Organizational Negotiations
MUS 320 ....3 credits
The Music Business Today

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the CERT/MGT

A Credit Bearing Certificate program is one that bears UOPX credits. Credit Bearing Certificate programs are developed and maintained by the Dean of each School.

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Applicants must have access to a suitable work environment for the completion of course assignments.

Certificate Completion Requirements for the CERT/MGT

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
  - Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
  - Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as: General Management (Undergraduate)

Residency Requirements and Course Waivers for the CERT/MGT

- Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 15 credits in the Required Course of Study, must be completed at University of Phoenix.
- Students in this program may waive a maximum of 3 credits from their required course of study.
- In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous credit bearing activity in transfer which meets the following criteria:
  - The activity must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university, or from an approved source of nontraditional transfer credit as listed in University transfer policy.
  - The activity must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better or comparable passing benchmark for nontraditional credits.

- The activity must be comparable in content and semester academic credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.
- Experiential Learning (essay) credit is not eligible to waive courses in the required course of study.
- Eligible students who have attended a SOC Member Institution and have successfully completed equivalent courses according to the SOC Transfer Tables may transfer all equivalent courses into a student's required course of study as a waiver if the courses meet the minimum grade and timeframe as stated in policy.
- The following course may not be waived: MGT 498

Re-entry for the CERT/MGT

With the exception of AAEE, BSED/E, BSLS, LVN/BSN, LPN/BSN, and BSN, students who have been out of attendance for a period of more than 365 days from the last date of positive recorded attendance in a program applicable course, and who have less than 24 credits from a combination of UOPX credits, previous college credits listed on the initial application for admission, and any additional college credits listed on the re-entry paperwork, are required to enroll in the First-Year Sequence upon re-entry.

Students who have been out of attendance for a period of more than 365 days from the last date of positive recorded attendance in a program applicable course, and who have 24 or more credits from a combination of UOPX credits, previous college credits listed on the initial application for admission, and any additional college credits listed on the re-entry paperwork, are not required to enroll in the First-Year Sequence upon re-entry.

Students who have been out of attendance for a period of more than 365 days from the last date of positive recorded attendance in a program applicable course, and who have 12 or more UOPX credits, and a total of 24 or more credits from a combination of UOPX credits, previous college credits listed on the initial application for admission, and any additional college credits listed on the re-entry paperwork will not be required to complete GEN 200 (or equivalent) upon re-entry.

Any student who has been out of attendance for more than 365 days from the last date of positive recorded attendance in a program applicable course is considered a re-entry student.

Re-entry students may re-enroll into their program version without appeal if the program version is still the most current in their state or jurisdiction.

Re-entry students whose program version is not the most current in their state or jurisdiction will be required to enroll into the most current version.

Select programs may have additional re-entry requirements/restrictions. Re-entry students should consult their Academic Advisor for guidance.

Project Management Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Southern California. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Please contact your enrollment representative for more information.

The Project Management concentration focuses on the professional success of its students. It emphasizes real-world application with assignments designed to apply the newfound skills and knowledge to the workplace. Practical study materials, team activities, and presentations to the class foster teamwork, critical thinking, self-confidence, and application of project technical and leadership skills on a real-time basis. This program is consistent with generally accepted project management principles, including the project management processes and knowledge areas that lead to professional certification.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-pm.

Required Course of Study for the CERT/PM

Courses requiring prerequisites are identified by a ~ symbol following the course number. Course descriptions for all courses are listed in the Course Guide section of the catalog (page B-1).

Re-entry students whose program version is not the most current in their state or jurisdiction will be required to enroll into the most current version.

Select programs may have additional re-entry requirements/restrictions. Re-entry students should consult their Academic Advisor for guidance.

CERTIFICATE PROGRAMS FOR THE SCHOOL OF HEALTH SERVICES ADMINISTRATION

Long Term Care Certificate Program

The following certificate program may be offered at these University of Phoenix campus locations: Southern California. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Please contact your enrollment representative for more information.

As the needs of the long-term care population evolve, there is a growing market for long-term care products and services. The long-term care certificate focuses on increasing the knowledge and skills essential to work with various populations across the life span that require long-term care. Courses focus on long-term care administration, health and wellness, legal issues and perspectives, programs and services, as well as alternative living environments for populations that require long-term care.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ltc.

Program Student Learning Outcomes

In addition to the knowledge and skills related to the University Learning Goals, School of Health Services Administration graduating students are intended to attain certain program-specific knowledge, skills and abilities. Therefore, you should be able to demonstrate the following learning outcomes by the time you complete this program.

- Learners will apply concepts of long-term care administration within the industry.
- Learners will analyze health and wellness concepts to address the needs of various Long Term Care populations.
- Learners will integrate ethical principles into all aspects of the Long Term Care industry.
- Learners will explain products and services to address the needs of various Long Term Care populations.

Required Course of Study for the LTC

Courses requiring prerequisites are identified by a ~ symbol following the course number. Course descriptions for all courses are listed in the Course Guide section of the catalog (page B-1).

GEN 200 .... 3 credits
Foundations for General Education and Professional Success

Long-term Care Administration
HCS 433 ~ .... 3 credits
Dimensions of Health and the Older Adult
LTC 315 ~.. 3 credits
Alternative Living Environments
LTC 328 ~.. 3 credits
Legal Perspectives in Aging
LTC 310 ~.. 3 credits
Social and Community Related Programs and Services

The University reserves the right to modify the required course of study.

General Information

This certificate program may be taken on its own or may be earned en-route to earning a bachelors degree. Students wishing to earn the certificate en-route must be enrolled in the corresponding "Certificate Track" bachelors program.

Students who completed a certificate in its entirety and who later choose to enroll in a bachelors program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track.

Additional Admission Requirements for the LTC

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Applicants must be currently employed or have access to a work environment.

Certificate Completion Requirements for the LTC

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
  - Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
  - Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- All students must complete the minimum number of credits required by their certificate program.
- The certificate awarded for this program will read as:
  Long Term Care

Residency Requirements and Course Waivers for the LTC

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous credit bearing activity in transfer which meets the following criteria:

- The activity must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university, or from an approved source of nontraditional transfer credit as listed in University transfer policy.

- The activity must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better or comparable passing benchmark for nontraditional credits.
- The activity must be comparable in content and semester academic credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Experiential Learning (essay) credit is not eligible to waive courses in the required course of study.

Eligible students who have attended a SOC Member Institution and have successfully completed equivalent courses according to the SOC Transfer Tables may transfer all equivalent courses into a student's required course of study as a waiver if the courses meet the minimum grade and timeframe as stated in policy. The following course in the Required Course of Study may not be waived: GEN 200

Re-entry for the LTC

With the exception of AAEE, BSED/E, BSLS, LVN/BSN, LPN/BSN, and BSN, students who have been out of attendance for a period of more than 365 days from the last date of positive recorded attendance in a program applicable course, and who have less than 24 credits from a combination of UOPX credits, previous college credits listed on the initial application for admission, and any additional college credits listed on the re-entry paperwork, are required to enroll in the First-Year Sequence upon re-entry.

Students who have been out of attendance for a period of more than 365 days from the last date of positive recorded attendance in a program applicable course, and who have 24 or more credits from a combination of UOPX credits, previous college credits listed on the initial application for admission, and any additional college credits listed on the re-entry paperwork, are not required to enroll in the First-Year Sequence upon re-entry.

Students who have been out of attendance for a period of more than 365 days from the last date of positive recorded attendance in a program applicable course, and who have 12 or more UOPX credits, and a total of 24 or more credits from a combination of UOPX credits, previous college credits listed on the initial application for admission, and any additional college credits listed on the re-entry paperwork will not be required to complete GEN 200 (or equivalent) upon re-entry.

Any student who has been out of attendance for more than 365 days from the last date of positive recorded attendance in a program applicable course is considered a re-entry student.

Re-entry students may re-enroll into their program version without appeal if the program version is still the most current in their state or jurisdiction.

Re-entry students whose program version is not the most current in their state or jurisdiction will be required to enroll into the most current version.

Select programs may have additional re-entry requirements/ restrictions. Re-entry students should consult their Academic Advisor for guidance.

Gerontology Health Care Certificate Program

The following certificate program may be offered at these University of Phoenix campus locations: Southern California. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Please contact your enrollment representative for more information.

This program is designed to provide health care professionals with diverse interdisciplinary backgrounds with the knowledge and process of aging. Content is designed to provide students with relevant information related to the physical, mental, and social aspects of gerontology as well as human services, economic and legal factors that influence elders.

With an emerging proportion of older adults in our society there is a growing market for aging services which are fueled by products and services for well elders as well as those elders compromised by chronic illnesses or disabilities. Career opportunities are increasing and are not limited to just long term care. Business, industry, community health, federal and local governments and professional organizations will look to include workers prepared to understand the needs of this population as a major consumer of their products and services.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/ghc.

Program Student Learning Outcomes

In addition to the knowledge and skills related to the University Learning Goals, School of Health Services Administration graduating students are intended to attain certain program-specific knowledge, skills and abilities. Therefore, you should be able to demonstrate the following learning outcomes by the time you complete this program.

- Learners will distinguish concepts foundational to gerontology that support the diverse health needs of older adults across the care continuum.
- Learners will appraise, from an administrative perspective, the resources available to older adults to determine these resources' efficacy in supporting the aging process.
- Learners will assess diverse gerontology-focused organizations to identify entrepreneurial/intrapreneurial opportunities to improve health outcomes of older adults.

Required Course of Study for the GHC

Courses requiring prerequisites are identified by a ~ symbol following the course number. Course descriptions for all courses are listed in the Course Guide section of the catalog (page B-1).

HCS 548 ....3 credits
Foundations of Gerontology
HCS 551 ~ ....3 credits
Biological and psychological Aspects of Aging
HCS 557 ~ ....3 credits
Social and Cultural Aspects of Aging
HCS 565 ~ ....3 credits
Organization and Management of Aging Services
The University reserves the right to modify the required course of study.

Additional Admission Requirements for the GHC

All applicants to this certificate program are expected to meet the following additional admission requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor's degree earned at a recognized foreign institution. If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- A cumulative grade point average (GPA) of 2.5 for all undergraduate coursework on the undergraduate degree posted transcript is required for admission.
- A minimum equivalent of one year full-time post- high school work experience.

Certificate Completion Requirements for the GHC

- Completion of a minimum of 12 credits.
- A minimum program grade point average (GPA) of 3.0.
  - Students earning the certificate en-route will only be placed on Academic Probation if their graduate program GPA falls below the minimum requirement.
  - Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as: Gerontology Health Care

Residency Requirements and Course Waivers for the GHC

Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 9 credits in the Required Course of Study, must be completed at UOPX.

Students in this program may waive a maximum of 3 credits from their required course of study.

In order to be granted a waiver for a course in the required course of study, the student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past ten (10) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Students completing this certificate en-route to the MHA/MBA Certificate Track program must appeal to the Student Appeals Center (SAC) to waive a certificate course that is required for their selected MHA/MBA concentration.

Re-entry for the GHC

Any student who has been out of attendance for more than 365 days from the last date of positive recorded attendance in a program applicable course is considered a re-entry student.

Re-entry students may re-enroll into their program version without appeal if the program version is still the most current in their state or jurisdiction.

Re-entry students whose program version is not the most current in their state or jurisdiction will be required to enroll into the most current version.

Select programs may have additional re-entry requirements/ restrictions. Re-entry students should consult their Academic Advisor for guidance.

Health Management Certificate Program

The following certificate program may be offered at these University of Phoenix campus locations: Southern California. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Please contact your enrollment representative for more information.

This certificate is designed to provide a framework in health care management concepts. The courses will provide perspectives related to health care delivery services, health care management and human resources, financial accounting concepts, as well as an introduction to the legal and regulatory aspects in health care.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/ programs/hm.

Program Student Learning Outcomes

In addition to the knowledge and skills related to the University Learning Goals, School of Health Services Administration graduating students are intended to attain certain program-specific knowledge, skills and abilities. Therefore, you should be able to demonstrate the following learning outcomes by the time you complete this program.

- Learners will apply basic management concepts and skills to a variety of health care settings.
- Learners will interpret regulatory and compliance requirements in a variety of health care settings.
- Learners will explain financial concepts and accounting principles in a variety health care settings.

The University reserves the right to modify the required course of study.

General Information

This certificate program may be taken on its own or may be earned en-route to earning a bachelors degree. Students wishing to earn the certificate en-route must be enrolled in the corresponding "Certificate Track" bachelors program.

Students who completed a certificate in its entirety and who later choose to enroll in a bachelors program with a concentration in the same area of focus as the completed certificate will not be required to enroll in the Certificate Track.

Additional Admission Requirements for the HM

All applicants are expected to meet the following admissions requirements:

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate, CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Applicants must be currently employed or have access to a work environment.

Certificate Completion Requirements for the HM

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
  - Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
  - Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- All students must complete the minimum number of credits required by their certificate program.
- The certificate awarded for this program will read as: Health Management

Residency Requirements and Course Waivers for the HM

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous credit bearing activity in transfer which meets the following criteria:

- The activity must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university, or from an approved source of nontraditional transfer credit as listed in University transfer policy.
- The activity must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better or comparable passing benchmark for nontraditional credits.
- The activity must be comparable in content and semester academic credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Experiential Learning (essay) credit is not eligible to waive courses in the required course of study.

Eligible students who have attended a SOC Member Institution and have successfully completed equivalent courses according to the SOC Transfer Tables may transfer all equivalent courses into a student's required course of study as a waiver if the courses meet the minimum grade and timeframe as stated in policy.

The following course in the Required Course of Study may not be waived: GEN 200

Re-entry for the HM

With the exception of AAEE, BSED/E, BSLS, LVN/BSN, LPN/BSN, and BSN, students who have been out of attendance for a period of more than 365 days from the last date of positive recorded attendance in a program applicable course, and who have less than 24 credits from a combination of UOPX credits, previous college credits listed on the initial application for admission, and any additional college credits listed on the re-entry paperwork, are required to enroll in the First-Year Sequence upon re-entry.

Students who have been out of attendance for a period of more than 365 days from the last date of positive recorded attendance in a program applicable course, and who have 24 or more credits from a combination of UOPX credits, previous college credits listed on the initial application for admission, and any additional college credits listed on the re-entry paperwork, are not required to enroll in the First-Year Sequence upon re-entry.

Students who have been out of attendance for a period of more than 365 days from the last date of positive recorded attendance in a program applicable course, and who have 12 or more UOPX credits, and a total of 24 or more credits from a combination of UOPX credits, previous college credits listed on the initial application for admission, and any additional college credits listed on the re-entry paperwork will not be required to complete GEN 200 (or equivalent) upon re-entry.

Any student who has been out of attendance for more than 365 days from the last date of positive recorded attendance in a program applicable course is considered a re-entry student.

Re-entry students may re-enroll into their program version without appeal if the program version is still the most current in their state or jurisdiction.

Re-entry students whose program version is not the most current in their state or jurisdiction will be required to enroll into the most current version.

Select programs may have additional re-entry requirements/ restrictions. Re-entry students should consult their Academic Advisor for guidance.

CERTIFICATE PROGRAMS FOR THE SCHOOL OF NURSING

....

Academic Progression Requirements for all Current Nursing Programs (excluding BSN/I)

....

Any student who demonstrates behaviors in a clinical, classroom, or laboratory setting that gives rise to a reasonable suspicion, of substance abuse or otherwise indicates that the student may be impaired by drugs or alcohol, without reasonable justification will be required to undergo a "for-cause" 15 panel, plus alcohol drug test.

Post Master's Certificate in Nurse Administration

....

The following certificate program may be offered at these University of Phoenix campus locations: Southern California. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Please contact your enrollment representative for more information.

....

The Nursing Certificate programs enhance the knowledge and skills of registered nurses with graduate-level nursing degree preparation. The program prepares registered nurses to function in leadership roles in administration, practice, and educational set- tings. Advanced nursing theory and research provide the founda- tion for nurses to influence the future of nursing and health care. Students complete courses in advanced nursing content, process, and leadership. Concentrations in nursing psychiatric-mental health, family nurse practitioner, nursing informatics, nursing administration and nursing education allow students to concen- trate on developing increased knowledge and skills in a specific area of content.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/ programs/cert-nad.

Program Purpose

This certificate program is designed for nurses with current RN licensure who desire a concentrated course of study in nursing administration. The course of study prepares nurses to function in leadership roles in nursing administration. Upon completion of the certificate program, nurses with a graduate degree in nursing and the required practice experience may be eligible to sit for the American Nurses Credentialing Center (ANCC) Nurse Executive – Board Certified (NE-BC) exam. For complete eligibility requirements, reference the complete NE-BC criteria (www.nursecredentialing.org).

CERT/NAD Required Course of Study

Courses requiring prerequisites are identified by a ~ symbol following the course number. Course descriptions for all courses are listed in the Course Guide section of the catalog (page B-1). Required Course of Study courses must be completed in the order recommended by the University.

NSG 557 .... 3 credits
Organizational Dynamics and Systems Thinking
NSG 577 .... 3 credits
Continuous Quality Monitoring and Outcomes Improvement
NSG 547 .... 3 credits
Human Resources Management
NSG 567 .... 3 credits
Financial Resources Management in Health Care
NSG 516AD ~... 3 credits
Practicum I
NSG 517AD ~... 3 credits
Practicum II

The University reserves the right to modify the required course of study.

Additional Admission Requirements for the CERT/NAD

All applicants are expected to meet the following admissions requirements:

* A master's degree in nursing (MSN or MN) or doctoral degree in nursing from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution. If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.

* A cumulative grade point average (GPA) of 3.0 for all graduate or doctoral coursework on the graduate or doctoral degree posted transcript is required for admission.

* Applicants who reside in the United States or in one of the US Territories with documentation of a valid, unrestricted / unencumbered RN license in all states in which the applicant holds an active nursing license. For applicants holding licenses in multiple jurisdictions, all active licenses must be valid, unrestricted / unencumbered through the duration of the program. Applicants from the following territories must also hold a RN license obtained by taking the NCLEX-RN exam. Students must provide documentation showing successful completion of the US NCLEX-RN exam:
  * Guam
  * American Samoa
  * Northern Mariana Islands
  * US Virgin Islands
  * Puerto Rico

* International students who are residents outside of the United States or approved US Territories must meet the following requirements:

- Completion of a nursing diploma, associates degree in nursing, or foreign equivalent program.
- All students, with the exception of students residing in Canada or Puerto Rico, will be required to validate their International Nursing License equivalency by CGFNS (Commission on Graduates of Foreign Nursing Schools) or ICD (International Consultants of Delaware) for RN equivalency.
- All Canadian students must complete the Canadian RN License Verification Form and submit documentation of a valid, unrestricted, unencumbered RN license.
- Applicants who reside in Canada must meet one of the following requirements for admission:
  - -Be a legal resident of Canada
  - -Be a landed immigrant
  - -Have a valid visa that does not prohibit educational studies
- A signed Foreign Nursing Memorandum of Understanding
- Signed Criminal Background Check Disclosure
- Signed Acknowledgement of Criminal Conviction Prohibition for Placement and Licensure
- Signed FERPA Release/Drug Test or Failure to Test Results
- Signed Clinical Assurance Statement form

Certificate Completion Requirements for the CERT/NAD
- Completion of a minimum of 18 credits.
- A minimum program grade point average (GPA) of 3.0.
- The certificate awarded for this program will read as: Post Master's Nurse Administration

Academic Progression Requirements for the CERT/NAD
- A minimum grade of C or better in all courses.
- Students must hold a valid, unrestricted / unencumbered RN license in all states in which the applicant holds an active nursing license. For students holding licenses in multiple jurisdictions, all active licenses must be valid, unrestricted / unencumbered through the duration of the program.
- Clinical experiences/hours cannot be completed during work time at the student's place of employment.
- Any student who demonstrates behaviors in a clinical, classroom, or laboratory setting that gives rise to a reasonable suspicion, of substance abuse or otherwise indicates that the student may be impaired by drugs or alcohol, without reasonable justification will be required to undergo a "for-cause" 15 panel, plus alcohol drug test.

Minimum Grade Requirements for the CERT/NAD
- Students in this program are required to achieve a minimum grade of "C" (2.0) in all courses. A "C-" grade is not acceptable. Students who fail to receive a minimum grade of "C" in any of the courses will be scholastically disqualified from the University.
- Students cannot repeat more than one nursing or clinical course. Students who fail to achieve the minimum grade requirement on a second course will be scholastically suspended, permanently withdrawn, from the certificate program.

- Students who have been scholastically disqualified will not be allowed to continue in their degree program until they have taken the following steps:
  - Met with the Campus College Chair, an assigned nursing faculty member, or designee to discuss the non-passing grade and resolve any concerns moving forward.
  - Completion of the academic progression student agreement form, signed by the student and returned to Campus College Chair, or designee.
  - Retake of the course which placed them on scholastic disqualification and satisfy the grade requirement
- Re-Admission is granted when the student satisfactorily fulfills the outlined requirements to remove the scholastic disqualification. Once the grade minimum has been satisfied, the student may then proceed sequentially through the program.

Residency Requirements and Course Waivers for the CERT/NAD
- Students must meet established University residency requirement for degree conferral. The University requires that 18 credits in the Required Course of Study must be completed at University of Phoenix.
- The courses in this program cannot be waived.

Re-entry for the CERT/NAD
- Any student who has been out of attendance for more than 365 days from the last date of positive recorded attendance in a program applicable course is considered a re-entry student to this program.
- Re-entry students may re-enroll into their program version if the program version is still the most current in their state or jurisdiction.
- Re-entry students whose program version is not the most current in their state or jurisdiction will be required to enroll into the most current version.
- An appeal will be required for re-entry students to re-enroll in their program if:
  - The student is requesting to return after being administratively withdrawn due to one of the following student academic statuses: academic disqualification (AD), scholastic suspension (SS), or scholastic disqualification (SD).
  - The student's program version is still the most current offered in their state or jurisdiction but they are unable to complete the remaining program requirements within the original program completion deadline.
  - The student wishes to return to a prior program version and the student can complete their remaining requirements within the original program completion deadline.
- Re-entry students will be required to submit an admissions application as well as all forms and documents required for readmission to the program at the time of re-entry.

Post Master's Certificate in Nurse Education

The following certificate program may be offered at these University of Phoenix campus locations: Southern California. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Please contact your enrollment representative for more information.

The Nursing Certificate programs enhance the knowledge and skills of registered nurses with graduate-level nursing degree preparation. The program prepares registered nurses to function in leadership roles in administration, practice, and educational settings. Advanced nursing theory and research provide the foundation for nurses to influence the future of nursing and health care. Students complete courses in advanced nursing content, process, and leadership. Concentrations in nursing psychiatric-mental health, family nurse practitioner, nursing informatics, nursing administration and nursing education allow students to concentrate on developing increased knowledge and skills in a specific area of content.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-ned.

Program Purpose

This certificate program is designed for nurses with current RN licensure who desire a concentrated course of study in nursing education. The course of study prepares nurses for roles within nurse education in a variety of educational and practice settings. Upon completion of the certificate, nurses with graduate degrees (or higher) and designated teaching experience may be eligible to sit for the National League of Nursing (NLN) Certified Nurse Educator (CNE) exam. For complete eligibility requirements, reference the complete NLN CNE criteria (www.nln.org).

CERT/NED Required Course of Study

Courses requiring prerequisites are identified by a ~ symbol following the course number. Course descriptions for all courses are listed in the Course Guide section of the catalog (page B-1).

Required Course of Study courses must be completed in the order recommended by the University.

NSG 531 .... 3 credits
Program and Course Development

- The courses in this program cannot be waived.

Re-entry for the CERT/NED
- Any student who has been out of attendance for more than 365 days from the last date of positive recorded attendance in a program applicable course is considered a re-entry student to this program.
- Re-entry students may re-enroll into their program version if the program version is still the most current in their state or jurisdiction.
- Re-entry students whose program version is not the most current in their state or jurisdiction will be required to enroll into the most current version.
- An appeal will be required for re-entry students to re-enroll in their program if:
  - The student is requesting to return after being administratively withdrawn due to one of the following student academic statuses: academic disqualification (AD), scholastic suspension (SS), or scholastic disqualification (SD).
  - The student's program version is still the most current offered in their state or jurisdiction but they are unable to complete the remaining program requirements within the original program completion deadline.
  - The student wishes to return to a prior program version and the student can complete their remaining requirements within the original program completion deadline.
- Re-entry students will be required to submit an admissions application as well as all forms and documents required for readmission to the program at the time of re-entry.

Post Master's Certificate/Family Nurse Practitioner

The following certificate program may be offered at these University of Phoenix campus locations: Southern California. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states.

The Family Nurse Practitioner Post Master's Certificate is designed to develop and enhance the knowledge and skills of registered nurses. It is also designed for those nurses who want to pursue more advanced positions in today's challenging health care environment. The program blends nursing theory with advanced practice concepts necessary to successfully work within the structure, culture, and mission of any size health care organization or educational setting. This program allows a Masters of Nursing prepared nurse to complete a nurse practitioner program and apply for state licensure.

The Family Nurse Practitioner Post Master's certificate curriculum consists of 41 credits.

The course sequence will be completed in the order determined by the University. The University reserves the right to modify the curriculum as necessary.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/fnp.

Additional Admission Requirements for the FNP

All applicants are expected to meet the following admissions requirements:

- A graduate degree in nursing (MSN or MN) from a regionally or approved nationally accredited, or candidate for accreditation, college or university or equivalent graduate degree earned at a recognized foreign institution. If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.

- A cumulative grade point average (GPA) of 3.0 on the graduate degree posted transcript is required for admission.
- Current employment is not a requirement for admission.
- FNP Program Manager's signature on the applicant's Program Eligibility Verification letter, transcripts, and resume. Evidence that these requirements have been met must be uploaded to the student's eXp file along with the Program Eligibility Verification letter.
  - Equivalent grade of "B-" or better in undergraduate core science courses. Core science courses include: Chemistry, Biology, Anatomy and Physiology, Pharmacology, Pathophysiology and Microbiology.
  - A minimum of three years of full-time post high school work experience within the past ten years of which two years must be in clinical based RN experience. At least one-year experience (from the two years clinical based RN experience), in the following nursing areas: medical-surgical, Intensive Care Units (ICU), step-down units, flight nurse, or Emergency Room (ER), or comparable experiences. The remaining year can be fulfilled with health care experience.
- Applicants must reside in the continental United States or in one of the US Territories with documentation of a valid, unrestricted/unencumbered RN license in all states in which the applicant holds an active nursing license. For applicants holding licenses in multiple jurisdictions, all active licenses must be valid, unrestricted/unencumbered through the duration of the program. Applicants from the following territories must also hold a RN license obtained by taking the NCLEX-RN exam:
  - Guam
  - American Samoa
  - Northern Mariana Islands
  - US Virgin Islands

Note: Nurses with a Puerto Rico License must obtain US licensure for admission.

- A signed Professional Non-Academic Requirement form.
- Signed Criminal Background Check Disclosure
- Signed Acknowledgement of Criminal Conviction Prohibition for Placement and Licensure
- Signed FERPA Release/Drug Test or Failure to Test Results
- Enrollment Agreements signed 7/1/2016 or later, signed Clinical Assurance Statement form

Additional Academic Progression Requirements for the FNP

- Students in the FNP certificate program are required to earn a minimum grade of "B" in all nurse practitioner courses.
- Students in this program are limited to a maximum of two attempts to complete all courses with a passing grade.
- Prior to beginning the clinical courses, a student must have successfully completed the following courses: NRP 505, HCS 507, NRP 516, and HCS 510

- Courses with a clinical component are sequenced to provide the student with foundational information and skills expanding to management of complex health issues and may not be taken concurrently with any other course. The student will work with a preceptor during the clinical experiences. The clinical courses are the following: NRP 516, NRP 540, NRP 545A, NRP 545B, NRP 552 and NRP 560.
- Following completion of the clinical courses NRP 516, NRP 540, NRP 545A, NRP 545B, NRP 552 and NRP 560, students may progress to NRP 566 Preceptorship.
- All students must have the following documentation current and in effect by the end of HCS 510 Advanced Pathophysiology and throughout the remainder of the Required Course of Study:
  - Documentation of current medical information including a Hepatitis B immunization or titer (or signed University of Phoenix declination form), negative TB skin test or University of Phoenix TB symptom survey questionnaire, and immunization against measles and Rubella (MMR/MR) and Tetanus/Diphtheria (TD).
  - Current Basic Cardiac Life Support certification (BCLS).
  - Completed and verified negative criminal background check.
  - Practice lab participation release form.
- Students must hold a valid, unrestricted / unencumbered RN license in all states in which the applicant holds an active nursing license. For students holding licenses in multiple jurisdictions, all active licenses must be valid, unrestricted / unencumbered through the duration of the program.

Minimum Grade Requirements for the FNP

- Students in the FNP certificate program are required to earn a minimum grade of "B" in all nurse practitioner courses. A student receiving a grade that does not meet this academic standard will be scholastically disqualified and will not be allowed to continue in the program until the course has been successfully repeated. Students are allowed one attempt to repeat only one (1) nursing practitioner course. The student will not be permitted to continue in the program unless an additional attempt is approved by the School of Nursing through the submission of a student appeal. Students may only repeat one class which caused them to be placed on Scholastic Disqualification one time. These courses include: HCS 507, HCS 510, NRP 505, NRP 516, NRP 540, NRP 545A, NRP 545B, NRP 552, NRP 560, NRP 566, NUR 550
- Students who have been scholastically disqualified will not be allowed to continue in their degree program until they have taken the following steps:
  - Met with the Campus College Chair, an assigned nursing faculty member, or designee to discuss the non-passing grade and resolve any concerns moving forward.
  - Completion of the academic progression student agreement form, signed by the student and returned to Campus College Chair, or designee.
  - Retake of the course which placed them on scholastic disqualification and satisfy the grade requirement

- Re-Admission is granted when the student satisfactorily fulfills the outlined requirements to remove the scholastic disqualification. Once the grade minimum has been satisfied, the student may then proceed sequentially through the program.

Certificate Requirements for the FNP

- A minimum of 41 graduate credits.
- A minimum program grade point average (GPA) of 3.0.
- Satisfactory completion of the Nurse Practitioner Preceptorship and all required clinical hours.
- The certificate awarded for this program will read as: Family Nurse Practitioner

Residency Requirements and Course Waivers for the FNP

Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 26 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 15 credits from the Required Course of Study based upon review of previous nurse practitioner coursework or equivalent by the Dean of Nursing via the Student Appeals Center (SAC).

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university.
- The course must have been completed within the past five (5) years from current program enrollment agreement sign date with a grade of "B" (3.0) or better.
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

The following courses in the Required Course of Study may not be waived: HCS 504, NRP 566

Re-entry for the FNP

Any student who has been out of attendance for more than 365 days from the last date of positive recorded attendance in a program applicable course is considered a re-entry student to this program.

Re-entry students may re-enroll into their program version if the program version is still the most current in their state or jurisdiction.

Re-entry students whose program version is not the most current in their state or jurisdiction will be required to enroll into the most current version.

An appeal will be required for re-entry students to re-enroll in their program if:

- The student is requesting to return after being administratively withdrawn due to one of the following student academic statuses: academic disqualification (AD), scholastic suspension (SS), or scholastic disqualification (SD).

- The student's program version is still the most current offered in their state or jurisdiction but they are unable to complete the remaining program requirements within the original program completion deadline.
- The student wishes to return to a prior program version and the student can complete their remaining requirements within the original program completion deadline.

Re-entry students will be required to submit an admissions application as well as all forms and documents required for readmission to the program at the time of re-entry.

CERTIFICATE PROGRAMS FOR THE COLLEGE OF INFORMATION SYSTEMS AND TECHNOLOGY

Advanced Software Developer Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Southern California. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Please contact your enrollment representative for more information. This certificate is only available as an en-route credential to the Bachelor of Science in Information Technology and must be completed via the Online modality.

The Advanced Software Developer Certificate concentrates on principles of software application development. This certificate explores modern software development though the use of multiple modern application programming languages as well as mobile programming and software architecture principles. This program helps preparation for industry certifications such as the C++ Certified Professional Programmer, Oracle Certified Professional JAVA SE Associate and Professional Programmer (OCP) and Microsoft C# and VB certifications.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-asd.

Program Student Learning Outcomes

In addition to the knowledge and skills related to the University Learning Goals, College of Information Systems and Technology graduating students are intended to attain certain program-specific knowledge, skills and abilities. Therefore, you should be able to demonstrate the following learning outcomes by the time you complete this program.

- Students will be able to explain and apply fundamentals of software application development.
- Students will be able to apply concepts learned toward industry certifications.

Program Category Requirements and Prerequisites for the CERT/ASD

Courses requiring prerequisites are identified by a ~ symbol following the course number. Course descriptions for all courses are listed in the Course Guide section of the catalog (page B-1).

Software Developer, 18 total credits

BSA 385 .... 3 credits
Intro to Software Engineering

CSS 422 .... 3 credits
Software Architecture
POS 408 .... 3 credits
.NET I
POS 409 .... 3 credits
.NET II
PRG 410 .... 3 credits
C++ Programming I
PRG 420 .... 3 credits
Java Programming I
PRG 421 ~ .... 3 credits
Java Programming II

The University reserves the right to modify the required course of study.

General Information for the CERT/ASD

This certificate program may be taken on its own or may be earned en-route to earning a degree.

Additional Admission Requirements for the CERT/ASD

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Signed Hardware/Software Agreement

Certificate Completion Requirements for the CERT/ASD

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
  - Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
  - Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as: Advanced Software Developer (Undergraduate)

Residency Requirements and Course Waivers for the CERT/ASD

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous credit bearing activity in transfer which meets the following criteria:

- The activity must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university, or from an approved source of nontraditional transfer credit as listed in University transfer policy.
- The activity must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better or comparable passing benchmark for nontraditional credits.
- The activity must be comparable in content and semester academic credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to six (6) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements).This policy also applies to upper division courses which are used to fulfill certificate degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

Experiential Learning (essay) credit is not eligible to waive courses in the required course of study.

Eligible students who have attended a SOC Member Institution and have successfully completed equivalent courses according to the SOC Transfer Tables may transfer all equivalent courses into a student's required course of study as a waiver if the courses meet the minimum grade and timeframe as stated in policy.

Re-entry for the CERT/ASD

Any student who has been out of attendance for more than 365 days from the last date of positive recorded attendance in a program applicable course is considered a re-entry student.

Re-entry students may re-enroll into their program version without appeal if the program version is still the most current in their state or jurisdiction.

Re-entry students whose program version is not the most current in their state or jurisdiction will be required to enroll into the most current version.

Select programs may have additional re-entry requirements/restrictions. Re-entry students should consult their Academic Advisor for guidance.

Advanced Networking Certificate (Undergraduate)

The following certificate program may be offered at these University of Phoenix campus locations: Southern California. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Please contact your enrollment representative for more information. This certificate is only available as an en-route credential to the Bachelor of Science in Information Technology and must be completed via the Online modality.

The Advanced Networking Certificate is designed to provide complete coverage of networking topics including the OSI model, network topologies, network protocols, network operating systems, as well as network architecture, network design and management. Comprehensive coverage of local area, wide area, and wireless networks including performance and service levels are addressed in this concentration. This certificate also provides an exposure to network modeling and measuring of network performance.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-an.

Program Student Learning Outcomes

In addition to the knowledge and skills related to the University Learning Goals, College of Information Systems and Technology graduating students are intended to attain certain program-specific knowledge, skills and abilities. Therefore, you should be able to demonstrate the following learning outcomes by the time you complete this program.

- Students will be able to apply fundamentals of networking.
- Students will be able to design and administer Windows Server infrastructure.

Program Category Requirements for the CERT/AN

Courses requiring prerequisites are identified by a ~ symbol following the course number. Course descriptions for all courses are listed in the Course Guide section of the catalog (page B-1).

Networking, 18 total credits

NTC 320 ....3 credits
Network Design Associate
NTC 324..3 credits
Windows Server Configuration
NTC 326..3 credits
Administering Windows Server
NTC 328..3 credits
Advanced Windows Services

NTC 362 .... 3 credits

NTC 409 .... 3 credits
Global Network Architecture and Design
POS 433 .... 3 credits
UNIX Networking
NTC 340 ~ .... 3 credits
Desktop Virtualization
NTC 345 ~ .... 3 credits
Cloud Virtualization
NTC 350 .... 3 credits
Data Center Virtualization
NTC 412 ~ .... 3 credits
Data Center Virtualization Administration
NTC 414 ~ .... 3 credits
Data Center Virtualization Design
NTC 300 .... 3 credits
Cloud Technologies
NTC 302 .... 3 credits
Network Web Services

The University reserves the right to modify the required course of study.

General Information for the CERT/AN

This certificate program may be taken on its own or may be earned en-route to earning a degree.

Additional Admission Requirements for the CERT/AN

- High school graduation from an institution that holds state approval to confer high school diplomas or are accredited or a candidate for accreditation at the time the student attended by an acceptable accrediting body, GED certificate or CHSPE (California High School Proficiency Examination) certificate, or completion of the HiSET examination with a passing score.
- Signed Hardware/Software Agreement

Certificate Completion Requirements for the CERT/AN

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 2.0.
  - Students earning the certificate en-route will only be placed on Academic Probation if their bachelor program GPA falls below the minimum requirement.
  - Students earning this certificate en-route to completion of a degree program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as: Advanced Networking (Undergraduate)

Residency Requirements and Course Waivers for the CERT/AN

Students must meet established University residency requirement for certificate conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study.

In order to be granted a waiver with credit for a course in the Required Course of Study, a student must have completed a previous credit bearing activity in transfer which meets the following criteria:

- The activity must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university or from an approved source of nontraditional transfer credit as listed in University transfer policy.
- The activity must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "C" (2.0) or better or comparable passing benchmark for nontraditional credits.
- The activity must be comparable in content and semester academic credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Through an approved articulation agreement, students who have successfully completed equivalent courses may waive, without credits, up to six (6) credits of the Required Course of Study. Students must substitute other upper division coursework to satisfy the upper division credit requirement of their degree program (each program has specific substitution requirements).This policy also applies to upper division courses which are used to fulfill certificate degree requirements. In order to be granted a waiver, without credit, for a course in the Required Course of Study, a student must have completed a previous course which meets the following criteria:

- The course must have been completed and transcripted from a regionally or nationally accredited institution with which the University of Phoenix has an approved articulation agreement.
- The course must have been completed with a grade of "C" (2.0) or better during the effective dates of the approved articulation agreement.
- The course must be approved through the articulation agreement and must be comparable in content and credits to the University course it is replacing.

Experiential Learning (essay) credit is not eligible to waive courses in the required course of study.

Eligible students who have attended a SOC Member Institution and have successfully completed equivalent courses according to the SOC Transfer Tables may transfer all equivalent courses into a student's required course of study as a waiver if the courses meet the minimum grade and timeframe as stated in policy.

Re-entry for the CERT/AN

Any student who has been out of attendance for more than 365 days from the last date of positive recorded attendance in a program applicable course is considered a re-entry student.

Re-entry students may re-enroll into their program version without appeal if the program version is still the most current in their state or jurisdiction.

Re-entry students whose program version is not the most current in their state or jurisdiction will be required to enroll into the most current version.

Select programs may have additional re-entry requirements/restrictions. Re-entry students should consult their Academic Advisor for guidance.

Graduate Cyber Security Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Southern California. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Please contact your enrollment advisor for more information.This certificate is only available as an en-route credential to the Bachelor of Science in Information Technology and must be completed via the Online modality.

The Graduate Cyber Security certificate will examine a number of methodologies and tools important to the discipline such as Information Systems Concepts; Financial Accounting; IS Auditing Processes; IT Governance and Management; Acquisition, Development, and Support of IS, and Information Assets Protection. Courses in this certificate can be used to help prepare for ISACA industry certifications.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-g-cs.

Program Category Requirements for the CERT/G-CS

Courses requiring prerequisites are identified by a ~ symbol following the course number. Course descriptions for all courses are listed in the Course Guide section of the catalog (page B-1).

Cyber Security, 18 total credits

Select Eighteen (18) Credits

ACC 537 ....3 credits
Financial Accounting
BSA 505..3 credits
IS Auditing Processes
BSA 510..3 credits
IT Governance and Management
BSA 515..3 credits
Acquisition, Development and Implementation of IS
BSA 520..3 credits
Operations, Maintenance and Support of IS
BSA 525..3 credits
Information Assets Protection
CIS 568..3 credits
Information Systems Concepts

The University reserves the right to modify the required course of study.

General Information for the CERT/G-CS

This certificate program may be taken on its own or may be earned en-route to earning a graduate degree.

Additional Admission Requirements for the CERT/G-CS

All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor's degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- Applicants must have access to a suitable work environment for the completion of course assignments.
- A cumulative grade point average (GPA) of 2.5 for all undergraduate coursework on the undergraduate degree posted transcript is required for admission.
- Signed Hardware/Software Agreement

Certificate Completion Requirements for the CERT/G-CS

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 3.0.
  - Students earning the certificate en-route will only be placed on Academic Probation if their graduate program GPA falls below the minimum requirement.
  - Students earning this certificate en-route to completion of a graduate program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as: Graduate Cyber Security

Residency Requirements and Course Waivers for the CERT/G-CS

Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study.

In order to waive a course in the required course of study, the student must have completed a previous course that meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university;
- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "B" (3.0) or better;
- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Re-entry for the CERT/G-CS

Any student who has been out of attendance for more than 365 days from the last date of positive recorded attendance in a program applicable course is considered a re-entry student.

Re-entry students may re-enroll into their program version without appeal if the program version is still the most current in their state or jurisdiction.

Re-entry students whose program version is not the most current in their state or jurisdiction will be required to enroll into the most current version.

Select programs may have additional re-entry requirements/ restrictions. Re-entry students should consult their Academic Advisor for guidance.

Graduate Business Analytics Certificate

The following certificate program may be offered at these University of Phoenix campus locations: Southern California. The availability of programs and concentrations depend on student demand and other factors. Not all programs may be available to all residents of all states. Please contact your enrollment representative for more information. This certificate is only available as an en-route credential to the Master of Information Systems and must be completed via the Online modality.

The Graduate Business Analytics Certificate is designed to provide specific theories, competencies, and skills necessary for success in the field of Business Analytics. This certificate will examine a number of methodologies and tools important to the discipline such as Information Systems Concepts, Database Management, Statistics, IT Architecture, Data Relationship Management, Customer Relationship Management, Analytic Programming and Statistical Business Analytics. Courses in this certificate can be used to help prepare for Oracle and SAS industry certifications.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.phoenix.edu/programs/cert-g-ba

Program Student Learning Outcomes

In addition to the knowledge and skills related to the University Learning Goals, College of Information Systems and Technology graduating students are intended to attain certain program-specific knowledge, skills and abilities. Therefore, you should be able to demonstrate the following learning outcomes by the time you complete this program.

- Students will be able to develop and plan for the maintenance of databases for storage of business data and use in business analytics.
- Students will be able to retrieve and analyze data using appropriate statistical operations for use in decision making within an organization.

Required Course of Study for the CERT/G-BA

Courses requiring prerequisites are identified by a ~ symbol following the course number. Course descriptions for all courses are listed in the Course Guide section of the catalog (page B-1).

Students must select 18 credits from the following course selections:

BSA 530 .... 3 credits
IT Architecture
BSA 540 .... 3 credits
Data Relationship Management
BSA 550 .... 3 credits
Customer Relationship Management
BSA 570 .... 3 credits
Analytic Programming
BSA 580 .... 3 credits
Statistical Business Analytics
CIS 568 .... 3 credits
Information Systems Concepts
DBM 502 .... 3 credits
Database Management
MTH 540 .... 3 credits
Statistics

The University reserves the right to modify the required course of study.

General Information for the CERT/G-BA

This certificate program may be taken on its own or may be earned en-route to earning a graduate degree.

Additional Admission Requirements for the CERT/G-BA

All applicants are expected to meet the following admissions requirements:

- An undergraduate degree from a regionally or approved nationally accredited, or candidate for accreditation, college or university or comparable undergraduate bachelor's degree earned at a recognized foreign institution or a graduate degree from an ABA accredited institution (i.e- JD, LLB, LLM). If the institution became accredited while the student was attending, a minimum of 75% of the coursework taken toward the degree must have been completed while the institution was accredited or during the candidacy period.
- Applicants must have access to a suitable work environment for the completion of course assignments.
- A cumulative grade point average (GPA) of 2.5 for all undergraduate coursework on the undergraduate degree posted transcript is required for admission.
- Signed Hardware/Software Agreement

Certificate Completion Requirements for the CERT/G-BA

- Completion of a minimum of 18 credits.
- A minimum grade point average (GPA) of 3.0.
  - Students earning the certificate en-route will only be placed on Academic Probation if their graduate program GPA falls below the minimum requirement.
  - Students earning this certificate en-route to completion of a graduate program must meet the minimum GPA requirement at the conclusion of all required coursework for the certificate to be eligible for certificate conferral.
- The certificate awarded for this program will read as: Graduate Business Analytics

Residency Requirements and Course Waivers for the CERT/G-BA

Students must meet established University residency requirement for degree conferral. The University requires that the majority of coursework, 12 credits in the Required Course of Study, must be completed at University of Phoenix.

Students in this program may waive a maximum of 6 credits from their required course of study.

In order to waive a course in the required course of study, the student must have completed a previous course that meets the following criteria:

- The course must have been completed at a regionally or approved nationally accredited, or candidate for accreditation, college or university;

- The course must have been completed within the past ten (10) years (5 years for IS&T courses) from current program enrollment agreement sign date with a grade of "B" (3.0) or better,

- The course must be comparable in content and credits to the University course it is replacing and must be an equivalent level or higher level course (i.e. graduate level coursework may be used to waive graduate or undergraduate coursework). Course descriptions must be included with the course waiver form in order for the Office of Admissions and Evaluation to review the course waiver request.

Re-entry for the CERT/G-BA

Any student who has been out of attendance for more than 365 days from the last date of positive recorded attendance in a program applicable course is considered a re-entry student.

Re-entry students may re-enroll into their program version without appeal if the program version is still the most current in their state or jurisdiction.

Re-entry students whose program version is not the most current in their state or jurisdiction will be required to enroll into the most current version.

Select programs may have additional re-entry requirements/restrictions. Re-entry students should consult their Academic Advisor for guidance.

Certificate Awards

Upon completion of all courses in a certificate program and submission of the Request for Certificate form, a certificate of completion and a certificate posted transcript will be processed.

Accreditation and Affiliations

The following agencies have supported the development of the certificate program that relates to their specific field:

- The Society for Human Resource Management (SHRM)

- Project Management Institute (PMI), Globally Registered Education Provider (R.E.P)

- Call Center Industry Advisory Council (CIAC)

....
TUITION AND FEES - GROUND CLASSROOM RATES
....

Tuition and fees are listed in the price tables in the ensuing pages. Tuition charged can vary based on whether a student is considered "new" or "continuing" for purposes of tuition and fees.

NEW STUDENTS

New Students enrolled on or after 1/17/2018, who meet one of the following criteria as of 1/17/2018, will be charged the rates listed in the "Standard Tuition Cost Per Credit' column of the table below, and students in this category will be given a guarantee of these tuition rates until their program completion deadline, unless they change programs or program versions: 1) individuals enrolling at University of Phoenix who do not have any positive attendance in any degree or credit-bearing certificate program course at the University, 2) University of Phoenix students who have graduated (degree/certificate conferred) from a University of Phoenix degree or credit-bearing certificate (not an en-route certificate) and are enrolling in a new program, and have not attempted any other program, with positive attendance (i.e. "Y" posted), since graduating from the previous program, 3) students returning to a University of Phoenix program after having no positive attendance ("Y" posted) in any degree or credit-bearing-certificate program course for longer than 365 days from the last positive attendance ("Y" posted), 4) University of Phoenix students who are changing from a bachelor or master degree program (from which they have not graduated) to another program at a higher degree level (e.g., bachelor to master, master to doctoral), or 5) University of Phoenix students who met any of the preceding New Student criteria on or after 1/17/2018, who subsequently change from a program (from which they have not graduated) to another program at any level, and who have at least one recorded positive attendance ("Y" posted) within 365 days of the last recorded positive attendance ("Y" posted).

Tuition

Program/Offering Type	Standard Tuition Cost Per Credit	Military Cost Per Credit	Alumni Cost Per Credit	Associate Transfer Cost Per Credit
Bachelor Degree Programs	$398.00	$250.00	$350.00	$350.00
Master Degree Programs (except MSC, MSN, and MAED - see below)	$698.00	$475.00	N/A	N/A
MSC programs (only applicable to New Students enrolled on or after 1/17/2018).	$698.00	$465.00	N/A	N/A
MSN programs	$540.00	$475.00	N/A	N/A
MAED programs	$540.00	$390.00	N/A	N/A
Undergraduate Certificate Programs	$398.00	$250.00	$350.00	N/A
Graduate Certificate Programs (except the programs below)	$698.00	$475.00	N/A	N/A
All School of Nursing Graduate Certificate Programs	$540.00	$475.00	N/A	N/A
ASC Program	$540.00	$390.00	N/A	N/A
CERT/CTEL Program	$175.00	$175.00	N/A	N/A
Non-Degree Single Courses (Undergraduate Level)	$398.00	$250.00	$350.00	N/A

CONTINUING STUDENTS

All Continuing Students as of 2/16/2018, (who meet one of the criteria 1-4 listed below) will be charged the same tuition rates listed in the table **ABOVE** and will be given a guarantee of these tuition rates until their program completion deadline, unless they change programs or program versions, EXCEPT those continuing students who fall into any of the following exception categories:

a) Continuing Students who have chosen to opt out of the "Continuing Students Effective 2/16/2018" tuition rates ¤

b) Continuing Students who are actively receiving and part of any of the following tuition reduction agreements, that were entered into prior to 1/17/2018, and who have chosen to remain with their tuition agreement rate: the Phoenix Scholarship Rewards Program (PSRP), the Phoenix Academic Achievers Scholarship (PAAS), the PAAS for MBA, the Advancing Nurse Leadership Scholarship, the Non Degree Alumni Discount, and/or employer tuition reductions ¤

c) Continuing Students who are participating in the Near Graduation Tuition Reduction program ¤

d) Continuing Students in any MSC program ¤

All Continuing Students must meet one of the following criteria:

1) University of Phoenix students who have been pursuing a degree or credit-bearing-certificate program when the first positive attendance ("Y" posted) was prior to 1/17/2018, who have not been out of attendance (no positive attendance "Y" posted) within 365 days from the last recorded positive attendance ("Y" posted), 2) University of Phoenix students who are changing from a program (from which they have not graduated) to another at the same or lower level, who started the former program prior to 1/17/2018, and who have at least one recorded positive attendance ("Y" posted) within 365 days of the last recorded positive attendance ("Y" posted), 3) University of Phoenix students who are changing from an associate program (from which they have not graduated) to a bachelor program, who started the associate program prior to 1/17/2018, and who have at least one recorded positive attendance ("Y" posted) within 365 days of the last recorded positive attendance ("Y" posted), or 4) University of Phoenix students who are changing from a credit-bearing certificate program from which they have not graduated, or from an en-route credit-bearing certificate program from which they have graduated, to an associate or bachelor program, when the first positive attendance ("Y" posted) for the credit-bearing certificate program was prior to 1/17/2018 and when there is positive attendance ("Y" posted) in the credit-bearing certificate program within 365 days of enrollment in the associate or bachelor program.

MILITARY‡

Students who are affiliated with the U.S. Armed Forces, as active-duty service members and family members of active duty and selected reserve will be charged the tuition rates listed in the 'Military Cost Per Credit' column of the table above.

ALUMNI‡

All alumni students who are applying to a new University of Phoenix bachelor program, undergraduate certificate program, or undergraduate non-degree single course; who have previously completed a degree program with University of Phoenix; whose account with the University is in good standing; and who didn't earn the previous degree as an en-route credential; will be charged the tuition rates listed in the 'Alumni Cost Per Credit' column of the table above. Students in this category will be given a guarantee of these tuition rates until their program completion deadline, unless they change programs or program versions.

ASSOCIATE TRANSFER‡

Students who are applying to a University of Phoenix bachelor's degree program for the first time and who have earned an associate's degree from another regionally accredited institution (or nationally accredited nursing program), or who are concurrent enrollment program (CEP) cohort students completing their Associate Degree in Nursing (ADN) and Bachelor of Science in Nursing (BSN) simultaneously, will be charged the tuition rates listed in the 'Associate Transfer Cost Per Credit' column of the table above, effective as of the date the associate's degree is verified on an official transcript by the Office of Admissions and Evaluation (except for CEP cohort students, who are eligible while still completing their ADN). Students in this category will be given a guarantee of these tuition rates until their program completion deadline, unless they change programs or program versions.

‡Students who receive a reduced tuition rate in one of the categories described above will not be eligible for any other tuition and/or fee reduction, waiver, benefit or offer. If a student wishes to use any other tuition and/or fee reduction, waiver, benefit or offer, it will only be applied to the University's standard tuition rate.

¤**The three tuition pricing categories defined below are for tuition rates that were in effect prior to 2/16/2018, and which are now only applicable to Continuing Students who have chosen to remain on their tuition reduction program (listed in subsection 'b' in the Continuing Students section above), continuing students who are participating in the Near Graduation Tuition Reduction program (see subsection 'c' in the Continuing Students section above), or continuing students who have chosen to opt out of the "Continuing Students Effective 2/16/2018" tuition rates. The tuition rates for these categories are listed by program in the pricing table that follows these pricing category descriptions.**

Continuing Students Enrolled Between 11/1/2016 and 1/16/2018: The rates and fees shown below are applicable to students who meet one of the following criteria: 1) individuals who enrolled at University of Phoenix between 11/1/2016 and 1/16/2018 who did not previously have any positive attendance (i.e. "Y" posted) in any degree or credit-bearing-certificate program course at the University, 2) University of Phoenix students who graduated (degree conferred) from a University of Phoenix degree program and subsequently enrolled in a new program between 11/1/2016 and 1/16/2018, and had not attempted any other program, with positive attendance (i.e. "Y" posted), since graduating from the previous program, 3) students who returned to a University of Phoenix program between 11/1/2016 and 1/16/2018 after having no positive attendance ("Y" posted) in any degree or credit-bearing- certificate program course for longer than 365 days from the last positive attendance ("Y" posted), or 4) University of Phoenix students who changed from a bachelor or master degree program (from which they had not graduated) to another program at a higher degree level (e.g., bachelor to master, master to doctoral) between 11/1/2016 and 1/16/2018.

Continuing Students Enrolled Between 3/17/2015 and 10/31/2016: The rates shown below are applicable to students who meet one of the following criteria: 1) individuals who enrolled at University of Phoenix between 3/17/2015 and 10/31/2016, who did not previously have any positive attendance (i.e. "Y" posted) in any degree or credit-bearing-certificate program course at the University, 2) University of Phoenix students who graduated (degree conferred) from a University of Phoenix degree program and subsequently enrolled in a new program between 3/17/2015 and 10/31/2016, and had not attempted any other program, with positive attendance (i.e. "Y" posted), since graduating from the previous program, 3) students who returned to a University of Phoenix program between 3/17/2015 and 10/31/2016 after having no positive attendance ("Y" posted) in any degree or credit-bearing- certificate program course for longer than 365 days from the last positive attendance ("Y" posted), or 4) University of Phoenix students who changed from a bachelor or master degree program (from which they had not graduated) to another program at a higher degree level (e.g., bachelor to master, master to doctoral) between 3/17/2015 and 10/31/2016.

Continuing Students Enrolled Prior to 3/17/2015: The rates shown below are those charged for students signing an enrollment agreement prior to 3/17/2015, who meet one of the following criteria: 1) University of Phoenix students who have been pursuing a degree or credit-bearing-certificate program when the first positive attendance ("Y" posted) was prior to 3/17/2015, who have not been out of attendance (no positive attendance "Y" posted) within 365 days from the last recorded positive attendance ("Y" posted), 2) University of Phoenix students who are changing from a program (from which they have not graduated) to another at the same or lower level, who started the former program prior to 3/17/2015, and who have at least one recorded positive attendance ("Y" posted) within 365 days of the last recorded positive attendance ("Y" posted), 3) University of Phoenix students who are changing from an associate program (from which they have not graduated) to a bachelor program, who started the associate program prior to 3/17/2015, and who have at least one recorded positive attendance ("Y" posted) within 365 days of the last recorded positive attendance ("Y" posted), or 4) University of Phoenix students who are changing from a credit-bearing certificate program from which they have not graduated, or from an en-route credit-bearing certificate program from which they have graduated, to an associate or bachelor program, when the first positive attendance ("Y" posted) for the credit-bearing certificate program was prior to 3/17/2015 and when there is positive attendance ("Y" posted) in the credit-bearing certificate program within 365 days of enrollment in the associate or bachelor program.

....
TUITION AND FEES - ONLINE RATES
....

Tuition and fees are listed in the price tables in the ensuing pages. Tuition charged can vary based on whether a student is considered "new" or "continuing" for purposes of tuition and fees.

NEW STUDENTS

New Students enrolled on or after 1/17/2018, who meet one of the following criteria as of 1/17/2018, will be charged the rates listed in the "Standard Tuition Cost Per Credit' column of the table below, and students in this category will be given a guarantee of these tuition rates until their program completion deadline, unless they change programs or program versions: 1) individuals enrolling at University of Phoenix who do not have any positive attendance in any degree or credit-bearing certificate program course at the University, 2) University of Phoenix students who have graduated (degree/certificate conferred) from a University of Phoenix degree or credit-bearing certificate (not an en-route certificate) and are enrolling in a new program, and have not attempted any other program, with positive attendance (i.e. "Y" posted), since graduating from the previous program, 3) students returning to a University of Phoenix program after having no positive attendance ("Y" posted) in any degree or credit-bearing-certificate program course for longer than 365 days from the last positive attendance ("Y" posted), 4) University of Phoenix students who are changing from a bachelor or master degree program (from which they have not graduated) to another program at a higher degree level (e.g., bachelor to master, master to doctoral), or 5) University of Phoenix students who met any of the preceding New Student criteria on or after 1/17/2018, who subsequently change from a program (from which they have not graduated) to another program at any level, and who have at least one recorded positive attendance ("Y" posted) within 365 days of the last recorded positive attendance ("Y" posted).

CONTINUING STUDENTS

All Continuing Students as of 2/16/2018, (who meet one of the criteria 1-4 listed below) will be charged the same tuition rates listed in the table **ABOVE** and will be given a guarantee of these tuition rates until their program completion deadline, unless they change programs or program versions, EXCEPT those continuing students who fall into any of the following exception categories:

a) Continuing Students who have chosen to opt out of the "Continuing Students Effective 2/16/2018" tuition rates¤

b) Continuing Students who are actively receiving and part of any of the following tuition reduction agreements, that were entered into prior to 1/17/2018, and who have chosen to remain with their tuition agreement rate: the Phoenix Scholarship Rewards Program (PSRP), the Phoenix Academic Achievers Scholarship (PAAS), the PAAS for MBA, the Advancing Nurse Leadership Scholarship, the Non Degree Alumni Discount, and/or employer tuition reductions¤

c) Continuing Students who are participating in the Near Graduation Tuition Reduction program¤

All Continuing Students must meet one of the following criteria:

1) University of Phoenix students who have been pursuing a degree or credit-bearing-certificate program when the first positive attendance ("Y" posted) was prior to 1/17/2018, who have not been out of attendance (no positive attendance "Y" posted) within 365 days from the last recorded positive attendance ("Y" posted), 2) University of Phoenix students who are changing from a program (from which they have not graduated) to another at the same or lower level, who started the former program prior to 1/17/2018, and who have at least one recorded positive attendance ("Y" posted) within 365 days of the last recorded positive attendance ("Y" posted), 3) University of Phoenix students who are changing from an associate program (from which they have not graduated) to a bachelor program, who started the associate program prior to 1/17/2018, and who have at least one recorded positive attendance ("Y" posted) within 365 days of the last recorded positive attendance ("Y" posted), or 4) University of Phoenix students who are changing from a credit-bearing certificate program from which they have not graduated, or from an en-route credit-bearing certificate program from which they have graduated, to an associate or bachelor program, when the first positive attendance ("Y" posted) for the credit-bearing certificate program was prior to 1/17/2018 and when there is positive attendance ("Y" posted) in the credit-bearing certificate program within 365 days of enrollment in the associate or bachelor program.

MILITARY‡

Students who are affiliated with the U.S. Armed Forces, as active-duty service members and family members of active duty and selected reserve will be charged the tuition rates listed in the 'Military Cost Per Credit' column of the table above.

ALUMNI‡

All alumni students who are applying to a new University of Phoenix bachelor program, undergraduate certificate program, or undergraduate non-degree single course; who have previously completed a degree program with University of Phoenix; whose account with the University is in good standing; and who didn't earn the previous degree as an en-route credential; will be charged the tuition rates listed in the 'Alumni Cost Per Credit' column of the table above. Students in this category will be given a guarantee of these tuition rates until their program completion deadline, unless they change programs or program versions.

ASSOCIATE TRANSFER‡

Students who are applying to a University of Phoenix bachelor's degree program for the first time and who have earned an associate's degree from another regionally accredited institution (or nationally accredited nursing program), or who are concurrent enrollment program (CEP) cohort students completing their Associate Degree in Nursing (ADN) and Bachelor of Science in Nursing (BSN) simultaneously, will be charged the tuition rates listed in the 'Associate Transfer Cost Per Credit' column of the table above, effective as of the date the associate's degree is verified on an official transcript by the Office of Admissions and Evaluation (except for CEP cohort students, who are eligible while still completing their ADN). Students in this category will be given a guarantee of these tuition rates until their program completion deadline, unless they change programs or program versions.

‡Students who receive a reduced tuition rate in one of the categories described above will not be eligible for any other tuition and/or fee reduction, waiver, benefit or offer. If a student wishes to use any other tuition and/or fee reduction, waiver, benefit or offer, it will only be applied to the University's standard tuition rate.

¤**The three tuition pricing categories defined below are for tuition rates that were in effect prior to 2/16/2018, and which are now only applicable to Continuing Students who have chosen to remain on their tuition reduction program (listed in subsection 'b' in the Continuing Students section above), continuing students who are participating in the Near Graduation Tuition Reduction program (see subsection 'c' in the Continuing Students section above), or continuing students who have chosen to opt out of the "Continuing Students Effective 2/16/2018" tuition rates. The tuition rates for these categories are listed by program in the pricing table that follows these pricing category descriptions.**

Continuing Students Enrolled Between 11/1/2016 and 1/16/2018: The rates and fees shown below are applicable to students who meet one of the following criteria: 1) individuals who enrolled at University of Phoenix between 11/1/2016 and 1/16/2018 who did not previously have any positive attendance (i.e. "Y" posted) in any degree or credit-bearing-certificate program course at the University, 2) University of Phoenix students who graduated (degree conferred) from a University of Phoenix degree program and subsequently enrolled in a new program between 11/1/2016 and 1/16/2018, and had not attempted any other program, with positive attendance (i.e. "Y" posted), since graduating from the previous program, 3) students who returned to a University of Phoenix program between 11/1/2016 and 1/16/2018 after having no positive attendance ("Y" posted) in any degree or credit-bearing- certificate program course for longer than 365 days from the last positive attendance ("Y" posted), or 4) University of Phoenix students who changed from a bachelor or master degree program (from which they had not graduated) to another program at a higher degree level (e.g., bachelor to master, master to doctoral) between 11/1/2016 and 1/16/2018.

Continuing Students Enrolled Between 3/17/2015 and 10/31/2016: The rates shown below are applicable to students who meet one of the following criteria: 1) individuals who enrolled at University of Phoenix between 3/17/2015 and 10/31/2016, who did not previously have any positive attendance (i.e. "Y" posted) in any degree or credit-bearing-certificate program course at the University, 2) University of Phoenix students who graduated (degree conferred) from a University of Phoenix degree program and subsequently enrolled in a new program between 3/17/2015 and 10/31/2016, and had not attempted any other program, with positive attendance (i.e. "Y" posted), since graduating from the previous program, 3) students who returned to a University of Phoenix program between 3/17/2015 and 10/31/2016 after having no positive attendance ("Y" posted) in any degree or credit-bearing- certificate program course for longer than 365 days from the last positive attendance ("Y" posted), or 4) University of Phoenix students who changed from a bachelor or master degree program (from which they had not graduated) to another program at a higher degree level (e.g., bachelor to master, master to doctoral) between 3/17/2015 and 10/31/2016.

Continuing Students Enrolled Prior to 3/17/2015: The rates shown below are those charged for students signing an enrollment agreement prior to 3/17/2015, who meet one of the following criteria: 1) University of Phoenix students who have been pursuing a degree or credit-bearing-certificate program when the first positive attendance ("Y" posted) was prior to 3/17/2015, who have not been out of attendance (no positive attendance "Y" posted) within 365 days from the last recorded positive attendance ("Y" posted), 2) University of Phoenix students who are changing from a program (from which they have not graduated) to another at the same or lower level, who started the former program prior to 3/17/2015, and who have at least one recorded positive attendance ("Y" posted) within 365 days of the last recorded positive attendance ("Y" posted), 3) University of Phoenix students who are changing from an associate program (from which they have not graduated) to a bachelor program, who started the associate program prior to 3/17/2015, and who have at least one recorded positive attendance ("Y" posted) within 365 days of the last recorded positive attendance ("Y" posted), or 4) University of Phoenix students who are changing from a credit-bearing certificate program from which they have not graduated, or from an en-route credit-bearing certificate program from which they have graduated, to an associate or bachelor program, when the first positive attendance ("Y" posted) for the credit-bearing certificate program was prior to 3/17/2015 and when there is positive attendance ("Y" posted) in the credit-bearing certificate program within 365 days of enrollment in the associate or bachelor program.

UNDERGRADUATE TUITION PER CREDIT (ONLINE)

College	Amount* - Continuing** Students Enrolled Between 11/1/2016-1/16/2018	Amount* - Continuing** Students Enrolled Prior to 11/1/2016

CALIFORNIA STUDENT TUITION RECOVERY FUND (STRF)

The State of California established the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic loss suffered by a student in an educational program at a qualifying institution, who is or was a California resident while enrolled, or was enrolled in a residency program, if the student enrolled in the institution, prepaid tuition, and suffered an economic loss. Unless relieved of the obligation to do so, you must pay the state-imposed assessment for the STRF, or it must be paid on your behalf, if you are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition.

You are not eligible for protection from the STRF and you are not required to pay the STRF assessment, if you are not a California resident, or are not enrolled in a residency program.

It is important that you keep copies of your enrollment agreement, financial aid documents, receipts, or any other information that documents the amount paid to the school. Questions regarding the STRF may be directed to the Bureau for Private Postsecondary Education, 2535 Capitol Oaks Drive, Suite 400, Sacramento, CA 95833, (916) 431-6959 or (888) 370-7589.

To be eligible for STRF, you must be a California resident or are enrolled in a residency program, prepaid tuition, paid or deemed to have paid the STRF assessment, and suffered an economic loss as a result of any of the following:

1. The institution, a location of the institution, or an educational program offered by the institution was closed or discontinued, and you did not choose to participate in a teach-out plan approved by the Bureau or did not complete a chosen teach-out plan approved by the Bureau.

2. You were enrolled at an institution or a location of the institution within the 120 day period before the closure of the institution or location of the institution, or were enrolled in an educational program within the 120 day period before the program was discontinued.

3. You were enrolled at an institution or a location of the institution more than 120 days before the closure of the institution or location of the institution, in an educational program offered by the institution as to which the Bureau determined there was a significant decline in the quality or value of the program more than 120 days before closure.

4. The institution has been ordered to pay a refund by the Bureau but has failed to do so.

5. The institution has failed to pay or reimburse loan proceeds under a federal student loan program as required by law, or has failed to pay or reimburse proceeds received by the institution in excess of tuition and other costs.

6. You have been awarded restitution, a refund, or other monetary award by an arbitrator or court, based on a violation of this chapter by an institution or representative of an institution, but have been unable to collect the award from the institution.

7. You sought legal counsel that resulted in the cancellation of one or more of your student loans and have an invoice for services rendered and evidence of the cancellation of the student loan or loans.

To qualify for STRF reimbursement, the application must be received within four (4) years from the date of the action or event that made the student eligible for recovery from STRF.

A student whose loan is revived by a loan holder or debt collector after a period of noncollection may, at any time, file a written application for recovery from STRF for the debt that would have otherwise been eligible for recovery. If it has been more than four (4) years since the action or event that made the student eligible, the student must have filed a written application for recovery within the original four (4) year period, unless the period has been extended by another act of law.

However, no claim can be paid to any student without a social security number or a taxpayer identification number.

Course Descriptions

Course Availability & Updates to Course Information

The courses listed in this section of the University of Phoenix Academic catalog constitute all active, degree-applicable University of Phoenix courses. Not all courses listed in this section are available at every University of Phoenix campus location, and not all courses listed in this section are available via the online instructional modality. This listing of courses is updated on the 1st of every month to reflect any changes to course information that occur up through the 15th of the previous month. Please contact a University representative for additional details about course availability and course information for a specific location or modality of instruction.

Course Descriptions

The course guide lists course descriptions and general course information. The information is presented in alphabetical order by course ID.

COURSE DESCRIPTIONS

Course ID	Course Title	Credits	College	Activity Description
ACC 210	ACCOUNTING INFORMATION SYSTEMS	3	School of Business	This course introduces accounting students to the use of technology and real-world applications. Areas of study include fundamental concepts and technologies (what computers can do for business), the Internet, intranets, electronic commerce, information systems development, basic project management principles, decision support systems, and the benefits of computer and human synergy.
ACC 230	FINANCIAL REPORTING: PEEKING UNDER THE FINANCIAL HOOD	3	School of Business	In this course, students will study how to analyze financial statements and methods used to value companies. Financial reports help managers choose between business paths. They also help investors and analysts evaluate the financial health of companies. This course is a practical means of discovering how financial data are generated and their limitations; techniques for analyzing the flow of business funds; and methods for selecting and interpreting financial ratios. It also presents analytical tools for predicting and testing assumptions about a firm's performance.
ACC 290	PRINCIPLES OF ACCOUNTING I	3	School of Business	This course is an introduction to financial accounting with an emphasis on using financial data for decision making. The focus will be on the application of basic accounting concepts and principles in enterprise and small business transactions. Students will learn how to identify, measure and report economic events of an enterprise.
ACC 290T	PRINCIPLES OF ACCOUNTING I	3	School of Business	This course is an introduction to financial accounting with an emphasis on using financial data for decision making. The focus will be on the application of basic accounting concepts and principles in enterprise and small business transactions. Students will learn how to identify, measure and report economic events of an enterprise.

ACC 291	PRINCIPLES OF ACCOUNTING II	3	School of Business	This course introduces accounting concepts in a business environment. Students learn to create and apply accounting documents in making better business decisions. Other topics include plant assets, liabilities, accounting for corporations, investments, statements of cash flows, financial statement analysis, time value of money, payroll accounting, and other significant liabilities.
ACC 291T	PRINCIPLES OF ACCOUNTING II	3	School of Business	This course takes an in-depth look at the key areas of the balance sheet mostly reviewed by management for decision making. Students will apply analytical methods used by management to assess the financial statements, and discuss management challenges and possible solutions for improvements. Areas of focus include receivables, plant assets, bonds, stocks, dividends and the statement of cash flows.
ACC 340	ACCOUNTING INFORMATION SYSTEMS I	3	School of Business	This course is designed to provide accounting students with the proper mix of technical information and real-world applications. Areas of study include fundamental concepts and technologies (what computers do for a business), internets, intranets, electronic commerce, information systems development, basic project management principles, Decision Support Systems, and the benefits of computer/human synergy.
ACC 349	COST ACCOUNTING	3	School of Business	This course introduces cost terminology and flows, standard cost systems, relevant costing, budgeting, inventory control, capital asset selection, responsibility accounting, and performance measurement.

ACC 400	ACCOUNTING FOR DECISION MAKING	3	School of Business	This course concentrates on effective decision making as it relates to financial activities in a business enterprise. Course topics will include financial assets, liabilities, equity, business operations, financial management, and financial statement analysis. Students will have the necessary analytical tools to enhance business operations.
ACC 421	INTERMEDIATE FINANCIAL ACCOUNTING I	3	School of Business	This course examines the conceptual framework of accounting, cash vs. accrual accounting, the income statement and balance sheet, time value of money, cash, receivables, and inventory.
ACC 422	INTERMEDIATE FINANCIAL ACCOUNTING II	3	School of Business	This course examines accounting for property, plant and equipment, intangible assets, current liabilities and contingencies, long-term liabilities, contributed capital and retained earnings.
ACC 423	INTERMEDIATE FINANCIAL ACCOUNTING III	3	School of Business	This course examines dilutive securities and earnings per share, investments, revenue recognition, accounting for income taxes, leases, changes & errors, and the statement of cash flows.

ACC 455	CORPORATE TAXATION	3	School of Business	This course is a basic introduction to federal corporate taxation. The purpose is to familiarize the student with fundamental tax issues and provide the student with a general understanding of the history, laws, and policies of federal taxation.
ACC 456	INDIVIDUAL/ESTATE TAXATION	3	School of Business	This course is a basic introduction to federal individual and estate taxation. The purpose is to familiarize the student with fundamental tax issues and provide the student with a general understanding of the history, laws, and policies of federal taxation.
ACC 460	GOVERNMENT AND NON-PROFIT ACCOUNTING	3	School of Business	This course covers fund accounting, budget and control issues, revenue and expense recognition and issues of reporting for both government and non-profit entities.
ACC 466	Advanced Accounting	3	School of Business	This course is a study of advanced accounting theory, applied to specialized topics and contemporary problems. Topics include the preparation of consolidated financial statements; international accounting; foreign currency translations and transactions; and SEC regulations on financial reporting are examined. Particular emphasis is placed on problem solving.

ACC 491	CONTEMPORARY AUDITING I	3	School of Business	This course examines auditing standards, professional ethics, evidence, legal liability, audit planning and documentation, materiality and risk, internal control and the overall audit plan and program.
ACC 492	CONTEMPORARY AUDITING II	3	School of Business	This course examines auditing from a balance sheet perspective, completion of the audit, internal, operational and compliance auditing, auditors' reports and other attestation services.
ACC 497	ADVANCED TOPICS IN ACCOUNTING RESEARCH	3	School of Business	This course in accounting research provides students with an in-depth examination of the Generally Accepted Accounting Principles (GAAP) and acceptable alternative reporting practices. Through comprehensive case studies, students will develop the research application skills necessary to analyze and make decisions regarding accounting reporting dilemmas in for-profit and not-for-profit companies.
ACC 537	FINANCIAL ACCOUNTING	3	School of Business	In this course, students are introduced to the basic concepts and methods used in corporate financial statements for information of investors and other interested external parties. Topics include University of Phoenix tools, basic accounting concepts, financial statements, inventory and fixed assets, present value of bonds and stockholders' equity, statement of cash flows, and error correction and accounting changes.

ACC 541	ACCOUNTING THEORY & RESEARCH	3	School of Business	In this introductory course to the Master of Science in Accounting, students analyze the major approaches underlying accounting research and the principle tools for performing that research. Topics include a program and course overview; inventory and fixed assets; leases; derivative instruments, debt, and contingencies; segment reporting and pensions; and combinations, consolidations, and stockholder's equity.
ACC 542	ACCOUNTING INFORMATION SYSTEMS	3	School of Business	In this course, students examine the fundamentals of accounting systems design. Topics include business information systems, business processes and data flows, database concepts and tools, internal control and risks, auditing the information system, and using the information system to perform audit functions.
ACC 543	MANAGERIAL ACCOUNTING & LEGAL ASPECTS OF BUSINESS	3	School of Business	In this course, students examine managerial accounting as part of the business's accounting information system and legal aspects of the business enterprise. Topics include managerial accounting and capital budgeting, cost analysis; management planning and control, negotiable instruments, secured transactions, debtor/creditor relationships, property and insurance, and legal aspects of employment and environment.
ACC 544	INTERNAL CONTROL SYSTEMS	3	School of Business	In this course, students gain a broad perspective of accounting and control that considers attainment of all goals of the organization, including those concerned with financial objectives. Topics include an overview of control, risk management, internal control systems, controls for current asset functions, controls for other accounting classifications, controls for information technology systems, and reporting on controls.

ACC 545	FINANCIAL REPORTING	3	School of Business	This course prepares students to address concepts of financial reporting for roles as CPA's. Students learn important criteria for calculating capital changes, applying concepts of fixed assets and cost determination, and preparing consolidated financial statements. Other topics include the professional responsibilities of CPAs, deferred taxes, cash flow statements, balance sheet preparation, restructuring of troubled debt, and the intricacies of comprehensive income.
ACC 546	AUDITING	3	School of Business	In this course, students focus on the auditing practice performed by public accountants. Topics include the CPA profession and the auditor's role, planning the audit, audit reporting and required communications, evaluating internal controls, audit programs for current assets and liabilities, and audit programs for other business cycles.
ACC 547	TAXATION	3	School of Business	In this course, students develop an understanding of the taxation of business entities and the individuals who own those entities. Topics include tax entities, property transactions, calculating basis, gains and losses, alternative minimum tax, S-corporations and partnerships.
ACC 548	NOT-FOR-PROFIT & GOVERNMENT ACCOUNTING	3	School of Business	In this course, students receive an overview of the budgeting, accounting, financial reporting, and auditing required of government and not-for-profit organizations. Topics include the governmental accounting, accounting records in government, fund allocation, government-wide reporting, not-for-profit accounting, and governmental performance measures.

ACC 556	FORENSIC ACCOUNTING	3	School of Business	In this course, students are introduced to the conduct of fraud examinations, including a discussion of specific procedures used in forensic accounting examinations and the reasoning behind these procedures. Topics include an overview of fraud and abuse, forensic evidence, substantive procedures for cash outflow irregularities, substantive procedures for asset irregularities, financial statement fraud, and examination reporting.
ACC 561	ACCOUNTING	3	School of Business	This course applies accounting tools to make management decisions. Students learn to evaluate organizational performance from accounting information. Other topics include financial statements, cost behavior, cost allocation, budgets, and control systems.
ACCP 497	ADVANCED TOPICS IN ACCOUNTING RESEARCH	3	School of Business	This course in accounting research provides students with an in-depth examination of the Generally Accepted Accounting Principles (GAAP) and acceptable alternative reporting practices. Through comprehensive case studies, students will develop the research application skills necessary to analyze and make decisions regarding accounting reporting dilemmas in for-profit and not-for-profit companies.
ACCTLAB	ACCOUNTING LAB	0	Non-College Specific	This workshop is an accounting lab that allows students to work on accounting principles.

ADM 511	Personnel Administration for Educators	3	College of Education	This course focuses on the responsibilities of educational administrators related to human resources. Participants examine three main components in human resources administration: utilization, development, and environment. Topics covered include selection, placement, induction, compensation, motivation, staff development, unionism, collective bargaining, and the legal aspects of personnel administration.
ADM 512	Leadership Strategies for Educators	3	College of Education	This course is designed to guide participants in the practical application of current trends and strategies of school leadership and organizational culture. Participants explore the roles and responsibilities of leaders, including decision making, communication, collaboration, and conflict management. An emphasis is placed on responsiveness to legislation and the implementation of standards, including the Common Core State Standards. Participants also explore ways to facilitate positive school change.
ADM 513	School Law for Educators	3	College of Education	This course is designed to provide opportunities for participants to explore the practical application of public school law, including the origin and initial intent of the writers, while recognizing their administrative limitations. Participants examine the constitutional framework and amendments, court systems, and current legal issues, as well as the effect each has on the educational environment. Landmark cases are reviewed and analyzed to develop a cognitive base for legal principles and to improve the administrative management of a school.
ADM 514	School Finance for Educators	3	College of Education	This course examines public educational funding and provides an overview for school leaders in the basic concepts of school finance. Topics include economic and social considerations for financing education adequately, equitable, and equally, as well as state and federal roles in education financing, school finance and litigation, finance procedures and practices, and the role of human resources in educational finance. Participants have the opportunity to experience the practical application of these concepts through various tasks, discussions, and scenarios addressing budget and finance issues, culminating in a project to develop their own school district financial plan and budget.

ADM 516	Ethical and Legal Issues for Administrators	3	College of Education	This course examines the legal and ethical principles for an educational administrator. Participants will develop and refine the skills necessary to analyze and integrate constructive legal and ethical principles into their practice. Emphasis is placed on the understanding and history of law and ethics needed in the educational setting for a school administrator. Current issues for school administrators featured in this course include curriculum and instruction, assessment and accountability, attendance and truancy, laws and liability, hiring and evaluating, Internet usage, and school safety and security.
ADM 517	Special Education Program Administration	3	College of Education	This course is designed to provide educational leaders with information and strategies for administering the legal requirements related to providing an inclusive education to students with special needs to determine effective programs and services. Participants receive a practical guide to the history, laws, and policies of special education, as well as the steps involved in the referral and evaluation processes from Response to Intervention (RTI) through the development of Individualized Education Programs (IEPs) and transition plans. Another focus addresses the roles, responsibilities, and relationships that parents/guardians and advocates have within processes to ensure appropriate services are provided to a diverse population. Budget management for special education programs is also examined.
ADM 590	INTERNSHIP ON THE PRINCIPALSHIP	3	College of Education	This internship provides opportunities for the student to engage in experiences relevant to the principal and to obtain knowledge of the role and responsibility of the principal. The students gain first-hand knowledge of the day-to-day operations of the principal through many internship activities. The internship includes a supervised experience at a district located outside the university environment. This is an Arizona-specific, on-ground only course.
ADM 591	INTERNSHIP ON THE SUPERINTENDENCY	3	College of Education	This internship provides opportunities for the student to engage in experiences relevant to the superintendent and to obtain knowledge of the role and responsibility of the superintendent. The students gain first-hand knowledge of the day-to-day operations of the superintendent through many internship activities. The internship includes a supervised experience at a district located outside the university environment. This is an Arizona-specific, on-ground only course.

ADM 592	INTERNSHIP OF THE SUPERVISOR	3	College of Education	This internship provides opportunities for the student to engage in experiences relevant to the supervisor and to obtain knowledge of the role and responsibility of the supervisor. The students gain first-hand knowledge of the day-to- day operations of the supervisor through many internship activities. The internship includes a supervised experience at a district located outside the University environment. This is an Arizona-specific, on-ground only course.
ADMIN 500	ORIENTATION TO ADMINISTRATION AND SUPERVISION	0	College of Education	This course is designed to provide an orientation to the primary components of the Master of Arts in Education/ Administration and Supervision program. Students will be introduced to the program's progression and degree completion requirements. Field experiences, electronic resources, E-portfolios, benchmark assignments, and the administrative internship will be discussed.
ADMIN 510	VISIONARY LEADERSHIP: FOUNDATIONS OF LEADERSHIP	3	College of Education	This course introduces the California Administrator Performance Expectations (CAPEs) and the California Administrator Content Expectations (CEs), with emphasis on the category of Visionary Leadership. Students will complete a series of dispositional, leadership, bias, and stereotyping assessments aligned to the University Student Code of Conduct and the College of Education Professional Supplemental Standards. Field experience, portfolio, and practicum will be reviewed.
ADMIN 518	LEADERSHIP AND COLLABORATIVE PROCESSES	3	College of Education	This course is designed to provide students with an overview of educational leadership and with an understanding of the issues in educational leadership positions. Students analyze the various styles of leadership and explore how leadership enhances an educational environment. Students examine information on collaborative processes and examine how educational leaders can create high performing teams.

ADMIN 524	SUPERVISION OF CURRICULUM, INSTRUCTION AND ASSESSMENT	3	College of Education	This course examines administrative responsibilities related to supervision of curriculum and instruction. Principal candidates will study the relationship among supervision, curriculum design, national and state standards, and effective instructional practice. Principal candidates will also participate in field experiences related to curriculum and instruction.
ADMIN 528	ADMINISTRATION OF SPECIAL PROGRAMS	3	College of Education	This course provides an overview of various federal, state, non-profit, and private funding programs and grants. Candidates study the components and requirements of these programs, practice grant-writing skills, and participate in field experiences related to special programs administration.
ADMIN 533	COACHING AS A LEADER	3	College of Education	This course provides an examination of how induction programs and individualized teacher support processes, such as mentoring and coaching, positively affect teaching and learning outcomes. Students will examine the process of gathering and using multiple sources of data to drive differentiated professional development that meets the needs of individual teachers and overall school goals. Students will be equipped with content knowledge, real-life application opportunities, tools, and specific strategies that can be applied in both school improvement and professional development. Field experience, portfolio, and practicum will be reviewed.
ADMIN 535	BUSINESS AND FACILITIES MANAGEMENT	3	College of Education	This course is a continuation of processes for managing business functions and for school facilities. Principal candidates will study school budgeting and accounting procedures, and they will study issues regarding facilities management. Principal candidates also will participate in field experiences related to business and facilities management.

ADMIN 540	LEADERSHIP IV: COMMUNITY	1	College of Education	This course focuses on community leadership, including representing and promoting the school's accomplishments and needs to the LEA and the public. Students will examine the multiple connections between the school, families, and the community, and the value of involving the entire school community in working towards achieving the school's mission, vision, and goals. Field experience, portfolio, and practicum will be applied.
ADMIN 541	COMMUNITY LEADERSHIP	3	College of Education	This course reinforces concepts of community leadership, particularly developing a shared commitment to the vision among all members of the school community. Course topics include personal and professional ethics; biases; school culture collaboration; working with diverse students and families; and strategies for developing family, community, and media relations. Field experience, portfolio, and practicum will be reviewed.
ADMIN 550	LEADERSHIP V: ASSESSMENT OF LEADERSHIP	4	College of Education	This course is a culmination of all course work, field experiences, portfolio, and practicum experiences. Students will apply the California Administrator Performance Expectations (CAPEs) to analyze their course work, field experiences, portfolio, and practicum.
ADMIN 555	SCHOOL POLICY AND LAW FOR PRINCIPALS	3	College of Education	This course allows students to examine legal theory and practice in the context of the educational setting. The constitutional framework, court systems, legal issues, and their subsequent impact on schools are discussed, analyzed, and applied to current educational practices.

ADMIN 560	HUMAN RESOURCES LEADERSHIP AND MANAGEMENT	3	College of Education	This course will focus on the responsibilities of human resources administration in education. Methods of recruitment, selection, induction, development, compensation, and appraisal will be examined. Strategic planning, employment continuity, employment justice including laws, policies and procedures, and unionism will be analyzed.
ADMIN 565	SCHOOL IMPROVEMENT PROCESSES	3	College of Education	This course focuses on the use of assessments in K-12 education and in developing school improvement plans from a principal perspective. Students will review the types of assessments that a school leader needs to be familiar with, and they will review how a school leader can use assessments to measure student achievement. Additionally, the model and processes of continuous school improvement are explored.
ADMIN 570	EQUITY, DIVERSITY, AND ACCESS IN EDUCATION	3	College of Education	This course provides candidates the opportunity to examine and to reflect upon equity, diversity, and access in education. In particular, the course focuses on the potential for contributions of students, families, teachers, and staff through equitable participation in school practices, programs, and curriculum. Candidates examine their personal beliefs, as well as issues regarding equity, diversity, and access, in the context of leadership.
ADMIN 575	FAMILY, COMMUNITY, AND MEDIA RELATIONS	3	College of Education	This course focuses on the role of the school principal as a catalyst for developing and for maintaining collaborations with families, business and community groups, and the media to support a school's vision and programs. Candidates analyze the research on school and community relations and its implications for their particular school. They also examine ways of learning about the nature of community resources, interests, and needs; establishing reciprocal relationships; the use of conflict resolution and decision making tools; and ethical issues when working with families, business, community, and media groups. In addition, candidates plan a social action project that involves school, families, community, and the media.

ADMIN 591A	PRINCIPAL INTERNSHIP PART I: INSTRUCTIONAL LEADERSHIP	1	College of Education	This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on instructional leadership. Application of all principles and techniques of planning and managing curriculum, leadership, problem solving, organizing, and program and personnel evaluation will be addressed.
ADMIN 591B	PRINCIPAL INTERNSHIP PART II: ORGANIZATIONAL MANAGEMENT	1	College of Education	This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on organizational management. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, human resource management, and budgeting will be addressed.
ADMIN 591C	ADMINISTRATIVE INTERNSHIP PART III: PROFESSIONAL PRACTICE	1	College of Education	This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on community and media relations. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, working with the media, and community relations will be addressed.
ADMIN 594A	ADMINISTRATIVE PRACTICUM PART I: INSTRUCTIONAL LEADERSHIP	1	College of Education	This practicum experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on instructional leadership. Application of all principles and techniques of planning and managing curriculum, leadership, problem solving, organizing, and program and personnel evaluation will be addressed.

