This course introduces the students to Modern Arabic Literature in form, language, and content. It will focus on various genres including poetry, drama, the novel, and short stories. Work by major Arab writers and poets representing various regions and content will be examined and analyzed to develop an appreciation for Arab literature and a deeper understanding of their portrayal of Arab culture.

**ARB 495 | FOREIGN LANGUAGES ACROSS THE CURRICULUM | 2 quarter hours
(Graduate)**

The two-credit FLAC course allows students to enrich their experience in the co-required course through added reading, writing, listening and speaking activities in Arabic. Students must have the equivalent of 106 or higher ability in Arabic to take this two-credit component. Please contact the Department of Modern Languages if you have questions about this courses or about language placement.

**ARB 496 | PRACTICUM IN ARABIC INSTRUCTION | 4 quarter hours
(Graduate)**

Supervised practice in language instruction, paired with a mentor instructor in a beginning or intermediate language course. Students observe a class, teach a lesson or lessons, assist in assessment and lesson planning, and complete individualized assignments to develop their skills as classroom language instructors. Repeatable.

**ARB 497 | SPECIAL TOPICS IN ARABIC | 4 quarter hours
(Graduate)**

See schedule for current offerings.

**ARB 498 | STUDY ABROAD | 4-8 quarter hours
(Graduate)**

Variable credit.

**ARB 499 | INDEPENDENT STUDY | 1-8 quarter hours
(Graduate)**

Variable credit.

Art and Architecture, History of (HAA)

**HAA 101 | INTRODUCTION TO AFRICAN ART | 4 quarter hours
(Undergraduate)**

This course is based on a series of important issues in the study of African art, such as medium and color, portraiture, the artist and innovation, relationships with language, royal patronage, divination, gender, aesthetics, Othering, and authenticity. The course will explore each of these concepts through a variety of artistic traditions from the continent. In this manner, students will gain basic theoretical tools which will enable them to work with art from across Africa.

**HAA 115 | INTRODUCTION TO ASIAN ART | 4 quarter hours
(Undergraduate)**

An introduction to major developments of art and architecture across Asia including South Asia, Southeast Asia, the Himalayas, and East Asia. This course examines not only painting, sculpture, and architecture, but also gardens, ceramics, and prints. Special emphasis will be placed on religious arts of Buddhism and Hinduism, along with landscape and figural painting of China and Japan.

**HAA 130 | INTRODUCTION TO EUROPEAN ART | 4 quarter hours
(Undergraduate)**

This introductory-level course examines art historical methods and their application to a broad chronological survey of European art and architecture from pre-history to the twentieth century. Field trips to Chicago art institutions enhance the understanding of historical traditions and critical methods taught in class lectures and discussions.

HAA 145 | INTRODUCTION TO ARTS OF THE AMERICAS | 4 quarter hours (Undergraduate)

What is distinctive about art created over time on the American continents? This class begins to answer this question by examining some of the principal developments in art history from the ancient indigenous cultures (particularly those of Meso- and South America), through the period of European colonialism (especially Spanish and English), to the modern art movements across the sovereign nations, including the United States and Canada. Since time permits only a sampling of artistic forms across time, lectures are often issue-oriented, with a focus on selected problems facing scholars. Periodic discussions allow students to weigh in on topics and offer their own critiques. This class argues that the distinctiveness of American visual forms springs from the heterogeneous cultural traditions that simultaneously divide and unify its inhabitants.

HAA 200 | SPECIAL TOPICS ON THE ART INSTITUTE | 4 quarter hours (Undergraduate)

In coordination with the University's partnership with the Art Institute of Chicago, this Special Topics class exploits an invaluable resource in our own city, to teach students about one or more specific collections or exhibitions. The class also works to think holistically about the development of the museum itself within the context of Chicago's own social history. With an encyclopedic collection consisting of 11 distinct curatorial departments, the Art Institute is both museum and research institution, thus offering students the opportunity to explore ideas at a variety of important levels. Class lectures and activities will consider specific aspects of the museum's art and architecture, remaining flexible enough in its format to accommodate opportunities provided by any special exhibitions that may be on display during a given quarter. Meetings will take place primarily in the classroom, with intermittent visits to the museum, both during and outside of class time.

HAA 201 | ANCIENT AFRICAN ART | 4 quarter hours (Undergraduate)

This course surveys a selection of artistic traditions from across the African continent beginning with the earliest attempts by humanity to visually represent complex thought until the Portuguese began trading along the coast of West Africa in the mid-fifteenth century. Emphasis is placed on demonstrating connectedness with a larger cultural environment, while also suggesting connections to future artistic traditions.

HAA 202 | CLASSICAL AFRICAN ART | 4 quarter hours (Undergraduate)

This course surveys a selection of artistic traditions from across the African continent beginning with the arrival of the Portuguese along the coast of West Africa in the mid-fifteenth century until the age of African independence in the 1960s. While the impact of a European presence helps define the boundaries of this course, artistic response to that presence is but one theme. Interactions between African cultures and the impact of Islam are equally important considerations.

HAA 203 | POST-COLONIAL AFRICAN ART | 4 quarter hours (Undergraduate)

This course surveys African art from the age of African independence in the 1960s until the present day. The meaning of the term contemporary as it applies to African art is questioned in this course. The position of the artist between African artistic tradition and the global art market is also of vital importance.

HAA 210 | AFRICAN AMERICAN ART: 1800 TO THE PRESENT | 4 quarter hours (Undergraduate)

This course surveys the work of African American artists, from the nineteenth century to the present. Lectures will cover a wide range of visual media, including painting, sculpture, photography, art criticism and performances.

HAA 215 | CHINESE ART | 4 quarter hours (Undergraduate)

This is a chronological survey of premodern Chinese art from antiquity to the nineteenth century. Special attention is given to sculpture and painting, but architecture and ceramics are also covered. There is an emphasis on prehistoric bronze vessels, Buddhist sculpture, and landscape painting of the Song through Qing periods.

HAA 216 | JAPANESE ART | 4 quarter hours (Undergraduate)

This is a chronological survey of premodern Japanese art, from the prehistoric era to the Meiji period (1868-1911). Topics covered include painting, sculpture, and architecture, as well as decorative arts, prints, and garden design. Special attention is given to Buddhist and Shinto religious arts, along with screen painting and woodblock prints.

HAA 218 | ARTS OF THE SILK ROAD | 4 quarter hours (Undergraduate)

This course examines the visual history of the Silk Road, focusing on works of art and architecture created in Central Asia. We not only consider the prehistoric, ancient, and medieval arts of this region, but we also investigate the modern development of a romanticized notion of the Silk Road and the imperial interest in acquiring treasures from the Silk Road. Today we frequently hear about the legacy of the Silk Road in promoting multicultural exchange. However, the Silk Road has long been affected by the expansionist agendas of empires. From the time of Alexander the Great (356-323 BCE) through the period of Genghis Khan (1162-1227 CE) and onward, there have been military leaders who have led their armies into Silk Road lands seeking territory, riches, and glory.

HAA 219 | JAPANESE FILM ARTS | 4 quarter hours (Undergraduate)

This course examines the development of cinema as an artistic form in Japan, from its inception in the early twentieth century to its explosion as an international phenomenon in recent decades. The Japanese cinematic experience is considered as visual expression that parallels key Japanese arts of handscroll painting and woodblock prints. We discuss such genres as samurai films, fantasy tales, monster movies, yakuza thrillers, and science fiction anime. Among the masterpieces studied are Ozu's Tokyo Story, Kurosawa's Seven Samurai, Itami's Tampopo, and Satoshi Kon's Millennium Actress. Issues addressed in relation to these films include artistic expression, technological progress, national identity, social unrest, and religious concern.

HAA 220 | BUDDHIST ART | 4 quarter hours (Undergraduate)

This course explores the traditional visual culture of the Buddhist world, examining art as a reflection of religious belief and practice. The regions covered are South Asia, Southeast Asia, and East Asia. An emphasis is placed on painting, sculpture, and architecture made for or related to Buddhist practice.

**HAA 222 | ISLAMIC ART | 4 quarter hours
(Undergraduate)**

This course examines the visual culture of the Islamic world, selectively surveying some of the major artistic developments in regions of the world with a significant Muslim population. It will consider art and architecture as interplay between local culture and Islamic tradition. Topics covered will include the origins of Islamic visual culture in the Arabian Peninsula and the spread of Islamic art and religion across the Middle East. Local expressions of Islamic art may be explored in areas as diverse as North Africa, sub-Saharan Africa, Spain, Sicily, Iraq, Iran, India, and Central Asia. Special attention is paid to architecture, painting, and decorative arts.

**HAA 230 | ART AND EMPIRE IN THE ANCIENT WORLD | 4 quarter hours
(Undergraduate)**

This course explores the art of the ancient period (ca. 30,000 BCE - 330 CE) from a broad range of cultures and styles: from the Paleolithic cave paintings to the Roman Colosseum, from the pyramids of Egypt to the Parthenon in Greece. We consider how art, religion, urbanism, and writing profoundly affected the development of the ancient Mediterranean and Mesopotamian world. We analyze major stylistic trends and explore the relationship between art, culture, and religion. We also discuss the role of art in the hands of political leaders and the profound interconnectedness of ancient civilizations. Frequent discussions will analyze controversies in the study of ancient art and scrutinize topics such as gender, power, aesthetics, and authenticity.

**HAA 231 | CONQUEST & CONVERSION: THE ART OF THE EARLY MIDDLE AGES | 4 quarter hours
(Undergraduate)**

This course treats the art of the early Medieval period, which spans the fourth to the eleventh centuries CE and includes Roman, Celtic, Gothic, Merovingian, Anglo-Saxon, Carolingian, Viking, and Ottonian cultures. In thinking about factors such as historical context, dynamics of production, and audience, we will come to understand the role of art and architecture in announcing power and extent of territory, staging public rituals, proclaiming social status, inspiring faith, and accommodating the dead.

**HAA 232 | AGE OF CATHEDRALS: THE ART OF THE LATER MIDDLE AGES | 4 quarter hours
(Undergraduate)**

This course explores the art of the late Medieval period, which spans the eleventh to the fifteenth centuries CE in countries such as France, Germany, Italy, and England. In our study of the Romanesque and Gothic art and architecture, we will explore issues related to production, display, and function and, thereby, come to better understand a world marked by pilgrimage and the cult of relics, chivalry, pageantry, and conflict.

**HAA 233 | THE ART OF CRUSADING | 4 quarter hours
(Undergraduate)**

This course focuses on the Crusades. More specifically, it focuses on the world within which the Crusades were born and the Levantine kingdom built as a result of their initial success. Our study will depend on primary artistic, literary, and archaeological materials, as well as the secondary scholarship that has identified and interpreted these materials. Our understanding of this historical moment will be nuanced by the questions we ask of both. The payoff will be an appreciation for the religious, social, political, and artistic forces that defined the twelfth and thirteen centuries in Europe and in the Mediterranean basin, leading as they did to such fascinating phenomena as pilgrimage, the cult of relics, chivalry, holy war, the rise of military orders, and the establishment of the Latin Kingdom of Jerusalem itself.

**HAA 234 | BYZANTINE ART | 4 quarter hours
(Undergraduate)**

This course explores the art of the Byzantine Empire from the founding of Constantinople in 330 CE to the fall of the city to the Ottomans in 1453. Lectures and readings focus primarily on how contemporaries understood and interacted with a diverse group of monuments and objects now classified as Byzantine art. Significant attention will be devoted to how works of art functioned in the service of imperial and ecclesiastical ideology. Discussions analyze how Byzantine art was appreciated and appropriated in both the medieval Mediterranean and in modern scholarship.

**HAA 235 | RUSSIA: MEDIEVAL MOMENTS, IMPERIAL DAYS & WHITE NIGHTS IN NOVGOROD & ST. PETERSBURG | 4-8 quarter hours
(Undergraduate)**

This study abroad program in Russia allows students the opportunity to explore Novgorod, the medieval trading emporium and center of Orthodox spirituality and the Russian imperial gem of St. Petersburg, while studying medieval art and the history of Imperial Russia. Both cities have been designated UNESCO World Heritage Sites and showcase the best of medieval and modern Russia by providing one of the world's richest ensembles of urban planning, art, architecture, and historical treasures.

**HAA 236 | NORTHERN RENAISSANCE ART | 4 quarter hours
(Undergraduate)**

This course features the most significant works of art, their artists and patrons, the social and economic aspects of artistic production, and the dominant cultural issues that flowed brilliantly in Northern Europe - above all, in France, the Netherlands, Bohemia, and German-speaking lands - between 1300 and 1600, that is, during the volatile period of the Renaissance and outbreak of the Protestant Reformation. And although Flemish oil painting offers the most evident legacy of the Northern Renaissance to the casual museum visitor, this course also introduces the most important outputs in printmaking; sculpture; and the industrial arts, as in tapestry weaving and the fabrication of luxury articles in metalwork.

**HAA 237 | ITALIAN RENAISSANCE ART | 4 quarter hours
(Undergraduate)**

This course concentrates on the architecture and pictorial arts that flourished on the Italian peninsula between ca. 1300 and 1600, although selected forays are undertaken into comparative European and Asian cultures. Its content focuses on the most significant works of art and architecture, including the technical arts; the key personalities, above all, the artists and their patrons; and a broad range of cultural and political issues that affected artistic thinking and production.

**HAA 238 | BAROQUE ART | 4 quarter hours
(Undergraduate)**

Starting in 1600, from the vantage point of the Counter-Reformation and the rise of modern European states, Baroque Art covers the principal works of art and architecture; artists and patrons; and a wide sweep of social, religious, and political conditions that impacted cultural thinking and production in the seventeenth century. Attention is focused on the most prominent artistic centers in Italy, the Spanish Netherlands, England, Spain, the Dutch Republic, and France. The in-class lectures with discussion are accompanied by field work to the Baroque collections of the Art Institute of Chicago.

**HAA 239 | 19TH CENTURY EUROPEAN ART | 4 quarter hours
(Undergraduate)**

This course is an introductory survey of major artists and movements in nineteenth century European art. This was a period of great change, both in the world and in the arts; it determined the modern world. This class primarily explores paintings and sculptures, but printmaking, photography, and architecture are drawn in as well. Artworks are treated as historical objects and texts with their own aesthetic properties, but also as reflective of major events such as the Industrial Revolution, political upheaval, and colonialism. Included is discussion of marginalized artists and populations, and connections to issues in the contemporary world.

**HAA 240 | ART FROM 1900-1945 | 4 quarter hours
(Undergraduate)**

This course examines the major artists, movements, and issues at play in the visual arts of Europe from 1900 to the outbreak of World War II. Lectures and class discussions address how modern art, often oppositional and contradictory in nature, responds to, reflects, or builds on the effects of modernization (i.e. urbanization, industrialization, and global capitalism). Modern art objects will be read for both stylistic innovation and for connections to specific historical developments. Significant themes addressed include the character and history of the avant-garde, the relationship between high art and mass culture, the changing identities and aims of the modern artist, and the institutional basis of art production.

**HAA 242 | ART FROM 1945 - 1975 | 4 quarter hours
(Undergraduate)**

This course considers the art and culture of Western Europe and the United States from World War II through the Vietnam War. Beginning with the period of high modernism, major art historical movements and highly distinct aesthetic practices will be examined in order to foreground the complex relations that exist between art making and specific socio-historical contexts. Topics to be addressed include the development of the arts after World War II, the role of art in a consumerist and spectacle-driven society, the dematerialization of the art object, and the shift from late modernist to postmodern sensibilities. Students will be introduced to a range of theoretical models which foreground structural and formal investigations, as well as issues of social and historical analysis.

**HAA 243 | MAYA ART AND ARCHITECTURE | 4 quarter hours
(Undergraduate)**

The "Classic Period" Maya (ca. 0-900 CE) are the source of modern interest for their graceful naturalism in a wide range of art forms and for their impressive architecture whose ruins today are found scattered across Southern Mexico, the Yucatan Peninsula, Guatemala, Belize, and Honduras. This class explores the political, social, economic and religious imperatives behind the soaring temples, intriguing ballcourts, stately public sculptures, delicately painted vases, complex manuscripts and much more. We will situate the art of the Maya relative to other Mesoamerican cultures, particularly those of the Olmec, Teotihuacan and Aztec, and with respect to the Spanish colonial invasion. Other themes include aesthetics, materiality, gender, interpretive methodologies, and the impact of hieroglyphics and calendrics on the study of Maya art.

**HAA 244 | AZTEC, MAYA, OLMEC: MESOAMERICAN ART | 4 quarter hours
(Undergraduate)**

This survey of art of the ancient Mesoamerica (ca. 1000 BCE - 1520 CE) focuses on the most artistically significant civilizations of Middle America and some of the difficulties encountered in studying them. Lectures explore visual traditions as diverse as the people they reflect; cultures to be covered include the Olmec, Maya, Teotihuacan, and Aztec. We consider the relationship between form and content, and the relationship between art and its social context, as much as we can understand it; however, especially because of the scarcity of primary source texts for the material, the class will also regularly raise questions of methodology in what is often identified as "pre-Columbian" scholarship.

**HAA 245 | ART OF THE ANDES | 4 quarter hours
(Undergraduate)**

This survey of art of the ancient Andes (ca. 1000 BCE - 1530 CE) focuses on the most artistically significant civilizations of South America and some of the difficulties encountered in studying them. Lectures explore visual traditions as diverse as the people they reflect; cultures to be covered include the Nazca, Moche, Tiawanaco, Wari and Inca of Peru. We consider the relationship between form and content, and the relationship between art and its social context, as much as we can understand it; however, especially because of the scarcity of primary source texts for the material, the class will also regularly raise questions of methodology in what is often identified as "pre-Columbian" scholarship.

**HAA 246 | ART IN THE SPANISH AMERICAN EMPIRE | 4 quarter hours
(Undergraduate)**

This course offers a critical survey of the art of colonial Latin America (ca. 1520 - 1820), from the Caribbean to Mexico, Central America, and South America. Framed by the Spanish Conquest of the sixteenth century and Independence in the early nineteenth century, lectures will survey state-sanctioned arts of the Iberian colonizers, including the foundations of the Catholic Church across the 'New World' landscape. Race will be a frequent issue of discussion as we consider both indigenous American and African participation in social realities and artistic practice in this colonial context.

**HAA 247 | MODERN LATIN AMERICAN ART | 4 quarter hours
(Undergraduate)**

This class is a survey of Latin American art created since the Wars of Independence which helped to create the modern nations in the nineteenth century (i.e. 1820s through the present). Lectures consider the struggle of artists to articulate newly sovereign identities through visual production, even as complicated relationships with Europe and increasingly, the United States, continue. Topics covered include Latin American modernism, surrealism, radical arts, and social realism, with a special consideration of post-revolutionary Mexican mural painting.

**HAA 248 | MEXICAN ART | 4 quarter hours
(Undergraduate)**

This survey situates the art of Greater Mexico in its rich historical context, from the territory on the eve of the Spanish Conquest to the early decades of the twenty-first century. From Aztec imperial art to colonial works, to efforts at nation-building through visual forms, the story of Mexican art is characterized by political and social change. Readings, lectures, and discussion will touch on critical issues of race, class, and gender, and take up themes such as miscegenation, indigenism, nationalism, and Mexico's place in the global art world. We will study famous works, such as the Aztec Calendar Stone, the Catholic image of the Virgin of Guadalupe, the post-revolutionary murals of Diego Rivera and the more intimate paintings of Frida Kahlo, but we will also consider less familiar art that has been equally important in the construction of Mexico and its identities.

**HAA 250 | THE ART MARKET | 4 quarter hours
(Undergraduate)**

This course examines the evolution of the global commercial art market. In this cultural survey, students will be introduced to the roles of auction houses and commercial galleries and how they shape the art world. In addition, the course will consider the rise and popularity of contemporary art fairs and non-fungible tokens (NFTs) and their significant impact on how art is now disseminated, collected, and exhibited. Field trips to local commercial galleries and auction houses will be organized to give students the opportunity to connect directly with experts in the field.

**HAA 260 | AMERICAN ART | 4 quarter hours
(Undergraduate)**

This course examines American art (the British colonies and United States) from the colonial period to the mid-twentieth century. Works of art are examined both in relation to American social and cultural history and also as aesthetic objects. The overarching themes of the class include the "American-ness" of American art, the relationship between American and European art, the function and production of art, and the expanding definition of American expression through multicultural diversity.

**HAA 263 | HISTORY OF INTERIOR DESIGN | 4 quarter hours
(Undergraduate)**

A survey of the history of interior design as expressed in residential architecture, furniture, and the decorative arts from antiquity to the present. The aim of this class is to understand interiors and furnishings throughout history, considering their function, style, materials, and fabrication in relation to their cultures and to the built environment. To this end, students will learn to identify, analyze, and understand historic styles of interior design and furnishings within the larger context of the history of painting, sculpture, and architecture.

**HAA 265 | HISTORY OF PHOTOGRAPHY | 4 quarter hours
(Undergraduate)**

This course is a survey of the major works, artists, and movements from photography's invention to the present day. Emphasis is placed on the major artists, subjects, and technical applications of the medium, as well as on the modernity of photography and its unique aesthetic qualities. This course will also consider the myriad purposes and social contexts for photography and examine a wide range of techniques from the camera obscura to recent developments in printing. Actual photographs are studied in class, on campus, and in field trips to regional collections. The course involves major readings that ask students to consider the role of photography in relations to race, gender, and politics. Many of the photographers under consideration are American and European, but examples of international imagery are included as well.

**HAA 268 | HISTORY OF FILM | 4 quarter hours
(Undergraduate)**

This course is a survey of the history of cinema and an introduction to the basic methods for analyzing films. Specifically, this course tracks the development of techniques for creating meaning using film within particular historical contexts and cinematic traditions such as narrative, documentary, and experimental film. We will focus on how meaning in film is conditioned by uses of camera, editing, lighting, mise-en-scene, sound, and acting as well as how these uses have been impacted by new technological developments in film production. Additionally, we will consider the significance of genre, the production system, and the impact of individual "auteurs" throughout the history of cinema.

**HAA 273 | ANIME AND MANGA | 4 quarter hours
(Undergraduate)**

This course examines the development of anime and manga in Japan from their inception to their explosion as international phenomena in recent decades. We consider anime and manga as forms of artistic expression that depend upon and parallel key Japanese visual forms of handscroll painting and woodblock prints. Students learn the ideas, ideals and values in Japanese cinematic and visual expression, and develop skills at analyzing anime and manga as artistic forms. The processes of drawing/creating anime and manga are considered; both form and content of anime and manga are discussed.

**HAA 280 | PREMODERN ARCHITECTURE: ANCIENT SOCIETIES TO THE ENLIGHTENMENT | 4 quarter hours
(Undergraduate)**

Social, economic, and political history of European and Mediterranean architecture, from Paleolithic times to the 1789 French Revolution. Topics include: classicism, the status and role of the architect, social struggle, patronage, and architectural technologies.

**HAA 281 | MODERN ARCHITECTURE | 4 quarter hours
(Undergraduate)**

World architecture from the 1789 French Revolution to the present. Examines the influence of industrial, technological, political and social change in the development of modernist and post-modernist architecture.

**HAA 288 | COMPARATIVE URBANISM | 4 quarter hours
(Undergraduate)**

An investigation of the origins and bases of non-American urban traditions, through the study of the genesis, form, functions, and social-cultural forces that shaped cities such as Paris, St. Petersburg, Istanbul, Calcutta, and Mexico City. This course is based in the Geography Department and is the equivalent of 200-level History of Art and Architecture course.

HAA 290 | ART HISTORICAL THEORY AND METHODOLOGY | 4 quarter hours**(Undergraduate)**

This course looks at the theories and methodologies that belong to art history. This means that, rather than a given artistic period, geographical area, or theme, our focus will be on the ways in which works themselves have been interpreted and understood since the origin of the discipline, emphasizing the more reflective and critical approaches to art that have emerged as a result of contact with other disciplines (such as philosophy and comparative literature). Each weekly meeting will consist of discussions inspired by informational readings on a given methodological approach (such as structuralism, Marxism, psychoanalysis, post-colonialism, queer theory), as well as a number of specifically art historical texts exemplifying that particular approach. Our main goal for this class will be to develop an understanding of these theories and methodologies and to evaluate the advantages and disadvantages of their application.

HAA 291 | MUSEUM AND NON-PROFIT ARTS MANAGEMENT | 4 quarter hours**(Undergraduate)**

Chicago is rich with museums and non-profits dedicated to the visual arts and the heritage of the city's cultural communities. Acquire an understanding of the fundamentals of the non-profit visual arts sector by investigating the principal practices of Chicago area museums and dynamic arts organizations as case studies. This course will examine how museums and non-profits are structured, governed, managed, and connect with arts audiences. Current challenges in curatorial and exhibition practice, community engagement, financial sustainability, equity, and impact in a highly competitive arts and culture market will be explored. Site visits and meetings with arts professionals will provide an inside look at how Chicago's non-profit visual arts and museums function and the demands they face.

HAA 297 | SPECIAL TOPICS IN HISTORY OF ART & ARCHITECTURE | 4 quarter hours**(Undergraduate)**

Focused study on a specific topic from the history of world art.

HAA 301 | AFRICAN ARCHITECTURE | 4 quarter hours**(Undergraduate)**

This course examines a wide variety of issues pertinent to the study of architecture in Africa, highlighting above all else the diversity of traditions across the continent. Themes are defined at times by materials, technology, type, geographical region, culture, or specific architectural elements. Examples of subjects studied include: earthen mosques of Mali; subterranean residences in Burkina Faso; nomadic tents; impluvial and courtyard traditions of Nigeria and Senegal; mural painting in Burkina Faso, Nigeria, and South Africa; Ethiopian rock cut churches; imperialist exploitation of Great Zimbabwe's legacy; and coral architecture of the Swahili Coast.

HAA 302 | AFRICAN ISLAM: ISLAMIC ART & ARCHITECTURE IN SUB-SAHARAN AFRICA | 4 quarter hours**(Undergraduate)**

Focused study of the impact of Islam on the artistic traditions of sub-Saharan Africa. Rather than necessarily replacing previous art forms, this course investigates in what circumstances preexisting visual culture might be integrated with the requirements and needs of Islam. This approach necessitates an understanding that neither Islam nor African art are monolithic entities, but rather their interactions represent a wide variety of negotiations across the continent. Likewise, this course will consider specific historical circumstances to which Islamic art in sub-Saharan Africa has responded in terms of form and content.

HAA 310 | TOPICS IN ART AND ARCHAEOLOGY | 4 quarter hours**(Undergraduate)**

This course addresses issues of archaeology relevant to the study of visual culture from the ancient to the contemporary world. This course is based in the Department of Anthropology and is the equivalent of a 300-level History of Art and Architecture course.

HAA 312 | ILLNESS AND DISABILITY IN CHINESE ART | 4 quarter hours**(Undergraduate)**

This course looks at how different bodies have been portrayed through different media and how illness and disability have been understood. Students will examine artworks created under illness and disability and investigate how different bodies affect the creation of artworks and styles. A wide variety of visual materials will be discussed, including painting, calligraphy, embroidery, cinema, footwear, propaganda posters, and performance art. By the end of the course, students will be able to identify important works related to illness and disability in Chinese art, explain their historical contexts using a perspective of disability studies, and analyze issues in defining what counts as disability art.

HAA 316 | GODS AND MORTALS: THE ART OF THE ANCIENT GREEKS | 4 quarter hours**(Undergraduate)**

This course looks at the ancient Greek world, focusing on the events, traditions, and beliefs that culminated, on the one hand, in the birth of democracy and the defeat of Xerxes and, on the other hand, in the building of the Parthenon and the sculpting of the Nike of Samothrace. In so doing, we will come to understand above all the heavy burden placed on art and architecture at this time and in this place, charged as it was with soliciting the gods, establishing power, celebrating battles, ritualizing entertainment, and remembering the dead. And along the way we will challenge long held assumptions related to the meaning and function of ancient Greece's most fundamental artistic forms, techniques, and subjects.

HAA 320 | ART AND POWER IN PAGAN AND EARLY CHRISTIAN ROME | 4 quarter hours**(Undergraduate)**

This class focuses on the art of the Roman Empire, an empire that began pagan and ended Christian. In practical terms, it will move from Augustus in the first century BCE to Justinian in the sixth century CE, with geographical coverage ranging from Jerusalem to (modern day) northern England. Our task will be to examine the artistic forms that came to identify this civilization via structures that dwarfed the natural world and figural likenesses that made the absent present to appreciate their efficacy. On the one hand, this examination will provide a deep and broad understanding of the role art plays in the building of empire; on the other, it will provide a vivid sense of art's part in maintaining the appearance of continuity despite radical change. Thus, we will watch as the artistic forms that once defined a pagan world are adopted enthusiastically by its Christian replacement, marking the subtle transformations that articulate new beliefs, facilitate new devotion, and charge spaces for new rituals.

HAA 325 | OLD EMPIRES AND NEW GODS: CULTURAL CONFRONTATIONS IN LATE ANTIQUITY | 4 quarter hours**(Undergraduate)**

This course focuses on how a clash of cultures and the emergence of new religions impacted the arts of the eastern Mediterranean in late antiquity (300 to 700 CE). It explores interactions between the Byzantine and Sasanian empires, as well as the creation of local and religious identities through art. It also investigates how the diverse religious climate (Christianity, Judaism, Paganism, Zoroastrianism, Islam) contributed to visual expression in the region.

HAA 328 | THE POWER OF PIETY: ICONS, RELICS, AND MIRACLES IN THE MEDIEVAL WORLD | 4 quarter hours (Undergraduate)

This course examines the intersection of personal devotion, public spirituality, and performance of faith in the medieval world. Probing a range of objects that give material expression to the desire for tangible links to the sacred and reminders of supernatural presence in the medieval world, the course analyzes miraculous objects that we now categorize as works of art. Objects under discussion include a category broadly defined as reliquaries, fragments of the True Cross, images "not made by human hands," and miraculous icons.

HAA 331 | ART OF THE CRUSADES: CRUSADES AS MEDITERRANEAN EXCHANGE | 4 quarter hours (Undergraduate)

This course considers the Crusades from multiple perspectives (Byzantine, Latin, Muslim) and explore how politics, religion, and culture influenced the art of the medieval Mediterranean. The Crusades are analyzed in the broader context of pilgrimage, the search for the divine, and the desire to seize control of and purify holy sites. The course focuses on works of art created when the cultures of the Mediterranean came into both contact and conflict.

HAA 332 | ROMANESQUE ART AND ARCHITECTURE | 4 quarter hours (Undergraduate)

Scholars in the nineteenth century designated Western European monuments, especially architecture and sculpture created between the eleventh and twelfth centuries, as "Roman-like" in character or "Romanesque," in order to acknowledge certain linkages they perceived between the characteristics of this era's architectural and visual language and that of the distant Roman past. Recent scholarship emphasizes not only large-scale works of art, architecture, and sculpture, crucial in an age of Pilgrimage and Crusades, but also small-scale works, such as illuminated manuscripts, metalwork, and coins and seals, as essential for an understanding of medieval visual culture. This class considers the broad spectrum of significant works of art produced during this period from shifting points of view, aesthetic or formalist toward function, agency, presentation and reception.

HAA 333 | GOTHIC ART AND ARCHITECTURE | 4 quarter hours (Undergraduate)

This course examines the art, architecture, history, and culture of the so-called Gothic era (twelfth - fifteenth centuries), the age of the great European cathedrals. Reigning supreme in most of Europe in the thirteenth and fourteenth centuries, the Gothic style marks an era of unparalleled building activity and one of the most fertile and productive periods in the history of Western art. Special emphasis will be given to the aesthetic, structural, and spiritual aspects of cathedrals and other great churches and their contents, primarily in France and England, as reflections and embodiments of the sacred aspirations and devout character of the era. The artistic and architectural production (buildings, sculptures, illuminated manuscripts, paintings, sacred or liturgical objects, stained glass, etc.) of the period will be studied in its original context, with close attention paid to questions of social and political function, cultural meaning, and historical circumstance.

HAA 335 | MICHELANGELO | 4 quarter hours (Undergraduate)

This course examines the extraordinary life, times and creations of Michelangelo Buonarroti (1475-1564), one of the most significant figures in the history of Western art. Sculptor, painter, architect, and poet, Michelangelo lived during the Italian Renaissance, an age that witnessed a flourishing artistic, scientific, and humanistic culture. During a career that spanned over seven decades, Michelangelo created famous lasting masterpieces, including the Vatican Pieta, David, Moses, the Sistine Chapel ceiling, and the papal church of St. Peter's. Who is this irascible and solitary genius, this devout Catholic and fierce Republican Florentine, who cavorted and lived with popes and princes, and fashioned works that profoundly influenced Western civilization? How do his brilliant achievements define, express, and illuminate the time, place, and culture in which he lived? Drawing on a variety of primary and secondary sources, this course seeks to understand an eccentric artist whose dazzling aesthetic productivity left a lasting mark on the art of future generations up to the modern period.

HAA 360 | DUCHAMP AND DADAISM | 4 quarter hours (Undergraduate)

This course examines the artworks and biography of Marcel Duchamp (1887-1968) and explores the major world cities where Dadaism occurred. Duchamp was among the most important artists of the modern era, his intriguing and challenging artworks redefining art altogether. No other modern artist influenced contemporary art so significantly. Another focus will be the cultural movement known as Dadaism (1916-24), a delirious anti-art movement begun in Zurich, Switzerland, during the absurd, bloody First World War. After contextualizing Dada in relation to modern art, the course explores its manifestations in various world centers. Along the way, we will encounter the works of many of its most important figures, many of whom were women. Besides the inherent value of looking closely at the cultural moment of an important historical figure, the study of Dadaism has special relevance because of its timeless iconoclasm and spirit of creative experimentation. This class includes close readings of primary and field-defining secondary texts, informed class discussions and lectures, as well as trips to area museums.

HAA 365 | ART SINCE 1975 | 4 quarter hours (Undergraduate)

This course addresses visual art production of a global context from the end of the Vietnam War to the present. Taking postmodernism as its starting point, the nature of contemporary art practice will be examined as it is redefined by new technologies and media, such as video, installation, performance, and digital art, and through an investigation of critical theoretical models. Traditional media, such as painting and sculpture, will also be assessed as a crucial part of this shifting terrain. Major themes considered include questions of identity and subject formation, the relationship between art and its audience, changing notions of artistic value, and the impact of globalization. Throughout, students will be exposed to the issues and ideas relevant to cultural production today, while simultaneously developing the visual and conceptual tools for critically analyzing contemporary art.

**HAA 366 | TOPICS ON WOMEN AND ART | 4 quarter hours
(Undergraduate)**

Historically courses on women and art were created as a supplement to the canon of art history taught in the standard art history survey, which celebrated the genius of the heroic white male artist. In many ways, however, these classes became a separate canon of women artists that was never truly integrated into the discipline and was narrow in terms of examining questions of class, ethnicity, race, religion, age, ability, etc. This course departs from this model and instead focuses on feminist theories of art applied to specific case studies investigating topics such as, problems of art historical categorization for women artists, performance as sites of resistance against violence, performing gender in visual images, and feminist activist collaborations.

**HAA 370 | CONTEMPORARY ARCHITECTURAL THEORY AND PRACTICE | 4 quarter hours
(Undergraduate)**

Study of contemporary debates in architecture and urban planning. This course explores economic, social, and political aspects of architectural theory through a case study of a contemporary monument or city plan.

**HAA 371 | HISTORIC CATHOLIC CHURCH ARCHITECTURE OF CHICAGO | 4 quarter hours
(Undergraduate)**

This course covers a selection of the jewels among the city's architecturally significant Catholic churches and related sites of interest that date up to ca. 1920. The course encourages us to think about the sacred buildings as extensions of the city's history, while emphasizing the contributions of its various immigrant groups. By thus using architecture and architectural history as the armature of this course, the student is able to explore the fascinating interplays between art, history, religion, and society, and come to terms with what culture does and signifies in one's own milieu.

**HAA 372 | CAIRO: MOTHER OF THE WORLD (WORLD CITIES) | 4 quarter hours
(Undergraduate)**

This course will examine the urban development and architectural heritage of Greater Cairo, Egypt since the reconstruction of the fortress of Babylon in the Roman period, through the establishment of Cairo itself in 969, and until the present. Cairo has always been a crossroads of cultures, set between Africa, Europe, and the Middle East. It has been home to significant Jewish, Christian and Muslim populations who have been impacted by the various ruling dynasties who have held sway there, including the Byzantines, early Islamic rulers, Tulunids, Shi'i Fatimids, and later Sunni Ayyubids, Mamluks, and Ottomans. In the 20th century, rapid expansion has produced extreme pressures on transportation networks and housing. The solution to such problems of intense urbanization has been to build satellite cities including a projected new capital to the east that will connect the Nile to the Red Sea shipping industry, following in the footsteps of the past.

**HAA 373 | KYOTO (WORLD CITIES) | 4 quarter hours
(Undergraduate)**

This course explores the art, architecture, and urban plan of Kyoto, the ancient capital of Japan. Kyoto became the seat of government and the home of the imperial court in 794 CE, and it continued to serve as the cultural and religious center of the land until the nineteenth century. This course considers major artistic developments as they relate to main sites in Kyoto, especially palaces, temples, and shrines. The eras covered extend from the Heian to the Meiji period.

**HAA 375 | MEXICO CITY (WORLD CITIES) | 4 quarter hours
(Undergraduate)**

From its origins as Tenochtitlan, the preordained capital of the Aztec Empire, through its identification as a "new Rome" dominated by the Spanish Crown in the Viceregal period, to its status as the largest metropolitan area in the Western Hemisphere (and the second largest in the world), Mexico City was born to impress the imagination. This class explores the development of the great city of Mexico in light of major historical events and cultural expressions. Discussions will focus especially on urban planning, key architecture, outdoor sculpture, and public spectacles over the centuries.

**HAA 376 | ROME (WORLD CITIES) | 4 quarter hours
(Undergraduate)**

Few cities in the world match Rome for its antiquity, imperial heritage, historic, religious and cultural importance, spectacular art and architecture, and rich urban landscape. Traditionally believed to have been founded by Romulus and Remus, descendants of Aeneas, in 753 BCE, and subsequently ruled by Etruscan kings; Rome's public buildings, communal baths, and fortifications suggest that Rome was urbanized as early as the sixth century BCE. After the expulsion of their Etruscan monarchs, Romans established the Republic, which evolved into the Roman Empire when Octavian, grand nephew of Julius Caesar, became Augustus, Rome's first emperor, princeps or first citizen. Along with subsequent emperors determined to turn Rome into a magnificent city worthy to be the capital of a great empire, Augustus used architecture and the built environment as massive symbols of power, authority, and legitimacy. The Catholic Church embraced this lesson when the imperial pagan capital became the capital of Western Christendom and the seat of the papacy. This class explores the city of Rome from its ancient origins through the seventeenth century and focuses on the major art and architectural developments that define this unique urban space.

**HAA 378 | HEAVENLY AND EARTHLY JERUSALEM (WORLD CITIES) | 4 quarter hours
(Undergraduate)**

This class focuses on the city of Jerusalem. The uniqueness of Jerusalem stems from its status as a sacred place in Judaism, Christianity, and Islam. In this class we will explore the physical city of Jerusalem with its monuments, contested holy sites, and changing architecture. We will also analyze representations of the imagined heavenly Jerusalem, for which many believers intensely yearned. The class will focus on Jerusalem from the second through the sixteenth centuries: from its destruction by Roman armies to its last pre-modern construction phase during the Ottoman period. We will discuss how different religious groups mapped meaning and marked holiness in the urban fabric of Jerusalem. This class will consider some of the following issues: art and architecture, politics, religion, urban planning, and patronage.

**HAA 379 | PARIS AND VICINITY TO CIRCA 1870 (WORLD CITIES) | 4 quarter hours
(Undergraduate)**

This course is designed to explore the arts and architecture, and urban planning of Paris and its vicinity, from the period of the Old Regime to ca. 1870. This span more or less coincides with the art historical periods from the Renaissance to early Impressionism. The course material weaves artistic works and projects into the greater cultural, political, and social fabric of the realm, and includes, among other outstanding personalities, the towering impact of Vincent de Paul, in order to expose the student to a variety of cross-disciplinary perspectives. Several class sessions are scheduled at the Art Institute of Chicago.

HAA 380 | CHICAGO ARCHITECTURE AND URBANISM (WORLD CITIES) | 4 quarter hours (Undergraduate)

This course investigates contemporary historiographic debates and new archival evidence surrounding research on Chicago architecture and urbanism. In addition to participating in lectures and discussions, students also meet separately to discuss scholarly debates as well as their individual research proposals.

HAA 390 | SENIOR CAPSTONE | 4 quarter hours (Undergraduate)

This is the culminating course of the art history major. Its project is twofold. On the one hand, it continues the critical thinking work of your previous art history courses, turning now to topics that define and occupy the field in general, rather than topics that define and occupy a specific period or geographical area and rather than topics related to methodology. These topics (such as cultural seeing, audience, material, the market, looting, etc.) will allow us to examine a variety of object and monument types in urban and non-urban settings from different cultures and different historical contexts. While some are of longstanding concern and others more recent, together they underscore art history's inherent interdisciplinarity and the breadth of issues that affect the study of art and architecture. On the other hand, this course continues the writing and research work of a single previous art history course, facilitating the expansion of a paper of your choosing. This expansion will be accompanied by readings and staged assignments that are designed to deepen your existing argument, or to push it in new and complementary directions, and to tighten and clarify your prose and your use of textual and material evidence. The result will be a substantial and sophisticated treatment of an art historical object, monument, or subject. Formerly HAA 399.

Declared major in History of Art and Architecture and (senior status required or juniors with instructor permission)..

HAA 391 | THE EVOLVING MUSEUM: HISTORIES AND CONTEMPORARY CHALLENGES | 4 quarter hours (Undergraduate)

This course examines the history and philosophy of museums and provides a framework to consider how the museum's role in society has changed over time. Compelling issues such as the museum's responsibility as a public institution and ethical considerations in collections acquisition and stewardship will be discussed. Case studies, guest lectures, and site visits to museums will inform history and theory by highlighting current museum practice and contemporary challenges in the museum field.

HAA 393 | SPECIAL TOPICS IN MUSEUM STUDIES | 4 quarter hours (Undergraduate)

Focused study on a specific topic in museum studies.

HAA 394 | MUSEUM STUDIES INTERNSHIP | 4 quarter hours (Undergraduate)

This course is a unique opportunity for students to gain valuable training in the museum field and work closely with professional museum staff on meaningful projects. Students will be matched with museum sites in consultation with the instructor. In addition to internship responsibilities, students will produce a reflective journal and document their field work in a digital portfolio. This course is designed for History of Art and Architecture majors and Museum Studies minors. Students should contact the instructor once they have registered for the class (at least three weeks prior to the start of the quarter) to discuss museum site placement.

HAA 395 | INTERNSHIP | 1-12 quarter hours (Undergraduate)

To be arranged with the Career Center and in consultation with advisory. **Junior or Senior standing and status as an Art, Media and Design major or Art minor or consent of instructor is a prerequisite for this class.**

HAA 397 | SPECIAL TOPICS/HISTORY OF ART & ARCHITECTURE | 4 quarter hours (Undergraduate)

Focused study on a specific topic from the history of world art.

HAA 398 | INDEPENDENT STUDY | 1-4.5 quarter hours (Undergraduate)

Independent work in the student's field of study under faculty supervision. Available only to upper-level students with demonstrated capacity for self-motivated study.

HAA 399 | NEWBERRY LIBRARY SEMINAR | 4.5 quarter hours (Undergraduate)

The Newberry Library Undergraduate Seminar (NLUS) provides an opportunity for DePaul undergraduates to participate in an intensive seminar and produce an original research project using the world-renowned collections of the Newberry Library. Seminar topics change annually. Admission is competitive, by application. Instructor permission is required to enroll.

HAA 400 | CHICAGO ARCHITECTURE AND URBANISM | 4 quarter hours (Graduate)

Chicago Architecture And Urbanism.

HAA 401 | GRADUATE TOPICS/HISTORY OF ART & ARCHITECTURE | 4 quarter hours (Graduate)

Graduate-level, intensively researched investigations into topics from the history of art and architecture taught by an instructor with a research specialty in that topic.

Graduate standing or department consent is a prerequisite of this class.

HAA 402 | DIGITAL MAPPING AND ART HISTORY | 4 quarter hours (Graduate)

This course explores the questions raised by digital humanities in art history through a specific focus on the digital mapping of art historical questions. Students will focus on advanced discussions of digital mapping but also apply these theoretical and methodological concerns to art historical problems. We will use the Harvard WorldMap program which is a complement to the more advanced GIS work available in the Geography component of the certificate. WorldMap is a tool that has both pedagogical and analytic potential for art history. Students will address the big issues in digital mapping while constructing maps around such art historical subjects as modern architecture in Chicago, women artists in Chicago, muralism in Chicago, and other select topics.

HAA 495 | ADVANCED TOPICS/HISTORY OF ART & ARCHITECTURE | 4 quarter hours (Graduate)

Advanced Topics in History of Art and Architecture.

Graduate standing or department consent is a prerequisite for this class.

Art and Craft of Theatre (ACT)

ACT 100 | POLITICS, POP CULTURE, AND THE STAGE | 4 quarter hours (Undergraduate)

Through the aesthetic analysis of plays, and dramatists that were foundational in the development of dramatic literature, the student is encouraged to develop basic critical standards for the understanding and appreciation of dramatic production. This course can be taken by non-Theatre School students.

ACT 200 | MAKING PLAYS: THEATER AND THE ART OF PRODUCTION | 4 quarter hours (Undergraduate)

Through lecture, discussion, projects and actual theatre attendance, students explore the human nature of the theatrical impulse and its evolution into theatrical form. Plays and readings deal with issues of gender identity, sexual orientation, and sexuality in performance. Students follow the process of specific drama productions from script to stage and examine the artistic process and the role that sexuality and gender play in performance and rehearsal.

ACT 209 | SKETCH COMEDY | 4 quarter hours (Undergraduate)

Live performances of sketch comedy present theatre in one of its most elemental forms. With a focus on actors and text rather than technical elements, stagings of sketch revues explore the relationship between audience and artist in a dynamic and revealing way. This course will explore both the theoretical underpinnings of comedy and the practical techniques for the creation of this work. The class will examine as literature this work that is often overlooked by critics and theorists because of its perception as a "low" art form.

ACT 213 | SCI-FI AND OTHER GENRE FICTION IN THEATRE | 4 quarter hours (Undergraduate)

Science Fiction, Horror, Fantasy, and Superhero as genres of fiction are prevalent in popular culture and successful (almost saturated) in Film, Television, Prose Literature, Graphic Novels, and other forms of storytelling media. Why, then, are they underrepresented in the world of the theatre? And why are the few more well-known examples of these genres in theatre so often unsuccessful, commercially and critically? How can these genres translate to the stage successfully? Which technical characteristics of the theatre and of the theatrical language of storytelling are advantages and disadvantages for bringing these genres to life, as opposed to the other media in which they are more prevalent and successful? This course will attempt to answer these questions by examining extant theatrical works of "genre" fiction and their financial successes and critical receptions. We will also examine critically-acclaimed pieces of "genre" fiction in other media to determine why those pieces were successful and how to translate that success to the stage.

ACT 215 | PLAYS ABOUT SPORTS | 4 quarter hours (Undergraduate)

There is a curious relationship between sports and theatre; that is to say, the inherent theatricality of sports and the inherent athleticism of theatre. A significant component in this relationship is the concept of performance and what that entails. We speak of high-performance cars and trucks, we applaud and then discuss, blog, and tweet (sometimes to an extraordinary degree) the performances of both athletes and actors, we talk about academic performance, we see performing seals, dolphins, and whales at Shedd Aquarium, a member of the clergy performs a wedding ceremony, and the list continues. A highly contested term, performance is bound to the team role as it relates to sports, theatre, and everyday life. What is your role on the team? What role were you cast in? What is your role in the company? The team role is aligned with function and also with the context in which the "role is played. More than anything perhaps, both sports and theatre deal with highly charged relationships. In the plays that we will examine in the course, it is the sport itself that serves as both the context of and trigger for the relationships that are created, strengthened, weakened, or in the worst-case scenarios, totally shattered.

ACT 216 | SCREEN TO STAGE | 4 quarter hours (Undergraduate)

There is a long and storied tradition of adapting plays to film. Glengarry Glen Ross, Chicago, A Few Good Men, Harvey, Romeo + Juliet - the list goes on and on. More recently, however, there has been a continuing trend in the opposite direction: major works of theatre, particularly Broadway musicals, are adaptations of films. This course will examine this trend from several angles. We will discuss some of the reasons for this trend, we will discuss the challenges inherent in translating work written for film to the techniques of the stage, and we will compare and contrast artistic, critical, and financial successes and failures of plays adapted from films.

ACT 217 | THE ART OF STORYTELLING | 4 quarter hours (Undergraduate)

Storytelling is one of our oldest art forms. By exploring stories in performance and writing, students acquire the tools necessary to sculpt and perform their own stories. Then, students discover how storytelling can be used in multiple applications - from marketing to change management to human resources to diversity training. Through discussion, projects, and viewing live and recorded performance, students understand the art and building blocks of good storytelling. Studying different forms will illuminate the connection between content and form. Stories have the power to change people and this class explores how and why.

ACT 223 | INTRODUCTION TO IMPROVISATION | 4 quarter hours (Undergraduate)

Improvisation for the theatre was originally developed as a means of bringing diverse populations of people together in a creative, non-competitive, environment. Improvisation for performance was developed by The Compass Players and The Second City and has influenced generations of theatre artists from Alan Arkin to Tina Fey. The essentials of improvisation, however, remain applicable to everyone. In this course, sessions will include theatre games, ensemble building exercises, and scene structures. We will explore how the practice of improvisation creates opportunities for connection, creativity, and spontaneity. This class is for anyone who wants to enhance their abilities to act and interact with others.

ACT 241 | ARE WE STILL FABULOUS?: QUEER IDENTITY IN CONTEMPORARY DRAMA | 4 quarter hours
(Undergraduate)

Born out of ACT UP and the AIDS militant movement of the late 1980s and early 1990s, Queer Nation concerned itself with the issue of gay and lesbian enfranchisement and power. They created the battle cry, "We're here, we're queer, we're fabulous, get used to it," thereby granting the gay community ownership of the word "fabulous." Fabulousness not only became a new manifesto for queer politics and camp, but also became synonymous with irony, tragic history, defiance, gender-fuck, glitter, and drama. Currently, young playwrights have shifted the visor of gay drama from overtly political dramas to stories of identity and love. In replacing direct political messages with more personal appeals for social progress, is contemporary gay drama still fabulous? By interpreting and analyzing the most current queer plays, reading critical and reflective essays, and through discussion, students in the course will decide for themselves if "fabulous" is a thing of the past or stronger than ever in the present.

ACT 242 | STAGE DIRECTION FOR NON-MAJORS | 4 quarter hours
(Undergraduate)

This course is designed to introduce students to the director's craft. The focus is on the director's relationship to text through the analysis of playscripts and the use of that analysis to plan an interpretation of a play. Analysis will come from a variety of perspectives—personal, psychological, social, and historical. In addition to preparing and presenting their projects, students will attend performances and write papers in response. The class combines lecture, discussion, group exercises, and in-class activities.

ACT 244 | DRAMATIC WRITING FOR NON-MAJORS | 4 quarter hours
(Undergraduate)

This course is designed as an introduction to the process of playwriting. The emphasis is on the exploration of a range of techniques and tools available to the playwright. Through the completion and discussion of a series of writing exercises, the class will examine the various elements of playwriting. Particular attention will be paid to the connections between form and meaning. Work for the course will include weekly exercises, written responses to plays in production, and the presentation of projects. Instructional methods will include lecture, discussion, group exercises, and in-class activities. The final project of the class will be the completion of a draft of a 10-minute play.

ACT 250 | AMERICAN FUNNY: STAGE COMEDY FROM GROUCHO MARX TO TINA FEY | 4 quarter hours
(Undergraduate)

We're a funny people. We like to watch people be funny. AMERICAN FUNNY is a survey course that looks at American comedy in theatre from the early 20th century to the present day. We view performances of plays on video, read and write about American plays and playwrights, and discuss what is special about going to the theatre. We explore a historical progression of comedy, different types of comedy, the development of the American Comic Hero, and how comedy brings us together as theatregoers and as Americans.

ACT 251 | STAGE TO SCREEN: CINEMATIC TRANSLATIONS OF THE DRAMATIC CANON | 4 quarter hours
(Undergraduate)

It is almost always the case that audiences are introduced to the dramatic canon with cinematic translations of the great plays, rather than actual productions. In this course we will examine what elements theatre and film share as well as what elements one or the other medium possesses exclusively if any. What is lost or, indeed gained in cinematic translation? What is the notion of theatricality? What cannot be translated to the film? What societal elements come into play when translating a play for the screen? Socio-political and historical milieu of the original plays will be examined as well as those of the screenplays.

ACT 253 | THEME PARK THEATRE | 4 quarter hours
(Undergraduate)

Theme parks have become contemporary equivalents of the ancient Greek theatre festivals - places where the citizenry gather to revisit the myths and history of the community. While much has been written about theme parks from the perspective of cultural studies, urban planning, and commerce, little attention has been paid to their function as performance or theatre. In this class we will attempt to develop criteria for evaluating theme park attractions as works of art. How do theme parks fulfill or challenge traditional definitions of theatre? What is the relationship between audience and performer? Can/should theme parks aspire to do more than entertain? How are stories told physically and architecturally? How have theme parks influenced theatre and other art forms?.

ACT 255 | ANGELS, PUNKS AND RAGING QUEENS: THE ECLECTIC QUILT OF AIDS DRAMA | 4 quarter hours
(Undergraduate)

Acquired Immune Deficiency Syndrome (AIDS) has left an indelible mark on both the history and culture of the world. While fear and loss can paralyze, they can also mobilize. In addition to destroying generations of artists, AIDS has become what some call "the great unifier," giving voice to a new generation of theatre artists. But what are these voices? Cries for social change? Political rants? Stories of remembrance? Lessons to educate? All of the above? What does AIDS mean when it appears onstage in a performance? By interpreting and analyzing plays from both national and global AIDS perspectives, reading critical and reflective essays, and through discussion, students in the course will discover how the ritual of theatre has been used to create the eclectic quilt of voices that is AIDS drama.

ACT 257 | WRITING LOCALLY, THINKING GLOBALLY: INTERNATIONAL THEATRE FOR YOUNG AUDIENCES DRAMATIC LITERATURE | 4 quarter hours
(Undergraduate)

While writing and performing for their local communities, various international artists have made a global impact on the field of theatre for young audiences. This course is an investigation of the principles, procedures, and practices of theatre for young audiences playwrights and artists worldwide. Through analysis of readings, lectures, workshops, and discussions students will explore the skills and aesthetic techniques that theatre creators from around the globe use to communicate with their audiences. By examining historical, theoretical, and artistic intercontinental connections, students will hopefully gain further appreciation and understanding of the contemporary, global theatre for young audiences (TYA) field.

ACT 290 | ACTING AND PERFORMANCE | 4 quarter hours
(Undergraduate)

Students work on basic performance skills through individual and group exercises in acting, voice and speech and movement. Can be taken by non-Theatre School students.

ACT 300 | MESSFEST | 4 quarter hours**(Undergraduate)**

Students will learn and practice the skills needed to create and produce a 40-show comedy festival at a professional Chicago venue. Using a choose-your-own-adventure co-learning format, students can participate in everything from writing, performing, directing, production skills, design, house and stage management, marketing, and more. The course culminates in a one-week takeover of The Annoyance Theater in Chicago, where students will collaborate to run the theater and produce MessFest. Students must plan to participate in the festival January.

ACT 301 | MODERN DANCE | 4 quarter hours**(Undergraduate)**

This artistic dance course will focus on technique, individual and group improvisation, choreography, the art of making dances and how to view dance in performance. Designed for all levels of experience, the class will give attention to body awareness and alignment, physical strength and flexibility, expressive and creative movement in the modern dance style to a variety of musical accompaniment.

ACT 302 | MODERN DANCE II | 4 quarter hours**(Undergraduate)**

This course is a continuation from Modern Dance for Non-Majors. The course focuses on technique, individual and group improvisation, partnering, principles of choreography, the art of making dances, and the skill of motivating feedback. Learning how to view and critique dance in performance, students will attend a selected dance concert to review. Class will include more advanced experiences with body awareness and alignment, physical strength and flexibility, expressive and original movement in the modern dance style to live percussion accompaniment. Students with previous training who haven't taken PRF 301/ Modern Dance I may contact the instructor for permission to enroll in Modern Dance II.

ACT 380 | ADVANCED ACTING AND PERFORMANCE | 4 quarter hours**(Undergraduate)**

This course is a continuation of PRF 290 and will allow students who have completed the introductory course further exploration in performance by applying basic acting skills to the presentation of short plays and scenes from modern dramatic literature.

PRF 290 is a prerequisite for this class.

ACT 500 | VOICE AND DICTION:FOR BROADCAST AND COMMUNICATION | 4 quarter hours**(Graduate)**

This course provides specific and constructive instruction on how students can improve their diction and voice quality. It is especially aimed at students who wish to pursue careers involving some form of voice work - for example, theatre and broadcast journalism students. The course will focus on improving vocal clarity and sound, through group meetings and individual coaching. This course is only open to Journalism majors who have completed the prerequisite of JOUR 330.

Art, Media, and Design (ART)

ART 101 | DIGITAL FOUNDATIONS | 4 quarter hours**(Undergraduate)**

This course will develop creative thinking through a variety of visual explorations in digital media. Photoshop and Illustrator will be introduced and applied to the creation of digital images within the context of contemporary art and design. Offered every Quarter.

ART 104 | CREATING ART | 4 quarter hours**(Undergraduate)**

A studio course that uses visual problems and critical discussions to develop creative and perceptual abilities; relates these abilities to the principles of art in cultural and historic contexts (non-art majors). Offered every quarter.

ART 105 | TWO-DIMENSIONAL FOUNDATIONS | 4 quarter hours**(Undergraduate)**

This course is an introduction to fundamental concepts, terminology, materials, and skills necessary for effective visual communication using two-dimensional media. Through studio projects, students gain practical experience in the planning, production, and evaluation of 2D works of art and design, and gain an understanding of the relationship between form and content. Through lectures, reading, writing, critiques and discussions, students will gain an understanding of the relationship between form and content, and be introduced to the theoretical and historical context specific to two-dimensional art forms. Offered every Quarter.

ART 106 | BEGINNING DRAWING | 4 quarter hours**(Undergraduate)**

Introduction to composition, line and rendering in black and white drawing media. Basic techniques for descriptive and expressive use of drawing media. Offered every Quarter and Summer Session.

ART 107 | THEATRE DRAWING I | 2 quarter hours**(Undergraduate)**

The first in a three quarter sequence of general drawing courses exclusively for students enrolled in the Theater School.

ART 108 | THEATRE DRAWING II | 2 quarter hours**(Undergraduate)**

ART 107 and a student in the Theatre School or consent of instructor is a prerequisite for this course.

ART 109 | THEATRE DRAWING III | 2 quarter hours**(Undergraduate)**

LIBERAL LEARNING SEMINARS (18 credits) - The Liberal Learning Seminars are designed to enable students to develop key liberal learning skills (self-assessment, self-managed learning, critical-creative-systemic thinking, interpersonal relations, communication effectiveness and values-based decision-making) through participation in a series of seminars. Both skills and seminar topics are deemed critical to all professionals?regardless of individualized areas of expertise.

ART 110 | BEGINNING PAINTING | 4 quarter hours**(Undergraduate)**

An introduction to basic organizational and technical concepts in painting. The preparation and proper use of materials is also stressed. Offered every Quarter.

ART 105 (or GD 105 or ANI 105 or ART 106 or instructor consent) is a prerequisite for this class.

ART 113 | THREE DIMENSIONAL FOUNDATIONS | 4 quarter hours**(Undergraduate)**

This course is an introduction to fundamental concepts, terminology, materials, and skills necessary for effective visual communication using three-dimensional media. Through studio projects, students gain practical experience in the planning, production, and evaluation of 3D works of art and design, and gain an understanding of the relationship between form and content. Through lectures, reading, writing, critiques and discussions, students will gain an understanding of the relationship between form and content, and be introduced to the theoretical and historical context specific to three-dimensional art forms. Offered annually.

**ART 114 | FOUR DIMENSIONAL FOUNDATIONS | 4 quarter hours
(Undergraduate)**

This course is an introduction to fundamental concepts, terminology, and methods of creating and interpreting time-based artwork. Time will be the central technical and conceptual component in all work created in this course. "4D" artwork primarily focuses on video or film, sound, interactive artworks, sequential artworks and performance art. Time-based aspects of other media may also be explored.

**ART 115 | BEGINNING SCULPTURE | 4 quarter hours
(Undergraduate)**

An introduction to traditional and contemporary approaches to sculpture with an emphasis on clay modeling, plaster casting and carving. Studio core course. Offered every Quarter.

**ART 117 | INTRODUCTION TO 3D PRINTING | 4 quarter hours
(Undergraduate)**

This course will extend students' knowledge and experience in the practical and conceptual aspects of contemporary studio art practice by introducing desktop 3D printing technology. The class will focus on basic methods and materials, idea development, and the incorporation of interdisciplinary thinking. Students will design simple forms with 3D modeling software, utilize and/or modify existing 3D forms from open online resources, and learn how to operate the printer. The course will provide students the opportunity to explore new tools and skills, while maintaining a focus on the development of meaningful content in their work. Through projects, readings, slideshows, discussions, examples from art history and contemporary culture, students will actively participate in the evolving relationship between art and technology.

ART 101 or consent of instructor is a prerequisite for this class.

**ART 200 | ART & ARTISTS IN CONTEMPORARY CULTURE | 4 quarter hours
(Undergraduate)**

This course will use a mixed lecture/discussion format and thematic approach to consider works on art and design produced in the last 30 years as a means of contextualizing recent works of art. The primary approach to this material will be from the perspective of the artmaker (artist or designer), for whom art theory, criticism and history are crucial tools for developing effective and meaningful work. For that reason, this class will be taught by studio faculty. The class will make extensive use of the city's contemporary museums, galleries, exhibitions and works of public art to emphasize the social, economic and political context from which works of art and design emerge as indicators or signposts of contemporary cultural concerns. Offered every Quarter.

**ART 204 | VISUAL COMMUNICATION | 4 quarter hours
(Undergraduate)**

A multi-media studio course exploring the visual principles of communication. Students learn to examine, deconstruct, and experiment with structures of visual communication through research, process, and divergent thinking methods. Offered Autumn Quarter in even years. ART 101 and (ART 105 or ANI 105 or GD 105) or consent of instructor are prerequisites for this class.

ART 101 and (ART 105 or ANI 105 or GD 105) or consent of instructor are prerequisites for this class.

**ART 205 | COLOR THEORY AND APPLICATION | 4 quarter hours
(Undergraduate)**

Explorations into the use of color in both paint and computer applications. Offered Autumn and Spring Quarters.

ART 105 or ANI 105 or GD 105 or permission of instructor is a prerequisite for this class.

**ART 206 | INTERMEDIATE DRAWING | 4 quarter hours
(Undergraduate)**

Continued development and exploration into the rendering of space with an introduction to a wider range of drawing media and contemporary art applications in drawing. Offered every quarter.

ART 106 or consent of instructor is a prerequisite for this class.

**ART 209 | DRAWING SPECIAL TOPICS | 4 quarter hours
(Undergraduate)**

This course focuses on specialties in drawing not encompassed by the general art curriculum. Offered annually.

ART 206 or ART 218 or permission of instructor is a prerequisite for this class.

**ART 210 | INTERMEDIATE PAINTING I | 4 quarter hours
(Undergraduate)**

A development of skills and concepts beyond the basic level. Problems that stress advanced concepts of theme, color and spatial design are studied. Offered Autumn and Spring Quarters.

ART 110 (or instructor consent) is a prerequisite for this class.

**ART 211 | INTERMEDIATE PAINTING II | 4 quarter hours
(Undergraduate)**

Intermediate Painting II.

ART 210 is a prerequisite for this course.

**ART 212 | WATERCOLOR PAINTING | 4 quarter hours
(Undergraduate)**

The investigation of aqueous medium in thin transparent washes, using a variety of subjects. Spontaneity of medium is stressed in order to capture the nuance of color and light. Offered Winter Quarter in even years.

ART 105 or ART 106 or instructor permission is a prerequisite for this course.

**ART 213 | SPACE DESIGN | 4 quarter hours
(Undergraduate)**

Application of three-dimensional principles to basic issues of space and object design. Introduction to professional presentation techniques.

ART 113 and ART 115 or consent of instructor is a prerequisite for this class.

**ART 214 | CERAMIC SCULPTURE | 4 quarter hours
(Undergraduate)**

An exploration of ceramic techniques for constructing and firing expressive sculptural forms.

ART 113 or consent of instructor is a prerequisite for this class.

**ART 215 | INTERMEDIATE SCULPTURE | 4 quarter hours
(Undergraduate)**

Introduction to basic wood and metal working techniques for producing constructed sculpture. Focuses on modern and contemporary issues in sculpture. Offered Winter Quarter.

ART 115 or consent of instructor is a prerequisite for this class.

**ART 217 | ADVANCED THREE-DIMENSIONAL DESIGN | 4 quarter hours
(Undergraduate)**

Advanced investigation of three dimensional design concepts. Course is a sequel to ART 213.

ART 113, ART 115 and ART 213 or consent of instructor is a prerequisite for this class.

**ART 218 | FIGURE DRAWING | 4 quarter hours
(Undergraduate)**

Learning to draw the human figure through the study of anatomy combined with various drawing concepts and processes. Offered every Quarter and Summer Session.

ART 106 or consent of instructor is a prerequisite for this class.

**ART 219 | BEGINNING FIGURE SCULPTURE | 4 quarter hours
(Undergraduate)**

This course provides opportunities for learning how to represent the dynamic human figure in three dimensions and welcomes students with no experience in figure studies as a first introduction to the figure. All class work will be done from a nude model. Home assignments will consist of figure drawings either from departmental Open Studio Figure Drawing sessions or from assigned figure drawings of great masters. Students will be taught basic technical and eye/hand coordination skills necessary to depict the human figure three dimensionally as well as basic understanding of the proportions of the human figure and ability to implement them. This course will also introduce to students the concept of the human figure as a dynamic three dimensional entity. Students will have an opportunity to work from a nude model for nine weeks, examining human anatomy, body proportions and different gesture poses.

ART 106 or ART 115 or instructor permission is a prerequisite for this course.

**ART 220 | THINKING PHOTOGRAPHY | 4 quarter hours
(Undergraduate)**

This is a course taking a critical and historical look at "the arts of mechanical reproduction" and lens-based image making. As a lecture class, it may include some very basic shooting exercises assigned that could easily be carried out by "snapshot" or disposable cameras - either film or digital. Formerly ART 118. Offered every Quarter.

**ART 223 | LIGHT, COLOR, AND PHOTOGRAPHY | 4 quarter hours
(Undergraduate)**

Principles of image making with lenses, mirrors and photographic processes. Discusses the physical properties of light and color including those used in laser and holography.

MAT 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.

**ART 224 | BEGINNING DIGITAL PHOTOGRAPHY | 4 quarter hours
(Undergraduate)**

This course introduces students to the digital camera (DSLR) and editing platforms as tools for creative and expressive use of the photographic medium. Proper use of camera functions and file management will be learned in tandem with editing strategies using adobe software. Lighting strategies and inkjet printing will be introduced in a fully equipped Mac lab. This course emphasizes the concepts, theory, and history of the photographic medium within the context of contemporary art. Students will produce their own photographs by digital means and engage in discussion and critical analysis of images and image aesthetics. Suggested prior course: ART 101: Digital Foundations. Offered every Quarter and Summer Session.

**ART 225 | BEGINNING PHOTOGRAPHY | 4 quarter hours
(Undergraduate)**

This course is an introduction to the aesthetics, processes, and theory of black & white film photography. Techniques of chemical-based film development, darkroom printing, and image editing will be introduced. Strategies of exposure, framing and lighting will be explored as means for developing a meaningful photographic language. Emphasis will be given to understanding and using the camera as a tool for personal inquiry and experimentation. Additionally, this course will focus on the role and impact of the photographic image in both historical and contemporary contexts. Suggested prior course: ART 105: 2D Foundations. Offered every Quarter.

**ART 226 | VIDEO ART | 4 quarter hours
(Undergraduate)**

ART226 Video Art is an introductory level course designed to familiarize students with the uses of video in a variety of artistic practices. These encompass non-narrative treatments in multiple forms that may include single and multi-use of monitors and projection, installation, and performance. Students will learn to use video editing software in this class. The department provides video and audio equipment. Offered Winter Quarter annually.

**ART 227 | DIGITAL ART | 4 quarter hours
(Undergraduate)**

Students will develop dexterity and finesse for digital imaging within the context of contemporary art. The primary focus will be on analytic problem solving and developing students' abilities to create complex images, illustrations, and icons that provoke sustained cognition and interpretation. Coursework will utilize software, digital tools, and hardware to support and enhance the student's artistic vision. Offered annually. ART 101 or consent of instructor is a prerequisite for this class.

ART 101 or consent of instructor is a prerequisite for this class.

**ART 228 | COMPUTER APPLICATIONS FOR DESIGN II | 4 quarter hours
(Undergraduate)**

This course will introduce students to professional layout techniques including page templates, formatting and preparing files per industry-specific guidelines for spot and process color offset printing. Students will design complex, multi-page documents utilizing intermediary layout, typographic and illustration skills. A broad range of conceptual layout principles and additional procedural preparations and "pre-flighting" expectations will be examined. Adobe InDesign will be the layout software utilized. ART 260 is highly recommended.

ART 101, ART 105, ART 227, and ART 264 or consent of instructor is a prerequisite for this class.

**ART 229 | BEGINNING PRINTMAKING | 4 quarter hours
(Undergraduate)**

Explorations in the artistic possibilities of a variety of printmaking techniques. Techniques may include forms of relief print, intaglio, monoprint, and other printmaking processes used in the production of limited edition prints. Offered annually.

ART 105 (or GD 105 or ANI 105 or ART 106 or instructor consent) is a prerequisite for this class.

**ART 230 | ISSUES IN ENVIRONMENTAL DESIGN | 4 quarter hours
(Undergraduate)**

Issues in Environmental Design is an introductory course that will examine concepts, theories and practices across multiple scales of design, including graphic, product, architecture, landscape architecture and urban design. We will explore the history and practice of eco-design as well as sustainable design in modern cultures. The environmental impact of design will be examined in relation to everyday products, as well as the consumer culture that feeds their mass production. Examples of excellence will be explored through the examination of case studies; local demonstrations will illustrate the theme of restorative design; and artists' projects that address environmental issues will also be studied. The underlying theme is the connection between culture and nature, and how we must reduce our negative impact on systems that support all life while building positive systems that support all life.

**ART 231 | SCREEN PRINTING | 4 quarter hours
(Undergraduate)**

A beginning level course designed to teach students the essential equipment, materials, and processes, for screen printing artworks. Printing methods utilize hand-cut stencils, screen filler, and photo-emulsion techniques. Offered every Quarter.

ART 101 (or ART 105 or GD 105 or ANI 105 or ART 106 or DES 141 or instructor consent) is a prerequisite for this class.

**ART 245 | PAINTING: MIXOLOGY | 4 quarter hours
(Undergraduate)**

This is an intermediate course utilizing varied 2D media and processes including digital imaging. This will allow students to explore contemporary means and sensibilities through media that reflect a broader range of visual, material and conceptual interests. This will give students a larger repertoire to choose from when making images. Building on the knowledge of oil painting materials and techniques that students gain in the ART 110 Beginning Painting course, ART 245 will also utilize water-based painting materials such as watercolor, gouache, acrylic polymers and gel media. Students will explore techniques such as collage, frottage, stamping, stenciling, relief printing, found image transfer and digital print output in combination with painting and drawing media. Offered every other year.

ART 110 (or instructor consent) is a prerequisite for this class.

**ART 260 | INTERMEDIA STUDIO | 4 quarter hours
(Undergraduate)**

This course introduces the practices of Intermedia in a contemporary and historical context. Intermedia is often recognized as work that exists in the gaps between media, genres, and disciplines. Students will produce works that take on hybridized forms, resist classification, and cross boundaries of recognized media and disciplinary distinctions. Students will also explore alternative forms of authorship, processes, and output that may not be currently recognized as art forms. Offered every other year. ART 101 or consent of the instructor is a prerequisite for this class.

ART 101 or consent of instructor is a prerequisite for this class.

**ART 264 | TEXT IN THE VISUAL ARTS | 4 quarter hours
(Undergraduate)**

Students are introduced to the creation of text-based art. This course covers the history and contemporary practice of artists and designers that create works exclusively using text. Assignments emphasize formal and conceptually driven experimentation with typographic form using the hand, hardware, and software. In addition, students are introduced to the fundamentals of typography, layout, hierarchy, and the basic characteristics of letterforms and type families. Offered every other year. ART 101 or consent of the instructor is a prerequisite for this class.

ART 101 or consent of instructor is a prerequisite for this class.

**ART 289 | EXPERIMENTAL FILM AND VIDEO | 4 quarter hours
(Undergraduate)**

This course is designed to investigate non-fiction and avant-garde film, video theory, and studio practices. Class will be devoted to the viewing and study of international film and video work from Europe, Asia, and the US. Assigned readings, discussions and debate about the history and aesthetic of film and video art are also emphasized. Students will learn to use DSLRs and Adobe software. Hands-on skills will be developed. DSLRs, sound recorders, tripods and light kits will be provided by the art department. Offered Winter Quarter in even years.

**ART 290 | ART WORKSHOP SELECTED TOPICS | 4 quarter hours
(Undergraduate)**

A variety of specific topics are explored that are not encompassed by the general art curriculum. May be repeated for up to 8 credits with different topics.

**ART 291 | MURAL PAINTING | 4 quarter hours
(Undergraduate)**

This class has a central focus on the art of mural making. Students will have hands on experience as they design and execute a mural at a predetermined site. The mural will be executed as a small scale illustration board piece in the classroom during the last part of the quarter and installed at a real venue. The students will also learn the strategy and design factors of planning a mural piece of their own. The class functions as a studio class as it meets for 6 hours weekly. A minimum of 25 service hours is required. Drawing or painting experience at the collegiate level is highly recommended for this class. This class is certified for cbSL and JYEL credit. Offered every other year, TBA.

**ART 292 | COMMUNITY VIDEO PRODUCTION | 4 quarter hours
(Undergraduate)**

The heavy emphasis on experiential learning of this course will combine classroom instruction on documentary video production with student fieldwork. Over the course of the term, students will plan, produce and substantially complete a videotape project for a community client. Through the production of a video project specifically designed for a community organization, students will be able to practice production techniques that they learn in the classroom while gaining insight about how video can bring attention to community needs and thus make an impact on communities (outside the classroom). Our goal for this course is to bring students to the point of understanding and mastering the technical elements of video production and understanding these processes within an experiential and service learning context, such that through working on documentary projects, students will come to a point of understanding the history and contemporary needs of a particular community group and how the creation of a finished video can address some of those needs. Students will work to produce projects that are thoughtful, important and technically polished. This class is certified for cbSL and JYEL credit.

**ART 293 | CHINA IN TRANSITION: SOCIAL PERSPECTIVES IN FILM & PHOTOGRAPHY IN CONTEMPORARY CHINA | 4 quarter hours
(Undergraduate)**

The course content will engage a wide range of issues such as the tension and history of the women's rights movement, the reconstruction of values in gender and sexuality, and the ever-changing urban infrastructures in the economically driven culture. Film and photography are the rising new media for documenting and responding to social issues by scholars, filmmakers and artists expressing the Chinese experience. The methodology of this class will deconstruct and decode three common cultural stereotypes: American representations of China, Chinese official representations of itself, and universal representations of one's experiences as a traveler. Through dialogue and cross-reading materials, we compare films, photography, sites/field trips, interviews and journalistic materials to search for the reality and social issues beneath the visual representation. This course emphasizes the aesthetic, the theory and the hands-on experience of using video and photography during the trip (including a brief lecture on composition, framing and digital photography and/or possible video shooting techniques). We will share finished assignments in group critiques and reading discussions - in both cases, they will be the primary means of evaluation in class. In a critique, students will present their work for response and analysis in relation to the given assignment through a class discussion. This dialogue is intended to be evaluative, to provide constructive criticism and to develop critical thinking skills.

ART 294 | GENIUS LOCI: ROMAN ARCHETYPES OF PLACE IN VISUAL CULTURE | 4 quarter hours**(Undergraduate)**

This is a semester long study trip to Rome that offers a thematic studio/art history experience concerned with the role that Rome has played in shaping our understanding of place as expressed in visual culture. This course will include such topics as: the influence of Roman approaches to urban organization and development; the influence of national academies in Rome on Western developments in art and architecture, Piranesi and the articulation of utopic and dystopic models derived from Roman culture; the spatial collage of Roman architectural enveloping and fragmentation; illusion and perspective as perceptual puzzle and ideological signifier; and Pasquino and the expression of vox populi in public space. The unique circumstance of urban Rome, where 2500 years of building activity are embedded in the fabric of contemporary life, offers an opportunity to involve students in an interdisciplinary examination of how human needs and desires shape our built environment and are shaped by it.

ART 302 | TOPICS IN THE HISTORY OF CINEMA | 4 quarter hours**(Undergraduate)**

Courses on the history of cinema that explore the form, content and historical significance of the media. Taught in the College of Communication with cross-list in Art.

ART 304 | THE PHOTOGRAPHIC BOOK | 4 quarter hours**(Undergraduate)**

Since the inception of the photographic process in the early 19th century, one of the primary ways photographers have disseminated their work is through the book form. In this course we will consider the history, examples and practice of the photobook. Students will be expected to photograph a major subject over the course of the term, edit and sequence your photographs and layout and produce a finished, bound photobook through an online publisher. In addition to the history of the photobook, processes of organization and editing will be explored through basic shooting and sequencing exercises. Both film and digital cameras may be used for the course. Offered Winter Quarter in odd years.

ART 224 or ART 225 or permission of instructor is a prerequisite for this class.

ART 306 | ADVANCED DRAWING | 4 quarter hours**(Undergraduate)**

An advanced course in historical and contemporary approaches to issues and techniques of drawing. Offered Winter Quarter.

ART 206 or ART 218 or instructor consent is a prerequisite for this class.

ART 309 | DIGITAL SCULPTURE | 4 quarter hours**(Undergraduate)**

The methods and materials of desktop 3D printing technology will be integrated with traditional and contemporary sculpture, such as woodworking, casting, assemblage, and installation. This "hybrid" approach will provide students the opportunity to develop and explore new tools and skills, while maintaining a focus on the development of meaningful content in their artwork.

ART 113 or ART 115 or consent of instructor is a prerequisite for this class

ART 310 | ADVANCED PAINTING I | 4 quarter hours**(Undergraduate)**

Development of advanced skills in painting with work in a more independent approach to concepts and techniques. Offered Autumn and Spring Quarters.

ART 210 (or ART 245 or instructor consent) is a prerequisite for this class.

ART 311 | ADVANCED PAINTING II | 4 quarter hours**(Undergraduate)**

Advanced Painting II. Offered annually.

ART 310 (or consent of instructor) is a prerequisite for this class.

ART 312 | FIGURE PAINTING | 4 quarter hours**(Undergraduate)**

An introduction to the study of the painted figure in environmental settings. Light, color and spatial illusion are stressed.

ART 105 and ART 106 or consent of instructor is a prerequisite for this class.

ART 313 | PERFORMANCE/INSTALLATION ART | 4 quarter hours**(Undergraduate)**

In this upper level course students will utilize their previously acquired skills and background from their respective areas of specialty (painting, drawing, sculpture, photo, video, sound, web and computer application etc) in a new conceptual and spatial context by creating specific environments (installation) and using their bodies in those environments (performance). These hybrid art projects will be presented in a real space and live performance format. Additionally using video and photo documentation as sources, students will create another project in digital format. Students will have the option to concentrate on only one aspect of the course; either installation or performance using either digital or non digital (or combined) formats for their projects.

One 200-level studio course or instructor permission is a prerequisite for this course.

ART 315 | ADVANCED SCULPTURE | 4 quarter hours**(Undergraduate)**

Exploration of advanced sculptural themes and techniques determined by the student in consultation with the instructor. Offered in the Spring Quarter.

ART 215 or consent of instructor is a prerequisite for this class.

ART 316 | ADVANCED SCULPTURE II | 4 quarter hours**(Undergraduate)**

Sequel course to ART 315 to allow the completion of extensive projects.

ART 315 or consent or instructor is a prerequisite for this class.

ART 317 | ADVANCED FIGURE SCULPTURE | 4 quarter hours**(Undergraduate)**

This course will provide an expansion and enrichment of skills in modeling the human figure for students with a basic background in the figure. All class work will be done from a nude model. Home assignments will consist of figure drawings either from departmental Open Studio Figure Drawing sessions or from assigned figure drawings of great masters. Students in this course will further develop their technical and eye/hand coordination skills necessary to depict the human figure three dimensionally in a more professional manner as well as full understanding of the proportions of the human figure and the ability to implement them freely in a dynamic human figure. Course will also point towards the potential possibility of the exploration, conceptualization and interpretation of the human figure within the contemporary art context or other applications related to the students' interests.

ART 215 or ART 218 or ART 219 or instructor permission is a prerequisite for this course.

ART 318 | ADVANCED FIGURE DRAWING | 4 quarter hours**(Undergraduate)**

As a sequel to ART 218 this course provides a more in depth study of figure drawing with emphasis on the refinement of drawing skills, the exploration of different drawing materials and techniques while considering the expressive value of figurative work.

ART 218 (or consent of instructor) is a prerequisite for this course.

ART 321 | INTERMEDIATE DIGITAL PHOTOGRAPHY | 4 quarter hours (Undergraduate)

This course builds on ART 224, further emphasizing the aesthetic and conceptual possibilities of digital photography. Through project-based experimentation, students deepen their critical engagement with photographic tools while producing conceptually driven bodies of work. Refined use of the DSLR camera and editing tools takes place through hands-on image production and process-oriented critique. Additionally, this course explores historically established uses of the photographic medium and their relation in the digital context. Offered Winter Quarter annually.

ART 224 or instructor permission is a prerequisite for this course.

ART 323 | INTERMEDIATE PHOTOGRAPHY | 4 quarter hours (Undergraduate)

This course continues the aesthetic development and processes of film-based, black & white photography through a refinement of techniques and conceptual practices. Large and medium-format cameras are introduced along with fiber-based printing, additional lighting and exposure strategies, and darkroom print finishing techniques. Emphasis is on developing and enhancing critical approaches to subject matter through project-based, hands-on experimentation and critical discussion.

ART 225 or consent of instructor is a prerequisite for this class.

ART 324 | INTERMEDIATE PRINTMAKING | 4 quarter hours (Undergraduate)

An intermediate course designed for students who have had previous technical experience with various printmaking media. This course enables students to investigate personal concerns and objectives through an ambitious and concentrated body of work. An emphasis is placed on the development of personal imagery and aesthetic goals. Offered annually.

ART 229 or instructor permission is a prerequisite for this course.

ART 325 | ADVANCED PHOTOGRAPHY PROJECTS | 4 quarter hours (Undergraduate)

Advanced Photography Projects is a course emphasizing individual artistic practice through project-driven approaches to photography. Students will generate conceptually challenging and visually refined photographs using analog and/or digital means. Coursework incorporates student presentations of their artwork, critical discussion and analysis, and the creation of a refined, edited and complete body of work or portfolio. Additional forms such as the photographic book, large-scale printing, and hybrid film/digital approaches may be explored. Offered Spring Quarter annually.

Two photography courses, at least one of which at the 300 level or instructor permission are prerequisites for this course.

ART 326 | SPECIAL TOPICS IN EXPERIMENTAL VIDEO ART | 4 quarter hours (Undergraduate)

Advanced explorations of video as a form of artistic expression. Each course will have a unique focus, such as installation art, video and performance, experimental narrative or experimental documentary. This course may be repeated for credit assuming a change in topic. HD Digital cameras will be provided by the art department. Hands-on skills will be developed and projects will be edited in Final Cut Express.

ART 226 or instructor permission is a prerequisite for this course.

ART 327 | ADVANCED COMPUTER GRAPHICS | 4 quarter hours (Undergraduate)

Builds on skills learned in ART 227. Explores specific areas of graphics and design; exposes students to advanced software including Director 5, Painter 4, Illustrator 6.0, Morph 2.5, and Claris Home Page.

ART 227 is a prerequisite for this class.

ART 328 | DOCUMENTARY PHOTOGRAPHY | 4 quarter hours (Undergraduate)

Exploration of photographic concepts and techniques used in artistic, journalistic and sociological documentation.

ART 225 or consent of instructor is a prerequisite for this class.

ART 329 | ADVANCED DIGITAL PHOTOGRAPHY | 4 quarter hours (Undergraduate)

Advanced Digital Photography focuses on artistic practice through inventive use of the photographic medium and refined engagement with digital tools. Students will focus on self-directed, in depth projects culminating in a high quality portfolio. Additionally, students will be engaging in large-scale inkjet printing and advanced digital workflow. This course also encourages experimentation with unconventional approaches to the photographic object. Students in this course should be prepared to work with their chosen topic independently, create thesis projects for presentations, and participate in group discussions and critiques. Offered Fall Quarter annually.

ART 224 and ART 321

ART 330 | INTERMEDIATE PRINTMAKING: INTAGLIO | 4 quarter hours (Undergraduate)

Exploring various methods and techniques in intaglio printing with an emphasis on both traditional and modern approaches. Techniques may include forms of etching, engraving, drypoint, mezzotint, or aquatint.

ART 229 or instructor permission is a prerequisite for this course.

ART 331 | INTERMEDIATE PRINTMAKING: SCREEN PRINTING | 4 quarter hours (Undergraduate)

An intermediate level screen printing course enabling students to take a more independent approach to the concepts, themes, techniques, and aesthetic of their work. Emphasis will be on conceptual development of a series of works as well as refining skills and techniques. Offered every Quarter.

ART 231 or (instructor consent) is a prerequisite for this class.

ART 332 | TOPICS IN PHOTOGRAPHIC PRACTICE | 4-12 quarter hours (Undergraduate)

Focused investigations of specific aesthetic, technical or conceptual issues in the practice of photography.

ART 224 or ART 225 or consent of instructor is a prerequisite for this class.

ART 333 | COMPUTER APPLICATIONS FOR DESIGN: PRE-PRESS | 4 quarter hours (Undergraduate)

Builds on skills learned in ART 228. Explores specific areas of graphics and design focusing on pre-press, and exposes students to advanced software. It is highly recommended students take ART 358 before taking this class.

ART 227, ART 228, ART 260, and ART 264 or consent of instructor is a prerequisite for this class.

ART 334 | PORTFOLIO | 4 quarter hours (Undergraduate)

In this course students review previous course projects and prepare a final portfolio of their own artistic identity and presentation in preparation for artistic practice, graduate study, and related career opportunities. Visiting professionals will present their work to the class and share their experiences in the field. Students will also learn presentational techniques and methods for career development.

ART 101 and (ART 105 or ANI 105 or GD 105) or consent of instructor are prerequisites for this class.

**ART 338 | FIGURE DRAWING IN CONTEXT | 4 quarter hours
(Undergraduate)**

A studio course ending the ART 218 Figure Drawing and ART 318 Advanced Figure Drawing sequence to study the figure in a contemporary context emphasizing independent research and ideation of different topics related to the human figure.

ART 318 (or consent of instructor) is a prerequisite for this course.

**ART 345 | ADVANCED PAINTING: MIXOLOGY | 4 quarter hours
(Undergraduate)**

This course is the sequel to ART 245 Painting: Mixology and as such is a content driven course with emphasis on understanding medium and material as symbol and idea. The course will offer students a more in-depth understanding of materials and techniques studied in ART 245 as well as prepare them for more conceptually advanced work in painting. Offered every other year.

ART 210 (or ART 245 or instructor consent) is a prerequisite for this class.

**ART 348 | GRAPHIC ART IN THE PUBLIC REALM | 4 quarter hours
(Undergraduate)**

This course enables students to research varied communities, complex information systems, processes, tools, and materials involved in visual communications. Students establish working relationships as individuals and in teams that utilize their skills to effectively communicate to an audience beyond the classroom. Objectives of the course include: creating awareness of current local community social issues, supporting students' development of independent and collaborative work habits, examining issues of social responsibility of the artist, integrating research-based learning and production skills, and assessing the social impact of a completed project. Offered every other year. ART 101 and (ART 105 or ANI 105 or GD 105) or consent of the instructor are prerequisites for this class.

ART 101 and (ART 105 or ANI 105 or GD 105) or consent of instructor are prerequisites for this class.

**ART 358 | GRAPHIC ART | 4 quarter hours
(Undergraduate)**

This course explores word and image within the realm of visual art, including analysis of meaning and structure, layout and composition, and format and production. Students are introduced to theory, history and analysis of graphic art through studio projects, readings, writing and critiques. Offered every other year.

ART 101 and (ART 105 or ANI 105 or GD 105) or consent of instructor are prerequisites for this class.

**ART 359 | PRINT MEDIA | 4 quarter hours
(Undergraduate)**

Students develop a sensitivity and nuanced understanding of printed matter through hands-on methods of alternative research and experimental studio assignments. Students are introduced to concepts and the experience of viewing and producing multi-page documents including artists' books, magazines, and zines as well as posters and other forms of printed matter. Emphasis is placed on expanding and creating new ways to understand how printed matter can perform. Offered Spring Quarter in odd years. ART 101 and (ART 105 or ANI 105 or GD 105) or consent of the instructor are prerequisites for this class.

ART 101 and (ART 105 or ANI 105 or GD 105) or consent of instructor are prerequisites for this class.

**ART 360 | ILLUSTRATION | 4 quarter hours
(Undergraduate)**

Investigation of black-and-white and color media and introduction to the techniques, imagery, and functions of illustration in graphic design. Offered every other year.

ART 106 and (ART 101 or ART 105 or ANI 105 or GD 105) or instructor permission are prerequisites for this course.

**ART 361 | PACKAGE DESIGN | 4 quarter hours
(Undergraduate)**

Focuses on current design trends with projects utilizing properties of materials such as paper, plastics, and glass.

ART 101, ART 105, ART 227, ART 260, ART 264 and ART 358 are prerequisites for this class.

**ART 363 | ADVERTISING DESIGN | 4 quarter hours
(Undergraduate)**

Explores the function and practice of design in advertising in both social and art historical contexts. It is highly recommended students take ART 358 before taking this class.

ART 227, ART 260 and ART 264 or consent of instructor is a prerequisite for this class.

**ART 364 | COMPUTER APPLICATIONS IN ART | 4 quarter hours
(Undergraduate)**

Use of Photoshop and Illustrator in the design and execution of paintings, drawings, and prints.

ART 101, ART 105, ART 106 and ART 110 or consent of instructor is a prerequisite for this class.

**ART 369 | TYPOGRAPHY II | 4 quarter hours
(Undergraduate)**

Advanced investigation into typography and text for verbal and visual expression.

ART 227, ART 260, ART 264 and ART 358 or consent of instructor is a prerequisite for this class.

**ART 376 | DRAWING PROJECTS | 4 quarter hours
(Undergraduate)**

Students will explore and identify drawing topics of personal interest from an interdisciplinary perspective based on previous and current ideas, course studies, and major and minor degree programs. Individual student interests and ideas will inform the development of a thematic approach to drawing. The selected individual themes will then be researched, explored, and applied to the creation of a completed body of drawing works or as a series of final drawings, in the format of a visual mini thesis drawing project. ART 101 or ART 224 or GD 151 or knowledge of Photoshop and/or experience with a digital SLR camera is highly recommended. Offered in the Winter Quarter.

Completion of two of the following courses is a prerequisite for this class: ART 206, ART 218, ART 306, ART 318, ART 338 or ART 229 or instructor permission.

**ART 377 | PHOTOJOURNALISM | 4 quarter hours
(Undergraduate)**

Introduction to the theoretical and technical foundations of photography with exploration of the medium's aesthetic, documentary and narrative purposes within the context of photojournalism. Cross-listed as JOUR 276.

ART 382 | STUDENTS TEACHING ART IN THE ELEMENTARY CLASSROOM | 4 quarter hours (Undergraduate)

This course brings DePaul students into a Chicago grade school to incorporate art into the curriculum. It is a hybrid course that involves some Independent Study in which the students organize their schedule in conjunction with a grade school classroom teacher, and some required classes that they must attend on campus at a prescribed time and day. Students are off campus for approximately 10 class sessions. At the start of the quarter, students are given a theoretical background in community-based art education, ethical issues, and social engagement. Working in teams, students will observe in the classrooms to gain a sense of the grade school community and the existing curriculum. DePaul students will then develop and teach a specific lesson plan in collaboration with the classroom teacher. The objective will be to produce a creative learning experience that co-mingles art and a core subject such as science or social studies. Teaching this art integrated lesson will be an essential aspect of the learning experience. Students will meet back at the DePaul classroom at designated intervals for information, reflection, and the analysis of their experience and their impact on the grade school community, in relation to the theoretical examples from the beginning of the course. These reflections take varied forms: discussion, role-playing exercises, presentations, and papers. Approved for JYEL and cbSL credit. Formerly ART 283.

ART 383 | SERVICE LEARNING IN THE ARTS INTERNSHIP | 4 quarter hours (Undergraduate)

Each student will be matched with a not-for-profit art-related organization, based on the student's interests and abilities in the visual arts as well as the organization's needs, which will provide the student with a practical and career-centered experience. An interview with the instructor at least one week prior to the beginning of the quarter is required (email the instructor). This class can be taken for Experiential Learning credit. Offered annually, TBA.

ART 384 | ART-RELATED INTERNSHIPS WITH FOR-PROFIT ORGANIZATIONS | 4 quarter hours (Undergraduate)

This is a four credit hour supervision class for any Art major or minor who has arranged for an internship with a For-Profit organization to do art-related activity. The class would be viewed as Independent Study, and the students do many of the same activities as in ART 383. This class can be taken for JYEL credit.

ART 385 | WEB ART & DESIGN I | 4 quarter hours (Undergraduate)

This course is an introduction to web-based art (or net art). Students learn the basic skills and conceptual framework necessary to develop multimedia works of art that can only exist online. Offered Winter Quarter in odd years. ART 101 and (ART 105 or ANI 105 or GD 105) or consent of instructor are prerequisites for this class.

ART 114 or ART 224 or consent of instructor is a prerequisite for this class.

ART 386 | WEB ART & DESIGN II | 4 quarter hours (Undergraduate)

Students will analyze and produce web art projects with an emphasis on the psychological, social and cultural framework of a web based environment. Students will develop focused and independent research methods and technical skills specific to their web art practice that will expand on the fundamental principals of user interaction and an integration of image, time, motion and sound.

ART 227, ART 228, ART 264 and ART 385 or consent of instructor is a prerequisite for this class.