ADMIN 594B	ADMINISTRATIVE PRACTICUM PART II: ORGANIZATIONAL MANAGEMENT	1	College of Education	This practicum experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on organizational management. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, human resource management, and budgeting will be addressed.
ADMIN 594C	PRINCIPAL PRACTICUM PART III: PROF PERSPECTIVES & REF PRAC	1	College of Education	This practicum experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on community and media relations. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, working with the media, and community relations will be addressed.
ADMIN 596A	PRINCIPAL INTERNSHIP PART I: INSTRUCTIONAL LEADERSHIP	1	College of Education	This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on instructional leadership. Application of all principles and techniques of planning and managing curriculum and instruction, accountability systems, leadership, problem solving, and organizing will be addressed.
ADMIN 596B	PRINCIPAL INTERNSHIP PART II: ORGANIZATIONAL MANAGEMENT	1	College of Education	This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on organizational management. Application of all principles and techniques of planning, leadership, problem solving, organizing, human resource management, personnel evaluation, and budgeting will be addressed.

ADMIN 596C	PRINCIPAL INTERNSHIP PART III: PROFESSIONAL PRACTICE	1	College of Education	This internship experience provides comprehensive field-based training designed to develop competencies needed by school principals with an emphasis on community and media relations. Application of all principles and techniques of planning, managing, leadership, problem solving, organizing, working with the media, and family and community relations will be addressed.
AED 222	INTRO TO THE EXCEPTIONAL LEARNER	3	College of Education	This course provides an overview of the exceptional learner, the student who differs from the average or normal student, with emphasis on factors relating to current practices, identification, characteristics, and educational adaptations. The course focuses on issues related to mildly disabled, severely disabled, emotionally and behaviorally disordered, mentally retarded, and gifted students.
AET 500	FOUNDATIONS OF ADULT LEARNING THEORY	3	College of Education	Learners focus on the principles of adult learning and andragogical theory. In addition, learners address the history of adult learning, the characteristics of adult learners, key adult learning theories, and learning processes and styles. Learners investigate factors that influence adult education and training environments such as motivation, critical thinking skills, and ethics. Additionally, learners review current developments in the field of adult education, training, and workplace learning.
AET 508	COMMUNITY-BASED EDUCATION	3	College of Education	This course provides an overview of community- based programs and services available for adult learners. Learners examine programs designed to enable adults to engage in educational, informational, and enrichment activities for lifelong learning. Learners examine issues, trends, and barriers to success for adult students, including areas such as social and community services, economic issues, and legislative influence. Additionally, learners review special populations of adult learners such as the aging population, adults with disabilities, military veterans, immigrants, refugees, incarcerated adults, and sexual minorities.

AET 552	MARKETING ADULT EDUCATION	3	College of Education	This course prepares graduate students to apply marketing principles to the roles they play as trainers and adult educators. Topics include the following: marketing basics, obtaining buy-in, market research, marketing strategies, communications, negotiation, and advocacy in education.
AET 560	FACILITATING CHANGE	3	College of Education	Learners focus on facilitating change by transforming theory into application using effective researched-based methods related to global influences of change, change management, and the analysis of human capital. In addition, learners explore various change management strategies and the use of skill sets that include being objective, using analysis, and using active listening when dealing with organizational change. Learners demonstrate an understanding of how to apply skills that are used by effective leaders and trainers to develop and conduct training sessions that lead the change process.
AET 562	SOCIAL MEDIA FOR PROFESSIONAL LEARNING	3	College of Education	Learners are introduced to the use of social media tools and resources that support professional learning in the 21st century. Learners explore a variety of social media tools for individual and collaborative learning, including development of a personal learning network. In addition, learners examine leading responsible social media usage and the future of social media for professional learning.
AET 570	PROGRAM DEVELOPMENT IN ADULT EDUCATION	3	College of Education	Learners examine a leader's role in developing and managing adult education within an organization. Learners define the organization's learning needs from a systems perspective, review the leader's role in management of multicultural training, and understand return on investment methodologies. In addition, learners review topics about networking and partnerships for successful learning, and identifying future trends in training and program development.

AJS 503	INTRO TO GRADUATE STUDY IN CRIMINAL JUSTICE AND SECURITY	1	College of Criminal Justice and Security	This course provides new College of Security and Criminal Justice graduate students with an introduction to the university's learning goals and resource utilization. Students will demonstrate graduate-level composition skills, communication skills and strategies for collaboration, critical thinking skills, the use of academically appropriate resources, and a basic knowledge of the United States Constitution.
AJS 504	SURVEY OF JUSTICE AND SECURITY	3	College of Criminal Justice and Security	This is a survey course that introduces policing, the court systems, corrections, and private security and how they relate to each other. Challenges in these relationships are also presented.
AJS 514	CRIMINOLOGICAL THEORY	3	College of Criminal Justice and Security	This is an advanced course in theories and crime causation, including classical, biological, psychological, sociological, and social- psychological approaches. This course also addresses victimology, to include topics such as victimization statistics, victimogenesis, and the prevention of victimization.
AJS 524	CYBERCRIME AND INFORMATION SYSTEMS SECURITY	3	College of Criminal Justice and Security	This course provides an overview of the nature of criminal activity that is facilitated through, or that targets, information systems. The course also reviews security measures that are designed to protect the software, hardware, and data associated with information systems.

AJS 534	ORGANIZATIONAL ADMINISTRATION IN JUSTICE AND SECURITY	3	College of Criminal Justice and Security	This course explores the various elements of organizational administration, behavior, and management in criminal justice organizations. It provides the student with an understanding of individual and group dynamics, problem solving concepts, and administrative processes associated with organizational behavior and structures that exist in the criminal justice system.
AJS 544	ETHICS IN JUSTICE AND SECURITY	3	College of Criminal Justice and Security	This course will examine the theoretical and philosophical basis of ethics and the standards of professional conduct and leadership applicable to justice and security agencies. Relevant case studies will be used, as well as contemporary situations in ethics.
AJS 554	CONCEPTS OF PHYSICAL AND PERSONAL SECURITY	3	College of Criminal Justice and Security	This course provides the student with an understanding of contemporary concepts of physical facility security and personal protection.
AJS 564	MANAGEMENT OF INSTITUTIONAL RISK AND CRITICAL INCIDENT MGNT	3	College of Criminal Justice and Security	This course provides an overview of the relationship between risk assessment and consequence management within the context of justice and security organizations. It examines the specific factors to mitigate risk and the critical incident response to maintain order when risk management fails. Topics include defining risk, planning factors for critical incident response, lessons learned.

AJS 574	FINANCE AND BUDGETING IN JUSTICE AND SECURITY	3	College of Criminal Justice and Security	This course introduces fundamental concepts of using financial tools and analysis for effective managerial decision making in criminal justice and security. Topics include the role of financial management in the criminal justice and security organization, concepts and principles underlying financial practices, and operational planning and budgeting.
AJS 583	LEGAL ISSUES IN JUSTICE AND SECURITY	3	College of Criminal Justice and Security	This course examines the competing legal and social issues that influence the actions of public officials, security personnel, and private citizens with respect to the provision of law enforcement, safety, and security services for various elements of society. The potential conflicts between public policy and civil rights will be discussed.
AJS 584	FORENSIC SCIENCE AND PSYCHOLOGICAL PROFILING	3	College of Criminal Justice and Security	This course provides the student with a fundamental understanding of forensic science and technology, psychological profiling, and the application of scientific methodologies to the investigative process.
AJS 586	PUBLIC POLICY ISSUES	3	College of Criminal Justice and Security	This course addresses the development and influence of public policy with respect to specific justice and security issues facing American society.

AJS 594	PROGRAM DEVELOPMENT AND EVALUATION	3	College of Criminal Justice and Security	This course prepares the student to identify operational goals and to develop or evaluate programs designed to mitigate issues of societal order. This course will provide an understanding of the application of key concepts, methods, and approaches in program evaluation for the criminal justice and security profession.
APAWKSHP	APA WORKSHOP	0	Non-College Specific	Non-credit bearing course ID for APA workshop offered at campus.
APB 001	ASSESSMENT PERIOD	0	College of Health Sciences and Nursing	This is assessment break period 001.
APB 002	ASSESSMENT PERIOD	0	College of Health Sciences and Nursing	This is assessment period break 002.

APB 003	ASSESSMENT PERIOD	0	College of Health Sciences and Nursing	This is assessment period break 003.
APB 004	ASSESSMENT PERIOD	0	College of Health Sciences and Nursing	This is assessment period break 004.
APB 005	ASSESSMENT PERIOD	0	College of Health Sciences and Nursing	This is assessment period break 005.
APB 006	ASSESSMENT PERIOD BREAK 006	0	College of Health Sciences and Nursing	This is assessment break period 006.

APB 010	ASSESSMENT PERIOD BREAK	0	College of Health Sciences and Nursing	This is an assessment period.
APB 020	ASSESSMENT PERIOD BREAK	0	College of Health Sciences and Nursing	This is an assessment period.
APB 030	ASSESSMENT PERIOD BREAK	0	College of Health Sciences and Nursing	This is an assessment period.
APB 040	ASSESSMENT PERIOD BREAK	0	College of Health Sciences and Nursing	This is an assessment period.

APB 050	ASSESSMENT PERIOD BREAK	0	College of Health Sciences and Nursing	This is an assessment period.
APB 060	ASSESSMENT PERIOD BREAK	0	College of Health Sciences and Nursing	This is an assessment period.
APB 070	ASSESSMENT PERIOD BREAK	0	College of Health Sciences and Nursing	This is an assessment period.
APB 080	ASSESSMENT PERIOD BREAK	0	College of Health Sciences and Nursing	This is an assessment period.

APB 090	ASSESSMENT PERIOD BREAK	0	College of Health Sciences and Nursing	This is an assessment period.
APMT 315	TECHNOLOGY AND SOCIETY	3	College of Social Sciences	This course introduces students to the evolution of technologies used in contemporary society to communicate, associate, learn, and build, social and material capital. A special focus is on the benefits technology accrues to humans and communities as well as potential harmful effects of engaging with technology.
APMT 430	SOCIAL MEDIA AND HUMAN INTERACTION	3	College of Social Sciences	This course focuses on social media technologies and their use and misuse in human relationships. Topics will include emerging cyber communication interfaces, building healthy technology mediated relationships and social etiquette in cyber space.
APMT 440	INFLUENCE OF MEDIA ON BEHAVIOR	3	College of Social Sciences	This course explores the ways in which contemporary media shape cultures and human behaviors including the role that media plays in influencing behaviors related to nutrition, body image and violence, and the impact on teenagers and children. Other topics include media literacy, education and celebrity culture.

APMT 460	CYBER COMMUNICATIONS	3	College of Social Sciences	This course examines relationship and communications theories and their practices in cyberspace. Topics will include digital etiquette, regulatory considerations, the conservation of interpersonal relations, and cyber commerce.
APMT 470	DIGITAL LEARNING	3	College of Social Sciences	This course will survey contemporary learning in non-traditional environments and explores the applications of continuous, lifelong and contextualized learning to social, community, and organizational settings. Emphasis will be placed on applying psychology principles to the efficacy of digital learning.
ARTS 100	INTRODUCTION TO THE VISUAL AND PERFORMING ARTS	3	College of Humanities and Sciences	This course examines traditions and developments in the visual and performing arts genres including music, dance, theater, cinema, visual arts, and architecture. Students will be introduced to the elements of each genre along with an overview of their historical development in Western European tradition.
ARTS 230	SURVEY OF THE VISUAL ARTS	3	College of Humanities and Sciences	This course offers a foundation in the visual arts,elements, styles, and critical analysis for beginning art students. Emphasis is on identifying and explaining styles of visual arts from various cultures, eras, and places. The course focuses on the interpretation of art to understand meaning, and the ability to make critical judgment based on principles of art. Students learn to communicate ideas and expression through their own creative work in a two-dimensional, three-dimensional, video, or other time-based media.

ARTS 340	EXPLORATION OF WESTERN CLASSICAL MUSIC	3	College of Humanities and Sciences	This course will introduce students to Western European music from the Baroque period through the beginning of the 20th Century. The course will emphasize the history, musical development, and accomplishments of the Baroque, Classical, Romantic, and Early 20th Century periods in music. Students will learn to recognize form, style, texture, and characteristics of each period by studying a variety of composers and the representative masterpieces of each period.
ATD 309	CLASSROOM TEACHING AND TECHNOLOGY	3	College of Education	Students focus on strategies for instruction using traditional and alternative delivery method with an emphasis on teaching technology. Topics include instructional theories, lecture- based instruction, interactive learning, group activities, case studies, and the impact of current trends in educational technology. Topics also include guidelines and laws, including ADA compliance, critical to the use of technology in instruction.
AUT 510	Autism Spectrum Disorders: Foundations	3	College of Education	This course provides foundational information about autism spectrum disorders (ASD). Participants identify general characteristics associated with autism spectrum disorders including learning preferences, behaviors, and patterns. Participants also learn interventions, accommodations, and supports, with emphasis on current evidence-based practices.
AUT 512	Autism Spectrum Disorders: Communication and Socialization	3	College of Education	This course is designed to address common social skill deficits in autism spectrum disorders: social cognition, social communication, social initiation, and social reciprocity. Identification of various ways to assess social skills is addressed. Participants focus on interventions that promote social skill acquisition and enhance social skill performance. Instructional tools and adaptations necessary to foster the development of social skills are also explored.

AUT 513	Autism Spectrum Disorders: Behavior Management	3	College of Education	This course focuses on behavioral characteristics of students with Autism Spectrum Disorders and identifies assessment tools to be used across learning environments. Participants develop behavior intervention plans that include sensory supports and structured routines to enhance students' lives and learning. Behavior generalization and self-monitoring strategies are also explored.
BACEU 2000	FOUNDATIONS IN DATA ANALYTICS	0.6	School of Continuing Education	Quantitative and qualitative data can both be used to investigate data behavior and patterns to enhance business productivity and decision-making. In this course, students will learn how data is analyzed and applied to the decision-making function of an organization. Concepts on data collection, processing, and integration will be presented as well as issues that may exist within the data. Students also will explore the role that statistics play in data analytics and learn about the multiple ways one can present data to tell a compelling story. This course provides 0.6 continuing education units over one 6-hour workshop.
BACEU 2010	DATABASE FUNDAMENTALS	0.6	School of Continuing Education	Organizations keep their business records within databases. To successfully extract information for use in business decisions, it is important to understand how data is structured and stored. In this course, students will learn the general principles involved in designing a database as it applies to a relational database model. Further, students will learn the terminology, data types, and integrity elements of database design and how queries allow data to be extracted from the database. To complete this course, students are required to have access to Microsoft Access software. This course provides 0.6 continuing education units over one 6-hour workshop.
BACEU 2020	BUSINESS INTELLIGENCE	0.6	School of Continuing Education	In today's competitive market, businesses cannot afford to rely on "gut feelings" or anecdotes to make decisions that impact their future course of action. Instead, business intelligence, or information, is now methodically collected from data mining, online analytical processing, benchmarking, and other components to uncover new opportunities and create market advantage. In this course, students will gain insight into the numerous functions associated with business intelligence and how proper analysis informs decision making. This course provides 0.6 continuing education units in one, 6-hour workshop.

BACEU 2030	DATA VISUALIZATION	0.6	School of Continuing Education	When faced with the prospect of understanding volumes of data, do reams of paper and spreadsheets make your eyes glaze over? Data visualization is the means by which lots of information can be more easily viewed - and understood - through charts, infographics, mind maps, and more. Students in this course will explore the tools used to create graphical representations that integrate significant data and analyses into engaging graphics, without losing sight of communicating the key information. This course provides 0.6 continuing education units in one, 6-hour workshop.
BCC 395	CONTEMPORARY ISSUES AND FUTURES IN CYBERCRIMES	3	College of Criminal Justice and Security	This course examines both the principle topics in the field of cybercrime investigation as well as the examination of the varying issues regarding the futures within the field of technology-facilitated crime. Students will focus on relevant exploration of technology crimes that reflect key fundamentals of current conditions and what may be expected in technology and cybercrime in the years to come. Students will apply critical review of current technological crimes and engage in in-depth discussions of these concepts as a basis for comprehensive understanding at the local and global levels of cybercrime investigation and prevention.
BCC 400	INFORMATION SYSTEMS FUNDAMENTALS	3	College of Criminal Justice and Security	This course introduces the fundamentals of computer systems and the role of information processing in current business environments. Students receive an overview of information systems, systems development, operating systems, networking, telecommunications, security concerns, and the Internet. Completing this course provides students new skills and knowledge that better prepares them for the Cybercrime specialization courses, and aids their present or future organizations as leaders, providing service to their communities.
BCC 401	CYBERCRIME IN THE 21ST CENTURY	3	College of Criminal Justice and Security	This course explores developments and changes in the practice of criminal justice brought about by technology and crime as well as the rapid technological change in computers, and other Internet access devices. Specific topics include: cybercrime, how different cybercrimes are committed, the rapid evolution of technology and its effects on crime, cybercrimes against persons, and criminal justice agencies involved in the investigation and prevention of cybercrimes. The new skills and knowledge gained in this course will add to the protection, safety, and security of our society.

BCC 402	CYBERCRIME AND ROLE OF LAW ENFORCEMENT SECURITY PERSONNEL	3	College of Criminal Justice and Security	This course explores the developments and changes in the role of law enforcement and security officials in their investigation of cybercrimes. Specific topics include: cybercrime forensics, obtaining search warrants for cybercrimes, jurisdictional issues in cybercrimes, law enforcement issues in cybercrimes, and personal and corporate security and the prevention of cybercrimes. Upon completion of this cybersecurity course, students will have new skills and knowledge that will aid their present or future organizations, and as leaders provide service to their communities.
BCC 403	GLOBAL TECHNOLOGY AND CYBERCRIME	3	College of Criminal Justice and Security	In this course, students will study how global technology is used to further cybercrime. Topics in this course include homeland security and cybertechnology, global technology, threats to the United States, preventing and fighting global technology crime, and the role of local and federal agencies in preventing and investigating global technology crimes. Students will also explore the future of law enforcement and security to prevent and fight global cybercrimes. The new skills and knowledge gained by the students will aid them in their current or future professional endeavors.
BECEU 1115	HUMAN CAPITAL	0.6	School of Continuing Education	Building strong human capital is key in staffing an organization that outperforms the competition. The human resource function plays a major role in building human capital, operating as a business partner for various departments within the company. Human resource professionals are expected to plan, organize, direct, and control strategic and operational activities related to human capital. This course will explore the role of the human resource department in collaborating with both internal and external partners to aid the organization in achieving strategic goals. It will focus on assessing risks, defining goals, assessing organization structure, and ensuring federal regulations and laws are followed. This course provides 0.4 continuing education units in one 4-hour workshop.
BECEU 1125	ORGANIZATIONAL BEHAVIOR	0.6	School of Continuing Education	Every organization, department and team has its own organizational dynamic. The team members, organization structure, company climate, and employee attitudes all play into organizational behavior. Organizational behavior affects the success of a company, and managers must be equipped to deal with the challenges that arise within their teams. In this course, students will learn the definition of organization behavior, variables and characteristics that influence organizational behavior at the individual and team level as well as how attitudes of employees drive the culture of the organization. This course provides 0.6 continuing education units in one, 6-hour workshop.

BECEU 1130	CUSTOMER SERVICE	0.6	School of Continuing Education	Customer service representatives and client- facing employees often find themselves faced with challenging customer situations. It is helpful to be equipped with proven strategies to effectively resolve such situations. In this course, students will explore methods to deal with common customer interactions, which may be difficult. Students will focus on establishing a solid customer relationship, overcoming communication issues, and resolving conflict. This course provides 0.6 continuing education units in one, 6-hour workshop.
BECEU 1175	SUPPLY CHAIN MANAGEMENT	0.6	School of Continuing Education	Effective management of the supply chain helps prepare an organization to navigate through changes in demand and supply over the life cycle of a product. Strategic decisions related to supply chain design, planning, and operation contribute to an organization's productivity and profitability. In this course students gain an understanding of what a supply chain is and the various issues that must be considered when designing, planning, or operating a supply chain. Students also learn how companies achieve strategic fit between its supply chain strategy and its competitive strategy in order to design, make, and deliver products and services in an efficient and cost effective manner. This course provides 0.6 continuing education units in one, 6-hour workshop.
BEH 225	INTRODUCTION TO BEHAVIORAL SCIENCE	3	College of Social Sciences	This course focuses on human personality, motivation, learning, and cognition. The theories and insights of major figures in psychology are discussed. Neuroscience, psychological disorders, and therapies are also considered in relation to human behavior.
BIO 100	INTRODUCTION TO LIFE SCIENCE WITH LAB	4	College of Humanities and Sciences	This course applies a broad, conceptual understanding of biology. Students are introduced to scientific ideologies and concepts that not only shape the biological world, but also shape humans. Students examine the scientific method, evolution and biodiversity, the biology of cells, physiology, the dynamics of inheritance, and the effect humans have on the environment. The text emphasizes methods and the theoretical foundations of ideas, while minimizing isolated facts. It stresses the integration of ideas, making connections that form an understanding of the living world. The weekly online labs add a practical component to the class. The labs build upon the concepts in the text and offer a chance to interact with the material and further their understanding.

BIO 101	PRINCIPLES OF BIOLOGY	3	College of Humanities and Sciences	This course is designed to introduce biology at an entry level by examining the hierarchy that ranges from the fundamentals of cell biology to the physiology of organisms, and the interactions among those organisms in their environment. The topics in this course include cell biology, genetics, molecular biology, evolution, physiology, and ecology.
BIO 280	CONSERVATION BIOLOGY	3	College of Humanities and Sciences	This course will examine the concepts and issues related to the conservation of biodiversity. Topics will include the impact of society on plants and animals, aquatic and terrestrial ecosystems, extinction, and genetic diversity.
BIO 290	ANATOMY AND PHYSIOLOGY I	4	College of Humanities and Sciences	Anatomy and Physiology I is the first of a two- course sequence examining the terminology, structure, function, and interdependence of the human body systems. This course includes a study of the cells, chemistry, and tissues of the integumentary, skeletal, muscular, nervous, and endocrine systems. In conjunction with classroom instruction, the anatomy and physiology online lab component for this course requires students to apply knowledge from the classroom to online experiments and critical-thinking application exercises.
BIO 291	ANATOMY AND PHYSIOLOGY II	4	College of Humanities and Sciences	Anatomy and Physiology II is the second in a two-course sequence examining the terminology, structure, function, and interdependence of systems within the human body. This course includes a study of circulatory, cardiovascular, lymphatic, immune, respiratory, digestive, urinary, reproductive systems and genetics as applicable to the weekly course content. In conjunction with the classroom instruction, the anatomy and physiology online lab component for this course requires students to apply knowledge learned regarding the systems through online experiments and critical thinking application exercises.

BIO 315	ECOLOGY AND EVOLUTION	3	College of Humanities and Sciences	This course provides the fundamental principles of ecology. Students will focus on populations and communities, adaptation, and other factors that affect organisms.
BIO 330	INVERTEBRATE ZOOLOGY	3	College of Humanities and Sciences	This course presents students with the study of invertebrates. Students will examine the ecology of invertebrates along with their structures and functions.
BIO 335	ENTOMOLOGY	3	College of Humanities and Sciences	This course presents students with the study of entomology. Students will examine insects and their interaction with the ecosystem.
BIO 340	MICROBIOLOGY	3	College of Humanities and Sciences	This course presents students with the fundamentals and applications of microbiology. Topics will include microbial genetics, microorganisms, diseases, and immunity.

BIO 350	GENERAL BIOLOGY I	4	College of Humanities and Sciences	This course provides students with an in-depth knowledge of the principles and applications of biology. Topics include biochemistry, genetics, the structure and function of molecules and cells, metabolism, and energy transformation. Students apply these concepts using practical examples, facilitated discussions, and experiments conducted through hands-on labs. This course is the first half of the general biology sequence, which is completed in BIO/351: General Biology II.
BIO 351	GENERAL BIOLOGY II	4	College of Humanities and Sciences	This course continues the examination of principles and applications of biology that was begun in BIO 350: General Biology I. Topics include evolution, biodiversity, the structure and function of plants and animals, and ecology. Students apply these concepts using practical examples, facilitated discussions, and experiments conducted through hands-on labs.
BIO 405	HUMAN BIOLOGY	3	College of Humanities and Sciences	This course provides students with concepts of human biology. Topics include structure, function and the interrelationships of the cells, organ, skeletal and muscular systems, genetics, inheritance, and homeostasis.
BIO 410	GENETICS	3	College of Humanities and Sciences	This course presents students with the concepts of genetics. Students will examine mitosis and meiosis, chromosomes, DNA structure, gene mutation, and genome dynamics.

BIS 221	INTRODUCTION TO COMPUTER APPLICATIONS AND SYSTEMS	3	School of Business	This course provides an overview of Business Information Systems. Students learn to apply Microsoft Office tools including word processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include uses of application software and the Internet for effective problem solving, exploration of relevant emerging technologies, and how information is used across different industries.
BIS 221T	INTRODUCTION TO COMPUTER APPLICATIONS AND SYSTEMS	3	School of Business	This course provides an overview of Business Information Systems. Students learn to apply Microsoft Office (TM) tools including word processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include uses of application software and the Internet for effective problem solving, exploration of relevant emerging technologies, and how information is used across different industries.
BIS 320	BUSINESS INFORMATION SYSTEMS	3	School of Business	This course provides instruction on the use of Business Information Systems. Students apply Microsoft Office tools including word processing, spreadsheet, database, and presentation software to accomplish business objectives. Other topics include application software and the Internet for effective problem solving, use of relevant emerging technologies, and using information across different industries.
BIS 375	SUPPLY CHAIN INFORMATION MANAGEMENT IN ONLINE ENVIRONMENTS	3	School of Business	This course introduces students to the theory and practice of conducting supply chain functions over the Internet. It addresses various business strategies for buying, selling, or exchanging products, services, and information via computer networks. Legal and ethical requirements for handling supply chain business over the Internet are addressed.

BLE 571	Instructional Techniques and Methods	3	College of Education	This course provides K-12 educators with an overview of techniques and methods that support the instruction of bilingual learners. Participants examine culturally responsive practices for instruction and assessment. Teaching in the content areas, honoring cultural diversity, and involving parents/guardians and community are also explored.
BMCEU 5005	ENTREPRENEURSHIP	0.6	School of Continuing Education	Some people are driven to be their own boss. Becoming an entrepreneur provides that opportunity, but it comes with a unique and broad set of responsibilities. As a small business owner, an entrepreneur holds the responsibility for success or failure of their organization. Entrepreneurs both lead and manage risks, and are responsible for all functions of a business. This course will introduce students to the principles of entrepreneurship, the components of starting a business, and resources necessary. Students will also explore how leadership plays a role in the success of a business. This course provides 0.6 continuing education units in one, 6-hour workshop.
BMCEU 5010	FINANCIAL ANALYSIS FOR THE BUSINESS MANAGER	0.6	School of Continuing Education	In today's workplace, the need for leaders who can manage, and managers who can lead, is critical. Leaders influence others both inside and outside an organization and promote working together towards a common goal. In this course, students will focus on identifying the role of leadership, communicating vision, and ways to motivate employees. Students will also explore the phases of change, motivating employees through change, and how to respond to distress and reduce stress. This course provides 0.6 continuing education units in one, 6-hour workshop.
BMCEU 5015	MARKETING PRINCIPLES	0.6	School of Continuing Education	At a strategic level, marketing provides many elements that guide an organization's development and execution of its business strategy. Marketing also plays a key role in identifying the competitive set, defining points of differentiation and establishing the brand. This course explains the role marketing plays in the development and execution of a business strategy and how this affects an organization. In this course, students will learn the principles of the marketing mix and the 4-Ps of marketing: Product, Price, Place, and Promotion. This course provides 0.4 continuing education units in one 4-hour workshop.

BMCEU 5020	OPERATIONS AND SUPPLY CHAIN MANAGEMENT	0.6	School of Continuing Education	It is the function of supply chain management to enable an organization to get things done, ensure materials and supplies are on hand at the right time, and create processes by which a business functions. Supply chain professionals who understand how to procure resources, produce goods, and sequence activities on time are critical to the success of a business and to the cost-efficient delivery of goods and services. This course covers the basics of operations and supply chain management. Students will learn why supply chain is an essential business function and how it drives the cost-efficient, on-time delivery of goods and services. This course provides 0.6 continuing education units in one, 6-hour workshop.
BMCEU 5030	ACCOUNTING BASICS FOR THE BUSINESS MANAGER	0.6	School of Continuing Education	Every organization has a need to keep track of spending and income which are some of the core elements of the accounting function. Accounting provides ongoing visibility into financial progress and is used both internally and externally to communicate performance. This course focuses on common accounting principles that govern organizations and ways the business manager can use this information. Students will learn how the accounting system relates to business activity and will identify methods of accounting for assets, inventory, and liabilities. Student also explore methods of calculating the time value of money as well as stockholders' equity. This course provides 0.6 continuing education units in one, 6-hour workshop.
BMCEU 5035	BUSINESS LAW AND ETHICS	0.6	School of Continuing Education	Supervisors blend the role of a leader and manager in guiding a team of employees to achieve the goals of an organization. In this role, supervisors are expected to act both legally and ethically and are expected to provide an example for their team. This course will explore the relationship between law and ethics and set the stage for the importance of conducting oneself in a legal and ethical manner to protect the organization. Students will complete an ethics self-assessment to guide them in decision making when faced with ethical situations. This course provides 0.6 continuing education units in one, 6-hour workshop.
BMCEU 5040	STRATEGIC PLANNING SKILLS	0.6	School of Continuing Education	This course will provide students with a process for developing a clear understanding of a business's culture, operations, and market position in order to develop a strategic plan. That plan serves as a blueprint for gaining the competitive advantage necessary for an organization's success now and in the future. Students will develop an approach to formulate the strategic programs and initiatives critical to effectively leading and managing an organization. This course provides 0.6 continuing education units over one 6-hour workshop.

BMCEU 5065	SALES MANAGEMENT	0.6	School of Continuing Education	The core of every business is its sales team. Without sales, a company cannot financially survive. This course explores how to select an effective sales team and implement strategies to measure performance. Students learn how managing sales territories aligns with sales goals. Students will learn how territory management and sales forecasts relate to the sales function, then how to motive sales teams to reach the sales forecasts.
BMCEU 5090	CREATING A BUSINESS PLAN	0.6	School of Continuing Education	The lack of a plan is the primary reason businesses struggle. The business plan is not a one time endeavor, but a living document that grows and changes with the business. If there is not a formal business plan how can success be measured. In this course, students will learn the elements of a business plan and what is included in each element. Students will explore the concept of vendor financing and how the elements of a business plan align to securing financing. This course provides 0.6 continuing education units over one 6-hour workshops.
BPA 200	PUBLIC SECTOR COMMUNICATIONS	3	College of Criminal Justice and Security	This course introduces students to the foundations of communication in a business setting. Students are exposed to various topics related to interpersonal and group communication within the context of applications in an office or virtual office setting. Students will develop skills in various mediums of written communication to include: memos, emails, business letters, and reports. Communication ethics and cross-cultural communications are also explored. Upon completing the course, students will have an awareness of their personal communication style and be able to identify areas for further exploration of communication as a business skill.
BPA 201	FOUNDATIONS OF PUBLIC ADMINISTRATION	3	College of Criminal Justice and Security	This course serves as an introduction to the study of public administration. During this course, students will review the political and social theories of public administration. Students will review leadership, human resources, finance, and ethics within a public policy-making environment. This course guides students to become familiar with the contemporary, complex issues facing local, state, and federal public administrators.

BPA 211	FOUNDATIONS OF FEDERAL, STATE, AND LOCAL GOVERNMENT	3	College of Criminal Justice and Security	This course provides students constitutional foundations and governing entities of the federal, state, and local governments. Students will learn about political themes, governmental reach, democracy, and political behavior at each level of government.
BPA 221	CRITICAL THINKING AND DECISION MAKING IN THE PUBLIC SECTOR	3	College of Criminal Justice and Security	This course provides students opportunities for analysis, synthesis, prescription, and application of critical thinking and decision making within the organization. Emphasis is placed on preparing managers who can deal clearly, rationally, and creatively with a diverse workforce in a dynamic workplace. This course equips students with concrete skills in critical thinking and decision making that will allow them to identify and solve organizational problems, as well as provide strategic direction.
BPA 300	POLITICS AND CITIZENSHIP: THE PUBLIC POLICY ENVIRONMENT	3	College of Criminal Justice and Security	This course explores the dynamic field of public policy development and examines decision-making in the ever-changing political environment. This course will require students to discuss multiple sources of policy input ranging from grass roots to legislative arenas. Current data sources and application of analytical tools will be presented as a means to best satisfy multiple needs.
BPA 301	FOUNDATIONS OF PUBLIC ADMINISTRATION	3	School of Business	This course serves as an introduction to the study of public administration. During this course, the student will review the political and social theories of public administration. Students will review leadership, human resources, finance, and ethics within a public policy-making environment. Students will become familiar with the complex issues facing local, state, and federal public administrators today.

BPA 302	POLITICS AND CITIZENSHIP: THE PUBLIC POLICY ENVIRONMENT	3	School of Business	This course explores the dynamic field of public policy development and examines decision-making in the ever-changing political environment. Use of multiple sources of policy input will be discussed, ranging from grass roots to legislative arenas. Current data sources and application of analytical tools will be presented as a means to best satisfy multiple needs.
BPA 311	PRINCIPLES OF GOVERNMENTAL ACCOUNTING	3	College of Criminal Justice and Security	This course focuses on principles of governmental accounting. This course emphasizes accounting equations and transactions, financial statement preparation and analysis, internal controls, regulatory environment, compliance, and local, state and federal, global civic implications.
BPA 321	PERSONNEL MANAGEMENT	3	College of Criminal Justice and Security	This course introduces skills necessary to manage a dynamic and diverse civic leadership workforce, including: executives, directors, chiefs, commissioners, administrators and superintendents. This workforce could also include public health, public safety, community services, public works, and other civic departments, including: elected, appointed, at- will, volunteer and non-profit personnel.
BPA 331	FINANCIAL MANAGEMENT FOR NON-PROFIT ORGANIZATIONS	3	College of Criminal Justice and Security	This course focuses on the key financial concepts to effectively obtain desired goals and objectives by public and private sector non- profit organizations as well as in the international arena.

BPA 341	PUBLIC PROGRAMS: IMPLEMENT AND EVALUATE IN A DYNAMIC SETTING	3	College of Criminal Justice and Security	This course focuses on the implementation of public policy decisions through the identification and development of specific cincorporates an emphasis on intergovernmental relations and the increasing use of private resources in the service delivery system. A strong emphasis is placed on evaluating both the delivery processes and service outcomes as a means to continuously improve service delivery effectiveness.
BPA 351	RESEARCH IN PUBLIC ADMINISTRATION	3	College of Criminal Justice and Security	This course evaluates the process of conducting research for improving decision making within public administration to include the non-profit sector. Students will learn to apply an understanding of commonly employed business research techniques to improve a situation, solve a problem, or change a process. Other topics include problem framing, data collection, data analysis, and data presentation.
BPA 361	GRANT WRITING	3	College of Criminal Justice and Security	This course explores the basics of grant and proposal writing in public administration for federal, state, and private funding. This course includes research, design, and evaluation of grant writing components and explores requirements for the various types of grants available. This course also includes developmental steps for an effective grant proposal.
BPA 371	INTERGOVERNMENTAL RELATIONS	3	College of Criminal Justice and Security	This class examines the relationships between different levels of government: federal, state, and local jurisdictions and the relationship between local governments. Partnerships between jurisdictions, both public- public and public- private, will be explored as will the use of quasi-governmental agencies.

BPA 381	PUBLIC ADMINISTRATION POLICY, LEGAL ISSUES, LAW & ETHICS	3	College of Criminal Justice and Security	This course analyzes the nature, formation and system of law in the United States, and applies them to the public administration environment.
BPA 410	GOVERNMENT AND NON-PROFIT ACCOUNTING	3	College of Criminal Justice and Security	Students will analyze and discuss budget issues as related to both government and non-profit organizations. This course will focus on accounting, revenue, and expenses allocated to various public administration entities. Students will examine reporting issues and discuss various solutions.
BPA 411	PUBLIC FINANCE: SOURCES, MANAGEMENT, AND REPORTS	3	College of Criminal Justice and Security	This course explores the sources of revenue necessary to operate public programs, the ways in which funds are allocated and utilized, the responsibility for public stewardship, economic fiscal policy, and includes the need for accurate and complete reporting. This course will cover different approaches to public finance by federal, state, and local agencies.
BPA 421	ORGANIZATIONAL BEHAVIOR AND ETHICAL RESPONSIBILITY	3	College of Criminal Justice and Security	This course focuses on the study of individual and group behavior in public administration settings and explores the ethical issues to which employees are exposed. Students will learn to recognize ethical dilemmas and resolve them through active deliberation and sound decision making.

BPA 431	LEADERSHIP IN THE PUBLIC SECTOR	3	College of Criminal Justice and Security	Leaders in public organizations face daily challenges. In this course, students will choose a contemporary leader and study his/her leadership style, strengths, and core values. Students will examine the application of these characteristics in public administration. This course will also help students learn to manage conflict, negotiate, and develop effective leadership skills.
BPA 441	URBAN AND REGIONAL PLANNING	3	College of Criminal Justice and Security	This class addresses the importance of planning for future growth along with evolving land use patterns. Issues like urban and suburban sprawl, infill, density, redevelopment, and transportation modalities will be covered. Tools for implementing general plans, zoning, and eminent domain will be addressed.
BPA 451	CAPITAL IMPROVEMENT PLANNING & MANAGEMENT	3	College of Criminal Justice and Security	As today's public infrastructures like roads, parks or water treatment facilities near the end of their design lifecycle, it is important to begin planning for renewal/restructure. This course will explore planning, building and maintaining these infrastructures while addressing the impact on stakeholders.
BPA 461	CONTEMPORARY ISSUES IN PUBLIC ADMINISTRATION	3	College of Criminal Justice and Security	Utilizing skills developed in civic foundation coursework completed throughout this program, students will demonstrate a deeper understanding of regulatory and environmental impact, issues, and topics in the public administration field. This course will provide an emphasis on content mastery assessment.

BRM 216	INTRODUCTION TO THE RETAIL INDUSTRY	3	School of Business	This course provides students with an overview of the retail industry. Topics include the types of retailers, key drivers and trends, the importance of customer-facing activities, and exploring the current issues facing retailers, such as customer relationship management, industry consolidation, and dynamic changes in multichannel promotion through social media and website offerings. As a broad survey of the industry, this course provides you with a framework and set of concepts that will support the remainder of your core courses.
BRM 226	CUSTOMER SERVICE MANAGEMENT	3	School of Business	This course presents strategies for effective customer service to increase satisfaction and retention within the retail environment. Students will be prepared to build customer rapport, analyze risks associated with customer service, and develop skills and strategies to resolve customer conflict. Additional focus will be placed on managing customer interactions to enhance competitive advantage within the retail sector.
BRM 236	SALES, TOOLS, AND STRATEGIES	3	School of Business	This course is an examination of basic principles involved in the sales process, the relationship between sales and business objectives, and managing the sales force and customer relationships. Emphasis is placed on sales planning, developing specific goals to meet the business objectives, and adapting to changes in the market.
BRM 246	RETAIL MARKETING: MERCHANDISING	3	School of Business	This course presents strategies for capitalizing on consumer behavior and growing retail market share through the application of research, advertising, and innovative retail merchandising tactics. Students will be prepared to execute the elements of the marketing mix and merchandising strategies to be successful in a retail setting.

BRM 266	RETAIL OPERATIONS: SUPPLY MANAGEMENT	3	School of Business	This course is an examination of the retail operations function of retail management including value chain logistics, channel management, vendor relationships, and purchasing. Students will be prepared to develop strategic alliances and optimize the supply chain in a retail setting.
BRM 268	PRINCIPLES OF FOOD RETAILING	3	School of Business	This course will introduce merchandising, operating, technology, and financial considerations necessary for successful food retailing management. Students will evaluate and apply principles unique to food retail organizations such as: food store formats, food store operations, product replenishment, and the integrated food supply chain. Other topics include manufacturing and wholesale distribution, and financial principles specific to the food retail industry.
BRM 276	LEADERSHIP AND SUPERVISION IN RETAIL CAPSTONE	3	School of Business	This is the capstone course for retail fundamentals. The course provides students with the opportunity to integrate and apply learning from their program of student in a comprehensive manner. Students will demonstrate competency and skills in the leadership and supervisory function of retailing. Emphasis will be on a practical skill-building approach to leadership and supervision so students develop skills that can be applied within the retail environment. Students will examine leadership styles, management principles, ethics and social responsibility, conflict resolution, and culturally diverse aspects of leadership.
BRM 277	LEADERSHIP AND SUPERVISION IN RETAIL APPLIED CAPSTONE	3	School of Business	This is the applied capstone course for retail fundamentals. The course provides students with the opportunity to integrate and apply learning from their program of study in a comprehensive manner within work environment. Students will demonstrate competency and skills in the leadership and supervisory function of retailing. Emphasis will be on a practical skill- building approach to leadership and supervision so students develop skills that can be applied within the retail environment. Students will examine leadership styles, management principles, ethics and social responsibility, conflict resolution, and culturally diverse aspects of leadership.

BRM 353	PRODUCT AND BRAND MANAGEMENT	3	School of Business	This course presents an analysis of the goods and services lifecycle from conception to purchase. Special emphasis is placed on design and implementation of successful product development and brand management strategies that deliver value to consumers.
BRM 360	RETAIL DATA ANALYTICS FOR DECISION MAKING	3	School of Business	The business of retail has embraced big data in nearly all phases of planning. Some retail businesses exist only online, forgoing the traditional "brick and mortar" locations that dominate the industry. With the emergence of online shopping, businesses are recognizing the need to enhance their future growth by connecting with their consumers through digital channels. The retail analytics certificate emphasizes an understanding of Internet marketing, consumer behavior, web analytics, data analysis, inventory management, increased sales and anticipated trends. Upon completing this certificate, students will possess the knowledge and skills necessary to effectively manage a retail business using data analytics.
BSA 310	BUSINESS SYSTEMS	3	College of Information Systems and Technology	This course reviews common business systems and their interrelationships. Business systems covered include finance, accounting, sales, marketing, human resources, legal, and operations. Emphasis is placed upon the inputs and outputs of information systems, the potential for integration of the systems, and information systems security.
BSA 375	FUNDAMENTALS OF BUSINESS SYSTEMS DEVELOPMENT	3	College of Information Systems and Technology	This course introduces the fundamental, logical, and design considerations addressed during system and application software development. It provides a solid background in information systems analysis and design techniques through a combination of theory and application. The Systems Development Life Cycle will be fundamental to the course.

BSA 376	SYSTEMS ANALYSIS AND DESIGN	3	College of Health Sciences and Nursing	This course introduces the fundamental, logical, and design considerations addressed during system and application software development in health care environments. It provides a solid background in information systems analysis and design techniques through a combination of theory and application. Systems development life cycle (SDLC) will be fundamental to the course.
BSA 385	INTRO TO SOFTWARE ENGINEERING	3	College of Information Systems and Technology	This course introduces the fundamental, logical, and design considerations addressed during system and application software development. It provides a background in applications software development and testing techniques through a combination of theory and application.
BSA 411	SYSTEMS ANALYSIS METHODOLOGIES	3	College of Information Systems and Technology	This course provides the student with an understanding of several methodologies available to identify business problems and the possible information system solutions for addressing problems.
BSA 412	SYSTEMS ANALYSIS TOOLS	3	College of Information Systems and Technology	This course builds upon the methodologies examined in Systems Analysis Methodologies by providing an emphasis on analysis tools - computer and non-computer supported. Emphasis is placed on when and how Microsoft Visio may be used for analysis.

BSA 413	IT SERVICE MANAGEMENT	3	College of Information Systems and Technology	This course addresses IT service management best practices from the perspective of the IT Infrastructure Library (ITIL) framework. The ITIL framework consists of Service Strategy, Design, Transition, Operation, and Continual Service Improvement.
BSA 425	BSIT CAPSTONE	3	College of Information Systems and Technology	As the capstone course for a Bachelor of Science in Information Technology (BSIT), students will complete a multi-faceted academic project/paper that demonstrates mastery and assesses the level of competency for the stated outcomes of the BSIT program. Additionally, students will complete the development of their career portfolios to illustrate skills gained throughout the course of this program.
BSA 500	BUSINESS SYSTEMS I	3	College of Information Systems and Technology	This course introduces business systems. The course first reviews the basics of the business environment and influences on that environment. Then accounting and finance business systems are reviewed.
BSA 502	BUSINESS SYSTEMS II	3	College of Information Systems and Technology	This course reviews the following business systems: marketing, sales, human resources, operations and legal. Emphasis is placed upon the inputs and outputs of information systems and the potential for integration of the systems.

BSA 505	IS AUDITING PROCESSES	3	College of Information Systems and Technology	This course focuses on information systems auditing, IT governance and protection of information assets. An audit preparation guide is created. Applicable laws, regulations, standards, guidance, techniques and professional ethics will be applied. Control self-assessment is evaluated as a process of continuous IS audit preparation.
BSA 510	IT GOVERNANCE AND MANAGEMENT	3	College of Information Systems and Technology	This course provides an intensive workshop where the student will gain the hands-on experience and knowledge required to provide assurance that the enterprise has the structure, policies, accountability mechanisms and monitoring practices in place to achieve the requirements of corporate governance of IT. This course is based on the Governance and Management of IT Domain of the ISACA Model Curriculum for IS Audit and Control. ISACA (www.isaca.org) is a leading global provider of knowledge, certifications, community, advocacy and education on information systems (IS) assurance and security, enterprise governance and management of IT, and IT-related risk and compliance.
BSA 515	ACQUISITION, DEVELOPMENT AND IMPLEMENTATION OF IS	3	College of Information Systems and Technology	The Information Systems Operations, Maintenance and Support domain is divided into ten topic areas that focus on service level management, maintenance of information systems, problem and incident management, change and configuration management, and backup and restoration of systems. The objective of this domain is to ensure that students understand and can provide assurance that the practices for systems operations and maintenance meet the enterprise's strategies and objectives.
BSA 520	OPERATIONS, MAINTENANCE AND SUPPORT OF IS	3	College of Information Systems and Technology	The Information Systems Acquisition, Development and Implementation domain is divided into six topic areas that focus on business case development, project management and controls. The objective of this domains to ensure that students understand and can provide assurance that the practices of acquiring, developing, testing and implementing information systems meet the enterprise's strategies and objectives.

BSA 525	INFORMATION ASSETS PROTECTION	3	College of Information Systems and Technology	The Protection of Information Assets domain is divided into five topic areas that focus on design and implementation of system and security controls, data classification, physical access, and the process of retrieving and disposing of information assets. The objective of this domain is to ensure that students understand and can provide assurance that the enterprise's security policies, standards, procedures and controls ensure the confidentiality, integrity and availability of information assets.
BSA 530	IT ARCHITECTURE	3	College of Information Systems and Technology	The IT Architecture course covers the material to allow a professional to design, develop, document and deliver IT architectural solutions for the business environment. The IT Architecture course is aligned to the Oracle Reference Architecture Overview certification requirements and covers Application Infrastructure, Security, Engineering, Integration, Management and Monitoring, Service Orientation and User Interaction.
BSA 550	CUSTOMER RELATIONSHIP MANAGEMENT	3	College of Information Systems and Technology	The Oracle Fusion Middleware 11g Business Intelligence Applications 7 for CRM Certified Implementation Specialist Certification identifies professionals that are skilled in implementing solutions based on Oracle Business Intelligence Applications for CRM source systems. The certification covers skills such as: installing and configuring Oracle BI Applications, using the Data Administration Console, configuring security for Oracle BI Applications, and customizing Oracle BI Applications. The exam targets the intermediate-level implementation team member. Up-to-date training and field experience are recommended.
BSA 570	ANALYTIC PROGRAMMING	3	College of Information Systems and Technology	This course covers the subject of Business Analytics Statistics. The analysis of large quantity of data through the use of statistical tools to help guide business operations has become an essential component of the modern organization. Topics in this course included foundational statistical concepts, t Tests, Analysis of Variance, Linear Regression, diagnostic and data analysis. This course is aligned to the SAS Statistical Business Analyst Using SAS 9: Regression and Modeling certification.

BSA 580	STATISTICAL BUSINESS ANALYTICS	3	College of Information Systems and Technology	This course covers Statistical Business Analytics. The course includes the topics of analysis of variance, linear and logistic regression, preparing inputs for predictive models, and measuring model performance. This course is aligned to the SAS Statistical Business Analyst Using SAS, Regression and Modeling certification.
BSCEU 1005	PROBLEM-SOLVING SKILLS	0.6	School of Continuing Education	One of the essential constants in business is that problems arise that need to be solved. This course provides students with the tools to solve problems. In a corporate environment, using specialized groups to solve problems is becoming more and more common. Knowing how to work in groups to solve problems will enhance the student's effectiveness and value to an organization. This course will show students the fundamentals of problem solving -- from defining a problem, to identifying solutions and then presenting to the key decision-makers in an organization. This course provides 0.6 continuing education units in one, 6-hour workshop.
BSCEU 1010	BASIC BUSINESS MATH	0.6	School of Continuing Education	Most business transactions involve some form of math. Transactions commonly include commissions, markups and markdowns, discounts, sales tax, interest calculations, and installment loan payments. This course begins with a review of the basic mathematical concepts of whole numbers, fractions, decimals, percentages, simple equations, and percentage formulas. Students will then learn how these basic concepts are applied to business applications. Graphs commonly used in business, as well statistical applications for business are presented. This course provides 0.6 continuing education units in one, 6-hour workshop.
BSCEU 1015	DEALING WITH CHALLENGING CUSTOMER INTERACTIONS	0.6	School of Continuing Education	Customer service representatives and client- facing employees often find themselves faced with challenging customer situations. It is helpful to be equipped with proven strategies to effectively resolve such situations. In this course, students will explore methods to deal with common customer interactions, which may be difficult. Students will focus on establishing a solid customer relationship, overcoming communication issues, and resolving conflict. This course provides 0.6 continuing education units in one, 6-hour workshop.

BSCEU 1020	EMOTIONAL INTELLIGENCE FOR MANAGERS	0.6	School of Continuing Education	To be an effective manager it is important to be aware of emotional intelligence and its significant impact on the ability to manage effectively. In this course, students will assess their current emotional intelligence capabilities, determine their strengths, and identify areas of improvement. Students will examine how emotions affect behavior and how those behaviors impact their relationships with others. Students will also be introduced to strategies for managing the emotional energy in themselves and others. This course provides 0.6 continuing education units in one, 6-hour workshop.
BSCEU 1025	BASIC COMPUTER SKILLS	0.6	School of Continuing Education	In today's workplace a person must be computer literate to be productive. Computer literacy is a combination of understanding the hardware, software, operating system and productivity software elements and how they interact. In this course, students will learn with basic computer components and function of each component. Using Windows 7 as the operating system, students will explore methods for managing files and folders and customizing the desktop. Students will learn about various software applications used to be productive in a business environment. This course provides 0.6 continuing education units in one, 6-hour workshop.
BSCEU 1030	PROJECT MANAGEMENT SKILLS FOR NON-PROJECT MANAGERS	0.6	School of Continuing Education	Even if not formally employed as a project manager, one may occasionally be called upon to lead a small- to medium-sized project for their organization. In this course, students learn the basics of the project management process and the tools needed to manage small- to medium-size projects. Project planning and project implementation will be explained and how these processes play into delivering a project on time and on budget. This course provides 0.6 continuing education units in one, 6-hour workshop.
BSCEU 1035	ETHICAL DECISIONS-MAKING ESSENTIALS	0.6	School of Continuing Education	Making ethical decisions can be a difficult task. The decision-maker must collect details about the situation, consider the ethical issues and people involved, and then implement the best action possible. This course provides students with a self-assessment, tools, and techniques to make ethical decisions. Students will be able to use ethical decision-making concepts to select the best decision in various ethical situations. This course provides 0.6 continuing education units in one, 6-hour workshop.

BSCEU 1040	MANAGING CONFLICT	0.6	School of Continuing Education	In order to manage conflict, it is helpful to both understand how individuals react in conflict situations and identify what they can do to reduce conflict. This course will provide students with tools and assist you in understanding and implementing strategies that will help you manage conflict effectively. This course provides 0.4 continuing education units in one, 4-hour workshop.
BSCEU 1045	MAKING EFFECTIVE DECISIONS	0.6	School of Continuing Education	Decision-making skills are essential in today's workplace. Whether making simple or complex decisions, one needs to consider various factors that influence a decision and its results. This course provides methods and techniques used to make effective decisions. Students learn decision-making concepts and strategies used to decide upon the best choice in various situations. This course provides 0.6 continuing education units in one, 6-hour workshop.
BSCEU 1100	BASIC WORD PROCESSING WITH MICROSOFT WORD	0.6	School of Continuing Education	Microsoft Word plays a critical role in assisting employees in their everyday word processing tasks. In this course, students will explore the basic functions of Word, which is designed to help users move smoothly through the task of creating professional documents. Students will learn how to create and edit simple documents, format, add tables and lists, incorporate design elements, and proof documents. This course provides 0.6 continuing education units in one, 6-hour workshop.
BSCEU 1150	ADVANCED WORD FEATURES	0.6	School of Continuing Education	Microsoft Word plays a critical role in assisting employees in their everyday word processing tasks. In this course, students will explore the advanced features of Word including creating complex documents, automating tasks, and methods to maintain consistency between documents. Students will learn how to control text flows between paragraphs and pages, insert hyperlinks, and modify how graphics and text appear together on the pages. This course provides 0.6 continuing education units in one, 6-hour workshop.

BSCEU 1200	ORGANIZING YOUR DAY WITH OUTLOOK BASICS	0.4	School of Continuing Education	Productivity software is a vital part of today's workplace. Microsoft Outlook plays a key role in assisting employees in organizing and managing their day and communications, both internally and externally. In this course, students will explore the basic features of Outlook and the interface, Students learn how to create and send emails, to use Outlook to manage appointments and meeting, maintain contact information, create Tasks and Notes, and customize the Outlook interface. This course provides 0.4 continuing education units in one, 4-hour workshop.
BSCEU 1240	ADVANCED OUTLOOK FEATURES	0.4	School of Continuing Education	Productivity software is a vital part of today's workplace. Microsoft Outlook plays a key role in assisting employees in organizing and managing their day and communications, both internally and externally. In this course, students will explore the more advanced features of Outlook. Students learn how to use advanced messaging options, calendar management, share Outlook workspaces with other users, and manage Outlook data files. This course provides 0.4 continuing education units in one, 4-hour workshop.
BSCEU 1300	FOUNDATIONS OF MICROSOFT EXCEL	0.6	School of Continuing Education	Organizations rely on information to make sound decisions. The ability to make sense of all of that data is becoming more challenging and a tool like Microsoft Excel can assist in organizing and presenting data. In this course, students will explore the basic foundational skills of Microsoft Excel. Students will learn how to perform calculations, modify and format worksheets, print workbooks, and manage workbooks. This course provides 0.6 continuing education units in one, 6-hour workshop.
BSCEU 1350	INTERMEDIATE FEATURES OF MICRSOFT(R) EXCEL(R)	0.8	School of Continuing Education	Using Excel(R) software's advanced spreadsheet functions, users are able to improve their efficiency and effectiveness by using powerful tools provided in the software. Users can extract and organize data using tools and formulas, sort and filter data, create PivotTables and PivotCharts, and customize workbooks. In this course, advanced formulas and various tools to analyze data will be presented. Students will learn to organize table data, present data as charts, and enhance the look and appeal of workbooks by adding graphical objects. This course provides 0.8 continuing education units over one 8-hour workshop.

BSCEU 1375	ADVANCED FEATURES OF MICROSOFT(R) EXCEL(R)	0.8	School of Continuing Education	For users that are called upon to analyze and report on data frequently, the advanced features of Excel(R) automate repetitive processes so users can focus on what is really important. This course will take a deeper dive into the advanced functions of Excel including, how to use Excel to collaborate with colleagues, automate complex or repetitive tasks, and use conditional logic to construct and apply elaborate formulas and functions. Having this knowledge will put the full power of Excel right at the user's fingertips. This course provides 0.8 continuing education units in one, 8-hour workshop.
BSCEU 1400	INTRODUCTION TO MICROSOFT POWERPOINT	0.6	School of Continuing Education	In today's workplace, information is constantly streaming in and increasing each day, and with so much information it can be difficult to grab people's attention. This course introduces students to the basic concepts of Microsoft(R) PowerPoint(R) for presenting clear, organized, and engaging information. Students will learn how to use the vast array of features and functionality of PowerPoint(R) as well as identify ways to organize content, enhance it with high-impact visuals, and effectively deliver content. This course provides 0.6 continuing education units in one, 6-hour workshop.
BSCEU 1470	ADVANCED FEATURES OF MICROSOFT(R) POWERPOINT(R)	0.8	School of Continuing Education	Professionals are commonly called upon to deliver presentations with little notice, at multiple venues, and with varying requirements. Given all the variables, it may seem overwhelming for presenters to deliver their content on time and to a variety of audiences. Microsoft(R) PowerPoint(R) 2013 provides tools to help users deliver content for nearly any situation, using time effective software that provides predesigned templates. This course will introduce students to an advanced-level usability, security, collaboration, and distribution functionality of PowerPoint(R) 2013. This course provides 0.8 continuing education units in one, 8-hour workshop.
BSCOM 100	INTRODUCTION TO COMMUNICATION	3	School of Business	This course is an introduction to the field of communication with emphasis on the history of communication study, concepts important to all areas of communication, the contexts in which communication occurs, and the issues that must be faced by students of communication. The course serves as an introduction to the strands of communication: interpersonal, small groups and teams, mass communication, organizational, intercultural, and rhetoric.

BSCOM 234	FOUNDATIONS OF INTERPERSONAL COMMUNICATION	3	School of Business	This course includes the application of communication principles, theory, and research to the process of interpersonal communication; includes verbal, nonverbal, listening, conflict management, and communication skills most relevant to a broad range of interpersonal settings.
BSCOM 268	FOUNDATIONS OF MASS COMMUNICATION	3	School of Business	This course surveys the basic theories of mass communication. Ethical and related problems of mass communication will be studied from contemporary and historical viewpoints. The course will encourage a critical analysis of the performance of mass media.
BSCOM 300	ADVERTISING AND THE MEDIA	3	School of Business	This course addresses the elements of advertising and the media. Topics include advertising concepts, selection of media, and the use of media and advertising as marketing communications tools. The course also emphasizes the ongoing convergence of media content and commercial messages and how it is redefining marketing communications.
BSCOM 324	COMMUNICATION RESEARCH	3	School of Business	This course focuses on the research methods employed in the communication discipline and enhancing the understanding of credible sources and accurate information. Students will learn of the most frequently applied components of communication research. Topics may include descriptive statistics, sampling, measures, research design, methodologies, and content analysis.

BSCOM 330	COMPUTER MEDIATED COMMUNICATION	3	School of Business	This course introduces students to the study of computer mediated communication and how it changes, shapes, and develops community through the use of diverse technological and social tools. Topics will include the history of computer-mediated communication, and how these technologies are leveraged in daily life. Students will develop their knowledge of computer mediated communication through immersive experiences of online and networked spaces and communities. Practical application of technology is used to complete communication projects to gain experience and depth of knowledge regarding how technology affects human communication.
BSCOM 336	COMMUNICATION THEORIES AND PRACTICE	3	School of Business	This course explores the various theories of communication that create the foundation for study of communications in the bachelor's degree program at the University of Phoenix. Major communication areas examined in this course include intrapersonal, interpersonal, group and teamwork, organizational, intercultural, and mass media. Each area, along with others, will be studied in greater depth in subsequent courses in the degree program.
BSCOM 348	SMALL GROUP AND TEAM COMMUNICATION	3	School of Business	This course explores the dynamics of group communication and effective team work. Both social and workplace scenarios will be examined. Analytical techniques will be included to provide effective strategies for communication in these contexts.
BSCOM 360	ORGANIZATIONAL COMMUNICATION	3	School of Business	This course examines various theoretical frameworks necessary for effective organizational communication. It analyzes the application of communication strategies within organizations in terms of their effectiveness. It provides the infrastructure necessary for the creation and maintenance of successful communication strategies in organizations.

BSCOM 384	MARKETING COMMUNICATIONS	3	School of Business	This course provides students with the basic concepts and methods related to marketing communications, including communication theories and the communication mix. Emphasis is placed on the marketing mix variables of product, place, price, and promotion, as well as marketing communications tools.
BSCOM 385	PUBLIC RELATIONS AND MESSAGE MANAGEMENT	3	School of Business	This course focuses on the role of public relations in marketing communications and how it can be used to attain organizational marketing and sales objectives. Topics covered in this course include media relations, relationship- building strategies, crisis communication, ethics, and the development of public relations messages.
BSCOM 386	SALES COMMUNICATIONS	3	School of Business	This course addresses the elements of sales communications. Topics include sales promotion, direct sales, personal selling, and customer relationship management as marketing communications tools.
BSCOM 390	INTERCULTURAL COMMUNICATION	3	School of Business	The purpose of this course is to assist students to understand and apply the principles of effective intercultural communication in a diverse society and in global commerce. Students will develop an understanding of why and how cultural issues influence effective communication. This course introduces techniques for improving written, oral, and interpersonal communication skills in response to intercultural settings.

BSCOM 410	MEDIA AND SOCIETY	3	School of Business	The development and evolution of contemporary society have become inextricably intertwined with the development and use of electronic media within the past 100 years. This course explores the complex interactions involving society, information, communication, and the electronic media. Controversial topics that media have brought to the fore, and in some cases caused, will be highlighted.
BSCOM 415	COMMUNICATION LAW	3	School of Business	This course focuses on the U.S. legal environment and its specific laws, court decisions, policies, and regulations that address the freedom and responsibilities that come with the First Amendment to the U.S. Constitution. The personal, commercial, and political exercise of free speech, and its regulation, will be analyzed in this course.
BSCOM 435	CREATIVITY AND COMMUNICATION	3	School of Business	Creativity is described as a process leading to products or processes that are novel, useful, and meaningful. As a result, the designation of creative is inextricably tied up with the process of communicating. This course examines contemporary models of communication. Practical application of these theoretical constructs to the development and enhancement of one's creativity is one of the primary focuses of the course.
BSCOM 460	ETHICS AND COMMUNICATION	3	School of Business	While ethical decision-making permeates every facet of personal and professional life, this course focuses specifically upon ethical issues that are inherent in personal and public forms of communication. Special emphases are placed on ethical issues in commercial communication. Ethical decision-making models will be discussed and applied to cases involving various contemporary and controversial communication topics.

BSCOM 465	COMMUNICATION IN MEDIATION AND CONFLICT RESOLUTION	3	School of Business	Communication is the foundation upon which mediation and other forms of alternative dispute resolution are based. This course starts with an examination of the theoretical basis for ADR in light of communication theory. Then it focuses upon the effective application of theory and practice to achieve meaningful results and to managing conflict in the future.
BSCOM 470	MARKETING AND SALES MESSAGE MANAGEMENT	3	School of Business	This course focuses on bridging the gap between sales and marketing communications through the use of customer message management. Topics covered in this course include creating a sense of value for customers, the development of marketing communications campaigns, the integration of the sales cycle and marketing communications, the use of a single voice to customers across all selling touch-points, and the ethical considerations associated with customer message management.
BSCOM 485	CAPSTONE IN COMMUNICATION	3	School of Business	This is the capstone course for students pursuing the bachelor's of science in communication. The course provides students with the opportunity to integrate and apply learning from their professional program of study in a comprehensive manner. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth in the study of communication, the benefits of lifelong learning, and the impact of these elements on their future.
BSHS 305	HISTORICAL DEVELOPMENT OF HUMAN SERVICES: AN INTRODUCTION	3	College of Social Sciences	In this course students will learn the historical roots of human services and the creation of the human services profession. An investigation of current and historical legislation and how legislation is influenced by public and private attitudes provides a foundational understanding of basic human services ideology. A deep exploration of economic and governance systems affecting service delivery serves to develop essential skills for understanding and interpreting historical dynamics related to advocacy and social change initiatives in human services. Analysis of historical data and exposure to the range of political perspectives facilitates a general introduction and integration to the overall experience of the human service worker's investment in the multidimensional field. Students will complete Module 1 of the MHF training. (3 credits).

BSHS 325	HUMAN SYSTEMS AND DEVELOPMENT	3	College of Social Sciences	Students will demonstrate a basic understanding of human development across the lifespan and of systems for meeting fundamental human needs. The course provides perspectives on individual roles in families, groups, and interpersonal relationships in communities, society, and organizations. Essential coursework components of human systems and development include theories of group dynamics and diversity, culture, aspects of human sexuality, social systems theory, and general processes effecting both developmental and social change. Students will complete Module 8 of the MHF training. (3 credits).
BSHS 335	ETHICS AND VALUES FOR HUMAN SERVICE PROFESSIONALS	3	College of Social Sciences	In this course students will become familiar with ethical standards for human service workers as outlined by the National Organization for Human Services (NOHS). An emphasis is placed on understanding concepts of least intrusive intervention, least restrictive environment, facilitating client self-determination, appropriate professional boundary maintenance, and employing interdisciplinary team approaches to problem-solving. Students will demonstrate understanding of requirements for client confidentiality, electronic record keeping, and portability of client information.
BSHS 345	DIVERSITY AND SPECIAL POPULATIONS	3	College of Social Sciences	The emphasis of this course is on the context of diverse social systems including roles of ethnicity, gender, sexual orientation, cultural dynamics, socio-economic status, variations of learning styles, and individual ability in evaluation and client needs assessment. To complete this course, a student must demonstrate knowledge and understanding of human limitations and capacity, and of the resilient nature of humans. The course involves an exploration of special populations to include individuals with disabilities, economically disadvantaged families and foster children, single parents including single pregnant women, displaced homemakers, individuals with barriers to educational achievement (including those with limited English proficiency), the aging and elderly, individuals preparing for nontraditional employment, tribal communities, refugees and immigrants, and underserved or hard- to-serve populations in general. Students will complete Module 9 of the MHF training.
BSHS 355	DELIVERY OF HUMAN SERVICES: THEORY AND PRACTICE	3	College of Social Sciences	This course facilitates identification of specific human needs and conditions, which are the core of the human services profession, and the range of human service delivery systems that address them. The conditions most often encountered with addictions and chemical dependency, aging populations, crime, mental and physical illnesses, poverty, delinquency and developmental disabilities will be explored in depth. On completion of this course students will demonstrate knowledge of theory and skills necessary for employing the major models of human service delivery at individual, group and community levels with attention to global influences effecting social policy and the political and ideological perspectives on human services delivery internationally. Students will complete Module 2 of the MHF training.

BSHS 375	INFORMATION SYSTEMS AND TECHNOLOGY IN HUMAN SERVICES	3	College of Social Sciences	This course provides the foundation for appropriate integration and use of information management systems crucial to the delivery of human services. Skills developed include methods of obtaining, organizing, analyzing, evaluating, maintaining and disseminating information. Domains addressed in the course involve the application of confidentiality guidelines and the appropriate use of client data, utilizing technology to assist in conducting needs assessments and basic program evaluation, and accessing research literature for advocacy and education initiatives. Basic computer skills such as word processing and the use of spreadsheets for maintaining a database are addressed along with a survey of assistive technology available for a range of special needs populations.
BSHS 385	INTERPERSONAL COMMUNICATION AND INTERVIEWING SKILLS	3	College of Social Sciences	Human Services delivery requires expertise in communicating well with a wide range of people and groups. A key component of effective communication is the development of genuine positive regard for others, skill in establishing empathic relationships, and obtaining information needed for effective intervention with successful outcomes. This course provides knowledge of theory and practice in interpersonal communication. Students will learn skills for resolving conflict, establishing positive rapport, assisting clients in becoming clear about goals and focusing on outcomes, and practicing professional and ethical behaviors in all client interactions. Students will complete Modules 3, 4, 5 and 6 of the MHF training.
BSHS 395	CLIENT ASSESSMENT AND PLANNING	3	College of Social Sciences	This course enables students to understand the process of conducting needs assessments, developing an action plan for services, implementing the action plan, and subsequent evaluation of outcomes. Students will learn the process of developing goals and measurable objectives, designing an individualized program for clients, implementing the program, and using ongoing assessment and evaluation of results to revise or modify individualized programs. Students will demonstrate competency in identifying needs, and mobilizing resources and necessary supports for assisting clients in meeting goals. Students will complete Module 10, 11 and 12 of the MHF training.
BSHS 405	INTERVENTION, DIRECT SERVICE DELIVERY & CASE MANAGEMENT	3	College of Social Sciences	This course provides an overview of the role of the human service worker as a change agent with a focus on the application of theory and skills necessary for providing interventions and direct service delivery to individuals and groups. Specifically, students will develop competence in professional skills such as case management, client intake and interviewing, and basic group and individual counseling techniques. Additionally, students will learn how to access resources, use consultation, and make referrals. Students will complete Module 16 of the MHF training. (3 credits) Prerequisite: BSHS 395.

BSHS 406	FAMILY AND SOCIAL SYSTEMS: CONTEMPORARY TRENDS AND ISSUES	3	College of Social Sciences	Theories of public and private families, as differentiated by societal interaction, are explored with a focus on family systems as they exist within social systems. Micro and macro family environments are investigated. Students will examine theories involving the interconnected and interdependent features of contemporary families in a range of social systems. Topics include the family, the state, and social policy with historical perspectives from federal and state legislation. Students will debate current trends in social policy, the efficacy of social welfare systems on a global scale, and demonstrate an understanding of the concept of practical compromise. Roles of the human service worker as advocate and service provider in the family systems context will be addressed.
BSHS 407	FAMILY VIOLENCE ACROSS THE LIFESPAN: A MULTI-STRATA PROBLEM	3	College of Social Sciences	This course explores the phenomenon and social problem of family violence with both macro- and micro-theory explanations and an in-depth literature review. Students will demonstrate an understanding of assessment strategies, consequences and contributing factors of family violence across socio-economic strata and the full range of diverse populations experiencing family violence. Attention is focused on professional and social responses that include clinical interventions, educational initiatives within schools, and responses to the disclosure of family violence in agency and private settings. Skills to develop a human services approach to preventing family violence are enhanced in this course; students are required to outline their own personal and professional roles in the movement to end family violence.
BSHS 408	CHILDHOOD ABUSE AND NEGLECT	3	College of Social Sciences	This course focuses on the segment of family violence involving physical child abuse, child sexual abuse and exploitation, child neglect and psychological maltreatment of children. Students will examine the scope of these problems and the characteristics of both victims and perpetrators while conducting a search for patterns and dynamics of each distinction. Students will demonstrate knowledge and understanding of reporting requirements, treatment interventions, repressed memory controversy, working within the criminal justice system and the tenets of the Children's Justice Act addressing investigation, prosecution and judicial handling of abuse and neglect cases. Areas of focus involve various forms of each category including indicators for the range of abuses on an international scale with child labor, slavery, and child prostitution issues.
BSHS 411	FIELD EXPERIENCE/PART II	3	College of Social Sciences	Curriculum Guide Description 04/01/2004: This course will provide relevant information and support to assist students in their second field experience placement experience in a human service organization. Students will conduct interviews, create learning contracts, and develop a further understanding of their role in the human service delivery system. Weekly workshops are provided to offer support and supervision of student activities in the field. Students will complete a total of 100 hours of field experience during a 10-week period. Supervision will be provided on a weekly basis in 2-hour group sessions. Students will be exposed to the 12 Core Competencies of the BSHS program, with an emphasis on Assessment, Documentation, Facilitation of Services, and Community Living Skills and Supports.

BSHS 415	FIELD EXPERIENCE I	3	College of Social Sciences	This is a 15-week course requiring at least 175 hours of field experience, or an average of 12 hours per week committed to a field placement site. Students will work in a human services setting under the supervision of a qualified professional. In addition to providing direct service, students will attend a weekly 2-hour class for faculty supervision and evaluation of core competency development. Typical activities of a field placement involve employing skills acquired so far in the program progression: conducting interviews, working directly with clients and groups, developing action plans and documenting. Students will complete Modules 13 and 14 of the MHF training.
BSHS 415O	ORIENTATION TO FIELD EXPERIENCE	0	College of Social Sciences	This course will provide an overview of the expectations and requirements for a successful Field Experience. Students will be provided with information regarding field placement with approved sites, documentation of field experience, and requirements for supervision. Orientation is offered well in advance of the first Field Experience course, BSHS/ 415 to provide students ample time for field site selection. (0 credits) Prerequisite: BSHS 375. May not be taken as Directed Study.
BSHS 425	ADMINISTRATION & MANAGEMENT OF HUMAN SERVICE PROGRAMS	3	College of Social Sciences	Administration and management involve components of indirect services associated with systematic delivery of direct human services. Students will learn theories of strategic planning, human resource management, strategies for evaluation and planning the development of human service organizations, elements of agency operations, risk management, budgeting, and fiscal acquisition through grant writing and contract negotiation. The emphasis of this course is on leadership development, and managing professional and volunteer staff. Additional content areas addressed in the course involve advocacy efforts and grass roots movements focused on constituency building.
BSHS 426	HUMAN SERVICES MANAGEMENT: THEORY & PRACTICE	3	College of Social Sciences	This course traces the historical context of human services management as it relates to current theory and practice. Students will examine strategies for managing an integrated, diverse workforce and prepare to be generalists, understanding the scope of leading an organization with commonly encountered agency pressures. Students will employ learned management practices to inspect, distinguish, and measure the important attributes of program management and supervision. By demonstrating a basic understanding of organizational behavior and the challenges of embracing workforce diversity, dynamic systems change, performance evaluation and effective communication with a range of Para-professional and professionals, students will explore their roles as managers in the growing human services field. (3 credits). Prerequisite: BSHS/425

BSHS 427	CRITICAL THINKING SKILLS IN MANAGEMENT DECISION-MAKING	3	College of Social Sciences	This course will familiarize students with strategies related to making sustainable decisions. Techniques used to make decisions, solve problems and lead environments will be explored. Concepts of strategic planning, organizing and leading are examined to link these basic principles to create a healthy and thriving workplace environment. Specific details to human services are considered and methods for service delivery to needs-based populations and the workers who serve in this capacity. Students are introduced to, and will demonstrate understanding of, the Six Sigma elements and five-step approach for process improvement. (3 credits). Prerequisite: BSHS/426
BSHS 428	HUMAN SERVICES PROGRAM DESIGN AND PROPOSAL WRITING	3	College of Social Sciences	This course introduces students to the purposes, challenges and benefits of program design and grant writing. Students will review components of each and conduct a needs assessment and develop a business case for implementation on program design. Special attention will be given to research for finding available funding sources and how to form important partnerships. Students explore the methods of research using quantitative, qualitative and mixed-method program design concepts. Students will examine concepts of logic models and their impact on people, processes, and conditions related to program design. Using a specific framework, learners will uncover funding possibilities and use tools to prepare for the rigor related with grant writing. Resources and tools to secure funding for state, federal and private human services programs and agencies are examined. Students will be introduced to the processes, obstacles and costs associated to grant writing and program design.
BSHS 435	RESEARCH AND STATISTICS IN HUMAN SERVICES	3	College of Social Sciences	This course provides an overview of research methods and appropriate use of statistics in the social sciences. A component of program development and evaluation involves knowledge of theory related to understanding research and statistics in the human services arena. The scientific method, research tools, data collection, and analysis will be reviewed. Understanding research and developing the ability to critically evaluate published research reports will be emphasized. Statistical concepts will be reviewed, and students will gain a conceptual understanding of underlying principles of research and statistical analysis. Statistical software will be introduced, and students will compute descriptive and inferential statistical data. Students will practice developing research designs and conducting statistical analyses.
BSHS 437	SOCIAL SYSTEMS AND AGING	3	College of Social Sciences	This course traces the origins of social systems for the aging around the world, followed by an examination of program types, the effects on retirement, demographic changes, political sustainability of social programs for the aging, institutional settings and labor supply. Students will define and measure population aging by comparing and contrasting U.S. data with other countries by exploring elderly dependency and age-dependency ratios. Additional topics for discussion and demonstrated understanding by students include: the biology of aging and the pathology of memory, disengagement theory, mental health issues such as depression, suicide, and the psychology of aging, the aging family and changes in family structure, intra- and inter-generational relationships across various societies, and healthful aging ideology.

BSHS 438	CARE FOR AGING POPULATIONS	3	College of Social Sciences	The course is an exploration of various living environments for aging and elderly including retirement communities, living with relatives and/or children, independency, assisted living, the goodness-of-fit between lifestyle and housing, and managing long-term care. Students will demonstrate knowledge of segregated versus age-integrated residential settings and the impact on residents. An in-depth investigation of care-related issues across the growing aging population will include topics such as chronic illness, subsidized and un-subsidized healthcare related expenses, and needs assessment protocol. The basic model and principles of integrative, interdisciplinary healthcare is presented as the foundation for a team approach to the development of intervention plans, strategies of care, and implementation.
BSHS 439	GRIEF, LOSS AND END OF LIFE ISSUES	3	College of Social Sciences	In this course students will learn strategies for facilitating the transition from curative measures to palliative care for the relief of emotional/psychological distress, pain, and a range of physical symptoms. Core competencies involve demonstrated learning of methods for anticipating the demands of end-of-life caregiving including advanced directives, 24/7 services, hospice case management, care and placement options, and easing the common challenges as individuals and families move from care and grief modalities to acceptance and healing. Students will demonstrate understanding of patient and caregiver needs and roles in late life care with topics that include: practical care assistance and early preparation, referral for financial and legal assistance, comfort and dignity issues, respite care, grief support, focusing on client values and concerns, and addressing family conflict.
BSHS 445	SURVEY OF CRISIS AND MENTAL HEALTH ISSUES AND INTERVENTIONS	3	College of Social Sciences	In this course students explore the relationship between mental health and human service delivery systems in the United States as well as global initiatives for improving the international service-base. Students will learn to define and describe the nature and process of crisis and the impact of trauma-causing events on the mental health of diverse clients. Students will compare and contrast the range of service delivery modalities and networks, including the operation of emergency management systems, and will demonstrate understanding of roles and skills needed when services are provided in emergency and crisis situations. The course facilitates development of skills necessary for assessing and managing suicide risk. Students will complete Module 15 of the MHF training.
BSHS 455	WORKING WITH ADDICTIONS	3	College of Social Sciences	This course introduces students to the biology of addiction, including brain reward mechanisms, the role of environment and genetics, psychodynamics, and the impact of addiction on individuals, families, and communities. The roles of addiction in society in relationship to the judicial system, treatment systems, progressive era reforms, and complications of dual diagnosis are emphasized in the course. The course examines major models of conceptualizing and integrating prevention, intervention, rehabilitation and maintenance/relapse prevention. Students will learn strategies for accessing supportive measures and case management processes for developing wrap-around action plans for service delivery to individuals and groups with addiction and chemical dependence related issues.

BSHS 456	ADDICTION INTERVENTIONS FOR HUMAN SERVICE WORKERS	3	College of Social Sciences	This course has a focus on familiarizing students with fundamental interventions used in drug and alcohol treatment settings. Students will conduct an investigation of 12-step, alternative support group, secular organization, therapeutic community, and structured in-patient/outpatient approaches to intervention and treatment. Students will be prepared to apply basic skills for assessing and evaluating client needs, making referrals, and working as a colleague in groups of professional service providers. An exploration of commonly used evaluation instruments for assessing level of care is underscored along with tenets of co- facilitation of treatment groups and assessing special population needs. Students will demonstrate foundational knowledge and understanding of guidelines for treatment as outlined by the Substance Abuse and Mental Health Services Administration and the American Society of Addiction Medicine's Patient Placement Criteria.
BSHS 457	CODEPENDENCE AND WORKING WITH FAMILIES	3	College of Social Sciences	In this course students will demonstrate an understanding of the impact of controlling behaviors and supporting dysfunction in relation to addictions and families. Theories of codependency are explored as a disease of loss of selfhood and an addiction resulting from an imbalance of inner and outer self-awareness. Cardinal characteristics of codependence are examined with a focus on chronic, progressive, malignant and treatable features. Students will demonstrate understanding and skill in case management and referral for treatment in addition to assisting clients with recovery goals, self-awareness, self-acceptance, self- responsibility and self-reflection with a focus on prevalence, and consequences of codependency in families.
BSHS 458	ACTION PLANNING, RELAPSE PREVENTION AND AFTERCARE	3	College of Social Sciences	This course provides advanced skills development for the addiction and chemical dependency human service worker. Students will conduct an in-depth evaluation of various treatment approaches employed when preparing action plans with clients. An investigation of comprehensive treatment programs, community action programs, school-based programs, and public health approaches to relapse prevention and aftercare strategies will provide students an opportunity to develop and present an individualized program for a fictional client. Students will demonstrate an understanding of policy issues, managed care, private and public insurance, and advocacy for the consumer in relation to addiction and dependency issues.
BSHS 465	PROFESSIONAL DEVELOPMENT AND IDENTITY	3	College of Social Sciences	In this course students will explore processes for enhancement of self-awareness and the effect of personal style and personality on human service delivery. Students will examine personal values, cultural differences and biases, individual philosophies and belief systems then integrate this understanding of self into the development of an identity as a human service professional. Students will demonstrate strategies for cultivating self-awareness and modeling self-care. Students will investigate the value of membership in supportive professional organizations such as the National Organization for Human Services (NOHS). Students will complete Module 17 of the MHF training.

BSHS 475	FIELD EXPERIENCE II	3	College of Social Sciences	This is a 15-week course requiring at least 175 hours of field experience, or an average of 12 hours per week committed to a community human services placement site. Weekly seminars (2- hours per week) are provided to offer support and supervision of the student activities during their field experience. Students will learn to present issues for supervision. Each student will create a portfolio of his or her competencies and accomplishments for career purposes. This course requires accumulation of the total 350 service hours necessary for graduation from the program (the first 175 hours were compiled in BSHS/415, FE I) and demonstration of a professional attitude and disposition as evaluated in 8 domains: Professionalism, Personal Growth, Sensitivity, Flexibility, Emotional Maturity, Group Membership Skills, Accepting Feedback, and Relationship with Authority. Students will complete Modules 7 and 18 of the MHF training.
BSHS 485	CAPSTONE: ADVOCACY AND CREATING SOCIAL CHANGE	3	College of Social Sciences	This course is the culmination of the BSHS program with a focus on the basic tenets of client advocacy efforts and the processes of creating social change. As human services professionals, students will demonstrate strategies for using their knowledge and skills for understanding and helping clients. The Capstone Project asks students to develop an advocacy action plan that addresses a local need they have determined utilizing a community needs assessment. Students will complete Module 19 of the MHF training.
BSHS 491	FIELD EXPERIENCE /PART III	3	College of Social Sciences	This course will provide relevant information and support to assist students in their third field experience in a human service organization. Students will conduct interviews, learn to create a learning contract, and develop a greater understanding of their role in the human service delivery system. Weekly workshops are provided to offer support and supervision of student activities in the field. Students will complete a total of 100 hours of field experience during a 10-week period. Supervision will be provided on a weekly basis in 2-hour workshop meetings. Students will be exposed to the 12 Core Competencies of the BSHS program, with an emphasis on Advocacy, Crisis Intervention, Organizational Participation, and Vocational, Educational and Career Support.
BSLS 101CA	ORIENTATION TO LIBERAL STUDIES IN EDUCATION	0	College of Education	This course is an orientation to the primary components of the Bachelor of Science in Liberal Studies program. Students will be introduced to the program's progression and degree completion requirements. Field experience, electronic resources, e-portfolio, teacher performance assessments, and student teaching will be discussed.

BSS 395	CONTEMPORARY ISSUES AND FUTURES IN SECURITY	3	College of Criminal Justice and Security	This course examines the principle issues in contemporary criminal justice as well as the extrapolation of such issues toward potential futures within the criminal justice field. Students focus on relevant research about the current environment of the law enforcement field and analytic conclusions of potential future conditions. Students will apply critical thinking to and engage in in-depth discussion of these concepts in this comprehensive study of local, state, national, and global levels of criminal justice administration.
BSS 480	RISK MANAGEMENT PERCEPTION AND COMMUNICATION	3	College of Criminal Justice and Security	In this course, students will explore different global and regional threats; integrate security decision concerns with antiterrorism resource allocation; examine the psychological perception of the risk of terrorism threats; evaluate security plans; and discuss the role of the media in regard to accuracy and timely reporting. The knowledge and skills developed in this course will help prepare students for service in local and global security environments.
BSS 481	COUNTERTERRORISM INTELLIGENCE AND ANALYSIS	3	College of Criminal Justice and Security	This course explores developments and changes in the practice of security operations brought about from global and local terrorist threats to different organizations. Students in this course will study the typology and anatomy of terrorist operations; evaluate intelligence and information sharing in counterterrorism; examine counterterrorism analysis methods and global security tactics; discuss international ethical and legal issues in counterterrorism; and analyze technology issues in counterterrorism. The new skills and knowledge gained will add to the protection, safety, and security of our society.
BSS 482	SECURING CRITICAL INFRASTRUCTURE AND CYBERSPACE	3	College of Criminal Justice and Security	This course explores the developments and changes in security operations to secure the critical infrastructure in public and private environments. Students will explore the critical infrastructure and interdependency; evaluate cybersecurity in post 9/11 global security; discuss the securing of human and property assets; develop proactive planning for protection of assets; and analyze border and transportation security issues. Upon completion of this security course, students will have new skills and knowledge that will aid them in their present or future organizations.

BSS 483	WORLD VIEW OF HOMELAND SECURITY	3	College of Criminal Justice and Security	Students in this course will develop new skills to aid in the protection, safety, and security of our society. Students will examine public and private security collaboration in homeland security response; discuss the leadership task of controlling the human influence in homeland security; analyze and understand the political influence on idea development in homeland security; compare and contrast jurisdictional responsibilities of homeland security programs; and evaluate the goals, objectives, and assessment of homeland security measures.
BUS 212	FOUNDATIONS OF BUSINESS	3	School of Business	In this course, students explore will understand the foundation of business. Topics include the evolution of business, analysis of economic systems, global considerations, the role of business ethics, and business forms. Upon completion, students are better prepared to make informed decisions regarding business types, structures, and behaviors.
BUS 475	INTEGRATED BUSINESS TOPICS	3	School of Business	The integrated business topics course examines strategic business management while integrating topics from previously completed business foundation coursework. This allows students to demonstrate a comprehensive understanding of the undergraduate business curricula with a significant emphasis placed on the assessment of individual outcomes to determine content mastery.
BUS 502	THE EXTERNAL FACTORS THAT IMPACT BUSINESS	3	School of Business	This course examines the functions and issues that business managers need to address in order to compete in an increasingly global market. Topics include an overview of the global environment of business, doing business ethically, quantitative research, business strategy, and marketing.

BUS 503	ACCOUNTING AND FINANCIAL DECISION MAKING	3	School of Business	This course provides students with the basic theories, concepts, terminology, and uses of economics, accounting, and business finance. Students learn practical applications for economics, accounting, and business finance in their professional lives through the integration of fundamental concepts and the analysis of actual business events.
BUS 511	MANAGING THE BUSINESS ENVIRONMENT	3	School of Business	This course begins an introductory sequence to ensure students are successful in a graduate program. The topics include a broad overview of the business environment, including the concepts of management and operations, organizational behavior, human resources, information systems, ethics and the legal environment.
BUS 515	SEMINAR IN BUSINESS TOPICS	3	School of Business	This course examines the functions and issues that business managers need to address in order to compete in an increasingly global market. Topics include an overview of the global environment of business, doing business ethically, quantitative research, information systems, accounting, finance, economics, management, leadership, and marketing.
BUS 721	ISSUES IN OPTIMIZING OPERATIONS	3	School of Advanced Studies	This course evaluates research on how businesses adopt approaches to optimizing their operations and the conditions under which these lead to success. Topics include how an organization adopts best practices, the predictors for a successful quality management program, and the role of project management.

BUS 731	TRANSFORMING THE BUSINESS I	3	School of Advanced Studies	This course requires the learner to integrate all previous learning by identifying and solving organizational problems as a member of an interdisciplinary team. The learner may be joined by doctoral candidates from other disciplines to consider a set of circumstances, define the problem, research the alternative solutions, applying the most appropriate methodology, and construct the best solution that optimizes the needs of the relevant stakeholders. The outcome of this course may be delivered in Transforming the Business II.
BUS 732	TRANSFORMING THE BUSINESS II	3	School of Advanced Studies	This course requires the learner to integrate all previous learning by identifying and solving organizational problems as a member of an interdisciplinary team. The learner may be joined by doctoral candidates from other disciplines to consider a set of circumstances, define the problem, research the alternative solutions, applying the most appropriate methodology, and construct the best solution that optimizes the needs of the relevant stakeholders. The outcome of this course may be a continuation of Transforming the Business I.
BUS 733	TRANSFORMING THE BUSINESS	3	School of Advanced Studies	In this course, students will integrate visionary organizational leadership ideas and practices and apply these to the optimization of organizational resources in a complex, global environment to positively impact future organizational performance, change and sustainability.
BUSP 475	INTEGRATED BUSINESS TOPICS	3	School of Business	The integrated business topics course examines strategic business management while integrating topics from previously completed business foundation coursework. By using real world examples, the students will demonstrate a comprehensive understanding of the undergraduate business curricula with a significant emphasis placed on the application of the student's previous coursework.