ART 387 | MULTIMEDIA DESIGN | 4 quarter hours (Undergraduate)

The course introduces students to a grounding in the design and execution of intensive multimedia project using Macromedia Director. Students will learn to combine text, images, and sound within a 4D environment.

ART 101, ART 105, ART 227, ART 228 and ART 264 are prerequisites for this class.

ART 390 | ADVANCED STUDIO PROBLEMS | 4 quarter hours (Undergraduate)

Intensive studio experience for students who have completed the requirements in their media specialty.

Junior or Senior standing and status as an Art, Media and Design major or Art minor or consent of instructor is a prerequisite for this class.

ART 392 | SENIOR STUDIO SEMINAR | 4 quarter hours (Undergraduate)

An intensive capstone seminar of contemporary art theory and studio practice in the student's area of concentration. Required for graduation in Studio Art and in Media Arts.

Senior status and major in the Art School.

ART 393 | SENIOR PROJECT STUDIO | 4 quarter hours (Undergraduate)

In this capstone course students work on advanced self-directed project(s) with an emphasis on developing a cohesive research methodology, artist statement and refined finalized works ready for presentation. Juniors may attend with instructor's consent. ART 101 or ART 224 or GD 151 or knowledge of Photoshop and/or experience with a digital SLR camera is highly recommended.

Senior standing and status as an Art, Media and Design major or Art minor are prerequisites for this course..

ART 394 | PROFESSIONAL PRACTICE IN THE STUDIO | 4 quarter hours (Undergraduate)

An intensive art seminar introducing students to the professional, business, and legal skills needed to manage a career in Studio Art, Graphic Art or Photography and Media Art.

Senior standing and status as an Art, Media and Design major or minor are prerequisites for this class. Juniors may attend with instructor's consent.

ART 395 | SPECIAL TOPICS IN ART | 4-12 quarter hours (Undergraduate)

Focuses on special topics and techniques not encompassed by the general art curriculum.

ART 396 | INTERNSHIP | 1-12 quarter hours (Undergraduate)

Arranges fieldwork or employment in the student's field of study. Utilizes the extensive professional studios and art institutions of Chicago and other international art facilities as well. Up to 12 hours of credit.

Junior or Senior standing and status as an Art, Media and Design major or Art minor or consent of instructor is a prerequisite for this class.

**ART 399 | INDEPENDENT STUDY | 1-4.5 quarter hours
(Undergraduate)**

Independent work in the student's field of study under faculty supervision. Available only to upper-level students with demonstrated capacity for self-motivated study.

**ART 405 | ADVANCED ART STUDIO | 4-8 quarter hours
(Graduate)**

Advanced projects in Studio Art, Media Art, and Graphic Art.

ART 105 or consent of instructor is a prerequisite for this class.

**ART 406 | GRADUATE DRAWING | 4 quarter hours
(Graduate)**

An advanced and rigorous approach to historical and contemporary issues, applications and techniques of drawing.

ART 306 (or equivalent) and ART 318 (or equivalent) or portfolio or instructor consent are prerequisites for this course.

**ART 418 | GRADUATE FIGURE DRAWING | 4 quarter hours
(Graduate)**

Encourages the application of perceptual and media skills gained in figure drawing to more advanced and ambitious works on paper.

ART 306 (or equivalent) and ART 318 (or equivalent) or portfolio or instructor consent are prerequisites for this course.

**ART 427 | DIGITAL ART | 4 quarter hours
(Graduate)**

Digital art applications in Studio Art and Media Arts. Offered Spring Quarter in even years.

ART 101 and ART 105 or consent of instructor is a prerequisite for this class.

**ART 460 | WEB ART AND DESIGN | 4 quarter hours
(Graduate)**

Web Art and Design study and explorations.

ART 101 and ART 105 or consent of instructor is a prerequisite for this class.

**ART 461 | PHOTOGRAPHY AND MEDIA ART | 4 quarter hours
(Graduate)**

Selected Topics in Art and Photography.

**ART 476 | DRAWING PROJECTS (GRADUATE) | 4 quarter hours
(Graduate)**

Students will explore and identify drawing topics of personal interest from an interdisciplinary perspective based on previous and current ideas, course studies, and undergraduate degree programs. Individual student interests and ideas will inform the development of a thematic approach to drawing. The selected individual themes will then be researched, explored, and applied to the creation of a completed body of drawing works or as a series of final drawings, in the format of a visual mini thesis drawing project.

ART 406 (or equivalent) and ART 418 (or equivalent) or portfolio review or instructor consent are prerequisites for this course.

**ART 489 | VIDEO ART | 4 quarter hours
(Graduate)**

An advanced level course designed to introduce students to the uses of video within a variety of artistic practices including installation, projection and performance as well as linear, single-channel non-narrative, non-documentary pieces. This course will take a "theory/practice" approach. Instruction will combine a study of the historical uses of video in the art world as well as the theoretical and critical perspectives on the practices of a wide range of artists who use video. Hands-on application of these concepts will be applied to the students' own work, culminating in a finished project by the end of the term which will be edited in the computer applications Dreamweaver, Flash and Fireworks. Basic literacy with Macintosh platform is required.

**ART 490 | ADVANCED TOPICS IN ART, MEDIA AND DESIGN | 1-8 quarter hours
(Graduate)**

Intensive studio art experience in the student's media of choice. May be taken for variable credit.

Arts and Ideas (AI)

**AI 147 | ETHICS: HOW GOOD PEOPLE MAKE TOUGH CHOICES | 2 quarter hours
(Undergraduate)**

Through life's many lessons, we have learned how to make a decision between what is the right thing to do and what is simply wrong. We can differentiate between good and evil, truth and lies, etc. However, most of our dilemmas do not stem from deciding the correct path, when we are faced with right and wrong decisions. What most often puts us into a quandary is deciding between what is right and what is right. In other words when good people are faced with tough choices, on what basis do they make their decisions? In an era of perceived ethical incertitude and moral skepticism, students will examine how decisions are made based on one of many ethical systems. Students will learn about various ethical systems, and ethicists, such as utilitarianism, deontology, Kant, Aristotle, and Gillian, just to name a few. By the end of the course students should be able to apply their knowledge of moral, ethical and social issues, and have a better understanding of how the tough decisions they make could impact others. (2-4 quarter hours)

**AI 152 | EXPLORING THE ART MUSEUM | 2 quarter hours
(Undergraduate)**

Museums have been a respected and trusted measurement of artistic accomplishment. In this course, the student will examine the museum's role as collector, conservator and educator. The student will investigate the traditional role of the art museum, its collection, practices and programs as well as its efforts to integrate new media into its collection. The course also investigates repatriation, which is the ownership of ancient and cultural heritage and other issues that affect the museum such as censorship and funding. Finally it will look at how we value art as a commercial commodity. (2-4 quarter hours)

**AI 153 | THE ART OF SPEECHMAKING | 2 quarter hours
(Undergraduate)**

In this class, students will use tools based in the imagination, principles of design, and standard dramatic practice to create a unique, personal experience for an audience. Speech, whether we call it dramatic or declamatory, has the potential to move the masses. In this course, you will develop a personal approach and construct effective presentations that harness the power of their voice and body. (2 credit hours)

**AI 155 | ANALYZING LEADERSHIP | 2 quarter hours
(Undergraduate)**

This course provides a framework from which to identify and analyze leadership. Leadership occurs in all aspects of life, including: business, politics, sports, society, religion, family, education, and culture. But what is leadership? The Merriam-Webster on-line dictionary defines leadership as "the act or an instance of leading," which provides us with little insight. On further investigation, however, the dictionary defines "lead" as [guide] on a way especially by going in advance. Where there is a leader, then, someone or something must follow. This course first explores the interrelationship between a leader and his or her followers and looks at the effect they have on each other. "Good" leadership traits (i.e., effective) and "bad" leadership traits (i.e., ineffective) are then studied from the perspectives of the leaders, the followers, and outsiders. Finally, this course takes a look at leadership from an international perspective. (2-4 quarter hours)

**AI 157 | ENGLAND: CATHEDRALS, A PILGRIMAGE | 2-4 quarter hours
(Undergraduate)**

The inspiration and faith which combined to produce the magnificent cathedrals in England are worthy subjects of study for students of art, history, architecture and religion. This Spring Break study abroad course brings students to some of the most important cathedrals in the world to provide opportunities for such important study. On this program, participants will gain valuable understandings of religion, art, and culture as they simultaneously engage with present day British culture and attempt to unravel its rich and complex past. SNL Students must register for three to four competencies between the two quarters. For more information, please visit the study abroad website or contact the instructor. (2-6 quarter hours)

**AI 160 | IT'S ONLY ROCK AND ROLL: MAKING MUSIC THE OLD FASHIONED WAY | 2 quarter hours
(Undergraduate)**

For many, music is an integral part of everyday life. It is also deeply ingrained in most cultures. Music is used by individuals, businesses and societies to entertain, soothe, excite, and arouse. Music is basically a series or combination of pleasing sounds but how is music made? How do we know what is pleasing and what is not? The answers to these questions and others demonstrate that music is also a field where science and art meet. In this class, we will explore how sound is physically created and how specific sounds have been turned into music over the centuries. Through experimentation, we will examine the physical and mathematical properties of sound and musical instruments. We will also create simple musical instruments and share the experience of creating musical pieces. No musical experience is needed to take this class. (2-4 quarter hours)

**AI 167 | DIGITAL PHOTOGRAPHY | 2 quarter hours
(Undergraduate)**

Students learn in this course to take artistic digital photos. They will analyze photos they have taken prior to the course and discuss if they fulfill criteria to be seen as art. Several theories of artistic expression will be discussed. Rules of composition, light, exposure, colors, etc. will be reflected upon. In a second step the students will develop the competence to alter their digital photos with a program like "Photoshop Elements". They will be able to change the expression of their photos and combine different shots, creating their personal piece of art. As a final product, students will create a portfolio with about 5 photos including detailed descriptions of their work. (2-4 quarter hours)

**AI 170 | CREATIVITY AND ENTREPRENEURSHIP | 2 quarter hours
(Undergraduate)**

IPads. Smart Phones. The automobile. These inventions, once unknown and now taken for granted, required years of imagining, experimentation and innovative thinking. While we value the end product, we are often unaware of the underlying creative/creating process. This class will explore the role of creativity in the development of entrepreneurial skills and the entrepreneurial personality. Creativity in this course will be seen both as a learned skill and as an exploration of our intuition. This course will explore contemporary approaches to the creative process based on the human capacity to imagine, to explore and, ultimately, to create. These are core skills for anyone pursuing a career as an entrepreneur or simply in search of ways to explore innovation. (2 credit hours)

**AI 172 | MAKING POEMS: AN INTRODUCTION TO VERSE | 2 quarter hours
(Undergraduate)**

Making poems will be a creative writing offering that teaches metrics and verse forms, poetry the old-fashioned way. Topics will include metric feet, rhyme, lines, and verse forms. For example, students will learn about the iambic foot, write some iambic lines of various lengths, and finally use the iambic line to write a sonnet. Rap poetry with its structured rhythms and elaborate rhyming is another possibility. This "formalist" approach promotes a kind of creativity that is strongly infused with craft and discipline in contrast to the "spoken word" or confessional approaches to making poems. This class involves making audio recordings of your poems; students will be required to purchase a headset/microphone and download and install free software. (2-4 quarter hours)

**AI 176 | CREATIVE WRITING | 2 quarter hours
(Undergraduate)**

Designed to help you explore the art of writing stories, either stories that are "made-up" or stories based on lived experience. You will be required to complete six fiction-writing exercises, and either one short story, one autobiographical story, or one story based on an oral history collected by the you. In addition, you write a final essay in which you reflect on your learning and experience in the course. (2-4 quarter hours)

**AI 181 | CREATING ORIGINAL DIGITAL ART | 2 quarter hours
(Undergraduate)**

The course will focus on electronic visual art, and because of the amount of material to be covered, will not include audio or animation art. Student will look at what constitutes "art", then look at how original art could be created using technological tools, such as Microsoft Paint, Pixel-based art, such as Microsoft Graphics in PowerPoint; Digital Photography and PhotoShop; digital short-movies, and Digital Animation using Freeware GIF Animation software. (2-4 quarter hours)

**AI 185 | THE BEATLES AND THE CREATIVE PROCESS | 2 quarter hours
(Undergraduate)**

The Beatles are significant in many ways: they were an unprecedented show business phenomenon; they were leaders of Sixties cultural rebellion; and they stand, for many, as a signal instance of popular entertainment attaining the status of high art. This course will examine the musical craftsmanship of the Beatles, focusing on their work as songwriters and record makers. Recent audio and print releases documenting the group's performing and recording history provide a unique and detailed glimpse of the Beatles' creative process. We will utilize these materials to closely trace the development of the group's work while using other resources to place it in a larger historical and cultural context. The goal is to shed critical light on this recent chapter in cultural history. That discussion will, in turn, highlight questions about creativity in a modern context where commerce vies with art, technology redefines performance and an emerging global village culture transforms concepts of originality and tradition. (2-4 quarter hours)

AI 202 | LONDON ALIVE: IN THEATERS, MARKETS AND MUSEUMS | 2-4 quarter hours (Undergraduate)

Join SNL in London for a course about performance and representation. Theater, live performance, museum collections and street markets are integral parts of English cultural history; they also represent Britain's international heritage. London theaters celebrate English history, culture and language, and carry the banner of the English artistic imagination into the future. London's museums make it one of the most visited cities in the world for the range of its collected artifacts and images. Outside the theater and museum doors, markets teem with life, creating a magical intersection of past with present and future, of art with life and politics, of cultural stasis with social change. (2-6 quarter hours)

AI 203 | ART AND TRANSFORMATION | 2-4 quarter hours (Undergraduate)

What's the difference between change and development? Between action and inspiration? Between mobility and transition? Between planned change and transformation? If you can answer all those questions, try this: What's the difference between the creative contributions of painter Leonardo da Vinci and CEO Walter Isaacson? This course explores how art can serve as a guidepost during key phases in the adult experience, especially those involving transition periods like healing, growth, and personal and professional change. Students look at cases of major change agents throughout history who became catalysts for cultural transformation in part because of the impact of important works of art. The students will engage with diverse examples of art that have influenced important thought leaders and change agents of the past and present to become catalysts for major transformations in the human experience. Students will learn how significant products of the creative process; in this case, great works of art can encapsulate, reflect, and even activate the process of personal as well as social change, and how each of us can participate in the alchemical process of reflection, inspiration, and action that can result in transformation of inner and even worlds. Art and Transformation introduces learners to a variety of works of art and the people they influenced, a group that will eventually include the learners themselves. It presents a range of ways to approach the arts and to use them as tools of inspiration, self-reflection, communication, and growth. Divided into four units (Art and Personal Transformation, Art and Cultural Transformation, Art and Leisure, and Art and Work), the class presents multidisciplinary examples of literature (poetry, fiction, essays, memoir), as well as film and other visual arts. Students will consider art both from the perspective of the artist him/herself as well that of major thought leaders and change agents whose contributions to society have been motivated by an engagement with art that acted as a catalyst for system shifts in areas of personal and cognitive growth, cultural and political change, as well as the transformation of the world of work in the 21st century. Ultimately this course is an investigation of art itself as a change agent that has much to tell us about the past, the present, and ourselves. (2-4 hours)

AI 204 | CREATIVE ENTREPRENEURSHIP | 2 quarter hours (Undergraduate)

IPads. Smart Phones. The automobile. These are inventions, once unknown and now taken for granted, required years of imagining, experimentation and unconventional thinking. While we value the end of the process (the product), we are often uncomfortable with the creative/creating process. The process of imagining, conceptualizing and articulating this "new" requires skills we often label 'creative'. This class will explore the role of creativity in the development of entrepreneurial skills and the entrepreneurial personality. Creativity in this course will be seen both as a learned skill and as an exploration of our intuition. Contemporary ideas about creativity are often tied to images of the past - from mad scientists to mystical muses. But modern science tells us something else about the creative mind. This course will explore contemporary approaches to the creative process based the human capacity to imagine, to explore and ultimately, to create. These are core skills for anyone in pursuing a career as an entrepreneur, or simply in search of ways to explore innovation. In this course, we will examine the ideas of three major thinkers from the world of creativity, disruption and entrepreneurship. We will then explore where these ideas converge on topics including, risk, the random, intuition and innovation. (2-4 quarter hours)

AI 211 | ANALYZING AUSTEN'S PRIDE AND PREJUDICE | 2 quarter hours (Undergraduate)

Jane Austen must have known something about universal truths. Her novel, *Pride and Prejudice*, which begins with the sentence quoted above, was first published in 1813. Still in print today, it has also been made into at least eleven movies, four of which were released since 2000, including a Mormon and a Bollywood version. In this class, we will read the novel in the context of the gender and class norms at the time Austen wrote her book and then consider how Austen's exploration of universal truths is reinterpreted in more contemporary film versions of this novel. In exploring Austen's creation and the many reinterpretations of her work, we will use both analytic and creative writing assignments as well as class discussion to examine how context informs creativity and how creativity informs analysis. You most definitely do not need to be a creative writer to take this class. (2-4 quarter hours)

AI 215 | FILM NOIR | 2 quarter hours (Undergraduate)

In this course we will screen and discuss select noir films and develop skills of viewing and analyzing them closely. Highlighted topics will include the concept of genre in film; the relationship of genre codes to creativity; the dynamics of form and content; the tension between commerce and art; the auteur theory; psychologies of the divided self; representations of masculinity and femininity; and the question of what these films say about American society, post-World War II. (2-4 quarter hours)

**AI 217 | MINDFULNESS MEDITATION | 2 quarter hours
(Undergraduate)**

Mindfulness meditation provides many different ways to broaden our awareness of the world around us, heighten our powers of concentration, deepen our understanding of our experience, and cultivate creative and transformative ways of being in the world. Many approaches to mindfulness meditation draw on ancient religious and spiritual traditions from around the world. So mindfulness meditation is compatible with and can enhance whatever religious or spiritual commitments you may have. But mindfulness meditation does not require religious or spiritual interpretations. It can be practiced as a very powerful path to becoming a creative, healthy and effective adult. In this course, you will learn what mindfulness meditation is and various ways in which it can be practiced. We will explore in particular how mindfulness meditation can enhance creativity, address the ethical challenges of contemporary life, and foster collaborative learning. Class sessions will involve extensive practice in mindfulness meditation, listening and dialogue. You will be expected to maintain and reflect on a daily mindfulness meditation practice for the duration of the course. (2-4 quarter hours)

**AI 225 | GREAT MUSIC IN CHICAGO | 2 quarter hours
(Undergraduate)**

The course introduces people to three of the most exciting and rewarding institutions in Chicago music: the world-famous Chicago Symphony Orchestra at Symphony Center downtown; the fabulous training orchestra of the Chicago Symphony Orchestra, known as the Civic Orchestra, also downtown; and live top-name jazz at the Jazz Showcase. We learn the background of these institutions, the nature of the arts they perform, and the terms used to describe and appreciate those forms. Most importantly, we experience, in person, the great music that they play! (2-4 quarter hours)

**AI 254 | RESISTANCE DURING THE HOLOCAUST AND WORLD WAR II | 2 quarter hours
(Undergraduate)**

This course explores the history of the Holocaust in the context of the Second World War (1939-1945) with a central focus on examples of resistance to discrimination, fascism and oppression. We will explore varied forms of opposition including armed resistance, spiritual resistance, resistance through writing and identity preservation. We will read autobiographies, view documentary and dramatic films, and use museum resources to develop our understanding of resistance. Required activities include a visit to the Illinois Holocaust Museum and Education Center (Skokie, IL). We will also consider the implications of this history for making ethical choices in our world today. (2-4 quarter hours)

**AI 255 | SELF EXPLORATION: INSIDE OURSELVES, OUTSIDE WITH OTHERS | 2 quarter hours
(Undergraduate)**

Exploring the self can be a very personal and satisfying experience. It can provide clues as to how you interact with others, accomplish daily tasks and how to become a more happy, productive and respected individual. Students in the course engage in self reflection in a collaborative learning format where they learn about themselves and observe the trends and conclusions of the class. Topics to be explored include family origins, gender perspectives, personality traits and development, self awareness and identity, creativity, and professional and moral perspectives.

**AI 256 | WORKPLACE AND PROFESSIONAL ETHICS | 2 quarter hours
(Undergraduate)**

This hybrid-learning course is open to all DePaul undergraduates. It provides a thorough grounding in the theoretical and applied nature of work-based ethical decision-making. We engage the tenets and assumptions of four major ethical perspectives, using them to examine the meanings and implications of morality in professional life. Using the tools of reason, we investigate obstacles to ethical decision-making in one's and others' professional behavior, and apply our learning in the writing of a personal ethical code. (2-4 quarter hours)

**AI 282 | LEISURE FOR WELL-BEING | 2 quarter hours
(Undergraduate)**

The pursuit of happiness for most people is an important aim in life. A personal feeling of well-being includes "emotional happiness" and the rational satisfaction with one's own life. In this course you will attempt to define the term "well-being" and discover its relationship with other concepts such as mental health and life satisfaction. How does physical exercise influence well-being? How do positive and negative life events influence well-being? Do good social relationships guarantee happiness? Do the expectations one has in life with regard to income influence well-being? Is it important to set goals to achieve a high level of well-being? These and other questions will be addressed in this course. You will try to define some of things a person can do to increase his or her level of well-being. Others' ideas serve as common course content, as presented in the material assigned to this course. You will be asked to participate actively and critically, to work individually and in study groups, using your own experience as a field of analysis and reflection. Active group participation will foster a harmonic, interactive environment, which might increase positive relationships among students and foster a feeling of well-being throughout this course. (2-4 quarter hours)

**AI 285 | WORK, PLAY, REST: NAVIGATING COMPLEXITIES OF ADULT LIFE | 2 quarter hours
(Undergraduate)**

Adult life has become complex. With expectations from family, school, work, home, social pressures, technology and social media, it sometimes feels impossible to keep up. When the news bombards us or becomes frightening, and the world around us feels uncertain, how do we make sense of things and find our way forward? In this course, we will begin from the place that human beings are full of creativity, ingenuity, resourcefulness, generosity and hope. Our very lives and the world around us will be our subject matter - our need to work, our bodies' need for rest, and our enjoyment of leisure and recreation. Where does stress, expectation and anxiety come from, how are these held in the body, and what can we do about it? And, how has story, movement, music and sound, humor, popular entertainment and fun helped humans get through the day, navigate relationships, and find more ease? By engaging in simple creative practices in and out of class and considering what might be useful for individual and collective well being, the goal is for students to create a toolbox of approaches for navigating life's complexities to carry forward beyond the class. (2-4 quarter hours)

AI 286 | NEW ORLEANS IN SONG, STORY & STRUGGLE | 2 quarter hours (Undergraduate)

The tapestry of New Orleans culture is tremendously rich and varied. This course will concentrate on two strands in that tapestry - music from New Orleans and fiction about it. Students will learn about music forms which originated in the city or its environs and which have gone on to dazzle the world, including jazz, r&b, zydeco and funk. We will situate these art forms in social, historical and political context and examine the complex processes of invention and adaptation which have shaped them; in that regard, we will particularly highlight the development of early jazz in this unique metropolis which, though residing at the tip of North America, has been called "the capitol of the Caribbean." We will make use of Thomas Brothers' pioneering study Louis Armstrong's New Orleans as well as musical performances by the likes of Professor Longhair, the Neville Brothers, Wynton Marsalis and Dr. John. We will also learn about the carnivalesque culture of New Orleans, a pursuit that will take us into what might be called the secret history of Mardi Gras. In addition, we will read two striking literary works by artists who have a background in and fascination with the crescent city: Kate Chopin's groundbreaking novella *The Awakening* and Tennessee Williams' spine-tingling one-act play *Suddenly, Last Summer*. Moreover, we will consider the role played by New Orleans in American history and imagination as well as the role played by images and fantasies of New Orleans in struggles for social justice at the local and national level. (2-4 quarter hours)

AI 322 | PROBLEMS AND ISSUES IN CONTEMPORARY ETHICS | 2 quarter hours (Undergraduate)

An introduction to moral philosophy with emphasis on the conflict between "moral relativism" (or "subjective" ethics) on the one hand and "moral realism" (or "objective" ethics) on the other. During the course you will be introduced to classic theories and leading figures in the history of ethics, from Plato and Aristotle to Kant and Nietzsche. Course content will focus on issues (e.g., poverty, drug use, capital punishment, sexual behavior, euthanasia, biomedical research, animal rights, political violence) at the center of contemporary ethical debate in the United States and throughout the world. (2-4 quarter hours)

AI 342 | LEARNING ART HISTORY THROUGH THE ART INSTITUTE OF CHICAGO | 2 quarter hours (Undergraduate)

The Art Institute of Chicago is one of the nation's premiere art museums, with a collection that offers wide opportunities for the study of art. This course will examine great paintings in the museum from the Middle Ages up to contemporary works. Students will deepen their knowledge of art history and how to study a painting, develop an overall knowledge of major periods and trends, as well as gain insights into the lives of the artists. Students will also gain a knowledge of the museum itself as a starting off point for further studies. Class will meet at the Art Institute, Michigan and Adams, at the front information desk. (2-4 quarter hours)

AI 396 | INTRODUCTION TO ART THERAPY | 2 quarter hours (Undergraduate)

This experiential class will introduce students to concepts of art therapy and other expressive arts. It will address the therapeutic use of art making by people who experience illness, trauma, or challenges in living, as well as by people who seek personal development and general well being. By participating in expressive arts activities and reflecting on the products and processes, students will learn how art therapy can help people increase awareness of self and others, cope with symptoms, stress, and traumatic experiences; enhance cognitive abilities; and enjoy the life-affirming pleasures of making art. (2-4 quarter hours)

Asian Studies, Global (AAS)

AAS 200 | ASIAN AMERICAN HISTORY | 4 quarter hours (Undergraduate)

This course examines the creation of Asian America by first and second-generation Asian migrants to the Americans from the 1840s to World War II. The course provides a historical, legal, social and cultural framework for understanding the resurgence of Asian migration since the 1960s.

AAS 202 | ASIAN AMERICAN LITERATURE | 4 quarter hours (Undergraduate)

This course will serve as an overview of Asian American literature in a socio-historical context. Special emphasis will be placed on tracing the various paradigms through which these works have been produced, from texts written prior to the movement towards self-determination during the 1960s; to works identified with the "cultural nationalism" promoted during the 1960s and 1970s; to the pluralism of the 1980s which explored how gender, sexual orientation, and class complicate earlier essentialist conceptions of racial identity; and finally to the transnational and diasporic interests of the 1990s. Texts covered will include primarily fiction (novels and short stories), but also critical essays, plays, movies, and poetry.

AAS 203 | ASIAN AMERICAN ARTS AND CULTURE | 4 quarter hours (Undergraduate)

This course will examine Asian American arts and cultural productions in relation to the histories of people and groups with roots in Asia and the Pacific. The course will focus on contemporary visual arts from the emergence of Asian American movements in the 1960's and 1970's, to the multiculturalism of the 1980's and 1990's to our present transnational moment. Formerly AAS 201.

AAS 205 | GLOBAL ASIA | 4 quarter hours (Undergraduate)

From ancient and modern perspectives, Global Asia introduces the artistic, cultural, economic, philosophical, political and religious transformation of Asian societies and peoples across space and time. A visual and multimedia approach complements literature on core ideas and practices. Creative and interactive learning methods are included.

AAS 208 | CHINA'S CULTURAL SOFT POWER AND ITS FUTURE | 4 quarter hours (Undergraduate)

Within three decades, China has transformed from an impoverished and self-secluded nation into a global powerhouse challenging the world's status quo. Through select soft power theoretical perspectives, this course will explore three primary questions: 1) what are China's cultural soft power resources? 2) how do China wield its cultural soft power? 3) how do we view China's future? The class will analyze multiple aspects of Chinese culture and its contemporary society and understand the prospects of China in the next generation. We will focus on the dramatic social cultural changes in China in the past decades that reflect its cultural soft power or lack thereof and explore its long-term impact on the rest of the world. The readings and class discussions will engage topics on China's historical dynamics, cultural traditions, contemporary societal changes, politics, economy, and international relations. Students will be exposed to and analyze comparative views analyzing and predicting China's future.

**AAS 209 | CHINESE YOUTH CULTURES | 4 quarter hours
(Undergraduate)**

As China's economic and political influence grows on the world stage, it has become increasingly important to understand China's youth who as the next generation of leaders and workers will unquestionably shape the country's trajectory, and ultimately the world's geopolitical, economic, and cultural landscape. It is well documented that China's millennials and their younger siblings have witnessed greater and faster socioeconomic and demographic changes than previous generations. This course is designed to help students understand and analyze what it means to be young in such a fast-changing country that is ruled by one Party but continuously exposed to intense globalization.

**AAS 210 | ASIAN ART | 4 quarter hours
(Undergraduate)**

An introduction to major developments of art and architecture across Asian cultures including South Asia, Southeast Asia, the Himalayas, and East Asia and their counterparts in America. This course examines not only painting, sculpture, and architecture, but also gardens, ceramics, and prints. Special emphasis will be placed on religious arts of Buddhism and Hinduism, along with landscape and figural painting. Cross-listed with HAA 115.

**AAS 211 | BUDDHIST ART | 4 quarter hours
(Undergraduate)**

This course explores the traditional visual culture of the Buddhist world, examining art as a reflection of religious belief and practice. The works come from South Asia, Southeast Asia, East Asia, and America. An emphasis is placed on painting, sculpture, and architecture made for or related to Buddhist practice. Cross-listed with HAA 220.

**AAS 214 | JAPANESE ART | 4 quarter hours
(Undergraduate)**

This is a chronological survey of premodern Japanese art, from the prehistoric era to the Meiji period (1868-1911). Topics covered include painting, sculpture, and architecture, as well as decorative arts, prints, and garden design. Special attention is given to Buddhist and Shinto religious arts, along with screen painting and woodblock prints. Cross-listed with HAA 216.

**AAS 215 | INTERNATIONAL DEVELOPMENT AND REGIONAL INEQUALITY
| 4 quarter hours
(Undergraduate)**

This course charts the political, social and economic transformation of the developing countries (Africa, Asia, Latin America, Caribbean, Pacific Islands) into a global economy dominated by the 'developed' countries (North America, Europe and Japan). This process, termed 'GLOBALIZATION', results from the operation of the global market mechanism, the activities of Transnational Corporations (TNCs) and the programs of the International Financial Institutions (IFIs). Cross-listed with GEO 215.

**AAS 216 | CHINESE ART | 4 quarter hours
(Undergraduate)**

This is a chronological survey of premodern Chinese art from antiquity to the nineteenth century. Special attention is given to sculpture and painting, but architecture and ceramics are also covered. There is an emphasis on prehistoric bronze vessels, Buddhist sculpture, and landscape painting of the Song through Qing periods. Cross-listed with HAA 215.

**AAS 217 | ARTS OF INDIA AND THE HIMALAYAS | 4 quarter hours
(Undergraduate)**

This is a chronological survey of premodern arts of the subcontinent of South Asia and the Himalayas. We start with the Indus Valley Civilization and move through the nineteenth century, including Mughal arts. Special attention is given to the emergence of figural imagery in Buddhist and Hindu sculptural arts, and the development of religious architectural forms from early stupas and cave temples to later shrines. Cross-listed with HAA 217.

**AAS 218 | ARTS OF THE SILK ROAD | 4 quarter hours
(Undergraduate)**

This course will examine the visual history of the Silk Road, focusing on works of art and architecture created in Central Asia. We not only consider the prehistoric, ancient and medieval arts of this region, but we also investigate the modern development of a romanticized notion of the Silk Road and the imperial interest in acquiring treasures from the Silk Road. Today we frequently hear about the legacy of the Silk Road in promoting multicultural exchange. However, the Silk Road has long been affected by the expansionist agendas of empires. From the time of Alexander the Great (356-323 B.C.E.) through the period of Genghis Khan (1162-1227) and on, there have been military leaders who have led their armies into Silk Road lands seeking territory, riches, and glory. Cross-listed with HAA 218.

**AAS 219 | K-POP & ITS GLOBAL CULTURAL INFLUENCE | 4 quarter hours
(Undergraduate)**

This course examines the increasing visibility and global dissemination of Korean popular culture, representatively K-pop. Looking through various social causes concerned with the dissemination of Korean popular culture (e.g., Korean entertainment industry, online K-pop fandom communities, race and gender systems in K-pop), this course will help students critically consume and understand Korean pop culture. By exploring various global cultural forces that are at work in the production and consumption of Korean pop culture, students will learn controversial topics around global culture and cultivate their global sense beyond Euro-American perspectives. Throughout the semester, students will do so by working both individually and in groups on a series of projects designed to further their understanding of Korean pop culture and its ramification in the global digital era.

**AAS 220 | AMERICAN BUDDHISM | 4 quarter hours
(Undergraduate)**

This course critically analyzes the origins of Buddhism in the United States in order to fully understand how and why Buddhism has flourished in Asian and White American communities, and to understand the conflict and controversy surrounding the racial dynamics of religious choice. Cross-listed with AMS 220.

**AAS 221 | RELIGION IN SOCIETY: SOUTH ASIA | 4 quarter hours
(Undergraduate)**

Focusing on South Asia, this course will explore how religion is both embedded in, and dynamically interacts with, the wider socio-cultural contexts of which it is a part. We will examine how religious ideas constitute and are constituted by social forces such as race, caste, class, gender, and sexuality both in South Asia as well as within the wider diaspora. We will analyze how religious ideas are re-shaped as people negotiate the changing social, economic and political circumstances of everyday life and construct self and identity in our increasingly transnational world.

**AAS 222 | RELIGION AND CONFLICT IN SOUTH ASIA | 4 quarter hours
(Undergraduate)**

Religion has become central to conflict in contemporary South Asia. This course examines the relationship between religion and conflict both within and between nations in South Asia. It will examine how religion fuels conflict as well as how religion is used to find a nonviolent resolution to conflict. It will also analyze how religion is used to challenge and resist victimization, marginalization, silencing, and indeed violence during conflict. Finally, the course will examine how the cultural politics of class, gender, ethnicity, and sexuality constitute and are constituted by religion.

**AAS 223 | TALES OF INDIA | 4 quarter hours
(Undergraduate)**

Before the modern nation-states of India and Pakistan came into being, the term "India" referred to the South Asian region, a region that has been and is the home of many cultures and societies. These cultures have also reached beyond the region to create rich and paradoxical diaspora experiences in Europe and the Americas. Tales of India will explore a variety of literatures, ancient and contemporary, that illuminate the worlds of South Asian peoples in their homelands and in the transnational life of the diaspora. Themes will include love, power, religious meaning/religious identity, and cultural difference.

**AAS 224 | HINDU THOUGHT AND CULTURE | 4 quarter hours
(Undergraduate)**

An exploration of Hinduism as a civilization whose key reference points are religious in the sense understood in the West (ritual and transcendence), yet which finds expression in a "high culture" of literary works, political and social theory, art and architecture, music and dance, and folk and popular stories, songs and plays. Cross-listed with REL 242.

**AAS 225 | RELIGION AND SOCIAL ENGAGEMENT: SOCIALLY ENGAGED BUDDHISM | 4 quarter hours
(Undergraduate)**

An investigation of the ways in which various religious traditions engage the social order. Traditions, persons and movements that form the focus of the course will vary from section to section (in this case the focus is on Buddhism). The course will integrate theory and practice in studying forms of religious engagement. All students will perform some service to a community or within a community organization or agency.

Sophomore standing or above is a prerequisite for this class.

**AAS 226 | ETHICAL WORLDS: MORAL ISSUES ACROSS CULTURES: ATOM BOMB DISCOURSE | 4 quarter hours
(Undergraduate)**

An exploration of religion and ethics from a comparative and international perspective. Ethical dimensions of diverse world traditions (in this case the development and use of atomic weaponry) will be investigated within their own particular historical and cultural contexts, and students will be asked to consider and evaluate their own ethical orientations in the light of these studies.

**AAS 227 | BEYOND PARASITE: SOUTH KOREAN CULTURE THROUGH FILM | 4 quarter hours
(Undergraduate)**

In 2012 the explosion of "Gangnam Style" on YouTube helped to usher in a new generation of American K-Pop addicts and interest in Korea culture. In 2019 Parasite became the first non-English film to win the Academy Award for best picture and driving a new wave of interest in yet another underappreciated genre of Korean cultural creation. It also brought new global attention to the domestic social issues that it depicted in South Korea concerning class, gender, race, and economic development. Changes and challenges in Korean society are reflected in its cultural products such as film. This course examines Korean society, culture, and history through the lens of cinema while critically engaging contemporary local and global social issues. This course will critically examine films from various periods of Korean history such as postwar cinema, the renaissance of the 1990s-2000s, and the modern era which will include blockbusters, independent films, and Academy Award winning masterpieces. Through an examination of recurring themes such as tradition, national division, gender, colonialism, and identity, students will learn to analyze, evaluate, and engage with Korean film media while improving their intercultural communication skills. No prior knowledge of Korea or the Korean language is necessary and all films will have English subtitles.

**AAS 228 | ROMANCE IN ASIA: LOVE AND GLOBALIZATION | 4 quarter hours
(Undergraduate)**

How is globalization shaping who and how we love? Globalization is transforming the social and economic reality that young people in Asia must navigate in order to find love. They seek to create intimate relationships that satisfy their emotional, material and erotic desires, as previous modes of relationship formation increasingly fail to fit the new realities of contemporary Asia. This course examines diverse social landscapes in South Korea, Japan, China, India, and South East Asia where traditional forms of dating, marriage, and social reproduction are in upheaval. Globalization has brought about rapid but dissimilar social changes to this region such as increased inequality, growing elderly populations, and steep male to female ratio imbalances. Advances in rapid forms of communication and transportation also bring these disparate places together through cross-border marriage and online dating. This course surveys experiences in Asia of how intimacy and love are shaped, contested, and negotiated in daily life, in dialogue with changing gender expectations, social hierarchies, and increasing interdependence.

AAS 230 | INTERNATIONAL ENVIRONMENTAL CONSERVATION | 4 quarter hours**(Undergraduate)**

The purpose of this course is to explore the relationship between our physical environment and society by focusing on natural resources. While the course introduces key concepts in environmental thought (conservation, preservation, sustainable development, etc.), another aim is to introduce students to some of the practical aspects of working in resource and environmental management. Lectures and readings examine contemporary environmental issues internationally with half the case studies featuring developing and emerging economies, many in Asia. The textbook focuses on mainstream models of nature-society relations such as rational planning in resource management and sustainable development, while the additional readings and videos will introduce students to critiques of the mainstream approaches and suggest alternatives to them. The issues covered in this course include climate change, atmospheric pollution, fresh water resources and water quality, forestry and biodiversity loss, food production and distribution and sustainable cities.

AAS 233 | THE RISE OF MODERN CHINA | 4 quarter hours**(Undergraduate)**

Examines the history of Chinese civilization from the 18th century to the present. We will survey the height of the authority of the Qing Imperial government, its dissolution in the 19th century, and the creation of a revolutionary China in the 20th century. Topics include the Opium War and China's foreign relations, the introduction of Westernized technology and education, and the rise of Communism under the leadership of Mao Zedong. Also considers the ways in which our contemporary understanding of China is formed by recent developments in the media - Chinese news and film. Cross-listed with HST 233.

AAS 235 | CHINESE SCIENCE FICTION | 4 quarter hours**(Undergraduate)**

This course centers on Liu Cixin's award-winning science fiction trilogy *Remembrance of Earth's Past* (2007-10) and short stories by Chen Qiufan, Regina Kanyu Wang, and others. Liu's popular trilogy features globally-influential and highly philosophical hard SF that begins during China's Cultural Revolution and end millions of years in the future. The trilogy examines, among many other topics, the adaptability of humans and machines, the promises and perils of new technologies, multiple dimensions, the effects of climate change, and ethical dilemmas on scales ranging from the personal to the intergalactic. Unlike so much popular science fiction produced in the West to date, in Liu's works Chinese people and Chinese technologies play central roles in the future of humanity on and beyond Earth. China's historically unprecedented rate of growth since the 1970s, as well as recent successes in space exploration, has created a great deal of optimism among Chinese people, including accelerated forecasts for new technology implementation when compared to surveyed North Americans, as a recent study shows. Importantly, one of science fiction's signature narrative devices is to portray the present as the past of a far future, thus de-familiarizing and historicizing current circumstances. Seen from the near or far future, present "givens" can be cast as contingent and this can indirectly imply various kinds of social and political critique. Time displacement, in SF and in other genres, has a long history as a useful device for writers in regimes of censorship, and we will discuss allegorical content in the assigned science fiction and other works. This course is cross-listed with ENG235.

AAS 238 | JAPANESE FILM ARTS | 4 quarter hours**(Undergraduate)**

This course examines the development of cinema as an artistic form in Japan, from its inception in the early twentieth century to its explosion as an international phenomenon in recent decades. The Japanese cinematic experience is considered as visual expression that parallels key Japanese arts of handscroll painting and woodblock prints. We discuss such genres as samurai films, fantasy tales, monster movies, yakuza thrillers, and science fiction anime. Among the masterpieces studied are Ozu's *Tokyo Story*, Kurosawa's *Rashomon*, Itami's *Funeral*, and Miyazaki's *Spirited Away*. Issues addressed in relation to these films include artistic expression, technological progress, national identity, social unrest, and religious concern.

AAS 239 | RELIGION AND ETHICS IN JAPANESE FOODSCAPES | 4 quarter hours**(Undergraduate)**

What would be your last meal?" We may all have to reflect on this question once or twice in our lives. The potential diversity of our responses to this question suggests that our relation to food can be quite personal and intimate, as well as cultural and social. In this regard, investigating food is a powerful analytical tool for understanding ourselves and our relations with our surroundings. In particular, in Japan, many TV programs on food, including quiz shows, dramas, and documentaries, have been produced and have garnered attention. Thus, the course equips students with a grasp of the Japanese culture from the vantage point of food, and the benefit of a personal self-reflection and understanding. Studying food in Japan, with particular attention to the underpinnings of religious doctrines, spiritual sensibilities, and ethical implications will inform students not only of the cultural ethos of Japan, but also of its social and political orders. Students will explore the relations between religion and food by examining the ways in which food is used in religious rituals, in which religious beliefs dictate dietary habits and thereby fortify the adherents' identity and reinforce their membership. But the function of food is not to bring people together, but also to divide them. The course also investigates how religious proscriptions on foods render them either sacred or taboo, thereby fostering a corresponding social hierarchy in which status is closely linked to what one consumes and produces; certain foods (e.g. salt, rice, sake) are consecrated and used for rituals, while other foods (e.g. meat) are forbidden.

AAS 240 | MODERN JAPANESE LITERATURE | 4 quarter hours**(Undergraduate)**

This course is an introduction to the major authors and works of Japan's modern period, from the 18th century through the 21st century. We will examine writers, works, and literary institutions in historical context to explore how Japanese writers engaged the modern era. This was the period when modern literature, more specifically the novel (*shosetsu*), was emerging internationally as a new technology of state-building. Modern Japan was highly literate with a flourishing popular culture that included diverse literary forms (high and low) that would be refashioned, contested and sometimes abandoned as the institution of literature was established by the turn of the 20th century, although not without ongoing contestation. Themes may include: the West, Orientalism and Counter-Orientalism; protest literature by women, workers and ethnic minorities; and modernism and modernity. Authors may include: Higuchi Ichiyo, Natsume Soseki, Yosano Akiko, Akutagawa Ryunosuke, Kobayashi Takiji, Murakami Haruki, and others. Cross-listed with MOL 240.

AAS 241 | RELIGION IN CHINESE HISTORY, SOCIETY, AND CULTURE | 4 quarter hours (Undergraduate)

An exploration of the Chinese religious landscape, focusing on social and practical dimensions of Chinese religion, such as state rituals and private cults, liturgies and individual practices of Taoist priests and adepts, politico-religious ideas that inspired popular messianic movements throughout Chinese history, and interrelations of Buddhist and Taoist clergies and institutions in the state. Cross-listed with REL 241.

AAS 242 | LITERATURE AND RELIGION IN CHINA | 4 quarter hours (Undergraduate)

This course focuses on the interpretation of renowned Chinese literary works, with attention paid to the intersections between literature and religion. Students are expected to acquire skills of literary appreciation and basic religious literacy by engaging with both texts and their contexts. This course explores major literary genres, such as revealed texts, rhapsody, lyrics, regulated verse, popular tales, plays, and novels, and discusses related thematic topics, such as the religious themes, mythological contexts, literariness, aesthetics, and individual experiences.

AAS 243 | BUDDHIST THOUGHT IN CULTURAL CONTEXT | 4 quarter hours (Undergraduate)

An exploration of the Buddhist tradition, using original sources, from its beginnings in ancient India to a world religion with strong roots in the US. Students will discover how Buddhism interacts with cultures from Sri Lanka and Thailand to China, Japan and Tibet. Although this course is online, students in the region will have the opportunity to practice meditation at a Chicago zendo and tour the Buddhist art at the Chicago Art Institute. Cross-listed with REL 243.

AAS 244 | TRADITIONS OF CHINESE POPULAR CULTURE | 4 quarter hours (Undergraduate)

Most of the Chinese, throughout history, did not subscribe to one exclusive belief system or belong to a single institutional religion. They, instead, participated in a web of popular religious practices, held multitudinous popular beliefs, and shared with each other imaginaires of heroes, monsters, ghosts, and gods. This course focuses on what has been popular and provides an understanding of Chinese religions from the perspective of the common people. Students are expected to learn aspects and elements of religion-related Chinese culture, such as mythology, ancestor veneration, divination, demonology, hero cults, festivals, local deities, and drama while paying attention to the internal logic of religious practices and imagination.

AAS 245 | RELIGION IN JAPANESE HISTORY, SOCIETY, AND CULTURE | 4 quarter hours (Undergraduate)

Explores the specific interplay between religion and culture in Japan. Taking historical and cultural factors into account, it considers prehistoric Japanese religion, ancient imperial myths, the assimilation of Buddhism, Confucianism, and continental (Chinese/Korean) culture, the religious and aesthetic worlds of the court nobility and the warrior class, popular mountain cults, the revival and systematization of Shinto, the impact of western culture, Japanese ultra-nationalism, and the religious situation in the post-war period. Cross-listed with REL 245.

AAS 246 | ASIAN FOREIGN POLICY | 4 quarter hours (Undergraduate)

This course surveys the international relations of selected Asian countries. For each country, the course presents the basic historical background shaping foreign relations, introduces the external and domestic influences on foreign policy, and identifies emerging international challenges. It examines both the economic and military-security dimensions of Asian foreign relations. Cross-listed with PSC 246.

AAS 247 | LITERATURE AND RELIGION IN JAPAN | 4 quarter hours (Undergraduate)

Focuses on the pervasive influence of religious thought and sentiment on Japanese literature from ancient to modern times and explores the intricate relationship between religion, aesthetics, and the arts in Japanese culture. Considers original works including ancient Japanese mythology and poetry, the memoirs of court ladies and Buddhist hermits, romance, epics, folktales and social satire, with attention to their historical, social, religious and social dimensions, as well as to the individual experience expressed in them. Cross-listed with REL 247.

AAS 248 | CHINESE CALLIGRAPHY | 4 quarter hours (Undergraduate)

An introduction to the art of Chinese calligraphy. Hands-on practice as well as history and theory of the art. This course is open to students with no background in Chinese calligraphy, language, literature, or culture. Cross-listed with MOL 248.

AAS 249 | JAPANESE WOMEN'S LITERARY MASTERPIECES | 4 quarter hours (Undergraduate)

The course begins over 1000 years ago with masterpieces of world literature including The Tale of Genji and classical poetry, traverses through the modern period of New Women Bluestocking and arrive in the 21st century to reflect on the richness of Japanese women's: writings across time and space. * No prior knowledge of Japanese language, history or culture.

AAS 250 | CHINESE CINEMA: A WINDOW ON CHINA | 4 quarter hours (Undergraduate)

This course studies Chinese cinema, the visualized artistic reflection of Chinese society, ideology, and culture from four perspectives: Historical, directorial, thematic, and artistic. It will cover the history of Chinese cinema, from the birth of the first Chinese film through the Silent Age, 1st Golden Age, 2nd Golden Age, Pre- and-Post-War Era, Pre- and-Post "Cultural Revolution" Period, and the Fifth Generation up to the emerging Sixth generation and beyond. Through substantial exposure and analysis of selected movie classics and subsequent classroom discussions, students will be well informed about the major developments and trends of each period in the history of Chinese cinema. Students will also explore the historical backgrounds, artistic characteristics, and key directors and stars of important Chinese movies as well as cinematic terminologies, the formation of Chinese cinematic theories, and innovative cinematic techniques.

AAS 251 | SOUTH ASIA TO C. 900 C.E.: THE STONE AGE TO THE GOLDEN AGE | 4 quarter hours
(Undergraduate)

The course follows the development of the history of the region from the earliest phases of human settlement, the first civilization in the Indus valley, and the formation of the Mauryan and Gupta empires. It will analyze the growth of different state structures from tribal/lineage based state to these great empires. It incorporates the rise of regional states and the growing importance of trade to linking South Asia with the West. It will also examine the development of different religious traditions from Vedic Brahmanism to Buddhism to Jainism and the very early days of Islam in the region. The central question of this course will be how to contextualize the relationship between structures like family, law, caste, community, state and the tumultuous changes in the subcontinent over this long period. Cross-listed with HST 151.

AAS 252 | SOUTH ASIA, C. 900 TO 1707: SULTANS, MUGHALS, AND ISLAMIC EMPIRES | 4 quarter hours
(Undergraduate)

The course begins with the transformation of society from the 'ancient' to the 'medieval', and compares this to developments in Europe in the feudal age. It then incorporates specific political, social, and cultural developments in South Asia that came about with the establishment of powerful Islamic states in a region where Muslims were a minority. These issues will inform the analysis of the Ghaznavid and Ghurid invasions, the Delhi Sultanate, the Vijayanagara empire and the Mughal empire. The course will end with the Marathas and the decline of the Mughal empire, and the rising influence of the British. The central themes concern how the state, economy, culture, and society developed in the period when Islam became firmly embedded in South Asia. Cross-listed with HST 152.

AAS 253 | ASIAN POLITICS | 4 quarter hours
(Undergraduate)

An introduction to contemporary government and politics in Asia, focusing on China and Japan, with comparative reference to other Asian and non-Asian political systems. Special attention will be made to the emerging political and economic role of the Pacific Rim.

AAS 254 | SOUTH ASIA, 1707 - 1947: RISE AND FALL OF THE BRITISH RAJ | 4 quarter hours
(Undergraduate)

The course begins with the decline of the Mughal Empire, and then moves to examine the British empire, the nationalist movement and finally to independence and partition in 1947. The central questions of this course continue to be relevant in the post-colonial period: how we understand the distinctive form of modernity that has developed in South Asia. Taking a comparative approach as often as possible, the course examines the fundamental ways that Britain was transformed by the development of its empire as was colonial India. The course constantly deconstructs easy binaries of self and others/ East and West by examining the differences within Indian and British society. Cross-listed with HST 153.

AAS 259 | RELIGION IN MANGA AND ANIME | 4 quarter hours
(Undergraduate)

Because of manga and anime's global popularity, growing market size, and artistic qualities, they become a window on Japanese history, culture, and society. The religious dimensions of manga and anime have deep roots in the history of Asian religion, visual arts, and literature, and they are key to a nuanced understanding of many important works. This course will address and discuss topics of religious significance in connection to manga and anime, such as death, afterlife, spiritual purity, personal cultivation, nature, among others. This course intends to help students understand various aspects of Japanese religions through manga and anime, where religious elements abound. This course is cross-listed with REL249.

AAS 262 | JAPANESE POPULAR CULTURE | 4 quarter hours
(Undergraduate)

Globally celebrated for its creativity, world-building, and complexity, Japanese pop culture: including anime, manga, J-pop, drama, collectible figurines, cosplay, tv drama, film, and video games continues to push the boundaries of what it means to be human in the 21st century. Students will strengthen skills to analyze screen arts and other cultural products with specialized attention to how the content is conveyed in historical context. Themes include cyber-physical blending, gender-bending and performance, historical memory, national identity, and what it means to be human.

AAS 263 | JAPAN TO C. 1200 | 4 quarter hours
(Undergraduate)

Follows the formation of a unified state in central Japan during the 5th and 6th centuries. Considers the influence of Korean immigrants and Chinese philosophy and statecraft on the unification of Japan in early antiquity. Explores rise of Japan's aristocratic court culture in Nara and Kyoto as well as powerful Buddhist institutions and the emergence of the warrior class in Eastern Japan. Cross-listed with HST 263.

AAS 264 | JAPAN, CA. 1200-1800 | 4 quarter hours
(Undergraduate)

Follows the emergence of the warrior class and the system of dual political authority until the 14th century, with the imperial court in Kyoto and the samurai elite in Kamakura. Continues with an examination of the early modern processes of urbanization and the growth of a monetary economy, changes in social organization, major cultural innovations, and religious/intellectual movements. Cross-listed with HST 264.

AAS 265 | JAPAN, C. 1800 - PRESENT | 4 quarter hours
(Undergraduate)

Follows the radical transformation of Japanese politics, society, and economy with the commercialization of the countryside, the weakening of samurai rule, and increased, often hostile, contact with Western imperialist nations. Explores expansion of Japan as an imperialist nation from the middle of the 19th century and the lasting legacy of that expansion in the region. Explores WWII and postwar political, economic, social changes in contemporary Japan. Cross-listed with HST 265.

AAS 266 | EAST ASIA, C.1800-PRESENT | 4 quarter hours
(Undergraduate)

Begins with the reshaping of East Asian relations from the late 18th century following the realignment of the region after the expulsion of European Catholic missionaries. Follows the radical shift in the relations between these countries as they all sought to respond to the imperial challenges that the West imposed. Explores the central role of Japan and its effort to build an empire in and beyond East Asia from the late 19th century through its defeat in World War II and the lasting historical legacy of that history in the region. Cross-listed with HST 163.

AAS 267 | WORLD ECONOMY: STATES, MARKETS AND LABOR | 4 quarter hours**(Undergraduate)**

This course introduces students to competing economic and political frameworks that analyze the interaction of states, markets and societies. The overall theme of the course is the spread of capitalism and the tandem disembedding of economic relations from social relations beginning with the Industrial Revolution in the 18th century through to the early 21st century.

AAS 272 | ANIME AND MANGA | 4 quarter hours**(Undergraduate)**

This course examines the development of anime and manga in Japan from their inception to their explosion as international phenomena in recent decades. We consider anime and manga as forms of artistic expression that depend upon and parallel key Japanese visual forms of handscroll painting and woodblock prints. Students learn the ideas, ideals and values in Japanese cinematic and visual expression, and develop skills at analyzing anime and manga as artistic forms. The processes of drawing/creating anime and manga are considered; both form and content of anime and manga are discussed. Cross-listed with HAA 273.

AAS 273 | GLOBAL ASIAN LITERATURE | 4 quarter hours**(Undergraduate)**

Introduction to selected authors, genres, and topics in Asian American or Asian diasporic literature from the mid-nineteenth century to the present. Variable emphasis on different groups, genres, or historical periods. WRD 103 or HON 100 is recommended for this course. Cross-listed with ENG 273.

AAS 287 | INTRODUCTION TO ASIAN PHILOSOPHY | 4 quarter hours**(Undergraduate)**

What must we do in order to live a good life? In this class, we will examine this question through our study of Asian philosophy. In particular, we will ask -- do we have a duty to serve society? what is the relationship among desire, happiness, knowledge and virtue? what is the relationship among the human, the divine, and the world? While this class will be an introduction, it will not be primarily a survey. Rather we will examine and discuss several texts in depth, representing four of the philosophical traditions in South and East Asia -- Hinduism, Buddhism, Confucianism, and Daoism. The objectives of the course are to gain an understanding of Asian philosophy while exploring some of our own philosophical questions about the purpose and meaning of life.

AAS 290 | TOPICS IN ASIAN AMERICAN STUDIES | 4 quarter hours**(Undergraduate)**

This course, which varies from quarter to quarter, explores topics in Asian-American studies.

AAS 301 | ECONOMIC INEQUALITY AND POLITICAL TRAUMA | 4 quarter hours**(Undergraduate)**

Traditionally, the discourse of political trauma has been restricted to discussions of genocide. Yet in the contemporary political deployment of trauma, both the victims and those causing trauma have claimed the experience for themselves. This course departs from the traditional discourse by providing a framework for understanding how historical legacies, economic inequality and contemporary political contexts such as populist movements are linked. In light of the unusual circumstances owing to the COVID 19 emergency measures, the course plan also incorporates discussions of the amorphous social anxiety that is a feature of the current moment. The introductory section of the course begins with case studies in which the term trauma has been deployed in international political economy. The second section of the course builds a theoretical framework for understanding the links between political trauma and economic inequality using readings from psychoanalysis, social and literary theory, using case studies from the United States, South America, South Africa, the Middle East and East Asia. Case studies are NOT restricted to those regions and can include studies from other regions. The third and last section of the class examines the fledgling literature on resistance and activism in understanding and confronting political trauma. The course seeks to answer questions of how different groups come to define their experience as traumatic and how we can respond and set limits to engagement in political trauma. Note that while we attempt to understand why the term is so widely deployed, we also distinguish between those who have the social power to retaliate as opposed to those who cannot.

AAS 305 | RELIGION AND CULTURE IN SOUTH ASIA | 4 quarter hours**(Undergraduate)**

This course examines the interplay between religion and society in pre-modern and contemporary South Asia. The course will use such materials as epic texts, poetry, novels, journalism, film, music and art to explore how religion, gender, social class and politics are experienced in the lives of people in India and Pakistan. Cross-listed with REL 305.

AAS 315 | THE STATE & ECONOMIC GROWTH IN EAST ASIA | 4 quarter hours**(Undergraduate)**

A survey course focused upon key geographical factors contributing to the emergence of Japan as an international economic leader, and the rapid development of the People's Republic of China, Taiwan, Hong Kong, and South Korea, among others, as global economic players. Cross-listed with GEO 315.

AAS 324 | JAPANESE POPULAR CULTURE | 4 quarter hours**(Undergraduate)**

Globally celebrated for its creativity, world-building, and complexity, Japanese pop culture: including anime, manga, J-pop, drama, collectible figurines, cosplay, tv drama, film, and video games continues to push the boundaries of what it means to be human in the 21st century. Students will strengthen skills to analyze screen arts and other cultural products with specialized attention to how the content is conveyed in historical context. Themes include cyber-physical blending, gender-bending and performance, historical memory, national identity, and what it means to be human.

**AAS 325 | QUEER JAPAN | 4 quarter hours
(Undergraduate)**

This course surveys representations of same-sex sexuality from the 14th century to the present day in Japan. We will explore the intersection of history, politics, art, and culture through historiography, literature, film, photography, music, cartoons, and animation, examining "traditional" male-male sexuality, the emergence of the modern era of texts reflecting female-female sexuality, as well as the formation of new consciousness and subjectivities throughout the 20th century and into the 21st. Cross-listed with MOL 325.

**AAS 337 | ASIAN AMERICAN MEDIA REPRESENTATION | 4 quarter hours
(Undergraduate)**

This course examines the ways in which Americans of Asian descent are portrayed in popular media such as television, film, newspapers, and advertisement.

**AAS 338 | ASIAN CULTURE AND COMMUNICATION | 4 quarter hours
(Undergraduate)**

Reviews major Asian philosophical and religious traditions such as Hinduism, Confucianism, Taoism, and Buddhism and examines how these traditions influence and affect Asian cultures and communication behaviors, particularly communication among Indians, Chinese, Japanese, Koreans, and Asian Americans in various contexts. Cross-listed with INTC 338.

**AAS 341 | ZEN MIND | 4 quarter hours
(Undergraduate)**

A study of the thought and practice of Zen Buddhism, focusing on the role of Zen in shaping ideas, ethics and the arts in Japan and America. Cross-listed with REL 342.

**AAS 342 | ASIAN POLITICAL ECONOMY | 4 quarter hours
(Undergraduate)**

This course offers an overview of the geopolitics, culture and history behind the "East Asian Miracle." It provides students with the tools to analyze the core theories, actors, and current and historical events in the study of the international relations, business, politics, and economy of Asia. Cross-listed with PSC 343.

**AAS 343 | JAPANESE AMERICAN HISTORY IN THE US/CHICAGO | 4 quarter hours
(Undergraduate)**

The second course in a sequence of three content-based courses designed for advanced high learners and native speakers of Japanese to discuss authentic cultural, historical, or literary materials. Topics vary with offering: see current schedule for details. Recommended for students who have completed JPN 201-202-203 and JPN 311-312-313, or have equivalent proficiency in Japanese.

**AAS 344 | YOGA AND TANTRA | 4 quarter hours
(Undergraduate)**

An examination of the history, philosophy and cultural meaning of body-oriented liberative techniques as they developed on the Indian subcontinent and Himalayan region in Hinduism and Buddhism. Students registering for this course are expected to have studied one or both of these traditions in courses such as REL 142, 143, 242, or 243, or in other courses. Background in theory is also useful. Cross-listed with REL 344.

**AAS 345 | MORAL PHILOSOPHY, POLITICAL POWER, & RELIGION IN PRE-MODERN CHINA | 4 quarter hours
(Undergraduate)**

An exploration of the major traditions informing pre-modern Chinese perspectives on morality, politics, social and personal formation, as well as cosmological and religious anchoring. Topics include Confucianism, Mohism, early Daoism, Legalism, correlative cosmology, liturgical Daoism, Buddhism, Neo-Confucianism, and also China's traumatic encounter with western power and thought. The course not only addresses comparative issues concerning Chinese values in relation to western views, but also questions common comparative constructs such as those contrasting religion & power; individualism & communalism, and tradition & modernity. Cross-listed with REL 343.

**AAS 350 | ETHNIC MINORITY YOUTH: ADAPTATION, IDENTITY AND DEVELOPMENT | 4 quarter hours
(Undergraduate)**

Utilizing an ecological systems perspective, this course examines the challenges and resiliencies faced and acquired by ethnic minority youth. This course will closely examine developmental issues during adolescence that are complicated by being an ethnic minority, or child of immigrant parents. Issues examining the intersection of socio-political power dynamics, with acculturation/cultural adaptation, ethnic identity formation, and intergenerational family conflict will particularly be examined.

**AAS 351 | JAPANESE POLITICS | 4 quarter hours
(Undergraduate)**

This course examines the meeting of the ancient and the modern in the context of 21st century politics in Japan. Exploring political, economic, and cultural practices and institutions, this class provides an in-depth understanding of Japan's political system from its origins in samurai traditions to current challenges facing Japan's democracy and economy. Cross-listed with PSC 350.

**AAS 352 | CHINESE POLITICS | 4 quarter hours
(Undergraduate)**

This course examines the political system of China and the major domestic issues in contemporary Chinese politics. The course explores the rise and early governance of the Chinese Communist Party, the economic and political developments since the start of the reform (post 1978) era, and the main political challenges facing Chinese society today. Cross-listed with PSC 352.

**AAS 363 | YELLOW PERIL/YELLOW POWER: ASIAN AMERICANS IN THE MEDIA | 4 quarter hours
(Undergraduate)**

This seminar course explores the landscape of popular and visual culture in the U.S. along the axes of race, ethnicity, class, gender, and sexuality and cultural "difference." Using an intersectional and interdisciplinary approach, the course also examines Asian Pacific Islander American representation and cultural production. Cross-listed with CMNS 563.

**AAS 367 | LITERATURE OF THE VIETNAM WAR | 4 quarter hours
(Undergraduate)**

This course examines novels, short stories, and essays on the Vietnam war and its aftermath, Vietnamese society, literature of the Vietnam Era.

**AAS 373 | KYOTO (WORLD CITIES) | 4 quarter hours
(Undergraduate)**

Explores the art, architecture, and urban plan of Kyoto, the ancient capital of Japan. Kyoto became the seat of government and the home of the imperial court in 794, and it continued to serve as the cultural and religious center of the land until the nineteenth century. This course considers major artistic developments as they relate to main sites in Kyoto, especially palaces, temples, and shrines. The eras covered extend from the Heian to the Meiji period.

**AAS 385 | INTERNATIONAL ADVERTISING | 4 quarter hours
(Undergraduate)**

This course informs students about the complexity and nuances of marketing communications in the global marketplace. We will explore the factors affecting the views of funny TV commercials from Japan, emotional short films from Thailand, controversial ads from China, and many more interesting ad campaigns from around the globe. Understand why Asian marketers made the ads the way they are as we talk about the theories behind cultural dimensions. As we progress, we learn not only about advertising but cultures. How do people from other countries behave and why. This course is perfect for someone who wants to understand the nuances of cultural difference and learn about the Asian way to advertise.

**AAS 395 | INDEPENDENT STUDY IN GLOBAL ASIAN STUDIES | 4-8
quarter hours
(Undergraduate)**

Independent study. Variable credit.

Bilingual-Bicultural Education (BBE)

**BBE 96 | 100 FIELD EXPERIENCE HOURS IN ESL / BE DOCUMENTED | 0
quarter hours
(Undergraduate)**

Required of all Bilingual Bicultural students. Observations and participatory experience with children and youth in a school or agency. The observation hours are a prerequisite for student teaching and related professional courses. (0 credit hours)

**BBE 97 | 100 FIELD EXPERIENCE HOURS IN ESL / BE DOCUMENTED | 0
quarter hours
(Graduate)**

Required of all Bilingual Bicultural students. Observations and participatory experience with children and youth in a school or agency. The observation hours are a prerequisite for student teaching and related professional courses. (0 credit hours)

**BBE 300 | TEACHING ELEMENTARY ENGLISH LANGUAGE LEARNERS:
THEORY, POLICY AND PRACTICE | 4 quarter hours
(Undergraduate)**

This introductory course offers candidates a foundation in the critical elements in the education of English Language Learners (ELL) in the Elementary grades: second language acquisition, consequences of additive and subtractive bilingualism, culture and diversity, policies and law, ELL family involvement, language development standards, advocacy, and assessment. The course analyzes factors that influence the acquisition of the first and second language. Emphasis is given to the linguistic process in an individual's acquisition of two languages and the context in which both languages are developed alongside academic attainment. Multicultural perspectives and approaches are examined in relation to culturally and linguistically diverse students' backgrounds and experiences. Teaching practices, curriculum development, appropriate instructional materials and assessments are examined. Family/ community relations and partnerships, as well engagement of advocacy are also explored. Current federal and state policies related to ELLs are addressed. This course covers the Illinois Professional Teaching Standards related to addressing the academic, linguistic, and socio-emotional needs of ELLs.

**BBE 301 | TEACHING ADOLESCENT ENGLISH LANGUAGE LEARNERS
AND DIALECT SPEAKERS ACROSS THE CURRICULUM | 4 quarter hours
(Undergraduate)**

This course provides educators across disciplines in the middle and high school grades foundational knowledge for teaching and assessing English learners (ELs) and speakers of non-dominant varieties of English. The course focuses on fundamental concepts of second language acquisition in various language learning contexts, teaching and assessing English as a second language, policy and law relating to ELs' education, and the importance of maintaining ELs' home language(s) and culture(s). The course analyzes factors that influence the acquisition of first and second languages, including linguistic, cognitive, political, social, cultural and affective dimensions. Interdisciplinary perspectives of second language development in classroom practice is also addressed. **TCH 302 or SEC 364 is a prerequisite for this class.**

**BBE 302 | BILINGUAL-BICULTURAL PROGRAM DESIGN AND
CURRICULUM DEVELOPMENT | 4 quarter hours
(Undergraduate)**

Reviews theory and application of curriculum development to bilingual instructional programs, such as design, organizational patterns, materials and media, teacher training, parent and community involvement, and evaluation. Principal bilingual education program models are examined and analyzed. Includes a review of multiethnic literature and literacy that advocates for students' self-concept, acceptance, and sense of identity (includes 15 clinical hour requirement).

**BBE 304 | LANGUAGE, LITERACY AND CULTURE | 4 quarter hours
(Undergraduate)**

This course examines the linguistic, cultural, and social contexts in which culturally and linguistically diverse communities operate and their relation to educational practices. The class addresses sociolinguistic and multicultural perspectives on language and cultural diversity within and outside the U.S. Case studies examined in class readings provide the conceptual framework for multicultural education in the context of language and literacy development. This course is designed to assist future and current teachers in attaining an expanded understanding on the linguistic, cultural, and sociocultural theoretical frameworks that are at the core of educational transformation and social justice in the US. The course also aims to examine educators' roles in creating culturally and linguistically responsive curricula for diverse students. Topics include language and ethnicity, language and identity, language and social class, literacy practices, language standardization, language discrimination, dialects, language loss, and heritage languages. Includes clinical hour requirement.

**BBE 305 | THEORETICAL FOUNDATIONS IN BILINGUAL EARLY CHILDHOOD DEVELOPMENT | 4 quarter hours
(Undergraduate)**

This course is designed to equip bilingual childhood teachers with the knowledge and philosophy to work effectively in the education of early childhood language minority students in the context of bilingual/ESL programs. The course will explore the historical, socio-political and legal foundations of bilingual education programs in the United States. It will examine different models of language education programs: immersion, ESL pullout, transitional bilingual education, maintenance bilingual, enrichment or dual language. It will also address psycholinguistic and sociolinguistic principles upon which they are based.

**BBE 306 | FOUNDATIONS OF ENGLISH AS SECOND LANGUAGE INSTRUCTION IN EARLY CHILDHOOD EDUCATION | 4 quarter hours
(Undergraduate)**

Candidates explore English as a Second Language (ESL), theory and practice as it applies to young children and their families. Candidates also study the sociocultural, pedagogical, linguistic, and political issues underlying current models of education for non-English speaking children, as well as models for ESL instruction in early childhood settings. Critical emphasis is placed upon theories that support young learners in second language acquisition.

**BBE 307 | EQUITY ISSUES IN ASSESSMENT OF LANGUAGE LEARNERS | 4 quarter hours
(Undergraduate)**

Examines assessment procedures, including standardized and performance-based, as well as ethical standards and practices used in the assessment of culturally and linguistically diverse students. Equity and legal issues related to assessment practices, research, first and second language acquisition, bilingualism, cultural and sociopolitical issues related to assessment are discussed. Emphasizes existing biases in assessment and non-discriminatory assessment practices and policies. National, state, and local assessment policies are examined. Includes clinical hour requirement.

**BBE 310 | SPECIAL TOPICS IN LANGUAGE EDUCATION AND CULTURE | 4 quarter hours
(Undergraduate)**

This course is designed to explore a specific area of study in the field of linguistics, such as sociolinguistics, psycholinguistics, applied linguistics, language planning and policy, and cognitive bilingualism, among other related topics. The particular focus of study will vary and change as the course is offered. Includes clinical hour requirement.

**BBE 311 | FUNDAMENTALS OF ENGLISH LANGUAGE LEARNER EDUCATION | 4 quarter hours
(Undergraduate)**

This introductory course offers candidates a foundation in the critical elements in the education of ELLs: second language acquisition, consequences of additive and subtractive bilingualism, culture and diversity, policies and law, ELL family involvement, language development standards, advocacy, and assessment. The course analyzes factors that influence the acquisition of the first and second language. Teaching practices, curriculum development, selection of instructional materials, use of appropriate language and content assessments are examined. This course covers the Illinois Professional Teaching Standards related to addressing the academic, linguistic, and socio-emotional needs of ELLs.

**BBE 316 | SOCIOCULTURAL AND HISTORICAL PERSPECTIVES IN BILINGUAL EDUCATION | 4 quarter hours
(Undergraduate)**

Presents theoretical constructs of bilingual schooling from early childhood through adult in the U.S. and other multilingual societies from historical, theoretical and sociocultural perspectives. Emphasizes issues in bilingual education related to the sociocultural and legal aspects of language policy and bilingual education in the U.S. The historical trajectory of language policy and bilingual education in the U.S. is discussed in reference to Native American languages and early European settlers' language schooling practices. The focus shifts to 20th and 21st century bilingual education and immigration policies that have influenced both the advocacy for and opposition to bilingual education as well as the movement to make English the official language in the U.S.

**BBE 320 | ANALYZING RESEARCH ON IDENTITY, CULTURE & LANGUAGE EDUCATION | 4 quarter hours
(Undergraduate)**

Introduces students to, and engages them in reading, research design within the context of bilingual-bicultural education and second language learning and instruction. Students will consider important linguistic and sociocultural issues in language education as examined with various research methods, including quantitative, qualitative, and mixed methods. Students will conduct and present a mini-action research project about their own learning and development, and will write a cogent review of literature about a personally meaningful topic, problem, or issue related to language and culture education. (Includes 15 clinical hour requirement.) **BBE 310 and at least 4 BBE courses (or equivalent) is a prerequisite for this class.**

**BBE 324 | METHODS OF TEACHING ENGLISH AS A SECOND LANGUAGE | 4 quarter hours
(Undergraduate)**

This course introduces instructional methods, approaches, strategies and materials for teaching English language learners. Particular importance is placed on the relationship of reading and writing development to second language acquisition, teaching language and content, and fostering cognitive development through the four domains of reading, writing, speaking and listening. Includes clinical hour requirement.

BBE 325 | BILITERACY PRACTICES IN BILINGUAL EDUCATION AND ESL | 4 quarter hours

(Undergraduate)

Analyzes and evaluates methods and materials used in bilingual education and ESL programs. Stresses effective instructional strategies and best practices in first and second language literacy development and content learning. Reviews language teaching approaches and cooperative models of learning relating to development of reading and writing in the first and second language. Presents the acquiring language through content learning versus learning language programs. Investigates appropriate first language usage in bilingual classrooms, focusing on the different content areas, appropriate terminology for native language instruction, and the study of language distribution issues (includes 15 clinical hour requirement).

BBE 326 | THEORETICAL FOUNDATIONS OF TEACHING ESL AND WLE | 4 quarter hours

(Undergraduate)

This course introduces key foundational theories of English as a second language and world language education that form the basis of our development as language education practitioners and professionals. The course explores theories of language, theories of learning and learners from early childhood to adult, and theory-driven teaching, as well as the philosophical paradigms that inform them. Foundational theories are introduced as problem-solving tools that provide interdisciplinary perspectives of English as a second language and world language education, and as frameworks for critically reading literature on language education theory, research, and methods.

BBE 330 | LATINOS AND EDUCATION | 4 quarter hours

(Undergraduate)

This course examines historical and current issues related to the education of Latinos in the US that includes PK-12 and higher education. The course explores the sociolinguistic, theoretical, historical, sociocultural, legal, and political contexts that shape the educational experience of Latinos in the US. Demographic trends and data are examined in light of the various characteristics that make up the diverse Latino population. The course also analyses the theoretical, historical, and political constructs of bilingual schooling and the underlying assumptions and implications for Latino students. Current research conducted by prominent scholars in the field are presented and examined. The course considers factors that influence, positively or negatively, the educational attainment of Latino students. The readings and class discussions emphasize how power relations in the wider society influence patterns in Latino education outcomes and policy-making. The course also examines arguments, assumptions, and interpretations of current and past legislation in regards to the education of Latinos in the US.

BBE 350 | ENGLISH LANGUAGE LEARNERS IN THE MIDDLE GRADES | 4 quarter hours

(Undergraduate)

Presents an introduction to the field of English as a second language, with attention to fundamental concepts of second language acquisition in various language learning contexts. The course analyzes possible factors that influence the acquisition of the first and second language, including linguistic, cognitive, social, and affective dimensions. Emphasis is given not only to the linguistic process in individuals' acquisition of two languages, but also the social, cultural, political, and educational context in which both languages are developed alongside academic attainment. Discusses interdisciplinary perspectives of second language acquisition and their application to classroom practices. This introductory course is designed for mainstream educators and covers the Illinois Professional Teaching Standards related to addressing the academic, linguistic, and socio-emotional needs of ELLs. ***This course counts toward ESL endorsement. Co-requisites for this course are MGE 301 and MGE 311. In this course, students will: 1.

MGE 300 and Junior standing are prerequisites for this class.

BBE 355 | HOW ENGLISH WORKS: ENGLISH SYNTAX FOR ESL AND BILINGUAL EDUCATION TEACHERS | 4 quarter hours

(Undergraduate)

This course examines the structure of English from a descriptive linguistic framework. It addresses the inner workings of the English language through objective investigation of the lexical, phrasal, and clausal structures of the language to provide ESL and bilingual education teachers the syntactic foundation of the language they will teach. Topics include parts of speech, constituency, phrase structure, clause types, complements versus adjuncts, question formation, tense, negation, and the grammar of dialects. Additionally, this course will provide special emphasis on how these areas of English grammar interface with Common Core and WIDA standards for ELLs.

BBE 360 | SECOND, WORLD AND HERITAGE LANGUAGE ACQUISITION | 4 quarter hours

(Undergraduate)

This course is an introduction to the theoretical study of second, world and heritage language acquisition (SLA) from a generative and psycholinguistic perspective. The content of the class is founded on the major concepts and issues of language acquisition, including UG-access, L1-transfer, age effects, and the acquisition of form vs. meaning. The course pays particular attention to empirical second and world language studies at the syntax/semantics interface. Course readings and discussion examine the complexities of the processes involved in acquiring a world language that includes the relation between first and second language acquisition; contrastive and error analysis; interlanguage; the social and cultural influences on SLA; learner variability; learning strategies; and classroom interaction analysis. Issues surrounding second, world and heritage language acquisition are discussed and deliberated through university classroom experiences as well as required field experiences. Includes clinical hour requirement.

BBE 366 | FIRST AND SECOND LANGUAGE ACQUISITION | 4 quarter hours**(Undergraduate)**

This course examines principles, processes, theories, and research in first and second language acquisition and bilingualism with implications for language teaching. The course provides an introduction to the fields of first and second language acquisition (SLA) that include universal, individual, and social features and dimensions of the second language learning process that determine the nature and path of acquisition. These features include age and critical periods; cross-linguistic influences; role of the environment; cognitive contributions; interlanguage variability; linguistic features; motivation; and affect. Socio-cultural and sociopolitical aspects of second language acquisition and bilingualism are also discussed. Includes clinical hour requirement.

BBE 370 | LANGUAGE, LITERACIES AND CULTURES | 4 quarter hours**(Undergraduate)**

This course examines the interdisciplinary study of first, second and world languages and multiple L1 and L2 literacies in their cultural, social, and political contexts, with emphasis on issues of ethnicity, identity, social class, gender, power, and other related topics relative to ideologies of reading and writing the world through reading and writing the word. Especial focus is placed on these topics as they pertain to the extant research on language, literacy, and culture represented in language communities, as well as in the literature, art, music, and popular culture of those communities as a means of advocating for students' sense of identity as global citizens. Includes clinical hour requirement.

BBE 400 | TEACHING ELEMENTARY ENGLISH LANGUAGE LEARNERS: THEORY, POLICY AND PRACTICE | 4 quarter hours**(Graduate)**

This introductory course offers candidates a foundation in the critical elements in the education of English Language Learners (ELL) in the Elementary grades: second language acquisition, consequences of additive and subtractive bilingualism, culture and diversity, policies and law, ELL family involvement, language development standards, advocacy, and assessment. The course analyzes factors that influence the acquisition of the first and second language. Emphasis is given to the linguistic process in an individual's acquisition of two languages and the context in which both languages are developed alongside academic attainment. Multicultural perspectives and approaches are examined in relation to culturally and linguistically diverse students' backgrounds and experiences. Teaching practices, curriculum development, appropriate instructional materials and assessments are examined. Family/community relations and partnerships, as well engagement of advocacy are also explored. Current federal and state policies related to ELLs are addressed. This course covers the Illinois Professional Teaching Standards related to addressing the academic, linguistic, and socio-emotional needs of ELLs.

BBE 402 | DESIGNING LANGUAGE PROGRAMS | 4 quarter hours**(Graduate)**

Reviews theory and application of curriculum development to bilingual instructional programs, such as design, organizational patterns, materials and media, teacher training, parent and community involvement, and evaluation. Principal bilingual education program models are examined and analyzed. Includes a review of multiethnic literature and literacy that advocates for students' self-concept, acceptance, and sense of identity. Includes clinical hour requirement.

BBE 404 | LANGUAGE, LITERACY AND CULTURE | 4 quarter hours**(Graduate)**

This course examines the linguistic, cultural, and social contexts in which culturally and linguistically diverse communities operate and their relation to educational practices. The class addresses sociolinguistic and multicultural perspectives on language and cultural diversity within and outside the U.S. Case studies examined in class readings provide the conceptual framework for multicultural education in the context of language and literacy development. This course is designed to assist future and current teachers in attaining an expanded understanding on the linguistic, cultural, and sociocultural theoretical frameworks that are at the core of educational transformation and social justice in the US. The course also aims to examine educators' roles in creating culturally and linguistically responsive curricula for diverse students. Topics include language and ethnicity, language and identity, language and social class, literacy practices, language standardization, language discrimination, dialects, language loss, and heritage languages. Includes clinical hour requirement.

BBE 406 | SOCIOCULTURAL AND HISTORICAL PERSPECTIVES IN BILINGUAL EDUCATION | 4 quarter hours**(Graduate)**

Presents theoretical constructs of bilingual schooling from early childhood through adult in the U.S. and other multilingual societies from historical, theoretical and sociocultural perspectives. Emphasizes issues in bilingual education related to the sociocultural and legal aspects of language policy and bilingual education in the U.S. The historical trajectory of language policy and bilingual education in the U.S. is discussed in reference to Native American languages and early European settlers' language schooling practices. The focus shifts to 20th and 21st century bilingual education and immigration policies that have influenced both the advocacy for and opposition to bilingual education as well as the movement to make English the official language in the U.S.

BBE 407 | EQUITY ISSUES IN ASSESSMENT OF LANGUAGE LEARNERS | 4 quarter hours**(Graduate)**

Examines assessment procedures, including standardized and performance-based, as well as ethical standards and practices used in the assessment of culturally and linguistically diverse students. Equity and legal issues related to assessment practices, research, first and second language acquisition, bilingualism, and cultural and sociopolitical issues related to assessment are discussed. Emphasizes existing biases in assessment and non-discriminatory assessment practices and policies. National, state, and local assessment policies are examined. Includes clinical hour requirement.

BBE 408 | BILINGUAL EARLY CHILDHOOD DEVELOPMENT THEORETICAL FOUNDATIONS | 4 quarter hours**(Graduate)**

This course is designed to equip bilingual and second language teachers with the knowledge and philosophy to work effectively in the education of early childhood language minority students in the context of bilingual/ESL programs. The course will explore the historical, political and legal foundations of bilingual education programs in the United States. It will examine different models of bilingual programs and the psycholinguistic and sociolinguistic principles upon which they are based.

BBE 409 | ENGLISH AS A SECOND LANGUAGE INSTRUCTIONAL FOUNDATIONS IN EARLY CHILDHOOD SETTINGS | 4 quarter hours (Graduate)

Candidates explore English as a Second Language (ESL), theory, and practice as it applies to young children and their families. Candidates also study the socio-cultural, pedagogical, linguistic, and political issues underlying current models of education for non-English speaking children, as well as models for ESL instruction in early childhood settings. Critical emphasis is placed upon theories that support young learners in second language acquisition.

BBE 411 | FUNDAMENTALS OF ENGLISH LANGUAGE LEARNER EDUCATION | 4 quarter hours (Graduate)

This introductory course offers candidates a foundation in the critical elements in the education of English Language Learners (ELL): second language acquisition, consequences of additive and subtractive bilingualism, culture and diversity, policies and law, ELL family involvement, language development standards, advocacy, and assessment. The course analyzes factors that influence the acquisition of the first and second language. Emphasis is given to the linguistic process in an individual's acquisition of two languages and the context in which both languages are developed alongside academic attainment. Multicultural perspectives and approaches are examined in relation to culturally and linguistically diverse students' backgrounds and experiences. Teaching practices, curriculum development, selection of instructional materials, use of appropriate language and content assessments are examined. Family/community relations and partnerships, as well engagement of advocacy are also explored. Current federal and state policies related to ELLs are also addressed. This course covers the Illinois Professional Teaching Standards related to addressing the academic, linguistic, and socio-emotional needs of ELLs.

Status as a Graduate Education student is a prerequisite for this class.

BBE 425 | BILITERACY PRACTICES IN BILINGUAL EDUCATION AND ESL | 4 quarter hours (Graduate)

Analyzes and evaluates methods and materials used in bilingual education and ESL programs. Stresses effective instructional strategies and best practices in first and second language literacy development and content learning. Reviews language teaching approaches and cooperative models of learning relating to development of reading and writing in the first and second language. Presents the acquiring language through content learning versus learning language programs. Investigates appropriate first language usage in bilingual classrooms, focusing on the different content areas, appropriate terminology for native language instruction, and the study of language distribution issues. Includes clinical hour requirement.

BBE 450 | ENGLISH LANGUAGE LEARNERS IN THE MIDDLE GRADES | 4 quarter hours (Graduate)

Presents an introduction to the field of English as a second language, with attention to fundamental concepts of second language acquisition in various language learning contexts. The course analyzes possible factors that influence the acquisition of the first and second language, including linguistic, cognitive, social, and affective dimensions. Emphasis is given not only to the linguistic process in individuals' acquisition of two languages, but also the social, cultural, political, and educational context in which both languages are developed alongside academic attainment. Discusses interdisciplinary perspectives of second language acquisition and their application to classroom practices. This introductory course is designed for mainstream educators and covers the Illinois Professional Teaching Standards related to addressing the academic, linguistic, and socio-emotional needs of ELLs. ***This course counts toward ESL endorsement. Co-requisites for this course are MGE 401 and MGE 411. In this course, students will: 1.

MGE 400 is a prerequisite for this class.

BBE 451 | TEACHING DUAL LANGUAGE LEARNERS IN EARLY CHILDHOOD: THEORY, POLICY AND PRACTICE | 4 quarter hours (Graduate)

This introductory course is designed for early childhood educators and leaders, and covers the academic, linguistic, and socio-emotional needs of young dual language learners (English Learners). This course builds the foundation for the effective learning and teaching of dual language learners (DLLs) in the early childhood context. The course covers: second language acquisition, culture and diversity, policies and law, family involvement, state required second language development standards, advocacy, and assessment. The course analyzes possible factors that influence the acquisition of the first and second language, including linguistic, cognitive, social, and affective dimensions. The consequences of additive and subtractive bilingualism for dual language learners' cognitive development, academic progress, linguistic processing, and metalinguistic abilities are addressed. Cross-cultural aspects are addressed in the contexts of integrating and celebrating their cultural diversity in school/center contexts. Family/community relations and partnerships, as well engagement of advocacy are also explored. Current federal and state policies related to ELLs are addressed.

BBE 466 | FIRST AND SECOND LANGUAGE ACQUISITION | 4 quarter hours (Graduate)

This course examines principles, processes, theories, and research in first and second language acquisition and bilingualism with implications for language teaching. The course provides an introduction to the fields of first and second language acquisition (SLA) that include universal, individual, and social features and dimensions of the second language learning process that determine the nature and path of acquisition. These features include age and critical periods; cross-linguistic influences; role of the environment; cognitive contributions; interlanguage variability; linguistic features; motivation; and affect. Socio-cultural and sociopolitical aspects of second language acquisition and bilingualism are also discussed. Includes clinical hour requirement.

**BBE 474 | READING AND ELLS | 4 quarter hours
(Graduate)**

This course examines current theories of second language acquisition, literacy teaching and learning for English language learners (ELLs), and explores the relationships between the first and second language as it relates to the approach to teaching for transfer with ELLs.

This course links theory and practice by examining pedagogical approaches that most effectively promote ELLs reading and writing development. Multicultural and multilingual characteristics of ELLs are also discussed as they relate to their literacy development. Other factors that impact the academic achievement of ELLs in relation to literacy include sociocultural, sociolinguistic, and sociopolitical dimensions of teaching ELLs. This course is designed to assist teachers with a specialization in reading to develop expanded understandings of theoretical and pedagogical perspectives related to the literacy and language processes of students learning English as a new language. In addition, literacy assessment in the first and second language represented by standardized testing as well as authentic performance-based evaluations are also presented.

**BBE 476 | BILITERACY PRACTICES: SECONDARY/ADULT | 4 quarter hours
(Graduate)**

Analyzes and evaluates current research and pedagogical approaches used in second language programs in relation to literacy instruction in the secondary and adult classroom settings. The course focuses on effective instructional strategies and best practices in first and second language literacy development. Special attention is given to content area learning in relation to acquiring literacy skills in a second language for secondary students. The course reviews language and literacy instructional approaches and cooperative models of learning related to the development of reading and writing in the first and second language. Discussions center on issues of acquiring language and literacy skills through content instruction as well as authentic and performance-based assessment. Investigates appropriate first and second language development in bilingual, ESL and foreign language classrooms, focusing on the different aspects of literacy and subject matter learning (includes 15 clinical hour requirement).

BBE 490 | MULTICULTURAL AND MULTILINGUAL CHILDREN'S LITERATURE | 4 quarter hours

(Graduate)

This course will use multicultural and multilingual children's books to survey pluralism and linguistic diversity. Students will analyze folk and modern literature, including application of literary and culturally responsive criteria to these selections. Students will explore means of teaching using multicultural literature to encourage diverse learners and learning styles. Students will evaluate literature for its literary value as well as cultural acceptability. Students will read a broad variety of current multicultural literature for children and young adults. Students interested in specializing in one specific age group or grade level may focus their literature selections on literature appropriate for specific ages. Genres of children's and young adult literature will be examined and criteria for selection and renewing collections for school and public libraries will be discussed. Notable authors, poets, and illustrators of children's and young adult literature will be studied with an emphasis on those who contribute to bilingual, multilingual, and multicultural, and multiethnic collections. The use of children's and young adult literature to develop literacy, particularly for ELLs will be studied and the use of children's and young adult literature in meeting national, state, and district standards will be discussed. Children's and young adult literature will be examined from diverse perspectives in particular literature reflecting African American, Asian, Latino, and Native American cultures. However, students will read literature from all cultural groups including traditional children's and young adult literature.

**BBE 501 | TEACHING ADOLESCENT ENGLISH LANGUAGE LEARNERS AND DIALECT SPEAKERS ACROSS THE CURRICULUM | 4 quarter hours
(Graduate)**

This course provides educators across disciplines in the middle and high school grades foundational knowledge for teaching and assessing English learners (ELs) and speakers of non-dominant varieties of English. The course focuses on fundamental concepts of second language acquisition in various language learning contexts, teaching and assessing English as a second language, policy and law relating to ELs' education, and the importance of maintaining ELs' home language(s) and culture(s). The course analyzes factors that influence the acquisition of first and second languages, including linguistic, cognitive, political, social, cultural and affective dimensions. Interdisciplinary perspectives of second language development in classroom practice is also addressed.

TCH 402 or T&L 425 is a prerequisite for this class.

**BBE 510 | SPECIAL TOPICS IN LANGUAGE EDUCATION AND CULTURE | 4 quarter hours
(Graduate)**

This course is designed to explore a specific area of study in the field of linguistics, such as sociolinguistics, psycholinguistics, applied linguistics, language planning and policy, and cognitive bilingualism, among other related topics. The particular focus of study will vary and change as the course is offered. Includes clinical hour requirement.

BBE 520 | ANALYZING RESEARCH ON IDENTITY, CULTURE & LANGUAGE EDUCATION | 4 quarter hours**(Graduate)**

Introduces students to, and engages them in reading, research designed within the context of bilingual-bicultural education and second language learning and instruction. Students will consider important linguistic and sociocultural issues in language education as examined with various research methods, including quantitative, qualitative, and mixed methods. Students will conduct and present a mini-action research project about their own learning and development, and will write a cogent review of literature about a personally meaningful topic, problem, or issue related to language and culture education. For many students, this paper forms the beginning stages of their BBE Masters thesis or M.Ed. paper. (Includes 15 clinical hour requirement.)

SCG 410 or SCG 610 and at least 5 BBE courses (or equivalent) is a prerequisite for this class.

BBE 524 | METHODS OF TEACHING ENGLISH AS A SECOND LANGUAGE | 4 quarter hours**(Graduate)**

This course introduces instructional methods, approaches, strategies and materials for teaching English language learners. Particular importance is placed on the relationship of reading and writing development to second language acquisition, teaching language and content, and fostering cognitive development through the four domains of reading, writing, speaking and listening. Includes clinical hour requirement.

BBE 526 | THEORETICAL FOUNDATIONS OF TEACHING ESL AND WLE | 4 quarter hours**(Graduate)**

This course introduces key foundational theories of English as a second language and world language education that form the basis of our development as language education practitioners and professionals. The course explores theories of language, theories of learning and learners from early childhood to adult, and theory-driven teaching, as well as the philosophical paradigms that inform them. Foundational theories are introduced as problem-solving tools that provide interdisciplinary perspectives of English as a second language and world language education, and as frameworks for critically reading literature on language education theory, research, and methods.

BBE 530 | LATINOS AND EDUCATION | 4 quarter hours**(Graduate)**

This course examines historical and current issues related to the education of Latinos in the US that includes PK-12 and higher education. The course explores the sociolinguistic, theoretical, historical, sociocultural, legal, and political contexts that shape the educational experience of Latinos in the US. Demographic trends and data are examined in light of the various characteristics that make up the diverse Latino population. The course also analyses the theoretical, historical, and political constructs of bilingual schooling and the underlying assumptions and implications for Latino students. Current research conducted by prominent scholars in the field are presented and examined. The course considers factors that influence, positively or negatively, the educational attainment of Latino students. The readings and class discussions emphasize how power relations in the wider society influence patterns in Latino education outcomes and policy-making. The course also examines arguments, assumptions, and interpretations of current and past legislation in regards to the education of Latinos in the US.

BBE 550 | SPEECH-LANGUAGE PATHOLOGY AND THE BILINGUAL LEARNER EXPERIENCE | 2 quarter hours**(Graduate)**

The course is designed for future speech pathologists who will be serving bilingual/multilingual learners (English Learners) with speech and language disorders in the PK-12 school context to attain foundational understanding of the theories, research, policies, law, cultural factors, and instructional contexts of bilingual learners' education. The course will emphasize the nature of students' simultaneous and/or sequential bilingual development, literacy and academic development and the implications for specialized instructional and learning practices, culturally relevant curriculum, and family engagement as it pertains to PK-12 school-aged children with disabilities.

BBE 554 | METHODS OF TEACHING ESL: ELEMENTARY | 4 quarter hours**(Graduate)**

The course provides an in-depth study of instructional approaches and curricular designs for the second language elementary classroom setting. Presents reviews and critiques specific methods and strategies for teaching second language learners, as well as comparative methods of learning the first and second language. Emphasizes methods for implementing constructivist strategies such as cooperative learning, thematic approach, flexible grouping, and sheltered instruction. The course provides guidelines for planning effective lessons using both thematic units and content-based subject matter. A critical focus of this course is on teaching and learning ESL through the content areas for elementary students (includes 15 clinical hour requirement).

BBE 555 | HOW ENGLISH WORKS: ENGLISH SYNTAX FOR ESL AND BILINGUAL EDUCATION TEACHERS | 4 quarter hours**(Graduate)**

This course examines the structure of English from a descriptive linguistic framework. It addresses the inner workings of the English language through objective investigation of the lexical, phrasal, and clausal structures of the language to provide ESL and bilingual education teachers the syntactic foundation of the language they will teach. Topics include parts of speech, constituency, phrase structure, clause types, complements versus adjuncts, question formation, tense, negation, and the grammar of dialects. Additionally, this course will provide special emphasis on how these areas of English grammar interface with Common Core and WIDA standards for ELLs.

BBE 556 | METHODS OF TEACHING ESL: SECONDARY/ADULT | 4 quarter hours**(Graduate)**

The course explores the theoretical underpinnings and the applications of second-language theories and cultural knowledge to ESL teaching methodology and curriculum design in secondary and adult classroom settings. In addition, various approaches to second language teaching and learning as well as methods for modifying lessons to suit the needs of second-language learners to enhance their acquisition and use of English are presented. Concentrates on assisting educators in the development of appropriate strategies for teaching speaking, listening, reading, writing, and grammar in ESL environments. A major focus of this course is on teaching and learning ESL within the content areas through effective lesson planning using both thematic units and content-based subject matter. The course explores constructivist approaches such as sheltered language instruction (includes 15 clinical hour requirement).

BBE 560 | SECOND, WORLD AND HERITAGE LANGUAGE ACQUISITION | 4 quarter hours (Graduate)

This course is an introduction to the theoretical study of second, world and heritage language acquisition (SLA) from a generative and psycholinguistic perspective. The content of the class is founded on the major concepts and issues of language acquisition, including UG-access, L1-transfer, age effects, and the acquisition of form vs. meaning. The course pays particular attention to empirical second and world language studies at the syntax/semantics interface. Course readings and discussion examine the complexities of the processes involved in acquiring a world language that includes the relation between first and second language acquisition; contrastive and error analysis; interlanguage; the social and cultural influences on SLA; learner variability; learning strategies; and classroom interaction analysis. Issues surrounding second, world and heritage language acquisition are discussed and deliberated through university classroom experiences as well as required field experiences. Includes clinical hour requirement.

BBE 570 | LANGUAGE, LITERACIES AND CULTURES | 4 quarter hours (Graduate)

This course examines the interdisciplinary study of first, second and world languages and multiple L1 and L2 literacies in their cultural, social, and political contexts, with emphasis on issues of ethnicity, identity, social class, gender, power, and other related topics relative to ideologies of reading and writing the world through reading and writing the word. Especial focus is placed on these topics as they pertain to the extant research on language, literacy, and culture represented in language communities, as well as in the literature, art, music, and popular culture of those communities as a means of advocating for students' sense of identity as global citizens. Includes clinical hour requirement.

BBE 588 | INDEPENDENT STUDY IN BILINGUAL BICULTURAL EDUCATION | 1-4 quarter hours (Graduate)

Permission required. (1 credit hour)

BBE 589 | THESIS RESEARCH IN BILINGUAL-BICULTURAL EDUCATION | 4 quarter hours (Graduate)

A student writing a thesis registers for this course for four quarter hours of credit. When the thesis research and writing of the thesis are prolonged beyond the usual time, the program advisor may require the student to register for additional credit.

BBE 599 | LEADERSHIP IN EDUCATING LINGUISTICALLY DIVERSE LEARNERS | 4 quarter hours (Graduate)

The course is designed for educators who currently are or will be serving in a leadership capacity involving linguistically and culturally diverse learners. The purpose of this course is to develop foundational knowledge of the theories, research, policies, and practices related to the education of English language learners. The aim is to support current and future education leaders in constructing a well-informed basis of the critical elements of ELL education that include: second language acquisition, culture and diversity, policies and law, ELL family involvement, language development standards, advocacy, and assessment. The course examines various pedagogical and assessment constructs related to teaching ELLs, including state mandated standards and assessments such as ACCESS and WIDA standards.

BBE 600 | REGISTERED STUDENT IN GOOD STANDING | 0 quarter hours (Graduate)

Registration in this course is open to students who are not registered for any other courses but need to complete requirements/assignments for previously taken courses. It provides access to University facilities. Permission of advisor required. (0 credit hours)

Status as a Graduate Education student is a prerequisite for this class.

BBE 608 | CAPSTONE IN BILINGUAL-BICULTURAL EDUCATION | 0 quarter hours (Graduate)

Culminating experience(s) that help(s) students acquire the qualities of professionalism and leadership needed to play a significant role in one's professional education community. Students are expected to situate and understand educational issues in a larger context; keep current in and be able to organize and present a body of research on an education-related question; connect research with practical, professional activity; demonstrate mastery of a sub-field of a discipline; write in a format that meets accepted scholarly criteria and participate in an ongoing professional conversation. A final product such as master's paper(s), comprehensive exam, or collection of professional work products is required. (0 credit hours)

BBE 625 | CANDIDACY CULMINATING PROJECT (STUDENT IN GOOD STANDING) | 0 quarter hours (Graduate)

Registration in this course is required of all students who are not enrolled in a course but are completing culminating projects for their program of study, including theses, papers, and final portfolios. It provides access to university facilities. Permission of advisor required. Registration limited to three terms. (0 credit hours)

Status as a Graduate Education student is a prerequisite for this class.

BBE 699 | LEADERSHIP IN EDUCATING CULTURALLY DIVERSE LEARNERS | 4 quarter hours (Graduate)

The course is designed for educators who currently are or will be serving in a leadership capacity involving linguistically and culturally diverse learners. The purpose of this course is to develop foundational knowledge of the theories, research, policies, and practices related to the education of English language learners. The aim is to support current and future education leaders in constructing a well-informed basis of the critical elements of ELL education that include: second language acquisition, culture and diversity, policies and law, ELL family involvement, language development standards, advocacy, and assessment. The course examines various pedagogical and assessment constructs related to teaching ELLs, including state mandated standards and assessments such as ACCESS and WIDA standards.

Status as an EDD student with a Global Catholic Educational Leadership concentration is a prerequisite for this class.

Biological Sciences (BIO)

BIO 101 | NAVIGATING AND SUCCEEDING IN BIOLOGY | 2 quarter hours (Undergraduate)

This two-credit course is designed for Biology majors in their first year in the program (FR and transfer). The course will help students learn how to navigate and succeed in the Biology program, and the college of CSH more broadly. By the end of the course, every student will be empowered to chart their own journey for success. Students will also become part of the learning community where they will be provided with opportunities to develop a deep understanding of the resources available for support, strategies to overcome challenges they are likely to face and career paths that are available post-graduation.

BIO 104 | EVOLUTION AND SOCIETY | 4 quarter hours (Undergraduate)

In this course you will learn to identify questions that can or cannot be answered by science, the assumptions made by science, how evidence is connected to predictions, and evaluate the role of communication and peer-review to promote scientific progress. It also includes current and foundational issues in evolution starting with Darwin's voyage of the Beagle, the Darwinian Natural Selection Theory, and the impact of evolution on disease and society.

BIO 105 | THE SCIENCE BEHIND HUMAN HEALTH | 4 quarter hours (Undergraduate)

In this course, students will study the causes of health problems and how they are treated in order to develop their understanding of the nature and process of science. Students will learn how to recognize common problems with scientific studies and how to distinguish good science from pseudoscience. Genetics and nutrition will be key topics; hormonal disorders and infectious diseases will also be touched upon. By the end of the course, students will be better equipped to assess the quality of health science and other scientific information that they will encounter in the future.

BIO 110 | EVOLUTION IN HEALTH AND MEDICINE | 4 quarter hours (Undergraduate)

This course examines how scientists are increasingly incorporating evolutionary thinking and research methods in medicine and health sciences. Throughout the course, emphasis will be placed on how the scientific method works and how scientists go about answering pressing questions related to human health. By the end of the course, students should have a greater appreciation of the value of science and how our place in the natural world relates to the health challenges that we face.

BIO 115 | INTRODUCTION TO BIOLOGY | 4 quarter hours (Undergraduate)

Survey of major topics in the life sciences including biochemistry, cell biology, genetics, evolution, ecology, biodiversity, anatomy and physiology. Students will examine, graph, and draw conclusions from data related to course content, and will discuss the ethical practice of science and interactions between science and society. Earns SWK credit for the SI Domain of the Liberal Studies Program. Cannot receive credit for both BIO 115 and BIO 155, no credit for Biology majors or minors.

BIO 118 | MARINE BIOLOGY | 4 quarter hours (Undergraduate)

Study of marine diversity, marine ecosystems, and connections between oceans and humans. Student cannot receive credit for both BIO 118 and 160, No credit for Biology majors or minors.

MAT 120 is a prerequisite for this class.

BIO 119 | FROM MUSIC TO MIND: THE NEUROSCIENCE OF MUSIC | 4 quarter hours (Undergraduate)

This Science as a Way of Knowing course presents the foundations of neuroscience by exploring the relationship between music and the nervous system. Mechanisms of sensory perception and music cognition will be explored and related to motor systems and musical performance. The course will also cover the processes of learning, memory, and emotional content of musical experiences. Throughout the course, emphasis is placed on the process of scientific discovery.

BIO 120 | THE SCIENCE AND ART OF VISION | 4 quarter hours (Undergraduate)

This Science as a Way of Knowing course will survey how our understanding of visual system function and our perception of the visual arts has developed through scientific inquiry. We will examine hypotheses about the evolution of human vision and the nature of visual anomalies, and will discuss creative efforts to evaluate these hypotheses. We will review questions that remain unresolved, and identify related technical and/or ethical constraints. Basic knowledge of visual processing will be applied to explore how artists employ techniques that interface with the visual system to create specific impressions.

BIO 121 | INFECTIOUS DISEASES AND IMMUNITY | 4 quarter hours (Undergraduate)

This course is designed to introduce students to the world of microorganisms, especially those which cause infectious diseases and to explain how the immune system protects the body against these organisms. Cannot receive credit for both BIO 121 and BIO 161, No credit for Biology majors or minors.

BIO 122 | INTRODUCTION TO PALEOBIOLOGY | 4 quarter hours (Undergraduate)

This course focuses on the concepts and practices of paleobiology, the scientific study of the biology of extinct organisms preserved as fossils. No credit for Biology majors or minors.

BIO 126 | BRAIN AND BEHAVIOR | 4 quarter hours (Undergraduate)

Examines basic concepts in neurobiology, including how the brain is organized, how it sends messages throughout the body, and how these messages turn into daily activities such as sensing, moving, sleeping, feeling, and learning. We also discuss how these behaviors are altered due to challenge or dysfunction in the cases of substance abuse, mental health disorders, stress, and neurodevelopmental and neurodegenerative disease. Cannot receive credit for both BIO 126 and BIO 162. Formerly BIO 206. No credit for Biology majors or minors or Neuroscience majors.

BIO 128 | STRESS, HORMONES AND THE NERVOUS SYSTEM | 4 quarter hours (Undergraduate)

A study and discussion of the basic concepts of stress and stressors, and their effects on the functioning of the Nervous System, the Endocrine System and the Immune System; the feedback influence of hormones and neurochemicals on cerebral processing, and the relation of these phenomena to health and behavioral medicine. Formerly BIO 208. No credit for Biology majors or minors or Neuroscience majors.

BIO 134 | HOW THE HUMAN BODY WORKS | 4 quarter hours (Undergraduate)

Fundamentals of human body functions through an examination of organs and organ systems. The quantitative component of this course will explore the concepts of scientific discovery through structured out-of-class projects. Cannot receive credit for both BIO 202 and BIO 134. Formerly BIO 224. No credit for Biology majors or minors.

BIO 155 | INTRODUCTION TO BIOLOGY WITH LABORATORY | 4 quarter hours**(Undergraduate)**

This lecture-laboratory course deals with the scientific method, biological chemistry, structure and function of cells, organs, and organ systems, heredity, evolution and ecology. Course includes a laboratory experience involving biological concepts discussed in class. Cannot receive credit for both BIO 115 and BIO 155. No credit for Biology majors or minors.

BIO 156 | FOOD, FUEL FOR LIFE | 4 quarter hours**(Undergraduate)**

Food from a biological perspective: defined at the chemical and biochemical level and as it fuels life through metabolism and nutrition. Other topics include improving foods by traditional breeding and new genetic engineering technology, food production, sustainable agriculture; food safety issues, and feeding world populations. No credit for Biology majors or minors.

BIO 160 | MARINE BIOLOGY WITH LAB | 4 quarter hours**(Undergraduate)**

Study of marine diversity; marine ecosystems; and connections between oceans, the atmosphere, and humans. Lecture-Laboratory. Cannot receive credit for both BIO 118 and BIO 160. No credit for Biology majors or minors.

MAT 120 is a prerequisite for this class.

BIO 161 | INFECTIOUS DISEASES AND IMMUNITY WITH LABORATORY | 4 quarter hours**(Undergraduate)**

This course is designed to introduce students to the world of microorganisms with particular emphasis on how microorganisms cause disease and the actions of the human body in fighting disease. This course includes a laboratory experience to reinforce concepts and introduce students to practical aspects of disease causing microorganisms. Cannot receive credit for both BIO 121 and BIO 161. No credit for Biology majors or minors.

BIO 162 | THE BRAIN: BIOLOGY AND BEHAVIOR | 4 quarter hours**(Undergraduate)**

Explores basic concepts in neurobiology, including the organization and evolution of the vertebrate system, how the nervous system sends messages through the body and how these messages are translated into the variety of human behaviors. Alterations in behavior due to brain disease or injury is also discussed. The laboratory elaborates on lecture material and provides insight into how scientific reasoning and testing can help to discover how the brain works. Cannot receive credit for both BIO 126 and BIO 162. Formerly BIO 239. No credit for Biology majors or minors or Neuroscience majors.

BIO 166 | INTRODUCTION TO PLANT BIOLOGY WITH LAB | 4 quarter hours**(Undergraduate)**

This course deals with the characteristic features of higher plants, plant products that are beneficial to humans, structure, physiology and ecology of cultivated plants, and modern horticultural and genetic approaches to the improvement of plants and plant productivity. No credit for Biology majors or minors.

BIO 183 | NATURAL HISTORY OF THE GALAPAGOS | 4 quarter hours (Undergraduate)

This course is designed to present students with the diversity and unique life forms that exist on the Galapagos Islands and the nearby coastal region of Ecuador. The organisms of the Galapagos Islands are isolated from the mainland of South America, resulting in a large number of animal and plant species found only on these islands. This course will cover the ecosystems, geology, and plant/animal adaptations of these islands, and on the way in which these unique adaptations relate to the ecological pressures found on the islands and the surrounding marine environment. Comparisons between mainland and island populations will be discussed to help demonstrate the way in which new ecological pressures on isolated ancestral populations can give rise to evolution.

BIO 191 | GENERAL BIOLOGY I FOR SCIENCE MAJORS | 4 quarter hours (Undergraduate)

Focuses on the unity of life: its biochemical and cellular makeup and functions, the acquisition and utilization of energy, and the storage and utilization of genetic information. Lecture-laboratory. CHE 130 and CHE 131 are recommended as corequisites.

MAT 130 is a prerequisite for this class.

BIO 192 | GENERAL BIOLOGY II FOR SCIENCE MAJORS | 4 quarter hours (Undergraduate)

Introduction to evolution, ecology, organismal development and diversity. Lecture-laboratory.

A grade of C- or higher in BIO 191 is a prerequisite for this class.

BIO 193 | GENERAL BIOLOGY III FOR SCIENCE MAJORS | 4 quarter hours (Undergraduate)

Deals primarily with diversity and development within the plant and animal kingdoms including basic principles of physiology. Lecture-laboratory.

A grade of C- or higher in BIO 192 is a prerequisite for this class.

BIO 201 | HUMAN ANATOMY | 4 quarter hours**(Undergraduate)**

Structure of the human body with an emphasis on gross anatomy. Lecture-laboratory. Lecture covers human anatomy; laboratory emphasis on feline dissection.

At least Sophomore Standing is a prerequisite for this course.

BIO 202 | HUMAN PHYSIOLOGY | 4 quarter hours**(Undergraduate)**

Introduction to concepts and mechanisms of human organ system function including respiratory, cardiovascular, renal, muscular, nervous, endocrine and digestive systems. Lecture-laboratory. Primarily for Health Science majors. No credit for Biology majors or minors. Cannot receive credit for both BIO 202 and BIO 134.

At least Sophomore Standing is a prerequisite for this course.

BIO 206 | BIostatISTICS | 4 quarter hours**(Undergraduate)**

A survey of a variety of statistical methods used to analyze biological data.

BIO 193 or instructor consent is a prerequisite for this class.

BIO 209 | PLANT BIOLOGY | 4 quarter hours**(Undergraduate)**

A study of plant evolution, diversity, reproduction, developmental plant anatomy, regulation of plant growth and development, and plant physiology.

BIO 193 is a prerequisite for this class.

**BIO 210 | MICROBIOLOGY | 4 quarter hours
(Undergraduate)**

Biology of microorganisms with emphasis on viruses, bacteria, fungi, and protozoa. Lecture-laboratory.

A grade of C- or better in BIO 193 is a prerequisite for this class.

**BIO 215 | ECOLOGY | 4 quarter hours
(Undergraduate)**

This course provides a broad survey of ecological principles and methods of lab and field investigation, using ecological theory to explain patterns observed in nature. Topics link interactions between organisms and their environment to their consequences in populations, communities, and ecosystems, including: the distribution and abundance of organisms in nature; factors that influence population size, growth and regulation; species interactions; community organization and diversity; and ecosystem level processes focused on moving energy and matter among living and nonliving parts of the environment. Labs involve applying ecological methods and sampling techniques to better understand ecological concepts and to gain an increased awareness of the organization and complexity in the natural world. Labs emphasize hypothesis testing and experimental design, the analysis of ecological data, and communicating research findings.

BIO 193 is a prerequisite for this class.

**BIO 220 | BIOTECHNOLOGY | 4 quarter hours
(Undergraduate)**

This course will address aspects of the research and methodologies used in Modern Biotechnology, and place the field in the context of current societal and ethical concerns. Lecture-laboratory.

BIO 193 is the prerequisite for this course.

**BIO 225 | PHYSIOLOGY OF POVERTY | 4 quarter hours
(Undergraduate)**

Low socioeconomic status is associated with psychological stress, nutritional challenges, and toxin exposure, in addition to low access to high-quality healthcare and education often discussed. In the US, it is also inseparable from racism, on a personal and structural level. This course will consider the effects of these stressors in driving cardiovascular, metabolic, immunological, and neurological diseases that contribute to striking disparities in quality of life and lifespan. With the support of lecture introductions, students will interpret data from basic research, biomedical studies, and epidemiology, and integrate them with public health and sociological perspectives. Documentaries and popular texts will contextualize these data and foster reflection and discussion in class meetings. By the end of the course, students will be able to apply what they have learned from the breadth of their scientific and liberal arts coursework to understand the critical challenges in addressing the impacts of socioeconomic inequality on human health.

BIO 193 is a prerequisite for this class.

**BIO 230 | EPIDEMIOLOGY | 4 quarter hours
(Undergraduate)**

This course will involve the study of the frequency and distribution of human disease. Students will learn how the health of a population is measured, and how medical interventions are quantitatively evaluated. Students will analyze data from historical and modern health studies, including population surveys, case-control studies, cohort studies, and clinical trials for prevention and treatment.

BIO 206 is a prerequisite for this class.

**BIO 235 | EVOLUTION | 4 quarter hours
(Undergraduate)**

This lecture/laboratory course will examine basic selection, population genetics, development, speciation, extinction, systematics, and the history of evolution. In the lab, students will learn some of the modern research methods used in the study of evolution.

BIO 193 is a prerequisite for this class.

**BIO 250 | CELL BIOLOGY | 4 quarter hours
(Undergraduate)**

Fundamentals of cell form and function studied at the molecular and organelle level, including basic cellular biochemistry, ultrastructure and physiology. Lecture-laboratory.

A grade of C- or better in BIO 193 and a grade of C- or better in CHE 134 (or CHE 138 or CHE 144) are prerequisites for this class.

**BIO 260 | GENETICS | 4 quarter hours
(Undergraduate)**

Transmission of heritable traits, nature of genetic material, manner of its expression, its mutability, and its significance with respect to organismal and species variation. Lecture-laboratory.

A grade of C- or better in BIO 193 is a prerequisite for this class.

**BIO 270 | COMPARATIVE VERTEBRATE ANATOMY | 4 quarter hours
(Undergraduate)**

This lecture-laboratory course explores the diversity, anatomy, and evolution of vertebrates. The laboratory portion includes dissection and observation of various vertebrates.

BIO 192 and BIO 193 are a prerequisite for this class.

**BIO 290 | TOPICS IN BIOLOGY | 2-4 quarter hours
(Undergraduate)**

Occasional courses offered at intermediate levels. See the schedule of classes for current offerings. 2 or 4 quarter hours.

Sophomore standing is a prerequisite for this class.

**BIO 299 | INTRODUCTION TO RESEARCH | 2-4 quarter hours
(Undergraduate)**

This course provides the opportunity to work with a faculty mentor in Biology on a project that provides an introduction to the research experience. Each student will work on a research project either individually or as a member of a collaborative team. Students will gain experience reading primary literature, collecting and analyzing data, presenting their research and generating a written report. Relevant safety and ethical training will be provided based on the specific proposed research. Sophomore standing required. In some cases, sophomore standing can be waived with consent of the faculty mentor.

**BIO 301 | ANIMAL BEHAVIOR | 4 quarter hours
(Undergraduate)**

An exploration of the types of animal behavior and modifiers of behavior as based on neuroendocrine function, with special emphasis on Felids. Lecture - Field Studies. Laboratory required.

BIO 191, BIO 192, BIO 193, BIO 206 and (BIO 215 or BIO 235) are a prerequisite for this class.

**BIO 302 | STUDENT TEACHING EXPERIENCE | 4 quarter hours
(Undergraduate)**

Students will work with lecture instructors to develop effective approaches for communicating and teaching Biology. Completion of the course requires students to work as part of a collaborative team to teach a biology laboratory section during the same quarter.

BIO 303 | INTRODUCTION TO SCIENTIFIC RESEARCH | 4 quarter hours (Undergraduate)

Introduction to Scientific Research. Course requires that student has had (or currently having) experience in scientific research.

BIO 304 | FIELD METHODS FOR BIOLOGISTS | 4 quarter hours (Undergraduate)

The course will focus on the methods needed to initiate and undertake observations on Midwest ecosystems. Students will learn methods and put into practice the tools required to begin a site inventory and to assess population characteristics. The data gathered by the class will be archived and used as a starting point for subsequent studies. Each student will have an original research project involving extensive field work in nature.

Junior Standing or above is a prerequisite for this class.

BIO 306 | RESEARCH METHODS & APPLIED BIOSTATISTICS | 4 quarter hours (Undergraduate)

Approaches to conducting research and a variety of statistical approaches will be discussed and used to answer questions applied to biological data. A computer lab will introduce and use the statistical software program R for graphing and statistically analyzing biological data sets. Includes such topics as: study design, data management, presenting data, analysis of variance (one-way and multi-factor), analysis of covariance, multiple regression, logistic regression, and AIC model selection.

BIO 206 is a prerequisite for this class.

BIO 307 | ANIMAL PHYSIOLOGY | 4 quarter hours (Undergraduate)

Physiology is a branch of biology dealing with the functions of living organisms; it addresses questions that relate to how living organisms work. This lecture-laboratory course focuses on the physiology of a broad range of animals including both vertebrates and invertebrates. The primary objectives of the course are (1) to define many of the physiological challenges experienced by animals living in different environments (respiratory gas exchange, temperature regulation, ion and water balance, etc.) and (2) to study the strategies and physiological mechanisms involved in dealing with these challenges. Although this course will take a broad approach examining many interesting physiological adaptations, students will learn to appreciate that there are far more similarities between how different animals do things than there are differences. (Cannot receive credit for both BIO 307 and BIO 308. Cannot receive credit for BIO 307 if credit already earned for BIO 310.)

A grade of C- or better in BIO 250 is a prerequisite for this class.

BIO 308 | HUMAN PHYSIOLOGY | 4 quarter hours (Undergraduate)

Physiology is a branch of biology dealing with the functions of living organisms; it addresses questions that relate to how living organisms work. This lecture-laboratory course focuses on human physiology at the organ system level. The human approach has immediate personal relevance; most of us are interested in how the human body solves the basic problems associated with life. The primary objectives of the course are (1) to define many of the physiological problems experienced by the human body (respiratory gas exchange, body nutrition, temperature regulation, body fluid regulation, etc.), (2) to study the concepts and mechanisms involved in solving these problems, and (3) to evaluate the effects of various disease states (e.g., emphysema, hypertension, renal failure, fever, hypercholesterolemia, diabetes) on normal body function. Although this course focuses on the human organism, the concepts and mechanisms to be addressed are applicable to a broad range of other vertebrates. (Cannot receive credit for both BIO 307 and BIO 308. Cannot earn credit for BIO 308 if received credit for BIO 310.)

A grade of C- or better in BIO 250 is a prerequisite for this class.

BIO 309 | PLANT PHYSIOLOGY | 4 quarter hours (Undergraduate)

The purpose of this course is to provide students with the opportunity to take a detailed look at how vascular plants function. Specifically to understand what biochemical life sustaining processes are occurring in the plant, what a plant needs from the environment, and how a plant reacts to and influences its environment. The general topics that will be covered in this course include: 1) The properties of water and its function in plants; 2) Substances moved in plants and the pathways involved in this movement; 3) Mineral uptake and roles of essential elements; 4) Intermediary metabolism and metabolic regulation as they pertain to plants; and 5) Control of plant growth and development. The laboratory portion of this course will be used to reinforce and expand upon the topics covered in lecture.

BIO 250 or instructor consent is a prerequisite for this class.

BIO 311 | HISTOLOGY | 4 quarter hours (Undergraduate)

A Lecture/Laboratory course covering the microscopic structure of the tissues that make up animal organs. The development of these tissues as well as their relationship to the principles of gross anatomy, physiology, cell biology and molecular biology is stressed.

A grade of C- or better in BIO 193 is a prerequisite for this class.

BIO 312 | TOPICS IN EXERCISE PHYSIOLOGY | 4 quarter hours (Undergraduate)

This course provides an introduction to exercise physiology to enable exploration of current research topics in the field. Weekly discussion and presentation of articles from peer-reviewed journals will reinforce and elaborate on concepts covered in lecture. Topics include: muscle structure and bioenergetics, cardiovascular and respiratory responses to exercise, human evolution and endurance, training and adaptation, nutrition and ergogenic aids, and the relationships between exercise, health, and longevity.

BIO 250 or instructor consent is a prerequisite for this class.

**BIO 313 | CELL CULTURE METHODS | 4 quarter hours
(Undergraduate)**

This course will focus on the hands-on skills in cell culture techniques such as: operate and maintain tissue culture equipment and cell cultures; maintain aseptic techniques during the preparation of stock and working solutions; autoclave glassware and solutions; maintain a sterile working condition all through; perform cell culture assays to determine cell viability, movement and death; design, perform and troubleshoot experiments and equipment; data analysis; participate and strictly follow universal or employer sponsored cell culture safety training standards; handle and dispose of biohazard materials per safety standards; maintain a lab notebook; and establish good practices in cell culture, communication of results and overall team skills.

BIO 210 or BIO 220 or BIO 250 or BIO 260 is a prerequisite for this class.

**BIO 315 | TOPICS IN ECOLOGY | 4 quarter hours
(Undergraduate)**

The focus of this course is to read and critique classic papers in ecology and to connect their foundational ideas with modern research and understanding.

BIO 215 is the prerequisite for this course.

**BIO 316 | PHYCOLOGY | 4 quarter hours
(Undergraduate)**

Introduction to algae with emphasis on taxonomy, morphology, ultrastructure, physiology, life histories of freshwater and marine species. Lecture-laboratory. Cross-listed as BIO 416.

BIO 193 is a prerequisite for this class.

**BIO 317 | AQUATIC BIOLOGY | 4 quarter hours
(Undergraduate)**

The study of biological, physical and chemical phenomena in freshwater environments. Emphasis on organisms and their ecology. Lecture-laboratory.

BIO 193 and either BIO 206 or BIO 215 or BIO 235 are the prerequisites for this course.

**BIO 318 | FIELD STUDIES IN MARINE AND ESTUARINE BIOLOGY | 4 quarter hours
(Undergraduate)**

This course provides a Course-Based Undergraduate Experience (CURE) and is designed for science majors with an interest in marine and estuarine biology. The primary objectives of the course are: 1) to explore the diversity of marine and estuarine life; 2) to understand the manner in which physical and biological factors influence biological diversity in marine systems; 3) to gain an authentic research experience; and 4) to develop professional connections in marine science.

BIO 193 and either BIO 206 or BIO 215 or BIO 235 are prerequisites for this course (or consent of instructor).

**BIO 319 | TOPICS IN BEHAVIORAL PARASITOLOGY | 4 quarter hours
(Undergraduate)**

This course is designed for science majors and graduate students with an interest in animal behavior, ecology, evolution, health science, veterinary science and parasitology. The course adopts an integrative approach to the study of Behavioral Parasitology, which draws on modern developments in the fields of Animal Behavior, Parasitology, Ecology and Evolution. The primary objectives of the course are to: 1) explore the diverse relationships that occurs between parasite infection and host behavior; 2) understand proximate mechanisms that underlie behavioral manipulation by parasites; 3) explore the ecological and evolutionary impacts of behavioral manipulation in nature; 4) extend findings from animal systems to human-related issues (health, psychology); 5) develop familiarity with reading and interpreting primary literature. The teaching approach will be primarily discussion- and presentation-based and will be highly-interactive in nature.

BIO 215 or BIO 235 is the prerequisite for this course.

**BIO 320 | ADVANCED MICROBIOLOGY | 4 quarter hours
(Undergraduate)**

Advanced microbiology lecture-lab course designed for science majors and graduate students that will focus on developing technical and critical thinking skills in the field of microbiology. Labs will involve independent or small group research projects.

BIO 210 or BIO 220 is the prerequisite for this course.

**BIO 321 | MOLECULAR METHODS IN ECOLOGY AND EVOLUTION | 4 quarter hours
(Undergraduate)**

This course will provide hands-on experience in methods of detecting and analyzing molecular variation in nature. By the end of the course, students should be competent employing molecular markers to answer a wide variety of basic questions in ecology and evolution. Molecular Methods in Ecology and Evolution is a course-based undergraduate research experience (CURE).

BIO 215 or BIO 235 is a prerequisite for this class.

**BIO 325 | PALEOBIOLOGY | 4 quarter hours
(Undergraduate)**

This lecture/laboratory course will introduce students to various principles of paleobiology and to provide a broad survey of important taxonomic groups. This course will cover topics such as: the concept of geologic time, evolution, extinction, morphology, taxonomic classification, fossilization, paleoecology, biogeography, and biostratigraphy. The laboratory portion of the course will reinforce the lecture topics and offer an opportunity to examine fossil specimens and compare them with modern forms.

BIO 192, BIO 193 and (BIO 215 or BIO 335) or instructor's consent are a prerequisite for this class.

**BIO 330 | DEVELOPMENTAL BIOLOGY | 4 quarter hours
(Undergraduate)**

A survey of developmental phenomena in animals from fertilization to sexual maturity. Students will gain a current understanding of the genetic, cellular, and environmental mechanisms that shape the body and its major organs.

BIO 250 and BIO 260 are a prerequisite for this class.

BIO 331 | TOPICS IN DEVELOPMENTAL BIOLOGY | 4 quarter hours (Undergraduate)

This seminar course examines the current embryological literature using both evolutionary and molecular perspectives. Previous student-led topics include: how early embryos are organized, the signals controlling left-right asymmetry, the evolutionary origin of feathers and the development of the retina.

BIO 330 or 360 is a prerequisite for this class.

BIO 332 | POPULATION ECOLOGY | 4 quarter hours (Undergraduate)

This course covers concepts and models in population ecology and their applications for predicting population trends and disease spread across populations, understanding conservation biology approaches, and the sustainable management of wildlife populations.

ENV 250 or BIO 215 is a prerequisite for this class.

BIO 335 | CONCEPTS IN EVOLUTION | 4 quarter hours (Undergraduate)

Study of evolution and diversity in the living world. Lecture only.

BIO 235 or (BIO 215 and BIO 260) are a prerequisite for this class.

BIO 339 | CELLULAR NEUROBIOLOGY | 4 quarter hours (Undergraduate)

This course examines the cellular and molecular mechanisms of neuronal function and the changes that occur in processes such as learning and memory. Emphasis on electrophysiology, synaptic communication, and cellular signaling. Cross-listed with BIO 439 and NEU 339.

BIO 250 (or NEU 201 or PSY 377 or HLTH 301) is a prerequisite for this class.

BIO 340 | BEHAVIORAL NEUROSCIENCE | 4 quarter hours (Undergraduate)

Explores the organization of the nervous system on a gross anatomical level and based on functional units. The emphasis is on understanding how individual behaviors are produced by different neural systems and how these individual behaviors integrate into the activities of whole organisms. Formerly Systems Neurobiology. Cross-listed as BIO 440.

BIO 307 or BIO 308 or BIO 339 or NEU 201 or NEU 339 or HLTH 301 or PSY 377 is the prerequisite for this course.

BIO 341 | TOPICS IN NEUROBIOLOGY | 4 quarter hours (Undergraduate)

A seminar course examining current topics in neurobiology. Original readings will include both current review and classic neuroscience articles.

BIO 340 (or BIO 339 or NEU 339 or BIO 342 or PSY 377) is a prerequisite for this class.

BIO 342 | COGNITIVE NEUROSCIENCE | 4 quarter hours (Undergraduate)

This course explores the neuroscience of human behaviors such as emotions, attention, executive function, language, learning, memory, and social interaction by exploring both the underlying biological mechanisms and the psychological theories behind these behaviors. Cognitive Neuroscience is an emerging field of study that attempts to help one gain an understanding of the interdisciplinary nature of the human mind.

NEU 201 (or BIO 339 or BIO 340 or BIO 341 or PSY 377) is a prerequisite for this class.

BIO 345 | TOPICS IN PALEOBIOLOGY | 4 quarter hours (Undergraduate)

A seminar course examining various topics in paleobiology (the study of ancient life) including morphological concepts, macroevolutionary processes, extinction events, phylogenetic systematics, paleoecology, paleobiogeography, and the adequacy of the fossil record. Readings include classic and recent articles in the fields of paleobiology.

BIO 192, BIO 193 and (BIO 215 or BIO 235) or instructor's consent are a prerequisite for this class.

BIO 347 | TOPICS IN MEDICAL BACTERIOLOGY | 4 quarter hours (Undergraduate)

This course will address current topics of concern and research in medical bacteriology. Students participating in this course will explore key concepts used in bacterial pathogenesis and learn how to critically appraise recent research papers in the field.

BIO 210 or BIO 220 (or consent of instructor) is a prerequisite for this class..

BIO 348 | THE BIOLOGY OF INFECTION | 4 quarter hours (Undergraduate)

This course will provide students with detailed knowledge of medically important bacteria. The course will first examine common events in infections and the body's responses to infection. We will highlight in these studies the changes in both hosts and pathogens as strategies of infection and immunity evolve relative to one another. Within this framework we will examine a spectrum of infectious diseases in detail.

BIO 210 and BIO 370 are a prerequisite for this class.

BIO 349 | TOPICS IN MICROBIOLOGY AND BIOTECHNOLOGY | 4 quarter hours (Undergraduate)

This course will address current topics of concern and research in microbiology and biotechnology. Students participating in this course will explore fundamental concepts being used and new discoveries and emerging technologies in microbiology and biotechnology. Students will learn how to critically appraise recent research papers in these fields.

BIO 210 or BIO 220 is a prerequisite for this class.

BIO 352 | ADVANCED COMPARATIVE PHYSIOLOGY | 4 quarter hours (Undergraduate)

Comparative and environmental approach to the functions and mechanisms of vertebrate organ systems. Selected topics will be addressed using a lecture/discussion/seminar format. Cross-listed as BIO 452.

BIO 250 is a prerequisite for this class.

BIO 355 | GENETIC TOXICOLOGY | 4 quarter hours (Undergraduate)

This course will deal with the study of agents that damage the genome or alter the proper functioning of the genome that can lead to disease in humans. Topics covered will include basic spectrum of genetic damage and chromosomal effects, mechanisms of mutations, DNA repair, genetic assays used for evaluation of genetic toxicology, health consequences of genetic damage, including cancer and inheritable mutations, and the current position of US government and global regulatory agencies on the issues of genetic toxicology.

BIO 260 is a prerequisite for this class.

BIO 360 | MOLECULAR BIOLOGY | 4 quarter hours (Undergraduate)

Study of biology at the molecular level, focusing on the regulation of gene expression and the principles of genetic engineering. Lecture-laboratory.

BIO 260 is the prerequisite for this course.

**BIO 361 | TOPICS IN MOLECULAR BIOLOGY | 4 quarter hours
(Undergraduate)**

Discussion and seminars in selected areas of molecular biology. Cross-listed as CHE 461.

BIO 360 is a prerequisite for this class.

**BIO 362 | ADVANCED GENETIC ANALYSIS | 4 quarter hours
(Undergraduate)**

High-throughput genomic technologies have revolutionized the study of biology. With whole genome sequencing, RNA sequencing and proteomic analysis, it is now possible to collect data about every gene in a species at the same time. This course will cover how these technologies work, and what they can tell us about how cells function. DePaul has joined The Genomics Education Partnership (www.thegep.org) consortium, which does distributed genomic science through Course-based Undergraduate Research Experience (CURE) classes, where students learn about genomics by analyzing real genomic data that was generated by the consortium. In the CURE lab component of this class, students will annotate genes that have never been previously studied; their work is then submitted to the consortium at the end of the class, which can earn students co-authorship on published manuscripts that include their work. Cross-listed with BIO 462.

Bio 260 (Genetics) or consent of instructor is a prerequisite for this class.

**BIO 365 | PRINCIPLES OF TOXICOLOGY | 4 quarter hours
(Undergraduate)**

A study of the adverse effects of chemicals on living organisms, including the chemical natures, kinetics, dose-response relationships, metabolism, and mechanisms of action of various toxins and toxicants.

BIO 193 and (CHE 234 or CHE 238) are a prerequisite for this class.

**BIO 369 | PEER MENTORING IN BIOLOGY | 4 quarter hours
(Undergraduate)**

This course is designed for undergraduates who will be mentoring students in the Biology Program of the College of Science and Health. The purpose of the course is to prepare mentors to welcome biology students into the culture of the scientific community at DePaul. Mentors will encourage their peers to use tools and resources designed to help them build a sense of belonging and achieve academic success. The course will include readings, presentations, and activities, which will support the student's development as a peer mentor. Students will reflect on their experiences to inform their efforts in creating a supportive learning environment for their peers.

**BIO 370 | IMMUNOBIOLOGY | 4 quarter hours
(Undergraduate)**

Basic factors governing immune phenomena and antigen-antibody reactions. Lecture-laboratory. Cross-listed as BIO 471.

BIO 250 or BIO 260 is a prerequisite for this class.

**BIO 375 | INTRODUCTION TO PHARMACOLOGY | 4 quarter hours
(Undergraduate)**

Introduction to Pharmacology will explore the relationships between an organism and its response to an administered drug. This will include: 1) How drugs are administered to the body 2) What is their fate once in the body, i.e. Pharmacokinetics 3) What their mechanisms actions are - i.e. Pharmacodynamics, and 4) Adverse reactions to drugs. We will explore these relationships in different physiological systems of the human body including (but not limited to) the nervous system, circulatory system, digestive system and endocrine system. Lastly, this course will provide an understanding of the pharmaceutical system by providing a framework to explore how drugs are discovered, produced, tested, and regulated.

One of the following is a prerequisite for this class: BIO 307, BIO 308, BIO 310, HLTH 301, HLTH 302, or NEU 201

**BIO 380 | CANCER BIOLOGY | 4 quarter hours
(Undergraduate)**

This course will explore the cellular and molecular aspects of cancer. Topics will include the pathology and epidemiology of cancer, the origin and spread of cancer, hereditary and familial cancers, cancer associated genes and strategies of cancer therapy.

BIO 250 is the prerequisite for this course.

**BIO 381 | TOPICS IN CANCER | 4 quarter hours
(Undergraduate)**

This course is a seminar based course that discusses current topics in the field of cancer biology from a cellular and molecular perspective. This course demonstrates the recent advances made in the most common cancers in the western world, toward etiology, diagnosis, therapy and prevention. Scientific articles taken from peer-reviewed scientific journals will illustrate available and potential chemotherapeutic approaches towards achieving a treatment for the most common cancers.

BIO 250 is a prerequisite for this class.

**BIO 385 | MAMMALIAN REPRODUCTION | 4 quarter hours
(Undergraduate)**

Molecular, cellular, physiological, and behavioral aspects of mammalian reproduction. Mechanisms and strategies used by mammals in reproductive processes including sexual differentiation, gamete production, puberty, reproductive hormone cyclicality, neuroendocrine control mechanisms, pregnancy, parturition, and reproductive behavior. Cross-listed with BIO 485.

BIO 250 and either BIO 307 or BIO 308 are the prerequisites for this course (or consent of instructor).

**BIO 386 | ENDOCRINOLOGY | 4 quarter hours
(Undergraduate)**

A study of hormones as chemical regulators of development, growth, metabolism, homeostasis, reproduction, response to stress, and behavior; as well as hormone synthesis, chemistry, mechanisms of action, and endocrine gland structure.

BIO 250 and either BIO 307, BIO 308, or [HLTH 301 & HLTH 302] are the prerequisites for this course (or consent of instructor).

BIO 388 | RESEARCH METHODS IN BIOLOGY | 4 quarter hours (Undergraduate)

Research Methods in Biology is a methods-based course designed for science majors that will focus on learning a variety of cutting edge methods used by biologists to carry out research. Throughout the course, students will develop an in-depth understanding and appreciation for one or two research methods which are associated with projects they will undertake as part of BIO 389 (Research in Field Biology). Biology is a very broad field, so your chosen method(s) may end up being based in any of a variety of sub-fields including cell biology, physiology, biochemistry, molecular biology, ecology or evolution. In order to utilize methods to collect biological data you will need to 'become an expert'. In this course you will learn that being an expert means more than just 'following a recipe'. An expert will also understand the theory behind how their method works and appreciate the history of how the method was developed over time (and by whom). An expert will also understand the specifics of how all of the required equipment works (including how it is properly maintained and calibrated) and how to properly collect or prepare any samples/chemicals needed to carry out the process. Finally you will learn how to analyze the data you collect and how to interpret it while acknowledging what limitations may be associated with your data. Research Methods in Biology is a hands-on course. You will learn your method(s), you will practice and you will become an expert. To test whether you are an expert, you will be challenged to teach the method to your peers and produce a detailed methods handout which others can use to carry out the method on their own. This means you will also be taught the methods selected by your peers. Finally, you will collect data utilizing your method to complete your chosen research project in BIO 389.

(BIO 191, BIO 192 and BIO 193) and (one of the following: BIO 206, BIO 215, BIO 235, BIO 250, BIO 260, BIO 307, BIO 308, BIO 309, BIO 310) or instructor consent are prerequisites for this class. BIO 389 is a co-requisite.

BIO 389 | RESEARCH IN FIELD BIOLOGY | 4 quarter hours (Undergraduate)

BIO 389/489 is a research-intensive course designed for science majors and graduate students that will focus on developing skills of collaborative field-based research. Throughout the course, students (working in groups of 2 or 3) will utilize the scientific method to develop and carry out an original research project. Students will utilize the primary literature to learn the current state of research in an area that interests them, then use that knowledge to develop a novel question they can test with a field-based experiment. Data collected will be analyzed and results compiled into a publication quality paper. Students will then present their study to their peers in the form of an oral or poster presentation.

Study Abroad Course**BIO 390 | SPECIAL TOPICS | 4 quarter hours (Undergraduate)**

Occasional courses offered at an advanced level. See the schedule of classes for current offerings. Cross-listed as BIO 490.

Junior or Senior standing is a prerequisite for this class.

BIO 392 | EXTRAMURAL INTERNSHIP | 4 quarter hours (Undergraduate)

An opportunity for students to integrate their academic experience with real-world work situations; supervision is provided by a member of the DePaul Faculty in the Biological Sciences and the private or public enterprise. 0-4 credit hours.

At least Sophomore standing and a declared Biological Sciences major, or by arrangement with the Biology internship director or department permission are prerequisites for this class.

BIO 393 | INTEGRATED APPLICATIONS OF CELL CULTURE TECHNIQUES | 2 quarter hours (Undergraduate)

This course is designed as the defining or capping course for the Cell Culture Techniques and Applications Certificate Program. The aim of this course is to provide students with the opportunity to integrate the practical and conceptual knowledge acquired in the certificate program with the diverse fields covered in the program. The course will also help students to develop a career plan and bridge the skills gained and future employment.

BIO 395 | BIOLOGY CAPSTONE SEMINAR | 4 quarter hours (Undergraduate)

The aim of this course is to integrate current biological view(s) of humanity with the perspectives of the liberal studies curriculum. Students will develop and debate topics that demonstrate mastery of the biology core curriculum (cell biology, genetics, physiology and ecology) while touching on history, philosophy, ethics and the law.

BIO 397 | MENTORED RESEARCH EXPERIENCE IN BIOLOGY | 2-4 quarter hours (Undergraduate)

This course provides the opportunity to work with a faculty research mentor in Biology on an advanced research project. The faculty research mentor and student will work together to formulate a research question based on current biological knowledge and the scientific literature. They will develop hypotheses and then design and conduct a research study to test the hypotheses. Under faculty supervision, the student will conduct relevant analysis generated by the research and propose follow-up studies. Students will produce a written report of the results and may be provided with the opportunity to present their research at a professional conference. In addition, the student will reflect on how the project activities and experiences have contributed to their personal growth as a scientist and their future career plans. Relevant safety and ethical training will be based on the specific proposed research.

Junior standing and consent of instructor required. In some cases, junior standing can be waived with consent of the instructor.

BIO 399 | INDEPENDENT STUDY - RESEARCH | 2-4 quarter hours (Undergraduate)

This course provides the opportunity to work with a faculty mentor in Biology on an advanced research project. The faculty research mentor and student will work together to formulate a research question based on current biological knowledge and the scientific literature. They will develop hypotheses and then design and conduct a research study to test these hypotheses. Under faculty supervision, the student will conduct relevant analysis generated by the research and propose follow-up studies. Students will produce a written report of the results and may be provided with the opportunity to present their research at a professional conference. Relevant safety and ethical training will be provided based on the specific proposed research. Junior standing and consent of instructor required. In some cases, junior standing can be waived with consent of the instructor.

BIO 400 | DEVELOPMENT OF TOPICS FOR RESEARCH | 4 quarter hours (Graduate)

The purpose of this course is to help graduate students in formulating research questions and design methods while improving written expression and oral presentation skills. Students will, with the guidance of a faculty member, undertake a detailed investigation of a topic, formulate a potential research project in that area, and present their proposal orally to the faculty at the end of the quarter.

**BIO 401 | INDEPENDENT STUDY | 2-4 quarter hours
(Graduate)**

Experimental and/or Library study of selected topics in the life sciences. A-Cell Biology, B-Immunobiology, C-Developmental Biology, D-Physiology, E-Endocrinology, F-Genetics, G-Structural Biology, H-Ecology, I-Molecular Biology, J-Neurobiology. Offered in the Autumn, Winter, Spring and Summer quarters. 2 or 4 quarter hours.

**BIO 402 | INTRODUCTION TO GRADUATE STUDIES | 2 quarter hours
(Graduate)**

Presents the biology faculty and facilities. Various research and teaching methods in biology will be explored. Required of all graduate students. Formerly BIO 495.

Status as a graduate Biology student (MA or MS) is a prerequisite for this class.

**BIO 403 | DEVELOPMENT OF TOPICS FOR RESEARCH | 4 quarter hours
(Graduate)**

The purpose of this course is to help graduate students in formulating research questions and design methods while improving written expression and oral presentation skills. Students will, with the guidance of a faculty member, undertake a detailed investigation of a topic, formulate a potential research project in that area, and present their proposal orally to the faculty at the end of the quarter.

Status as a graduate Biology student (MA or MS) is a prerequisite for this class.

**BIO 406 | RESEARCH METHODS & APPLIED BIOSTATISTICS | 4 quarter hours
(Graduate)**

Approaches to conducting research and a variety of statistical approaches will be discussed and used to answer questions applied to biological data. A computer lab will introduce and use the statistical software program R for graphing and statistically analyzing biological data sets. Includes such topics as: study design, data management, presenting data, analysis of variance (one-way and multi-factor), analysis of covariance, multiple regression, logistic regression, and AIC model selection.

Status as a graduate Biology student (MA or MS) is a prerequisite for this class.

**BIO 409 | PLANT PHYSIOLOGY | 4 quarter hours
(Graduate)**

A study of the functional and developmental aspects of flowering plants. Lecture-laboratory. Cross-listed as BIO 309.

**BIO 412 | TOPICS IN EXERCISE PHYSIOLOGY | 4 quarter hours
(Graduate)**

This course provides an introduction to exercise physiology to enable exploration of current research topics in the field. Weekly discussion and presentation of articles from peer-reviewed journals will reinforce and elaborate on concepts covered in lecture. Topics include: muscle structure and bioenergetics, cardiovascular and respiratory responses to exercise, human evolution and endurance, training and adaptation, nutrition and ergogenic aids, and the relationships between exercise, health, and longevity.

**BIO 415 | TOPICS IN ECOLOGY | 4 quarter hours
(Graduate)**

The focus of this course is to read and critique classic papers in ecology and to connect their foundational ideas with modern research and understanding.

**BIO 416 | PHYCOLOGY | 4 quarter hours
(Graduate)**

Introduction to algae with emphasis on taxonomy, morphology, ultrastructure, physiology, life histories of freshwater and marine species. Lecture-laboratory.

**BIO 417 | AQUATIC BIOLOGY | 4 quarter hours
(Graduate)**

The study of biological, physical and chemical phenomena in fresh water and marine environments. Emphasis on organisms and their interactions. Lecture-laboratory.

**BIO 419 | TOPICS IN BEHAVIORAL PARASITOLOGY | 4 quarter hours
(Graduate)**

This course is designed for science majors and graduate students with an interest in animal behavior, ecology, evolution, health science, veterinary science and parasitology. The course adopts an integrative approach to the study of Behavioral Parasitology, which draws on modern developments in the fields of Animal Behavior, Parasitology, Ecology and Evolution. The primary objectives of the course are to: 1) explore the diverse relationships that occurs between parasite infection and host behavior; 2) understand proximate mechanisms that underlie behavioral manipulation by parasites; 3) explore the ecological and evolutionary impacts of behavioral manipulation in nature; 4) extend findings from animal systems to human-related issues (health, psychology); 5) develop familiarity with reading and interpreting primary literature. The teaching approach will be primarily discussion- and presentation-based and will be highly-interactive in nature.

**BIO 420 | ADVANCED MICROBIOLOGY | 4 quarter hours
(Graduate)**

Advanced microbiology lecture-lab course designed for science majors and graduate students that will focus on developing technical and critical thinking skills in the field of microbiology. Labs will involve independent or small group research projects.

**BIO 421 | MOLECULAR METHODS IN ECOLOGY AND EVOLUTION | 4 quarter hours
(Graduate)**

This course will provide hands-on experience in methods of detecting and analyzing molecular variation in nature. By the end of the course, students should be competent employing molecular markers to answer a wide variety of basic questions in ecology and evolution. Molecular Methods in Ecology and Evolution is a course-based research experience. Cross-listed with BIO 321.

**BIO 425 | CELLULAR EVENTS IN THE IMMUNE RESPONSE | 4 quarter hours
(Graduate)**

Analysis of cellular and subcellular interactions in the immune response. Lecture, seminar, discussion. BIO 470 recommended.

**BIO 430 | DEVELOPMENTAL BIOLOGY | 4 quarter hours
(Graduate)**

A survey of developmental phenomena in animals from fertilization to sexual maturity. Topics include gametogenesis, early cell divisions, organ formation, metamorphosis, regeneration, birth defects, stem cells, reproductive technology and mammalian cloning. Lecture-laboratory.

**BIO 431 | TOPICS IN DEVELOPMENTAL BIOLOGY | 4 quarter hours
(Graduate)**

This seminar course examines the current embryological literature using both evolutionary and molecular perspectives. Previous student-led topics include: how early embryos are organized, the signals controlling left-right asymmetry, the evolutionary origin of feathers and the development of the retina. BIO 430 or BIO 460 recommended.

**BIO 432 | POPULATION ECOLOGY | 4 quarter hours
(Graduate)**

This course covers concepts and models in population ecology and their applications for predicting population trends and disease spread across populations, understanding conservation biology approaches, and the sustainable management of wildlife populations.

**BIO 435 | CONCEPTS IN EVOLUTION | 4 quarter hours
(Graduate)**

Study of evolution and diversity in the living world. Lecture only.

**BIO 439 | CELLULAR NEUROBIOLOGY | 4 quarter hours
(Graduate)**

This course examines the cellular and molecular mechanisms of neuronal function and the changes that occur in processes such as learning and memory. Emphasis on electrophysiology, synaptic communication, and cellular signaling. Cross-listed as BIO439, NEU339, NEU439.

**BIO 440 | BEHAVIORAL NEUROSCIENCE | 4 quarter hours
(Graduate)**

An examination of the ways in which neural systems underpin behavior with an emphasis on vertebrates. In this course, behavior is understood in its broadest sense, from the functioning of organs and organ systems to the activities of whole organisms. Formerly Systems Neurobiology. Lecture-Laboratory.

**BIO 441 | TOPICS IN NEUROBIOLOGY | 4 quarter hours
(Graduate)**

A seminar course examining current topics in neurobiology. Original readings will include both current review and classic articles in the fields of neurobiology, neuroethology and the related neurosciences. BIO 439 or BIO 440 is recommended.

**BIO 442 | COGNITIVE NEUROSCIENCE | 4 quarter hours
(Graduate)**

This course explores the neuroscience of human behaviors such as emotions, attention, executive function, language, learning, memory, and social interaction by exploring both the underlying biological mechanisms and the psychological theories behind these behaviors. Cognitive Neuroscience is an emerging field of study that attempts to help one gain an understanding of the interdisciplinary nature of the human mind.

**BIO 445 | TOPICS IN PALEOBIOLOGY | 4 quarter hours
(Graduate)**

A seminar course examining various topics in paleobiology (the study of ancient life) including morphological concepts, macroevolutionary processes, extinction events, phylogenetic systematics, paleoecology, paleobiogeography, and the adequacy of the fossil record. Readings include classic and recent articles in the fields of paleobiology.

**BIO 447 | TOPICS IN MEDICAL BACTERIOLOGY | 4 quarter hours
(Graduate)**

This course will address current topics of concern and research in medical bacteriology. Students participating in this course will explore key concepts used in bacterial pathogenesis and learn how to critically appraise recent research papers in the field.

**BIO 448 | THE BIOLOGY OF INFECTION | 4 quarter hours
(Graduate)**

This course will provide students with detailed knowledge of medically important bacteria. The course will first examine common events in infections and the body's responses to infection. We will highlight in these studies the changes in both hosts and pathogens as strategies of infection and immunity evolve relative to one another. Within this framework we will examine a spectrum of infectious diseases in detail. BIO 470 is recommended.

**BIO 449 | TOPICS IN MICROBIOLOGY AND BIOTECHNOLOGY | 4 quarter hours
(Graduate)**

This course will address current topics of concern and research in microbiology and biotechnology. Students participating in this course will explore fundamental concepts being used and new discoveries and emerging technologies in microbiology and biotechnology. Students will learn how to critically appraise recent research papers in these fields.

**BIO 452 | ADVANCED COMPARATIVE PHYSIOLOGY | 4 quarter hours
(Graduate)**

Comparative and environmental approach to the function and mechanisms of vertebrate organ systems. Selected topics in comparative physiology will be addressed using a lecture/discussion/seminar format.

**BIO 455 | GENETIC TOXICOLOGY | 4 quarter hours
(Graduate)**

This course will deal with the study of agents that damage the genome or alter the proper functioning of the genome that can lead to disease in humans. Topics covered will include basic spectrum of genetic damage and chromosomal effects, mechanisms of mutations, DNA repair, genetic assays used for evaluation of genetic toxicology, health consequences of genetic damage, including cancer and inheritable mutations, and the current position of US government and global regulatory agencies on the issues of genetic toxicology.

BIO 260 is a prerequisite for this class.

**BIO 460 | MOLECULAR BIOLOGY | 4 quarter hours
(Graduate)**

Study of biology at the molecular level, focusing on the regulation of gene expression and the principles of genetic engineering. Lecture-laboratory. Cross-listed as BIO 360.

**BIO 461 | TOPICS IN MOLECULAR BIOLOGY | 4 quarter hours
(Graduate)**

Discussion and seminars in selected areas of molecular biology.

**BIO 462 | ADVANCED GENETIC ANALYSIS | 4 quarter hours
(Graduate)**

High-throughput genomic technologies have revolutionized the study of biology. With whole genome sequencing, RNA sequencing and proteomic analysis, it is now possible to collect data about every gene in a species at the same time. This course will cover how these technologies work, and what they can tell us about how cells function. DePaul has joined The Genomics Education Partnership (www.thegep.org) consortium, which does distributed genomic science through Course-based Undergraduate Research Experience (CURE) classes, where students learn about genomics by analyzing real genomic data that was generated by the consortium. In the CURE lab component of this class, students will annotate genes that have never been previously studied; their work is then submitted to the consortium at the end of the class, which can earn students co-authorship on published manuscripts that include their work. Cross-listed with BIO 362.

**BIO 465 | PRINCIPLES OF TOXICOLOGY | 4 quarter hours
(Graduate)**

A study of the adverse effects of chemicals on living organisms, including the chemical natures, kinetics, dose-response relationships, metabolism, and mechanisms of action of various toxins and toxicants.

**BIO 471 | IMMUNOBIOLOGY | 4 quarter hours
(Graduate)**

Basic factors governing immune phenomena and antigen antibody reactions. Lecture-laboratory.

**BIO 475 | INTRODUCTION TO PHARMACOLOGY | 4 quarter hours
(Graduate)**

Introduction to Pharmacology will explore the relationships between an organism and its response to an administered drug. This will include: 1) How drugs are administered to the body 2) What is their fate once in the body, i.e. Pharmacokinetics 3) What their mechanisms actions are - i.e. Pharmacodynamics, and 4) Adverse reactions to drugs. We will explore these relationships in different physiological systems of the human body including (but not limited to) the nervous system, circulatory system, digestive system and endocrine system. Lastly, this course will provide an understanding of the pharmaceutical system by providing a framework to explore how drugs are discovered, produced, tested, and regulated. Cross-listed with BIO 375.

**BIO 480 | CANCER BIOLOGY | 4 quarter hours
(Graduate)**

This course will explore the cellular and molecular aspects of cancer. Topics will include the pathology and epidemiology of cancer, the origin and spread of cancer, hereditary and familial cancers, cancer associated genes and strategies of cancer therapy.

**BIO 481 | TOPICS IN CANCER | 4 quarter hours
(Graduate)**

This course is a seminar based course that discusses current topics in the field of cancer biology from a cellular and molecular perspective. This course demonstrates the recent advances made in the most common cancers in the western world, toward etiology, diagnosis, therapy and prevention. Scientific articles taken from peer-reviewed scientific journals will illustrate available and potential chemotherapeutic approaches towards achieving a treatment for the most common cancers.

**BIO 485 | MAMMALIAN REPRODUCTION | 4 quarter hours
(Graduate)**

Molecular, cellular, physiological, and behavioral aspects of mammalian reproduction. Mechanisms and strategies used by mammals in reproductive processes including sexual differentiation, gamete production, puberty, reproductive hormone cyclicity, neuroendocrine control mechanisms, pregnancy, parturition, and reproductive behavior. Cross-listed with BIO 385.

**BIO 486 | ENDOCRINOLOGY | 4 quarter hours
(Graduate)**

A study of hormones as chemical regulators of development, growth, metabolism, homeostasis, reproduction, response to stress, and behavior; as well as hormone synthesis, chemistry, mechanisms of action, and endocrine gland structure.

**BIO 488 | ADVANCED ENDOCRINOLOGY | 4 quarter hours
(Graduate)**

Analysis of non-hypothalamic-hypophyseal pathways for hormonal regulation of the structure, function and biochemistry of hard tissues, calcium metabolism, and regulation of glucose metabolism. Lecture-seminar. BIO 486 is recommended.

**BIO 489 | RESEARCH IN FIELD BIOLOGY | 4 quarter hours
(Graduate)**

BIO 389/489 is a research-intensive course designed for science majors and graduate students that will focus on developing skills of collaborative field-based research. Throughout the course, students (working in groups of 2 or 3) will utilize the scientific method to develop and carry out an original research project. Students will utilize the primary literature to learn the current state of research in an area that interests them, then use that knowledge to develop a novel question they can test with a field-based experiment. Data collected will be analyzed and results compiled into a publication quality paper. Students will then present their study to their peers in the form of an oral or poster presentation.

**BIO 490 | SPECIAL TOPICS | 4 quarter hours
(Graduate)**

Occasional courses offered at the graduate level. See schedule for current offerings.

**BIO 491 | MASTER OF ARTS SEMINAR | 4 quarter hours
(Graduate)**

A seminar course dealing with current readings in the biological sciences. Students will evaluate and interpret these readings both orally and in writing.

**BIO 494 | COMMUNICATING SCIENCE | 4 quarter hours
(Graduate)**

Students will refine their oral and written presentation skills using their own research as the subject. The components of an effective research talk, poster presentation, and formal thesis will be examined. Students will have several opportunities to present their research and to receive and participate in peer review. This course is required for second year Biology MS students.

Status as a graduate Biology student (MA or MS) is a prerequisite for this class.

**BIO 495 | INTRODUCTION TO GRADUATE STUDY | 2 quarter hours
(Graduate)**

Presents the biology faculty and facilities. Various research and teaching methods in biology will be explored. Required of all graduate students.

**BIO 496 | RESEARCH | 2-8 quarter hours
(Graduate)**

Experimental work in selected areas of biology. These studies do not necessarily relate to a thesis. Autumn, Winter, Spring, Summer. Laboratory. Two or four quarter hours.

**BIO 498 | RESEARCH FOR MASTER'S THESIS | 2-8 quarter hours
(Graduate)**

Original study of a specific biological problem leading to a thesis.

**BIO 499 | THESIS RESEARCH | 2-8 quarter hours
(Graduate)**

Original study of a specific biological problem leading to a thesis.

**BIO 502 | CANDIDACY CONTINUATION | 0 quarter hours
(Graduate)**

Students who have completed their coursework and are actively working on the requirements for the Master's thesis (MS), or final project (MA), must enroll in candidacy continuation each quarter of the academic year until the Master's requirement has been completed. This course carries the equivalent of half-time enrollment status. Course requires graduate program director approval and proof of work each quarter. Pass/No Pass grading. (0 credit hours)

**BIO 503 | CANDIDACY MAINTENANCE | 0 quarter hours
(Graduate)**

This course is meant for Master's students not actively working on their thesis. It is only used to maintain active student status. It will not give the student full- or half-time enrollment status and will not permit deferment of student loans. Course requires graduate program director approval each quarter. (0 credit hours)

Business Administration (BADM)

**BADM 110 | ESSENTIALS OF TRAINING | 2 quarter hours
(Undergraduate)**

This is a 5-week, 1-competence course on Employee Training and Development. Students will learn the basic processes of employee training and development, including needs assessment, theories of learning and behavior change, training design to support appropriate selection or development of training, delivery of training, issues of transfer, and assessment of results. (2 quarter hours)

**BADM 120 | ESSENTIALS OF COACHING | 2 quarter hours
(Undergraduate)**

Effective coaching has long been recognized as a key element of success in the world of sports. More recently, a new breed of coaches has emerged to help people transform their personal and professional lives. In this course, we will explore the theories, concepts, and techniques of personal life and business coaching. Students will learn about the history of coaching, its uses in personal and professional development and practical applications. Working individually, in pairs, and in small groups, students will practice coaching skills and keep a detailed learning journal. This course will be highly experiential and collaborative in nature. Students will learn concepts of coaching for personal development and professional effectiveness. In addition, students will learn models of collaborative learning and will apply one recognized model in the exploration of their coaching practice in the course. (2 credit hours)

**BADM 208 | SALES AND MARKETING MANAGEMENT FOR BUSINESS TODAY | 4 quarter hours
(Undergraduate)**

Sales Management is one of the most important jobs in business today. It is the focal point for managing customer relations, and is critical for sustaining profitability and growth. It draws on a broad spectrum of skills and offers many desirable career paths for both entry level as well as experienced workers. Sales Management techniques are applicable in a wide variety of business settings, and the basic framework and details apply in all of them. The purpose of this course is to present a practical, contemporary framework for Sales Management. It starts with basic sales analysis techniques for determining company position in the market. From there it explores modern sales techniques for facilitating the customer's buying decision. It then covers the major Sales Management job functions, such as Territory Management and Sales Training. The course concludes with a discussion of leadership and psychological skills that make for Sales Management excellence. Students will learn Sales Management via course lectures, textbook reading, Internet searches and independent research on the company they work for.

**BADM 209 | THE HEART OF THE ENTREPRENEUR | 2 quarter hours
(Undergraduate)**

Entrepreneurs are an integral part of a thriving economy yet the aspects of successful entrepreneurship remain a mystery. This course takes a detailed look at the characteristics of successful and unsuccessful entrepreneurs, enabling the students to acquire a personal understanding of what it takes to start a new business venture. This course is especially targeted for those interested in starting their own business or aspiring to be an employee within an innovative business. (2 credit hours)

**BADM 214 | ENTREPRENEURIAL ACCOUNTING | 4 quarter hours
(Undergraduate)**

Entrepreneurial Accounting is a thorough coverage of financial and management accounting topics in an economically challenging business environment. Clear principles and procedures are used to demonstrate the complete accounting cycle in any type of organization: For-Profit or Non-Profit. General purpose financial statements are prepared and examined from a fundamental understanding of how for-profit and non-profit businesses operate in a dynamic and changing business marketplace. Specifically, the reach of this course will be on a global environment that is characterized by a high degree of uncertainty. We will examine a variety of accounting challenges faced by business from an international perspective. This will have important implications on the way a company becomes more competitive and thus profitable. As such each of you will be assigned a company on day one of class to manage through a series of accounting dilemmas often both inside and outside our borders. As you acquire the requisite skills (throughout the term) to meet those challenges you'll execute decisions that will change the management course of the company. It is through this individual decision making that you'll learn what works and what doesn't and why. This is not a static accounting course. Your decisions will have an impact on the direction of the company. We will also cover a series of topics that will enhance your understanding of financing techniques and options through detailed ratio-analysis. This will advance your ability to understand and seek creative financing for any ideas you might have in the future. This is essential if you have that entrepreneurial spark that just needs some financial backing and support to get started. As this is an accounting course we would expect some proficiency in basic quantitative /mathematical ability. You should also be able to use a calculator reasonably well. (4 quarter hours)

BADM 223 | ACCOUNTING AND FINANCE PRINCIPLES | 4 quarter hours (Undergraduate)

In this course, we will examine the role of accounting and financial management in the preparation, reporting and analysis of financial information. This topic is particularly important in today's economically challenging business world. Accounting and Finance concepts and principles serve as the bookends for our exploration. Clear principles and procedures are used to capture financial data, which can then be used to make economic and financial decisions. Specifically, the objective of this course is to present the fundamentals of accounting and finance to assist the non-accountant in understanding the financial statements of an organization and how financial information can be used in the management planning, control, and decision-making processes of both profit and non-profit seeking enterprises. Accounting is often called the language of business and as such, it is appropriate that as participants in the economic activities of our society we should have enough knowledge of this language to make informed decisions and judgements about our role in these economic activities. We will also cover a series of topics that will enhance your understanding of financial information, financing techniques and options through financial and ratio-analysis. This will advance your ability to understand and make relevant financing and investment decisions or develop viable future business strategies. (4 credit hours)

BADM 224 | ECONOMY, SOCIETY, AND SUSTAINABILITY IN THE 21ST CENTURY | 4 quarter hours (Undergraduate)

This course targets undergraduate and postgraduate students who want to familiarize with economic principles, but do not intend to major in economics. No prior economic coursework is required. Students learn to develop an understanding of the use of analytical and data-handling tools. At the same time, they benefit from an accessible yet complete primer of economic principles and concepts that are essential to understand economic policymaking and the role of politics, as well as a host of issues facing our societies, such as: economic prosperity and inequality; economic efficiency and fairness in policymaking; institutions, power, and inequality; the labor market and unemployment; production and the market mechanism, etc... The course operates on the premise that the Economy shouldn't constitute the sole focus of public and private decisionmakers, and that equal attention should be devoted to two other essential dimensions of the human condition, Society and the Environment. (4 quarter hours)

BADM 230 | MANAGING REMOTE TEAMS | 2 quarter hours (Undergraduate)

Before COVID made remote working common, corporations were examining how remote working strategies and logistics could be used to build cross functional remote teams in a creative way. Many employers were forced with an immediate need to move to remote working after Covid, and are now challenged with how to manage this new type of workforce. This course will explore the challenges and opportunities with remote working, including legal considerations, manager/supervisory best practices, communication strategies, and technology utilization. Learners will be provided with conceptual and tactical learning through text, videos, articles and deliverables that can be used in their workplace. This is an asynchronous course with optional Zoom sessions featuring special topics.

BADM 231 | PERSONAL FINANCIAL PLANNING | 4 quarter hours (Undergraduate)

This course will help students organize their financial lives by learning and implementing selected principles of accounting, finance, and management. The course will address value and risk determination by dealing specifically with the analysis of one's financial status, goal setting and planning, and decision making. Risk analysis, savings and investment principles, taxes, debt management, retirement, and estate considerations are areas which guide the financial management of individuals and businesses alike. (4 quarter hours)

BADM 239 | BUSINESS, TECHNOLOGY AND OUR GLOBAL FUTURE | 4 quarter hours (Undergraduate)

Students will study the latest changes in the fields of intercultural communication and leadership development in today's global corporations, including reading interviews from some of the world's leaders in manufacturing, energy, telecommunications, and health care from 26 countries. This course combines hard science with cutting-edge organizational research-based case studies in today's trans-cultural global corporations. Students study key behaviors needed today to be successful in a global corporation, including cultural self-awareness, frame-shifting, inviting the unknown, third-way solutions, etc. Students will also study how "disruptive technologies", mobile internet, automation of knowledge work, cloud technology, next generation genomics, 3D printing, advanced materials, and renewable energy are changing and will continue to revolutionize global corporations. This course concludes with an analysis of the effects of social justice and corporate social responsibility on today's global corporations. (4 quarter hours)

BADM 244 | STATISTICAL REASONING: UNDERSTANDING AND USING STATISTICS | 4 quarter hours (Undergraduate)

This course will teach students the basic concepts of statistics. Students will investigate topics including descriptive statistics, correlation, normal distributions, probability, sampling distributions and hypothesis testing. By the end of this course, students will be able to complete a statistical analysis of datasets using Microsoft Excel as the primary tool. Considerable time will also be devoted to discussing how statistics are used and abused.

BADM 247 | APPLYING ECONOMICS: A PRACTICAL APPROACH | 4 quarter hours (Undergraduate)

This applied economic course is tailored to introduce students to economic issues, without employing complex graphical and mathematical models. The material to be covered caters to students who are concerned citizens and active participants in the economy, and want to achieve a better grasp of problems facing society today. Students will learn how to use fun tools from game theory to analyze some of society's most puzzling problems, such as pollution, health care, the depletion of natural resources, how the pursuit of individual goals can lead to poor collective outcomes, and also the challenges of monetary and fiscal policy, economic growth, inflation, unemployment, income inequality, etc. Students will learn by doing, through hands-on experiments and practical exercises. (4 credit hours)

**BADM 270 | BUSINESS STARTUPS | 2 quarter hours
(Undergraduate)**

Learn the steps required to develop a business plan and start a business. In this 5 week class, students will be introduced to a variety of topics relevant to starting up your own business including market research, business model canvas, business plan development, business structures, registration, licensing, and business banking. The purposes, logic, and audiences for a business plan will be examined. Students will be introduced to tools and resources helpful in developing their own business plans. (2 quarter hours)

**BADM 271 | FINANCING YOUR OWN BUSINESS | 2 quarter hours
(Undergraduate)**

This course will cover the various sources of capital that might be available to start and grow a small business. Students will learn the phases of new businesses: startup phase; pre-seed; seed stage; series financing; growth capital; mergers and acquisitions (M&A); and initial public offerings (IPO). Alternative finance methods will be explored including debt financing, equity financing, and mezzanine capital for example. Sources of financing will be explored including: founders; friends and family; employees; venture capitalists; banks; suppliers; customers, and personal asset leverage. The tools, techniques and process students learn in this class can also be applied to not only start-ups, but financing a franchise or a consulting business. This course will allow students to assume the roles of entrepreneurs and investors in a role-play exercise to negotiate capital investments.

**BADM 272 | MANAGING YOUR OWN SMALL BUSINESS | 2 quarter hours
(Undergraduate)**

In this course, students will learn the tools, metrics, techniques, and resources they would need to start and run a small business. With the tools learned in this course, students will be able to analyze opportunities, self-assess as entrepreneurs, learn how to attract talent and, get professional (e.g. mentors, advisory boards) and technology support. Students will become familiar with various on-line tools, support associations, metrics, and financial reporting methods. Students will be exposed to some of the most effective problem solving techniques available to business owners including: modeling; forecasting; strengths weaknesses opportunities threats (SWOT) analysis; 5 whys and interpersonal skills management. Finally, important business software will be discussed: personnel management software; comparative information resources; enterprise resource planning (ERP); expense trackers; time trackers and customer resource management (CRM) applications.

**BADM 288 | MARKETING FOR THE SOCIAL GOOD | 4 quarter hours
(Undergraduate)**

This is a ten week course on the nonprofit and public organizational issue of social marketing. Generally social marketing techniques are used to influence individuals, or groups to change their behavior in order to improve a social good such as: individual health, the environment, and the community. Students will develop an appreciation for the principles of social marketing and will be taught the techniques for conducting social marketing programs. Students will also learn how to develop social marketing plans and meaningful promotions, including utilizing imagery/art to understand and create advertisements. (4 quarter hours)

**BADM 305 | ECONOMICS FOR MANAGERS | 4 quarter hours
(Undergraduate)**

Economics for Managers is an important, relevant and real-time course for present and future managers of departments within companies, managers of small businesses, branch operations of a company and for those who support or oversee those managers. In the course you will learn market structures, the dynamics of supply and demand, pricing strategies, how to assess hiring and investment decisions, and current issues in the labor market such as equality of pay, unemployment and inflation. Case studies will consist of real companies in which managers face decisions about employee recruiting and retention, supply chain issues, stale merchandise, pricing strategies and cost/benefit investment decisions. Optional Zoom sessions each week will take on topics of behavioral economics and consumer behavior that is often contrary to what might be expected. These sessions are intended to be informative, interesting and fun.

**BADM 310 | GENDER IN BUSINESS AND LEADERSHIP | 4 quarter hours
(Undergraduate)**

Women's work is never done. Not only are women mothers and wives, but these days the expectation is that women will take on leadership roles outside the home as well. What makes a woman a leader? How did the workplace differ when women were not corporate leaders? Who are today's prominent female leaders and how are they shaping our future? In this course, learners will study the lives and contributions of various important women from business, politics, and social action. Students will assess equality in management and leadership, the psychological make up of the woman leader, and the ways in which women's contributions to leadership differ from men's. Furthermore, the class will endeavor to define leadership, its consequences, and its personal ramifications. Students should expect to read extensively about the lives and characteristics of contemporary women who have surfaced in leadership roles. Learners will also identify women leaders in their own workplaces and communities and assess their involvement in the corporation and/or general public. (4 quarter hours)

**BADM 313 | CHANGE MANAGEMENT: THEORY & PRACTICE | 2 quarter hours
(Undergraduate)**

Change management is a common term for all the processes, skills and practices used to prepare individuals, managers, and leaders to implement organizational changes. Simply put managing change, although difficult, is about the people side of change. Over this 5-weeks course theories, practices, and people management skills that are the foundation of sustainable change will be studied. The course emphasis is on deepening SCPS students' understanding of the challenges and opportunities associated with being an effective change advocate and creating successful change outcomes. (2 credit hours)

**BADM 315 | ECONOMICS FOR DECISION-MAKING | 4 quarter hours
(Undergraduate)**

The purpose of this course is to provide the modern consumer living in a global economy fueled by unabated technological progress, with basic notions to understand the path that has led to sustained prosperity in the past many decades. The focus is on endowing students, as householders, with conceptual tools to make optimal financial and consumer decisions throughout the lifecycle. That theoretical foundation is reinforced and exemplified with a wealth of practical applications offered through a student-friendly online interactive learning platform, which also provides a convenient means to complete weekly assignments. That online platform will help students relate what they learn to their everyday experience as economic agents. The course is divided into two modules, microeconomic and macroeconomic. The microeconomic module studies the market mechanism. Topics covered include scarcity, opportunity costs, the law of diminishing returns, the trade principle of comparative advantage, the mechanism of the price system, the laws of demand and supply, the impact of market interventions by the government, etc. In the macroeconomic module, topics covered include the workings of the gross domestic product (GDP), of inflation and unemployment, of money and banking, the role of fiscal and monetary policy, etc. The course will visit the relevance of balancing the requirements of economic growth (efficiency in the use of inputs) with the necessity of attending to the needs of both society (need for equity) and the environment (need for sustainability). Students will also discussed at length the economic implications of topics of heightened public interest, such as the Great Recession of 2008-2009 and the coronavirus pandemic that unleashed itself on the world around the onset of the year 2020. Throughout the course, we will refer to the idea that knowledge of economics leads to practical, informed decisions that can help us minimize cost and maximize return and satisfaction as voters and taxpayers participating actively in the economy. (4 credit hours)

**BADM 318 | UNDERSTANDING FINANCIAL STATEMENTS | 4 quarter hours
(Undergraduate)**

Business managers as well as investors must have a basic understanding of financial statements as not only a management tool but also as a way of communicating the financial and operational well-being of a company. This course teaches students the essential elements of financial statements, their interpretation and their impact on investors and society. This is a particularly important topic and skill in light of the recent corporate financial reporting scandals plaguing Wall Street and the nation. (4 quarter hour)

**BADM 320 | CRISIS MANAGEMENT | 4 quarter hours
(Undergraduate)**

Students will study different types of business crises including self-imposed events, natural occurrences, technology related events, financial shocks and social conflicts. Tools for anticipating and mitigating crises will be explored, including continuity of business plans, employee assistance plans, and communication plans targeted for all stakeholders. Case studies of management in a crisis environment across multiple industries and non-profit organizations will be a central theme in the course. Crisis management techniques used with different levels of success will include crisis leadership, crisis management teams, communication strategies and disciplined pursuit of objectives. Upon completion of the course students will have an understanding of how business crises can be anticipated, mitigated, navigated and successfully overcome.

**BADM 329 | DATABASE DEVELOPMENT FOR MANAGING INFORMATION | 4 quarter hours
(Undergraduate)**

Using MS Office tools suite (in particular Access), this course takes students through the entire process for building a database system that will be used to capture, store and present information. In addition to database concepts like designs, reports and SQL queries, the students will discuss and analyze relationships between technology and society.

**BADM 330 | LAW IN THE BUSINESS ENVIRONMENT | 4 quarter hours
(Undergraduate)**

The influence of the law is far-reaching in the corporate world. Whether an entrepreneur, manager, administrative assistant, union employee, nonunion employee, sales representative, purchasing agent, etc., the law ultimately affects how we make decisions in the work arena. This course allows students to discover the wide range of laws affecting America's business environment. Students will learn how the law is established and developed, and be provided with tools to recognize potential legal issues that arise in daily business operations. The curriculum considers the impact of the law in the global workplace, and in commerce, business operations, employer/employee relationships, and in the regulatory environment.

**BADM 334 | HUMAN RESOURCE AND TALENT DEVELOPMENT
FUNDAMENTALS FOR MANAGERS | 4 quarter hours
(Undergraduate)**

This course is designed as an introduction to the practices of human resources (HR) in a corporate environment. It will target the practices that managers need to know such as recruiting, training, hiring, and terminating employees as well as the basics of HR law. Additional content that will be addressed includes headcount management, performance appraisals, learning & development, compensation basics, and grievance processes. This course will equip managers with the information they need to know without making them Human Resource experts but rather how to work effectively with their HR counterparts. (4 hours)

**BADM 335 | RISK MANAGEMENT IN THE WORKPLACE | 4 quarter hours
(Undergraduate)**

This overview course in risk management will introduce managers to the various types of risk that needs to be managed in the workplace. Numerous areas such as operational risk, market risk, global risk, and customer risk will be investigated. While this course is not to create students who will be experts in risk management this course will allow them to identify and analyze areas of potential risk to the assets of their organization. Students will use case studies to ensure that proper communication happens for key risks within the organization. (4 hours)

**BADM 340 | IMPLEMENTING CORPORATE TRAINING PROGRAMS | 4 quarter hours
(Undergraduate)**

In this course, students will learn about the strategic process of effectively and efficiently implementing a corporate training program based on business drivers from design stages through measurement of results. This process includes defining requirements and success criteria, designing the process, implementing and powerfully communicating the program to the learners, and then understanding how to measure the success of the program. It is imperative to measure and report on the trends of the program and to understand why it is important. Using methodology and models that have been successful in numerous global and domestic companies, students in this course will create their own plan for implementation, communication, and measurement to ensure success in their future training program implementations. (4 quarter hours)

BADM 345 | EMOTIONAL INTELLIGENCE AT WORK | 4 quarter hours (Undergraduate)

One's IQ (intelligence quotient) alone does not predict success in the workplace or in life. Emotional intelligence (EI) plays a vital role as well. This course provides an introduction to the field of emotional intelligence, evidence of its impact on individuals and organizations, and strategies for applying it in multiple settings. Participants will deepen their understanding of EI by exploring the research literature and completing an assessment of EI provided by 6 Seconds (<http://www.6seconds.org>). Strategies for applying EI to increase one's success and satisfaction at work and in other social contexts will also be explored. There are several models of emotional intelligence, each with a measure used by individuals to create a profile of EI abilities, used as the basis for learning and development. Some focus more directly on the workplace or on therapeutic settings. The Six Seconds' model of EI is designed to have broad application and enable individuals to draw on EI across the various dimensions of their lives. (4 credit hours)

BADM 359 | ETHICAL BUSINESS BEHAVIOR | 4 quarter hours (Undergraduate)

Ethical Business Behavior explores the ethical issues that business decision-makers face and examines the moral principles that are used to help resolve these issues. Ethical decisions in the workplace can have tremendous influence on the individuals and the corporations involved. The outcomes of unethical behavior can affect reputations, trust and career path. Results have been as severe as loss of employment, physical harm to individuals, corporate bankruptcy and even impacts to the economy. Students are placed in decision-making roles through exercises, case studies and role-playing. Reasoning skills are honed through identification of ethical issues and alternative means to analyze these issues. Ethical behavior is evaluated using analytical skills to apply ethical concepts to business situations. (4 quarter hours)

Business Analytics

BUA 250 | CAREER MANAGEMENT SKILLS | 2 quarter hours (Undergraduate)

This course helps business analytics major students develop their careers. Students review their skills and interests as they relate to relevant career paths and professions. They acquire career-enhancing skills in job search, career research, goal setting, and action planning. Students create resumes and cover letters, and they enhance their interviewing and networking skills. Through activities, students assess their current career activities and explore appropriate adjustments. This course is designed for students who have declared (or intend to declare) majors in Business Analytics.

BUA 301 | DESCRIPTIVE AND DIAGNOSTIC BUSINESS ANALYTICS | 4 quarter hours (Undergraduate)

This course introduces students to fundamental business analytics concepts and work processes. Students will develop their business analytics knowledge and skills by learning to formulate and address business questions with data, performing reproducible analytics with an open-source scripting language (e.g., R, Python), iterating typical analytical steps (e.g., importing, cleaning, analyzing data), describing and summarizing business data, computing bivariate relations, applying ordinary-least squares regression to model continuous business outcomes, and applying logistic regression to model binary business outcomes. Along the way, students will engage in mastery-learning orientation as they complete assignments. By the end of the course, students will feel prepared to apply their business analytics knowledge and skills to perform fundamental business analytics work tasks. **A grade of C- or better in BUS 102 is a prerequisite for this class.**

BUA 302 | PREDICTIVE AND PRESCRIPTIVE BUSINESS ANALYTICS | 4 quarter hours (Undergraduate)

This course introduces students to predictive and prescriptive business analytics. In the first part of the course, students will learn how to apply a supervised learning workflow to predict outcomes. This includes learning how to apply supervised learning methods such as elastic nets and ensemble trees, tuning hyperparameters of these methods, training these algorithms on training data, and evaluating trained algorithms on testing data. In the second part of the course, students will learn the fundamentals of using models for explanatory purposes. This includes learning how to work with data collected from experiments (e.g., A/B tests) and quasi-experiments (e.g., field data). By the end of the course, students will feel prepared to apply their predictive and prescriptive analytics knowledge and skills to perform fundamental business analytics work tasks.

A grade of C- or better in BUA 301 is a prerequisites for this class.

BUA 303 | DATA VISUALIZATION | 4 quarter hours (Undergraduate)

This course introduces students to data visualization for business analytics. In this course, students learn how to work with data visually and produce visuals for various business stakeholders. Specific topics include understanding data visualization principles, building different types of charts, developing dynamic and interactive charts, and creating dashboards and storyboards. Throughout the course, students will engage in active learning by completing individual assignments on business data to develop their data visualization knowledge and skills. Students will also learn how to incorporate visualization into clear and compelling communication. After completing the course, students will feel prepared to apply their data visualization knowledge and skills to business analytics projects.

A grade of C- or better in BUA 301 is a prerequisites for this class.

BUA 304 | DATA MANAGEMENT | 4 quarter hours (Undergraduate)

This course covers data management skills for business analysts such as developing database structure so that the relations database using Structured Query Language (SQL) will be robust, resistant to errors, and flexible enough to accommodate a reasonable amount of future change. It also covers how to discover database requirements, build data models, and refine those models to improve the database's effectiveness.

A grade of C- or better in BUA 301 is a prerequisites for this class.

BUA 320 | ARTIFICIAL INTELLIGENCE AND COGNITIVE TECHNOLOGIES | 4 quarter hours**(Undergraduate)**

This course provides students with an overview of modern artificial intelligence technology and its applications in the real world. Students will study the fundamentals of AI models and how they can be used to generate value for an organization. Through lectures, case studies, and hands-on activities, students will explore the potential of AI to solve complex problems. Additionally, students will gain insights into the impact of AI on industry, legal and ethical implications of its use, and how it can be leveraged to transform business processes.

A grade of C- or better in BUS 102 and a grade of C- or better in MAT 137 are prerequisites to this class.

BUA 321 | TEXT ANALYTICS FOR BUSINESS | 4 quarter hours**(Undergraduate)**

This course provides students with a theoretical and practical understanding of text analysis applied to marketing and business context. The first two weeks of the course provide a high-level theoretical initiation into frameworks that explain human communication, discourse and conversation. The rest of the course is devoted to hands-on learning and use of qualitative and quantitative methods for gathering, processing and analyzing textual data. Students will obtain a level of competence and understanding in skills including data mining (extracting raw data from public sources), preprocessing unstructured data, tagging themes in qualitative data, sentiment or opinion mining, and more.

A grade of C- or better in BUS 102 and a grade of C- or better in MAT 137 are prerequisites to this class.

BUA 322 | MACHINE LEARNING FOR BUSINESS ANALYTICS | 4 quarter hours**(Undergraduate)**

This course advances student understanding of machine learning for business analytics. In the first part of the course, students will learn how to apply unsupervised learning for dimensionality reduction and clustering units. This includes learning how to apply several unsupervised learning methods for dimensionality reduction such as principal components analysis, singular value decomposition, and non-linear techniques, and clustering such as hierarchical clustering, partition methods, and model-based clustering. In the second part of the course, students will learn how to apply supervised learning for predicting categorical and continuous outcomes. This includes learning how to apply various supervised learning algorithms such as tree methods, support vector machines, and neural networks, and evaluating the predictive performance of such algorithms. By the end of the course, students will feel prepared to apply their machine learning knowledge and skills to perform fundamental business analytics work tasks.

A grade of C- or better in BUA 301 and a grade of C- or better in BUA 302 are prerequisites to this class.

BUA 340 | QUASI-EXPERIMENTAL DESIGN | 4 quarter hours**(Undergraduate)**

Some of the most important questions in business and the social sciences involves causal relationships. Here are a few recent examples: How do paywalls affect digital media site usage? How does moving out of a high poverty neighborhood affect obesity and diabetes? How do price promotions affect the sale of our products? How will opening a new store location affect our total sales? These questions can't afford mere correlations. They require causal evidence. What assumptions are necessary to achieve this? And what do we even mean by causality? What about those warnings that correlation does not imply causation? What should we believe? This course is about the research designs and methods that researchers use to support causal inferences in business and the social sciences. The specific topics include randomized experiments, instrumental variables, regression discontinuity designs, difference-in-differences models, regression analysis, and propensity score matching. There are four broad goals of the course. The first is to learn some of the notation and language that social scientists use to describe causal effects. The second is to understand the logic and assumptions that support a set of research designs that are commonly used in quantitative social science research. The third is to gain some experience in implementing the methods using a statistical software package such as R. The fourth objective is to develop skill at reading, understanding, and critiquing "technical" scientific articles that make casual claims.

A grade of C- or better in BUA 302 and a grade of C- or better in ECO 304 are prerequisites to this class.

Business Law (BLW)

BLW 201 | LEGAL & ETHICAL ASPECTS IN THE BUSINESS ENVIRONMENT | 4 quarter hours**(Undergraduate)**

Legal and Ethical Aspects in the Business Environment. Study of the nature and philosophy of law including ethical perspectives and fundamental concepts and legal principles of sales contracts, product liability, business organizations, and employment law including ethical and social responsibilities in the managerial process.

Sophomore standing is a prerequisite for this class.

BLW 202 | COMMERCIAL PAPER AND SALES | 4 quarter hours**(Undergraduate)**

History of negotiable instruments and sales law from the days of the Law Merchant through Articles II and III of the Uniform Commercial Code; discussions of promissory notes, drafts, sales, bulk sales, and recent trends.

BLW 201 or ACC 370 is a prerequisite for this class.

BLW 203 | BUSINESS ORGANIZATIONS | 4 quarter hours**(Undergraduate)**

Types of business organizations; emphasis on Partnership and Corporation. Relations of parties to one another, and to third parties; comparisons between the two types and mechanics of forming and operating each.

BLW 201 or ACC 370 is a prerequisite for this class.

BLW 398 | SPECIAL TOPICS | 4 quarter hours**(Undergraduate)**

Content and format of this course are variable. An in-depth study of current issues in legal studies. Subject matter and prerequisites will be indicated in class schedule.

BLW 201 is a prerequisite for this class.

**BLW 399 | INDEPENDENT STUDY | 1-4.5 quarter hours
(Undergraduate)**

Independent Study. Available to students of demonstrated capability for intensive independent work in business law. (variable credit)

Junior standing with at least 88 cumulative units is a prerequisite for this class.

**BLW 799 | INDEPENDENT STUDY | 4 quarter hours
(Graduate)**

Available to graduate students of demonstrated capability for intensive independent work in business law.

Business Studies (BUS)

**BUS 101 | INTRODUCTION TO DRIEHAUS: BUSINESS FUNDAMENTALS AND THE ENTREPRENEURIAL MINDSET | 4 quarter hours
(Undergraduate)**

This course introduces students to the fundamentals of modern business education with applications to the different business disciplines and an emphasis on the entrepreneurial mindset, a way of thinking that embraces change and teaches students to identify and act upon business opportunities. Using an active learning approach, the course requires individual preparation and discovery, community discussion of concepts, and group collaboration on a business simulation and group project.

**BUS 102 | BUSINESS ANALYTICS | 4 quarter hours
(Undergraduate)**

This course introduces students to the growing role of big data and the quantitative strategies that businesses employ to inform decisions. Students will analyze business cases in which data have helped businesses make better decisions, exposing them to real world applications of analytics. The course will also introduce students to some basic statistical techniques and spreadsheet software, which students will use to analyze specific business problems.

**BUS 103 | BUSINESS FOR SOCIAL GOOD | 4 quarter hours
(Undergraduate)**

This course explores how modern business can be a part of the solution to address critical social and environmental issues - both on a global and local scale. Through class discussions, readings, and visits from local business leaders and entrepreneurs, students learn about how firms function within a broader societal landscape and the importance of managing both internal and external stakeholders for the long-term success of the firm.

**BUS 202 | BUSINESS TECHNOLOGY | 4 quarter hours
(Undergraduate)**

Technology is central to every business discipline in the modern economy. In this course, you will learn about digital transformation and how technology is changing the way that we do business. The course will introduce you to tools for viewing a business as a system with processes so that you can spot inefficiencies and recommend technology solutions. Business process automation is one of these key skills of the modern workforce that leverages technology to maximize the contributions of people. You will also learn about emerging technologies like artificial intelligence and blockchain as new tools with business applications. The course will prepare you to become a life-long learner who can adapt to future technological innovations.

BUS 102 is a prerequisite for this class.

**BUS 211 | DEVELOPING AN ENTREPRENEURIAL MINDSET | 4 quarter hours
(Undergraduate)**

Learn the fundamentals of the entrepreneurial process from the discovery of an opportunity to the development and launch of a new solution. Explore entrepreneurial firms, business trends, market and industry analysis, business models, growth strategies, financing new ventures, and presenting a solution. Interactive assignments will allow students to gain an appreciation for the entrepreneurial mindset.

Students with a major or double major in The Driehaus College of Business are restricted from registering for this class.

**BUS 212 | MARKETING, CONSUMER BEHAVIOR & YOU | 4 quarter hours
(Undergraduate)**

Explore the exciting world of marketing to learn how product, price, distribution, and promotions are integrated to build brands. Gain a greater understanding of positioning, market segmentation, the sales process, decision making and marketing plan development. Conduct an in-depth study of the meaning of marketing in everyday life. Interactive discussions encourage the examination of constantly evolving marketing tools and the wide variety of employment opportunities in the industry.

Students with a major or double major in The Driehaus College of Business are restricted from registering for this class.

**BUS 213 | ECONOMICS FOR EVERYBODY | 4 quarter hours
(Undergraduate)**

Explore the beauty and usefulness of economics and learn the economic way of thinking by studying cases and real-world examples that teach you the basic tools of economics. Use economic thinking for decision-making in business and life, and learn how economics can help us make the world a better place.

Students with a major or double major in The Driehaus College of Business are restricted from registering for this class.

**BUS 214 | MAKING FINANCIAL DECISIONS | 4 quarter hours
(Undergraduate)**

Uniting essential elements of accounting and finance, learn how to use financial information to make critical business decisions. Develop an understanding of financial statements and use this information in the decision making process. Learn how to analyze corporate performance, find efficiencies and determine an organization's worth..

Students with a major or double major in The Driehaus College of Business are restricted from registering for this class.