CAP GM591	CASES IN CROSS-BORDER MANAGEMENT	3	School of Business	This content area capstone course applies management concepts to a global environment. Students learn to evaluate opportunities and challenges in world wide market places. Case studies will be utilized to synthesize concepts from prior global management course work.
CCMH 504	INDIVIDUAL AND FAMILY DEVELOPMENT ACROSS THE LIFE SPAN	3	College of Social Sciences	This course presents students with theoretical frameworks to foster an understanding of the various dimensions of human development. Emphasis is placed on biological, cognitive, and psychosocial development within the context of gender, family systems, social roles, and culture.
CCMH 506	PERSONALITY THEORIES AND COUNSELING MODELS	3	College of Social Sciences	This course enables students to differentiate among the primary theoretical models of personality theory and counseling practice, including psychodynamic, affective, cognitive behavioral, humanistic, interpersonal, multicultural, and systems theory. A focus on evidence-based practices that incorporate cultural diversity issues with population- specific approaches is significant feature of this course. Emphasis is on the importance of students recognizing belief systems that accurately reflect their own personal style and to recognize strategies and approaches likely to be most successful with a particular client population. Students have opportunities to establish a strong theoretical foundation as the basis of clinical practice and to evaluate and assess clinical situations for implementation of therapeutic interventions that are gender and culturally appropriate. Assessment and intervention for emergency/crisis is introduced.
CCMH 510	MULTI-CULTURAL ISSUES IN MENTAL HEALTH COUNSELING	3	College of Social Sciences	This course is designed to be a foundation for understanding diversity among clients in a pluralistic society. Emphasis will be on integrating awareness, knowledge, and skills related to counseling differences and similarities based on age, race, ethnicity, national origin, religious affiliations, gender identification, sexual orientation, physical/mental limitations, social class, etc.

CCMH 510CA	MULTICULTURAL ISSUES IN MENTAL HEALTH COUNSELING	3	College of Social Sciences	This course is designed to be a foundation for understanding diversity among clients in a pluralistic society. Special focus is given to populations in the state of California. Emphasis will be on integrating awareness, knowledge, and skills related to counseling differences and similarities based on age, race, ethnicity, national origin, religious affiliations, gender identification, sexual orientation, physical/mental limitations, social class, etc.
CCMH 511	FUNDAMENTAL COUNSELING SKILLS	3	College of Social Sciences	This introductory counseling skills course introduces students to fundamental helping skills. Students will develop a range of basic communication patterns to facilitate a healthy therapeutic relationship between counselor and client. Students learn counseling and communication skills such as, attending behaviors, eliciting, structuring, and summarizing.
CCMH 515	LEGAL, ETHICAL, AND PROFESSIONAL ISSUES IN COUNSELING	3	College of Social Sciences	This course covers the legal and ethical responsibilities of the counseling professional. Students learn to interpret and act upon situations appropriately and effectively. Content includes issues such as client rights, confidentiality, duty to warn and protect, dual relationships, supervision and consulting, ethics with special populations, and ethical decision-making models.
CCMH 515CA	LEGAL, ETHICAL, AND PROFESSIONAL ISSUES IN COUNSELING	3	College of Social Sciences	This course covers the legal and ethical responsibilities of the counseling professional with an emphasis on California law. Students learn to interpret and act upon situations appropriately and effectively. Content includes issues such as client rights, confidentiality, duty to warn and protect, dual relationships, supervision and consulting, ethics with special populations, and ethical decision-making models.

CCMH 520	BIOLOGICAL BASIS OF BEHAVIOR/PHYSIOLOGICAL ISSUES	3	College of Social Sciences	This course examines the biological foundations of human functioning in relationship to cognition, emotions and mental health. It includes an overview of neuro anatomy, biochemistry, and main effects and side effects of prescription psychotropic medication. The goal of the course is to learn how the underlying biological aspects of human functioning affect processes of adjustment and well-being relevant to client populations. There is special attention given to issues pertaining to those who are taking psychotropic medication and the need to monitor them for side effects and contraindications. Ethics and methods of working with medical personnel are included.
CCMH 521	PSYCHOPHARMACOLOGY/BIOLOGICAL BASIS OF BEHAVIOR	3	College of Social Sciences	The goal of the course is twofold. It examines the history, biochemistry, main effects and side effects of prescription psychotropic medication and also covers the many facets of human sexuality and the treatment of sexual dysfunctions. Topics include biological concepts of mental distress, principles of drug action and metabolism, the physiology, psychology, and sociology of sexuality, including the effects of sexual attitudes and functioning on individuals and families. Ethics and methods of working with medical personnel are included.
CCMH 522	PSYCHOPHARMACOLOGY	3	College of Social Sciences	The course examines the history, biochemistry, main effects and side effects of prescription psychotropic medication and biological bases of human behavior in relation to cognition, emotions and mental health. Topics include an overview of neuroanatomy and biochemistry, biological concepts of mental distress, and principles of drug action and metabolism. Ethics, methods of working with medical personnel, and the effects of psychotropic medications on the family system are included.
CCMH 525	RESEARCH METHODS FOR MENTAL HEALTH COUNSELORS	3	College of Social Sciences	This course provides an overview of the fundamentals of research and evaluation in the counseling profession. Topics include critical analysis of research literature, statistical analysis, qualitative and quantitative research methods, needs assessment, and program evaluation. Emphasis is placed on understanding connections between research design, theories, and the utilization of results in the professional practice of counseling.

CCMH 535	PSYCHOMETRICS	3	College of Social Sciences	This course provides an overview of the fundamentals of research and evaluation in the counseling profession. Topics include critical analysis of research literature, statistical analysis, qualitative and quantitative research methods, needs assessment, and program evaluation. Emphasis is placed on understanding connections between research design, theories, and the utilization of results in the professional practice of counseling.
CCMH 540	CAREER AND VOCATIONAL COUNSELING	3	College of Social Sciences	This course provides the student with a comprehensive overview of vocational theory and career counseling. It includes the historical foundations of vocational theory and the relationship of these to skills and techniques utilized in career counseling and vocational development practices. Vocational and career counseling is examined as an integral component of the overall assessment and treatment of clients representing diverse populations found within the scope of community, mental health, and marriage and family counseling. Emphasis is placed on the examination of adults in transition and the nature of work in a changing world. Students develop competencies necessary to provide career and vocational counseling to clients across the lifespan.
CCMH 544	INTRODUCTION TO CLINICAL ASSESSMENT	3	College of Social Sciences	This course introduces students to models and tools of assessment and diagnosis for the purpose of developing competency in evaluation and treatment planning for professional counseling practice. Students learn about and practice intake assessment techniques, mental status examinations, using the Diagnostic and Statistical Manual of Mental Disorders (DSM), outcome-based treatment planning, and behavioral analysis. Emphasis is placed on writing clear, accurate, and useful assessments and treatment plans. Multicultural and ethical issues in assessment are also explored.
CCMH 547	BASIC CLINICAL ASSESSMENT AND PSYCHOMETRICS	3	College of Social Sciences	This course introduces students to models and tools of clinical assessment and diagnosis techniques, including tests and test reports used in counseling and behavioral analysis. Students use the current edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM) to practice writing clear, accurate, and useful intake assessments, mental status examinations, and outcome-based treatment planning. Special focus is placed on psychometric properties of tests, test selection criteria, administration, interpretation, and reporting of test results. Multicultural and ethical issues in assessment and psychometrics are also explored.

CCMH 548	PSYCHOPATHOLOGY: ADVANCED CLINICAL ASSESSMENT	3	College of Social Sciences	Students build on the skills gained in CCMH/544 (Introduction to Clinical Assessment), focusing on the more complex or problematic disorders with particular focus on personality disorders. Students enhance their skills by using the DSM for report-writing and treatment plan development. Emphasis is on accepted treatment approaches and outcome-based assessments; the development of critical thinking skills; and on multicultural, legal, and ethical issues.
CCMH 551	INDIVIDUAL COUNSELING	3	College of Social Sciences	This course focuses on intensive skill building in individual counseling. The relationship between assessment, theory, application of strategy and intervention, setting goals with clients, closure, and referral are emphasized as essential to the counseling environment. Emphasis is also placed on treatment plans, ethics, and cultural diversity.
CCMH 558	CRISIS INTERVENTION AND TRAUMA	3	College of Social Sciences	This course provides students with an in-depth evaluation of crisis and trauma counseling, including emergency and disaster situations. Students examine crisis theory, methods of crisis response, psychological effects associated with trauma, assessment strategies, and intervention models. Students analyze theoretical approaches as they relate to crisis management and trauma counseling.
CCMH 561	DEPENDENCY AND ADDICTIONS	3	College of Social Sciences	This course addresses addiction concepts and counseling practices. Topics include an overview of dependency theories, major substances of abuse, assessment, diagnosis, treatment modalities, special topics, and working with diverse populations

CCMH 565	FAMILY, COUPLE, AND CHILD COUNSELING	3	College of Social Sciences	This course is an overview of models in the intervention and treatment of children, adolescents, and families. Students contrast fundamental assumptions of systems theory with intrapsychic theories; address integrative approaches to assessment and diagnosis in family therapy; and explore systemic approaches to treatment of issues common to families and children in clinical settings.
CCMH 568	GROUP COUNSELING	3	College of Social Sciences	This course provides students with intensive knowledge, awareness, and skill-building in group counseling. Content emphasizes such areas as different types of groups, dynamics, norms and boundaries, leadership styles, leading and co- leading, and treatment plans. Confidentiality, selection procedures, ethics, and diversity are included as key components of effective group counseling practice.
CCMH 578	SEMINAR CLINICAL MENTAL HEALTH	3	College of Social Sciences	This course integrates mental health foundations with historical, philosophical and contextual dimensions of clinical mental health counseling practice, and reviews the trends in both the knowledge and skills necessary to practice clinical mental health counseling. Additionally, this course explores current national and local issues relevant to the practice of mental health counseling. Community resources and professional networks are explored as a means of demonstrating the integration of the profession in a social context. Issues surrounding the need for ongoing professional identity development, including membership in professional organizations, are examined as a strategy for counselor involvement in advocacy processes. Students will investigate professional roles, functions, and relationships with other human services providers. Additionally, application of counseling models for diverse needs and settings, including crisis and trauma, are investigated in-depth.
CCMH 581	SUPERVISION/MANAGEMENT IN CLINICAL MENTAL HEALTH COUNSELING	3	College of Social Sciences	This course is an overview of supervision and management as they relate to the practice of counseling. Models of supervision and counselor development, supervision and management processes, assessment and evaluation issues, and ethical and legal aspects of supervision are emphasized. Students explore their skills in management, supervision, and and consultation, particularly as they relate to recent changes in the mental health care delivery system.

CCMH 585	COMMUNITY COUNSELING	3	College of Social Sciences	This course examines principles, theories, and practices of community counseling and interventions. Topics include needs assessment, design and utilization of programs and facilities for inpatient, outpatient, partial treatment, and aftercare, as well as the utilization of the public and private mental health counseling services networks in local communities. Other topics addressed include community-based strategies for crisis intervention, interdisciplinary community outreach, and trauma counseling. Related ethical practice is integrated.
CCMH 592	PRACTICUM IN CLINICAL MENTAL HEALTH COUNSELING	3	College of Social Sciences	This course focuses on the assessment and continuing development of student counseling skills. Students have a variety of opportunities to receive feedback and to evaluate their ability to integrate theory into practice. Students determine their styles and strengths as professional counseling practitioners, as well as identify areas needing further development. Individualized practice sessions and feedback are designed into the course.
CCMH 592O	ORIENT TO PRACTICUM IN CLINICAL MENTAL HEALTH COUNSELING	0	College of Social Sciences	This course is an orientation to the practicum and internship.
CCMH 597A	INTERNSHIP A	3	College of Social Sciences	Counseling Internship is a 600-hour clinical experience (900 hours in Utah) required of all MSC students. Depending on the campus, the internship is divided into either 200 or 300 hour sections, each lasting 15 weeks. Those campuses that offer CCMH 597 A, B, and C require students to complete 200 hours for each course (except Utah which requires 300 hours each), while those campuses that offer only CCMH 597 A and B require the student to complete 300 hours for each course. Please check with your Campus College Chair for any clarification or questions you have. The internship experience comprises Portfolio III of the counseling portfolio series. Students are placed in community counseling agencies where they provide clinical services to clients under the direction of an approved licensed agency site supervisor. Students are also assisted in their preparation for the National Counselor Examination.

CCMH 597B	INTERNSHIP B	3	College of Social Sciences	Counseling Internship is a 600-hour clinical experience (900 hours in Utah) required of all MSC students. Depending on the campus, the internship is divided into either 200 or 300 hour sections, each lasting 15 weeks. Those campuses that offer CCMH 597 A, B, and C require students to complete 200 hours for each course (except Utah which requires 300 hours each), while those campuses that offer only CCMH 597 A and B require the student to complete 300 hours for each course. Please check with your Campus College Chair for any clarification or questions you have. The internship experience comprises Portfolio III of the counseling portfolio series. Students are placed in community counseling agencies where they provide clinical services to clients under the direction of an approved licensed agency site supervisor. Students are also assisted in their preparation for the National Counselor Examination.
CCMH 597C	INTERNSHIP C	3	College of Social Sciences	Counseling Internship is a 600-hour clinical experience (900 hours in Utah) required of all MSC students. Depending on the campus, the internship is divided into either 200 or 300 hour sections, each lasting 15 weeks. Those campuses that offer CCMH 597 A, B, and C require students to complete 200 hours for each course (except Utah which requires 300 hours each), while those campuses that offer only CCMH 597 A and B require the student to complete 300 hours for each course. Please check with your Campus College Chair for any clarification or questions you have. The internship experience comprises Portfolio III of the counseling portfolio series. Students are placed in community counseling agencies where they provide clinical services to clients under the direction of an approved licensed agency site supervisor. Students are also assisted in their preparation for the National Counselor Examination.
CHM 109	INTRODUCTORY CHEMISTRY	3	College of Humanities and Sciences	This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.
CHM 110	INTRODUCTORY CHEMISTRY	3	College of Humanities and Sciences	This course will examine the basic principles of chemistry conceptually and specifically. The course will apply chemical concepts to address relevant issues ranging from atomic structure and chemical reactions to organic and biological chemistry. The course topics include matter and energy, chemical bonding, intermolecular forces, chemical equilibrium, and nuclear, organic, and biological chemistry. Students will apply these concepts using practical examples, facilitated discussions, and experiments conducted through a virtual laboratory.

CHM 150	GENERAL CHEMISTRY I	4	College of Humanities and Sciences	This course provides students with an in-depth knowledge of the principles and applications of chemistry. Topics include chemical nomenclature, atomic theory, stoichiometry, periodicity, chemical bonding, thermochemistry, gas laws, and properties of solids and liquids. Students apply these concepts using practical examples, facilitated discussions, and experiments conducted through hands-on labs. This course is the first half of the general chemistry sequence, which is completed in CHM/151: General Chemistry II.
CHM 151	GENERAL CHEMISTRY II	4	College of Humanities and Sciences	This course continues the examination of principles and applications of chemistry that was begun in CHM 150: General Chemistry I. Topics include properties of solutions, acids and bases, kinetics, equilibrium, thermodynamics, oxidation-reduction, ionic and redox equations, and electrochemistry. Students apply these concepts using practical examples, facilitated discussions, and experiments conducted through hands-on labs.
CIS 207	INFORMATION SYSTEMS FUNDAMENTALS	3	College of Information Systems and Technology	This course introduces the fundamentals of computer systems and the role of information processing in today's business environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, and the Internet.
CIS 207T	INFORMATION SYSTEMS FUNDAMENTALS	3	College of Information Systems and Technology	This course introduces the fundamentals of computer systems and the role of information processing in today's business environment. An overview is presented of information systems, systems development, data management, networking, and the Internet.

CIS 211	OFFICE SOFTWARE SUPPORT FUNDAMENTALS	3	College of Information Systems and Technology	This course is an introduction to the support fundamentals of desktop software, including word processor, spreadsheet, presentation, and personal information management (e-mail, calendar, contact management, and web browsing) applications.
CIS 291	PC AND DEVICE FUNDAMENTALS	3	College of Information Systems and Technology	This course provides an introduction to personal computers (PC) and mobile devices commonly used in business and non-profit industries. Topics include the fundamentals of hardware components, architecture, configuration, upgrade, and repair. This course also provides an introduction to hardware troubleshooting and computer support. This course and CIS/293 are aligned with the requirements of the CompTIA A+ 220-901 exam.
CIS 293	NETWORK TROUBLESHOOTING AND SUPPORT	3	College of Information Systems and Technology	This course provides an introduction to computer networking, network troubleshooting and desktop support. Topics include networking design and implementation. CIS/293 provides hands on practice troubleshooting hardware and desktop support issues aligned with entry-level desktop support. This course, and CIS/291, are aligned with the requirements of the CompTIA A+ 220-901 exam.
CIS 295	INTRODUCTION TO PC AND MOBILE OPERATING SYSTEMS	3	College of Information Systems and Technology	This course provides an introduction to the fundamentals of personal computer and mobile device operating systems. Topics include software configuration, file and data management, synchronization, and troubleshooting. Cloud concepts and the integration of cloud services in the work environment are introduced. This course and CIS/297 align with the requirements of the CompTIA A+ 220-902 exam.

CIS 297	COMPUTER SECURITY AND OPERATIONAL SUPPORT FUNDAMENTALS	3	College of Information Systems and Technology	This course provides an introduction to the fundamentals of network security across devices. Topics include operational procedures and best practices for troubleshooting and providing end-user support. This course provides theory and practice troubleshooting operating systems across devices. This course and CIS/295 align with the requirements of the CompTIA A+ 220-902 exam.
CIS 298	HEALTHCARE IT	3	College of Information Systems and Technology	This course is an introduction to the technical knowledge and IT skills applied to health care business operations. This course will focus on the application of regulatory requirements, medical business and IT operations, and IT security. In addition, students will also explore medical business and technology applications in health care.
CIS 532	INFORMATION SYSTEMS LEADERSHIP	3	College of Information Systems and Technology	The Information Systems Leadership course provides an opportunity for a student to explore the role of senior level Information systems executives, these titles range from IT director, VP of technology, and CIO as well as functional titles. Their duties often encompass responsibility for the overall direction for technology through strategic planning and evaluation. This course addresses numerous skills that can help Information Systems leaders excel within their unique roles in the organization.
CIS 568	INFORMATION SYSTEMS CONCEPTS	3	College of Information Systems and Technology	This Course focuses on the role of the manager as a user and manager of information. Topics include the analysis & design of information systems. The analysis and design of information systems are covered from the operational, tactical, and strategic perspectives with a focus on identifying specific tools and techniques.

CIT 245	LOCAL AREA NETWORKING FUNDAMENTALS	3	College of Information Systems and Technology	This course addresses the fundamentals of local area network (LAN) and provides the basic networking components and their functions. The OSI model is introduced and the TCP/IP protocol stack and its layers are examined. Students learn how to install, operate, configure, and verify a basic IPv4 network, including implementing IPv4 addressing, configuring a LAN switch, configuring an IP router, and troubleshooting common LAN switch issues.
CIT 249	WIDE AREA NETWORK ENVIRONMENT	3	College of Information Systems and Technology	This course provides students with the knowledge and skills necessary to design, build, and maintain routing and switching technologies. Students learn routing and switching operations, including implementing VLANs and trunking, implementing and troubleshooting single-area open shortest path first (OSPF) routing protocol and introduce IPv6 main features, addresses and basic configuration. Advanced IP services are described such as applying and troubleshooting access control lists (ACLs) and managing IP address space using network address translation (NAT) and port address translation (PAT).
CIT 274	ROUTING AND SWITCHING IMPLEMENTATIONS	3	College of Information Systems and Technology	This course describes implementing scalable medium-sized switched and routed networks. Students learn to build and improve redundant networks using spanning tree protocol (STP) and EtherChannel, implement and troubleshoot EIGRP and multi-area OSPF routing protocols, and troubleshoot IPv6 network connectivity issues.
CIT 276	ROUTING AND SWITCHING MANAGEMENT	3	College of Information Systems and Technology	This course provides the knowledge and skills necessary for routing and switching management. Topics include extending local area network (LAN) into a wide area network (WAN), virtual private network (VPN) solutions, and frame relay connectivity. Students learn network device, IOS file and licensing management.

CIT 277	WEBSITE DEVELOPMENT FOUNDATIONS	3	College of Information Systems and Technology	This course introduces essential Website development skills. Students will write code manually, as well as use graphical user interface (GUI) authoring tools. Topics include XHTML code validation, web forms, tables and frames, internet marketing and search engine optimization, and content formatting with style sheets. This course addresses the objectives specified in the CIW Site Development Associate Certificate.
CIT 278	INTERNET BUSINESS CONCEPTS	3	College of Information Systems and Technology	This course introduces the Information Technology (IT) foundational skills and technologies used in business and the tasks involved in various IT job roles. Topics include Internet connection methods and protocols, the Domain Name System (DNS), cloud computing, social networking, and business skills. This course addresses the objectives specified in the CIW Internet Business Associate Certificate.
CIT 279	NETWORK TECHNOLOGY FOUNDATIONS	3	College of Information Systems and Technology	This course introduces the basics of network administration. Topics include the fundamentals of network architecture, the secure transmission of data, the OSI reference model, implementing a Content Management System (CMS), and mobile computing devices. This course addresses the objectives specified in the CIW Network Technology Associate Certificate.
CJA 304	INTERPERSONAL COMMUNICATIONS	3	College of Criminal Justice and Security	This course prepares the student to communicate effectively in both written and verbal form. It covers best practices in investigative reporting and interpersonal verbal communication with victims, suspects, and civilians, in a criminal justice setting. Emphasis is placed on practical application of the skills and theories introduced.

CJA 305	CRIMINAL LAW	3	College of Criminal Justice and Security	This course is an introduction to the study of criminal law, general legal principles, and how the criminal law functions in and affects modern society. This course highlights a variety of key topics, including the concept of crime and the development of criminal law, defenses to criminal charges, and a number of specific types of crimes, including personal crimes, property crimes, public order crimes, and offenses against public morality. Legal issues affecting punishment and the way criminal law impacts crime victims are also discussed.
CJA 314	CRIMINOLOGY	3	College of Criminal Justice and Security	Criminology is an introductory course in the study of crime and criminal behavior, focusing on the various theories of crime causation. This course highlights the causes of crime, criminal behavior systems, societal reaction to crime, and criminological methods of inquiry.
CJA 315	CRIMINAL PROCEDURE	3	College of Criminal Justice and Security	This course explores the basic core knowledge of constitutional criminal procedure. Emphasis is placed on the Fourth, Fifth and Sixth Amendments; searches and seizures; interrogations and confessions; identifications; and pre-trial and trial processes. In addition, the United States Constitution as interpreted by the U.S. Supreme Court is examined along with philosophical policy considerations. Application of core knowledge is developed through simulation exercises and examining homeland security issues.
CJA 324	ETHICS IN CRIMINAL JUSTICE	3	College of Criminal Justice and Security	This course explores the standards and codes of professional responsibility in criminal justice professions (e.g., Law Enforcement Code of Ethics, ABA Standards of Professional Responsibility, American Jail Association Code of Ethics for Jail Officers, and the American Correctional Association Code of Ethics). It also explores analysis and evaluation of ethical dilemmas, roles of professional organizations and agencies, ethics and community relations, ethics in criminal justice laws and procedures and civil liability in law enforcement and correctional environments.

CJA 325	CRIMINAL ORGANIZATIONS	3	College of Criminal Justice and Security	This course is a survey of the origins and development of organized crime in the United States. It examines the structure and activities of organized criminal enterprises, considers different models that have been employed to describe organized crime groups, and explores theories that have been advanced to explain the phenomenon. Major investigations of organized crime and legal strategies that have been developed to combat it are also considered.
CJA 333	POLICING THEORY AND PRACTICE	3	College of Criminal Justice and Security	This course reviews the structure and function of law enforcement agencies in the United States at the state, local, and federal levels. Differences between levels, as well as current issues and problems facing law enforcement administrators are emphasized.
CJA 335	RESEARCH STATISTICS	3	College of Criminal Justice and Security	Students learn to perform introductory statistical techniques common to the criminal justice system including descriptive and inferential statistics, correlation, and factor analysis and demonstrate knowledge of the application and limitations of specific statistical tests. Students also analyze and critique the use of statistics in research published by criminal justice researchers.
CJA 344	CULTURAL DIVERSITY ISSUES IN CRIMINAL JUSTICE	3	College of Criminal Justice and Security	This course offers a comprehensive, critical and balanced examination of the issues of crime and justice with respect to race and ethnicity. Procedures and policy in a pluralistic and multicultural society are examined relative to law enforcement, courts and corrections environments.

CJA 345	RESEARCH METHODS AND EVALUATION	3	College of Criminal Justice and Security	Students learn and demonstrate knowledge of research methodology including problem formulation, design, data collection and analysis, interpreting and summarizing research findings while exploring the range and scope of research and evaluation tools available to the criminal justice professional. Students also analyze and critique criminal justice program and service evaluations published by criminal justice research professionals.
CJA 355	GRANT WRITING	3	College of Criminal Justice and Security	This course explores the basics of grant and proposal writing for criminal justice programs and agencies, from needs assessment to finding federal, state, and private funding. Students will practice program design and evaluation, research various grant application components and requirements, and identify funding sources and suggestions to develop successful grant proposals.
CJA 365	BUDGET, FINANCE, AND PLANNING	3	College of Criminal Justice and Security	This course explores public sector revenue sources, allocation of funds, governance, public stewardship, responsible economic policies, debt, and the requirement for accurate and complete reporting. Various budgetary approaches used in federal, state, and local agencies are analyzed.
CJA 373	CRIMINAL COURT SYSTEMS	3	College of Criminal Justice and Security	An overview of American court history, including the development of state and federal courts. Court administration, the roles of professional and nonprofessional courtroom participants, and stages in the process are discussed.

CJA 374	JUVENILE JUSTICE SYSTEMS AND PROCESSES	3	College of Criminal Justice and Security	This course is a general orientation to the field of juvenile justice, including causation theories and the development of system responses to delinquent behavior. The problems facing juveniles today are addressed, and adult and juvenile justice systems are compared, including initial apprehension, referral, and preventive techniques. Specific issues examined include chemical dependency, mental illness, and compulsive and habitual offenders. Special attention is given to the problems inherent in the police handling of juveniles and the function of juvenile courts.
CJA 375	INTERAGENCY COMMUNICATION	3	College of Criminal Justice and Security	This course explores the relationships across all internal and external areas and levels of government regarding effective emergency management. Students examine the required planning, response, recovery, and mitigation components that government agencies must consider. Network management theories, inter- organizational communication, and potential collaboration models are explored.
CJA 383	INSTITUTIONAL AND COMMUNITY CORRECTIONS	3	College of Criminal Justice and Security	An introduction to the various aspects of the corrections system. The historical development of corrections is discussed, along with the goals of criminal sentencing, jails, prisons, alternative sentencing, prisoner rights, rehabilitation, and parole and probation.
CJA 385	CRIMINAL JUSTICE POLICY ANALYSIS & PROGRAM EVALUATION	3	College of Criminal Justice and Security	Students learn and demonstrate knowledge of models and operational strategies used to develop and evaluate criminal justice policies and programs including issue identification, development of alternative solutions and strategies, and predicting the potential impact of justice system policy alternatives and programs. Students also analyze and critique criminal justice policy and program evaluations published by criminal justice research professionals.

CJA 394	CONTEMPORARY ISSUES AND FUTURES IN CRIMINAL JUSTICE	3	College of Criminal Justice and Security	This course examines both the principle issues in contemporary criminal justice as well as the extrapolation of such issues toward possible futures within the criminal justice field. Students will focus upon relevant research in policing, courts, and corrections that reflects key elements of current conditions and what may be expected in the years to come. Students will apply critical review and engage in in-depth discussion of these concepts as a basis for comprehensive understanding at local, state, national, and global levels of criminal justice administration.
CJA 395	CURRENT ISSUES/FUTURES IN CRIMINAL JUSTICE MANAGEMENT	3	College of Criminal Justice and Security	This course examines both the principle issues in contemporary criminal justice management as well as the extrapolation of such issues toward possible futures within the criminal justice management field. Students will focus on relevant research in policing, courts, and corrections that reflect key elements of current conditions and what may be expected in the years to come that will be important to criminal justice administrators. Students will apply critical review and engage in in-depth discussion of these concepts as a basis for comprehensive understanding at local, state, national, and global levels of criminal justice administration.
CJA 444	ORGANIZATIONAL BEHAVIOR AND MANAGEMENT	3	College of Criminal Justice and Security	This course in organizational behavior encompasses the study of individual and group behavior as they apply to criminal justice organizations - court systems, law enforcement, and corrections. Managing organizational behavior challenges individuals to understand organizational structure and systems, leadership, motivation, effective communication, change management, and performance systems. A comprehensive review of these processes, as well as others, will allow students to examine their role in criminal justice systems in our rapidly changing society.
CJA 454	CRIMINAL JUSTICE MANAGEMENT THEORY AND PRACTICE	3	College of Criminal Justice and Security	This course applies management and financial principles to criminal justice organizations. Emphasis is placed on budgets, financial accounting principles and assessing the effectiveness of the activities of criminal justice organizations. Constitutional requirements, court decisions, and legislation (such as EEOC requirements) as they impact management in criminal justice organizations are discussed. Basic accounting and financial terminology, and purposes and formats of financial statements are introduced: depreciation of assets, capital budgeting, cash management, lease versus purchase, and inventory management.

CJA 474	MANAGING CRIMINAL JUSTICE PERSONNEL	3	College of Criminal Justice and Security	This course is a survey of important personnel issues inherent to organizations and especially to Criminal Justice organizations. Problems, procedures and solutions to common personnel issues will be explored.
CJA 475	FORECASTING AND STRATEGIC PLANNING	3	College of Criminal Justice and Security	This course provides pre- or in-service administrators/managers the knowledge, skills and tools necessary to consider the long-term mission and direction of various criminal justice agencies and to build strategy and operations from both internal and external stakeholders to achieve identified mission goals. Students consider strategic planning as a process and method for implementing effective strategic management. Students receive a high-level overview of data collection and analysis methods for strategic planning that provide the ability to develop long-term solutions to continually evolving organizational challenges. Students explore long-term strategic management options, and how to use that information in planning, decision making, and developing strategies for more efficient organizational management of operations and programs.
CJA 483	FUTURES OF CRIMINAL JUSTICE	3	College of Criminal Justice and Security	This course examines possible criminal justice futures. Issues that police, corrections, and courts are likely to confront in the 21st century and beyond will be researched and discussed, along with established predictive techniques in the field of futures research. This is a capstone course requiring students to apply all they have learned throughout the program to the issues that will define possible criminal justice futures.
CJA 484	CRIMINAL JUSTICE ADMINISTRATION CAPSTONE	3	College of Criminal Justice and Security	This capstone course for the criminal justice administration undergraduate degree program provides students with an integration of acquired knowledge of theory to practical applications. Particular attention is given to integrating core content of criminal justice administration with specialized content from students' selected concentration area. Students will assess the impact of their educational experiences on their professional competence and values, critical thinking and problem solving, communication, information utilization, and collaboration skills.

CJHS 395	ISSUES AND FUTURES IN HUMAN SERVICES IN CRIMINAL JUSTICE	3	College of Criminal Justice and Security	This course examines both the principle issues in contemporary human services in the criminal justice system as well as the extrapolation of such issues toward possible futures within human services in the criminal justice field. Students will focus on relevant research that reflects key elements of current conditions and what may be expected in the years to come. Such research will reflect case management, mental health care, crisis and trauma situations, and legal requirements affecting children and families as they relate to policing, courts, and corrections; the main components of the criminal justice system. Students will apply critical review and engage in in-depth discussion of these concepts as a basis for comprehensive understanding at local, state, national, and global levels of human services in the criminal justice system as addressed by criminal justice administration.
CJHS 400	THEORY AND PRACTICE: HUMAN SERVICES IN CRIMINAL JUSTICE	3	College of Criminal Justice and Security	Students explore major theoretical areas in human services, including psychotherapeutic, behavioral, cognitive, multicultural, and systems theories. Students learn the foundational concepts associated with the major theories, approaches to change, and techniques and interventions used by practitioners. This course emphasizes the development of a personal theory and approach to human services within criminal justice. In addition, students analyze the practical applications of theory-based techniques that criminal justice and human services professionals use while working in the criminal justice system.
CJHS 410	MENTAL HEALTH AND CRISIS INTERVENTIONS IN CRIMINAL JUSTICE	3	College of Criminal Justice and Security	Students learn about human services delivery, crisis intervention, and mental health services within the criminal justice system. Students explore the skills associated with crisis intervention and mental health services and how they are applied in the field. Strategies for providing services to various populations in the criminal justice system also are examined.
CJHS 420	CASE MANAGEMENT AND SERVICES PROVIDED IN CRIMINAL JUSTICE	3	College of Criminal Justice and Security	This course covers principles, practices, and issues in case management. Students learn about the nature of diagnoses, basic interviewing skills, and how to identify treatment resources in the criminal justice system. Ethics and professional boundaries in case management are also examined.

CJHS 430	COLLABORATIVE SERVICES IN CRIMINAL JUSTICE	3	College of Criminal Justice and Security	This course examines the collaboration between human service professionals and those working in the criminal justice system. Students analyze the roles of mediator, advocate, and agency representatives to include forensic evaluation. Overcoming barriers to effective service delivery through the use of collaboration is also considered.
CJS 200	FOUNDATIONS OF THE CRIMINAL JUSTICE SYSTEM	3	College of Criminal Justice and Security	This course is an introduction to the foundational elements of the criminal justice system. Students will begin to examine this system from its influential past to its multi- faceted present to its theorized future. This course gives the student an interactive pathway through the laws that protect the system, through the people that enforce the system, and through the courts that govern this system. It also provides an overview of the correctional systems, their impact, and their roles in our society. Other topics include crime causation, terrorism.
CJS 201	INTRODUCTION TO CRIMINAL JUSTICE	3	College of Criminal Justice and Security	This course is an introductory overview of the organization and jurisdictions of local, state, and federal law enforcement, judicial and corrections agencies, and processes involved in the criminal justice systems. It examines the historical and philosophical aspects of the police, the courts, and the correctional system, as well as the philosophy. Additionally, career opportunities and qualifying requirements, terminology and constitutional limitations of the system will also be covered.
CJS 205	COMPOSITION FOR COMMUNICATION IN THE CRIMINAL JUSTICE SYSTEM	3	College of Criminal Justice and Security	This course prepares students to communicate effectively in both verbal and nonverbal forms. Students explore best practices of investigative reporting and composing written communications, such as administrative reports and memos, interpreting and using body language, and interpersonal interactions within criminal justice settings. This includes interactions with victims, suspects, incarcerated persons, as well as government officials, staff, and civilians.

CJS 210	FUNDAMENTALS OF POLICING	3	College of Criminal Justice and Security	This course provides students with the opportunity to gain a basic understanding of policing in the United States. It examines the history of the police, the emerging role of private security, and the organizational structure of police departments. This course will also discuss the relationships between the police department and their respective communities. Other topics include recruitment processes, diversity, culture, and laws that govern policing. Students will have the opportunity to research their local police department for a closer look at policing in their community.
CJS 211	ETHICS IN CRIMINAL JUSTICE	3	College of Criminal Justice and Security	This course explores the standards and codes of professional responsibility in criminal justice professions. It also explores ethical dilemmas, professional organizations and agencies, ethics and community relations, ethics in criminal justice laws and procedures, and civil responsibility in law enforcement and correctional environments.
CJS 215	INTRODUCTION TO FORENSICS	3	College of Criminal Justice and Security	This course provides an introduction to forensic science. This survey course is developed specifically for non-science majors to familiarize them with the different forensic science disciplines, the types of examinations crime laboratories conduct, and how forensic science is applied in current American criminal justice systems. Students gain a basic understanding of the principles of science, specifically the scientific method and its application.
CJS 220	INTRODUCTION TO CRIMINAL COURT SYSTEM	3	College of Criminal Justice and Security	This course is an introduction to the fundamental elements of the courts in our criminal justice system. Students will examine the many complexities affecting the court system, from the theory behind the creation of laws to the implementation of such laws. This course provides an in-depth look into the roles and functions of the professionals interacting within the court while outlining the courtroom process. Other topics include punishments, appeals, and plea bargains.

CJS 221	CULTURAL DIVERSITY IN CRIMINAL JUSTICE	3	College of Criminal Justice and Security	This course offers a comprehensive, critical, and balanced examination of the issues of crime and justice with respect to race and ethnicity. Procedures and policy in a pluralistic and multicultural society are examined relative to law enforcement, courts, and corrections environments.
CJS 225	CRITICAL THINKING IN CRIMINAL JUSTICE	3	College of Criminal Justice and Security	This course introduces the topics of critical and creative thinking. This overview course defines and differentiates the two topics, and helps students explore how personal beliefs are formed and evaluated. Special attention is placed on how critical and creative thinking are used to create solutions to problems encountered by criminal justice and security personnel.
CJS 230	INTRODUCTION TO CORRECTIONS	3	College of Criminal Justice and Security	This course is an introduction to the fundamental elements of the corrections system within the criminal justice field. Students will examine the early implementations of punishment as well as evolving philosophies of sentencing. Students will gain insight into the purpose and functions of jails and prisons, while establishing a connection between prison life and prisoner's rights. Students will also take an in-depth look into how parole and probation affect our communities. Other topics include correctional management, rehabilitation, and correctional systems in other countries.
CJS 231	CRIMINOLOGY	3	College of Criminal Justice and Security	This course highlights the causes of criminal behavior and the theoretical interpretations of such behavior. Students are introduced to criminological methods of inquiry and review several different classifications of crime. Students also consider the public policy implications of various approaches to criminology.

CJS 235	VICTIMOLOGY	3	College of Criminal Justice and Security	This course introduces students to the topic of victimology, the scientific study of victims, and an overview of current theory, research, and trends within the context of specific victimization types. Specific crime types, the impact of crime on victims and society, the role of victims within the criminal justice system, specific remedies, and victim rights and services are also examined.
CJS 240	INTRODUCTION TO JUVENILE JUSTICE	3	College of Criminal Justice and Security	This course is a general orientation to the concept of delinquency and the field of juvenile justice. Students will examine the nature of delinquency, as well as a variety of theories and explanations for delinquent behavior. Students will study factors related to delinquency and/or prevention including gender, family, peers, school, and drug use. This course will also familiarize students with the evolution of juvenile justice and the roles of the police with juvenile offenders. Additionally, students will develop an understanding of the juvenile court process, as well as juvenile detention, restitution, and treatment.
CJS 241	INTRODUCTION TO POLICE THEORY AND PRACTICES	3	College of Criminal Justice and Security	This course provides an overview of policing theories and practices used in United States law enforcement systems. It surveys the basics of police functions, from individual and organizational roles to the issues faced on a daily basis. This course also examines the procedures and methods of operation of police and critical issues in law enforcement.
CJS 245	JUVENILE JUSTICE SYSTEMS AND PROCESSES	3	College of Criminal Justice and Security	This course is a general orientation to the field of juvenile justice, including causation theories and the development of system responses to delinquent behavior. The problems facing juveniles today are addressed, and adult and juvenile justice systems are compared, including initial apprehension, referral, and preventive techniques. Specific issues examined include chemical dependency, mental illness, and compulsive and habitual offenders. Special attention is given to the problems inherent in the police handling of juveniles and the function of juvenile courts.

CJS 250	INTRODUCTION TO SECURITY	3	College of Criminal Justice and Security	This course is an introduction to contemporary security practices and programs. Students will study the origins of private security, its impact on our criminal justice system, and the roles of security personnel. Students will also examine the growth and privatization of the security industry, and study the elements of physical security including surveillance and alarm systems. The course will cover legal and liability issues, which determine the extent of private security authority as well as its limitations. This course will also focus on the current and future ontegration of private security services in law enforcement agencies.
CJS 251	INTRODUCTION TO CRIMINAL COURT SYSTEMS	3	College of Criminal Justice and Security	This course is an introduction and overview of the legal system, the participants, the courtroom process, and post conviction process of the course system. It demonstrates the connection among all participants and how they relate to each other. Additionally, the course covers the history of the court system and the different types of court at the state and federal levels.
CJS 255	INTRODUCTION TO CORRECTIONS	3	College of Criminal Justice and Security	This course is an introduction to the various components of the corrections system within the criminal justice system. It provides an overview of corrections, including corrections history, the persons, agencies, and organizations that manage convicted offenders. Other topics that are covered include policy and procedure, sentencing, probation, and rehabilitations of prisoners.
CMC 240	INFORMATION STRATEGIES: PUTTING 2 AND 2 TOGETHER	3	School of Business	Effective communication strategies require effective information strategies. This course focuses on the gathering, analysis, synthesis, and evaluation that comprise information literacy as a standard of modern problem solving. Students will recognize the need for information, formulate meaningful questions to guide their search, access what is cogent, interpret bias, and integrate material for a compelling presentation. They will furthermore do this with an eye toward social responsibility and professional ethics.

CMC 260	COMMUNICATION VARIETY: THE SPICE OF LIFE	3	School of Business	The field of communications underlies virtually every aspect of today's increasing global interdependence. This course addresses how customs, values, and societal systems generate expectations - often tacit - about how communication should occur, and problems - often misunderstood - about how communication is occurring. Students develop greater sensitivity to intercultural and intracultural differences to foster effective information exchange and develop mutually satisfying communication solutions.
CMCEU 1000	EFFECTIVE BUSINESS COMMUNICATION	0.6	School of Continuing Education	To be successful in the business environment, one must be able to develop ideas, express them clearly, and persuade others of their viability. This course offers students effective strategies to sharpen their writing skills in letters and reports by structuring their ideas logically, exercising diplomacy and shaping their arguments for optimal effect. Students will also learn proper communication etiquette and the need for professionalism in various forms of business communication. This course provides 0.8 continuing education units in two 4-hour workshops.
CMCEU 1030	FACE TO FACE COMMUNICATION	0.6	School of Continuing Education	Even as technology has allowed us to connect with an ever-expanding global network through the click of a mouse, many workplace situations, often those involving conflict, feelings, or other sensitive issues, still demand human contact. In this course, students discover the power and need for face-to-face communication and how to improve skills to become a competent communicator. Topics include verbal and non-verbal elements of message delivery, how words are used to create positive relationships and resolve conflict, and how good listening ability factors into human interaction. Ways to adapt face-to-face communication principles for remote settings are also explored. This course provides 0.6 continuing education units in one, 6-hour workshop.
CMCEU 1040	TIME MANAGEMENT	0.6	School of Continuing Education	Time is a form of currency, and the ways that we talk about it illustrate its value: we say "Time is money," and "My time was well spent," or "It's a waste of time." Like most professionals, you've probably struggled with managing this resource effectively. In this course, you will practice techniques that will help you achieve more effective use of your time so that you can direct your energy towards the activities that will further your professional and personal goals. You will identify effective time-management strategies, including defining personal and professional goals, establishing priorities, and identifying the tasks that will be critical to achieving those goals. You will also create a personal time-management action plan. This course provides 0.6 continuing education units in one, 6-hour workshop.

CMGT 245	IS SECURITY CONCEPTS	3	College of Information Systems and Technology	This course introduces general concepts of information systems security. Content includes governmental views, positions and processes of national security. Coursework explores other concepts, including contingency and business resumption planning, backup schemes and implementation strategies, as well as various types of invasive actions and prevention measures.
CMGT 400	INTRO TO INFORMATION ASSURANCE & SECURITY	3	College of Information Systems and Technology	This course is an introduction to information assurance and security in computing technology. Topics include risk management; protecting information in the enterprise; business continuity and disaster recovery planning; threats and remediation; legal, ethical, and professional issues; and considerations within systems development processes.
CMGT 410	PROJECT PLANNING AND IMPLEMENTATION	3	College of Information Systems and Technology	This course provides the foundation for successful project planning, organization, and implementation within the realm of information technology. The course uses real-world examples and identifies common mistakes and pitfalls in project management. Topics covered include project scoping, estimating, budgeting, scheduling and staffing, tracking and controlling, and software tools for project management.
CMGT 413	APPLICATION ACQUISITION AND SOURCING	3	College of Information Systems and Technology	This course examines a number of alternatives to be considered when delivery of an information technology application is needed. The evaluation of alternatives such as build versus buy and in-sourcing or outsourcing are covered along with the considerations for testing and evaluation of information technology decisions. The primary components of a Request for Proposal (RFP) and a Statement of Work (SOW) are examined in this course.

CMGT 420	INTEGRATED PROJECT MANAGEMENT	3	College of Information Systems and Technology	This course helps to prepare students for the Project Management Institute (PMI®) (CAPM®) certification exam. It covers the Project Management Framework, a set of standard terminology and guidelines for project management, and the knowledge areas in managing projects.
CMGT 430	ENTERPRISE SECURITY	3	College of Information Systems and Technology	This course covers the managerial and technical considerations related to access controls, authentication, external attacks and other risk areas facing the enterprise. This course will also survey the techniques to prevent unauthorized computer and facility access as well the concepts for protecting the hardware and software assets of the enterprise.
CMGT 431	INFORMATION SYSTEMS SECURITY	3	College of Information Systems and Technology	This course introduces students to the concepts of information systems security within the framework of the major security certification, the Certified Information Systems Security Professional (CISSP). It provides an overview of each of the CISSP's ten domains and prepares students for more detailed work in the subsequent program courses. Those domains include Access Controls; Application Security; Business Continuity and Disaster Recovery; Cryptography; Information Security and Risk Management; Legal, Regulations, Compliance, and Investigation; Security Architecture and Design, Telecommunications and Network Security.
CMGT 433	CYBER SECURITY	3	College of Information Systems and Technology	This course explores the evolution from information security to cyber security, policy and cyber security development and the relationships between business and public/private sector organizations in meeting the challenges of cyber security threats. Students will be introduced to the legal and regulatory requirements for internal network and internet security both as they apply to business and personal use. Vulnerabilities of both the organization and the individual will be reviewed as well as the processes and controls for mitigating cyber security threats. The need for an IT audit will also be explored as part of the vulnerability/mitigation process as well as the need for development of an organization-wide cyber security policy.

CMGT 442	INFORMATION SYSTEMS RISK MANAGEMENT	3	College of Information Systems and Technology	This course identifies and defines the types of risks that information systems professionals need to consider during the development and implementation of computer based information systems. This course will survey remedies and prevention techniques available to address the risk areas present. Organizational policies and current regulatory considerations will also be examined relative to development, implementation and use of computer based information systems.
CMGT 445	APPLICATION IMPLEMENTATION	3	College of Information Systems and Technology	This course will cover the process and issues associated with the implementation of a computer application information system. Topics will include the processes associated with sponsor and stakeholder approvals, end user training, technical staff training, conversion from existing application(s) and integration into the information system production environment. This course will also examine the use of development and testing environments and the testing procedures related to the implementation of a computer application information system.
CMGT 554	IT INFRASTRUCTURE	3	College of Information Systems and Technology	This course focuses on the managerial level of knowledge and terminology for telecommunications and computer networks. This course covers the concepts and application of the internet; server and storage architectures; and regulatory considerations.
CMGT 555	SYSTEMS ANALYSIS AND DEVELOPMENT	3	College of Information Systems and Technology	This course explores the framework and strategy for creating an environment to develop and engineer software according to the business needs of an organization. The course teaches the techniques of software engineering while focusing on the quality and development and the support of business objectives during the software engineering process.

CMGT 556	ENTERPRISE MODELS	3	College of Information Systems and Technology	This course provides a process view of the organization from several perspectives including enterprise resource planning (ERP), supply chain management (SCM), and customer relationship management (CRM) system.
CMGT 557	EMERGING TECHNOLOGIES & ISSUES	3	College of Information Systems and Technology	The course examines how to identify emerging technology, the related issues and their potential impact on the organization. This examination provides an understanding of both the technical and managerial issues including the strategic implications associated with emerging technologies.
CMGT 575	CIS PROJECT MANAGEMENT	3	College of Information Systems and Technology	This course will provide both theory and application of the skills required for Project Management. Topics covered will include: identifying deliverables, determining work break-down structure, estimating resource and cost requirements, resource management, scheduling techniques, schedule control methods, PERT and Gantt charts. MS Project, a project management application, will be used extensively at this course.
CMGT 578	CIS STRATEGIC PLANNING	3	College of Information Systems and Technology	This course provides the knowledge and skills to develop effective short, intermediate and long-range strategic information technology plans. Course topics include the need and responsibilities of an information technology steering committee, the relationship of information technology planning to the overall organizational mission, goals, and assessment of the organizations current state, determination of information technology, project and management requirements, and means of prioritizing and selecting information technology projects.

CMGT 582	SECURITY & ETHICS	3	College of Information Systems and Technology	The ethical issues examined in the course will include information privacy, accessibility, and ownership from an organizational perspective. Information laws, regulations and compliance requirements will be examined in this course as well as the considerations for creating a safe digital environment within the organization.
CMGT 583	IS INTEGRATION	3	College of Information Systems and Technology	This course will focus on the integration of the IS function and the information technology architecture within the enterprise. The alignment of IT with the strategy of the organization will be examined considering the decisions related to information technology architecture.
CMHC 551	HUMAN SEXUALITY AND SEX THERAPY	3	College of Social Sciences	The goal of this course is to learn about the many facets of human sexuality and the treatment of sexual dysfunctions in a safe and respectful environment. Topics include the physiology, psychology, and sociology of sexuality, including the effects of sexual attitudes and functioning on individuals and families. Clinical applications, including the treatment of sexual difficulty and dysfunction will also be explored. Students will develop familiarity with the language and terms of sexology and demonstrate an ability to apply this knowledge to clinical situations.
CMHC 597C	INTERNSHIP C	3	College of Social Sciences	Mental health counseling internship is a 900-hour clinical experience divided into three parts (A, B, and C), fifteen weeks each. Students are placed at a mental health counseling organization where they provide direct services under the authority of an approved site supervisor. In addition, students meet weekly to review their clinical work and to receive instruction on professional issues.

CNSL 500	ORIENTATION TO THE COUNSELING PROFESSION	0	College of Social Sciences	CNSL/500 is a 3-week orientation required for specified counseling program applicants. Students will explore the field of counseling and options for a career path to determine their readiness for entry into a graduate program in counseling. Students are required to take a career inventory to examine their interests and aptitude for acquiring the skills needed in the counseling professions. Students also begin to identify their personal motives for a career in the counseling field. Additional topics include orientation to University of Phoenix learning platforms, the online library, graduate-level writing expectations, and the broader idea of navigating graduate school and studies.
CNSL 502	GRADUATE PORTFOLIO I	0	College of Social Sciences	Portfolio I is an admission readiness assessment which samples and evaluates the student's cognitive, affective, and behavioral skills in critical areas of the counselor education process. It is a six-workshop, 24-hour, noncredit assessment that helps determine student appropriateness for the program and gives the potential student the opportunity to evaluate his or her aptitude for the counseling program. Portfolio I must be passed before a student may be admitted to any graduate counseling program in the College of Social Sciences.
CNSL 503R	RESIDENCY I	1	College of Social Sciences	This residency course is 2-weeks in length, with the last 3 days of the second week involving face-to-face interaction with faculty and peers at a ground campus is the last requirement for formal admission into the counseling program. The residency is experiential, with organized opportunities for students to observe, practice, and demonstrate fundamental counseling and helping skills. Topics in this course include counselor self-efficacy, oral and written communication skills, basic interviewing skills, application of counseling theory to counseling models and practice, and finally an evaluation of students' readiness to move forward in the program. (1 credit)
CNSL 513R	RESIDENCY II	1	College of Social Sciences	This residency course is 2-weeks in length, with the last 3 days of the second week involving face-to-face interaction with faculty and peers at a ground campus. The 3-day in person residency provides an opportunity for students to observe, practice, and demonstrate competency in intermediate counseling skills. Topics include professional and personal development, oral communication skills, research methodologies, and sensitivity to diversity issues. Students will demonstrate intake, assessment, provisional diagnoses, and treatment planning abilities. Students also practice facilitation of group therapy and demonstrate skills in clinical case staffing. The core of this residency focuses on practicing group work theory and application in a variety of group therapy simulations. The capstone of the residency is staffing a clinical case and role play. (1 credit)

CNSL 523R	RESIDENCY III	1	College of Social Sciences	This residency course is 2-weeks in length, with the last 3 days of the second week involving face-to-face interaction with faculty and peers at a ground campus. The final 3-day in person residency in the Clinical Mental Health Counseling online program focuses on advanced clinical counseling skills and competencies. This residency is used to determine the student's readiness for work with diverse populations during clinical placement in practicum and internship courses. Students demonstrate skills in case conceptualization, diagnosis and rationalization, treatment planning using evidence-based approaches, and cultural and career awareness. Additional counseling topics include crisis and trauma, professional orientation and identity, personal growth and self-care concepts, and completion of a scenario-based exam. (1 credit)
CNSL 556	PORTFOLIO II	0	College of Social Sciences	Portfolio II assists students in the process of integrating and evaluating their learning in the Master of Science in Counseling Program at this point in both academic and experiential studies. Portfolio II is an assessment process that requires students to draw from and integrate material from previous courses in the program and demonstrate the application of that learning both professionally and personally. Students must successfully pass all areas to move forward in the program.
COM 295	BUSINESS COMMUNICATIONS	3	School of Business	This course introduces students to the foundations of communication in a business setting. After completion of this course, students will be able to identify the types and purposes of various business documents; create messages using appropriate channels for delivery based on context, audience and purpose; understand the needs created by changes in technology such as social media on business communication; and identify ethical, cross- cultural, and multinational issues in business communication.
COM 295T	BUSINESS COMMUNICATIONS	3	School of Business	This course introduces students to the foundations of communication in a business setting. After completion of this course, students will be able to identify the types and purposes of various business documents; create messages using appropriate channels for delivery based on context, audience and purpose; understand the needs created by changes in technology such as social media on business communication; and identify ethical, cross-cultural, and multinational issues in business communication.

COM 340	MASS COMMUNICATION	3	School of Business	This course delves into the processes and technology of communication on societal and global levels accomplished through the print and electronic media. Content of communication studied ranges from journalism, entertainment, commerce, advocacy to personal communication on the Internet. The dynamic changes that have taken place and are evolving today in mass media and mass communication will be considered along with predictions about the role of mass communication in the future.
COM 516	PROFESSIONAL COMMUNICATIONS	1	College of Education	This course provides new graduate students in University of Phoenix programs with an introduction to strategies for academic success within the University of Phoenix adult learning model. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, the purpose and use of portfolios, program standards, stress and time management, and tools for collaborative learning, in preparation for team assignments in future classes.
COM 520	ORGANIZATIONAL COMMUNICATION FOR ADULT EDUCATION & TRAINING	3	College of Education	In this course, learners apply written and oral communication principles to their roles as trainers and adult educators. Learners demonstrate how to persuade a variety of stakeholders through applicable communication channels. Learners examine the role of perception, techniques, and business justifications related to effective communication. The course includes topics about oral and written communication, interpersonal and intercultural communication, and tools for collaborative learning.
COM 537	ORGANIZATIONAL COMMUNICATIONS	3	School of Business	This course prepares graduate students to apply written and oral communication principles to the roles they play as managers. Students will learn how to persuade a variety of stakeholders to commit to a proposal. Other topics include the role of perception in communication, techniques, aligning communication to an audience, business justifications, presenting data, and ethics in organizational communications.

COM 600	COMMUNICATION SKILLS FOR GRADUATE STUDY	3	College of Social Sciences	This course provides students with an introduction to strategies for academic success at the graduate level. Topics include oral and written communication, methods for finding and evaluating course resources, critical thinking, program standards, stress and time management, and collaborative processes.
COM 705	COMMUNICATION STRATEGIES	1	School of Advanced Studies	This 3-week, online course provides incoming doctoral students with an introduction to advanced communication strategies to demonstrate their readiness to take next steps in their intellectual/doctoral journey through iterative improvements to critical thinking and writing skills by applying faculty feedback, writing resources, and personal insights to a doctoral-level writing assignment.
COM PA523	COMMUNICATIONS FOR PUBLIC ADMINISTRATORS	3	College of Criminal Justice and Security	This course prepares students to lead change in the public sector. Students will apply leadership theories in the public sector considering the unique role of shared decision making between career, appointed and elected officials in a political environment. Other topics include culture in the public sector, power, group behavior, financial and nonfinancial motivation, and workplace conflict.
COMM 110	INTRODUCTION TO ORAL COMMUNICATION	3	College of Humanities and Sciences	This course will provide students with the basic concepts of oral presentations. Students will be able to develop and deliver effective individual and group presentations in classroom and professional settings. The course is also designed to provide a maximum opportunity for practice and evaluation of presentation techniques.

COMM 315	DIVERSITY ISSUES IN COMMUNICATION	3	School of Business	This course identifies barriers to effective communication associated with racial, gender, cultural and socioeconomic diversity in the workplace and in the community. Students will develop an understanding of why and how diversity factors influence effective communications. The course will introduce techniques for improving written, oral and interpersonal communication skills in response to diversity concerns.
COMM 400	MANAGEMENT COMMUNICATION SKILLS	3	School of Business	This course is a study of human interpersonal communications and conflict resolution. Focus and emphasis is on identification and development of interpersonal relations in business organizations, as well as on management communication skills, group process, effective responses, and team building.
COMM 470	COMMUNICATING IN THE VIRTUAL WORKPLACE	3	School of Business	This course offers guidance and examples on how to communicate effectively in a growing workplace that is dependent upon technology as a means to communicate globally The course provides students with an understanding of technology mediated communication and how to maximize the use of new media to optimize organizational communications. Intranets, internet, e-commerce, and the impacts upon customer satisfaction of new communications technologies are explored.
COMP 295	BUSINESS COMMUNICATIONS	3	School of Business	This course introduces students to the foundations of communication in a business setting. After completion of this course, students will be able to identify the types and purposes of various business documents; create messages using appropriate channels for delivery based on context, audience and purpose; understand the needs created by changes in technology such as social media on business communication; and identify ethical, cross- cultural, and multinational issues in business communication.

COMPROG	COMPUTER PROGRAMMING LAB	0	Non-College Specific	This is a workshop for the new BSIT program for Computer Programming.
COMPROGLAB	COMPUTER PROGRAMMING LAB	0	Non-College Specific	This is a workshop for the new BSIT program Computer Programming Labs.
CONFWKSP	CONFLICT RESOLUTION FOR STUDY GROUPS	0	Non-College Specific	This is not an actual course. It has been entered as a means to schedule a non-academic activity.
CPMGT 300	PROJECT MANAGEMENT	3	School of Business	This course examines project management roles and environments, the project life cycle, and various techniques of work planning, and control and evaluation to achieve project objectives. The tools currently available to project managers are illustrated in this course through the use of Microsoft® Project® software.

CPMGT 301	STRATEGIC PORTFOLIO AND PROJECT MANAGEMENT	3	School of Business	This course provides students with insight into the management of an organization's strategic project portfolio. Students will learn the value of aligning a project's goals and objectives with the organization's strategies and stakeholders' interests. In addition, this course will illustrate how project teams are used to accomplish continuous improvement and to facilitate change within the organization. Students will also examine the characteristics of global and virtual project management.
CPMGT 302	PROCUREMENT AND RISK MANAGEMENT	3	School of Business	This course explores the procurement planning process, contracting methods and phases, outsourcing, contract administration, and the external environment of the procurement management processes. The course also addresses risk management applied to both project and procurement management processes.
CPMGT 303	PROJECT ESTIMATING AND CONTROL TECHNIQUES	3	School of Business	To be successful, project managers must analyze alternative project decisions by relying heavily on project estimating and control tools and techniques. This course provides students with the skills required to plan, baseline, monitor, analyze, and evaluate project performance. Students work in groups to analyze program parameters and work situations.
CPMGT 304	LEADING PROJECTS IN ORGANIZATIONS	3	School of Business	This course provides students with an overview of organizational behavior as it relates to project management. It introduces various techniques and processes that will help students develop effective communication and interpersonal skills to successfully manage project teams. In addition, numerous leadership and motivation theories are presented as well as techniques that minimize stress in the project environment. Furthermore, project decision-making processes and techniques that facilitate effective and efficient project change management are addressed in this course. Students will also examine the influence of globalization, technology, and future trends in project management.

CPMGT 305	PROJECT MANAGEMENT CAPSTONE	3	School of Business	This course is the capstone of the project management courses. Students will demonstrate project management skills learned via preparation of a project plan and presentation of that plan to the executive board in a role-play environment. Key project management concepts and processes studied in prior five courses will be integrated and applied to the class project.
CPMGT 310	PROJECT MANAGEMENT METHODOLOGIES	3	School of Business	This course examines the various project management methodologies used to successfully manage projects within an organization. Students will discover effective and efficient practices of applied project management techniques to include waterfall, PRINCE2, agile, six sigma, and Kanban methods. Students will also examine the influence of project type on the methodology used to effectively manage the project.
CPMGT 311	AGILE PROJECT MANAGEMENT WITH SCRUM METHODOLOGY	3	School of Business	This course provides students with an understanding of agile management as it relates to the agile project manager utilizing scrum methodology. Students will apply the scrum development framework to rapidly deliver improved outcomes within an organization. Scrum practices will be discussed in detail, including self-organizing teams, Scrum roles, sprint planning tracking, and tools for defining and measuring progress.
CPMGT 312	PROGRAM MANAGEMENT	3	School of Business	This course provides students with an overview of program management techniques to effectively manage the complexity of a collection of projects. Students will develop the skills to logically dissect a complex deliverable into individual parts, apply best practices to develop logical plans for program components, and understand how to manage dependencies and organize program staff into a high-performing program team.

CPSS 210	INTRODUCTION TO CRIMINAL JUSTICE	3	College of Social Sciences	This course is an overview of the organization and jurisdictions of local, state, and federal law enforcement, the judicial system, and corrections agencies involved in the criminal justice system. Special issues affecting the criminal justice system including prevention efforts, recidivism, and evidence-based practices are reviewed.
CPSS 215	SURVEY OF CORRECTIONS IN THE UNITED STATES	3	College of Social Sciences	This course introduces the various components of the corrections system within the criminal justice system. It provides an overview of corrections, including corrections history and the people, agencies, and organizations who manage convicted offenders. Other topics covered include policies and procedures, sentencing, community supervision, and rehabilitations of prisoners.
CPSS 225	SURVEY OF CORRECTIONAL PROGRAM CAREER OPPORTUNITIES	3	College of Social Sciences	This course introduces students to the areas in which correctional programs are offered. Students explore the various career opportunities in this diverse field.
CPSS 235	WORKING WITH THE JUVENILE JUSTICE SYSTEM	3	College of Social Sciences	This course is a general overview of the juvenile justice system. Students address current problems juveniles face and compare adult and juvenile justice systems. The course focuses special attention on the problems inherent in the handling of juveniles, the function of juvenile courts, sentencing, and future juvenile justice system issues.

CPSS 240	FOUNDATIONS OF CRIMINAL BEHAVIOR	3	College of Social Sciences	This course highlights the causes of criminal behavior and the theoretical interpretations of such behavior. Students are introduced to the criminological methods of inquiry and review several different classifications of crime. Students also consider the public policy implications of various approaches to criminology.
CPSS 300	WORKING WITH THE CORRECTIONAL POPULATION	3	College of Social Sciences	This course provides an overview of correctional populations and addresses the ethical, legal, and security aspects of the profession, including inmate manipulation.
CPSS 315	SOCIAL PSYCHOLOGY	3	College of Social Sciences	This course provides a view of the field of social psychology as it relates to the development of criminogenic factors and criminal behavior. It presents the concepts of social influence and power and exchange in social life. Students explore human thoughts, feelings, and actions as influenced by other people.
CPSS 330	ESSENTIALS OF COMMUNICATION IN CORRECTIONS	3	College of Social Sciences	This course focuses on the principles of effective professional communication. Topics include the broad spectrum of communication requirements and techniques to meet the demands of multiple audiences within the correctional field.

CPSS 370	INTAKE, ASSESSMENT, AND CLASSIFICATION	3	College of Social Sciences	This course introduces students to the purpose, philosophy, and functions of intake, assessment, and classification within the correctional system. Students survey multiple tools for determining risk and the needs of incarcerated individuals.
CPSS 385	CASE PLANNING AND CASE MANAGEMENT	3	College of Social Sciences	The purpose of this course is to prepare students to develop and manage a case plan for persons in the correctional system, based on each individual's risk, needs, and resources. Students examine the factors that influence case planning and management.
CPSS 395	PROGRAM FACILITATION SKILLS	3	College of Social Sciences	This course identifies the variety of facilitation skills necessary for promoting positive behavioral change in inmates and offenders. Students explore the distinction between paraprofessional and professional program services.
CPSS 400	INSTITUTIONAL AND COMMUNITY-BASED PROGRAMS	3	College of Social Sciences	This course provides an overview of the range of programs and interventions in institutional- and community-based settings. Students explore the risk and need assessment process that determines program placement.

CPSS 405	WORKING WITH SEX OFFENDERS	3	College of Social Sciences	This course provides the historical overview of sex crimes and punishment and explores the contemporary challenges of working with sex offenders. Students review treatment types specific to sex offenders.
CPSS 410	OVERVIEW OF MENTAL HEALTH IN CRIMINAL JUSTICE	3	College of Social Sciences	This course is designed to provide students with an introduction to the theories and research concerning psychopathology. The course addresses topics such as the classification of abnormal behaviors into various diagnostic categories; the etiologies of psychological disorders; and an overview of the major models of prevention, intervention, and treatment of mental health problems in the criminal justice system.
CPSS 411	MENTAL HEALTH ISSUES IN THE FORENSIC SETTING	3	College of Social Sciences	This course examines the evolution of national perspectives and current strategies regarding offenders with mental health issues. Students explore the challenges related to assessment and treatment within the system, as well as transition and continuity of care after release from custody.
CPSS 412	ORGANIC- AND PHYSIOLOGICALLY-BASED DISORDERS	3	College of Social Sciences	This course introduces students to the diagnostic criteria for organic- and physiologically-based disorders. Students examine the intricacies of multiple disorders related to mood, anxiety, and trauma issues. The course addresses the prevalence of these disorders within society, with a special focus on the effects on the criminal justice system. Students learn basic identification and intervention techniques.

CPSS 413	CHARACTER- AND PERSONALITY-BASED DISORDERS	3	College of Social Sciences	This course introduces students to the diagnostic criteria for character- and personality-based disorders. Students examine the intricacies of multiple disorders related to character and personality issues. The course addresses the prevalence of these disorders within society, with a special focus on the effects on the criminal justice system. Students learn basic identification and intervention techniques.
CPSS 415	WORKING WITH JUVENILE OFFENDERS	3	College of Social Sciences	This course is designed to prepare students to address the challenges of working with juvenile offenders. Students examine the differences between adult and juvenile offenders in supervision strategies, classification systems, and custodial relationships. Students also examine the unique role of the family in juvenile offender cases.
CPSS 416	OVERVIEW OF ADOLESCENT DEVELOPMENT	3	College of Social Sciences	This course is designed to familiarize students with developmental milestones, social influences, the process of identity formation, and the moral and ethical development of adolescents. Students also explore the unique challenges adolescents face.
CPSS 417	THE ROLE AND INFLUENCE OF THE FAMILY	3	College of Social Sciences	This course allows students to examine the complex correlation between of family dynamics and juvenile deliquency. Students explore topics related to prevention, development, and rehabilitation.

CPSS 418	PREVENTION AND TREATMENT INTERVENTIONS	3	College of Social Sciences	This course introduces students to basic prevention and treatment models for addressing delinquent behavior. Students survey a variety of interventions and strategies specific to juvenile offenders.
CPSS 420	ISSUES OF SUBSTANCE ABUSE AND ADDICTION	3	College of Social Sciences	This course examines the history of substance abuse and addiction, including the effects of addiction on individuals, families, and communities. Topics include national and international perspectives and strategies regarding addiction, as well as their relationship to the judicial system. The course includes an overview of the major models of prevention, intervention, rehabilitation, and maintenance and relapse prevention.
CPSS 421	ETIOLOGY AND PHYSIOLOGY OF ADDICTIONS DISORDERS	3	College of Social Sciences	This course examines the development of addiction disorders and the factors that influence substance abuse. Students explore the prevalence of co-occurring disorders and addictions in vulnerable population.
CPSS 422	ALCOHOL- AND DRUG-RELATED ADDICTIONS DISORDERS	3	College of Social Sciences	This course introduces students to the diagnostic criteria for alcohol- and drug-related addictions disorders. Students examine the intricacies of multiple disorders related to substance abuse and dependence and their prevalence in society, with a special focus on the effects on the criminal justice system. Students also survey a variety of other addiction disorders.

CPSS 423	PREVENTION, SELF-HELP, AND TREATMENT MODELS	3	College of Social Sciences	This course introduces students to different addiction prevention, treatment, self-help, and program models for working with forensic populations. Topics include the progression of criminal justice interventions and strategies to address addiction issues.
CPSS 430	MAINTAINING BOUNDARIES AND SELF-CARE	3	College of Social Sciences	This course introduces multiple skills and resources that support a fulfilling career in corrections, including processes for setting healthy boundaries, managing conflicts, and developing appropriate coping strategies for professional self-care.
CSC 390	CULTURE AND COMMUNICATION	3	School of Business	Students will be introduced to the interdependent relationship between symbols, rituals, artifacts, and patterns of thought of cultural groups and the communication practices of those groups. They will engage in critical analysis of communication in contemporary society, including culture-based metaphor, nonverbal communication, advertising, print media and television.
CSC 391	GEOGRAPHY, CULTURE AND COMMUNICATION	3	School of Business	This course will focus on the ecological and historical approach to cultures and communication and how they have changed within a global and spatial context. Within the context of culture and communication, themes will include human-environmental interaction; exploration of human-environmental systems analysis; diffusion and movement of commerce and urban sprawl; location and spatial patterns of development; identity and the boundaries of place; and selected topics within the scope of human geography.

CSC 392	ETHNIC AND CULTURAL DIVERSITY	3	School of Business	Students in the course will analyze the topics of identity, culture, and diversity as it relates to modern society. Students will be introduced to the conceptual frameworks of racial and ethnic relations, generalizations, stereotypes, prejudices, and adaptations in diverse cultures.
CSC 477	RACE AND CLASS IN THE MEDIA	3	School of Business	Through filmic analysis, cultural history, and media theory, students will explore the ways in which media in the United States participate in and challenge prevailing ideologies toward race, class and difference. Students will examine how various ethnic groups, including Native Americans, Asian Americans, African Americans, Latinos/as, and Whites are presented and what those images mean for audiences.
CSS 422	SOFTWARE ARCHITECTURE	3	College of Information Systems and Technology	This course is an integrating course in business application software engineering. Integration, migration, and maintenance of enterprise software systems, including legacy systems, are emphasized.
CSS 562	PROGRAMMING CONCEPTS	3	College of Information Systems and Technology	This course provides the conceptual foundation to develop computer software programs. Topics include program development processes, flowcharting, basic design, program structure (methods and events), Boolean logic, looping, recursion, lists and arrays.

CTEC 510	Overview of Career and Technical Education	3	College of Education	This course is designed to survey the history, philosophy, and general principles of Career and Technical Education (CTE). Participants share ideas and resources as they learn to analyze current trends and meet challenges within the field. Using effective instructional methods in the CTE classroom, identifying resources for CTE programs and educators, overseeing student organizations, mobilizing stakeholders, and promoting CTE are also emphasized.
CTEC 511	Career and Technical Education Curriculum and Instruction	3	College of Education	This course emphasizes methods of teaching career and technical education (CTE), including interdisciplinary cross-curricular instruction and the integration of Common Core State Standards (CCSS) into the CTE curriculum. Participants design curriculum and instruction to meet the needs of the diverse CTE student. Strategies for incorporating instructional technology, developing employability skills, and generating authentic assessments are also examined.
CTEL 501	LANGUAGE AND LANGUAGE DEVELOPMENT	4	College of Education	This course examines language structure, second language acquisition theories, the nature of cognitive and affective language development, and sociocultural and political factors affecting language development. An analysis of the theories, models, processes and stages of language acquisition will also be covered.
CTEL 502	ASSESSMENT AND INSTRUCTION	4	College of Education	This course discusses instruction in the content areas, using both the first language and the second language, and principles for standards- based assessments, as well as the roles, purposes, and different types of assessments. Effective language and content-area assessments and foundations for programs for English learners and English language literacy are also analyzed. The course also examines ELD and SDAIE such as resources, approaches and methods, listening and speaking, and reading and writing.

CTEL 503	CULTURE AND INCLUSION	4	College of Education	This course addresses cultural awareness and effective collaboration among teachers, English learners, their families, paraprofessionals, and the community to improve literacy development and learning.
CTSKILLS	CRITICAL THINKING WORKSHOP	0	Non-College Specific	The ability to think critically, solve problems, and make decisions is a valuable skill that students will need to apply both in their professional lives and academic careers. Some decisions are routine and require little, if any, contemplation. Other decisions are complex and require a considerable amount of thought and reflection. This three hour seminar introduces students to the concept of assumptions in critical thinking and presents a model to aid in the examination of complex decisions. First, students are presented with a definition of assumptions, an explanation of how assumptions are developed, and an examination of strategies for identifying assumptions that drive their own behavior. It also presents the critical thinking definition of argument and how language is used to support or discredit arguments. Second, students are presented with a five-step problem solving model. Whether a complicated work problem, a difficult assignment at school, or a major life decision; this model gives students a tool for evaluating situations, developing alternatives, and shaping a plan of action.
CUR 505	SOCIAL AND GLOBAL PERSPECTIVES OF TEACHER LEADERSHIP	3	College of Education	Learners in this course have the opportunity to analyze the field of education from a social and global perspective. Learners investigate the implications of the globalization of knowledge on micro and macro educational systems. Multicultural implications, diversity, and the use of technology as a vehicle of pedagogy are explored. Emphasis is on building collaborative organizational communities and empowering teacher leaders to think strategically about school change.
CUR 506	THEORIES AND BEST PRACTICES OF CURRICULUM AND INSTRUCTION	3	College of Education	This course focuses on applying curricular theory to best practices in the 21st century classroom. Candidates explore the social and political foundations of curriculum and instruction and current research in this area. They analyze curriculum philosophy and planning as well as practical applications and innovations in curriculum design. Special attention is given to the use of technology in the development of effective learning environments and instruction in the 21st century classroom.

CUR 515	CRITICAL THINKING AND INNOVATIVE SKILLS	3	College of Education	Learners in this course explore the development and application of critical thinking skills for all academic content areas in elementary, middle school, and high school settings. Participants identify the educational needs of students by exploring current instructional theories, models, and strategies; and state, local, and national standards as they relate to developing critical thinking skills in classroom teaching. Prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.
CUR 516	CURRICULUM THEORY AND INSTRUCTIONAL DESIGN	4	College of Education	In this course, learners focus on applying theory and systematic approaches to design and implementation of instruction for diverse adult learners. Learners identify and analyze trends, issues, models, methods, various instructional strategies, technology, and classroom management strategies in instructional design for adults. In addition, learners design an instructional unit, applying research-based best practices and employing instructional design models.
CUR 518	MULTICULTURAL STRATEGIES FOR THE ADULT LEARNER	3	College of Education	In this course, learners acquire a rich and deep framework to understand what diversity means in the workplace, in the training and development environment, and in the higher education classroom. Learners explore dimensions of diversity which include race, gender, age, ethnicity, sexual orientation, gender identity and expression, religion, education, and socioeconomic status. Learners acquire an awareness of diversity and understand how to design, deliver, and evaluate training and education programs that are sensitive to the challenges and opportunities that a multicultural context presents.
CUR 520	ADVOCATING FOR LEARNING	3	College of Education	Learners examine dispositions and beliefs regarding teaching and learning for all students. This course includes discussions about supportive and engaging learning environments, along with collaboration with other professionals to develop strategies that promote student learning. Using assessment data, learners will differentiate instruction and employ appropriate strategies for students. Learners will explore advocacy through course materials, practical exercises and engaging group activities.

CUR 525	ETHICAL ISSUES IN EDUCATION	3	College of Education	Learners examine the ethical framework and challenges of teachers and teacher leaders in today's schools. The professional educational leader fosters ethical practices and engages in purposeful ethical decision-making. Learners will ethically respond to social and political issues in education through case studies, field experiences, and other readings and interactions. Ethical leadership and decision- making will be analyzed and discussed to determine how educational leaders will be able to provide support to teachers, students, and other constituents with the purpose of improving current educational practices.
CUR 528	ASSESSMENT OF LEARNING	3	College of Education	Learners focus on developing the skills necessary to become effective assessors of adult learners in corporate training and in other adult education learning environments. Learners examine the fundamentals of planning, implementing, and learning. Additionally, learners explore purposes and methods of evaluation for courses, programs, and training.
CUR 530	ASSESSMENT AND EVALUATION MODELS	3	College of Education	In this course, learners use assessment data through a systematic process to make informed decisions and to evaluate classroom and school- wide learning outcomes. Emphasis is placed on the design, implementation, and analysis of formative assessments while other types of assessments are explored. Learners will use this assessment knowledge to design and analyze a comprehensive assessment plan in a K-12 setting.
CUR 532	FACILITATING ONLINE LEARNING	3	College of Education	Learners explore practical strategies for aligning effective principles of instruction with the use of technology in adult learning and training environments. Learners develop the knowledge and skills required for effectively engaging adult learners in distance learning experiences using a variety of web-based course management and information systems. In addition, learners apply and evaluate audio, video, and collaborative technology tools; mobile learning technologies; and corporate online training techniques. Learners discuss essential aspects of learning in online training programs and classrooms such as engagement, time management, reflection, and assessment strategies.

CUR 535	RESEARCH FOR IMPROVED PRACTICE	4	College of Education	Learners examine the process of conducting their own classroom-based or school-based research. The course provides practical experience with action research components in the educational setting for everyday instruction. Learners will use research and data to enhance the instructional environment and to promote lifelong learning.
CUR 540	METHODS OF COACHING IN THE INSTRUCTIONAL SETTING	3	College of Education	This course provides an examination of how systemic processes, experiential learning, and coaching strategies positively affect teaching and learning outcomes. Learners examine the interchangeable competencies of coaching and mentoring including roles, fostering relationships, ethical guidelines, building learning communities, effective communication, self-reflective problem solving, conflict resolution, facilitating learning, and accountability. Learners will be equipped with content knowledge, real life application opportunities, tools, and specific strategies that can be applied in both instructional leadership and coaching situations.
CUR 545	USING TECHNOLOGY FOR TEACHING AND LEARNING	3	College of Education	Learners evaluate technology use and technology integration for teaching and learning while considering the value of current technologies and tools as part of an interactive experience in a 21st century classroom. Learners will review the considerations and responsibilities of using and maintaining technology in today's schools, including safety, ethics, resources, and financial needs. Using the knowledge gained in this course, learners will determine how they will advocate and be change-agents for technology integration within their districts, schools, classrooms, and the community.
CUR 550	ENGAGING IN COMMUNITIES OF PRACTICE	3	College of Education	Learning communities are a method for the organization and operation of schools that will best meet the academic needs of students. In this course, learners examine the components of developing and maintaining school-based communities of practice to improve student achievement and assist with school improvement planning. Learners will identify resources to help them initiate, plan, and maintain communities of practice.

CUR 555	PROFESSIONAL LEARNING FOR CONTINUOUS IMPROVEMENT	3	College of Education	Learners will examine the relationship of professional and personal learning to school, teacher, and student need. Learners will gain an array of effective ideas, strategies, plans, methods, and tools on designing and implementing professional development to promote the intellectual and self-reflective development of teachers, as they collaborate to raise student achievement. Topics include components of high- quality staff development and learning networks.
CUR 711	DEVELOPMENTAL AND LEARNING THEORIES	3	School of Advanced Studies	Theories on the physical, social, emotional, and intellectual development of learners across the lifespan are the focus of this course. These theories and their effect on the educational process and the design and implementation of instructional programs will be examined.
CUR 712	CURRICULUM THEORY	3	School of Advanced Studies	This course examines historical, current, and cross-cultural theories of curriculum. With a foundation in the major theorists and tenets of their theories, learners analyze curriculum documents for evidence of the various theories, investigate implications of theories on educational programming, and interpret the interaction of these theories with public policy.
CUR 713	CURRICULUM, DEVELOPMENTAL, AND LEARNING THEORIES	3	School of Advanced Studies	This course provides an overview of the historical and current theories of curriculum, development, and learning. Students examine the effects these theories have on the educational process, curriculum design, and the implementation of instructional programs. With a foundation in the major theorists and tenets of their theories, students analyze curriculum processes and procedures, investigate implications of the theories for educational programming, and interpret the interaction of these theories with public policy.

CUR 721	CURRICULUM DESIGN	3	School of Advanced Studies	In this course, students focus on the creation of systemic models of curriculum design and delivery, including consideration of schedule, structure, stakeholder involvement, and end products. Students will also analyze the implicit, hidden, cultural, and institutional aspects of existing curricular models to inform their own development approach.
CUR 722	INSTRUCTIONAL MODELS	3	School of Advanced Studies	This course analyzes the models and process of instruction. Effective instructional models are explored as they relate to teaching strategies and learner outcomes. Instructional models for diverse populations, improvement of instructional programs, and staff development are of special focus.
CUR 723	ASSESSMENT OF STUDENT LEARNING	3	School of Advanced Studies	This course explores student assessment methods utilized in learning organizations. The merits and faults of these methods are debated. Among the key topics are outcomes-based assessment - such as standardized achievement and criterion assessment, as well as the influence of leadership styles on these outcomes.
CUR 731	SUPERVISION OF CURRICULUM AND INSTRUCTION	3	School of Advanced Studies	This course explores the supervision and evaluation of instructional programs. Topics include effective techniques for managing curriculum, effective evaluation instruments, conferencing, classroom management, and recommendations for improvement. Traditional and alternative methods of evaluating student achievement will be discussed.

CUR 732	PROGRAM EVALUATION	3	School of Advanced Studies	In this course, students explore program evaluation models and methods utilized in learning organizations. Both formative and summative methods are discussed, and their merits and faults are debated. Accreditation issues are among the key topics, and the influence of leadership style on program evaluation methods is examined.
CVCEU 2100	THE 5 CHOICES(R) TO EXTRAORDINARY PRODUCTIVITY	1.6	School of Continuing Education	The ordinary just happens, but extraordinary - that's a choice. Every day brings crashing waves of demands: texts, emails, interruptions, meetings, phone calls, tweets, blogs - not to mention the high-pressure challenges of jobs - that can be overwhelming and exhausting. The sheer number of distractions can threaten the ability to think clearly, make good decisions, and accomplish what matters most leaving individuals worn out and unfulfilled. This course offers the exceptional FranklinCovey(R) The 5 Choices of Productivity. This course presents time management redefined for the twenty-first century offering insights to increase productivity of teams, individuals, and organizations while empowering individuals to make more selective, high-impact choices about where to invest valuable time, attention, and energy. This 16 instructional hour course issues 1.6 continuing education units.
CVCEU 2500	RULE YOUR TECHNOLOGY DON'T LET IT RULE YOU	0.6	School of Continuing Education	Every day brings crashing waves of demands: texts, emails, interruptions, meetings, phone calls, tweets, blogs - not to mention the high-pressure challenges of jobs - that can be overwhelming and exhausting. The sheer number of distractions can threaten our ability to think clearly, make good decisions, and accomplish what matters most, leaving individuals worn out and unfulfilled. This course covers Choice 4 from the exceptional FranklinCovey (TM) The 5 Choices of Productivity. This materials is time management redefined for the twenty-first century: offering insights to increase productivity through the use of technology. This course provides .6 continuing education units in one, 6-hour workshop.
CYB 205	Infrastructure Administration	3	College of Information Systems and Technology	This course analyzes and compares security administration for traditional physical infrastructures with that of evolving cloud infrastructures.

CYB 409	Information Systems Leadership, Projects and Operations	3	College of Information Systems and Technology	This course focuses on the application of information security management principles to Security Projects from a Chief Information Security Officer (CISO) point of view.
CYB 492	Capstone Bachelor Implementation	3	College of Information Systems and Technology	This capstone project is the implementation phase of the capstone project that combines and demonstrates the acquired knowledge and skills from Computer Network Defense and other Core Courses, and the twelve selected Elective courses.
DAT 335	User Interface Principles and Design	3	College of Information Systems and Technology	This course introduces principles and techniques of user interface design with particular emphasis on databases.
DAT 565	DATA ANALYSIS AND BUSINESS ANALYTICS	3	School of Business	This course introduces students to a variety of data analytic solutions. Students will learn how to retrieve real business data and create reports, support business decisions with visual representations of data, manage and improve a business process based on quantitative analysis, analyze long-term trends and patterns in the data, and develop actionable results that drive the business decision-making process.

DBM 280	FUNDAMENTALS OF ACCESS DATABASE	3	College of Information Systems and Technology	This course will cover the use of desktop database software to create small database applications. Emphasis will be placed on creating and managing a database, creating tables, and building forms. Emphasis is placed on hands-on experience in the installation, design, and debugging of desktop database software.
DBM 294	QUERYING A SQL SERVER	3	College of Information Systems and Technology	This course provides an overview of querying a SQL Server. Emphasis is placed on creating database objects, working and modifying data, and optimizing the database environment. This course addresses the objectives contained in the Microsoft Certified Solutions Associate (MCSA) for querying a Microsoft® SQL server.
DBM 296	ADMINISTERING A SQL SERVER	3	College of Information Systems and Technology	This course provides an introduction to the installation, configuration, support, availability and recovery of databases. The considerations for database administration addressing the requirements for user access, security, backup and recovery will be covered in this course. This course addresses the objectives contained in the Microsoft Certified Solutions Associate (MCSA) for administering a Microsoft® SQL server database.
DBM 298	IMPLEMENTING A DATA WAREHOUSE	3	College of Information Systems and Technology	This course examines the use of database technology in a variety of information technology applications. Emphasis is placed on implementing, configuring, deploying, and maintaining SQL Server Integration Services (SSIS), Analysis Services (SSAS), and Reporting Services (SSRS) solutions. This course addresses the objectives contained in the Microsoft Certified Solutions Associate (MCSA) for implementing a data warehouse with Microsoft SQL server.

DBM 380	DATABASE CONCEPTS	3	College of Information Systems and Technology	This course covers database concepts. Topics include data analysis, the principal data models with emphasis on the relational model, entity-relationship diagrams, database design, normalization, and database administration.
DBM 381	DATABASE CONCEPTS	3	College of Health Sciences and Nursing	This course covers health care database concepts. Topics include data analysis, the principal data models with emphasis on the relational model, entity-relationship diagrams, database design, normalization, and database administration within the health care industry.
DBM 384	SPECIAL PURPOSE DATABASES	3	College of Information Systems and Technology	This course examines the use of database technology in a variety of information technology applications. The use of text, multimedia, temporal, spatial, and mobile databases will be covered in this course.
DBM 460	ENTERPRISE DATABASE MANAGEMENT SYSTEMS	3	College of Information Systems and Technology	This course covers distributed computing, middleware and industry standards as relating to the enterprise data repository. Data warehousing, data mining, and data marts are covered from an enterprise perspective.

DBM 502	DATABASE MANAGEMENT	3	College of Information Systems and Technology	The course focuses on database management systems from a managerial perspective. Emphasis is placed on developing a strategy for managing and organizing corporate data, including data warehousing, to support the business activities of the organization. The course uses Microsoft Access and simulations of Oracle software.
DEVQA 898	TEST COURSE 4	3	Non-College Specific	
DEVQA 899	TEST COURSE 5	3	Non-College Specific	
DEVQA 997	TEST COURSE 1	3	Non-College Specific	

DEVQA 998	TEST COURSE 2	4	Non-College Specific	
DEVQA 999	TEST COURSE 3	3	Non-College Specific	
DEVQA LAD	TEST COURSE 6	10	Non-College Specific	test course
DEVQA898	TEST COURSE 4	3	Non-College Specific	

DEVQA899	TEST COURSE 5	3	Non-College Specific	
DHA 711	ADMINISTRATION OF COMPLEX HEALTH CARE SYSTEMS	3	School of Advanced Studies	Students will focus on administration of complex health systems rather than singular organizations. Topics include organizational analysis, strategic planning, multi-organizational management issues, and evolving governance structures. Students are expected to discuss and critically analyze theories and methods in health care administration. This course is intended to serve as an arena for discussion and inquiry regarding both current and historical issues in strategic decision-making at the policy and the organizational level. 3 credits.
DHA 714	HEALTH CARE MARKETING	3	School of Advanced Studies	Survival of health care institutions is primarily dependent on how well marketing succeeds at acquiring market share. This course examines key marketing concepts within the health care industry. Students will examine the financial success of health care institutions from a market share perspective including pricing, promotion, and distribution of services. 3 credits.
DHA 715	RISK MANAGEMENT IN COMPLEX HEALTH ORGANIZATIONS	3	School of Advanced Studies	Managing risk in health care organizations involves strategic resource management to reduce loss, maximize financial stability, and protect assets. Practitioners must have an understanding of insurance and finance principles as well as litigation management within the context of corporate compliance. Students will apply concepts from claims administration, human resource management, and information technology to analyze how integrated resource management promotes operational efficiency, ethical leadership, and employee retention.