**BUS 215 | BIG DATA STORYTELLING | 4 quarter hours
(Undergraduate)**

In the world of Big Data, data visualization tools are essential for analyzing large amounts of information. Create effective visuals to focus attention on trends, outliers, and patterns for data-driven decision-making in the business world. Interactive student assignments focus on best practices and explore personal style to create engaging, informative, and compelling visual stories in business. Explore industry trends and employment opportunities using data visualization in the global marketplace.

Students with a major or double major in The Driehaus College of Business are restricted from registering for this class.

**BUS 392 | SENIOR SEMINAR | 4 quarter hours
(Undergraduate)**

A variety of senior capstone seminars are offered every term. These seminars focus on specific content areas reflecting a wide range of non-business issues that are relevant to business in contemporary society. The learning experience enables students to see the world differently through reflections and interactions, encourages them to develop a broader perspective on how and where business fits in society, and prepares them to communicate and express that perspective orally and in writing.

Senior standing is a prerequisite for this class.

Cannabis Studies (CAN)**CAN 230 | CANNABIS AND SOCIETY I | 2 quarter hours
(Undergraduate)**

This course engages students in foundational studies of cannabis in context, drawing upon perspectives from science, medicine, history, sociology, law, ethics, and business. Students will receive a broad introduction to the plant's key facts, uses, status, and controversies in contemporary society, with attention to variations among local, state, federal, and international contexts. We will draw comparisons between cannabis, other drugs, and alcohol. The course focuses on developing students' competencies in critical and ethical analysis, dialog, and civic engagement. Students who wish to deepen their study of selected topic through a social justice research methodology should follow this course with CAN 231 Cannabis and Society II.

**CAN 231 | CANNABIS AND SOCIETY II | 2 quarter hours
(Undergraduate)**

This course is the companion course to CCS 230 Cannabis and Society I, completing the two short-course sequence. The emphasis in this part II of the sequence is on social-justice approaches to researching topics in cannabis studies, and course content will include scholarly, secondary research literature that pertain to students' academic goals. Key questions that will be considered include: What is social justice research theory, and how can it be applied in cannabis studies? What are critical issues in the disciplines that require further research on cannabis in context, and what are key emerging lines of study? How can we determine various impacts—criminological, economic, educational, environmental, health, legal, and social—of the cannabis industry?.

CAN 230 is a prerequisite (or co-requisite) for this class.

**CAN 236 | CANNABIS & 60S PSYCHEDELIC CULTURE | 4 quarter hours
(Undergraduate)**

For a brief (and some would say shining) moment in the mid-to-late 60s, a movement of disaffected youth, eventually called the counterculture, turned away from mainstream Euro-American society, its customs and mores, to embrace what it saw as a more humane, earthy and adventurous way of living. The recreational use of cannabis was pervasive within this movement, as was the use of "mind-expanding" drugs such as psilocybin and LSD (the latter of which was not declared illegal until Fall 1966). Such drugs, termed "psychedelic," in turn became associated with certain art forms - rock music in particular. While contextualizing, exploring and examining terms such as "psychedelic" itself, this course will emphasize close analysis of such art forms - music especially, but also trends in visual art, and one representative piece of countercultural literature. In addition to examining such works in terms of form, content, and genre, we will situate them in relation to social controversies of the period – notably, the nuclear threat, the US's war in Vietnam, and what Theodore Roszak called the counterculture's "revolt against technocracy.

**CAN 260 | INTRODUCTION TO CANNABIS STUDIES | 4 quarter hours
(Undergraduate)**

This course engages students in foundational studies of cannabis in context, drawing upon perspectives from science, medicine, history, sociology, law, ethics, and business. Students will receive a broad introduction to the plant's key facts, uses, status, and controversies in contemporary society, with attention to variations among local, state, federal, and international contexts. We will draw comparisons between cannabis, other drugs, and alcohol. The course focuses on developing students' competencies in critical and ethical analysis, dialog, and civic engagement. Through a major project, students will be guided through a social-justice informed approach to researching a topic that addresses the question of cannabis in relation to their academic or career interests.

**CAN 265 | CANNABIS & 60S PSYCHEDELIC CULTURE | 4 quarter hours
(Undergraduate)**

For a brief (and some would say shining) moment in the mid-to-late 60s, a movement of disaffected youth, eventually called the counterculture, turned away from mainstream Euro-American society, its customs and mores, to embrace what it saw as a more humane, earthy and adventurous way of living. The recreational use of cannabis was pervasive within this movement, as was the use of "mind-expanding" drugs such as psilocybin and LSD (the latter of which was not declared illegal until Fall 1966). Such drugs, termed "psychedelic," in turn became associated with certain art forms - rock music in particular. While contextualizing, exploring and examining terms such as "psychedelic" itself, this course will emphasize close analysis of such art forms - music especially, but also trends in visual art, and one representative piece of countercultural literature. In addition to examining such works in terms of form, content, and genre, we will situate them in relation to social controversies of the period – notably, the nuclear threat, the US's war in Vietnam, and what Theodore Roszak called the counterculture's revolt against technocracy.

**CAN 300 | CANNABIS, RACE, AND JUSTICE | 4 quarter hours
(Undergraduate)**

This course investigates issues related to race and equity in the recreational cannabis sector. It examines the impact of, among other issues, the industry's commercial landscape and concerns about 'Big Cannabis' as an emerging yet not universal corporatized model, cultural proclivities toward natural and preventive medicine as well as race-related disparities in the cannabis universe. The latter includes a focus on the various regional strategies to resolve disproportionate, race-based arrest and incarceration rates pre-legalization, social equity and licensing programs for cannabis entrepreneurs, teenage marijuana use and the overall state of numerous social justice movements to address these and other racial issues connected to this industry.

**CAN 390 | INDEPENDENT STUDY: CANNABIS STUDIES | 1-4 quarter hours
(Undergraduate)**

INDEPENDENT STUDY: CANNABIS STUDIES.

Career and Life Design (CLD)

CLD 200 | DESIGN YOUR FUTURE: CAREER AND ACADEMIC EXPLORATION | 2 quarter hours (Undergraduate)

Who am I? What should I study? What kind of work might I enjoy? Through this course, you will build the foundation needed to design your career. We will start with career reconnaissance, exploring and building language around your VIPS (values, interests, personality, and skills). Next, we will dive into market reconnaissance, exploring careers and majors of interest. Using these as your guide, you will leave this course with a strong foundation for sound career decision making.

CLD 205 | CREATE YOUR CAREER TOOLKIT | 2 quarter hours (Undergraduate)

Creating a written and oral suite of career communications is essential to your career development. In order to be competitive in today's job market, you need to be able to craft and share your story. Through written communication, such as resumes and cover letters to oral communication, such as your elevator pitch and interview stories, you need to understand how to effectively communicate brand YOU. Through this course, students will learn by doing, leaving with their own personalized career communication toolkit that will help them to navigate networking, apply for a job, and/or ace the interview.

CLD 210 | HARNESS YOUR STRENGTHS | 2 quarter hours (Undergraduate)

Talent is the source of true potential. Using the Clifton StrengthsFinder assessment, you will identify your talents: the thoughts, feelings, and behaviors that come most naturally to you. Through this course, we will explore ways for you to build your natural talents into your strengths and apply them to several areas of your career development.

CLD 215 | LAUNCH YOUR SEARCH: JOB AND INTERNSHIP SEARCH STRATEGIES | 2 quarter hours (Undergraduate)

Want an internship, but are not sure where to start? Or maybe you are seeking full-time employment and want to be more strategic in your search. Through this course, you will design a customized search strategy that will position you for success in landing your dream job or internship! Topics covered include self-discovery, identifying/researching target organizations, refinement of your career communication suite, offer/negotiation best practices, and designing/executing your search plan.

CLD 216 | EXPLORING GRADUATE & PROFESSIONAL SCHOOL | 2 quarter hours (Undergraduate)

Graduate and professional school provides you with the opportunity to advance your academic and professional career through advanced study of a particular field and/or area of interest. For many fields, earning an advanced degree gives you a competitive advantage while for others, it is necessary for advancement. Exploring your options and getting accepted into your preferred program requires research, differentiation, and project management skills. Through this course, you will learn how to identify best-fit graduate programs and figure out how to successfully navigate the application process. By the end of this course, students will be able to: Identify connections between graduate study and their career and life goals; Discover and evaluate graduate programs of interest; Develop an understanding of and strategy for the graduate school application process; Write an effective personal statement and Resume/CV for a graduate school application; Prepare for a grad school interview; Network with professionals who can support their graduate school exploration and application process.

CLD 220 | INTERNATIONAL STUDENTS: JOB AND INTERNSHIP SEARCH STRATEGIES | 2 quarter hours (Undergraduate)

As an international student, you may have additional challenges to your job/internship search. From navigating visa matters to overcoming cultural barriers, you need to carefully manage each phase of the process. With these challenges also comes opportunities: from your global experience to unique set of skills and abilities. Through this course, you will develop strategies for seeking employment in the U.S. and/or your home country, while understanding how to navigate the nuts and bolts of the U.S search for internships, OPT, or H-1B jobs.

CLD 225 | REPOSITION YOUR CAREER PLAN | 2 quarter hours (Undergraduate)

Are you at a career crossroads? Career journeys are rarely linear. More often than not, one of your internships and/or classes makes you reconsider your career plan. While changing the direction of your career may seem intimidating, this experience is completely normal. Utilizing our three step process for repositioning your career plan (self-assessment/research/design), this course will provide you with the tools needed to reposition your career plan and get back on track for success.

CLD 230 | PROFESSIONAL SKILLS FOR CAREER SUCCESS | 2 quarter hours (Undergraduate)

The workplace is constantly evolving, and employers are increasingly taking a skills-based approach to hiring. Developing a strong set of professional skills is more important now than ever, as they can set you up for career success by allowing you to differentiate yourself from other candidates in today's competitive job market. This course offers a variety of upskilling topics to help build your professional skill set and advance your career.

CLD 250 | NAVIGATING THE WORKPLACE | 4 quarter hours (Undergraduate)

CLD 250 integrates academic curriculum with supervised work experiences in both the private and public sectors. Internships are an essential part of a student's academic experience at DePaul. The course promotes the life-long education process of integrating work and learning; enables students to view their internship experiences within a broad world perspective; assists career decision-making; drives individual success through on-the-job experiences; and provides students with valuable networking and other career-development opportunities. NOTE: All CLD 4-credit courses are completely online and all fulfill DePaul's Experiential Learning requirement. If you have completed the requirement already, the course will be counted as a general elective course. Your internship must be approved by the CLD Manager, located in the Career Center.

CLD 251 | INTERNSHIP: ANALYSIS & REFLECTION | 0 quarter hours (Undergraduate)

This course integrates analysis and reflection with a student's internship experience. Students will be required to submit a reflective essay and supervisor evaluation at the end of the quarter. This course is offered pass/fail only. Through enrollment in this course, students will be able to: -Summarize, analyze, and evaluate their internship experience. -Identify the knowledge and skills gained from their internship. -Discuss how their internship experience supports their career development.

CLD 290 | STUDENT-ATHLETES: EXPLORE CAREERS | 2 quarter hours (Undergraduate)

As a student athlete, you possess a unique set of skills and experiences that are highly valued by employers. Through this course, you will build the foundation of your career game plan. We will start with career reconnaissance, exploring your VIPS (values, interests, personality, and skills), paying close attention to your unique transferable skills and abilities you bring to the table as a student athlete. Next, we will dive into market reconnaissance, exploring careers and majors of interest. Using these as your guide, you will leave this course with a strong foundation for sound career decision making and the ability to make connections between your sports-related skills and the workplace.

CLD 295 | STUDENT-ATHLETES: KICKSTART YOUR CAREER STRATEGY | 2 quarter hours (Undergraduate)

Just as training for your sport makes you a better athlete, developing a strategic career plan will help ensure you are career-ready upon graduation. Through this course, you will build upon the foundation of your career game plan and learn how to develop and implement strategies that propel you towards career success. From resumes to networking to interviewing, all aspects of career development will be covered. Whether you are looking to transition out of sport or stay in the game, this course will help you develop a solid search strategy while helping you position the value of your student-athlete experience to potential employers.

CLD 300 | CHICAGO'S CREATIVE ECONOMY | 2 quarter hours (Undergraduate)

The Illinois Creative Economy Roundtable report defines the creative economy as being "made up of creative enterprises and the people and businesses involved in their success and growth." Chicago is home to many of these creative enterprises across a variety of industries. This course will introduce students to key industries and organizations within Chicago's creative economy, gaining insight into various career opportunities within the space through a combination of online modules and engagement with industry professionals.

CLD 330 | CAREERS ON THE HILL | 2 quarter hours (Undergraduate)

This course is part one of a two-part series, Washington DC: Careers in Government, Politics, and International Affairs, which includes/ is connected by a career trek to Washington, D.C. over spring break. Interested in a career within government, public policy, or international affairs? The opportunities for new talent are both numerous and multifaceted. This course will prepare you for a career in our nation's capital in a variety of public and private industries and institutions. From understanding yourself to understanding the industry landscape and trends to career opportunities and the skills/qualifications necessary to be successful in this line of work, you will have the opportunity to learn about career paths and begin to build your network in Washington, D.C. During your time in D.C, you will engage with DePaul alumni/industry professionals as you learn about career paths, clarify your career interests, and build your network on "The Hill." Upon your return, you will take UIP 335 - Landing a Job on Capitol Hill. You must apply and be accepted into Washington DC: Careers in Government, Politics, and International Affairs in order to enroll in this course.

CLD 335 | LANDING A JOB ON CAPITOL HILL | 2 quarter hours (Undergraduate)

This course is part two of a two-part series, Washington DC: Careers in Government, Politics, and International Affairs, which includes/is connected by a career trek to Washington, D.C. over spring break. Having just returned from a week on "The Hill," you will be ready to reflect on your experience, share your insights, and start thinking about your job or internship search in Washington, D.C. While there are a wide range of employment opportunities, securing a position on Capitol Hill is competitive. This course will help to position you for success in your search. Building off of what you learned in UIP 330 and your week in Washington, D.C., you will develop a customized search strategy for working or interning on "The Hill," taking into account industry-specific trends, rules, and best practices. You must apply and be accepted into Washington DC: Careers in Government, Politics, and International Affairs, as well as successfully complete UIP 330 and participate in the career trek to Washington, D.C. in order to enroll in this course.

CLD 340 | EXPLORING A CAREER ABROAD | 2 quarter hours (Undergraduate)

This 2-credit course is part of a 2 course series. This course will give undergraduate students who are interested in careers abroad a chance to analyze their own individual skills, values, and interests and explore career options. In addition, this course will involve a study abroad trip to London, England. In this study abroad component students will meet alumni who have worked and lived abroad. Students will research international careers ahead of the meeting and ask thoughtful and relevant questions to support their reflection assignments on careers abroad. The course will provide a self-evaluation that will help point students towards careers that best fit their interests and abilities. It will also introduce students to many different careers abroad and the process of finding work abroad and following through with the process.

CLD 345 | DESIGNING A CAREER ABROAD | 2 quarter hours (Undergraduate)

This 2-credit course is part of a two course series. The series is designed to help undergraduate students, who are interested in working abroad, with an opportunity to assess values, skills, interests and career options as well as connect with alumni who are working abroad in London, England. In this second course of the series, students will learn how their recent study abroad experience as well as their academic courses, campus activities and work experience will transfer to the workplace and be of interest to potential employers. Students will then identify the wealth of transferable skills they have already acquired, which will give employers concrete evidence of their qualifications for positions. These transferable skills, such as how to communicate clearly and effectively, the ability to be creative and solve complex problems, and having had multicultural experiences are characteristic of a liberal arts education and are much in demand. At the end of the course, students will learn how to articulate both their academic accomplishments and transferable skills in a way that will impress potential employers.

**CLD 500 | DESIGN YOUR LIFE & CAREER | 2 quarter hours
(Graduate)**

Thinking like a designer can transform the way one approaches their career and life planning. This course employs a design thinking approach to help graduate students develop a constructive and effective approach to finding and designing their lives and careers after graduation. Students in this course will explore different options for the future, clarify their values and goals, focus and target their efforts, prototype and test elements of paths that interest them, and map their next steps. Using the mindset and toolkit of a designer, students will work on these issues through discussions, assigned readings, reflections, individual coaching, and in-class exercises. By the end of the course, students will be able to: 1) Articulate and reflect upon one's work view, academic view, and worldview. 2) Demonstrate a growth mindset using a design thinking approach. 3) Apply the skills of self-management and wayfinding to chart a personal life and career path. 4) Integrate educational and career planning strategies to design next steps after graduation. 5) Explain and evaluate life after graduation planning successes, challenges and commitments moving forward.

**CLD 505 | DEVELOP YOUR CAREER TOOLKIT | 2 quarter hours
(Graduate)**

Your Career Toolkit is a collection of essential assets that help to ensure your career success. From resumes and cover letters to CVs and research statements, LinkedIn profiles to personal value propositions - it is important to understand how to effectively communicate brand YOU. Through this course, you will have the opportunity to develop a toolkit that will support you in your academic and/or industry career pursuits! By the end of the course, students will be able to: -Articulate their personal brand and personal value proposition. -Create effective and authentic toolkit documents. -Demonstrate effective interviewing skills -Build professional connections within their field.

**CLD 530 | PROFESSIONAL SKILLS FOR CAREER SUCCESS | 2 quarter hours
(Graduate)**

The workplace is constantly evolving, and employers are increasingly taking a skills-based approach to hiring. Developing a strong set of professional skills is more important now than ever, as they can set you up for career success by allowing you to differentiate yourself from other candidates in today's competitive job market. This course offers a variety of upskilling topics to help build your professional skill set and advance your career. By the end of this course, students will be able to: -Understand the importance of upskilling; -Identify how upskilling contributes to their career success; -Demonstrate proficiency in a new professional skill; -Articulate the value of the professional skill in their career toolkit.

Catholic Studies (CTH)

**CTH 110 | THE CHRISTIAN EXPERIENCE | 4 quarter hours
(Undergraduate)**

An introductory course surveying the range of traditions that have emerged within the Christian movement, and offering an historical perspective on the life and thought of Christian communities, and their prospects for the future. Cross-listed as REL 110.

**CTH 180 | INTRODUCTION TO CATHOLICISM | 4 quarter hours
(Undergraduate)**

An examination of the breadth of the Catholic experience from a 1st-century Jewish religious movement to a 21st-century global religion.

**CTH 181 | INTRODUCTION TO WORLD CATHOLICISM | 4 quarter hours
(Undergraduate)**

This course examines the Roman Catholic tradition in its global dimensions, specifically the implications of the shift of the majority of Catholics from the global North to the global South—Africa, Asia, and Latin America—over the course of the twentieth century. The course explores such themes as the expansion of Catholicism in Africa and Asia, the decline of Catholicism in Latin America, European missionary movements in the South, the adaptation of Catholicism to African and Asian and Latin American cultures, Catholic politics in the South, and different images of Christ in poor countries. This course will adopt a multidisciplinary approach to these questions, using history, theology, literature, sociology, and art.

**CTH 182 | THE LATINO RELIGIOUS EXPERIENCE IN THE UNITED STATES | 4 quarter hours
(Undergraduate)**

An examination of the diverse nature of Latino religion, from its indigenous roots to its institutional forms, within the social and political context of American culture. Cross-listed with REL 113.

**CTH 183 | THEMES IN CATHOLIC SOCIAL THOUGHT | 4 quarter hours
(Undergraduate)**

An initial, systematic examination of major themes in modern Catholic social thought. Cross-listed as REL 183.

**CTH 190 | METHODS OF BIBLICAL INTERPRETATION | 4 quarter hours
(Undergraduate)**

This course will survey methods of biblical interpretation. Literary, historical, cultural, and theological methodologies will be studied and applied to Old and New Testament texts.

**CTH 202 | CATHOLICS AND SCRIPTURE | 4 quarter hours
(Undergraduate)**

This course serves as an introduction to the content of the Old and New Testaments and to Catholic ways of reading Scripture. The course will cover, for example, passages from Genesis, Exodus, the historical writings, the prophets, the Gospels, and the letters of Paul. The course will also treat questions of canon, interpretation, and the relation of Scripture to tradition. Formerly CTH/REL 190 Catholicism and Biblical Interpretation/Interpreting Sacred Texts.

**CTH 203 | WHAT CATHOLICS BELIEVE | 4 quarter hours
(Undergraduate)**

This course will cover the basic elements of Catholic belief, following the pattern of the Nicene Creed. The course will deal with God, Jesus Christ, salvation, the Holy Spirit, the Church, sacraments, and the afterlife, as these ideas have been discussed and debated in classical, modern, and contemporary periods.

**CTH 205 | CATHOLICISM IN WORLD HISTORY I: JESUS TO 1500 | 4 quarter hours
(Undergraduate)**

A study of the development of the Catholic Church from the time of Jesus to the Renaissance. Religious movements, piety and art as well as theology and ecclesiastical history will be examined. Cross-listed as REL 213 and HST 261.

**CTH 206 | CATHOLICISM IN WORLD HISTORY II: MODERN & POST-MODERN TIMES | 4 quarter hours
(Undergraduate)**

A study of the development of Catholicism since 1500 exploring the Catholic Reformation, Catholicism's encounter with the Enlightenment, the missionary movement and the Catholic Church in the United States. Cross-listed with REL 214 and HST 262.

CTH 209 | THEORIES OF THE CHURCH: CONCEPTS AND CONTROVERSIES | 4 quarter hours**(Undergraduate)**

Introduction to several ecclesiologies that co-exist in Catholicism. Both historical and contemporary ecclesiologies will be considered. Cross-listed as PSC 335.

CTH 210 | CATHOLIC SOCIAL TEACHING | 4 quarter hours**(Undergraduate)**

This course will introduce students both to the development of Catholic Social Teaching (CST) and the lived witness of social engagement by a variety of Catholics in varied contexts. The course will cover texts essential to the foundations of CST. Witnesses who embody, challenge and contribute to Catholic Social Teaching may also be explored. Some sections will study CST with a specific focus, such as the Catholic Church's involvement in global healthcare or Catholicism's role in public life within a particular culture.

CTH 212 | ANCIENT ISRAEL: HISTORY, LITERATURE AND RELIGION | 4 quarter hours**(Undergraduate)**

The development of Judaism from Moses to the Rabbinic era with special attention to social and historical questions. Cross-listed with REL 232.

CTH 213 | THE NEW TESTAMENT | 4 quarter hours**(Undergraduate)**

A critical investigation of the New Testament. Topics include the earliest Christian writings (letters of Paul), the production of "gospels" about Jesus, and the development of early churches in the context of ancient history and society. Cross-listed with REL 233.

CTH 214 | THE HISTORICAL JESUS | 4 quarter hours**(Undergraduate)**

An investigation of the early Christian Gospels and other sources for reconstructing the life of Jesus of Nazareth. The relation of historical reconstruction and religious interpretation, and the significance of conflicting interpretations of Jesus, will also be considered. Cross-listed as REL 238.

CTH 215 | VARIETIES OF EARLY CHRISTIANITY | 4 quarter hours**(Undergraduate)**

An examination of multicultural diversity in early Christianity through a study of materials excluded from the New Testament canon; Christian apologists defending the church against pagan intellectuals and Roman imperial magistrates; comparisons of early Christian fiction and ancient Greek novels; and an examination of Gnostic writings. Cross-listed as REL 234.

CTH 218 | THE BIBLE AS LITERATURE | 4 quarter hours**(Undergraduate)**

This course is an introduction to the major stories and literary genres of the Bible, e.g. myths, poems, parables, gospels, letters.

CTH 220 | EARLY CATHOLIC HISTORY: ORIGINS AND EXPANSION | 4 quarter hours**(Undergraduate)**

This course is an introduction to the history of the Catholic Church and the evolution of Christian thought and practices, from the early Church to the thirteenth century. The course will cover the emergence of Christian communities throughout the Near East, Europe, Asia, and North Africa, and study these communities in their cultural, social, and political contexts through foundational texts and works of art. Main topics: The Early Church; Councils and Heresies; Missions in Northern Europe; Charlemagne, Carolingians and a new Roman Empire; Monasticism; Eastern Orthodoxy; Christianity and Islam (the Age of the Crusades); the Mystical Tradition; the Investiture Controversy. Cross-listed with REL 206 and HST 218.

CTH 221 | CATHOLIC HISTORY FROM MEDIEVAL TO MODERN: REFORM AND REVOLUTION | 4 quarter hours**(Undergraduate)**

This course provides an overview of the history of Catholicism and its interactions with political and social history from 1200 to the French Revolution. The main topics of the class are the origin of the Universities and Scholasticism; St. Francis and St. Dominic and their impact on Medieval Society; the Challenges to Papal Monarchy; Humanism and Erasmus; the impact of the Reformation; the Council of Trent; the geographic discoveries of the New World; the Enlightenment and the Scientific Revolution; the Catholic Church and the French Revolution. Cross-listed with REL 207 and HST 219.

CTH 222 | CATHOLICISM IN THE MODERN AGE: SECULAR AND SACRED | 4 quarter hours**(Undergraduate)**

This course will offer a survey of the political, cultural and intellectual history of the Catholic Church from 1789 through the early twenty-first century. It will include discussions of the Catholic Church in relation to the French Revolution; the Catholic Church and the formation of modern nation-states (including, inter alia, the unification of Italy and the German Kulturkampf); the relation between the Church and Liberalism; intellectual movements like theological Modernism and ressourcement theology; the First Vatican Council; the Church, Fascism and Communism; the Second Vatican Council; the Emergence of a Global Church, Latin American Liberation Theology, and more. Cross-listed with REL 208 and HST 220.

CTH 223 | THE SECOND VATICAN COUNCIL | 4 quarter hours**(Undergraduate)**

A detailed exploration of the history, issues, personalities, theologies and results of Vatican II studied against the backdrop of modernity and post-modernity.

CTH 226 | ROMAN CATHOLIC SPIRITUAL LITERATURE | 4 quarter hours**(Undergraduate)**

A study of the foundational religious experiences that underlie the Roman Catholic tradition, of the narratives they generate, and of their representations in various media such as poetry, music, myths, sacred legends and apologetic stories.

CTH 228 | MEDIEVAL MYSTICS IN EUROPE: 1000-1600 A.D. | 4 quarter hours**(Undergraduate)**

The evolution of theories and experiences of human union with God, and of varied Christian spiritual paths and practices as described in mystical literature, saint's lives, religious art and music. Emphasis on the monastic, urban and courtly institutional context of the documents. Cross-listed with HST 213.

**CTH 229 | CATHOLICISM AS A SPIRITUAL PATH | 4 quarter hours
(Undergraduate)**

An experience-centered study of the relationship between contemplation and action, prayer and service, liturgy and social justice, personal religious experience and the wider experience of Catholics. Both historical as well as contemporary spiritualities will be explored. Cross-listed as REL 284.

**CTH 230 | THINKING ABOUT GOD | 4 quarter hours
(Undergraduate)**

This course centers on the question of the relationship between reason and faith, between as it were "thinking" and "God." According to the Catholic tradition, reason's search for wisdom initiated by such classical thinkers as Plato and Aristotle is fulfilled in Christian faith. As such, it regards philosophy "as a mode of reflection that holds God as the source of all being and action and brings multiple disciplines together into a lived synthesis" (Vision Statement, Department of Catholic Studies). This holistic vision entails theses regarding the character of reason as open to theology and faith as an extension of reason. It entails the Christian doctrines of the Logos, the Trinity, revelation, and sin. It requires careful considerations of the human person's powers of intellect and will. It extends to considerations of the relationship between the theological virtues of faith, hope, and charity that in turn extend to all of the moral life. And it must offer an account of reasonableness that begins to answer the challenges of Nominalism, the Reformation, the Enlightenment, and postmodernity. Possible topics of a more interdisciplinary nature include the public/private distinction, the compatibility of science and religion, and the validity of truth claims in a pluralistic world.

**CTH 231 | ROMAN CATHOLIC LITURGY | 4 quarter hours
(Undergraduate)**

A study of the emergence, meaning and dynamics of community, and of the interaction between community and ritual in the Roman Catholic tradition. Cross-listed as REL 281.

**CTH 233 | LA MORENITA DE CHICAGO: FAITH, CULTURE AND IDENTITY IN MEXICAN CATHOLICISM | 4 quarter hours
(Undergraduate)**

The course will enable the students to "read" the image of Our Lady of Guadalupe in distinct contexts, especially in the light of the struggle of the Mexican Catholic community in Chicago and will allow them to think and write about the image of la Morenita de Chicago (an affectionate term used by Mexican-Americans to refer to the image that literally translates as "the brown-skinned woman of Chicago"). The learning process will lead to an integration of varied personal experiences, guided theological reflection, and the common study of history, art, culture, and politics.

**CTH 238 | ANCIENT PHILOSOPHY | 4 quarter hours
(Undergraduate)**

A study of selected thinkers and issues from ancient Greece. Cross-listed with PHL 293.

**CTH 239 | MEDIEVAL PHILOSOPHY | 4 quarter hours
(Undergraduate)**

A study of selected thinkers and issues from the Medieval period. Cross-listed as PHL 294.

(PHL 100 or HON 105 or any 200-level PHL course) is a prerequisite for this class.

**CTH 240 | TOPICS IN CATHOLIC THOUGHT | 4 quarter hours
(Undergraduate)**

A study of selected topics and controversies.

**CTH 241 | VIRTUE ETHICS | 4 quarter hours
(Undergraduate)**

The intellectual framework for this course is a rich strand in the Catholic moral tradition called virtue ethics. Virtue ethics begins with the universal human question: how can I be happy? Its answer is in part the diverse activities that make up happiness called virtues. This course focuses on primary sources.

**CTH 243 | ROMAN CATHOLIC THEOLOGICAL THINKING | 4 quarter hours
(Undergraduate)**

A study of the Roman Catholic tradition of "faith seeking understanding" examining the content and the process of emergence of Catholic beliefs about such matters as God, sin, Jesus Christ, revelation, the church and eschatology. Cross-listed with REL 280.

**CTH 244 | DEBATES ABOUT GOD | 4 quarter hours
(Undergraduate)**

A study of classical and contemporary arguments regarding the existence and meaning of "God" as developed in a variety of theistic traditions. Cross-listed as REL 200.

**CTH 246 | INTRODUCTION TO CHRISTIAN ETHICS | 4 quarter hours
(Undergraduate)**

This course is an introductory study of the basic themes of Christian ethics. Particular attention will be paid to the Roman Catholic moral tradition, including such topics as the virtues, the natural law, moral decision-making and narrative. Cross-listed as REL 201.

**CTH 247 | ROMAN CATHOLIC SOCIAL THOUGHT IN CONTEXT | 4 quarter hours
(Undergraduate)**

A study of Roman Catholicism's understanding of its relation to the social world, including such matters as the relation between Church and state, and the moral authority of the Church, and of its teaching on such issues as social ethics, politics and economics. Cross-listed with REL 283.

**CTH 248 | CONTEMPORARY MORAL ISSUES | 4 quarter hours
(Undergraduate)**

A study of the relations between religious beliefs and moral action to be carried out through an examination of the ethical and moral response of Catholicism to selected moral issues such as war and peace, sexual behavior, etc.

**CTH 249 | NATURE, COSMOS AND GOD: CATHOLICISM AND SCIENCE | 4 quarter hours
(Undergraduate)**

A constructive correlation of Catholic thought and contemporary scientific theory about the origins and development of the universe. Modern and contemporary cosmologies will be put into dialogue with Christology, Trinity and Incarnation. A particular concern will be today's environmental crisis and an authentically Christian response.

**CTH 250 | ART IN THE SPANISH AMERICAN EMPIRE | 4 quarter hours
(Undergraduate)**

This course offers a critical survey of the art of colonial Latin America (circa 1520s-1820s), from the Caribbean to Mexico, Central America, and South America. Framed by the Spanish Conquest of the 16th century and Independence in the early 19th century, lectures will survey state-sanctioned arts of the Iberian colonizers, including the foundations of the Catholic Church across the "New World" landscape. Race will be a frequent issue of discussion as we consider both indigenous American and African participation in social realities and artistic practice in this colonial context. Cross-listed with HAA 246 and LST 246.

CTH 251 | CATHOLIC THEMES IN CONTEMPORARY CINEMA | 4 quarter hours**(Undergraduate)**

This course will explore and examine the interaction of Catholic themes, symbols, and images through Hollywood and foreign films. Students are required to analyze films outside of class, give oral presentations, and compose papers on selected films. Cross-listed with MOL 319.

CTH 252 | BYZANTINE ART | 4 quarter hours**(Undergraduate)**

This course will explore the art of the Byzantine Empire from the founding of Constantinople in A.D. 330 to the fall of the city to the Ottomans in 1453. Lectures and readings will primarily focus on how contemporaries understood and interacted with a diverse group of monuments and objects now classified as Byzantine art. Significant attention will be devoted to how works of art functioned in the service of imperial and ecclesiastical ideology. Discussions will analyze how Byzantine art was appreciated and appropriated in both the medieval Mediterranean and in modern scholarship. Cross-listed with HAA 234.

CTH 253 | CONQUEST AND CONVERSION: THE ART OF THE EARLY MIDDLE AGES | 4 quarter hours**(Undergraduate)**

This course explores the art of the Medieval period from a broad range of cultures: Early Christian, Byzantine, Islamic, Carolingian, and Ottonian. We will discuss major stylistic trends and explore the relationship between art, culture, and religion. Works of art will be evaluated in terms of their social functions in the societies that produced them and our analysis will incorporate the perspectives of both the producers (patrons, artists) and consumers of art. Cross-listed as HAA 231.

CTH 254 | THE AGE OF CATHEDRALS: THE ART OF THE LATER MIDDLE AGES | 4 quarter hours**(Undergraduate)**

This course will explore the art of the late Medieval period from a broad range of cultures and styles: Byzantine, Romanesque, Gothic, and Islamic. We will discuss major stylistic trends and explore the relationship between art, culture, and religion. Works of art will be evaluated in terms of their social functions in the societies that produced them and our analysis will incorporate the perspectives of both the producers (patrons, artists) and consumers of art. Cross-listed as HAA 232.

CTH 255 | ANCIENT AND MEDIEVAL ART | 4 quarter hours**(Undergraduate)**

A survey of the principal works of architecture, sculpture, painting and the industrial arts created in the Mediterranean basin and in Europe from the Byzantine through the Gothic age.

CTH 256 | ITALIAN RENAISSANCE ART | 4 quarter hours**(Undergraduate)**

This course provides an overview of the history of Italian Renaissance art and architecture in Italy's primary centers of artistic production. Cross-listed as HAA 237.

CTH 257 | BAROQUE ART | 4 quarter hours**(Undergraduate)**

Starting in 1600, from the vantage point of the Counter-Reformation and the rise of modern European states, Baroque Art covers the principal works of art & architecture; artists and patrons; and a wide sweep of social, religious, and political, conditions that impacted cultural thinking and production in the 17th century. Attention is focused on the most prominent artistic centers in Italy, the Spanish Netherlands, England, Spain, the Dutch Republic, and France. The in-class lectures with discussion are accompanied by field work to the Baroque collections of the Art Institute of Chicago. Cross-listed as HAA 238.

CTH 258 | NORTHERN RENAISSANCE ART | 4 quarter hours**(Undergraduate)**

This course features the most significant works of art, their artists & patrons, the social and economic aspects of artistic production, and the dominant cultural issues that flowed brilliantly in Northern Europe - above all, in France, the Netherlands, Bohemia, and German-speaking lands - between 1300 and 1600, during the volatile period of the Renaissance and the outbreak of the Protestant Reformation. Although Flemish oil painting offers the most evident legacy of the Northern Renaissance to the casual museum visitor, this course also introduces the most important outputs in printmaking, sculpture, and the industrial arts, as in tapestry weaving and the fabrication of luxury articles in metalwork. Cross-listed with HAA 236.

CTH 260 | ART, LITURGY AND LIFE | 4 quarter hours**(Undergraduate)**

This class examines how beauty and its antithesis, ugliness, permeate Catholic life and thought. Students will be introduced to the topic by considering examples from a variety of media, including ritual, painting, sculpture, architecture, crafts, and mural art. The students will learn not only how works of art accompany the performance and celebration of worship but also how Christians have learned to discern the living presence of the incarnate form of the divine Word within both art and liturgy. This course will demonstrate with concrete examples how art in Catholicism is the nexus that joins spirituality and liturgy. Theoretical orientation can be gleaned from the Christian theological tradition (St. Augustine, Hans Urs von Balthasar), Christian aesthetic theory (Jacques Maritain, Flannery O'Connor, Walker Percy, or Alejandro Garcia Rivera), liturgical reformers (Odo Cassel, Louis Bouyer, or Virgil Michel), or the document of Vatican II on liturgy, namely, Sacrosanctum Concilium.

CTH 261 | CATHOLIC FAITH AND MUSICAL EXPRESSION | 4 quarter hours**(Undergraduate)**

An investigation of the relationship between Catholic life and music. The development of Catholic service music (masses, canticles, hymns, motets, etc.) as well as religious choral works may be studied.

CTH 264 | CATHOLICISM AND LITERATURE | 4 quarter hours**(Undergraduate)**

Christianity claims that the Word of God became flesh in a human being. It also claims that the story of this human being is found in a book, and that a specific community has protected the proper interpretation of this book. Whatever else Christianity is, it is a history of people telling stories. In this course, we will examine six different genres that Christians have used to tell their story. These are: criticism, gospel, poem, memoir, novel, and short story. The course will introduce students both to different types of literary genres and to essential ideas in Christian theology. These ideas include: prayer, conversion, sacraments, and the like.

CTH 265 | LITERATURE AND THE SACRED | 4 quarter hours**(Undergraduate)**

How human beings across cultures express their intimations of ultimate meaning in a variety of genres ranging from aphorisms and autobiographies to mythic and fictional narratives. Cross-listed with REL 223.

CTH 266 | CONTEMPORARY SPIRITUAL MEMOIRS | 4 quarter hours**(Undergraduate)**

Religious faith is not simply a matter of doctrine or abstract ideas. It is a way of life. In this course, we will examine how five authors describe their own faith – its joys, its struggles, and how it shapes their own lives. We will read selections from memoirs by Thomas Merton, Flannery O'Connor, Kaya Oakes, Amy Andrews and Jessica Griffith, and Richard Rodriguez.

**CTH 270 | JESUS ACROSS CULTURES | 4 quarter hours
(Undergraduate)**

A study of the multiple and diverse (primarily theological, but also literary, artistic and philosophical) historical and contemporary images of Jesus, as a way of understanding the diversity of the Christian tradition and its impacts on society, and of understanding the issue of plurality or diversity itself in religious traditions. Cross-listed with REL 273.

**CTH 271 | ROMAN CATHOLICISM'S ENCOUNTER WITH OTHER RELIGIONS | 4 quarter hours
(Undergraduate)**

A study of how Roman Catholicism understands and responds to other religious traditions, other ways of being religious, and how the encounter with those other traditions affects Roman Catholicism's understanding of itself and its teachings. Cross-listed with REL 285.

**CTH 273 | HISTORY OF THE CATHOLIC CHURCH IN THE U.S. | 4 quarter hours
(Undergraduate)**

This course traces the developments of the Catholic Church from the missionary enterprise to the position of a major social, political and economic institution. The course will examine the manner in which the hierarchical institution of the Catholic Church has related to the Liberal ideal of American Democracy. Cross-listed with HST 243.

**CTH 274 | IRELAND: RELIGION AND THE CONTEMPORARY "TROUBLES" | 4 quarter hours
(Undergraduate)**

An examination of the role of two Christian denominations (Protestant and Roman Catholic) in the more recent "Troubles" in the north of Ireland. Attempts to discover the contributions of religious differences in fueling and resolving the animosities between the Unionist and Republican sides; studies the social-historical dimension of the troubles and the Protestant and Catholic religious activities and official responses to them. Cross-listed with IRE 103.

**CTH 275 | MEDIEVAL PEOPLE: 400 TO 1400 A.D. | 4 quarter hours
(Undergraduate)**

The important components of European society during the Middle Ages, including rulers, knights, and peasants, churchmen and nuns, urban merchants, intellectuals, and artisans. Who were these Medieval people, what differentiated them, how did they interact with each other, and how and why did these interactions change over time? Cross-listed with HST 171.

**CTH 276 | CATHOLICISM IN AFRICA | 4 quarter hours
(Undergraduate)**

This course will study African Catholicism: (1) as a religious heritage dating back to the first century, reaching its climax in the conquest of Alexandria and the entrenchment of the Roman Empire in Africa; (2) as a cross-cultural and socio-political movement which has affected and changed Africa through the Trans-Atlantic Slave Trade, Colonialism, Western Missionary activities in Africa, Western education and the integration of Africa into global Christianity and World Catholicism; (3) as an unique and contemporary African Christian religious movement with her own identity, mission, and character which is redefining the future of Christianity beyond the African continent. Key themes: African church history, African spirituality, African Traditional Religions and cultures, African ecology, church and development in Africa, biblical and Pentecostal movements in Africa; religion and peace, religion and social transformation in Africa.

**CTH 279 | CATHOLICISM AND THE FAMILY | 4 quarter hours
(Undergraduate)**

An historical and theological study of the family in Catholic life and thought. Images of family life in contemporary film and literature will be given special consideration.

**CTH 280 | RELIGION AND EDUCATION IN WESTERN CULTURE | 4 quarter hours
(Undergraduate)**

A study of the relationship between Catholicism and education in Western culture. The historical relationship between Catholic faith and educational institutions will be studied. A major part of the course will explore the theological meaning of education with special attention to the issues of freedom and indoctrination, moral education, authorities in education and issues of the modern Western university.

**CTH 282 | GOD, JUSTICE AND REDEMPTIVE ACTION | 4 quarter hours
(Undergraduate)**

A practicum and seminar combining student participation in social outreach programs with an examination of the theological and ethical issues raised therein. Students will volunteer at a field site for the quarter.

**CTH 288 | IRELAND, 1450-1800, CONQUEST, COLONIZATION & REBELLION | 4 quarter hours
(Undergraduate)**

This course offers a survey of Irish history from the end of the middle ages to the union of Ireland and Great Britain in 1800. It traces the ways in which Ireland was brought under great English (later British) control through processes of agreement, conquest and colonization; and the ways in which various groups within Ireland sought to resist such developments. Cross-listed with HST 266 and IRE 101.

**CTH 289 | IRELAND, 1800 - 2000 | 4 quarter hours
(Undergraduate)**

Survey of Irish history from 1800 to 2000. Examines the course of Irish history from the Act of Union (creating the United Kingdom), through the struggles and reforms of the 19th century (Catholic Emancipation, the Famine and Irish diaspora, Fenianism, Land Reform and Home Rule), to the creation of the modern nation-state of the 20th century (the Easter Rising, partition and civil war, the role of Eamon deValera, the Republic, and the Troubles). Topics include the contributions of Irish culture and its influence in Europe and the world. Cross-listed with HST 268 and IRE 102.

**CTH 290 | THE LIFE AND TIMES OF VINCENT DE PAUL | 4 quarter hours
(Undergraduate)**

A study of Vincent de Paul in his cultural and religious context.

**CTH 291 | VINCENT DE PAUL AND HIS WORLD | 4 quarter hours
(Undergraduate)**

This course has four objectives: 1. To separate the Vincent of "myth" from the Vincent of "history." The "person" Vincent de Paul from the "saint." 2. Contextualize Vincent de Paul within his 17th century world. 3. Recover the role of Louise de Marillac and women in founding the Vincentian tradition. 4. Explore the re-contextualization of Vincent de Paul for the 21st century.

**CTH 292 | WOMEN AND SAINT VINCENT DE PAUL | 4 quarter hours
(Undergraduate)**

The changing roles of women in 17th century France, the importance of women in Vincent de Paul's life, the key relationships of Vincent with Madame de Gondi, Jane de Chantel and Louise de Marillac will be studied in depth. The flowering of Vincent's new conception of possibilities for women in the Ladies of Charity, the Daughters of Charity and other groups of women will be explored.

**CTH 293 | NOTABLE VINCENTIAN WOMEN | 4 quarter hours
(Undergraduate)**

An historical study of the Vincentian charism and how notable women embraced the Vincentian mission in roles of service as wives, mothers, widows, educators, nurses, spiritual leaders, and advocates for those who are poor. Among such women are Louise de Marillac, Elizabeth Bayley Seton, Rosalie Rendu, etc.

**CTH 294 | THE ART OF CRUSADING | 4 quarter hours
(Undergraduate)**

This course focuses on the Crusades. More specifically, it focuses on the world within which the Crusades were born and the Levantine kingdom built as a result of their initial success. Our study will depend on primary artistic, literary, and archaeological materials, as well as the secondary scholarship that has identified and interpreted these materials. Our understanding of this historical moment will be nuanced by the questions we ask of both. The payoff will be an appreciation for the religious, social, political, and artistic forces that defined the twelfth and thirteen centuries in Europe and in the Mediterranean basin, leading as they did to such fascinating phenomena as pilgrimage, the cult of relics, chivalry, holy war, the rise of military orders, and the establishment of the Latin Kingdom of Jerusalem itself. Cross-listed with HAA 233 and HST 211.

**CTH 295 | OZANAM: A VINCENTIAN LIFE | 4 quarter hours
(Undergraduate)**

Catholics have an outstanding experience of social justice and action. For years they have advocated for a fairer economy and reduction of inequalities. In the context of Covid-19 crisis, Pope Francis called again for solidarity and debt relief for poor nations (April 2020). Lay and religious Vincentians have actively contributed to this reflection. Frederic Ozanam (1813-1853) is one of the most famous. Romantic, writer, historian and economist, politician, journalist, traveler, warm friend, passionately in love of his family, he founded the Society of St. Vincent de Paul when he was a student. It is now a charity of 800,000 members in one hundred countries, including the USA. This course will explore the brief but rich life of a man who faced a divided society, and look at how his legacy is relevant for us. It will encourage students to look for parallels between past and present situations, to discover other Vincentians (men and women) and practices oriented to social justice and action. The course is based on lectures, readings, videos, Vincentian materials, interviews, and presentations.

**CTH 336 | THEORIES OF INTERPRETATION | 4 quarter hours
(Undergraduate)**

Philosophical hermeneutics and biblical interpretation. Cross-listed with PHL 355.

**CTH 337 | GREEK AND MEDIEVAL THOUGHT | 4 quarter hours
(Undergraduate)**

A study of selected thinkers and issues from the ancient Greek and Medieval periods.

**CTH 338 | EARLY MODERN PHILOSOPHY | 4 quarter hours
(Undergraduate)**

A study of some of the main philosophers and philosophical movements from the 17th to the 19th centuries. Cross-listed as PHL 295.

**CTH 339 | PHILOSOPHY SINCE KANT | 4 quarter hours
(Undergraduate)**

A study of some of the most influential thinkers of the last 150 years. PHL 100 or HON 105 is a prerequisite for this course.

**CTH 341 | LIBERATION THEOLOGY: THEORY AND PRACTICE | 4 quarter hours
(Undergraduate)**

Focuses upon the ideas and practices of a radical movement for the transformation of Christianity and for social justice that originated in the "Basic Christian Communities" of Latin America and spread from there to North America and the Third World. Cross-listed as REL 351 and PAX 331.

**CTH 350 | LOVE IN THE CHRISTIAN TRADITION | 4 quarter hours
(Undergraduate)**

Christians claim that "God is love" (1 John 4:8). In this course, we will examine representative texts in the Christian tradition that try to understand what it could mean to say that God is love. We will read texts from the Bible through the early, medieval, modern, and contemporary Church. These texts will include works of theology, philosophy, and literature.

**CTH 354 | SPECIAL TOPICS IN CATHOLIC THOUGHT | 4 quarter hours
(Undergraduate)**

Special topics in Catholic Thought; see schedule for current offerings.

**CTH 369 | SPECIAL TOPICS IN THE ART, MUSIC AND LITERATURE OF CATHOLICISM | 4 quarter hours
(Undergraduate)**

Special topics in the Art, Music and Literature of Catholicism; see schedule for current offerings.

**CTH 382 | GOD, JUSTICE AND REDEMPTIVE ACTION I | 2 quarter hours
(Undergraduate)**

A practicum and seminar combining student participation in social outreach programs with an examination of the theological and ethical issues raised therein. Students will volunteer at a field site for the quarter.

**CTH 383 | GOD, JUSTICE, AND REDEMPTIVE ACTION II | 2 quarter hours
(Undergraduate)**

A practicum and seminar combining student participation in social outreach programs with an examination of the theological and ethical issues raised therein. Students will volunteer at a field site for the quarter.

**CTH 386 | THE CATHOLIC CHURCH IN WORLD POLITICS | 4 quarter hours
(Undergraduate)**

Catholicism as it affects (and is affected by) world politics. Various topics might include war and peace, global economy, immigration, nationalism, etc. Cross-listed with PSC 345.

**CTH 389 | SPECIAL TOPICS IN THE SOCIAL DIMENSION OF CATHOLICISM | 4 quarter hours
(Undergraduate)**

SPECIAL TOPICS IN THE SOCIAL DIMENSION OF CATHOLICISM.

**CTH 391 | VINCENT DEPAUL: THE MAN AND THE SAINT | 4 quarter hours
(Undergraduate)**

In this course, students will study St. Vincent de Paul in his cultural and religious context, including a trip to Vincentian locations in France. Students will reflect upon their time abroad, linking their experiential activity to a detailed academic exploration of St. Vincent's life.

**CTH 397 | INTERNSHIP | 4 quarter hours
(Undergraduate)**

INTERNSHIP.

**CTH 398 | SENIOR SEMINAR | 4 quarter hours
(Undergraduate)**

SENIOR SEMINAR.

**CTH 399 | ADVANCED STUDY | 1-6 quarter hours
(Undergraduate)**

Independent Study.

Catholic Theological Union (CTU)

CTU 410 | TOPICS IN RELIGIOUS STUDIES | 3-4.5 quarter hours (Graduate)

Select Topics in Religious Studies. Course Taught at the Catholic Theological Union.

CTU 420 | TOPICS IN CATHOLIC STUDIES | 3-4.5 quarter hours (Graduate)

Select Topics in Catholic Studies. Course Taught at the Catholic Theological Union.

Chemistry (CHE)

CHE 100 | OUR CHEMICAL WORLD | 4 quarter hours (Undergraduate)

A course for non-science majors that develops the essential concepts of chemistry with some focus on applications of these methods and ideas toward a particular aspect of human activity or condition. Only one of series 100-102 may be taken for credit.

CHE 101 | EXPLORING MATTER | 4 quarter hours (Undergraduate)

A course for non-science majors that develops the fundamental concepts of chemistry with experimental exploration to complement the methods and ideas encountered in reading and discussion in class. Only one of series 100-102 may be taken for credit.

CHE 102 | MOLECULES THAT SHAPED THE WORLD | 4 quarter hours (Undergraduate)

A course for non-science majors that presents how molecules and basic chemical concepts have shaped our world. Introductory concepts in chemistry, focusing on atomic and molecular structure and reactivity, will be placed in the larger context of the development of modern human civilization and culture. Topics of discussion may include the roles molecules have played in shaping: cuisine, energy, health, medicine, fashion, environmental policy, and others.

CHE 103 | ENVIRONMENTAL CHEMISTRY | 4 quarter hours (Undergraduate)

A discussion and laboratory exploration of the technological origins, effects, and control of environmental pollutants.

CHE 104 | CHEMICALS, DRUGS AND LIVING SYSTEMS | 4 quarter hours (Undergraduate)

A discussion of the molecular basis of the interaction of specific chemical compounds (chiefly pharmaceuticals and drugs) with living organisms.

CHE 105 | EXPLORING NUTRIENTS/SCIENCE OF NUTRITION | 4 quarter hours (Undergraduate)

A discussion and laboratory exploration of the chemical molecules which supply nutrients for living organisms. This course also includes a quantitative project, applicable to the individual student, to enhance the understanding of the principles of nutrition.

CHE 106 | GEOCHEMISTRY | 4 quarter hours (Undergraduate)

This course for non-science majors that introduces students to basic chemical and geological concepts through a discussion of the chemical principles and scientific laws governing the composition and chemical transformation of the components making up the Earth. Major topics include the scientific method, reporting and treatment of quantitative data, introduction to the basic principles of matter, chemical reactivity, and radioactive decay.

CHE 107 | PROTEINS AND THEIR GENES | 4 quarter hours (Undergraduate)

A discussion and laboratory introduction to many aspects of proteins: their chemical structures, biological functions, how genes store the information to make them, and how changes in genes can lead to changes in proteins, and to cancer and other diseases.

CHE 109 | FORENSIC CHEMISTRY | 4 quarter hours (Undergraduate)

Discussion and laboratory exploration of the application of modern science to problems in criminology, evidence, art, and archaeology.

CHE 116 | GENERAL, ORGANIC AND BIOLOGICAL CHEMISTRY I | 3 quarter hours (Undergraduate)

First course of a two-quarter sequence designed to introduce the physical and chemical properties of molecules. This course will cover: atomic and molecular structure, the states of matter, description of gases, preparation of solutions, acid/base chemistry, reactions and equilibrium and introduction to structure and conventional drawing of organic molecules.

CHE 117 is a co-requisite for this class.

CHE 117 | GENERAL, ORGANIC AND BIOLOGICAL CHEMISTRY LABORATORY I | 1 quarter hour (Undergraduate)

This laboratory course introduces students to basic chemical laboratory techniques, while providing hands-on experience and applications related to CHE 116 course material.

CHE 116 is a co-requisite for this class.

CHE 118 | GENERAL, ORGANIC AND BIOLOGICAL CHEMISTRY II | 3 quarter hours (Undergraduate)

Second course of a two-quarter sequence designed to introduce the physical and chemical properties of molecules. This course will cover: basic reactivity of organic functional groups relevant to biological systems, description of biomolecules (proteins, carbohydrates, nucleic acids and lipids), enzyme and vitamin chemistry, nucleic acid and protein synthesis and metabolic pathways and energy production.

C- or better in CHE 116 and CHE 117 are prerequisites for this class.

CHE 119 is a co-requisite for this class.

CHE 119 | GENERAL, ORGANIC AND BIOLOGICAL CHEMISTRY LABORATORY II | 1 quarter hour (Undergraduate)

This laboratory course continues to practice basic laboratory skills learned in CHE 117, while introducing new organic and biochemical techniques related to CHE 118 course material.

C- or better in CHE 116 and CHE 117 are prerequisites for this class.

CHE 119 is a co-requisite for this class.

CHE 120 | GENERAL CHEMISTRY IP | 5 quarter hours (Undergraduate)

This introductory course for science majors covers the same subject matter and sequence of topics as that of CHE 130, however this course includes additional coverage of fundamental chemistry concepts and more in-class time devoted to developing problem-solving skills. CO-REQUISITE(S): CHE131 and MAT 130 if math placement indicates MAT 130 (5 quarter hours)

Placement by the Chemistry Placement Test is a prerequisite for this class. CHE 131 is a co-requisite for this class. MAT 130 is a prerequisite for this class (determined by Math placement test score).

**CHE 122 | GENERAL CHEMISTRY IIP | 5 quarter hours
(Undergraduate)**

Second course of three in the General Chemistry series that covers the same material as that of CHE 132, however this course includes additional coverage of fundamental chemistry concepts and more in-class time devoted to developing problem-solving skills. CO-REQUISITE(S): CHE133 (5 quarter hours)

A grade of C- or better in (CHE 120 or CHE 130) and in CHE 131 are prerequisites for this class. CHE 133 is a co-requisite for this class.

**CHE 128 | BASIC CHEMICAL CONCEPTS | 3 quarter hours
(Undergraduate)**

This course develops the fundamental concepts of chemistry and basic quantitative reasoning. This course is suitable to prepare students to take General Chemistry I (CHE130 or CHE 136). (3 quarter hours)

CHE 129 and MAT 130 or higher are a corequisite for this class.

**CHE 129 | BASIC CHEMICAL CONCEPTS LABORATORY | 1 quarter hour
(Undergraduate)**

Laboratory course to be taken in conjunction with CHE128. (1 quarter hour)

CHE 128 and MAT 130 or higher are a corequisite for this class

**CHE 130 | GENERAL CHEMISTRY I | 3 quarter hours
(Undergraduate)**

This introductory course for science majors emphasizes the composition of matter, atomic and molecular structure, bonding and chemical reactions. It is the first in the three-course sequence of General Chemistry. CO-REQUISITE(S): CHE131 (3 quarter hours)

MAT 130 is a pre-requisite for this class. CHE 131 is a co-requisite for this class.

**CHE 131 | GENERAL CHEMISTRY I LABORATORY | 1 quarter hour
(Undergraduate)**

Laboratory course to be taken in conjunction with CHE 120 or CHE 130. The experimental techniques provide hands-on experience with the course material in CHE 120 and CHE 130. CO-REQUISITE(S): CHE 120 or CHE 130 (1 quarter hour)

Either CHE 120 or CHE 130 is a co-requisite for this class.

**CHE 132 | GENERAL CHEMISTRY II | 3 quarter hours
(Undergraduate)**

Second course of three in the General Chemistry series. Topics discussed include: states of matter, phase transitions, properties of solutions, kinetics and equilibrium. CO-REQUISITE(S): CHE 133 (3 quarter hours)

A grade of C- or above in CHE 131 and (CHE 122 or CHE 120 or CHE 130) are prerequisites for this class. CHE 133 is a co-requisite for this class.

**CHE 133 | GENERAL CHEMISTRY LABORATORY II | 1 quarter hour
(Undergraduate)**

Laboratory course to be taken in conjunction with CHE 122 or CHE 132. The experimental techniques learned in lab provide hands-on experience with the course material in CHE 122 and CHE 132. CO-REQUISITE(S): CHE 122 or CHE 132 (1 quarter hour)

A minimum grade of C- in (CHE 120 or CHE 130) and in CHE 131 are prerequisites for this class. CHE 122 or CHE 132 is a corequisite for this class.

**CHE 134 | GENERAL CHEMISTRY III | 3 quarter hours
(Undergraduate)**

Third of three courses in the General Chemistry sequence. Topics discussed include: chemical equilibrium in aqueous solution (acids and bases, solubility, complex ion formation), thermodynamics (entropy and free energy), electrochemistry, chemistry of d-block elements and descriptive chemistry. CO-REQUISITE(S): CHE 135 (3 quarter hours)

A minimum grade of C- in (CHE 122 or CHE 132) and in CHE 133 are prerequisites for this class and CHE 135 is a corequisite for this class.

**CHE 135 | GENERAL CHEMISTRY LABORATORY III | 1 quarter hour
(Undergraduate)**

Laboratory course to be taken in conjunction with CHE 134. The experimental techniques provide hands-on experience with the course material in CHE 134. CO-REQUISITE(S): CHE 134 (1 quarter hour)

A minimum grade of C- in (CHE 122 or CHE 132) and in CHE 133 are prerequisites for this class and CHE 134 is a corequisite for this class.

**CHE 136 | GENERAL CHEMISTRY I | 5 quarter hours
(Undergraduate)**

This course is a rigorous introductory course in general chemistry covering topics such as composition of matter, atomic and molecular structure, bonding and chemical reactions, common states of matter, properties of solutions, phase transitions. Students must coregister for CHE 137, the laboratory course. (5 quarter hours)

MAT 130 or equivalents or placement by test is a prerequisite for this class.

**CHE 137 | GENERAL CHEMISTRY I LABORATORY | 1 quarter hour
(Undergraduate)**

Laboratory course to be taken in conjunction with CHE 136. This laboratory course introduces students to basic chemical laboratory techniques. (1 quarter hour)

MAT 130 or equivalents or placement by test is a prerequisite for this class.

**CHE 138 | GENERAL CHEMISTRY II | 5 quarter hours
(Undergraduate)**

This course is a continuation of CHE136 covering topics including kinetics, chemical equilibrium in aqueous solution (acids and bases, solubility, complex ion formation), thermodynamics (entropy and free energy), electrochemistry, chemistry of d-block elements and descriptive chemistry. Students must coregister for CHE 139, the laboratory course. (5 quarter hours)

A minimum grade of C- in CHE 136 and CHE 137 is a prerequisite for this class.

**CHE 139 | GENERAL CHEMISTRY II LABORATORY | 1 quarter hour
(Undergraduate)**

This laboratory course is a continuation of CHE137, emphasizing additional quantitative and qualitative laboratory techniques to coincide with CHE138 content. (1 quarter hour)

A minimum grade of C- in CHE 136 and CHE 137 is a prerequisite for this class.

**CHE 140 | UNIVERSITY CHEMISTRY I | 3 quarter hours
(Undergraduate)**

The subject matter and sequence of topics are similar to that of the General Chemistry sequence (CHE 130-132-134), however this course is designed for students who are prepared for a more thorough and systematic study of chemistry including increased emphasis on the connection between chemical and physical topics. This is the first of a three-course sequence of University Chemistry. This course meets for three hours of lecture and one hour of discussion per week. Students must co-register for the laboratory companion course, CHE 141. (3 quarter hours)

MAT 131 and completion of the Chemistry Assessment Examination is a prerequisite of this class.

**CHE 141 | UNIVERSITY CHEMISTRY LABORATORY I | 1 quarter hour
(Undergraduate)**

Laboratory course to be taken in conjunction with CHE 140. This course meets weekly for three hours. The experimental techniques provide hands-on experience with the course material in CHE140. Students must co-register for the lecture companion course, CHE140. (1 quarter hour)

MAT 131 and completion of the Chemistry Assessment Examination is a prerequisite of this class.

**CHE 142 | UNIVERSITY CHEMISTRY II | 3 quarter hours
(Undergraduate)**

Second course of three in the University Chemistry sequence. This course meets for three hours of lecture and one hour of discussion per week. Students must co-register for the laboratory companion course, CHE 143. (3 quarter hours)

A grade of C- or higher in CHE 140 and CHE 141 is a prerequisite for this class.

**CHE 143 | UNIVERSITY CHEMISTRY LABORATORY II | 1 quarter hour
(Undergraduate)**

Laboratory course to be taken in conjunction with CHE 142. The course meets weekly for three hours. The experimental techniques provide hands-on experience with the course material in CHE 142. Students must co-register for the lecture companion course, CHE142. (1 quarter hour)

A grade of C- or higher in CHE 140 and CHE 141 is a prerequisite for this class.

**CHE 144 | UNIVERSITY CHEMISTRY III | 3 quarter hours
(Undergraduate)**

Third course of three in the University Chemistry sequence. This course meets for three hours of lecture and one hour of discussion per week. Students must co-register for the laboratory companion course, CHE 145. (3 quarter hours)

A grade of C- or higher in CHE 142 and CHE 143 is a prerequisite for this class. A grade of C- or higher in CHE 142 and CHE 143 is a prerequisite for this class.

**CHE 145 | UNIVERSITY CHEMISTRY LABORATORY III | 1 quarter hour
(Undergraduate)**

Laboratory course to be taken in conjunction with CHE 144. The course meets weekly for three hours. The experimental techniques provide hands-on experience with the course material in CHE 144. Students must co-register for the lecture companion course, CHE144. (1 quarter hour)

A grade of C- or higher in CHE 142 and CHE 143 is a prerequisite for this class. A grade of C- or higher in CHE 142 and CHE 143 is a prerequisite for this class.

**CHE 202 | APPLIED PROBABILITY AND STATISTICS | 2 quarter hours
(Undergraduate)**

This is a lecture course that introduces students to concepts related to the statistical analysis of experimental data, covering material from uncertainty, significant figures, and propagation of error through least squares fitting to descriptions and applications of several statistical distributions. (2 quarter hours)

A grade of C- or better in (CHE 134 and CHE 135) or (CHE 138 and CHE 139) or (CHE 144 and CHE 145) is a prerequisite and CHE 204 is a co-requisite for this class.

**CHE 204 | ANALYTICAL CHEMISTRY | 3 quarter hours
(Undergraduate)**

Use of equilibrium chemistry to solve problems of chemical analysis in acid-base, solubility, metal-ligand complex, and electrochemical systems. CO-REQUISITE: CHE 205. (3 quarter hours)

A grade of C- or better in (CHE 134 and CHE 135) or (CHE 138 and CHE 139) or (CHE 144 and 145) is a prerequisite for this class. CHE 205 is a co-requisite.

**CHE 205 | ANALYTICAL CHEMISTRY LABORATORY | 1 quarter hour
(Undergraduate)**

Laboratory to be taken in conjunction with CHE 204. Methods include wet chemistry and instrumental techniques of analysis. CO-REQUISITE(S): CHE 204. (1 quarter hour)

A grade of C- or better in (CHE 134 and CHE 135) or (CHE 138 and CHE 139) or (CHE 144 and CHE 145) is a prerequisite for this class. CHE 204 is a co-requisite.

**CHE 228 | SURVEY OF ORGANIC CHEMISTRY | 3 quarter hours
(Undergraduate)**

This one-quarter course gives students an overview of the fundamentals of organic chemistry and its applications in health and environmental sciences. This is a survey course meant for students who do not need to learn a full year of organic chemistry. Emphasis is on the structure, function, and reactivity of the major classes of organic compounds.

This course meets for six hours per week: three hours of traditional lecture and three hours of lab. The course is suitable for nursing and environmental science students; it does not substitute for any traditional organic chemistry course. CO-REQUISITE(S): CHE 229. (3 quarter hours)

A grade of C- or better in (CHE 132 and CHE 133) or (CHE 138 and CHE 139) is a prerequisite for this class.

**CHE 229 | SURVEY OF ORGANIC CHEMISTRY LABORATORY | 1 quarter hour
(Undergraduate)**

Laboratory to be taken in conjunction with CHE 229. CO-REQUISITE(S): CHE 228. (1 quarter hour)

A grade of C- or better in (CHE 132 and CHE 133) or (CHE 138 and CHE 139) is a prerequisite for this class.

**CHE 230 | ORGANIC CHEMISTRY I | 3 quarter hours
(Undergraduate)**

First in a sequence of courses designed to investigate what organic chemistry is and how it works, by emphasizing the relationship between structure and function of organic molecule and the language and fundamental concepts of organic chemistry, including: structure and bonding; acid-base reactions; functional groups; thermodynamics and kinetics of organic reactions; stereochemistry; substitution and elimination reactions of alkyl halides. (3 quarter hours)

A minimum grade of C- in (CHE 134 and CHE 135) or (CHE 138 and CHE 139) is a prerequisite for this class.

**CHE 231 | ORGANIC CHEMISTRY LABORATORY I | 1 quarter hour
(Undergraduate)**

Laboratory to be taken in conjunction with CHE 230. (1 quarter hour)

A minimum grade of C- in ([CHE 134 and CHE 135] or [CHE 138 and CHE 139] or [CHE 144 and CHE 145]) is a prerequisite for this class.

CHE 230 is a corequisite for this class.

**CHE 232 | ORGANIC CHEMISTRY II | 3 quarter hours
(Undergraduate)**

Second in a sequence of courses designed to investigate what organic chemistry is and how it works, by emphasizing the relationship between structure and function of organic molecules. Specific topics investigated include the reactivity and synthesis of alcohols, ethers, epoxides, alkenes, alkynes, alkanes, conjugated, and aromatic compounds. To be taken in conjunction with CHE 233. (3 quarter hours)

A minimum grade of C- in CHE 230 and CHE 231 is a prerequisite for this class. CHE 233 is a corequisite for this class.

**CHE 233 | ORGANIC CHEMISTRY LABORATORY II | 1 quarter hour
(Undergraduate)**

Laboratory to be taken in conjunction with CHE 232. (1 quarter hour)

A minimum grade of C- in CHE 230 and CHE 231 is a prerequisite for this class. CHE 232 is a corequisite for this class.

**CHE 234 | ORGANIC CHEMISTRY III | 3 quarter hours
(Undergraduate)**

Third in a sequence of courses designed to investigate what organic chemistry is and how it works, by emphasizing the relationship between structure and function of organic molecules. Specific topics investigated include the reactivity and synthesis of carbonyl compounds; amines; and bio-molecules. To be taken in conjunction with CHE 235. (3 quarter hours)

A minimum grade of C- in CHE 232 and CHE 233 is a prerequisite for this class. CHE 235 is a corequisite for this class.

**CHE 235 | ORGANIC CHEMISTRY LABORATORY III | 1 quarter hour
(Undergraduate)**

Laboratory to be taken in conjunction with CHE 234. (1 quarter hour)

A minimum grade of C- in CHE 232 and CHE 233 is a prerequisite for this class.

**CHE 236 | ORGANIC CHEMISTRY I | 5 quarter hours
(Undergraduate)**

First in a sequence of courses designed to investigate what organic chemistry is and how it works, by emphasizing the relationship between structure and function of organic molecules, and the language and fundamental concepts of organic chemistry. Specific topics that are covered include the following: structure and bonding; acids and bases; functional groups; thermodynamics and kinetics of organic reactions; alkanes; stereochemistry; alkyl halides and nucleophilic substitution; elimination reactions; alcohols, ethers and epoxides; alkenes; alkynes; oxidation and reduction. CO-REQUISITE(S): CHE 237. (5 quarter hours)
C- or better in (CHE 134 and CHE 135) or (CHE 138 and CHE 139) are a prerequisite for this class.

**CHE 237 | ORGANIC CHEMISTRY I LABORATORY | 1 quarter hour
(Undergraduate)**

Laboratory to be taken in conjunction with CHE 236. CO-REQUISITE(S): CHE 236. (1 quarter hour)

C- or better in (CHE 134 and CHE 135) or (CHE 138 and CHE 139) are a prerequisite and CHE 236 is a corequisite for this class

**CHE 238 | ORGANIC CHEMISTRY II | 5 quarter hours
(Undergraduate)**

Second in a sequence of courses designed to investigate what organic chemistry is and how it works, by emphasizing the relationship between structure and function of organic molecules, and the language and fundamental concepts of organic chemistry. Specific topics that are covered include the following: conjugation, resonance, and dienes; benzene and aromatic compounds; electrophilic aromatic substitution; carboxylic acids; organometallic reagents; carbonyl substitution and addition reactions; aldehydes and ketones; carbonyl condensation reactions; amines; bio-molecules. To be taken in conjunction with CHE 239. (5 quarter hours)

A minimum grade of C- in CHE 236 and CHE 237 is a prerequisite for this course.

**CHE 239 | ORGANIC CHEMISTRY II LABORATORY | 1 quarter hour
(Undergraduate)**

Laboratory to be taken in conjunction with CHE 238. (1 quarter hour)

A minimum grade of C- in CHE 236 and CHE 237 is a prerequisite for this course.

**CHE 261 | INSTRUMENTAL ANALYSIS | 4 quarter hours
(Undergraduate)**

A lecture and lab course examining instrumentation in chemical analysis. Areas of focus include electronics and measurement theory, applied measurement statistics, chromatography, spectroscopy, and electroanalytical instruments and their applications.

Grades of C- or better in both CHE 204 and CHE 205 are prerequisites for this class.

**CHE 264 | ATMOSPHERIC CHEMISTRY | 3 quarter hours
(Undergraduate)**

Atmospheric chemistry with a focus on physical and chemical processes in the troposphere and stratosphere. CO-REQUISITE(S): CHE 265. (3 quarter hours)

C- or better in CHE 204 and CHE 205 are prerequisites for this course.

**CHE 265 | ATMOSPHERIC CHEMISTRY LABORATORY | 1 quarter hour
(Undergraduate)**

Laboratory to be taken in conjunction with CHE 264, with emphasis placed on gas phase and particulate measurements. CO-REQUISITE(S): CHE 264. (1 quarter hour)

C- or better in CHE 204 and CHE 205 are a prerequisite for this class.

**CHE 268 | SOLID WASTE CHEMISTRY | 3 quarter hours
(Undergraduate)**

Fundamental chemical processes involved in the processing of solid wastes. CO-REQUISITE(S): CHE 269. (3 quarter hours)

C- or better in CHE 204 and CHE 205 are prerequisites for this course.

**CHE 269 | SOLID WASTE CHEMISTRY LABORATORY | 1 quarter hour
(Undergraduate)**

Laboratory to be taken in conjunction with CHE 268. CO-REQUISITE(S): CHE 268. (1 quarter hour)

C- or better in CHE 204 and CHE 205 are prerequisites for this course.

CHE 300 | THERMODYNAMICS AND INTRODUCTION TO QUANTUM MECHANICS | 4 quarter hours**(Undergraduate)**

This course will cover topics in thermodynamics, including thermodynamic laws, chemical potential, and both phase and chemical equilibria. In addition, the postulates of quantum mechanics will be discussed, and these postulates will be applied to simple systems, allowing spectroscopic applications to be explored.

(C- or better in CHE 204 and CHE 205) and (C- or better in MAT 149 or MAT 152 or MAT 162 or MAT 172 or MAT 156) and (C- or better in PHY 152 or PHY 172 or PHY 156) are pre-requisites for this class.

CHE 302 | QUANTUM CHEMISTRY | 3 quarter hours**(Undergraduate)**

This is the first course in a three-quarter long physical chemistry sequence. This course focuses on quantum mechanics: a theoretical description of matter at the microscopic level. The energy levels of atoms and molecules will be derived; spectroscopic applications will be explored. Students must co-register for the laboratory companion course, CHE 303. (3 quarter hours)

D or better in CHE 300 is a pre-requisite for this class.

CHE 303 | EXPERIMENTAL PHYSICAL CHEMISTRY I | 1 quarter hour**(Undergraduate)**

Laboratory to be taken in conjunction with CHE 302. Introduction to essential skills and techniques of experimental physical chemistry. Topics include the use of data analysis software, computational methods, basic spectroscopy, and technical writing. CO-REQUISITE(S): CHE 302. (1 quarter hour)

(C- or better in CHE 204 and CHE 205) and (MAT 149 or MAT 152 or MAT 162 or MAT 172) and PHY 172 are prerequisites for this course.

CHE 304 | THERMOCHEMISTRY | 3 quarter hours**(Undergraduate)**

This is the second course in a three-quarter long physical chemistry sequence. This course explores the molecular-scale effects of quantum mechanics and thermodynamics. The understanding of quantum mechanics gained during CHE 302 is extended into the molecular regime, with a focus on bonding. The basic principles of thermodynamics are explored in detail. These principles are then applied to build up a detailed understanding of chemical equilibria and the properties of various states of matter. Students must co-register for the laboratory companion course, CHE 305. (3 quarter hours)

C- or better in CHE 302 and CHE 303 are a prerequisite for this class.

CHE 305 | EXPERIMENTAL PHYSICAL CHEMISTRY II | 1 quarter hour**(Undergraduate)**

Laboratory to be taken in conjunction with CHE 304. The goal of this laboratory course is to teach students essential skills and techniques of physical chemistry. Experimental work will focus on electronic spectroscopy and thermodynamics. CO-REQUISITE(S): CHE 304. (1 quarter hour)

C- or better in CHE 302 and CHE 303 are a prerequisite for this class.

CHE 306 | Kinetics and Statistical Thermodynamics | 3 quarter hours**(Undergraduate)**

This is the third course in a three-quarter long physical chemistry sequence. This course focuses on the connection between quantum mechanics and thermodynamics, as well as chemical kinetics. Topics discussed may include: kinetics, molecular dynamics, statistical mechanics, and transport properties. Students must co-register for the laboratory companion course, CHE 307. (3 quarter hours)

C- or better in CHE 302 is a pre-requisite for this class.

CHE 307 | EXPERIMENTAL PHYSICAL CHEMISTRY III | 1 quarter hour**(Undergraduate)**

Laboratory to be taken in conjunction with CHE 306. The goal of this laboratory course is to teach students essential skills and techniques of physical chemistry. CO-REQUISITE(S): CHE 306. (1 quarter hour)

C- or better in CHE 304 and CHE 305 are prerequisites for this course.

CHE 308 | PHYSICAL CHEMISTRY FOR BIOLOGICAL SCIENCE | 3 quarter hours**(Undergraduate)**

This course will cover various topics from the field of physical chemistry with an emphasis on applications to biological systems. Topics will include: quantum mechanics, thermodynamics, kinetics, and statistical mechanics. In all cases, the focus will be on the application of these topics to biological molecules, including DNA, RNA, and proteins.

Laboratory experiments will complement lecture topics, and may include examinations such as protein folding, isothermal calorimetry for protein-protein interactions, differential scanning calorimetry, and spectroscopic investigations of protein and DNA structure.

BIO 193, (C- or better in CHE 134/135, CHE 204/205), (PHY 150/151/152 or 170/171/172), and (MAT 147/148/149 or 150/151/152 or 160/161/162 or 170/171/172) are prerequisites for this class. CHE 309 is a co-requisite for this class.

CHE 309 | PHYSICAL CHEMISTRY FOR BIOLOGICAL SCIENCES LAB | 1 quarter hour**(Undergraduate)**

Laboratory experiments will complement lecture topics, and may include examinations such as protein folding, isothermal calorimetry for protein-protein interactions, differential scanning calorimetry, and spectroscopic investigations of protein and DNA structure.

BIO 193, (C- or better in CHE 134/135, CHE 204/205), (PHY 150/151/152 or 170/171/172), and (MAT 147/148/149 or 150/151/152 or 160/161/162 or 170/171/172) are prerequisites for this class. CHE 308 is a co-requisite for this class.

CHE 310 | NUCLEAR CHEMISTRY | 4 quarter hours**(Undergraduate)**

This is a course for advanced undergraduates and graduate students.

The course emphasizes the theory of radioactive decay, nuclear properties, mass-energy systematics, and nuclear applications.

(C- or better in CHE 205) and (PHY 152 or PHY 172) are prerequisites for this course.

CHE 315 | PHYSICAL CHEMISTRY LAB | 4 quarter hours**(Undergraduate)**

This four-credit laboratory course will include experiments related to thermodynamics, quantum mechanics, and kinetics. Experiments in computational chemistry may also be included. Students will be introduced to advanced software used for data analysis.

CHE 318 | BIOPHYSICAL CHEMISTRY | 4 quarter hours**(Undergraduate)**

This course is designed for advanced undergraduate students with an interest in the interdisciplinary field of biophysics. The course will focus on several subfields of biophysical chemistry, including: fluorescence as a tool in biophysics; protein folding; biophysical applications of single molecule fluorescence, atomic force microscopy, X-ray crystallography, mass spectrometry, and NMR spectroscopy. Additional topics will be selected by students from a list of possible choices.

C- or better in CHE 300 or CHE 302 or CHE 308 or CHE 340 is a pre-requisite for this class.

CHE 320 | INTERMEDIATE INORGANIC CHEMISTRY | 3 quarter hours (Undergraduate)

Lecture course emphasizing synthesis, structure and reactions of metal ligand compounds of general and biological interest. CO-REQUISITE(S): CHE 321. (3 quarter hours)

C- or better in (CHE 234 and CHE 235) or (CHE 238 and CHE 239) are a prerequisite for this class.

CHE 321 | INTERMEDIATE INORGANIC CHEMISTRY LABORATORY | 1 quarter hour (Undergraduate)

Laboratory to be taken in conjunction with CHE 320. CO-REQUISITE(S): CHE 320. (1 quarter hour)

C- or better in (CHE 234 and CHE 235) or (CHE 238 and CHE 239) are a prerequisite for this class.

CHE 326 | ORGANOMETALLIC CHEMISTRY | 3 quarter hours (Undergraduate)

Organometallic chemistry is the study of compounds that contain a metal-carbon bond, and thus unites the fields of organic and inorganic chemistry. Organometallic compounds are commonly employed throughout various chemical sub-industries for the synthesis of pharmaceuticals, liquid crystals, polymer precursors, fragrances, hormones and more. This course will provide an introduction to the fundamental structure and bonding of organometallic complexes, while offering an in depth study of the unique reaction mechanisms by which metals, particularly transition metals, react with organic molecules. Applications of these compounds and reactions to real-world industrial processes will also be presented to highlight the tremendous utility of this chemistry. Students must co-register for the laboratory companion course, CHE 327. (3 quarter hours)

C- or better in (CHE234 and CHE235) or (CHE238 and CHE239) are prerequisites for this course.

CHE 327 | ORGANOMETALLIC CHEMISTRY LABORATORY | 1 quarter hour (Undergraduate)

Laboratory to be taken in conjunction with CHE 326. This course is designed to provide the student with a thorough introduction to the experimental techniques utilized by practicing chemists in the synthesis, isolation, and characterization of organic compounds. CO-REQUISITE(S): CHE 326. (1 quarter hour)

C- or better in (CHE234 and CHE235) or (CHE238 and CHE239) are prerequisites for this course.

CHE 330 | SENIOR CAPSTONE IN THE PHYSICAL SCIENCES | 4 quarter hours (Undergraduate)

Capstone in the Physical Sciences. A course for graduating chemistry and physics majors to integrate physical science experience with non-scientific fields.

CHE 332 | POLYMER SCIENCE | 3 quarter hours (Undergraduate)

This course has been designed to expose students to various aspects of polymer science. The course will focus on the synthesis, structure, and properties of an array of both synthetic and natural polymers. Students will learn the means by which various classes of polymers are prepared and characterized, with an emphasis on the mechanisms of formation, including: free radical, cationic, anionic, condensation, and transition metal-mediated and catalyzed polymerization methods. The course will also highlight differences in the physical properties of polymers, and how such differences can be controlled and exploited for practical purposes. Students will also be introduced to more modern macromolecular materials including dendrimers and nanostructures. The applications of the polymers discussed in the course will also be presented in order to provide context for the real-world utility of these materials. Students must register for the co-requisite laboratory companion course, CHE 333.

C- or better in (CHE 234 and CHE 235) or (CHE 238 and CHE 239) are prerequisites for this course and CHE 333 is a co-requisite for this class.

CHE 333 | POLYMER SCIENCE LAB | 1 quarter hour (Undergraduate)

Laboratory to be taken in conjunction with CHE 332. This course is designed to provide students with practical skills in the area of polymer science. The course will cover topics related to the synthesis, isolation, and characterization of polymeric materials. Students must be co-registered for the lecture course CHE 332.

C- or better in (CHE 234 and CHE 235) or (CHE 238 and CHE 239) are prerequisites for this course and CHE 332 is a co-requisite for this class.

CHE 334 | NANOMATERIALS AND NANOTECHNOLOGY | 4 quarter hours (Undergraduate)

Nanotechnology is a well-established sector of our technology economy, driving much of the function of modern electronics. Nanomaterials and nanotechnology are also thriving research fields, both in industry and academia. This course will prepare students to work in this exciting and growing field. In the first section of the course we will explore what it means for something to be a nanomaterial, and how the properties of nanomaterials can be determined. In the second section of the course we will explore several nanotechnologies, identifying the mechanisms that facilitate the special functions of the nanomaterials used to produce them. Students will also get hands-on experience creating nanomaterials in a laboratory.

A minimum grade of C- in (CHE 134 and CHE 135) or (CHE 138 and CHE 139) is a prerequisite for this class.

CHE 340 | BIOCHEMISTRY I | 3 quarter hours (Undergraduate)

First in a three-course sequence, directed at those who wish an in- depth exploration of modern biochemistry. This course covers the structures and functions of the four major macromolecules, concentrating on enzyme kinetics and regulation. CO-REQUISITE(S): CHE 341. The general biology sequence is strongly recommended. (3 quarter hours)

A grade of C- or better in (CHE234 and CHE 235) or (CHE 238 and CHE 239) is a prerequisite for this course.

**CHE 341 | EXPERIMENTAL BIOCHEMISTRY I | 1 quarter hour
(Undergraduate)**

Laboratory to be taken in conjunction with CHE 340. This course will introduce classic and modern techniques for isolating and characterizing biological molecules. Topics covered will include buffer preparation; amino acid analysis; detection, quantification, and purification of proteins; enzyme kinetics; purification, amplification, and analysis of DNA; protein stabilization; and molecular interaction analysis. CO-REQUISITE(S): CHE 340. (1 quarter hour)

A grade of C- or better in (CHE234 and CHE 235) or (CHE 238 and CHE 239) is a prerequisite for this course.

**CHE 342 | BIOCHEMISTRY II | 3 quarter hours
(Undergraduate)**

Second in a three-course sequence, directed at those who wish an in- depth exploration of modern biochemistry. This course covers energy metabolism and biosynthetic pathways, with emphasis on their coordinated regulation. CO-REQUISITE(S): CHE 343. (3 quarter hours)
C- or better in CHE 340 and CHE 341 are a prerequisite for this class.

**CHE 343 | EXPERIMENTAL BIOCHEMISTRY II | 1 quarter hour
(Undergraduate)**

Laboratory to be taken in conjunction with CHE 342. Applications of basic techniques from CHE 341: DNA cloning and transformation; protein expression, purification, and characterization; and advanced biophysical methods. CO-REQUISITE(S): CHE 342. (1 quarter hour)
C- or better in CHE 340 and CHE 341 are a prerequisite for this class.

**CHE 344 | BIOCHEMISTRY III | 3 quarter hours
(Undergraduate)**

Third in a three-course sequence, directed at those who wish an in- depth exploration of modern biochemistry. This course covers metabolism, nucleic acid structure and replication, transcription and translation. Also included are methods of biotechnology and an introduction to reading the primary literature. CO-REQUISITE(S): CHE 345. (3 quarter hours)
C- or better in CHE 342 is a pre-requisite for this class.

**CHE 345 | EXPERIMENTAL BIOCHEMISTRY III | 1 quarter hour
(Undergraduate)**

Laboratory to be taken in conjunction with CHE 344. This course will introduce students to bioinformatics methods including protein function prediction and structure analysis, DNA/protein sequence analysis and alignment, and special topics laboratory techniques. CO-REQUISITE(S): CHE 344. (1 quarter hour)

C- or better in CHE 342 and CHE 343 are a prerequisite for this class.

**CHE 346 | PRINCIPLES OF BIOCHEMISTRY | 4 quarter hours
(Undergraduate)**

This course covers the key topics in biochemistry. These include non-covalent interactions, acid/base chemistry, chemical and three-dimensional structures of proteins/nucleic acids/lipids, hemoglobin oxygen binding, cytoskeletal and motor proteins, enzyme mechanisms/ kinetics, membrane and membrane proteins/transport, signaling, energy metabolism and biosynthesis. Formerly CHE 240. This course is not intended for students majoring in chemistry and does not count as a CHE 250+ in-depth course for the major.

C- or better in CHE 232 or CHE 238 is a prerequisite for this class.

**CHE 348 | CHEMICAL BIOLOGY | 4 quarter hours
(Undergraduate)**

This course introduces students to a new discipline spanning the fields of chemistry and biology in which chemical techniques and tools, often compounds produced through synthetic chemistry are used to study and manipulate biological systems in an effort to unravel biological problems and systems. The course will take a case study approach. Techniques encountered in the case study will be studied in depth. Primary literature will be used extensively in the in depth case study.

C- or better in CHE 340 is a prerequisite for this class.

**CHE 360 | MEDICINAL CHEMISTRY | 4 quarter hours
(Undergraduate)**

This course emphasizes organic chemical principles and reactions vital to drug design and drug action in the human body. Medicinal chemists design molecules that alter phenomena operating at the overlap of chemistry, biochemistry, cell biology, and pharmacology. This course introduces the conceptual frameworks and methods employed in drug development using case histories and mechanisms of clinically important drugs as illustrative examples.

C- or better in CHE 234 or CHE238 are prerequisites for this course.

**CHE 362 | DRUGS AND TOXICOLOGY | 4 quarter hours
(Undergraduate)**

This course covers the chemical and biological analysis of the metabolism and distribution of drugs, toxins and chemicals in animals and humans, and the mechanism by which they cause therapeutic and toxic responses. Metabolism and toxicity as a basis for drug development, metabolic polymorphisms and biomarkers of exposure are also covered.

C- or better in CHE 234 or CHE 238 is a prerequisite for this class.

**CHE 364 | NUTRITION | 4 quarter hours
(Undergraduate)**

This is a one-quarter course focused on the advanced chemical aspects of human nutrition. The topics include the nutritive and toxic content of foods and health effects, a review of basic metabolic processes, nutrient transport and storage systems, cell signaling and regulation, and hormonal regulation and fuel utilization.

C- or better in CHE 234 or CHE 238 and CHE 340 are a prerequisite for this class.

**CHE 376 | COMPUTATIONAL CHEMISTRY | 4 quarter hours
(Undergraduate)**

This course is designed to provide an accessible and practical introduction to computational chemistry. The course provides an overview of different methods commonly used in the field ranging from classical to quantum mechanical ab initio and density functional methods. PREREQUISITE(S): CHE302.

C- or better in CHE 302 is a prerequisite for this class.

**CHE 378 | APPLIED SPECTROSCOPY | 4 quarter hours
(Undergraduate)**

This course serves as an introduction to the methods of structural and spectral analysis typically employed in the identification of organic molecules. Many instrumental techniques exist for the investigation of chemical structures, each of which provides unique information about the composition and structure of a compound. This course does not heavily emphasize the theoretical aspects of spectroscopy and instrumentation, but focusing primarily on the application of these techniques through the interpretation of spectra of organic molecules, and reaction mixtures.

C- or better in (CHE234 and CHE235) or (CHE238 and CHE239) are prerequisites for this course.

**CHE 392 | INTERNSHIP | 4 quarter hours
(Undergraduate)**

Experiential learning experience in a government agency, industrial firm, business, or non-profit organization. (variable credit)

**CHE 394 | SEMINAR | 2 quarter hours
(Undergraduate)**

This course is required for all chemistry majors. This course is designed to enhance your ability to: critically read and summarize scientific literature, thoughtfully listen to a scientific seminar, articulate questions regarding a scientific seminar, and orally present a scientific paper. (2 quarter hours)

(CHE 234 and CHE 235) or (CHE 238 and CHE 239) and at least Junior year standing) or instructor permission is a prerequisite for this course. (CHE 234 and CHE 235 and at least Junior year standing) or instructor permission is a prerequisite for this course.

**CHE 397 | RESEARCH | 1-4 quarter hours
(Undergraduate)**

This course allows a student to work with a faculty member on a research project. Faculty consent and research contract are required to register for the course. This course is typically completed in one to four quarters at the discretion of the research advisor. The student is expected to gain skills in laboratory techniques and procedures in pursuing answers to a research project. (variable credit)

Junior standing is a prerequisite for this class.

**CHE 398 | CHEMISTRY THESIS | 1-4 quarter hours
(Undergraduate)**

This course requires faculty-guided experimental exploration of a research topic and both written (thesis) and oral (seminar and defense) presentation of results. This course is typically completed in two or three quarters (though it may be completed in one quarter at the discretion of the research advisor). The student is expected to gain skills in laboratory techniques and procedures in pursuing answers to a research project. The student will choose a faculty mentor and a project. The project may be based on lab or field research. The grade for the thesis will be based on the written document as well as on the oral seminar and defense presented to the Chemistry students and faculty and the student will graduate "with honors" from the department. This course may be taken more than one time for credit. (variable credit)

Junior standing is a prerequisite for this class.

**CHE 399 | INDEPENDENT STUDY | 1-4 quarter hours
(Undergraduate)**

Independent study of chemistry on an informal basis by an individual in consultation with a department faculty member. Department consent required. (variable credit)

**CHE 422 | INORGANIC STRUCTURE AND REACTIVITY | 4 quarter hours
(Graduate)**

One of two courses in inorganic chemistry for advanced undergraduates and graduate students in the M.S. program. The course emphasis is variable, but topics covered will include the structure of inorganic compounds and inorganic reaction chemistry.

**CHE 424 | GROUP THEORY | 4 quarter hours
(Graduate)**

One of two courses in inorganic chemistry for advanced undergraduates and graduate students in the M.S. program. The course emphasis is variable, but the primary topics will be group theory and its application to inorganic compounds.

**CHE 430 | POLYMER SYNTHESIS | 4 quarter hours
(Graduate)**

This course focuses on the key synthetic organic chemistry methods for making polymers and coatings. A detailed consideration is given to the three types of polymerization reactions: step, chain, and ring-opening polymerizations. Practical application of polymer chemistry in society is a theme throughout the course.

**CHE 431 | POLYMER SYNTHESIS LABORATORY | 2 quarter hours
(Graduate)**

The goal of this lab course is to expose students to experimental polymer chemistry. This course focuses on the key synthetic methods for making polymers and basic structural characterization techniques. Practical application of polymer chemistry in society is a theme throughout the course. (2 quarter hours)

**CHE 432 | PHYSICAL CHEMISTRY OF POLYMERS | 4 quarter hours
(Graduate)**

This course looks at the broad subject of the physical chemistry of polymers and coatings. A detailed consideration is given to the role of molecular conformation and configuration in determining the physical behavior of polymers. Practical application of physical polymer chemistry in society is a theme throughout the course.

**CHE 434 | POLYMER CHARACTERIZATION | 4 quarter hours
(Graduate)**

This course looks at the broad subject of polymer characterization. A detailed consideration is given to major methods of analysis of chemical structure, molecular weight, morphology, and rheology. Practical application of polymer characterization in society is a theme throughout the course.

**CHE 435 | POLYMER CHARACTERIZATION LABORATORY | 2 quarter hours
(Graduate)**

The goal of this lab course is to expose students to hands-on polymer characterization techniques. This course will focus on the basic characterization techniques for determining structure and physical properties of polymers. Practical application of polymer characterization is a theme throughout the course. (2 quarter hours)

**CHE 436 | POLYMER TECHNOLOGY | 4 quarter hours
(Graduate)**

This course looks at the broad subject of the polymer and coatings technology. A detailed consideration is given to polymerization processes, and polymer and coatings processing. Practical application of polymer and coatings technology in society is a theme throughout the course.

**CHE 438 | MATERIAL SCIENCE | 4 quarter hours
(Graduate)**

This course looks at the broad subject of the materials science with emphasis on theory and applications of metals, ceramics, polymers, coatings and composites from atomic and macroscopic points of view. Practical application of materials science is a theme throughout the course.

CHE 442 | PROTEIN STRUCTURE AND FUNCTION | 4 quarter hours (Graduate)

One of two courses in biochemistry for advance undergraduates and graduate students in the M.S. program. An in-depth exploration of protein structure and function, this course surveys the common experimental and bioinformatics methods used by modern biochemists to study protein structure, folding, evolution, engineering, conformational dynamics, and enzymatic reactivity. Students will gain experience with and working knowledge of online databases and tools used by biochemists to formulate and test hypotheses related to the topics of the course.

CHE 444 | ADVANCED TOPICS IN PROTEIN BIOCHEMISTRY | 4 quarter hours (Graduate)

One of two courses in biochemistry for advanced undergraduates and graduate students in the M.S. program. Discussion and seminars in selected areas.

CHE 450 | ADVANCED MECHANISTIC ORGANIC CHEMISTRY | 4 quarter hours (Graduate)

One of two courses in organic chemistry for advanced undergraduates and graduate students in the M.S. program. This course emphasizes physical organic chemical models and experimental methods that are used to understand, predict, and control the outcomes of reactions in organic chemistry.

CHE 452 | ADVANCED SYNTHETIC ORGANIC CHEMISTRY | 4 quarter hours (Graduate)

One of two courses in organic chemistry for advanced undergraduates and graduate student in the M.S. program. This course emphasized classic and modern synthetic methods.

CHE 464 | COATINGS SCIENCE AND TECHNOLOGY | 4 quarter hours (Graduate)

This course will provide a concise review of the current scientific understanding in the field of polymer and coatings science with numerous practical applications to produce a basic understanding of polymers and coatings technology.

CHE 466 | COATINGS PROPERTIES AND APPLICATIONS | 4 quarter hours (Graduate)

This course will provide a concise review of basic principles involved in the characterization, properties, applications, and performance of coatings.

CHE 470 | STATISTICAL THERMODYNAMICS | 4 quarter hours (Graduate)

One of three courses in physical chemistry for advanced undergraduates and graduate students in the M.S. program. CHE470 is a course designed to provide an in-depth presentation of thermodynamics from a molecular perspective. The course builds upon foundations given in undergraduate courses on quantum chemistry, and thermochemistry. Starting with some basic principles of probability and probability distribution, it proceeds to the Boltzmann distribution law, and an introduction to microcanonical ensembles; then using the expressions of the quantum energy levels of some simple models, a systematic exploration of the proper formulation, evaluation, and application of partition functions is given. In short, this course develops a methodology to compute thermodynamic properties of macroscopic systems from knowledge of the quantized energies of individual molecules.

CHE 472 | MOLECULAR DYNAMICS | 4 quarter hours (Graduate)

One of three courses in physical chemistry for advanced undergraduates and graduate students in the M.S. program. CHE472 builds upon topics covered in a typical undergraduate-level course on chemical kinetics. Here, focus is placed on kinetics at the molecular level with an aim to understand how a reaction system behaves as it passes over a potential energy surface. Depending on time and student interest, specific topics in this course may include reaction rate theory, scattering theory, and surface interactions. Computer simulations may also be incorporated in this course.

CHE 474 | ADVANCED QUANTUM CHEMISTRY | 4 quarter hours (Graduate)

One of three courses in physical chemistry for advanced undergraduates and graduate students in the M.S. program. CHE474 is focused on quantum mechanics and will build on fundamental principles introduced in undergraduate quantum chemistry, including an examination of the particle-in-a-box, rigid rotor, and harmonic oscillator models. More advanced quantum mechanical topics such as the Dirac representation, wave packet motion, and time-dependent perturbation theory may also be explored. These topics can be used to understand phenomena such as coherent control of reactions, vibrational energy redistribution, and electronic energy transfer. The primary goals of this course are to: 1) increase students' understanding of quantum mechanical principles; 2) apply quantum mechanics to spectroscopic problems; and 3) expose students to modern literature related to quantum mechanics.

CHE 480 | SPECIAL TOPICS IN ANALYTICAL CHEMISTRY | 4 quarter hours (Graduate)

This course may be any topic related to chemical analysis, such as mass spectroscopy, electrochemical analysis, principles of chromatography, polymer properties, coatings, sampling methods, design of experiments, etc. This course may be repeated if the topics are different..

CHE 482 | SPECIAL TOPICS IN BIOCHEMISTRY | 4 quarter hours (Graduate)

This course may cover any topic related to biochemistry or medicinal chemistry. This course may be repeated if the topics are different.

CHE 484 | SPECIAL TOPICS IN INORGANIC CHEMISTRY | 4 quarter hours (Graduate)

This course may cover any topic related to inorganic chemistry. This course may be repeated if the topics are different.

CHE 486 | SPECIAL TOPICS IN ORGANIC CHEMISTRY | 4 quarter hours (Graduate)

This course may cover any topic related to organic chemistry. This course may be repeated if the topics are different.

CHE 488 | SPECIAL TOPICS IN PHYSICAL CHEMISTRY | 4 quarter hours (Graduate)

This course covers specific topics in the area of physical chemistry. Examples of topics include single molecule techniques, molecular electronic spectroscopy, interaction of electromagnetic radiation with particulate matter, and hydrogen bonding. This course may be repeated if the topics are different.

CHE 490 | ADVANCED PROBABILITY AND STATISTICS | 4 quarter hours (Graduate)

This course introduces students to statistical methods that can be used in error analysis of experimental data. Computers are used to apply concepts discussed in lecture to actual data sets. Offered: Winter of even-numbered years. Familiarity with Excel or a modern programming language is strongly recommended.

CHE 494 | SCIENCE WRITING AND COMMUNICATION | 4 quarter hours (Graduate)

The goal of this course is to prepare students to be effective writers and communicators in academic and industrial settings. The course is organized around learning how to write a scientific argument via modules that cover the nature of scientific fact, different genres of scientific writing (e.g., reports and proposals), writing collaboratively and presenting a scientific argument to a stakeholder audience.

CHE 497 | RESEARCH | 1-12 quarter hours (Graduate)

This course requires independent experimental exploration under the supervision of a faculty member. Thesis students must write a thesis based on their research project and successfully complete a two-part oral exam. The first part of the examination consists of the thesis presentation and defense; the second part is an oral examination concerning the student's general knowledge of chemistry. (variable credit)

CHE 499 | INDEPENDENT STUDY | 4.00 quarter hours (Graduate)

This course is for Master's students. Topic of the course varies. Credit hours vary. Course requires graduate program director approval each quarter.

CHE 502 | CANDIDACY MAINTENANCE | 0 quarter hours (Graduate)

This course is meant for Master's students not actively working on their thesis or final project. It is only used to maintain active student status. It will not give the student full- or half-time enrollment status and will not permit deferment of student loans. Course requires graduate program director approval each quarter. (0 credit hours)

Chinese (CHN)

CHN 101 | BASIC CHINESE I | 4 quarter hours (Undergraduate)

This course is an introduction to the study of standard modern Chinese, often referred to as Mandarin. It adopts the modern Chinese phonetic system, hanyupinyin, using simplified characters. This course aims at functional proficiency by developing the four aspects of communicative capabilities – listening, speaking, reading, and writing – through intensive practice. It also strives to improve students' structural accuracy, which in turn will increase functional proficiency, by dealing with the grammatical rules in such a way that students can internalize them. As language and culture interact with each other, this course will also help students gain insights into the Chinese people, their life, culture, customs and habits.

CHN 101S | BASIC CHINESE I FOR SUMMER | 6 quarter hours (Undergraduate)

(Covers the equivalent of CHN 101 and the first half of CHN 102.) The first half of beginning Chinese (Mandarin). Listening to, speaking, reading, and writing Chinese in a cultural context for the beginning student.

CHN 102 | BASIC CHINESE II | 4 quarter hours (Undergraduate)

This course is the second part of the three-quarter sequence on Basic Chinese. It helps students develop basic conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin. Simplified Chinese characters are mainly used in reading and writing although students are also exposed to the traditional form of Chinese characters throughout the course.

CHN 103 | BASIC CHINESE III | 4 quarter hours (Undergraduate)

This course continues to broaden and strengthen the foundation of Chinese language in both written and spoken formats. Based on knowledge gained in Basic Chinese I and II in terms of the origin and the elements of Chinese characters, the course expands students' collection of Chinese words and phrases to apply in both reading and writing. With the understanding of the phonetic systems of spoken Chinese as well as the structure of Chinese characters, students will continue to reflect on their learning and will share methods used to retain what they have learned in the class. The course combines language study with the exploration of Chinese culture and history.

CHN 103S | BASIC CHINESE III FOR SUMMER | 6 quarter hours (Undergraduate)

(Covers the equivalent of the second half of CHN 102 and all of CHN 103.) The second half of beginning Chinese (Mandarin). Further work on the basic elements of the Chinese language, spoken as well as written, with due regard to the cultural context of Chinese expression. CHN 101S or equivalent is recommended.

CHN 104 | INTERMEDIATE CHINESE I | 4 quarter hours (Undergraduate)

This course is the first part of the three-quarter course in Intermediate Chinese. It is offered to help students develop higher-level conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin. Simplified Chinese characters are mainly used in reading and writing, although students are also exposed to the traditional form of Chinese characters throughout the course. CHN 103 or equivalent, including placement test or permission of instructor, is recommended.

CHN 105 | INTERMEDIATE CHINESE II | 4 quarter hours (Undergraduate)

This course is the second part of the three-quarter course in Intermediate Chinese. It is offered to help students develop higher-level conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin Chinese. Simplified Chinese characters are mainly used in reading and writing, although students are also exposed to the traditional form of Chinese characters throughout the course. CHN 104 or equivalent, including placement test or permission of instructor, is recommended.

CHN 106 | INTERMEDIATE CHINESE III | 4 quarter hours (Undergraduate)

This course is the third part of the three-quarter course in Intermediate Chinese. It is offered to help students develop higher-level conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin. Simplified Chinese characters are mainly used in reading and writing, although students are also exposed to the traditional form of Chinese characters throughout the course. CHN 105 or equivalent, including placement test or permission of instructor, is recommended.

CHN 110 | INTENSIVE BASIC CHINESE I (FOR PARTICIPANTS IN STARTALK PROGRAM) | 4 quarter hours (Undergraduate)

An intensive introduction to reading, writing, and speaking Mandarin in a cultural context for the beginning student. For participants in the STARTALK PROGRAM.

**CHN 111 | INTENSIVE BASIC CHINESE II (FOR PARTICIPANTS IN STARTALK PROGRAM) | 6 quarter hours
(Undergraduate)**

An intensive introduction to reading, writing, and speaking Mandarin in a cultural context for the beginning student; continues CHN 110. For participants in the STARTALK Program.

**CHN 117 | INTENSIVE BASIC CHINESE I | 6 quarter hours
(Undergraduate)**

This is part I of a two-course sequence of hybrid Basic Chinese which is equivalent to the 1st-year sequence CHN101-102-103. The hybrid course is offered in two modules: Online Learning Module (OLM) in which students learn the online content on our course website and finish on-line assignments during the weekdays and the Face-to-Face Module (FtFM) in which you take tests and have conversational practices in a weekly class meeting every Friday afternoon. The class will focus on developing students' basic conversational and literary proficiency in Mandarin Chinese.

**CHN 118 | INTENSIVE BASIC CHINESE II | 6 quarter hours
(Undergraduate)**

This is part II of a two-course sequence of hybrid Basic Chinese which is equivalent to the 1st-year sequence CHN101-102-103. The hybrid course is offered in two modules: Online Learning Module (OLM) in which students learn the online content on the course website and finish on-line assignments during the weekdays and the Face-to-Face Module (FtFM) in which you take tests and have conversational practices in a weekly class meeting. The class will focus on developing students' basic conversational and literary proficiency in Mandarin Chinese. CHN 117 or equivalent, including placement test or permission of instructor, is recommended.

**CHN 130 | MOLILSAP STUDY ABROAD | 2 quarter hours
(Undergraduate)**

This course is specially designed to complement the Modern Language Introductory Languages Study Abroad programs, linked to the third quarter of the first year language program. The course will be taught abroad.

**CHN 141 | INTENSIVE CHINESE | 4 quarter hours
(Undergraduate)**

Students will be encouraged to engage in primary research and field work, visiting local Asian American communities and community-based organizations. While the course will provide students with an introduction to issues linked to community-rooted research in Chicago, it will also enhance an awareness of the challenges of integrating: media or popular representations with reality; theory with practice, and "objective" research with social advocacy. Gaining new perspectives, students will be empowered to apply such knowledge and research skills in conducting a study of any community, particularly those that are least understood, such as the Asian American communities. Through such studies, students will take active roles in bringing such communities from the margins to the center of investigation, contributing to academic and popular interests.

**CHN 197 | SPECIAL TOPICS IN CHINESE | 4 quarter hours
(Undergraduate)**

See schedule for current offerings.

**CHN 198 | STUDY ABROAD | 1-8 quarter hours
(Undergraduate)**

Variable credit.

**CHN 199 | INDEPENDENT STUDY | 0.5-8 quarter hours
(Undergraduate)**

Variable credit.

**CHN 201 | ADVANCED CHINESE I | 4 quarter hours
(Undergraduate)**

This is the first course of third-year Chinese. Students will improve their communicative competence in all four areas of listening, speaking, reading, and writing. Emphasis will be on expansion of vocabulary, the mastery of more complex structural patterns and grammatical concepts, as well as the students' ability to apply in actual communication what they have learned in the classroom. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

**CHN 202 | ADVANCED CHINESE II | 4 quarter hours
(Undergraduate)**

This course is offered to help students develop higher-level conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin. Simplified Chinese characters are mainly used in reading and writing, although students are also exposed to the traditional form of Chinese characters throughout the course. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

**CHN 203 | ADVANCED CHINESE III | 4 quarter hours
(Undergraduate)**

This course is the third part of the three-quarter sequence in Advanced Chinese. It is offered to help students develop higher-level conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin. Simplified Chinese characters are mainly used in reading and writing, although students are also exposed to the traditional form of Chinese characters throughout the course. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

**CHN 208E | CHINA'S CULTURAL SOFT POWER AND ITS FUTURE | 4 quarter hours
(Undergraduate)**

TAUGHT IN ENGLISH. Soft power is a political term coined by Joseph Nye in the 1980s to refer to a country's ability to attract and persuade other countries without coercion. According to certain metrics, a country's soft power can be measured by the quality of a country's political institutions, the extent of their cultural appeal, the strength of their diplomatic network, the global reputation of their higher education system, the attractiveness of their economic model, and a country's digital engagement with the world. Within three decades, China has transformed from an impoverished and self-secluded nation into a global powerhouse challenging the world's status quo. This course will explore China's soft power by analyzing multiple aspects of Chinese culture and its contemporary society and understand the prospects of China in the next generation. We will focus on the dramatic social cultural changes in China in the past decades that reflect its soft power or lack thereof and explore its long-term impact on the rest of the world. The readings and class discussions will engage topics on China's historical dynamics, unique cultural traditions, politics, economy, and international relations. Students will be exposed to and analyze comparative views analyzing and predicting China's future.

**CHN 209E | CHINESE YOUTH CULTURES | 4 quarter hours
(Undergraduate)**

TAUGHT IN ENGLISH. As China's economic and political influence grows on the world stage, it has become increasingly important to understand China's youth who as the next generation of leaders and workers will unquestionably shape the country's trajectory, and ultimately the world's geopolitical, economic, and cultural landscape. It is well documented that China's millennials and their younger siblings have witnessed greater and faster socioeconomic and demographic changes than previous generations. This course is designed to help students understand and analyze what it means to be young in such a fast-changing country that is ruled by one Party but continuously exposed to intense globalization.

**CHN 210E | CHINESE MYTHOLOGY | 4 quarter hours
(Undergraduate)**

Divinities, legendary animals, famous figures, and unicorns abound in China and are a realm of intrigue and fascination. China has had various faiths and ideologies during its history, all intertwined into Chinese tales. This is an introductory course intended for students with little or no background in Chinese studies. This course aims to introduce students to the vast mythology of China, which includes, along with the legend of the world's creation, the heroes (e.g., the Yellow Emperor, the Archer Yi, Chang'e, etc.), mythological animals (the dragon, the tiger, the phoenix, the Qilin, the Fu lion, the Nian monster, etc.), and ancient Taoist and Buddhist deities. Students will learn about Chinese myths from several different perspectives, including the relationship between myth and history, between myth and literature, and between myth and religion. Students will be expected to develop a critical stance in the study of Chinese mythology, in an endeavor to understand the historical origins of Chinese mythology and to appreciate the roles that myths have played in Chinese culture over the centuries. The primary focus will be on the earliest periods of Chinese history, and formative myths from the classical tradition to folktales and popular religion. This course is taught in English.

**CHN 211 | LANGUAGE AND SOCIETY IN MODERN CHINA | 4 quarter hours
(Undergraduate)**

This course explores contemporary society and culture through readings and discussions about the features and history of languages spoken in Mainland China, Taiwan, and Hong Kong. The course explores the mutual influence between language and cultural traditions including, social practices and values; the recent economic boom, the Internet; and English. The course is designed as a companion course to the intensive Chinese language study in the Chinese Summer Abroad program in Shanghai. The pre-travel portion of the course helps prepare students for their stay in Shanghai by introducing them to the general features of the society, culture and history. The on-site and post-travel portions will engage students in reflection, analysis and understanding of the experience. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

**CHN 248E | CHINESE CALLIGRAPHY | 4 quarter hours
(Undergraduate)**

TAUGHT IN ENGLISH. This course provides an introduction to the art of Chinese calligraphy. Hands-on practice as well as history and theory of the art. This course is open to students with no background in Chinese calligraphy, language, literature, or culture.

**CHN 250E | CHINESE CINEMA -- A WINDOW ON CHINA | 4 quarter hours
(Undergraduate)**

TAUGHT IN ENGLISH. This course studies Chinese cinema, the visualized artistic reflection of Chinese society, ideology, and culture from four perspectives: Historical, directorial, thematic, and artistic. It will cover the history of Chinese cinema, from the birth of the first Chinese film through the Silent Age, 1st Golden Age, 2nd Golden Age, Pre- and-Post-War Era, Pre- and-Post "Cultural Revolution" Period, and the Fifth Generation up to the emerging Sixth generation and beyond. Through substantial exposure and analysis of selected movie classics and subsequent classroom discussions, students will be well informed about the major developments and trends of each period in the history of Chinese cinema. Students will also explore the historical backgrounds, artistic characteristics, and key directors and stars of important Chinese movies as well as cinematic terminologies, the formation of Chinese cinematic theories, and innovative cinematic techniques.

**CHN 252 | INTRODUCTION TO COMMERCIAL CHINESE | 4 quarter hours
(Undergraduate)**

This course will help students develop basic interpretive, presentational, and interactive skills that are needed in business-related Chinese social contexts. Students will learn pertinent vocabulary, idiomatic expressions, cultural information and etiquette in four conversational contexts as presented in four units in this course. Mandarin Chinese is used in the majority of instruction, although English is also employed to explain certain cultural information and relevant business etiquette. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

**CHN 297 | SPECIAL TOPICS IN CHINESE | 4 quarter hours
(Undergraduate)**

See schedule for current offerings.

**CHN 298 | STUDY ABROAD | 1-8 quarter hours
(Undergraduate)**

Variable credit.

**CHN 299 | INDEPENDENT STUDY | 0.5-8 quarter hours
(Undergraduate)**

Variable credit.

**CHN 301 | ADVANCED SPEAKING | 4 quarter hours
(Undergraduate)**

This course is designed to help post-intermediate students of Chinese develop advanced-level Mandarin speaking skills. Students will acquire new vocabulary, structural patterns and language registers that will allow students to comprehend and discuss issues in Chinese in various social contexts. As this is an advanced level course, Chinese is the medium of instruction and is the focus of all class activities. Minimal English is expected in class communication. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

**CHN 302 | ADVANCED READING & WRITING | 4 quarter hours
(Undergraduate)**

This course is designed to help post-intermediate students of Chinese to develop reading and writing skills in standard (Mandarin) Chinese, dealing with intermediate to advanced texts with carefully designed exercises to guide comprehension and strengthen reading and writing strategies. As this is an advanced level course, Chinese is the medium of instruction and is the focus of all class activities. Minimal English is expected in class communication. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

**CHN 303 | ADVANCED WRITING | 4 quarter hours
(Undergraduate)**

This course is the third section of the fourth-year Chinese sequence with the aim of helping students develop advanced-level reading and writing skills in standard (Mandarin) Chinese. This course will focus on developing students' writing skills on formal and abstract topics. Students will also be exposed to various genres of written Chinese such as newspaper, magazines, and contemporary novels. As this is an advanced level course, Chinese is the medium of instruction and is the focus of all class activities. Minimal English is expected in class communication. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

**CHN 305 | TANG DYNASTY LITERATURE AND CULTURE | 4 quarter hours
(Undergraduate)**

This is an introductory course to the history, art and interpretation of Tang Poetry, the zenith of classical Chinese poetry. Introductory readings are in English, and original poems in simplified and traditional Chinese will be selected for reading and discussion. Attention will also be given to the rewriting of Chinese literature in the age of globalization. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

**CHN 319 | CONTEMPORARY CHINESE LITERATURE | 4 quarter hours
(Undergraduate)**

This is a survey course of Chinese literary history of the past seven decades in the contexts of Chinese historical and cultural circumstances. Students will examine representative works of the major literary genres such as poetry, novel (in excerpt), short story, drama (in excerpt), and the most recent online forms, such as blog essay. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

**CHN 320 | CHINESE FOR BUSINESS | 4 quarter hours
(Undergraduate)**

This course is designed to help students who have finished at least three years of Chinese language learning to develop advanced-level Mandarin Chinese skills and cultural knowledge that are needed in Chinese-speaking business contexts. The focus will be on international business activities that involve Chinese-speaking professionals. You will develop relevant vocabulary, oral and literate skills, cultural information and etiquette that are needed when conducting business tasks in Chinese-speaking contexts. Mandarin Chinese is used as the primary language in class although English may be occasionally employed. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

**CHN 321 | TRANSLATION | 4 quarter hours
(Undergraduate)**

Boosted by globalization and the Internet, the demand for translators is on the rise. This demand creates career opportunities for people with the knowledge of a second language. Chinese 321 - Translation Practice and Theories - is designed to help Chinese-language students grasp the skills and theories needed to render Chinese-to-English and English-to-Chinese translations. Through hands-on practice, a survey of major theories of translation, group and class discussions, and lectures, this course will teach students how to comprehend source texts accurately and deeply from both linguistic and cultural perspectives; how to express faithfully, fully, and coherently in the target language the idea of a source text; how to apply grammatical rules, rhetorical devices, diction, etc. in translation; how to use editing skills to enhance translation results; and how to use different language styles to render different materials. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

**CHN 330 | MODERN CHINESE LITERATURE: 1919 - 1949 | 4 quarter hours
(Undergraduate)**

This course studies some of the highlights of modern Chinese literature since the May 4th Movement in 1919 to the pre-Mao era in 1949—literature produced during a period of unprecedented historical upheavals and that itself has been an arena for political, cultural, and aesthetic conflicts. Through a close study of some of the significant fiction, drama, and poetry students will not only gain a keen understanding of the central themes of modern Chinese but also a better understanding of modern Chinese society. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

**CHN 331 | CHINESE CLASSIC FICTION: JOURNEY TO THE WEST | 4 quarter hours
(Undergraduate)**

Conceived and cultivated by the essence of nature for millions of years, out of a rock on the east subcontinent sprang a stone egg, which then turned into a monkey. This monkey, with miraculous fighting skills he had learned from a mysterious master, later became the disciple of a famous Buddhist monk and guarded him, with two other disciples in the incarnation of a pig-man and a water-man, through a long-and-danger-ridden journey to the West to seek sutra. What is hidden behind the mission of the journey? What is the purpose of this magic fiction? We will answer all these questions in this course. This course is designed for students with native-like Mandarin Chinese proficiency to develop deeper understanding of Chinese culture and critical literary analysis skills needed to appreciate one of the best-known Chinese classic literature.

**CHN 354 | INTRODUCTION TO CHINESE LINGUISTICS | 4 quarter hours
(Undergraduate)**

This course is aimed to introduce students to modern Mandarin Chinese linguistics. Students will explore the historical evolution of Chinese and understand the basic characteristics of Mandarin. CHN 106 or equivalent recommended. Cross-listed with CHN 454.

**CHN 360 | CHINESE POPULAR CULTURE AND SOCIAL MEDIA | 4 quarter hours
(Undergraduate)**

The course aims to survey contemporary Chinese pop culture in city life as well as social, cultural, and political dynamics shaped by and reflected in Chinese social media. Print and online media reports, excerpts from popular TV shows, films, documentaries, and literature will be used as reading and class discussion materials. Language use in various media genres will be discussed as well. Students are expected to use Mandarin Chinese as the primary language in the classroom. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

**CHN 370 | CHINESE CULTURE THROUGH FILM | 4 quarter hours
(Undergraduate)**

This course is a survey course in which a selection of films from the internationally acclaimed "new Chinese cinema" are used to help students better understand the history, politics, society and economy of China in different decades of the twentieth century. Students will place each film in its historical context, considering both its aesthetic form and sociopolitical content. Although both English and Mandarin will be used in class, students need to have good command of the Chinese language to understand and discuss sociolinguistic issues in certain films. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 395 | FOREIGN LANGUAGES ACROSS THE CURRICULUM | 2 quarter hours**(Undergraduate)**

The two credit FLAC course allows students to enrich their experience in the co-required course through added reading, writing, listening and speaking activities in Chinese. Students must have the equivalent of 106 or higher ability in Chinese to take this two credit component. Please contact the Department of Modern Languages if you have questions about this course or about language placement.

CHN 397 | SPECIAL TOPICS IN CHINESE | 4 quarter hours**(Undergraduate)**

See schedule for current offerings.

CHN 397E | SPECIAL TOPIC IN CHINESE STUDIES | 4 quarter hours**(Undergraduate)**

this is a generic course taught in English related to Chinese Studies.

CHN 398 | STUDY ABROAD | 1-8 quarter hours**(Undergraduate)**

Variable credit.

CHN 399 | INDEPENDENT STUDY | 0.5-8 quarter hours**(Undergraduate)**

Variable credit.

CHN 401 | ADVANCED SPEAKING | 4 quarter hours**(Graduate)**

Advanced practice of speaking skills in Mandarin, focusing on expanding vocabulary and information needed for the discussion of topics in the target language. Three years of college study or equivalent knowledge recommended.

CHN 402 | ADVANCED READING | 4 quarter hours**(Graduate)**

Advanced practice of reading skills in Mandarin, focusing on increasing vocabulary and reinforcement of grammatical knowledge, using textual clues to find the meanings of unknown words.

CHN 403 | ADVANCED WRITING | 4 quarter hours**(Graduate)**

Advanced practice of writing skills in Mandarin, focusing on standardized formal writing practices ranging from the writing of letters to the writing of essays, including both descriptive and expository styles. Students in this course will develop vocabulary, expressions, and reading and writing strategies through working with historical texts. They are also expected to develop deeper understanding of the content, as well as the special historical and cultural contexts, of the selected texts. All assignments will be submitted in Mandarin Chinese.

CHN 405 | TANG DYNASTY LITERATURE AND CULTURE | 4 quarter hours**(Graduate)**

This is an introductory course to the history, art and interpretation of Tang Poetry, the zenith of classical Chinese poetry. All the introductory readings are in English, and original poems in simplified and traditional Chinese will be selected for reading and discussion. Attention will also be given to the rewriting of Chinese literature in the age of globalization.

CHN 419 | CONTEMPORARY CHINESE LITERATURE | 4 quarter hours**(Graduate)**

This is a survey course to the Chinese literary history of the past seven decades in the contexts of Chinese historical and cultural circumstances. Students will examine representative works of the major literary genres such as poetry, novel, short story, drama, and the most recent online forms, such as blog essay.

CHN 420 | CHINESE FOR BUSINESS | 4 quarter hours**(Graduate)**

This course aims to develop advanced-level oral and literary skills that are needed in business-related Chinese social contexts. Cultural information will be covered as an integral part of business communication.

CHN 421 | TRANSLATION | 4 quarter hours**(Graduate)**

Boosted by globalization and the Internet, the demand for translators is on the rise. This demand creates career opportunities for people with the knowledge of a second language. Chinese 421 - Translation Practice and Theories - is designed to help Chinese-language students grasp the skills and theories needed to render Chinese-to-English and English-to-Chinese translations. Through hands-on practice, a survey of major theories of translation, group and class discussions, and lectures, this course will teach students how to comprehend source texts accurately and deeply from both linguistic and cultural perspectives; how to express faithfully, fully, and coherently in the target language the idea of a source text; how to apply grammatical rules, rhetorical devices, diction, etc. in translation; how to use editing skills to enhance translation results; and how to use different language styles to render different materials.

CHN 430 | MODERN CHINESE LITERATURE: 1919 - 1949 | 4 quarter hours**(Graduate)**

This course studies some of the highlights of modern Chinese literature since the May 4th Movement in 1919 to the pre-Mao era in 1949—literature produced during a period of unprecedented historical upheavals and that itself has been an arena for political, cultural, and aesthetic conflicts. Through a close study of some of the significant fiction, drama, and poetry, students will not only gain a keen understanding of the central themes of modern Chinese but also a better understanding of modern Chinese society.

CHN 454 | INTRODUCTION TO CHINESE LINGUISTICS | 4 quarter hours**(Graduate)**

This course introduces students to modern Mandarin Chinese linguistics. Students will explore the historical evolution of Chinese and understand the basic characteristics of Mandarin.

CHN 460 | CHINESE POPULAR CULTURE AND SOCIAL MEDIA | 4 quarter hours**(Graduate)**

The course aims to survey contemporary Chinese pop culture in city life as well as social, cultural, and political dynamics shaped by and reflected in Chinese social media. Print and online media reports, excerpts from popular TV shows, films, documentaries, and literature will be used as reading and class discussion materials. Language use in various media genres will be discussed as well. Students are expected to use Mandarin Chinese as the primary language in the classroom.

CHN 470 | CHINESE CULTURE THROUGH FILM | 4 quarter hours**(Graduate)**

Survey of major twentieth-century Chinese films illustrating the history, politics, society and economy of modern China, with special attention to the continuity between tradition and modernity.

CHN 496 | PRACTICUM IN CHINESE INSTRUCTION | 4 quarter hours**(Graduate)**

Supervised practice in language instruction, paired with a mentor instructor in a beginning or intermediate language course. Students observe a class, teach a lesson or lessons, assist in assessment and lesson planning, and complete individualized assignments to develop their skills as classroom language instructors. Repeatable.

**CHN 497 | SPECIAL TOPICS IN CHINESE | 4 quarter hours
(Graduate)**

See schedule for current offerings.

**CHN 497E | SPECIAL TOPIC IN CHINESE STUDIES | 4 quarter hours
(Graduate)**

This is a generic course number for any advanced-level topic in Chinese Studies.

**CHN 498 | STUDY ABROAD | 1-8 quarter hours
(Graduate)**

Variable credit.

**CHN 499 | INDEPENDENT STUDY | 1-8 quarter hours
(Graduate)**

Variable credit.

Communication (CMN)

**CMN 101 | INTRODUCTION TO HUMAN COMMUNICATION | 4 quarter hours
(Undergraduate)**

This course provides an introduction to the field of relational, group and organizational communication. Students become acquainted with the basic terms, concepts and theoretical perspectives used to examine communication in dyadic, group and organizational contexts.

**CMN 102 | INTRODUCTION TO MASS COMMUNICATION | 4 quarter hours
(Undergraduate)**

This course offers students a broad overview of the mass media (print, film, video, recorded music, radio, television and the internet) with a particular focus on how these media impact our everyday lives. Students will develop critical frameworks for understanding how power operates across the media spheres of production, circulation, representation and reception. Attention is placed on how the social categories of race, class, gender, sexuality, ethnicity, age and nationality inform each of these media spheres. The course also considers how recent developments in digital technologies, media convergence and globalization have transformed our media culture.

**CMN 103 | INTERCULTURAL COMMUNICATION | 4-6 quarter hours
(Undergraduate)**

Examines the relationships between and among different cultural contexts and identities from a communication standpoint. Explores differences and similarities in cultural values, norms, and communication behaviors between and among diverse cultures and develops intercultural competence. Critiques stereotypes and increases cultural sensitivity, especially related to race, ethnicity, sexuality, and gender.

**CMN 104 | PUBLIC SPEAKING | 4 quarter hours
(Undergraduate)**

Introduction to the effective communication skills required for public speaking in organizational and public settings. The course stresses the important role public speaking plays in a democratic society and encourages students to address topics of a political and/or social nature. The course emphasizes the process of researching, preparing and presenting a variety of speeches. Additionally, it includes units on delivery and performance skills, effective use of language for the spoken word, clear organization of messages, critical listening and thinking skills, and tailoring messages to a variety of audiences in a diverse society. (FORMERLY INTC 220)

**CMN 280 | INTRODUCTION TO DIGITAL MEDIA SKILLS | 4 quarter hours
(Undergraduate)**

This course introduces students to the necessary skills for digital media content creation. Students learn about conceptual and technical skills related to digital media. The course provides an introduction to tools and platforms used to produce online content.

**CMN 292 | ADOBE CREATIVE CLOUD WORKSHOP | 2 quarter hours
(Undergraduate)**

This course offers students hands-on experience using Adobe Creative Cloud software in a communication and media context. Topics include Premiere, InDesign, Photoshop, and Illustrator. Students may take a maximum of 8 credit hours of CMN 292 applied to their major with a maximum of 8 hours.

**CMN 294 | IDENTIFYING YOUR MARKETABLE SKILLS | 2 quarter hours
(Undergraduate)**

In this 2-credit course, you will learn how to prepare for the job market while you are still in school. Coursework includes exploring career options, identifying skills employers need and you already have, developing a great resume and learning how to present both your academic accomplishments and relevant skills to impress potential employers. Please note that this course is open to students of all majors. However, it will be most beneficial to those interested in the field of communication.

**CMN 394 | MAKING THE MOST OF YOUR COMMUNICATION INTERNSHIP | 4 quarter hours
(Undergraduate)**

PREREQ(S): Completed Communication Internship orientation session and internship director approval to meet eligibility requirements. Students must have an internship and begin working on or before Nov. 1, 2018. Must be able to work 100 hours by December 14. For instructions on how to obtain department consent, visit <https://communication.depaul.edu/internships/Pages/internship-credit.aspx>. Submit your internship proposal at by Nov. 16. DESCRIPTION: This course is for communication majors and minors who meet eligibility requirements. Students will learn career planning skills, explore the organizations in which they work, gain an understanding of how they contribute to their organizations, and discuss societal and world issues as they affect their workplaces. The final project is a career e-portfolio. CMN 394 fulfills the Experiential Learning Requirement. If you have completed the requirement already, the course will be counted as an elective in your major.

**CMN 395 | COMMUNICATION INTERNSHIP SPECIAL TOPICS | 4 quarter hours
(Undergraduate)**

PREREQ(S): Completed Communication Internship orientation session and internship director approval to meet eligibility requirements. Must be taken concurrently with an approved internship. Students are required to work 10 hours per week at their internships while enrolled in the course. CMN 395 is for communication majors and minors who meet eligibility requirements. Students will integrate their work experience with a course that facilitates learning, researching and practicing proactive and strategic approaches to career planning in consultation with their supervisors and other coworkers. These include identifying and communicating transferable skills, and developing and utilizing a new network of professional contacts that will prepare students for continued gainful employment after graduation. CMN 395 fulfills the Experiential Learning requirement. If you have completed the requirement already, the course will be counted as an elective in your major. For instructions on how to obtain department consent, visit <https://communication.depaul.edu/internships/undergraduate/Pages/default.aspx>.

**CMN 396 | CAPSTONE IN COMMUNICATION | 4 quarter hours
(Undergraduate)**

Making a difference: Communication Senior Capstone. Exploration of student skills, knowledge and interests, as well as how these might have a concrete contribution to contemporary society. Students cannot earn credit for both CMN396 and PRAD396.

Status as a College of Communication major with senior standing is a prerequisite for this class.

**CMN 397 | RESEARCH PRACTICUM | 1-4 quarter hours
(Undergraduate)**

The research practicum offers the high-achieving student the opportunity to connect with a faculty expert to train in a specialized communication research method and/or to achieve hands-on practice in conducting scholarly research more generally. The research practicum may take various forms. For example, the student may become part of an ongoing research project led by the faculty member in order to learn and practice particular research methods. Typical activities may include data gathering, data analysis, interpretation of results, and writing research reports. In contrast, the student may wish to learn about a particular research method practiced by the faculty expert but not available in a regular undergraduate course offering. In this case, the research practicum would be a course of study focusing on specialized research method(s) with agreed upon readings and assignments for this purpose. PREREQUISITE(S): Approval from program chair and associate dean.

**CMN 398 | STUDY ABROAD | 4 quarter hours
(Undergraduate)**

Expand international learning opportunities that effectively prepare students to be successful, innovative leaders and community members in a diverse global society. NOTE: CMN 398 meets the Junior Year Experiential learning requirement. To count for MCS credit, topic of Study Abroad must be approved by program director to count for History/Criticism elective.

**CMN 399 | INDEPENDENT STUDY | 1-4 quarter hours
(Undergraduate)**

The independent study offers the high-achieving student the opportunity to develop a specialized course of study with a faculty expert. The goal of the independent study is for the student to investigate the scholarship of a particular sub-discipline of communication by delving into its theories, critical concepts and current scholarly research with the guidance of a faculty member. The independent study option is intended for students who have demonstrated a mastery of course content, and who would benefit from a sustained, focused collaboration with a faculty member in order to produce an independent scholarly project. PREREQUISITE(S): Approval from instructor, program chair, and associate dean.

**CMN 591 | INTERNSHIP | 4 quarter hours
(Graduate)**

PREREQ(S): Completed Graduate Communication Internship orientation workshop and internship director approval to meet eligibility requirements. Must be taken concurrently with an approved internship. Students are required to work 10 hours per week at their internships. Students will reflect on their internship experience through a variety of assignments that will prepare them for gainful employment after graduation.

Status as a Graduate Communication student is a prerequisite for this class

**CMN 592 | INDEPENDENT STUDY | 1-12 quarter hours
(Graduate)**

The independent study offers the high-achieving student, who has succeeded in attaining substantial learning in a communication subspecialty, the opportunity to develop a specialized course of study with a faculty expert. The goal of the independent study is for the student to master scholarship of a particular area of study in communication by delving into its theories, critical concepts and current scholarly research. The independent study option is intended for students who have demonstrated a mastery of course content, and who would benefit from a sustained, focused collaboration with a faculty member in order to produce an independent scholarly project. PREREQUISITE(S): Approval from instructor and college.

Status as a Graduate Communication student and Director Consent is a prerequisite for this class.

**CMN 593 | RESEARCH PRACTICUM | 4 quarter hours
(Graduate)**

The research practicum offers the high-achieving student, who has succeeded in attaining substantial learning in a communication subspecialty, the opportunity to connect with a faculty expert to train in a specialized communication research method and/or to achieve hands-on practice in conducting scholarly research more generally. The research practicum may take various forms. For example, the student may become part of an ongoing research project led by the faculty member, and the research practicum would provide an opportunity for the student to apply previously studied research methods to the research project. Typical activities include data gathering, data analysis, interpretation of results, and writing research reports. In contrast, the student may wish to learn about a particular research method practiced by the faculty expert but not available in a regular graduate course offering. In this case, the research practicum would be a course of study focusing on specialized research method(s) with agreed upon readings and assignments for this purpose. PREREQUISITE(S): Approval from instructor and college.

Status as a Graduate Communication student is a prerequisite for this class

**CMN 598 | STUDY ABROAD | 4 quarter hours
(Graduate)**

Expand international learning opportunities that effectively prepare students to be successful, innovative leaders and community members in a diverse global society.

Communication Studies (CMNS)

**CMNS 201 | BUSINESS AND PROFESSIONAL COMMUNICATION | 4 quarter hours
(Undergraduate)**

This course will provide students with opportunities to understand the role communication (interpersonal, group, virtual, and public) has in business contexts. Students will learn the components of communication, typical business communication challenges (from small businesses to multinational corporations), productive conflict management techniques, how to identify and dismantle discriminatory systems, and how to develop an engaging, dynamic, and inclusive communication style, while writing to and speaking with others in professional settings. (Formerly ORGC 201)

CMNS 205 | COMMUNICATION, CULTURE AND COMMUNITY | 4 quarter hours**(Undergraduate)**

Examines the relationships among culture, communication, institutions, and public and private life. Students explore the possibilities and problems of contemporary forms of community through service in community organizations or through extensive individual or group research projects. The course also fulfills the junior year experiential learning requirement through community based service learning.

CMNS 211 | INTERPERSONAL COMMUNICATION | 4 quarter hours**(Undergraduate)**

An introduction to the factors that shape communication between two people. Topics include self-concept formation, perception, message formation, verbal and nonverbal communication, active listening, and defensiveness. (Formerly RELC 211)

CMNS 212 | EFFECTIVE COMMUNICATION IN TEAMS AND SMALL GROUPS | 4 quarter hours**(Undergraduate)**

Develop the communicative skills needed to build and sustain creative, inclusive teams. Students will learn about the varied types of teams and small groups encountered in and outside of the workplace with the opportunity to build their skills through self-assessment and team activities. Learn how to build a team that you would want to belong to - and how to increase that team's possibility of success. Class topics focus on learning and applying effective models for team problem-solving, building cohesion, conflict management, leadership, and creativity. (Formerly ORGC 212)

CMNS 221 | HOW LANGUAGE WORKS: INTRODUCTION TO LINGUISTICS | 4 quarter hours**(Undergraduate)**

The focus of this course is on linguistics as the study of how language works in the minds and brains of its speakers, taking an approach that focuses on the mental representation of language. We develop a theory of language knowledge that includes knowledge of sound systems, sentence structure, and meaning, and along the way we investigate data from diverse languages to illustrate how linguists think and reason. We also draw connections between linguistic knowledge and other types of cognition, as well as connections between linguistics and related fields, including philosophy, psychology, and neuroscience.

CMNS 230 | PERFORMANCE: COMMUNICATION, CREATIVITY AND THE BODY | 4 quarter hours**(Undergraduate)**

Introduction to performance studies, examining the persuasive, cultural, and artistic dimensions of embodied communication. Through "on our feet" engagement, students will study the role of identity, aesthetics, space, genre, and literary form in their experience with cultural texts, including poetry, prose, and narratives. Involves critical and creative analyses of texts in preparation and reflection of live performance. The course explores the how the body, voice, and movement are central to artistry and meaning. (Formerly INTC 230)

CMNS 251 | ORGANIZATIONAL COMMUNICATION | 4 quarter hours**(Undergraduate)**

This course focuses on the central role that communication plays in contemporary organizations. Throughout the class, we draw on a variety of theoretical and analytical tools to review the different communication strategies managers use to coordinate and control the activities of their employees. We also discuss best practices for managing dysfunctional communication at work. Additional topics may include new employee orientation and socialization, individual and team communication strategies to achieve organizational goals, managing on-the-job communication stressors, power and resistance, and navigating new information technologies for on-site and remote work. (Formerly ORGC 251)

CMNS 280 | INTRODUCTION TO DIGITAL MEDIA SKILLS | 4 quarter hours**(Undergraduate)**

This course introduces students to the necessary skills for digital media content creation. Students learn about conceptual and technical skills related to digital media. The course provides an introduction to tools and platforms used to produce online content.

CMNS 282 | STATISTICS IN HUMAN COMMUNICATION | 4 quarter hours**(Undergraduate)**

The study of human communication involves observing patterns in human interaction and message behavior. This course introduces students to the statistics most relevant to the field of human communication. Course activities emphasize quantitative reasoning; the measurement of communication variables; performing statistical analyses (e.g., correlation, regression, t-test, ANOVA); interpreting and communicating statistical results; and ethical considerations in data collection, analysis, and research conclusions.

MAT 120 is a prerequisite for this class.

CMNS 290 | COMMUNICATION WORKSHOP (VARIABLE TOPICS) | 2 quarter hours**(Undergraduate)**

This course allows students to sample a range of hands on, practical offerings in communication that can enhance their knowledge and expertise. Topics offered include survey design and focus groups. (2 quarter hours)

CMNS 291 | RESEARCH METHODS | 4 quarter hours**(Undergraduate)**

This course is an introduction to the study of communication through the observation and analysis of empirical (i.e. aspects of the observable world) data. It will stress how to form appropriate questions from the theories (or hunches, dreams etc.) and rigorously test these propositions (quantitatively and qualitatively) to see how well they correspond to the world outside ourselves. An added benefit of the course will be to show how to be a more informed judge of the claims of others. The format of the course is lecture/discussion. Students cannot earn credit for both CMNS 291 and PRAD 291.

CMNS 300 | MUSIC INDUSTRIES AND CULTURE | 4 quarter hours**(Undergraduate)**

This course critically examines music as a form of cultural communication and as a media industry. Students learn about historical changes in the music business, contemporary issues that industry insiders negotiate, do-it-yourself alternatives to mainstream industry practices, and how music functions as a unique source for collective fandom. Cannot earn credit in conjunction with "MCS 368: Music Industries" class.

**CMNS 301 | AUDIO DOCUMENTARY | 4 quarter hours
(Undergraduate)**

This course uses hands-on projects so that students can explore the steps in the process of creating an audio documentary. Through practical application students consider questions that surround the interpretation of cultural experience. Additionally, students analyze a variety of approaches to audio documentary in an effort to understand better this significant form of storytelling.

**CMNS 303 | TOPICS IN ORGANIZATIONAL AND GROUP COMMUNICATION | 4 quarter hours
(Undergraduate)**

Topics covered in this course might include: political campaign communication, nonprofit and social impact communication, internal communication and employee development, democratic participation in organizations, diversity and team building, gender in the workplace, communication and customer service, assessment and intervention in organizations, comparative management, etc. (Formerly ORGC 357)

**CMNS 304 | COMMUNICATION, CODING & ENTREPRENEURSHIP | 4 quarter hours
(Undergraduate)**

Students from College of Computing and Digital Media and the College of Communication will use communication theory to solve problems by implementing web-based solutions using an entrepreneurial framework. Students will learn how communication theory and web design can complement each other to create a web/app-based business. No coding experience needed for communication students.

**CMNS 305 | PERFORMANCE STUDIES | 4 quarter hours
(Undergraduate)**

The course traces the shift from the field of Oral Interpretation to the emergence of Performance Studies as a discipline, with particular attention to the primary theorists and practitioners who have set the foundation and scope of the field of Performance. Taking an historical approach to the development of the field, the course will explore performance epistemologies, performative methodologies, and performative theories, offering students the opportunity to study and engage contemporary approaches to performance research.

**CMNS 306 | TOPICS IN PRESENTATION | 4 quarter hours
(Undergraduate)**

Courses offer advanced analysis of presentational forms. Students will enact presentational theories in relational, small group, or public communication contexts.

**CMNS 307 | TOPICS IN COMMUNICATION STUDIES | 4 quarter hours
(Undergraduate)**

Examines intensively one or more issues in Communication Studies. The topics differ each term focusing on a particular area of discourse, such as environmental communication, political communication, and discourse analysis, among other topics. (Formerly INTC 307)

**CMNS 308 | TOPICS IN INTERCULTURAL COMMUNICATION | 4 quarter hours
(Undergraduate)**

Examination of cultural communication in different intercultural contexts. Courses might include language and culture, multicultural issues, social justice, international issues, and cultural industries. (Formerly INTC 308)

**CMNS 309 | INTERNATIONAL/GLOBAL COMMUNICATION | 4 quarter hours
(Undergraduate)**

As the world has become immensely and intricately connected through immigration/diaspora, travel, technology, and intercultural trade, it's imperative to equip ourselves with knowledge and understanding of the dynamic and complex international cultures as well as the impact of globalization on individual countries. This course is intended to introduce concepts, theories, practices, and experiences of international/global communication from scholarly research and empirical studies. It focuses on issues of history, power relations, cultural norms and practices, intersectionality of identities, effects of media/social media, international conflict, and community building through dialogues and common goals in the international/global context.

**CMNS 311 | TOPICS IN RELATIONAL COMMUNICATION | 4 quarter hours
(Undergraduate)**

Explores specialized topic within the field of interpersonal communication. Past topics have included: emotions & communication, gender & its relation to interaction, the "social construction" of interpersonal realities, etc. For a detailed course description, click the course link and view the Class Notes in the Enrollment Information tab.

**CMNS 312 | EVOLUTION AND COMMUNICATION | 4 quarter hours
(Undergraduate)**

This seminar explores how communication, across a variety of topics, can be understood with respect to the theory of evolution. Specifically, this course examines how millions of years of human evolution influences how people interact in their personal and social relationships. (Formerly RELC 312)

**CMNS 313 | NONVERBAL COMMUNICATION | 4 quarter hours
(Undergraduate)**

This course surveys various conceptual areas generally subsumed under the broad rubric of nonverbal communication. Topics include: physical appearances, gestures, face and eye behavior, vocalics, proxemics, touch, time, environmental contexts as well as application of nonverbal behaviors to specific interpersonal communication contexts. (Relational, Group, Organizational) (Formerly RELC 313)

**CMNS 314 | FAMILY COMMUNICATION | 4 quarter hours
(Undergraduate)**

This course surveys topics relevant to understanding communication phenomena in the setting of the family. Topics include: family systems, patterns, meaning, themes, roles and types, family life cycles, stressors and conflict, changing family forms and contexts. (Relational, Group, Organizational) (Formerly RELC 314)

**CMNS 315 | HEALTH COMMUNICATION | 4-6 quarter hours
(Undergraduate)**

This survey course examines communication as the principle means by which health care is delivered, understood, and experienced. The course surveys the theory and practice of communication as it relates to health in a range of contexts (e.g. interpersonal, small group, organizational, public and/or mediated contexts) with a particular emphasis on critical thinking.

**CMNS 316 | COMMUNICATION AND DECISION-MAKING IN GROUPS AND TEAMS | 4 quarter hours
(Undergraduate)**

Students will examine different approaches to individual decision-making, discuss unique characteristics of groups and teams, assess factors that contribute to the success and failure of group decision-making, and focus on theories and research to enhance our individual and group/team decision-making practices. (Formerly ORGC 316)

**CMNS 317 | PERFORMANCE OF RITUAL | 4 quarter hours
(Undergraduate)**

Participating in and performing rituals is part of what makes us human. Rituals develop and define cultural life. Rituals in modern life include macro events like the transfer of power in a government as well as micro rites of passage, known as "coming of age" events, whether defined experientially (acquiring a driver's license) or chronologically (turning 21). Here in the United States, many so-called rituals have an ambiguous purpose while others are clearly defined. In this course we will be looking at a range of rituals and the communicative and symbolic elements connected to the performance of them. We will examine, for example, the ritual of acquiring a tattoo, voting, participation in a marriage ceremony, rituals surrounding birth and death, as well as the absence of rituals for life-changing events (i.e. divorce/break up and miscarriage). We will ask as many questions as we answer: What roles do ritual, myth, and symbol play in human experience and everyday life? How do rituals reflect, produce, or deflect reality? How do they reinforce socio-political power structures while potentially providing options for resistance?

**CMNS 318 | CLOSE RELATIONSHIPS | 4 quarter hours
(Undergraduate)**

This course examines the role of communication in the development, maintenance, and deterioration of romantic attachments. Topics include attraction, intimacy and self-disclosure, attachment beliefs, jealousy, satisfaction, commitment, trust, betrayal, conflict, autonomy, interdependence, etc. (Relational) (Formerly RELC 318)

**CMNS 319 | THE DARK SIDE OF PERSONAL RELATIONSHIPS | 4 quarter hours
(Undergraduate)**

This course explores the "dark side" of interpersonal communication by examining the growing literature on the troubling or problematic aspects of close relationships. Topics covered include relational dilemmas, relational control and dominance, hurtful messages, paradoxical communication, social predicaments, relational transgressions, privacy violations, physical abuse, verbal aggression, etc. (Formerly RELC 319)

**CMNS 320 | DECEPTIVE COMMUNICATION | 4 quarter hours
(Undergraduate)**

Explores the use of deceptive communication in social and personal relationships from a range of theoretical perspectives including ethics, evolutionary biology, linguistics, social and developmental psychology and jurisprudence. (Formerly RELC 320)

**CMNS 321 | CULTURAL AND SYMBOLIC CRITICISM | 4 quarter hours
(Undergraduate)**

Introduction to the critical methodologies of rhetorical analysis. Students are instructed in ways to become more reflective consumers of discourse by examining how rhetoric instructs reality, shapes the social and political agenda and engages questions of ethics, power and persuasion. The course promotes a critical awareness of the role symbols play in influencing human perception, attitude, and action in a diverse culture. (Formerly INTC 321)

**CMNS 322 | PERFORMING IDENTITY | 4 quarter hours
(Undergraduate)**

In this performance presentation course, students creatively explore and reflect upon how their own identities are represented, embodied and communicated within contemporary culture. Enlisting voice, body and visual media, students will make performance works that challenge, theorize and re-imagine who they are, how they understand themselves, and who they might be. The course is an artistic and self-reflexive exploration of how identity is constructed (and resisted) through language, social systems, pop culture, historical memory, and social media.

**CMNS 323 | SOCIAL MOVEMENTS | 4 quarter hours
(Undergraduate)**

This course examines the rhetoric of social movements throughout American History. As a rhetoric class, the focus is primarily on the symbolic creation of movements in order to provide background of the political and social events that gave rise to the movement. Using readings from a variety of sources, we will investigate the discursive construction of power as it relates to society and politics. The class will take a case-study approach to examining social movement rhetoric, exploring the discourse that has served to resist oppressive, or perceptively oppressive, systems. (Formerly INTC 323)

**CMNS 324 | CULTURE OF CONSUMPTION | 4 quarter hours
(Undergraduate)**

Introduces students to the critique of our consumer culture. Teaches students how to be critical consumers and understand how to be critical consumers and understand how we consume lifestyles, images, aesthetics, and desire through our shopping patterns. Provides theoretical, observational, and critical tools that allow students to critique patterns of consumption, the production of culture through consumption, and how consumption is a means of communication. (Formerly INTC 324)

**CMNS 325 | PROMOTING SUSTAINABILITY | 4 quarter hours
(Undergraduate)**

Provides a foundation in the communication skills necessary for achieving conservation goals. Introduces communication approaches such as social marketing, citizen participation, public campaigns, and environmental interpretation that have proven effective in the work of conservation professionals. (Formerly INTC 325)

**CMNS 326 | ENVIRONMENTAL POLITICS AND RHETORIC | 4 quarter hours
(Undergraduate)**

Rhetorical perspective on environmental public discourse. Course also explores the relationship between rhetorically constituted ideas about nature and the development of political and social ideas, institutions, and practices that inform our understanding of the human place in the environment. (Formerly INTC 326)

**CMNS 327 | RESEARCHING RELATIONSHIPS | 4 quarter hours
(Undergraduate)**

Researching Relationships provides an overview of the concepts, methods and tools by which interpersonal/relational research is designed, conducted, interpreted, and critically evaluated. Quantitative, qualitative, and critical interpersonal/relational research will be examined. The primary goals of the course are to help students become knowledgeable consumers and producers of relational communication research by developing skills in gathering, organizing, interpreting and presenting research information using informed, competent, and ethical methods.

**CMNS 328 | HISTORY OF RHETORIC AND COMMUNICATION | 4 quarter hours
(Undergraduate)**

Offers an overview of historical foundations of the communication field. Examines how the formulations of rhetoric by various thinkers derived from cultural, religious, and political contexts shape human consciousness and communication patterns. Students read primary and secondary materials on classical rhetoric and rhetoric of diverse cultures. The course promotes an understanding and appreciation of antiquity and development of ideas over time in relation to current cultural and communicative patterns. (Formerly INTC 328)

**CMNS 329 | PERSUASION | 4 quarter hours
(Undergraduate)**

Explores major theoretical assumptions of current persuasion research. Examines causes and effects of effective and ineffective persuasion. Analyzes persuasive skills and strategies for a variety of persuasion applications, e.g. political, interpersonal, intercultural, and advertising. (Formerly RELC 329)

**CMNS 330 | TOPICS IN PERFORMANCE | 4 quarter hours
(Undergraduate)**

Advanced study in performance focusing on a specific genre each quarter such as: Poetry, Fiction, Nonfiction, Drama or Chamber Theater. Other possibilities include: performing autobiography; life performances; ritual, ceremony, and storytelling; and radio and television performances. For a detailed course description, click the course link and view the Class Notes in the Enrollment Information tab. (Formerly INTC 330)

**CMNS 331 | COMMUNICATION FIELDWORK | 4 quarter hours
(Undergraduate)**

Provides students with experience conducting qualitative research, including data collection techniques, data coding and analysis, as well as interpretation of data and writing ethnographic reports. In addition to providing practical hands-on training in ethnographic research, this course serves to explore the theory, ethics, and politics behind various research methodologies. (Formerly INTC 331)

**CMNS 333 | CULTURES IN CONVERSATION | 4 quarter hours
(Undergraduate)**

Whenever we communicate, we show parts of our identities, perspectives, values, and norms. In short, when we interact with others, we reveal culture. Because we are cultural beings and we each belong to various cultural groups, interactions can often backfire and misunderstandings may occur. This course teaches a specialized way to listen for culture in conversation in order to become competent and successful communicators no matter the context. Whether you are navigating difficult relationships with family and friends, or attempting to succeed at work and school, this course will help you learn strategies to decipher cultures in conversation and become competent navigators of cultural misunderstandings.

**CMNS 334 | URBAN COMMUNICATION | 4 quarter hours
(Undergraduate)**

Examines relationships between material features of the city and symbolic representations of urban life (e.g., photography, film, songs, public discourse) with the goal of understanding the city as a site of communication. Special attention is paid to expressions of hope for and fear of the city. (Formerly INTC 334)

**CMNS 335 | LATINX COMMUNICATION, ADVOCACY AND COMMUNITY BUILDING | 4 quarter hours
(Undergraduate)**

Students will examine the relationships between Latino cultures, communication, institutions, and public and private life. Message crafting and relationship building for strategic objectives will be examined through the lens of multiculturalism. This course will teach students how to manage diversity issues for Latino community organizations, management, and policy advocacy.

**CMNS 336 | STORYTELLING: COMMUNICATION AS NARRATIVE | 4 quarter hours
(Undergraduate)**

Scholars suggest that the oldest form of communication is storytelling. Narrative theories and methodologies form a substantive core throughout the history of human communication praxis. This course responds to the contemporary resurgence of narrative and highlights its communicative aspects. Rooted in both the oral and literary traditions, this course builds and enhances skills for those who would like to use storytelling in various ways including: 1) storytelling as a teaching tool, 2) giving structure to personal narratives, 3) developing a repertoire of stories, and 4) improving general presentation skills.

**CMNS 337 | ASIAN-AMERICAN MEDIA REPRESENTATIONS | 4 quarter hours
(Undergraduate)**

The course takes an interdisciplinary approach in the analysis of the media images and explores issues of power, identity, race, gender, class, sexual orientation and the interaction of these factors in the representation of Asian Americans. (Formerly INTC 337)

**CMNS 338 | ASIAN CULTURE AND COMMUNICATION | 4 quarter hours
(Undergraduate)**

Reviews major Asian philosophical and religious traditions such as Hinduism, Confucianism, Taoism, and Buddhism and examines how these traditions influence and affect Asian cultures and communication behaviors, particularly communication among Indians, Chinese, Japanese, Koreans, and Asian Americans in various contexts. (Formerly INTC 338)

**CMNS 339 | PERFORMANCE OF GENDER & SEXUALITY | 4 quarter hours
(Undergraduate)**

This course is designed to give students an opportunity to experiment, explore, and reflect upon the performative dimensions of gender and sexuality. Using aesthetic performance as a point of entry, students will view, analyze, and generate performance work that interrogates the communicative, political, and transformative potentials of embodied actions. With an emphasis on the intersections of gender and sexuality, the course will move through three units of reading, discussion, viewing, and performance creation. (Formerly INTC 329)

**CMNS 340 | COMMUNICATING & DATING | 4 quarter hours
(Undergraduate)**

The goal of this course is provide students with a research-based understanding of the role of communication within dating relationships. Accordingly, this course traces the life-cycle of a dating relationship. Specifically, this course begins by examining initial interactions that are potentially romantic and could turn into dating interactions. Next, the course focuses on how people engage in dating relationships and the factors that influence relationships. Finally, the course concludes with what happens after dating (i.e., long term commitment/marriage, relational termination, or the death of a partner). (Formerly RELC 340)

**CMNS 341 | COMMUNICATION NETWORKS IN A DIGITAL AGE | 4 quarter hours
(Undergraduate)**

The social world is a vastly complicated network consisting of more than eight billion individuals. Network theory has long been the purview of mathematicians, computer scientists and physicists; however, this course alternatively examines the dynamics of networks from a social perspective. We consider how networks impact relational/organizational life, communication and community, and link people around the world through digital communication.

**CMNS 342 | LIVING ONLINE | 4 quarter hours
(Undergraduate)**

An overview of how people use communication technology in their everyday life. Examines a variety of communication technology in interpersonal and organizational contexts. Focus is on the appropriate and effective use of mediated communication and surveys issues including trust, privacy, identity, and relational communication.

**CMNS 343 | WORK/FAMILY COMMUNICATION | 4 quarter hours
(Undergraduate)**

This course focuses on communication at the intersections of paid work and family life. Students will approach work/family "balance" as an essentially communicative process. Throughout the quarter, students will critically analyze how communication and discourse at micro- (interpersonal), meso- (organizational), and macro- (cultural) levels enables and constrains individuals and organizations as they navigate and manage the work/family interface.

**CMNS 344 | MINDFULNESS | 4 quarter hours
(Undergraduate)**

This course examines the role of mindfulness in everyday interaction. It explores how mindfulness practices can influence how people related to each other, create mutually beneficial partnerships, and help each other achieve their personal, social and relational goals. This course also examines how to apply the knowledge and skills regarding mindfulness to other contexts through the entrepreneurial process. In other words, how can principles of mindfulness be used to create value for others?.

**CMNS 345 | THE DARK WEB | 4 quarter hours
(Undergraduate)**

The World Wide Web has developed into an incredibly powerful social force creating a new world of opportunities for human interaction, for better and for worse. This course examines the digital underworld also known as the Dark Web. The Dark Web is a sprawling yet secretive network, which provides a haven for behavior that may or may not be illegal, but is often deemed radical, unethical or immoral. Literature that examines the difficulty in maintaining the delicate balance between privacy and protection, as well as freedom and regulation in virtual spaces will be covered. Students will explore topics including trolling, exploitative content, illegal markets, and cryptocurrencies.

**CMNS 346 | SOCIAL MEDIA RESEARCH METHODS | 4 quarter hours
(Undergraduate)**

This course provides an overview of methodological choices for analyzing social media platforms, users, and messages. Students will learn a variety of techniques and concepts including reading analytic reports, basics of social network analysis, language processing, data visualization, and content analysis. Students will also engage in forming appropriate research questions and ethical considerations in internet research.

**CMNS 347 | THE POLITICS OF HIP HOP CULTURE | 4 quarter hours
(Undergraduate)**

This course examines "the political" in hip hop culture. Thus, it is not an appreciation of hip hop class; this is, instead, a rigorous theory-based course that interrogates hip hop culture for its political potential for social equality and change. In this course, we will grapple with theories on how popular culture, representations of blackness and power intersect within the context of hip hop. This course examines "the political" in hip hop culture. Thus, it is not an appreciation of hip hop class; this is, instead, a rigorous theory-based course that interrogates hip hop culture for its political potential for social equality and change. In this course, we will grapple with theories on how popular culture, representations of blackness and power intersect within the context of hip hop. We will also interrogate various media texts (film, music, television, and "new media") in relation to the multiple ways in which hip hop culture has been defined. Among the issues we engage are the constructions and representations of blackness, black images in popular culture, and how hip hop culture relates to underlying factors such as globalization, hyper-commodification, racism, sexism, hetero-normativity, classism, and resistance.

CMN 103 is a prerequisite for this class.

**CMNS 348 | COMMUNICATING HEALTH, RACE AND REPRODUCTIVE RIGHTS | 4 quarter hours
(Undergraduate)**

This course examines "the political" that arises from women's bodies and reproductive rights and practices. In this course, we will grapple with theories on how race, media representations of blackness and power intersect within the context of the female body. We will begin with a theoretical framework for our readings and discussions then we will delve into the history of women and reproduction as it relates to power; this history will focus primarily on women of the Black Diaspora which will include indigenous women of the Americas and Latinas. We will also interrogate various race-based case studies as both a force for change and for reinforcing hegemonic discourse. Among the issues we will engage are the constructions and representations of blackness and how race and reproduction relates to underlying factors such as globalization, racism, sexism, classism, and resistance. A crucial part of our task in this course is to think critically and complexly about the roles of race and racism as it pertains to the female body and reproduction within our contemporary world.

CMN 103 is a prerequisite for this class.

**CMNS 349 | DIGITAL MEDIA LAW AND ETHICS | 4 quarter hours
(Undergraduate)**

This course covers fundamental principles of law and ethics with specific attention to uses and applications of digital communication technologies. The class explores the interplay of law (the rights and freedoms granted to citizens under the First Amendment and the Universal Declaration of Human Rights) and applied ethics (the range of civic and professional responsibilities under consideration as citizens exercise these rights) with a focus on critical issues concerning communication technology. Emphasis will be placed on the legal privileges, regulatory limitations, and ethical issues that specifically concern digital media and information technologies within the broader context of communication law and ethics. The course focuses on legal rights and ethical responsibilities within the American framework but also includes comparative analysis with other nations and cultures to empower students to appreciate and contrast other legal and ethical decision-making frameworks.

CMNS 350 | TOPICS IN COMMUNICATION AND TECHNOLOGY | 4 quarter hours**(Undergraduate)**

Advanced study of the relationships between communication and technology. Varied topics.

CMNS 351 | EFFECTIVE COMMUNICATION FOR THE HUMAN RESOURCES PROFESSIONAL | 4 quarter hours**(Undergraduate)**

Skillful communication lies at the heart of all effective human resource management practice. This course reviews research and best practices in human resources communication. Topics covered include: recruitment and selection; orientation and socialization; crafting policies; performance appraisal; professional development; and leaving the organization. (Formerly ORGC 360)

CMNS 352 | COMMUNICATION AND THE CORPORATE CULTURE | 4 quarter hours**(Undergraduate)**

Focuses on the communicative implications of such cultural elements as values, heroes, rites, rituals, symbolism and storytelling. Analyzes and presents ways of adapting to the diverse components of a culture. (Formerly ORGC 352)

CMNS 353 | COMMUNICATION AND ORGANIZATIONAL CHANGE | 4 quarter hours**(Undergraduate)**

Change is a constant in organizations. Students will examine how culture, leadership, and organizational members influence, and are influenced by, change. Learn how organizational leaders anticipate, facilitate, and implement change - and how to become an agent for change yourself. (Formerly ORGC 353)

CMNS 354 | EMPLOYMENT INTERVIEWING | 4 quarter hours**(Undergraduate)**

This course examines the theory and practice of on the job interviewing and is especially helpful to those students who will soon graduate and transition into the world of full-time work. Through the class, you will have the opportunity to practice your interviewing skills in simulated probing and employment screening interviews. While the principal emphasis of the class is on the employment screening interview, many interviewing skills and pitfalls that translate equally well to other interview contexts.

CMNS 355 | CONFLICT MANAGEMENT | 4 quarter hours**(Undergraduate)**

Examines the process of conflict in interpersonal and organizational contexts. Focuses upon the causes, types, and theories of conflict as well as upon practical approaches to dispute resolution. Topics include: social cognition, emotion, and power in conflict; personal conflict style(s); cultural and contextual factors; conflict tactics and messaging; destructive versus constructive interaction cycles; and negotiation and resolution strategies.

CMNS 356 | COMMUNICATION CONSULTING | 4 quarter hours**(Undergraduate)**

Interested in consulting as a career or as a side hustle? This project-based learning course matches students with a real client to complete a consulting project while also learning about the contemporary consulting industry. Students can expect to learn how to develop expertise, build and maintain client relationships, anticipate and navigate client concerns, and complete a project as an internal or external consultant for a client organization. May be cross-listed with CMNS 205: Communication, Community, and Culture. (Formerly ORGC 356)

CMNS 357 | DARK SIDE OF ORGANIZATIONAL COMMUNICATION | 4 quarter hours**(Undergraduate)**

Explores the unsavory communication dimensions and dysfunctions of organizational life - and how to overcome them. Attention will be devoted to examining and trouble-shooting harmful organizational communication activities like incivility, bullying and violence, social ostracism, gossip, prejudice and discrimination, sexual harassment, group (dy)synergies, and stress and burnout. (Formerly ORGC 355)

CMNS 358 | DIVERSITY, LEADERSHIP, & TEAM BUILDING | 4 quarter hours**(Undergraduate)**

Learn how teams can benefit from thoughtful leadership and intentional focus on diversity and inclusion during team formation. Class materials will focus on various leadership theories and research, and their applications to leadership issues in real-life organizational teams. Students will acquire knowledge about what separates successful leaders from their unsuccessful counterparts, learn analytical tools to observe, diagnose, and choose appropriate responses to different leadership and team-related problems, and have opportunities to recognize and reflect on one's own leadership skills in a team context. (Formerly ORGC 358)

CMNS 359 | THE FUTURE OF REMOTE AND VIRTUAL TEAMS | 4 quarter hours**(Undergraduate)**

Teamwork skills are consistently ranked high as one of the top qualities that employers look for in new hires. Cultivate the necessary communication skills to thrive in virtual or remote teams that require communication technologies for collaboration. Students will learn how to contribute to and lead teams that may span cultural, temporal, disciplinary, and geographic boundaries. Students should expect to participate in a virtual team of their own through online simulations, discussions, and team projects. This course may be offered in an online or hybrid environment (Formerly ORGC 359)

CMNS 360 | RELATIONAL, GROUP, AND ORGANIZATIONAL THEORY | 4 quarter hours**(Undergraduate)**

This course surveys relevant theoretical developments in the field of communication. While exploring the major theoretical paradigms that inform and guide the study of human communication, students receive insight into the significance and meaning of their own day-to-day communication activities and discover how theories provide complementary and viable explanations for analyzing as well as assessing the impact of communication in relational, group and organizational contexts.

CMNS 361 | GENDER AND COMMUNICATION | 4 quarter hours**(Undergraduate)**

Students will discover the intricate relationship between gender, communication, and culture. The course focuses on how gender influences communication, how gender gets communicated, and how communication reflects, refracts, shapes, and revises our understandings of gender and what it means to be gendered beings. Further, the course asks what role culture plays in the communication of our gendered identities. Students work toward recognizing societal expectations of gender while discovering how we may use communication, as gendered beings, in order to improve our lives, both individually and collectively.

**CMNS 362 | SOUND AND VISION | 4 quarter hours
(Undergraduate)**

This course introduces students to unique ways that photography and audio documentary can blend together. The course will combine documentary and experimental production to help students learn to create audio documentary and visual projects and to work in mixed-media contexts.

**CMNS 363 | CLIMATE CHANGE COMMUNICATION | 4 quarter hours
(Undergraduate)**

Individuals make up their minds on climate change, energy development, and other science of pressing public policy importance through a complex set of factors: values, demographics, political ideology, and so on. Journalists, strategic communicators, scientists, and policy analysts need to be able to communicate effectively with diverse public audiences on climate and energy topics. This course is oriented from a science communication perspective and draws on social scientific research on communicating on climate change and energy issues. We will take a human perspective on climate issues and focuses on the social, political and cultural aspects of climate change. The course covers best practices for promoting and facilitating public dialogue on climate change policy and global energy systems. Topics covered include: climate change public opinion and knowledge, media portrayals of climate change and its societal effects, climate skepticism and denial, psychological factors that contribute to values and beliefs on climate science, journalism and covering climate issues, framing and developing narratives on climate impacts, and climate change in popular culture. Students will conduct original research to analyze and evaluate climate change communication. For the final project, students have the option of completing a major journalistic reporting project, designing an advocacy or marketing campaign, or conducting a research project. (Cross-listed with JOUR 311)

**CMNS 365 | ARGUMENTATION, ADVOCACY, AND DELIBERATION | 4 quarter hours
(Undergraduate)**

The primary purpose of this course is to equip students with a heightened capacity for reasoning so that they will be better prepared to participate in argumentation, advocacy, and deliberation in a number of contexts (academic, work place, public life). This course focuses on critical thinking, effective argumentation, and civil dialogue. Students in the class will develop and evaluate reasoned arguments; practice the skills of critical thinking; and deliver class presentations.

**CMNS 366 | COMMUNICATION, TECHNOLOGY AND SOCIETY | 4 quarter hours
(Undergraduate)**

Survey of a variety of contemporary and historical issues related to the introduction and diffusion of communication technologies in society. Especially examines how new technologies, particularly the Internet, are transforming the communication landscape. Emphasis on issues of intellectual property, surveillance, privacy, regulation, message construction, and access will be central to this course.

**CMNS 367 | PERFORMANCE FOR SOCIAL CHANGE | 4 quarter hours
(Undergraduate)**

There is no greater obstacle facing our culture right now than the intensified divisions that exist in our politics and the inability to speak with and listen to those who do not agree with our positions. As a special topics course focusing on polarization in our society, this class will focus on the role of performance and creative intervention (theater, poetry, aesthetics communication) as a tool to facilitate dialogues across difference. Practical and applied in its design, this course will call for students to examine what it means to seek out and sit with differences in perspective, listen to differences in understanding and work to bridge disparate worldviews. Students will challenge their own communication practices, engage and practice difficult dialogues, script, and stage performance work that works to foster discussion within and across disagreement.

**CMNS 369 | PERFORMANCE OF HUMOR | 4 quarter hours
(Undergraduate)**

This course provides a critical and performative exploration into the role of humor and comedy in our social world. Often layered, complex, and contested, the communicative and critical workings of humor mark an ongoing site of cultural struggle, cultural tension, and heated debate. This course engages humor from a performative lens, which calls for us to consider the embodied, contextual, relational, historical, and political dimensions of comedy. The first unit in the course offers a broad theoretical framework to discuss the doings of humor, as well as providing a foundational class vocabulary in the concepts of satire, irony, parody, ideology, performance, performativity, and the absurd. The second section looks to the construction of the ironic persona as a site of humor and a tool for cultural criticism, reflection, and parody. The third unit, coinciding with the November election, looks to political satire as a tool for questioning, challenging, and complicating sedimented cultural systems, performances, and beliefs. Finally, the last unit broadens out our understanding of comedy to explore the notion of harmony, looking to humor as a space for disrupting hierarchies of power and building alternative forms of community.

**CMNS 371 | PERFORMANCE OF RITUAL | 4 quarter hours
(Undergraduate)**

Participating in and performing rituals is part of what makes us human. Rituals develop and define cultural life. Rituals in modern life include macro events like the transfer of power in a government as well as micro rites of passage, known as "coming of age" events, whether defined experientially (acquiring a driver's license) or chronologically (turning 21). Here in the United States, many so-called rituals have an ambiguous purpose while others are clearly defined. In this course we will be looking at a range of rituals and the communicative and symbolic elements connected to the performance of them. We will examine, for example, the ritual of acquiring a tattoo, voting, participation in a marriage ceremony, rituals surrounding birth and death, as well as the absence of rituals for life-changing events (i.e. divorce/break up and miscarriage). We will ask as many questions as we answer: What roles do ritual, myth, and symbol play in human experience and everyday life? How do rituals reflect, produce, or deflect reality? How do they reinforce socio-political power structures while potentially providing options for resistance?.

CMNS 373 | INTERPERSONAL COMMUNICATION, POWER, AND SOCIAL JUSTICE | 4 quarter hours
(Undergraduate)

This course is organized around the central question: how does interpersonal communication reinforce, maintain, or resist dominant power relations in our relationships, families, organizations, and communities? In it, students will apply critical interpersonal communication scholarship and theory to a range of topics, with a focus on how interpersonal interactions contribute to the equitable or inequitable distribution of wealth, opportunities, and privileges in society.

CMNS 377 | SPECIAL TOPICS IN COMMUNICATION STUDIES: CUSTOMER SERVICE COMMUNICATION | 4 quarter hours
(Undergraduate)

CMNS 382 | APPLIED RESEARCH METHODS IN COMMUNICATION STUDIES | 4 quarter hours
(Undergraduate)

In this course, students apply quantitative research methods to answer questions about human communication. Students pose research questions, select and design quantitative measures, collect quantitative data, conduct descriptive and inferential statistical analyses, and interpret results.

LSP 121 (or MAT 137 or MAT 242 or PSY 240 or SOC 279) is a prerequisite for this course.

CMNS 393 | COMMUNICATION STUDIES PRACTICUM | 2 quarter hours
(Undergraduate)

Structured and supervised student participation in group presentations for various audiences. Includes practical experience in research, rehearsal and performance. Students may take a maximum of 2 credit hours in one quarter, 4 credit hours in the major, and 8 total credit hours. Written permission of supervising faculty member and of the departmental chair is necessary before registration.

CMNS 394 | ORGANIZATIONAL COMMUNICATION PRACTICUM | 2 quarter hours
(Undergraduate)

Structured and supervised student participation group presentations for various audiences. Includes practical experience in research, rehearsal and performance. Students may take a maximum of 2 credit hours in one quarter, 4 credit hours in the major, and 8 total credit hours. (2 quarter hours) (Formerly ORGC 393)

CMNS 500 | FOUNDATIONS IN GRADUATE COMMUNICATION STUDIES | 4 quarter hours
(Graduate)

This course provides an orientation and introduction to graduate study in Communication and Media in the College of Communication; including graduate program policies, faculty, DePaul resources, the broader academic discipline of Communication and potential pathways for program graduates. In addition, the course explains relevant research paradigms and methodologies, while emphasizing the breadth and interconnectedness of communication contexts (relationships, organizations, media, culture). Students will develop a personalized study plan and a literature review on their area of research interest. This class will integrate student participation, active learning, and diverse disciplinary perspectives. Students will be required to participate in small group discussions and submit papers and other written assignments.
Status as a Graduate Communication student, Health Communication student, or Relational Communication student is a prerequisite for this class.

CMNS 501 | COMMUNICATION IN CULTURAL CONTEXTS | 4 quarter hours
(Graduate)

This course examines the relationship between culture and communication in various international and co-cultural contexts. It analyzes theories, concepts, personal narratives, and empirical studies on inter cultural and multicultural communication. It engages students in dialogues and reflections of the readings and familiarizes students with various approaches to intercultural communication studies. The course aims to develop students' self-reflectivity, critical thinking and analytical skills in the observation, interpretation, and understanding of communication in various cultural contexts. Formerly CMN 501.

Status as a College of Communication graduate student or Experience Design student or department consent is a prerequisite for this class.

CMNS 506 | SEMINAR IN INTERPERSONAL COMMUNICATION | 4 quarter hours
(Graduate)

This course focuses on communication between individuals in the context of personal and professional relationships. Various theoretical and methodological approaches to the study of interpersonal communication, major interpersonal communication dynamics and processes, and contemporary concerns of interpersonal communication researchers and practitioners will be discussed. Students will critique and apply interpersonal scholarship to address communication problems in personal and professional contexts.

Status as a College of Communication graduate student or Experience Design student or department consent is a prerequisite for this class.

CMNS 507 | ATTACHMENT & RELATIONAL COMMUNICATION | 4 quarter hours
(Graduate)

This course will explore the unique role that attachment styles play in the formation, maintenance, and deterioration of close relationships. Attachment theory will be used to examine how working models of self and other influence patterns of interaction among relational partners. Topics will include how attachment styles influence self-disclosure, conflict resolution, jealousy and deceptive communication. Students will also explore communicative strategies for dealing with attachment related problems.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 509 | SPECIAL TOPICS IN MULTICULTURAL COMMUNICATION | 4 quarter hours
(Graduate)

Course covers a variety of topics that address theories about multicultural communication such as culture, gender, sexual orientation, race, and ethnicity. For a detailed course description, click the course link and view the Class Notes in the Enrollment Information tab.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 510 | APPLIED COMMUNICATION: THEORIES AND CASES | 4 quarter hours
(Graduate)

This course provides students with a review of foundational and leading-edge theories of human communication, examined in contexts of practical significance. Coursework will involve deep reading and discussion of specific communication theories; and students will practice using theory to identify, analyze, and remediate communication problems via case study.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 511 | TOPICS IN INTERPERSONAL COMMUNICATION | 4 quarter hours**(Graduate)**

Explores specialized topics within the field of relational communication. Past topics have included emotions and communication, gender and its relationship to interaction, and the social construction of interpersonal realities. For a detailed course description, click the course link and view the Class Notes in the Enrollment Information tab.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 512 | TOPICS IN APPLIED COMMUNICATION | 4 quarter hours**(Graduate)**

Explores specialized topics and contemporary problems within the field of human communication, such as Gendered Communication, Communicating Identity, Persuasion and Social Influence, and Social Media & Misinformation.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 513 | NONVERBAL COMMUNICATION | 4 quarter hours**(Graduate)**

Nonverbal messages are important as we typically monitor our own nonverbal messages less, but believe others nonverbal messages more than their verbal messages. Likewise, research suggests that 65% of our communication is based on nonverbal messages and some estimates are as high as 93%. Clearly such messages are important, yet we spend little time examining such messages. That said, the goal of this course is to provide you with a research based overview of a variety of nonverbal messages, that is, everything we communicate without using our words. This course surveys various conceptual areas generally subsumed under the broad rubric of nonverbal communication. Topics include physical appearances, gestures, face and eye behavior, vocalic, proxemics, touch, time, environmental contexts as well as application of nonverbal behaviors to specific interpersonal communication contexts.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 522 | COMMUNICATING IDENTITY | 4 quarter hours**(Graduate)**

Focuses on the rhetorical theories and practices through which various cultural groups within the US. construct a sense of identity. The course examines different rhetorical forms and strategies through an analysis of the rhetorical situations, texts and artifacts of various cultural groups.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 523 | GENDERED COMMUNICATION | 4 quarter hours**(Graduate)**

Examines research into the ways the various aspects of communication are affected by and affect the social construction of gender. Topics covered include language and language usage differences, interaction patterns and perceptions of the sexes generated through language and communication. (Cross-listed as MLS 445/WMS 440).

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 524 | NARRATIVES IN HEALTH CARE | 4 quarter hours**(Graduate)**

Focusing on the performance and narrative paradigms of communication studies, the course will survey uses of performance and narrative methods to consider health communication relationships. Narrative and narrative performance are sites of health communication issues for marginalized populations, difficult conversations, and alternate means of reporting. For example, narrative and narrative performance are increasingly being used as part of medical curriculum, as a means to train health care professionals to understand the experiences of their patients, encourage deep listening, and foster different professional-patient relations. For cancer, HIV/AIDS, and other patients, performance becomes a means of speaking into mainstream and dominant discourses of health and to actively shape discourses from their own subjectivities. This increases the visibility of health care experiences in their gendered, sexualized, and racialized dimensions. Finally, narrative and narrative performance offers an additional means of visibility in catalyzing change in public, legislative, scholarly and relational arenas.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 525 | COMMUNICATION TRAINING FOR INTERNATIONAL WORK | 4 quarter hours**(Graduate)**

Examines and contrasts the management philosophies of different cultures around the world, paying special attention to how European and Asian organizational practices influence structure, culture and communication within American corporations.

Status as a College of Communication Graduate Student, Organizational Diversity MBA Student or department consent is a prerequisite to this class.

CMNS 527 | ASSESSMENT AND INTERVENTION IN ORGANIZATIONS | 4 quarter hours**(Graduate)**

Organizations are symbolic realities constructed by humans in communication. In other words, organizations are creations, and both organizational members and observers need to comprehend them as such. Communication 527 is devoted to preparing you to become communication professionals able to understand organizations through the analysis of organizational patterns of meaning and expectations. Communication professionals help organizations to improve communication by (1) identifying differences between actual and desired conditions of communication and (2) devising ways to close the gap between actual and desired states. The first function involves organizational communication evaluation (gathering, analyzing, and interpreting data about an organization's communication processes). The second function is referred to as intervention (actions taken to improve organizational communication). People who perform organizational communication evaluation and intervention may be members of the organization or outside agents brought in to perform specific projects. This class will focus on the role of the communication professional in the maintenance and change of organizational communication functions, structures, and the communication processes that occur at various systems levels, including dyads, groups, intercultural and multicultural relations, and organization-wide network processes.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 528 | THE SOCIAL CONSTRUCTION OF HEALTH AND ILLNESS | 4 quarter hours (Graduate)

Beginning with foundational theories and principles of social construction, the course examines cases illustrating socially-constructed features of healthcare. We discuss (a) medicine as a gendered and hierarchical institution, (2) specialized languages used to describe/construct specific illnesses (e.g. anorexia and obesity, addiction, depression, HIV/AIDS), and (3) how constructed realities become internalized through primary and secondary socialization within the family, through media, and through encounters with the health care system.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 529 | TOPICS IN ORGANIZATIONAL AND MULTICULTURAL COMMUNICATION | 4 quarter hours (Graduate)

This course offers students a variety of special topic areas related to organizational and multicultural communication. Students will have opportunities to delve more deeply into each topic area working with instructors who have specialized expertise in that area. Typical topics include but are not limited to Global Workplaces and International Management, Organizational Identity, Critical Theory, and Latino(a) Representation.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 530 | INSTRUCTIONAL DEVELOPMENT | 4 quarter hours (Graduate)

This course is designed to assist in understanding the principles necessary for effective design based on learning outcomes, delivery and evaluation of instruction based on awareness of differing learning styles, subject content, and educational setting including both higher education and professional development settings. This course examines issues related to instructional development by emphasizing the components that are critical in the development, delivery, and assessment of quality teaching and learning experiences in both academic and organizational settings. Students will have the opportunity to implement instructional strategies in the class setting.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 532 | INTRODUCTION TO TRAINING AND DEVELOPMENT | 4 quarter hours (Graduate)

This course provides an introduction to training and its relationship to organizational problem solving. Basic and advanced training strategies are taught within the context of developing organizations. Organizations often have in house training and development specialists that facilitate on-going organizational change processes. The functions of such human relations specialists are explored and the kinds of communication knowledge, competencies and skills needed to enact such functions are examined.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 541 | ORGANIZATIONAL COMMUNICATION AND CULTURE | 4 quarter hours (Graduate)

The central purpose of this course is to introduce students to the role communication plays in organizational life. Throughout the quarter, attention will be devoted to examining the various theoretical perspectives from which organizational communication can be viewed, and selectively surveying major content topics and current issues in the organizational communication literature.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 542 | MULTICULTURAL COMMUNICATION IN THE WORKPLACE | 4 quarter hours (Graduate)

Multicultural issues affect the communication of organizational members on a day-to-day basis. This course examines multicultural issues in professional settings. It provides students with knowledge about co-cultural communication patterns, which will enhance their own ability to interact. Further, it demonstrates how multicultural communication can be an organizational asset.

Status as a College of Communication Graduate Student, Organizational Diversity MBA Student or department consent is a prerequisite to this class.

CMNS 543 | COMMUNICATION AND ORGANIZATIONAL CHANGE | 4 quarter hours (Graduate)

Change in an organization implies change in communicative processes at the individual, dyadic, group and systemic levels. Communication variables that define patterns of interaction within these organizational contexts will be examined as well as key issues that might cause communication difficulties.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 545 | COMMUNICATION AND TECHNOLOGY | 4 quarter hours (Graduate)

Communication and Technology explores the process through which technological and social systems co-create or invent each other. As such, this course not only examines the role that new communication technologies play in shaping our social systems and the organizations within them, but also looks at how social, cultural, economic and legal contexts influence the development and emergence of these technologies.

Status as a College of Communication graduate student or Experience Design student or department consent is a prerequisite for this class.

CMNS 548 | TEAMS, DIVERSITY AND LEADERSHIP | 4 quarter hours (Graduate)

Modern organizations are increasingly interested in shifting their organizational structures toward the goal of creating self-managed work teams. Therefore, the current communication graduate greatly benefits from knowledge and experience with two interdependent aspects of group dynamics: decision-making under conditions of uncertainty, and the philosophy and practice of developing groups into self-managed teams. The December quarter version of this course will combine a relatively brief period of lecture/discussion with a teamwork intensive action learning component towards the goal of making each student competent to either spearhead a change to self-managed work teams in their own organization (if called upon to do so), or to understand and weather this change in work mode without stress.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 549 | SPECIAL TOPICS IN ORGANIZATIONAL COMMUNICATION | 4 quarter hours (Graduate)

Course covers a variety of topics that address theories about organizational communication such as group processes, conflict management, and leadership. For a detailed course description, click the course link and view the Class Notes in the Enrollment Information tab.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 551 | COLLABORATION FOR SOCIAL IMPACT | 4 quarter hours (Graduate)

Collaboration is a communicative process by which people work together to achieve something they couldn't do alone. This class explores collaboration as a communicative strategy for achieving social impact, with an emphasis on defining problems that warrant a collaborative response and negotiating structures that promote coordination across individuals and organizations. Students will learn strategies for collaborating across organizational boundaries, power and resource differences, and cultural contexts to enact social impact.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 552 | RELATIONSHIPS AND INFLUENCE IN THE WORKPLACE | 4 quarter hours (Graduate)

This course explores the process by which communicators attempt to accomplish their goals. In particular, this course covers theories of persuasion, strategic message design (creating messages that take into account multiple audiences and goals), and how the inferential process influences decision-making.

Status as a College of Communication graduate student or Experience Design student or department consent is a prerequisite for this class.

CMNS 563 | MULTICULTURAL MEDIA REPRESENTATIONS | 4 quarter hours (Graduate)

This course examines both representational practices and theories that are informed by multicultural perspectives. It explores ways in which scholars and media practitioners have dealt with the epistemological problem of "difference." The course may take up topics such as race, class, age, and sexual orientation as categories of difference that have informed and continue to inform academic inquiries. The course also looks at historical and/or contemporary media texts, and analyzes them through these methods.

Status as a College of Communication Graduate Student, Critical Ethnic Studies Student or department consent is a prerequisite to this class.

CMNS 570 | INTRODUCTION TO DIGITAL CMN | 4 quarter hours (Graduate)

This course will provide students with a detailed critical introduction to the field of digital communication. Topics will include practical applications of digital communication across disciplines: communication studies, journalism, public relations, advertising, media and cinema studies, and communication technology. This class will offer students a glimpse of those disciplines and allow them to integrate them all together. Additionally, this course will provide an entry point for students into the program who have had little experience with either digital technology or communication courses. Ideally, this course would be a critical introduction to the field.

Status as a student in Digital Communication and Media Arts (CDM or College of Communication) or the Digital Communication Certificate or department consent is a prerequisite for this class.

CMNS 573 | WORK/LIFE COMMUNICATION AND WELLNESS | 4 quarter hours (Graduate)

Work/life at all levels is enacted through communication, as individuals take up, contest, and re-inscribe work/life boundaries and negotiate work/life conflicts with other social and institutional actors. This seminar examines the communication theory and practice of work/life management at the individual, dyadic, familial, and organizational levels. Topics include family, health, and labor policy; organizational wellness initiatives and interventions; and the pursuit of personal work/life "balance" across the life course.

Status as a Graduate Communication student, Health Communication student, or Relational Communication student is a prerequisite for this class.

CMNS 580 | DATA-DRIVEN DECISION MAKING IN COMMUNICATION | 4 quarter hours (Graduate)

This course guides students to translate communication research methodology and skill to domains of practical significance. The course addresses specific processes by which data and research insights are applied to guide agenda-setting and decision-making, inform change processes, involve stakeholders, influence leadership, conduct evaluation, and create communication products and interventions across a variety of institutional and community contexts. [Prerequisite: MCS 503, CMNS 581, OR CMNS 582].

CMNS 581 or CMNS 582 or department consent is a prerequisite for this class.

CMNS 581 | QUALITATIVE RESEARCH METHODS | 4 quarter hours (Graduate)

Introduction to qualitative approaches to research in communication. The course includes a systematic review and application of ethnography, unstructured interviewing, personal document analysis, historical research, and critical practice. Addresses the rationale, method, and theory of each qualitative approach to research in addition to placing emphasis upon data collection and interpretation.

Status as a College of Communication Graduate Student, Critical Ethnic Studies Student or department consent is a prerequisite to this class.

CMNS 582 | QUANTITATIVE RESEARCH METHODS | 4 quarter hours (Graduate)

Introduces students to quantitative approaches to research and basic statistics. Topics include research design and control, survey construction, measurement and other general research issues, nonparametric statistics, correlation, the t-test and analysis of variance.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 583 | RESEARCH METHODS | 4 quarter hours (Graduate)

Focuses on developing an understanding of appropriate quantitative and qualitative research methodologies and relevant descriptive and inferential statistics for the investigation of both practical and theoretical problems in the study of communication. By considering the nature, concepts, and logic of the research enterprise, permits a critically informed assessment of published research, including data gathering and data analysis procedures.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

**CMNS 584 | METHODOLOGICAL TOPICS | 4 quarter hours
(Graduate)**

This course is a special topics course in research methods, wherein students study and practice a specialized approach to data collection and knowledge generation. Students will engage the philosophical foundations and practical methodological operations of the study of human communication from a specific research perspective.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

**CMNS 585 | THE POLITICS OF HIP HOP CULTURE | 4 quarter hours
(Graduate)**

This course examines "the political" in hip hop culture. Thus, it is not an appreciation of hip hop class; this is, instead, a rigorous theory-based course that interrogates hip hop culture for its political potential for social equality and change. In this course, we will grapple with theories on how popular culture, representations of blackness and power intersect within the context of hip hop. This course examines "the political" in hip hop culture. Thus, it is not an appreciation of hip hop class; this is, instead, a rigorous theory-based course that interrogates hip hop culture for its political potential for social equality and change. In this course, we will grapple with theories on how popular culture, representations of blackness and power intersect within the context of hip hop. We will also interrogate various media texts (film, music, television, and "new media") in relation to the multiple ways in which hip hop culture has been defined. Among the issues we engage are the constructions and representations of blackness, black images in popular culture, and how hip hop culture relates to underlying factors such as globalization, hyper-commodification, racism, sexism, hetero-normativity, classism, and resistance.

Status as a Communication and Media graduate student is a prerequisite for this class.

**CMNS 586 | COMMUNICATING HEALTH, RACE AND REPRODUCTIVE RIGHTS | 4 quarter hours
(Graduate)**

This course examines "the political" that arises from women's bodies and reproductive rights and practices. In this course, we will grapple with theories on how race, media representations of blackness and power intersect within the context of the female body. We will begin with a theoretical framework for our readings and discussions then we will delve into the history of women and reproduction as it relates to power; this history will focus primarily on women of the Black Diaspora which will include indigenous women of the Americas and Latinas. We will also interrogate various race-based case studies as both a force for change and for reinforcing hegemonic discourse. Among the issues we will engage are the constructions and representations of blackness and how race and reproduction relates to underlying factors such as globalization, racism, sexism, classism, and resistance. A crucial part of our task in this course is to think critically and complexly about the roles of race and racism as it pertains to the female body and reproduction within our contemporary world.

Status as a Communication and Media graduate student is a prerequisite for this class.

**CMNS 590 | COMMUNICATION WORKSHOP (VARIABLE TOPICS) | 2 quarter hours
(Graduate)**

This course allows students to sample a range of hands on, practical offerings in communication that can enhance their knowledge and expertise. Topics offered include survey design and focus groups. (2 quarter hours)

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

**CMNS 592 | INDEPENDENT STUDY | 4 quarter hours
(Graduate)**

Students will be guided in the development of a special project that furthers their collaboration with an instructor and produces a report that demonstrates their mastery of critical content and competencies. The independent study option is intended for students who have demonstrated a mastery of course content, who would benefit from a sustained, focused collaboration with a relevant faculty member. (Variable credit).

Status as a Graduate Communication student and Director Consent is a prerequisite for this class.

**CMNS 594 | DCMA THESIS I | 4 quarter hours
(Graduate)**

Enroll in 594 during the term before you plan on taking Thesis II. This is a graded, 4-credit hour course. Tuition is charged and loan deferment is available. Your thesis/project advisor needs to communicate this date to the Graduate Studies Director for your program, before you are allowed to enroll. PREREQUISITE(S): Status as a Graduate Digital Communication and Media Arts student and Director consent is a prerequisite for this class.