DHA 721	HEALTH CARE ECONOMICS	3	School of Advanced Studies	This course focuses on the application of economic theory to the amount, organization, and distribution of health care services in the United States. Students will apply principles such as supply and demand, margin analysis, and cost effectiveness analysis. Students will discuss issues and controversies surrounding the government's role in financing and regulating health services. 3 credits.
DHA 722	POLICY AND REGULATION IN HEALTH CARE	3	School of Advanced Studies	Contemporary administration requires a thorough understanding of governmental policy and regulatory development process. Students analyze the history of health financing legislation and regulatory implications of the Medicare and Medicaid programs. This course examines the impact of emerging social, economic, ethical, legal, and political issues on the future of the health care system. Emphasis is on the creation of innovative models of health care delivery.
DHA 723	EXECUTIVE INFORMATION SYSTEMS	3	School of Advanced Studies	This course focuses on the use of financial systems, decision modeling programs, and advanced clinical information systems in formulating the strategic direction of modern health care systems. Practical experience using the University's information technology partners introduces students to the richness of modern data systems. Simulations include quality improvement applications, including statistical process control methodology. 3 credits.
DHA 724	GLOBALIZATION OF HEALTH CARE	3	School of Advanced Studies	This course focuses on global health care systems with the objective of improving the US health care systems. Topics include global health issues, advocacy organizations, comparative political processes, and the economics of health financing. Students will understand the role of various international governing structures on health policy development. 3 credits.

DHA 731	POPULATION HEALTH AND EPIDEMIOLOGY	3	School of Advanced Studies	The science of epidemiology is essential for projecting the population health needs, and appropriate allocation of public and private resources. This course focuses on the utilization of epidemiologic studies and techniques as a basis for health care policy and administrative decision-making. Students will apply this science in the analysis of emerging health epidemics and diseases. 3 credits.
DHA 732	EVALUATION OF HEALTH CARE PROGRAMS	3	School of Advanced Studies	This course prepares the contemporary health administrator to utilize research methodologies in making decisions regarding the cost effectiveness of specific health programs. Case studies will be used that incorporate disease-specific programs, community wide health interventions, and population specific care management programs across a variety of health settings. 3 credits.
DHA 733	CONTEMPORARY LEADERSHIP ISSUES	3	School of Advanced Studies	This seminar focuses on the application of new knowledge in creating new policies and models in the administration of health programs. Learners will explore contemporary issues and their impact on emerging leadership and management theory. Learners will demonstrate integration of knowledge. 3 credits.
DHAX 733	CONTEMPORARY LEADERSHIP ISSUES	3	School of Advanced Studies	This seminar focuses on the application of new knowledge in creating new policies and models in the administration of health programs. Learners will explore contemporary issues and their impact on emerging leadership and management theory. Learners will demonstrate integration of knowledge.

DISCWKSP	DISC FOR STUDY GROUPS	0	Non-College Specific	The DiSC for Study Groups is a class that provides a personality profile and behavioral profile for students to help them improve their communication and interaction with other study group members. It is designed to help students succeed in their study groups.
DOC 700	DEVELOPING THE DOCTORAL IDENTITY	1	School of Advanced Studies	This foundational course is designed to promote active doctoral-level inquiry and establish the School of Advanced Studies' integrated scholarship, practice, and leadership approach. Students participate in structured activities and guided dialogue to strengthen their understanding of the doctoral program requirements and expectations for doctoral-level thinking, research, informed voice, and community building. Students will demonstrate the initiative needed to take next steps in their intellectual/doctoral journey through iterative improvements to critical thinking, reading and writing skills by applying faculty feedback, writing resources, and personal insights to a doctoral-level writing assignment.
DOC 705R	CREATIVE AND CRITICAL THINKING	3	School of Advanced Studies	This course challenges the student to become a creative scholar, practitioner, leader and problem-solver and to begin the process of personal transformation by questioning assumptions and traditional patterns of thinking. Throughout the course, students demonstrate characteristics of creative and critical thinking in individual and collaborative situations.
DOC 720N	PROPOSAL SEMINAR	3	School of Advanced Studies	This course will assist learners in determining their dissertation topic. Learners will work on their own dissertation prospectus/proposal as well as discuss the work of the other learners in the class. Upon completion of this course, learners will develop their problem statement, purpose statement, and determine the most effective research tradition to use for their dissertation. At the end of this course, learners will have incorporated this information to form the first chapter of their dissertation proposal.

DOC 720R	DOCTORAL SEMINAR I	2	School of Advanced Studies	This 3-day residency course begins the formal development of the student's dissertation. This development will be ongoing throughout the curriculum and result in the dissertation's submission at the end of the program. Topics in the course include problem statements, research questions, hypotheses and testing, samples and populations, and the intended impact of the study on the profession and society. The outcome of this course is a concept paper that articulates a specific goal and plan that will evolve into the student's dissertation. This course will incorporate students from various doctoral programs/disciplines.
DOC 721N	PROSPECTUS AND PROPOSAL WORKSHOP	3	School of Advanced Studies	This course begins the formal development of the learner's dissertation. This development will be ongoing throughout the curriculum and result in the dissertation's submission at the end of the program. Topics in the course include problem statements, research questions, hypotheses and testing, samples and populations, the intended impact of the study on the profession and society. The outcome of this course is a prospectus (or blueprint) that articulates a specific goal and plan that will evolve into the learner's dissertation.
DOC 722	DOCTORAL SEMINAR II	3	School of Advanced Studies	This course is designed to focus on the Doctoral Proposal for approval. During this course the Prospectus from the Weekend Residency will be applied to the development of the Proposal. Topics in this course include focused literature review, statistical and qualitative tools, data gathering and data analysis approaches, past research and current theory, proposal chapter format requirements, Human Subjects research requirements, and submission timelines. 3 credits.
DOC 723	DOCTORAL SEMINAR II	3	School of Advanced Studies	This course is designed to focus on the Doctoral Proposal for approval. During this course, the work from the Second-Year Residency will be applied to the development of the Proposal. Topics in this course include focused literature review, statistical and qualitative tools, data gathering and data analysis approaches, past research and current theory, proposal chapter format requirements, Human Subjects research requirements, and submission timelines.

DOC 733	DOCTORAL DISSERTATION	3	School of Advanced Studies	This is a chair-guided course for students to finalize their dissertation proposals. The chair and committee members will work with the student to assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support from chair and committee members to be engaged in communities of scholarship and practice.
DOC 733A	DOCTORAL DISSERTATION	3	School of Advanced Studies	This course is a continuation of DOC/733 for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support from chair and committee members to be engaged in communities of scholarship and practice.
DOC 733B	DOCTORAL DISSERTATION	3	School of Advanced Studies	This course is a continuation of DOC/733A for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Enhanced support will be provided to guide students towards completion of the dissertation proposal.
DOC 733R	DOCTORAL SEMINAR III	3	School of Advanced Studies	This 5-day residency course supports the students' professional and scholarly development in their respective discipline through experiential and interactive activities. Students will synthesize and integrate theory and practice to apply them toward the development of leadership in their communities.

DOC 734	DOCTORAL PROJECT IV	3	School of Advanced Studies	This is a chair-guided course for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to assess and improve readiness and skill preparation for completion of the dissertation. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.
DOC 734A	DOCTORAL PROJECT IV	3	School of Advanced Studies	This course is a continuation of DOC/734 for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.
DOC 734B	DOCTORAL PROJECT IV	3	School of Advanced Studies	This course is a continuation of DOC/734A for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. Enhanced support will be provided to guide students towards completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.
DOC 734R	DOCTORAL SEMINAR IV	2	School of Advanced Studies	This 3-day residency course is designed to facilitate the process through an approved doctoral proposal to final submission of the doctoral dissertation due at the end of the program, with the final chapters being explored for content and format.

DOC 735	RESEARCH PROPOSAL	3	School of Advanced Studies	Students will work toward completing a draft of the dissertation proposal with their dissertation Chair. While working on their proposals, students will discuss ethical issues associated with conducting research with human participants. Students will discuss, at a conceptual level, the dissertation proposal quality review and the Institutional Review Board review processes.
DOC 736A	DISSERTATION I	3	School of Advanced Studies	The purpose of this class is for the learner and dissertation chair to work together, with the dissertation committee to finalize and submit the dissertation proposal for a Quality Review of the research method and an Institutional Review Board (IRB) review. Quality Review of the research method and IRB approval must be received to progress to DOC/737.
DOC 736B	DISSERTATION I	3	School of Advanced Studies	This is the second one-on-one chair-guided course for a doctoral student working to complete a dissertation proposal. Students enroll for this course when any of three approvals have not been received, Committee/Chair approval, Quality Review Methods approval, or Institutional Review Board IRB approval of ethical treatment within the proposed study. The student/chair relationship and the student earning approval of the dissertation proposal from all three groups is the catalyst for the course. Quality Review of the research method and IRB approval must be received to progress to DOC/737.
DOC 736C	DISSERTATION I	3	School of Advanced Studies	The purpose of this class is for the learner and dissertation chair to work together, with the dissertation committee to finalize and submit the dissertation proposal for a Quality Review of the research method. Quality Review of the research method approval must be received to progress to DOC/737.

DOC 736IA	DISSERTATION I	3	School of Advanced Studies	The purpose of this class is for the student and dissertation Chair to work together, with the dissertation committee, to finalize and submit the dissertation proposal for approval. Students receive continued support from Chair and committee members to be engaged in communities of scholarship.
DOC 736IB	DISSERTATION I	3	School of Advanced Studies	The purpose of this class is for the student and dissertation Chair to work together, with the dissertation committee, to finalize and submit the dissertation proposal for approval. Students receive continued support from Chair and committee members to be engaged in communities of scholarship.
DOC 736IC	DISSERTATION I	3	School of Advanced Studies	The purpose of this class is for the student and dissertation Chair to work together, with the dissertation committee, to finalize and submit the dissertation proposal for approval. Students receive continued support from Chair and committee members to be engaged in communities of scholarship.
DOC 736N1	DISSERTATION I	3	School of Advanced Studies	The purpose of this class is for a learner to work with his or her committee to finalize the first three chapters of the dissertation and submit the research proposal for ARB/IRB approval. ARB/IRB approval must be received to progress to DOC/737

DOC 736N2	DISSERTATION I	3	School of Advanced Studies	The purpose of this class is for a learner to work with his or her committee to finalize the first three chapters of the dissertation and submit the research proposal for ARB/IRB approval. ARB/IRB approval must be received to progress to DOC/737.
DOC 736N3	DISSERTATION I	3	School of Advanced Studies	The purpose of this class is for a learner to work with his or her committee to finalize the first three chapters of the dissertation and submit the research proposal for ARB/IRB approval. ARB/IRB approval must be received to progress to DOC/737
DOC 737	DISSERTATION II	3	School of Advanced Studies	Learners enroll in this mentor-guided course while collecting and analyzing data for their dissertation. Learners are expected to finalize their dissertation with their committee during this course. In this course learner/ mentor agreement serves as the catalyst for completing the study's research, findings, recommendations, and conclusions.
DOC 737I	DISSERTATION II	3	School of Advanced Studies	Students enroll in this dissertation chairperson guided course while collecting and analyzing data for the dissertation. Students are expected to continue the research and writing of the dissertation during this course. In this course the learner/chair agreement serves as the catalyst for completing the study's research, findings, recommendations, and conclusions.

DOC 737N	DISSERTATION II	3	School of Advanced Studies	Learners enroll in this mentor-guided course while collecting and analyzing data for their dissertation. Learners are expected to finalize their dissertation with their committee during this course. In this course learner/mentor agreement serves as the catalyst for completing the study's research, findings, recommendations, and conclusions.
DOC 738A	DEFENSE	3	School of Advanced Studies	In this course, learners, with the guidance of their mentor, will complete the formal oral defense of the dissertation and prepare and submit the study for university approval.
DOC 738B	DEFENSE	3	School of Advanced Studies	In this course, learners, with the guidance of their mentor, will complete the formal oral defense of the dissertation and prepare and submit the study for university approval.
DOC 738C	DEFENSE	3	School of Advanced Studies	In this course, learners, with the guidance of their mentor, will complete the formal oral defense of the dissertation and prepare and submit the study for university approval.

DOC 738IA	DISSERTATION DEFENSE	3	School of Advanced Studies	During this Dissertation Chair-guided course, the doctoral candidate prepares and submits the doctoral dissertation for final quality review and completes the formal oral defense of the dissertation. Successfully submitting and gaining final quality review approval and passing the oral defense is required to complete this class.
DOC 738IB	DISSERTATION DEFENSE	3	School of Advanced Studies	During this Dissertation Chair-guided course, the doctoral candidate prepares and submits the doctoral dissertation for final quality review and completes the formal oral defense of the dissertation. Successfully submitting and gaining final quality review approval and passing the oral defense is required to complete this class.
DOC 738IC	DISSERTATION DEFENSE	3	School of Advanced Studies	During this Dissertation Chair-guided course, the doctoral candidate prepares and submits the doctoral dissertation for final quality review and completes the formal oral defense of the dissertation. Successfully submitting and gaining final quality review approval and passing the oral defense is required to complete this class.
DOC 738N1	DEFENSE	3	School of Advanced Studies	In this course, learners, with the guidance of their mentor, will complete the formal oral defense of the dissertation and prepare and submit the study for university approval.

DOC 738N2	DEFENSE	3	School of Advanced Studies	In this course, learners, with the guidance of their mentor, will complete the formal oral defense of the dissertation and prepare and submit the study for university approval.
DOC 738N3	DEFENSE	3	School of Advanced Studies	In this course, learners, with the guidance of their mentor, will complete the formal oral defense of the dissertation and prepare and submit the study for university approval.
DOC 740R	ANNUAL RENEWAL RESIDENCY	0	School of Advanced Studies	This non-credit-bearing, 3-day course is required only when a learner has not completed the dissertation within 12 months of completing all courses, excluding DOC/733 and DOC/734. This residency session is designed to allow for concentrated time between the learner and a faculty member, focusing on dissertation completion. This annual renewal residency is required for every full year a learner remains in "all but dissertation" status.
DOC 741	DOCTORAL DISSERTATION	3	School of Advanced Studies	In this course, students will finalize their dissertation proposal. Students receive continued support in assessing and improving their readiness and skill preparation for completion of the dissertation proposal. Additionally, students explore communities of scholarship to engage with scholars in their area of practice and to share their future research.

DOC 741A	DOCTORAL DISSERTATION	3	School of Advanced Studies	In this course, the dissertation chair and committee members guide the student in finalizing their dissertation proposal. Students receive continued support in assessing and improving their readiness and skill preparation for completion of the dissertation proposal. Additionally, students explore communities of scholarship to engage with scholars in their area of practice and to share their future research.
DOC 741B	DOCTORAL DISSERTATION	3	School of Advanced Studies	In this course, the dissertation chair and committee members guide students in finalizing their dissertation proposal. Students receive continued support in assessing and improving their readiness and skill preparation for completion of the dissertation proposal.
DOC 741R	ANNUAL RENEWAL RESIDENCY	2	School of Advanced Studies	This 3-day renewal residency is designed to support students at various stages of dissertation development. Students engage in structured reflective activities with personalized faculty guidance to develop strategies focused on advancing the doctoral dissertation toward completion.
DOC 742	DOCTORAL PROJECT IV	3	School of Advanced Studies	In this chair-guided course, doctoral candidates finalize their dissertation as a significant contribution to the body of knowledge. The chair and committee members work with the candidate to complete the dissertation in preparation for University approval, followed by the oral defense. Additionally, this course focuses on engagement in communities of scholarship and practice.

DOC 742A	DOCTORAL PROJECT IV	3	School of Advanced Studies	In this chair-guided course, doctoral candidates finalize their dissertation as a significant contribution to the body of knowledge. The chair and committee members work with the candidate to complete the dissertation in preparation for University approval, followed by the oral defense. Additionally, this course focuses on engagement in communities of scholarship and practice.
DOC 742B	DOCTORAL PROJECT IV	3	School of Advanced Studies	In this chair-guided course, doctoral candidates finalize their dissertation as a significant contribution to the body of knowledge. The chair and committee members work with the candidate to complete the dissertation in preparation for University approval, followed by the oral defense.
DOC 787	CONCEPT CONTINUING ENROLLMENT I	0	School of Advanced Studies	This course will allow the student to submit to the Concept Review.
DOC 788	CONCEPT CONTINUING ENROLLMENT II	1	School of Advanced Studies	This course will allow the student to submit to the Concept Review.

DOC 887	DISSERTATION CONTINUING ENROLLMENT I	0	School of Advanced Studies	This is a 1-week course that serves as a continuation of DOC/741. In this course, students will ensure that their dissertation proposal aligns with the requirements of the Dissertation Criteria and Rating Scale (DCRS). Students should plan to submit their proposal to Quality Review Methods (QRM) for review during this course.
DOC 888	DISSERTATION CONTINUING ENROLLMENT II	1	School of Advanced Studies	In this 3-week course, which serves as a continuation of DOC/741, students engage with their facilitator and chair to ensure that their dissertation proposal aligns with the requirements of the Dissertation Criteria and Rating Scale (DCRS). Students should plan to submit their proposal to Quality Review Methods (QRM) for review during this course.
DOC 889	DISSERTATION CONTINUING ENROLLMENT I	0	School of Advanced Studies	This course will allow the student to submit to Quality Review of Methods.
DOC 890	DISSERTATION CONTINUING ENROLLMENT II	1	School of Advanced Studies	This course will provide the student time to work with their chair and submit to Quality Review of Methods.

DOC 891	DISSERTATION CONTINUING ENROLLMENT I	0	School of Advanced Studies	This course will allow the student to submit to Quality Review of Methods.
DOC 892	DISSERTATION CONTINUING ENROLLMENT II	1	School of Advanced Studies	This course will provide the student time to work with their chair and submit to Quality Review of Methods.
DOC 893	DISSERTATION CONTINUING ENROLLMENT I	0	School of Advanced Studies	This 1-week dissertation continuation course is designed to facilitate student submission of the dissertation proposal to Quality Review Methods (QRM).
DOC 987	PROJECT CONTINUING ENROLLMENT I	0	School of Advanced Studies	This course will allow the student to submit to Quality Review Final.

DOC 988	PROJECT CONTINUING ENROLLMENT II	1	School of Advanced Studies	This course will provide the student time to work with the chair and submit to Quality Review Final.
DOC 989	PROJECT CONTINUING ENROLLMENT I	0	School of Advanced Studies	This 1-week course serves as a continuation of DOC/742A. Students who have not yet received Quality Review Final (QRF) approval should submit their dissertation for review. Students with QRF approval should plan to complete the oral defense during this course.
DOC 990	PROJECT CONTINUING ENROLLMENT II	1	School of Advanced Studies	This course will provide the student time to work with the chair and submit to Quality Review Final.
DOC 991	PROJECT CONTINUING ENROLLMENT I	0	School of Advanced Studies	This course will allow the student to submit to Quality Review Final.

DOC 992	PROJECT CONTINUING ENROLLMENT II	1	School of Advanced Studies	This course will provide the student time to work with the chair and submit to Quality Review Final.
DOC 993	DISSERTATION CONTINUING ENROLLMENT I	0	School of Advanced Studies	In this course, students will conduct the oral defense of their dissertation.
DOC 994	Dissertation Continuing Enrollment	0	School of Advanced Studies	In this course, students will conduct the oral defense of their dissertation.
DOC 995	Dissertation Continuing Enrollment	0	School of Advanced Studies	In this course, students will conduct the oral defense of their dissertation.

DOC 996	Dissertation Continuing Enrollment	0	School of Advanced Studies	In this course, students will conduct the oral defense of their dissertation.
DOC 999	DOCTORAL DISSERTATION REVIEW FACULTY	0	School of Advanced Studies	Test course for doctoral dissertation review faculty.
DOCX 733	DOCTORAL DISSERTATION	3	School of Advanced Studies	This is a chair-guided course for students to finalize their dissertation proposals. The chair and committee members will work with the student to assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support from chair and committee members to be engaged in communities of scholarship and practice.
DOCX 733A	DOCTORAL DISSERTATION	3	School of Advanced Studies	This course is a continuation of DOC/733 for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Students receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DOCX 733B	DOCTORAL DISSERTATION	3	School of Advanced Studies	This course is a continuation of DOC/733A for students to finalize their dissertation proposals. The chair and committee members will work with the student to re-assess and improve readiness and skill preparation for completion of the dissertation proposal in accordance with standards of ethical research. Enhanced support will be provided to guide students towards completion of the dissertation proposal.
DOCX 734	DOCTORAL PROJECT IV	3	School of Advanced Studies	This is a chair-guided course for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.
DOCX 734A	DOCTORAL PROJECT IV	3	School of Advanced Studies	This course is a continuation of DOC/734 for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.
DOCX 734B	DOCTORAL PROJECT IV	3	School of Advanced Studies	This course is a continuation of DOC/734A for candidates to finalize their dissertation as the significant contribution to the body of knowledge. The candidate prepares and submits the dissertation for University approval and completes the formal oral defense of the dissertation in this course. The chair and committee members will work with the candidate to re-assess and improve readiness and skill preparation for completion of the dissertation. Enhanced support will be provided to guide students towards completion of the dissertation. An approved dissertation is required to complete this class. Candidates receive continued support from chair and committee members to be engaged in communities of scholarship and practice.

DSC 330	DATA COMMUNICATION AND VISUALIZATION FOR BUSINESS	3	School of Business	This course introduces students to tools and techniques needed to present data, both simple and complex, to gain support and recommend business decisions. Student will use graphical tools such as graphs, animation, and presentation techniques to communicate the message behind the data and improve decision making. Topics include requirement gathering, graphical representation of data sets, visualization techniques and tools, and data validation.
ECE 205	DEVELOPMENTALLY-EFFECTIVE LEARNING ENVIRONMENTS	3	College of Education	This course examines developmentally-effective strategies used to create a positive and active early childhood learning environment for young children, birth through age 8. Topics include classroom management techniques, motivational strategies for young children, family/school relationships, instructional planning and assessment, and arranging an effective learning space. Participants develop a classroom management plan for an early childhood setting.
ECE 206	CURRICULUM AND INSTRUCTION IN EARLY CHILDHOOD EDUCATION	3	College of Education	This course provides a foundation of curriculum and instruction in early childhood education, from a historical and theoretical perspective through the application of current developmentally-appropriate best practices. Participants discover lesson plan development and methodologies for instruction. Additionally, strategies for assessment, diversity of populations, and the importance of collaborative partnerships with family and community are also explored.
ECE 207	ASSESSMENT IN EARLY CHILDHOOD EDUCATION	3	College of Education	This course provides an overview of assessment techniques used in early childhood education, including assessment of children with special needs. Participants focus on structured observations, use of behavioral rating scales, psycho-educational screening tests, and assessment of parent-child interactions. Formal and informal parent contacts, interviewing techniques, the use of technology in the assessment process, and referrals to school and community resources are also explored. Participants examine developmental and differentiated assessment strategies for children, birth through age eight.

ECE 510	Effective Instruction for Early Childhood Education	3	College of Education	This course focuses on the attributes and pedagogy specific to young children, in addition to theoretical models of curriculum development, instruction, and assessment that optimize teaching and learning in the early childhood setting. Participants examine methods for designing lessons and explore effective teaching strategies to promote learning.
ECE 511	Language and Literacy Methods in Early Childhood Education	3	College of Education	This course focuses on theoretical and developmentally appropriate teaching methods in language and literacy for children from birth to age eight. Theories in language development, including second language acquisition, as well as the needs of English Language Learners are examined. Participants will explore research-based early literacy teaching strategies for engaging children in integrated listening, speaking, reading, and writing experiences. There is an emphasis on incorporating content area standards and developing hands-on learning experiences for young children. Additionally, developmentally effective assessments are discussed as a means of guiding instruction.
ECE 512	Early Childhood Assessment	3	College of Education	This course examines the role, purpose, and applications of assessment in early childhood education. Participants explore developmentally appropriate assessment techniques and strategies in early childhood education to meet the needs of diverse learners as well as approaches to effectively select, design, and record assessments. Participants examine how to interpret and evaluate assessment outcomes to evaluate student development and to enhance curriculum planning. Additionally, this course provides an overview of collaborative partnerships such as school districts, parents, and community resources in the assessment process.
ECE 513	Early Childhood Growth and Development	3	College of Education	This course focuses on the research, theories, and concepts related to early childhood growth and development. Participants examine the physical, motor, cognitive, language, literacy, social and emotional development of diverse children from birth through age eight. Family and cultural influences on early childhood growth and development are also explored.

ECE 514	FAMILY/COMMUNITY INVOLVEMENT IN EARLY CHILDHOOD EDUCATION	3	College of Education	This course focuses on family and community involvement in early childhood education. Participants examine strategies for establishing and maintaining collaborative relationships with culturally diverse families and communities. Effective communication, engagement, and school partnerships are also explored.
ECH 205	EARLY CHILDHOOD GROWTH AND DEVELOPMENT	3	College of Education	This course examines the theories, concepts, and trends related to early childhood growth and development from prenatal development through the early school years. It examines the physical, social, emotional, cognitive, and language development of children from birth through age 8. The course focuses on defining the various stages as they impact instructional practices and decisions in the context of the early learning environment.
ECH 211	INSTRUCTIONAL STRATEGIES FOR EARLY CHILDHOOD EDUCATION	3	College of Education	This course focuses on the theoretical models that underlie teaching and learning in the early childhood setting. Students examine appropriate methods for teaching all young children, explore lesson plan designs, analyze the most effective, research-based teaching strategies to promote student learning, and develop a lesson plan.
ECH 300	ORIENTATION TO EARLY CHILDHOOD EDUCATION	0	College of Education	This course is designed to provide an orientation to the primary components of the Teacher Education Program for Early Childhood. Students will be introduced to the program's progression and degree completion requirements. Field Experience, E-Portfolio, Student Teaching, Teacher Work Sample, and technology resources will be discussed.

ECH 301	FOUNDATIONS OF EARLY CHILDHOOD EDUCATION	3	College of Education	This course provides an overview of early childhood education for children, birth through age 8. Topics include theories and history of early childhood education, play theories, program types and models, and public policy trends. The course examines the significance of developmentally effective learning experiences throughout early childhood programs.
ECH 302	EXCEPTIONALITIES OF THE YOUNG CHILD	3	College of Education	This course provides an overview of the exceptional young child in early childhood education who may require accommodations and adaptations. The course focuses on developmentally-effective methods and techniques used for the identification, assessment, and instruction of children with special needs from birth to age 8. Legal structures, public policy, and information related to current practices serving exceptional young children in early childhood are also examined.
ECH 321	DEVELOPMENTALLY-EFFECTIVE LEARNING ENVIRONMENTS	3	College of Education	This course examines developmentally-effective strategies used in implementing and managing a positive and active learning environment within the framework of a diverse early childhood population. Topics include models of classroom management, establishing expectations and procedures, motivating children, family communication, managing off-task behaviors, technology integration, and materials management and record keeping. Students will develop an individual classroom management plan for an early childhood setting.
ECH 390	EARLY CHILDHOOD STUDENT TEACHING SEMINAR	1	College of Education	This course focuses on the professional aspects of teaching. Students are introduced to the Teacher Work Sample that will be created during student teaching. Students will engage in self- evaluation to develop their own professional growth plans for inclusion in their portfolios. The character qualifications for becoming a teacher will be assessed through a personal interview, using letters of character reference, and a written reflective paper on the desire and reasons for joining the profession.

ECH 400	ASSESSMENT AND EVALUATION IN EARLY CHILDHOOD	3	College of Education	This course provides exposure to a variety of assessment techniques in early childhood education, including children with special needs. There is a focus on structured observations, use of behavioral rating scales, psycho-educational screening tests, and assessment of parent-child interactions. Formal and informal parent contacts, interviewing techniques, the use of technology in the assessment process, and referrals to school and community resources are also explored. Emphasis is placed on developmental and differentiated assessment strategies for children birth through age eight.
ECH 416	METHODS OF TEACHING IN EARLY CHILDHOOD: MATHEMATICS	3	College of Education	This course focuses on methodology and assessment strategies that enhance young children's learning in mathematics. Integration of content, and instructional strategies, as well as curriculum and assessment issues are emphasized. Multiple perspectives of young children as learners of mathematics, along with current research on mathematics pedagogy, are explored. Students evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies. Special attention is given to the use of manipulatives in math instruction and to developing children's problem-solving skills.
ECH 418	COMMUNITY AND FAMILY ENGAGEMENT	3	College of Education	This course focuses on establishing and maintaining collaborative relationships among families, early childhood learning environments, and communities to support student development and achievement. Candidates explore and discuss issues related to family diversity, relationship building, and community involvement. Emphasis will be placed on creating positive family and community engagement as well as strengthening the connection between home and school.
ECH 420	METHODS OF TEACHING IN EARLY CHILDHOOD: SCIENCE	3	College of Education	This course focuses on understanding and using developmentally effective practices to teach and to integrate science concepts and skills in early childhood education (birth through age 8). Developing meaningful curricular content, modifications, hands-on learning experiences, and integration of early childhood content area standards are explored. A foundation in developmentally effective teaching and assessment of the content area is provided.

ECH 430	METHODS OF TEACHING IN EARLY CHILDHOOD: SOCIAL STUDIES	3	College of Education	This course provides a foundation in content and methodology for the teaching of social studies in early childhood education (birth through age 8). Developing meaningful curricular content, hands-on learning experiences, integration of early childhood content area standards, and the impact of technology are explored. A foundation in developmentally-effective teaching and assessment of the content area is provided.
ECH 435	METHODS OF TEACHING IN EARLY CHILDHOOD: ARTS AND MUSIC	3	College of Education	This course focuses on understanding and using the visual and performing arts to promote growth and development in early childhood education. Emphasis is placed on developmentally-effective practices and integration of art, music, dance, and drama across the curriculum. Assessment, modifications, accommodations, culture, and family involvement through the arts are also explored. A foundation of effective teaching strategies and best practices in early childhood education are provided.
ECH 498	EARLY CHILDHOOD STUDENT TEACHING (BIRTH-PRESCHOOL)	4	College of Education	This course emphasizes the practical application of early childhood educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
ECH 499	EARLY CHILDHOOD STUDENT TEACHING (K THROUGH AGE 8/GRADE 3)	4	College of Education	This course will focus on the design and implementation of the Kindergarten through Age 8 or through Grade 3 Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on Kindergarten through Age 8 or through Grade 3 student teaching experiences.

ECH 598	EARLY CHILDHOOD STUDENT TEACHING, PART A	4	College of Education	This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
ECH 599	EARLY CHILDHOOD STUDENT TEACHING, PART B	4	College of Education	This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on early childhood student teaching classroom experiences.
ECO 365	PRINCIPLES OF MICROECONOMICS	3	School of Business	This course provides students with the basic theories, concepts, terminology, and uses of microeconomics. Students learn practical applications for microeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.
ECO 365T	PRINCIPLES OF MICROECONOMICS	3	School of Business	This course provides students with the basic theories, concepts, terminology, and uses of microeconomics. Students learn practical applications for microeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.

ECO 370	ENVIRONMENTAL ECONOMICS	3	College of Humanities and Sciences	This course applies the theoretical economics tools to environmental issues. Special emphasis will be devoted to analyzing the role of public policy regarding the economy and the environment.
ECO 372	PRINCIPLES OF MACROECONOMICS	3	School of Business	This course provides students with the basic theories, concepts, terminology, and uses of macroeconomics. Students learn practical applications for macroeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.
ECO 372T	PRINCIPLES OF MACROECONOMICS	3	School of Business	This course provides students with the basic theories, concepts, terminology, and uses of macroeconomics. Students learn practical applications for macroeconomics in their personal and professional lives through assimilation of fundamental concepts and analysis of actual economic events.
ECO 561	ECONOMICS	3	School of Business	This course applies economic concepts to make management decisions. Students employ the concepts of scare resources and opportunity costs to perform economic analysis. Other topics include supply and demand, profit maximization, market structure, macroeconomic measurement, money, trade, and foreign exchange.

EDCEU 1001	CLASSROOM MANAGEMENT/STUDENT ENGAGEMENT	0.5	School of Continuing Education	Excellent classroom management is critical for new and experienced teachers alike. This professional development course focuses on strategies used in managing a positive classroom. Topics include management models, motivation, working with disruptive students, classroom expectations and procedures, and communication. Students will practice using multiple strategies for student engagement and classroom management. This course provides 0.5 continuing education units in one, 5-hour course.
EDCEU 1002	ASSESSMENT AND EVALUATION	0.5	School of Continuing Education	Educators recognize the need for regular assessment and effective student evaluation; however, implementation can be challenging. This professional development course examines the importance of regular assessment within classroom instruction and identifies ways to interpret the data obtained from those assessments. Participants will explore the different types of assessment, the analysis of data and corresponding instructional techniques. This course provides 0.5 continuing education units in one 5-hour course.
EDCEU 1003	DIFFERENTIATED LEARNING	0.5	School of Continuing Education	Differentiation is no easy feat. This professional development course will provide a foundation for educators to create reading and writing activities that meet the needs of students with varied abilities and learning preferences. Participants will review selected pre-reading, guided reading, and post-reading activities that heighten comprehension and retention for diverse learners. Tools and resources will be reviewed to assist educators in the creation of rubrics that reflect reading comprehension, writing skills, and content area mastery, including selecting supplemental content area media for a variety of reading levels. This course provides 0.5 continuing education units in one, 5-hour course.
EDCEU 1004	POSITIVE BEHAVIOR AND SUPPORTS (PBIS)	0.5	School of Continuing Education	This course is designed for administrators and school teams interested in the development and implementation process of PBIS, a multi-tiered system of support proven to significantly reduce the occurrence of problem behaviors, improve school climate, and increase academic performance. Participants will gain knowledge and skills to begin the planning process in their school.

EDCEU 1005	THE GIFTED AND TALENTED LEARNER	0.5	School of Continuing Education	This course focuses on the unique academic, social and emotional needs of gifted students and addresses some instructional practices to differentiate for gifted learners in the classroom. Participants will explore common characteristics and unique attributes specific to subgroups within the gifted population. Critical and Creative Thinking strategies for use in classrooms with gifted and talented students will be identified and implemented into general instructional practices.
EDCEU 1006	HIGHER ORDER THINKING SKILLS	0.5	School of Continuing Education	Higher Order Thinking Skills (HOTS) must be a component of all units and lessons in this age of rigorous standards. This professional development course examines the (HOTS) required for students to become strategic thinkers, extend their thinking, solve complex problems, reason, analyze and communicate their understandings. Norman Webb's Depth of Knowledge construct, which measures cognitive demand, suggests complex and challenging assessments must be supported by rigorous instruction. Participants will explore and discuss strategies to integrate HOTS into regular classroom instruction.
EDCEU 1007	THE HIGHLY EFFECTIVE SUBSTITUTE EDUCATOR	1.5	School of Continuing Education	This professional development course is designed to examine the characteristics and skills necessary to become a highly effective substitute educator. Emphasis will be placed on the substitute educator as a professional, classroom management, and instructional strategies that promote student learning.
EDCEU 1008	FLORIDA TEACHER CERTIFICATION EXAM GK TEST PREP	0.5	School of Continuing Education	This course prepares students for the Florida Teacher Certification General Knowledge Exam by reviewing key reading, English language skills and essay, as well as key mathematics topics.

EDD 711	SOCIAL CONTEXTS AND CONTEMPORARY ISSUES	3	School of Advanced Studies	This course focuses on the historical concepts, demographic trends and current issues of education. An analysis of institutions, unionization, technology, and diversity are of focus.
EDD 712	LEADERSHIP IN CONTEMPORARY ORGANIZATION	3	School of Advanced Studies	Theories and models of leadership and adult learning are compared and applied to a variety of organizations, cultures, and work environments. The focus is on preparing educational leaders to enhance their leadership skills and styles to promote success in evolving organizations.
EDD 713	LIFELONG LEARNING: LEADERSHIP IN THE EDUCATIONAL CONTINUUM	3	School of Advanced Studies	The concept of lifelong learning and the impact it has on education providers is the focus of this course. Theories of learning, and specifically, adult learning, are examined. The role that P-12 education, higher education, corporate education/ training and the military play in instilling a belief in lifelong learning is of focus.
EDD 714	COMPARATIVE MODELS OF EDUCATIONAL ENVIRONMENTS	3	School of Advanced Studies	This course examines the various models of educational environments available to students today. Discussion topics range from the wealth of options available for P-12 school students to adults learners to alternative learning environments. Specific focus is placed on distance education modalities for learners of all ages.

EDD 721	PLANNING AND LEADING CHANGE	3	School of Advanced Studies	This course examines the concept of change and its impact on educational organizations. How to manage and lead change, counteract resistance to change, and the politics and economics of change are of special focus. Understanding the dynamics of change and how it influences strategic planning of an institution are explored.
EDD 722	THE LEGAL CONTEXT OF EDUCATION	3	School of Advanced Studies	This course provides an analysis of the legal issues prevalent in educational systems. Major topics of discussion include accreditation and regulatory issues, Federal and state constituents and laws, and institutional and individual legal issues. Freedom of speech, separation of church and state, and methods of student discipline are examined. Case laws and specific pieces of education legislation are reviewed.
EDD 723	ETHICS AND VALUES IN LEARNING ORGANIZATIONS	3	School of Advanced Studies	The ethics and values-based decisions that learning organizations are faced with are explored in-depth. Case studies on access, diversity, plagiarism, technology, confidentiality, student-faculty relationships, and harassment are discussed. The roles of values education, codes of conduct, and codes of ethics are debated.
EDD 724	INSTRUCTIONAL LEADERSHIP	3	School of Advanced Studies	In this course, students analyze the impact of change on the process of instruction and curriculum development. Effective teaching and learning strategies are explored as they relate to the use of technology, motivating faculty, staff, and students, and creating dynamic learning environments. Leading change in learning environments and also counterbalancing resistance to change for faculty, staff, and students are addressed. The importance of fostering faculty development and building professional learning communities are of special focus.

EDD 731	THE ECONOMICS OF EDUCATION	3	School of Advanced Studies	The principles and theories of the economics of education are examined. The role that federal, state, and local governments play in the economics of education is explored in-depth. Key topics include budget management grants, financial aid, expenditures and revenues, and the rising cost of education. Economic policy analysis is a focus in this course.
EDD 732	CONTEMPORARY POLICY ANALYSIS AND DEVELOPMENT	3	School of Advanced Studies	This course provides an overview of contemporary education policy analysis and development. The federal, state, local, and institutional levels of policy development are explored. The factors that influence the analysis and development of policy are discussed in depth. The evaluation and revision of policies and future trends and implications are examined.
EDD 733	EVALUATION AND ASSESSMENT METHODS	3	School of Advanced Studies	This course explores the strengths and weaknesses of evaluation and assessment methods utilized in learning organizations. Accreditation issues, outcomes-based assessment, institutional research, and student and faculty evaluation are key topics. The influence of leadership styles on evaluation and assessment methods is also examined.
EDS 799	EDUCATIONAL SPECIALIST CAPSTONE	3	School of Advanced Studies	The capstone course will require learners to integrate their program of study into an in-depth project that explores and inquires into a contemporary problem within the field of educational administration. The project will be based on library research and/or fieldwork and must demonstrate an approach to addressing the problem from a leadership perspective. Additionally, within this course learners will complete a reflective self-assessment of their learning throughout the program.

EDT 711	EDUCATIONAL TECHNOLOGY RESEARCH	3	School of Advanced Studies	This course explores research on learning with technology. Focal areas include learner control, media preference, motivation, collaborative learning, and computer-mediated communication. Learners formulate conclusions based on refereed studies and consider the relationship between research design and questions.
EDT 721	INSTRUCTIONAL DESIGN	3	School of Advanced Studies	This course is designed to examine the foundations and development of instructional design principles and the learning theories that have impacted the field. Students will explore models and processes applicable to training and learning environments. Students will also examine emerging trends, issues, and the use of technology in instructional design.
EDT 722	DISTANCE LEARNING	3	School of Advanced Studies	This course traces the development of distance learning, including past, present, and future trends. Students relate social contexts and educational goals to the evolution of technologies and their intended support of learning. Students also explore the delivery of instruction over physical distance, focusing on concepts such as transactional distance, cultural considerations, anonymity, privacy, and accountability.
EDT 723	INSTRUCTIONAL MEDIA AND DESIGN TECHNIQUES	3	School of Advanced Studies	This course examines various types of electronic media used in the development of instructional design projects. Students explore the principles of instructional media design and their applications in content delivery, differentiating instruction, improving student engagement, and enhancing student learning. An emphasis is placed on identifying appropriate media formats and technologies that are purposeful in facilitating learning in multiple environments.

EDT 731	SYSTEM ANALYSIS AND DESIGN	3	School of Advanced Studies	This course follows the phases of needs analysis, planning, implementation, and evaluation that are integral to large-scale instructional technology projects. Learners consider vendor selection, organizational constraints, maintenance, and enhancements in an effort to address learners' present and future needs. Learners focus on developing systemic solutions that avoid the pitfalls of piecemeal technology adoptions.
EDT 732	INTEGRATING TECHNOLOGY AND CURRICULUM	3	School of Advanced Studies	This course enables students to develop strategies for effective and appropriate leadership, and management for instructional technology projects. Technology selection, vendor selection, maintenance, and the needs of stakeholders are explored in an effort to address present and future organizational learning needs. A running theme of this course is system solutions for technology integration that meets the instructional needs of diverse organizations. A focus of this course is balancing the competing needs of emerging technology integration, stakeholders, and organizational constraints in a learning environment.
EDT 733	TECHNOLOGY LEADERSHIP	3	School of Advanced Studies	This course enhances the leadership skills and styles of educational technology leaders to promote success in evolving educational organizations. Students examine leading change through leveraging technology in educational organizations. Methods to lead technological change, manage the procurement process, and counteract resistance to technological changes are addressed. The importance of creating a standardized process and language for the integration of technology is of special focus. Benefits of technology and how they influence the strategic road map for the institution are also explored.
EDU 101	FOUNDATIONS OF EDUCATION	3	College of Education	In this course, learners are introduced to the foundations of education. Topics include the history of education, philosophical perspectives, and societal trends that change education. Learners will explore the characteristics of 21st century students and the use of technology in the classroom. In addition, learners will reflect on reasons for working in the educational setting and create a personal philosophy of education.

EDU 105	DIVERSITY IN EDUCATIONAL SETTINGS	3	College of Education	This course focuses on developing an understanding of multicultural diversity concepts in education and implications for learning and instruction. Learners will examine the relationship of cultural values on the formation of self-concept and learning styles. Learners will also explore the scope of diversity prevalent in classrooms today and the role of prejudice, biases, assumptions, stereotyping, and cultural inequalities in education. Learners will connect these perspectives to instructional strategies that contribute to creating culturally responsive classrooms.
EDU 200	INTRODUCTION TO ASSESSMENT	3	College of Education	In this course learners are introduced to the role of assessment in education. The purpose and types of assessment are identified including appropriate components in assessment planning. Formative assessment for learning and summative assessment of learning will be examined. Learners will also explore the topics of feedback and grading.
EDU 215	ETHICS AND SOCIAL RESPONSIBILITY IN EDUCATION	3	College of Education	This course introduces learners to the concepts of ethical reasoning and professional ethics in teaching. Learners will explore how their personal values and dispositions-whether inherited through culture and tradition or consciously adopted-interact with professional codes of ethics and ethical decision-making. Learners will examine ethical theories and the function of ethics in teaching. Ethical dilemmas in the education workplace will also be investigated.
EDU 300	ORIENTATION TO TEACHER EDUCATION	0	College of Education	This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program's progression and degree completion requirements. Field Experience, E-Portfolio, Student Teaching, Teacher Work Sample, and technology resources will be discussed.

EDU 300CA	ORIENTATION TO TEACHER EDUCATION	0	College of Education	This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program's progression and degree completion requirements. Field Experience, E-Portfolio, Student Teaching, Teaching Performance Assessment (TPA), and technology resources will be discussed.
EDU 301	FOUNDATIONS OF EDUCATION	3	College of Education	This course introduces students to the teaching profession. Historical foundations, professionalism, the role of technology, and trends and issues in education are introduced. Students will examine personal reasons for wanting to teach and will create a personal philosophy of education.
EDU 301CA	FOUNDATIONS OF EDUCATION	3	College of Education	This course introduces students to the teaching profession. Historical foundations, professionalism, the role of technology, and trends and issues in education are introduced. Students will examine personal reasons for wanting to teach and will create a personal philosophy of education.
EDU 305	CHILD DEVELOPMENT	3	College of Education	This course explores the development of the child from birth through eighth grade. Physical, cognitive/intellectual, social/emotional, and moral development will be examined. The course focuses on defining the various stages as they impact instructional practice and decisions in a preK-8 environment.

EDU 305CA	CHILD DEVELOPMENT	3	College of Education	This course explores the development of the child from birth through eighth grade. Physical, cognitive/intellectual, social/emotional, and moral development will be examined. The course focuses on defining the various stages as they impact instructional practice and decisions in a pre K-8 environment.
EDU 311	MODELS AND THEORIES OF INSTRUCTION	3	College of Education	This course focuses on the theoretical models that underlie teaching and learning for all learners. Effective teaching strategies that promote student learning will be examined. Various lesson plan designs will be explored, and students will create an original lesson plan.
EDU 311CA	MODELS AND THEORIES OF INSTRUCTION	3	College of Education	This course focuses on the theoretical models that underlie teaching and learning for all learners. Effective teaching strategies that promote student learning will be examined. Various lesson plan designs will be explored, and students will create an original lesson plan.
EDU 315	LEGAL & ETHICAL ISSUES IN EDUCATION	3	College of Education	This course provides students with the opportunity to examine and apply legal and ethical issues within the context of an educational setting. Legal issues and their consequent impact on educators are discussed, analyzed, and applied to current educational practices. Emphasis is placed on the ways ethical and legal issues facing teachers affect student learning, and the critical thinking, decision-making, professional and personal conduct of teachers.

EDU 321	CLASSROOM MANAGEMENT	3	College of Education	This course examines the strategies used in managing a positive elementary classroom. Topics include models of discipline, motivation, disruptive students, classroom expectations and procedures, parent communication, and materials management and record keeping. Students will develop an individual classroom management plan.
EDU 321CA	CLASSROOM MANAGEMENT	3	College of Education	This course examines the strategies used in managing a positive elementary classroom. Topics include management models, motivation, disruptive students, classroom expectations and procedures, communication, and record keeping. Managing materials and technology will also be addressed. Students will develop an individual classroom management plan.
EDU 390	ELEMENTARY EDUCATION SEMINAR	1	College of Education	This course focuses on the professional aspects of teaching. Students are introduced to the Teacher Work Sample that will be created during student teaching. Students will engage in self-evaluation to develop their own professional growth plans for inclusion in their portfolios. The character qualifications for becoming a teacher will be assessed through a personal interview, using letters of character reference, and a written reflective paper on the desire and reasons for joining the profession.
EDUC 519	FOUNDATIONS OF EDUCATION	3	College of Education	This course focuses on the historical, philosophical, sociological, legal, and curricular foundations of education. The evolution of education, the role of cultural diversity in education, curriculum and assessment, education standards, and issues and trends in education are explored. Participants analyze educational philosophies and develop a personal educational philosophy.

EDUC 521	CLASSROOM MANAGEMENT FOR EDUCATORS	3	College of Education	In this course, participants examine strategies for managing their classrooms more effectively. Student behavior and misbehavior, techniques for classroom preparation, setup and management, and discipline models are explored. Participants learn how to establish and communicate expectations in their classroom and create a positive learning environment.
EDUC 522	CURRICULUM DEVELOPMENT AND INSTRUCTION	3	College of Education	This course focuses on curriculum development and instructional strategies for K-12 educators. Participants examine the history of curriculum development, the role of curriculum in education, and the alignment of curriculum to state and national standards. School reform, curriculum implementation, assessment methods, textbook and material selection, and the adaptation of technology into curriculum are also explored. Particular emphasis will be placed on developing curriculum and instruction to meet the needs of diverse learners.
EDUC 523	MIDDLE SCHOOL CURRICULUM DEVELOPMENT AND INSTRUCTION	3	College of Education	This course is designed to evaluate the unique characteristics of adolescents and the diversity among middle school students and their families. Instructional strategies, standards, technology integration, and assessment are examined. Participants develop curriculum and instruction to engage students and promote learning and achievement.
EDUC 524	Assessment and Evaluation for Educators	3	College of Education	This course is designed to provide P-12 teachers and administrators with a deeper appreciation of the role of assessment in education. Participants research influences on current trends in assessment and fundamentals of the assessment process and develop skills to evaluate the alignment of curriculum, instruction, and assessment for school improvement. Standards-based assessments, data-driven instruction, and accountability to increase achievement are also addressed.

EDUC 525	Theories of Growing and Learning	3	College of Education	This course examines theories of growing and learning from birth through adolescence. The stages of life and the developmental domains including physical, language, cognitive, and emotional, social, and moral are emphasized. In addition, participants explore investigative methods and research processes in human development.
EDUC 526	Overview of Adolescent Psychology	3	College of Education	This course provides an overview of theory and research on adolescent development aligned to the following domains: physical, cognitive, emotional, social, moral, and identity. Participants review how adolescents react to and cope with the influence of sociocultural context in society. In addition, participants analyze adolescent interactions with peers and family, gender and multicultural issues, and school and community settings.
EDUC 527	TEACHING CRITICAL THINKING SKILLS	3	College of Education	This course prepares participants to incorporate critical thinking strategies in the classroom. Opportunities are provided to implement critical thinking skills into the curriculum and learning environment. Participants determine instructional and assessment strategies for thinking critically across disciplines.
EDUC 528	Communication Strategies for Educators	3	College of Education	This course is designed to inform educators about the power of effective communication through awareness, understanding, and implementation. Emphasis is on communication competencies, interpersonal communication, active listening, the use of technology, and written, verbal, and nonverbal communication. Participants analyze instructional strategies and study the effect of ethics, the role of diversity, and effective communication styles for use with students, parents, and other stakeholders to promote a positive learning environment.

EDUC 545	FAMILY ENGAGEMENT AND COMMUNITY INVOLVEMENT	3	College of Education	This course focuses on family engagement and community involvement in K-12 education. Participants examine strategies for establishing and maintaining collaborative relationships with culturally diverse parents, families, and communities. The emphasis is on building relationships, family outreach, and developing an understanding and appreciation of families from diverse backgrounds. Participants explore methods to improve communication and collaboration to support learning, and explore ways to connect students, parents, families, and schools with the community.
EDUC 548	Coaching and Mentoring	3	College of Education	This course is designed to provide an overview of coaching and mentoring. Participants examine coaching and mentoring theories and models, the roles and responsibilities of the coach and mentor, common elements and issues related to coaching and mentoring strategies, and the development of communicative, nurturing relationships. Feedback, self-evaluation, reflection, and monitoring and evaluating performance are also explored.
EED 400	ASSESSMENT IN ELEMENTARY EDUCATION	3	College of Education	This course identifies what assessment is and how formative and summative assessments are used in the classroom. The course will include construction of objective and performance assessments, topics on reliability and validity, understanding the uses of standardized assessments, and the framework of assessment.
EED 416	ELEMENTARY METHODS: MATHEMATICS	3	College of Education	This course focuses on methodology and assessment strategies that enhance learning in mathematics. Integration of content, and instructional strategies, as well as curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of mathematics, along with current research on mathematics pedagogy, are explored. Students evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies. Special attention is given to the use of manipulatives in math instruction and to developing students' problem-solving skills.

EED 420	ELEMENTARY METHODS - SCIENCE	3	College of Education	This course focuses on methodology and assessment strategies that enhance learning in science. Integrated content, interdisciplinary teaching, classroom management, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of science, along with current research on pedagogy, are explored. This course also provides students with an opportunity to develop the ability to evaluate and to use instructional methods, curricular materials and resources, and appropriate assessment strategies.
EED 425	ELEMENTARY METHODS-HEALTH/PE	3	College of Education	This course provides an overview of the physical education and health state and national standards and provides a context for how these are addressed in elementary schools and classrooms. Instructional approaches for the integration of physical education and health with other content areas are explored.
EED 430	ELEMENTARY METHODS - SOCIAL STUDIES	3	College of Education	This course defines and provides a context for teaching and assessing students in the areas of social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop a variety of data collection tools designed to assess student learning.
EED 435	ELEMENTARY METHODS - FINE ARTS	3	College of Education	This course defines and provides a context for teaching and assessing students in the area of fine arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.

EED 436CA	ELEMENTARY METHODS: SOCIAL SCIENCE AND FINE ARTS	3	College of Education	This course focuses on methodology and assessment strategies that enhance learning in social science and fine arts. Integrated content, interdisciplinary teaching, classroom management, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of social science and fine arts, along with current research on pedagogy, are explored. This course also provides students with an opportunity to develop the ability to evaluate and to use instructional methods, curricular materials and resources, and appropriate assessment strategies.
EED 438CA	ELEMENTARY METHODS: MATHEMATICS AND SCIENCE	3	College of Education	This course focuses on methodology and assessment strategies that enhance learning in mathematics and science. Integrated content, interdisciplinary teaching, classroom management, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of mathematics and science along with current research on pedagogy, are explored. This course also provides students with an opportunity to develop the ability to evaluate and to use instructional methods, curricular materials and resources, and appropriate assessment strategies.
EED 444	ELEMENTARY METHODS - INTEGRATION OF HAWAIIAN STUDIES	3	College of Education	This course focuses on the pedagogy and assessment strategies that enhance student learning of Hawaiian studies. Instructional approaches for the Hawaiian Studies content area within the framework of an integrated curriculum are explored, including the use of critical thinking and study skills. Methods for integrating Hawaiian history, cultural values, and Hawaiian heritage are emphasized. This course provides students with an opportunity to develop the ability to create performance-based activities and assessments, culturally-sensitive instructional methods, curricular materials and resources, and appropriate assessment strategies. Students develop a variety of data- collection tools designed to assess student learning.
EED 496	STUDENT TEACHING	8	College of Education	This course emphasizes the practical application of educational theories and methods. Participants will focus on the following topics: requirements and expectations for student teaching and teacher performance assessment, the school culture, planning instruction, and teaching planned lessons. The course provides a forum for open discussion and problem solving based on student teaching classroom experiences. Finally, learners will prepare and submit Task 1, 2, and 3 of the teacher performance assessment.

EED 498	ELEMENTARY STUDENT TEACHING, SEMINAR I	4	College of Education	This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
EED 498CA	ELEMENTARY STUDENT TEACHING, SEMINAR I	4	College of Education	This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the learning environment, designing and implementing assessments in preparation for the CalTPA Task Three: Assessing Learning Task, and developing as a professional educator. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences and the ability to use and apply the Teaching Performance Expectations.
EED 499	ELEMENTARY STUDENT TEACHING, SEMINAR II	4	College of Education	This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
EED 499CA	ELEMENTARY STUDENT TEACHING: SEMINAR II	4	College of Education	This course will focus on the elements of the CalTPA Task Four: Culminating Teaching Experience Task. The course explores the following topics: school culture and diversity, pedagogical assignments and tasks, self- reflection, and preparation to serve as a beginning teacher in an induction program. It also provides practical guidance in seeking a teaching position. This course will serve as a forum for open discussion and problem solving based on student teaching classroom experiences and their ability to use and apply the full- range of Teaching Performance Expectations.

ELEC 710	PHD/HEA ELECTIVE	3	School of Advanced Studies	Elective courses for the Online Extended Studies in the PhD/HEA 001 program
ELEC 711	PHD/HEA ELECTIVE	3	School of Advanced Studies	Elective courses for the Online Extended Studies in the PhD/HEA 001 program
ELEC 712	PHD/HEA ELECTIVE	3	School of Advanced Studies	Elective courses for the Online Extended Studies in the PhD/HEA 001 program
ELEC 713	PHD I/O ELECTIVE	3	School of Advanced Studies	Elective course for PHD I/O program: PSYCH/780 or PSYCH/790

ELEC 714	DHA ELECTIVE	3	School of Advanced Studies	Placeholder for elective courses in the DHA program.
ELEC 725	DOCTORAL EXTENSION	3	School of Advanced Studies	Doctoral Extension
ELL 300	INSTRUCTIONAL METHODS FOR ENGLISH LANGUAGE LEARNERS	3	College of Education	This course focuses on instruction for English Language Learners (ELLs). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.
ELL 500	INSTRUCTIONAL METHODS FOR ENGLISH LANGUAGE LEARNERS	3	College of Education	This course focuses on instruction for English Language Learners (ELLs). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide ELLs with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.

ELM 532	Creating an Effective Learning Environment	3	College of Education	This course explores differentiated approaches and strategies used in managing a positive classroom environment within the framework of today's diverse student population. Teacher candidates identify issues that may affect the climate of the classroom and evaluate classroom management techniques appropriate for their targeted grade levels and needs.
ELM 533	Instruction and Assessment for Diverse Learners	3	College of Education	This course focuses on the theoretical models that underlie teaching and learning. Teacher candidates analyze effective teaching strategies that encourage learners to develop a deeper understanding of content and to promote critical thinking. Candidates also explore assessment and its relationship to lesson planning.
ELM 534	Elements of Literacy Content and Curricular Knowledge	3	College of Education	This course focuses on the most current research, theory, and methods of literacy instruction. Teacher candidates will enhance content knowledge of phonics, phonemic awareness, fluency, comprehension, and vocabulary. Candidates will assess learners' background knowledge in literacy to develop differentiated instruction.
ELM 535	Application of Research-Based Literacy Instruction	3	College of Education	This course focuses on the instructional approaches for literacy within the framework of an integrated curriculum. Teacher candidates will apply research-based instructional and assessment techniques to meet the needs of all learners. Candidates will apply interdisciplinary teaching strategies to develop a variety of writing styles, reading methods, and critical thinking skills in their learners.

ELM 536	Social Studies Content and Curricular Knowledge	3	College of Education	This course focuses on the pedagogy and assessment strategies that enhance inquiry learning in the social studies classroom. Content knowledge, interdisciplinary teaching, curriculum, and assessment are emphasized. Teacher candidates will focus on enhancing the meaning of social studies concepts, developing critical thinking skills to include the use of social studies in other disciplinary areas, and creating real-life experiences for all learners.
ELM 537	Science Content and Curricular Knowledge	3	College of Education	This course focuses on the pedagogy and assessment strategies that enhance inquiry learning in the science classroom. Content knowledge, interdisciplinary teaching, curriculum, and assessment are emphasized. Teacher candidates will focus on enhancing the meaning of science concepts, developing critical thinking skills to include the use of science in other disciplinary areas, and creating real-life experiences for all learners.
ELM 538	Mathematics Content and Curricular Knowledge	3	College of Education	This course focuses on the pedagogy and assessment strategies that enhance inquiry learning in the mathematics classroom. Content knowledge, interdisciplinary teaching, curriculum, and assessment are emphasized. Teacher candidates will focus on enhancing the meaning of mathematical concepts, developing critical thinking skills to include the use of math concepts in other disciplinary areas, and creating real-life experiences for all learners.
ELM 539	PHYSICAL EDUCATION/HEALTH CONTENT AND CURRICULAR KNOWLEDGE	2	College of Education	This course establishes a context for teaching and assessing K-8 students in physical education and health based on a scope and sequence, and on state and national standards (1). Candidates examine framework-based teaching strategies effective in helping K-8 students develop a variety of motor skills and abilities, recognize the importance of a healthy lifestyle, gain knowledge of human movement, learn the rules and strategies of games and sports, and develop self-confidence and self-worth (2). They also examine framework-based teaching strategies effective in helping their students achieve the goals of lifelong health; recognize nutrition, acknowledge the risks associated with drugs and alcohol, understand growth and development; and utilize health-related information, products, and services(3). Additionally, this course explores instructional approaches for integrating physical education and health with other content.

ELM 545	ELEMENTARY STUDENT TEACHING	3	College of Education	This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, instructional design, implementing assessments, instructional decision-making, analyzing learning results, reflection and self-evaluation, and planning, preparing, and implementing the teacher performance assessment. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
ELM 583	Elementary Clinical Practice	3	College of Education	This course emphasizes the practical application of educational theories and methods. Candidates will focus on the following topics: requirements and expectations for clinical practice, teacher performance assessment, the school culture, planning instruction, and teaching planned lessons. The course provides a forum for open discussion and problem solving based on classroom experiences. Finally, candidates will prepare and submit all respective tasks of the teacher performance assessment.
ELM 586	ELEMENTARY CLINICAL PRACTICE A	3	College of Education	This course emphasizes the practical application of educational theories and methods. Candidates focus on the following topics: school culture, academic language, lesson planning, and instruction. The course provides a forum for open discussion and problem solving based on classroom experiences and the ability to use and apply Teaching Performance Expectations. Teacher candidates begin preparing their teacher performance assessment submission.
ELM 587	ELEMENTARY CLINICAL PRACTICE B	3	College of Education	This course emphasizes the practical application of educational theories and methods. Candidates focus on the following topics: student engagement, assessment, the learning environment, and preparing for a teaching position. The course provides a forum for open discussion and problem solving based on classroom experiences and the ability to use and apply Teaching Performance Expectations. Teacher candidates begin preparing their teacher performance assessment submission.

ELM 590	ELEMENTARY STUDENT TEACHING PART A	4	College of Education	This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the learning environment, designing and implementing assessments in preparation for the CalTPA Task Three: Assessing Learning Task, and developing as a professional educator. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences and the ability to use and apply the Teaching Performance Expectations.
ELM 595	ELEMENTARY STUDENT TEACHING PART B	4	College of Education	This course will focus on the elements of the CalTPA Task Four: Culminating Teaching Experience Task. The course explores the following topics: school culture and diversity, pedagogical assignments and tasks, self- reflection, and preparation to serve as a beginning teacher in an induction program. It also provides practical guidance in seeking a teaching position. This course will serve as a forum for open discussion and problem solving based on student teaching classroom experiences and their ability to use and apply the full- range of Teaching Performance Expectations.
ELM 598	ELEMENTARY STUDENT TEACHING PART A	4	College of Education	This course emphasizes the practical application of educational theories and methods including classroom management, grading, and strategies to increase parent communication and/or family and community involvement. In addition, students will receive practical guidance in securing a teaching position, time management, and developing and maintaining relationships with colleagues and parents. This seminar also provides a forum for open discussion and problem solving based on classroom experiences.
ELM 599	ELEMENTARY STUDENT TEACHING PART B	4	College of Education	This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

EMC 310	PRINCIPLES OF EMERGENCY MANAGEMENT	3	College of Health Sciences and Nursing	This course will explore the history and evolution of emergency management as well as roles of local, state, regional and national agencies. Topics include roles and organizations comprising emergency management, leadership concepts, and technology and communication challenges.
EMC 320	EMERGENCY PREPAREDNESS AND PLANNING	3	College of Health Sciences and Nursing	This course examines the preparation and planning process for emergency and crisis situations from geographical, national and local levels. Topics will include concepts of response and preparedness, recovery and mitigation strategies, hazard analysis, vulnerability assessment, exposure pathways and response capability assessment.
EMC 330	POLITICAL AND POLICY ISSUES FOR EMERGENCY MANAGEMENT	3	College of Health Sciences and Nursing	This course examines the political and policy environment which affects emergency management. The course is intended to help emergency managers develop an understanding of local, state, and federal policies are developed and maintained. In addition, legal issues involving state and Federal law effecting emergency operations will be studied.
EMC 340	EMERGENCY SERVICES AND THE COMMUNITY	3	College of Health Sciences and Nursing	This course will look at the social dimensions of community responses to disaster related issues. Emphasis will be placed on examining effective community outreach and preparation programs as well as distribution mechanisms for public information. In addition, students will assess demographic implications and their impact on emergency prevention activities and services.

EMC 350	MANAGING EMERGENCY RESPONSE OPERATIONS	3	College of Health Sciences and Nursing	This course focuses on the principles and practices that promote effective disaster response operations in emergency management. Students will examine the roles and responsibilities of the participants in a crisis event, and identify possible problems associated with response operations such as inadequate preparedness measures, safety and site security, and communication. In addition, impact of disaster on response organization and personnel will be discussed.
ENG 100	CRITICAL READING AND COMPOSITION	3	College of Humanities and Sciences	This course develops the reading, writing and critical thinking skills that are essential for academic and life success.
ENG 101	EFFECTIVE ESSAY WRITING	3	College of Humanities and Sciences	Students develop academic writing skills. The emphasis is on coherence and correctness in written communication as students use the writing process to craft an expository essay. Students also conduct basic research for the expository essay. Selected readings provide the basis for discussion regarding the difference between fact and opinion. Grammar exercises focus on verb tense, subject-verb and pronoun-antecedent agreement, and pronoun case.
ENG 102	RESEARCH WRITING	3	College of Humanities and Sciences	Students focus on gathering research, evaluating and documenting sources, and developing a major research paper. Selected readings prompt discussion regarding bias, rhetorical devices, arguments, and counterarguments. Grammar exercises address commonly confused words, modifiers, parallel structure, and sentence variety.

ENG 106	SURVEY OF LITERARY MASTERPIECES	3	College of Humanities and Sciences	This course provides students with a survey of literary masterpieces across the ages. Students will gain insight into writing and culture from the content of this course. Topics include Shakespeare, Homer, Dante, Milton, Machiavelli, and Joyce, among other literary authors.
ENG 125	LITERATURE IN SOCIETY	3	College of Humanities and Sciences	This course introduces themes in literature and provides guided study and practice in reflecting on themes which describe the human experience across cultural and societal boundaries. The course includes readings from literature in different genres and cultures. Students will study the literature in thematic units and be asked to make connections to their own lives and cultures.
ENG 135	ESSENTIALS OF CONTEMPORARY COMMUNICATION	3	College of Humanities and Sciences	This course covers the skills necessary for effective written and oral communication in the work environment and in modern society. The course reviews basic communication theories and discusses the fundamentals of interpersonal, written, and oral communication skills. This course emphasizes applying these theories and skills to group processes and professional situations.
ENG 157	MULTICULTURAL LITERATURE	3	College of Humanities and Sciences	This course provides students with an introduction to multicultural literature. Emphasis is placed on increasing students' awareness and understanding of the values, beliefs, and experiences of people from different cultures through literature.

ENG 200	RHETORIC AND RESEARCH	3	College of Humanities and Sciences	This course extends practice in critical reading, writing, and thinking. Emphasis is given to developing an effective writing process that takes into account audience and rhetorical purpose.
ENG 222	INTRODUCTION TO TECHNICAL WRITING	3	College of Humanities and Sciences	This is a foundational course designed to introduce students to technical writing fundamentals and the technical writing career field. Topics include what technical writing is and how technical writing differs from other types of writing, technical writing best practices, and the career opportunities in the technical writing field.
ENG 230	MECHANICS OF WRITING	3	College of Humanities and Sciences	This course provides an overview of the mechanics of American English grammar as it applies to academic reading and writing.
ENG 240	INTRODUCTION TO CREATIVE WRITING	3	College of Humanities and Sciences	This course provides a foundation in writing creative fiction and nonfiction works. Students will be expected to produce original creative writings.

ENG 260	FOLKLORE AND FAIRYTALES	3	College of Humanities and Sciences	This course explores the genre of folklore and fairytales and their role as cultural literary artifacts. Students will examine the construction, shaping and use of folklore and fairytales in society.
ENG 265	THE SHORT STORY	3	College of Humanities and Sciences	This course examines the short story through notable works and writers.
ENG 270	LITERARY INTERPRETATION AND ANALYSIS	3	College of Humanities and Sciences	This is a foundational course in developing the skills necessary for effective and appropriate academic writing. This course reviews the elements of grammar, mechanics, style and proper documentation of outside sources.
ENG 280	RHETORIC AND CRITICAL THINKING	3	College of Humanities and Sciences	This course introduces students to rhetoric and critical thinking. Students will apply both formal logic and rhetorical principles to the study and practice of argument and persuasion.

ENG 295	CHILDREN'S LITERATURE	3	College of Humanities and Sciences	This course examines literature for children. Through an overview of a variety of genres and topics, students will develop an understanding of literature for young readers.
ENG 301	AMERICAN ETHNIC LITERATURE	3	College of Humanities and Sciences	This course will survey the literature of the major ethnic groups in the United States (African Americans, Native Americans, Hispanics/Latinos, and Asian Americans) as a means to explore ethnic diversity and minority voices. Focusing on contemporary relevance, a wide range of representative literary works and authors will be discussed in their historical, socio-political, and cultural contexts with special consideration of characteristic literary themes and techniques.
ENG 313	WRITING PROPOSALS	1	College of Humanities and Sciences	This is a one credit course that introduces students to approaches for developing winning proposals. This course may focus on proposal development processes rather than writing and technical issues.
ENG 340	CREATIVE WRITING	3	College of Humanities and Sciences	This course introduces students to creative writing in various genres. The purpose of this course is to develop and expand students' imaginative writing processes and to develop and expand their understanding of the human experience through creative writing. This would include identifying elements of writing and developing skills and techniques for creative writing in poetry, fiction, and nonfiction writings.

ENG 380	APPLIED LINGUISTICS	3	College of Humanities and Sciences	This course introduces students to the nature of language and the way in which language is acquired and used in society. It also addresses grammatical aspects of language such as syntax, semantics, and pragmatics and changes in language over time. Stages of language acquisition and bilingual development will also be discussed.
ENG 437	LITERARY GENRES ACROSS CULTURES	3	College of Humanities and Sciences	This course introduces literary genres that reflect the human experience across cultures. Past and present voices from the literature of majority and minority writers, as expressed in fiction, poetry, drama, and nonfiction, are surveyed. Students analyze literal and symbolic meanings in texts, and examine the elements and conventions of each literary genre. Students think critically, recognize instances of stereotyping and make connections between the literature and their lives.
ENG 437CA	LITERARY GENRES ACROSS CULTURES	3	College of Humanities and Sciences	This course introduces literary genres that reflect the human experience across cultures. Past and present voices from the literature of majority and minority writers, as expressed in fiction, poetry, drama, and nonfiction, are surveyed. Students analyze literal and symbolic meanings in texts, and examine the elements and conventions of each literary genre. Students think critically, recognize instances of stereotyping, and make connections between the literature and their lives.
ENG 480	APPLIED RHETORIC	3	College of Humanities and Sciences	This is the capstone course for English majors. Through applied rhetoric, students will apply various concepts to their own studies and writing, and to written works from multiple genres and disciplines.

ENG 491	AMERICAN LITERATURE TO 1860	3	College of Humanities and Sciences	This course will survey major authors, ideologies, and historical contexts of American literature from colonial times until the Civil War era. A diverse range of works, genres, movements, and cultural narratives will be explored. Accounts of early explorers, Puritan sermons, American Indian mythology, slave narratives, political and social writings, and poetry will be read and discussed.
ENG 492	AMERICAN LITERATURE SINCE 1860	3	College of Humanities and Sciences	This course will survey the writings of 150 years in the historical and cultural context of America. The influence of vast social, political, and philosophical changes in America on literary works will be explored. The major literary movements, works, and authors of four distinct time periods will be read and discussed: the late 19th century, the early 20th century, the late 20th century, and the 21st century.
ENG 493	ENGLISH LITERATURE TO 1800	3	College of Humanities and Sciences	This course will survey major authors, ideologies, and historical contexts of English literature from medieval times until the 18th century. A diverse range of works, genres, movements, and cultural narratives will be explored.
ENG 494	ENGLISH LITERATURE SINCE 1800	3	College of Humanities and Sciences	This course will survey major authors, ideologies, and historical contexts of English literature from the 19th century to the present. A diverse range of works, genres, movements, and cultural narratives will be explored.

ENG 495	ADVANCED CREATIVE WRITING	3	College of Humanities and Sciences	This course explores advanced literary elements of creative writing, focusing on elements of form and craft. Students will write poems, fictional short stories, and one act plays. In the process, students will re-examine all elements of the writing process to deepen their understanding of each stage of the process including prewriting, drafting, editing, and revising, and students will reflect upon differences among genres. A writers' workshop will be an integral component of this course.
ENGPROF 01	ENGLISH COMPOSITION PROFICIENCY COURSE	0	College of Humanities and Sciences	This proficiency exam, which is a zero credit- bearing course, can be used to fulfill the English Composition Proficiency requirement most commonly satisfied by ENG/220, COMM/215 or comparable coursework. To earn a passing grade, a student must receive a score of 60% or better. This is a pass/fail course.
ENT 527	OPPORTUNITY ASSESSMENT AND INNOVATION	3	School of Business	This course is an introduction to entrepreneurship and the entrepreneurial mindset. This course will provide an overview of the challenges and opportunities of an entrepreneurship, an intrapraneurship, and social entrepreneurship. Students will learn the process of initiating an entrepreneurial venture through the creative pursuit of ideas.
ENT 586	INFORMATIONAL TECHNOLOGY FOR ENTREPRENEURS AND LEADERS	3	School of Business	This course focuses on innovative technologies that advance organizational success and sustainability. Students will receive hands-on experience with technology that impacts innovation and performance. The ethical and financial challenges of technology are explored.

ENT 588	INNOVATION AND DESIGN: CAPSTONE PROJECT	3	School of Business	This course provides a learning environment that reinforces creativity and innovation. Students will examine the core concepts related to innovation and analyze effective strategies for managing start-ups or organizations. Topics will include leading innovation, scaling excellence from innovation, financing innovation, creative problem-solving, and design thinking.
ENV 100M	PRINCIPLES OF ENVIRONMENTAL SCIENCE	3	College of Humanities and Sciences	This course will provide students with the scientific principles, concepts, and methodologies that are required to identify and analyze risks associated with environmental problems, and examine alternative solutions for resolving or preventing these problems.
ENV 310	ENVIRONMENTAL MANAGEMENT	3	College of Humanities and Sciences	This course examines environmental problems from a local, national, and international perspective. Federal legislation will be reviewed on air pollution and water quality. Students will be introduced to control techniques for treating air and water, and the emerging environmental issues such as global climate changes, bioterrorism, organic pollutants, and industrial ecology.
ENV 315	GLOBAL CHANGE	3	College of Humanities and Sciences	This course will examine the impact of human activity on the environment. Students will examine a variety of environmental issues influenced by human activity, including the development and impact of global climate change on Earth.

ENV 320	ENVIRONMENTAL LAW	3	College of Humanities and Sciences	This course explores the administrative regulations and policies that are requisite to the management of health and safety in the workplace. Federal, state, and local policies will be examined.
ENV 340	ENERGY AND THE ENVIRONMENT	3	College of Humanities and Sciences	This course will introduce topics covering a wide variety of alternative energy sources, the need for renewable energy, as well as the problems associated with them. Energy sources will include oil, coal, natural gas, hydroelectric, nuclear, wind, solar, geothermal, tidal, and biofuels.
ENV 410	ENVIRONMENTAL TOXICOLOGY	3	College of Humanities and Sciences	The purpose of this course is to provide the fundamental knowledge of the effects of environmental chemicals on living systems, and the toxic responses of the human and plant systems. Students will discuss risk, ethics, and social responsibility with regard to environmental toxicology.
ENV 420	ENVIRONMENTAL RISK ASSESSMENT	3	College of Humanities and Sciences	This course provides an overview of the basic concepts of human and ecological risk assessment. Students evaluate various components of risk assessment, including human health, environmental, occupational, ecological, and risk management. Significant case studies are used to illustrate the assessment process.

ENV 431	PUBLIC POLICY ANALYSIS	3	College of Humanities and Sciences	This course will examine the fundamentals of public policy analysis to the environment. Student will explore the management of public policy issues related to land use and urbanization, ecosystem preservation, global analysis, and policy making.
ESL 300	TEACHING ENGLISH LANGUAGE LEARNERS	3	College of Education	This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.
ETH 120	CULTURAL DIVERSITY IN THE UNITED STATES	3	College of Humanities and Sciences	This course is designed to educate students about issues of race, ethnicity, gender, disability and other diversity issues in the United States.
ETH 125	CULTURAL DIVERSITY	3	College of Humanities and Sciences	This course is designed to educate students about issues of race, ethnicity, and gender in the United States by presenting historical and modern perspectives on diversity.

ETH 316	ETHICS AND SOCIAL RESPONSIBILITY	3	College of Humanities and Sciences	This course provides a foundational perspective for ethics and social responsibility in relationship to individuals, organizations, and the community. Emphasis is placed on the inter- related nature of ethics, morality, legal responsibility, and social issues.
ETH 321	ETHICAL AND LEGAL TOPICS IN BUSINESS	3	School of Business	This course provides students with an overview of the legal, ethical, and related statutory and regulatory environment in which businesses, organizations, and individuals within them function. After completion of this course, students will be able to understand the general structure of the court systems in the United States, describe the alternative means of resolving disputes and their respective advantages and disadvantages, evaluate the frameworks for regulatory compliance and corporate social responsibility, examine the principle areas of commercial law, and understand the impact of technology on intellectual property rights.
ETH 328	DATA ETHICS AND SECURITY	3	School of Business	This course provides students with an overview of the legal and ethical implications of data. Students will examine the legal and ethical issues that must be considered throughout the lifecycle of data analytics including collection, storage, analysis and presentation. Other topics include, privacy, security, classification, and discrimination. After completion of this course, students will be able to understand the legal and ethical considerations that are necessary when utilizing particular types of data, collection methods, and analysis techniques.
ETH 557	ACCOUNTING ETHICS	3	School of Business	In this course, students focus on core values of the accounting profession such as ethical reasoning, integrity, objectivity, and independence. Topics include economics, price and consumer behavior, business and accounting issues, ethics and information technology, and professional standards.

EXAM 799	COMPREHENSIVE EXAMINATION	1	School of Advanced Studies	The comprehensive examination is a program requirement for the Doctor of Philosophy degree from University of Phoenix. Examinations are administered online, and a successful grade must be earned for learners to attend the dissertation and elective course work and move to candidacy.
FIN 366	FINANCIAL INSTITUTIONS	3	School of Business	This course will cover financial institutions such as insurance companies, commercial banks, investment banks and savings and loan associations. The risks facing financial institutions and how to measure and manage those risks are analyzed.
FIN 370	FINANCE FOR BUSINESS	3	School of Business	This course introduces the student to the essential elements of finance for business. Emphasis is placed on financial management, financial markets, and the tools, techniques, and methodologies used in making financial decisions. Topics include: Financial planning, working capital management, capital budgeting, long term financing, and international finance.
FIN 370T	FINANCE FOR BUSINESS	3	School of Business	This course introduces the student to the essential elements of finance for business. Emphasis is placed on financial management, financial markets, and the tools, techniques, and methodologies used in making financial decisions. Topics include: Financial planning, working capital management, capital budgeting, long term financing, and international finance.

FIN 375	FINANCIAL MANAGEMENT IN THE SMALL BUSINESS	3	School of Business	This course focuses on the role that financial management plays in the development and sustainability of a small business. This course provides a detailed review of forecasting, budgeting, daily cash flow management techniques and monitoring financial performance in small business operations. Specifically, students will address funding, venture capital, and debt management, cash-flow management, financial planning, and capital budgeting.
FIN 402	INVESTMENT FUNDAMENTALS AND PORTFOLIO MANAGEMENT	3	School of Business	This course covers the theories and practices of investments including financial markets, risk and return, securities, asset allocation and diversification. Students will utilize analytical techniques available in the investment planning and selection process in the environment in which investment decisions are made. Students will apply finance models and investment strategies to analyze and manage investments for various types of organizations.
FIN 410	WORKING CAPITAL MANAGEMENT	3	School of Business	This course covers the basics of working capital management with emphasis on how firms manage current assets and liabilities to ensure the organization has sufficient cash to pay day-to- day bills and meet short-term obligations. The balance between risk and return is emphasized. Some of the basic techniques of financial forecasting, accounts receivable and inventory management will also be explored.
FIN 415	CORPORATE RISK MANAGEMENT	3	School of Business	This course will provide students with the elements of corporate risk management in a competitive business environment. Emphasis will be placed upon the identification, measurement, management, and planning aspects of risk management, as well as trends and developments in the business environment. Insurance considerations in corporate risk management will also be addressed. Students will utilize newly acquired knowledge and techniques to develop a corporate risk management plan that will maximize value for the organization and stakeholders.

FIN 419	FINANCE FOR DECISION MAKING	3	School of Business	This course addresses advanced principles in financial management and decision making. Emphasis is placed on providing relevant theory, best practices, and skills to effectively manage risk, time value of money, working capital, capital structure, the regulatory environment, and evolving issues in financial management.
FIN 420	PERSONAL FINANCIAL PLANNING	3	School of Business	This course provides an introduction to personal financial planning. Personal financial goals are examined with a focus on investment risk and returns, markets, and analysis tools useful in assessing financial situations.
FIN 422	RETIREMENT AND BENEFIT PLANNING	3	School of Business	This course provides students with the tools necessary to create a retirement plan. After completion of this course, students will be able to identify the types of retirement plans, understand the implications of federal law on retirement plans, identify retirement plans and participation requirements, calculate tax deduction ad contribution limits, and create a full financial plan, including retirement, for an individual.
FIN 428	INSURANCE FOR FINANCIAL PLANNING	3	School of Business	This course will prepare students to make insurance policy recommendations as part of a financial plan. After completion of this course, students will be able to apply concepts of medical, life, and property insurance to financial planning, and understand concepts underlying risk and insurance management for financial plans.

FIN 444	MERGERS, ACQUISITIONS, AND CORPORATE RESTRUCTURING	3	School of Business	This course prepares students to analyze merger and acquisition (M&A) opportunities in ways that will maximize corporate value and shareholder wealth in a competitive market environment. Special emphasis is placed on the identification, screening, selection, evaluation, and financing of M&A activities. Additionally, the course examines business failures and restructuring strategies.
FIN 467	REAL ESTATE INVESTMENT	3	School of Business	This course involves the study of the techniques of real estate investment analysis, including financing, taxes, and decision-making criteria in today's investment environment.
FIN 486	STRATEGIC FINANCIAL MANAGEMENT	3	School of Business	This course gives students the opportunity to integrate previously learned finance and accounting concepts and practices to contemporary business strategies, while improving financial decision-making and problem-solving skills. In addition, students will examine real-world financial management scenarios in order to apply best practices resulting in increased value for various types of organizations.
FIN 571	CORPORATE FINANCE	3	School of Business	This course applies corporate finance concepts to make management decisions. Students learn methods to evaluate financial alternatives and create financial plans. Other topics include cash flows, business valuation, working capital, capital budgets, and long-term financing.

FIN 572	HEALTHCARE FINANCE	3	School of Business	This course applies healthcare finance concepts to make effective management decisions. Students learn methods to evaluate financial alternatives and create financial plans. Other topics include reimbursement strategies, cash flow, working capital, capital budgets, and long-term financing.
FIN 575	PROJECT BUDGET AND FINANCE	3	School of Business	This course applies finance concepts to evaluate and manage projects. Students will prepare a plan to obtain funding and manage a project budget. Other topics include return on investment, cost classification, debt and equity financing, and project cash flows.
FIN 580	GLOBAL CAPITAL MARKETS	3	School of Business	This course examines the international financial environment facing firms in a globalized economy. Students will assess the impact of economic policy and financial disturbances on financial markets, exchange rates, and capital flows. Other topics include investment analysis, asset management, capital markets, hedge funds, corporate finance, and international macroeconomics.
FIN 585	FINANCIAL CONTROLLING	3	School of Business	This course analyzes several topics concerning financial control. Students will explore design and use of cost management systems, financial performance measures for enhancing firm value, managerial incentive contracts and accounting data, and management accounting. Other topics include managing earnings and financial ratios, use of balanced scorecard to evaluate financial/nonfinancial managerial performance, and post-auditing of capital investments.

FIN 590	AUDIT AND COMPLIANCE MANAGEMENT	3	School of Business	The course emphasizes concepts and principles of auditing and assurance services theory and practice. Students will explore professional standards utilized in providing auditing and other assurance services, and reporting on financial statements. Other topics include securities law and regulatory structure, professional conduct, and ethical and legal issues in securities regulation.
FIN 591	REAL ESTATE INVESTMENT	3	School of Business	This course explores the techniques of real estate investment analysis, including financing, taxes, and decision-making criteria in today's real estate investment environment. Students will analyze the risks and rewards of existing and proposed real estate projects to make specific financing and investment decisions. Other topics include real estate financial analysis and valuation, diversification of real estate assets, real estate taxation, and real estate law.
FIN 592	MERGERS AND ACQUISITIONS	3	School of Business	This course examines merger and acquisition opportunities to maximize corporate value and shareholder wealth in a competitive market environment. Students will focus on the identification, screening, selection, evaluation, and financing of activities. Other topics include business failures and restructuring strategies.
FIN 593	INVESTMENT BANKING	3	School of Business	This course examines investment banking firm organizational structure, products, risks, earnings, regulations, innovations and competition. Students will analyze the functions of the banking business, including equity, bond and convertible financings and sales and trading business. Other topics include investment banking relationships with LBO funds, hedge funds and corporate and institutional clients.

FIN 711	FINANCIAL MEASURES OF VALUE ADDED	3	School of Advanced Studies	This course explores and evaluates research on how businesses measure and could modify their measure of financial value to improve decision-making. Topics include business analysis, valuation tools, and applications; mergers and acquisitions; marketplace valuation of equity; U.S. GAAP/IFRS convergence; and the challenges of valuing high growth companies, companies in emerging markets, cyclical companies, and banks.
FNP 001	FNP ORIENTATION	0	College of Health Sciences and Nursing	This is a non-credit bearing course for the faculty schedulers to use to track faculty supervision of student clinical courses. This course will not be used for students.
FP 100T	EVERYDAY ECONOMICS AND FINANCES	3	College of Humanities and Sciences	This course introduces students to thinking about and working with numbers by examining the day-to-day and societal importance of money.
FP 101	FOUNDATIONS OF PERSONAL FINANCE	3	College of Humanities and Sciences	This course provides an overview of the elements necessary for effective personal financial planning and the opportunity to apply the techniques and strategies essential to this understanding. Primary areas of study include creating and managing a personal budget, understanding and paying taxes, working with financial institutions, wise use of credit cards and consumer loans, financing automobiles and homes, and the use of insurance for protecting one's family and property.

GBM 380	GLOBAL BUSINESS	3	School of Business	This course addresses major forces in the global environment and the impact upon business strategies, operations, and decision making. Special emphasis is placed on developing a global mindset and the intricacies of the global business environment.
GBM 381	INTERNATIONAL TRADE	3	School of Business	This course examines the concepts and components of international trade. Emphasis is placed on applying current theories, concepts, and practices in conducting global business transactions.
GEN 201	FOUNDATIONS FOR UNIVERSITY SUCCESS	3	College of Humanities and Sciences	This course transitions students through the foundations of study at University of Phoenix. Students develop personal strategies for achieving educational goals; and develop skills in critical thinking, collaboration, and communication.
GEN 480	INTERDISCIPLINARY CAPSTONE COURSE	3	College of Humanities and Sciences	This is the capstone course for business, health and human services, and information technology undergraduate students. The course provides students with the opportunity to integrate and apply learning from their professional programs of study in a comprehensive manner. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

GEO 180	PHYSICAL GEOGRAPHY	3	College of Humanities and Sciences	This course introduces students to the principles of physical geography. Students examine the processes of Earth's physical environment as well as the human-environment interaction. Topics include plate tectonics, the rock cycle, landscape building, water resources, the relationship between the Earth and Sun, the elements of weather and climate, vegetation and soils, types and uses of maps, and human interaction with the environment.
GFT 500	Teaching Gifted and Talented Learners	3	College of Education	In this course, participants explore the characteristics of and methods to identify gifted and talented learners, including underrepresented students. Programs, strategies, and supports for the diverse needs of gifted and talented learners are examined. Participants develop lessons and assessments to accommodate and foster the academic, social, and emotional development of gifted and talented learners.
GFT 501	Curriculum and Instruction for Gifted and Talented Learners	3	College of Education	This course focuses on the theory, research, standards, and practices necessary to adapt, develop, and sustain high quality curriculum and instruction for diverse gifted and talented learners. Participants examine strategies to enhance acceleration, depth, and complexity of learning. Participants explore creative student products, the use of technology, assessment, differentiation, collaboration, enrichment, and higher order processing skills in curriculum and instruction for highly able students.
GFT 503	Assessment for Gifted and Talented Learners	3	College of Education	This course provides an overview of evaluation methods and assessment of gifted and talented learners. Participants interpret different evaluation and assessment tools, identifying the pros, cons, and limitations of multiple assessments. Participants explore solutions and alternative assessments in the identification of gifted and talented learners. Strategies in the ongoing assessment process of gifted and talented learners are also examined.