**CMNS 595 | DCMA THESIS II | 4 quarter hours
(Graduate)**

Enroll in CMNS 595 during the term you plan to defend your thesis or complete your final project. This is a graded, 4-credit hour course. Tuition is charged and loan deferment is available. You must have a scheduled defense/completion date to be approved for this class. Your thesis/project advisor needs to communicate this date to the Graduate Studies Director for your program, before you are allowed to enroll. This class is for DCMA students in the Digital Communication concentration and follows DMA 695.

A concentration in Digital Communication and CMNS 594 are prerequisites for this class.

**CMNS 596 | GRADUATE CAPSTONE | 4 quarter hours
(Graduate)**

The graduate capstone course is designed to accompany the completion of an exit project, an option to fulfill the requirements for an M.A. in the following programs: Organizational and Multicultural, Relational Communication, and Health Communication. Under the mentorship of a faculty member, students will design and create an exit project as guided by their chosen committee. The students in the course will serve as peer collaborators for one another, providing resources throughout the exit project process. The purpose of an exit project is to allow students the flexibility to create a meaningful work product that integrates the graduate coursework, which is distinctly separate from the thesis and comprehensive exam options. To enroll in this course, students must complete and submit the requisite paperwork with the signature of their exit project committee members along with a proposal of the exit project. **Status as a Graduate Communication student, Health Communication student, or Relational Communication student is a prerequisite for this class.**

**CMNS 599 | RESEARCH THESIS | 4 quarter hours
(Graduate)**

Enroll in 599 during the term you plan to defend your thesis or complete your final project. This is a graded, 4-credit hour course. Tuition is charged. You must have a scheduled defense/completion date to be approved for this class. Your thesis/project advisor needs to communicate this date to the Graduate Studies Director for your program, before you are allowed to enroll. Loan deferment is allowed to those registered for this class.

Status as a Graduate Communication student and Director Consent is a prerequisite for this class.

**CMNS 601 | ACTIVE DEGREE COMPLETION | 0 quarter hours
(Graduate)**

This is a 0-credit hour course that is available to students who are working actively toward the completion of a thesis or project. Enrollment in this course is limited to the two quarters prior to the defense of the thesis/project and requires thesis/project advisor and graduate director approval and proof of work each quarter. Enrollment in this course allows access to the library and other campus facilities. This course carries half-time enrollment status and eligibility for loan deferment and student loans. This course is graded as pass/fail. (0 credit hours)

Status as a Graduate Communication or Relational Communication student or department consent is a prerequisite for this class.

**CMNS 602 | CANDIDACY CONTINUATION | 0 quarter hours
(Graduate)**

This is a 0-credit hour course that requires permission from the graduate director. Students can enroll in this course if they are finishing a course in which they received an incomplete (IN) and are not registered for any other regular credit-bearing courses in the quarter they plan to finish the incomplete. Enrollment in this course is limited to the two quarters following the quarter of the original incomplete (IN) grade. Enrollment in this course allows access to the library and other campus facilities. This course does not carry any enrollment status. Students enrolled in this course are not eligible for loan deferment or student loans. This course is not graded. (0 credit hours)

Status as a Graduate Communication student is a prerequisite for this class.

Community Service Studies (CSS)

**CSS 101 | CATHOLIC SOCIAL TEACHING AND REFLECTION | 1-4 quarter hours
(Undergraduate)**

CSS 101 is a mandatory year-long course sequence for all students serving as tutors at San Miguel schools and Visitation Catholic Elementary through the Stean's Center Catholic Schools Initiative. Utilizing the pastoral cycle of "See, Judge, and Act" within the Catholic Social tradition, students will critically reflect on their tutoring experience as it relates to local economic, cultural and political issues surrounding the Englewood and Back of the Yards neighborhoods. In addition they will explore a variety of domestic and global justice issues through the lens of Catholic Social Teaching. Through this hermeneutic, they will gain a familiarity with terms and concepts to more thoroughly analyze and critique social systems. The students will also learn more about the Dominican and LaSallian charism towards marginalized populations and reflect on their own personal responsibility as members of a community bound to their religious mission. As a service-enhanced course, students will actively engage in critical reflection and dialogue on their tutoring experience through the use of readings, videos, guest speakers, group projects/presentations, and designated field trips to related organizations. Variable credit.

**CSS 201 | CRITICAL COMMUNITY ENGAGEMENT | 4 quarter hours
(Undergraduate)**

This course explores the relationship between social justice movements and non-profit organizations in the U.S. by providing a structure within which students can learn about issues and theory and the organizational settings in which they are serving.

**CSS 300 | INTRODUCTION TO NON-PROFIT MANAGEMENT | 4 quarter hours
(Undergraduate)**

This course provides students with an understanding of the functioning of the organizations that conduct the vital work of the non-profit sector. Students will complete the course with the knowledge base to be effective program managers and board members in these organizations.

**CSS 302 | ASSET-BASED COMMUNITY DEVELOPMENT AND COMMUNITY SERVICE | 4 quarter hours
(Undergraduate)**

This course examines the ABCD framework in greater depth.

**CSS 310 | RESTORATIVE JUSTICE: ENGAGEMENT WITH THE PRISON | 4 quarter hours
(Undergraduate)**

This course will provide an opportunity for students to 1) reflect deeply on the meaning of justice, 2) examine institutionalized forms of justice, and, above all, 3) explore alternative models of justice. Using a dialectic process, students will actively scrutinize theories of justice and investigate issues and movements of social justice. Additionally, they will be asked to consider how each of these areas informs the other, since theories often influence as well as emerge from issues and movements. Assumptions about crime and justice will be considered by comparing and contrasting retributive and restorative paradigms. The role of offender, victim and community will be analyzed in the context of crime and justice. Students will also look into programs in restorative justice to discern their outcome effectiveness.

**CSS 311 | MASCULINITY, JUSTICE AND LAW | 4 quarter hours
(Undergraduate)**

This course examines the social practices as well as the legal and institutional culture of masculinity. We will explore the sociocultural, historical and political debates surrounding masculinity and address why it is frequently thought to be "in crisis." Focusing on a number of different sociopolitical movements, we shall consider the construction of masculinity in relation to other social theories, including feminism and postcolonial theory. Furthermore, the effects of various types of violence, and strategies for intervention and prevention shall be addressed.

**CSS 312 | LAW AND POLITICS: PRISON POLICIES AND RESTORATIVE JUSTICE | 4 quarter hours
(Undergraduate)**

This course is about the intersections between law and politics. The learning outcomes for this course include helping students understand the U.S. Constitution, civil liberties and civil rights; the tensions between democracy and the rule of law. The course readings will address restorative justice, community service, redemption, and social justice. We will apply particular concepts from readings, lectures, etc. to an analysis of lived experiences in the American penal system. Collaborating with the Inside-out program, we will examine the ethics of drug sentencing, "three strikes and you are out" sentencing laws, mass incarceration, felon disenfranchisement, and prison-based gerrymandering. The main course assignment asks students to frame a constitutional amendment to rectify one of the issues covered in the course. Their amendments must reflect a thorough understanding of the legal, political, and ethical aspects of the issue they wish to address.

**CSS 320 | COMMUNITY FOOD SYSTEMS | 4 quarter hours
(Undergraduate)**

This course offers a critical analysis of the concept of community food systems as they have been employed as an alternative to the global agro-food system. Readings, lectures, films, guest speakers, site visits, and field projects will provide students with an overview of emerging community-driven efforts at producing, distributing and consuming food. Emphasis will be placed on (1) local, community-based food projects within urban contexts in North America; (2) whether or not these projects constitute more environmentally, socially, and economically sustainable approaches to provisioning households, neighborhoods, towns and cities; and (3) the degree to which such projects enhance the control over, accessibility to, and healthiness of food. Students will gain an understanding of the current global food system in relation to producing, processing, packaging, transporting, marketing, and eventually discarding food. Comparisons will be drawn with emerging local production, distribution and procurement processes driven by the interests of community groups and organizations concerned with health and nutrition, the environment and social justice. There will be a specific focus on the application of community food systems in urban sectors where access to fresh food is challenged, for example, as a result of historical patterns of racial segregation and social exclusion. Students will gain an understanding of such challenges through engaging in field projects in support of local food production and distribution within Chicago communities.

**CSS 330 | COMMUNITY PARTICIPATORY ACTION RESEARCH DESIGN | 4 quarter hours
(Undergraduate)**

This course traces the development of Participatory Action Research (PAR) through a number of different prisms including positivism, feminism, post-modernism and experiential learning pedagogies and examines the influence of discourses of power and inequality on this research methodology.

**CSS 340 | MINDFULNESS AND ACTIVISM | 4 quarter hours
(Undergraduate)**

This course will introduce students to the spiritual and secular uses of mindfulness to further their understanding of themselves and others and to consider its implications for social change. Mindfulness is "the intentional, accepting and non-judgmental focus of one's attention on the emotions, thoughts and sensations occurring in the present moment"; scientific research demonstrates that mindfulness is a powerful vehicle for advancing social relationships and individual health. Students will learn about the history of, contemporary practice, and scientific research on mindfulness in Buddhism, Christianity, and secular health venues through texts, reflection papers, research, and outreach and curriculum development to community partner sites in the Chicago community.

**CSS 350 | CRITICAL ISSUES IN PUBLIC EDUCATION: THE CHICAGO CONTEXT | 4 quarter hours
(Undergraduate)**

This course is a community-based service learning course that requires both "service" in and critical reflection of student experiences in public schools. Students in this course will engage critically with the challenges in public education. Issues explored in this course include: privatization of schooling, punitive accountability measures and sanctions, over-testing, tracking, and, zero tolerance disciplinary policies. Additionally, this class will address the systemic structures that lie at the foundation of these issues including the intersections of differences in race, class, gender, culture, sexual preference, religion, and nationality.

**CSS 378 | COMMUNITY-BASED TECHNOLOGY PROJECTS | 4 quarter hours
(Undergraduate)**

Using an Asset-based Community Development (ABCD) approach, students will work with a community partner to assess urban community web needs, then develop and implement a Web solution. This course provides a systematic and thorough introduction to project management theory, terms and concepts, while students learn the technical, cultural, and interpersonal skills necessary to successfully manage a web project through the project development life cycle. Concepts are reinforced via interactive in-class case study and reflection exercises; the course culminates in a web project for the community partner.

**CSS 390 | SPECIAL TOPICS IN COMMUNITY SERVICE STUDIES | 4 quarter hours
(Undergraduate)**

Special topics in Community Service Studies are designed to cover emerging or specialized issues in community service, development, nonprofit management, and/or social and global responsibility.

**CSS 395 | COMMUNITY INTERNSHIP | 4 quarter hours
(Undergraduate)**

Community Internship exposes students to career potentials in non-profit and government agencies through an intensive internship experience in a community organization.

**CSS 399 | INDEPENDENT STUDY | 1-4 quarter hours
(Undergraduate)**

Independent study. Enrollment by instructor and/or with approval by program director. Variable credit.

Comparative Literature (CPL)

**CPL 210 | GREAT IDEAS, THE INDIVIDUAL AND SOCIETY I | 4 quarter hours
(Undergraduate)**

Classical Antiquity and the Middle Ages Representative works from the Bible, ancient Greek and Roman literature, and European literature of the Middle Ages. Emphasis on close reading of particular texts in different genres; all readings in English. Authors treated in this sequence may include: Homer, Sappho, Aeschylus, Sophocles, Euripides, Hippocrates, Aristophanes, Plato, Aristotle, Cicero, Lucretius, Ovid, Seneca, Plutarch, Augustine, Maimonides, Dante. Formerly ISP 210.

**CPL 211 | GREAT IDEAS, THE INDIVIDUAL AND SOCIETY II | 4 quarter hours
(Undergraduate)**

This course entails close reading and discussion of significant texts in Western culture from the Renaissance to the Enlightenment. Readings will reflect different genres and perspectives. Potential authors may include, for example, Machiavelli, Erasmus, Pisan, Luther, Teresa of Avila, Cervantes, Montaigne, Descartes, Locke, Voltaire, Wollstonecraft, Swift, Equiano, and Rousseau. Cross-listed with HST 234.

**CPL 212 | GREAT IDEAS, THE INDIVIDUAL AND SOCIETY III | 4 quarter hours
(Undergraduate)**

The Modern Era Representative works of European literature from the French Revolution to the modern period. Emphasis on close reading of particular texts in different genres; all readings in English. Authors treated in this sequence may include: Hegel, Kierkegaard, Marx, Melville, Flaubert, Nietzsche, Freud. Formerly ISP 212.

CPL 240 | VOICES OF WAR AND PEACE; ART, LITERATURE AND FILM | 4 quarter hours (Undergraduate)

This course is an overview of the ways in which the arts, including literature and film, portray warfare and the attempts to end violence and build reconciliation and peace. Cross-listed with PAX 240.

CPL 242 | PICTURES OF INJUSTICE: NARRATIVE ARTS IN SOCIAL JUSTICE MOVEMENTS | 4 quarter hours (Undergraduate)

This course will critically examine social justice themes in documentary and feature films in order to consider the role film and filmmaking can play in social justice movements. Together, we will carefully analyze a wide variety of films with the goal of critically examining their representations of race, gender, class and their depiction of agency of their subjects. We will also examine the storytelling and technical techniques used by filmmakers and how those techniques support the goals of filmmakers. Finally, we will examine case studies of activists who are using film and film-making as a part of movements for social justice. Students will leave this course with a better understanding of the ethics of filmmaking and the use of film in social movements. They will be more critical consumers of media and more familiar with a variety of social justice issues. Cross-listed with PAX 242.

CPL 301 | EPIC AND ROMANCE | 4 quarter hours (Undergraduate)

Study of examples of heroic literature from a variety of cultures, including Western and non-Western civilizations.

CPL 302 | COMEDY | 4 quarter hours (Undergraduate)

Study of important examples of dramatic comedy; selections may range from ancient times to the present day with some attention to the relevant theories of comedy (Aristotle, Freud, Bergson, Frye, etc.).

CPL 303 | TRAGEDY | 4 quarter hours (Undergraduate)

Study of important examples of dramatic tragedy; selections may range from ancient times to the present day with some attention to the relevant theories of tragedy.

CPL 304 | THE NOVEL | 4 quarter hours (Undergraduate)

Study of the novel, any period or subgenre (historical, picaresque, romantic, realist etc.) from any given area or country with some attention to the literary theory of the particular novels in question.

CPL 305 | AUTOBIOGRAPHICAL/CONFESSIONAL LITERATURE | 4 quarter hours (Undergraduate)

Study of autobiographical/confessional literature; selections may range from ancient times to the present day from any given area or country with some attention to the relevant theories of these genres.

CPL 306 | UTOPIAN LITERATURE | 4 quarter hours (Undergraduate)

Study of utopian literature; selections range from the Renaissance to the present day. Readings are discussed within the context of relevant political and social theory.

CPL 311 | REVOLUTIONARY LITERATURE | 4 quarter hours (Undergraduate)

Study of revolutionary literature in any of its manifestations and genres in specific areas and periods.

CPL 312 | THE LITERATURE OF IDENTITY | 4 quarter hours (Undergraduate)

Cross-cultural study of self-discovery and identity as manifested in the literatures of self-awareness and self-definition (African-American, Hispanic, gay/lesbian, etc.).

CPL 313 | FEMINIST LITERATURE | 4 quarter hours (Undergraduate)

Cross-cultural synchronic or diachronic study of feminist literature.

CPL 319 | TOPICS IN COMPARATIVE LITERATURE | 4 quarter hours (Undergraduate)

Selected topics on any theme from comparative literature.

CPL 355 | CONTEMPORARY CRITICISM | 4 quarter hours (Undergraduate)

An overview of contemporary criticism from Russian formalism to post-modernism.

Composition (COM)

COM 300 | ORCHESTRATION I | 4 quarter hours (Undergraduate)

Ranges, sonorities and characteristics of woodwind, brass, percussion and string instruments; orchestrational studies of representative works through the 19th century; arrangements for orchestral ensembles.

Status as an undergraduate composition major is a prerequisite for this class.

COM 301 | 16TH CENTURY COUNTERPOINT | 4 quarter hours (Undergraduate)

Species counterpoint in two and three parts; melodic, formal and "harmonic" practices in Renaissance polyphony; free composition in the style; analysis and in-class performances of Renaissance motets and mass settings as well as original student compositions.

Status as an undergraduate composition major is a prerequisite for this class.

COM 302 | 18TH CENTURY COUNTERPOINT | 4 quarter hours (Undergraduate)

Contrapuntal techniques of Bach and Handel; analysis, composition, and in-class performances of solo and ensemble works in the style. Assignments include composition of inventions and fugues.

Status as an undergraduate composition major is a prerequisite for this class.

COM 303 | 20TH CENTURY COUNTERPOINT | 4 quarter hours (Undergraduate)

Exploration of contrapuntal techniques using 20th century vocabularies; analysis of selected compositions from the 20th-century, including works of Ives, Schonberg, Webern, Bartok, Hindemith, Ligeti and others as well as music of very recent times.

Status as an undergraduate composition major is a prerequisite for this class.

COM 305 | ANALYTICAL STUDIES | 4 quarter hours (Undergraduate)

Use of various analytical techniques for detailed studies of selected compositions from the common-practice period through the present day.

Status as an undergraduate composition major is a prerequisite for this class.

**COM 313 | INTRODUCTION TO COMPOSITION | 2-4 quarter hours
(Undergraduate)**

Basic composition. Recommended as preparatory for intended composition majors. This course may be repeated for credit. (2 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.

**COM 315 | COMPOSITION | 1-4 quarter hours
(Undergraduate)**

Exploration of 20th and 21st century techniques through creative projects and possible analytical assignments. Projects are designed to lead to the completion of compositions for a variety of performance media, culminating in the senior composition project.

Status as a Composition student is a prerequisite for this class.

**COM 316 | COMPUTER ASSISTED COMPOSITION | 4 quarter hours
(Undergraduate)**

The purpose of this course is to offer composition majors an introduction to the use of computers in the implementation of generative and formal strategies for music composition.

Status as an Undergraduate Music student is a prerequisite for this class.

**COM 320 | ORCHESTRATION II | 4 quarter hours
(Undergraduate)**

A survey of orchestrational practices and techniques from the last 100 years. Assignments include analysis, notation, and orchestration.

Status as an undergraduate composition major and COM 300 are prerequisites for this class.

**COM 326 | ELECTRO-ACOUSTIC MUSIC I | 4 quarter hours
(Undergraduate)**

Introduction to the history and literature of electro-acoustic music. Introduction to electronic tools and techniques, including MIDI sequencing, timbral manipulation, and digital sampling.

Status as an Undergraduate Music student is a prerequisite for this class.

**COM 327 | INTERMEDIA COMPOSITION | 4 quarter hours
(Undergraduate)**

Introduction to digital video and multimedia composition and delivery. Further study in the history, literature, and analysis of electro-acoustic music.

COM 326 is a prerequisite for this class.

**COM 360 | TOPICS IN COMPOSITION | 2-4 quarter hours
(Undergraduate)**

An in-depth investigation of a topic in composition. (2 quarter hours)

Status as an undergraduate composition major is a prerequisite for this class.

**COM 398 | INDEPENDENT STUDY | 1-4 quarter hours
(Undergraduate)**

An in-depth study of a composition topic under the supervision of a faculty member. (Departmental permission required). (variable credit)

Status as an Undergraduate Music student is a prerequisite for this class.

**COM 399 | FINAL COMPOSITION PROJECT | 1 quarter hour
(Undergraduate)**

Completion of a final composition project for a large ensemble of six minutes or more. The specific ensemble is to be determined by the student and the composition department and work for this project will be a part of composition lessons throughout the student's senior year.

Status as an Undergraduate Music student is a prerequisite for this class.

**COM 405 | ANALYTICAL STUDIES | 4 quarter hours
(Graduate)**

The study and practice of specific analytical techniques as related to specific works from the common practice period through the present day.
Status as a Graduate Music Performance student (degree or certificate) is a prerequisite for this class.

**COM 415 | COMPOSITION | 1-4 quarter hours
(Graduate)**

The study of advanced compositional issues at the graduate level which will culminate in quarterly projects as well as a final composition project.
Status as a Graduate Composition student is a prerequisite for this class.

**COM 416 | COMPUTER ASSISTED COMPOSITION | 4 quarter hours
(Graduate)**

The purpose of this course is to offer composition majors an introduction to the use of computers in the implementation of generative and formal strategies for music composition.

Status as a Graduate Composition student is a prerequisite for this class.

**COM 420 | ORCHESTRATION II | 4 quarter hours
(Graduate)**

The study of significant notation, orchestration and instrumentation practices and techniques from the last 75 years. Course activities include consistent score analysis as well as demonstrations of extended instrumental techniques. Projects include orchestral transcriptions and the creation of short works for specific instrumental combinations.

Status as a Graduate Composition student is a prerequisite for this class.

**COM 421 | SEMINAR IN COMPOSITION | 2 quarter hours
(Graduate)**

(2 quarter hours)

Status as a Graduate Music Performance student (degree or certificate) is a prerequisite for this class.

**COM 444 | NOTATIONAL SEMINAR: NOTATION, COMPOSITION, & SOUND
STRUCTURES | 4 quarter hours
(Graduate)**

A study of some of the most relevant notational issues that have emerged in western music since WWII.

Status as a Graduate Music Performance student (degree or certificate) is a prerequisite for this class.

**COM 445 | TWENTIETH CENTURY MUSIC TOPICS | 4 quarter hours
(Graduate)**

A review of significant 20th century literature and techniques as partial preparation for the comprehensive exam.

Status as a Graduate Composition student is a prerequisite for this class.

**COM 446 | NEW MUSIC COMPOSITION SEMINAR | 4 quarter hours
(Graduate)**

Analysis of compositional and notation techniques as found in significant new works from the last twenty-three years for chamber ensembles or orchestral ensembles. Students will develop weekly presentations on specific works that will eventually be presented at the department's weekly meeting sessions and will also develop a minimum 10 page paper on one-two works.

Status as a Graduate Composition student is a prerequisite for this class.

COM 447 | NON-WESTERN SOUND AND CONCEPT IN CONTEMPORARY MUSIC | 4 quarter hours**(Graduate)**

This class will consist of two major elements: one is a survey of the non-western influences in question and the second is the application of non-western influences to actual composition. The final goal of the class is to produce a small scale composition, which demonstrates the application of non-western music ideas.

Status as a Graduate Composition student is a prerequisite for this class.

COM 448 | KINETIC AND KINESTHETIC APPROACH TO COMPOSITION AND ANALYSIS | 4 quarter hours**(Graduate)**

This course centers around an approach to music from a kinetic point of view; listening for kinetic processes and sonic cause and effect, examining how each musical gesture, by way of attack, timing, timbre, even the very act of playing that gesture, holds the potential and the impetus for the sounds to come. We will examine how that kinetic potential can be harnessed in composition, improvisation, and to further our analytical tools.

COM 460 | TOPICS IN COMPOSITION | 2-4 quarter hours**(Graduate)**

An in-depth investigation of a topic in composition. (2 quarter hours)

Status as a Graduate Composition student is a prerequisite for this class.

COM 498 | INDEPENDENT STUDY | 2-4 quarter hours**(Graduate)**

An in-depth study of a composition topic under the supervision of a faculty member. (Departmental permission required). (2 quarter hours)

Status as a Graduate Music Performance student (degree or certificate) is a prerequisite for this class.

Computer Graphics & Motion Technology (GPH)

GPH 205 | HISTORICAL FOUNDATIONS OF VISUAL TECHNOLOGY | 4 quarter hours**(Undergraduate)**

This course is a survey of the development, application and meaning of visual technologies in a wide range of world cultures from pre-history to the present. It traces the unique intersection of mathematics and physical culture that marks design science, as it has been realized in a variety of human societies. The course includes works of art that emphasize those mathematical and geometric elements that are antecedent to contemporary graphic technology.

GPH 211 | PERCEPTUAL PRINCIPLES FOR DIGITAL ENVIRONMENTS I | 4 quarter hours**(Undergraduate)**

An introduction to the visual, non-verbal principles incorporated in the effective presentation of on-screen environments. This course emphasizes the use of two-dimensional elements and their organization.

GPH 212 | PERCEPTUAL PRINCIPLES FOR DIGITAL ENVIRONMENTS II | 4 quarter hours**(Undergraduate)**

Further experience with the visual, non-verbal principles incorporated in effective presentation of on-screen environments. This course emphasizes the use of three-dimensional elements, spaces and their organization. PREREQUISITE(S): ART 105, GD 105, GPH 211 or HCI 402.

GPH 213 | PERCEPTUAL PRINCIPLES FOR DIGITAL ENVIRONMENTS III | 4 quarter hours**(Undergraduate)**

An introduction to the visual and communication principles for the structure and organization of time-based digital environments. Introduction to standard 2D animation software applications.

PREREQUISITE(S): GPH 211 or GD 105 or equivalent.

GPH 250 | DIGITAL MODELING I | 4 quarter hours**(Undergraduate)**

Introduction to 3D object modeling with an emphasis on visual applications and prototype design. Students will work with basic spatial operations in surface modeling and CAD interfaces and will produce an original object from pattern with computer-aided manufacture.

Prerequisite: GPH 212.

GPH 255 | HAND PROTOTYPING FOR GRAPHIC VISUALIZATION | 4 quarter hours**(Undergraduate)**

Paper prototyping techniques for pre-screen image design including form rendering, rapid visualization, descriptive geometry, and iconographic diagramming. Students will work from initial sketch versions through client presentation. PREREQUISITE(S): ART 106 and (GPH 211 or GD 105)

GPH 259 | DESIGN GEOMETRY | 4 quarter hours**(Undergraduate)**

An historical and practical introduction to the visual applications of geometry. This CAD-based survey covers constructive geometry, surface symmetry, projective geometry, polyhedrons and spheroids through the discussion of historical precedents and practicum exercises.

GPH 269 | GRAPHIC GEOMETRIES | 4 quarter hours**(Undergraduate)**

An historical and practical introduction to the visual applications of geometry. This CAD-based survey covers constructive geometry, surface symmetry, projective geometry, polyhedrons and spheroids through the discussion of historical precedents and practicum exercises.

Graduate standing is a prerequisite for this class.

GPH 279 | SCIENCE AND DESIGN OF SUNDIALS | 4 quarter hours**(Undergraduate)**

This course explores ancient and early modern understanding of the cosmos and how this was successfully modeled into the sundial. About half of the course lectures are historical, while others explain the astronomy, geography and geometry used to design the dial. During lab sessions students design and create their own sundials.

GPH 321 | COMPUTER GRAPHICS DEVELOPMENT I | 4 quarter hours**(Undergraduate)**

This course presents the fundamental mathematical foundations of graphics including an introduction to the basic geometric constructions of points, vectors, transformations, matrices and homogeneous coordinates. The course will explore applications of these mathematical techniques to rendering 3D scenes and lighting and shading surfaces in 3D. Advanced topics will include several key techniques from computational geometry such as the computation of object intersections and applications to rendering 3D scenes and object collisions. The focus of this course is on building the software from scratch rather than using a graphics application programming interface (API) so that students will gain a deeper understanding of the techniques they will be using in later courses through an API such as OpenGL or Direct3D. PREREQUISITE(S): CSC 300 or CSC 383 or CSC 393.

CSC 300 or CSC 383 or CSC 393 is a prerequisite for this class.

**GPH 325 | SURVEY OF COMPUTER GRAPHICS | 4 quarter hours
(Undergraduate)**

(Formerly GPH 371) A survey of basic 3D techniques, including interaction of light and color. The relationship between visual effect and geometry. Visual effects of rendering, texturing and lighting algorithms. Procedurally based modeling and an introduction to procedural animation techniques. PREREQUISITE(S): CSC 212 or ISM 330.

**GPH 329 | COMPUTER GRAPHICS DEVELOPMENT II | 4 quarter hours
(Undergraduate)**

Basic graphics architecture. Coordinate systems. Three-dimensional representations and transformations. Simple visible-surface algorithms. Introduction to illumination. Gouraud and Phong shading. Antialiasing. Texture mapping and elements of animation. Students create a graphics package using a high-level graphics API such as OpenGL. PREREQUISITE(S): CSC 361 and (GAM 325 or GPH 321)

CSC 361 and (GAM 325 or GPH 321) are prerequisites for this class.

**GPH 336 | SMOOTH SURFACE MODELING FOR GRAPHICS AND ANIMATION | 4 quarter hours
(Undergraduate)**

Parametric curves and surfaces. Continuity of curves and surfaces. Hermite, Bezier, B, and Catmull-Rom splines. Integer, adaptive and interactive generation of curves and surfaces. Surface subdivision. Quadric surfaces. Surface use in animations. PREREQUISITE(S): GPH 329 or GAM 370.

GPH 329 or GAM 370 is a prerequisite for this class.

**GPH 338 | SURVEY OF 3-D ANIMATION | 4 quarter hours
(Undergraduate)**

(Formerly titled Computer Animation Survey). Use of a commercially-based animation package for the purpose of communicating a narrative or visual information. Animation of transformations, deformations, cameras, and lights. Forward / inverse kinematics for character rigging. Prerequisites: ANI 201 and either GPH 325 or GPH 250.

**GPH 339 | ADVANCED RENDERING TECHNIQUES | 4 quarter hours
(Undergraduate)**

An introduction to shading techniques for highly realistic computer generated imagery. Texturing basics. Design, acquisition and application of layered textures to produce realistic dirt and aged surfaces. Turntables. Basic illumination and reflectance models. Elements of procedural texturing for organic surface materials such as wood and marble. The course includes an introduction to an industry standard shading language that is a powerful prototyping tool for both offline and real-time rendering environments. Students work in teams to produce convincingly organic environments. PREREQUISITE(S): GPH 325 or GPH 321 or (ANI 339 and GPH 355)

**GPH 340 | PROCEDURAL SHADING | 4 quarter hours
(Undergraduate)**

Procedural pattern generation, creating patterns such as marble and wood with noise, moving beyond the Phong Illumination model. Gaussian distributions and the Ward anisotropic model, BRDFs. Non-photorealistic rendering techniques such as "toon" shading and painterly techniques. PREREQUISITE(S): GPH 339.

**GPH 341 | ADVANCED LIGHTING TECHNIQUES | 4 quarter hours
(Undergraduate)**

Simple local models such as Phong, extensions to Phong (HDRI), ray-traced lighting and shadows, soft shadow generation using shadow maps, radiosity for producing ambient lighting and photon mapping for calculating realistic refracted light. Theory, lighting features supported, efficiency, and practical considerations for choosing the model in production. PREREQUISITE(S): GPH 339.

**GPH 345 | DIGITAL SURFACE MODELING | 4 quarter hours
(Undergraduate)**

This course is an upper level exploration of digital modeling in NURBS environments. Students will learn to creatively apply analytic methods of form production and scenic presentation suitable for application to design and engineering, medical and forensic visualization, and testing. In general this course will prepare students for 3-D graphic applications outside of the entertainment industry while rounding out their modeling skills for that industry, too. PREREQUISITE(S): GPH 212 or GPH 259 or ANI 230.

**GPH 346 | SMOOTH SURFACE MODELING FOR GRAPHICS AND ANIMATION | 4 quarter hours
(Undergraduate)**

(Formerly CSC 346; Cross-listed with CSC 536) Parametric curves and surfaces. Continuity of curves and surfaces. Hermite, Bezier, B, and Catmull-Rom splines. Integer, adaptive and interactive generation of curves and surfaces. Surface subdivision. Quadric surfaces. Surface use in animations. PREREQUISITE(S): GPH 329 or GAM 370.

GPH 329 or GAM 370 is a prerequisite for this class.

**GPH 348 | RIGGING FOR ANIMATION | 4 quarter hours
(Undergraduate)**

Readying 3D characters and other models for animation. Skeleton chains, joint orientations, and degrees of freedom. IK solvers, including single chains, rotation and splines. Methods for computing weights for skinning body and face, including semi-automated approaches. Considerations for mechanical objects, animals and low-polygon models. PREREQUISITE(S): GPH 338 or ANI 201.

**GPH 350 | DIGITAL MODELING II | 4 quarter hours
(Undergraduate)**

Advanced experience in object modeling and prototype design. Students will work with more sophisticated form relationships, reverse engineering and textures, and will produce an original object from slicing with computer-aided manufacture. PREREQUISITE(S): GPH 250.

**GPH 355 | 3D SCRIPTING FOR ANIMATORS | 4 quarter hours
(Undergraduate)**

This is an introductory course in scripting for a 3D production environment. Students will learn and apply basic programming concepts in order to improve the productivity of animators and modelers. Using script, we will automate repetitive tasks, customize the interface, and create new tools. Students will gain a fundamental understanding of how a 3D animation package functions behind the interface. Prerequisites: ANI 230 or GPH 338.

**GPH 358 | COMPUTER GRAPHICS AUTOMATION | 4 quarter hours
(Undergraduate)**

Covers the use of scripting and other automation techniques to generate computer graphics and animation. Emphasis on the benefits and differences of scripting languages compared to conventional graphics programming. Using commercially available scripting environments, students will generate rich, interesting graphics and animations that would not be possible with the conventional user interface. PREREQUISITE(S): ISM 330 or CSC 212 or GPH 355 or CSC 242.

**GPH 360 | MODELING SPACES | 4 quarter hours
(Undergraduate)**

The digital design and modeling of environmental spaces with attention to human use parameters. PREREQUISITE(S): GPH 250.

GPH 372 | PRINCIPLES OF COMPUTER ANIMATION | 4 quarter hours (Undergraduate)

(Formerly CSC 372) This course will cover a range of topics in introductory 3D Computer Animation. Topics covered will include key framing, interpolation, hierarchies, inverse kinematics, particle systems, and the basics of physically based simulation and modeling. PREREQUISITE(S): GPH329 or GAM 370.

GPH 329 or GAM 370 is a prerequisite for this class.

GPH 375 | ADVANCED GRAPHICS DEVELOPMENT | 4 quarter hours (Undergraduate)

(Formerly CSC 375) Survey of standards and current modular technology for 2D and 3D graphics software development. Use of software development toolkits to create "plug-ins" and other modularly organized functionality enhancements for selected commercially available graphics packages. PREREQUISITE(S): GPH 329 or permission of instructor.

GPH 380 | VISUALIZATION | 4 quarter hours (Undergraduate)

An in depth introduction to a wide range of visualization techniques focusing on medical and scientific applications. Introduction to programming using a visualization package, use of color for feature extraction and enhancement, false color mapping techniques, reconstruction techniques, iso surface generation, stream lines and ribbons, spatial set operations and projections of higher-dimensional data sets. Prerequisite(s): GPH 325.

GPH 387 | FORENSIC ANIMATION | 4 quarter hours (Undergraduate)

Techniques and issues in forensic animation. Application of modeling and rendering to the recreation of time-based events for legal purposes. Survey of research and interview techniques. Demonstrative recreation and physically-based recreation. Issues of accuracy, verification, certification and ethics. Students research and recreate an event with forensic value. Possible project areas include motor vehicle incidents, aviation events, product liability, medicine, and trademark infringement. Prerequisites: GPH 338 or ANI 231.

GPH 388 | PRODUCTION PIPELINE TECHNIQUES | 4 quarter hours (Undergraduate)

An essential aspect of CGI is the skill to effectively manage data for an entire show, and to know how to monitor renders and image processes with the end result of assembling the finished animation. Students taking this course will gain hands-on experience in render queue management, automated file/image processing and manipulation, disk resource management, data archiving, conversion of outside vendor media and scripting tools to automatic common tasks and improve workflow. Students will work in teams to complete large-scale asset management and rendering projects. Prerequisites: CSC 212 or CSC 262.

GPH 389 | REAL-TIME GRAPHICS TECHNIQUES | 4 quarter hours (Undergraduate)

This course will cover the basic algorithms and techniques used in today's real-time graphics systems. Topics will include the following: an introduction to computational geometry including computation with polygonal meshes. Alternate scene representations for efficient geometry culling, including BSP trees and oct-trees. Bounding volume hierarchies, box-trees and R-trees, and application to geometry culling. Programmable graphics hardware and its applications to geometric deformations and surface rendering. PREREQUISITE(S): GPH 329 or GAM 370.

GPH 329 or GAM 370 is a prerequisite for this class.

GPH 390 | TOPICS IN GRAPHICS | 4 quarter hours (Undergraduate)

Description: May be repeated for credit. PREREQUISITE(S): Permission of Instructor.

GPH 395 | COMPUTER GRAPHICS SENIOR PROJECT | 4 quarter hours (Undergraduate)

A group project involving analysis, design, creation, implementation and testing of a large project such as an animation, an interactive multimedia presentation or a video game. Portfolio creation and critique. Discussion of strategies for graduate school and the job market. PREREQUISITE(S): GPH 338 or GPH 372.

GPH 399 | INDEPENDENT STUDY | 1-8 quarter hours (Undergraduate)

Variable credit. PREREQUISITE(S): Consent of dean.

GPH 425 | SURVEY OF COMPUTER GRAPHICS | 4 quarter hours (Graduate)

Expression of visual intent through geometry and procedure. A survey of basic 3D techniques, including interaction of light and color. Visual effects of rendering, texturing, and lighting algorithms. Procedural modeling techniques and an introduction to procedurally-based texturing and animation. PREREQUISITE(S): CSC 212.

GPH 436 | FUNDAMENTALS OF COMPUTER GRAPHICS | 4 quarter hours (Graduate)

An accelerated introduction to the graphics development environments and to graphical programming. Provides an in depth discussion of the basic mathematical language of computer graphics: vectors, transformations, homogeneous coordinates and their associated data structures. Advanced topics will include sampling theory and interpolation. Also provides a basic introduction to industry standards in graphics development, including specifying transformations and viewing parameters. PREREQUISITE(S): CSC 393 and MAT 150.

CSC 393 and MAT 150 are prerequisites for this class.

GPH 438 | COMPUTER ANIMATION SURVEY | 4 quarter hours (Graduate)

Survey of methods used in computer animation. This course uses commercially available software packages to teach techniques for animation and digital video production. The techniques covered include storyboarding, key frame animation, audio and video editing. PREREQUISITE(S): GPH 425 or GPH 469.

GPH 425 (or GPH 469) is a prerequisite for this class.

GPH 448 | COMPUTER GRAPHICS SCRIPTING | 4 quarter hours (Graduate)

Covers the use of scripting to generate computer graphics and animation. Emphasis on the benefits and differences of scripting languages compared to conventional graphics programming. Using commercially available scripting environments, students will generate complex graphics and animations that would not be possible with the conventional user interface. PREREQUISITE(S): GPH 438.

GPH 450 | DIGITAL MODELING I | 4 quarter hours (Graduate)

Introduction to 3D object modeling with an emphasis on visual applications and prototype design. Students will work with basic spatial operations in surface modeling and CAD interfaces and will produce an original object from pattern with computer-aided manufacture. PREREQUISITE(S): HCI 470.

GPH 469 | COMPUTER GRAPHICS DEVELOPMENT | 4 quarter hours (Graduate)

Basic graphics architecture. Coordinate systems. Three-dimensional representations and transformations. Simple visible-surface algorithms. Introduction to illumination. Gouraud and Phong shading. Antialiasing. Texture mapping and elements of animation. Students create a graphics package using a high-level graphics API such as OpenGL. PREREQUISITE(S): CSC 461 and (GAM 425 or GPH 436)

CSC 461 and (GAM 425 or GPH 436) are prerequisites for this class.

GPH 487 | FORENSIC ANIMATION | 4 quarter hours (Graduate)

Techniques and issues in forensic animation. Application of modeling and rendering to the recreation of time-based events for legal purposes. Survey of research and interview techniques. Demonstrative recreation and physically-based recreation. Issues of accuracy, verification, certification and ethics. Students research and recreate an event with forensic value. Possible project areas include motor vehicle incidents, aviation events, product liability, medicine, and trademark infringement.

GPH 536 | SMOOTH SURFACE MODELING FOR GRAPHICS AND ANIMATION | 4 quarter hours (Graduate)

Parametric curves and surfaces. Continuity of curves and surfaces. Hermite, Bezier, B, and Catmull-Rom splines. Integer, adaptive and interactive generation of curves and surfaces. Surface subdivision. Quadric surfaces. Surface use in animations. PREREQUISITE(S): GPH 469 or GAM 470.

GPH 469 or GAM 470 is a prerequisite for this class.

GPH 538 | RIGGING FOR ANIMATION | 4 quarter hours (Graduate)

Readying 3D characters and other models for animation. Skeleton chains, joint orientations, and degrees of freedom. IK solvers, including single chains, rotation and splines. Methods for computing weights for skinning body and face, including semi-automated approaches. Considerations for mechanical objects, animals and low-polygon models. PREREQUISITE(S): GPH 438.

GPH 539 | ADVANCED RENDERING TECHNIQUES | 4 quarter hours (Graduate)

An in-depth examination of texturing techniques for highly realistic computer generated imagery. Design and implementation of layered textures to produce realistic dirt and aged surfaces. Cost analysis of advanced illumination and reflectance models, including environment and shadow mapping, and ambient occlusion. Procedural texturing including pattern generation and the application of noise to produce organic surfaces. Shader development using an industry standard. Prototyping for both offline and real-time rendering environments. Students work in teams to produce convincingly organic environments. PREREQUISITE(S): GPH 425 or GPH 436 or (ANI 439 and GPH 355)

GPH 540 | PROCEDURAL SHADING | 4 quarter hours (Graduate)

Procedural pattern generation, creating patterns such as marble and wood with noise, Moving beyond the Phong Illumination model: Gaussian distributions and the Ward anisotropic model, BRDFs. Non-photorealistic rendering techniques such as "toon" shading and painterly techniques. PREREQUISITE(S): GPH 539.

GPH 541 | ADVANCED LIGHTING TECHNIQUES | 4 quarter hours (Graduate)

Simple local models such as Phong, extensions to Phong (HDRI), ray-traced lighting and shadows, soft shadow generation using shadow maps, radiosity for producing ambient lighting and photon mapping for calculating realistic refracted light. Theory, lighting features supported, efficiency, and practical considerations for choosing the model in production. PREREQUISITE(S): GPH 539.

GPH 560 | MODELING SPACES | 4 quarter hours (Graduate)

The digital design and modeling of environmental spaces with attention to human use parameters. PREREQUISITE(S): any GPH 400-level course or consent of instructor.

GPH 565 | DESIGNING FOR VISUALIZATION | 4 quarter hours (Graduate)

Sources of graphical integrity and sophistication. Data-Ink maximization. Data density. The use of color to enhance features in data sets and the communication of information. Effective use of space and time. Use of 3D techniques to display multi-dimensional data. The use of isosurfaces and volumetric techniques to display features of data sets. Students will use a programmable system to produce their visualizations and will learn how to use procedural techniques to express graphical intent. (Only one of GPH 570 and GPH 565 may be taken for credit) Prerequisite(s): GPH 448 and HCI 470.

GPH 570 | VISUALIZATION | 4 quarter hours (Graduate)

(Formerly CSC 570) Reconstruction techniques. Voxel classification and isosurface generation. Spatial set operations. Projections of higher-dimensional data sets. Data feature enhancement. False color mapping. Survey of applications in science, engineering and medicine. PREREQUISITE(S): GPH 469 or GAM 470.

GPH 469 or GAM 470 is a prerequisite for this class.

GPH 572 | PRINCIPLES OF COMPUTER ANIMATION | 4 quarter hours (Graduate)

(Formerly CSC 572) This course will cover a range of topics in introductory 3D Computer Animation. Topics covered will include key framing, interpolation, hierarchies, inverse kinematics, particle systems, and the basics of physically based simulation and modeling. PREREQUISITE(S): GPH 469.

GPH 575 | ADVANCED GRAPHICS DEVELOPMENT | 4 quarter hours (Graduate)

Survey of standards and current modular technology for 2D and 3D graphics software development. Use of software development toolkits to create "plug-ins" and other modularly organized functionality enhancements for selected commercially available graphics packages. PREREQUISITE(S): GPH 448 and (GPH 469 or GAM 470)

GPH 448 and (GPH 469 or GAM 470) are prerequisites for this class.

GPH 580 | HARDWARE SHADING TECHNIQUES | 4 quarter hours (Graduate)

This class explores the current trends in programmable computer graphics hardware. Modern graphics processing units (GPU's) are becoming increasingly powerful and fully programmable parallel processing units. They make extremely sophisticated effects in computer graphics, such as shadows, displacement maps, skinning, motion blur, reflections and refractions, possible in real-time scenes. In addition these increasingly general programmable units are being used for far more general computing problems from traditional searching and sorting algorithms to computational problems in physics such as the diffusion equation and fluid flow. In this course we will explore the applications of hardware shading to computer graphics, including advanced lighting, shading and surface effects. As time allows, we will explore other applications such as physics and computer science. Prerequisites: GPH 469 or GAM 470.

GPH 469 or GAM 470 is a prerequisite for this class.

GPH 595 | TOPICS IN GRAPHICS | 4 quarter hours (Graduate)

May be repeated for credit. PREREQUISITE(S): Permission of instructor.

Computer Science (CSC)

CSC 200 | SURVEY OF COMPUTING | 4 quarter hours (Undergraduate)

This introductory course explores various careers in the field of information technology. A hands-on component will deal with state of the art personal computer operating systems, applications, database systems, Internet, email, and basic website construction. The structure of the course utilizes both classroom lectures and computer classroom labs. This course is geared toward the non-major and assumes no prior knowledge or experience in Computer Science.

CSC 208 | ETHICS IN TECHNOLOGY | 4 quarter hours (Undergraduate)

Information Technology and the rapid pace in which it has advanced have had a tremendous impact on our lives. Changes have been swift and the human capacity to deal with them is limited. It has been said that our technology has outpaced our humanity. This course will research the new responsibilities technology presents and our ability to deal with these changes in an ethical manner. Students will employ ethical frameworks, which integrate computer science and ethics, to develop the skills required to examine different sets of assumptions and question them. Case studies will provide a historical perspective for analysis.

CSC 211 | PROGRAMMING IN JAVA I | 4 quarter hours (Undergraduate)

Introduction to programming in Java and problem solving. Variables, data types, input/output, using objects and methods from the standard classes (such as String and Scanner), control structures, writing methods, arrays. Solving problems with algorithms and implementing algorithms in Java. (Not for CS majors)

CSC 212 | PROGRAMMING IN JAVA II | 4 quarter hours (Undergraduate)

Intermediate programming in Java and problem solving. Writing Java programs with multiple classes: constructors, visibility modifiers, static members, accessor and mutator methods, and arrays of objects. Inheritance, polymorphism, and interfaces. Sorting arrays of primitive data and arrays of objects. Exception handling. (Not for CS majors)

CSC 211 is a prerequisite for this class.

CSC 221 | FOUNDATIONS OF COMPUTER SCIENCE | 4 quarter hours (Undergraduate)

This course introduces students to the foundations of computer science. Students will learn how to use mathematical data types to model problems in computer science, apply mathematical and computational tools to analyze and solve the problems, and use formal reasoning techniques to verify and analyze the solutions. Topics covered in this course include numbers, strings, functions, sets, graphs, relations, propositional logic, and combinatorics.

MAT 130 or above or equivalent or Mathematics Diagnostic test placement into MAT 140 is the prerequisite for this class.

CSC 222 | FOUNDATIONS OF COMPUTER SCIENCE II | 4 quarter hours (Undergraduate)

This course is the second in a two-course sequence introducing students to the foundations of computer science. Students will learn how to use mathematical data types to model problems in computer science, apply mathematical and computational tools to analyze and solve the problems, and use formal reasoning techniques to verify and analyze the solutions. Topics covered include algebraic structures, graphs, state machines, linear algebra, formal reasoning principles, first-order logic, combinatorics, and probability.

CSC 221 and CSC 241 are prerequisites for this class.

CSC 223 | THE IMPACT OF COMPUTING TECHNOLOGY ON OUR LIVES | 4 quarter hours (Undergraduate)

This course will introduce students to an overview of social analysis techniques and the theories of social change. These tools will be used to explore social impact issues of computing technology. Counts for Liberal Studies SCBI credit.

CSC 233 | CODES AND CIPHERS | 4 quarter hours (Undergraduate)

This course is an introduction to the science and history of secret writing (cryptography) and how codes and ciphers can be broken (cryptanalysis). In historical settings we will encounter the main ideas and methods devised to secure communication channels. Possible topics include: substitution ciphers, transposition ciphers, the Vigenere cipher, statistical methods in cryptanalysis, public-key cryptography, and quantum cryptography.

MAT 120 (or MAT 130 or CSC 241 or CSC 243) is a prerequisite for this class.

CSC 235 | PROBLEM SOLVING | 4 quarter hours (Undergraduate)

How do you solve a problem? In this course we discuss different problem solving techniques and strategies such as modeling, establishing subgoals, and searching and pruning. The techniques will be presented as part of a theoretical framework, but there will be significant emphasis on solving problems in familiar domains such as games, newspaper articles, philosophy, and simple geometry and logic. At the end of the course, students will have built a repertoire of problem solving tools that will allow them to make an informed choice of approach towards new problems.

CSC 241 | INTRODUCTION TO COMPUTER SCIENCE I | 4 quarter hours (Undergraduate)

An introduction to problem solving, algorithms and structured programming using a higher-level programming language. The course will focus on skills for developing algorithms, and for writing and debugging programs. Students will learn how and when to use loops, conditionals, and functional abstractions in the context of problems motivated by real world applications.

MAT 130 or above or equivalent or Mathematics Diagnostic test placement into MAT 140 is the prerequisite for this class.

CSC 242 | INTRODUCTION TO COMPUTER SCIENCE II | 4 quarter hours (Undergraduate)

An intermediate course in problem solving, algorithms and programming. Programming skills are further strengthened through more complex and larger programming assignments. The assignments will also be used to introduce different Computer Science areas (e.g. a Client/Server application for the Distributed Systems area). Classes and object oriented programming are motivated and introduced.

CSC 241 is the prerequisite for this class.

CSC 243 | INTRODUCTION TO COMPUTER SCIENCE FOR PROGRAMMERS | 4 quarter hours (Undergraduate)

An accelerated course covering the essentials of programming, with a focus on problem-solving, structured programming, and algorithm design. The concepts covered include collection types, conditional and iterative structures, functions, file input/output, exceptions, namespaces, recursion, and Internet client programming. Students are expected to have successfully completed at least one high-level, object-oriented programming class prior to enrollment.

MAT 130 or above or equivalent or Mathematics Diagnostic test placement into MAT 140 is the prerequisite for this class.

CSC 250 | COMPUTERS AND HUMAN INTELLIGENCE | 4 quarter hours (Undergraduate)

Students taking this course will study human problem-solving and its simulation by computers. Artificial intelligence, pattern recognition and learning programs will be discussed. PREREQUISITE(S): Familiarity with basic computer productivity tools and the Web.

CSC 270 | FROM FIREFLIES TO FACEBOOK: THE SCIENCE OF NETWORKS | 4 quarter hours (Undergraduate)

This course explores complex systems both natural and man-made, characterized by the relationships between interacting entities. Network structures can be found in the Internet and its many applications, but also in social relationships, marketplaces, ecosystems, even cells. We will examine a wide range of networks including technological, social, and natural. Students will learn basic concepts from graph theory, algorithms and network analysis, apply tools for extracting, analyzing and visualizing network properties, using data sets drawn from a variety of areas.

MAT 120 is a prerequisite for this class.

CSC 281 | WORKSHOP: JAVA FOR PROGRAMMERS | 2-2.25 quarter hours (Undergraduate)

This course introduces students to the Java programming language and eclipse development environment.

CSC 241 or CSC 243 is a prerequisite for this class.

CSC 282 | WORKSHOP: LINUX FOR PROGRAMMERS | 2-2.25 quarter hours (Undergraduate)

This course provides an introduction to Linux, the command-line environment, C programming, and version control.

CSC 241 or CSC 243 is a prerequisite for this class.

CSC 298 | INTERNSHIP | 4 quarter hours (Undergraduate)

This course satisfies the junior year experiential learning requirement. In cooperation with local employers, this course offers students the opportunity to integrate their academic experience with on-the-job training in computer related work areas. Admission to the program requires consent of internship course instructor. Current work experience plus classroom time is required. Supervisor evaluation will contribute to the final grade.

CSC 299 | SOPHOMORE LAB IN APPLIED COMPUTING | 4 quarter hours (Undergraduate)

In this course, students investigate a particular application of computing. Students learn tools, methodologies, and formalisms used in a particular computing area, and apply them to develop working systems. Courses stress student initiative in investigating the application context, learning new tools (including languages and APIs), studying algorithms and code examples, and working on projects. Topics will vary by the faculty member's interest and perspective.

CSC 242 or CSC 243 is the prerequisite for this class.

CSC 300 | DATA STRUCTURES I | 4 quarter hours (Undergraduate)

This is the first course in a two-course sequence on data structures using Java. The course introduces basic Java programming, reviews recursion, introduces asymptotic notations, and focuses mainly on linear data structures including arrays, linked lists and their variants, stacks and queues, and data structures supporting disjoint-set operations. The implementation of the basic operations on each data structure are discussed and analyzed in terms of their efficiency. The applications covered highlight and exploit the unique characteristics of the data structures, and emphasize problem solving and recursive thinking.

CSC 242 or CSC 243 is the prerequisite for this class.

CSC 301 | DATA STRUCTURES II | 4 quarter hours (Undergraduate)

This is the second course in a two-course sequence on data structures using Java. The course focuses mainly on the following data structures, their analysis, and their applications: trees (search trees, balanced search trees), heaps, associative arrays, hash tables, and data structures for representing graphs. The implementation of the basic operations on each data structure are discussed and analyzed in terms of their efficiency. The applications discussed highlight and exploit the unique characteristics of the different data structures, and emphasize problem solving and recursive thinking.

CSC 300 and MAT 140 are prerequisites for this class.

CSC 308 | FRAMEWORKS FOR WEB APPLICATION DEVELOPMENT | 4 quarter hours (Undergraduate)

This course introduces concepts, techniques, technologies and APIs for web application development. The main focus of the course is on the Model-View-Controller design pattern employed by modern full-stack web frameworks. Concepts and techniques covered include client/server programming, database abstraction APIs, and asynchronous JavaScript. Examples of full-stack MVC frameworks include Ruby-on-Rails (written in Ruby), Django and TurboGears (written in Python).

CSC 374 is a prerequisite for this class.

**CSC 309 | C++ FOR PROGRAMMERS | 4 quarter hours
(Undergraduate)**

This course covers the essentials of C and C++ programming, focusing primarily on the topics of memory management and object-oriented programming. Topics include pointers and dynamic allocation, operator overloading, copy constructors and destructors, inheritance and polymorphism.

(CSC 242 or CSC 243) or proficiency in another programming language is a prerequisite for this class.

**CSC 321 | DESIGN AND ANALYSIS OF ALGORITHMS | 4 quarter hours
(Undergraduate)**

Techniques for designing algorithms including: analyzing algorithms (big-O, recurrence relations) and divide-and-conquer (quicksort, mergesort). Additional topics chosen from: the greedy method, dynamic programming, backtracking, branch-and-bound and string matching.

CSC 301 and MAT140 are prerequisites for this class. MAT141 Recommended.

**CSC 325 | TIME SERIES ANALYSIS AND FORECASTING | 4 quarter hours
(Undergraduate)**

The course introduces students to statistical models for time series analysis and forecasting. The course topics include: autocorrelated data analysis, Box-Jenkins models (autoregressive, moving average, and autoregressive moving average models), analysis of seasonality, volatility models (GARCH-type, GARCH-M type, etc.), forecasting evaluation and diagnostics checking. The course will emphasize applications to financial data, volatility modeling and risk management. Real examples will be used throughout the course. PREREQUISITE(S): (CSC 212 or CSC 224 or CSC 262 or CSC 309) and (CSC324 or MAT356) or consent of instructor.

**CSC 327 | PROBLEM SOLVING FOR CONTESTS | 2-2.25 quarter hours
(Undergraduate)**

This course prepares students to compete in programming contests. More broadly, it covers problem solving techniques in an informal, fun, and hands-on setting. This course will improve your analytical and programming skills and is thus recommended for all students and not just the competitors among us. This course can be taken for credit twice.
CSC 301 is a prerequisite for this class.

**CSC 331 | SCIENTIFIC COMPUTING | 4 quarter hours
(Undergraduate)**

This course presents fundamental numerical algorithms for solving problems in scientific computing and computational finance. Areas covered include: error analysis, computer arithmetic, linear algebra, optimization problems, numerical integration (solvers), ordinary differential equations (ODE). The emphasis of the course is on the design of the algorithms, and their analysis. Algorithms will be implemented using mathematical software.

((CSC 242 or CSC 243) and MAT 152) or by permission of instructor

**CSC 333 | CRYPTOLOGY | 4 quarter hours
(Undergraduate)**

Introduction to the methods of cryptography and cryptanalysis. Topics include classical cryptography (codes, substitution ciphers, transposition ciphers), block and stream ciphers (Feistel networks, DES), and public key cryptography (RSA, Key agreement, signature schemes). Optional topics include zero-knowledge protocols, quantum cryptography, and history.

(CSC 300 or IT 313) and MAT 140 are prerequisites for this class.

**CSC 343 | INTRODUCTION TO OPERATING SYSTEMS | 4 quarter hours
(Undergraduate)**

An advanced course on operating system design and implementation. Process management and scheduling, memory management, file systems, device drivers, access control, and virtualization will be covered. The emphasis of the course will be on implementing components of a functional operating system.

CSC 301 and CSC 373 and CSC 374 are prerequisites for this class.

**CSC 344 | AUTOMATA THEORY AND FORMAL GRAMMARS | 4 quarter hours
(Undergraduate)**

An introduction to the most important abstract models of computation and their applications: finite state machines and pushdown automata.

Explores the relationship between regular expressions and formal grammars and automata. PREREQUISITE(S): CSC 301 and MAT 141.

CSC 301 and MAT 141 are prerequisites for this class.

**CSC 347 | CONCEPTS OF PROGRAMMING LANGUAGES | 4 quarter hours
(Undergraduate)**

This course examines concepts and programming paradigms that are found in multiple programming languages. Topics include but are not limited to functional programming, type systems, and runtime systems.

CSC 301 and CSC 373 are prerequisites for this class.

**CSC 348 | INTRODUCTION TO COMPILER DESIGN | 4 quarter hours
(Undergraduate)**

An overview of the design of a compiler for a general purpose programming language; tools for designing the components of the compiler; implementing the compiler; run time environments.

CSC 301 and CSC 373 and CSC 347 are prerequisites for this class.

**CSC 352 | DATABASE PROGRAMMING | 4 quarter hours
(Undergraduate)**

Programming in a large-scale relational database environment using procedural languages. Topics covered in the course include: procedural extension of query languages, runtime error handling, subprograms (procedures and functions), packages, database triggers, dynamic query language. Optional topics include transaction management, reliability, and security.

(IT 240 or CSC 355) and (CSC 212 or CSC 242 or CSC 243 or CSC 300 or CSC 309) are prerequisites for this class.

**CSC 353 | ADVANCED DATABASE CONCEPTS | 4 quarter hours
(Undergraduate)**

An introduction to advanced selected topics in databases. Possible topics include: object-oriented databases, distributed databases, intelligent and deductive databases, temporal databases, multimedia databases, spatial and geographic databases, fuzzy databases, mobile databases, data mining and data warehousing, as well as emerging issues and concepts in database design, implementation and management.

IT 240 is a prerequisite for this class.

**CSC 355 | DATABASE SYSTEMS | 4 quarter hours
(Undergraduate)**

An introduction to modern database systems; the course covers the traditional concepts and techniques of database systems including the relational model, SQL, indexes and normalization as well as a selection of advanced topics such as constraints and triggers, transactions, database programming, semi-structured data, and recursive SQL.

CSC 301 is a prerequisite for this class.

**CSC 357 | EXPERT SYSTEMS | 4 quarter hours
(Undergraduate)**

A study of the development of expert systems. Students will use commercial packages to develop standalone and embedded expert systems. Topics will include rule-based systems, decision trees, forward and backward chaining, inference, reasoning with uncertainty, and intelligent agents.

CSC 301 is a prerequisite for this class.

**CSC 358 | SYMBOLIC PROGRAMMING | 4 quarter hours
(Undergraduate)**

Concepts of symbolic programming as embodied in the language LISP. Basic data and control structures of LISP. Symbolic expressions, the interpreter, functions, recursion, iteration. Techniques for prototyping and building conceptually advanced systems in an environment that encourages procedural and data abstraction. Advanced topics may include Prolog, intelligent tutoring systems, intelligent agents, and natural language processing. Assignments will focus on basic AI techniques, but the class is intended for anyone who will need to rapidly develop large complex systems.

CSC 301 is a prerequisite for this class.

**CSC 360 | WEB APPLICATIONS | 4 quarter hours
(Undergraduate)**

This course covers the design and development of single-page web applications and their interaction with web services. Possible topics include: HTML; JavaScript/TypeScript; RxJS; Frameworks such as Angular and/or React; Node.js; programming and security models for browsers; client-side web applications with local storage; HTTP, proxies, and caching.

CSC 347 and CSC 376 are prerequisites for this course.

**CSC 361 | OPTIMIZED C++ | 4 quarter hours
(Undergraduate)**

Implementation techniques to improve the performance and resource usage of C++ programs. This class will provide low level understanding of C++'s internal behavior that can be exploited to create faster performing software. Identify existing SISD (single instruction single data) implementation and refactor into SIMD (single instruction multiple data) to improve math centric software segments. Understand a system's dynamic memory usage to design and implement a custom high performance memory system. Topics include: performance enhancements through extended SIMD instruction set, dynamic memory usage, caching, implicit behavior, C++ language extensions, algorithms, streaming and profiling.

CSC 301 and CSC 373 are prerequisites for this class.

**CSC 362 | OPTIMIZED C++ MULTITHREADING | 4 quarter hours
(Undergraduate)**

Applied C++ concurrency and multithreading fundamentals. Basic threading concepts: process model, threads, stacks, fibers, mutexes, semaphores, atomics, and events. Understanding synchronous/asynchronous interactions and behavior of threads. Using managed thread pools and queues in applications. Understanding advanced C++ language features relating to the memory model and the threading support.

CSC 361 and (SE 350 or GAM 372) are prerequisites for this class.

**CSC 363 | THEORY AND PRACTICE OF SAFE SYSTEMS PROGRAMMING | 4 quarter hours
(Undergraduate)**

Modern developments in programming languages, toolchains, and package management reduce the risk of security vulnerabilities from programming errors and supply chain attacks. This course covers the theory and practice of ownership type systems, their application in systems programming, and discussion of the vulnerabilities they mitigate. Approaches to software integrity and distributed code review are investigated in the context of package management and supply chain attacks. Coursework includes development of a large systems program in a language with ownership types such as Rust.

CSC 347 is a prerequisite for this class.

**CSC 364 | VIRTUALIZATION AND CLOUD COMPUTING | 4 quarter hours
(Undergraduate)**

This course will cover underlying technologies that enable major cloud computing providers to deliver computing resources to consumers on-demand over the Internet, focusing primarily on virtualization and containers. Topics to be covered will include many aspects of the design and implementation of hypervisors and containers, ranging from isolation, namespaces, cgroups stackable file systems, copy-on-write, and scheduling of containers. Coursework includes development of a container project applying concepts learned in class and involves systems programming.

CSC 376 or CSC 361 is a prerequisites for this course.

**CSC 371 | MOBILE APPLICATION DEVELOPMENT FOR IOS | 4 quarter hours
(Undergraduate)**

This course introduces the core issues associated with application development for mobile devices using the iOS platform. Students will learn the Swift language, the XCode IDE, UIKit and other frameworks, the elements and architecture of the user interfaces, and more. Students will be exposed to the iOS system architecture including memory management, MVC, delegates and threads. Topics will also include understanding and handling of multi-touch events, gestures, and motion events. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 374.

CSC 301 and CSC 374 are prerequisites for this class.

**CSC 372 | MOBILE APPLICATION DEVELOPMENT FOR ANDROID | 4 quarter hours
(Undergraduate)**

This course introduces the core issues associated with application development for mobile devices using the Android platform. Students will learn the Eclipse IDE, frameworks, the elements and architecture of user interfaces, graphics, and more. Students will be exposed to the Android system architecture, including Views, Widgets, Resources, Adapters, Intents and Activities. Topics will also include understanding and handling of threads, multi-touch events, gestures, and motion events. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 374.

CSC 301 is a prerequisite for this class.

**CSC 373 | COMPUTER SYSTEMS I | 4 quarter hours
(Undergraduate)**

A course on computer systems topics, focusing on machine-level programming and architecture and their relevance for application programming. Information representations, assembly language, C programming, and debuggers, processor architecture.

CSC 300 and MAT 140 are prerequisites for this class.

**CSC 374 | COMPUTER SYSTEMS II | 4 quarter hours
(Undergraduate)**

A course on computer systems topics, focusing on operating systems components and their relevance for application programming. Caching, memory hierarchy, performance optimization, linking, processes, virtual memory, dynamic memory allocation, system level I/O. PREREQUISITE: CSC 373.

CSC 373 is the prerequisite for this class.

**CSC 376 | DISTRIBUTED SYSTEMS | 4 quarter hours
(Undergraduate)**

An introduction to distributed systems. Topics may include: architecture of distributed systems; networking; datagram-oriented and stream-oriented protocols; network programming (for example, the sockets API); remote procedure call and remote method invocation; processes and threads; code migration; software agents; naming of non-mobile and mobile entities; cryptography and security. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 374.

CSC 301 and CSC 374 are prerequisites for this class.

**CSC 379 | TECHNOLOGY PARTNERSHIPS IN URBAN SCHOOLS | 4 quarter hours
(Undergraduate)**

Students in this course will have the opportunity to assess urban community needs in the technology arena and develop skills in assisting and developing methods for "bridging the digital divide" that exists. As a result, the student will be able to make a substantial difference in an underprivileged academic community group. This course is a CDM-sponsored community-based service learning course. Any student enrolled in this course can also satisfy the junior year experiential learning requirement.

**CSC 380 | FOUNDATIONS OF ARTIFICIAL INTELLIGENCE | 4 quarter hours
(Undergraduate)**

An in-depth survey of important concepts, problems, and techniques in artificial intelligence, including search, knowledge representation, logical reasoning, and reasoning with uncertainty. A particular focus and a unifying theme of the course will be the concept of intelligent agents. No prior knowledge of AI is required. The course is particularly suitable for graduate and advanced undergraduate students who want to gain the technical background necessary to build intelligent systems, or who want to prepare for more advanced work in AI. The concepts and techniques learned in this course will be directly applicable to many other areas of computer science including software design, distributed systems, databases, and information management and retrieval. PREREQUISITE(S): CSC 301 or CSC 393.

CSC 301 is a prerequisite for this class.

**CSC 381 | INTRODUCTION TO DIGITAL IMAGE PROCESSING | 4 quarter hours
(Undergraduate)**

Components of an image processing system and its applications, elements of visual perception, sampling and quantization, image enhancement by histogram equalization, color spaces and transformations, introduction to segmentation (edge detection algorithms), and morphological image processing. PREREQUISITE(S): MAT 150 or MAT 262.

MAT 150 or MAT 262 are prerequisites for this class

**CSC 382 | APPLIED IMAGE ANALYSIS | 4 quarter hours
(Undergraduate)**

Image analysis from classical computational imaging techniques to deep learning techniques. Fundamentals of computational image analysis in terms of image information extraction and modeling of image patterns. Specific topics include, but are not limited to: image segmentation, multi-scale representation, shape analysis, texture analysis, Fourier analysis, wavelets, Gabor and fractal analysis, and template matching. Deep learning models to extract image representations automatically. Classical and deep learning imaging techniques applied and compared in the context of different image analysis tasks such as image representation, segmentation, classification, retrieval, and object recognition. Applications of these techniques for autonomous driving, biometrics, sports analytics, smart and connected communities, and biomedical and health informatics. PREREQUISITE(S) CSC 381.

CSC 381 is a prerequisite for this class.

**CSC 386 | REAL-TIME NETWORKING (FORMERLY GAM 390) | 4 quarter hours
(Undergraduate)**

Applied real-time networking fundamentals. Topics include low-level TCP/UDP socket programming, serialization of data for network transportation, deterministic data flow and queuing in applications, dynamic configuration and session communications. Students will explore issues related to performance-based networking in different topologies: client/server and peer to peer. Students will create and build real-time applications using different protocols (TCP, UDP, RUDP) with active network simulation of loss, delayed, corrupted and out of order data packets. PREREQUISITE(S): GAM 372 or (SE 350 and CSC 361)

GAM 372 or (SE 350 and CSC 361) are prerequisites for this class.

**CSC 388 | REAL-TIME MULTITHREADED ARCHITECTURE | 4 quarter hours
(Undergraduate)**

Real-time constrained multithreaded architecture. Topics include multithreaded handle development, inter-thread communication, creating systems for user-defined callbacks, asynchronous loading and streaming of resources, non-blocking threading synchronization, design patterns and data driven messaging with time delivery constraints Exploration of multithreaded interfaces to maintain uniqueness and control for contented resources. Wrapping and integrating a multithreaded solution into an application will be analyzed. Students will design, develop and implement a multithreaded real-time application (i.e. Audio engine) that integrates existing single and multithreaded middleware libraries. PREREQUISITE(S): GAM 372 or (CSC 361 and SE 350)

GAM 372 or (SE 350 and CSC 361) are prerequisites for this class.

**CSC 389 | THEORY OF COMPUTATION | 4 quarter hours
(Undergraduate)**

Advanced topics in the mathematical foundations of computation. Topics may include random access and Turing machines, recursive functions, algorithms, computability and computational complexity, intractable problems, NP-complete problems. PREREQUISITE(S): CS321 or CS344.

CSC 321 or CSC 344 is a prerequisite for this class.

**CSC 391 | MOBILE APPLICATION DEVELOPMENT FOR IOS II | 4 quarter hours
(Undergraduate)**

This course will cover advanced topics in mobile application development for iOS. The topics covered will be made explicitly by the course instructor when the course is offered. PREREQUISITE(S): CSC 371.

CSC 371 is a prerequisite for this class.

CSC 392 | MOBILE APPLICATION DEVELOPMENT FOR ANDROID II | 4 quarter hours
(Undergraduate)

This course will cover advanced topics in mobile application development for Android. The topics covered will be made explicit by the course instructor when the course is offered. PREREQUISITE(S): CSC 372.

CSC 372 is a prerequisite for this class.

CSC 393 | DATA STRUCTURES IN C++ | 4 quarter hours
(Undergraduate)

This course covers the design, implementation, application and analysis of algorithms on a variety of data structures, including lists, stacks, queues, trees, heaps, hash tables and graphs. Implementation is done in C++, in particular with the use of templates and the C++ standard template library (STL). PREREQUISITE(S): CSC 309.

CSC 309 is a prerequisite for this class.

CSC 394 | SOFTWARE PROJECTS | 4 quarter hours
(Undergraduate)

Students will be provided with experience in team design, implementation and testing of a large software project.

CSC 301 is a prerequisite for this class.

CSC 395 | RESEARCH COLLOQUIUM | 2 quarter hours
(Undergraduate)

The research colloquium series features informal talks by a variety of speakers including DePaul faculty, students, and guests from the academic and business communities. The lectures feature new creative and scholarly works that encompass the disciplines and areas of interest of the School of Computing. The talks are free and open to all who are interested, though only students who register can obtain academic credit. Every quarter, a different set of speakers will be invited. PREREQUISITE(S): WRD 204 and (CSC 321 or CSC 376 or CSC 355) (2 quarter hours)

WRD 204 and (CSC 321 or CSC 376 or CSC 355) are prerequisites for this class.

CSC 397 | TOPICS IN COMPUTER SCIENCE | 2-4 quarter hours
(Undergraduate)

Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit. PREREQUISITE(S): Consult the instructor (2 quarter hours)

CSC 398 | INTERNSHIP | 1-8 quarter hours
(Undergraduate)

This course does not carry Experiential Learning credit. In cooperation with local employers the computer science program offers students the opportunity to integrate their academic experience with on-the-job training in computer related work areas. Academic credit is variable and admission to the program requires consent of internship advisor. Supervisor evaluation will contribute to the final grade. This course is repeatable for 8.00 credit hours.

CSC 399 | INDEPENDENT STUDY | 1-8 quarter hours
(Undergraduate)

Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable Credit. PREREQUISITE(S): None. (variable credit)

CSC 400 | DISCRETE STRUCTURES FOR COMPUTER SCIENCE | 4 quarter hours
(Graduate)

This course covers the basic mathematical tools essential for solving problems in computer science. The mathematical topics are presented with emphasis on their applications in computer science. The topics covered include: logic and set theory, relations, functions, graphs, and counting and probability.

CSC 401 | INTRODUCTION TO PROGRAMMING | 4 quarter hours
(Graduate)

An introduction to programming with a focus on problem solving, structured programming, and algorithm design. Concepts covered include data types, expressions, variables, assignments, conditional and iterative structures, functions, file input/output, exceptions, arrays and an introduction to user-defined classes.

CSC 402 | DATA STRUCTURES I | 4 quarter hours
(Graduate)

A first course on data structures in Java for graduate students. The course introduces Java programming from within the context of data structures. The course covers arrays, linked lists, stacks and queues, data structures supporting disjoint-set operations, and discusses recursion and performance analysis. The implementation of the basic operations on each data structure are discussed and analyzed in terms of their efficiency. PREREQUISITE(S): CSC 401.

CSC 401 is a prerequisite for this class.

CSC 403 | DATA STRUCTURES II | 4 quarter hours
(Graduate)

This is the second course on data structures in Java for graduate students. The course covers trees, heaps, associative arrays, hash tables, tries, and data structures for representing graphs. The implementation of the basic operations on each data structure are discussed and analyzed in terms of their efficiency. PREREQUISITE(S): CSC 402.

CSC 402 is a prerequisite for this class.

CSC 404 | ACCELERATED C++ | 4 quarter hours
(Graduate)

This introductory graduate course covers the essentials of C++ programming. Topics include encapsulation, inheritance, polymorphism, dynamic memory allocation, casting, pointer arithmetic, operator overloading, templates, and the Standard Template Libraries.

CSC 401 is a prerequisite for this class.

CSC 406 | SYSTEMS I | 4 quarter hours
(Graduate)

An introductory graduate course on computer systems topics, focusing on machine-level programming and architecture and their relevance for application programming. Information representations, assembly language and debuggers, processor architecture, program optimization, memory hierarchy and caching. Students are recommended to finish CSC 400 before enrolling in this course. PREREQUISITE(S): CSC 401.

CSC 401 is a prerequisite for this class.

CSC 407 | SYSTEMS II | 4 quarter hours
(Graduate)

An introductory graduate course on computer systems topics, focusing on operating systems components and their relevance for application programming. Linking, processes, virtual memory, dynamic memory allocation, system level I/O, networking and network programming, concurrent servers and web services. PREREQUISITE(S): CSC 406 and CSC 402.

CSC 406 and CSC 402 are prerequisites for this class.

CSC 412 | TOOLS AND TECHNIQUES FOR COMPUTATIONAL ANALYSIS | 4 quarter hours (Graduate)

Use of mathematical software to explore basic concepts in linear algebra and calculus. Scripting for symbolic and computational processing. Emphasis is on applications in computer science, finance, data mining, and computer vision. PREREQUISITE(S): None.

CSC 421 | APPLIED ALGORITHMS AND STRUCTURES | 4 quarter hours (Graduate)

This course covers techniques for designing and analyzing algorithms and structures in the context of computer application development. Examples will come from Internet, WWW, database, and computer system applications. Fundamental topics such as running-time analysis, searching and sorting within various structures, divide-and-conquer and dynamic programming will be covered. PREREQUISITE(S): CSC 400 and CSC 403.

CSC 400 and CSC 403 are prerequisites for this class.

CSC 426 | RESEARCH METHODS AND PRACTICE IN COMPUTING | 4 quarter hours (Graduate)

The course is intended to help students understand the process of and issues related to doing scientific research in computing or related areas. Topics covered include how to develop an effective research proposal, how to critically evaluate or review a scientific research paper, how to use appropriate research methods in scientific research, key elements of a publishable paper or a dissertation, ethics and professional responsibility in scientific research. The course is intended for PhD students in Computer and Information Sciences or for students who are interested in pursuing a research career. PREREQUISITE(S): PhD status or consent of instructor.

PhD status or consent of instructor is a prerequisite for this class

CSC 431 | SCIENTIFIC COMPUTING | 4 quarter hours (Graduate)

This course presents fundamental numerical algorithms for solving problems in scientific computing and computational finance. Areas covered include: error analysis, computer arithmetic, linear algebra, optimization problems, numerical integration (solvers), ordinary differential equations (ODE). The emphasis of the course is on the design of the algorithms, and their analysis. Algorithms will be implemented using mathematical software. PREREQUISITE(S): (CSC 401 and two quarters of calculus) or instructor permission.

CSC 401 and two quarters of calculus (or instructor permission) are prerequisites for this course.

CSC 435 | DISTRIBUTED SYSTEMS I | 4 quarter hours (Graduate)

An introduction to distributed systems. Topics may include: architecture of distributed systems; networking; datagram-oriented and stream-oriented protocols; network programming (for example, the sockets API); remote procedure call and remote method invocation; processes and threads; code migration; software agents; naming of non-mobile and mobile entities; cryptography and security. PREREQUISITE(S): CSC 403 and CSC 407.

CSC 403 and CSC 407 are prerequisites for this class.

CSC 436 | WEB APPLICATIONS | 4 quarter hours (Graduate)

This course covers the design and development of modern web applications and their interaction with web services. The primary focus is on client-side web applications using AJAX-techniques to access web services. Possible topics include: HTML5; JavaScript/TypeScript; MVC and single-page application programming models, e.g., AngularJS; programming and security models for browsers; client-side web applications with local storage; data synchronization; HTTP, proxies, and caching; Node.js; RESTful web services. PREREQUISITE(S): CSC 435 and CSC 447.

CSC 435 and CSC 447 are prerequisites for this class.

CSC 438 | FRAMEWORK FOR WEB APPLICATION DEVELOPMENT | 4 quarter hours (Graduate)

This course introduces concepts, techniques, technologies and APIs for web application development. The main focus of the course is on the Model-View-Controller design pattern employed by modern full-stack web frameworks. Concepts and techniques covered include client/server programming, database abstraction APIs, and asynchronous javascript. Examples of full-stack MVC frameworks include Ruby-on-Rails (written in Ruby), Django and TurboGears (written in Python). PREREQUISITE: CSC 407.

CSC 407 is a prerequisite for this class.

CSC 439 | COMPUTER SECURITY | 4 quarter hours (Graduate)

This course covers core principles of computer security. Topics include: user authentication; access control (discretionary, mandatory, role-based); security auditing; database security; software security, common vulnerabilities, and secure coding practices; malicious software; and operating system security. Prerequisite(s): CSC 407.

CSC 407 is a prerequisite for this class.

CSC 440 | CRYPTOLOGY | 4 quarter hours (Graduate)

Introduction to the methods of cryptography and cryptanalysis. Topics include classical cryptography (codes, monoalphabetic and polyalphabetic substitution ciphers, transposition ciphers), modern block ciphers (such as DES, AES), and public key cryptography (such as RSA). Optional topics include zero-knowledge protocols, information theory, coding theory, error-correcting codes, steganography, stream ciphers, hashing algorithms, quantum cryptography, elliptic curve cryptography, and history. PREREQUISITE(S): CSC 403.

CSC 403 is a prerequisite for this class.

CSC 443 | INTRODUCTION TO OPERATING SYSTEMS | 4 quarter hours (Graduate)

An advanced course on operating system design and implementation. Process management and scheduling, memory management, file systems, device drivers, access control, and virtualization will be covered. The emphasis of the course will be on implementing components of a functional operating system. PREREQUISITE: CSC 403 and CSC 407.

CSC 403 and CSC 407 are prerequisites for this class.

CSC 444 | AUTOMATA THEORY AND FORMAL GRAMMARS | 4 quarter hours (Graduate)

An introduction to the most important abstract models of computation and their applications: finite state machines and pushdown automata. Explores the relationship between regular expressions and formal expressions and automata. PREREQUISITE(S): CSC 400 and CSC 403.

CSC 400 and CSC 403 are prerequisites for this class.

CSC 447 | CONCEPTS OF PROGRAMMING LANGUAGES | 4 quarter hours (Graduate)

This course examines concepts and programming paradigms that are found in multiple programming languages. Topics include but are not limited to functional programming, type systems, and runtime systems. **CSC 403 and CSC 406 are prerequisites for this class.**

CSC 448 | COMPILER DESIGN | 4 quarter hours (Graduate)

Design and structure of high level languages. Lexical scan, top down and bottom up syntactic analysis. Syntax directed translation and LR(k) grammars. **PREREQUISITE(S): CSC 447.**

CSC 447 is a prerequisite for this class.

CSC 452 | DATABASE PROGRAMMING | 4 quarter hours (Graduate)

Programming in a large-scale relational database environment using procedural languages. Topics covered in the course include: procedural extension of query languages, runtime error handling, subprograms (procedures and functions), packages, database triggers, dynamic query language. Optional topics include transaction management, reliability, and security.

(CSC 453 or IS 451 or CSC 455 or DSC 450) and (CSC 401 or IT 411) are prerequisites for this class.

CSC 453 | PRINCIPLES OF DATABASE MANAGEMENT SYSTEMS | 4 quarter hours (Graduate)

A core graduate course in database design and implementation. Topics include database implementation and queries in SQL, logical design or relational databases, storage and indexes, database programming, and emerging database models.

CSC 403 is a prerequisite for this class.

CSC 454 | DATABASE ADMINISTRATION AND MANAGEMENT | 4 quarter hours (Graduate)

This course is designed to give students a comprehensive foundation in database administration and management. The course provides a conceptual understanding of the database architecture and how its components work and interact with one another. Topics covered in this course include: database architecture, capacity planning, installation and maintenance, network configuration, security management, utilities and tools, industry standards and guidelines, database management techniques and practices. **PREREQUISITE(S): CSC 451 or CSC 453 or CSC 455.**

CSC 451 or CSC 453 or CSC 455 or DSC 450 is a prerequisite for this class.

CSC 457 | EXPERT SYSTEMS | 4 quarter hours (Graduate)

A study of the development of expert systems. Students will use commercial packages to develop standalone and embedded expert systems. Topics will include rule-based systems, decision trees, forward and backward chaining, inference, reasoning with uncertainty, and intelligent agents. **PREREQUISITE(S): CSC 403.**

CSC 403 is a prerequisite for this class.

CSC 458 | SYMBOLIC PROGRAMMING | 4 quarter hours (Graduate)

Concepts of symbolic programming as embodied in the language LISP. Basic data and control structures of LISP. symbolic expressions, the interpreter, functions, recursion, iteration. Techniques for prototyping and building conceptually advanced systems in an environment that encourages procedural and data abstraction. Advanced topics may include Prolog, intelligent tutoring systems, intelligent agents, and natural language processing. Assignments will focus on basic AI techniques, but the class is intended for anyone who will need to rapidly develop large complex systems. **PREREQUISITE(S): CSC 403.**

CSC 403 is a prerequisite for this class.

CSC 461 | OPTIMIZED C++ | 4 quarter hours (Graduate)

Analysis and implementation techniques to improve the performance and resource usage of C++ programs. This class will provide low level understanding of C++'s internal behavior that can be exploited to create faster performing software. Analysis of existing software to help identify and remedy execution performance issues related to data layout, processor caching, unintended compiler interactions, algorithmic considerations, data containers and supplied subsystems. Topics include: performance enhancements through SIMD instruction set, dynamic memory usage, caching, implicit behavior, C++ language extensions, algorithms, streaming and profiling. **PREREQUISITE(S): CSC 400 and CSC 403 and CSC 406.**

CSC 400 and CSC 403 and CSC 406 are prerequisites for this class.

CSC 463 | THEORY AND PRACTICE OF SAFE SYSTEMS PROGRAMMING | 4 quarter hours (Graduate)

Modern developments in programming languages, toolchains, and package management reduce the risk of security vulnerabilities from programming errors and supply chain attacks. This course covers the theory and practice of ownership type systems, their application in systems programming, and discussion of the vulnerabilities they mitigate. Approaches to software integrity and distributed code review are investigated in the context of package management and supply chain attacks. Coursework includes development of a large systems program in a language with ownership types such as Rust.

CSC 447 is a prerequisite for this class.

CSC 464 | VIRTUALIZATION AND CLOUD COMPUTING | 4 quarter hours (Graduate)

This course will cover underlying technologies that enable major cloud computing providers to deliver computing resources to consumers on-demand over the Internet, focusing primarily on virtualization and containers. Topics to be covered will include many aspects of the design and implementation of hypervisors and containers, ranging from isolation, namespaces, cgroups stackable file systems, copy-on-write, and scheduling of containers. Coursework includes development of a container project applying concepts learned in class and involves systems programming.

CSC 435 or CSC 461 is a prerequisite for this class.

CSC 468 | PROGRAMMING INTERACTIVE DATA VISUALIZATION FOR THE WEB | 4 quarter hours (Graduate)

This course covers the fundamentals of data visualization and how to build interactive visualizations from scratch. Topics include implementing common visualizations with JavaScript and D3 (e.g. scatter plots), techniques for more complex types of data (e.g. hierarchical, geospatial, network), and adapting existing implementations of advanced visualizations to new applications. The final project involves building a custom interactive visualization with a python back-end and a D3 front-end.

SE 450 OR SE 456 OR CSC 438 OR CSC 447 is a prerequisite for this class.

CSC 471 | MOBILE APPLICATION DEVELOPMENT FOR IOS | 4 quarter hours (Graduate)

This course introduces the core issues associated with application development for mobile devices using the iOS platform. Students will learn the Swift language, the XCode IDE, UIKit and other frameworks, the elements and architecture of the user interfaces, and more. Students will be exposed to the iOS system architecture including memory management, MVC, delegates and threads. Topics will also include understanding and handling of multi-touch events, gestures, and motion events. PREREQUISITE(S): CSC 403 and CSC 407.

CSC 403 and CSC 407 are prerequisites for this class.

CSC 472 | MOBILE APPLICATION DEVELOPMENT FOR ANDROID | 4 quarter hours (Graduate)

This course introduces the core issues associated with application development for mobile devices using the Android platform. Students will learn the Eclipse IDE, frameworks, the elements and architecture of user interfaces, graphics, and more. Students will be exposed to the Android system architecture, including Views, Widgets, Resources, Adapters, Intents and Activities. Topics will also include understanding and handling of threads, multi-touch events, gestures, and motion events. PREREQUISITE(S): CSC 403 and CSC 407.

CSC 403 and CSC 407 are prerequisites for this class.

CSC 480 | ARTIFICIAL INTELLIGENCE I | 4 quarter hours (Graduate)

The course provides an in-depth survey of important concepts, problems, and techniques in artificial intelligence, including heuristic and adversarial search, constraint satisfaction problems, logical reasoning, reasoning with uncertainty, and machine learning. A particular focus and a unifying theme of the course will be the notion of intelligent agents and their implementation.

CSC 403 is a prerequisite for this class.

CSC 481 | INTRODUCTION TO IMAGE PROCESSING | 4 quarter hours (Graduate)

The course is a prerequisite for more advanced Visual Computing (VC) courses and the students will be challenged to implement VC algorithms for real world applications. The topics covered in the course include: components of an image processing system and its applications, elements of visual perception, sampling and quantization, image enhancement by histogram equalization, color spaces and transformations, introduction to segmentation (Edge detection), and morphological image processing. PREREQUISITE(S): CSC 412 or consent of instructor.

CSC 412 or consent of instructor is a prerequisite for this class.

CSC 482 | APPLIED IMAGE ANALYSIS | 4 quarter hours (Graduate)

Image analysis from classical computational imaging techniques to deep learning techniques. Fundamentals of computational image analysis in terms of image information extraction and modeling of image patterns. Specific topics include, but are not limited to: image segmentation, multi-scale representation, shape analysis, texture analysis, Fourier analysis, wavelets, Gabor and fractal analysis, and template matching. Deep learning models to extract image representations automatically. Classical and deep learning imaging techniques applied and compared in the context of different image analysis tasks such as image representation, segmentation, classification, retrieval, and object recognition. Applications of these techniques for autonomous driving, biometrics, sports analytics, smart and connected communities, and biomedical and health informatics. PREREQUISITE(S) CSC 481.

CSC 481 is a prerequisite for this class.

CSC 484 | ETHICS IN ARTIFICIAL INTELLIGENCE | 4 quarter hours (Graduate)

The course examines a broad range of real ethical issues that we face in a future that includes artificially intelligent computational agents, widespread intelligent mining of big data and possibly even artificial sentience. In addition, students will discuss the ethical issues raised by the combined intelligence of brain-machine intelligent systems, and also the cognitive limits of the human mind from a computational perspective. This is a lecture / discussion survey class, with background readings.

CSC 485 | NUMERICAL ANALYSIS | 4 quarter hours (Graduate)

Use of a digital computer for numerical computation. Error analysis, Gaussian elimination and Gauss-Seidel method, solution of nonlinear equations, function evaluation, approximation of integrals and derivatives, Monte Carlo methods. PREREQUISITE(S): MAT 220 and a programming course.

CSC 486 | REAL-TIME NETWORKING (FORMERLY GAM 490) | 4 quarter hours (Graduate)

Applied real-time networking fundamentals. Topics include low-level TCP/UDP socket programming, serialization of data for network transportation, deterministic data flow and queuing in applications, dynamic configuration and session communications. Students will explore issues related to performance-based networking in different topologies: client/server and peer to peer. Students will create and build real-time applications using different protocols (TCP, UDP, RUDP) with active network simulation of loss, delayed, corrupted and out of order data packets. Architecture of different bandwidth compression and estimation techniques will be investigated. Research of wireless ad hoc networks such as Bluetooth and ZigBee will be explored. PREREQUISITE(S): CSC 461 and (SE 456 or SE 450)

CSC 461 and (SE 456 or SE 450) are prerequisites for this class.

CSC 489 | THEORY OF COMPUTATION | 4 quarter hours (Graduate)

Advanced topics in the mathematical foundations of computation. Topics may include random access and Turing machines, recursive functions, algorithms, computability and computational complexity, intractable problems, NP-complete problems. PREREQUISITE(S): CSC 444 or CSC 421.

CSC 444 or CSC 421 is a prerequisite for this class.

CSC 491 | MOBILE APPLICATION DEVELOPMENT FOR IOS II | 4 quarter hours**(Graduate)**

This course will cover advanced topics in mobile application development for iOS. The topics covered will be made explicit by the course instructor when the course is offered. PREREQUISITE(S): CSC 471.

CSC 471 is a prerequisite for this class.

CSC 492 | MOBILE APPLICATION DEVELOPMENT FOR ANDROID II | 4 quarter hours**(Graduate)**

This course will cover advanced topics in mobile application development for Android. The topics covered will be made explicit by the course instructor when the course is offered. PREREQUISITE(S): CSC 472.

CSC 472

CSC 500 | RESEARCH COLLOQUIUM | 2 quarter hours**(Graduate)**

The research colloquium consists of weekly talks by a variety of speakers including faculty, students, and guests from the academic and business communities. The lectures feature new creative and scholarly works that encompass the disciplines and areas of interest of the School of Computing. Student evaluation is based on attendance as well as an online journal with reflections on each of the presentations. The educational objectives are to expose students to creative and scholarly research at DePaul and elsewhere, and to engage students in the thought process of identifying and solving challenging research problems. PREREQUISITE(S): None (variable credit)

CSC 503 | PARALLEL ALGORITHMS | 4 quarter hours**(Graduate)**

Development, implementation, and applications of parallel algorithms. Models of parallel computation. Parallel sorting, searching and graph algorithms, as well as other parallel algorithms, will be studied and implemented on both simulated and actual parallel machines. PREREQUISITE(S): CSC 421.

CSC 421 is a prerequisite for this class.

CSC 521 | MONTE CARLO ALGORITHMS | 4 quarter hours**(Graduate)**

A course about the use of random numbers for numerical computation with particular emphasis on implementation issues and applications in science and finance. Covered topics include: pseudo random number generators, the inversion method, the accept-reject method, discrete event simulations, multi-dimensional integration, the Metropolis and the Bootstrap algorithms.

(CSC 402 or CSC 404 or DSC 430) and DSC 423 or consent of instructor are prerequisites for this class.

CSC 525 | COMBINATORIAL OPTIMIZATION | 4 quarter hours**(Graduate)**

This course defines and introduces the concepts and techniques needed to formulate and model optimization problems. A set of fundamental problems in combinatorial optimization will be covered together with their applications. The emphasis will be on the design and analysis of algorithms for such problems. The computational complexity of this set of problems (easy/hard to solve/approximate) will be discussed, and techniques for coping with intractable problems will be introduced. PREREQUISITE(S): CSC 421.

CSC 421 is a prerequisite for this class.

CSC 528 | COMPUTER VISION | 4 quarter hours**(Graduate)**

Introduction to computer vision, including fundamentals of image formation, camera imaging geometry, feature detection and matching, stereo, and motion analysis. Basic methods and modern deep learning models for applications that include camera calibration, depth recovery from video, motion estimation and tracking, image and video, image search, and new image generation. Focus on the mathematics of these methods and models. Development of modern techniques such as convolutional neural networks for optical flow estimation and object detection, and generative adversarial networks for artificial image generation. PREREQUISITE(S): CSC 481.

CSC 481 is a prerequisite for this class.

CSC 531 | INTRODUCTION TO BIOINFORMATICS | 4 quarter hours**(Graduate)**

An introduction to the field of Bioinformatics, which is computational modeling of biological and biochemical processes. Some programming in Java will be involved. Little biological knowledge will be assumed: any required will be taught in the course. Topics will include genomics, biological databases, sequence alignment (longest common subsequence), phylogenetic trees, and protein folding.

CSC 421 and (SE 450 or SE 456) are prerequisites for this class.

CSC 534 | SOFTWARE DEVELOPMENT FOR LIMITED AND EMBEDDED DEVICES | 4 quarter hours**(Graduate)**

This course will focus on the unique aspects, tools, and techniques of developing software applications for limited and embedded devices, such as set-top boxes and smart cards. Formerly CSC 542.

SE 450 or SE 456 are prerequisites for this class.

CSC 535 | FORMAL SEMANTICS OF PROGRAMMING LANGUAGES | 4 quarter hours**(Graduate)**

Methods of formal semantics. Lambda-calculus. Lattices and domains. Reflexive domains. Formal semantics of the lambda-calculus. Languages with state. Interpretation functions. Expressions and environments. Command and stores. Control structures and continuations. PREREQUISITE(S): CSC 447.

CSC 447 is a prerequisite for this class.

CSC 536 | DISTRIBUTED SYSTEMS II | 4 quarter hours**(Graduate)**

Advanced course that introduces the techniques required to build large-scale, highly available, fault tolerant distributed systems. Covers the distributed algorithms (e.g., vector clocks, consistent hashing, gossip protocols, Merkle trees, Paxos/Raft algorithms) that solve the fundamental problems (e.g., synchronization, replication and replica consistency, fault tolerance) in building such systems. Focus is on problems and solutions relevant to systems that store and process massive data sets and the design decisions behind current large-scale distributed database systems.

CSC 435 is a prerequisite for this class.