GFT 505	Critical Thinking Skills for Gifted and Talented Learners	3	College of Education	This course prepares participants to enhance critical thinking skills in gifted and talented learners. Participants explore theories, teaching and assessment methods, instructional strategies, and technology related to the development of critical thinking skills in gifted and talented learners. Characteristics of gifted and talented learners, differentiated instruction, creative thinking, twice exceptional learners, and student engagement are also addressed.
GHA 548	FOUNDATIONS OF GERONTOLOGY FOR HEALTH ADMINISTRATORS	3	College of Health Sciences and Nursing	This course introduces current and aspiring health administrators to the field of gerontology, and the systems and facilities that support these populations. Topics include an examination of the experiences of aging populations across the care continuum, myths and stereotypes of aging, and a survey of the demographic changes occurring in the U.S. that are resulting in larger elder populations.
GHA 551	BIOLOGICAL AND PSYCHOLOGICAL ASPECTS OF AGING	3	College of Health Sciences and Nursing	This course examines the process of aging and explores health care programming and support systems that promote the health of the aging population. These topics are applied in a health administration context to disease prevention, health maintenance, and selected disorders that effect health and independent living.
GHA 557	SOCIAL AND CULTURAL ASPECTS OF AGING	3	College of Health Sciences and Nursing	This course examines social and cultural perspectives on aging and their implications for health administrators serving aging populations. Public and personal aspects of aging will be addressed. Topics will include work and retirement, social policy, older people as social and political forces, care needs, diversity, economics, social support, and disability.

GHS 563	LEADERSHIP AND PUBLIC POLICY IN GLOBAL/HOMELAND SECURITY	3	College of Criminal Justice and Security	This course is designed to provide students with an understanding of how public organizations deal with the threat of various forms of terrorism. Leadership and management responsibilities are considered. Students will understand the importance of interdisciplinary security in developing comprehensive protection plans and policies designed to reduce the vulnerability associated with deliberate violent acts.
GHS 573	INTELLIGENCE INTEGRATION IN GLOBAL/HOMELAND SECURITY	3	College of Criminal Justice and Security	This course allows students to explore the collaboration of intelligence and law enforcement communities (intelligence-led policing) for human welfare and safety in global and homeland environments. Students will review the development and implementation of counterterrorism initiatives based on terrorism intelligence and emerging threats to homeland security. Students will also examine recommendations of the Global Intelligence Working Group (GIWG) and evaluate operational expectations of law enforcement and federal intelligence analysts, law enforcement administrators, and first responding officers responsible for global and homeland security. Students will also explore the importance of keeping local law enforcement intelligence and national security intelligence separate, but recognize methods for federal, state, and local law enforcement agencies to share and dispense intelligence.
GHS 583	MULTI-DISCIPLINARY GLOBAL AND HOMELAND SECURITY ISSUES	3	College of Criminal Justice and Security	This course explores current and future issues in global and homeland security. Students will evaluate domestic border security and global immigration control. Students will understand the importance of planning for the prevention of domestic and international terrorism acts and other critical incidents and develop an understanding of gathering, using, and sharing appropriate intelligence. They will explore the collaboration and development of partnerships with private security organizations. Students will develop methods for coordinating emergency management efforts and discuss the psychological and sociological effects of terrorism and other critical incidents. The new skills and knowledge gained will add to the protection, safety, and security of our society.
GHS 593	CRITICAL INFRASTRUCTURE ANALYSIS AND PROTECTION	3	College of Criminal Justice and Security	This course focuses on systems analysis in the context of critical infrastructure protection. The course provides a strategic perspective of the Critical Infrastructure Protection (CIP) efforts in the United States. This includes preparation and response to critical events. Practical approaches to CIP are considered including threat assessment and vulnerability identification. Risk assessment methodologies, physical protection system design, cybersecurity, and emergency response protocols are also discussed.

GLG 220	PHYSICAL GEOLOGY	3	College of Humanities and Sciences	This course will introduce the key concepts of geology by examining the Earth and the processes that take place within it. Topics will include historical geology, rocks and minerals, plate tectonics, igneous activity, mass wasting, weathering and erosion systems.
GMGT 520	EXTERNAL ENVIRONMENT OF GLOBAL BUSINESS	3	School of Business	This course explores issues and institutions that affect global business outside the direct control of the organization. Topics include country risk assessment, basis for trade and capital flows, exchange rate determination, international, national, and local organizations, regional integration, and conflict resolution of global trade disputes.
GMGT 530	INTERNAL ENVIRONMENT OF GLOBAL BUSINESS	3	School of Business	This course examines issues and functions that global business faces within control of the organization. Topics include organizational forms of entry and exit, legal issues, marketing, finance, human resources, and risk management.
GMGT 540	GLOBAL STRATEGY FORMULATION AND IMPLEMENTATION	3	School of Business	This course develops strategy for global implementation. Topics include the role of global strategy in the organization, the current state and strategy choices, strategy selection, implementation and control issues, portfolio management, and case analysis.

HCA 210	INTRODUCTION TO HEALTH CARE: RIDING THE FOURTH WAVE	3	College of Health Sciences and Nursing	This course provides a broad overview of the United States health care system. The historical evolution of the business of health care is examined. The student will explore management concepts and workforce opportunities within the health care industry.
HCA 220	THE LANGUAGE OF HEALTH CARE	3	College of Health Sciences and Nursing	This course offers the student engagement and interaction with the dynamic language of health care. Through comprehensive discussions and activities, the student will have the opportunity to be immersed in the words used in health care. This course requires a microphone and speakers or headphones for recording and listening to digital audio files.
HCA 230	COMMUNICATION SKILLS FOR HEALTH CARE PROFESSIONALS	3	College of Health Sciences and Nursing	This course offers the student the foundational knowledge and skills to communicate effectively in a variety of health care workplace settings. The student will discuss social and cultural influences on communication efforts, examine channels of communication including internal, external, and technology related communication, and the impact of consumer and interdisciplinary communication.
HCA 240	HEALTH & DISEASES: UNDERSTANDING PATHOS OF PATHOLOGY	3	College of Health Sciences and Nursing	This course introduces the student to the basic principles of illness and disease commonly seen in the health care environment. Topics may include infectious and noninfectious diseases, environmental health, and the promotion of good health practices. In addition, students will be introduced to common disease and medical procedure terminology.

HCA 250	THE PSYCHOLOGY OF HEALTH	3	College of Health Sciences and Nursing	In this course, the student is introduced to the psychological factors that relate to maintaining a healthy workplace. The course also exposes the student to management elements of cultural diversity, collaboration, and healthy behaviors.
HCA 260	HEALTH CARE'S LAW AND ETHICS ENVIRONMENT	3	College of Health Sciences and Nursing	This course is designed as an introduction to the laws and ethics of providing health care services. The course is also intended to familiarize the student with state and federal health regulation. Since ethics and laws are both dynamic, emphasis is placed on discussing some of the dramatic changes in health care delivery, such as managed care, patient self-determination, medical record keeping, and various laws that impact health care employment.
HCA 270	FINANCIAL MATTERS FOR HEALTH CARE PROFESSIONALS	3	College of Health Sciences and Nursing	This course is designed as an introduction to the terminology, processes, functions, and financial reports commonly encountered in health care operations. This course introduces the concepts of basic managerial financial functions, such as budgeting, reimbursement methods, and the responsibilities of health care financial management.
HCIS 140	FUNDAMENTALS OF ELECTRONIC HEALTH RECORDS	3	College of Health Sciences and Nursing	This course introduces students to the fundamentals of electronic heath records (EHR) utilized in the health care environment. Students will receive an overview of information systems, workflows, health information accessibility, as well as health care transactions and billing.

HCIS 245	FUNDAMENTALS OF INFORMATION SYSTEMS FOR HEALTH CARE	3	College of Health Sciences and Nursing	This course introduces the fundamentals of computer systems and the role of information processing in today's health care environment. An overview is presented of information systems, systems development, operating systems and programming, database management, networking and telecommunications, the Internet, and how these resources are applied in the health care industry.
HCIS 250	STRUCTURE, DESIGN, AND TOOLS OF ELECTRONIC HEALTH RECORDS	3	College of Health Sciences and Nursing	Students will learn about the evolving functions and uses of technology to support the documentation of vital health information contained in a patient's electronic health record. This course will introduce students to software applications, claims and reimbursement information, as well as regulatory compliance requirements. Students will examine forms, routing, and reporting of patient records in a variety of health care settings. Students will use an electronic health record (EHR) software to reinforce quality and data management of patient information.
HCIS 255	STRUCTURE AND DESIGN OF ELECTRONIC HEALTH RECORDS	3	College of Health Sciences and Nursing	Students will learn about the evolving function and use of technology to support the documentation of vital health information contained in a patient's medical history. This course will introduce students to the general software applications, insurance and coding information, and regulatory compliance requirements.
HCIS 265	MEDICAL HEALTH INFORMATION	3	College of Health Sciences and Nursing	This course focuses on the documentation of medical data and how managing data can be vital to the treatment and care of individuals in the health care system. Students will examine development, forms, routing, filing, and storage of patient's records in a variety of health care settings. Students will also review issues related to quality and data management, as well as privacy and security compliance.

HCIS 270	APPLICATION OF ELECTRONIC HEALTH RECORDS	3	College of Health Sciences and Nursing	Students in the capstone course for the electronic health records (EHR) concentration will continue to use an EHR software to apply foundational skills related to administrative tasks, data charting, insurance and billing, and regulatory compliance and reporting. Students will demonstrate mastery processing an electronic health record.
HCIS 275	PRACTICAL APPLICATION OF ELECTRONIC HEALTH RECORDS	3	College of Health Sciences and Nursing	Students in the capstone course will use case studies and an electronic health record (EHR) software application to develop foundational skills related to data charting, usage, and application.
HCIS 305	TERMINOLOGY AND CULTURE OF THE HEALTHCARE INDUSTRY	3	College of Health Sciences and Nursing	This course provides students with a foundational set of health care terminology utilized in a variety of health care settings and applications. The course also provides an overview of the various personnel and types of provider service models in the health care delivery systems. Topics will include common disease management and processes that impact the delivery of health care services.
HCIS 410	PROJECT PLANNING AND IMPLEMENTATION IN HEALTH CARE	3	College of Health Sciences and Nursing	This course provides the foundation for understanding the broad concepts of successful planning, organization, and implementation within the realm of health care information technology. This course uses real-world examples to support and expand a student's skills in project management. Topics covered include project scoping, estimating, budgeting, scheduling, tracking and controlling.

HCIS 420	INFORMATION SYSTEMS RISK MANAGEMENT IN HEALTH CARE	3	College of Health Sciences and Nursing	This course identifies and defines the types of risks that information systems professionals need to consider during the development and implementation of health care information systems. This course will survey remedies and prevention techniques available to address risk and security management. Health care organizational policies and current regulatory considerations will also be examined relative to development, implementation and use of computer based information systems.
HCM 440	HEALTH CARE DATA ANALYTICS	3	School of Business	This course will introduce students to the role of data and analysis in healthcare. Students will understand the concepts of analytics, informatics, the electronic health record and other data sources that can be used to support organizational strategies and initiatives. Other topics include, ethical and privacy issues in healthcare and the role of social media and mobile initiatives. Students will conduct a case study on a topic in healthcare analytics and implement recommendations for improvement.
HCR 201	MEDICAL BILLING AND CODING	3	College of Health Sciences and Nursing	This course is designed to provide students with a framework for managing the application of clinical data to the patient record. Students will examine predominant medical billing and coding manuals and will demonstrate use of codes.
HCR 202	MEDICAL INSURANCE	3	College of Health Sciences and Nursing	This course is designed to provide students with an understanding of health care reimbursement systems. Students will become familiar with various medical insurance plans offered by health care payors.

HCR 203	MEDICAL CLAIMS PROCESSING AND COMPLIANCE	3	College of Health Sciences and Nursing	This course is designed to provide students with an understanding of the management of patient records through the practices and processes of filing claims. Students will focus on the knowledge and skills essential for completing insurance claim forms in the health care setting. Security and compliance requirements will also be covered.
HCR 210	PATIENT RECORDS: KEEPING IT REAL	3	College of Health Sciences and Nursing	Documenting patients' health information is central to the continuity of medical care and the collection of medical data. This course examines the content, development, format, routing, filing, and storage of patient records. Settings include hospitals, physicians' offices and alternate care facilities. Students review uses of health data and legal aspects of health information management.
HCR 220	CLAIMS PREPARATION I: CLEAN BILLS OF HEALTH	3	College of Health Sciences and Nursing	Medical records processing revolves around insurance and reimbursement. This course focuses on the background, knowledge and skills related to basic billing duties, HIPAA regulations, patient encounters, and the preparation, compliance, and transmission of claims. Students are introduced to the history, current state and future direction of the major diagnostic and procedural coding systems.
HCR 230	CLAIMS PREPARATION II: FOOTING THE BILLS	3	College of Health Sciences and Nursing	This course continues medical records processing instruction. Topics focus on the background, knowledge and skills related to private payers, Medicare, Medicaid, Tricare, Champva, workers compensation and disability. Claims processing includes payments, appeals, and secondary claims; patient billing and collections; hospital billing and reimbursement.

HCR 240	COMPUTERIZING MED DATA: PAPER CHASE GOES TECHNO	3	College of Health Sciences and Nursing	This medical records capstone course enables students to develop career skills in computerizing data through application of a software program widely used in health care. While popular for medical billing and collections, MedisoftTM also applies to managing patients' health care information, scheduling, correspondence, and a variety of reports. This course requires a PC with Windows 2000 or Windows XP operating system.
HCS 120	MEDICAL TERMINOLOGY FOR HEALTH CARE PROFESSIONALS	3	College of Health Sciences and Nursing	This course offers students engagement and interaction with the dynamic language of health care. Through comprehensive discussions and activities, students will have the opportunity to be immersed in the words used in health care.
HCS 131	BUSINESS COMMUNICATION SKILLS FOR HEALTH CARE PROFESSIONALS	3	College of Health Sciences and Nursing	This course offers students the foundational knowledge and skills to communicate in a variety of workplace settings. Students will focus on business writing correspondence, communication technologies, and effective communication strategies for the health care industry.
HCS 182	INTRODUCTION TO FINANCIAL CONCEPTS	3	College of Health Sciences and Nursing	This course introduces students to fundamental financial concepts related to the health care industry. Students will learn about basic insurance procedures, bookkeeping processes, and budgets commonly used in a variety of health care settings.

HCS 207	Introduction to Medical Terminology	3	College of Health Sciences and Nursing	In this course, students are introduced to medical terminology used within the health care industry. The course will cover medical terminology related to the main body systems and their functions as well as word building through the use of word roots, prefixes, suffixes, and combining forms. Also, students will explore the importance of medical terminology in the health care industry.
HCS 214	ANATOMY AND PHYSIOLOGY I	3	College of Health Sciences and Nursing	This course is designed to introduce students to basic terminology, roles, and diseases related to the cardiovascular, respiratory, gastrointestinal, and urinary systems. The content provides a fundamental baseline for coding and billing applications to help build a foundation for students who are pursuing the medical coding and billing track.
HCS 216	ANATOMY AND PHYSIOLOGY II	3	College of Health Sciences and Nursing	This course is designed to introduce students to basic terminology, roles, and diseases related to the nervous, endocrine, musculoskeletal, reproductive, and dermatological systems. The content provides a fundamental baseline for coding and billing applications to help build a foundation for students who are pursuing the medical coding and billing track.
HCS 219	INTRODUCTION TO HEALTH CARE FINANCE	3	College of Health Sciences and Nursing	This course is designed as an introduction to the terminology, processes, functions, and financial reports commonly encountered in health care. Students will explore the concepts of basic managerial financial functions, such as budgeting, reimbursement methods, and the use of financial documents.

HCS 224	HEALTH CARE OFFICE MANAGEMENT	3	College of Health Sciences and Nursing	This course is designed to provide students with the knowledge and skills needed for the administrative operations of a health care facility. Concepts regarding office procedures, resources and supplies, and compliance and risk management requirements will be explored.
HCS 235	HEALTH CARE DELIVERY IN THE U. S.	3	College of Health Sciences and Nursing	This course provides a broad overview of the various functions of the United States health care system. The historical evolution of health care is examined. The student is introduced to the various forms of provider models and service delivery systems found in private and public health sectors, including ambulatory, acute, mental, and long-term care. The financing aspects of health care and their influence on health care delivery and quality are outlined.
HCS 245	INTRODUCTION TO HEALTH AND DISEASE	3	College of Health Sciences and Nursing	This course introduces students to the basic principles of illness and disease as well as the impact of disease trends on the delivery of services. The clinical manifestations of diseases commonly seen in the health care environment will be reviewed. The impact of health promotion and wellness program perspectives will be presented.
HCS 265	THE MANAGERIAL ENVIRONMENT OF HEALTH CARE	3	College of Health Sciences and Nursing	This course introduces students to basic management concepts and regulations within the health care industry. Students will become familiar with regulatory compliance and ethical issues in the health care business. The application of human resource concepts will also be discussed.

HCS 305	HEALTH CARE PROFESSIONAL DEVELOPMENT	3	College of Health Sciences and Nursing	This course introduces students to the diverse spectrum of the health care industry. Topics will include an overview of the program student learning outcomes, professional organizations, scope of career opportunities, and planning for the future.
HCS 310	HEALTH CARE DELIVERY IN THE UNITED STATES	3	College of Health Sciences and Nursing	This course provides a broad overview of the various functions of the United States health care system. The historical evolution of health care is examined. The student is introduced to the various forms of provider models and service delivery systems found in private and public health sectors, including ambulatory, acute, mental, and long-term care. The financing aspects of health care and their influence on health care delivery and quality are outlined.
HCS 320	HEALTH CARE COMMUNICATION STRATEGIES	3	College of Health Sciences and Nursing	This course offers students the foundational knowledge and skills to communicate effectively in a variety of health care workplace settings. Students will review basic medical terminology, discuss the influences of gender and culture, examine channels of communication including the development of interpersonal and technology related communication, and the impact of consumer and interdisciplinary communication.
HCS 325	HEALTH CARE MANAGEMENT	3	College of Health Sciences and Nursing	The course explores fundamental concepts of management theory as applied to healthcare. Students will examine the organizational structure of the health care delivery system and administrative processes such as planning, problem solving, decision making, and quality productivity improvement. Emphasis will also be placed on the major issues and problem areas confronting health service administrators.

HCS 330	INTRODUCTION TO HEALTH AND DISEASE	3	College of Health Sciences and Nursing	This course introduces students to the basic principles of illness and disease as well as the impact of disease trends on the delivery of services. The clinical manifestations of diseases commonly seen in the health care environment will be reviewed. The impact of health promotion and wellness program perspectives will be presented.
HCS 335	HEALTH CARE ETHICS AND SOCIAL RESPONSIBILITY	3	College of Health Sciences and Nursing	This course identifies ethical issues in health care. It is designed to encourage students to clarify their personal ethic with regard to health care issues. The various responsibilities involving the management of populations whose ethics may be divergent are identified.
HCS 341	HUMAN RESOURCES IN HEALTH CARE	3	College of Health Sciences and Nursing	This course examines the complexities and multiple issues involved in Human Resources management in health care organizations. Students will examine the strategic role of human resource management in response to changes in the health care industry. In addition, issues such as recruitment, retention, performance management, organizational development, and employee relations are examined. Federal, state, and professional regulatory requirements specific to health care are emphasized.
HCS 370	ORGANIZATIONAL BEHAVIOR	3	College of Health Sciences and Nursing	This course focuses on the dynamics of individual and group behaviors and processes that impact and shape organizations. Topics will include organizational theories, decision making, group dynamics, change and conflict negotiation, and organizational culture and design.

HCS 380	HEALTH CARE ACCOUNTING	3	College of Health Sciences and Nursing	This course provides an understanding of the fundamental concepts of accounting applied in the health care environment. Students will examine accounting practices and procedures to support managerial decision making within the health care organizations.
HCS 385	HEALTH CARE FINANCE	3	College of Health Sciences and Nursing	This course provides an overview of the financial economics of health care. Concepts such as payments systems, economic trends, financial statements and budgets are covered.
HCS 429CA	PATHOPHYSIOLOGY	3	College of Health Sciences and Nursing	This course presents an introduction to human pathophysiology. Emphasis will be placed on explaining the mechanisms and clinical manifestations associated with specific infectious diseases. The course will examine cellular activity, organs, and systems that affect the health of the human body.
HCS 430	LEGAL ISSUES IN HEALTH CARE: REGULATION AND COMPLIANCE	3	College of Health Sciences and Nursing	This course covers the broad range of topics affected by law and regulation ranging from patient rights to corporate responsibilities. Health care regulatory agencies and state and federal agencies are examined as well as their impact on the operation healthcare as a business. Legal issues ranging from professional malpractice to corporate wrongdoing are also discussed.

HCS 433	DIMENSIONS OF HEALTH AND THE OLDER ADULT	3	College of Health Sciences and Nursing	This course examines the basic principles and concepts of the aging process, including the physical, social, emotional, and mental components of health. Benefits of health promotion and preventive action for the older adult are also explored.
HCS 436	PATHOPHYSIOLOGY	3	College of Health Sciences and Nursing	This course presents an introduction to human pathophysiology. Emphasis will be placed on explaining the mechanisms and clinical manifestations associated with specific infectious diseases. The course will examine cellular activity, organs and systems that affect the health of the human body.
HCS 437	LONG-TERM CARE ADMINISTRATION	3	College of Health Sciences and Nursing	This course introduces students to the organization and management of long-term care. The impact of state and federal regulations are analyzed, as well as issues surrounding funding services are discussed. Students will examine the health services needed for current and future populations needing long-term care.
HCS 446	FACILITY PLANNING	3	College of Health Sciences and Nursing	This course will introduce students to the legal and regulatory challenges of facility planning and development. Students will analyze facility designs, discuss further health care consumer utilization trends, and as well as examining the regulatory compliance requirements.

HCS 449	HEALTH ADMINISTRATION CAPSTONE	3	College of Health Sciences and Nursing	Students in this course summarize their learning and formulate strategies to manage various challenges they will encounter in the healthcare environment. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.
HCS 451	HEALTH CARE QUALITY MANAGEMENT AND OUTCOMES ANALYSIS	3	College of Health Sciences and Nursing	This course examines the relationships between health care quality and organizational performance management. The student is introduced to the rationale for performance management and quality improvement tools used in health care. Methods for assuring quality in process and outcome management are described. Changing trends in the provision and reimbursement of health care services are reviewed.
HCS 455	HEALTH CARE POLICY: THE PAST AND THE FUTURE	3	College of Health Sciences and Nursing	This course examines the role of federal, state, and local government in the development of health care policy and regulation involving both the private and public sectors. The resulting impact of policy and regulation on healthcare systems is discussed. The role of health care systems will be reviewed as well as the various aspects involving the delivery of services.
HCS 456	RISK MANAGEMENT	3	College of Health Sciences and Nursing	This course introduces students to issues related to risk management in health care. Concepts will include the tasks of the risk manager, regulatory requirements, and risk factors unique to the health care industry.

HCS 457	PUBLIC AND COMMUNITY HEALTH	3	College of Health Sciences and Nursing	This course provides health care students with an introduction to the development of the public health system and through the epidemiological model students will examine the impact of environmental factors on disease trends as well as communicable disease controls. Students will develop beginning skills in community assessment and health promotion strategies. The course also reflects the advances in population health in the community health field. This course represents the concept that many populations of concern in health programs are not solely defined by geographic location.
HCS 465	HEALTH CARE RESEARCH UTILIZATION	3	College of Health Sciences and Nursing	This course introduces students to the purpose and process of research as applied to health care. Students will examine the role of statistics and various research methods. In addition students will analyze the key elements evidence based research within health care.
HCS 475	LEADERSHIP AND PERFORMANCE DEVELOPMENT	3	College of Health Sciences and Nursing	The course provides students with an overview of leadership theories to assist in the development of effective leadership skills. Students will discuss workplace change and the leader's role in the change process as well as examining and analyzing effective performance indicators for staff and organizational goals.
HCS 478	HEALTH LAW AND ETHICS	3	College of Health Sciences and Nursing	The legal and ethical aspects of the nurse's role in the delivery and management of health care are examined in this course. This course will introduce ethical responsibilities and decision making models related to various health care situations while exploring legal accountability to the individual, clinical, and health care providers.

HCS 482	HEALTH CARE INFORMATICS	3	College of Health Sciences and Nursing	This course is designed to examine computer and electronic modalities that assist patient and client management. The automation of data management through information systems, expert systems, and telecommunications will be examined in the context of health care informatics. The use of technology to help make decisions and to improve the health status of the individual, family, and community will be emphasized.
HCS 483	HEALTH CARE INFORMATION SYSTEMS	3	College of Health Sciences and Nursing	The course provides an overview of the integration of technology in the health care setting. Students will examine the processes used in the selection, application and evaluation of computer software and hardware. Methods and processes to make informed business decisions related to the application and use of technology in health care will be discussed.
HCS 490	HEALTH CARE CONSUMER - TRENDS AND MARKETING	3	College of Health Sciences and Nursing	In this course students will have the opportunity to examine the traits, trends and needs of today's health care consumer. Students will examine current consumer information for readability, implications for the selection of products and services and differentiation of health care web sources.
HCS 499	HEALTH CARE STRATEGY CAPSTONE	3	College of Health Sciences and Nursing	This capstone course examines the techniques and perspectives of strategic planning in the health care industry. Students will be required to demonstrate mastery of program Student Learning Outcomes through the strategic planning process by formulating strategies to manage various challenges encountered in the dynamic health care environment.

HCS 504	INTRODUCTION TO GRADUATE STUDY IN HEALTH SCIENCES/NURSING	1	College of Health Sciences and Nursing	This course provides new graduate students in the college with an introduction to strategies for success within the University's adult learning model. Topics include program standards and objectives, graduate-level oral and written communication, locating, evaluating, and citing scholarly resources, and purposes and use of portfolios.
HCS 507	ADVANCED PHARMACOTHERAPEUTICS	3	College of Health Sciences and Nursing	This course is designed to provide the nurse practitioner student with the information and skills to initiate and monitor drug therapy. This course will integrate advanced knowledge regarding the clinical application of pharmacology and pharmacokinetics, techniques and methods of drug prescribing, approaches to data collection, and problem solving with discussions about drug therapy for common acute and chronic diseases. Emphasis will be on the practical application of important concepts used in clinical practice for clients across the life span.
HCS 510	ADVANCED PATHOPHYSIOLOGY	4	College of Health Sciences and Nursing	This course provides students with advanced anatomy, physiology, and pathophysiology of systems in relation to an individual's health across the lifespan. Focus is given to the physiological and biological manifestations and adaptive and maladaptive changes that occur. The knowledge gained in this course lays a foundation for the management of primary care issues of the family and its members.
HCS 529	CONTEMPORARY HEALTH CARE FACILITY DESIGN	3	College of Health Sciences and Nursing	This course will provide students the opportunity to analyze and create plausible designs for a health care organization. Students will discuss current and future health care consumer utilization trends and environmental impacts, as well as examine the regulatory compliance requirements. Practical application of design and planning for a health care facility will be demonstrated.

HCS 542	HEALTH CARE RESEARCH	3	College of Health Sciences and Nursing	This course focuses on the application of health care research methods. Emphasis will be placed on using evidenced based concepts to analyze current health care workplace issues, including the development of an effective research question, literature reviews, and concepts related to data design and collection.
HCS 565	ORGANIZATION AND MANAGEMENT OF AGING SERVICES	3	College of Health Sciences and Nursing	This course examines a variety of services currently available for aging adults and their families. Students will learn the basic principles for planning, organizing, implementing, and coordinating programs and services intended for maturing adults. Topics include community programs, policy, institutional services, religious-based and other nonprofit resources, contracted service providers, and residential facilities.
HCS 567	ENTREPRENEURSHIP IN HEALTH CARE	3	College of Health Sciences and Nursing	This course will set up the context of entrepreneurship and new business development; examine the characteristics of entrepreneurs, identifying and quantifying market opportunities in the health care market, as well conceptualizing the resources and capabilities needed. Topics include opportunity assessment, regulated industry implications and requirements, as well as the challenges of expansion within an existing enterprise.
HCS 577	FINANCIAL MANAGEMENT IN HEALTH CARE	3	College of Health Sciences and Nursing	This course presents the concepts of financial accounting important to the understanding of the financial environment of the health care industry. Students interpret financial statements, prepare analyses of financial data necessary to make decisions, describe the different third party payment methods, experiment with cost finding and price setting, and conduct break-even analyses. The course provides students with experience in capital and operating budgets, and financial forecasts.

HCS 589	HEALTH CARE STRATEGIC MANAGEMENT	3	College of Health Sciences and Nursing	This is the capstone course for the graduate health care programs. The development and presentation of health care organization's strategic plan will demonstrate mastery of the critical content as the principles relate to the health care industry. Special emphasis is placed upon consumer demand, market volatility, regulatory and fiscal constraints from the perspective of strategic management. The learner will demonstrate understanding of the critical importance of strategic management and planning within the dynamic, complex, and evolving nature of the health care industry.
HEA 711	HISTORY AND PHILOSOPHY OF HIGHER EDUCATION	3	School of Advanced Studies	This course presents the historical origins and development of higher education and its influence on the development of postsecondary education in the United States. Through ontological and epistemological lenses, students will examine the philosophical perspectives on cultural values, beliefs (both secular and non- secular), and goals of education from classical times through modern American higher education.
HEA 712	HIGHER EDUCATION LAW, POLICY AND THE REGULATORY ENVIRONMENT	3	School of Advanced Studies	In this course, students will evaluate how higher education institutions operate within a regulatory framework created by local, state and federal statutory law, case law, policies created by governmental agencies as well as various accrediting bodies. Major topics include systems of higher education governance, faculty, administrator and staff employment issues, student rights and conduct, technology, intellectual property and risk management. The impact of social and political constructs and stakeholder perspectives will be evaluated as it relates to the creation of a comprehensive ethical and legal approach to problem solving and policy development.
HEA 713	HIGHER EDUCATION ECONOMICS, FINANCE AND STRATEGIC PLANNING	3	School of Advanced Studies	This course introduces and examines the major features of the financial operations and functions, and decision making within various types of higher education institutions. Strategic financial planning and global market influences, in the context of higher education institutions will be addressed.

HEA 721	ORGANIZATIONAL THEORY, INNOVATION AND CHANGE MANAGEMENT	3	School of Advanced Studies	In this course, students will analyze the factors that have resulted in contemporary innovative changes in higher education. The course will focus on leadership influences in the evaluation and application of change management models, strategies, and tactics that promote effective institutional innovation.
HEA 722	ACADEMIC AND STUDENT AFFAIRS ADMINISTRATION	3	School of Advanced Studies	In this course, major functions housed in the academic division of colleges and universities will be analyzed. Major functions of student affairs administration will also be analyzed. Emerging issues in the academic and student affairs profession will be evaluated as they relate to the achievement of the institutional mission.
HEA 731	STUDENT DEVELOPMENT, ADULT EDUCATION, AND STUDENT DIVERSITY	3	School of Advanced Studies	This course will provide an understanding of traditional, non-traditional and diverse students in higher education through an examination of the psychosocial, cultural, cognitive-structural, and identity theories related to student development.
HEA 732	CURRICULUM DEVELOPMENT, ASSESSMENT, AND PROGRAM EVALUATION	3	School of Advanced Studies	In this course, students will explore contemporary curriculum issues including creating appropriate learning outcomes, developing high-impact educational practices, and striking a balance between general education and major courses. The course will also focus on using evidence-based decision making in program/course curriculum development and change processes. Program evaluation models and methods and accreditation processes utilized in higher education will be explored.

HEA 733	GLOBAL MODELS AND INTERNATIONAL ISSUES IN HIGHER EDUCATION	3	School of Advanced Studies	This course will provide a comparative perspective of higher education systems in countries around the world. The relationship between educational systems and historical, social and political factors will be evaluated. International governance structures and accreditation processes will be analyzed and compared. Current international issues in higher education will also be explored.
HINF 500	INFORMATICS FOR HEALTH ADMINISTRATION	3	College of Health Sciences and Nursing	This course presents informatics as a strategic tool for the health administrator in sourcing and utilizing data.
HINF 510	THE SYSTEMS LIFE CYCLE	3	College of Health Sciences and Nursing	This course will focus on the systems life cycle in the context of selection, implementation, and integration of information systems across the health sector. Topics include performing interoperability assessments, determining key elements of data system designs, planning for end-user training and support, and securing buy- in from stakeholders.
HINF 520	DATA MANAGEMENT AND DESIGN IN HEALTH ADMINISTRATION	3	College of Health Sciences and Nursing	This course will explore the ways in which data provides the foundation for healthcare information systems. Topics include the concepts of information and knowledge, as well as systems operations, reporting mechanisms, data exchange, and data taxonomies.

HIS 110CA	U.S. HISTORY TO 1865	3	College of Humanities and Sciences	This course recounts the story of the United States by looking at the experiences of the many diverse races and nationalities. When woven together, these diverse races and nationalities have created this country. Students will learn to appreciate the contributions of various peoples which have made contributions to the American culture. Particular emphasis will be placed on America's colonial origins, the American Revolution and the creation of a republican government under the Constitution. Emphasis is also placed on westward expansion, section divisions over slavery and causes/consequences of the Civil War.
HIS 120CA	U.S. HISTORY 1865 TO 1945	3	College of Humanities and Sciences	This course recounts the story of our country by looking at the experiences of the many diverse races and nationalities that, woven together, have created the United States of America. Students will learn to appreciate the contributions various peoples have made to the American culture. Emphasis will be placed on how both compromise and conflict have played major parts in American history.
HIS 125	US HISTORY FROM 1865 TO 1945	3	College of Humanities and Sciences	This course examines U.S. social, political, and economic events between 1865 and 1945. Students will learn to appreciate the significance of key historical events and figures, including the rise of big business, urbanization, World War I, the Great Depression, and World War II. This course equips students with a general understanding of how important historical events impact future development of the United States.
HIS 135	THE AMERICAN EXPERIENCE SINCE 1945	3	College of Humanities and Sciences	This course is an overview of the principal social, political, economic, and global events which have shaped the American experience since World War II. Understanding modern American history is a necessity in today's ever-changing world. This course aims to supply the tools for understanding current political, social, cultural, and economic problems in the US by applying an historical perspective to analyze contemporary issues.

HIS 265	HAWAII: HISTORY AND CULTURE	3	College of Humanities and Sciences	This is a survey course in the history of Hawaii from Polynesian origins to contemporary multi- cultural society. This course traces the impact of major events, historical figures, and cultures on the development of Hawaii; and considers the Hawaiian response to these forces.
HIS 276CA	GLOBAL CIVILIZATIONS 1400-1700	3	College of Humanities and Sciences	This course provides an overview of the establishment of world civilizations during the European Middle Ages through the 1700s. The principle social, cultural, political, economic, and global developments that influenced multiple civilizations during this period will be explored. The framework of this course will provide a societal understanding by applying historical perspectives to contemporary issues.
HIS 301	UNITED STATES CONSTITUTION	3	College of Humanities and Sciences	This course is a five-week introduction to the historical, political, philosophical, and economic roots of the U.S. Constitution. It first reviews the philosophical arguments of the Federalists and the Anti-Federalists, those that supported and opposed ratification of the Constitution. The course then examines milestone Supreme Court decisions and their evolving interpretations of the Constitution. This course focuses on the first ten amendments of the Constitution know as the Bill of Rights as well as later amendments and the issues of slavery and civil rights as seen through major court decisions.
HIS 305	CALIFORNIA STATE HISTORY	3	College of Humanities and Sciences	This course provides students with the political, economic, and social history of California. Topics include Pre-Columbian California; the early exploration and founding of California; the Gold Rush, the Railroad Era, and current challenges faced by the state.

HIS 311	NEVADA AND U.S. CONSTITUTION	3	College of Humanities and Sciences	This course is a study of the history and development of the Nevada and U.S. Constitutions, particularly during the 20th century. The historical, political, economic, and social foundations upon which the U.S. Constitution was built and the philosophies of the proponents and opponents of its adoption are analyzed. Selected provisions of the Nevada Constitution and, in particular, Article 1 of the Declaration of Rights are also analyzed.
HIS 335	EUROPE AND THE WORLD WARS	3	College of Humanities and Sciences	This course discusses the causes and history of World War I, the interwar era, and World War II, with a particular emphasis upon social, political, and economic developments during the period.
HIS 341	ANCIENT WORLDS	3	College of Humanities and Sciences	This course provides students with the opportunity to study the historical and cultural developments of Ancient Worlds including Egypt, Greece, and Rome.
HIS 356	THE HISTORY OF AFRICA	3	College of Humanities and Sciences	This course examines the events and processes leading up to the colonization of Africa, and the subsequent changes in African society under colonial rule and after independence.

HIS 510	AZ CONSTITUTION	1	College of Education	This course provides an overview of Arizona history from its preterritorial days to the present. Participants examine the original intent and current influence of the Arizona Constitution and the constitutional issues impacting Arizona. The organization of Arizona schools, including funding, is addressed.
HIS 511	U.S. CONSTITUTION	1	College of Education	This course is a study of the creation, application, and viability of the United States Constitution. Participants examine the Constitution's historical and philosophical origins to better understand its original intent, evolution, and current usage, specifically through its interpretation in changing social and political climates. Emphasis is on the Constitution's influence on education in the United States.
HIT 300	INTRODUCTION TO HEALTH INFORMATION TECHNOLOGY	3	College of Information Systems and Technology	This course provides an overview of the history of health information technology in the United States. The student is introduced to the various forms of technology resources commonly found in private and public health sectors. This includes the historic application of information technology resources to healthcare.
HIT 350	HEALTH INFORMATION SYSTEMS SUPPORT	3	College of Information Systems and Technology	This course covers computer systems and the role of IT support in today's health care environment. This includes the installation and maintenance of Health IT Systems relating to hardware, software, programming, database management, and telecommunications.

HIT 400	ELECTRONIC HEALTH RECORDS MANAGEMENT	3	College of Information Systems and Technology	This course covers Electronic Health Records (EHR) Management. Content includes governmental regulations, patient information management, and system integration. Coursework explores configuring EHRs, addressing vendor-specific systems, and the fundamentals of health workflow process analysis.
HIT 450	IMPLEMENTATION AND MANAGEMENT OF HEALTH INFORMATION SYSTEMS	3	College of Information Systems and Technology	This course covers IT project management knowledge utilized in health care business operations. Coursework explores the application of technology planning, management, and leadership skills for working in Health Information Systems environments.
HLTH 510	Health and Nutrition for Educators	3	College of Education	This course provides an overview of health and nutrition education for the K-12 classroom teacher. Topics include wellness and nutrition, cardiovascular health and exercise, stress management, the use and abuse of alcohol, tobacco, and drugs, and sexually transmitted diseases. Participants assess personal health habits through health assessments and reflections. Plans and resources for sharing important health and nutrition information with students are also explored.
HM 370	HOSPITALITY MANAGEMENT	3	School of Business	This course provides an overview of the fundamental concepts that make up the hospitality industry. Students will gain a current perspective and understanding of the impact of travel and tourism while examining hospitality issues, trends, e-business implications, and operational structures.

HM 475	HOSPITALITY DECISION ANALYSIS	3	School of Business	This capstone course integrates the principles and concepts of hospitality operations management. Upon completion of this course, students will be able to prepare a service delivery model, conduct financial analyses, and develop sales and marketing strategies within a hospitality. organization.
HM 476	HOSPITALITY DECISION ANALYSIS APPLIED CAPSTONE	3	School of Business	This applied capstone course integrates the principles and concepts of hospitality operations management. Upon completion of this course, students will be able to prepare a service delivery model, conduct financial analyses, and develop sales and marketing strategies within a hospitality organization.
HM 482	HOSPITALITY ANALYTICS FOR DECISION MAKING	3	School of Business	This course enables a student to extract meaningful information from hospitality data, to better position the hospitality enterprise for success in the marketplace. Topics to be covered include an introduction to data analysis skills for the hospitality industry, market segmentation, understanding measures of business performance, hospitality analytics (events, travel, tourism), and property analytics (hotel, CHIA).
HPE 270	PHYSICAL EDUCATION AND HEALTH FOR EDUCATORS	3	College of Education	This course will help students identify the importance of a healthy lifestyle with the knowledge of human movement and motor skills. Students will explore the principles of exercise science and its impact on health, while developing self-confidence and self-worth. This course also defines and provides a context for the classroom teacher to teach and assess K-8 students in the area of physical education and health based on state and national standards. This course includes framework-based teaching strategies effective in helping K-8 students develop a variety of motor skills and abilities, recognize the importance of a healthy lifestyle and the goals of lifelong health, gain knowledge of human movement, understand growth and development, and learn the rules and strategies of games and sports. Instructional approaches for the integration of physical education and health with other content areas are explored.

HPE 540	TEACHING AND LEARNING IN HEALTH PROFESSIONS EDUCATION	3	College of Health Sciences and Nursing	This course focuses on selecting and developing teaching strategies to facilitate student learning in health professions education contexts. Principles of adult learning provide the basis for developing and utilizing effective methods for different student learning styles and instruction modalities.
HPE 544	CURRICULUM DEVELOPMENT IN HEALTH PROFESSIONS CONTEXTS	3	College of Health Sciences and Nursing	This course will focus on health administration curriculum design in higher education and/or corporate settings. The learner will propose a program concept, develop its mission and vision, and create its program and course objectives. Topics also include the ADDIE model, curriculum mapping, and implementation plans.
HPE 549	EVALUATION AND ASSESSMENT METHODOLOGIES	3	College of Health Sciences and Nursing	This course will focus on best practice strategies for assessment and evaluation of health professions education programs. Rubric creation and collection and utilization of program/course feedback in higher education and corporate settings will be discussed.
HRCEU 1000	COACHING ESSENTIALS	0.6	School of Continuing Education	Business leaders are expected to help their team meet or exceed expectations by driving productivity and profitability for the organization. Coaching is a leadership tool used to improve performance and contribute to achieving the goals of the organization. In this course, students will explore the benefits of coaching, coaching approaches, how to develop an action plan, and methods for ensuring the coaching process is successful. This course provides 0.6 continuing education units in one, 6-hour workshop.

HRCEU 2000	WORKING WITH A GENERATIONALLY-DIVERSE WORKFORCE	0.6	School of Continuing Education	Human resource professionals communicate with a multigenerational workforce across all levels of an organization. Having a foundational knowledge of the behavioral characteristics of different generations is important to your success as an HR professional. Learners will gain an understanding of the generational differences, adapt their communication and work styles, and apply conflict intervention and resolution practices. This course provides .6 continuing education units, in one - 6 hour workshop.
HRCEU 2220	CHANGE MANAGEMENT	0.6	School of Continuing Education	Critical to any organization's success is the ability to facilitate effective change. The ability to effectively manage and adapt to change requires an understanding of various levels of change and methods of bringing about change. This course explores the fundamentals of change management and how it is of benefit to organizations in an era of constant transformation. Students will learn the steps of the change process, obstacles to change, strategies used to manage and adapt to change, as well as how to address the uncertainty that change brings about in order to move others forward. This course provides 0.6 continuing education units in one, 6-hour workshop.
HRM 300	FUNDAMENTALS OF HUMAN RESOURCE MANAGEMENT	3	School of Business	This course explores the critical role of human achieving resources in business results. The course will help students to have a solid understanding of the fundamentals of human resource management and its strategic relevance in business today. This course will provide students with a critical perspective on the development of human capital in the context of a unified system of attracting, retaining and developing talent that creates and supports the vision and values of the organization. Students will develop an understanding of the critical business implications for human resource professionals today.
HRM 310	CHANGE MANAGEMENT	3	School of Business	This course examines both the human and organizational aspects of change. Topics include identifying the types and sources of change, human and organizational resistance to change, theories of managing change, and developing skills that will enable the student to lead, implement, and sustain change.

HRM 324	TOTAL COMPENSATION	3	School of Business	This course explores topics in basic total compensation design and decision-making. It will provide the student with knowledge and skills required for planning, developing, and administering total compensation programs that are compliant with government laws and regulations. Topics include: wage decisions, budgeting, benefits, incentive plans, and retirement plans.
HRM 326	EMPLOYEE DEVELOPMENT	3	School of Business	This course explores the role and relevance of employee development in today's business environment. This course will also provide students with a thorough understanding of the legalities impacting employee development, the strategic role that employee development plays in an organization, and the impact education has on employee motivation. The course will also explore methods of program design, development, and assessment.
HRM 350	INTERNATIONAL HUMAN RESOURCE MANAGEMENT	3	School of Business	This course is an overview of international human resources management practices with emphasis on human resources challenges and opportunities facing global business enterprises. Students will examine human resources management in the global business environment. Upon completion of this course, students will be able to identify, and evaluate global HR strategies and practices to increase organizational effectiveness and efficiency.
HRM 420	HUMAN RESOURCE RISK MANAGEMENT	3	School of Business	This course introduces students to risk management in a human resources department context. The course introduces basic risk management concepts that the student can apply to HR responsibilities of an organization to avoid or mitigate potential liabilities. Topics will health and safety, security, crisis management, legal compliance, employment and discrimination issues.

HRM 498	STRATEGIC HUMAN RESOURCE MANAGEMENT AND EMERGING ISSUES	3	School of Business	This course focuses on strategic HR management and key issues that are opportunities and challenges for the HR function. The course explores how to align human resource management (HRM) with business strategies, and the emerging issues facing business. Students will evaluate the HRM competencies and leadership skills needed for a strategic HRM plan. Students will examine what strategic HRM planning is and how to do it, as well as learning how to manage the necessary change in emerging business environments. The course will define the new roles and expectations of companies for the HRM functions.
HRM 531	HUMAN CAPITAL MANAGEMENT	3	School of Business	This course prepares students to address the concepts of personnel development as managers. Students learn criteria for developing effective job analysis, appraisal systems, and appropriate career development plans for employees. Other topics include personnel selection, employee compensation, benefits, training, workplace diversity, discipline, employee rights, unions, and management behaviors.
HRM 546	HUMAN RESOURCE LAW	3	School of Business	This course prepares human resource managers to comply with human resource laws and regulations across all jurisdictions. Students learn how to manage human resource functions within a regulatory environment. Other topics include laws and regulations related to the following: workforce planning and employment, human resource development activities, compensation and benefits, labor relations, and workplace safety.
HRM 548	RECRUITMENT AND RETENTION PRACTICES	3	School of Business	This course prepares students to evaluate and develop a a workforce to attain organizational goals. Students learn to develop total reward strategies that attract and retain the best employees. Other topics include recruitment strategies, workforce planning and assessment, relocation practices, right sizing, negotiation, employment policies, and global compensation practices.

HRM 552	ORGANIZATIONAL TRAINING AND DEVELOPMENT	3	School of Business	This course applies development and training concepts to enhance organizational performance. Students develop an employee engagement strategy. Other topics include training program development & delivery, employee relations, organizational development theories and applications, behavioral issues, and performance management.
HRM 558	RESEARCH IN HUMAN RESOURCE MANAGEMENT	3	School of Business	This course applies research methods to human resource functions. Students learn to use quantitative analysis and secondary research to recruit and select employees to meet organizational goals. Other topics include forecasting, evaluation of selection tests, application of selection tests, interviewing techniques, techniques to assess training program effectiveness, job evaluation methods, and external labor market analysis.
HRM 595	HUMAN RESOURCE CAPSTONE COURSE	3	School of Business	This content area capstone course applies human resource concepts to improve organizational effectiveness within the framework of employment laws and regulations. Students apply existing professional standards and theories to human resource management. Other topics include the alignment of human resource strategy with the organization, global workforce planning, career and leadership development, and performance analysis and appraisal.
HRM PA533	HUMAN CAPITAL DEVELOPMENT IN THE PUBLIC SECTOR	3	College of Criminal Justice and Security	This course prepares students to apply human capital development concepts in a public sector. Students will create plans for managing human capital in a public and political environment. Other topics, at the state and local level, include recruitment, development & retention of employees, compensation, motivation, performance evaluation, employee/employer relationship, personnel policies & politics, and public service ethic, union management relations, employee/employer relations.

HRTP 2000	SHRM-CP (TM)/SHRM-SCP (TM) CERTIFICATION PREPARATION	4	School of Continuing Education	In today's ever-changing workplace, human resource professionals are assuming more responsibilities in organizations and contributing to the achievement of strategic goals by hiring and retaining talented employees. Whether you are seeking certification, recertification, or professional development opportunities, the SHRM-CP (TM)/SHRM- SCP (TM) certification preparation course offers accelerated and comprehensive training on the Body of Competency and Knowledge (SHRM BoCK (TM)), focusing on the People, Organization, Workplace, and Strategy knowledge domains. The course also covers the eight behavioral competencies for human resources professionals: Leadership & Navigation, Ethical Practice, Business Acumen, Relationship Management, Consultation, Critical Evaluation, Global & Cultural Effectiveness, and Communications. Students will gain or improve human resources knowledge and skills by using practical and real-life information, online assessments and practice tests, and creating a personal study plan, through the use of the SHRM Learning
HS 205	HUMAN SERVICE HELPING PROCESS AND SELF-CARE	3	College of Social Sciences	This course overviews the foundations of human services as the field applies to community assistance and support. Student will identify the skills necessary to help people. Emphasis will be placed on developing healthy relationships with clients, identifying, and improving helping skills. Student will examine techniques of self-care and support for the human service worker, to include stress management, crisis and shock techniques and ways to not internalize some of the difficult work of human service professionals.
HS 215	INTRODUCTION TO THE HUMAN SERVICES PROFESSION	3	College of Social Sciences	This course focuses on the depth in which the human service profession affects our nation's communities. Student will define what community is and outline the needs of communities related to children, seniors and families as a whole. Special attention will be given to events that shaped human services in the last 20 years.
HS 225	INTRODUCTION TO CASE MANAGEMENT AND HELPING STRATEGIES	3	College of Social Sciences	This course assists in the discovery process of case management and what it means to help. Students will gain a better understanding of the roles, responsibilities, and the planning required in successfully managing caseloads involving clients. Students will deepen their perception of what it means to intervene, monitor and react to behaviors, successfully implement problem solving techniques, and the differences between giving advice and rendering action plans to human service clients.

HS 235	PUBLIC POLICY, SOCIAL WELFARE, AND RESEARCH	3	College of Social Sciences	This course describes the task of assessing needs in a community. Students will learn the meaning and perception of the term welfare and examine national and state data to understand the tenets of need, and how communities are charged with helping individuals navigate through program requirements and guidelines. Students will review public policy as it relates to welfare. A final research activity will be completed to show student comprehension of these complex topics.
HS 245	FUNDAMENTALS OF WORKING WITH PEOPLE	3	College of Social Sciences	This course is designed to provide students an overview to understand the multi-tiered outlook required to effectively understand people. Emphasis will be placed on the notion of people being different, and one solution does not fit everyone. Students will evaluate how race, gender, social class and religious contexts influence a person's ability to accept help. Students will have an opportunity to look at their own biases and develop methods to not use bias while working with special populations.
HS 255	HUMAN SERVICE CAPSTONE COURSE	3	College of Social Sciences	This course is a culmination of the human services program content, integrating students' education and experiences from previous courses. Students will construct a portfolio to include a personal philosophy as it relates to their desire to work in human services, a summation of how needs are assessed in communities, what was learned during human service agency and community observations, a case management case study synopsis, and a mission statement and executive summary of the personal understanding of the helping profession and people.
HSM 210	HUMAN SERVICES IN THE UNITED STATES	3	College of Social Sciences	This course is a foundation for studies of human services in the United States. It provides an overview of the evolution of American human services delivery systems, including historical perspectives, as well as current and future trends. It covers the role of human services workers, how needs are determined and met, and factors that affect the delivery of services such as theoretical perspectives, social policies, and government regulations. Community advocacy, prevention techniques, contemporary issues, and careers in the human services industry are also examined.

HSM 220	HUMAN SERVICES ADMIN: SO YOU WANT TO HELP PEOPLE	3	College of Social Sciences	This course discusses the roles and responsibilities of administrators in human services organizations. It covers recent studies related to the changing contests of human services delivery, leadership, organizational culture, human resource management, financial management, strategic planning, working with boards, marketing and public relations, social entrepreneurship, partnership, and collaboration.
HSM 230	ETHICAL ISSUES IN HUMAN SERVICES ORGANIZATIONS	3	College of Social Sciences	This course explores the legal and ethical environments of human service organizations. Students consider tools and traditions for ethical decision-making, the role of the leader, and the role of organizational culture in sustaining a moral vision, and the design of and need for legal and ethical oversight. Students analyze current ethical and legal dilemmas and controversies through case studies and debate.
HSM 240	PUBLIC POLICY DEVELOPMENT IN HUMAN SERVICES	3	College of Social Sciences	This course focuses on the formation and execution of public policy and programs by government and private organizations within human services. Emphasis is placed on evaluative and analytical approaches for determining positive and negative characteristics of policies and programs. Students will learn to analyze and critique organizations and the policies and programs within those organizations.
HSM 260	FINANCIAL MANAGEMENT FOR HUMAN SERVICE MANAGERS	3	College of Social Sciences	This course focuses on the conceptual understanding and practice of financial management as it applies to human service agencies. Students complete the course with a better understanding of basic accounting concepts, budgets and budgeting systems, how to create performance measures, and the ability to analyze financial statements for the purpose of cost analysis and forecasting. Aspects of setting fees, funding and risk management are also covered.

HSM 270	PROGRAM PLANNING AND GRANT PROPOSAL WRITING IN HUM SERV	3	College of Social Sciences	This course provides practical knowledge in program planning, grant proposal writing, and program evaluation. Students will examine the planning process from conceptualization to implementation and evaluation. Also discussed is how to locate private and public funding for human service programs and agencies.
HSN 300	PHARMACOLOGY I	4	College of Health Sciences and Nursing	This course examines the registered nurse's role in safe medication administration. Students develop skills and techniques for calculating medication dosages and interpreting physician orders, medical records, and medication labels. Patient education is also addressed.
HSN 301	PHARMACOLOGICAL INTERVENTIONS I	3	College of Health Sciences and Nursing	This course examines the registered nurse's role in medication management, reconciliation, education, and safety.
HSN 310	PHARMACOLOGY II	4	College of Health Sciences and Nursing	This course builds on the knowledge and skills of Pharmacology I. This course provides basic pharmacological principles and therapeutics of medications. The course emphasizes evidence- based treatment guidelines in the application of pharmacology to nursing practice with a focus on safe patient care.

HSN 311	PHARMACOLOGICAL INTERVENTIONS II	3	College of Health Sciences and Nursing	This course builds on the knowledge and skills acquired in Pharmacological Interventions I. Complex patients, genetics and genomics, and the use of complementary and alternative medications are examined.
HSN 376	HEALTH INFORMATION TECHNOLOGY FOR NURSING	3	College of Health Sciences and Nursing	This course examines electronic modalities that assists in patient-centered health care management. Topics include informatics, automation of data management, and evaluation of information systems. A key focus is the relationship between technology in health care delivery and patient safety.
HSN 470	HEALTH POLICY, LAW, AND ETHICS	3	College of Health Sciences and Nursing	This course examines the interrelationships of legal decisions, health policy development, legislation, and regulation in the context of contemporary issues to the RN generalist role. Students will analyze legislative impact on nursing practice, ethical issues, ANA Code of Ethics and regulatory governance.
HSN 471	POLICY, LAW AND ETHICAL CONSIDERATIONS	2	College of Health Sciences and Nursing	This course examines legal and ethical decision making, health policy development, legislation, and regulation in the context of nursing practice.

HSN 476	HEALTHCARE POLICY AND FINANCIAL MANAGEMENT	3	College of Health Sciences and Nursing	This course examines the nurse's role as a leader in healthcare. Topics include financial and resource management, cost controls, fiscal responsibility, and healthcare policies and reform. A key concept is the interrelationship among health policy, legislation, regulation, finance, and practice.
HSN 525	RESEARCH METHODOLOGIES FOR THE NURSE ADMINISTRATOR	4	College of Health Sciences and Nursing	This course introduces the role of the nurse administrator in health care organizations. Topics include organizational theory, performance, and structure; change management; systematic processes; and human resource management. This course requires 20 hours of clinical practicum.
HSN 548	ROLE OF THE HEALTH CARE/NURSING EDUCATOR	3	College of Health Sciences and Nursing	Responsibilities of faculty within various higher education settings are explored. Trends and issues that impact the educator role within changing health care and educational environments are discussed. Topics such as technological, legal, ethical, and professional dynamics are included.
HSN 555	HUMAN RESOURCES IN HEALTH CARE	3	College of Health Sciences and Nursing	This course examines principles of human resource management and personnel development needs in health care organizations. Topics include job analysis, appraisal systems, employee development and evaluation, forecasting of workforce needs, and legal considerations. This course requires 20 hours of clinical practicum.

HSN 560	ORGANIZATIONAL SYSTEMS AND INFORMATICS	3	College of Health Sciences and Nursing	This course focuses on the integration of informatics in health care organizations. Topics include organizational effectiveness, systems management, and ethical considerations in data management. This course requires 20 hours of clinical practicum.
HSN 565	ORGANIZATIONAL CHANGE AND NEGOTIATION	3	College of Health Sciences and Nursing	The course examines the role of the nurse leader during organizational change. A key focus is the effect of change on health care delivery. Topics include principles and models of change, communication skills, and allocation of organization resources. This course requires 20 hours of clinical practicum.
HSN 570	FINANCIAL RESOURCE MANAGEMENT	3	College of Health Sciences and Nursing	This course examines financial resource management as used in health care organizations. Topics include budgeting, financial forecasts, analysis of financial performance, and business plan design. This course requires 20 hours of clinical practicum.
HSN 575	QUALITY MANAGEMENT AND OUTCOMES	4	College of Health Sciences and Nursing	This course focuses on quality management initiatives for improving health care delivery outcomes. Topics include models and theories of quality improvement, evaluation methods, and regulatory and accreditation standards. This course requires 20 hours of clinical practicum.

HSN 590	ADVANCED PHARMOCOTHERAPEUTICS	3	Non-College Specific	This course is designed to provide the nursing student with the information and skills to initiate and monitor drug therapy. This course will integrate advanced knowledge regarding the clinical application of pharmacology and pharmacokinetics, techniques and methods of drug prescribing, approaches to data collection, and problem solving with discussions about drug therapy for common acute and chronic diseases. Emphasis will be on the practical application of important concepts used in clinical practice for clients across the lifespan.
HST 155	U. S. HISTORY TO 1865	3	College of Humanities and Sciences	This course provides an overview of the social, political, economic, and global events that have shaped the American scene from colonial times through the Civil War period.
HST 165	U. S. HISTORY 1865 TO 1945	3	College of Humanities and Sciences	This course provides an overview of the social, political, economic, and global events affecting U.S. history from the Civil War through World War II.
HST 175	THE AMERICAN EXPERIENCE SINCE 1945	3	College of Humanities and Sciences	This course is an overview of the principle social, political, economic, and global events which have shaped the American experience during the Cold War Era.

HST 206	LATIN AMERICA	3	College of Humanities and Sciences	This course provides an historical survey Latin America with emphasis on political, economic and social developments, and international relations.
HST 275	GLOBAL CIVILIZATIONS TO 1500	3	College of Humanities and Sciences	This course surveys the establishment of civilizations throughout the world to the 1500s. Emphasis is on the principle social, cultural, political, economic, and global developments that influenced multiple civilizations.
HST 276	GLOBAL CIVILIZATIONS SINCE 1500	3	College of Humanities and Sciences	This course surveys global civilizations from Africa and the Americas to Eurasia to explore changes in communication, communities, demography, economics, environment, politics, religion, technology, warfare, and women.
HST 290	HISTORIANS AND HISTORY	3	College of Humanities and Sciences	This course introduces the study of history as a scholarly discipline emphasizing significant historians, sub-disciplines of the field, and the foundational methodological and theoretical tools of historians for History majors.

HST 320	HISTORY RESEARCH METHODS	3	College of Humanities and Sciences	This course focuses on research methods used in historical research and writing, and application of theories and methodologies to the analysis of historical materials. Emphasis is placed on research, writing, and critical thinking in historical contexts. For History majors only.
HST 409	AMERICAN REVOLUTION	3	College of Humanities and Sciences	This course examines the American Revolutionary period from 1763 to 1789. Emphasis is on the political, economic, social, and cultural history of the American Revolution, the military course of the war, the political administration of the conflict, and the cultural impact on all Americans; concluding with the development of the Constitution.
HST 498	HISTORY CAPSTONE	3	College of Humanities and Sciences	This capstone experience focuses on demonstrating history as a mode of discourse. Emphasis is placed on producing a capstone project that employs historical content, evidence, interpretation, and judgment using research methods, application of theories, critical reasoning, and precise historical writing. For History majors only.
HTT 201	INTRODUCTION TO HOSPITALITY	3	School of Business	This course is an overview of the history, current trends, and general organizational structure of the hospitality industry. Additionally, the course covers topics such as recreational entertainment, economic impact of hospitality, and service standards. The course also gives students the opportunity to examine careers in tourism, foodservice, and lodging industries.

HTT 211	HOSPITALITY, TRAVEL, AND TOURISM, SUPERVISION	3	School of Business	This course introduces the tourism industry and its major components such as the travel mart, surface travel, air travel, business travel, cruises, and recreation. It covers current issues in tourism and their effect on the hospitality industry as a whole including economic, political, and cultural forces, and quality of life impacts on host locals. Career opportunities within travel and tourism are also discussed.
HTT 221	IT IN HOSPITALITY	3	School of Business	This course explores the impact of information and communications technology on the structure and operations of the hospitality, travel, and tourism industry. It covers topics dealing with the interaction between consumers, intermediaries, operatives, and management through rapidly changing technologies. Effects on service quality, productivity, efficiency, and profitability will be examined.
HTT 231	FINANCE FOR HOSPITALITY PROFESSIONALS	3	School of Business	This course focuses on conceptual awareness and practice of financial management as it applies to hospitality, travel, and tourism industries. It covers the basics of accounting, budgets and budgeting systems, performance measures creation, and financial statement evaluation for the purpose of cost analysis and planning. Aspects of setting prices, funding, and risk management are also covered.
HTT 241	FOOD AND BEVERAGE MANAGEMENT	3	School of Business	This course integrates the basic concept and practical skills related to foodservice operations, from the front office to the kitchen. It covers basic principles of purchasing and cost management of food and beverage, as well as menu planning, institutional food service, and quality control.

HTT 251	HOSPITALITY OPERATIONS	3	School of Business	This course studies the lodging industry, its history, growth, development, and future direction. It covers front office procedures and interpersonal dynamics from reservations through the night audit. The course also examines career opportunities in lodging and resorts.
HUM 105	WORLD MYTHOLOGY	3	College of Humanities and Sciences	This course provides an overview of mythology and its relationship to ancient cultures and culture today. The course covers the purposes and types of myths; development of myths and mythological characters; the common elements of mythological structures; the predominant characteristics of heroes in myth; the conflicts heroes encounter, and how ancient heroes relate to heroes today.
HUM 111	CRITICAL AND CREATIVE THINKING	3	College of Humanities and Sciences	This course focuses on developing the critical and creative thinking skills necessary to analyze and solve problems, make decisions, implement strategies, and formulate well supported points of view on key academic, social, and professional issues. The principles of creative thinking are essential to critical thinking skills. Students will learn how to evaluate their ideas and how to communicate their points of view persuasively.
HUM 115	CRITICAL THINKING IN EVERYDAY LIFE	3	College of Humanities and Sciences	Students learn how to think critically, focusing on developing the necessary tools and skills to analyze problems, make decisions, and formulate well-supported points of view on key academic, social, and professional issues.

HUM 130	RELIGIONS OF THE WORLD	3	College of Humanities and Sciences	This course studies the major religions of the world. Topical areas include Buddhism, Christianity, Confucianism, Hinduism, Indigenous Cultures, Islam, Judaism, and Taoism. Students will be objectively studying the origins and major figures and comparing and contrasting each of the major religions.
HUM 150	INTRODUCTION TO FILM STUDIES	3	College of Humanities and Sciences	Introduction to Film Studies is designed to provide students with an overview of film history and the skills necessary to analyze and critique film. Students will learn about film theory, aesthetics, genres, and basic film criticism. Students will analyze film through an examination of cinematography, editing, acting, scenes, and sound to allow students to view films critically, to develop a systematic and convincing interpretation of the films they watch, and to acquire the ability to analyze films in well-constructed and persuasive essays.
HUM 176	MEDIA AND AMERICAN CULTURE	3	College of Humanities and Sciences	The course provides an introduction to the most prominent forms of media that influence and impact social, business, political, and popular culture in contemporary America. It explores the unique aspects of each medium as well as interactions across various media that that combine to create rich environments for information sharing, entertainment, business, and social interaction in the U.S. and around the world.
HUM 186	MEDIA INFLUENCES ON AMERICAN CULTURE	3	College of Humanities and Sciences	The course provides an introduction to the most prominent forms of media that influence and impact social, business, political, and popular culture in contemporary America. It explores the unique aspects of each medium as well as interactions across various media that combine to create rich environments for information sharing, entertainment, business, and social interaction in the U.S. and around the world.

HUM 300	THE GLOBAL VILLAGE	1	College of Humanities and Sciences	This course is an overview of the humanities in the twentieth century. The course covers the fine arts, war, philosophy, and social movements reflecting the developments of the information age as it moves to the communication age.
HUM 375CA	INTEGRATIVE STUDIES	3	College of Humanities and Sciences	This course introduces students to the concept of integrative study, which involves connecting the liberal arts to multiple subject education and integrating disciplines through the curriculum development process. Emphasis is placed on thinking critically and creatively about the relationships that exist among the disciplines of language arts, art, physical education, math, social studies, and science.
IM 300	DATA ORGANIZATION ARCHITECTURE	3	College of Information Systems and Technology	This course provides an introduction to how data is architected and organized. It discusses the different data models used to store data, outlines several schemas that drive how data is structured, and provides other database concepts relating to the design and architecture of data.
IM 305	DATA MODELING	3	College of Information Systems and Technology	This course provides an in-depth look at several intermediate design and architecture concepts. The course covers the design method used in the creation of a relational database, the required steps to reengineer a database, and several tools and techniques used through the database design process.

IM 310	DATA ANALYTICS AND MODELING	3	College of Information Systems and Technology	This course will introduce students to data analytics and modeling through contemporary business tools. Students will examine how data is architected and organized. After completion of this course, students will be able to understand the different data models used to store data, several schemas that drive how data is structured, and provide other database concepts relating to the design and architecture of data.
IND 701	INDEPENDENT STUDY I	3	School of Advanced Studies	The content and assessment of independent study courses will be determined via a learning contract between the learner and a requested faculty member. This learning contract will be forwarded to the program's chair for review. Independent studies can be either concept or methods-based, and regardless of content they must culminate with the development of a major project that demonstrates learning at the doctoral level. Examples of major projects include publication-quality papers, complete chapter drafts of the dissertation proposal, or other rigorous demonstrations of learning.
INTNETWKSP	INTRO TO THE INTERNET	0	Non-College Specific	This is not an actual course. It is entered as a means of scheduling a non-academic activity.
IOP 455	PROFESSIONAL ETHICS	3	College of Social Sciences	This course will use APA and SHRM guidelines to explore ethical dilemmas and organizational responses to these issues. Topics will include the law and personnel management, crisis/public relations management and ethical decision- making. Students will analyze case studies related to these issues.

IOP 460	ORGANIZATIONAL CULTURES	3	College of Social Sciences	This course provides students with the concepts of different types and ecosystems of organizations: corporate giants, non-profit service providers, leading edge start-ups and military and governments. The course examines competing organizational dynamics including structural, human relations, political, and symbolic. Topics include types and characteristics of organizations, learning organizations, and dealing with organizational ambiguity and complexity.
IOP 470	GROUP DYNAMICS	3	College of Social Sciences	This course is designed to give students an understanding of group dynamics and small group processes. Topics explored include power, perception, motivation, leadership, decision-making, and team-building. The learning team concept will be utilized to examine many concepts of group dynamics in an organizational setting.
IOP 480	ASSESSMENT TOOLS FOR ORGANIZATIONS	3	College of Social Sciences	This course will examine various assessment methodologies currently used in the industry to assess organizational talent, leadership, and culture. Some assessment which will be covered in this course include DISC and 360 Evaluation. Analyses of organizational assessment tools and results will help students recognize the usefulness of these tools and their application in an organization. Exploration in talent management, organizational, cultural, and leadership assessments will be used in various assignments to assess student learning.
IOP 490	CAPSTONE PROJECT	3	College of Social Sciences	This course is designed to prompt reflection and focus on the entire program learning experience. Students will integrate core concepts learned throughout the program and will demonstrate proficiency with these concepts in a final project.

ISCOM 305	SYSTEMS OPERATIONS MANAGEMENT	3	School of Business	This course outlines the main components of effective systems operations management. This includes effectively managing data collection, inventory optimization, operational procedures, information technology resources, and operational components for effective decision making.
ISCOM 361	PURCHASING AND PROCUREMENT	3	School of Business	This course addresses the relationship between supply chain management and procurement. This includes overview of both the procurement process and commodity markets. Students will address procurement from a strategic perspective as well as at the operational level.
ISCOM 370	STRATEGIC SUPPLY CHAIN MANAGEMENT	3	School of Business	This course will provide an overview of the strategic elements and functional relationships within manufacturing and service supply chains. Emphasis is placed on the integration of strategic planning, sourcing, operations, and logistics to achieve a sustainable competitive advantage.
ISCOM 374	INTEGRATED LOGISTICS MANAGEMENT	3	School of Business	This course prepares students to strategically plan, implement, and control the efficient and effective flow and storage of goods, service, and related information from a point-of-origin to a point-of-consumption. This course also focuses on transportation, inventory management, warehousing, and customer services.

ISCOM 383	GLOBAL VALUE CHAIN MANAGEMENT	3	School of Business	This course describes value chain activities between buyers and sellers in international business. Emphasis is placed on global sourcing, procurement of materials and services, and on business-to-business cultural differences between countries.
ISCOM 385	INVENTORY AND MATERIALS MANAGEMENT	3	School of Business	This course provides an overview of the strategic role that inventory plays in the modern logistics environment. Topics include inventory models, regulations, outsourcing, material handling, procurement, continuous improvement, inventory control, and measuring inventory productivity.
ISCOM 386	SERVICE OPERATIONS MANAGEMENT	3	School of Business	The course presents structured techniques for evaluating operating efficiency and effectiveness in the service sector. Special emphasis is placed on key service principles. Students learn how to manage service operations through a series of case studies and applications, inventory control, waiting time management, project management, site selection, performance evaluation, and scoring systems.
ISCOM 424	END-TO END SUPPLY CHAIN MANAGEMENT	3	School of Business	This course prepares students to be effective managers in end-to-end supply chain management. This refers to tracking all segments of the supply chain beginning with capturing customer requirements to customer consumption and disposal. Special emphasis is placed on enhancing supply chain efficiencies through problem-solving methodologies including Six Sigma, Lean management. Students will also apply the principles of Supplier Relationship Management (SRM) and Customer Relationship Management (CRM) to make effective end-to-end supply chain decisions.

ISCOM 472	LEAN ENTERPRISE	3	School of Business	This course provides an overview of lean manufacturing practices within a company and its supply chain. It addresses fundamental practices including flowcharting of business processes, collection, and analysis of process performance data and the removal of those activities that are determined to be wasteful or non-essential.
ISCOM 473	GLOBAL SOURCING AND PROCUREMENT	3	School of Business	This course introduces students to the changing world of purchasing and its relationship to supply chains. It addresses purchasing operations and structures, strategic sourcing processes and the critical supply chain elements of managing supply chain inventory, information systems, as well as performance measurement and evaluation.
ISCOM 476	INTEGRATED SUPPLY CHAIN APPLICATIONS	3	School of Business	This course introduces students to the importance of a strategic plan and its interaction with, and impact on, supply chain applications. Students will understand the processes of supply change creation and improvement, and as a result, the effects it has on competition. Students will be able to select and apply a set of metrics to the supply chain which demonstrate performance standards are achieved.
ISCOM 480	SUPPLY CHAIN MANAGEMENT CAPSTONE	3	School of Business	This supply chain management capstone course is designed for students to synthesize both the theoretical and practical skills they have learned throughout the program in a collaborative capstone project using case analysis and scenarios to address supply chain management challenges. Students will develop a plan for adding value to the management of the supply chain by focusing on logistics, purchasing, quality processes, and ethical and global considerations.

IST 710	FOUNDATIONS OF INFORMATION SYSTEMS MANAGEMENT	3	School of Advanced Studies	This course surveys the major content areas of information systems management that will be examined at various organizational levels of the Information Systems and Technology Specialization of the Doctor of Management program. The major content areas (IT domains) to be surveyed include information technology management, networking, Web, database, programming, and systems development. Upon completion of this course, the learners will be prepared to analyze, define, and research the unique management considerations of each domain within various organization levels.
IST 721	KNOWLEDGE WORKER INFORMATION SYSTEMS	3	School of Advanced Studies	In this course, the learner will research and evaluate the information systems and technology tools necessary to support the individual knowledge worker in today's environment. This analysis of the systems and tools will be conducted from the viewpoint of the program domains and how the individual worker must be supported to create a productive and efficient environment. The scope of this course will include hardware and software product considerations for management.
IST 722	INFORMATION TECHNOLOGY FOR TEAMS	3	School of Advanced Studies	Learners in this course will further evaluate the application of the domains studied in IST/721 and how those domains are applied in a team setting. The application of the program domains will be examined in the context of support necessary to implement various organizational team models, ranging from co-located teams to geographically distributed virtual teams. Upon completion of this course, the learner will be prepared to define and analyze issues related to the management and support of information technology necessary for organizational teams' operations.
IST 723	DEPARTMENTAL INFORMATION SYSTEMS	3	School of Advanced Studies	This course will continue the analysis of the application of the domains used by individuals and teams studied in previous content courses. The student will evaluate the application of the program domains to departmental operations and strategy. The student will research and evaluate information systems support techniques, both internal and external to the departmental interfaces.

IST 724	ORGANIZATIONAL INFORMATION SYSTEMS MANAGEMENT	3	School of Advanced Studies	This course will build upon the considerations examined in the prior IST courses. Upon completion of this course, the learner will be prepared to evaluate and develop integrated strategies for the implementation of the IT domains within an organization.
IST 731	PARTNERSHIP AND INDUSTRY INFORMATION SYSTEMS	3	School of Advanced Studies	This course extends the learning from previous intra-company relationships to external IS organizational relationships. Upon completion of this course, the learner will be prepared to define, evaluate, and plan the application of IT domains that must be considered when developing partnerships and common industry relationships.
IST 732	GLOBAL INFORMATION SYSTEMS MANAGEMENT	3	School of Advanced Studies	This course extends the examination of the IT domains studied throughout the program to the global level. The learner will examine the application of the IT domains in the setting of a global economy and international business environment. The learners will be prepared to define the common IS management approaches for the development of business systems that can support global information systems requirements.
IST 733	INFORMATION SYSTEMS MANAGEMENT ARCHITECTURE	3	School of Advanced Studies	Upon completion of this course, learners will be prepared to manage and lead the analysis and planning of strategic and tactical information systems that address the considerations of all IST domains examined in the IST specialization courses. Additionally, this course will include an examination of potential dissertation topics from the domains and spectrum of organizational levels explored in this program.

IT 200	DIGITAL SKILLS FOR THE 21ST CENTURY	3	College of Information Systems and Technology	Digital Skills for the 21st Century is a course focus on the impact of digital technology on today's businesses, the economy, and society. Rapid advances in technologies are creating benefits and efficiencies for those businesses that recognize their advantages and pitfalls, and harness them to its advantages; those who can't are left behind with competitive disadvantages. Today's workforce need to understand these trends, recognize key differences among features and approaches of these technologies, and apply them effectively. Specific topics in this course includes cloud computing, unified communication platforms, cyber security, social media and mobile computing.
IT 205	MANAGEMENT OF INFORMATION SYSTEMS	3	College of Information Systems and Technology	This course introduces students to the world of information technology. Students will examine the technology concepts included in business systems, networking, and project management and explore the systems development life cycle. Specific topics for the course include: hardware components, software applications, operating systems, databases, programming, as well as the security, privacy, and safety issues associated with information technology.
IT 206	PC APPLICATIONS SUPPORT	3	College of Information Systems and Technology	This course will prepare students to support Microsoft Office applications. The student will learn the product features of Word, Excel, PowerPoint, Outlook and Access. This course is based on the requirements of the Microsoft Office Specialist certification.
IT 210	FUNDAMENTALS OF PROGRAMMING WITH ALGORITHMS AND LOGIC	3	College of Information Systems and Technology	This course provides students with a basic understanding of programming practices. Concepts covered include flowcharting, pseudocode methodologies, and an understanding of programming practices. Students will learn how these concepts, when properly applied, improve program design.

IT 215	JAVA PROGRAMMING	3	College of Information Systems and Technology	JAVA has rapidly become the language of choice for platform independent implementations. This course provides a general introduction to programming, data structures and object-oriented programming in particular. The syntax and semantics of the JAVA language are addressed, as well as related topics which include object- oriented programming concepts, terminology, and notation.
IT 218	INTRODUCTION TO C/C++	3	College of Information Systems and Technology	This course introduces the student to C/C++ programming. The syntax and semantics of the C/C++ programming language are used to produce simple computer programs.
IT 235	IMAGE EDITING AND IMPLEMENTATION	3	College of Information Systems and Technology	Design elements such as basic composition, style, use of color, textures, graphic manipulation, photographic re-touching and text/font design are introduced. File formats, sizing and packaging for export are covered in this class. Concepts such as pre-press production and printing are introduced. Imaging program, Adobe Photoshop Elements is required for this class.
IT 236	INTRO TO WEB DESIGN I	3	College of Information Systems and Technology	Introduction to web design concepts are taught, with an emphasis on producing viable web pages in a business and e-business contexts. Topics such as web page construction, layout, ease of navigation and performance are combined in the production of esthetically appealing web pages that implement artistic qualities in their use of style and color. The concept of XML coding and its linkage with HTML coded outputs are covered. The program, Macromedia Studio MX 2004 with Flash Pro MX 2004 Pro is used for the assignments in this class.

IT 237	INTRO TO WEB DESIGN II	3	College of Information Systems and Technology	Webpage creation using Hypertext markup language (HTML) will be employed. Focus will be on creating robust, well formatted, esthetically pleasing text-based web pages. Discussion of how to publish completed page to the web as well as advertisement of this page on the web will be covered.
IT 238	WEB SYSTEMS	3	College of Information Systems and Technology	This course builds upon a foundational understanding of Web design and examines professional Web development technologies. Topics include dynamic hypertext markup language (DHMTL), interactive technologies, advanced use of presentational technologies and Web 2.0. Emphasis is placed upon the appropriate use of Web programming tools and professional development standards.
IT 240	INTRO TO LAN TECHNOLOGIES	3	College of Information Systems and Technology	This foundational course covers local area network (LAN) topics including rationale for networking, Open Systems Interconnection (OSI) models, common network topologies and architecture, client/server concepts, basic hardware devices and usage, basic networking security concepts.
IT 241	INTRO TO W-LAN TECHNOLOGIES	3	College of Information Systems and Technology	Concepts of wireless networking systems include wireless networking topologies, hardware protocols, hardware selection and implementation, interface with MAN, LAN and WAN networks, basic wireless security and integration concepts.

IT 242	INTRO TO WAN TECHNOLOGIES	3	College of Information Systems and Technology	This course covers Wide Area Networking/Enterprise networking concepts and its interface with metropolitan area networks (MAN) and local area networks (LAN). The course will cover telecommunication technologies, backbone technologies, hardware device protocol, hardware selection and usage, and basic WAN security considerations and planning.
IT 244	INTRO TO IT SECURITY	3	College of Information Systems and Technology	Concepts of General IT security and its rationale will be introduced. Content includes contingency planning and business resumption planning, backup schemes and implementation strategies, as well as an introduction to various types of invasive actions and prevention measures.
IT 260	INTRO TO DESKTOP DATABASES	3	College of Information Systems and Technology	This course will cover the use desktop database software to create small database applications. Emphasis will be placed on creating databases and forms. Hands-on experience in the installation, design, and debugging of desktop database software will be included in this course.
IT 261	ADVANCED DESKTOP DATABASES	3	College of Information Systems and Technology	This course is a continuation in the study of desktop database software. Emphasis will be placed on database design, reporting, queries and data analysis using desktop database software.

IT 264	INTRODUCTION TO SQL	3	College of Information Systems and Technology	This course provides an introduction to the Structured Query Language (SQL) that provides a unified language that lets you query, manipulate, or control data in a business applications environment.
IT 265	MANAGING THE DATABASE ENVIRONMENT	3	College of Information Systems and Technology	This course provides an introduction to the installation, configuration, support, availability and recovery of databases. The considerations for database administration addressing the requirements for user access, security, backup and recovery will be covered in this course.
IT 280	COMPUTER HARDWARE FUNDAMENTALS	3	College of Information Systems and Technology	This course is an introduction to computer support fundamentals of personal computer (PC) hardware architecture, components, networking, configuration, upgrading, and repair.
IT 282	COMPUTER SOFTWARE FUNDAMENTALS	3	College of Information Systems and Technology	This course is an introduction to the fundamentals of the Vista and legacy Windows Operating Systems (98/ME, 2000/XP) for computer software configuration, file management, performance monitoring, optimization, maintenance, recover and security. Activities that are critical to this course include remote access to hands-on LiveLabs and Scenarios.

IT 284	ENTERPRISE COMPUTER SUPPORT	3	College of Information Systems and Technology	This course is an introduction to the roles, responsibilities, and skills required to become a professional computer support PC Technician and provide exceptional computer support service. This includes the fundamentals of customer service, effective questioning, verbal and non-verbal communication, on-site support, telephone support, remote e-commerce support, and dealing with difficult customers. This course includes remote access to hands-on, real-world customer support issues and Scenarios.
IT 286	COMPUTER MAINTENANCE AND TROUBLESHOOTING	3	College of Information Systems and Technology	This course is an introduction to computer hardware and software maintenance and troubleshooting. Each Module of the course will focus on typical problem scenarios, diagnostics, procedures and solutions. The final Module of this course provides you with a problem scenario to demonstrate your understanding of diagnostic skills and solution implementation. This course includes remote access to hands-on LiveLabs and Scenarios.
JRN 310	INTRODUCTION TO JOURNALISM	3	School of Business	This course is the introduction to the journalism concentration. The role of the journalist will be described from its origin to the emergence of the modern-era journalist. Key journalistic theories and principles will be discussed. Special attention will be given to influences in journalism and qualities that exemplify journalistic writing. The concepts of journalistic writing, research, technology, ethics, and personal responsibility will be introduced. Controversial issues faced by journalists will be highlighted throughout the course.
JRN 320	RESEARCH FOR JOURNALISM	3	School of Business	This course focuses on the research methods employed in journalistic writing and reporting. The goal of this course is to enhance the understanding of the characteristics of credible sources and accurate information. Information will be assembled and evaluated to support journalistic goals by interpreting information needs, choosing accurate and unbiased sources, and selecting relevant and reliable information. The importance of employing ethical practices to research techniques is emphasized throughout the course.

JRN 330	JOURNALISTIC WRITING I	3	School of Business	This course focuses on understanding journalistic writing styles. The course begins by categorizing historical media and associating past writing styles with current 21st century styles. Differences will be identified in writing for various audiences and for print, digital, and broadcast media. The rationale for using certain writing styles will be illustrated and expressed. Throughout the course, the roles of research, editing, and ethics in journalistic writing will be emphasized.
JRN 340	JOURNALISTIC WRITING II	3	School of Business	This course focuses on the application of the diverse journalistic writing techniques used by today's changing media landscape. The goal is to enhance storytelling skills by informing and engaging audiences using various delivery methods. Written media messages will be designed and assessed by determining which writing styles should be utilized given the target audience. Within the new convergent media landscape, credible resources will be identified, materials evaluated, and details of written work summarized. The association between research and responsible writing will be explored, as writing strategies to craft effective messages are developed. The role of ethics in journalism is emphasized throughout the course.
JRN 350	CONTROVERSIAL ISSUES IN JOURNALISM	3	School of Business	This course examines the rise of social media and the immediacy in which controversial issues are communicated in journalism. This course focuses on developing the writer/reporter's ability to critically examine and react to specific media elements, including public opinion, trends, celebrity commentary, and the public's need to know. Emphasis is placed on understanding the nature and characteristics of thought-provoking mass media occurrences. Concepts of idea generation and storytelling in an ethical and personally responsible manner are highlighted.
JRN 360	STORYTELLING: A MULTIMEDIA APPROACH	3	School of Business	This course focuses on the role of technology and its impact on news delivery. The use of technologically advanced multimedia formats will be explored. Stories will be adapted to various media outlets to realize the full range appeal to targeted audiences. The goal of this course is to provide students with experiences in storytelling that are delivered through the use of advanced convergent technologies.

LAW 441	BUSINESS LAW FOR SMALL BUSINESS AND ENTREPRENEURS	3	School of Business	This course provides students with overview of the legal issues faced by small businesses and entrepreneurs. Students will examine the legal aspects of incorporation, human resource considerations, the regulatory environment, and legal business structures.
LAW 531	BUSINESS LAW	3	School of Business	This course prepares students to evaluate the legal risks associated with business activity. Students will create proposals to manage an organization's legal exposure. Other topics include the legal system, alternative dispute resolution, enterprise liability, product liability, international law, business risks, intellectual property, legal forms of business, and governance.
LAW PA513	LAW AND PUBLIC ADMINISTRATION	3	College of Criminal Justice and Security	This course prepares students to apply legal concepts in public administration. Students will analyze legislative and judicial processes in the administration of state and local government jurisdictions. Other topics, at the state and local level, include enabling laws, regulatory review, open-meeting/sunshine provisions, adjudication, and the Administrative Procedures Act.
LCO 336	ORGANIZATIONAL COMMUNICATION THEORY	3	School of Business	This course identifies the nature of organizational communication and provides seminal organizational communication theories within the context of the traditional, interpretive, and critical perspectives. Students will gain knowledge of core theories along with the organizational dynamics of culture, diversity, and ethics. They will understand the effects of technology and innovation, along with power, conflict, organizational structure, and the need for organizations to develop informed organizational communication strategies.

LCO 348	ADVANCED GROUP COMMUNICATION AND LEADERSHIP	3	School of Business	This course focuses on the issues of group dynamics and leadership encountered when dealing with complex, strategic, and critical public or corporate entities. It will build on the fundamentals of group dynamics and leadership, which were covered in previous courses, and provide advanced work in theory of groups and theory of leadership. Students will explore and analyze effective group interaction in task-oriented situations, and consider small-group structures and communication styles that influence the problem-solving process.
LCO 372	LEADERSHIP COMMUNICATION ETHICS	3	School of Business	This course will focus on the ethical challenges and responsibilities of being a competent leader and communicator in a diverse and changing world. Students will learn to apply ethical and moral leadership theory and reasoning to a variety of organizational communication processes and contexts.
LCO 465	CONFLICT MANAGEMENT	3	School of Business	This course we will explore advanced methods for dealing with intrapersonal, interpersonal and group conflict. Students will investigate and apply the theoretical and practical aspects of situation assessment, conflict management, negotiation, and mediation, giving them opportunities to improve their communication, critical thinking, and problem solving skills.
LCO 480	SOCIAL MEDIA AND THE ORGANIZATION	3	School of Business	This course will focus on the strategic implementation of social media tools as they relate to a firm's integrated marketing communication strategies. Students will learn how to effectively use social media to improve external communication, marketing and advertising by studying and analyzing websites, social media sites, and affiliate sites to determine how successful companies utilize social media to improve their communication and attract their target audience to achieve their business goals.

LDCEU 1000	APPLYING LEADERSHIP PRINCIPLES	0.6	School of Continuing Education	Dynamic leaders exhibit critical leadership skills to effectively set the direction for the team and organization. Solid leadership inspires others and motivates the team to perform at a higher level, increasing productivity. In this course, you will learn the principles of effective leadership and practical strategies to apply on the job to improve your performance as a leader within your work group or organization. This course provides 0.6 continuing education units in one, 6-hour workshop.
LDCEU 1005	DEVELOPING YOURSELF AS A LEADER	0.6	School of Continuing Education	As a first-time manager or team lead, individuals will need to develop a skillset as a leader in order to be successful. This course will provide methods for new managers to perform a personal assessment to identify areas for improvement and apply strategies to develop and grow leadership capabilities. New managers will learn best practices and proven techniques and strategies that can be leveraged to grow leadership skills. This course provides 0.6 continuing education units in one, 6-hour workshop.
LDCEU 1010	PRACTICAL LEADERSHIP	0.6	School of Continuing Education	Recently promoted managers, successful employees or other individual contributors who seek to become more influential in their organization require an expanded understanding of leadership. In this course, students will explore the practical skills needed to transition from being an individual contributor to becoming a leader of diverse teams to achieve business results. This course provides 0.6 continuing education units in one, 6-hour workshop.
LDCEU 5000	MANAGERIAL LEADERSHIP	0.6	School of Continuing Education	In today's workplace, the need for leaders who can manage, and managers who can lead, is critical. Leaders influence others both inside and outside an organization and promote working together towards a common goal. In this course, students will focus on identifying the role of leadership, communicating vision, and ways to motivate employees. Students will also explore the phases of change, motivating employees through change, and how to respond to distress and reduce stress. This course provides 0.6 continuing education units in one, 6-hour workshop.

LDR 300	INNOVATIVE LEADERSHIP	3	School of Business	This course provides a foundation of understanding of leadership and its role in managing people and systems. This course will cover key leadership elements such as effective leadership behavior, power and influence, the differences between leadership and management, leading change, intrapreneurship, and how an innovative mindset impacts people and systems in a continually changing global and virtual environment.
LDR 531	ORGANIZATIONAL LEADERSHIP	3	School of Business	This course prepares students to apply leadership principles to the roles they play as managers. Students will discover more about themselves and learn more about the connection between the individual and the organization. Other topics include organizational culture, structure, group behavior, motivation, power, politics, organizational change, and workplace conflict.
LDR 533	LEADERSHIP FOR HEALTHCARE ORGANIZATIONS	3	School of Business	This course prepares students to apply leadership principles specific to the healthcare industry. Students will learn about the relationship between healthcare providers, physicians, and the organization. Other topics include organizational culture, group behavior, motivation, power, politics, and organizational change specific to healthcare organizations.
LDR 711A	LEADERSHIP THEORY AND PRACTICE	3	School of Advanced Studies	In this course students explore their role as a scholar, practitioner, and leader from historical, theoretical, and applications-based content and framework-all within the context of critical reasoning, writing, and research. Students will develop doctoral-level critical analysis, evaluation, and synthesis skills as these apply in leadership practices within their organizations.

LDR 721	ETHICAL LEADERSHIP AND THE LEGAL LANDSCAPE	3	School of Advanced Studies	This course evaluates research on how legal environments in the global economy shape decision-making and ethical issues that emerge from disparate legal systems and practices. Topics include contemporary legal and ethical issues that impact the environment and workplace such as technology, social media, advertising, harassment, and diversity. The relationships among the law, corporate ethical standards and global business practices are analyzed.
LDR 722	ETHICAL LEADERSHIP AND THE LAW IN THE GLOBAL ENVIRONMENT	3	School of Advanced Studies	This course evaluates ethical and risk management issues emerging from disparate legal systems and practices in the global environment, with an emphasis on current world events. Topics include decision-making, cultural implications, and the management of economic, financial, and political risk. The relationships among the law, corporate ethical standards, and global business practices are analyzed.
LDR 726	THE DYNAMICS OF GROUP AND TEAM LEADERSHIP	3	School of Advanced Studies	Upon completion of this course, learners will be prepared to use advanced leadership strategies for group communications, team building, and coaching skills to attain organizational objectives. Learners explore large group and smaller team dynamics and the ways in which the role of a leader is required to affect behavior. Emphasis is placed on the growing dependency on self-directed work teams in the workplace.
LDR 731	CONTEMPORARY ISSUES IN LEADERSHIP	3	School of Advanced Studies	This course explores successful leadership and controversial issues surrounding how and why senior leaders set and deploy organizational values, short and long-term directions, and performance expectations that create a balanced value in global organizations. The focus is on business results that encompass organizational learning; stakeholder satisfaction; and overall budgetary, financial, and market performance.

LDR 736	ARCHITECTURE OF LEADERSHIP	3	School of Advanced Studies	Upon completion of this course, learners will be prepared to develop and maintain a strong orientation to the future and a commitment to improvement and innovation in creating and establishing new business models for attaining organizational goals, setting new short- and long-term directions, and achieving performance excellence. This course includes an assessment of how leaders address current and future impacts on society in a proactive manner and how leaders establish and accomplish ethical practices in all stakeholder interactions.
LEO 563	LAW ENFORCEMENT INTELLIGENCE OPERATIONS	3	College of Criminal Justice and Security	This course examines the basic tools utilized in addressing criminal activity and security issues, relating to the gathering of intelligence. This course provides students with knowledge and resources to effectively identify, gather, and analyze information obtained through either human or electronic means. Students will comprehend the resources available for conducting investigations. Through examination of organizations comprising the intelligence community students will recognize how public and private sector partnerships can promote efficiency and effectiveness.
LEO 573	ORGANIZATIONAL PERFORMANCE, ANALYSIS, AND DECISION MAKING	3	College of Criminal Justice and Security	This course explores methods to track and measure an organization's overall performance and how to use the data collected to align and actuate future decisions. Topics include empirical practices in performance measurement, mining, and filtering data; effectively communicating research results, and application of innovative knowledge for future decision making. Students also study modern evaluation methods to analyze neoteric organizational decisions.
LEO 583	STRATEGIC PLANNING FOR THE LAW ENFORCEMENT SECTOR	3	College of Criminal Justice and Security	This course will introduce students to the tools and practical measures for successfully designing and implementing a strategic plan for law enforcement organizations. Students will learn strategic approaches that allow evaluation and measurement of fiscal responsibility, accountability, productivity, customer satisfaction, and cohesiveness of mission, with the intent of identifying best practices and overall organizational effectiveness.

LEO 593	TECHNOLOGY FOR THE LAW ENFORCEMENT EXECUTIVE	3	College of Criminal Justice and Security	This course examines technologies that affect the operations and administrative responsibilities of the law enforcement executive. The course provides students with an understanding of the relationship between technologies and critical incident management. Upon completion of this course, students will have knowledge and skills that will assist them with their career goals.
LIT 235	SURVEY OF ENGLISH LITERATURE TO 1798	3	College of Humanities and Sciences	This course is a survey of English literature through 1798.
LIT 245	SURVEY OF ENGLISH LITERATURE SINCE 1798	3	College of Humanities and Sciences	This course is a survey of English literature since 1798.
LIT 255	SURVEY OF AMERICAN LITERATURE TO 1860	3	College of Humanities and Sciences	This course is a survey of American literature through 1860.

LIT 265	SURVEY OF AMERICAN LITERATURE SINCE 1860	3	College of Humanities and Sciences	This course is a survey of American Literature since 1860.
LIT 304	SHAKESPEARE	3	College of Humanities and Sciences	This course examines Shakespearean literature with a focus on significant plays still popular today. Students will discuss the influence of Shakespeare on literary, social, and theatrical concepts.
LIT 305	MAJOR AMERICAN NOVEL	3	College of Humanities and Sciences	This course examines the American novel through major genres and authors.
LIT 330	MODERN POETRY	3	College of Humanities and Sciences	This course examines poetry from the early 20th century to today. Through reading significant works of the modern period, students will be able to explain poetry as an expression of culture and its importance to society.

LIT 375	LITERARY THEORY AND CRITICISM	3	College of Humanities and Sciences	This course introduces students to major literary theories in the discipline, from Structuralism to Post-modernism, for use in critical analysis.
LIT 410	LITERATURE OF THE FANTASTIC	3	College of Humanities and Sciences	This course examines the genre of science fiction and fantasy through notable authors and works.
LSM 404	INTRODUCTION TO LIFESPAN MANAGEMENT	3	College of Health Sciences and Nursing	This course introduces students to the lifespan management industry. Focus will include defining populations of lifespan management as well as industry specific terminology. Students will explore various environments and services for populations requiring care over the lifespan. Students will also be introduced to financial and quality management, as well as regulatory requirements for the industry.
LSM 412	MANAGEMENT WITHIN THE LIFESPAN INDUSTRY	3	College of Health Sciences and Nursing	This course provides students with overall management principles within the lifespan industry. Focus will be on fundamental management concepts such as planning, organizing, leading and controlling within lifespan management industry. Students will be exposed to marketing and promotion of programs and services for populations requiring care for the lifespan.

LSM 417	REGULATIONS IN LIFESPAN MANAGEMENT	3	College of Health Sciences and Nursing	This course covers regulatory guidelines which impact the lifespan management industry. Students will explore specific regulations and compliance strategies which focus on the protection of long-term care populations. Students will also explore how various laws and regulatory agencies impact lifespan environments and services.
LSM 423	FINANCIAL STRATEGIES FOR LIFESPAN MANAGEMENT	3	College of Health Sciences and Nursing	This course provides students with a focus on the financing and reimbursement of lifespan management. Course content will focus on financial strategies to support environments for lifespan populations. Students will also learn about various payers and reimbursement practices that impact the management of lifespan services.
LSM 429	LIFESPAN MANAGEMENT CAPSTONE	3	College of Health Sciences and Nursing	This course is the capstone for the lifespan management content where students apply management, financial, and regulatory strategies to demonstrate industry aligned competencies. Students will explore personal and professional career goals within the lifespan management industry.
LTC 310	SOCIAL AND COMMUNITY RELATED PROGRAMS AND SERVICES	3	College of Health Sciences and Nursing	This course provides an overview of programs and products related to our rapidly expanding long- term care populations. Services designed to support the growing needs of long-term care populations and their support networks will be examined. The impact of health care trends on the future of the long-term care industry will be explored.

LTC 315	ALTERNATIVE LIVING ENVIRONMENTS	3	College of Health Sciences and Nursing	This course focuses on the various alternative living environments available for long-term care populations. Students will focus on understanding the continuum of care and alternative living environments available to meet the evolving needs of long-term care populations.
LTC 328	LEGAL PERSPECTIVES IN AGING	3	College of Health Sciences and Nursing	This course will focus on the legal and regulatory issues related to today's long-term care populations. Topics will include age discrimination, advocacy and autonomy, fraud and abuse, major life transitions, and end of life decision making.
MACEU 2010	GOOGLE(R) ANALYTICS	0.6	School of Continuing Education	In today's competitive market, businesses cannot afford to rely on "gut feelings" or anecdotes to make decisions which impact their future course. Instead, business intelligence, or information, is now methodically collected from data mining, online analytical processing, benchmarking, and other components to uncover new opportunities and create market advantage. In this course, students will gain insight into the numerous functions associated with business intelligence and how proper analysis becomes informed decision-making. This course provides 0.6 continuing education units over one 6-hour workshop.
MAT 001	MATH PLACEMENT EXAM A	0	College of Humanities and Sciences	This placement exam, which is not credit- bearing, is a pass/fail course that can be used to satisfy the content of MAT/116 or MTH/208, fulfilling the prerequisite needed for taking MAT/117 or MTH/209. To earn a passing grade, a student must receive a score of 60% or better.

MAT 002	MATH PLACEMENT EXAM B	0	College of Humanities and Sciences	This placement exam, which is not credit- bearing, is a pass/fail course that can be used to satisfy the content of MAT/117 or MTH209, fulfilling the mathematics proficiency requirement. To earn a passing grade, a student must receive a score of 60% or better.
MAT 003	MATH PLACEMENT EXAM C	0	College of Humanities and Sciences	This placement exam, which is not credit- bearing, is a pass/fail course that can be used to satisfy the content of MAT/220 or MTH/220, fulfilling the mathematics proficiency requirement. To earn a passing grade, a student must receive a score of 60% or better.
MAT 116	ALGEBRA 1A	3	College of Humanities and Sciences	This course introduces basic algebra concepts and assists in building skills for performing specific mathematical operations and problem solving. Students will solve equations, evaluate algebraic expressions, solve and graph linear equations and linear inequalities, graph lines, and solve systems of linear equations and linear inequalities. These concepts and skills will serve as a foundation for subsequent business coursework. Applications to real-world problems are also explored throughout the course. This course is the first half of the college algebra sequence, which is completed in MAT 117, Algebra IB.
MAT 117	ALGEBRA 1B	3	College of Humanities and Sciences	This course explores advanced algebra concepts and assists in building the algebraic and problem solving skills developed in Algebra 1A. Students will solve polynomials, quadratic equations, rational equations, and radical equations. These concepts and skills will serve as a foundation for subsequent business coursework. Applications to real-world problems are also explored throughout the course. This course is the second half of the college algebra sequence, which began with MAT 116, Algebra 1A.

MAT 207	FUNDAMENTALS OF GEOMETRY	3	College of Humanities and Sciences	This course is designed to have students demonstrate the ability to use fundamental concepts of geometry including definitions, tools of geometry, and to recognize geometry as an axiomatic system.
MAT 219	INTRODUCTION TO COLLEGE ALGEBRA	3	College of Humanities and Sciences	This course introduces algebraic concepts providing a solid foundation for college algebra. Topics range from properties of real numbers, the order of operations, and algebraic expressions to solving equations and inequalities. Additional topics include polynomials, factoring methods, rational and radical expressions as well as graphing and functions.
MAT 220	COLLEGE ALGEBRA	3	College of Humanities and Sciences	This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations, sequences, and series.
MBL 400	MOBILE FUNDAMENTALS	3	College of Information Systems and Technology	This course is an introduction to mobile application development. Participants will learn about industry standards, how to select an application platform and architecture, and current trends in mobile application development. Additionally, the course covers HTML 5, CSS, and JavaScript for mobile devices. Upon completion, participants will be able to plan, design and create simple mobile applications.

MBL 402	ANDROID MOBILE DEVELOPMENT	3	College of Information Systems and Technology	This course will cover the basics of coding for Android. Topics include use of the Android APIs, persistent data retrieval and storage, testing, and publishing. Upon completion of the course, participants will be able to develop, test, debug and publish working mobile applications.
MBL 404	ANDROID MOBILE IMPLEMENTATION	3	College of Information Systems and Technology	This course will continue to build on the fundamentals covered in Android Mobile Development. Topics include security, multithreading, and monetization. Upon completion of the course, participants will be able to both develop useful mobile applications and implement monetization strategies.
MBL 406	IOS MOBILE DEVELOPMENT	3	College of Information Systems and Technology	This course will cover the basics of coding for iOS. Topics include Objective-C, persistent data retrieval and storage, testing, and publishing. Upon completion of the course, participants will be able to develop, test, debug and publish working mobile applications.
MBL 408	IOS MOBILE IMPLEMENTATION	3	College of Information Systems and Technology	This course will continue to build on the fundamentals covered in iOS Mobile Development. Topics include security, multithreading, and monetization. Upon completion of the course, participants will be able to both develop useful mobile applications and implement monetization strategies.

MDT 523	LEGAL AND ETHICAL ISSUES IN MEDIATION	3	College of Social Sciences	Students will examine the differences and similarities between practicing mediation and other professions, such as law and psychological counseling. Students will focus on the legal and ethical issues in mediation, especially conflicts of interest, mediator neutrality, confidentiality, mediator liability, and enforceability of mediation agreements. The course will address state licensing and certification requirements, statutes, and case law as they pertain to the professional and community-based volunteer mediators. Additionally, students will examine mediation codes of conduct and standards of practice.
MFCC 537	CHILD AND ADOLESCENT COUNSELING	3	College of Social Sciences	This course exposes students to a variety of models in the treatment of children and adolescents, including the developmental variables that may have an effect on behavior and family intervention. Systemic approaches to treatment of chronic illness, incest, delinquent behavior, adolescent chemical dependency, child suicide, psychosomatic disorders, families in crisis, fire setting, school phobia, and other behavior and learning problems are explored.
MFCC 551CA	LEGAL AND ETHICAL ISSUES IN MARRIAGE AND FAMILY THERAPY	3	College of Social Sciences	This course covers legal and ethical responsibilities of the marriage and family counselor, including California state laws governing mental health professionals. Emphasis is placed on the current legal patterns and trends governing client rights, duty to warn, duty to protect, treatment of minors, parent consent, multiple relationships, and application in special situations and with special populations. Students learn how to interpret and act appropriately in a wide variety of ethical situations as well as recognize and explore the relationship between a practitioner's sense of self and human values and his or her professional behavior and ethics.
MFCC 552	LEGAL AND ETHICAL ISSUES IN MARRIAGE AND FAMILY THERAPY	3	College of Social Sciences	This course covers legal and ethical responsibilities of the marriage and family counselor, including codes of ethics and laws governing mental health professionals. Emphasis is placed on the principles governing client rights, duty to warn and protect, multiple relationships, and application in special situations and with special populations; students learn how to interpret and act appropriately in a wide variety of situations.

MFCC 556	FAMILY SYSTEMS THEORY	3	College of Social Sciences	This course provides an overview of the development of family systems theory as a discipline and the therapeutic approaches that have emerged. Fundamental assumptions and concepts of general systems theory are introduced and contrasted with individual theories of psychology. The historic development of family systems thinking is explored. Evolving therapeutic models are introduced and contrasted with family systems concepts. In this course, students will explore the major systems theories' approaches to diagnosis, treatment, and change and explore ethnic differences in family patterns and attitudes toward therapy. Critiques of systems theory and research issues are discussed.
MFCC 561	FAMILY INTERVENTIONS	3	College of Social Sciences	This course introduces fundamental concepts and practices that underlie couples and family therapy in human systems. It teaches an integrative approach to the treatment of the broad range of presenting problems that arise within marriage and family relationships. The course will introduce culture-specific interventions used for the treatment of culturally different families.
MFCC 566	ADVANCED MARRIAGE AND FAMILY THERAPY	3	College of Social Sciences	This course requires students to apply marriage and family theory and skills acquired throughout the program and allows them to gain a deeper understanding of working with diverse families. Students will go through the process, from intake to termination, of working with a family in a role-play setting incorporating practical applications of assessment, treatment planning, therapeutic interventions, progress notes, and termination summaries. Family interventions will be emphasized, including interventions for families in acute and chronic crisis, and for various ethnic family systems.
MFCC 567	SEMINAR IN MARRIAGE AND FAMILY COUNSELING	3	College of Social Sciences	This course requires students to apply marriage and family theory and skills acquired throughout the program and allows them to gain a deeper understanding of working with diverse families. Students will go through the process, from intake to termination, of working with a family in a role-play setting incorporating practical applications of assessment, treatment planning, therapeutic interventions, progress notes, and termination summaries. Family interventions will be emphasized, including interventions for families in acute and chronic crisis, and for various ethnic family systems.

MFCC 591	PRE-PRACTICUM IN MARRIAGE AND FAMILY COUNSELING	3	College of Social Sciences	This course focuses on the assessment and continuing development of student counseling and clinical documentation skills. Students have a variety of opportunities to receive feedback and to evaluate their ability to integrate theory into practice. Students determine their styles and strengths as professional counseling practitioners, as well as identify areas needing further development. Individualized practice sessions, case management skills, and feedback are designed into the course.
MFCC 591O	ORIENTATION TO PRACTICUM IN MARRIAGE AND FAMILY COUNSELING	0	College of Social Sciences	This course is an orientation to the pre- practicum and practicum courses.
MFCC 592	PRACTICUM	3	College of Social Sciences	This course focuses on the assessment and continuing development of student counseling skills. Students have a variety of opportunities to receive feedback and to evaluate their ability to integrate theory into practice. Students determine their styles and strengths as professional counseling practitioners, as well as identify areas needing further development. Individualized practice sessions and feedback are designed into the course.
MFCC 597A	INTERNSHIP A	3	College of Social Sciences	The Marriage/Family/Child Counseling Internship is a clinical experience required of all MFCC students. The internship is divided into two sections, each lasting 15 weeks. The internship experience comprises Portfolio III of the counseling portfolio series. Students are placed in community agencies where they provide clinical marriage/family/child counseling services to clients under the direction of an approved licensed site supervisor.

MFCC 597B	INTERNSHIP B	3	College of Social Sciences	The Marriage/Family/Child Counseling Internship is a clinical experience required of all MFCC students. The internship is divided into two sections, each lasting 15 weeks. The internship experience comprises Portfolio III of the counseling portfolio series. Students are placed in community agencies where they provide clinical marriage/family/child counseling services to clients under the direction of an approved licensed site supervisor.
MFCC 597C	INTERNSHIP	3	College of Social Sciences	Students in Arizona, Hawaii, and Nevada must take a third component course to complete the 300-hour (minimum) clinical experience, which has been divided into three fifteen-week parts (A, B, and C), and which comprises Portfolio III of the counseling portfolio series. Student interns are placed in an approved mental health site and receive supervision from an approved site supervisor. In addition, interns meet weekly with their faculty supervisor and internship group to review their clinical work and to receive instruction and share information on related professional issues, including the role and function of supervision, clinical intakes, terminations, case notes, case presentations, and services offered by their internship sites. Interns will also evaluate their growth through the internship and develop a professional resume.
MFCC 599A	PRACTICUM IN MARRIAGE AND FAMILY COUNSELING A	3	College of Social Sciences	The Marriage/Family/Child Counseling Internship is a clinical experience required of all MFCC students. The internship is divided into two sections, each lasting 15 weeks. The internship experience comprises Portfolio III of the counseling portfolio series. Students are placed in community agencies where they provide clinical marriage/family/child counseling services to clients under the direction of an approved licensed site supervisor.
MFCC 599B	PRACTICUM IN MARRIAGE AND FAMILY COUNSELING B	3	College of Social Sciences	The Marriage/Family/Child Counseling Internship is a clinical experience required of all MFCC students. The internship is divided into two sections, each lasting 15 weeks. The internship experience comprises Portfolio III of the counseling portfolio series. Students are placed in community agencies where they provide clinical marriage/family/child counseling services to clients under the direction of an approved licensed site supervisor.

MFCC 599C	PRACTICUM IN MARRIAGE AND FAMILY COUNSELING C	3	College of Social Sciences	The Marriage/Family/Child Counseling Internship is a clinical experience required of all MFCC students. The internship is divided into two sections, each lasting 15 weeks. The internship experience comprises Portfolio III of the counseling portfolio series. Students are placed in community agencies where they provide clinical marriage/family/child counseling services to clients under the direction of an approved licensed site supervisor.
MGCEU 1000	MANAGING ORGANIZATIONAL GOALS	0.6	School of Continuing Education	Managers are responsible for setting the goals for their team and for managing their work. Organizational goals can often get lost in layers of management and not get communicated to the individual contributors. In the absence of goals, employees can feel unmotivated or can even set their own goals for achievement, which can result in poor and conflicting team performance. In this course, students will develop the necessary skills to establish tactical goals for their team based on organizational directives, and create and manage action plans to achieve these goals. This course provides 0.8 continuing education units in two, 4-hour workshops.
MGCEU 1005	WHAT GOOD MANAGERS DO: THE FIRST 100 DAYS	0.6	School of Continuing Education	Taking on a management role can be a bit scary. Understanding how to conduct performance appraisals, monitor work processes, communicate effectively with team members, build an internal network of supportive colleagues, and avoid common management pitfalls can be overwhelming for a new manager. This course provides the basics of effective management key for the first 100 days on the job. Topics include managerial responsibilities and skills such as the ability to resolve conflicts, coach teams to optimal performance, and serve as an advocate for their team within the wider corporate structure. This course provides 0.6 continuing education units in one, 6-hour workshop.
MGCEU 1010	EFFECTIVE MANAGEMENT	0.6	School of Continuing Education	The world of business is increasingly centered on the interaction of different teams, both within and outside the organization. The success of a team within a company is often directly linked to the ability of a manager to lead and manage the team effectively. In order to perform the job well, the manager must understand the different roles of those on the team. A manager should be trained to develop the capabilities of all team members and address issues as soon as they surface. This course will help students gain an understanding of the fundamentals of becoming an effective manager for their team. This course provides 0.6 continuing education units in one, 6-hour workshop.

MGT 230	MANAGEMENT THEORY AND PRACTICE	3	School of Business	This course explores the rich field of management in theory and practice, and as both a science and an art. Students learn to apply management concepts to current workplace issues. Other topics include increasing competitive forces, expectations for successful performance of employees and organizations, and achieving desired business goals.
MGT 312	ORGANIZATIONAL BEHAVIOR FOR MANAGERS	3	School of Business	This course prepares students to understand the influence that behavior has on leading and managing organizations. After completion of this course, students will be able to describe the role of a manager within an organization, summarize key concepts and terminology related to organizational behavior, explain the influence of leadership styles on individual performance, examine the roles and interaction of group and team members, describe the relationship between job fit, job satisfaction, and job performance, and the relationship between the human resource function and organizational development.
MGT 312T	ORGANIZATIONAL BEHAVIOR FOR MANAGERS	3	School of Business	This course prepares students to understand the influence that behavior has on leading and managing organizations. After completion of this course, students will be able to describe the role of a manager within an organization, summarize key concepts and terminology related to organizational behavior, explain the influence of leadership styles on individual performance, examine the roles and interaction of group and team members, describe the relationship between job fit, job satisfaction, and job performance, and the relationship between the human resource function and organizational development.
MGT 314	HOSPITALITY ENTREPRENEURSHIP	3	School of Business	This course provides an overview of the managerial and entrepreneurial skills needed to operate and manage a small business in the hospitality industry. Special emphasis is placed on business planning, marketing, financial management, and the regulatory environment.

MGT 330	MANAGEMENT THEORY, PRACTICE, AND APPLICATION	3	School of Business	This course explores the rich field of management in theory and practice, and as both a science and an art. The course also addresses the role of managers in the current world of rapid change, increased competitive forces, and increased expectations for the successful performance of employees and organizations. The focus is on some of the ways and means of achieving desired goals. The student will leave this course with a solid background in the nature and work of management and managers. Applications of concepts to current workplace issues will be stressed.
MGT 360	GREEN AND SUSTAINABLE ENTERPRISE MANAGEMENT	3	School of Business	This course provides an overview of sustainable management techniques from an economic, social, and corporate environmental responsibility perspective. Special emphasis is placed on production principles, innovative and sustainable practices, and the importance of managing the bottom line in business.
MGT 362	CHANGE MANAGEMENT AND IMPLEMENTATION	3	School of Business	This course will provide students with an overview of the role that business analytics has in the preparation and implementation of change management throughout a project. Students will examine the functions of change management to apply them to activities to meet the strategic and operational plans of an organization. Upon completion of this course, students will understand the importance of the integration of data and decision making on change processes and project management methodologies to implement changes throughout an organization. Focus will also be on managing change to ensure high performance, quality, and operational effectiveness.
MGT 401	SMALL BUSINESS: STRUCTURE, PLANNING, FUNDING	3	School of Business	This course provides an overview of the small business from concept through funding. Emphasis is placed on designing a competitive business model, crafting the business plan, forms of ownership and exploring funding options.

MGT 411	INNOVATIVE AND CREATIVE BUSINESS THINKING	3	School of Business	This course provides students with the skills and knowledge necessary for using innovative and creative thinking strategies to improve managerial decision making and problem solving. Emphasis is placed upon learning critical skills to identify and facilitate innovative behavior and collaboration within the organization that will increase sustainable business growth and strengthen abilities to respond to organizational changes and challenges. Course lectures, reading and projects will span theory and practice and draw upon examples from multiple industry sectors.
MGT 418	EVALUATING NEW BUSINESS OPPORTUNITIES	3	School of Business	This course focuses on evaluating the benefits and risks associated with new business opportunities. This includes reviewing the projected return on investment, the role of risk, investor considerations, strategic planning, and modeling techniques to analyze possible business ventures.
MGT 420	MANAGING QUALITY IN THE SUPPLY CHAIN	3	School of Business	This course provides a detailed look at quality management in the company and the supply chain. It addresses the differing theories of quality to include product and process design as well as customer driven quality. This course includes managing supply chain quality through supplier alliances and development in both the services and manufacturing industries.
MGT 434	EMPLOYMENT LAW	3	School of Business	This course provides an overview of federal statutes and state regulated areas that impact the personnel function. Among the topics addressed are EEO and Affirmative Action, OSHA, ERISA, FMLA, and ADA; employee privacy issues (polygraph testing, drug and alcohol testing, employer searching and monitoring); and wrongful discharge.

MGT 445	ORGANIZATIONAL NEGOTIATIONS	3	School of Business	This course provides an overview of negotiations in an organizational setting. Students will learn negotiation processes and strategies, the role of stakeholder interests in negotiation, and how to apply these concepts to the workplace. Students will also examine conflict management techniques as well as emerging negotiation trends in globalization and technology.
MGT 448	GLOBAL BUSINESS STRATEGIES	3	School of Business	The manager's perspective in the fields of international payments, international trade, and investment are analyzed. Emphasis is given to the materials and concepts that illuminate the strategies, structure, practices and effects of multinational enterprises. (3 credits; 5 weeks) Prereq: none
MGT 465	SMALL BUSINESS AND ENTREPRENEURIAL PLANNING	3	School of Business	This course focuses on the development of a strategic business plan applicable for the needs of a small business or entrepreneurial venture. This will include the strategic and integrative application of financial planning, capital management, marketing, people management, and leadership. Special emphasis is placed on adapting business planning requirements to the realistic needs of small business owners and entrepreneurs.
MGT 498	STRATEGIC MANAGEMENT	3	School of Business	This course gives students the opportunity to integrate management concepts and practices to contemporary business strategies, while discussing the theories of strategic management. This course will focus on improving management decision-making and problem-solving skills. Students will create a strategic management plan.

MGT 521	MANAGEMENT	3	School of Business	This course applies the tools available to University of Phoenix graduate students and the competencies of successful managers to understand the functions of business. Students develop an increased awareness of their own perceptions and values in order to manage and communicate with others more effectively. Other topics include graduate business program goals, argument construction, decision making, collaboration, and academic research.
MGT 527	CONSULTING	3	School of Business	This course applies the tools available to University of Phoenix graduate students and the competencies of successful individuals who exercise influence within an organization but have no direct authority to make changes or implement programs. Students learn their own perceptions and values to communicate more effectively with others. Other topics include Master of Management program goals, argument construction, decision making, collaboration, and academic research.
MGT 538	MANAGING IN A CROSS-CULTURAL ENVIRONMENT	3	School of Business	This course prepares students to persuade decision makers across global dimensions of culture. Students will create a training plan for enhancing cultural awareness and tolerance within a cross-boarder organization. Other topics include cross-cultural communication, differences in decision making, values, motivation, and leadership.
MGT 539	THE GLOBAL ECONOMY	3	School of Business	This course examines the national and global issues that fundamentally change the nature of business functions. Students will investigate strategies and solutions that improve opportunities for economic mobility. Other topics include international business and trade, global marketing, and the role of government policies on organizations.

MGT 557	NEGOTIATION, POWER, AND POLITICS	3	School of Business	This course prepares students to achieve organizational objectives through formal and informal channels. Students will create a plan to achieve a goal by applying negotiation skills within the formal and informal structures of an organization. Other topics include coalitions, types of power, liaison roles, and persuasion.
MGT 567	ETHICS AND SOCIAL RESPONSIBILITY	3	School of Business	This course prepares students to align an organization's social responsibility initiatives with its values. Students will create a proposal for an organization that aligns corporate social initiatives with its values. Other topics include ethics, values awareness, and evaluating the results of social initiatives.
MGT 598	CONSULTING PROJECT	3	School of Business	This course applies student understanding of organizations and project management to the development of a consulting project. The course requires students to synthesize and integrate theory and practice from all prior courses in the program.
MGT 711	STRATEGIC OPPORTUNITIES IN AN INTERNET-BASED GLOBAL ECONOMY	3	School of Advanced Studies	This course evaluates models for creating economically viable global businesses using the technology of the Internet. Topics include assessing successful e-business and management models, evaluating and summarizing the macroeconomic and societal factors that contribute to the success of business strategy in a global environment. Outcomes include developing a strategic e-business plan and creating solutions and recommendations for global e-businesses.

MGT 716	MANAGEMENT PHILOSOPHIES	3	School of Advanced Studies	Completion of this research-based course will empower learners to explore, analyze, and critically evaluate historical and current management philosophies and theories. The course focus is on understanding, designing, and executing sustainable management strategies that meet the demands of domestic and global competition.
MGT 721	MANAGING THE RISKS IN A GLOBAL ENVIRONMENT	3	School of Advanced Studies	This course evaluates alternative practices to manage risk in a global environment. Topics include measuring cultural implications, as well as economic, financial, and political risks. Students will utilize models to evaluate instruments of global investment and predict where to invest internationally.
MGT 726	EMERGING MANAGERIAL PRACTICES	3	School of Advanced Studies	This course prepares students to implement emerging managerial practices designed to develop organizational agility and responsiveness. Additionally, students will be able to adapt best practices, implement high-performance work teams, and build advanced strategies for effective global communications. Emphasis is placed on how organizational leaders are encouraged to develop and demonstrate creative, adaptive, and flexible business approaches to meet the challenges of the future of work.
MGT 736	CONTEMPORARY SYSTEMS MANAGEMENT	3	School of Advanced Studies	This course empowers students to manage complexity and lead organizations through strategic decision making. Students focus on managing information systems and theoretical and practical frameworks to enable organizational performance and innovation.

MHA 505	SYSTEMS THINKING IN HEALTH CARE ENVIRONMENTS	3	College of Health Sciences and Nursing	The learner will utilize the theoretical framework of Systems Thinking as a strategy to address challenges in the health care environment. Topics include Complexity Science, Design Thinking, Creativity and Flow.
MHA 506	ETHICAL MARKETING: THE NEW HEALTH CARE ECONOMICS	3	College of Health Sciences and Nursing	The learner will explore the emerging intersection of marketing and economics in the health sector. Topics include consumer behavior, market segmentation, and identification of new market opportunities in health care, as well as regional/system commoditization, value proposition and differentiation, branding, and social media strategies in the health sector.
MHA 507	LEVERAGING INFORMATICS IN THE HEALTH SECTOR	3	College of Health Sciences and Nursing	The learner will determine how best to "tell the story" by utilizing patient data and organizational quality and safety benchmarks in diverse health sector contexts. Topics include the systems life cycle, the management of data, sourcing data from the electronic medical record, tracking organizational performance, employee productivity and morale, and peer benchmarking.
MHA 508	NAVIGATING THE REGULATORY ENVIRONMENT IN HEALTH CARE	3	College of Health Sciences and Nursing	The learner will explore the diverse and expanding regulatory environment of the health sector. Topics include compliance and privacy, the ethical responsibilities inherent in leading regulatory structures wtihin organizations, the specific laws that dictate privacy and compliance, as well as auditing, monitoring, and corrective action.

MHA 515	SCANNING THE HEALTH SECTOR AS AN INDUSTRY EXPERT	3	College of Health Sciences and Nursing	The learner will be able to identify emerging healthcare trends in areas such as systems, delivery, outcomes and quality, healthcare design, and population health. Topics include how to scan the environment, validate information, make decisions, and articulate solutions that are appropriate across diverse health care contexts.
MHA 516	OPERATING IN STRUCTURE: HEALTH SECTOR POLICY AND GOVERNANCE	3	College of Health Sciences and Nursing	Students will examine how health policy and organizational governance informs systems and delivery of care, and identify the policies that should be adopted to implement industry trends. Topics include the influence of policy, interest groups, and stakeholders on the health status of a society, as well as how to cultivate effective governance systems within organziations, and the importance of risk-based policy and governance models in the health sector.
MHA 520	SECTOR STAKEHOLDERS: IDENTIFYING AND CULTIVATING ALLIANCES	3	College of Health Sciences and Nursing	The learner will begin to identify networking opportunities within the health sector, both internally (i.e. industry associations, Boards of Directors) and externally (i.e. community, donors). Topics include objectively determining which relationships are vital to the organization, how to nurture relationships and manage transition, and maintain integrity to protect the organization.
MHA 542	LEADING WITH AUTHENTICITY IN THE HEALTH SECTOR	3	College of Health Sciences and Nursing	The learner will begin to exemplify the traits of Adaptive Leadership in the context of the health sector. Topics include leading in complex environments (transparency and servant leadership), modeling ethical decision making, creating and adjusting organizational culture, and collaboration, concepts of power and professional culture.

MHA 543	TACKLING THE TALENT WAR IN THE HEALTH SECTOR	3	College of Health Sciences and Nursing	Learners will respond to developing trends and insights across the health sector that inform workforce development and hiring. Topics include recruitment and retention strategies, succession planning, leadership strategies for a multigenerational workplace, embracing diversity, and considerations for positive morale and enagement.
MHA 560	CREATING A SUSTAINABLE LEGACY: HEALTHY COMMUNITIES	3	College of Health Sciences and Nursing	The learner will operationalize health care sustainability in three ways: personal legacy, organizational environment, and community development. Topics include sustainability in a health sector context, mentorship, board and association leadership, economic analysis and sustainability practice within organizations, and fostering community interactions.
MHA 598	LEVERAGING RESULTS TO BUILD BRAND IN THE HEALTH SECTOR	3	College of Health Sciences and Nursing	Learners will examine strategies for successfully elevating the role of the health care organization through a well- defined "brand". Topics will include brand-as- promise, brand-as-experience, and brand-as- emotional connection, quality and outcomes, articulating the strategy, and engaging teams and leaders.
MHA 599	CAPSTONE: LEADING THE ORGANIZATION THROUGH CHANGE	3	College of Health Sciences and Nursing	In this MHA capstone course, learners will synthesize previous coursework from the program to identify and address strategic opportunities for change and innovation specific to the health sector. Topics include entre/intrapreneurship, innovation, communication, transformation, and execution.

MKT 310	PERSONAL SELLING	3	School of Business	This course provides students with the tools and techniques necessary to understand the personal sales process. After completion of this course, students will be able to create a personal sales presentation, describe sales negotiations, compare and contrast the categories of prospect objections, summarize the elements of the closing process, and identify ethical frameworks associated with sales professional associations.
MKT 320	BUSINESS-TO-BUSINESS SALES MANAGEMENT	3	School of Business	This course provides students with an understanding of the business-to-business selling relationship and the challenges associated with maintaining these relationships. After the completion of this course, students will be able to describe the complexities of business-to-business selling relationships, create numerous presentations to address the variety of audiences in the business-to-business setting, examine legal issues associated with business-to-business selling, and evaluate the ethical considerations of relationship building behavior within a business-to-business sales relationship.
MKT 360	SALES FORCE MANAGEMENT	3	School of Business	This course provides students with an overview of the functions and activities related to managing a sales force. After the completion of this course, students will be able to summarize the responsibilities of a sales manager, evaluate the techniques used to recruit sales force candidates, describe sales territory strategies, examine the methods used in lead generation, and explain the approaches used to forecast sales performance information.
MKT 421	MARKETING	3	School of Business	This course involves an analysis of the role of marketing within the organization. Other topics include analyzing consumer behavior, identifying marketing variables, creating marketing strategies, and describing challenges of international marketing issues.

MKT 431	SMALL BUSINESS MARKETING	3	School of Business	Knowing your customer, growing your customer base and creating a consumer driven culture are key drivers of sustainability in the small business. This course focuses on the functions of evaluating opportunities, creating value, and developing effective pricing and advertising strategies.
MKT 435	CONSUMER BEHAVIOR	3	School of Business	This is an introductory course in analyzing consumer and purchasing behaviors as basic considerations in the development of a marketing mix. Economic, social, psychological, and cultural factors are considered as they relate to the development of marketing programs.
MKT 438	PUBLIC RELATIONS	3	School of Business	This course provides an introduction to the field of public relations. Topics covered are media relations; promotion; tools used in developing public relations and publicity, and improving customer satisfaction; relationship building strategies; and ethics and public relations. (3 credits; 5 weeks)
MKT 440	FUNDAMENTALS OF DIGITAL MARKETING	3	School of Business	This course provides a high-level view of the impact of technology on the marketing of goods and services. After completion of this course, students will be able to understand the structure of the Internet, compare and contrast strengths and weaknesses of various digital marketing tools, identify common terminology used in digital marketing, analyze ethical issues in public presentation of information, and evaluate the integration of digital media into a marketing plan.

MKT 441	MARKETING RESEARCH	3	School of Business	This course covers basic research methodology applied to marketing issues. Students will study methods and techniques for collection, analysis, and interpretation of primary and secondary data for consumer business marketing.
MKT 443	SOCIAL MEDIA MARKETING	3	School of Business	The course provides an opportunity for students to examine social networks, social media, and online advertising techniques. After completion of this course, students will be able to identify interactive marketing opportunities, understand the use of social media marketing on customer loyalty, apply social media tactics to the appropriate target market, and apply concepts of micropayments in social media setting.
MKT 444	HOSPITALITY MARKETING	3	School of Business	This course applies the general tools of marketing to the specific needs of the hospitality management industry. Special emphasis is placed on the global, regional, individual, and ethical considerations when building customer- relationships through marketing.
MKT 446	SEARCH ENGINE OPTIMIZATION	3	School of Business	This course will provide students with the tools to apply concepts used in search engine optimization. After completion of this course, students will be able to design an architecture, keyword search and competitive analysis, create website building strategies, techniques and tools to enhance search results, and optimize mobile content to enhance website visibility.

MKT 447	ADVERTISING AND CREATIVE STRATEGY	3	School of Business	This course provides an overview of advertising in the context of integrated marketing. Topics include the development of advertising objectives, creative guidelines, media selection and scheduling, budgeting, and performance evaluation.
MKT 448	WEB ANALYTICS FOR DIGITAL MARKETING	3	School of Business	This course prepares students to understand the appropriate web analytics technologies associated with digital marketing and the key performance indicators and metrics used to determine performance. After completion of this course, students will be able to determine appropriate key performance indicators, apply analytics to segmented strategies, create web analytics reports, and understand research and testing in social media analytics.
MKT 468	CUSTOMER RELATIONSHIP MANAGEMENT	3	School of Business	This course provides students with an understanding of the importance of building and enhancing customer relationships by utilizing best practices and customer relationship management strategies. After completion of this course, students will be able to summarize market segmentation methods, evaluate the strategies of customer acquisition and retention, identify effective customer service techniques, and understand the use of relational databases and customer relationship management software in maintaining customer loyalty.
MKT 498	INTEGRATED MARKETING STRATEGY	3	School of Business	This course provides students with an in depth study of Integrating Marketing Communications (IMC). Emphasis will be placed on strategic roles and the integration of marketing communication tools including advertising, public relations, sales, promotion, event management, media selection, and marketing management.

MKT 544	INTEGRATED MARKETING COMMUNICATIONS	3	School of Business	This course prepares students to apply integrated marketing communications as part of a strategic marketing plan. Students evaluate how marketing communication tools build brand value. Topics include advertising, promotions, public relations, sales, and direct marketing.
MKT 554	CONSUMER BEHAVIOR	3	School of Business	This course prepares students to apply buyer behavior theories in the marketplace. Students evaluate how demographic, psychological, and socio-cultural issues contribute to buyer behavior. Topics include consumer preference, brand perception, attitude formation, persuasion, motivation, and consumer protection.
MKT 562	ADVANCED INTERNATIONAL MARKETING	3	School of Business	This course prepares students to develop and manage a marketing strategy in an international business environment. Students evaluate case studies of previous product launches and current research to create a launch strategy for a specific country. Topics include distribution systems, socio-cultural perspectives, business customs, product and service adaptations, and pricing issues.
MKT 571	MARKETING	3	School of Business	This course prepares students to apply marketing concepts to create and sustain customer value. Students learn to solve marketing problems in a collaborative environment. Topics include market research, customer relationships, branding, market segmentation, product development, pricing, channels, communications, and public relations.

MKT 578	PUBLIC RELATIONS	3	School of Business	This course prepares students to evaluate the use of public relations in meeting organizational objectives. Students will create a response to a given public relations challenge. Other topics include media relations; promotion; public relations tools, publicity, and ethics.
MKT 593	PRODUCT DESIGN AND DEVELOPMENT	3	School of Business	In this content area capstone course students design an innovative product or service that satisfies an unmet consumer need. Students use research methods to identify opportunities or new product features that reflect the latest market trends. Topics include market environmental analysis, marketing strategy, the marketing process, product development, ethics and social responsibility, innovation and diffusion, pricing strategy, and strategic marketing issues.
MKT 711	MARKETING AND MANAGING THE CUSTOMER RELATIONSHIP	3	School of Advanced Studies	This course evaluates how decision makers manage their relationship with their customers and apply their marketing knowledge to the development of products and services. Topics include the prediction of demand in global markets, managing product development, and the role of Internet- based customer information.
MPA 503	PUBLIC ADMINISTRATION INSTITUTIONS AND PROCESSES	3	College of Criminal Justice and Security	This course applies the tools available to UOPX graduate students and the competencies of successful managers to understand the functions of public administration. Students will understand the relationship between the political system and public administration in the creation and implementation of public policy. Other topics, at the state and local level, include executive & legislative branches of government, the evolution of public administration, intergovernmental relationships, and fiscal sources & uses.

MPA 533	LEADING ORGANIZATIONAL CHANGE IN THE PUBLIC SECTOR	3	College of Criminal Justice and Security	This course prepares students to lead change in the public sector. Students will apply leadership theories in the public sector considering the unique role of shared decision making between appointed and elected officials in a political environment. Other topics include culture in the public sector, power, group behavior, financial and nonfinancial motivation, and workplace conflict.
MPA 543	DATA ANALYSIS FOR PUBLIC POLICY AND MANAGEMENT	3	College of Criminal Justice and Security	This course prepares students to analyze information and present it appropriately to diverse stakeholder groups. Students will collect and analyze primary and secondary data to measure effectiveness and efficiency in the delivery of public sector goods and services. Other topics, at the state and local level, include pretesting, post testing, correlation, and forecasting.
MPA 553	PUBLIC FINANCE	3	College of Criminal Justice and Security	This course prepares students to apply the principles of economics to the public sector. Students will create a plan for a public-private partnership to deliver a public good or service. Other topics include, at the state and local level, revenue sources, income redistribution, multilevel government financing, bond issuance, role of nonprofits, and basic micro- and macroeconomic variables.
MPA 563	PUBLIC BUDGETING	3	College of Criminal Justice and Security	In this course students learn the accounting and budgeting tools and theories used in the public sector. Students will analyze the relationship between public policy and the public budget process. Other topics include budgetary decision making, basics of government and not-for-profit accounting, reporting, capital and operating expenditures, and inter-period equity.

MPA 573	PROGRAM EVALUATION	3	College of Criminal Justice and Security	This course prepares students to apply techniques to evaluate public sector programs. Students will be evaluating public sector programs using analytical tools. Other topics, at the state, county and local level, include measures of effectiveness, benchmarks, baselines, performance standards, and customized stakeholder communication and collaboration.
MPA 583	PUBLIC POLICY PLANNING AND IMPLEMENTATION	3	College of Criminal Justice and Security	This course prepares students to trace the development of a public policy. For a selected policy, students will analyze the policy-making process and the challenges that accompany each stage. Other topics, at the state and local level, include public policy planning, policy alternative evaluation, and stakeholder conflicts.
MPA 593	PUBLIC ADMINISTRATION APPLIED PROJECT	3	College of Criminal Justice and Security	Students are required to apply the knowledge learned in the MPA program to a cumulative project.
MPA TM543	LEVERAGING TECHNOLOGY IN THE PUBLIC SECTOR	3	College of Criminal Justice and Security	This course prepares students to leverage technology in support of effective and efficient administration of government. Students will apply technology concepts to enhance self-service tools for citizens while providing data security and respecting privacy concerns. Other topics, at the state and local level, include mobility, database interconnectivity, Internet, intranet and extranet, and data maintenance and retrieval.

MTE 001	Orientation to Teacher Education	0	College of Education	This course is designed to provide an orientation to the primary components of the teacher education program. Students will be introduced to the program's progression and degree completion requirements. Professional dispositions, clinical experience, clinical practice, My Time Log, teacher performance assessment, and technology resources will be discussed.
MTE 501	THE ART AND SCIENCE OF TEACHING	2	College of Education	This course introduces teaching as both an art and a science. Topics for discussion include an historical overview, basic philosophies, professionalism, legal/ethical ramifications, in addition to trends and issues in education. Students will reflect on their motivations to teach and will begin developing a personal philosophy of education.
MTE 503	ORIENTATION TO ALTERNATIVE PATHWAY CERTIFICATE	0	College of Education	This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program's progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and the Student Teacher Performance Assessment will be discussed.
MTE 506	CHILD AND ADOLESCENT DEVELOPMENT	2	College of Education	This course explores the range of issues related to human development from birth through age 18. The focus of the course is on defining the various stages as they impact instructional practice and decisions in a K-12 environment. Emotional, intellectual, physiological, social, and cultural factors are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 507	ORIENTATION TO TEACHER EDUCATION	0	College of Education	This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program's progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.
MTE 507CA	ORIENTATION TO TEACHER EDUCATION	0	College of Education	This course is designed to provide an orientation to the primary components of the Teacher Education Program. Students will be introduced to the program's progression and degree completion requirements. Field Experience, Electronic Resources, E-Portfolio, Student Teaching, and Teacher Work Sample will be discussed.
MTE 510	Professional Knowledge, Skills, and Dispositions	1	College of Education	This course provides learners in the College of Education programs with strategies for academic success within the University of Phoenix adult learning model. Learners will apply written and oral communication principles to their roles as educators, examine research methods for finding and evaluating resources, and develop effective skills in collaboration and critical thinking in preparation for their program and workplace.
MTE 511	Child/Adolescent Growth, Development, and Learning	3	College of Education	This course explores the range of issues that affect human development from birth through age 18. The focus of the course is on defining the various stages of child/adolescent growth and development and how they impact instructional practice and decisions in a K-12 environment. The influence of emotional, intellectual, psychological, social, and cultural factors on student learning are discussed. Peer and family influences, along with issues related to media themes and gender bias, are examined.

MTE 512	Teaching the Exceptional Learner	3	College of Education	This course provides an overview of the categories of exceptionality for school-aged learners with special needs. The teacher candidate will focus on expressive and receptive communication skills and the recognition of individual learning patterns to utilize for the planning, instruction, and assessment strategies of diverse populations. Historical perspectives and information related to special education law and current policies and practices are examined.
MTE 513	Evaluation and Data Literacy	3	College of Education	This course focuses on utilizing effective assessment practices to guide instruction. The fundamentals of assessment, including standardized, formative, summative, and performance assessments and their uses will be discussed. Teacher candidates will effectively analyze and evaluate test and performance data in order to communicate data results ethically and determine learner needs. Additionally, the purpose, methods, and reporting of evaluations are explored.
MTE 516	Foundations of the Professional Educator	3	College of Education	This course introduces teaching as both an art and a science. Teacher candidates will examine the historical foundations of education as well as current issues and trends. Candidates will reflect on their dispositions and motivations to teach and will explore basic philosophies, professionalism, and legal and ethical ramifications in education.
MTE 517	TECHNOLOGY INTEGRATION FOR EDUCATORS	3	College of Education	This course is designed to prepare educators to use technology to inform teaching and learning in middle and high school settings. Teacher candidates create and design effective, relevant, and engaging student learning outcomes across the content areas. Candidates incorporate technology-based instructional strategies into student-centered learning, applying industry standards and fair use guidelines. Educational technology integration and classroom use of digital tools and resources, software applications, and assessments are also examined.

MTE 518	MODELS, THEORIES AND INSTRUCTIONAL STRATEGIES	3	College of Education	This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.
MTE 522	MAINTAINING AN EFFECTIVE LEARNING CLIMATE	3	College of Education	This course examines the strategies used in managing a positive classroom environment within the framework of today's diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.
MTE 522CA	MAINTAINING AN EFFECTIVE LEARNING CLIMATE FOR ELEM SETTINGS	3	College of Education	This course examines the strategies used in managing a positive classroom environment within the framework of today's diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.
MTE 523	MAINTAINING AN EFFECTIVE LEARNING CLIMATE	3	College of Education	This course examines the strategies used in managing a positive classroom environment within the framework of today's diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.

MTE 523CA	MAINTAINING AN EFFECTIVE LEARNING CLIMATE	3	College of Education	This course examines the strategies used in managing a positive classroom environment within the framework of today's diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating students, parent communication, managing disruptive students, and materials management and record keeping. The course focuses on helping teacher candidates to develop an individual classroom management plan appropriate for their targeted grade levels and needs.
MTE 528CA	CURRICULUM CONSTRUCTS AND ASSESSMENT: VISUAL ARTS	3	College of Education	This course explores the theory, application, and strategies of teaching visual art in middle and secondary school. Participants identify the educational needs of students by exploring current instructional theory, national and state standards, assessment practices, aesthetic valuing, artistic perception, and historical and cultural origins that impact art. The course also helps prospective educators develop skills in adapting delivery methods and behavior management plans for individual students and diverse populations. The course will also emphasize classroom management skills and use of technology as they relate to visual art instruction.
MTE 529	READING AND PHONOLOGICAL THEORY	2	College of Education	This course expounds upon the basic premise that systematically integrated phonics instruction is a fundamental component of effective reading programs. Students will study the relevant research and applications that support principles of sequential phonics instruction and phonological awareness and review traditional and contemporary phonics approaches.
MTE 531	CURRICULUM CONST & ASSMT: HISTORY/SOCIAL SCIENCE	2	College of Education	This course defines and provides a context for teaching and assessing K-8 students in the areas of history and social science based on scope, sequence, and national and state standards. Instructional approaches for the content area within the framework of an integrated curriculum are explored, including the use of critical thinking skills and study skills. Students develop alternative assessments and traditional testing tools based on clear criteria, which are designed to yield accurate information on student progress.

MTE 533	CURRICULUM CONSTRUCTS AND ASSESSMENT:SCIENCE AND MATHEMATICS	4	College of Education	This course focuses on the pedagogy and assessment strategies that enhance learning in science and mathematics. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of math and science are explored. This course provides students with an opportunity to develop the ability to evaluate and use instructional methods, curricular materials and resources, and appropriate assessment strategies.
MTE 534	CURRICULUM CONST & ASSMT: VISUAL AND PERFORMING ARTS	2	College of Education	This course defines and provides a context for teaching and assessing students in the area of visual and performing arts based on scope, sequence, and national and state standards. An emphasis is placed on integrating art across the curriculum.
MTE 536	CHILDREN'S LITERATURE	3	College of Education	This course will examine the use of children's literature in the elementary school classroom. Various genres will be studied, as well as the application of children's literature to instruction and assessment in reading. Methods for incorporating the use of children's literature in all content areas will also be examined.
MTE 537	CURRICULUM CONST & ASSMT: PHYSICAL EDUCATION and HEALTH	2	College of Education	This course defines and provides a context for the classroom teacher to teach and assess K-8 students in the area of physical education and health based on a scope and sequence, and on state and national standards. This course includes framework-based teaching strategies effective in helping K-8 students develop a variety of motor skills and abilities, recognize the importance of a healthy lifestyle, gain knowledge of human movement, learn the rules and strategies of games and sports, and develop self-confidence and self-worth. This course also includes framework- based teaching strategies effective in helping K-8 students achieve the goals of lifelong health; understand growth and development; and utilize health-related information, products, and services. Instructional approaches for the integration of physical education and health with other content areas are explored.

MTE 541	LANGUAGE DEVELOPMENT FOR SECONDARY SETTINGS	2	College of Education	This course examines second language acquisition theories, strategies, and the nature of cognitive and affective language development to assist the secondary teacher of the English Language Learner student. The course focuses on language acquisition development within alternative language service programs, and it provides the basis for effective instructional strategies including methods, techniques, and materials to be used with linguistically diverse secondary students. It examines the critical elements of learning issues associated with linguistically diverse students, including the learning styles and interconnected variables that interact in second language learning, thought processes, and the relationship to content mastery. The course also focuses on the structure and use of the English language to ensure oral and written accuracy and correct punctuation and intonation for those working with linguistically diverse secondary populations.
MTE 541CA	LANGUAGE DEVELOPMENT FOR SECONDARY SETTINGS	2	College of Education	This course examines second language acquisition theories, strategies, and the nature of cognitive and affective language development to assist the secondary teacher of the English Language Learner student. The course focuses on language acquisition development within alternative language service programs, and it provides the basis for effective instructional strategies including methods, techniques, and materials to be used with linguistically diverse secondary students. It examines the critical elements of learning issues associated with linguistically diverse students, including the learning styles and interconnected variables that interact in second language learning, thought processes, and the relationship to content mastery. The course also focuses on the structure and use of the English language to ensure oral and written accuracy and correct punctuation and intonation for those working with linguistically diverse secondary populations.
MTE 550	CURRICULUM CONSTRUCTS AND ASSESSMENT: GLOBAL LANGUAGES	3	College of Education	This course explores the application of basic instructional methods to the content area of Global Languages in middle school and high school settings. Participants identify the educational needs of middle level and secondary students by exploring current instructional theory, models, and strategies; state, local, and national standards as they relate to instruction, assessment, and accountability; and cultural issues in the teaching of foreign languages. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.
MTE 551	CURRICULUM CONSTRUCTS AND ASSESSMENT: PHYSICAL EDUCATION	3	College of Education	This course explores the secondary physical education classroom, professionalism, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, national and state standards including the developing motor skills through activities, developing levels of physical fitness, understanding principles of human movement, and developing and practicing social skills and the value of fair play in games and sports. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse student populations. The course will also emphasize classroom and sport/field management skills and safety as they relate to physical education instruction.

MTE 553	INSTRUCTION AND ASSESSMENT OF ENGLISH LANGUAGE LEARNERS	3	College of Education	This course focuses on education for the English Language Learner (ELL). It emphasizes knowledge of and sensitivity to the history and to the culture of other languages and ethnic groups, as well as to multiethnic curriculum and instruction. It provides strategies for effective instruction, including standards-based lesson planning and implementation models, and assessment of linguistically diverse K-12 students. In addition, the course addresses ways in which a learner-centered approach to teaching can provide English Language Learners with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and acquire English.
MTE 556	CURR CONSTR & ASSESS: DISTANCE ED METHODS FOR SEC SCHOOLS	3	College of Education	This course examines methods for incorporating distance learning into middle and high school settings. Various instructional and assessment strategies are explored, along with ethical issues related to the distance education environment. Students are given the opportunity to participate in an interactive, online environment.
MTE 557	LANGUAGE DEVELOPMENT FOR SECONDARY SETTINGS	3	College of Education	This course examines second language acquisition theories, strategies, and the nature of cognitive and affective language development to assist the secondary teacher of the English Language Learner student. The course focuses on language acquisition development within alternative language service programs, and it provides the basis for effective instructional strategies including methods, techniques, and materials to be used with linguistically diverse secondary students. It examines the critical elements of learning issues associated with styles and interconnected variables that interact in second language learning, thought processes, and the relationship to content mastery. The course also focuses on the structure and use of the English language to ensure oral and written accuracy and correct punctuation and intonation for those working with linguistically diverse secondary populations.
MTE 559	CURRICULUM CONSTRUCTS AND ASSESSMENT: SECONDARY METHODS	3	College of Education	This course focuses on the methodology and assessment strategies that enhance learning at the secondary level. Integrated content, interdisciplinary teaching, and curriculum and assessment issues are emphasized. Multiple perspectives of students as learners of secondary content, along with current research on pedagogy, are explored. This course provides students with an opportunity to develop the ability to use and evaluate instructional and curricular materials and appropriate assessment strategies.

MTE 562	ASSESSMENT AND EVALUATION	3	College of Education	This course focuses on developing the skills necessary to become effective assessors. It provides the fundamentals of a variety of classroom assessments, including formative and summative traditional as well as authentic assessments. Learners will focus on using a variety of assessment tools to assist in making instructional decisions. Additionally, the purposes, the methods, and the reporting of evaluations are explored.
MTE 564CA	CURRICULUM CONSTRUCTS AND ASSESSMENT: SECONDARY MATHEMATICS	3	College of Education	This course explores the secondary mathematics classroom, curriculum, and teaching and assessment strategies. Participants identify the educational needs of secondary students by exploring current instructional theory, National Council of Teachers of Mathematics Standards, state standards, and social issues that impact the mathematics classroom. The course also helps prospective educators develop skills in selecting and adapting instruction for diverse student populations. The course will also emphasize classroom management skills as they relate to mathematics instruction.
MTE 566	CURRICULUM CONST & ASSMT: SECONDARY ENGLISH/LANGUAGE ARTS	3	College of Education	This course explores the application of basic instructional methods to the content area of English/language arts in middle level and high school settings. Participants identify the educational needs of middle level and secondary students by exploring current instructional theory, models, and strategies; state, local, and national standards as they relate to instruction, assessment, and accountability; and social issues that impact reading, listening, speaking, and writing in the classroom. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.
MTE 566CA	CURRICULUM CONST & ASSMT: SECONDARY ENGLISH/LANGUAGE ARTS	3	College of Education	This course explores the application of basic instructional methods to the content area of English/language arts in middle school and high school settings. Participants identify the educational needs of middle level and secondary students by exploring current instructional theory, models, and strategies; state, local, and national standards as they relate to instruction, assessment, and accountability; and social issues that impact reading, listening, speaking, and writing in the classroom. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations

MTE 567	CURRICULUM CONST & ASSMT: SECONDARY HISTORY/SOCIAL SCIENCE	3	College of Education	This course explores the application of basic instructional methods and strategies of teaching social studies in middle school and high school settings. Participants identify the educational needs of secondary students by exploring current instructional and assessment theory; national, state, and local standards; and social issues that are found in various social studies courses. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.
MTE 567CA	CURRICULUM CONST & ASSMT: SECONDARY HISTORY/SOCIAL SCIENCE	3	College of Education	This course explores the application of basic instructional methods and strategies of teaching social studies in middle school and high school settings. Participants identify the educational needs of secondary students by exploring current instructional and assessment theory; national, state, and local standards; and social issues that are found in various social studies courses. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.
MTE 569	CURRICULUM CONSTRCTS AND ASSESSMENT: SECONDARY SCIENCE	3	College of Education	This course is designed to prepare students to teach science at the secondary school level. To meet this objective, students will explore the instructional methods in science content areas in middle level and high school settings. Participants will identify the educational needs of secondary students by exploring current instructional theory; national, state, and local standards; and social issues that impact the science classroom. The course also helps prospective educators develop skills in selecting and adapting instruction and management plans for diverse student populations.
MTE 569CA	CURRICULUM CONSTRUCTS AND ASSESSMENT: SECONDARY SCIENCE	3	College of Education	This course is designed to prepare students to teach science at the secondary school level. To meet this objective, students will explore the instructional methods in science content areas in middle level and high school settings. Participants will identify the educational needs of secondary students by exploring current instructional theory; national, state, and local standards; and social issues that impact the science classroom. The course also helps prospective educators develop skills in selecting and adapting instruction and management plans for diverse student populations.

MTE 580	CURRICULUM CONSTRUCTS & ASSESSMENT: SECONDARY BUS & MKTNG	3	College of Education	This course focuses on instruction and assessment strategies to provide secondary students background and knowledge in business/marketing content and careers, employment and workplace skills, applied academics, and leadership skills through participation in career and technical student organizations (CTSOs). This course will provide teacher candidates the opportunity to develop the ability to evaluate and use appropriate instructional methods, curricular materials and resources, and assessment strategies.
MTE 583	STUDENT TEACHING	8	College of Education	This course emphasizes the practical application of educational theories and methods. Participants will focus on the following topics: requirements and expectations for student teaching and teacher performance assessment, the school culture, planning instruction, and teaching planned lessons. The course provides a forum for open discussion and problem solving based on student teaching classroom experiences. Finally, learners will prepare and submit Task 1, 2, and 3 of the teacher performance assessment.
MTE 586	STUDENT TEACHING, PART A	4	College of Education	This course emphasizes the practical application of educational theories and methods. This course will focus on the student teaching experience and the design and implementation of the Teacher Work Sample. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.
MTE 587	STUDENT TEACHING, PART B	4	College of Education	This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.

MTH 110	HISTORY OF MATHEMATICS	1	College of Humanities and Sciences	This one-credit course introduces students to a survey of the history of mathematics, including the background of famous mathematicians from ancient to modern times and their specific contributions to mathematics. The format and content of the course is conceptual rather than technical.
MTH 156	MATH FOR ELEMENTARY TEACHERS I	3	College of Education	This course is the first course of a two-part series designed for K-8 pre-service teachers to address the conceptual framework for mathematics taught in elementary school. The focus of part one will be on real number properties, patterns, operations and algebraic reasoning and problem solving. The relationship of the course concepts to the National Council of Teachers of Mathematics Standards for K-8 instruction is also addressed.
MTH 157	MATH FOR ELEMENTARY TEACHERS II	3	College of Education	This course is the second course in a two-part series designed for K-8 pre-service teachers to address the conceptual framework for mathematics taught in elementary school. The focus of part two will be on measurement, geometry, probability and data analysis. The relationship of the course concepts to the National Council of Teachers of Mathematics Standards for K-8 instruction is also addressed.
MTH 209	COLLEGE MATHEMATICS II	3	College of Humanities and Sciences	This course continues the demonstration and examination of various algebra concepts that was begun in MTH/208: College Mathematics I. It assists in building skills for performing more complex mathematical operations and problem solving than in earlier courses. These concepts and skills should serve as a foundation for subsequent quantitative business coursework. Applications to real-world problems are emphasized throughout the course.

MTH 210	FUNDAMENTALS OF GEOMETRY	3	College of Humanities and Sciences	This course is designed to have students demonstrate the ability to use fundamental concepts of geometry including definitions, basic constructions, tools of geometry, and to recognize geometry as an axiomatic system.
MTH 212	INTRODUCTION TO FINITE MATHEMATICS	3	College of Humanities and Sciences	This course is an introduction to the mathematics available for the study of social and behavioral sciences, and for application in business. Emphasis is placed on the comprehension of problem-solving techniques for the real world. Specific applications in statistics, accounting, finance, and economics are demonstrated and discussed.
MTH 213	Mathematics for Elementary Educators I	3	College of Education	This is the first course of a two-part series designed for K-8 pre-service teachers to address the conceptual framework for mathematics taught in elementary school. The focus of part one will be on real number properties, patterns, operations and algebraic reasoning and problem solving.
MTH 214	Mathematics for Elementary Educators II	3	College of Education	This is the second course in a two-part series designed for K-8 pre-service teachers to address the conceptual framework for mathematics taught in elementary school. The focus of part two will be on measurement, geometry, probability and data analysis.

MTH 215	QUANTITATIVE REASONING I	3	College of Humanities and Sciences	This applications-driven course prepares students to critically analyze and solve problems using quantitative reasoning. Students approach real-world scenarios using numerous reasoning skills and mathematical literacy to draw conclusions.
MTH 216	QUANTITATIVE REASONING II	3	College of Humanities and Sciences	Students apply advanced quantitative reasoning skills to solve real-world problems. This course emphasizes modelling skills, statistical methods, and probability to create, analyze, and communicate solutions.
MTH 217	STATISTICS I	3	College of Humanities and Sciences	Students apply elementary probability theory, descriptive and inferential statistics, and reasoning to real-world situations. The course embeds foundational skill into topics including probability, statistics, and reasoning.
MTH 218	STATISTICS II	3	College of Humanities and Sciences	Students collect, analyze, and interpret data as they examine the role of statistical analysis and statistical terminology. Students also apply appropriate statistical techniques and analytical reasoning in real-world problems to communicate logical arguments and models. The course topics includes probability, statistics, and quantitative reasoning.

MTH 219	INTRODUCTION TO COLLEGE ALGEBRA	3	College of Humanities and Sciences	This course introduces algebraic concepts providing a solid foundation for college algebra. Topics range from properties of real numbers, the order of operations and algebraic expressions to solving equations and inequalities. Additional topics include polynomials, factoring methods, rational and radical expressions as well as graphing and functions.
MTH 220	COLLEGE ALGEBRA	3	College of Humanities and Sciences	This course presents traditional concepts in college algebra. Topics include linear, polynomial, rational, radical, exponential and logarithmic functions, systems of equations sequences, and series.
MTH 221	DISCRETE MATH FOR INFORMATION TECHNOLOGY	3	College of Humanities and Sciences	Discrete mathematics is of direct importance to the fields of Computer Science and Information Technology. This branch of mathematics includes studying areas such as sophisticated forms of counting (combinatorics, etc), set theory, logic, relations, graph theory, and analysis of algorithms. This course is intended to provide students with an understanding of these areas and their use in the field of Information Technology.
MTH 225	PRE-CALCULUS	4	College of Humanities and Sciences	This course prepares students for success in calculus. A brief review of college algebra topics is presented including linear, polynomial, radical, rational and absolute value, functions and equations. Students also examine systems of equations, exponential, logarithmic, and trigonometric functions as well as analytic geometry. In addition, students are introduced to sequences and series.

MTH 280	CALCULUS I	4	College of Information Systems and Technology	This course is an introduction to differential calculus. Students explore limits and continuity. They examine the basic concept of differentiation and practice differentiation techniques. Students develop competence applying differentiation to solve problems. Students also examine simple antiderivatives.
MTH 290	CALCULUS II	4	College of Information Systems and Technology	This course examines integral calculus topics. Students are presented with integration techniques for functions of one variable and more applications of definite integrals. Students explore numerical techniques of integration. Students also examine the area function, Riemann sums and indefinite integrals, and apply these to real-life problems. The course concludes with the fundamental theorem of calculus.
MTH 360	LINEAR ALGEBRA	3	College of Information Systems and Technology	This course provides a survey of the concepts related to linear algebra. Students examine the geometry of vectors, matrices, and linear equations, including Gauss-Jordan elimination. Students explore the concepts of linear independence, rank, and linear transformations. Vector spaces, bases, and change of bases are discussed, including orthogonality and the Gram-Schmidt process. In addition, students investigate determinants, eigenvalues, and eigenvectors.
MTH 380	CALCULUS III	3	School of Business	This course builds on the concepts presented in MTH/310 Calculus I and MTH/320 Calculus II. Students examine functions of more than one variable, curves in space, and Newtonian mechanics in three-dimensions. Students explore partial derivatives and differentials as well as local and global extrema. In addition, students use differentiation techniques for functions of many variables.

MTH 463	APPLIED STATISTICS	3	College of Information Systems and Technology	This course surveys descriptive and inferential statistics with emphasis on practical applications of statistical analysis. The principles of collecting, analyzing, and interpreting data are covered. In addition, this course examines the role of statistical analysis, statistical terminology, the appropriate use of statistical techniques, and interpretation of statistical findings through the applications and functions of statistical methods.
MTH 530	LINEAR ALGEBRA	3	College of Education	The purpose of this course is to provide an introduction to linear algebra, a branch of mathematics dealing with matrices and vector spaces. This course describes the use of linear algebra as a compilation of diverse, but interrelated ideas that provide a way of analyzing and solving problems in many applied fields. Linear algebra has three sides: computational techniques, concepts, and applications. One of the goals of this course is to help you master all of these facets of the subject and see the interplay among them. The material presented in this course involves theorems, proofs, formulas, and computations of various kinds.
MTH 535	GEOMETRY	3	College of Education	This course is designed for students to demonstrate the ability to use fundamental concepts of geometry including definitions, basic constructions, tools of geometry, and to recognize geometry as an axiomatic system. Students will apply theorems to evaluate various problems, analyze the properties of figures, and formulate equations utilizing geometric foundations.
MTH 540	STATISTICS	3	College of Education	This course surveys descriptive and inferential statistics with emphasis on practical applications of statistical analysis. The principles of collecting, analyzing, and interpreting data are covered in this course. It examines the role of statistical analysis, statistical terminology, the appropriate use of statistical techniques, and interpretation of statistical findings through the applications and functions of statistical methods.

MTH 575	MATHEMATICS INSTRUCTION FOR SPECIAL EDUCATION	3	College of Education	This course focuses on the methodology and assessment strategies that enhance learning in mathematics for exceptional learners. Attention is given to an overview of mathematics content and process standards. Emphasis is placed on ranges of abilities and needs, modifications and accommodations, instructional strategies, and classroom management.
NCPDSU 100	Developing a STEAM Unit	0	College of Education	The workshop is designed to support K-12 teachers with STEAM unit design using problem-based learning as the vehicle. Throughout the course of this workshop, participants will design a unit for classroom instruction in the upcoming school year.
NCPSTM 100	Foundations of STEAM Education II	1.5	College of Education	This course will explore STEAM in the classroom, utilizing problem-based learning as the vehicle to teach STEAM. Participants will take a look at arts integration and the engineering design process. Participants will also engage in using a variety of assessment tools in STEAM and how to extend STEAM beyond the classroom through other engagement opportunities.
NRP 505	ROLE OF ADVANCED PRACTICE NURSE	3	College of Health Sciences and Nursing	This course emphasizes the history and development of advanced practice nursing roles and competencies, as well as the organizational and regulatory scope of practice requirements expected in these roles. Students examine the impact and evolution of this role transition, certification, and professional activities as these relate to advanced practice nursing.

NRP 507	ADVANCED PHARMACOLOGY	4	College of Health Sciences and Nursing	This course provides the nurse practitioner student with the information and skills to initiate and monitor drug therapy. This course integrates advanced clinical application of pharmacology and pharmacokinetics, techniques and methods of drug prescribing, approaches to data collection, and problem solving with discussions about drug therapy for common acute and chronic diseases. The practical application of important concepts used in clinical practice for patients across the lifespan is emphasized.
NRP 508	HEALTH POLICY AND ROLE OF THE ADVANCED PRACTICE NURSE	4	College of Health Sciences and Nursing	This course discusses the history and development of advanced practice nursing roles and competencies, as well as the organizational and regulatory scope of practice. Students examine the impact and evolution of role transition, certification, and professional activities. Health care changes and their impact on advanced practice nursing are addressed. The impact of health care policy, managed care, and concepts related to financial responsibility within health care delivery systems are examined. This course provides the health care professional with the necessary strategies to address ethical issues. Research principles applicable to advanced practice nursing are discussed and reinforced.
NRP 511	ADVANCED PATHOPHYSIOLOGY	4	College of Health Sciences and Nursing	This course provides students with advanced anatomy, physiology, and pathophysiology of systems in relation to an individual's health across the lifespan. Focus is on physiological and biological manifestations and adaptive and maladaptive changes. The foundational knowledge gained in this course guides the management of primary care issues of the family and individual.
NRP 513	CLINICAL APPLICATIONS OF THEORY AND RESEARCH	4	College of Health Sciences and Nursing	This course focuses on the critical components of contemporary nursing knowledge, including concepts, statements, metaparadigms, philosophies, conceptual models, and theories. Students evaluate the variety of ways to organize nursing knowledge and explore the implications of their application. Through the clinical application of the course content, students examine the use of theory, nursing research, and nursing knowledge in professional environments.

NRP 516	ADVANCED HEALTH ASSESSMENT	4	College of Health Sciences and Nursing	Emphasis is placed on the advanced practice of history taking, conducting a physical examination, and obtaining and assessing diagnostic data for patients across the life span. Students will learn to justify actual and potential health problems through interpretation and integration of the history, health assessment, and laboratory data. This course incorporates 45 hours of supervised practice laboratory experience, allowing students to utilize the techniques and equipment to perform physical examinations.
NRP 531	ADVANCED HEALTH ASSESSMENT I	4	College of Health Sciences and Nursing	This course emphasizes advanced practice history taking, physical examination, and documentation of those findings for clients across the lifespan. Students learn to develop a health problem list through the integration and interpretation of data obtained during the health history and physical assessment. This course also introduces students to medical billing and coding.
NRP 540	MANAGEMENT OF PEDIATRIC AND ADOLESCENT POPULATIONS	5	College of Health Sciences and Nursing	This course focuses on the management of normal and common pathological conditions for children from birth through adolescence, as an individual and as a family member. The course combines theory and clinical experiences to emphasize assessment, prevention, and management utilizing a holistic model of care. Growth and development, anticipatory guidance, and behavioral theories are emphasized. Identification and application of pharmacological therapies are incorporated. The effects of culture on development, parenting, and health care practices are also evaluated.
NRP 543	MANAGEMENT OF PEDIATRIC AND ADOLESCENT POPULATIONS	4	College of Health Sciences and Nursing	This combined theory and clinical course focuses on the management of normal and common pathological conditions for children from birth through adolescence, as an individual and as a family member. The course combines theory and clinical experiences to emphasize assessment, prevention, and management utilizing a holistic model of care. Growth and development, anticipatory guidance, and behavioral theories are emphasized. Identification and application of pharmacological therapies are incorporated. The effects of culture on development, parenting, and health care practices are also evaluated. This course provides the health care professional with the necessary strategies to address ethical issues specific to pediatric and adolescent populations.

NRP 545A	ADULT AND GERIATRIC MANAGEMENT	4	College of Health Sciences and Nursing	This two-part, combined theory and clinical course focuses on management of common pathological conditions related to the cardiovascular, respiratory, endocrine and neurovascular systems for adults and geriatric patients including implications for the individual as well as the family. Theory and clinical experiences emphasize prevention, disease management, and evaluation of patient outcomes. Identification and application of pharmacological therapies are incorporated.
NRP 545B	ADULT AND GERIATRIC MANAGEMENT	4	College of Health Sciences and Nursing	This two-part, combined theory and clinical course focuses on management of common pathological conditions related to the musculoskeletal, gastrointestinal, hematological, neurological, and genito-urinary systems for adults and geriatric patients including implications for the individual as well as the family. In addition, management of psychiatric issues and skin pathology will be discussed. Theory and clinical experiences emphasize prevention, disease management, and evaluation of patient outcomes. Identification and application of pharmacological therapies are incorporated.
NRP 552	CLINICAL PROCEDURES	2	College of Health Sciences and Nursing	This course provides the theoretical foundation for common office procedures encountered in primary care. Included will be ECG, X-ray, spirometry interpretation, and diagnostic imaging as well as minor surgery and orthopedic procedures. Supervised practice will be provided for selected skills.
NRP 555	ADULT AND GERIATRIC MANAGEMENT I	4	College of Health Sciences and Nursing	This two-part, combined theory and clinical course focuses on the management of common pathological conditions related to the neurological, cardiovascular, and pulmonary systems of adults and geriatric patients, including implications for the individual and the family. Coding and billing are discussed. Theory, research, and clinical experiences guide prevention, disease management, and evaluation of patient outcomes. Identification and application of pharmacological therapies are incorporated. This course provides the health care professional with the necessary strategies to address ethical issues specific to adult and geriatric patients.

NRP 556	ADULT AND GERIATRIC MANAGEMENT II	4	College of Health Sciences and Nursing	This two-part, combined theory and clinical course focuses on the management of common pathological conditions related to the musculoskeletal, gastrointestinal, hematological, and genitourinary systems of adults and geriatric patients, including implications for the individual and the family. The management of psychiatric issues and skin pathology are discussed. Theory, research and clinical experiences emphasize prevention, disease management, and evaluation of patient outcomes. Identification and application of pharmacological therapies are incorporated. This course provides the health care professional with the necessary strategies to address ethical issues specific to adult and geriatric patients.
NRP 560	MANAGEMENT OF WOMEN'S HEALTH ISSUES	4	College of Health Sciences and Nursing	This combined theory and clinical course focuses on management of normal and common pathological conditions that occur in women's health across the lifespan. Special emphasis is placed on disease prevention, reproductive health issues, contraceptive therapies, and normal OB. Students develop a systematic approach to women's health issues based on physiology and pharmacology. Appropriate educational and collaborative skills for the individual and their families will be explored. Management of pharmacological issues will also be addressed.
NRP 563	MANAGEMENT OF WOMEN'S HEALTH ISSUES	4	College of Health Sciences and Nursing	This combined theory and clinical course focuses on management of normal and common pathological conditions that occur in women's health across the lifespan. Special emphasis is placed on disease prevention, reproductive health issues, contraceptive therapies, and normal OB. Students develop a systematic approach to women's health issues based on physiology and pharmacology. Appropriate educational and collaborative skills for the individual and their families are explored. The management of pharmacological issues is addressed. This course provides the health care professional with the necessary strategies to address ethical issues specific to women's health issues.
NRP 566	PRECEPTORSHIP	4	College of Health Sciences and Nursing	This 480-hour precepted clinical course provides students with clinical experiences needed to develop and broaden their clinical skills and judgments. Students will consolidate and refine their acquired skills in assessment and client management in order to attain a level of competency and proficiency that will allow them to function independently in the nurse practitioner role.

NRP 571	ADVANCED HEALTH ASSESSMENT II AND CLINICAL PROCEDURES	4	College of Health Sciences and Nursing	This course is a continuation of NRP/531: Advanced Health Assessment I and provides the theoretical foundation for common office procedures encountered in primary care. ECG, X-ray, spirometry interpretation, and diagnostic imaging, as well as minor surgery and orthopedic procedures are included. Selected skills are practiced under supervision during residency.
NRP 590	FINAL PRECEPTORSHIP	8	College of Health Sciences and Nursing	This course provides students with precepted clinical experiences. Business practices of the independent or semi-independent practitioner, including guidelines and regulations in the advanced practice role, are discussed. Students consolidate and refine their acquired skills in assessment and patient management in order to attain a level of competency and proficiency that will allow them to function in the nurse practitioner role. This course contains additional theory content across the lifespan. This course provides the health care professional with the necessary strategies to address ethical issues. Incorporation of research principles is reinforced throughout the course.
NSE 721	THEORIES OF NURSING EDUCATION	3	School of Advanced Studies	This course examines historical and current theories as a basis for the nursing education curriculum. With a foundation based in major theorists and tenets of the theories, learners analyze select curricula for evidence of the various theories, investigate Implications of the theories applied to nursing education and interpret the interaction of the theories with current and evolving public policy.
NSE 722	INSTRUCTIONAL DESIGN AND CURRICULUM DEVELOPMENT	3	School of Advanced Studies	This course analyzes the models and processes of instruction in nursing education programs. Effective instructional models explore the relationship of theories, standards, teaching strategies and learner outcomes. The importance of curriculum design, delivery, and evaluation are related to program outcomes. Instructional models for diverse populations, improvement of programs, and staff development are a special focus. Learners synthesize systemic teaching-learning models that include schedule, structure, stakeholder involvement, and curricular outcomes. Explication of implicit, hidden, cultural, and institutional aspects of curriculum design and delivery inform the learner's development approach.

NSE 723	MEASUREMENT AND EVALUATION	3	School of Advanced Studies	This course explores program measurement and evaluation models and methods utilized in nursing education and learning organizations. Both formative and summative methods are discussed along with a debate of the merits and faults that apply to each evaluation method. Accreditation issues for nursing programs are a key topic. The influence of leadership style on program evaluation methods is examined. Assumptions of program evaluation and factors affecting reliability and validity are key topics presented and are integral to the measurement and evaluation processes.
NSG 300	INTRODUCTION TO THE SCHOOL OF NURSING	3	College of Health Sciences and Nursing	This introductory course to the School of Nursing is designed to orient students to the nursing curriculum and program. Students will receive an introduction to the simulation laboratory. Students will develop strategies for achieving educational goals that assist them to be successful in the undergraduate program. Strategies for success will include improving test-taking skills, utilizing case studies, and studying test questions that are similar to those of the NCLEX-RN Examination.
NSG 301	TRANSITION TO BACCALAUREATE STUDIES	3	College of Health Sciences and Nursing	This course introduces baccalaureate students to the nursing program and curriculum. Topics include critical thinking, collaboration, research, academic honesty, APA guidelines, and communication skills. A key focus is introducing students to professional nursing resources and university resources designed for student success.
NSG 302	PROFESSIONAL CONTEMPORARY NURSING ROLE AND PRACTICE	3	College of Health Sciences and Nursing	This course introduces the School of Nursing's philosophical framework for professional practice and the baccalaureate role of the nurse as practitioner, leader, and educator. Topics include critical thinking, clinical judgment, collaboration and communication skills, evidenced-based practice and professional values and responsibilities. A key focus is introducing students to professional nursing and behaviors necessary for professional accountability.

NSG 320	PROFESSIONAL NURSING ROLE	3	College of Health Sciences and Nursing	This course provides an overview of nursing and is designed for the practical/vocational nurse to begin transitioning into professional nursing. Historical influences on professional nursing are explored. Critical thinking, clinical judgment, and professional values and responsibilities are examined in the context of the scope of practice for the professional nurse. The nursing process and concepts crucial to role transition are introduced, along with behaviors related to professional and academic accountability. Benner's Theory of novice to expert and the role of the generalist will be explored.
NSG 321	TRANSITION TO BACCALAUREATE NURSING	2	College of Health Sciences and Nursing	In the role of registered nurse, professional nurses use leadership, critical thinking, evidence-based practice, and clinical judgment to design, manage, coordinate, and provide safe care. Evaluating knowledge, skills, and attitudes is crucial to role transition from practical and vocational nursing to baccalaureate-prepared registered nursing. Students will analyze the relationship between critical thinking, clinical reasoning, clinical judgment, and the nursing process; and evaluate the role and scope of practice of the registered nurse.
NSG 330	PHYSICAL ASSESSMENT	4	College of Health Sciences and Nursing	This course builds from previous practical or vocational nursing competencies, knowledge, and skills. It provides the nursing student with the skills in physical, psychosocial, and spiritual assessment of patients across the life span. History taking and data collection are emphasized. Laboratory experiences are included to develop an application of anatomy and physiology concepts to body systems under the supervision of a qualified faculty member. This course includes 30 clinical hours and 8 lab hours.
NSG 331	HEALTH ASSESSMENT	4	College of Health Sciences and Nursing	This course advances the nursing student's skills in health assessment and physical examination. History taking, performing focused assessments, and data evaluation to develop care plans are emphasized.

NSG 340	MEDICAL/SURGICAL NURSING I: ACUTE	5	College of Health Sciences and Nursing	This course builds on previous nursing knowledge and skills to expand into the professional nursing roles related to the medical surgical client experiencing acute health care problems. Management of safe patient care using the nursing process and Watson's Theory of Human Caring is addressed. Watson's Theory will be used by the student to apply critical thinking pathways to individual heath problems. Students are required to successfully complete 75 clinical hours to pass the course that includes immersive simulation learning.
NSG 341	CARE OF THE MEDICAL-SURGICAL PATIENT	6	College of Health Sciences and Nursing	This course prepares students to function as registered nurses in the care of medical- surgical patients. Critical thinking, clinical judgment, and evidence-based decision making in the management of safe patient care are emphasized.
NSG 345	MEDICAL/SURGICAL NURSING II: COMPLEX AND GERIATRICS	5	College of Health Sciences and Nursing	This course focuses on the care of patients with chronic/complex medical/surgical conditions. Students will develop their role of the generalist RN in assessing and managing the continuum of care with the adult and geriatric patient. Students are required to successfully complete 75 clinical hours to pass the course that includes immersive simulation learning.
NSG 347	CARE OF THE MEDICAL-SURGICAL PATIENT II	6	College of Health Sciences and Nursing	This course continues to prepare students to function as registered nurses in the care of medical-surgical patients. Critical thinking, clinical judgment, and evidence-based decision making in the management of safe patient care are emphasized.

NSG 400	THEORETICAL BASIS FOR NURSING PRACTICE	3	College of Health Sciences and Nursing	This course focuses on the conceptual and theoretical aspects of professional nursing practice within the unifying framework of Watson's Theory of Human Caring and its practical applications to practice. The taxonomies of Nursing Diagnosis, Nursing Interventions Classification (NIC), and Nursing Outcomes Classifications (NOC) are introduced. The course examines the application of theories to nursing practice.
NSG 401	THEORY APPLICATION IN NURSING PRACTICE	2	College of Health Sciences and Nursing	This course focuses on the exploration of various theories and their application to professional practice. Watson's theory of human caring is presented as a possible framework to guide baccalaureate nursing practice.
NSG 410	PSYCHIATRIC AND MENTAL HEALTH NURSING	3	College of Health Sciences and Nursing	The focus of this course is the provision of nursing care to the client with alteration in mental health. Watson's Theory of Human Caring will be used to apply critical thinking pathways to the individual with acute and chronic mental health problems. Students are required to successfully complete 45 clinical hours to pass the course that includes immersive simulation learning.
NSG 411	CARE OF THE MENTAL HEALTH PATIENT	4	College of Health Sciences and Nursing	This course focuses on evidence-based care of mental health patients and explores pharmacology and other treatment modalities, medication adherence, and access to care.

NSG 416	THEORETICAL DEVELOPMENT AND CONCEPTUAL FRAMEWORKS	3	College of Health Sciences and Nursing	This course focuses on behaviors, attitudes, and values necessary for theory-based professional nursing practice. The roles of baccalaureate nurses are presented within the frameworks of Watson's theory of human caring and Benner's theory of novice to expert.
NSG 420	COMMUNITY AND FAMILY NURSING	3	College of Health Sciences and Nursing	This course provides the foundation for developing and utilizing theory-based practice for managing the continuum of care required for families. Based on Watson's Theory of Human Caring, the nursing process, and evidence-based practice, the student develops the skills to provide family-centered outcomes. Students will demonstrate the ability to recognize the dimensions of multicultural diversity within the community and how it affects the family. Students are required to successfully complete 45 clinical hours to pass the course that includes immersive simulation learning.
NSG 421	CARE OF THE FAMILY AND COMMUNITY	4	College of Health Sciences and Nursing	?This course addresses the role of nursing in community and public health. Topics include theories and models of community and public health nursing, diversity, advocacy, family and community assessment, and health education. A key focus is evidence-based health promotion and preventive care of individuals, families, and communities.
NSG 425	NURSING ETHICS AND PROFESSIONALISM	4	College of Health Sciences and Nursing	This course addresses ethical aspects of the professional nurse's role in health care delivery and management. Topics include interprofessional collaboration and communication, ethical and professional responsibilities, state Nurse Practice Acts, and decision-making models. Students are required to successfully complete 45 clinical hours.

NSG 426	INTEGRITY IN PRACTICE: ETHIC AND LEGAL CONSIDERATIONS	3	College of Health Sciences and Nursing	This course addresses ethical aspects of the professional nurse's role in healthcare delivery and management. Topics include ethical and legal principles, ethical decision-making, standards of care, scope of practice, state Nurse Practice Acts, and Code of Ethics.
NSG 430	EVIDENCE-BASED PRACTICE & INFORMATION TECH IN HEALTH CARE	4	College of Health Sciences and Nursing	Students will compare and contrast nursing research and evidence-based practice. The focus of the course examines nursing practices related to patient safety and quality of patient care. The effect of technology in health care delivery will be explored in relation to patient safety. Students are required to successfully complete 15 clinical hours to pass the course.
NSG 431	EVIDENCE-BASED PRACTICE AND INFORMATICS	3	College of Health Sciences and Nursing	This course focuses on the research process as a foundation for evidence-based practice. Data compilation and analysis for problem identification, evaluation of interventions, and patient outcomes are explored.
NSG 435	MATERNAL - CHILD NURSING	4	College of Health Sciences and Nursing	This course focuses on the use of Watson's Theory of Human Caring in the care of the material-child dyad and family. Students are required to successfully complete 60 clinical hours to pass the course to include immersive simulation learning.

NSG 436	CARE OF THE MATERNAL-CHILD PATIENT	4	College of Health Sciences and Nursing	This course focuses on evidence-based nursing care of childbearing patients, newborns, and their families during prenatal, antepartum, and postpartum phases of care.
NSG 440	PEDIATRIC NURSING	4	College of Health Sciences and Nursing	This course focuses on the utilization of Watson's Theory of Human Caring with patients from birth to 18 years. Students will examine the management of acute and chronic illness in the pediatric patient in a variety of settings. The understanding of human growth and development is the foundational framework for the course. Students are required to successfully complete 60 clinical hours to pass the course that includes immersive simulation learning.
NSG 441	CARE OF THE PEDIATRIC PATIENT	4	College of Health Sciences and Nursing	This course focuses on evidence-based care of pediatric and adolescent patients experiencing acute and chronic illnesses in a variety of care settings.
NSG 447	CARE OF THE COMPLEX MEDICAL-SURGICAL PATIENT	6	College of Health Sciences and Nursing	This course prepares students to function as registered nurses in the care of medically complex patients. This course advances the critical thinking, clinical judgment, and evidence-based decision making skills developed during the previous two medical-surgical courses.

NSG 450	EPIDEMIOLOGY AND GLOBAL HEALTH	3	College of Health Sciences and Nursing	Epidemiology provides the basis for significant public and global health decisions. Through the use of global statistics and the exploration of epidemiology, students will track the natural history of a disease and identify its frequency, distribution, and cause for the purpose of understanding issues related to global and public health. Students are required to successfully complete 45 clinical hours to pass the course that includes immersive simulation learning.
NSG 451	PROFESSIONAL NURSING LEADERSHIP PERSPECTIVES	3	College of Health Sciences and Nursing	This course analyzes the role of the contemporary nurse as a leader and manager in the profession and health care industry. Topics include managing heath care resources, assessing quality and risk in patient care, and decision-making models.
NSG 452	PUBLIC AND GLOBAL HEALTH	4	College of Health Sciences and Nursing	This course explores public and global health issues relevant to professional nursing practice. Topics include social responsibility and determinants of health, epidemiology, disease prevention and health promotion for at- risk populations, and national and global health organizations. A key focus is the application of evidence-based public health principles.
NSG 456	RESEARCH OUTCOMES MANAGEMENT FOR THE PRACTICING NURSE	3	College of Health Sciences and Nursing	This course emphasizes the role of research outcomes in evidenced-based nursing practice. Topics include formulating research questions, collecting, summarizing, and interpreting data, and understanding the elements of research design. The key concept is the role of nursing in research analysis for improving practice environments and patient outcomes.

NSG 468	INFLUENCING QUALITY WITHIN HEALTHCARE	3	College of Health Sciences and Nursing	This course examines quality management processes, functions, and tools that improve health systems and outcomes. Topics include nursing sensitive indicators, core measures, Quality & Safety Education for Nurses (QSEN) competencies, and legislative mandates. Key concepts are patient safety, quality improvement, and accountability to quality performance.
NSG 470	NURSING LEADERSHIP AND MANAGEMENT	4	College of Health Sciences and Nursing	This course emphasizes leadership and management theory including systems theory, leadership styles, and organizational change in a variety of health care settings. The course provides students with tools to assume various responsibilities in delegation, managing change, and patient advocacy. Students are required to successfully complete 60 clinical hours to pass the course that includes immersive simulation learning.
NSG 471	NURSING LEADERSHIP AND MANAGEMENT	4	College of Health Sciences and Nursing	This course examines the role of the nurse as leader and manager. Managing health care resources, assessing quality and risk in patient care, interprofessional collaboration, and decision-making models are explored.
NSG 478	PROMOTING HEALTHY COMMUNITIES	4	College of Health Sciences and Nursing	This course addresses the role of nursing in community and public health. Topics include theories and models of community and public health nursing, diversity, advocacy, family and community assessment, and health education. A key focus is health promotion and preventive care of individuals, families, and communities. Students are required to successfully complete 45 clinical hours.

NSG 478CA	Promoting Healthy Communities	4	College of Health Sciences and Nursing	This course addresses the role of nursing in community and public health. Topics include theories and models of community and public health nursing, diversity, advocacy, family and community assessment, and health education. A key focus is evidence-based health promotion and preventive care of individuals, families, and communities. This course is designed for residents of the state of California.
NSG 480	NURSING SYNTHESIS	4	College of Health Sciences and Nursing	This capstone course provides opportunities for students in their final course of study to analyze and synthesize content and experience from all nursing courses. This course requires the student to prepare, practice, and test for the national examination for registered nurses. This course prepares the student for the application process for RN licensure.
NSG 481	INFLUENCING NURSING PRACTICE	2	College of Health Sciences and Nursing	Students integrate knowledge of nursing practice and synthesize program knowledge to prepare for national licensure.
NSG 482	PROMOTING HEALTHY COMMUNITIES	3	College of Health Sciences and Nursing	This course addresses the role of nursing in community and public health. Topics include theories and models of community and public health nursing, diversity, advocacy, family and community assessment, and health education. A key focus is health promotion and preventive care of individuals, families, and communities.

NSG 482CA	Promoting Healthy Communities	3	College of Health Sciences and Nursing	This course addresses the role of nursing in community and public health. Topics include theories and models of community and public health nursing, diversity, advocacy, family and community assessment, and health education. A key focus is health promotion and preventive care of individuals, families, and communities. This course is designed for residents of the state of California.
NSG 485	PUBLIC HEALTH: HEALTH PROMOTION AND DISEASE PREVENTION	4	College of Health Sciences and Nursing	This course explores public and global health issues relevant to professional nursing practice. Topics include social responsibility and determinants of health; epidemiology, disease prevention, and health promotion for populations at risk; and national and global health organizations. A key focus is the application of public health principles. Students are required to successfully complete 45 clinical hours.
NSG 485CA	Public Health: Health Promotion and Disease Prevention	4	College of Health Sciences and Nursing	This course explores public and global health issues relevant to professional nursing practice. Topics include social responsibility and determinants of health; epidemiology, disease prevention, and health promotion for populations at risk; and national and global health organizations. A key focus is the application of public health principles. This course is designed for residents of the state of California.
NSG 486	PUBLIC HEALTH: HEALTH PROMOTION AND DISEASE PREVENTION	3	College of Health Sciences and Nursing	This course explores public and global health issues relevant to professional nursing practice. Topics include social responsibility and determinants of health, epidemiology, disease prevention and health promotion for at- risk populations, and national and global health organizations. A key focus is the application of public health principles.

NSG 486CA	Public Health: Health Promotion and Disease Prevention	3	College of Health Sciences and Nursing	This course explores public and global health issues relevant to professional nursing practice. Topics include social responsibility and determinants of health, epidemiology, disease prevention and health promotion for at-risk populations, and national and global health organizations. A key focus is the application of evidence-based public health principles. This course is designed for residents of the state of California.
NSG 495	SENIOR LEADERSHIP PROJECT	4	College of Health Sciences and Nursing	In this capstone course, students integrate and synthesize the content and experiences from all nursing courses into a final leadership project. Students are required to successfully complete 45 clinical hours.
NSG 498	SENIOR LEADERSHIP PRACTICUM	3	College of Health Sciences and Nursing	In this capstone course, students integrate and synthesize the content and experiences from all nursing courses into a final leadership project.
NSG 500	AN INTEGRATED APPROACH TO PATHOPHYSIOLOGY AND PHARMACOLOGY	4	College of Health Sciences and Nursing	This course presents an integrated approach to pathophysiology, pharmacokinetics, and pharmacodynamics of medications throughout the life span. A key focus is developing clinical decision-making skills essential to safe and effective pharmacological intervention based on pathophysiology. Topics include a holistic approach to changes associated with disease states, improving physiological status through nursing interventions, and the nurse's role in health promotion and disease management.

NSG 501	PATHOPHYSIOLOGY, ASSESSMENT VARIABLES AND PHARMACOLOGY I	3	College of Health Sciences and Nursing	This course presents an integrated approach to pathophysiology, pharmacokinetics, and pharmacodynamics of medications throughout the life span. A key focus is developing clinical decision-making skills essential to safe and effective pharmacological intervention based on pathophysiology. Topics include a holistic approach to changes associated with disease states, improving physiological status through nursing interventions, and the nurse's role in health promotion and disease management.
NSG 502	PATHOPHYSIOLOGY, ASSESSMENT VARIABLES AND PHARMACOLOGY II	3	College of Health Sciences and Nursing	This course presents theories and techniques for performing and documenting comprehensive health assessments across the life span. Topics include physiological, psychological, spiritual, sociocultural, and developmental variables of patients. This course requires 10 lab hours allowing students to demonstrate a complete health assessment.
NSG 505	COMPREHENSIVE HEALTH ASSESSMENT	3	College of Health Sciences and Nursing	This course presents theories and techniques for performing and documenting comprehensive health assessments across the life span. Topics include physiological, psychological, spiritual, sociocultural, and developmental variables of patients. This course requires 10 lab hours allowing students to demonstrate a complete health assessment.
NSG 511	CONTEMPORARY NURSING PRACTICE	3	College of Health Sciences and Nursing	This course emphasizes the School of Nursing's philosophical framework for professional practice and the role of the graduate nurse as practitioner, leader, and researcher. Topics include conceptual models, nursing theory, theory frameworks, conceptual terms, and the utility and application of nursing theories in practice. A key focus is introducing students to various conceptual perspectives to guide new ideas, research questions, and interpretations in nursing practice.

NSG 512	NURSING RESEARCH	3	College of Health Sciences and Nursing	This course focuses on the role of the graduate nurse in research processes and evidence-based nursing practice. The key concepts focus on the process of translating knowledge influenced from quantitative and qualitative research into clinical guidelines. Topics include research methodologies and designs, statistical measures, data analysis and the role of the nurse as scientist.
NSG 513	INTER-PROFESSIONAL LEADERSHIP AND MANAGEMENT	3	College of Health Sciences and Nursing	This course integrates the principles, theories, and models of leadership used in advanced nursing roles. A key focus is determining one's personal identity as a nurse leader. Topics include complexities in health delivery systems, leadership in the current health care environment, and the future of nursing.
NSG 514	HEALTH LAW, POLICY, ETHICS, AND GLOBAL TRENDS	3	College of Health Sciences and Nursing	This course analyzes the role of the graduate- level nurse as a leader in the profession as a steward of financial management. Topics include principles in financial and resource management, budgetary cost controls, fiscal responsibility, and healthcare policies and reform. A key concept is the interrelationship among health policy, legislation, regulation, finance, and practice.
NSG 516AD	PRACTICUM I	3	College of Health Sciences and Nursing	The capstone experience for the Master of Nursing programs is offered through a set of two (3-credit, 30-practicum hour) courses: NSG/516 and NSG/517. Together, these courses guide the student through the following stages of the practicum project; needs assessment, development plan, implementation, deconstruction, evaluation, and dissemination.

NSG 516ED	PRACTICUM I	3	College of Health Sciences and Nursing	The capstone experience for the Master of Nursing programs is offered through a set of two (3-credit, 30-practicum hour) courses: NSG/516 and NSG/517. Together, these courses guide the student through the following stages of the practicum project; needs assessment, development plan, implementation, deconstruction, evaluation, and dissemination.
NSG 516IN	PRACTICUM I	3	College of Health Sciences and Nursing	The capstone experience for the Master of Nursing programs is offered through a set of two (3-credit, 30-practicum hour) courses: NSG/516 and NSG/517. Together, these courses guide the student through the following stages of the practicum project; needs assessment, development plan, implementation, deconstruction, evaluation, and dissemination.
NSG 517AD	PRACTICUM II	3	College of Health Sciences and Nursing	The capstone experience for the Master of Nursing programs is offered through a set of two (3-credit, 30-practicum hour) courses: NSG/516 and NSG/517. Together, these courses guide the student through the following stages of the practicum project; needs assessment, development plan, implementation, deconstruction, evaluation, and dissemination.
NSG 517ED	PRACTICUM II	3	College of Health Sciences and Nursing	The capstone experience for the Master of Nursing programs is offered through a set of two (3-credit, 30-practicum hour) courses: NSG/516 and NSG/517. Together, these courses guide the student through the following stages of the practicum project; needs assessment, development plan, implementation, deconstruction, evaluation, and dissemination.

NSG 517IN	PRACTICUM II	3	College of Health Sciences and Nursing	The capstone experience for the Master of Nursing programs is offered through a set of two (3-credit, 30-practicum hour) courses: NSG/516 and NSG/517. Together, these courses guide the student through the following stages of the practicum project; needs assessment, development plan, implementation, deconstruction, evaluation, and dissemination.
NSG 525	ROLE OF THE NURSE EDUCATOR	3	College of Health Sciences and Nursing	This course examines the role of the nurse educator in research, education, community, service, and practice. Topics focus on emerging trends and issues that influence nursing education and the rights and responsibilities inherent in educational positions. This course requires 20 hours of clinical practicum.
NSG 530	THEORY AND PRINCIPLES OF NURSING EDUCATION	4	College of Health Sciences and Nursing	This course focuses on andragogy, educational frameworks, and learning theories. A key focus is for nurse educators to understand how students acquire knowledge. Topics include teaching strategies in diverse settings for nursing education. This course requires 20 hours of clinical practicum.
NSG 531	PROGRAM AND COURSE DEVELOPMENT	3	College of Health Sciences and Nursing	Nurse educators are responsible for creating programs and courses for diverse settings while aligning to multiple regulations and standards for nursing education. Completing a needs assessment and developing effective programs and courses through a systematic framework is critical. Learners will evaluate instructional methods and theories for teaching and learning and will differentiate between the strategies used to develop, implement, and evaluate educational programs.

NSG 532	INNOVATIVE CURRICULUM DESIGN	3	College of Health Sciences and Nursing	Developing curriculum that aligns to the program's mission, standards, and outcomes is important in creating an effective program. Delivering curriculum to a diverse population in an organized fashion, taking into consideration the best modality for delivery, promotes engagement and critical thinking skills. Learners will analyze current trends and issues in curriculum design, evaluate innovations and technologies used to develop engaging curriculum, and determine best practices for course improvement.
NSG 533	EDUCATIONAL ASSESSMENT AND EVALUATION	3	College of Health Sciences and Nursing	Nurse educators count on reliable and valid information to evaluate the effectiveness of an educational program. Thoughtful creation of evaluation tools that align to an educational taxonomy is an important step in order to obtain qualitative and quantitative data that informs the nurse educator about how well learners are performing. Communicating assessment and evaluation results to others, and gaining their input, provides the nurse educator the opportunity to make curricular improvements based on stakeholder feedback. Learners will evaluate assessment methods used to measure performance and improve educational programs, and develop a communication strategy to share results with stakeholders.
NSG 534	FACILITATING ENGAGED LEARNING	3	College of Health Sciences and Nursing	Nurse educators use instructional design approaches to build effective courses with engaging activities and assignments. Creating interesting and innovative materials for learners and faculty is critical for learning success. Using technologies in the classroom, regardless of the delivery modality, provides learners and faculty with the most up-to-date educational resources available. Learners will analyze the systematic model of analysis, design, development, implementation, and evaluation to create instructional products and solutions.
NSG 535	CURRICULUM DEVELOPMENT	3	College of Health Sciences and Nursing	This course focuses on curriculum design and development theories and research. A key focus is preparing educators to meet learning needs of students in changing social, cultural, and technological environments. Topics focus on aligning curriculum and course design to program mission, objectives, and outcomes. This course requires 20 hours of clinical practicum.

NSG 536	Practicum Elective I	3	College of Health Sciences and Nursing	This course provides the nursing informatics student the opportunity for the application of knowledge and skills to a second practicum project. There are 75 practicum hours required in the course. These additional practicum hours are to assist the nursing informatics student in partially meeting the national certification eligibility requirements of faculty-supervised practicum hours in informatics nursing. The practicum hours must be focused on a nursing informatics project that will advance knowledge and skill to prepare the student for practice in informatics.
NSG 537	Practicum Elective II	3	College of Health Sciences and Nursing	This course provides the nursing informatics student the opportunity for the application of knowledge and skills to a third practicum project. There are 75 practicum hours required in the course. These additional practicum hours are to assist the nursing informatics student in partially meeting the national certification eligibility requirements of faculty-supervised practicum hours in informatics nursing. The practicum hours must be focused on a nursing informatics project that will advance knowledge and skill to prepare the student for practice in informatics.
NSG 540	INSTRUCTIONAL DESIGN AND TECHNOLOGY	3	College of Health Sciences and Nursing	This course examines instructional design and development theories and research as a necessary foundation for meeting goals of outcome-based curriculum. Topics include current instructional design models and learning theories. Students apply the systematic process of analysis, design, development, implementation, and evaluation to create instructional products and solutions. This course requires 20 hours of clinical practicum.
NSG 541	DATA ANALYSIS AND MANAGEMENT	3	College of Health Sciences and Nursing	The course challenges the student to manage data generated from the electronic health record. Data management may require recommendations for additional data or how to sort current data to obtain information necessary for comprehensive analysis which supports quality initiatives, risk management, or data trends.

NSG 542	INFORMATION WORKFLOW	3	College of Health Sciences and Nursing	This course requires the student to define patterns of workflow in order to manage data. There is a necessity to knowing what data will be needed by various departments within the organization. The student will demonstrate the ability to develop a plan for data distribution.
NSG 543	DATABASE MANAGEMENT	3	College of Health Sciences and Nursing	This course engages the student in management of databases to develop forms, tables, reports and queries. Database models will be explored. Data mining techniques will be explored to discover new knowledge that may be hidden in the stored data. Query will explored as a tool to manipulate data.
NSG 544	EVALUATION AND APPLICATION OF INFORMATION	3	College of Health Sciences and Nursing	This course explores the use of data for the purposes of strategic planning, reimbursement, rules and regulations, accreditation, and disease surveillance. Measures to assure data quality and validity will be explored.
NSG 545	ASSESSMENT, MEASUREMENT, AND EVALUATION	3	College of Health Sciences and Nursing	The course presents the use of statistical designs, qualitative data, and quantitative data in determining educational outcomes. A key focus is on assessment, measurement, and evaluation of clinical practice and nursing curriculum. This course requires 20 hours of clinical practicum.

NSG 547	HUMAN RESOURCES MANAGEMENT	3	College of Health Sciences and Nursing	This course focuses on the nurse administrator's role for supervising the nursing personnel and support staff. The topics covered are common to nurse administrators. They include: responsibilities for recruitment, scheduling, counseling, coaching, mentoring, developing and evaluating nursing staff and support personnel. The legal implications surrounding interviewing, hiring, managing and terminating employment will also be explored.
NSG 550	ROLE OF THE NURSE ADMINISTRATOR	3	College of Health Sciences and Nursing	This course introduces the role of the nurse administrator in health care organizations. Topics include organizational theory, performance, and structure; change management; systematic processes; and human resource management. This course requires 20 hours of clinical practicum.
NSG 557	ORGANIZATIONAL DYNAMICS AND SYSTEMS THINKING	3	College of Health Sciences and Nursing	This course focuses on organizational effectiveness, systems management. The role of the nurse leader during organizational change. A key focus is the effect of change on health care delivery Principles and models of change will be explored.
NSG 567	FINANCIAL RESOURCES MANAGEMENT IN HEALTH CARE	3	College of Health Sciences and Nursing	This course engages the student in the processes of budget preparation, analysis, and monitoring are essential for analyzing the financial performance of an organization, service, or system. Emphasis is placed upon the use of resources to support organizational mission and strategic vision.

NSG 577	CONTINUOUS QUALITY MONITORING AND OUTCOMES IMPROVEMENT	3	College of Health Sciences and Nursing	This course focuses on identification of quality markers within health care. The learner will utilize data to support development and evaluation of performance measures. The many variables which impact quality will also be considered.
NSG 580	PRACTICUM	4	College of Health Sciences and Nursing	This capstone course integrates and synthesizes concepts addressed throughout the program. Students finalize and present a completed project including an implementation and evaluation plan. This course requires 80 hours of clinical practicum.
NTC 245	FOUNDATION OF LOCAL AREA NETWORKS	3	College of Information Systems and Technology	This foundational course covers local area network topics including rationale for networking, Open Systems Interconnection (OSI) models, common network topologies and architecture, client/server concepts, basic hardware devices and usage, and basic networking security concepts.
NTC 248	FOUNDATIONS OF NETWORKING	3	College of Information Systems and Technology	This course introduces the basic interconnections for all computers from home computer systems, to multinational businesses, the Internet. In this course, you'll learn about network architecture including network infrastructure implementation, addressing schemas, routing, unified communications, and cloud computing and virtualization. This course covers the objectives for certification exam CompTIA Network+ N10-006.

NTC 255	STORAGE AND MANAGEMENT OF DATA	3	College of Information Systems and Technology	This course introduces fundamental concepts and practices for information storage and management in cloud, virtualization, and class networking environments. Included are elements and practices of data centers, information storage networking technology, storage systems, and business continuity practices. Also addressed are management and security in information storage infrastructures.
NTC 260	FOUNDATIONS OF CLOUD SERVICES	3	College of Information Systems and Technology	This course introduces practices in cloud infrastructure and services. Covered are a cloud computing model, layers of cloud computing, and functions of cloud computing. Included are fundamental layers of cloud infrastructure: physical, virtual, control, orchestration, and service. Also included are cross-layer functions of cloud infrastructure: business continuity, security, and service management.
NTC 275	STORAGE MANAGEMENT CAPSTONE	3	College of Information Systems and Technology	This is the capstone course for information storage management. The course provides students with the opportunity to integrate and apply learning from their program of study in a comprehensive manner. Students will demonstrate competency and skills in the monitoring and management of information storage infrastructure, explain and use relevant network security concepts, and apply cloud interface standards and protocols for building cloud infrastructure.
NTC 300	CLOUD TECHNOLOGIES	3	College of Information Systems and Technology	This course provides an introduction to how data is architected and organized. It discusses the different data models used to store data, it outlines several schemas that drive how data is structured, and provides other database concepts relating to the design and architecture of data.

NTC 302	NETWORK WEB SERVICES	3	College of Information Systems and Technology	This course focuses on Network Web Services with a specific focus on Amazon Web services. The courses will help an IT professional identify and gather requirements in order to define a Web Services solution to be built using architecture best practices and to be capable of providing guidance on architectural best practices to developers and system administrators throughout the lifecycle of the web services project.
NTC 320	NETWORK DESIGN ASSOCIATE	3	College of Information Systems and Technology	This course provides an intensive workshop where the student will gain the hands-on experience required to help pass the CISCO CCDA: Cisco Certified Design Associate certification exam. Topics include: understanding the methodology used to design a network; describing network structure and modularity; and designing enterprise campus networks, enterprise edge and remote network modules, IP addressing and routing protocols, and network services.
NTC 324	WINDOWS SERVER CONFIGURATION	3	College of Information Systems and Technology	This course provides students with the knowledge and skills necessary to install and configure Windows Servers 2012. The course covers Server Roles Configuration, Server Virtualization Configuration, Network Services Configuration, and Directory Services Administration & Group Policy.
NTC 326	ADMINISTERING WINDOWS SERVER	3	College of Information Systems and Technology	This course provides students with the knowledge and skills necessary to administer Windows Servers. The course covers Server Maintenance, Print and File Services Configuration, Manage Network Services, Server Policy Infrastructure, and Manage Directory Services & Group Policy.

NTC 328	ADVANCED WINDOWS SERVICES	3	College of Information Systems and Technology	This course provides students with the knowledge and skills necessary to configure advanced Windows services. The course covers High Availability, Server File and Storage, Business Continuity, Advanced Network Services and Directory Infrastructure & Access Solutions.
NTC 361	NETWORK AND TELECOMMUNICATIONS CONCEPTS	3	College of Health Sciences and Nursing	This course provides an overview of telecommunication systems in a business health care environment. Topics include voice communications, and standards, transmission, networks, and internetworking.
NTC 362	FUNDAMENTALS OF NETWORKING	3	College of Information Systems and Technology	This course provides a foundation in the basic telecommunications and networking technologies fundamental to the industry and to the broad field of telecommunications. Analog, digital, and radio frequency technologies are covered. Also covered in this course is an introduction to the OSI protocol model, network-switching systems, basics of wireless communications, and network security.
NTC 405	TELECOMMUNICATIONS AND NETWORKING I	3	College of Information Systems and Technology	This course is designed to provide the fundamentals of basic telecommunications including an introduction to standards, organizations, and governing bodies, and concepts such as TCP/IP, modulation or demodulation, and terminology for telecommunications and computer networks. The basics of analog and digital circuits are analyzed. Complex digital equipment, such as multiplexers, is introduced. The course is completed with an overview and analysis of various network topologies and network operating systems explaining how the electronic concepts assist in network troubleshooting.

NTC 406	TELECOMMUNICATIONS AND NETWORKING II	3	College of Information Systems and Technology	NTC/406 provides analysis of the seven levels of the OSI model as the basis for analysis and discussion of network protocols. Each level of the OSI model is analyzed in detail the related theory being applied to specific applications in the industry.
NTC 409	GLOBAL NETWORK ARCHITECTURE AND DESIGN	3	College of Information Systems and Technology	This course addresses the fundamentals of network design and analysis with an emphasis on network traffic. The network design techniques necessary for LAN and WAN implementations are covered. The concept of service levels, the provisioning of and importance of service levels are analyzed.
NTC 411	GLOBAL NETWORK MANAGEMENT, SUPPORT AND SECURITY	3	College of Information Systems and Technology	NTC/411 broadens network design and analysis to include global considerations for an enterprise network configuration. This course introduces the topic of overall end-to-end network management, the concepts and the available tools to the network designer. The development and management of the relationships between the enterprise and the WAN providers is discussed Network security, Disaster Recovery, and Business Continuity planner is also address in this course.
NTC 415	NETWORK INTEGRATION PROJECT	3	College of Information Systems and Technology	The focus of this course is the application of network design and performance concepts. The design considerations for a global network, including LANs and WANs with both wired and wireless functionality will be applied. End-to- end performance criteria and service levels guarantees will examined as a part of network design project. Network capabilities to handle varying types of traffic from low speed data to large image files and streaming video and digital voice will be explored.

NTC 425	NETWORKING AND SECURITY IN HEALTH INFORMATION SYSTEMS	3	College of Information Systems and Technology	This course covers the concepts of health information security and networking. Content includes governmental regulations, data security, and working with Health Information Exchange systems. Coursework explores contingency planning, network architecture, hardware, and system security concepts.
NUR 440	HEALTH ASSESSMENT AND PROMOTION FOR VULNERABLE POPULATION	3	College of Health Sciences and Nursing	This course is designed to assist professional nurses in developing interviewing skills, refinement of a health assessment, and preventative health interventions when working with diverse and vulnerable populations. The importance of therapeutic communication in performing a health assessment is emphasized.
NUR 440CC	HEALTH ASSESSMENT AND PROMOTION FOR VULNERABLE POPULATIONS	3	College of Health Sciences and Nursing	This course is designed to assist professional nurses in developing interviewing skills, refinement of a health assessment, and preventative health interventions when working with diverse and vulnerable populations. The importance of therapeutic communication in performing a health assessment is emphasized.
NUR 443	EVIDENCE-BASED NURSING RESEARCH AND PRACTICE	3	College of Health Sciences and Nursing	This course will focus on current review of nursing research literature and research utilization through evidence-based practice. Three areas of research competencies will be examined which include interpreting and using research in nursing practice, evaluating research, and conducting research.

NUR 443CC	EVIDENCE-BASED NURSING RESEARCH AND PRACTICE	3	College of Health Sciences and Nursing	This course will focus on current review of nursing research literature and research utilization through evidence-based practice. Three areas of research competencies will be examined which include interpreting and using research in nursing practice, evaluating research, and conducting research.
NUR 492	SENIOR PRACTICUM: LEADERSHIP AND MANAGEMENT	4	College of Health Sciences and Nursing	This course will provide the student the opportunity to synthesize previous knowledge and skills in a supervised practicum experience with the guidance and approval of the faculty. The final project will integrate the academic and practical knowledge the students have acquired in their program. This course contains 25 hours of clinical experience.
NUR 492CC	SENIOR PRACTICUM: LEADERSHIP AND MANAGEMENT	4	College of Health Sciences and Nursing	This course will provide the student the opportunity to synthesize previous knowledge and skills in a supervised practicum experience with the guidance and approval of the faculty. The final project will integrate the academic and practical knowledge the students have acquired in their program. This course contains 25 hours of clinical experience.
NUR 531	INFLUENCING THE FUTURE OF NURSING AND HEALTH CARE	3	College of Health Sciences and Nursing	The role of advanced practice nurses in today's health care environment provides numerous opportunities and responsibilities. Nursing's potential for improving the health of individuals, families, groups, and communities is examined. Strategies for involvement in shaping health care police are developed.

NUR 540C	NP PEDIATRIC PRECEPTORSHIP CLINICAL	0	College of Health Sciences and Nursing	This is a non-credit bearing course for the faculty schedulers to use to track faculty supervision of student clinical courses. This course will not be used for students.
NUR 542	DYNAMICS OF FAMILY SYSTEMS	2	College of Health Sciences and Nursing	Family systems theories and models are used to understand the impact of nuclear families on professional and personal relationships, as well as on society. These theories and models are used as well to develop strategies for promoting and monitoring the health of families.
NUR 544	POPULATION-FOCUSED HEALTH CARE	3	College of Health Sciences and Nursing	Theories, principles, and strategies of population-based health care are used to design, implement, and evaluate services and plans of care to promote, maintain, and restore health in a defined population. Students focus on population aggregates in structured or unstructured settings across care environments. Strategies to evaluate health outcomes and costs of care are emphasized.
NUR 550	ISSUES IN ADVANCED PRACTICE	3	College of Health Sciences and Nursing	This course addresses the changes in health care and their implications for advanced practice nursing. The impact of health care policy, managed care, as well as concepts related to financial responsibility within the health care delivery systems will be examined.

NUR 588	DEVELOPING AND EVALUATING EDUCATIONAL PROGRAMS	3	College of Health Sciences and Nursing	Identifying learning needs provides the foundation for designing health care educational programs for individuals, families, groups, or communities. Students select and develop teaching strategies and explore ways of monitoring and evaluating teaching methods and learner outcomes. Roles of educators in organizations, communities, and higher education settings are examined.
NUR 590A	NURSING PRACTICUM-A	1	College of Health Sciences and Nursing	This capstone course is designed to provide students with opportunities to integrate and apply previously learned knowledge and skills in a 60-hour practicum. Students develop specific learning objectives that are approved by faculty. Objectives are achieved as a result of working with a nurse mentor and various experts during the practicum.
NUR 590B	NURSING PRACTICUM-B	2	College of Health Sciences and Nursing	This capstone course is designed to provide students with opportunities to integrate and apply previously learned knowledge and skills in a 60-hour practicum. Students develop specific learning objectives that are approved by faculty. Objectives are achieved as a result of working with a nurse mentor and various experts during the practicum.
NUR 598	RESEARCH UTILIZATION PROJECT	3	College of Health Sciences and Nursing	This is a graduate research course that focuses on the use of a body of nursing knowledge and scientific knowledge in the nursing practice setting. Students develop a proposal to address a problem or concern in the nursing practice, propose a evidence-based solution, develop an implementation and evaluation plan, and describe implementation strategies for the proposed solution.

NUR 703	THEORETICAL APPLICATIONS IN EVIDENCE-BASED PRACTICE	3	School of Advanced Studies	This course examines the application of theoretical frameworks to different areas of nursing practice. Learners will demonstrate acquired competencies to evaluate and generate research at the doctoral level. Learners will be able to use research and evidence-based data to support decision-making processes.
OI 365	KNOWLEDGE MANAGEMENT AND INTELLECTUAL CAPITAL	3	School of Business	In this course, students are provided the knowledge and skills necessary for effective knowledge management present in today's increasingly innovative and global business environment. Students will be asked to consider a variety of topics critical to an organization's long-term success including, but not limited to innovation, intellectual capital, goodwill, brand recognition, organizational partnerships, and organizational culture.
OI 466	ORGANIZATIONAL INNOVATION INTEGRATED PROJECT	3	School of Business	This project-based course integrates knowledge and skills from previous organizational innovation coursework and requires business students to demonstrate their innovative, creative, and inspirational capacity to solve a real life business problem or opportunity. Using design principles, practices, and theory, students will be asked to create innovative solutions to problems or opportunities in the areas of strategy, process, product, and service.
ONL 507	Digital Citizenship for Educators	3	College of Education	The primary focus of this course is to explore the foundations and elements of digital citizenship. Participants examine the planning and implementation phases of a comprehensive digital citizenship program. Emphasis is placed on lesson planning, developing and integrating digital citizenship lessons, modeling digital citizenship behaviors, and discovering how digital citizenship extends beyond the classroom with real world functions and authentic applications.

ONLINEWKSP	USING THE ONLINE COLLECTION	0	Non-College Specific	The is not an actual course. It is entered as a means of scheduling a non-academic activity.
OPS 350	OPERATIONS MANAGEMENT	3	School of Business	This course provides an overview of operations management. Students will analyze the planning, organizing, controlling, and general management of productive resources in manufacturing and service organizations. This course also addresses the design and control of systems that are responsible for the efficient use of raw materials, labor, equipment, and facilities in the production of customer satisfying products and services. Topics include quality management, process design, capacity management, materials management, and project management.
OPS 400	BUSINESS PROCESS MANAGEMENT	3	School of Business	This course introduces a process-oriented view of the flows of information, products and services through and across organizational functions. Students will analyze and document business processes and assess the efficiency and effectiveness of these processes to minimize cost and maximize value creation. Students will be able to identify process information, assess and improve process efficiency, learn to model and analyze business processes, and understand the interactions between human behavior and process design. Other topics include business process reengineering, lean six sigma, total quality management, and process innovation.
OPS 405	ENTERPRISE RESOURCE MANAGEMENT	3	School of Business	This course provides and overview of Enterprise Resource Planning (ERP), which will integrate all facets of the business, including planning, manufacturing, sales, finance and accounting. Students will learn the methodology and practice of ERP using an industry-leading software package to explore the interaction among the different business processes. Topics include business process integration, inventory management, master scheduling, and material and capacity planning. Concepts are applied through the use of current enterprise resource planning software.

OPS 415	SYSTEMS THINKING AND PERFORMANCE MEASUREMENT	3	School of Business	This course provides an overview of systems thinking and information to measure and optimize an organization's performance. Topics include introduction of systems thinking; tools for measuring organizational performance; organizational performance and measurement systems; data management and analysis; results implementation: decisions, improvement, and growth; and continuous measurement and monitoring for organizational improvement.
OPS 420	OPERATIONS MANAGEMENT CAPSTONE	3	School of Business	This operations management capstone course is designed for students to synthesize both the theoretical and practical skills they have learned throughout the program in a collaborative capstone project using case analysis and scenarios to address operations management challenges. Students will develop a plan for adding value to the management of the operation focusing on the processes, quality, human resources, financial, logistics, and organizational strategy.
OPS 571	OPERATIONS MANAGEMENT	3	School of Business	This course applies planning and controlling concepts to increase the value of the supply chain. Students learn to evaluate and improve processes. Other topics include process selection, process design, theory of constraints, project implementation, capacity planning, lean production, facility location, and business forecasting.
ORG 581	ORGANIZATIONAL DESIGN	3	School of Business	This course prepares students to design organizations that adapt to environmental changes through innovation. Students will prepare a plan to incorporate innovation into organizational design to align an organization with a change in strategy. Other topics include the learning organization, authority & control, specialization & coordination, intrapreneurship, and lateral organizations.

ORG 707	ADVANCED SYSTEMS THINKING	3	School of Advanced Studies	With organizational change a certainty and no quick fix the problems of these organizations, this course will assist learners in dealing with uncertainty in the workplace and making decisions when neither the problems nor goals are clear. Upon completion of this course, learners will be able to think and act holistically to see connections among systems and how decisions in one area might affect the rest of the system.
ORG 711	21ST CENTURY ISSUES IN ORGANIZATIONAL BEHAVIOR I	3	School of Advanced Studies	This course evaluates research on issues that organizations face in optimizing their performance. Students will gain insight on organizational theory and leadership, organizational behavior and globalization, people systems, and emerging trends and issues in organizations.
ORG 716	ORGANIZATIONAL THEORY AND DESIGN	3	School of Advanced Studies	Upon completion of this course, learners will be prepared to analyze and select appropriate paradigms to guide organizational research. Additionally, learners will have the ability to systematically apply organizational theories to enrich existing models or develop new models to increase performance and effectiveness.
ORG 721	21ST CENTURY ISSUES IN ORGANIZATIONAL BEHAVIOR II	3	School of Advanced Studies	The focus of this course is on human behavior in 21st century global organizations and the practices and systems that encourage or impede effective performance. Students will engage in cutting edge thinking on emerging topics in organizational behavior and development and learn practical methods for analyzing, understanding, and improving individual, team, and organizational performance.

ORG 726	THE IMPACT OF TECHNOLOGY ON ORGANIZATIONS	3	School of Advanced Studies	In this course, students evaluate the relationships between technology, structure, and behavior to inform strategic organizational decisions. In addition, students assess the benefits and challenges surrounding technology integration and develop implementation strategies to strategically manage and promote organizational performance.
ORG 727	ORGANIZATIONAL DIAGNOSIS AND INTERVENTION	3	School of Advanced Studies	Upon completion of this course, learners will be prepared to optimize organizational performance through the judicious implementation of performance interventions utilizing organization theory, organization design, and technology.
ORG 730	ORGANIZATION DEVELOPMENT	3	School of Advanced Studies	This course examines theory and research relevant to changing individuals, groups, and organizations to enhance and improve their overall effectiveness. OD interventions are discussed, specifically examining the role of the I/O psychologist, type of change, and focus of intervention (individual, group, or organization). Furthermore, learners will learn how to integrate psychological theories regarding small group theory as related to leadership, motivation, interpersonal influence, group effectiveness, conformity, conflict, role behavior, and group decision making.
ORIENT 001	ORIENTATION	0	College of Health Sciences and Nursing	This information only course is designed to provide an orientation to the primary components of the Nurse Practitioner program. Students will be introduced to the program's progression and degree completion requirements. Clinical expectations, including documentation and regulatory requirements, clinical placement processes, and explanation of clinical hour and program requirements will be discussed.

ORIENT 002	ORIENTATION	0	College of Health Sciences and Nursing	This information only course is designed to provide an orientation to the primary components of the Nurse Practitioner program clinical experience. Students will be introduced to performance expectations when entering a clinical setting. Clinical forms, faculty site visits and preceptor evaluation for family nurse practitioner competencies, and requirements of documentation into the nurse practitioner student tracking system will be discussed. Population focus of each clinical class will be reviewed.
ORIENT 003	ORIENTATION	0	College of Health Sciences and Nursing	This information only course is designed to provide an orientation to the primary components of the Nurse Practitioner program's Final Preceptorship course. Students will be introduced to clinical and didactic requirements for the extended clinical course. Required documentation for graduation and family nurse practitioner clinical competencies for entry into practice will be discussed. Clinical hour requirements including family practice hour requirements will be reviewed.
PHL 310CA	CRITICAL THINKING ACROSS DISCIPLINES	3	College of Humanities and Sciences	This course in critical thinking helps students develop the ability to reason clearly and critically. It includes an introduction to inductive and deductive logic, fallacious reasoning, assumptions, and problem solving techniques. Students will apply critical thinking skills in confirming knowledge, producing new ideas, research, and making connections across disciplines.
PHL 320	CRITICAL THINKING AND DECISION MAKING IN BUSINESS	3	School of Business	This course addresses foundational skills in the analysis, synthesis, prescription, and application of critical thinking and decision making in business environments. Emphasis is placed on thinking critically, creatively, and ethically, and decision making outcomes.

PHL 320T	CRITICAL THINKING AND DECISION MAKING IN BUSINESS	3	School of Business	This course addresses foundational skills in the analysis, synthesis, prescription, and application of critical thinking and decision making in business environments. Emphasis is placed on thinking critically, creatively, and ethically, and decision making outcomes.
PHL 410	CLASSICAL LOGIC	3	College of Humanities and Sciences	This is a systematic course in the use of argument and logic in formal constructs. As logic is applied in various aspects of human reasoning including from deductive inference to mathematical proofs, this course will demonstrate the skills of deduction, validity, and symbols to determine the strengths and soundness of argument and conclusions.
PHL 458	CREATIVE MINDS AND CRITICAL THINKING	3	College of Humanities and Sciences	In this course students will analyze the thinking process from a critical and creative perspective. The lives of prominent creative thinkers will be examined to identify the social, historical, psychological, and cultural elements that influenced their development. The salient aspects of creativity will be assessed along with the relationship between creativity and critical thinking. Students will apply critical thinking skills to contemporary creative and scientific thought.
PHL 736	POLITICAL ACUMEN AND ETHICS	3	School of Advanced Studies	This course will provide students with the tools leaders need to address current and future impacts on business and society. Students will examine methods used to influence organizational change toward proactively addressing risk factors such as political, legal, regulatory, and governmental requirements. The course will focus on understanding how business leaders can change, strengthen, and transform their organizations. Topics include corporate social responsibility, organizational and community involvement, and attaining and maintaining American corporate ethical standards in local and global environments.

PHY 101	FUNDAMENTALS OF PHYSICS	3	College of Humanities and Sciences	This course is designed to introduce physics at an entry level by examining the principal laws of physics leading to a conceptual understanding of how these principles relate to everyday life. The topics in this course include Newton's laws, properties of matter, heat and thermodynamics. Students will apply these principles using practical examples, facilitated discussions, and experiments.
PM 571	PROJECT MANAGEMENT	3	School of Business	This course integrates the five processes that define project management. Students will design a project management plan to accomplish an organizational objective. Other topics include project initiation, budgeting, communications, execution, team management, control, and closure.
PM 582	PROJECT LEADERSHIP	3	School of Business	This course prepares students to lead a project to successful conclusion. Students will create a plan to lead change during project execution. Other topics include integrated change control, work breakdown structures, human resource planning, performance reporting, managing stakeholders, negotiation, conflict resolution, and cultural diversity.
PM 584	PROJECT RISK MANAGEMENT	3	School of Business	This course applies risk management concepts to project execution. Students will create contingency plans for a project. Other topics include risk identification, qualitative analysis, quantitative analysis, response planning, monitoring & control, and proactive planning.

PM 586	PROJECT QUALITY MANAGEMENT	3	School of Business	This course applies quality control techniques to project development and implementation. Students will create a continuous quality improvement plan for projects within an organization. Other topics include scheduling, quality planning, quality assurance, scope management, schedule control, and quality control.
PM 598	PROJECT MANAGEMENT CAPSTONE	3	School of Business	In this concentration capstone course, students will design a project to meet an organizational need. Students will collaboratively create a project plan using Microsoft® Project software. Other topics include Project Management Professional (PMP) certification preparation.
PMPDU 2000	PROJECT MANAGEMENT FUNDAMENTALS	24	School of Continuing Education	Foundational knowledge of the phases and elements of professional project management are important to the success of a project. Using the knowledge areas and process groups related to project management methodologies, the principles in the course align to the standards in the Project Management Institute, A Guide to the Project Management Body of Knowledge, (PMBOK Guide) - Fifth Edition, Project Management Institute, Inc., 2013. Students will gain an essential familiarity of the methodologies, principles and practices of project management. This course provides 24 contact hours in six 4- hour workshops.
PMPTP 2500	PROJECT MANAGEMENT PROFESSIONAL TEST-PREP	35	School of Continuing Education	Passing the Project Manager Professional (PMP) exam can be a challenging task. Having resources and a structured approach for exam preparation can help build confidence. This course is designed for students ready to sit for the PMP exam. In this test preparation course, students will assess their readiness to sit for the PMP exam then build a study plan to use when preparing for test day. Using the study plan as a guide, students will utilize a variety of study resources, including weekly readings, Practice quizzes, flashcards, mock exams, as well as other supplemental materials to address identified content gaps in the study plan. This course provides 35 professional development hours in five, 7-hour workshops.

POL 115	AMERICAN NATIONAL GOVERNMENT	3	College of Humanities and Sciences	This course introduces students to the constitutional foundations and governing institutions of the federal government. Throughout the course, students address common political themes, such as the nature and scope of governance, democracy, and patterns of political behavior.
POL 215	STATE AND LOCAL POLITICAL PROCESSES	3	College of Humanities and Sciences	This course examines the structure and operation of state and local governments and the ways in which governments respond to social, political and public policy challenges.
POS 221	WINDOWS SERVER CONFIGURATIONS	3	College of Information Systems and Technology	This course is a survey of Windows Server Administration. Topics emphasize the structure and the various applications supported by Windows Server. The course includes remote, hands- on access to Windows lab exercises.
POS 355	INTRODUCTION TO OPERATING SYSTEMS	3	College of Information Systems and Technology	This course provides an introduction to operating systems. Topics covered include operating system concepts, program execution, and operating system internals such as memory, processor, device, and file management. A variety of operating systems are compared and contrasted.

POS 408	.NET I	3	College of Information Systems and Technology	This course introduces object-oriented programming in the context of business applications development. It develops the skills and knowledge necessary to produce beginning event-driven programs with graphical user interfaces (GUI). Topics include standard Windows compatible forms, controls, and procedures. The course uses Visual Basic.
POS 409	.NET II	3	College of Information Systems and Technology	This course extends the facilities of the .NET family of languages. The course focuses on the C# language. Topics covered include designing C# applications, writing and debugging programs, data files and database connectivity.
POS 410	SQL FOR BUSINESS	3	College of Information Systems and Technology	This course covers Structured Query Language (SQL) that provides a unified language that lets you query, manipulate, or control data in a business applications environment.
POS 433	UNIX NETWORKING	3	College of Information Systems and Technology	This course is a survey of the UNIX operations. The student will gain an understanding of the internal operations of the UNIX system, which enables the user to make efficient use of files, file systems, and processes. Commands for efficient management of UNIX system files, file systems and process, systems administration and security are also examined.

PRG 211	ALGORITHMS AND LOGIC FOR COMPUTER PROGRAMMING	3	College of Information Systems and Technology	This course provides students with a basic understanding of programming development practices. Concepts covered include the application of algorithms and logic to the design and development of procedural and object oriented computer programs to address the problem solving requirements associated with business information systems. This course will cover procedural programming concepts including data types, controls structures, functional decomposition, arrays, and files, classes and objects.
PRG 215	JAVA PROGRAMMING	3	College of Information Systems and Technology	Java has rapidly become the language of choice for platform independent implementations. This course provides a general introduction to programming, data structures and object-oriented programming. The syntax and semantics of the Java language are addressed, as well as related topics which include object-oriented programming concepts, terminology, and notation. This class requires the Java 2 Platform Development Kit, Standard Edition.
PRG 218	INTRODUCTION TO C/C++	3	College of Information Systems and Technology	This course introduces the student to C/C++ programming. The syntax and semantics of the C/C++ programming languages are used to produce simple computer programs.
PRG 280	PROGRAMMING IN HTML5 WITH JAVASCRIPT	3	College of Information Systems and Technology	This course provides students an introduction to HTML5 with JavaScript and CSS3. Concepts covered include the creation and formatting of web pages using HTML5 and CSS3, development of web forms, and implementing program logic and validating user input using JavaScript.

PRG 281	WINDOWS APPLICATION DEVELOPMENT USING HTML5 AND JAVASCRIPT I	3	College of Information Systems and Technology	This course cover enhanced HTML5 concepts using CSS3 and JavaScript. This includes use of canvas and different HTML API, exposure to and Windows Event Listener creating and validating dynamic presentation slideshow that responds to mobile and desktop layouts enhancing web presentations using Audio and video features.
PRG 282	WINDOWS APPLICATION DEVELOPMENT USING HTML5 AND JAVASCRIPT 2	3	College of Information Systems and Technology	This course covers developing web applications using HTML 5, CSS3, JQuery and JavaScript. This includes use of different advanced JavaScript API such as Drag-and-drop API, Web storage API, Geo-location API, Web socket API, Web SQL, and Document Object Model (DOM) components
PRG 410	C++PROGRAMMING I	3	College of Information Systems and Technology	This course introduces the student to C++. Topics include C++ basics, selection and repetition structures, sequential files, arrays, and C++ libraries.
PRG 420	JAVA PROGRAMMING I	3	College of Information Systems and Technology	This course introduces object-oriented programming in the content of business applications development. The basics of the Java programming language are covered.

PRG 421	JAVA PROGRAMMING II	3	College of Information Systems and Technology	This course continues the subject in PRG420, Java Programming I. Topics include designing complex applications and the use of data files
PSY 103	INTRODUCTION TO PSYCHOLOGY	3	College of Social Sciences	This course provides an overview of basic psychological principles that underlie human behavior and reactions to everyday life. Students are provided an opportunity to apply critical- thinking skills to psychological problems and issues. The basic tenets of psychology are presented from a historical perspective, with attention to research-based behavioral science.
PSY 110	PSYCHOLOGY OF LEARNING	3	College of Humanities and Sciences	This course introduces theories and concepts in psychology that will foster academic success and provide students with opportunities to synthesize and apply that knowledge.
PSY 201	FOUNDATIONS OF PSYCHOLOGY	3	College of Humanities and Sciences	This course overviews the foundations of psychology as the field applies to everyday life. The physical and mental aspects of psychology are traced through lifespan development with emphasis on psychological health and wellness. Further study focuses on personality; thinking, learning and memory; motivation and emotions; and gender and sexuality. Based in various historical traditions, the course is set in the context of contemporary psychological principles.

PSY 203	FOUNDATIONS OF PSYCHOLOGY	3	College of Social Sciences	This course overviews the foundations of psychology as the field applies to everyday life. The physical and mental aspects of psychology are traced through lifespan development with emphasis on psychological health and wellness. Further study focuses on personality; thinking, learning and memory; motivation and emotions; and gender and sexuality. Based in various historical traditions, the course is set in the context of contemporary psychological principles.
PSY 205	LIFE SPAN HUMAN DEVELOPMENT	3	College of Social Sciences	This course focuses on a historical view of human development leading to the current life span approach to form an understanding of the developing individual, and it explores influences on human development, ranging from individual models to cross-cultural groups. Emphasis is given to personality, social, intellectual, and physical development, and the major theories used to describe how people change throughout their life span.
PSY 205T	LIFE SPAN HUMAN DEVELOPMENT	3	College of Social Sciences	This course focuses on a historical view of human development leading to the current lifespan approach to form an understanding of the developing individual, and it explores influences on human development, ranging from individual models to cross-cultural groups. Emphasis is given to personality, social, intellectual, and physical development, and the major theories used to describe how people change throughout their life span.
PSY 215	CAREERS IN PSYCHOLOGY	3	College of Social Sciences	This course is designed to provide students with an orientation to the field and assist students in planning for a career in psychology. Emphasis will be placed on exploring the different branches of psychology, to identify key resources for exploring careers in psychology and to classify skills and experiences relevant to achieving career goals.

PSY 220	POSITIVE PSYCHOLOGY: WHAT'S RIGHT WITH ME	3	College of Social Sciences	How much control does a person have over his or her thoughts, feelings, and behaviors? What does it mean to be "free"? PSY/220 offers students a contemporary and relevant approach to the study of psychology and the opportunity to learn more about themselves in the process. In this course, students evaluate, understand, and build on their psychological strengths and those of others.
PSY 225	POSITIVE PSYCHOLOGY	3	College of Social Sciences	How much control do we have over our thoughts, feelings, and behaviors? What does it mean to be "free"? This course offers the student a contemporary and relevant approach to the study of psychology and, in the process, the opportunity to learn more about themselves. In the course, students will evaluate, understand, and build on their psychological strengths and those of others.
PSY 230	THEORIES OF PERSONALITY: I THINK, THEREFORE WHO AM I?	3	College of Social Sciences	What is theory? What is personality? What is your theory of your personality? This course introduces the student to a number of personality theorists, their personalities, and their views in offering insight in to the question of the self. Psychoanalytic, social behavioral, traits, biological, humanistic, and cognitive are some of the theories that will be discussed in this course.
PSY 240	THE BRAIN, THE BODY, AND THE MIND: ALL TOGETHER NOW	3	College of Social Sciences	This course provides an introduction to the investigation of physiological and neurological basis for human behavior. The student will be able to study and discuss various influences on personality development, such as pre-natal maternal behavior; gender; nature versus nurture; brain development; genetic composition; sensory motor interactions; learning disabilities; drug impacts; and neurological diseases.

PSY 245	SURVEY OF RESEARCH AND STATISTICS	3	College of Social Sciences	This course is designed to introduce basic principles and methods of statistics, reasoning, and understanding of psychological data. Statistical and research concepts will be reviewed, and students will be introduced to statistical analysis.
PSY 250	PSYCHOLOGY OF PERSONALITY	3	College of Social Sciences	This course is an introduction to the study of personality. An examination of classic theoretical explorations of personality development, including analysis of how factors such as trauma, mental disorders, intelligence, creativity, and family structure affect personality. Focus is on approaches psychology has developed for understanding personality with applications for personal growth, interpersonal relationships, and organizational processes.
PSY 265	PSYCHOLOGY OF HUMAN SEXUALITY	3	College of Social Sciences	This course is a comprehensive view of the psychosocial and physiological aspects of sexual health in our contemporary society. The student will have opportunities to explore numerous relevant topics including love, intimacy, and relationships; sex and marketing; sexual diseases; sexual abuse; gender identity and sex roles; and socio-cultural influences and values in decision making. The course is designed for the student to understand attitudes and behaviors as they relate to sexual well-being and integrity.
PSY 270	ABNORMAL PSYCHOLOGY: ABUSE, ADDICTION, AND DISORDERS	3	College of Social Sciences	This course introduces the study of major psychological disorders as defined in the DSM-IV- TR, including their diagnoses, causes, and treatments. It covers such subjects as depression, bipolarity, anxiety, panic, somatoform, dissociation, substance abuse, anorexia, schizophrenia, and childhood disorders, as well as gender and cultural differences.

PSY 275	INTRODUCTION TO ABNORMAL PSYCHOLOGY	3	College of Social Sciences	This course introduces the study of major psychological disorders as defined in the DSM 5, including their diagnoses, causes, and treatments. It covers such subjects as depression, bipolarity, anxiety, panic, somatoform, dissociation, substance abuse, anorexia, schizophrenia, and childhood disorders, as well as gender and cultural differences.
PSY 280	HUMAN GROWTH & DEVELOPMENT	3	College of Social Sciences	This course is a study of the development of the individuals from conception through adulthood. Theories and factual content underlying current thinking and research are examined, as well as the processes and influences affecting the developing person. The focus is on biological, social, emotional, and intellectual aspects across the lifespan, and individual application is emphasized.
PSY 285	SOCIAL PSYCHOLOGY: WHY CAN'T WE ALL JUST GET ALONG	3	College of Social Sciences	This course provides a comprehensive introduction to the study of social psychology- how people interact with and think about others. Students are able to explore and discuss topics such as self-concept, social perception and cognition, attitudes, social identity, interpersonal attractions, social influence, human aggression, and applications of social psychology.
PSY 300	GENERAL PSYCHOLOGY	3	College of Social Sciences	General Psychology is a survey course which introduces the student to the major topics in scientific psychology as applied to human behavior. Applications of these principles will be made to the human experience

PSY 301	EMOTIONAL INTELLIGENCE	1	College of Social Sciences	This course examines the concepts and practical applications of emotional intelligence. Emotional intelligence is the ability to manage one's own internal emotional environment and one's ability to participate in relationships with others in such a way as to maximize individual success in life as a functioning human being and member of society. Through a highly interactive format, the course will focus on how to assess basic skills in emotional intelligence, how to develop strategies to improve and enhance basic skill levels, and how to experiment with techniques that facilitate dealing with others of varying emotional backgrounds and competency levels.
PSY 305	PROFESSIONAL ORIENTATION IN PSYCHOLOGY	3	College of Social Sciences	This course is designed for students to explore issues professionals face in the field of psychology. Specifically, the course emphasizes legal and ethical concerns in psychological research and in practice. Emphasis will also be placed on knowledge of APA Ethical Principles and the integration of selected core competencies for professions related to psychology.
PSY 310	HISTORY AND SYSTEMS IN PSYCHOLOGY	3	College of Social Sciences	The purpose of this course is to familiarize the student with the various methods of inquiry, terminologies, and theoretical systems that comprise the history of psychology. A broader view is used to introduce the modern era of psychology and its use. These include: structuralism, functionalism, Gestalt, behaviorism, psychoanalysis, and phenomenological/existential approaches.
PSY 315	STATISTICAL REASONING IN PSYCHOLOGY	3	College of Social Sciences	This is an introductory course in applied statistics, with particular emphasis in psychology. Both descriptive and inferential statistics are included. In addition, this course provides the basic statistical background and understanding needed.

PSY 320	HUMAN MOTIVATION	3	College of Social Sciences	This course seeks to synthesize the many theories of human motivation with the practical application of motivating employees. To this end, the course will examine historical theories as well as recent developments in the field of motivation and their relationship to management practices. The primary concepts of goals, quality of work, and rewards will be examined and applied to the workplace.
PSY 335	RESEARCH METHODS	3	College of Social Sciences	This course covers the fundamentals of research and evaluation in the field of psychology. Topics include critical analysis of research literature, quantitative methodologies, and an introduction to qualitative methods. Emphasis will be placed on understanding connections between research design, theories, and the application of results in psychology. Legal and ethical issues pertaining to research with human subjects will also be covered.
PSY 340	BIOLOGICAL FOUNDATIONS IN PSYCHOLOGY	3	College of Social Sciences	This course is designed to expose you to the underlying physiological mechanisms of behavior. Physiological psychology is a complex but fascinating field of study. It explores the relationship between our biological systems and behavior. Structure and function of the nervous system from the neuron to the brain, as well as the interrelationships between the brain and such behaviors as eating, sleeping, learning, memory, emotion, and mental disorders will be discussed using examples from the behavior of both humans and lower organisms.
PSY 345	SENSATION AND PERCEPTION	3	College of Social Sciences	This course is designed to explore the five major human sensory systems (vision, hearing, smell, touch, and taste) and perceptual experiences related to these senses as they occur in the human brain. The course examines the anatomical, physiological, and neural connections that influence sensation and perception. Emphasis will be placed on theories and concepts of sensation and perception as a means of understanding human behavior.

PSY 355	MOTIVATIONAL PROCESSES IN HUMAN PSYCHOLOGY	3	College of Social Sciences	This course examines theories and research results pertaining to the structures (self, person, role, and event schemas) and processes (expectations, attributions, and inferences) underlying self and person perception
PSY 360	COGNITIVE PSYCHOLOGY	3	College of Social Sciences	This course will present an overview of cognitive psychology and its findings, theories, and approach. Cognitive psychology deals with how we acquire and use knowledge so the course will cover topics such as perception, attention, memory, language, reasoning, and problem solving.
PSY 375	LIFE SPAN HUMAN DEVELOPMENT	3	College of Social Sciences	This course focuses on a historical view of human development leading to the current lifespan approach to form an understanding of the developing individual, and it explores influences on human development, ranging from individual models to cross-cultural groups. Emphasis is given to personality, social, intellectual, and physical development, and the major theories used to describe how people change throughout their lifespan.
PSY 390	LEARNING AND COGNITION	3	College of Social Sciences	This course concerns the study of learning from the most basic associationistic ideas to complex cognitive behaviors such as problem solving and thinking. Various ideas regarding the nature of the mind are presented along with the fundamental concepts of learning and conditioning. Strengths and weaknesses of the memory system are discussed as they relate to higher cognitive processes such as language, problem solving, and eyewitness identification. Neurophysiological correlates of cognitive phenomena and memory disorders are also discussed.

PSY 400	SOCIAL PSYCHOLOGY	3	College of Social Sciences	This course provides a unified view of the field of social psychology organized around the concepts of social influence and power and exchange in social life and explores in-depth human thoughts, feelings, and actions as influenced by other people. Specific topics include socialization, perception of self and others, pro-social and anti-social behavior, attitudes, interpersonal attraction, social influence, and group behavior.
PSY 405	THEORIES OF PERSONALITY	3	College of Social Sciences	This course surveys the field of personality from a scientific perspective, examining the general approaches to understanding personality. The key theorists and concepts associated with each perspective are highlighted, along with the strengths and limitations of the different approaches.
PSY 410	ABNORMAL PSYCHOLOGY	3	College of Social Sciences	This course is designed to provide students with an introduction to theories and research concerning abnormal behavior (psychopathology). The course will address such topics as the incidence (frequency) of abnormal behavior of various types; how abnormal behaviors are classified into various diagnostic categories; the etiologies (causes) of psychological disorders; and the variety of methods employed in the treatment of abnormal behavior.
PSY 420	THEORIES OF BEHAVIOR	3	College of Social Sciences	This course is an introduction to principles of learning and behavior analysis and how they relate to the profession of psychology. Topics to be covered include conditioning, social learning, and philosophical and historical antecedents of behaviorism. The environmental influences of behavior, to understand the antecedent-consequence link and functions of behaviors, will also be covered. An emphasis will be placed on behavior-analytic strategies in a variety of settings including business and industry, education, and health and human services.

PSY 425	CHEMICAL DEPENDENCY IN THE WORKPLACE	3	College of Social Sciences	Using an issues-based approach, this course examines drugs of abuse and the impact of abuse on the individual, family, and society with an emphasis on the employer and work environment. Legal and ethical implications of chemical dependency in the workplace are addressed, and the hallmarks of creating drug-free workplace programs are examined.
PSY 435	INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY	3	College of Social Sciences	This course is designed to introduce the student to the field of industrial/organizational psychology. The emphasis is on the psychological principles and how they can be applied in a work context. Topics will include legal issues in employment, selection of employees, performance appraisal, training, leadership, motivation, and group behavior.
PSY 450	DIVERSITY AND CULTURAL FACTORS IN PSYCHOLOGY	3	College of Social Sciences	This course is a study of the issues and influences related to gender, sexual orientation, and the major racial/ethnic and cultural groups in the United States and how they affect theoretical and research paradigms in psychology and clinical and counseling practices. The course expands the students' frame of reference concerning human diversity and applies this knowledge to counseling and research issues in psychology.
PSY 460	ENVIRONMENTAL PSYCHOLOGY	3	College of Social Sciences	In this course students will learn about the interaction between people and their environments; how our behavior affects our environment, and how that environment, in turn, influences our own behavior. An emphasis will be placed on developing behavioral solutions for environmental problems.

PSY 475	PSYCHOLOGICAL TESTS AND MEASUREMENTS	3	College of Social Sciences	This course will cover the basic principles, research, and theories on testing and measurement of psychological constructs. It is expected that students complete the course with knowledge of various techniques for psychological testing; a familiarity of several professionally developed tests; the ability to develop, administer, and interpret certain tests; and knowledge of measurement theory which includes reliability and validity.
PSY 480	ELEMENTS OF CLINICAL PSYCHOLOGY	3	College of Social Sciences	This course is intended to provide the beginning psychology student with an overview of the theory and practice of clinical and counseling psychology. The course includes reference to major theories of personality, assessment, and psychotherapy. Topics include psychodynamic, cognitive/behavioral, and biological theories of normal and abnormal psychological processes, and the assessment of behavior, abilities, and personality. Therapies covered include a variety of psychoanalytic approaches, and humanistic, biological, cognitive/behavioral, and child and family therapies.
PSY 490	CAPSTONE COURSE IN PSYCHOLOGY	3	College of Social Sciences	This is the capstone course for undergraduate psychology students. The course provides students with the opportunity to integrate and apply learning from their psychology program of study in a comprehensive manner. Students will also assess the impact of their educational experiences on their ethical perspectives and critical thinking skills. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.
PSYCH 600	DEVELOPMENTAL PSYCHOLOGY	3	College of Social Sciences	This course examines biological and environmental influences on human development across the lifespan. The biological foundations of human growth and development are presented along with major theories of cognitive, social and emotional development. Current research in developmental psychology is presented as students explore both opportunities and challenges that people face as they age. Social, cultural, systemic and ethical issues related to research and practice are also addressed.

PSYCH 610	RESEARCH METHODS IN PSYCHOLOGY	3	College of Social Sciences	This course is an overview of the fundamentals of research methods applicable to the broad field of psychology. Topics include research design, quantitative and qualitative forms of analysis, ethical issues in research, and appropriate documentation of research processes and outcomes. Students will learn to critically read and evaluate psychological studies and apply their knowledge of research design and methodology to a variety of problems and issues in the field of psychology.
PSYCH 620	MULTICULTURAL AND SOCIAL ISSUES IN PSYCHOLOGY	3	College of Social Sciences	This course provides students with an in-depth investigation of cross-cultural issues and perspectives in the field of psychology. Students learn to identify and consider cultural and systemic variables in psychological theory, research and practice. Multicultural issues, social dynamics, social justice and valued diversity are emphasized.
PSYCH 625	STATISTICS FOR THE BEHAVIOR SCIENCES	3	College of Social Sciences	This course presents fundamental statistical concepts and tools for understanding and analyzing data from studies in the social and behavioral sciences. Topics include measures of central tendency and dispersion, probability theory, data distributions, significance testing and statistical inference. Students will learn how to analyze and interpret data from psychological studies using descriptive statistics, correlational methods, t-tests and analysis of variance procedures.
PSYCH 626	ELEMENTS OF HEALTH PSYCHOLOGY AND BEHAVIORAL HEALTH	3	College of Social Sciences	This course is an overview of the field of health psychology and the origins of the biopsychosocial model from a historical perspective, including the biological, psychological and social contexts of the science. It provides students with information about the biological foundations of health and illness, as well as current research in health psychology. The dangers of "unscientific" applications and the importance of using critical thinking and evidence-based research when formulating strategies are described.

PSYCH 627	ILLNESS PREVENTION AND HEALTH PROMOTION	3	College of Social Sciences	This course examines research on the basic relationships between behavior and health, including stress, eating and obesity, substance abuse, and chronic illness such as cardiovascular disease, cancer and HIV-AIDS. Students will learn the major concepts of illness prevention and health promotion, with a focus on both personal behavioral factors and sociocultural determinants. Special attention will be given to the disparities in health status and prevention efforts with regard to race, gender, ethnicity, and socioeconomic status.
PSYCH 628	EVIDENCE-BASED INTERVENTIONS IN BEHAVIORAL HEALTH	3	College of Social Sciences	This course provides a description of those therapeutic interventions which are based on outcome studies. Students will learn practical assessment and intervention strategies for the major disorders where health psychology plays a role, including chronic stress and pain, obesity and eating disorders, substance abuse, HIV and AIDS, diabetes and hypertension, insomnia and cancer. Methods will include self-monitoring, relaxation and meditation techniques, stimulus control, self-management, and cognitive-behavioral therapies. Complementary and alternative therapies which have shown clinical efficacy will also be described.
PSYCH 629	INTRODUCTION TO INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY	3	College of Social Sciences	In this course, students will be introduced to the domains of the Industrial Organizational (I-O) Psychology concentration. Topics include an overview of the four primary domains of I-O psychology, human resource management, factors influencing employee performance, organization development, and research relevance within the I-O field of study. Students will gain an understanding of the evolution of the I-O field of study from the foundations of the field to the present day, the various ways that I-O psychologists contribute to organizations, the unique contributions of I-O psychology to the broader scientific community, and the main ethical issues likely to be encountered in the field. This course covers a wide variety of topics with the goal of exposing students to the main issues influenced by I-O psychologists.
PSYCH 630	PHYSIOLOGICAL PSYCHOLOGY	3	College of Social Sciences	This course emphasizes the biological and biochemical correlates of behavior, focusing on the structure and function of the central nervous system, the autonomic nervous system, and the endocrine system as they relate to the psychological processes of sensation, drive, emotion, learning, and memory.

PSYCH 635	PSYCHOLOGY OF LEARNING	3	College of Social Sciences	This course examines major theories of learning, covering topics such as classical conditioning, operant conditioning, shaping and chaining, reinforcement schedules, punishment, one-trial learning, and cognitive and social processes in learning. Students will examine research from animal and human studies, emphasizing basic and complex models of acquired behavior, motivation and memory.
PSYCH 640	COGNITIVE PSYCHOLOGY	3	College of Social Sciences	This course surveys contemporary research and theory in the field of cognitive psychology, including problem solving and reasoning, attention, memory, knowledge representation, language, and imagery. Strategies and methods for investigating cognition are presented along with future trends involving interdisciplinary research in this growing field.
PSYCH 642	PERSONNEL PSYCHOLOGY	3	College of Social Sciences	Students in this course will gain an appreciation for the processes I/O psychologists use to recruit, select, place, and develop employees, managers, and executives. This includes discussions about tests, assessment centers, interviews, succession planning, and departure. Students will examine the role of the I/O psychologist in awareness, preparedness, and response to behavioral problems or issues in the workplace.
PSYCH 645	PERSONALITY THEORIES	3	College of Social Sciences	This course enables students to differentiate among the primary theoretical approaches to the study of personality, including psychodynamic, affective, cognitive-behavioral, and systems theories. Students examine the underlying assumptions inherent in various personality models and learn how the tenets of these models are investigated through empirical research.

PSYCH 647	HUMAN PERFORMANCE, ASSESSMENT, AND FEEDBACK	3	College of Social Sciences	In this course students are familiarized with behaviors associated with the accomplishment of expected, specified, or formal role requirements on the part of individual organizational members as well as means for appraising and providing feedback to employees.
PSYCH 650	PSYCHOPATHOLOGY	3	College of Social Sciences	This course will introduce students to the major categories of psychopathology as presented in the most recent edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM). Mental disorders and their etiologies will be conceptualized from different perspectives, including cultural, biological, psychodynamic, cognitive-behavioral, existential and systemic. Ethical issues related to research and practice in the field will be addressed. Students will be challenged to consider various definitions of normality/abnormality, the process of rendering a diagnosis, and the symptoms, causes and interventions for commonly occurring mental disorders.
PSYCH 655	PSYCHOMETRICS	3	College of Social Sciences	This course will introduce students to the science and practice of psychological testing and assessment. Students will learn to evaluate the quality of various psychological tests and develop an understanding of the complex process of test development. Social, cultural and ethical issues will be addressed as students examine the psychometric properties and appropriate applications of commonly used educational, intelligence and personality assessment instruments.
PSYCH 658	WORK MOTIVATION AND JOB ATTITUDES	3	College of Social Sciences	Students will evaluate various theories of motivation and develop a familiarity and understanding of pertinent research in the field. Students will be able to adapt motivational constructs to the enhancement of employee attitudes, effectiveness, and well- being across a range of organizational contexts.

PSYCH 660	ETHICS AND PROFESSIONAL ISSUES	3	College of Social Sciences	This course surveys various professional activities in psychology with emphasis on the legal and ethical responsibilities of psychological researchers and practitioners. Students will study the APA Code of Ethics and analyze case studies involving assessment, research and practice in psychology. Topics include ethics in research, the purpose and function of internal review boards (IRBs), participant and client rights, informed consent, confidentiality, duty to warn and protect, dual relationships, supervision, consultation, ethical considerations when working with diverse populations, and the application of ethical decision-making models.
PSYCH 665	INTEGRATIVE CAPSTONE: PSYCHOLOGY PAST AND PRESENT	3	College of Social Sciences	This course will trace the historical progression of ideas and concepts in Psychology with emphasis on pivotal experiments that influenced our understanding of human behavior. Students will select a specific area of study and explore the historical roots of their selected topic. Students will conduct a comprehensive literature review of a contemporary issue or problems related to their selected topic and develop either an applied project or research proposal.
PSYCH 670	MASTER'S THESIS	3	College of Social Sciences	Only those students who have developed a detailed and manageable research proposal in PSYCH/665 may enroll in this course. During the course, the student will implement a small-scale or quantitative study, analyze the data and document the research in an APA style manuscript.
PSYCH 705	PERSONNEL PSYCHOLOGY	3	School of Advanced Studies	Learners gain an appreciation for the processes I/O psychologists use to recruit, select, place, and develop employees/managers/executives, including discussions about tests, assessment centers, and interviews. Furthermore, the course examines the role of the I/O psychologist in awareness, preparedness, and response to behavioral problems or issues in the workplace.

PSYCH 706	HUMAN PERFORMANCE, ASSESSMENT, AND FEEDBACK	3	School of Advanced Studies	In this course learners are familiarized with basic models of learning, as well as the different approaches to training, design, delivery, and measurement, that are necessary for organizational development programs. A key emphasis of the class concerns designing essential and effective training objectives that are aligned with an organization's mission.
PSYCH 707	LEADERSHIP THEORY AND MANAGEMENT THEORY	3	School of Advanced Studies	Learners examine major theoretical leadership and management models, distinguish between leadership and management, and assess the impact of each on the work setting. Application of the various perspectives on leadership and management and how these perspectives play a vital role in the achievement of organizational, group, and team goals is discussed.
PSYCH 708	WORK MOTIVATION AND JOB ATTITUDES	3	School of Advanced Studies	This course will allow learners to evaluate various theories of motivation and develop a familiarity and understanding of pertinent research in the field. Learners will be able to relate motivational theories to enhance employee attitudes, effectiveness, and well being in the midst of organizational stressors, health and safety issues, and outsourcing/downsizing.
PSYCH 709	ETHICAL, LEGAL, AND PROFESSIONAL CONTEXTS OF I/O PSYCHOLOGY	3	School of Advanced Studies	Learners will review pertinent legal and ethical issues for I/O psychologists that are related to the different roles that these professionals take in the workplace. Learners will gain the tools necessary to develop an initial ethical framework for making decisions within an organizational structure, and this framework will be expounded upon in future classes.

PSYCH 710	MASTER'S PROJECT	1	School of Advanced Studies	The Master's Project will require learners to integrate their program of study with an in-depth exploration of an interest area that spans all four I/O program domains: human resource management, factors influencing employee performance, organization development, and research relevance. The project will be based on library research and/or fieldwork and must demonstrate a significant contribution to the I/O psychology field.
PSYCH 720R	DISSERTATION PROCESS	3	School of Advanced Studies	Learners will develop a foundational understanding about the composition of the dissertation, including research, analysis, and writing. To facilitate individual interests, learners will develop interest papers about three topics, each of which can be examined as a dissertation, including the general problem to be researched and supporting literature.
PSYCH 740	JUDGMENT AND DECISION MAKING	3	School of Advanced Studies	Learners will develop knowledge about decision theory, judgment, and problem-solving research related to areas such as vigilance behavior, employee selection, choice behavior, and human performance in complex environments. This course examines Brunswik's lens model, Bayesian inference, subjective expected utility, prospect theory, and the cognitive information-processing paradigm.
PSYCH 750	CONSULTING AND BUSINESS SKILLS	3	School of Advanced Studies	This course focuses on developing business presentation, including the development and presentation of information to a business audience that clearly articulates key messages in terms the audience can understand; skills in presenting and responding to questions; and the ability to deliver ideas, proposals, and requests in a fashion that leads to their acceptance and organizational movement in desired directions.

PSYCH 760R	CONSULTING PROCESSES IN I/O	3	School of Advanced Studies	The purpose of this residency is for learners to build competencies related to consulting as an internal and external I/O professional.
PSYCH 770	ATTITUDE THEORY MEASUREMENT AND CHANGE	3	School of Advanced Studies	Students will gain an understanding of attitudes, opinions, and beliefs in relation to behavioral intentions and behaviors of individuals in the workplace. Areas include job satisfaction (general and various facets), job involvement, organizational commitment, and perceptions of fairness.
PSYCH 780	CONSUMER BEHAVIOR	3	School of Advanced Studies	The relation between the producers (or distributors) and consumers (actual or potential recipients) of goods and services will be discussed, based on the application of a variety of social science research methodologies.
PSYCH 790	INDEPENDENT STUDY	3	School of Advanced Studies	The content and assessment of the independent study course will be determined via a learning contract between the student and the faculty member. The independent study can be either concept or methods-based, and regardless of content, it must culminate with the development of a major project that demonstrates learning at the doctoral level.

PSYCH 799	COMPREHENSIVE EXAM	1	School of Advanced Studies	The comprehensive exam provides an opportunity for students to demonstrate competence in I-O psychology content, practice and leaderships, and research. Students will demonstrate a requisite understand of previous course work, will be assessed on their knowledge and skill as an I-O psychology consultant, and will demonstrate the capability of generating research at the doctoral level.
QNT 275	STATISTICS FOR DECISION MAKING	3	School of Business	This course introduces the techniques used for the visualization of numerical data and descriptive statistics in business. After completion of this course, students will be able to explain how to obtain a suitable sample of business data and evaluate its validity and reliability for statistical inferences, produce tables and charts to organize and display qualitative and quantitative business data, interpret numerical business data using measures of central tendency and dispersion, apply fundamental concepts probability theory for inferential decision making for business, and perform a linear regression for trend analysis.
QNT 275T	STATISTICS FOR DECISION MAKING	3	School of Business	This course introduces the use of statistics for business decision making. After completion of this course, students will be able to explain how to obtain a suitable sample of business data and evaluate its validity and reliability for statistical inferences, produce tables and charts to organize and display business data, interpret numerical business data using measures of central tendency and variability, apply fundamental concepts probability theory for inferential decision making for business, and perform trend analyses.
QNT 351	QUANTITATIVE ANALYSIS FOR BUSINESS	3	School of Business	This course integrates applied business research and descriptive statistics. Students will learn to apply business research and descriptive statistics in making better business decisions. Other topics include examination of the role of statistics in research, statistical terminology, the appropriate use of statistical techniques, and interpretation of statistical findings in business and research.

QNT 561	APPLIED BUSINESS RESEARCH & STATISTICS	3	School of Business	This course prepares students to apply statistics and probability concepts to business decisions. Students learn criteria for developing effective research questions, including the creation of appropriate sampling populations and instruments. Other topics include descriptive statistics, probability concepts, confidence intervals, sampling designs, data collection, and data analysis - including parametric and nonparametric tests of hypothesis and regression analysis.
QRB 501	QUANTITATIVE REASONING FOR BUSINESS	3	School of Business	This course applies quantitative reasoning skills to business problems. Students learn to analyze data using a variety of analytical tools and techniques. Other topics include formulas, visual representation of quantities, time value of money, and measures of uncertainty.
RDG 201CA	READING AND WRITING CONCEPTS	3	College of Humanities and Sciences	This course builds a foundation in language acquisition and development to examine the concepts of reading, writing, spelling, and concepts of reading, writing, spelling, and handwriting. Students explore children's development in these areas and the implications for instruction. They also observe and reflect on language arts interactions and activities in a classroom setting.
RDG 350	CHILDREN'S LITERATURE	3	College of Education	This course will examine the use of children's literature in the elementary school classroom. Various genres will be studied as well as the application of children's literature to instruction and assessment in reading. Methods for integrating the use of children's literature in all content areas will be examined.

RDG 351	EARLY CHILDHOOD LITERACY DEVELOPMENT	3	College of Education	This course focuses on creating an environment in the early childhood setting that promotes literacy skill development. This course will help teachers create developmentally effective learning environments that promote listening, speaking, reading, and writing skills.
RDG 412	SCIENTIFICALLY BASED LITERACY INSTRUCTION	3	College of Education	This course focuses on scientifically-based research as the foundation for classroom reading instruction. It examines the work of the National Reading Panel, as well as the mandates of The Colorado Reading to Ensure Academic Development Act (2012) and state reading and language arts standards. In addition, it focuses on the five major areas of reading: phonemic awareness, phonics, fluency, vocabulary, and comprehension. The elements and the application of techniques for organizing and implementing explicit, systematic instruction in each of these areas, and methods of regularly assessing children's performance in reading and language arts are also emphasized.
RDG 415	DIAGNOSIS AND REMEDIATION OF READING DIFFICULTIES	3	College of Education	This course addresses the use of reading assessments to determine classroom intervention and instructional strategies. It provides foundational information about stages of reading acquisition, factors that impact reading success or failure, and the nature of reading difficulties. This information serves as a context for learning about the selection, administration, and interpretation of formal and informal classroom assessments for the purposes of screening, diagnosing difficulties, monitoring progress, and evaluating instruction. In addition, a final diagnostic and instructional recommendations report will be developed based on student test data provided.
RDG 416	METHODS OF TEACHING IN EARLY CHILDHOOD LANGUAGE AND LITERACY	3	College of Education	This course focuses on children's language and literacy development from birth to age 8. Students examine theories of language development, including theories of second language acquisition and the needs of English Language Learners. They also explore strategies for engaging children in integrated listening, speaking, reading, and writing experiences. Integration of content area standards and development of hands-on learning experiences are emphasized. Additionally, developmentally-effective assessments are discussed as a means of informing instruction.

RDG 418	PHONOLOGICAL THEORY AND READING INSTRUCTION	3	College of Education	This course focuses on scientifically based instruction in phonological awareness, linguistic skills, and phonics as fundamental to implementing an effective reading program. Students examine scientific research and distinguish it from non-scientific claims. In addition, they study the applications of scientific research to classroom instruction.
RDG 420	ELEMENTARY METHODS - READING/LANGUAGE ARTS	3	College of Education	This course focuses on current research, theory, methods, and state standards related to reading instruction. It provides students with the background knowledge in language arts necessary to prepare comprehensive standards-based lesson plans and integrated units of instruction. Effective instructional and assessment techniques are modeled.
RDG 420CA	ELEMENTARY METHODS: READING AND LANGUAGE ARTS	3	College of Education	This course focuses on current research, theory, methods, and state standards related to reading instruction. It provides students with the background knowledge in language arts necessary to prepare comprehensive standards-based lesson plans and integrated units of instruction. Effective instructional and assessment techniques are modeled.
RDG 420FE	READING FIELD EXPERIENCE	1	College of Education	Students will complete reading field experience activities.

RDG 500	SCIENTIFICALLY BASED READING INSTRUCTION	3	College of Education	This course focuses on scientifically based research as the foundation for classroom reading instruction. It examines the work of the National Reading Panel, as well as the mandates of No Child Left Behind and state reading/language arts standards. In addition, it focuses on the five major areas of reading: phonemic awareness, phonics, fluency, vocabulary, and comprehension. The elements and the application of techniques for organizing and implementing explicit, systematic instruction in each of these areas, and methods of regularly assessing children's performance in reading and in the language arts are also emphasized.
RDG 532	CURRICULUM CONSTRUCTS & ASSMNT: ENGL LANG ARTS & READING 4-8	4	College of Education	This course focuses on the knowledge, skills, texts, and instructional settings that are unique to students in grades 4-8. It emphasizes best practices in the instruction and in the assessment of oral language, word study, vocabulary, comprehension, fluency, research and study skills, writing, viewing and presenting/representing. Varied strategies for developing critical thinking, reading, and writing skills that facilitate learning in content areas are explored. Differentiating instruction is examined as a means of addressing the diverse cultures, strengths, and needs of students in 4-8 classrooms.
RDG 535	DIAGNOSIS AND REMEDIATION OF READING DIFFICULTIES	3	College of Education	This course addresses instructional reading or language arts strategies, student activities, and resources that can be utilized, based on students' contextual information and assessment results. It provides foundational information about stages of reading, factors that impact reading ability, and the nature of reading difficulties. This information serves as a context for learning about the administration and interpretation of formal and informal classroom assessments for the purposes of screening, diagnosing difficulties, monitoring progress, and evaluating instruction. In addition, a final case study report and intervention plan is developed based on student data provided.
RDG 537	CURRICULUM CONST AND ASSMT: READING AND LANGUAGE ARTS	4	College of Education	This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.

RDG 537CA	CURRICULUM CONST AND ASSMT: READING AND LANGUAGE ARTS	4	College of Education	This course focuses on the design and delivery of a comprehensive reading/language arts program of systematic instruction in reading, writing, listening, and speaking in multiple subject classrooms. Emphasis is placed on instructional planning, design, delivery and assessment as well as universal access and differentiated instruction. Candidates use this knowledge to prepare an integrated unit of instruction. Guided field experience, based on work with a student in a K-8 school setting, is incorporated into the course requirements.
RDG 542	CURR CONST AND ASSMT: READING METHODS FOR SECONDARY SETTINGS	3	College of Education	This course focuses on the most current research on the design, delivery, and assessment of content-based literacy strategies (pre-reading, guided reading, post-reading, and writing) in single subject classrooms at the secondary level. Candidates use this knowledge to prepare a comprehensive content area lesson plan. Guided field experience, based on work in a single subject content area classroom, is incorporated into the course requirements.
RDG 542CA	CURR CONST AND ASSMT: READING METHODS FOR SECONDARY SETTINGS	3	College of Education	This course focuses on the design and delivery of content-based literacy strategies (reading, writing, listening and speaking) in single subject classrooms. Emphasis is placed on instructional planning, design, and delivery; assessment; universal access and differentiated instruction. Candidates use this knowledge to prepare a comprehensive content area lesson plan. Guided field experience, based on work in a single subject content area classroom, is incorporated into the course requirements.
RDG 556	ELEMENTS OF LITERACY CONTENT AND PEDAGOGICAL KNOWLEDGE	3	College of Education	This course focuses on the five key themes of English language arts and literacy and English language development instruction: making meaning, language development, effective expression, content knowledge, and foundational skills in multiple subject classrooms. Candidates apply interdisciplinary teaching strategies to develop learning and critical thinking skills in their learners. Emphasis is placed on using both universal design as a learning framework to guide instructional planning, design, delivery and assessments, and Multi-Tiered System of Supports to meet the needs of diverse learners. This course incorporates required guided clinical experience based on work with a student in a K-8 school setting.

RDG 558	SECONDARY CONTENT AREA LITERACY	3	College of Education	This course focuses on implementing principles, and instructional strategies for comprehensive instruction of content-based literacy strategies in single-subject classrooms. Emphasis is placed on development of literacy throughout all content areas; designing and differentiating curriculum; showcasing literacy through speech, writing, listening, and reading; incorporating new literacies and assessment. Candidates use this knowledge to prepare a comprehensive content area lesson plan. This course incorporates required guided field experience based on work in a single-subject content-area classroom.
RDG 570	CURRICULUM CONST AND ASSMT: READING AND LANG ARTS FOR SPE	4	College of Education	This course focuses on the most current research, theory, and methods of reading instruction, while providing students with the background knowledge in language arts necessary to prepare an integrated unit of instruction. Various instructional and assessment techniques, including research-based phonics, are modeled. A practical application project, based on work with a student in a K-8 school setting, is incorporated into the course requirements.
RDNG 500	Reading Methods: Primary	3	College of Education	This course explores current theories and methods to support young children in making a successful start in reading. Participants explore principles of language acquisition and reading; children's transitions from oral language to concepts of print; and the techniques, technology, and texts to begin the development of college- and career-ready readers and writers. Participants analyze effective methods to monitor and assess children's reading, while differentiating reading instruction based on experiential background, language, culture, and special learning needs.
RDNG 501	Reading Methods: Elementary	3	College of Education	This course is designed to provide an integrated approach to reading instruction. Participants analyze current trends for teaching literacy and explore specific strategies designed to help construct meaning across the curriculum. Participants learn methods for meeting the needs of diverse learners and assessing reading performance. In addition, emphasis is placed on components of balanced literacy instruction, including word identification, prereading techniques, vocabulary development, fluency, comprehension, writing, and technology-based instruction.

RDNG 502	Reading Methods: Secondary	3	College of Education	This course emphasizes literacy and learning in grades 6-12. Various influences on reading and writing are analyzed, including new literacies, information and communication technologies, diversity, schema, resources, and student skill level. Participants examine state and national standards, instructional strategies, active engagement techniques, fluency, vocabulary development, and assessment.
RDNG 503	Diagnosis and Remediation	3	College of Education	This course is designed to provide participants with practice in current research-based assessment, diagnosis, and intervention and accommodations for struggling readers and diverse learners with literacy difficulties. Participants explore informal and formal assessments for progress monitoring. In addition, participants examine assessment results and create assessment reports with recommendations.
RDNG 504	Phonological Theory and Application	3	College of Education	This course addresses the linguistic, neurological, cognitive, and socio-cultural factors that influence readers and writers. The No Child Left Behind (NCLB) Act, national and state standards in literacy, and high stakes assessments have resulted in more attention placed on the role of phonics in students' reading and writing achievement. Participants study relevant research, theories, and instructional approaches, including technology and multimedia, to support phonics as a fundamental component of effective reading, writing, and spelling programs.
RDNG 505	CHILDREN'S LITERATURE	3	College of Education	This course examines children's literature, its various genres, and its importance in the classroom to engage students in reading, writing, listening, and speaking. Participants explore the value that children's literature adds to the lives of children and why reading matters for children, teachers, adults, society, and the world. Participants examine how to encourage children to be lifelong readers by learning about how, when, and why children read.

RDNG 506	Elementary Reading and Writing Strategies	3	College of Education	This course empowers participants to support diverse elementary students to read and write with ease and confidence. Participants explore the principles, theories, and standards that help students read and write well. In particular, participants explore reading and writing materials, instructional tools and strategies, and assessment techniques.
RDNG 507	Content Area Reading and Writing for Elementary	3	College of Education	This course focuses on methods and materials for teaching diverse elementary children to read and write well in various content areas. Participants examine current critical issues affecting content area reading and writing, including state and national assessments. Effective reading and writing strategies, vocabulary development, and technology tools, media, and print materials used to enhance children's reading and writing in the content areas are also explored.
RDNG 508	Adolescent Literature	3	College of Education	This course focuses on evaluating, selecting, integrating, and understanding adolescent literature in 6th-12th grade classrooms. Participants investigate gender, language, and individual preferences in adolescent literature. Participants analyze various techniques and formats for teaching diverse learners using an array of culturally responsive, age-appropriate, classic, contemporary, and award-winning literature. Participants examine the use of text sets, choice books, technology links, tradebooks, audio books, author studies, performance assessments, and book-to-film features to incorporate across the curriculum.
RDNG 510	Content Area Reading and Writing for Adolescents	3	College of Education	In this course, participants explore the teaching of reading and writing in grades 6-12 content area classrooms. Participants learn instructional strategies, comprehension strategies, vocabulary strategies, and techniques for using reading and writing to learn across content area lines. Methods for differentiating instruction as well as assessing reading and writing are examined.

RDNG 511	Reading Assessment	3	College of Education	This course focuses on K-12 reading assessment. Participants examine various types of assessment for use in the classroom, the school, the district, and the state. Participants explore objective tests, performance assessments, and standardized testing. Topics include evaluation of curriculum and assessment, data-driven decision making, Response to Intervention for struggling readers, diversity and assessment, and ethical and legal considerations.
REL 133	WORLD RELIGIOUS TRADITIONS I	3	College of Humanities and Sciences	This course offers a survey of the major historical developments, structural cosmology, symbolic interpretation, and values of the Hindu, Buddhist, Taoist, Confucian, and Shinto traditions.
REL 134	WORLD RELIGIOUS TRADITIONS II	3	College of Humanities and Sciences	This course provides a survey of the major historical developments, structural cosmology, symbolic interpretation, and values of the Judaic, Christian, and Islamic religious traditions.
RES 351	BUSINESS RESEARCH	3	School of Business	This course evaluates the process of conducting business research for improving decision making within an organization. Students will learn to apply an understanding of commonly employed business research techniques to improve a situation, solve a problem, or change a process. Other topics include problem framing, data collection, data analysis, and data presentation.

RES 700	STATISTICS ENTRANCE ASSESSMENT	0	School of Advanced Studies	This statistics assessment, which is not credit-bearing, is a pass/fail course that can be used to demonstrate a foundation of educational exposure to research, statistics or quantitative reasoning, fulfilling the academic progression requirement.
RES 709	RESEARCH CONCEPTUALIZATION AND DESIGN	3	School of Advanced Studies	This course provides an overview of social science research methodologies and their application in context to the student's degree program. Foundational concepts include the examination and application of theoretical frameworks, critical analysis of scholarly literature and interpretation of data through a theoretical lens. Students also explore quantitative, qualitative and mixed research methods and the core elements of an effective research plan.
RES 710	STATISTICAL RESEARCH METHODS AND DESIGN I	3	School of Advanced Studies	This course surveys a broad range of quantitative research methods to prepare learners to apply them to resolving a variety of researchable problems. Topics include an overview of descriptive and inferential statistics including nonparametric statistics.
RES 713	STATISTICS	3	School of Advanced Studies	This course provides learners with a foundation in the design of statistical research. This course builds on the material covered in Quantitative Methods and Statistical Analysis by elaborating on the various statistical techniques used in the analysis of data generated by empirical research. The course includes both descriptive and inferential statistical methods and spans parametric and non-parametric statistical methods including multi-variant research designs.

RES 720	STATISTICAL RESEARCH METHODS AND DESIGN II	3	School of Advanced Studies	The course builds on the student's foundational knowledge in research methods and statistics. The importance of how to select appropriate measures for a study, different research designs - experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.
RES 723	ADVANCED STATISTICAL RESEARCH METHODS AND DESIGN	3	School of Advanced Studies	The course builds on the foundational knowledge in research methods and statistics. The importance of how to select appropriate measures for a study, different research designs - experimental, quasi-experimental, and correlational, and threats to reliability and validity are discussed.
RES 724	QUALITATIVE METHODS AND DESIGN	3	School of Advanced Studies	This class presumes some basic understanding of the foundations and underlying assumptions in the field of qualitative research as well as examples of practice. Building upon this pre-existing foundational understanding the purpose of the class is to enhance students' understanding and craft through reading, writing, and reflecting on the practice of qualitative inquiry. Specific focus is on the design and development of qualitative research studies.
RES 725	DESCRIPTIVE AND COMPARATIVE DATA ANALYSIS	3	School of Advanced Studies	This course focuses on statistical analysis methods and reporting of results when describing and comparing data from groups. Learners will explore the assumptions, advantages, limitations, and appropriate applications of these quantitative approaches. The methods covered will include comparison of means for various forms of data including multiple means using methods of basic and advanced factorial ANOVA. Multivariate comparisons will also be explored under conditions of multiple independent and dependent variables using techniques including Hoetelling's T, MANOVA and related techniques. Depending on the learners' needs other approaches may be covered.

RES 726	CORRELATIONAL METHODS OF ANALYSIS	3	School of Advanced Studies	This course focuses on statistical approaches to analysis and reporting when examining bivariate and multivariate relationships among variables. Learners will explore the underlying assumptions, advantages, limitations and appropriate application of correlation/regression based approaches to data analysis. The course will cover basic correlation methods, simple and multiple regression techniques, and advanced multivariate procedures including factor analysis and structural equation models. Depending on the learners' needs, other approaches may be covered.
RES 727	APPROACHES TO PHENOMENOLOGICAL INQUIRY AND DATA ANALYSIS	3	School of Advanced Studies	This course is designed to provide advanced graduate students with instruction in qualitative phenomenological approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for phenomenological data collection. Focus is placed on analysis approaches appropriate for and relevant to phenomenological research.
RES 728	QUALITATIVE CASE STUDY	3	School of Advanced Studies	This course is designed to provide advanced graduate students with instruction in qualitative case study research approaches as applied to social science research. The course will emphasize individual and group interviewing as techniques for qualitative case study data collection. This course is particularly useful for advanced doctoral students who plan to conduct a qualitative dissertation. Focus is placed on analysis approaches appropriate for and relevant to case study research.
RES 729	ETHNOMETHODOLOGY AND THE STUDY OF CULTURE	3	School of Advanced Studies	In this course, students will build knowledge of and competence with data analysis techniques developed in the anthropological tradition of ethnography. Integrating data from multiple collection methods (e.g. observational field notes, interviews, analyses of cultural artifacts), students will develop coding/thematic grouping protocols as well as strategies to develop findings into comprehensive interpretation of a particular culture. The course will conclude with a comprehensive overview of the process and practice of writing up ethnographic texts, centering largely on "thick description" as a critical mode of representation.

RES 741	TESTING AND MEASUREMENT	3	School of Advanced Studies	A comprehensive overview of the psychological tests and measurements used by I-O psychology practitioners. Basic psychometric principles, such as reliability, validity, and standardization, will be explored. Students will also learn about the steps involved in test devlopment and considerations surrounding the interpretation of test scores. Professional and ethical standards and guidelines for testing are reviewed.
RES 745	GROUNDED THEORY METHODS	3	School of Advanced Studies	This course is designed to provide advanced graduate students with instruction in qualitative approaches as applied to social science research, where the research objective is the development of theory. Building upon an existing understanding of qualitative inquiry, students explore the concept of data within grounded theory as well as the techniques and processes traditionally found within grounded theory, such as the constant comparative method. Focus is placed on the steps and procedures for analyzing data within a grounded theory context.
RES 746	MIXED METHODS	3	School of Advanced Studies	The Mixed-Methods course focuses on both conceptual issues surrounding the use of mixed methods in business, education, nursing and social science research and the analysis of data using mixed methods. The course will involve scrutiny of published mixed-method research throughout, and uses published research for reference purposes throughout the course. Students are expected to develop skills in mixed- method research by engaging in actual analysis of data using mixed methods. Thus, the course will blend conceptualization, design, and analysis. Content of the course represents a clear recognition of the importance of mixed methods in research and the growing importance of a solid knowledge of both quantitative and qualitative approaches -- and their blending -- to actually design and conduct meaningful doctoral level research.
RES 750	APPROACHES TO RESEARCH: QUANTITATIVE/QUALITATIVE I	3	School of Advanced Studies	In this course, students will learn about foundational quantitative and qualitative research designs and their appropriateness for achieving a study's objectives. Topics include research methods and design, the development of problem statements, purpose statements, research questions, and hypotheses. Learners will create the foundational components of a concept paper for the two topics identified by the student during PSYCH/720R.

RES 751	APPROACHES TO RESEARCH: QUANTITATIVE/QUALITATIVE II	3	School of Advanced Studies	In this course, students will critically evaluate the two research topics developed into draft concept papers during RES/750 to determine which topic is most viable for their dissertation study. After selecting a topic, students will more deeply examine quantitative and qualitative research designs, including key methodological approaches. They will continue to develop key components of their dissertation concept paper and focus on a brief review of the literature, a summary of the theoretical or conceptual framework, and a justification of their research methods and design choices.
RES 752	RESEARCH CONSTRUCTS AND DESIGN	3	School of Advanced Studies	In this course, students will synthesize the cumulative knowledge gained in RES/750 and RES/751 to prepare their dissertation concept paper for final review and evaluation. The concept paper will be expanded to ensure a brief discussion of the study population, the sampling strategy, and the methodological approach of data collection and analysis. The contents of the concept paper will be critically reviewed by the student for alignment with the School of Advanced Studies Dissertation Criteria and Rating Scale.
RES 760	MEASUREMENT OF CONSTRUCTS	3	School of Advanced Studies	The purpose of this course is to guide learners in the integration of information learned in previous courses (i.e., residency, research courses, testing and measurement) that relates to measurement and dissertation issues and apply the information to the initial working draft of the dissertation (developed in Research Constructs and Design). The final outcome of this course will be used as an initial draft of the introduction and literature review of the dissertation.
RES 765	MULTIVARIATE STATISTICS	3	School of Advanced Studies	This course focuses on statistical approaches that simultaneously examine multiple variables. Students will explore the assumptions, limitations, advantages, and applications of each approach. The approaches will include correlation and regression, discriminant function and analysis, multidimensional scaling, MANOVA, factor analysis, and path analysis and structural equation modeling.

RES 770	PSYCHOMETRICS	3	School of Advanced Studies	Learners will be exposed to theoretical and applied research issues for three areas of psychometrics: classical test theory, generalizability theory, and item response theory. These three theories will be examined based on I/O topics of interest to the students, such as leadership, individual differences, selection, and teamwork.
RES ARA1	ADVANCED RESEARCH ANALYSIS ELECTIVE	3	School of Advanced Studies	Placeholder for Advanced Research Analysis Elective in the CERT/D-RES 001 program.
RES ARA2	ADVANCED RESEARCH ANALYSIS ELECTIVE	3	School of Advanced Studies	Placeholder for Advanced Research Analysis Elective in the CERT/D-RES 001 program.
RES ARA3	ADVANCED RESEARCH ANALYSIS ELECTIVE	3	School of Advanced Studies	Placeholder for Advanced Research Analysis Elective in the CERT/D-RES 001 program.

REV 410	REVENUE MANAGEMENT STRATEGY AND IMPLEMENTATION	3	School of Business	This course applies the advanced techniques and management skills necessary to elevate the performance of an organization through the role of a strategic revenue manager. Students will develop the skills necessary to implement strategies and understand the implications of their decisions on the hospitality organization. Through a case study approach, students will interpret revenue management opportunities and create impactful solutions with an action plan for implementation within a hospitality setting.
RHET 300	RHETORICAL THEORIES	3	College of Humanities and Sciences	This course examines major rhetorical theories and theorists from a range of cultures and periods.
RHET 470	STUDIES OF AMERICAN RHETORIC	3	College of Humanities and Sciences	This course examines American rhetoric from a variety of genres and a range of historical periods.
RHET 475	RHETORIC AND SOCIAL MEDIA	3	College of Humanities and Sciences	This course explores the use of rhetoric in contemporary social media.

RHM 410	THE LANDSCAPE OF HEALTH CARE IN RETAIL HEALTH CLINICS	3	College of Health Sciences and Nursing	This course introduces students to the business operations of the retail health environment. Focus will include overall concepts of health systems, managed care plans, and government providers that impact retail health clinics, as well as formulating strategies for the future development of retail clinics.
RHM 420	THE MANAGEMENT OF RETAIL HEALTH CLINICS	3	College of Health Sciences and Nursing	This course introduces students to the management of retail health clinics. Content will focus on customer engagement, clinical practices, and the day-to-day management of the retail health clinic environment.
RHM 430	TECHNOLOGY AND DIGITAL HEALTH CARE IN RETAIL HEALTH CLINICS	3	College of Health Sciences and Nursing	This course introduces students to technology and digital health within retail health clinics. Concepts covered include patient record management, the exchange of data, proper coding, and data management for the health and wellness of consumers using retail health clinics.
RHM 440	REGULATORY AND COMPLIANCE IN THE RETAIL HEALTH ENVIRONMENT	3	College of Health Sciences and Nursing	This course covers regulatory and compliance concepts as it relates to retail health management. Students will focus on resource allocation related to compliance and regulations concerning privacy and security laws, and communication protocols with consumers, staff, and external partners to the retail health clinics.

RHM 450	RETAIL HEALTH FINANCIAL STRATEGIES	3	College of Health Sciences and Nursing	This course introduces students to approaches that relate to the financing and reimbursement of retail health clinics. Course content will focus on financial strategies for retail health clinics, the various payers within the health care industry for timely reimbursement, and appropriate billing and coding considerations that impact the management of retail health clinics.
SCHC 505	HUMAN DEVELOPMENT AND FAMILY CHANGE ACROSS THE LIFESPAN	3	College of Social Sciences	This course presents students with theoretical frameworks to foster an understanding of the various dimensions of human development. Emphasis is placed on biological, cognitive, and psychosocial development within the context of gender, family systems, social roles, and culture. Students evaluate school based situations, consider prevention strategies and assess potential interventions in the school context.
SCHC 506	SCHOOL COUNSELING THEORIES AND PERSONALITY MODELS	3	College of Social Sciences	This course enables students to differentiate among the primary theoretical models of personality theory and counseling practice, including psychodynamic, affective, cognitive- behavioral, and systems theory. Emphasis is on the importance of students recognizing belief systems that accurately reflect their own personal style and also recognizing strategies and approaches likely to be most successful with a particular school population. Students have opportunities to establish a strong theoretical foundation as the basis of school practice and to evaluate and assess educational situations for implementation of therapeutic interventions that are gender and culturally appropriate.
SCHC 510	HUMAN DIVERSITY AND SPECIAL POPULATIONS IN SCHOOL COUNSELING	3	College of Social Sciences	This course is designed for school counselors as a foundation for understanding diversity among the school age population in a pluralistic society. Emphasis will be on integrating awareness, knowledge, and skills related to counseling differences and similarities based on age, race, ethnicity, national origin, religious affiliations, gender identification, sexual orientation, physical/mental limitations, social class, etc.

SCHC 515	LEGAL AND ETHICAL ISSUES IN COUNSELING AND SCHOOLS	3	College of Social Sciences	This course covers the legal and ethical responsibilities of the counseling professional, particularly related to counseling in schools. Students learn to interpret and act upon situations appropriately and effectively. Content includes issues such as client rights, confidentiality, duty to warn and protect, dual relationships, supervision and consulting, ethics with special populations, and ethical decision-making models.
SCHC 517	FOUNDATIONS OF SCHOOL COUNSELING	3	College of Social Sciences	This course introduces prospective school counselors to the history, services, settings, roles, and competencies of counselors in elementary and secondary schools in America. Pertinent laws and ethical standards will be explored. Important trends that will continue to influence school counseling programs will also be examined.
SCHC 519	DELIVERY OF SERVICES IN SCHOOL COUNSELING	3	College of Social Sciences	This course is aligned with the national school counseling model by introducing the student to the delivery components of effective school counseling programs including the guidance curriculum, individual planning, responsive services and system support. Students will learn how these services are appropriately delivered at the different school levels from kindergarten through high school.
SCHC 525	INDIVIDUAL COUNSELING: CHILDREN AND ADOLESCENTS	3	College of Social Sciences	This course provides students with foundational professional skills in counseling, with a focus on individual counseling techniques with children and adolescents. Particular emphasis is given to the application of these skills in the school-based environment.

SCHC 537	RESEARCH AND DATA ANALYSIS IN SCHOOL COUNSELING	3	College of Social Sciences	This course provides an overview of the fundamentals of research and evaluation in the counseling profession. Topics include research methods, statistical analysis, needs assessment, program evaluation, and data driven research necessary in the school setting. Emphasis is placed on understanding connections between research design and data analysis related to school counseling.
SCHC 544	CLINICAL ASSESSMENT AND STUDENT EVALUATION	3	College of Social Sciences	This course introduces students to models and tools of assessment and evaluation necessary to work within a school environment. Students will have a basic knowledge of the Diagnostic and Statistical Manual of Mental Disorders (DSM) and understand the historical, ethical and legal issues regarding assessment. Administration, scoring and interpretation of standardized tests are described as well as the purposes of assessment in an educational counseling setting. Students will develop competency in intervention, referral, and after care procedures for professional school counseling practice in situations such as abuse and neglect, substance abuse, and suicide, as well as participating as a member of a multi-disciplinary team for special education planning.
SCHC 554	GROUP COUNSELING: CHILDREN AND ADOLESCENTS	3	College of Social Sciences	This course provides students with intensive knowledge, awareness, and skill-building in group counseling within a school setting. Content emphasizes such areas as different types of groups, group dynamics, group norms and boundaries, leadership styles, leading and co- leading, and development of appropriate school based counseling group plans. Confidentiality, selection procedures, ethics, and multicultural diversity are included as key components of effective group counseling practice.
SCHC 556	PORTFOLIO II	0	College of Social Sciences	Professional Counseling Assessment Portfolio II helps students integrate and evaluate their learning in the Master of Science in School Counseling program at midpoint. Like an assessment center, Portfolio II provides an integrative experience requiring the student to bring together all of what he or she has learned in previous courses in the program and to demonstrate how that learning has been applied both personally and professionally.

SCHC 562	STUDENT VOCATIONAL DEVELOPMENT AND CAREER COUNSELING	3	College of Social Sciences	This course is a study of career counseling from theory to practical application. The focus is on clearly delineated career guidance objectives and strategies for implementing career guidance programs in schools, including the development of individual career life plans for students. The course fosters appropriate use of career counseling tools such as computer-based guidance systems, labor market information, and assessment. It provides a historical perspective of current College Tech Prep and K-12 programs. Issues related to career counseling for individuals from specific populations are also addressed.
SCHC 571	SCHOOL COUNSELING ADMINISTRATION	3	College of Social Sciences	This course examines the essential role of counselors in administering school counseling programs. This includes the processes of designing, implementing, monitoring, and evaluating comprehensive school counseling and guidance programs. The course emphasizes the role of the counselor as a leader and advocate in systemic change.
SCHC 592	PRACTICUM IN SCHOOL COUNSELING	3	College of Social Sciences	The Practicum is designed to help students make a transition from the academic study of school counseling concepts to the practical application of these concepts in the school setting. Students are closely supervised as they develop skills in the comprehensive school counseling areas of responsive services, guidance curriculum, individual planning, and system support. The practicum experience includes on campus classroom hours and 100 Practicum hours at a school site.
SCHC 592O	ORIENTATION TO SCHOOL COUNSELING PRACTICUM	0	College of Social Sciences	This course is an orientation to the practicum and internship.

SCHC 597A	SCHOOL COUNSELING INTERNSHIP A	3	College of Social Sciences	Counseling Internship is a 600-hour clinical experience required of all Master of Counseling students. Divided into 300 hour sections, each lasting 15 weeks, SCHC/597 A and B comprise Portfolio III of the counseling portfolio series. Students work in a K-12 school setting for 20-30 hours per week where they provide school counseling services under the direction school counseling services under the direction and supervision of an approved school counselor.
SCHC 597B	SCHOOL COUNSELING INTERNSHIP B	3	College of Social Sciences	Counseling Internship is a 600-hour clinical experience required of all Master of Counseling students. Divided into 300 hour sections, each lasting 15 weeks, SCHC/597 A and B comprise Portfolio III of the counseling portfolio series. Students work in a K-12 school setting for 20-30 hours per week where they provide school counseling services under the direction and supervision of an approved school counselor.
SCH-CN 501	School Counseling: Delivery of Services	3	College of Education	Aligned with the national school counseling model, the primary focus of this course is on guidance curriculum, individual planning, responsive services, and system supports that advocate for every student's academic, career, personal, and social success. Delivery components of effective K-12 school counseling programs are examined. Participants analyze current strategies, interventions, and trends to promote constructive partnerships and student wellness.
SCI 162	PRINCIPLES OF HEALTH AND WELLNESS	3	College of Humanities and Sciences	This course reinforces the concept that learning effectively and living well involves both the mind and body. It presents the fundamentals of wellness and preventive health including strategic planning to attain and maintain personal optimal health. In addition, physical and mental diseases are discussed along with the dangers of environmental pollution, stress, addiction, and other negative factors that can affect personal health.

SCI 163	ELEMENTS OF HEALTH AND WELLNESS	3	College of Humanities and Sciences	This course provides an overview of the key components of comprehensive wellness. Based on a preventive model, the course will allow learners to explore choices that promote wellness with goals of living longer and better.
SCI 163M	ELEMENTS OF HEALTH AND WELLNESS	3	College of Humanities and Sciences	This course provides an overview of the key components of comprehensive wellness. Based on a preventive model, the course will allow learners to explore choices that promote wellness with goals of living longer and better.
SCI 201	SURVEY OF ALTERNATIVE MEDICINE	1	College of Humanities and Sciences	This course examines the traditions and recent developments within the field of alternative medicine, and includes a comparison of Western and Eastern diagnostic systems. Through a highly interactive and experiential format, participants will overview a comprehensive range of physical, psychological, and energy therapies resulting in insight, awareness, and appreciation for diverse approaches to medicine.
SCI 209	OCEANOGRAPHY	3	College of Humanities and Sciences	This course examines the linkages between the evolution of earth and water masses. Students will focus on the physical, chemical, biological and geological aspects of the ocean processes.

SCI 220	HUMAN NUTRITION	3	College of Humanities and Sciences	This course introduces the basic concepts of food and nutrition to highlight ways that students can integrate good nutrition into their lifestyles. Principles of digestion and absorption, the function of nutrients, lifecycle nutritive needs, disease prevention, diet modifications, and weight management are covered. Practical application of these principles to the students' lives is emphasized.
SCI 230	INTRODUCTION TO LIFE SCIENCE	3	College of Humanities and Sciences	This course introduces the student to scientific ideologies and concepts that not only shape our biological world, but also shape us as humans. Through a variety of comprehensive assessments and relevant discussions, students examine the scientific method, the dynamics of inheritance, and the affect humans have on the environment. Topics include the biology of cells, energy systems, and evolution.
SCI 241	NUTRITION	3	College of Humanities and Sciences	SCI 241 introduces students to the world of human nutrition. Students examine the components included in a healthy, balanced diet, and develop strategies to meet their changing nutritional needs throughout the various stages of life. Specific topics for the course include: the digestion process, functions and health benefits of specific nutrients, weight management and fitness, and the effects of nutritional deficiencies.
SCI 250	MICROBIOLOGY	4	College of Humanities and Sciences	This course will instruct students on the fundamentals of microbiology. Topics will include introduction to the biology of microorganisms, including structure, function, metabolism, growth, genetics, diversity and host-parasite relationships. Also, examples of how microorganism are relevant to the needs, activities, and role of the health of individuals is discussed. Students will explore principles of applied microbiology and apply these scientific principles to case studies and lab experiences.

SCI 256	PEOPLE, SCIENCE AND THE ENVIRONMENT	3	College of Humanities and Sciences	This in-depth environmental science course examines how people use science to understand how they relate to the environment. The course explores relationships between people and ecosystems, and the science behind how ecosystems work. It reviews the historical development of the environmental movement, interactions between humans and natural ecosystems , and more specifically, the role of a growing population and associated pressures on natural resources. This course further examines how economics, natural systems, and conservation are interrelated. The many forms of pollution as well as types of energy resources are addressed. This course challenges students to consider the impact of lifestyle choices on environmental sustainability.
SCI 275	ENVIRONMENTAL SCIENCE	3	College of Humanities and Sciences	This course focuses on the causes, impacts, and solutions to environmental issues. Students will identify global environmental issues, as well as develop and critique environmental action plans. Topics addressed include ecosystems, energy, populations, resources, pollution, and sustainability.
SCI 362	ENVIRONMENTAL ISSUES AND ETHICS	3	College of Humanities and Sciences	This course applies scientific, philosophical, economic, and ethical principles to current and future environmental issues. Students will analyze the cumulative impact of human activities on global ecosystems, as well as responsibilities to the natural world, in terms of the complex interrelationships humans have with their environment.
SEC 100	INTRODUCTION TO SECURITY MANAGEMENT	3	College of Information Systems and Technology	Introduction to the basics of corporate security management, including the development, documentation, and implementation of policies and procedures for protecting corporate assets. Identifies security management procedures that support information classification, risk assessment, and risk analysis to identify threats, categorize assets, and rate system vulnerabilities. Course also introduces concepts that will be further developed in the next five courses.

SEC 110	INTRODUCTION TO THE CRIMINAL JUSTICE SYSTEM AND PATRIOT ACT	3	College of Information Systems and Technology	An overview of the criminal justice system in the United States. Insights will be provided on the history, philosophy and social development of both federal and state criminal justice systems and the impact of the Patriot Act on these systems.
SEC 120	CORPORATE SECURITY ESSENTIALS	3	College of Information Systems and Technology	Introduction to the systems and processes that identify and effectively mitigate activities that may threaten the resilience and continued survival of an enterprise. Overview of corporate activities that oversee and manage the close coordination of all functions within a company that are concerned with security, continuity and safety.
SEC 130	PRIVATE SECURITY ISSUES AND CONFLICTS	3	College of Information Systems and Technology	Introduction to private security guidelines that are essential to the success and safety of individuals and professional private policing organizations. Course also examines, through case study, examples of private security firm failures and successes.
SEC 140	INCIDENT COMMUNICATION PLANS AND SYSTEMS	3	College of Information Systems and Technology	Overview of plans that swiftly and effectively communicate incident details and subsequent response actions. Course also introduces concepts to pre-plan standardized methods and notification procedures that will allow companies to rapidly communicate in the event of a crisis condition. Course will establish that well planned communication procedures will streamline anticipated methods and assure messages are received promptly during a crisis situation.

SEC 150	INSIDER THREATS FUNDAMENTALS	3	College of Information Systems and Technology	Course provides an overview of threats to an organization that come from people within the organization, such as employees, former employees, contractors or business associates, who have inside information concerning the organization's security practices, data and computer systems. Insider threats may involve fraud, the theft of confidential or commercially valuable information, the theft of intellectual property, or the sabotage of computer systems, either directly or through indirect access.
SEC 200	EMERGENCY MANAGEMENT AND RESPONSE	3	College of Information Systems and Technology	Introduction to the development of an emergency response plan which includes conducting risk assessments to identify potential emergency scenarios. Course will provide insights on potential threats and the need to respond with appropriate resources. Course will also review actual corporate emergency plans that include building evacuation ("fire drills"), sheltering from severe weather such as tornadoes, "shelter- in-place" from an exterior airborne hazard such as a chemical release and lockdown procedures when confronted with an act of violence.
SEC 210	PHYSICAL ASSET PROTECTION	3	College of Information Systems and Technology	This course introduces students to examining physical assets and evaluating risk as a result of associated threats and identified vulnerabilities. Based on a risk analysis model, students will evaluate assets, prioritize threats, and apply critical thinking to countermeasures with consideration for a cost- benefit analysis.
SEC 220	CRITICAL THINKING IN SECURITY MANAGEMENT	3	College of Information Systems and Technology	Course addresses the development of critical thinking skills that facilitate improved security management decision making. Overview of the importance of developing critical and creative thinking skills and technologies in the 21st century.

SEC 230	HOMELAND SECURITY AND PUBLIC SAFETY	3	College of Information Systems and Technology	This course evaluates public safety initiatives in a post 9/11 era with emphasis on homeland security strategies carried out by federal, state, local, private, and joint assets. Students will examine threats, investigative techniques, and applicable laws and regulations used to mitigate risk.
SEC 240	LOSS PREVENTION AND SUPPLY CHAIN SECURITY	3	College of Information Systems and Technology	This course is an introduction and general overview of loss prevention and supply chain security strategies and programs. Students will learn the basic principles and methodologies involved with the prevention of shrinkage or loss. Students will be introduced to basic theories and concepts, key terms and definitions and current critical issues. Additionally this course provides an overview of situational crime prevention the crime risk management process, and the stages necessary to designing an effective supply chain security program.
SEC 311	SECURITY MANAGEMENT FUNDAMENTALS	3	College of Information Systems and Technology	This course is an overview of the principles of security management and the consequences of failure to identify and adequately protect business assets. The course includes an introduction to loss prevention and risk management. It provides an overview of the contingencies that influence modern security management, such as technology, legal issues, ethics, vulnerability assessments, criminal and terrorist activity, and interagency cooperation. The course also introduces various security specializations including corporate, academic, transportation, and government.
SEC 319	COMPUTERS AND INFORMATION PROCESSING IN SECURITY	3	College of Information Systems and Technology	This course introduces the fundamentals of information systems and the role of information management and protection in the modern security environment. Students will explore and develop their skills in critical thinking and problem- solving of information systems, networking communication, information utilization from the Internet, and information management and security collaboration. Learners will also nurture their professional competence and values by learning how to handle information ethically.

SEC 321	SURVEY OF SECURITY SPECIALIZATIONS	3	College of Information Systems and Technology	This course identifies and contrasts the benefits of proprietary and contract security operations and introduces the student to a variety of security specializations. It also examines the purposes, objectives, procedures, risks, and types of organizations associated with the respective specializations.
SEC 331	INDUSTRIAL SAFETY	3	College of Information Systems and Technology	This course provides the student with an overview of safety issues that could be experienced by security personnel as first responders in various work environment emergencies. It includes a review of OSHA, EPA and Fire Code safety regulations and provides methods for identifying and correcting environmental risk factors related to hazardous materials, fire and other potential safety hazards. The course is also intended to provide the student with knowledge that will assist with the initial response to an investigation of work related accidents.
SEC 341	CRIMINOLOGY AND THE CRIMINAL JUSTICE SYSTEM	3	College of Information Systems and Technology	This course identifies the theories of criminology and its influence on society from social, political, individual and theoretical perspectives. The course examines types of criminal activity and provides students with an understanding of the causes of criminal behavior and the societal response to crime. The course also identifies and discusses the various elements of the American criminal justice system and related current trends of social media and perceived disparages.
SEC 351	LEGAL AND REGULATORY ISSUES IN SECURITY MANAGEMENT	3	College of Information Systems and Technology	This course examines legal, regulatory, ethical, and policy issues that influence the work performance of security personnel. It also discusses the potential consequences of non-compliance for individuals and institutions.

SEC 361	INTERPERSONAL COMMUNICATIONS	3	College of Information Systems and Technology	This course prepares the student to communicate effectively in written and verbal form. It provides principles for effective investigative reporting and incident documentation, as well as techniques for interviewing and understanding verbal and nonverbal communication.
SEC 371	FINANCE AND BUDGETING PRACTICES	3	College of Information Systems and Technology	This course provides the student with an understanding of the various elements of a program budget and the process of budget development, justification, and presentation. Special emphasis is given to these procedures, practices, and liabilities in relation to security-oriented environments.
SEC 391	ORGANIZATIONAL BEHAVIOR AND MANAGEMENT	3	College of Information Systems and Technology	This course encompasses the study of individual and group behavior in organizational settings, with special emphasis on those that are security-oriented. Management methods for organizational processes and change are presented along with leadership applications.
SEC 401	THREAT AND VULNERABILITY MANAGEMENT	3	College of Information Systems and Technology	This course highlights a methodical approach to security management. Students will learn the steps necessary to carrying out a comprehensive security risk assessment with consideration for physical facilities, personnel, equipment, and operating systems. Students will evaluate techniques and current trends for identifying and managing security risks and vulnerabilities associated with potential threats.

SEC 411	PHYSICAL SECURITY	3	College of Information Systems and Technology	Review of facilities physical security measures, including active and passive protection systems.
SEC 421	PERSONNEL SECURITY AND EXECUTIVE PROTECTION	3	College of Information Systems and Technology	Review of personal security measures, including employee, general public and VIP protection systems and methods.
SEC 431	PRINCIPLES OF INVESTIGATION	3	College of Information Systems and Technology	Investigation of criminal activity, employment applicant backgrounds, and internal organizational security issues are an integral part of the security manager's responsibilities. This course is designed to provide the student with an understanding of the principles and techniques of investigation.
SEC 441	SECURITY OF NETWORKS AND ENTERPRISE SYSTEMS	3	College of Information Systems and Technology	This course provides the student with an understanding of the security issues associated with computer network systems. The course also identifies security measures that are intended to protect the software, hardware, and data associated with computer systems and include practices that security professionals can employ to harden their organization's information systems against attack.

SEC 451	GLOBAL SECURITY ISSUES	3	College of Information Systems and Technology	Course provides an overview of the "General Security Risk Assessment Guideline." Also addresses global socioeconomic, political, and environmental issues. As well an introduction to the US State Department International Traffic in Arms Regulation (ITAR) and the US Commerce Department Export Administrative Regulations (EAR) on global business operations.
SEC 461	TERRORISM	3	College of Information Systems and Technology	This course helps the student understand the causes of domestic and international terrorism and the psychological and economic effects of terrorist acts. Additionally, student learn how to assess terrorist risks as they relate to the private sector and how to prepare for and handle the incident and business continuity planning for recovery.
SEC 471	CRITICAL INCIDENT MANAGEMENT	3	College of Information Systems and Technology	This course introduces students to the process of critical incident management, encompassing a variety of events that impact justice and security organizations. This course will discuss prevention, planning and recovery, as well as inter-agency coordination and response.
SEC 481	SECURITY CAPSTONE	3	College of Information Systems and Technology	Through operational scenarios and practical exercises, students will address the competencies outlined in the "Chief Security Office (CS0) Organizational Standard," by ASIS/American National Standard. Includes a summary and integration of the entire organizational security and management curriculum.

SEC 489	IMPLEMENTATION OF SECURITY SYSTEM MEASURES	3	College of Information Systems and Technology	This course will examine the process of security project planning. Students will gain knowledge in how to submit a contract requesting proposals, analyzing appropriate bids, procuring necessary components for the security system, and security system integration.
SEC 490	PHYSICAL SECURITY OPERATIONS CAPSTONE	3	College of Information Systems and Technology	In this course students will examine the physical security of a facility and complete a security survey to make recommendations on improvement while considering cost implications and system effectiveness.
SEC 491	ENTERPRISE SECURITY ADMINISTRATION CAPSTONE	3	College of Information Systems and Technology	This course will examine the totality of the domain areas necessary to successfully manage Enterprise Security within an organization. We will place special emphasis on integrating knowledge from the previous courses to examine the security system as a whole and make recommendations for best practices and improvement.
SEC 508	MODELS, THEORIES AND STRATEGIES FOR SECONDARY EDUCATION	3	College of Education	This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.

SEC 532	SECONDARY - CREATING AN EFFECTIVE LEARNING ENVIRONMENT	3	College of Education	This course examines the strategies used in managing a positive and respectful classroom environment within the framework of today's diverse student population. Topics include models of discipline, establishing expectations and procedures, motivating and engaging students, parent and community engagement, and effective communication strategies. This course provides direction to teacher candidates on how and where to seek support and guides them in developing an individual classroom management plan appropriate for their targeted grade levels and needs.
SEC 533	INSTRUCTION AND ASSESSMENT FOR DIVERSE LEARNERS	3	College of Education	This course focuses on the theoretical models that underlie teaching and learning in middle and high school settings. Teacher candidates examine methods for teaching all students, explore lesson plan designs, analyze the most effective instructional and questioning strategies to promote student learning, and develop a lesson plan. Candidates also explore assessment and its relationship to lesson planning, apply the backward design process to unit and lesson planning, and analyze methods of collaborating with colleagues and communicating with parents and families.
SEC 534	READING IN THE CONTENT AREA	3	College of Education	This course focuses on the most current research on the design, delivery, and assessment of content-based literacy strategies in single-subject classrooms at the middle and high school levels. Foundations and trends in content area literacy, academic language strategies, disciplinary reading and writing strategies, and inquiry-based strategies are addressed in this course. The integration of new literacies and technology into content area instruction, strategies for effectively studying texts, approaches to lesson and unit planning, and benefits of collaborative learning are explored. Candidates use this knowledge to prepare a comprehensive content area literacy unit at the end of the course.
SEC 535	ENGLISH/LANGUAGE ARTS CONTENT AND CURRICULAR KNOWLEDGE	3	College of Education	This course explores the application of basic instructional methods to the content area of English and language arts in middle and high school settings. Teacher candidates identify the educational needs of students by exploring current instructional theory, models, and strategies; and state, local, and national standards as they relate to instruction, assessment, and accountability. Skills for teaching reading and comprehending complex literary and informational texts, as well as writing, listening, and speaking in the classroom are also examined. This course also helps participants develop skills in selecting and adapting delivery methods for diverse individual students and student populations.

SEC 536	SOCIAL STUDIES CONTENT AND CURRICULAR KNOWLEDGE	3	College of Education	This course explores the application of instructional methods and strategies for teaching history and social sciences in diverse middle and high school settings. Teacher candidates review national and state standards, current issues, and approaches to instruction and assessment in the social sciences. This course assists prospective educators in developing skills to select and adapt social science resources to support curriculum that meets the needs of all learners and integrates literacy and technology, and to plan for professional development and enrichment activities. Throughout the course, candidates will complete a content-specific unit ready for use in a classroom or inclusion in a professional portfolio.
SEC 537	SECONDARY CONTENT AND CURRICULAR KNOWLEDGE	3	College of Education	This course focuses on the methodology and assessment strategies that enhance learning at the secondary level across content areas. The teacher candidate will use assessment data to enhance instruction that meets students' varied learning needs. Teacher candidates will apply essential strategies to promote critical thinking and incorporate meaningful context to promote a deeper understanding of content. This course also explores multiple perspectives of students as learners of secondary content as well as current research on pedagogy.
SEC 538	MATHEMATICS CONTENT AND CURRICULAR KNOWLEDGE	3	College of Education	This course focuses on the pedagogy and assessment strategies of teaching mathematics in middle and high school settings. Teacher candidates identify the educational needs of secondary students by exploring national, state, and professional standards from the National Council of Teachers of Mathematics, as well as current theories, models, and strategies of instruction to meet the needs of diverse learners. Teacher candidates will focus on enhancing the meaning of mathematical concepts, developing critical thinking skills to include the use of math concepts in other disciplinary areas, and creating real-life experiences for all learners.
SEC 539	PHYSICAL EDUCATION CONTENT AND CURRICULAR KNOWLEDGE	3	College of Education	This course explores the secondary physical education classroom teaching and assessment strategies, and national and state standards. Candidates examine topics including developing motor skills through activities, developing levels of physical fitness, understanding principles of human movement, developing and practicing social skills, and the value of fair play in games and sports. Candidates develop skills in selecting, designing, and adapting instruction for diverse student populations. The course also emphasizes classroom and sport/field management skills and safety as they relate to physical education instruction.

SEC 540	SCIENCE CONTENT AND CURRICULAR KNOWLEDGE	3	College of Education	This course is designed to prepare teacher candidates to teach science at the secondary school level. To meet this objective, candidates explore the instructional methods in science content areas in middle level and high school settings. Candidates identify the educational needs of secondary students by exploring current instructional theory; national, state, and local standards; and social issues that affect the science classroom. The course also helps candidates develop skills in selecting and adapting instruction and management plans for diverse student populations.
SEC 541	VISUAL ARTS CONTENT AND CURRICULAR KNOWLEDGE	3	College of Education	This course explores the theory, application, and strategies of teaching the visual arts for single-subject teacher candidates. Candidates identify the educational needs of students by exploring current instructional theory, national and state standards, assessment practices, aesthetic valuing, artistic perception, and historical and cultural origins that influence the arts. Candidates develop skills in adapting delivery methods and behavior management plans for individual students and diverse populations. The course also emphasizes classroom management skills, including safety, and the use of technology as they relate to visual arts instruction.
SEC 545	SECONDARY STUDENT TEACHING	3	College of Education	This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, instructional design, implementing assessments, instructional decision-making, analyzing learning results, reflection and self-evaluation, and planning, preparing, and implementing the teacher performance assessment. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
SEC 583	SECONDARY CLINICAL PRACTICE	3	College of Education	This course emphasizes the practical application of educational theories and methods. Candidates will focus on the following topics: requirements and expectations for clinical practice, teacher performance assessment, the school culture, planning instruction, and teaching planned lessons. The course provides a forum for open discussion and problem solving based on classroom experiences. Finally, candidates will prepare and submit all respective tasks of the teacher performance assessment.

SEC 586	SECONDARY CLINICAL PRACTICE A	3	College of Education	This course emphasizes the practical application of educational theories and methods. Candidates focus on the following topics: requirements and expectations for clinical practice and the teacher performance assessment, the learning environment, planning instruction, and teaching planned lessons. The course provides a forum for open discussion and problem solving based on classroom experiences and the ability to use and apply Teaching Performance Expectations. Teacher candidates begin preparing their teacher performance assessment submission.
SEC 587	SECONDARY CLINICAL PRACTICE B	3	College of Education	This course emphasizes the practical application of educational theories and methods. Candidates focus on the following topics: school culture and diversity, pedagogical assignments and tasks, self-reflection, and preparation to serve as a beginning teacher in an induction program. The course provides practical guidance for candidates seeking a teaching position, and serves as a forum for open discussion and problem solving based on their classroom experiences and abilities to use and apply the full-range of Teaching Performance Expectations. Teacher candidates finalize and submit their completed teacher performance assessment.
SEC 590	SECONDARY STUDENT TEACHING PART A	4	College of Education	This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the learning environment, designing and implementing assessments in preparation for the CalTPA Task Three: Assessing Learning Task, and developing as a professional educator. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences and the ability to use and apply the Teaching Performance Expectations.
SEC 595	SECONDARY STUDENT TEACHING PART B	4	College of Education	This course will focus on the elements of the CalTPA Task Four: Culminating Teaching Experience Task. The course explores the following topics: school culture and diversity, pedagogical assignments and tasks, self- reflection, and preparation to serve as a beginning teacher in an induction program. It also provides practical guidance in seeking a teaching position. This course will serve as a forum for open discussion and problem solving based on student teaching classroom experiences and their ability to use and apply the full- range of Teaching Performance Expectations.

SEC 596	SECONDARY STUDENT TEACHING	8	College of Education	This course emphasizes the practical application of educational theories and methods. Participants will focus on the following topics: requirements and expectations for student teaching and teacher performance assessment, the school culture, planning instruction, and teaching planned lessons. The course provides a forum for open discussion and problem solving based on student teaching classroom experiences. Finally, learners will prepare and submit Task 1, 2, and 3 of the teacher performance assessment.
SEC 598	SECONDARY STUDENT TEACHING: PART A	4	College of Education	This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
SEC 599	SECONDARY STUDENT TEACHING: PART B	4	College of Education	This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.
SEI 300	STRUCTURED ENGLISH IMMERSION	3	College of Education	This course will introduce students to the concept of and methods for instructing in a Structured English Immersion (SEI) environment. Students will learn about assessment of K-12 students, state standards, research-based instructional activities, and lesson planning and implementation models. Students will study how a learner-centered approach to teaching can provide English Language Learners (ELL), as well as native English speakers, with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and ELL's acquire English.

SEI 301	ADVANCED STRUCTURED ENGLISH IMMERSION METHODS	3	College of Education	This course addresses Structured English Immersion (SEI) instruction and assessment of K- 12 English Language Learners (ELLs), and is designed to meet the standards set by the Arizona Department of Education. It examines the legal, historical, and educational reasons for SEI, as well as theoretical principles of language acquisition and the role of culture in learning. It also emphasizes the alignment of ELL Proficiency Standards to Arizona's Academic Standards and their application to lesson planning. The Arizona English Language Learner Assessment (AZELLA), use of alternative assessments, analysis of data, and the application of data to instruction, are emphasized as well. A final project synthesizes the concepts and instructional strategies taught in the course.
SEI 500	STRUCTURED ENGLISH IMMERSION	3	College of Education	This course will introduce students to the the concept of and methods for instructing in a Sheltered English environment. Students will study how a learner-centered approach to teaching can provide English Language Learners, as well as native English speakers, with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and ELL students acquire English. This course will introduce students to the concept of and methods for instructing in a Structured English Immersion (SEI) environment. Students will learn about assessment of K-12 students, state standards, research-based instructional activities, and lesson planning and implementation models. Students will study how a learner-centered approach to teaching can provide English Language Learners (ELL), as well as native English speakers, with a greater opportunity to interact meaningfully with educational materials as they learn subject matter and EL Learners acquire English.
SEI 503	ADVANCED STRUCTURED ENGLISH IMMERSION METHODS	3	College of Education	This course addresses Structured English Immersion (SEI) instruction and assessment of K-12 English Language Learners (ELLs), and is designed to meet the standards set by the Arizona Department of Education. It examines the legal, historical, and educational reasons for SEI, as well as theoretical principles of language acquisition and the role of culture in learning. It also emphasizes the alignment of ELL Proficiency Standards to Arizona's Academic Standards and their application to lesson planning. The Arizona English Language Learner Assessment (AZELLA), use of alternative assessments, analysis of data, and the application of data to instruction are emphasized as well. A final project synthesizes the concepts and instructional strategies taught in the course.
SEI 506	STRUCTURED ENGLISH IMMERSION - SECONDARY	3	College of Education	This course addresses legal and historical foundations of structured English immersion (SEI) foundations, instructional elements and language development of English learners in secondary grades, and culturally relevant instruction. Candidates explore SEI identification, SEI models, and English Language Proficiency Standards. Candidates also examine language acquisition theories, elements of language, and language domains. Candidates learn instructional strategies for academic English development in secondary settings. This course is designed to meet the standards set by the Arizona Department of Education.

SMCEU 2010	SOCIAL MEDIA COMMUNITY FUNDAMENTALS	0.6	School of Continuing Education	Social media has taken old-fashioned "word-of- mouth" marketing to a global level. So much so, that creating and maintaining social media communities is standard practice for organizations of nearly any size today. How does one capitalize on these efforts? By staying mindful of the overall business strategy and keeping the online conversation on-topic. Students in this course will learn how to grow brand awareness, perpetuate the conversation, and influence the world using specific social media communities. This course provides 0.6 continuing education units over one 6-hour workshop.
SMH 591	CREATING A SUSTAINABLE HEALTH CARE ORGANIZATION	3	College of Health Sciences and Nursing	This course explores the opportunities and challenges for health administrators as they seek to create organizational environments focused on sustainability. Topics include understanding sustainability in health sector contexts, assessing institutional practices, facilitating culture change, and innovation in the context of health care sustainbility.
SMH 593	THE ECONOMICS OF HEALTH CARE SUSTAINABILITY	3	College of Health Sciences and Nursing	This course examines the economic issues related to the management of resources in the creation and day-to-day operations of sustainability-focused organizations. Topics include cost- benefit analysis of sustainable produts, supply chains, and corporate partnerships, as well as sustainability metrics across the health sector.
SMH 596	ISSUES IN ENVIRONMENTAL SUSTAINABILITY	3	College of Health Sciences and Nursing	This course will explore the impact of sustainability across the health sector. Topics include the evolving strategies that are transforming health technology, regulation, and societal and community interactions. Topics include the use of emerging evidenced based knowledge to support environmental sustainability.

SOC 100	INTRODUCTION TO SOCIOLOGY	3	College of Humanities and Sciences	This course is an introduction to the set of perspectives on human life that allows us to understand how our personal lives are affected by our place in society. It explores ways of looking at the world that allow us to understand how the events and experiences of our lives are part of group dynamics, of social institutions, and of cultural meanings. It allows us to see personal events and meanings as affected by historical forces and to see how historical events may be shaped by personal choices.
SOC 110	TEAMWORK, COLLABORATION, AND CONFLICT RESOLUTION	3	College of Humanities and Sciences	This course provides an applied approach to teambuilding, collaboration, and conflict resolution. Students must understand and apply these concepts within academic and professional settings. Students develop structures, processes, and strategies to create and maintain effective teams. Gender, cultural, and individual considerations in team dynamics are also explored.
SOC 262	CONTEMPORARY AMERICAN SOCIETY	3	College of Humanities and Sciences	Students in this course will explore the implications of ethnicity, culture, and diversity within the context of society. Students will be introduced to racial and ethnic relations, prejudice, steretypes, discrimination and adaptation and conflict in diverse cultures.
SOC 315	CULTURAL DIVERSITY	3	College of Humanities and Sciences	This course focuses on the issues, challenges and opportunities presented by U.S. population diversity. Emphasis is placed on workplace issues related to employee diversity in terms of gender, race/ethnicity, socioeconomic class and cultural background.

SOC 333	GENDERS IN SOCIETY	3	College of Humanities and Sciences	The objective of this course is to explore gender differences and communication. This course introduces students to gender inclusiveness and sensitivity through the examination of the roles of genders in society. Students will focus on gender communication in business, organizations, family and the media. Additionally, students will explore communication traits of men and women and the impact of miscommunication between genders.
SOC 335	THE PEOPLES AND CULTURES OF ASIA	3	College of Humanities and Sciences	This course provides students with an overview of the cultural traditions and contemporary development of Asian countries. Course topics include the geography, history, politics, economic development, and social conditions of Asian countries.
SOC 337	CONTEMPORARY LATIN AMERICAN SOCIETY	3	College of Humanities and Sciences	This course introduces the cultural perspectives of Latin America. Students will explore cultural geography, ethnicity, class and culture, gender, and challenges facing Latin America.
SOC 338	THE AFRICAN AMERICAN EXPERIENCE	3	College of Humanities and Sciences	This course serves as an introduction to the African American experience. This course will explore the social construction of identity, culture, and the inequalities African Americans face in popular American culture. Race, class, and gender of the African American people will be explored from a historical to modern day perspective.

SPAN 110	CONVERSATIONAL SPANISH I	3	College of Humanities and Sciences	SPAN 110 is an introductory course in conversational Spanish. The objective of the course is to teach students basic vocabulary and grammar, with an emphasis in the meaningful use of the language and an introduction to Hispanic cultures. Upon completion of the course, students should be able to communicate effectively in Spanish, using basic words and phrases learned during the course.
SPAN 114	CONVERSATIONAL SPANISH II	3	College of Humanities and Sciences	SPAN/114 is the second course in a two-course sequence presenting topics in conversational Spanish. The objective of the course is to teach students Spanish vocabulary and grammar, with an emphasis in the meaningful use of the language and an introduction to Hispanic cultures. Upon completion of the course, students should be able to communicate effectively in Spanish, using basic words and phrases learned during the course.
SPAN 520	Spanish for Educators, Basic	3	College of Education	In this course, participants are introduced to simple Spanish grammar and knowledge of the Hispanic culture. Educators who are beginning Spanish-language learners are instructed on how to communicate with English language learners and their parents. Emphasis is on basic communication skills associated with real-life situations, the classroom environment, student praise and encouragement, school personnel, and school terminology.
SPAN 521	Spanish for Educators, Intermediate	3	College of Education	This course prepares educators to effectively communicate with students and parents in Spanish. Participants focus on real-life situations, the classroom, and school terminology using complex grammatical structures, verb tenses, and conjugations. In addition, participants analyze the sociolinguistic aspect of the Spanish language to better comprehend cultural differences. Basic understanding and knowledge of Spanish, as gained through an introductory Spanish for Educators course, is required.

SPE 300	ORIENTATION TO THE EXCEPTIONAL CHILD	3	College of Education	This course provides an overview of the categories of exceptionality for elementary age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.
SPE 300CA	ORIENTATION TO THE EXCEPTIONAL CHILD	3	College of Education	This course provides an overview of the categories of exceptionality for elementary age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.
SPE 300FE	SPECIAL EDUCATION FIELD EXPERIENCE	1	College of Education	Students will complete special education field experience activities.
SPE 512	SPECIAL EDUCATION ASSESSMENT AND INTERPRETATION	3	College of Education	This course focuses on the task of assessing the exceptional child, with an emphasis on measuring a child's abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. The course also addresses specific diagnostic procedures and the link between interpretation and the instructional process. Basic instructional, assessment, and behavioral recommendations are discussed.

SPE 513	ORIENTATION TO THE EXCEPTIONAL CHILD	3	College of Education	This course provides an overview of the different categories of exceptionality. Students will be introduced to special education laws and their implications for delivery systems, transition plans, and identification and placement procedures.
SPE 514	SURVEY OF SPECIAL POPULATIONS	2	College of Education	This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.
SPE 514CA	SURVEY OF SPECIAL POPULATIONS	2	College of Education	This course provides an overview of the categories of exceptionality for school-age students with special needs. The course focuses on differentiated methods and techniques used for the identification, assessment, and instruction of diverse populations. Historical perspectives and information related to special education law, and current policies and practices are examined.
SPE 544	CHARACTERISTICS OF EMOTIONAL & BEHAVIORAL DISORDERS	3	College of Education	This course provides an in-depth examination of students with emotional and behavioral difficulties. Attention is given to federal and state regulations, possible causes such as traumatic brain injury, learner characteristics, student identification, and program models. Emphasis is placed on behavioral techniques, classroom management skills, and instructional practices.

SPE 556	CHARACTERISTICS OF PHYSICAL & HEALTH DISABILITIES	3	College of Education	This course provides an overview of the unique characteristics, learning styles, and challenges faced by individuals with physical and health disabilities, including students with traumatic brain injury, other health impairments, and sensory disorders. Attention is given to federal and state regulations as they pertain to qualifying these individuals for special education services within the schools. Service delivery options, including self-contained placements and inclusion, and their impact on students will be analyzed. Instructional strategies, accommodations, adaptations, and curricular modifications will be explored.
SPE 557	COLLABORATION WITH FAMILIES OF STUDENTS WITH DISABILITIES	3	College of Education	This course focuses on the interrelationships of varied services for students with disabilities. Emphasis is placed on meeting the academic and social-emotional needs of students with disabilities by working with parents, professionals, and community services to develop collaborative and productive professional relationships.
SPE 558	TRANSITION PLANNING FOR ADOLESCENTS WITH DISABILITIES	3	College of Education	This course focuses on the role of the special education teacher as he/she transitions adolescents with disabilities into adult living. The course examines student transition between the educational setting, the home environment, and employment and community environments. Emphasis is placed on the needs of adolescents with cognitive and behavioral disorders in secondary school special education programs. Strategies to improve academic, social, career/vocational, and transition skills are also discussed. Students will learn skills and concepts in working with students with special needs, parental involvement, and the community.
SPE 559	CHARACTERISTICS OF LEARNING DISABILITIES	3	College of Education	This course examines the foundations of special education and characteristics of learning disabilities. Causes attributed to learning disabilities, the referral process, and available programs or service delivery options are examined. Various assessment and remediation techniques, as well as the use of appropriate classroom materials, are analyzed and evaluated. Curricular modifications for students in inclusive settings are also explored.

SPE 574	CHARACTERISTICS OF INTELLECTUAL/DEVELOPMENTAL DISABILITIES	3	College of Education	This course examines issues related to the instruction of students with intellectual and developmental disabilities. Individuals with a traumatic brain injury will be considered among this population. Attention is given to legal foundations, learner characteristics, and instructional considerations. Emphasis is placed on collaborating with families of children with intellectual and developmental disabilities.
SPE 575	INCLUSION STRATEGIES OF THE SPECIAL EDUCATOR	3	College of Education	This course examines the roles of special educators when including students with disabilities into general education classrooms. Options for success that consider peer relationships, systematic instruction, behavior management, and collaboration are explored. This course focuses on inclusion strategies and collaborative activities that enable special educators, general classroom teachers, and administrators to successfully provide an optimal educational environment for students with disabilities.
SPE 576	CHARACTERISTICS OF AUTISM SPECTRUM DISORDERS	3	College of Education	This introductory course is designed to assist teacher candidates in developing strategies and techniques to support students with Autism Spectrum Disorders (ASD). This class is designed to familiarize teacher candidates with the complexity of ASD. The course provides theoretical background and practical instructional strategies needed for working with students with ASD. Participants will gain a better understanding of key issues related to inclusive instructional practices, adjust behavioral challenges, as well as foster communication and social-perceptual thinking skills.
SPE 577	SPECIAL EDUCATION STUDENT TEACHING	3	College of Education	This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, instructional design, implementing assessments, instructional decision-making, analyzing learning results, reflection and self-evaluation, and planning, preparing, and implementing the teacher performance assessment. The course also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SPE 578	MODELS, THEORIES AND INSTRUCTIONAL STRATEGIES FOR SPE	3	College of Education	This course focuses on the theoretical models that underlie teaching and learning. Students examine methods for teaching all students, explore lesson plan designs, analyze the most effective teaching strategies to promote student learning, and develop a lesson plan.
SPE 584	LEARNING DISABILITIES AND LANGUAGE AND DEVELOPMENT DISORDERS	3	College of Education	This course examines the characteristics of students with learning disabilities and language and development disorders. Emphasis is placed on classroom management, instructional strategies, assessment, and augmentative and alternative technologies. Attention is given to the referral process, and available program or service delivery options.
SPE 591	CHARACTERISTICS OF EXCEPTIONALITIES	3	College of Education	This course examines teaching and managing students with mild disabilities. Special emphasis is placed on specific learning disabilities, intellectual and developmental disabilities, and emotional disturbance. The etiology, characteristics, philosophies, service delivery models available, methods of instruction, and behavior management techniques of each disability area are discussed in depth.
SPE 594	SPECIAL EDUCATION STUDENT TEACHING: PART A	4	College of Education	This course emphasizes the practical application of educational theories and methods. The course will focus on the following topics: the student teaching experience, the school culture, the learning environment, and planning, preparing, and implementing the Teacher Work Sample. The seminar also provides a forum for open discussion and problem solving based on student teaching classroom experiences.

SPE 595	SPECIAL EDUCATION STUDENT TEACHING: PART B	4	College of Education	This course will focus on the design and implementation of the Teacher Work Sample. It also provides students practical guidance in securing a teaching position. Students will examine resumes and cover letters, teaching applications, and interview strategies. Assistance in preparing an employment portfolio will be provided. This seminar also provides a forum for open discussion and problem-solving based on student teaching classroom experiences.
SPE 596	SPECIAL EDUCATION STUDENT TEACHING	8	College of Education	This course emphasizes the practical application of educational theories and methods. Participants will focus on the following topics: requirements and expectations for student teaching and teacher performance assessment, the school culture, planning instruction, and teaching planned lessons. The course provides a forum for open discussion and problem solving based on student teaching classroom experiences. Finally, learners will prepare and submit Task 1, 2, and 3 of the teacher performance assessment.
SPED 530	Introduction to Learners with Special Needs	3	College of Education	This course is designed to provide an overview for working with exceptional learners, ages 3 years to 21 years. Participants explore methods to instruct and assess learners with special needs and create individualized education programs. Historical perspectives, special education law, and current policies and practices are examined.
SPED 531	Special Education Teaching Methods	3	College of Education	This course provides an overview of teaching methods used in the K-12 special education classroom, with an emphasis on students with specific learning disabilities, emotional disabilities, and other mild to moderate disabilities. Participants explore the relationship between individual student characteristics and the development of an Individualized Education Program, as well as: instructional implications of special education categories, characteristics of various service delivery models, lesson planning, instructional strategies, classroom organization and management, crisis prevention, transition planning, and career counseling. Communication through consultation and collaboration, and professional and ethical practices are also examined.

SPED 532	Special Education Assessment	3	College of Education	This course provides an overview of assessment in the K-12 special education classroom. Participants focus on assessing learners with special needs, with an emphasis on measuring a learner's abilities and diagnosing his or her strengths and needs. Commonly used tests and evaluation systems used in public school special education programs are examined. Participants review guidelines and procedures for developing the individualized education program and evaluate the use of progress monitoring assessments to assess student performance. The special education referral process, the use of response to intervention for assessment and remedial purposes, and basic remediation principles and strategies are also discussed.
SPED 533	Mainstreaming and Inclusion	3	College of Education	The focus of this course is mainstreaming and inclusion of students with special needs in regular classrooms. Participants explore the history and evolution of special education, including federal legislation and related standards. Identification and referral, lesson planning, modifications and accommodations, communication and collaboration, and assessment are also examined.
SPED 534	Speech and Language Disorders	3	College of Education	This course provides educators with an overview of speech and language disorders. Participants examine language acquisition and development; language disorders; speech, articulation, and phonological disorders; voice, swallowing, and fluency disorders; and hearing disorders. Classroom management, instructional strategies, assessment, and augmentative and alternative technologies are also explored.
SPED 535	Overview of Severe Disabilities	3	College of Education	This course provides K-12 educators with an overview of severe disabilities. Participants examine the categories and characteristics of severe disabilities including impairments, injuries, and disorders. Special education laws, teaching strategies, assessment, placement options, augmentative and assistive technology, communication and collaboration among stakeholders, and cultural considerations are also explored.

SPED 536	Transition Planning for Adolescents with Disabilities	3	College of Education	This course focuses on the role of the special education teacher in transitioning adolescents with disabilities into adult living. The course examines student transition between the educational setting, the home environment, and employment and community environments. Emphasis is placed on the needs of adolescents with cognitive and behavioral disorders in secondary school special education programs. Strategies to improve academic, social, career/vocational, and transition skills are also discussed. Participants learn skills and concepts in working with students with special needs, their families, and the community.
SPED 537	Mathematics Instruction for Special Education	3	College of Education	This course focuses on the vertical alignment of national, state, and local mathematics standards used to deliver content instruction in the area of mathematics to learners with exceptional learning needs. In addition, this course will provide the candidates the opportunity to examine and analyze strategies that support learner development, learner differences, content knowledge, application of content, assessment, planning instruction, and professional practices.
SPED 538	Special Education in Early Childhood	3	College of Education	This course helps prepare participants to support the development and learning of young and diverse students with special needs. Participants learn the basic foundations and principles of early childhood special education, including diagnosis and monitoring, ethics, and assessment. Best practices for classroom management, behavior modification techniques, and effective ways to communicate with families are also explored.
SPED 560	TEACHING LEARNERS WITH DISABILITIES	1	College of Education	This course is designed for educators to investigate current disabilities and strategies for a variety of different content areas in order to implement best practices. Participants investigate different teaching methods correlating with various disabilities/abilities in the PK-12 setting. Participants have the opportunity to specifically gear their learning based on interests, content area, and grade level with specific emphasis on best practices and current trends.

SPKNGWKSP	BASIC PUBLIC SPEAKING/PRESENTATION SKILLS	0	Non-College Specific	This is not an actual course. It has been entered as a means to schedule a non-academic activity.
SSCEU 3350	LEAN SIX SIGMA GREEN BELT	8	School of Continuing Education	The Define, Measure, Analyze, Improve, and Control (DMAIC) model is the foundation of Six Sigma methodology. Lean Six Sigma incorporates the DMAIC model with lean methodologies used to streamline business processes. In this course, students will focus on the individual phases of the model, by exploring how each phase impacts the success of projects. In addition, students will learn how the project scope, process mapping, and change management play into the six sigma methodology, while applying lean concepts to reduce waste. 80 hours, 8 - weeks.
SSCEU 3400	LSS GREEN BELT: EXAMS	1	School of Continuing Education	The final course in LSS Green Belt Certificate Program (noncredit) is a collection of exams that measure the concepts covered in the program. There are four exams, Define, Measure, Analyze, and Improve and Control that align with the four courses in the program. The course provides 1 continuing education units over one 10-hour workshop.
STATSWKSHP	STATISTICS WORKSHOP	0	Non-College Specific	Non-credit bearing course for Statistics Workshop offered at campus.

STATWKS	OPEN STATISTICS LAB	0	Non-College Specific	Open lab for students seeking additional help in statistics.
STEAM 506	STEAM Education: Curriculum and Instruction	3	College of Education	This course focuses on researching, analyzing, and applying curricular theory and philosophy of best practices in the 21st century classroom for implementing STEAM education. Special attention is given to STEAM-specific instructional strategies such as project-based assessment, inquiry-based learning, and conceptual change. Participants focus on planning and practical applications, differentiated instruction, collaboration, the use of technology, and inclusion of the arts in the development of effective K-12 learning environments that involve creating solutions to real-world problems.
STR 581	STRATEGIC PLANNING & IMPLEMENTATION	3	School of Business	This course integrates concepts from all prior courses in the program. Students apply the concepts of strategic planning and implementation to create sustainable competitive advantage for an organization. Other topics include environmental scanning, strategic analysis, corporate social responsibility, implementation, evaluation, and risk management.
SUS 300	ENVIRONMENTAL SUSTAINABILITY	3	College of Humanities and Sciences	Students will be presented with a broad treatment of the preservation and efficient use of resources as well as methods of reversing current resource consumption. Topics will include sustainable practices, population growth, hydrologic cycle, water treatment processes, waste management, alternative energies, and sustainable design.

SUS 310	INDUSTRIAL ECOLOGY	3	College of Humanities and Sciences	This course introduces students to the field of industrial ecology. Students examine the interaction of industrial activities and the management of resources to minimize the negative impact on the environment due to these activities through the promotion of sustainability. Emphasis is placed on the flow of materials and energy through industrial and technological systems. Topics include technology and society, sustainability, biological and industrial ecology, cost analysis, and life- cycle assessment.
SUS 330	INTRODUCTION TO SUSTAINABLE AGRICULTURE	3	College of Humanities and Sciences	This course introduces principles in sustainable agriculture as it relates to environmental and socioeconomic issues. Students evaluate the environmental impact of conventional agriculture, and the solutions that sustainable agriculture provides. Students examine the principles and effectiveness of sustainable agriculture and its ability to meet the global demand for food. Upon completion of the course, students are able to analyze issues regarding sustainable agriculture and its effects on society and the environment.
SUS 350	GREEN BUILDING AND URBAN PLANNING	3	College of Humanities and Sciences	This course introduces students to the practices of green building design and urban planning. Students examine the principles of green building with a focus on land use and urban design and development. Upon completion of the course, students are able to evaluate sustainable design considerations, including economic analysis, environmental policies and strategies, land and energy usage, resource and waste reduction, transportation, and urbanization.
SUS 370	SUSTAINABLE ECOSYSTEMS	3	College of Humanities and Sciences	In this course, students evaluate the principles of sustainable practices in aquatic and terrestrial environments. Students analyze the factors that govern ecosystems sustainability which include density-dependent regulations, mechanisms of biodiversity, invasive species, and equilibrium dynamics. The impact of human activities and management practices on the environment is examined. Emphasis is placed on applying ecological theory to restore and manage habitats and populations.

SUS 380	SUSTAINABLE PLANNING AND LAND USE	3	College of Humanities and Sciences	In this course, students evaluate strategies that lead to the promotion of sustainable development, planning, and land use. Students develop a sustainable land use plan for natural and human-dominated landscapes and its impact on socioeconomic issues. Upon completion of the course, students are able to apply management strategies and relevant land use practices to achieve sustainability.
SUS 385	SUSTAINABLE OCEAN USE	3	College of Humanities and Sciences	In this course, students evaluate the principles of sustainable ocean use. Students analyze the environmental and economic role of the oceans. The sources and impact of ocean environmental degradation are examined. Topics include fisheries, aquaculture, natural resources and uses, and pollution. Sustainable management practices are analyzed by examining global environmental policies and regulations.
TCH 501	Teaching Methods: Elementary Art	3	College of Education	This course is designed to prepare participants to integrate the visual arts across elementary curriculum. The elements of art and principles of design, art methods, lesson planning, and classroom management techniques, with particular emphasis on diverse students, are examined. Participants draw, paint, make prints, and create sculptures appropriate for the elementary setting.
TCH 502	Teaching Methods: Elementary Language Arts	3	College of Education	This course explores theories, models, and strategies for teaching and learning language arts in the elementary school. Participants explore and apply strategies for teaching reading, writing, listening, and speaking. Technology and assessment in language arts is also examined.

TCH 503	Teaching Methods: Elementary Mathematics	3	College of Education	This course emphasizes content and process standards and pedagogical instruction that enhance learning in P-8 mathematics. Participants explore teaching mathematics through research-based practices, problem- solving, and developmentally effective instructional strategies. Participants also examine assessment techniques, technology tools, instructional leadership, diverse learning needs, and materials management.
TCH 504	Teaching Methods: Elementary Science	3	College of Education	This course prepares K-8 teachers to develop a balanced and articulated elementary school science program that promotes inquiry. Participants discuss the evaluation of texts and reference materials, the development of hands-on activities and assessments, and the use of teacher-made materials and technology. Participants also evaluate resources for effective instructional strategies, including safety best practices.
TCH 505	Teaching Methods: Elementary Social Studies	3	College of Education	This teaching methods course is designed for K-8 elementary educators who teach social studies. Participants learn to facilitate student-centered, differentiated learning. Participants explore hands-on strategies for designing and implementing cross-curricular work, integrating literacy, creating assessments, and incorporating 21st-century technology to engage learners.
TCH 510	Secondary Teaching Methods	3	College of Education	This course focuses on enhancing learning at the secondary level. Current trends and issues affecting the secondary classroom are examined, including communication, collaboration, creativity, and critical thinking. Participants develop and evaluate standards-based instruction, curricular materials, and assessment strategies aligned to 21st-century skills.

TCH 511	Teaching Methods: Secondary Art	3	College of Education	This course is designed to explore secondary art instruction. Participants learn to create relevant art lesson plans that incorporate all art disciplines for a diverse student body. Advocacy for the arts, assessing student art, incorporating art from diverse perspectives, creativity, art classroom management, and using technology in the art classroom are also explored.
TCH 513	Teaching Methods: Secondary Mathematics	3	College of Education	This course provides participants with the knowledge of research and standards-based pedagogical instructional practice that facilitate learning in the secondary mathematics classroom. Participants explore diversity and equity, mathematics standards and curriculum, and technology integration, as critical components of planning for and implementing mathematics instruction and assessment. In addition, participants examine the importance of teacher reflection, instructional leadership, and professional development to continuously improve one's teaching of mathematics.
TCH 514	Teaching Methods: Secondary Science	3	College of Education	This course is designed to prepare participants to teach science at the secondary school level. To meet this objective, participants explore the instructional methods in science content areas in middle level and high school settings. Participants identify the educational needs of secondary students by exploring current instructional theory; national, state, and local standards; and social issues that affect the science classroom. The course also helps prospective educators develop skills in selecting and adapting instruction and management plans for diverse student populations.
TCH 515	Teaching Methods: Secondary History/Social Studies	3	College of Education	This course explores the application of basic instructional methods and strategies of teaching social studies in middle school and high school settings. Participants identify the educational needs of secondary students by exploring current instructional and assessment theory; national, state, and local standards; and social issues that are found in various social studies courses. The course also helps prospective educators develop skills in selecting and adapting delivery methods and behavior management plans for diverse individual students and student populations.

TCH 520	TEACHING METHODS	3	College of Education	This course focuses on general methodology to enhance student learning in today's diverse K-12 classrooms. Participants explore instructional planning, instructional strategies, and assessment. This course provides participants with the opportunity to develop and evaluate instructional materials and assessment strategies.
TCH 533	Teaching Methods: Mathematics Assessment	3	College of Education	This course promotes the understanding of theories guiding math instruction within the framework of the Common Core State Standards (CCSS) and National Council of Teachers of Mathematics (NCTM) principles and standards. Participants select, develop, and evaluate assessment tools aligned to Common Core State Standards in the K-8 mathematics classroom. Particular emphasis is given to implementing timely, relevant, and thoughtful assessment and analyzing student errors and misunderstandings. By using this approach, ongoing, constructive, and supportive feedback serves as a meaningful instructional tool for students.
TCH 543	Teaching Methods: Remedial Mathematics	3	College of Education	This course is designed to provide participants with knowledge of standards-based pedagogical instructional practices to facilitate and enhance learning for students who struggle with mathematics. Participants examine diagnostic information on mathematics difficulties and strategies for systematic intervention and remediation. The assessment and evaluation of progress and meeting diverse learning needs is also explored.
TECH 510	USING APPS IN THE CLASSROOM	1	College of Education	This course introduces K-12 teachers to the use of apps in the classroom. A variety of apps to supplement classroom instruction are examined. Tools to support students and teachers in creating original apps are also explored. Participants design an original app to supplement instruction.

TECH 511	USING GOOGLE TOOLS IN THE CLASSROOM	1	College of Education	This course introduces K-12 teachers to the use of Google tools in the classroom. A variety of Google tools to support classroom communication and collaboration are examined. Tools for learning, creating, and solving problems are also explored. Participants create original instructional products and lesson plans using Google tools.
TECH 519	Using Social Media in the Classroom	2	College of Education	This course introduces classroom teachers and building administrators to effective and responsible social media implementation in K-12 classrooms. The emergence of social media as a viable tool for learning will be explored and implementation considerations will be determined. Legal and ethical issues regarding social media use in schools will be examined. Participants will devise a social media application plan for school-wide integration.
TECH 520	Multimedia for Educators	2	College of Education	In this course, participants select, use, and design multimedia resources that enhance teaching and student learning. Multimedia categories such as still images, text, audio, video, and interactive components are explored. Participants also evaluate differentiated instructional delivery methods to promote a student-centered learning environment that meets the needs of a diverse student population. In addition, participants learn strategies for teaching students to create their own presentations. Legal and ethical considerations, such as copyright and fair use, are also addressed in the course.
TECH 522	Technology Integration for Educators	3	College of Education	This course is designed to prepare educators to integrate technology for engaging and effective P-12 student learning across the content areas. Participants incorporate technology-based instructional design strategies into a student- centered learning environment, using the National Educational Technology Standards, and inquiry-based, problem-based, and project based learning. Digital tools and resources, software applications, fair use guidelines, and assessment are also examined.

TECH 524	Technology Survival for Educators	3	College of Education	This course provides educators with survival strategies when incorporating technology into the P-12 classroom. Managing and integrating common classroom technology and portable devices as well as integrating web-based and cloud computing applications are introduced. Participants examine basic maintenance and troubleshooting, personal and professional productivity, and issues regarding the safe and ethical use of technology.
TECH 525	Becoming a Connected Educator	3	College of Education	This course provides participants with strategies for using digital tools to make course information readily available and to connect with other educators, parents, and communities. Participants also examine applications of online platforms, such as blogs and social media, for participating in a professional learning network (PLN). Digital citizenship and school branding are also explored in this course.
TESOL 570	Foundations of Instruction	3	College of Education	This course is designed to introduce participants to the history, law, and theory of education for English language learners. Participants identify effective instructional models and teaching practices that define aspects of multicultural education. Participants also develop programs, instruction, and materials for English language learners. Issues associated with the interdependent relationship between teaching and assessments are also addressed.
TESOL 571	Instructional Techniques and Methods	3	College of Education	This course prepares K-12 educators to use effective instructional techniques, methodology, and assessments for English language learners. Participants apply researched theory focusing on sheltered instruction, particularly the Sheltered Instruction Observation Protocol (SIOP) model. Differentiated instruction, lesson comprehension, special education, and parental involvement as related to English language learners are also explored.

TESOL 572	Assessment	3	College of Education	This course provides K-12 educators with a foundational understanding of assessment practices for English language learners. Participants examine the relationship between instruction and assessment, assessment techniques, progress reporting, content-area testing, and program interventions. Communication principles and the role of parents as related to assessment are also explored.
TESOL 573	Applied Linguistics	3	College of Education	This course introduces K-12 educators to the nature, structure, and acquisition of language. Participants study the first and second language acquisition process, the cultural implication of language and classroom instruction, the integration of theory and practices including assessment and phonology, morphology, and syntax of English. Participants apply linguistic theory through instructional methods to support the English language learner.
TESOL 574	Cross-Cultural Communication	3	College of Education	This course explores cross-cultural communication and global awareness in multicultural K-12 education. Participants learn and apply the principles of culturally responsive teaching and multicultural and global education with particular attention to English language learners. Instructional strategies, diversity, and technology as related to cross-cultural communication are also addressed.
TESOL 575	Teaching Reading and Writing	3	College of Education	This course provides educators with a foundational awareness and understanding of best practices for teaching reading and writing to English language learners. Language acquisition and literacy development as it relates to teaching reading and writing is explored. Participants create reading and writing instruction and assessment for integration across the curriculum.

TEST 105	Test Course Only 105	3.76	School of Continuing Education	Test Course Only 105
TEST 106	Test Course Only	5	School of Continuing Education	
TEST 107	TEST COURSE 23	4	School of Continuing Education	
TEST 888	TEST TITLE	3	Non-College Specific	This course is a study in Java programming. It covers topics around Java building blocks, operators, core APIs, methods and exceptions. These topics are closely aligned with Oracle Certified Associate Java SE examination.

TEST 998	TEST COURSE 2	4	Non-College Specific	
TIPSWKSP	STUDY GROUP TIPS AND TECHNIQUES	0	Non-College Specific	This is not an actual course. It is entered as a means to schedule a non-academic activity.
TMGT 540	MANAGEMENT OF R&D AND INNOVATION PROCESSES	3	School of Business	This course explores the role of Research & Development (R&D) as a means to provide future survival and growth for the organization as the lifecycle of existing products and/or services matures to obsolescence. Also introduced are techniques used to stimulate and manage innovation in the workplace.
TMGT 550	TECHNOLOGY TRANSFER IN THE GLOBAL ECONOMY	3	School of Business	This course introduces the student to the concept of multi- national enterprises and the role of technology in the strategic management of these enterprises. This course focuses on opportunities to utilized technology transfer within a global business to meet the goals of the strategic plan.

TMGT 590	APPLICATIONS OF TECHNOLOGY MANAGEMENT	3	School of Business	This is an integrative course and the capstone for the MBA/TM program. The outcome is to apply a range of skills from the individual courses in the technology management program to develop a change management plan to implement, build, and initiate a technology product or infrastructure in an organization.
TPA 001	SUBJECT SPECIFIC PEDAGOGY	1	College of Education	This course addresses California's Teaching Performance Assessment: Principles of Content-Specific and Developmentally Appropriate Pedagogy. Students will review the elements of this assessment and will demonstrate their knowledge of principles of content-specific pedagogy and developmentally appropriate pedagogy. Through this assessment process, students will learn the importance of their performance with K-12 students in mastering the knowledge, skills and abilities required of a beginning teacher, as exemplified in the Teacher Performance Expectations.
TPA 002	DESIGNING INSTRUCTION	1	College of Education	This course addresses the second task of California's Teaching Performance Assessment: Designing Instruction, Connecting Instructional Planning to Student Characteristics for Academic Learning. Students will review the elements of the Designing Instruction Teaching Performance Assessment and will demonstrate their ability to learn important details about a classroom of students, an English learner, and a student who presents a different instructional challenge. Students will focus on how instructional planning connects to student characteristics of a whole class and to two focus students who present a different instructional challenge.
TPA 100	TPA PLANNING AND INSTRUCTION	1	College of Education	This course is the first of a 2-part series that focuses on preparing teacher candidates for the edTPA performance-based assessment. Emphasis is placed on Task 1 of the edTPA final project, which addresses requirements and expectations for edTPA, academic language, and planning instruction.

TPA 200	TPA INSTRUCTION AND ASSESSMENT	1	College of Education	This course is the second of a 2-part series that focuses on preparing teacher candidates for the edTPA performance-based assessment. Emphasis is placed on understanding the edTPA process and Tasks 2, 3, and 4 of the edTPA final project, which addresses teaching planned lessons, assessment, and evaluation.
VCT 231	VIDEO COMMUNICATION FUNDAMENTALS	3	College of Information Systems and Technology	This course introduces the tools and techniques used in video post-production. This includes examining post-production workflow, use of graphics and audio to enhance video clips, and preparing video communication content for a professional audience.
VCT 236	INTRODUCTION TO IMAGE EDITING AND FORMATTING	3	College of Information Systems and Technology	This course is an introduction to image editing and its role in the disciplines of web design, electronic publishing and multimedia development. An overview is presented on image editing software applications, file formats, composition, color, text design, retouching, and manipulation of graphic and photographic images.
VCT 241	ELECTRONIC PUBLISHING FUNDAMENTALS	3	College of Information Systems and Technology	This course introduces the role of electronic publishing in the delivery of information to businesses and consumers. Emphasis is placed on the methods and techniques involved in the electronic publishing of professional materials, reports, and digital content.

VCT 251	GRAPHIC DESIGN AND ILLUSTRATION FUNDAMENTALS	3	College of Information Systems and Technology	This course introduces the tools and techniques used in graphic design and illustration. This includes utilizing drawing tools, color manipulation, design techniques, and formatting content for a professional audience.
VCT 305	DIGITAL DESIGN	3	College of Information Systems and Technology	This course presents principles of digital design. An overview of digital design is presented that includes designing and developing creative presentations across various Medias including print, video, web, and mobile platforms.
VCT 330	IMAGE EDITING WITH PHOTOSHOP	3	College of Information Systems and Technology	This course provides an intensive workshop where the student will gain the hands-on experience required to help pass the ACE: Photoshop CS6 certification exam. Topics include: Photoshop fundamentals; using Adobe Bridge; using Camera Raw; editing images; use of selections, layers and adjustments; working with video; and outputting for web, print and mobile.
VCT 340	WEB DESIGN WITH DREAMWEAVER	3	College of Information Systems and Technology	This course provides an intensive workshop where the student will gain the hands-on experience required to help pass the ACE: Dreamweaver CS6 certification exam. Topics include: Dreamweaver fundamentals - navigating the workspace, defining and creating a website; page layout, handling links and formatting text; integrating rich media; using templates and writing HTML and CSS code; and launching to the web and to mobile.

VCT 360	ELECTRONIC PUBLISHING WITH INDESIGN	3	College of Information Systems and Technology	This course provides an intensive workshop where the student will gain the hands-on experience required to help pass the ACE: InDesign CS6 certification exam. Topics include: establishing layouts, creating and managing text, working with graphics, working with colors and transparency, and publishing documents.
VCT 390	VIDEO COMMUNICATIONS WITH PREMIERE PRO	3	College of Information Systems and Technology	This course provides an intensive workshop where the student will gain the hands-on experience required to help pass the ACE: Premiere Pro CC certification exam. Topics include: planning and designing Premiere Pro projects; video editing and transitions, working with graphics and effects, handling audio, and publishing.
VTC 420	MULTIMEDIA DEVELOPMENT	3	College of Information Systems and Technology	This course introduces the fundamentals of developing interactive, multimedia enriched content for delivery across alternative platforms such as the Internet, CDs and handheld devices. The focus is on the integration of animation, audio and video content to maximize communication.
WEB 240	WEB DESIGN FUNDAMENTALS	3	College of Information Systems and Technology	This course introduces development tools and techniques used to publish web pages on the World Wide Web. Students use basic hypertext markup language, scripting, and presentational technologies to create websites with the aid of a software authoring application. Topics include HTML5, CSS, JavaScript®, server hosting, site publication, site maintenance, and search engine optimization.

WEB 401	WEB DEVELOPMENT	3	College of Information Systems and Technology	This course covers topics such as designing dynamic web pages and an introduction to Java and Java applets. Emphasis is placed upon the appropriate use of web programming tools.
WEB 407	ADVANCED WEB DEVELOPMENT	3	College of Information Systems and Technology	This course focuses on existing and emerging web development technologies. Topics include specialized web markup languages, server-side backend databases, server-side programming, web services, enterprise web development, and web applications.
WEB 436	MOBILE COMMERCE	3	College of Information Systems and Technology	This course explores the concept of mobile commerce from the perspective of an advanced web developer or development manager. Students will focus on E-Commerce principles, M-Commerce websites and apps, security, ethics and emerging technologies.
WEB 437	WEB COMMERCIALIZATION	3	College of Information Systems and Technology	This course builds upon a professional understanding of web design and development, emphasizing the trend towards website commercialization. Topics of this course include strategy and e-commerce planning, online supply chain management, e-commerce tools and techniques, marketing strategies, customer experience and service, and search engine optimization.

WRIT 310	CREATIVE WRITING: PERSONAL ESSAYS AND CREATIVE NON-FICTION	3	College of Humanities and Sciences	This course in creative writing offers practice and criticism in the reading, analysis, and composition of personal essays and nonfiction.
WRIT 320	ADVANCED COMPOSITION FOR THE ENGLISH MAJOR	3	College of Humanities and Sciences	This course in advanced composition is for students who want to develop advanced writing skills. While focus and subject matter may vary, a rhetorical emphasis will guide the writing tasks.
WRIT 350	WRITING FOR SOCIAL MEDIA	3	College of Humanities and Sciences	This course explores the varied styles of writing for social media. Students will analyze multiple examples of social media and practice writing for these media.
WRITELAB	WRITING LAB	0	Non-College Specific	

XCOM 100	INTRODUCTION TO COMMUNICATION	3	School of Business	This course is an introduction to the field of communication with emphasis on the history of communication study, theories important to all areas of communication, the contexts in which communication occurs, and the issues that must be faced by students of communication. The course serves as an introduction to the strands of communication: interpersonal, small groups and teams, mass communication, organization, intercultural, and rhetoric.
XCOM 200	FOUNDATIONS OF INTERPERSONAL COMMUNICATION	3	School of Business	This course includes the application of communication principles, theory, and research to the process of interpersonal communication; includes verbal, nonverbal, listening, conflict management, and communication skills most relevant to a broad range of interpersonal settings.
XCOM 225	FOUNDATIONS OF MASS COMMUNICATIONS	3	School of Business	This course is a survey of the basic theories upon which our scientific understanding of mass communication is based. Ethical and related problems of mass communication will be studied from contemporary and historical viewpoints, as well as a critical analysis of the performance of the mass media.
XCOM 285	ESSENTIALS OF MANAGERIAL COMMUNICATION	3	School of Business	This course introduces students to the foundations of communication in a business setting. Students are exposed to various topics related to interpersonal and group communication with an eye toward applications in an office or virtual office setting. Students will develop skills in various forms of written communication, including memos, emails, business letters, and reports. Communication ethics and cross-cultural communications are also explored. Upon completing the course, students will have an awareness of their personal communication style and be able to identify areas for further exploration of communication as a business skill.

XECO 212	PRINCIPLES OF ECONOMICS	3	School of Business	This course introduces the fundamental theories of microeconomics and macroeconomics. The economic principles studied in this course apply to everyday life as students research an industry, debate issues with trade agreements, discuss the effects of a shift in labor supply and demand, and discuss the strengths and weaknesses of the Consumer Price Index calculation. In particular, students research an industry affected by the economy and perform an economic analysis of the chosen industry.
XMGT 216	ORGANIZATIONAL ETHICS AND SOCIAL RESPONSIBILITY	3	School of Business	This course introduces the fundamental theories of microeconomics and macroeconomics. The economic principles studied in this course apply to everyday life as students research an industry, debate issues with trade agreements, discuss the effects of a shift in labor supply and demand, and discuss the strengths and weaknesses of the Consumer Price Index calculation. In particular, students research an industry affected by the economy and perform an economic analysis of the chosen industry.