CSC 538 | VISION SYSTEMS | 4 quarter hours**(Graduate)**

Vision Systems will cover the geometry of computer vision as well as a survey of working vision systems to include 1) Content-based Image Retrieval Systems; 2) Object Detection and Tracking Systems; 3) Medical Visual Systems; 4) Robotic Navigation Systems. PREREQUISITE(S): CSC 528.

CSC 528 is a prerequisite for this class.

CSC 540 | MOBILE APPLICATION DEVELOPMENT II | 4 quarter hours (Graduate)

This course will cover advanced topics in mobile and wireless application development. The topics covered will be made explicit by the course instructor when the course is offered. PREREQUISITE(S): CSC 471.

CSC 471 is a prerequisite for this class.

CSC 543 | SPATIAL DATABASES & GEOGRAPHIC INFORMATION SYSTEMS | 4 quarter hours (Graduate)

This course considers how spatial databases work within a GIS, how data is structured, stored, indexed, retrieved, and displayed. Other topics may include fuzzy spatial databases, temporal spatial databases, and multiple criteria spatial decision making. The class will consist of hands-on work with commercial products, as well as investigating the state-of-the-art research in the field. Prerequisites: CSC 453 or CSC 455.

CSC 453 or CSC 455 or DSC 450 is a prerequisite for this class.

CSC 547 | ADVANCED TOPICS IN PROGRAM LANGUAGES | 4 quarter hours (Graduate)

A project-based course on advanced topics related to programming languages and programming environments. The course does not have any formal exams or homework assignments, but participants are expected to read papers on current research, actively participate in discussions, and complete a significant course project. PREREQUISITE(S): Instructor consent required.

CSC 548 | ADVANCED COMPILER DESIGN | 4 quarter hours (Graduate)

Emphasis on practical problems in implementing compilers, data flow analysis, code optimization, error analysis. Discussion of compiler generators. As a class project, students will write a compiler. PREREQUISITE(S): CSC 448.

CSC 448 is a prerequisite for this class.

CSC 549 | DATABASE SYSTEM IMPLEMENTATION | 4 quarter hours (Graduate)

This is an advanced database course that covers issues in DBMS implementation. Topics covered in this course include: physical data organizations, indexing and hashing, query processing and optimization, database recovery techniques, transaction management, concurrency control, and security. PREREQUISITE(S): CSC 453.

CSC 453 is a prerequisite for this class.

CSC 550 | OBJECT-ORIENTED DATABASES | 4 quarter hours (Graduate)

(No Longer Offered) Introduction to object-oriented concepts: abstract data typing, inheritance, object identity. Architecture, modeling and design for object-oriented databases. Query languages, integrity, long-duration transactions, concurrency, recovery and versioning in object-oriented databases. Brief survey of commercial and research prototypes of object-oriented database management systems. PREREQUISITE(S): CSC 453.

CSC 453 is a prerequisite for this class.

CSC 551 | DISTRIBUTED DATABASE SYSTEMS | 4 quarter hours (Graduate)

Distributed database architecture, distributed database design, distributed query processing, query decomposition and optimization of distributed queries, distributed transaction management and concurrency control, distributed DBMS reliability, distributed database operating systems. Distributed multidatabase systems. Client/Server database systems. PREREQUISITE(S): CSC 453 and (CSC 435 or TDC 405 or TDC 463)

CSC 453 and (CSC 435 or NET 405 or NET 463) are prerequisites for this class.

CSC 552 | CONCURRENT SOFTWARE DEVELOPMENT | 4 quarter hours (Graduate)

Fundamentals and techniques of developing concurrent object-oriented applications, using a patterns-based approach. Concepts covered include: threads, synchronization and object locking, thread blocking and deadlock, safety and liveness, state-dependent action and concurrency control. Formerly SE 552.

(SE 450 or SE 456) and CSC 407 are prerequisites for this class.

CSC 553 | ADVANCED DATABASE CONCEPTS | 4 quarter hours (Graduate)

An introduction to advanced selected topics in databases. The topics include: intelligent and deductive databases, temporal databases, multimedia databases, spatial and geographic databases, fuzzy databases, mobile databases, data mining and data warehousing, as well as emerging issues and concepts in database design, implementation and management. PREREQUISITE(S): CSC 453.

CSC 453 is a prerequisite for this class.

CSC 554 | ADVANCED DATABASE MANAGEMENT | 4 quarter hours (Graduate)

In this class, we will discuss concepts, technologies, guiding principles, processes and best practices in managing database environment to meet high availability, scalability, and compliance needs. Organizations with business critical applications must reduce their risk of downtime, manage database environment efficiently and ensure data meets compliance requirements effectively. IT now has additional responsibilities to secure and manage information in alignment with legal, records management and regulations. This class explores methods and techniques to achieve the availability needs and also focuses on how to protect the database against disasters by maintaining multiple copies of the databases in separate locations, synchronized in real-time. Students learn to design and manage key business resumption functions including disaster recovery plans and business continuity plans. Data governance challenges will be discussed along with solutions including data life cycle management, preservation, retention, and disposition. Prerequisite(s): CSC 453 or CSC 454.

CSC 453 or CSC 454 is a prerequisite for this class.

CSC 555 | MINING BIG DATA | 4 quarter hours (Graduate)

Introduction to fundamentals of distributed file systems and map-reduce technology (e.g., Hadoop); tuning map-reduce performance in a distributed network. Algorithms and tools for mining massive data sets and discussion of current challenges. Applications in clustering, similarity search, classification, data warehousing (e.g., Hive), machine learning (e.g., Mahout).

(CSC 453 or DSC 450) and (DSC 441 or CSC 480) or (MAT 491 and MAT 449) are prerequisites for this class.

CSC 557 | FOUNDATIONS OF COMPUTER SECURITY | 4 quarter hours (Graduate)

This course provides an overview of foundational techniques in the specification and verification of computer systems in the presence of malicious attackers. Topics may include: formal models of interaction, attacker models, robust safety properties such as confidentiality and authenticity, information flow properties such as noninterference, and tools such as model checkers, type checkers and theorem provers. Formerly 557. PREREQUISITE(S): CSC 439.

CSC 439 is a prerequisite for this class.

CSC 559 | SOFTWARE ENGINEERING FOR FINANCIAL MARKETS | 4 quarter hours (Graduate)

This course focuses on software engineering issues in creating a financial engine that drives automation and execution in a financial market. The course will cover different types of financial engines from back-office to front-office, exchange matching engines, data gathering engines, trading engines and straight through processing. The emphasis will be on the engines themselves rather than the financial models beneath them. Students will be required to work individually and/or in teams and create a financial engine. This is a project course and it will put students in the role of a domain architect who will need the skills required to communicate with financial traders and software engineers at the same time. PREREQUISITE(S): CSC 404 and (CSC 431 or CSC 521 or CSC 425)

CSC 404 and (CSC 431 or CSC 521 or CSC 425 or DSC 425) are prerequisites for this class.

CSC 562 | OPTIMIZED C++ MULTITHREADING | 4 quarter hours (Graduate)

Software architecture of applied C++ concurrency and multithreading fundamentals. Basic threading concepts: process model, threads, stacks, fibers, mutexes, semaphores, atomics and events. Leveraging advanced C++ language features relating to the memory model and the threading support in large multithreaded architectures. Architecting lock-based and lock-free concurrent data structures in applications. Designing a threaded management system to control the access and reuse of threads in applications. Designing multithreaded architecture for real-time performance.

(SE 450 or SE 456) and CSC 461 are prerequisites for this class.

CSC 575 | INTELLIGENT INFORMATION RETRIEVAL | 4 quarter hours (Graduate)

Examination of the design, implementation, and evaluation of information retrieval systems. The focus is on the underlying retrieval models, algorithms, and system implementations. Also examined is how an effective information search and retrieval is interrelated with the organization and description of information to be retrieved. Topics include: automatic indexing; thesaurus generation; Boolean, vector-space, and probabilistic models; clustering and classification; information filtering; distributed IR on the WWW; intelligent information agents; IR system evaluation; information visualization; and natural language processing in IR. Throughout the course, current literature from the viewpoints of both research and practical retrieval technologies both on and off the World Wide Web will be examined. PREREQUISITE(S): CSC 403.

CSC 403 (or Data Science MS students)

CSC 576 | COMPUTATIONAL ADVERTISING | 4 quarter hours (Graduate)

Computational advertising is the problem of finding the best advertisement for a given user in a given on-line context. It is a complex and emerging area at the intersection of quantitative marketing, web search, data mining, recommendation, optimization, and algorithmic game theory. Students will read current scientific papers and explore a range of models both mathematically and empirically. Students can choose from three types of final course projects: implementation projects, research papers, or data analysis projects. Prerequisite(s): IS 467 or CSC 478 or ECT 584.

IS 467 or DSC 441 or CSC 478 or ECT 584 or DSC 484 is a prerequisite for this class.

CSC 577 | RECOMMENDER SYSTEMS | 4 quarter hours (Graduate)

Recommender systems offer personalized access to online information in product catalogs, social media networks, and document collections, among other applications. This class will introduce students to a range of approaches for building recommender systems including collaborative, content-based, knowledge-based, and hybrid methods. Students will implement recommendation algorithms using an open-sourced toolkit and conduct experimental evaluations. PREREQUISITE(S): (CSC 412 and CSC 478) or (CSC 403 and IS 467)

(CSC 412 and (CSC 478 or DSC 478)) or (CSC 403 and (IS 467 or DSC 441)) are the prerequisites for this class..

CSC 578 | NEURAL NETWORKS AND DEEP LEARNING | 4 quarter hours (Graduate)

Course focuses on the algorithms, implement, and application of neural networks for learning about data. It will present how neural networks represent data and learn in supervised and unsupervised contexts with applications to language processing, classification, and regression problems. Topics include learning algorithms, and optimization methods, deep learning methods for deriving deep representations from surface features, recursive networks, Boltzmann machines and convolutional networks.

CSC 412 and (DSC 478 or CSC 480) are prerequisites for this class.

CSC 580 | ARTIFICIAL INTELLIGENCE II | 4 quarter hours (Graduate)

The course provides an in-depth coverage of advanced concepts and techniques in artificial intelligence. The topics include advanced concepts in optimization; Markov decision processes; reinforcement learning; and advanced machine learning techniques such as support vector machines, kernel regression, ensemble classification, spectral and density-based clustering, and multi-layer neural networks. These topics will be explored in the context of modern intelligent applications such as recommender systems, text and natural language processing, chat bots, and image recognition.

CSC 578 is a prerequisite for this class.

CSC 583 | NATURAL LANGUAGE PROCESSING | 4 quarter hours (Graduate)

This course introduces the fundamental concepts and theory of Natural Language Processing (NLP) and computational linguistics. NLP is a field in Artificial Intelligence devoted to creating computer systems which understand and produce human languages. Topics include language models, sentiment analysis, parsing, information extraction and neural language models. The course will explore the theoretical aspects of these topics and their practical implementations through case studies and projects.

CSC 578 is a prerequisite for this class.

**CSC 587 | COGNITIVE SCIENCE | 4 quarter hours
(Graduate)**

A study of the relationships between our knowledge of human and computer intelligence. Levels of analysis of intelligent system, examples of cognitive models, and exposure to current publications, with an emphasis on those related to human computer interaction. Students will participate in the design and testing of models of human intelligence, both experimentally and using computer models.

CSC 403 or HCI 460 is a prerequisite for this class.

**CSC 588 | REAL-TIME MULTITHREADED ARCHITECTURE | 4 quarter hours
(Graduate)**

Real-time constrained multithreaded architecture. Topics include multithreaded handle development, inter-thread communication, creating systems for user-defined callbacks, asynchronous loading and streaming of resources, non-blocking threading synchronization, design patterns and data driven messaging with time delivery constraints. Design and implementation of thread safe data management with atomic non-blocking synchronization. Exploration of real-time data driven messaging to allowing the run-time object data to control the behavior an application. Students will design, develop and implement a multithreaded real-time application (i.e. Audio engine) that integrates existing single and multithreaded middleware libraries. PREREQUISITE(S): CSC 461 and (SE 456 or SE 450)

CSC 461 and (SE 456 or SE 450) are prerequisites for this class.

**CSC 589 | TOPICS IN DATABASE | 2-4 quarter hours
(Graduate)**

Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit. PREREQUISITE(S): For specific prerequisites, see syllabus or consult with course instructor. (variable credit)

**CSC 590 | TOPICS IN USER INTERFACES | 2-4 quarter hours
(Graduate)**

Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit. PREREQUISITE(S): For specific prerequisites, see syllabus or consult with course instructor. (variable credit)

**CSC 591 | TOPICS IN ALGORITHMS | 2-4 quarter hours
(Graduate)**

Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit. PREREQUISITE(S): For specific prerequisites, see syllabus or consult course instructor. (variable credit)

**CSC 592 | TOPICS IN COMPUTER VISION AND PATTERN RECOGNITION | 4 quarter hours
(Graduate)**

This is an independent study course. May be repeated for credit. PREREQUISITE(S): CSC 482 or CSC 528.

**CSC 594 | TOPICS IN ARTIFICIAL INTELLIGENCE | 2-4 quarter hours
(Graduate)**

Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit. PREREQUISITE(S): For specific prerequisites, see syllabus or consult course instructor. (variable credit)

**CSC 595 | TOPICS IN COMPUTER SCIENCE | 2-4 quarter hours
(Graduate)**

Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit. PREREQUISITE(S): For specific prerequisites, see syllabus or consult course instructor. (variable credit)

**CSC 598 | TOPICS IN DATA ANALYSIS | 2-4 quarter hours
(Graduate)**

Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit. PREREQUISITE(S): For specific prerequisites, see syllabus or consult course instructor. (variable credit)

**CSC 599 | INDEPENDENT STUDY | 1-8 quarter hours
(Graduate)**

Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable Credit. PREREQUISITE(S): None. (variable credit)

**CSC 601 | MASTER'S RESEARCH CONTINUATION | 0 quarter hours
(Graduate)**

Non-credit. This course is intended for master's degree students who have completed all course registration requirements and who are regularly using the facilities of the University for study and research, thesis or project completion. These students are required to be registered in this course each quarter of the academic year until all requirements have been completed. PREREQUISITE(S): Completion of required courses. Independent Study form required. (0 credit hours)

**CSC 675 | CAPSTONE IN ARTIFICIAL INTELLIGENCE | 4 quarter hours
(Graduate)**

The course provides an opportunity for students to apply the skills and knowledge learned in the classroom to real world challenges. Students work in teams to implement an AI empowered solution to a critical problem. Students will also read scientific papers in the field to review and compare related work. At the end of the course, students submit a report summarizing their approach and describing the intelligent information system they developed.

CSC 580 and CSC 578 and CSC 583 are prerequisites for this class.

**CSC 690 | RESEARCH SEMINAR | 1-4 quarter hours
(Graduate)**

Readings and discussion on current research topics. PREREQUISITE(S): Consent of the instructor. (variable credit)

**CSC 695 | MASTER'S RESEARCH | 1-4 quarter hours
(Graduate)**

Students interested in a more in-depth study of a particular area will register for this course and work with a faculty member (not necessarily their academic advisor) on a research project. The work involved may include system development, empirical studies, or theoretical work. 4 credit hours of CSC 695 replaces one 500level elective course in student's degree program. This course can be taken for 1-4 credit hours for up 8 credit-hours. PREREQUISITE(S): Consent of research advisor. Independent study form required. Students must successfully complete the foundation courses prior to their first enrollment in CSC 695. (variable credit)

**CSC 696 | MASTER'S RESEARCH | 0 quarter hours
(Graduate)**

A student who has made a significant contribution to a research project, through work done in 8 credit-hours CSC 695, may choose to complete the Master's Research option. During the second of the two quarters, the student must submit a technical report detailing the results of the research project. This report must be approved by the student's research supervisor and the faculty advisor, at which point it will be made available to the public as a CDM Departmental Master's Research Technical Report. The transcript will show the Research project title as the course topic.

**CSC 697 | GRADUATE INTERNSHIP | 1-4 quarter hours
(Graduate)**

In cooperation with local employers, the graduate program offers students the opportunity to integrate their academic experience with on-the-job training in computer related work areas. This course is variable credit and may be taken for one to four credits. This course may be repeated for a maximum of four credits total. Admission to the internship program requires consent of the Instructor and a Student Services Advisor. International students may complete curricular practical training (CPT) through this class provided they first obtain CPT authorization from the Office for International Students and Scholars (OISS) before beginning the internship. (1 quarter hour)

**CSC 698 | MASTER'S THESIS | 0 quarter hours
(Graduate)**

A student who has made an original contribution to the area (typically through 8 credit-hours' worth of work done in CSC 695, but not necessarily) may choose to complete a Master's Thesis. The student and the student's research advisor form a Master's Thesis Committee. The student submits to the committee a thesis detailing the original results of the research project. After a public defense, the committee will decide whether to accept the thesis. In that case, the student will be allowed to register for this course and the transcript will show the thesis title as the course topic. PREREQUISITE(S): Successful defense of a Master's Thesis. (variable credit)

**CSC 699 | RESEARCH | 1-12 quarter hours
(Graduate)**

PREREQUISITE(S): Research course supervised by an instructor. Independent Study Form required. Variable credit. Can be repeated for credit. (variable credit)

**CSC 701 | FULL-TIME CANDIDACY CONTINUATION | 0 quarter hours
(Graduate)**

Non-credit. Students in the doctoral degree who have completed their course credit requirements are required to be registered each quarter of the academic year until the exams, dissertation and final examination have been completed. Registration through independent study form requires certification that the student is actively working on exams and/or thesis under the advisor's supervision. This course carries the equivalent of full-time enrollment status.

**CSC 702 | PART-TIME CANDIDACY CONTINUATION | 0 quarter hours
(Graduate)**

Non-credit. Students in the doctoral degree who have completed their course credit requirements are required to be registered each quarter of the academic year until the exams, dissertation and final examination have been completed. Registration through independent study form requires certification that the student is actively working on exams and/or thesis under the advisor's supervision. This course carries the equivalent of part-time enrollment status.

Core Curriculum Arts and Ideas (CCA)**CCA 147 | ETHICS: HOW GOOD PEOPLE MAKE TOUGH CHOICES | 4
quarter hours
(Undergraduate)**

Through life's many lessons, we have learned how to make a decision between what is the right thing to do and what is simply wrong. We can differentiate between good and evil, truth and lies, etc. However, most of our dilemmas do not stem from deciding the correct path, when we are faced with right and wrong decisions. What most often puts us into a quandary is deciding between what is right and what is right. In other words when good people are faced with tough choices, on what basis do they make their decisions? In an era of perceived ethical incertitude and moral skepticism, students will examine how decisions are made based on one of many ethical systems. Students will learn about various ethical systems, and ethicists, such as utilitarianism, deontology, Kant, Aristotle, and Gillian, just to name a few. By the end of the course students should be able to apply their knowledge of moral, ethical and social issues, and have a better understanding of how the tough decisions they make could impact others. (4 quarter hours)

**CCA 152 | EXPLORING THE ART MUSEUM | 4 quarter hours
(Undergraduate)**

Museums have been a respected and trusted measurement of artistic accomplishment. In this course, the student will examine the museum's role as collector, conservator and educator. The student will investigate the traditional role of the art museum, its collection, practices and programs as well as its efforts to integrate new media into its collection. The course also investigates repatriation, which is the ownership of ancient and cultural heritage and other issues that affect the museum such as censorship and funding. Finally it will look at how we value art as a commercial commodity. (4 quarter hours)

**CCA 153 | THE ART OF SPEECHMAKING | 2 quarter hours
(Undergraduate)**

In this class, students will use tools based in the imagination, principles of design, and standard dramatic practice to create a unique, personal experience for an audience. Speech, whether we call it dramatic or declamatory, has the potential to move the masses. In this course, you will develop a personal approach and construct effective presentations that harness the power of their voice and body. (2 credit hours)

**CCA 154 | STRESS REDUCTION USING HUMOR AND SPIRITUALITY | 2
quarter hours
(Undergraduate)**

Stress affects the body in dramatic ways, and is a major contributing factor in chronic and degenerative diseases. We will understand/describe the physiology and biochemistry of stress and, more importantly, apply effective methods to reduce and manage it. Effective stress reduction and burnout prevention then become important health, wellness, productivity and disease prevention strategies for individuals, schools, businesses, the medical industry and the culture. The effective stress reduction techniques include breathing, biofeedback, humor, spiritual exploration, connection and inspiration. The holistic paradigm of body, mind and spirit supports our informed search for meaning, connection, calm productivity and enhanced health (2 quarter hours)

**CCA 167 | DIGITAL PHOTOGRAPHY | 4 quarter hours
(Undergraduate)**

Students learn in this course to take artistic digital photos. They will analyze photos they have taken prior to the course and discuss if they fulfill criteria to be seen as art. Several theories of artistic expression will be discussed. Rules of composition, light, exposure, colors, etc. will be reflected upon. In a second step the students will develop the competence to alter their digital photos with a program like "Photoshop Elements". They will be able to change the expression of their photos and combine different shots, creating their personal piece of art. As a final product, students will create a portfolio with about 5 photos including detailed descriptions of their work. (2-4 quarter hours)

**CCA 170 | CREATIVITY AND ENTREPRENEURSHIP | 2 quarter hours
(Undergraduate)**

IPads. Smart Phones. The automobile. These inventions, once unknown and now taken for granted, required years of imagining, experimentation and innovative thinking. While we value the end product, we are often unaware of the underlying creative/creating process. This class will explore the role of creativity in the development of entrepreneurial skills and the entrepreneurial personality. Creativity in this course will be seen both as a learned skill and as an exploration of our intuition. This course will explore contemporary approaches to the creative process based on the human capacity to imagine, to explore and, ultimately, to create. These are core skills for anyone pursuing a career as an entrepreneur or simply in search of ways to explore innovation. (2 credit hours)

**CCA 172 | MAKING POEMS: AN INTRODUCTION TO VERSE | 4 quarter hours
(Undergraduate)**

Making poems will be a creative writing offering that teaches metrics and verse forms, poetry the old-fashioned way. Topics will include metric feet, rhyme, lines, and verse forms. For example, students will learn about the iambic foot, write some iambic lines of various lengths, and finally use the iambic line to write a sonnet. Rap poetry with its structured rhythms and elaborate rhyming is another possibility. This "formalist" approach promotes a kind of creativity that is strongly infused with craft and discipline in contrast to the "spoken word" or confessional approaches to making poems. This class involves making audio recordings of your poems; students will be required to purchase a headset/microphone and download and install free software.

**CCA 176 | CREATIVE WRITING | 4 quarter hours
(Undergraduate)**

Designed to help you explore the art of writing stories, either stories that are "made-up" or stories based on lived experience. You will be required to complete six fiction-writing exercises, and either one short story, one autobiographical story, or one story based on an oral history collected by the you. In addition, you write a final essay in which you reflect on your learning and experience in the course. (4 quarter hours)

**CCA 185 | THE BEATLES AND THE CREATIVE PROCESS | 4 quarter hours
(Undergraduate)**

The Beatles are significant in many ways: they were an unprecedented show business phenomenon; they were leaders of Sixties cultural rebellion; and they stand, for many, as a signal instance of popular entertainment attaining the status of high art. This course will examine the musical craftsmanship of the Beatles, focusing on their work as songwriters and record makers. Recent audio and print releases documenting the group's performing and recording history provide a unique and detailed glimpse of the Beatles' creative process. We will utilize these materials to closely trace the development of the group's work while using other resources to place it in a larger historical and cultural context. The goal is to shed critical light on this recent chapter in cultural history. That discussion will, in turn, highlight questions about creativity in a modern context where commerce vies with art, technology redefines performance and an emerging global village culture transforms concepts of originality and tradition.

**CCA 202 | LONDON ALIVE: IN THEATERS, MARKETS AND MUSEUMS | 4 quarter hours
(Undergraduate)**

Join SNL in London for a course about performance and representation. Theater, live performance, museum collections and street markets are integral parts of English cultural history; they also represent Britain's international heritage. London theaters celebrate English history, culture and language, and carry the banner of the English artistic imagination into the future. London's museums make it one of the most visited cities in the world for the range of its collected artifacts and images. Outside the theater and museum doors, markets teem with life, creating a magical intersection of past with present and future, of art with life and politics, of cultural stasis with social change. (4 quarter hours)

**CCA 211 | ANALYZING AUSTEN'S PRIDE AND PREJUDICE | 4 quarter hours
(Undergraduate)**

Jane Austen must have known something about universal truths. Her novel, *Pride and Prejudice*, which begins with the sentence quoted above, was first published in 1813. Still in print today, it has also been made into at least eleven movies, four of which were released since 2000, including a Mormon and a Bollywood version. In this class, we will read the novel in the context of the gender and class norms at the time Austen wrote her book and then consider how Austen's exploration of universal truths is reinterpreted in more contemporary film versions of this novel. In exploring Austen's creation and the many reinterpretations of her work, we will use both analytic and creative writing assignments as well as class discussion to examine how context informs creativity and how creativity informs analysis. You most definitely do not need to be a creative writer to take this class. (4 quarter hours)

**CCA 213 | MINDFULNESS MEDITATION | 2 quarter hours
(Undergraduate)**

Research shows that mindfulness cultivates skills to manage stress and build attention, focus, and resilience. This experiential course is an introduction to mindfulness. Through it, students will learn the principles of mindfulness, develop their practice, and apply the skills to their daily life. Students will learn strategies to skillfully develop their capacity to enhance mind-body awareness of present-moment experience. These practices have many benefits, such as improving health and wellbeing, deepening relationships, and enhancing engagement in learning, work, leisure, and civic activities. The class is taught in a secular manner drawing on western modalities of neuroscience and psychology, as well as Zen Buddhism. Students will study theory and research in the field of mindfulness and the emerging science that shows the beneficial effects on physical and mental health and well-being. This two-credit online class will consist of five modules, three Zoom sessions, readings, journal keeping, mindfulness practice sessions, and a personal mindfulness project.

**CCA 215 | FILM NOIR | 2 quarter hours
(Undergraduate)**

In this course we will screen and discuss select noir films and develop skills of viewing and analyzing them closely. Highlighted topics will include the concept of genre in film; the relationship of genre codes to creativity; the dynamics of form and content; the tension between commerce and art; the auteur theory; psychologies of the divided self; representations of masculinity and femininity; and the question of what these films say about American society, post-World War II. (2 quarter hours)

**CCA 216 | HOLIDAY FILMS | 2 quarter hours
(Undergraduate)**

This course uses the holiday genre to introduce students to a range of perspectives from which to interpret and analyze films and other popular media. Using a selection of screenings and accompanying readings, students will identify the characteristics of the holiday genre, paying particular attention to the role of tradition and to the relationship between the individual and the community. They will also consider the broader cultural contexts of these films, analyzing them from historical, business, and ideological perspectives. By the end of this course, students will have gained confidence in employing critical approaches to media analysis, while interpreting and appreciating a diverse selection of holiday films and "very special" TV episodes. There will be no required textbook for this course, but students will be asked to rent films and/or view them on a subscription streaming service like Netflix.

**CCA 217 | MINDFULNESS MEDITATION | 4 quarter hours
(Undergraduate)**

Mindfulness meditation provides many different ways to broaden our awareness of the world around us, heighten our powers of concentration, deepen our understanding of our experience, and cultivate creative and transformative ways of being in the world. Many approaches to mindfulness meditation draw on ancient religious and spiritual traditions from around the world. So mindfulness meditation is compatible with and can enhance whatever religious or spiritual commitments you may have. But mindfulness meditation does not require religious or spiritual interpretations. It can be practiced as a very powerful path to becoming a creative, healthy and effective adult. In this course, you will learn what mindfulness meditation is and various ways in which it can be practiced. We will explore in particular how mindfulness meditation can enhance creativity, address the ethical challenges of contemporary life, and foster collaborative learning. Class sessions will involve extensive practice in mindfulness meditation, listening and dialogue. You will be expected to maintain and reflect on a daily mindfulness meditation practice for the duration of the course. (4 quarter hours)

**CCA 220 | YOGA: PHILOSOPHIES AND PRACTICES | 2-4 quarter hours
(Undergraduate)**

This course combines an introduction to yoga and meditation techniques with an examination of the scientific and philosophical knowledge of yoga to improve health. Course is appropriate for beginners; no previous experience needed. Mats and props provided.

**CCA 225 | LIVE SUMMER MUSIC IN CHICAGO: A CHICAGO EXCURSION
COURSE | 2 quarter hours
(Undergraduate)**

The course introduces people to three of the most exciting and rewarding institutions in Chicago music: the world-famous Chicago Symphony Orchestra at Symphony Center downtown; the fabulous training orchestra of the Chicago Symphony Orchestra, known as the Civic Orchestra, also downtown; and live top-name jazz at the Jazz Showcase. We learn the background of these institutions, the nature of the arts they perform, and the terms used to describe and appreciate those forms. Most importantly, we experience, in person, the great music that they play!

**CCA 227 | ART AND SELF | 2 quarter hours
(Undergraduate)**

Although we take dozens of selfies, there are internal aspects to the interior self that a photo will miss. A Journal/sketchbook can hold ideas and act as a reflection of internal meanderings. During 5 weeks, we will explore the contemplative drawing practices of mandala (Hindu/Buddhist from East Asia), mind maps (popularized by 20th Century psychology), and dream drawings (First Nations peoples of Australia and South America). Students will use these methods to reflect on their own lives, drawing and writing in their 'image journal'. These ideas will be mined to create a self-portrait. No prior experience in art is necessary to succeed in this course. Students will supply their own art materials and find a quiet practice space. (2 quarter hours)

**CCA 231 | VISIBLE & INVISIBLE CITIES | 4 quarter hours
(Undergraduate)**

This course looks at THE CITY through the lenses of four philosophical domains: ontology, epistemology, ethics and aesthetics. Through carefully curated short readings of the most important texts of classical, modern, and contemporary writers, students will be introduced to the big philosophical questions in these four domains as they apply to life in a great city.

CCA 242 | AMERICAN HORROR FILMS: A CULTURAL HISTORY | 2 quarter hours**(Undergraduate)**

Horror is one of the most beloved genres in American cinema. In this course, we will explore five of the most enduring horror subgenres: the slasher film, the haunted house film, the home invasion film, the monster film, and the cosmic horror film. Through analysis of the films themselves, as well as through exploration of the films' historical and cultural contexts, we will shine a light on the darkest corners of the American psyche, looking for all the fears—interpersonal, economic, existential? that we're too afraid to face and too ashamed to admit.

CCA 249 | SOCIAL MEDIA: CREATING CONTENT | 2 quarter hours**(Undergraduate)**

In this class students will learn about many of the various social media platforms (Facebook, Twitter, TikTok, Instagram, Reddit, etc) and how to create content that succeeds on each platform. Students will examine how brands and organizations use social media, learn how to create content for specific audiences, discuss how influencers and brand partnerships exist in the social media ecosystem, learn how to creatively repurpose content over a series of posts, and participate in content workshoping with their peers. The second half of this course puts the students in the shoes of a social media team where they will submit a final presentation that showcases their work.

CCA 250 | INTRODUCTION TO RECREATION AND SPORTS MANAGEMENT**| 4 quarter hours****(Undergraduate)**

This course will expose students to management theory, principles, administrative processes and functions with emphasis upon ethical practices and management procedures in recreation and sports.

The course includes the examination of the roles, interrelationships, and uses of diverse leisure delivery systems to promote community development and equitable business practices. Focus will also be placed on understanding career options in the Recreation and sport industry and preparing for employment.

CCA 251 | PROGRAMMING PRINCIPLES AND APPLICATIONS IN RECREATION AND SPORTS | 4 quarter hours**(Undergraduate)**

Foundation for designing, planning, delivering, and managing recreation and sport events. Recreation and sport programming is the overall management process in which leisure service professionals plan, promote, conduct, supervise, and evaluate program services within the context of a specific organization. This course is designed to provide students with an understanding of recreation and sport programming in a variety of settings and situations for diverse participants.

CCA 255 | SELF EXPLORATION: INSIDE OURSELVES, OUTSIDE WITH OTHERS | 4 quarter hours**(Undergraduate)**

Exploring the self can be a very personal and satisfying experience. It can provide clues as to how you interact with others, accomplish daily tasks and how to become a more happy, productive and respected individual. Students in the course engage in self reflection in a collaborative learning format where they learn about themselves and observe the trends and conclusions of the class. Topics to be explored include family origins, gender perspectives, personality traits and development, self awareness and identity, creativity, and professional and moral perspectives.

CCA 256 | WORKPLACE AND PROFESSIONAL ETHICS | 4 quarter hours**(Undergraduate)**

This hybrid-learning course is open to all DePaul undergraduates. It provides a thorough grounding in the theoretical and applied nature of work-based ethical decision-making. We engage the tenets and assumptions of four major ethical perspectives, using them to examine the meanings and implications of morality in professional life. Using the tools of reason, we investigate obstacles to ethical decision-making in one's and others' professional behavior, and apply our learning in the writing of a personal ethical code. (2-4 quarter hours)

CCA 281 | LIBERAL ARTS IN ACTION: BRAVE NEW WORLD AND NINETEEN EIGHTY-FOUR: DIVERGING DYSTOPIAS | 2-6 quarter hours**(Undergraduate)**

The Liberal Arts in Action course directs students to analyze an engaging topic - in this case, the two preeminent dystopian fictions of the last 100 years, Aldous Huxley's Brave New World and George Orwell's Nineteen Eighty-Four – from multiple perspectives in the liberal arts. Students strengthen their problem-solving skills by drawing upon the ideas and methods of three different liberal arts disciplines. The learning activities clarify how the liberal arts can be put into action to ponder and address problems. The course strengthens students' development of critical thinking and academic writing across the curriculum. Students also will learn about resources that will be useful for their academic success at DePaul.

CCA 285 | WORK, PLAY, REST: NAVIGATING COMPLEXITIES OF ADULT LIFE | 4 quarter hours**(Undergraduate)**

Adult life has become complex. With expectations from family, school, work, home, social pressures, technology and social media, it sometimes feels impossible to keep up. When the news bombards us or becomes frightening, and the world around us feels uncertain, how do we make sense of things and find our way forward? In this course, we will begin from the place that human beings are full of creativity, ingenuity, resourcefulness, generosity and hope. Our very lives and the world around us will be our subject matter - our need to work, our bodies' need for rest, and our enjoyment of leisure and recreation. Where does stress, expectation and anxiety come from, how are these held in the body, and what can we do about it? And, how has story, movement, music and sound, humor, popular entertainment and fun helped humans get through the day, navigate relationships, and find more ease? By engaging in simple creative practices in and out of class and considering what might be useful for individual and collective well being, the goal is for students to create a toolbox of approaches for navigating life's complexities to carry forward beyond the class.(4 quarter hours)

CCA 322 | PROBLEMS AND ISSUES IN CONTEMPORARY ETHICS | 4 quarter hours**(Undergraduate)**

An introduction to moral philosophy with emphasis on the conflict between "moral relativism" (or "subjective" ethics) on the one hand and "moral realism" (or "objective" ethics) on the other. During the course you will be introduced to classic theories and leading figures in the history of ethics, from Plato and Aristotle to Kant and Nietzsche. Course content will focus on issues (e.g., poverty, drug use, capital punishment, sexual behavior, euthanasia, biomedical research, animal rights, political violence) at the center of contemporary ethical debate in the United States and throughout the world. (4 quarter hours)

CCA 342 | LEARNING ART HISTORY THROUGH THE ART INSTITUTE OF CHICAGO | 4 quarter hours (Undergraduate)

The Art Institute of Chicago is one of the nation's premiere art museums, with a collection that offers wide opportunities for the study of art. This course will examine great paintings in the museum from the Middle Ages up to contemporary works. Students will deepen their knowledge of art history and how to study a painting, develop an overall knowledge of major periods and trends, as well as gain insights into the lives of the artists. Students will also gain a knowledge of the museum itself as a starting off point for further studies. Class will meet at the Art Institute, Michigan and Adams, at the front information desk. (4 quarter hours)

CCA 357 | CATHEDRALS OF ENGLAND: A PILGRIMAGE | 4 quarter hours (Undergraduate)

This study abroad program brings students to England - London, York, Canterbury, and other sites - to experience among the most impressive medieval cathedrals in the world. The travel segment is designed as a pilgrimage to the cathedrals because that is how people in the Middle Ages visited them, but also because that form of travel was, like the Silk Road, an early form of international commerce. As with globalization today, medieval pilgrimage involved people bringing not just goods but ideas across national borders, irrevocably impacting and being impacted by the cultures through which they traveled. As with pilgrimage, students in this program will share a collaborative journey of discovery and cultural exchange as they engage with England's medieval past and its post-Brexit present.

CCA 358 | CATHEDRALS OF ENGLAND II: A PILGRIMAGE | 4 quarter hours (Undergraduate)

This study abroad program brings students to England - London, York, Canterbury, and other sites - to experience among the most impressive medieval cathedrals in the world. The travel segment is designed as a pilgrimage to the cathedrals because that is how people in the Middle Ages visited them, but also because that form of travel was, like the Silk Road, an early form of international commerce. As with globalization today, medieval pilgrimage involved people bringing not just goods but ideas across national borders, irrevocably impacting and being impacted by the cultures through which they traveled. As with pilgrimage, students in this program will share a collaborative journey of discovery and cultural exchange as they engage with England's medieval past and its post-Brexit present.

CCA 365 | JAZZ AND CHICAGO | 2 quarter hours (Undergraduate)

This short course will introduce the student to the pleasures and enrichment of jazz. Students will learn what jazz is, learn about its fascinating history and some of its most influential players, and learn about the special role that Chicago has played-and still does play-in great jazz. In the classroom we'll hear records, view videos, engage the instructor in question-and-answer sessions, and hear stories about this unique musical art form and Chicago's ongoing role in it. The instructor, a jazz writer and longtime jazz drummer, will enliven the course with personal anecdotes covering a considerable part of Chicago jazz history. (2 credit hours)

CCA 367 | EXPRESSIVE ARTS THERAPY | 4 quarter hours (Undergraduate)

This course offers a multi-arts approach in which different art modalities are woven into the therapeutic process as appropriate to a client's situation. It is grounded not in any particular techniques or media but in the capacity of the arts to respond to human suffering. Various arts--poetry, movement, drawing, painting, journaling, improvisation, music, and sculpture--are used in a supportive setting to facilitate growth and healing. Expressive arts processes have been used successfully in almost all psychotherapeutic contexts, ranging from work with the severely ill to the facilitation of human growth and potential. There is a growing use of the arts in health education, hospice work, and in community art projects especially after catastrophic events. The class will be conducted in a workshop format in which theoretical content will be combined with experiential learning. Lecture, discussion, audio-visual presentation, experiential exercise, guest speakers, and field trips comprise the structure of the class.

CCA 396 | INTRODUCTION TO ART THERAPY | 4 quarter hours (Undergraduate)

This experiential class will introduce students to concepts of art therapy and other expressive arts. It will address the therapeutic use of art making by people who experience illness, trauma, or challenges in living, as well as by people who seek personal development and general well being. By participating in expressive arts activities and reflecting on the products and processes, students will learn how art therapy can help people increase awareness of self and others, cope with symptoms, stress, and traumatic experiences; enhance cognitive abilities; and enjoy the life-affirming pleasures of making art.

Core Curriculum Human Community (CCH)

CCH 110 | ESSENTIALS OF TRAINING AND DEVELOPMENT | 2 quarter hours (Undergraduate)

This is a 5-week, 1-competence course on Employee Training and Development. Students will learn the basic processes of employee training and development, including needs assessment, theories of learning and behavior change, training design to support appropriate selection or development of training, delivery of training, issues of transfer, and assessment of results. (2 quarter hours)

CCH 116 | PSYCHOLOGY OF MALE DEVELOPMENT | 4 quarter hours (Undergraduate)

This course focuses on the development of boys from infancy through adulthood within socio-cultural context. We therefore address in addition to gender, the impact of race, ethnicity, class and related issues of societal /governmental failures when it comes to non-voting children. We cover why boys have more trouble at school, more problems with anger, and more incarcerations than girls or boys of higher social class, but our focus will be on their capacities and how those in power can help them thrive rather than present obstacles in their path from birth onwards. In my work in Chicago schools from Englewood to Rogers Park, I found young boys and teens very capable of caring and empathy but not reinforced by adults to develop these skills. This course suggests ways to change that and help teachers, parents and society not stereotype boys or give up on them so early in life. We will focus on how boys can develop fully as men of character and care, who can succeed in relationships, as parents, at work and in their community. We will learn of advocacy work to convince society to improve the conditions in which boys live. We draw upon the work of the Search Institute, the book "The Men They Will Become" by Eli Newberger (free online) and other current research. We will view workshops including feminist Judith Jordan's "Raising Competent and Connected Boys" and learn of local and national efforts to support young boys development.

CCH 118 | MAKING SOCIAL CHANGE: THE LEGACY OF THE 1960'S | 2 quarter hours (Undergraduate)

In the first twenty years following World War II, Americans participated in the democratic process and in civil society in record numbers. They participated in public meetings, belonged to labor unions, joined churches, and formed professional societies. These civic structures and habits of involvement empowered citizens to believe they could make a difference in their communities and laid the groundwork for some of the major social movements of the second half of the 20th Century. Civil rights, second-wave feminism, gay rights, and Latino rights all have their roots in the 1960s and continued their work over the following decades. In this class, we will explore civic engagement through the lens of our recent history. We will look at how these movements developed and analyze how they achieved their goals. We will take lessons from our predecessors and apply them to our own efforts to make a contribution to the lives of people in our local, national or global communities. (2 quarter hours)

CCH 140 | WRITING WITH SOURCES: APA STYLE AND CITATIONS | 2 quarter hours (Undergraduate)

Writing Toolkit courses introduce, deepen and provide practical engagement with specific topics in writing and rhetoric. These online courses allow students to engage with their peers and instructors through asynchronous and synchronous elements. In Writing with Sources: APA Style and Citations, students will deepen their understanding of correct ways to use secondary sources in academic writing. Students will practice summarizing, paraphrasing, synthesizing, and citing source material, while gaining a deeper knowledge of the basic components and moves needed to write a paper using APA Style.

CCH 141 | CONFRONTING WRITER'S BLOCK | 2 quarter hours (Undergraduate)

Writing Toolkit courses introduce, deepen and provide practical engagement with specific topics in writing and rhetoric. These online courses allow students to engage with their peers and instructors through asynchronous and synchronous elements. In this course, students will explore the potential causes of writer's block and practice strategies for overcoming it.

CCH 142 | MECHANICS OF GOOD WRITING | 2 quarter hours (Undergraduate)

Writing Toolkit courses introduce, deepen, and provide practical engagement with specific topics in writing and rhetoric. These online courses allow students to engage with their peers and instructors through asynchronous and synchronous elements. In this course, students will learn how to improve the style, clarity, and correctness of their writing. The course will help students expand their knowledge and build confidence in their control of writing mechanics including, rules of grammar, sentence structure, word choice, parts of speech, and punctuation. Students will learn how to fix the most common mistakes that writers make. They will also learn when, why, and how to break the rules. Through weekly readings, discussions, and short, focused work using a current writing assignment of their own, students will identify and address areas for improvement in their writing.

CCH 155 | ANALYZING LEADERSHIP | 4 quarter hours (Undergraduate)

This course provides a framework from which to identify and analyze leadership. Leadership occurs in all aspects of life, including: business, politics, sports, society, religion, family, education, and culture. But what is leadership? The Merriam-Webster on-line dictionary defines leadership as "the act or an instance of leading," which provides us with little insight. On further investigation, however, the dictionary defines "lead" as [guide] on a way especially by going in advance. Where there is a leader, then, someone or something must follow. This course first explores the interrelationship between a leader and his or her followers and looks at the effect they have on each other. "Good" leadership traits (i.e., effective) and "bad" leadership traits (i.e., ineffective) are then studied from the perspectives of the leaders, the followers, and outsiders. Finally, this course takes a look at leadership from an international perspective. (4 quarter hours)

CCH 165 | CHINA: MONEY, POWER AND THE 21ST CENTURY | 4 quarter hours (Undergraduate)

The greatest migration of people in the history of the world is occurring right now, in China. Hundreds of millions of people, whose families have lived in rural China for thousands of years, are moving to rapidly urbanizing cities. This course analyzes, through the voices of the Chinese people, the dramatic impact of this social and economic revolution upon families and individuals. These changes are having a worldwide impact upon economics, trade and the new world order. Through lecture/discussions, videos, readings, on-line discussion boards and independent research, students will have the opportunity to form their own viewpoints as to the impact of globalization upon one of the oldest civilizations on earth. (4 quarter hours)

**CCH 192 | THE ART, SCIENCE AND PSYCHOLOGY OF FOOD | 4 quarter hours
(Undergraduate)**

We have many connections to food. Food sustains us but it has meaning that extends far beyond basic nutrition. Eating is an individual pleasure and comfort, a tool for creating and sustaining social bonds, and a way to express one's cultural identity. Food is tied to many aspects of life including culture, politics, agriculture and the environment. Americans have become disconnected from both the production of our food and from the joy of eating it and suffer from food related health problems such as diabetes, obesity and eating disorders. In this class we will explore the myriad of food-related habits and choices, that determine how what and why we eat. This experiential class moves beyond specific dietary guidelines by presenting concepts and skills that will help you reframe your connections with food. We will explore the multiple dimensions of food and eating from an individual, community and national level. We will explore the true meaning of nourishment. Topics include: identifying personal eating styles, mindful eating exercises, the slow food movement, locating Chicago food deserts, a field trip to a popular Chicago organic garden/restaurant, guest speaker from a Chicago restaurant mural artist, examining types of hunger and nourishment, and issues involving food and ritual, food and story, food and psychology, food and art. We will combine art, film clips, lectures, field trip, research, and mindful eating skills.

**CCH 203 | RESILIENCE FOR CIVIC ENGAGEMENT | 2 quarter hours
(Undergraduate)**

It can be meaningful and invigorating to contribute to change in your community and the world... and, it may also be exhausting! When the causes in the world we care about feel urgent and pressing, our ability to rest and recover often fall to the wayside, and we may not feel we have permission to take time out. In fact, in these times finding ways to be resilient is vital and enhances our ability to contribute. Beyond adaptability and bouncing back, resilience skills involve how we cope with adversity, practice mindfulness, and stay connected to others and our purpose. In this short course, our very lives and the world around us will be our subject matter. Students will tap into their unique creativity and imagination to identify what resilience practices serve their personal wellbeing and their ability to meaningfully contribute to a changing world.

**CCH 209 | CONSUMER BEHAVIOR INSIGHTS | 4 quarter hours
(Undergraduate)**

In the Consumer Behavior Insights course, students explore the processes that consumers use to make decisions. Understanding of consumer segments is developed and applied to create communication strategies using a decision-making framework. Through coursework, students demonstrate an understanding of various topics including how market intelligence is collected, market segmentation, the impact of various cultural influences on behavior, elements of persuasive communication and development of consumer-oriented strategies. Cultural norms influence receptivity to marketing communication messages. In-depth consumer knowledge of a sub-cultural segment is learned and applied as students conduct market research. Based on analysis, students develop communication objectives, positioning statements and strategies for consumer communication. The role of mass media is examined in two distinct areas. Mass media influence cultural values by reinforcing norms for consumer needs and wants. Mass media are also important means for communication of targeted advertising messages. (4 quarter hours)

**CCH 219 | THE FIGHT FOR HUMAN RIGHTS: ONE WOMAN'S CRUSADE | 4 quarter hours
(Undergraduate)**

Helen Prejean is a leading human rights activist in the United States. For the past 30 years, she has helped shape conversation about equal treatment for all within the criminal justice system, especially persons of color and the materially poor. *Dead Man Walking*, the eyewitness account of her experience accompanying condemned prisoners to execution, has had a major influence on discussion of violence, poverty, civil rights, criminal law, and social justice. In this course, we use her work and interact with her personally to study power inequities across race and class lines that perpetuate injustice and examine her strategies for reform.

**CCH 220 | FRAUD IN REAL WORLD ORGANIZATIONS | 2 quarter hours
(Undergraduate)**

In this 5-week course, students will learn about common fraud schemes in the workplace, how to recognize them, the proper actions to take in response, and the long-term effects of undiscovered fraudulent acts. Students will achieve objectives by using online interactive scenarios designed to sharpen detective skills, reading articles focused on prevalent fraud schemes, and completing activities to learn how to prevent fraud in their own organizations. The course is geared to those with little or no accounting experience.

**CCH 221 | PROFESSIONAL SPEAKING SKILLS FROM ZOOM TO ROOM | 2 quarter hours
(Undergraduate)**

Authentic, credible oral communication is paramount to attain professional and personal success. The purpose of this course is to hone each student's ability to orally communicate effectively and with ease. Regardless of the starting point - as a beginner or a seasoned speaker - we will identify personal strengths and improvement areas, then work upward from there. To accommodate today's high demand for online communication (Zoom, Google Meet, WebEx, et al), instruction will focus on both virtual and in-person delivery. With an emphasis on the professional environment, we will explore a variety of common scenarios. Students will gain practical techniques to boost performance and shine - ranging from formal presentations to meeting facilitations to impromptu speaking. Because we represent different industries, backgrounds, and experience levels, we will employ a mix of individual and collaborative activities. The latter will ensure that we are capitalizing on resources within our unique learning group. Students will be encouraged to select topics relevant to their respective careers or areas of study. As well, students have the option to work on their real-life speaking scenarios(s), provided it fits within the assignment parameters. (2 credit hours)

**CCH 222 | FACILITATIVE DIALOGUE | 4 quarter hours
(Undergraduate)**

This course aims to help students understand the psychology surrounding difficult, emotionally volatile interpersonal situations in order to facilitate appropriate dialogue to arrive at a solution. These situations can include: confronting an uncooperative coworker, assessing alleged wrongdoing by a student, addressing resistance in a patient, providing feedback to a friend, or meeting the needs of a disgruntled customer. In these situations, our own behavioral and verbal actions are important determinants in the direction, duration, and consequences of the interaction. Given the potential for us to be hostilely confronted, and for those whom we are talking to for them to act defensively, we often have to manage our own emotions while trying to quickly assess the situation to facilitate dialogue. Students will learn, develop, and practice a framework to more effectively manage these situations. This course is appropriate for those in professional settings such as human resources, patient- and service-oriented industries, counseling, education, leadership development, in addition to personal settings where facilitative dialogue is necessary.

**CCH 223 | GAMIFICATION FOR WORKPLACE AND CLASSROOM LEARNING | 2 quarter hours
(Undergraduate)**

This course will focus on introducing students to the various ways in which games are used to educate, train, and motivate people towards non-game goals. Students will learn the basic principles of how gamification works, analyze examples of gamification in practice, learn various tools for creating a gamified experience, and design a gamified training exercise for adult learners.

**CCH 224 | SOCIAL MEDIA ANALYTICS & MEASUREMENT | 2 quarter hours
(Undergraduate)**

How do you know if your social media posts are taking off? This course focuses on looking at data behind social media likes, retweets, and upvotes to analyze and determine what works. Students will learn how to collect and analyze data, differentiate the importance of various statistics, use different measurement tools, and learn advanced measurement tactics.

**CCH 230 | FRANCE AND THE SILVER SCREEN: MODERN HISTORY THROUGH FRENCH CINEMA | 4 quarter hours
(Undergraduate)**

This course will explore central issues in the history of modern France through the lens of cinematic representations analyzed in historical context. Students will deepen their knowledge of the events and figures in French history and examine change and continuity in such phenomena as the rise of the politically-conscious urban working-class. We will also consider how French society has confronted gender difference and religious pluralism. This course also includes a focus on representations of war and militarism in film, particularly considering the rise of anti-militarist film in the aftermath of the First World War, and the role of violence in colonialism struggles in Algeria and Vietnam. This course will interpret the ways in which films portray historical events and how films contribute to public understanding of history. No prior knowledge of French language is required; all films will be in French with English subtitles.

**CCH 232 | FRANCE IN THE TWENTIETH CENTURY | 4 quarter hours
(Undergraduate)**

This course will examine the major events and themes of twentieth-century French history, engaging with critical issues of war and society, empire, gender, citizenship, immigration, and the politics of memory. Topics will include the impact of the First World War on the French state and society; the political radicalization of the interwar period; the emergence of anxieties surrounding gender roles; the fall of France in 1940 and subsequent German occupation, with a particular focus on the politics of collaboration and resistance; the impact of colonialism and decolonization; the strikes and protest movements of 1968; and debates over immigration and multiculturalism in the 1980s and 1990s, including the rise in popularity of the extreme right-wing National Front and the activism of second-generation French citizens of North African descent.

**CCH 233 | LEGACIES OF SLAVERY AND ABOLITION IN ILLINOIS | 4 quarter hours
(Undergraduate)**

Understanding our history can empower us to contribute to the present, and even more so when it is the history in our own backyard. This course will unpack the complex history of the presence of slavery in Illinois, including pro-slavery forces in the nineteenth century and the anti-slavery activists who fought against slavery in Illinois and Illinois stops on the Underground Railroad. In the first half of the quarter we will learn about the little-known history of slavery practices, indentured servitude, sundown towns, Black Codes, and even lynching in Illinois history. In the second half of the quarter we will study the rise of abolitionism and anti-slavery voices, with a focus on key figures who led change, including instrumental figures who kept Illinois from becoming a slave state. A focus on how these inherited legacies impact Illinois residents and communities today will be threaded into discussions and assignments throughout the course.

**CCH 234 | COUPLES PSYCHOLOGY AND INTIMATE PARTNER CONFLICT | 4 quarter hours
(Undergraduate)**

The desire and pursuit of romantic love and partnership is a normal part of psychological development. This course will examine the psychology behind how couples become attracted to one another by focusing on the relationship between emotions, thoughts and behaviors and the dyadic environment in which they function. Students will learn about healthy partnerships as well as how conflict arises between couples including the context in which behaviors such as abuse and violence manifest. This course will also examine cultural factors that influence couples psychology.

CCH 236 | CULTURAL COMMUNICATIONS IN CUBA: WHO TALKS TO WHOM IN SCHOOLS AND CAFES | 4 quarter hours**(Undergraduate)**

This study abroad course will provide participants with a foundation in the theories of intercultural communications. They will observe how people from different cultures communicate in public spaces, cafes, schools and other institutions and evaluate how communications are affected by place. Through their stay in Havana and a day trip to Vinhales, participants will analyze how different socio-cultural factors interact to shape individuals and interaction patterns in these different settings, as well as in the United States. They will engage in global communication and evaluate the impact of communication differences that diverse political, religious, social, ethnic and educational backgrounds have on individuals communicating within an organization or individually. Prior to departure, participants will use interactive, online technology to engage in cross-cultural communication and to create criteria for evaluating and comparing communication patterns. In Cuba, participants will collaboratively use the criteria to analyze cross-cultural aspects of language and interactions in various settings from social and political perspectives. The trip duration is 7 days. The readings and activities ground students in recent theories of intercultural practice and provide a framework for students to become interculturally competent. Students will be staying in small groups in Casa Particulares, similar to Bed and Breakfasts, and hosted by Cuban families. The activities tentatively planned include touring Old Havana and the Plaza de la Revolucion, a visit to the Museo de la Revolucion, a visit to the Callejon de Hamel street fair, a day in rural Cuba to visit a tobacco farm and the Sierra del Rosario Biosphere Reserve, a visit to the Akokan community and the Casa de Africa, and a day at the beach. An important part of the curriculum are visits to local elementary schools, guest lectures with local university professors and an afternoon and evening with university students.

CCH 238 | ENGAGING RESILIENCE IN ADULT LIFE | 4 quarter hours**(Undergraduate)**

Building & Engaging Resilience (in Adult Life) (4 credit hours) (Fac: Matamonasa): An ancient proverb reads: "Fall down seven times. Stand up eight." But how? What's involved in such flexibility, adaptability, tenacity, hardiness and resilience? What understandings, values and skills help? How does one develop these and nurture them across an adult lifetime? Through this seminar, participants will explore various concepts, models and "best practices" for growing, rebounding and selfguarding one's resilience given the challenges and uncertainties of adult life. (Questions? Contact instructor at amatamo1@depaul.edu.)

CCH 239 | BUSINESS, TECHNOLOGY AND OUR GLOBAL FUTURE | 4 quarter hours**(Undergraduate)**

Students will study the latest changes in the fields of intercultural communication and leadership development in today's global corporations, including reading interviews from some of the world's leaders in manufacturing, energy, telecommunications, and health care from numerous countries. This course combines hard science with cutting-edge organizational research-based case studies in today's trans-cultural global corporations. Students study key behaviors needed today to be successful in a global corporation, including cultural self-awareness, frame-shifting, inviting the unknown, third-way solutions, and others. Students will also study how "disruptive technologies", mobile internet, automation of knowledge work, cloud technology, next generation genomics, 3D printing, advanced materials, and renewable energy are changing and will continue to revolutionize global corporations. This course concludes with an analysis of the effects of social justice and corporate social responsibility on today's global corporations. (4 credit hours)

CCH 240 | VALUES-BASED LEADERSHIP | 2 quarter hours**(Undergraduate)**

Over the past few decades, we have observed a number of leaders and their responses to a variety of major changes and crises—civic unrest and pandemics, just to name a few. And at the helm of societies resolving these issues have been leaders who can be categorized as "values-based." This term has its foundation in leading by a set of values or principles, or at least the examination of those values or beliefs. When applied properly, values-based leadership is risk taking, conveys a shared vision, empowers constituents, gives and accepts openness and honesty in relationships, and assumes responsibility for results. In this course we will first develop a broad general understanding of leadership, then unpack our understanding of values-based leadership, and the role it plays in both good and difficult times. The course will examine the impact of select leaders—both current and past—who exemplify values-based leadership qualities. Finally, students will also examine their own values and personal approach to values-based leadership.

CCH 243 | POST-TRAUMATIC SLAVE SYNDROME AND ITS AFFECTS | 2 quarter hours**(Undergraduate)**

This FDIS seeks to inform students about the nature of trauma, and the impact of post-traumatic slave syndrome (PTSS) on African-American life and culture. In the context of this course, both of these phenomena are associated with 250 years of U.S. chattel slavery, followed by decades of de jure and de facto racial discrimination. It is a subject that has historical, psychological and sociological implications and thus is a must for students pursuing undergraduate and/or graduate work in these areas. With this primary goal in mind, students will be asked to review one of two texts on the subject, Joy DeGruy-Leary's Post Traumatic Slave Syndrome: America's Legacy of Enduring Inquiry and Healing or Thom Burrell's Brainwashed: Challenging the Myth of Black Inferiority, along with selected readings where appropriate.

CCH 249 | NEW YORK: AN HISTORICAL OVERVIEW | 2 quarter hours**(Undergraduate)**

This Faculty Designed Independent Study (FDIS) encourages students to study the history of one of our nation's oldest and most vibrant cities: New York City, including its five boroughs: Manhattan, the Bronx, Brooklyn, Staten Island, and Queens. The readings associated with the course provide a skeletal history of the city's nearly four hundred years. Students are then asked to read a series of articles that elaborate on key historical events and/or eras, i.e. the city's role in the American Revolution, the Great Depression, the impact of deindustrialization and suburbanization, and development of art and culture across different epochs, among other areas. Students are finally asked to supplement readings and a major homework assignment with a five-page paper that mirrors the spirit of their competence. The collection of readings and video presentations offer a fascinating, insightful, and fun look at one of the most interesting and intriguing American metropolises.

**CCH 253 | FAMILY LIFE: THE PAST, PRESENT AND FUTURE OF FAMILIES
| 4 quarter hours
(Undergraduate)**

In history, families have been defined as mother, father, and children. In our current experience, more families differ from that model than comply with it. Family structure is evolving. Missing fathers, Single parents, and Blended families are only a few of the changes to the family structure that have occurred with some significance beginning in the 1950s. (2-4 quarter hours) What influences family structure? Do economics and education make a difference? Are race and ethnicity important factors? What about gender, personality and religion? Is the two parent family necessary? What role do grandparents and great grandparents play in the changing family? Perhaps the most important question we can ask about the family is what comes next. What are the many ways in which families might be redesigned in the future? How do these changes impact individuals in society?

**CCH 254 | RESISTANCE DURING THE HOLOCAUST AND WORLD WAR II |
4 quarter hours
(Undergraduate)**

This course explores the history of the Holocaust in the context of the Second World War (1939-1945) with a central focus on examples of resistance to discrimination, fascism and oppression. We will explore varied forms of opposition including armed resistance, spiritual resistance, resistance through writing and identity preservation. We will read autobiographies, view documentary and dramatic films, and use museum resources to develop our understanding of resistance. Required activities include a visit to the Illinois Holocaust Museum and Education Center (Skokie, IL). We will also consider the implications of this history for making ethical choices in our world today.

**CCH 257 | PARTICIPATION AND DEMOCRACY IN AMERICA | 4 quarter
hours
(Undergraduate)**

Why don't more Americans vote? How do education, income, and age impact voting trends? Why are some Americans more interested in politics than others? How is inequality reflected in other forms of political participation, such as donating money? Do recent trends in voter ID laws help to safeguard the democratic process, or restrict it? In summary, how democratic or representative are American elections? The course begins with some famous arguments about why participation matters. Trends in voter turnout then become the primary object of study, but we also consider other forms of participation including writing members of Congress, attending political meetings and contributing money. We explore recent discoveries in behavioral psychology that are changing the strategies of modern campaigns. After taking this course, you will understand the fundamental role of participation in democracy.

**CCH 274 | THE BILL OF RIGHTS IN CONTEMPORARY LIFE AND WORK | 4
quarter hours
(Undergraduate)**

This course will be organized around a series of central questions: What is a law? Who has the authority to make one? What are the various sources of law? What is or should be the relationship between law, ethics and morality, between law and religion? What is the difference between legislative law and constitutional law? What are the legal, historical, philosophical and political sources of American constitutional law? What sort of society did the Framers of the Bill of Rights have in mind and are their ideas still applicable in 21st century America? How does the Bill of Rights fit into our constitutional framework and what rights does it guarantee? What is the relationship between the states and the federal government in guaranteeing those rights? What is the relationship between our legal system and our political system generally? What criteria do judges use to interpret laws? How does our own legal system differ from those of other countries and cultures? Are there any universal rights worth protecting? What role does (or should) science play in upholding our rights under the Bill of Rights? Possible areas to be covered are freedom of speech, religion, establishment of church and state, the right to privacy, the 4th, 5th and 6th Amendments' protections for criminal defendants and the death penalty.

**CCH 281 | LIBERAL ARTS IN ACTION: VOICE OF HER OWN: EQUALITY IN
ACTION | 2-6 quarter hours
(Undergraduate)**

On January 21, 2017, over two million women around the world marched. They marched in big cities, small towns, and on every continent. Why did they march? What was and will be the impact of their marching? What can we learn from this phenomenon? These are questions we will explore in this course using three different disciplinary perspectives: history, psychology, and rhetoric. (6 credit hours)

**CCH 282 | LEISURE FOR WELL-BEING | 2 quarter hours
(Undergraduate)**

The pursuit of happiness for most people is an important aim in life. A personal feeling of well-being includes "emotional happiness" and the rational satisfaction with one's own life. In this course you will attempt to define the term "well-being" and discover its relationship with other concepts such as mental health and life satisfaction. How does physical exercise influence well-being? How do positive and negative life events influence well-being? Do good social relationships guarantee happiness? Do the expectations one has in life with regard to income influence well-being? Is it important to set goals to achieve a high level of well-being? These and other questions will be addressed in this course. You will try to define some of things a person can do to increase his or her level of well-being. Others' ideas serve as common course content, as presented in the material assigned to this course. You will be asked to participate actively and critically, to work individually and in study groups, using your own experience as a field of analysis and reflection. Active group participation will foster a harmonic, interactive environment, which might increase positive relationships among students and foster a feeling of well-being throughout this course. (2 quarter hours)

CCH 283 | GLOBAL PERSPECTIVES OF WORK & FAMILY | 4 quarter hours (Undergraduate)

What role does the political, economic, and cultural structure of a nation play in its concepts of work and family? This course develops students' understanding of issues in the history of family and work through historical and contemporary accounts from Europe and the United States. We will take a close look at issues such as the gender division of labor, child labor, government policies on maternity, economic structure as well as social and political movements. Course materials include historical documents, lectures, films, and varied readings. Assignments will include essays, reflection journals, discussion, and a research project on work-life balance. (4 credit hours)

CCH 284 | JAZZ AGE PARIS: 1919-1939 | 4 quarter hours (Undergraduate)

This is a history of Parisian society and culture in the era between the two world wars. We will explore issues of race, class and gender in the interwar period in French society. We will also examine the role of American writers, artists, musicians and performers in the cultural world of Paris, the City of Light, and an outpost in the Harlem Renaissance. (4 credit hours)

CCH 286 | NEW ORLEANS IN SONG, STORY & STRUGGLE | 4 quarter hours (Undergraduate)

The tapestry of New Orleans culture is tremendously rich and varied. This course will concentrate on two strands in that tapestry - music from New Orleans and fiction about it. Students will learn about music forms which originated in the city or its environs and which have gone on to dazzle the world, including jazz, r&b, zydeco and funk. We will situate these art forms in social, historical and political context and examine the complex processes of invention and adaptation which have shaped them; in that regard, we will particularly highlight the development of early jazz in this unique metropolis which, though residing at the tip of North America, has been called "the capitol of the Caribbean." We will make use of Thomas Brothers' pioneering study Louis Armstrong's New Orleans as well as musical performances by the likes of Professor Longhair, the Neville Brothers, Wynton Marsalis and Dr. John. We will also learn about the carnivalesque culture of New Orleans, a pursuit that will take us into what might be called the secret history of Mardi Gras. In addition, we will read two striking literary works by artists who have a background in and fascination with the crescent city: Kate Chopin's groundbreaking novella *The Awakening* and Tennessee Williams' spine-tingling one-act play *Suddenly, Last Summer*. Moreover, we will consider the role played by New Orleans in American history and imagination as well as the role played by images and fantasies of New Orleans in struggles for social justice at the local and national level. (4 quarter hours)

CCH 299 | ASSESSING AND MANAGING CONFLICT | 4 quarter hours (Undergraduate)

Our usual method for presenting, analyzing, and resolving conflicts has centered around legalistic argument; the goal being to discover the "right" answer and suppress the "wrong" ones. However, the multiple worldviews operating in the world today make such an approach to conflict less viable. Reflecting this reality, ways of communicating about and resolving conflict have arisen that go beyond enforcement of rules or legal determinations of right and wrong. In this course, we will look at various methods for handling conflict and consider how we might apply them to personal, work, community and literary conflicts through lecture, small group work, role playing, reading, various written projects, and discussion.

CCH 300 | GLOBALIZATION AND PROFESSIONAL PRACTICE | 4 quarter hours (Undergraduate)

For decades scholars have observed a growing body of evidence and employers a growing body of experience of significant changes in the way that international business is conducted. These changes in the business world, brought on largely by globalization, present new challenges. These challenges require staff with specific skills related to global competence in order for the business to remain competitive. The goal of this course is to help students to cultivate and/or refine the skills and capabilities necessary to succeed in today's global work environment. Organized around four learning units and one major project, the class will provide each student with extensive content and resources; it will also provide a forum for assessing the competences necessary to attain success in a global workplace and a method for honing those skills each student needs to cultivate. (4 quarter hours)

CCH 306 | TRAVEL AND LEARN IN BOSTON: EXPLORING ITS ARTS AND HISTORY | 4 quarter hours (Undergraduate)

Boston is a city of many faces. It's a world class city from a cultural and educational perspective by any standard, but it competes with New York City and Philadelphia for the title of best place for American history and art. Boston has fame for the riches made by old money profits but also for its colorful mob history. With such internal paradoxes and external competitors, why choose a travel course to Boston? Here's why: In this domestic travel course, participants will walk the famous freedom train and other historic sites, visit Boston's famous art collections, and experience its diverse neighborhoods like Boston Common, Beacon Hill, and the North End. Issues such as Boston's immigrant populations, its fame as a seat of American higher education, its connection to events in American history, and its stake in the meaning of freedom and democracy will be discussed in the preparatory classes as well as in post travel learning as students work on individual projects.

CCH 315 | ECONOMICS FOR DECISION-MAKING | 4 quarter hours (Undergraduate)

The purpose of this course is to provide the modern consumer living in a global economy fueled by unabated technological progress, with basic notions to understand the path that has led to sustained prosperity. The focus is on endowing students, as householders, with conceptual tools to make optimal financial and consumer decisions throughout the life-cycle. That theoretical foundation is reinforced and exemplified with a wealth of practical applications offered through a student-friendly online interactive learning platform, which also provides a convenient means to complete weekly assignments. That online platform will help students relate what they learn to their everyday experience of active participants in the economic game. The course is divided into two modules, microeconomic and macroeconomic, and basic economic methodology is presented in both. Microeconomic topics include scarcity, opportunity costs, the law of diminishing returns, the trade principle of comparative advantage, the mechanism of the price system, the laws of demand and supply, the impact of market interventions by the government, etc. Macroeconomic topics include the forces undergirding the performance of the gross domestic product (GDP), the forces that influence inflation and unemployment, the role of fiscal and monetary policy, the workings of money and banking, the relevance of balancing the requirements of economic growth (efficiency in the use of inputs) with the necessity of attending to the needs of both society (need for equity) and the environment (need for sustainability), etc. (2-4 credit hours)

**CCH 317 | FACILITATING ADULT LEARNING | 4 quarter hours
(Undergraduate)**

In this course, students will develop and hone skills to facilitate adult learning in a variety of settings. Students will learn about concepts that inform learner-centered methods and techniques of facilitating learning. Throughout the course, they will apply various methods and techniques in various settings and reflect on how these methods influence learning. The repertoire of skills that students develop as facilitators of learning will have both immediate and future application.

**CCH 320 | LEADING FOR SOCIAL CHANGE | 4 quarter hours
(Undergraduate)**

As the call to take action for social change across spheres of professional and personal life becomes ever stronger, those who seek to engage in the work of social change are compelled to think and plan critically and creatively about what social change means, what leadership for change means, and how it can be enacted effectively. In this course we will examine theories and models for social change in relation to social action-oriented modes of leadership. Through case studies, we will explore past and present social change movements that have been enacted in community, educational, organizational, and business settings – and consider the strengths and weaknesses of those movements and how approaches to change have been implemented. Using Chicago as a field site, students will deepen their understanding of real-world applications of social change leadership theories by studying current social change processes and interviewing leaders. Students will also chronicle the development of their identities as social change leaders and design an action plan that responds to an issue relevant to their professional or personal practice.

**CCH 325 | CONNECTING THOUGHT AND BEHAVIOR | 4 quarter hours
(Undergraduate)**

This course introduces students to concepts of Cognitive Psychology. They will review the history and development of the field and explore how cognitive processes impact thought and behavior. Through an experiential learning process, students will explore the science behind such topics as perception, consciousness, memory, language, problem solving, reasoning and emotional experience and how these cognitive abilities impact their lives.

**CCH 330 | LAW IN THE BUSINESS ENVIRONMENT | 2 quarter hours
(Undergraduate)**

The influence of the law is far-reaching in the corporate world. Whether an entrepreneur, manager, administrative assistant, union employee, nonunion employee, sales representative, purchasing agent, etc., the law ultimately affects how we make decisions in the work arena. This course allows students to discover the wide range of laws affecting America's business environment. Students will learn how the law is established and developed, and be provided with tools to recognize potential legal issues that arise in daily business operations. The curriculum considers the impact of the law in the global workplace, and in commerce, business operations, employer/employee relationships, and in the regulatory environment.

**CCH 335 | HUMAN RESOURCE AND TALENT DEVELOPMENT
FUNDAMENTALS FOR MANAGERS | 4 quarter hours
(Undergraduate)**

This course is designed as an introduction to the practices of human resources (HR) in a corporate environment. It will target the practices that managers need to know such as recruiting, training, hiring, and terminating employees as well as the basics of HR law. Additional content that will be addressed includes headcount management, performance appraisals, learning & development, compensation basics, and grievance processes. This course will equip managers with the information they need to know without making them Human Resource experts but rather how to work effectively with their HR counterparts. (4 hours)

**CCH 345 | EMOTIONAL INTELLIGENCE AT WORK | 4 quarter hours
(Undergraduate)**

One's IQ (intelligence quotient) alone does not predict success in the workplace or in life. Emotional intelligence (EI) plays a vital role as well. This course provides an introduction to the field of emotional intelligence, evidence of its impact on individuals and organizations, and strategies for applying it in multiple settings. Participants will deepen their understanding of EI by exploring the research literature and completing an assessment of EI provided by 6 Seconds (<http://www.6seconds.org>). Strategies for applying EI to increase one's success and satisfaction at work and in other social contexts will also be explored. There are a several models of emotional intelligence, each with a measure used by individuals to create a profile of EI abilities, used as the basis for learning and development. Some focus more directly on the workplace or on therapeutic settings. The Six Seconds' model of EI is designed to have broad application and enable individuals to draw on EI across the various dimensions of their lives. (4 credit hours)

**CCH 359 | ETHICAL BUSINESS BEHAVIOR | 4 quarter hours
(Undergraduate)**

Ethical Business Behavior explores the ethical issues that business decision-makers face and examines the moral principles that are used to help resolve these issues. Ethical decisions in the workplace can have tremendous influence on the individuals and the corporations involved. The outcomes of unethical behavior can affect reputations, trust and career path. Results have been as severe as loss of employment, physical harm to individuals, corporate bankruptcy and even impacts to the economy. Students are placed in decision-making roles through exercises, case studies and role-playing. Reasoning skills are honed through identification of ethical issues and alternative means to analyze these issues. Ethical behavior is evaluated using analytical skills to apply ethical concepts to business situations. (4 quarter hours)

**CCH 363 | ACHIEVING YOUR WORK AND LIFE GOALS | 4 quarter hours
(Undergraduate)**

You will study the process of goal achievement from goal definition through development of a vision, review of resources and obstacles, strategic ordering of tasks and steps, effective communication and problem solving and development of an action plan. You will consider theories of goal setting, planning, communication, and negotiation, and engage in practical exercises that will require the application of theory. You will produce a completed action plan for a defined career or personal goal. (4 quarter hours)

**CCH 367 | LEISURE, RECREATION, AND HEALTH | 4 quarter hours
(Undergraduate)**

This course will stimulate your thinking about the meaning of leisure in your life. Leisure today and historically has been central to the human experience. It is an elemental experience, essential to the total well-being of every person; it is a reflection and expression of the cultural values of a society; it is an important vehicle for treatment. Leisure and recreation services are also essential for healthy communities in terms of social climate, environmental quality, and economic stability. Leisure services comprise one of the largest and fastest growing industries in the world, whether measured in dollars spent, persons served, hours of time devoted, or resources used. The study of leisure and recreation is a broad discipline, combining diverse fields of study and professional practice. This course will (1) illustrate the importance of leisure to you and your loved ones, (2) contribute to your ability to become an informed consumer of leisure, (3) question the binary relationship of work and leisure and, (4) teach you how to use leisure to increase emotional and physical health, resulting in a higher quality of life. The course will be interactive and participatory.

**CCH 387 | AFRICAN-AMERICAN STUDIES IN CRITICAL PERSPECTIVE | 4 quarter hours
(Undergraduate)**

This interdisciplinary 19th and 20th century African-American studies course examines the role of protest and resistance, the media, and cultural and artistic expression in African-American history. Vis-a-vis readings, documentaries, and discussion, the course intends to illustrate the multiple ways in which African-Americans have protested and resisted oppression while examining how such efforts have been framed in the media during varying historical eras. It defines 'media' broadly and analyzes its role, both via its traditional forms (print, television and radio) but also vis-a-vis other forms of entertainment/infotainment that were particularly unique to 19th century U.S. society (i.e. minstrelsy [1830-1920]). The course concludes with a discussion of the role of art and culture in refashioning thinking and transforming experience. The latter discussion promises to be rich and thought provoking and unearths some of the works of the raw and revolutionary artists of the 1960s while taking a careful look at novel cultural practices that emerged during this period.

Core Curriculum Scientific World (CCS)

**CCS 153 | SCIENCE FOR CITIZENS | 2 quarter hours
(Undergraduate)**

Students will learn basic knowledge of science as they engage in activities that are connected to their everyday life. They will explore their natural ecosystem and be able to describe various functions. They will engage in the scientific method through observations, hypotheses, data collection and basic data analysis. Students will apply their critical thinking based on the scientific method to local environmental or science related issues/events. (2 quarter hours)

**CCS 208 | ISSUES IN SCIENCE AND RELIGION | 4 quarter hours
(Undergraduate)**

This course develops students' understandings of the scientific and religious constructions of self in the modern world (natural and social). The institutions and bodies of knowledge comprising science, religion, and their overlap are critically analyzed. Key historic debates are examined, for example: the Vatican's trial of Galileo for his teachings of a heliocentric universe; the controversial reception of Darwin's theory of evolution; and the 2001 U.S. policy on embryonic stem cell research. Through such analyses, the course develops students' skills in making ethically-informed decisions and thus recognizing their roles in the public debates involving the intersection of science and religion.

**CCS 217 | UNDERSTANDING AND MEASURING INTELLIGENCE | 4 quarter hours
(Undergraduate)**

In this course, students examine intelligence testing and its uses in employee selection and placement. Students learn the principles of assessing human traits (reliability, validity, bias and other systematic errors), and apply them to intelligence testing. We will work to define "intelligence" and consider various approaches to intelligence, contrasting the theories of unitary vs. multiple intelligences. Students will examine the implications of the definitions and measurement approaches on different groups of people, both historically and currently, with attention to the unintended effects of the biases of test developers and the ethical implications of different approaches and uses of intelligence testing.

**CCS 219 | NEUROPLASTICITY AND THE AGING BRAIN | 4 quarter hours
(Undergraduate)**

In this course, we will examine the latest research on the aging process and, specifically, its relationship to the brain. We will cover a mix of material from psychological and, especially, neuroscientific fields. Students will also be introduced to the field of neuroplasticity, which is revolutionizing the way we understand the functioning power of the brain. Neuroplasticity, in simple terms, is the brain's ability to rearrange its connections and, therefore, its functions based on experiences. In other words, the brain has the capacity to literally change itself, based on experiences, to achieve positive results. The goals of this course are to understand how the brain works, examine its impact on our daily actions, study how aging impacts brain functioning, discover the learning and adjustment potential of the brain, and apply the principles of the 3 P's. We will use numerous examples to understand the brain, including health, work, relational, and personal settings. Students will ultimately answer the question of whether they will have an aging or reengaging brain.

**CCS 220 | FASHION AND THE ENVIRONMENT | 2 quarter hours
(Undergraduate)**

This 5-week course introduces students to the concept and science of sustainability, its relationship with the business of fashion, and strategies and work practices to shift the business to a sustainable operating mode. Coursework topics focus on defining sustainability, understanding human-induced climate change, and local and global effects that fashion has had on the Earth and its peoples. Learners will examine the impact of supply chains and apply sustainability practices to create an action plan for a fashion company. The course is self-paced and includes a pre-assessment test and modules of interactive instruction based on asynchronous lectures, videos, interactive exercises, case studies and knowledge assessments.

CCS 225 | CLIMATE CHANGE: TRANSFORMING ORGANIZATIONS FOR SUSTAINABILITY | 4 quarter hours**(Undergraduate)**

Climate change is the biggest challenge faced by society and organizations of all kinds can play a significant role in the transition to a sustainable society. In this course, students will gain knowledge concerning the latest scientific facts on climate change and the ecological crisis we face as well as how to make positive changes in their organizations. Students will learn about a range of tools to reframe cultural norms, both personally and professionally, and explore different perspectives concerning climate change. They will reflect on their personal leadership style, and gain a 'big picture' view inspired by case studies featuring pioneering people and organizations who are collaborating to take radical action. The course is designed as a fully online interactive course based on asynchronous lectures, videos, podcasts, interactive exercises, quizzes, case studies, an individual project, discussion boards and knowledge assessments.

CCS 250 | SOCIAL MEDIA MARKETING FUNDAMENTALS | 2 quarter hours
(Undergraduate)

This course will provide students with an overview of the history of the Internet and basic marketing strategies as they relate to the Internet and Web 2.0 technologies. Students will learn about how to keep abreast of new technology, how these technologies can be used to market services and products as well as how they can be used to create and maintain social networks for professional use.

CCS 256 | EVERYDAY ECOLOGY | 4 quarter hours
(Undergraduate)

Every week, we learn of typhoons and landslides, floods and hurricanes, droughts and other natural catastrophes. Scientists now agree that the major cause of climate shift is man-made, specifically our use and abuse of global energy resources. In Everyday Ecology we will analyze our energy use patterns and explore practical alternatives. The word "ecology" originates from the meshing of two Greek words meaning the "study of homes." Although the main focus of this course is the individual household, another "household" we must take into account is the economy. Ecological economics examines how both disciplines need to look toward the other to be viable long term. We will examine options to bring the earth household (ecology) and the human household (economy) together for the benefit of both. This course observes how 'man' is connected to the world around him. It allows us to see our options in response to growing concern over global climate change. Through readings, field trips, activities, discussions and an analysis of our personal use of energy, this course enables us to become increasingly aware of ecological issues. You will learn to evaluate the effect of personal choices on the earth and be introduced to alternative, 'greener' options.

CCS 259 | PREHISTORIC LIFE | 4 quarter hours
(Undergraduate)

This course promotes students' investigation of fossils to interpret the character of 3.5 billion years of biological evolution and ecological change on earth. By way of scientific reasoning, mathematical inference, and applicable technologies, emphasis is on the exploration of earliest evidence of life, development of multi-celled plants and animals, dinosaur evolution, mass extinction events, mammal diversification, human origins as well as appraisal of the societal reliance on fossil resources and the persistent debate over evolution versus creation. Learning is assessed through labs, a fieldtrip, an exam, video summaries, contributions to online discussions, and a research paper in a scientific format.

CCS 267 | NUTRITION FOR A LIFETIME | 4 quarter hours
(Undergraduate)

Today's consumers want and need to be educated about taking charge of their own health. With the current fast-paced world that has spilled over into our eating habits, food choices have become unlimited. Choosing a healthful approach to diet requires basic information about our bodies' nutritional needs. The greater our understanding of our basic bodily needs, the better we are able to make choices concerning our health. This course will offer an overview of the basic science of nutrition, with an emphasis on the relationship between disease and nutrition, and current research findings.

CCS 269 | ENERGY AND HEALTH | 4 quarter hours
(Undergraduate)

This course will provide a framework for understanding human energy systems, such as digestion and respiration, in relation to current healthcare practices to enhance their effectiveness (dietary approach, manipulation therapies, acupuncture, exercise, and meditation). We will consider connections between social and environmental variables such as constitution, stress, lifestyle, and vital physiological functions. Each class will build on the basic understanding of biological systems in relation to energy through lecture and discussion. We will review literature on various healthcare practices to discern sound approaches and practical applications. Students will cultivate an appreciation for daily health choices that cumulatively affect their health.

CCS 275 | BODY, MIND, SPIRIT: YOGA AND MEDITATION | 4 quarter hours
(Undergraduate)

Why are 20 million Americans practicing yoga? This course answers that question with an introduction to yoga and meditation techniques and the underlying scientific and philosophical principles of the system of yoga. The first half of each class will be experiential, conducted as a yoga and meditation class for beginners, providing tools to reduce stress, focus the mind, and cultivate inner peace. This first hour and a half will use yoga postures, breathing exercises, and meditation techniques. The second half of each class will use readings, reflection, and discussion to examine the scientific and philosophical knowledge of yoga as a way to ease stress, strengthen the bone and muscle structures, lower blood pressure, increase flexibility and strength, improve mind functioning, and provide spiritual sustenance. We will read *Yoga Mind Body and Spirit: A Return to Wholeness* by Donna Farhi, and *The Yoga Sutras of Patanjali*, research articles on the scientific studies of yoga's benefits from journals and websites, etc. Students will keep weekly reflection journal observations on the changes(s) they notice in themselves. This course will refresh, relax, rejuvenate. Yoga mats and other props will be provided. Bring/ wear comfortable clothes (no jeans, belts, dresses). This is a Gentle Yoga class for beginners. Yoga means to unite or yoke so course will explore the ways to unite body, mind, spirit. This course is designed to 1) help establish good health and well-being; 2) gain scientific knowledge and understanding of the various systems of the human body; and 3) explore the spiritual benefits of meditation.

CCS 281 | LIBERAL ARTS IN ACTION: RATS IN THE CITY | 2-6 quarter hours**(Undergraduate)**

This course directs students to analyze an engaging topic (here, urban rats) from multiple perspectives in the liberal arts. Students strengthen their problem-solving skills by drawing upon the ideas and methods of three different liberal arts disciplines. The learning activities clarify how the liberal arts can be put into action to solve problems. The course strengthens students' development of critical thinking and academic writing across the curriculum. Students also will learn about resources that will be useful for their academic success at DePaul. (2-6 credit hours)

CCS 285 | ENVIRONMENTAL ETHICS | 4 quarter hours**(Undergraduate)**

This course contains two distinct strands of learning: (1) the current condition of the natural world and the ways it is approached scientifically; and (2) the major premises of the most significant ethical frameworks in use today. Using this knowledge, students investigate several contemporary environmental problems, identifying their underlying causes, and analyzing various proposed solutions. This is complemented by the intensive study of major ethical perspectives, particularly those which have developed alongside, and as a consequence of, grave environmental concerns. The course project is a collaborative endeavor to integrate the knowledge and skills acquired through mastery of both learning strands.

CCS 292 | EXPLORING EARTH'S PHYSICAL FEATURES | 4 quarter hours**(Undergraduate)**

This course advances student exploration of earth's 4.5 billion year geologic record in order to evaluate the planet's evolution and the interrelationships between humans and landforms. Through the application of scientific reasoning, mathematical inference, and prevailing technologies used by geologists, emphasis is on plate tectonics, geologic time, the rock cycle, weathering, earthquakes, fluvial features, rock structures, volcanoes, mountains, plateaus, plains, glacial features, deserts, caves, and coasts. Students also assess human reliance on landforms, the economics of landforms, and cases of earth pseudoscience. Learning is assessed through labs, fieldtrips, a scientifically-formatted research paper, an exam, and contributions to online discussions.

CCS 300 | PROJECT MANAGEMENT | 4 quarter hours**(Undergraduate)**

Project Management is a business concept which has received a great deal of attention over the last few years. Business managers are discovering that the complexity of human and technological systems forces workers to organize, prepare, and monitor project development in a way which was not necessary in simpler times. In this course, students will discuss and discover methods of project organization and execution which will help them achieve efficacy and success in the workplace. This course will cover concepts in describing project goals, setting priorities, identifying needs, and designing realistic time lines. Students will learn how to execute successful projects from start to finish. (4 quarter hours)

CCS 320 | MAMMALOGY | 2-4 quarter hours**(Undergraduate)**

This course will introduce you to the origins, evolution, ecology, and biodiversity of the class Mammalia. Key topics will include mammalian anatomy, classification, genetics, reproduction, thermoregulation, locomotion, behavior, ecology, and conservation. Special emphasis will be on investigating the connections of mammalian evolutionary biology to human health issues including disease, nutrition, physical activity, injury, and overpopulation. Online learning will incorporate readings, discussions, a science 'kit' for hands-on labs, virtual labs using 3D mammals, and computer simulations. Student will also undertake collaborative experimentation and onsite inquiry of mammals at a zoological park, museum, and/or nature reserve. Prerequisite: None.

CCS 328 | GLOBAL INFECTIOUS DISEASES AND HEALTH | 4 quarter hours**(Undergraduate)**

In this course we will learn about the global burden of disease with an emphasis on understanding the critical intersection of policy, social expectations in determining how health systems function and adapt to address new challenges; and examine why some health systems are so fragile in the face of new disease challenges such as the Covid-19 pandemic. We will look at the role of globalization in introducing "western world" diseases to low and middle income countries, and we will learn about the science-based methods and tools we have to track the emergence of new disease threats, assess global disease burden, understand disease mitigation strategies, and compare our ability to measure improvements in health outcomes in well-resourced and resource-poor countries. Online learning will include readings, slide presentations, discussions, and open-source epidemiological tools to examine disease burden and trends.

CCS 329 | DATABASE DEVELOPMENT FOR MANAGING INFORMATION | 4 quarter hours**(Undergraduate)**

Using MS Office tools suite (in particular Access), this course takes students through the entire process for building a database system that will be used to capture, store and present information. In addition to database concepts like designs, reports and SQL queries, the students will discuss and analyze relationships between technology and society.

CCS 332 | BIODIVERSITY | 4 quarter hours**(Undergraduate)**

The science of Biodiversity is the study of life on earth, both past and present. It involves the exploration and measurement of the amount of genetic, species, and ecological variation on earth and is emerging as one humanity's most important and urgent endeavors. Scientific efforts to study earth's biodiversity have intensified because of our growing appreciation of the role human population growth and urbanization play in accelerating the extinction of plant and animal species. This course introduces students to the nature of science and the central issues concerning life on earth including: the current state of biodiversity, valuing life's variations, human dependence on biological diversity, the origin and extinction of species, mass extinction, critical habitats at risk, and policies and approaches to conserve biodiversity (4 hours)

Counseling (CSL)

CSL 95 | CLINICAL ORIENTATION | 0 quarter hours**(Graduate)**

Students will be oriented to the expectations and requirements of the practicum and internship experiences in Human Services and Counseling. (0 credit hours)

**CSL 96 | CLINICAL APPLICATION | 0 quarter hours
(Graduate)**

This milestone course ensures that all students have met the requirements for clinical placement. (0 credit hours)

**CSL 97 | CLINICAL PLACEMENT | 0 quarter hours
(Graduate)**

This milestone course ensures that students have secured a clinical placement that fulfills all requirements for Human Services and Counseling Program. (0 credit hours)

**CSL 200 | LEADERSHIP AND SOCIAL CHANGE | 4 quarter hours
(Undergraduate)**

This is an advanced course exploring how leadership theory interacts with organizational structures, advocacy, and social justice. The class is structured to expand from the individual to the group/organization/school level to the societal macro view of leadership. The topics of leadership development and leadership education in P-16 settings will be included. Contemporary topics in leadership will be addressed to coincide with social change and leadership. (Cross-listed with CSL 500).

**CSL 377 | SOCIAL EMOTIONAL LEARNING IN THE MIDDLE GRADES | 4 quarter hours
(Undergraduate)**

This course introduces social-emotional learning standards and their relevance and application to middle grades content area classrooms. Topics addressed include the relationship between social emotional learning and classroom management as well as bullying and cyberbullying in school communities. Co-requisites for this course are MGE 341, MGE 351 and MGE 361. In this course, students will: 1.

Senior status and Advanced Teacher Candidate Standing are prerequisites for this class.

**CSL 451 | LEGAL AND ETHICAL ISSUES IN COUNSELING | 4 quarter hours
(Graduate)**

Professional counseling involves interplay of ethics, personal values and legal implications of practice. A core component of the course is a focus on how personal values intersect with ethical decision-making. Ethical codes and ethical decision-making models related to the profession are studied so that the students will have the knowledge of professional ethical practice. An examination of local and federal laws in relation to the previously mentioned components will be examined. Students engage in case conceptualization, small group activities, role-playing with lectures, and video technology.

Admission to the Counseling Masters Program is a prerequisite for this course.

**CSL 452 | INTRODUCTION TO THE COUNSELING PROFESSION | 4 quarter hours
(Graduate)**

This introductory course provides students with a broad yet comprehensive overview of the Counseling profession. Through lectures, discussions, activities, and group work, students learn and apply core concepts and aspects of counseling including basic counseling skills, advocacy, multiculturalism, ethics, evaluation, and assessment. For most of the primary topics covered, students will take a full course on them later in the program.

Admission to the Counseling Masters Program is a prerequisite for this course.

**CSL 454 | CAREER COUNSELING | 4 quarter hours
(Graduate)**

This course introduces students to methods for assisting individuals in choosing, preparing for, and progressing in a career. Vocational testing and sources for occupational information are explored and technology tools designed for career exploration are demonstrated. The study of vocational behavior in relation to career patterns is also considered, with special attention to the analysis of empirical data and theories pertaining to vocational choice.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

**CSL 458 | GROUP COUNSELING | 4 quarter hours
(Graduate)**

This course includes the study and ethics of group process, theoretical application, leadership and membership styles and problems such as conflict resolution. Students will engage in a regular group experience as a part of the course. In addition, opportunities to observe and participate in group work in the community are also part of the course. In addition, CSL 501 Counseling Skills must be taken either before or concurrently with CSL 458 Group Counseling.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

**CSL 461 | TESTING AND APPRAISAL | 4 quarter hours
(Graduate)**

This course includes a detailed analysis of intelligence, aptitude, personality, and achievement tests used with groups and individuals. The course is intended to familiarize students with various appraisal procedures and their utilization. Attention is given to the development of the institutional testing program.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

**CSL 466 | ASSESSMENT AND TREATMENT OF CHEMICAL DEPENDENCY | 4 quarter hours
(Graduate)**

This course seeks to develop skills and understanding relevant to the assessment and treatment of chemical dependency. The major alternative assessment approaches and treatment interventions for chemical dependency are surveyed and analyzed.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

**CSL 467 | COUNSELING THEORIES | 4 quarter hours
(Graduate)**

This course reviews counseling a broad range of counseling theories. Counseling techniques and process derived from these various counseling theories will be used in classroom experiences and with follow-up assignments. Students will begin to develop their own theoretical orientation. Theoretical frameworks will be considered for a variety of counseling contexts.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and 452 are prerequisites for this course.

**CSL 475 | COLLEGE AND CAREER READINESS COUNSELING FOR SCHOOL COUNSELORS | 4 quarter hours
(Graduate)**

This course provides an introduction to college and career readiness counseling in the school context. Students are introduced to career theories and resources, as well as strategies to promote access and readiness for postsecondary education.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

**CSL 476 | COLLEGE AND POSTSECONDARY ACCESS COUNSELING | 4 quarter hours
(Graduate)**

This course will introduce students to the college and postsecondary education admissions process. Students will learn methods for counseling others through selecting, applying, and transitioning to postsecondary education. Topics include admission requirements for various types of higher education institutions, financial aid, college match and fit concepts, college search technology, college transition, and working with special populations.

**CSL 477 | SOCIAL EMOTIONAL LEARNING IN THE MIDDLE GRADES | 4 quarter hours
(Graduate)**

This course introduces social-emotional learning standards and their relevance and application to middle grades content area classrooms. Topics addressed include the relationship between social emotional learning and classroom management as well as bullying and cyberbullying in school communities. Co-requisites for this course are MGE 441, MGE 451 and MGE 461. In this course, students will: 1.

MGE 421 and Advanced Teacher Candidate Standing are prerequisites for this class.

**CSL 480 | SPECIAL TOPICS IN COUNSELING | 1 quarter hour
(Graduate)**

The content and format of this course are variable. This course includes an in-depth study of a specific topic in counseling. Subject matter will be indicated in the class schedule. (1 credit hour)

A grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

**CSL 481 | SPECIAL TOPICS IN SCHOOL COUNSELING: | 2 quarter hours
(Graduate)**

The content and format of this course are variable. This course includes an in-depth study of a specific topic in counseling. Subject matter will be indicated in the class schedule.

A grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

**CSL 482 | SPECIAL TOPICS IN COUNSELING: | 4 quarter hours
(Graduate)**

The content and format of this course are variable. This course includes an in-depth study of a specific topic in counseling. Subject matter will be indicated in the class schedule.

A grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

**CSL 483 | COUNSELING INTERVENTIONS AND TREATMENT PLANNING | 4 quarter hours
(Graduate)**

This course provides students with an introduction to empirically supported treatments for specific disorders occurring across the lifespan. Opportunities for hands-on practice with several treatments are required.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451, CSL 452 and CSL 489 are prerequisites for this course.

**CSL 484 | ISSUES IN CLINICAL MENTAL HEALTH COUNSELING | 4 quarter hours
(Graduate)**

This course provides students with a review of up-to-date information on the issues related to community and clinical mental health counseling including but not limited to outcome evaluation, prevention and wellness strategies, advocacy strategies, counselor roles, reimbursement, paperwork, and referral processes.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

**CSL 485 | SEXUALITY COUNSELING | 4 quarter hours
(Graduate)**

This course provides students with an overview of human sexual development and the assessment and treatment of various sexual issues and disorders. Topics covered include common development of human sexuality, sexual concerns, sexual behavior, sexual orientation, gender identity, diagnostic and assessment techniques, treatment planning, and therapeutic interventions for individuals and couples.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

**CSL 489 | PSYCHOPATHOLOGY | 4 quarter hours
(Graduate)**

This course provides students with an overview of normal and abnormal personality and behavior, and the DSM-5 and ICD classifications and descriptions of mental health disorders. Specific attention is given to diverse cultural perspectives in diagnosis and assessment.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

**CSL 490 | FOUNDATIONS OF STUDENT AFFAIRS | 4 quarter hours
(Graduate)**

The course examines historical and philosophical elements relative to the role of student affairs in higher education as well as the impact of changing demographics on current trends pertinent to the management of student affairs. The course also provides students with theoretical and practical knowledge about organization structure, services, and faculty/staff/administrative functions in student affairs.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

**CSL 491 | CONTEXTUAL DIMENSIONS OF COLLEGE STUDENT DEVELOPMENT | 4 quarter hours
(Graduate)**

This course examines the impact of institutional mission and state and national policies on access, retention and graduation rates. Organizational change, decision-making and conflict resolution strategies are explored within the context of strategic planning, organizational structure and leadership style and management. Personnel selection, management theories and performance evaluations are also studied. Various assessment practices are reviewed and analyzed. Within this framework, student demographics, campus culture and student development theory (traditional and contemporary) are examined.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 490 are prerequisites for this course.

CSL 492 | PROGRAM DEVELOPMENT IN STUDENT AFFAIRS | 4 quarter hours**(Graduate)**

This course explores models for designing, managing, and evaluating student affairs programs, including the use of technological applications. Students become familiar with models and methodologies of program development and implementation in higher education and understand how to use professional standards and other resources for program development.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 491 are prerequisites for this course.

CSL 500 | LEADERSHIP AND SOCIAL CHANGE | 4 quarter hours**(Graduate)**

This is an advanced course exploring how leadership theory interacts with organizational structures, advocacy, and social justice. The class is structured to expand from the individual to the group/organization/school level to the societal macro view of leadership. The topics of leadership development and leadership education in P-16 settings are included. Contemporary topics in leadership are addressed to coincide with social change and leadership. (Cross-listed with CSL 200).

CSL 501 | COUNSELING SKILLS | 4 quarter hours**(Graduate)**

This course is designed to provide students with a comprehensive application and integration of the basic counseling skills used in the helping profession. Skills emphasized in the course include: active listening, attending, rapport building, empathy, paraphrasing, confrontation, reflection, and goal setting. These skills enable students to establish a helping relationship with a client, facilitate the client's self-exploration and engagement in counseling, and encourage the client's active progression towards achieving specified counseling goals. Students practice basic counseling skills and participate in in-vivo role-play through laboratory exercises in the Education and Counseling Center (ECC). The instructor gives feedback on skill development to students during face-to-face consultation and through the viewing of videotaped sessions.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 510 | MULTICULTURAL COUNSELING | 4 quarter hours**(Graduate)**

This course is designed to provide students with a basic foundation in multicultural counseling with an emphasis on culturally proficient counseling practices. Students learn multicultural models and counseling interventions for working with culturally and linguistically diverse populations. Attention is given to issues such as worldview, acculturation, racial/ethnic identity, culture-centered interventions, and various dimensions of diversity. Role play is used throughout the course to provide students with a more in-depth application of culturally responsive services.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 511 | SUPERVISION | 1 quarter hour**(Graduate)**

This course is an introduction to the theory and practice of supervision in the Counseling profession. There is a focus on developing the basic skills necessary for the effective supervision of counselors. (1 credit hour)

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 512 | CRISIS INTERVENTION | 2 quarter hours**(Graduate)**

This course provides students with an understanding of the principles of crisis intervention and crisis management with a focus on the school setting. Focus is on the common characteristics and manifestations of crisis and addresses methods and techniques of crisis intervention. (2 credit hours)

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 513 | CONSULTATION FOR COUNSELORS | 1 quarter hour**(Graduate)**

This course focuses on the theory, techniques, practice and skill development needed to effectively provide consultation in communities and schools. Emphasis is on the application of consultation, collaboration and the role of the consultant. (1 credit hour).

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 514 | CRISIS INTERVENTION FOR SCHOOL COUNSELING | 4 quarter hours**(Graduate)**

This course provides students with an understanding of the principles of crisis intervention and crisis management with a focus on the school setting. Working with individuals and groups in crisis is significantly different than other counseling situations, both in the characteristics of the clients and in the types of intervention strategies employed. This course provides the skills and knowledge needed to employ crisis intervention strategies in school settings.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 515 | CRISIS INTERVENTION AND TRAUMA COUNSELING | 4 quarter hours**(Graduate)**

This course provides students with an understanding of the individual in crisis and the impact of trauma. Students develop the knowledge and skills needed to access and treat both the acute and long-term effects of trauma. Subjects such as disaster response, psychological first-aid, and evidence-based treatment models are examined and students explore perspectives on the causes and prevention of trauma as it applies to the individual, family, local, national, and international community. The role of power and oppression in the experience of trauma within family, socio-political, and ethno-cultural systems is also addressed.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 519 | FOUNDATIONS OF READING LITERACY& SPECIAL EDUCATION FOR SCHOOL COUNSELORS | 4 quarter hours**(Graduate)**

This course introduces students to special education law including relevant legislation, cases, and regulations. Students also learn about the development, monitoring, and implementation of IEPs as well as reading literacy. In addition, this course addresses the school counselor's potential role in the evaluation, referral, monitoring, and consultation of students with special needs.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 520 | COUNSELING CHILDREN AND ADOLESCENTS | 4 quarter hours (Graduate)

This course considers the theoretical foundations of working with children and adolescents. It addresses developmentally appropriate counseling perspectives and interventions. Emphasis is on the child/adolescent in various systemic contexts, multicultural factors, specific child/adolescent problems, and the role of the school counselor in helping to prevent and remediate them.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451, 452, 467 and 501 are prerequisites for this course.

CSL 521 | CONTEXTUAL DIMENSIONS OF SCHOOL COUNSELING | 4 quarter hours (Graduate)

This course addresses the role of the school counselor and provides an understanding of the coordination of counseling program components as they relate to the school and the wider community. Students explore the various roles of the school counselor as advocate, leader, consultant, collaborator and counselor. The developmental approach to school counseling programs and the Transformed School Counseling Initiative are introduced and integrated throughout the course. Students must take CSL 521 and CSL 522 consecutively.

CSL 451, CSL 452 (B- or better required) and Advanced Masters Education (Counseling) student or Counseling (Licensure) student are prerequisites for this course. Students must pass the TAP test prior to enrolling in CSL 521.

CSL 522 | DELIVERY OF COMPREHENSIVE DEVELOPMENTAL SCHOOL COUNSELING PROGRAMS | 4 quarter hours (Graduate)

This course focuses on the comprehensive development, delivery, and evaluation of school counseling programs based on the Illinois state model and the American School Counselor Association national model. Students learn strategies to develop school counseling programs that align with school wide goals, to promote the value of counseling activities and programs, to plan for and present school counseling core curricula, and to use data to effect systemic change. Students must take CSL 521 and CSL 522 consecutively.

CSL 521 (B- or better required), and status as an Advanced Masters Education (Counseling) student or Counseling (Licensure) student are prerequisites for this course.

CSL 523 | LEARNING AND CLASSROOM MANAGEMENT FOR SCHOOL COUNSELORS | 4 quarter hours (Graduate)

This course explores current learning frameworks in education and education reform movements that impact learning and classroom management. The history of foundational learning approaches is also covered particularly those from the 19th and 20th centuries. Classroom management models and theories of inner discipline and consistency management are discussed so that the school counselor can assist educators and parents in home-school management of youth. Students develop original lesson plans, and observe and interview current educators as a part of this course.

Advanced Masters Education (Counseling) or Counseling (Licensure) student and a grade of B- or better in CSL 451, 452, 467, 501, and 510 are prerequisites for this course.

CSL 552 | PRACTICUM IN COUNSELING | 4 quarter hours (Graduate)

The practicum course is the initial professional practice experience for the CSL student. The student begins to see her- or himself as a counselor-in-training in an actual counseling setting and will develop and continue to work on mastery of counseling skills in a clinical setting.

Grade of B- or better in CSL 451, CSL 452, CSL 458, CSL 467, CSL 501, and CSL 510 or CSL 492 or CSL 511 or (CSL 475 and CSL 522) and status as an Advanced Masters Education (Counseling) student are prerequisites for this course.

CSL 553 | INTERNSHIP IN COUNSELING I | 4 quarter hours (Graduate)

After the completion of required courses and consultation with one's advisor, the student-intern is approved to be in a professional practice site such as a school, community agency, college or university. The student-intern functions under the joint supervision of a professionally qualified site supervisor and a university faculty supervisor. A structured contract requires specific experiences and expectations of the student, site, and University, and is signed by all parties. Ongoing reflective seminars are a part of the internship experience and are related to concentration specific topics and the skill and process development of students as well as a research component.

Admission to the Counseling Masters Program and a grade of B or better in CSL 552 are prerequisites for this course.

CSL 554 | INTERNSHIP IN COUNSELING II | 4 quarter hours (Graduate)

This course is a continuation of Internship I. The student-intern continue under supervision of the site supervisor and university faculty supervisor using a structured contract, with a research component. Note: School Counseling students must have also met the 235 testing requirement for this course.

Admission to the Counseling Masters Program and a grade of B or better in CSL 553 are prerequisites for this course. (School Counseling students must have also met the 181 testing requirement as a prerequisite for this course.)

CSL 555 | INTERNSHIP IN COUNSELING III | 4 quarter hours (Graduate)

This course is a continuation of Internship II. The student-intern continues under supervision of the setting supervisor and University faculty supervisor using a structured contract, with a research component.

Admission to the Counseling Masters Program and a grade of B or better in CSL 554 are prerequisites for this course.

CSL 556 | COUPLES AND FAMILY COUNSELING | 4 quarter hours (Graduate)

This course focuses on providing theoretical formulations and practical illustrations applicable to the practice of marriage and family counseling. Students engage in role-playing, case study, and observation of counseling techniques. Skills expected in this course include understanding the process of marriage and family counseling and the role of the counselor in the marriage and family setting. Students will learn to develop effective marriage and family strategies, and to conduct complete case analysis.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and CSL 452 are prerequisites for this course.

CSL 558 | INDEPENDENT STUDY IN COUNSELING | 1-4 quarter hours (Graduate)

Admission to the Counseling Masters Program and the permission of instructor, department chair and associate dean are required for this course. (1 credit hour)

Admission to the Counseling Masters Program is a prerequisite for this course.

CSL 559 | THESIS RESEARCH IN COUNSELING | 0 quarter hours (Graduate)

A student writing a thesis registers for this non-credit course. Where the thesis research and the writing of the thesis itself are prolonged beyond the usual time, the program advisor may require the student to register for additional credit. (0 credit hours)

SCG 410, thesis, advanced Mast

CSL 600 | REGISTERED STUDENT IN GOOD STANDING | 0 quarter hours (Graduate)

Registration in this course is open to students who are not registered for any other courses but need to complete requirements/assignments for previously taken courses. It provides access to University facilities. Permission of advisor required. (0 credit hours)

Status as a Graduate Education student is a prerequisite for this class.

CSL 625 | CANDIDACY CULMINATING PROJECT (STUDENT IN GOOD STANDING) | 0 quarter hours (Graduate)

Registration in this course is required of all students who are not enrolled in a course but are completing culminating projects for their program of study, including theses, papers, and final portfolios. This course provides access to university facilities. Permission of an advisor is required and registration is limited to three terms. (0 credit hours)

Status as a Graduate Education student is a prerequisite for this class.

Criminology (CRIM)

CRIM 101 | INTRODUCTION TO THE CRIMINAL LEGAL SYSTEM | 4 quarter hours

(Undergraduate)

The course examines the relationship between crime and the criminal legal system in American society. Specifically, the course will introduce students to the origins and purposes of the criminal law, explaining why rules are broken and who breaks them, and exposing students to the those agencies that comprise the criminal legal justice (police, courts, corrections).

CRIM 105 | CRIME AND THE MEDIA | 4 quarter hours (Undergraduate)

The objective of this course is to examine the influence of mass media on crime and society. Specifically, the course explores how mass media shapes the public's understanding of criminality, social responses to criminality, and the criminal justice system. Through an analysis of television, film, newspaper, and electronic/internet media channels, the course explores how the media represents, distorts, and/or filters crime and criminal justice issues. Students will be able to identify the common links between media representations and criminal justice actors, issues, and policies; in addition to becoming critical consumers of media related depictions of criminality.

CRIM 107 | CRIMINOLOGY GOES TO THE MOVIES | 4 quarter hours (Undergraduate)

This course explores popular representations of crime in films. Crime films communicate social concerns, moderate public debates, and serve as the primary point of access to criminal justice agencies and populations. This course will examine how crime films influence notions of criminality, victimization, and appropriate social responses. Students will discover the significance of crime films in shaping and distorting public perceptions of crime and punishment in society. The course will contextualize crime films within existing and emerging issues in Criminology, including policing, courts, penology, criminal injustice, wrongful convictions, organized crime, gangs, drugs, communities, forensic science and serial killers.

CRIM 201 | LAW ENFORCEMENT | 4 quarter hours (Undergraduate)

The course examines the social and historical origins of police systems in America. Specifically, the course will introduce students to the role of policing in society, explaining how police organizations operate and respond to occupational challenges.

CRIM 202 | CRIMINAL LAW AND PROCEDURE | 4 quarter hours (Undergraduate)

The course examines the historical and philosophical development of procedural law in America. The course will introduce students to the definition, constitutionality, and application of criminal law. The course will consider interrelationships between law, custom, morality, and social change.

CRIM 203 | CORRECTIONS | 4 quarter hours (Undergraduate)

The course examines the history, philosophy, and practice of corrections in America. The course will introduce students to the origins and purposes of corrections, explaining how U.S. culture defines punishment, incarceration, and social control. The course will expose students to the individual agencies and prison administrators that comprise the American system of corrections.

CRIM 205 | RACE, CLASS, GENDER AND THE CRIMINAL LEGAL SYSTEM | 4 quarter hours (Undergraduate)

The course examines the relationship between Race, Class, Gender, and the criminal legal system. Throughout the course, we will examine the multiple and intersecting ways these concepts shape the criminal process. Specifically, how do these socially constructed axioms influence a variety of institutional contexts such as law enforcement, courts, and corrections? The goal is to provide students with knowledge and understanding of the criminal legal system from the position of under-represented groups in America.

CRIM 206 | CRIMINAL INVESTIGATIONS | 4 quarter hours (Undergraduate)

The objective of this course is to examine the fundamental principles and procedures employed in criminal investigations. The course will introduce students to investigative theory, collection and preservation of evidence, interviews and interrogations, behavioral analysis and criminalistics. The course will consider procedural law and the constitutional limits to criminal investigations. Specific topics include drug laws, juvenile justice, victims, white-collar crime, ethical behavior, and criminal justice policies.

**CRIM 207 | LAW ENFORCEMENT MANAGEMENT | 4 quarter hours
(Undergraduate)**

The objective of this course is to examine the fundamental concepts of law enforcement administration and management that underlie decision-making, policy formulation, operational strategies, and procedural limitations. The course will introduce students to organizational patterns, administrative processes, and management theories in regards to law enforcement. The course will consider internal and external factors affecting the role of police administrators in relation to organizational communications and community relations. Special topics include leadership, political climate, unionization, recruitment and retention of qualified law enforcement personnel, training policies, and management issues.

**CRIM 208 | LATINOS AND THE CRIMINAL JUSTICE SYSTEM | 4 quarter hours
(Undergraduate)**

The objective of this course is to examine the relationship between Latinos/as and the criminal legal system. Throughout the course, we will ask (1) what distinguishes Latinos/as from other racial and ethnic groups (2) and what Criminological theories can help us understand the causes of these differences and inequalities. The course will examine key variables such as historical context, ethnic and race relations, and current criminal justice policy regarding Latinos/as in the United States. Cross-listed with LST 209.

**CRIM 209 | CRIME AND PUNISHMENT | 4 quarter hours
(Undergraduate)**

This course examines the nature of crime and the justification of punishment. Through historical and contemporary readings, basic issues such as what crime and punishment actually are, how punishment has been and continues to be justified, and the various forms that penal practices have taken will be explored. The course will also examine the question of social justice as it relates to punishment and the vexed problem of whether any forms of crime can ever be morally justified.

**CRIM 215 | GANGS IN SOCIETY | 4 quarter hours
(Undergraduate)**

The objective of this course is to provide a historical and organizational examination of gangs in society. The course will address the nature and definition of gangs, gang typologies and theoretical explanations of gang behavior. The course pays particular attention to social, cultural, political, and economic causes of gangs. In addition, students will analyze law enforcement responses, intervention and prevention strategies, and public policy issues. In short, students will develop a greater understanding of the social forces that contribute to the creation of gangs and assess societal responses to reduce deviant behavior.

**CRIM 218 | COMMUNITIES AND CRIME | 4 quarter hours
(Undergraduate)**

The objective of this course is to examine the connection between crime and various aspects of community context. Specifically, the course will explore how conditions and processes both within the community and in the broader society impact crime. The course will pay particular attention to factors that influence community-level crime rates and the effects on individual behavior. Students will assess Criminological explanations regarding the causes of crime, the consequences for neighborhoods, and how policing and imprisonment influence crime, violence, and the people who reside in such communities. Special topics of interest include social disorganization, collective efficacy, industrial and post-industrial urbanization, population instability, family structure, the concentration of poverty, economic processes, and social transformations.

**CRIM 225 | COMMUNITY NON-VIOLENCE | 4 quarter hours
(Undergraduate)**

The objective of this course is to examine non-violence efforts to reduce crime in violent communities. Specifically, the course will introduce students to the history, theory, and practice of non-violence with an emphasis on crime prevention and social change. The course will highlight factors that influence community-level violence, the effects that community characteristics have on individual violence, and attempts to resolve violence through non-violent means.

**CRIM 228 | CRIME PREVENTION | 4 quarter hours
(Undergraduate)**

This course provides an introduction to the science and practice of crime prevention. Specifically, the course examines the history, theories, and philosophies that inform crime prevention strategies. The course pays particular attention to the role of community capacity building in preventing crime and explores alternatives to incarceration. Students develop informed decision making skills by linking crime to individual and societal factors, collaborating with community and criminal justice agencies, and assessing the social costs associated with current criminal justice policies regarding punishment.

**CRIM 235 | JUVENILE JUSTICE | 4 quarter hours
(Undergraduate)**

This course provides a historical and philosophical examination of juvenile justice in American society. Specifically, the course explores the nature and extent, causes and correlates, and treatment and prevention of juvenile delinquency. The course reviews current policies and practices influencing juvenile justice as well as societal definitions and reactions to juvenile delinquency. Special topics include: the role of family and peer groups, substance abuse and mental health, school violence, status offenses, jurisdiction and function of juvenile agencies, disproportionate minority confinement and prevention and treatment programs.

**CRIM 240 | CRIMES OF THE STATE | 4 quarter hours
(Undergraduate)**

While the state has traditionally been the author, guardian and executor of criminal law within its own borders, there are numerous instances when the state violates its own standards of criminal law. This course explores major global cases of state-sponsored criminal activities including cases of torture, war crimes, terrorism, and genocide. Students study the ways that the state implicates itself in crimes concerning the obstruction of justice, disinformation, cover-ups, unaccountability and fraud. To this end, the course explores the measures used to determine whether a state's activity is criminal and compare them against behaviors and operating standards by which the state attempts to fulfill its own civic goals.

**CRIM 245 | HATE/BIAS CRIMES | 4 quarter hours
(Undergraduate)**

This course provides an introductory understanding of the definitions of hate/bias crime; examines the causes and consequences of hate/bias crimes, explores hate/bias crime as it relates to policy and legislation; and scrutinizes the reporting, investigation, and prosecution of hate/bias crimes in the United States.

CRIM 257 | SCHOOL VIOLENCE, DISCIPLINE AND JUSTICE | 4 quarter hours**(Undergraduate)**

The objective of this course is to examine crime and punishment in America's educational system. Specifically, the course will introduce students to the nature, extent and proposed remedies to school violence. The course will pay particular attention to the policy and practice of school discipline grounded in the philosophy of law and order and the criminalization of young people. Within the context of educational justice, students will explore equitable access to quality instruction, school resources and alternatives to punishment. Finally, a number of special topics such as bullying, sexual harassment, dating violence, school shootings, the school to prison pipeline, zero tolerance, school resource officers, corporal punishment, and restorative justice will all be addressed in relation to the larger macro concerns of the American ethos of education and the primary institution of upward mobility in American society.

CRIM 264 | FORENSIC SCIENCE | 4 quarter hours**(Undergraduate)**

This course introduces the field of forensic science and its application to the criminal legal system. Specifically, the course explores the theory and practice of forensic science used in the collection, examination, preservation, evaluation and interpretation of evidence. Students will understand the basic considerations, guidelines, and procedures that comply with both legal and scientific regulations regarding the use of physical evidence. Special topics include crime scene techniques, nature of evidence, physical and chemical analyses, toxicology, DNA, botany, entomology, courtroom activities and new trends in forensic science.

CRIM 265 | DOMESTIC AND INTERNATIONAL TERRORISM | 4 quarter hours**(Undergraduate)**

This course is designed to introduce students to the topic of terrorism, both domestically and internationally. The course will critically examine how terrorism is defined, what is known about the causes of terrorism, the strategies and tactics of terrorist groups, and the efficacy of current prevention and intervention efforts.

CRIM 275 | CYBERCRIME AND CYBERTERRORISM | 4 quarter hours**(Undergraduate)**

This course introduces students to cybercrime, cyberterrorism, and information warfare along with the law enforcement response to these issues. Topics addressed in this course include descriptions of the types of crimes and terrorist acts committed using computer technology; theories addressing digital criminals; and an overview of the laws which govern cybercrime investigation and prosecution. Students will examine current events and high profile cyberattacks ranging from facilitation of terrorist attacks, hackers, identify theft and fraud, cyber criminal organizations, sex crimes, digital hate, espionage, and nation-state attacks.

CRIM 280 | CRIMINAL BEHAVIOR | 4 quarter hours**(Undergraduate)**

This course explores criminal and delinquent behavior by learning about the motivations behind various types of crime. Through case studies, students will examine crimes such as arson, hate crimes, sex crimes, crimes of violence (serial murder), and crimes involving satanic and ritualistic behavior. The course includes exploration of how criminal behaviors is influenced by cognitive, developmental, and opportunistic factors.

CRIM 285 | COMMUNITY CORRECTIONS | 4 quarter hours**(Undergraduate)**

This course explores the history, purpose, and operations of probation and parole as well as other types of community-based supervision, such as pre-trial supervision, electronic monitoring, home detention and house arrest, day reporting centers, and other programs related to the supervision of individuals under court jurisdiction in the community. The course includes a specific examination of promising and evidence-based practices used in the field, including Risk-Need-Responsivity and evidence-based principles for effective intervention.

CRIM 290 | SPECIAL TOPICS | 4 quarter hours**(Undergraduate)**

In-depth examination of selected and timely social issues. Topics vary from quarter to quarter. Topics may be initiated by students.

CRIM 301 | RESEARCH METHODS IN CRIMINOLOGY | 4 quarter hours**(Undergraduate)**

The course examines the fundamental principles of social science research. Specifically, the course provides students with the necessary skills to design, conduct, interpret, and evaluate criminal justice data.

CRIM 101 is a prerequisite for this class.

CRIM 302 | STATISTICS IN CRIMINOLOGY | 4 quarter hours**(Undergraduate)**

The course introduces students to the basic principles and techniques of statistical analysis. Specifically, the course utilizes quantitative research methods to collect, analyze, and evaluate criminal offending patterns and criminal justice responses to crime.

(MAT 095 & MAT 100) or MAT 101 or placement and CRIM 101 are prerequisites for this class.

CRIM 303 | CRIMINOLOGICAL THEORY | 4 quarter hours**(Undergraduate)**

The course examines the theoretical perspectives related to the causes of crime and delinquency. Specifically, the course considers the impact and application of criminological theories of crime to the practice of criminal justice. Students will be required to analyze the assumptions of each theoretical perspective and demonstrate how these assumptions shape our knowledge of criminal behavior.

CRIM 101 is a prerequisite for this class.

CRIM 305 | VICTIMOLOGY | 4 quarter hours**(Undergraduate)**

The course will review victimology as an evolving discipline. It will examine the elements of this field, including the development of the discipline, theories of victimization, the use of victimization surveys, specific types of victimization, the economic and other costs of crime to victims, services and programs for victims, and the implications of the victim-offender system on the criminal justice process.

CRIM 101 is a prerequisite for this class.

CRIM 306 | FOUNDATIONS OF JUSTICE | 4 quarter hours**(Undergraduate)**

The course will provide students with an understanding of the ethical dilemmas faced by criminal justice practitioners across the criminal legal system. Specifically, the course will discuss the history and philosophy of justice, fundamentals and history of ethics, professional codes of conduct, as well as discuss ethical decision-making processes at both the individual and organizational levels.

CRIM 309 | FEDERAL LAW ENFORCEMENT AGENCIES | 4 quarter hours (Undergraduate)

This course will explore the role of federal law enforcement in regards to sharing responsibilities for intelligence collection, national security matters, and expansive criminal investigations. Specific topics will include the interaction between agencies, conflicts between local and federal law enforcement, international responsibilities, and the impact of public perceptions.

CRIM 312 | 21ST CENTURY POLICING | 4 quarter hours (Undergraduate)

The purpose of this courses is to examine police reform efforts in society. Specifically, the course explores how to law enforcement agencies can build legitimacy in the eyes of its constituents and balance considerations of procedural justice with due process. The course considers the ethical, moral, and accountability dilemmas that face law enforcement practitioners in preventing and controlling crime. Students will be exposed the audit and oversight functions in law enforcement. Special topics include: proactive policing, police use of force, racial profiling, police and community partnerships, restorative justice practices, the changing nature of police work, police discretion and misconduct and different types of policing strategies.

CRIM 320 | WRONGFUL CONVICTIONS | 4 quarter hours (Undergraduate)

Several elements make innocent people vulnerable to being wrongfully convicted, including faulty or junk science; eyewitness misidentification; false confessions; misconduct by government officials; use of snitches; and poor defense. Using a case study approach, this course explores how innocent people can wind up on death row, incarcerated, or convicted, with a particular emphasis on how race and poverty increase the risk of innocent people being convicted. The class will include accounts of exonerated persons, readings critical of criminal justice system, and videos that highlight key cases and issues.

CRIM 325 | US POLITICAL PRISONERS AND CRIMES OF CONSCIENCE | 4 quarter hours (Undergraduate)

Although the United States government claims not to hold political prisoners, there are hundreds of individuals in US detention charged with political crimes or crimes of conscience. This course identifies the various types of political prisoners, the history and philosophy of counterintelligence measures, and the accommodations made by the judicial system to enforce social, political and economic codes of behavior on dissenters. In this course, students question the traditional definitions of crime. Specifically, students explore the ways that people purposely break the law to address larger issue of injustice, for example through acts of civil disobedience, and the ways that political resistance is criminalized as in charges of seditious conspiracy.

CRIM 328 | MOBILITY & THE STATE | 4 quarter hours (Undergraduate)

In this course we explore the history, culture, and politics of migration along with an examination of the expanding borders of the United States. We analyze the varied mythology of the border as a danger zone, an intermediary zone, and a place of contact and conflict. We also look to the theorizations of the border as a site of cultural exchanges, resistance and critical negotiation; interchanges that impact the construction of race, ethnicity, sexuality and gender from both sides of the border. We examine issues relating to U.S. policies of immigration and labor movements as well as the economic and political consequences of globalization along the border region. Finally, we examine how the U.S. border has shifted and changed over time, critically challenging issues of political, cultural, and legal belonging.

CRIM 330 | REHABILITATION, REINTEGRATION AND REENTRY | 4 quarter hours (Undergraduate)

This course examines the challenges and barriers individuals face as they return from a period of incarceration in jail or prison and the practices and policies that increase successful reintegration and reentry to communities. Challenges and issues that may be examined include, housing, employment, education, criminal history, family reunification, substance use treatment, victimization and trauma, and mental and behavioral health treatment. The course also explores the appropriateness of recidivism as a common metric of success and the concept of desistance.

CRIM 337 | DRUGS AND SOCIETY | 4 quarter hours (Undergraduate)

This course provides a historical, social, and political examination of drugs in American society. Specifically, the courses explores the causes and consequences of drug use, the impact of the medicalization of human behavior, legislation and enforcement of drug policies and prevention and treatment efforts. The course will pay particular attention to the criminalization of certain substances and groups as a result of the War on Drugs. Students will study the intersection of research, policy and practice to developed evidence based approaches in health promotion and disease prevention relative to treatment and prevention of addiction. The course will conclude with an investigation of alternative drug policies in American society. Special topics of interest include: drug identification, subcultures, drugs and the media, systemic shame, cultural stigma, class and race conflict, drug violence, drug industries, decriminalization, legalization, harm reduction and drug courts.

CRIM 345 | WHITE COLLAR AND CORPORATE CRIME | 4 quarter hours (Undergraduate)

The objective of this course is to examine white collar crime in a transnational context. Specifically, the course exposes students to the economic, political and social consequences of white collar crime in a global age. Students investigate the cause and extent of white collar crime with particular attention to the differences and similarities to other criminal activity. The study of white collar crime challenges traditional assumptions of criminality. Therefore, the course explores alternative methodologies to research, investigate, prosecute, and sanction white collar crime in society. Special topics of interest include: embezzlement, mail and wire fraud, money laundering, computer crime, identity theft, tax crimes, securities fraud, conspiracy, RICO, antitrust and environmental laws, obstruction of justice and bribery and corruption.

CRIM 390 | SPECIAL TOPICS | 4 quarter hours (Undergraduate)

In-depth examination of selected and timely social issues. Topics vary from quarter to quarter. Topics may be initiated by students.

CRIM 395 | CAPSTONE IN CRIMINOLOGY | 4 quarter hours (Undergraduate)

Capstone in Criminology.

**CRIM 398 | INTERNSHIP | 4 quarter hours
(Undergraduate)**

The purpose of the internship is to complement a student's educational understanding with real world experience. Specifically, internships require students to apply Criminology related theories and paradigms to professional settings. Throughout the internship experience, students learn about the criminal legal system through techniques of observation and reflective analysis. An internship opportunity allows students to compare different career fields and develop a better understanding of their personal skills and interests. In addition, internships provide students with professional references and networking contacts. Finally, an internship develops skills, knowledge, and approaches that will distinguish them within a pool of applicants.

**CRIM 399 | INDEPENDENT STUDY | 4 quarter hours
(Undergraduate)**

With the approval and under the guidance of an assigned faculty member, students in this course conduct research on Criminology related topics.

**CRIM 409 | FEDERAL LAW ENFORCEMENT AGENCIES | 4 quarter hours
(Graduate)**

This course will explore the role of federal law enforcement in regards to sharing responsibilities for intelligence collection, national security matters, and expansive criminal investigations. Specific topics will include the interaction between agencies, conflicts between local and federal law enforcement, international responsibilities, and the impact of public perceptions.

**CRIM 425 | US POLITICAL PRISONERS AND CRIMES OF CONSCIENCE | 4 quarter hours
(Graduate)**

Although the United States government claims not to hold political prisoners, there are hundreds of individuals in US detention charged with political crimes or crimes of conscience. This course identifies the various types of political prisoners, the history and philosophy of counterintelligence measures, and the accommodations made by the judicial system to enforce social, political and economic codes of behavior on dissenters. In this course, students question the traditional definitions of crime. Specifically, students explore the ways that people purposely break the law to address larger issue of injustice, for example through acts of civil disobedience, and the ways that political resistance is criminalized as in charges of seditious conspiracy.

Critical Ethnic Studies (CES)

**CES 400 | CRITICAL SOCIAL THEORY | 4 quarter hours
(Graduate)**

Social movements are collective efforts that spring up from within communities that are not connected to organizations or power entities. At times a leader springs forth from the movement as it gather steam, but in other cases the movement continues to have a collective leadership, and in diverse regions. Examples in the US, the abolitionist movement, the women's suffrage movement, the civil rights movement, anti-war movements, the feminist and gay rights movements, the environmental movement, social justice and immigrant rights movements, the Tea Party movement, and the "occupy" and "we are the 99%" movement. Globally, such movements take on longstanding hegemonic systems, such as the "Arab spring" of 2011, and the movement by indigenous people in Bolivia that eventually brought Evo Morales to the presidency, for the first time since European arrival in the continent. In the US, movements tend to pursue social justice causes, rather than removing hegemonic power. Cross-listed with INT 401.

**CES 401 | CRITICAL ETHNIC STUDIES | 4 quarter hours
(Graduate)**

This core seminar will serve as an introduction to key issues and methods in the comparative study of ethnicity and race. The course highlights an interdisciplinary approach to the studies of systematic oppression in the United States, and the global implication of these structures. We will consider how critical ethnic studies presents a progressive intellectual challenge to global and local configurations of power in the name of global justice. Among our methods will be an intersectional theoretical analysis of the identities of race, gender, class, nation, sexuality, ability and religion. Readings will cover theories of intersectionality, decolonial indigenities, mestiza feminism and other critical mixed race theories, queer critical theory, settler racism and state violence, as well as creative and political movements of resistance and social change.

**CES 402 | MOBILITY AND THE STATE | 4 quarter hours
(Graduate)**

In this course we explore the history, culture, and politics of migration along with an examination of the expanding borders of the United States. We analyze the varied mythology of the border as a danger zone, an intermediary zone, and a place of contact and conflict. We also look to the theorizations of the border as a site of cultural exchanges, resistance and critical negotiation; interchanges that impact the construction of race, ethnicity, sexuality and gender from both sides of the border. We examine issues relating to U.S. policies of immigration and labor movements as well as the economic and political consequences of globalization along the border region. Finally, we examine how the U.S. border has shifted and changed over time, critically challenging issues of political, cultural, and legal belonging.

**CES 403 | CITIES AND RACIAL FORMATION | 4 quarter hours
(Graduate)**

The goal of this course is to critically examine urban redevelopment policies and policy strategies that have profoundly shaped Latinx and African-American populations in the United States. Topics to be discussed include: race and racial formation, class and ethnicity, urban neoliberal policies, gentrification, contestation, and public school policy. Class lectures, discussions, speakers, and assignments are geared toward helping students develop a critical understanding of the primary urban redevelopment issues related to the experiences of African-American, Central American, and Mexican American communities in Chicago or other city/cities.

**CES 404 | BORDERS AND MIGRATION | 4 quarter hours
(Graduate)**

This course examines the integral role that different processes of mobility play in shaping today's world: emigration, immigration, displacement, refugee and internally displaced persons flows. Students study the causes and effects of population movements including push-pull factors, demographic, economic, and political variables. Students also look at the role of state and non-state actors and organizations. Cross-listed with INT 404 "Migration and Forced Migration."

**CES 405 | RACE AND THE MEDIA | 4 quarter hours
(Graduate)**

Using an intersectional and interdisciplinary approach, this seminar course explores the landscape of popular media and visual culture in the U.S. along the axes of race, ethnicity, class, gender, and sexuality and cultural "difference." Cross-listed with CMNS 563.

CES 410 | SPECIAL TOPICS IN CRITICAL ETHNIC STUDIES | 4 quarter hours (Graduate)

Open elective for Critical Ethnic Studies. Topics vary. See schedule for current offerings.

CES 412 | FINAL PROJECT INDEPENDENT RESEARCH | 4-8 quarter hours (Graduate)

This course involves individual investigation and research (toward completion of the Master's thesis, project, internship, or portfolio) under the supervision of a faculty member. A minimum of 4 credit hours required. Course can be repeated for a total of 8 credit hours.

CES 413 | CANDIDACY CONTINUATION | 0 quarter hours (Graduate)

This 0-credit hour course is available to master's degree candidates who are actively working toward the completion of a thesis, project, or portfolio. Enrollment in this course is limited to three quarters and requires thesis/project advisor and graduate director approval and demonstration to them of work each quarter. Enrollment in this course allows access to the library and other campus facilities. This course carries and requires the equivalent of half-time enrollment status. The student may be eligible for loan deferment and student loans. This course is graded as pass/fail. (0 credit hours)

CES 414 | CANDIDACY MAINTENANCE | 0 quarter hours (Graduate)

This 0-credit hour course is available to graduate students who are not registered for a course in a given quarter but need to maintain active university status. Enrollment in this course is limited to three quarters and requires permission of the graduate director. Enrollment in this course allows access to the library and other campus facilities. This course does not carry an equivalent enrollment status and students in it are not eligible for loan deferment or student loans. This course is not graded. (0 credit hours)

CES 495 | INTERNSHIP | 4 quarter hours (Graduate)

Internship by arrangement. Written permission of supervising faculty member and of the program director is necessary before registration. Variable service learning content. May include direct service, project-based service, community-based research, or advocacy.

Status as a Critical Ethnic Studies student is a prerequisite for this class.

CES 499 | INDEPENDENT STUDY | 4 quarter hours (Graduate)

Individually supervised learning experience, usually involving extensive research and writing.

Curriculum Studies (CS)

CS 447 | CURRICULUM DESIGN FOR THE MIDDLE GRADES | 4 quarter hours (Graduate)

This course is designed to provide students with a comprehensive understanding of the history of and rationale for middle level education as well as the curricular and pedagogical knowledge needed to meaningfully engage middle level students in learning within and across the content areas. Important considerations and strategies for disciplinary and interdisciplinary learning in the middle school classroom, as well as the importance of reading and writing across the curriculum with regard to these, will be addressed.

CS 460 | LEARNING IN A TECHNOLOGY-SUPPORTED CLASSROOM | 4 quarter hours (Graduate)

An examination of current theories about instructional technology and of recent literature in the field. Students will become familiar with particular technology appropriate for their areas of interest and will learn to evaluate this technology for a variety of instructional purposes. The course includes: frameworks for classifying educational uses of the technology; an analysis of selected research on educational technology; theories and practices of using technology in classrooms; and the advantages and disadvantages of distance learning. Emphasis throughout will be on why and how technology can be used to enhance the learning process.

CS 461 | LITERACY PROCESSES AND PRACTICES | 4 quarter hours (Graduate)

Foundational theoretical perspectives and practices for teaching and learning language and literacy in a diverse, changing, and political world. Background of knowledge in the area of learning and exposure to the controversies that surround the teaching of literacy will be used to develop an understanding of literacy learning in action. Students will be invited to participate in the current conversations around literacy learning and teaching in order to inform their everyday curricular decisions.

CS 463 | ASSESSMENT, DIAGNOSIS, DEVELOPMENTAL/REMEDIAL MATERIALS & RESOURCES: EMERGENT & DEVELOPING READING | 4 quarter hours (Graduate)

Assessment, diagnosis and instructional planning for early and emergent learners. Building on a knowledge base of emergent reading processes and literacy practices, teachers will explore the ways in which young learners construct meaning and use language purposefully in their unique social worlds, even before beginning school. Participants in this course will learn to use performance based assessments as well as more formal standardized measures of achievement to support emerging and struggling readers with appropriate materials and theoretically sound instructional practices.

CS 461 is a prerequisite for this class.

CS 464 | ASSESSMENT, DIAGNOSIS, DEVELOPMENTAL/REMEDIAL MATERIALS & RESOURCES: MIDDLE SCHOOL/ADOLESCENT READING | 4 quarter hours (Graduate)

Assessment, diagnosis and instructional planning for middle school students. Building on a knowledge base of reading processes and literacy practices, teachers will explore the ways in which students construct meaning and use language purposefully in their unique social worlds. Participants in this course will learn to use performance based assessments as well as more formal standardized measures of achievement to support middle school and adolescent readers with appropriate materials and theoretically sound instructional practices.

CS 461 is a prerequisite for this class.

CS 465 | TEACHING READING IN THE CONTENT AREAS | 4 quarter hours (Graduate)

This course focuses on teaching reading in various subject (content) areas and emphasizes non-fiction reading process, strategies, and theories for grades K-9. The course will examine what it means to be literate in the elementary content areas (e.g. science, math, social studies, arts). Emphasis will be placed on learning effective literacy strategies for different subject areas. There will also be a focus on how one uses reading and writing to think, act, speak, question, and apply the tools of each content/subject area in ways that are unique to that discipline. Additionally, as teachers it is important to remember that students will bring various literacies from their homes and communities. An important emphasis will be on creating learning environments that honor student diversity, and learning about multiple ways of knowing, acting, and communicating.

CS 461 is a prerequisite for this class.

CS 470 | TEACHERS AS LEADERS | 4 quarter hours (Graduate)

Assists teachers in becoming leaders for positive change in schools and districts. Provides overview of major theoretical models in research on teaching and teacher leadership, historical perspectives on the teaching profession, and overview of select best practice in teacher collaboration, mentoring and coaching. Specific topics addressed may include: developing leadership among existing teaching staff; fostering professional collaboration; improving instruction school-wide; organizing colleagues, administrators, parents and students to improve achievement; fostering sustainability in teaching/fighting teacher attrition; teaching standards; team teaching; and curriculum mapping.

CS 471 | DIVERSITY IN THE CLASSROOM | 4 quarter hours (Graduate)

Examines issues related to diversity that result when students from diverse socioeconomic, cultural, linguistic, and academic backgrounds are in the same classroom. Explores the impact of inclusion, ESL, bilingual, and bicultural programs on instruction. Emphasis on developing strategies to meet individual student needs within the regular classroom.

CS 472 | ETHICS, CURRICULUM AND SOCIAL CHANGE | 4 quarter hours (Graduate)

Explores some major issues impacting curriculum, including cultural and socioeconomic factors, legal issues, conflicting values, pressures for assessment, and the push to include technology. Examines the historical development and current state of education in the U.S. as compared to education in other cultures. Emphasis on ways that educators can work as change agents within the competing demands of these forces.

CS 473 | ASSESSMENT | 4 quarter hours (Graduate)

Explores current theory and practice regarding alternate forms of assessment, including formal, standardized, and informal tests and inventories; selection, evaluation, and interpretation of tests used in educational settings; portfolio assessment, video performances, and presentations; preparation and use of teacher-made tests; evaluating outcomes; and utilizing data to improve instruction. The critical examination of multiple perspectives of assessment theories, policies and practices center around the emphasis on developing strategies to evaluate student progress.

CS 481 | THE STUDY OF TEACHERS AND TEACHING | 4 quarter hours (Graduate)

A selective survey and analysis of research on teachers and teaching. Particular emphasis will be placed on the assumptions which are built into various forms of research and the effect these assumptions have on how results should be interpreted and used in supervision and curriculum development. Each student will be expected to become familiar with alternative ways of studying teachers and the teaching process in his/her area of expertise. While many school settings will be utilized because of the many studies done in this area, research in non-school settings will be given a good deal of emphasis.

CS 482 | THE HISTORY OF CURRICULUM PRACTICE | 4 quarter hours (Graduate)

A survey of trends and movements in curriculum practice. Particular emphasis will be placed on the recurrent nature of curriculum practices and the reasons for this. The class will consider underlying models of curriculum practice in their historical settings as possible methods for meeting contemporary social needs as well as the assets and liabilities of these models.

CS 484 | MULTIMEDIA MATERIALS PRODUCTION | 4 quarter hours (Graduate)

This course will analyze the role of multimedia materials in instruction. A variety of media will be explored (including software, internet, audio, video, and film). Students will be expected to manipulate a variety of images and produce sample materials for critique and analysis. The primary focus will be on enhancing learning in elementary and secondary schools.

CS 485 | CURRICULUM/PROGRAM EVALUATION | 4 quarter hours (Graduate)

Evaluation is essential for curriculum/program development and implementation. Hence, understanding evaluation methods, technologies, and quality criteria is particularly relevant to educational leaders, curriculum/program designers, and technology specialists. In this course, students will critically examine a variety of current evaluation models, instruments, and resources. Students will also conduct a comprehensive analysis of a significant evaluation study relevant to their specific professional interest. Registration is restricted to students in Advanced Master's programs.

Status as an Advanced Masters Education student is a prerequisite for this class.

CS 487 | INTRODUCTION TO CURRICULUM DELIBERATION | 4 quarter hours (Graduate)

An introduction to systematic and collaborative deliberation on curriculum problems. A pattern for deliberation (including situation analysis, problem discrimination and formulation, development of alternative courses of action, and anticipation of consequences) will be developed and exemplified. This pattern will be contrasted with other descriptions of curriculum planning. Each student will complete a project which describes his/her systematic formulation of a curriculum problem and a plan of action for resolving it.

Status as an Advanced Masters Education student is a prerequisite for this class.

CS 488 | CURRICULUM DESIGN | 4 quarter hours
(Graduate)

Provides a project-based opportunity to develop curriculum that promotes student understanding, student voice, and student involvement in school or community change. Encourages educators to think carefully about what does and should constitute the curriculum and why, who and what is served and who/what is marginalized by current curriculum arrangements, and how collaboration in curriculum design can assist in organizing classrooms, schools, and communities.

CS 489 | CREATIVITY AND CRITICAL THINKING - VYGOTSKY, BAKHTIN, MAKIGUCHI, IKEDA | 4 quarter hours
(Graduate)

Introduces students to the educational philosophies of Russian thinkers Lev Vygotsky (1896 - 1934) and Mikhail Bakhtin (1895 - 1975) and Japanese thinkers Tsunesaburo Makiguchi (1871 - 1944) and Daisaku Ikeda (1928 -). Students will locate confluences in these thinkers' philosophies and apply them to current curriculum or curriculum theorizing in their chosen discipline(s) (e.g., mathematics, social studies, language education, etc.), context(s) (e.g., policy, gender, socioeconomics, identity, etc.) and K-12/adult level(s). Topics covered include, among others, cultural-historical theory, socially constructed meaning making, zone of proximal development, dialogism, carnival, value and value-creating pedagogy, humanitarian competition, and human revolution.

CS 492 | CREATING AND SUSTAINING PROFESSIONAL LEARNING COMMUNITIES | 4 quarter hours
(Graduate)

This course will provide the framework for the creation, development and sustainability of a professional learning community. Professional learning communities have at their core three guiding principles: 1) a focus on learning, 2) the creation of a collaborative culture and 3) a results-orientation. Within the professional learning community, members are committed to working collaboratively in an ongoing process of collective inquiry and action research in order to achieve better results for the students and community they serve. Professional Learning Communities operate under the assumption that the key to improved learning for students is continuous, job-embedded learning for educators.

CS 493 | CURRICULUM DEVELOPMENT AND ASSESSMENT IN K-12 SCHOOLS | 4 quarter hours
(Graduate)

This course prepares future school leaders with knowledge; understanding; and application of planning, assessment, and instructional leadership for roles in the K-12 school setting at the supervisory or administrative level. The emphasis of the course will be planning, implementation, and refinement of standards-based curriculum aligned with instruction, assessment, and instructional decisions as they affect the teaching and learning environment of the school with diverse cultural, ethnic, linguistic, and special needs populations.

CS 494 | CURRICULUM 2.0: CURRICULUM FOR LEARNING IN GLOBAL NETWORKS | 4 quarter hours
(Graduate)

This course will explore curriculum theories and practices for the age of global networks, including themes such as the shift from industrial to post-industrial educational paradigms, online learning, and more. New communications technologies make it possible for teaching and learning to take place anywhere and anytime, in many cases under conditions radically different from those of formal schooling. This course considers the implications of curriculum under such conditions.

CS 495 | DESIGN THINKING IN EDUCATION | 4 quarter hours
(Graduate)

Design Thinking is a problem solving methodology for collaborative innovation. This course introduces the methods of design thinking applied to curriculum design and education in general. Students will learn how to use design thinking for insight, ideation, and implementation of collaborative solutions to complex educational problems. In addition, students will understand design thinking within the context of the history of ideas and be able to critically analyze and evaluate implementations of design thinking in a variety of educational settings.

CS 551 | CURRICULUM FOR HUMAN AND COMMUNITY DEVELOPMENT | 4 quarter hours
(Graduate)

This course focuses on the relationships between schools and the communities they serve. Specifically, it focuses on how pk-12 schools as well as colleges/universities can and cannot promote human development (healthy growth, learning, and maturation) and community development (creating healthy, safe, connected, & politically-enfranchised communities). The course explores contemporary models of educational reform and community development, notably: project- and community-based learning, asset-based development, participatory action research (PAR), full-service community schools, and university-assisted community schools. Additional topics may include: Explicit and implicit goals of educational reforms and how these (re-)shape civic and democratic opportunities; how universities, schools, and communities can collaborate on individual and community development; and the benefits and liabilities of hybrid educational improvement/community development projects (e.g., Promise Neighborhoods/Promise Zones, the Harlem Children's Zone, etc.).

CS 564 | CURRICULUM AND IDEOLOGY | 4 quarter hours
(Graduate)

This course examines the ideological significance of "youth," youth development, and education in societies characterized by structural inequalities based on class, race, ethnicity, and sexual/gendered relations of domination and subordination. Texts from a range of academic disciplines - psychology, sociology, cultural studies, social work - are studied to show the influence these perspectives have had in shaping discourse about youth, youth development, and education as a vehicle for social reproduction and social change. Youth and education are looked at as the locus of arguments about social crises and social change and the impacts of framing social problems as educational and youth problems are explored.

CS 579 | RESEARCH IN TEACHING READING: DEVELOPMENTAL & REMEDIAL READING INSTRUCTION & SUPPORT: BEST PRACTICES | 4 quarter hours
(Graduate)

In this course, students will explore and analyze current literacy research through the critical lenses of educational practitioners. Students will: identify meaningful questions about literacy practices in their classrooms and schools; create a plan for addressing the identified research question(s); collect and analyze data relevant to the research question(s); and organize and present the research findings. This inquiry project, or an extension of it, may subsequently become the basis for the student's Master's paper or thesis.

CS 461 is a prerequisite for this class.

CS 580 | RESEARCH SEMINAR IN CURRICULUM STUDIES | 4 quarter hours**(Graduate)**

This course is designed to help graduate students in Curriculum Studies through the difficult process of planning, organizing, drafting, and revising their Master's papers. Students will be expected to complete a literature review and to develop a strong proposal for an integrative paper as a prelude to selecting an advisor for their Master's papers. For M.Ed. students only.

SCG 410, 6 additional graduate courses and status as an Advanced Masters student is a prerequisite for this class.

CS 582 | PRACTICUM IN CURRICULUM STUDIES: READING | 4 quarter hours**(Graduate)**

This course provides directed experiences in decision-making for curriculum, participation, and leadership in the planning and management of reading curricula. Students will: assess students' reading capabilities; make informed curricular choices to address students' needs; identify and implement short and long-term learning goals for students; manage instructional materials needed to guide students; develop curriculum based on assessments of the needs of students. It is designed to offer students an opportunity to put into practice, in a summer school classroom, previous learning about the teaching of reading, especially their beliefs and understandings regarding literacy as social practice. Provides students with multiple opportunities to share their thinking with each other in a supportive community of learners.

CS 461 is a prerequisite for this class.

CS 588 | INDEPENDENT STUDY IN CURRICULUM STUDIES | 4 quarter hours**(Graduate)**

Independent Study in Curriculum Studies.

CS 589 | THESIS RESEARCH IN CURRICULUM STUDIES | 4 quarter hours**(Graduate)**

A student writing a thesis registers for this course for four quarter hours of credit. Where the thesis research and the writing of the thesis itself are prolonged beyond the usual time, the program advisor may require the student to register for additional credit.

SCG 410 and CS 580 are prerequisites for this class.

CS 591 | CURRICULUM THEORIZING: MULTIPLE LENSES | 4 quarter hours**(Graduate)**

This course examines diverse curriculum discourses, historical as well as contemporary, within a broader context of issues related to education and schooling. It is designed to engage students critically in the study of curricular frameworks, their assumptions, values, and implications for education, schooling, teaching and learning. Major topics include frameworks for defining and conceptualizing curriculum and curricular visions; social, political, and historical contexts of curriculum construction; issues of gender, race, class, and the media; and the curriculum as socially constructed and historically contextualized discourse(s) about what is and what should be taught. Particular content areas will be used as examples.

CS 594 | SPECIAL TOPICS IN CURRICULUM | 4 quarter hours**(Graduate)**

In order to assure that the program remains flexible, responsive to the needs of students, and inclusive of the areas of interest of both faculty and students, this variable topics course will provide an opportunity for critical examination of compelling topical issues related to education. Topics could include: issues in educational reform; special education; controversies in curricular discourse; current issues such as the education of homeless children; or legal and constitutional issues in education and schooling. The course will be conducted in a seminar format.

CS 600 | REGISTERED STUDENT IN GOOD STANDING | 0 quarter hours**(Graduate)**

Registration in this course is open to students who are not registered for any other courses but need to complete requirements/assignments for previously taken courses. It provides access to University facilities. Permission of advisor required. (0 credit hours)

Status as a Graduate Education student is a prerequisite for this class.

CS 606 | REVIEW OF LITERATURE | 0 quarter hours**(Graduate)**

Review of Literature. This paper will give students the opportunity to develop and demonstrate written competence in a subfield of their disciplines and to enhance life-long learning. Specifically, they will broaden their knowledge base and inform themselves about a topic, issue, theory, etc., reviewing and synthesizing existing literature. To do so, students will need a variety of bibliographic skills including searching data bases. (See the student handbook for additional information about completing Master's papers.) (0 credit hours)

CS 607 | INTEGRATIVE PAPER | 0 quarter hours**(Graduate)**

Integrative Paper. Non-credit. Students will observe and/or participate in the reciprocal interaction of theory and practice, by investigating actual practice in the field as it relates to theory. This might take the form of investigating how a particular theory is applied in the field, developing a practical application of a theory, or, conversely, developing/refining a theory based on investigations made in the field. (See the student handbook for additional information about completing Master's papers.) (0 credit hours)

CS 608 | CAPSTONE IN CURRICULUM STUDIES | 4 quarter hours**(Graduate)**

Students who have completed the majority of the Curriculum Studies coursework will engage in a thorough analysis of a school or other educational institution (e.g., museum, community organization) and develop an action plan for: professional development; mentoring and inducting new teachers; teacher evaluation and training; instructional coaching; curriculum development, assessment, or alignment; using assessments or other data to improve student learning; or building collaboration with teachers and stakeholders. Students will gather and analyze demographic, financial and testing data, develop a narrative to tell the story of a school's (or educational institution's) history and recent past, capture the school by way of photographs and interviews, and collect documents or other pertinent artifacts to support their action plan.

**CS 625 | CANDIDACY CULMINATING PROJECT (STUDENT IN GOOD STANDING) | 0 quarter hours
(Graduate)**

Registration in this course is required of all students who are not enrolled in a course but are completing culminating projects for their program of study, including theses, papers, and final portfolios. It provides access to university facilities. Permission of advisor required. Registration limited to three terms. (0 credit hours)

Status as a Graduate Education student is a prerequisite for this class.

**CS 694 | CURRICULUM 2.0: CURRICULUM FOR LEARNING IN GLOBAL NETWORKS | 4 quarter hours
(Graduate)**

This course will explore curriculum theories and practices for the age of global networks, including themes such as the shift from industrial to post-industrial educational paradigms, online learning, and more. New communications technologies make it possible for teaching and learning to take place anywhere and anytime, in many cases under conditions radically different from those of formal schooling. This course considers the implications of curriculum under such conditions.

Status as a Global Educational Leadership PhD student with a declared concentration is a prerequisite for this class.

**CS 700 | REGISTERED DOCTORAL STUDENT IN GOOD STANDING | 0 quarter hours
(Graduate)**

This registration is required of all doctoral students who are not enrolled in a doctoral course, but are completing course requirements and/or dissertation research. It provides access to University facilities. Academic advisor approval required. After the third enrollment, dissertation chair approval required. (0 credit hours)

Status as a EDD student with a declared concentration is a prerequisite for this class.

**CS 704 | CURRICULUM DISCOURSES/PERSPECTIVES OVER TIME | 4 quarter hours
(Graduate)**

This course focuses on the examination of the ways in which curriculum - both pK-12 and college/university curriculum - has developed over time. It looks at changes in how curriculum has been defined and conceptualized, theoretical and philosophical developments, evolving assumptions and values, and implications for teaching and learning across varied historical and social contexts. Readings include primary texts by major theorists as well as secondary material including commentary and critique. A primary goal of the course is to provide students with an overview of major movements in curriculum history as a foundation for further study. **Status as an EDD, PhD or EdS student with a declared concentration is a prerequisite for this class..**

**CS 706 | CANDIDACY PAPER | 0 quarter hours
(Graduate)**

Registration in this course is required of all students who are not enrolled in a course but are completing a dissertation. It provides access to university facilities. Permission of advisor required. This registration indicates that a student has successfully completed the candidacy paper as specified in the Doctoral Student Handbook. (0 credit hours)

Status as a EDD student with a declared concentration is a prerequisite for this class.

**CS 751 | CURRICULUM FOR HUMAN AND COMMUNITY DEVELOPMENT | 4 quarter hours
(Graduate)**

This course focuses on the relationships between schools and the communities they serve. Specifically, it focuses on how pk-12 schools as well as colleges/universities can and cannot promote human development (healthy growth, learning, and maturation) and community development (creating healthy, safe, connected, & politically-enfranchised communities). The course explores contemporary models of educational reform and community development, notably: project- and community-based learning, asset-based development, participatory action research (PAR), full-service community schools, and university-assisted community schools. Additional topics may include: Explicit and implicit goals of educational reforms and how these (re-)shape civic and democratic opportunities; how universities, schools, and communities can collaborate on individual and community development; and the benefits and liabilities of hybrid educational improvement/community development projects (e.g., Promise Neighborhoods/Promise Zones, the Harlem Children's Zone, etc.)

Status as an EDD, PhD or EdS student with a declared concentration is a prerequisite for this class..

**CS 754 | CURRICULUM THEORIZING: MULTIPLE LENSES | 4 quarter hours
(Graduate)**

Curriculum Theorizing: Multiple Lenses. This course examines diverse curriculum discourses, historical as well as contemporary, within a broader context of issues related to education and schooling. It is designed to engage students critically in the study of curricular frameworks, their assumptions, values, and implications for education, schooling, teaching and learning. Major topics include: frameworks for defining and conceptualizing curriculum and curricular visions; social, political, and historical contexts of curriculum construction; issues of gender, race, class ableness, and the media; the curriculum as socially constructed, and historically contextualized discourse(s) about what is and what should be taught. Particular content areas will be used as examples.

Status as an EDD, PhD or EdS student with a declared concentration is a prerequisite for this class..

**CS 761 | ASSESSING SCHOOL CURRICULUM | 4 quarter hours
(Graduate)**

This course develops a framework for assessing the content, characteristics, and outcomes of the curriculum in a school. The framework will include the collection, organization and analysis of both quantitative and qualitative measures of effective instruction. Particular attention will be given to local, state, and national standards for content, teaching and outcomes. Attention will also be given to the qualities of the lived experiences of students in school and thus to the unintended as well as intended outcomes of schooling. Each student will be expected to begin assessing the curriculum in his or her school and to outline a proposal for a more complete assessment of the school's curriculum.

Status as an EDD, PhD or EdS student with a declared concentration is a prerequisite for this class..

**CS 764 | YOUTH DEVELOPMENT, IDEOLOGY, CULTURE, AND SOCIETY | 4 quarter hours
(Graduate)**

This course examines the ideological significance of "youth," youth development, and education in societies characterized by structural inequalities based on class, race, ethnicity, and sexual/gendered relations of domination and subordination. Texts from a range of academic disciplines – psychology, sociology, cultural studies, social work – are studied to show the influence these perspectives have had in shaping discourse about youth, youth development, and education as a vehicle for social reproduction and social change. Youth and education are looked at as the locus of arguments about social crises and social change and the impacts of framing social problems as educational and youth problems are explored.

Status as an EDD, PhD or EdS student with a declared concentration is a prerequisite for this class..

**CS 774 | ENGAGING IN CURRICULUM DELIBERATION | 4 quarter hours
(Graduate)**

This course engages students in systematic and collaborative deliberation on curriculum problems. A pattern for deliberation – including situation analysis, problem discrimination and formulation, development of alternative courses of action, and anticipation of consequences – will be developed, exemplified, and contrasted with other descriptions of curriculum development. The importance and role of alternative conceptions of learners, of situation, and of knowledge structures within disciplines will be emphasized. After engaging in stimulated deliberations, each student will be asked to examine the intellectual commitments underlying this approach to curriculum change, to reconsider his or her role as a curriculum leader in a school or other educational setting, and to develop realistic plans for engaging a particular school community in collaborative curriculum deliberation.

Status as an EDD, PhD or EdS student with a declared concentration is a prerequisite for this class..

**CS 784 | CURRICULUM AND PROGRAM DESIGN | 4 quarter hours
(Graduate)**

This course studies principles underlying the design of effective, coherent, and comprehensive instructional programs. Topics include: the design and organization of core courses of study and related curricular components; the associated staff development program; and alignment with local, state, and national mandates. Particular attention will be given to planning for diversity, including differences in learning styles, special needs, culture and language.

Status as an EDD, PhD or EdS student with a declared concentration is a prerequisite for this class..

**CS 785 | CURRICULUM AND PROGRAM DESIGN IN INTERNATIONAL BACCALAUREATE | 4 quarter hours
(Graduate)**

This course studies principles underlying the design of effective, coherent, and comprehensive instructional programs within the International Baccalaureate PYP, MYP, DP, and CCP continuum. Topics include: the principles and practices of the International Baccalaureate, the integration of the IB learner profile, the design and organization of IB core courses of study and related curricular components; the associated staff development program to meet IB requirements for Category 1, 2, and 3 training; and alignment with local, state, and national mandates as well as IB mandates. Particular attention will be given to planning for global minded education, diversity, including differences in learning styles, special needs, culture and language.

Status as a Global Educational Leadership PhD student with a declared concentration is a prerequisite for this class.

**CS 786 | CURRICULUM AND PROGRAM DESIGN IN CATHOLIC SCHOOLS | 4 quarter hours
(Graduate)**

This course studies principles underlying the design of effective, coherent, and comprehensive instructional programs within the theoretical and philosophical foundation of Catholic education. Topics include: The National Catholic Benchmark standards, as well as the design and organization of curriculum using the Catholic lens, and related curricular components; the associated staff development program to integrate Catholic values and faith; and alignment with local, state, and national mandates as well as Catholic education standards. Particular attention will be given to planning for global minded Catholic education, diversity, including differences in learning styles, special needs, culture and language.

Status as a Global Educational Leadership PhD student with a declared concentration is a prerequisite for this class.

**CS 794 | SPECIAL TOPICS IN CURRICULUM | 4 quarter hours
(Graduate)**

In order to assure that the program remains flexible, responsive to the needs of students, and inclusive of the areas of interest of both faculty and students, this variable topics course will provide an opportunity for critical examination of compelling topical issues related to education. Topics could include: issues in educational reform; special education; controversies in curricular discourse; current issues such as the education of homeless children; or legal and constitutional issues in education and schooling. The course will be conducted in a seminar format.

Status as an EDD, PhD or EdS student with a declared concentration is a prerequisite for this class..

**CS 838 | SUPERVISED APPLIED CAPSTONE (EDD) PROPOSAL DEVELOPMENT | 4 quarter hours
(Graduate)**

Students register for this course for the quarter in which they defend their capstone proposals. Permission of capstone chair required.

**CS 839 | INDEPENDENT APPLIED CAPSTONE (EDD): CURRICULUM STUDIES | 4 quarter hours
(Graduate)**

Students register for this course for the quarter in which they defend their capstone projects. Permission of capstone chair required.

**CS 849 | SUPERVISED DISSERTATION (PHD) PROPOSAL DEVELOPMENT | 4 quarter hours
(Graduate)**

Students register for this course for the quarter in which they defend their dissertation proposals. Permission of dissertation chair required.

**CS 859 | INDEPENDENT DISSERTATION RESEARCH (PHD): CURRICULUM STUDIES | 4 quarter hours
(Graduate)**

Students register for this course for the quarter in which they defend their dissertations. Permission of dissertation chair required.

Cyber-Physical Systems Engineering (CSE)

CSE 299 | HARDWARE PROJECTS | 4 quarter hours (Undergraduate)

A course that introduces student to building basic cyber-physical systems. The course will cover basic electronics, a hardware computing platform (e.g., Raspberry Pi), and the API for managing hardware devices including serial communication, interfacing with digital and analog inputs (sensors), controlling motors, and using displays.

CSC 242 or CSC 243 is the prerequisite for this class.

CSE 304 | RAPID PROTOTYPING TECHNOLOGIES | 4 quarter hours (Undergraduate)

An overview of computer-aided design for 3-D modeling and prototype fabrication using 3-D printing and other technologies. **PREREQUISITE(S):** MAT 262.

CSE 314 | NETWORKING FOR CYBER-PHYSICAL SYSTEMS | 4 quarter hours (Undergraduate)

Overview of computer network technologies used in cyber-physical systems. Topics covered wired and wireless network protocol stacks, serialization, real-time network programming, and utilizing cloud-based services.

CSE 316 | CYBER-PHYSICAL SYSTEM SECURITY | 4 quarter hours (Undergraduate)

Design for security for cyber-physical systems, security breaches and enforcement, standardization, best practices, security policies, security threat and protection-in-depth modeling, vulnerability and risk assessment for cyber-physical systems, CPS security incidents and trends.

CSC 374 is a prerequisite for this class.

CSE 331 | CYBER-PHYSICAL SYSTEM ENGINEERING I | 4 quarter hours (Undergraduate)

The first in a three-course sequence that provides a comprehensive overview of core CPS topics in an application-driven context and with an emphasis on fundamental engineering design principles of modularity and abstraction. This first course focuses on electromagnetics and circuit analysis with applications to displays, touchpads, cameras, memory, batteries, GPS, and wireless communications. Labs will be used to apply the concepts covered in class in the context of managing hardware devices and building cyber-physical system prototypes.

MAT 152 is a prerequisite for this class.

CSE 332 | CYBER-PHYSICAL SYSTEMS ENGINEERING II | 4 quarter hours (Undergraduate)

The second in a three-course sequence that provides a comprehensive overview of core CPS topics in an application-driven context and with an emphasis on fundamental engineering design principles of modularity and abstraction. This second course covers more advanced concept in electromagnetism and electronics (transistors, amplifiers and circuit interfaces and operational amplifiers) and abstractions such as state machines along with probabilistic inference and state space search. Labs will be used to apply the concepts covered in class in the context of managing hardware devices and building cyber-physical system prototypes.

CSE 331 is a prerequisite for this course.

CSE 333 | CYBER-PHYSICAL SYSTEMS ENGINEERING III | 4 quarter hours (Undergraduate)

The third in a three-course sequence that provides a comprehensive overview of core CPS topics in an application-driven context and with an emphasis on fundamental engineering design principles of modularity and abstraction. This third course introduces signals and analog and digital signal processing, sampling and quantization, and control. Labs will be used to apply the concepts covered in class in the context of managing hardware devices and building cyber-physical system prototypes.

CSE 332 is a prerequisite for this class.

CSE 341 | DIGITAL SYSTEMS | 4 quarter hours (Undergraduate)

Design and implementation of digital systems using transistor transistor logic (TTL), SystemVerilog, and field-programmable gate arrays (FPGAs). Topics include combinational and sequential logic, storage elements, input/output, timing analysis, design trade offs, synchronous and asynchronous design methods.

CSE 332 is a prerequisite for this class.

CSE 342 | COMPUTER SYSTEM ORGANIZATION AND DESIGN | 4 quarter hours (Undergraduate)

Overview of the design of hardware elements of computer systems. Topics include instruction set design, processor micro-architecture and pipelining, cache and virtual memory organizations, protection and sharing, I/O and interrupts, and multithreaded architectures, and embedded systems.

CSC 374 is a prerequisite for this class.

CSE 351 | EMBEDDED SYSTEMS I | 4 quarter hours (Undergraduate)

The first of a two course sequence on programming embedded architectures in devices such as smartphones, portable gaming devices, and robots. Topics covered include embedded architectures, interaction with devices (buses, memory architectures, memory management, device drivers) and concurrency (software and hardware interrupts, timers).

CSC 374 is a prerequisite for this class.

CSE 352 | EMBEDDED SYSTEMS II | 4 quarter hours (Undergraduate)

The second of a two course sequence on programming embedded architectures in devices such as smartphones, portable gaming devices, and robots. Topics may include real-time principles (multi-tasking, scheduling, synchronization), implementation trade-offs, profiling and code optimization (for performance and memory), and embedded software (exception handling, loading, mode-switching, programming embedded systems).

CSE 351 is a prerequisite for this class.

CSE 361 | LINEAR SYSTEMS | 4 quarter hours (Undergraduate)

A comprehensive overview of modeling and analysis of dynamic systems including mechanical, electrical, electro-mechanical, thermal, and fluid systems. Topics include modeling using state-variable equations, input-output differential equations, transfer functions, and block diagrams, analytical solutions using the Laplace transform, and applications to modeling and designing feedback control systems.

CSE 333 and MAT 304 are prerequisites for this class.

CSE 362 | FOUNDATIONS OF CYBER-PHYSICAL COMPUTING | 4 quarter hours**(Undergraduate)**

This course covers the modeling, design, and analysis of cyberphysical systems that integrate computation and physical processes. It introduces formal models that support abstractions to manage the complexity of a system design and verify the system implementation correctness. Topics include safety and liveness requirements, temporal logic, model checking, deductive verification, stability analysis of linear systems, and real-time scheduling algorithms.

CSE 352 is a prerequisite for this class.

CSE 375 | INTRODUCTION TO ROBOTICS | 4 quarter hours**(Undergraduate)**

An introduction to the field of Robotics. Topics include history of robotics, kinematics, control theory, and sensor theory. A large portion of class time will be lab based, building and programming robots using the Lego Mindstorms EV3 Robotics Kit. The programming will be using a C derivative and knowledge of C and general systems concepts is required.

CSC 373 and CSC 374 are prerequisites for this class.

CSE 377 | INTRO TO MECHATRONICS | 4 quarter hours**(Undergraduate)**

Design and development of a mechatronic system incorporating sensors, actuators, and artificial intelligence.

CSE 332 is a prerequisite for this class.

CSE 393 | CYBER-PHYSICAL SYSTEMS ENGINEERING PRACTICUM I | 4 quarter hours**(Undergraduate)**

The first course in a two-course sequence in which students work in small groups to implement a cyber-physical system.

CSE 333 and CSE 352 are prerequisites for this class.

CSE 394 | CYBER-PHYSICAL SYSTEMS ENGINEERING PRACTICUM II | 4 quarter hours**(Undergraduate)**

The second course in a two-course sequence in which students work in small groups to implement a cyber-physical system.

CSE 393 is a prerequisite for this class.

CSE 424 | NETWORKING FOR CYBER-PHYSICAL SYSTEMS | 4 quarter hours**(Graduate)**

Overview of computer network technologies used in cyber-physical systems. Topics covered wired and wireless network protocol stacks, serialization, real-time network programming, and utilizing cloud-based services.

CSC 407 is a prerequisite for this class.

CSE 426 | CYBER-PHYSICAL SYSTEM SECURITY | 4 quarter hours**(Graduate)**

Design for cyber-physical system (CPS) security, security breaches and enforcement, standardization, best practices, security policies, security threat and protection-in-depth modeling, vulnerability and risk assessment for cyber-physical systems, CPS security incidents and trends. Students will carry out a CPS security-related independent project.

CSC 407 is a prerequisite for this class.

CSE 431 | CYBER-PHYSICAL SYSTEMS ENGINEERING I | 4 quarter hours**(Graduate)**

The first in a three-course sequence that provides a comprehensive overview of core CPS topics in an application-driven context and with an emphasis on fundamental engineering design principles of modularity and abstraction. This first course focuses on electromagnetics and circuit analysis with applications to displays, touchpads, cameras, memory, batteries, GPS, and wireless communications. Labs will be used to apply the concepts covered in class in the context of managing hardware devices and building cyber-physical system prototypes. **PREREQUISITES:** linear algebra and a year of college physics and CSC 407.

CSE 432 | CYBER-PHYSICAL SYSTEMS ENGINEERING II | 4 quarter hours**(Graduate)**

The second in a three-course sequence that provides a comprehensive overview of core CPS topics in an application-driven context and with an emphasis on fundamental engineering design principles of modularity and abstraction. This second course covers more advanced concept in electromagnetism and electronics (transistors, amplifiers and circuit interfaces and operational amplifiers) and abstractions such as state machines along with probabilistic inference and state space search. Labs will be used to apply the concepts covered in class in the context of managing hardware devices and building cyber-physical system prototypes.

CSE 431 is a prerequisite for this class.

CSE 433 | CYBER-PHYSICAL SYSTEMS ENGINEERING III | 4 quarter hours**(Graduate)**

The third in a three-course sequence that provides a comprehensive overview of core CPS topics in an application-driven context and with an emphasis on fundamental engineering design principles of modularity and abstraction. This third course introduces signals and analog and digital signal processing, sampling and quantization, and control. Labs will be used to apply the concepts covered in class in the context of managing hardware devices and building cyber-physical system prototypes.

CSE 432 is a prerequisite for this class.

CSE 441 | DIGITAL SYSTEMS | 4 quarter hours**(Graduate)**

Design and implementation of digital systems using transistor-transistor logic (TTL), SystemVerilog, and field-programmable gate arrays (FPGAs). Topics include combinational and sequential logic, storage elements, input/output, timing analysis, design tradeoffs, synchronous and asynchronous design methods.

CSE 432 is a prerequisite for this class.

CSE 442 | COMPUTER SYSTEM ORGANIZATION AND DESIGN | 4 quarter hours**(Graduate)**

Overview of the design of hardware elements of computer systems. Topics include instruction set design, processor micro-architecture and pipelining, cache and virtual memory organizations, protection and sharing, I/O and interrupts, and multithreaded architectures, and embedded systems.

CSC 407 is a prerequisite for this class.

**CSE 451 | EMBEDDED SYSTEMS I | 4 quarter hours
(Graduate)**

The first of a two course sequence on programming embedded architectures in devices such as smartphones, portable gaming devices, and robots. Topics covered include embedded architectures, interaction with devices (buses, memory architectures, memory management, device drivers) and concurrency (software and hardware interrupts, timers).

CSC 407 is a prerequisite for this class.

**CSE 452 | EMBEDDED SYSTEMS II | 4 quarter hours
(Graduate)**

The second of a two course sequence on programming embedded architectures in devices such as smartphones, portable gaming devices, and robots. Topics may include real-time principles (multi-tasking, scheduling, synchronization), implementation trade-offs, profiling and code optimization (for performance and memory), and embedded software (exception handling, loading, mode-switching, programming embedded systems).

CSE 451 is a prerequisite for this class.

**CSE 462 | FOUNDATIONS OF CYBER-PHYSICAL COMPUTING | 4 quarter hours
(Graduate)**

This course covers the modeling, design, and analysis of cyber-physical systems that integrate computation and physical processes. It introduces formal models that support abstractions to manage the complexity of a system design and verify the system implementation correctness. Topics include safety and liveness requirements, temporal logic, model checking, deductive verification, stability analysis of linear systems, and real-time scheduling algorithms.

CSE 433 is a prerequisite for this class.

**CSE 464 | RAPID PROTOTYPING TECHNOLOGIES | 4 quarter hours
(Graduate)**

An overview of computer-aided design for 3-D modeling and prototype fabrication using 3-D printing and other technologies. **PREREQUISITES:** linear algebra.

**CSE 475 | INTRODUCTION TO ROBOTICS (FORMERLY CSC 475) | 4 quarter hours
(Graduate)**

An introduction to the field of Robotics. Topics include history of robotics, kinematics, control theory, and sensor theory. A large portion of class time will be lab based, building and programming robots using the Lego Mindstorms NXT Robotics Kit. The programming will be using a C derivative and knowledge of C and general systems concepts is required.

CSC 403 and CSC 421 are prerequisites for this class.

**CSE 476 | LINEAR SYSTEMS | 4 quarter hours
(Graduate)**

A comprehensive overview of modeling and analysis of dynamic systems including mechanical, electrical, electro-mechanical, thermal, and fluid systems. Topics include modeling using state-variable equations, input-output differential equations, transfer functions, and block diagrams, analytical solutions using the Laplace transform, and applications to modeling and designing feedback control systems.

CSE 433 is a prerequisite for this class.

**CSE 477 | INTRO TO MECHATRONICS | 4 quarter hours
(Graduate)**

Design and development of a mechatronic system incorporating sensors, actuators, and artificial intelligence.

CSE 432 is a prerequisite for this class.

**CSE 527 | CPSE MASTER'S PROJECT | 4 quarter hours
(Graduate)**

Students will work in small groups to implement a cyber-physical system.

CSE 433 and CSE 452 are prerequisites for this class.

Cybersecurity (CSEC)

**CSEC 228 | LEGAL, ETHICAL AND SOCIAL ISSUES IN INFORMATION SECURITY (FORMERLY CNS 228) | 4 quarter hours
(Undergraduate)**

This course is designed to acquaint students with electronic privacy, security and ethics. Students will gain an understanding of information ethics, existing and emerging cyber-laws, organizational liability issues, and explore several Codes of Ethics. Students will learn about real and potential security issues, steps that can be taken to create environments of trust, how to evaluate the strengths and weaknesses of a firm's information resource environment, and risk management and operation feasibility issues.

**CSEC 320 | COMPUTER FORENSIC AND INCIDENT RESPONSE (FORMERLY CNS 320) | 4 quarter hours
(Undergraduate)**

Introduction to the topics of computer forensic, computer crimes, response to security incidents, Cybercrime investigation and prosecution. Students will learn how an organization can setup a security response team, prepare for Security incidents and manage these incidents.

CSEC 378 or CSC 374 is a prerequisite for this class

**CSEC 328 | FUNDAMENTALS OF IT RISK | 4 quarter hours
(Undergraduate)**

This course describes the principles of IT risk management, responsibilities and accountability for IT risk, ways to develop risk awareness, and how to communicate risk scenarios, business impacts and key risk indicators. The course covers risk identification, evaluation, and response; students will have the opportunity to create a business-focused, process-oriented and measurement-driven risk response plan.

**CSEC 340 | FUNDAMENTALS OF INFORMATION ASSURANCE (FORMERLY CNS 340) | 4 quarter hours
(Undergraduate)**

This course is a survey of the fundamental elements of computer security and information assurance. Topics may include confidentiality, integrity, and availability; security policies; authentication; access control; risk management; threat and vulnerability assessment; common attack/defense methods; ethical issues.

**CSEC 342 | CYBERSECURITY OPERATIONS (FORMERLY CNS 342) | 4 quarter hours
(Undergraduate)**

The Cybersecurity Operations course presents the knowledge and skills needed for a Security Analyst in a typical Security Operations Center environment. The course covers the core security skills needed for monitoring, detecting, investigating, analyzing and responding to security events. Extensive laboratory exercises are included to apply knowledge learned in the lectures and allow the students to implement typical SOC tools. In addition to technologies, the course will also cover cybersecurity operations network principles, roles and responsibilities as well as the related technologies, tools, regulations and security frameworks.

CSEC 345 | HUMAN-CENTERED CYBERSECURITY (FORMERLY CNS 345) | 4 quarter hours (Undergraduate)

A survey of behavioral theories relevant in cybersecurity context. Topics include economic theories of decision making, heuristics, biases, and bounded rationality, signal detection theory, mental models, social engineering, game theory, information search, and cognitive engineering. Students work on term paper describing potential application(s) of a theory of their choice in cybersecurity context. PREREQUISITE(S): IT 263 or CSC 242.

CSEC 348 | ONLINE MISINFORMATION AND DISINFORMATION OPERATIONS | 4 quarter hours (Undergraduate)

A hands-on course in which students familiarize themselves with the concepts of information operations, dissemination of misinformation and disinformation online (e.g. social media platforms, Wikipedia, forums, chatrooms, etc.), fact checking, automated detection, evasion, and the lifecycle of alternative narratives. Antecedents, cognitive predispositions, and the history of misinformation and disinformation in human evolution as well as societies are also discussed. Students work on a misinformation labeling of social media posts for their final project.

CSEC 355 | PHYSICAL AND IT SECURITY CONVERGENCE (FORMERLY CNS 355) | 4 quarter hours (Undergraduate)

This course introduces students to the fundamental processes associated with the Physical Security discipline. This course will present the convergence of IT Security and Corporate Physical Security, focusing on where convergence takes place - at the technology, process and function level. Students will look at real-world illustrations of implementation and analyze perceived efficiencies and cost-savings. This course is designed for students who desire to understand physical and IT security in the framework of Enterprise Risk Management.

CSEC 356 | APPLIED SOCIAL ENGINEERING | 4 quarter hours (Undergraduate)

A hands-on course in which students investigate social engineering attacks in controlled lab environments and develop technical, policy, and risk management responses. Topics include: social engineering mechanics, principles of persuasion, preparation, traditional social engineering attacks and defenses, Ambient Tactical Deception (ATD), false information online, ethical aspects of social engineering, and automation/machine learning support for social engineering. Students work on an individual social engineering training scenario for their final project.

CSEC 366 | CRITICAL INFRASTRUCTURE AND CONTROL SYSTEMS CYBERSECURITY (FORMERLY CNS 366) | 4 quarter hours (Undergraduate)

This course is an introduction to the cybersecurity challenges for control systems present in industry, homes and traditional businesses such as manufacturing. Topics covered include the design and setup of Supervisory Control and Data Acquisition (SCADA) systems, Distributed Control Systems (DCS), and Programmable Logic Controller (PLC) systems. As these systems are typically designed without any intrinsic security mechanism, we will study the challenges of protecting them and how to employ a defense-in-depth methodology to secure them. This class will focus on the security risks of critical infrastructure systems (such as Electrical, Pipelines, Water/Wastewater and transportation) and methods to protect them. PREREQUISITE(S): CSEC 340 or NET 377 or IT 263.

CSEC 378 | HOST BASED SECURITY (FORMERLY CNS 378) | 4 quarter hours (Undergraduate)

Principles of host based security. Review of security methods used to ensure the confidentiality, integrity, and availability of the information stored on a host. The class will cover OS configuration, access control, anti-malware, public facing application security, host-based intrusion detection/prevention, host-based firewalls and audit & compliance. Course includes laboratory work with both the Linux and Windows operating systems.

NET 363 or CSC 374 is a prerequisite for this class.

CSEC 380 | ADVANCED CYBERSECURITY AUTOMATION (FORMERLY CNS 380) | 4 quarter hours (Undergraduate)

This hands-on course will introduce students to real world exercises and scenarios. Students will create tools to perform automation, monitoring, red and blue team operations. Techniques will be applied to topics such as operating systems, infrastructure hardening, virtualization, sandboxing, incident response, and web applications.

CSEC 388 | SECURITY TESTING AND ASSESSMENT (FORMERLY CNS 388) | 4 quarter hours (Undergraduate)

Vulnerability assessment and ethical security testing; review of ethical concerns and legal issues associated with security testing activities; study and analysis of the defensive mechanisms used to mitigate such threats. There will be extensive hands-on laboratory exercises.

CSEC 340 and CSEC 378 are prerequisites for this class.

CSEC 389 | CYBER DEFENSE EXERCISES AND ATTACK RESPONSES (FORMERLY CNS 389) | 4 quarter hours (Undergraduate)

This is a hands-on, lab based applied security course in which students will work in teams to defend against cyber-attacks and implement services in a hostile cyber environment. Most activities will be derived from Cyber Dense and Cyber League competitions and will prepare students to participate and excel in these competitions. This course is open to all students, including students inexperienced in Cyber Defense competitions. Repeat enrollment is encouraged.

CSEC 340 and CSEC 378 are prerequisites for this class.

CSEC 390 | VULNERABILITY ASSESSMENT FOR COMMUNITY-BASED ORGANIZATIONS (FORMERLY CNS 390) | 4 quarter hours (Undergraduate)

This service learning course prepares students with real-world experience by partnering with a non-profit, community-based organization to identify information security vulnerabilities and propose recommendations that improve the organization's security and privacy practices. Within the context of an assigned community-based organization, students will work in teams to conduct a vulnerability assessment; identify and propose cost-effective safeguards that may be administrative, technical, or physical; define a plan to test, monitor, and train system users on recommended security safeguards, and; document project deliverables for the organization's management. The course emphasizes hands-on exercises and student reflection on a community-based term project.

**CSEC 394 | INFORMATION SYSTEMS SECURITY ENGINEERING I
(FORMERLY CNS 394) | 4 quarter hours
(Undergraduate)**

This course requires students to apply Information System Security Engineering methods and processes to design, document and implement comprehensive security infrastructures in realistic scenarios. Students will work in teams through the entire life cycle of a Security infrastructure project from needs discovery, threat assessment, architecture design, implementation, effectiveness assessment and auditing. The course is designed to span two quarters. In this first quarter, students will learn the Information Systems Security Engineering process and perform asset identification, threat assessment and system requirement specification.

NET 377 and NET 379 and CSEC 388 are prerequisites for this course.

**CSEC 395 | INFORMATION SYSTEMS SECURITY ENGINEERING II
(FORMERLY CNS 395) | 4 quarter hours
(Undergraduate)**

This senior project capstone course requires students to apply Information System Security Engineering methods and processes to perform the design and implementation of Information Systems Security infrastructures. The human and sociological impacts of Information Security will be studied with a particular focus on privacy issues, ethical use of Security tools and cultural and legal difference that exist in a globally connected but diverse world.

CSEC 394 is a prerequisite for this class.

**CSEC 397 | TOPICS IN COMPUTER, INFORMATION AND NETWORK
SECURITY FORMERLY CNS 397) | 1-4 quarter hours
(Undergraduate)**

May be repeated for credit. (1 quarter hour)

**CSEC 399 | INDEPENDENT STUDY (FORMERLY CNS 399) | 1-8 quarter
hours
(Undergraduate)**

Variable credit. PREREQUISITE(S): Consent of dean. (variable credit)

**CSEC 418 | INTRODUCTION TO HOST SECURITY (FORMERLY CNS 418) |
4 quarter hours
(Graduate)**

Principles of host based security. Review of security methods used to ensure the confidentiality, integrity, and availability of the information stored on a host. The class will cover OS configuration, access control, anti-malware, public facing application security, host-based intrusion detection/prevention, host-based firewalls and audit & compliance. Course includes laboratory work with both the Linux and Windows operating systems.

NET 405 is a prerequisite for this class.

**CSEC 428 | IT RISK MANAGEMENT | 4 quarter hours
(Graduate)**

This course provides an in-depth view of IT-related business risk management and the methodology that includes risk identification, evaluation and response. The course describes the principles of IT risk management, responsibilities and accountability for IT risk, how to build risk awareness, and how to communicate risk scenarios, business impacts and key risk indicators. Students will have the opportunity to create a business-focused, process-oriented and measurement-driven risk response plan; the course will also prepare students for the IT Risk Fundamentals Certificate offered by ISACA.

**CSEC 440 | INFORMATION SECURITY MANAGEMENT (FORMERLY CNS
440) | 4 quarter hours
(Graduate)**

Survey of information security management as it applies to information systems analysis, design, and operations. Managing information assets and the security infrastructure. Emphasis on managing security-related risk, as well as the process of developing, implementing, and maintaining organizational policies, standards, procedures, and guidelines. Identifying and evaluating information assets, threats, and vulnerabilities. Quantitative and qualitative risk analysis, risk mitigation, residual risk, and risk treatment as they relate to information security. Topics include information security vulnerabilities, threats, and risk management; security policies and standards; security audits; access controls; network perimeter protection, data protection; physical security; security education training and awareness. Introduction to compliance, as well as the CISSP domains.

**CSEC 445 | HUMAN-CENTERED CYBERSECURITY (FORMERLY CNS 445)
| 4 quarter hours
(Graduate)**

Application of behavioral theories in cybersecurity context. Topics include economic theories of decision making, heuristics, biases, and bounded rationality, signal detection theory, mental models, social engineering, game theory, information search, and cognitive engineering. Students work on an individual project applying one of these theories to a practical cybersecurity scenario of their choice.

**CSEC 446 | SECURE DESIGN (FORMERLY CNS 446) | 4 quarter hours
(Graduate)**

Secure design is a cross-disciplinary approach to cybersecurity and user-centered design. The course includes hands-on, interactive activities focused on secure designs for Internet-of-Things (IoT) technologies. Topics include: principles of visual design, user-centered design, mental models, heuristics, bounded rationality, applied cybersecurity, prototyping, and usability testing. Students will work on a class long project that will employ the principles of secure design to develop a secure yet usable prototype of an IoT device.

**CSEC 448 | ONLINE MISINFORMATION AND DISINFORMATION
OPERATIONS | 4 quarter hours
(Graduate)**

A hands-on course in which students familiarize themselves with the concepts of information operations, dissemination of misinformation and disinformation online (e.g. social media platforms, Wikipedia, forums, chatrooms, etc.), fact checking, automated detection, evasion, and the lifecycle of alternative narratives. Antecedents, cognitive predispositions, and the history of misinformation and disinformation in human evolution as well as societies are also discussed. Students work on the design of an experimental social media platform for socially calibrated misinformation and disinformation containment for their final project.

**CSEC 450 | DIGITAL FORENSIC TECHNIQUES (FORMERLY CNS 450) | 4
quarter hours
(Graduate)**

This course focuses on the forensic acquisition, analysis and presentation of data from computer systems. This course covers: preservation and interpretation of evidence; forensic imaging; file systems and data recovery; Windows registry forensics; internet history and social media analysis; mobile device forensics; timeline analysis; incident response and writing expert reports and testimony.

CSC 407 or CSEC 418 is a prerequisite for this class.

CSEC 455 | PHYSICAL AND IT SECURITY CONVERGENCE (FORMERLY CNS 455) | 4 quarter hours (Graduate)

This course introduces students to the fundamental processes associated with the Physical Security discipline. This course will present the convergence of IT Security and Corporate Physical Security, focusing on where convergence takes place - at the technology, process and function level. Students will look at real-world illustrations of implementation and analyze perceived efficiencies and cost-savings. This course is designed for students who desire to understand physical and IT security in the framework of Enterprise Risk Management.

CSEC 456 | APPLIED SOCIAL ENGINEERING | 4 quarter hours (Graduate)

A hands-on course in which students investigate social engineering attacks in controlled lab environments and develop technical, policy, and risk management responses. Topics include: social engineering mechanics, principles of persuasion, preparation, traditional social engineering attacks and defenses, Ambient Tactical Deception (ATD), false information online, ethical aspects of social engineering, and automation/machine learning support for social engineering. Students work on an individual design, exploit, detection, prevention, and deterrence in a practical social engineering scenario of their choice for their final project. Students work on designing, implementing, and testing an automation/machine learning tool for detecting social engineering on Twitter for their final project.

CSEC 466 | CRITICAL INFRASTRUCTURE AND CONTROL SYSTEMS CYBERSECURITY (FORMERLY CNS 466) | 4 quarter hours (Graduate)

This course is an introduction to the cybersecurity challenges for control systems present in industry, homes and traditional businesses such as manufacturing. Topics covered include the design and setup of Supervisory Control and Data Acquisition (SCADA) systems, Distributed Control Systems (DCS), and Programmable Logic Controller (PLC) systems. As these systems are typically designed without any intrinsic security mechanism, we will study the challenges of protecting them and how to employ a defense-in-depth methodology to secure them. This class will focus on the security risks of critical infrastructure systems (such as Electrical, Pipelines, Water/Wastewater and transportation) and methods to protect them.

CSEC 440 or NET 477 is a prerequisite for this class.

CSEC 477 | GOVERNANCE POLICIES IN INFORMATION ASSURANCE (FORMERLY CNS 477) | 4 quarter hours (Graduate)

This course focuses on assessment of business risks arising from information security and privacy issues, as well as the creation and implementation of policies that ensure compliance with laws and industry standards. It is a complement to IS 482, which focuses on the legal standards to which people and organizations are held under laws and regulations that concern computing and information technology. Legal issues arising under information security and control frameworks, such as COBIT and ISO17799, are considered. Topics include privacy laws, payment card industry standards, information security measures mandated by select federal statutes (e.g., HIPAA, Gramm-Leach-Bliley and Sarbanes-Oxley), data breach notification, governance and policy development, e-discovery, contracts, intellectual property, and security risk assessments.

CSEC 440 is a prerequisite for this class

CSEC 480 | CYBERSECURITY AUTOMATION OPERATIONS | 4 quarter hours (Graduate)

This intermediate course will build upon basic programming and cybersecurity knowledge to enable students to combine programming with real-world cybersecurity skills. Students will create scripts to perform automation, monitoring, red and blue team operations. Scripting will be applied to topics such as operating systems, networking, incident response, and web applications. Students will also learn about revision control, automation deployment options, and containerization.

CSC 401 and (CSEC 418 or CSC 407) are prerequisites for this class.

CSEC 488 | SECURITY TESTING AND ASSESSMENT (FORMERLY CNS 488) | 4 quarter hours (Graduate)

Methodologies and tools for performing vulnerability testing; management of security testing initiatives and activities; review of the different types of assessments, legal issues, ethical concerns. Defensive mechanisms to mitigate the risks illustrated by the assessment using Defense-In-Depth architectures. Concepts illustrated using hands-on lab exercises.

CSEC 440 and CSEC 418 are prerequisites for this class.

CSEC 489 | ADVANCED CYBER ATTACK RESPONSES AND DEFENSES (FORMERLY CNS 489) | 4 quarter hours (Graduate)

This lab-based applied security course introduces students to advanced cyber defense and cyber-attack response. Students manage and organize teams to defend against cyber-attacks and implement services in a hostile cyber environment. Most activities will be derived from Cyber Defense and Cyber League competitions and will prepare students to participate and excel in these competitions. This course is open to all students, including students inexperienced in Cyber Defense competitions. Repeat enrollment is encouraged.

CSEC 440 and CSEC 418 are prerequisites for this class.

CSEC 490 | INFORMATION SECURITY RISK ASSESSMENT FOR NON-PROFIT ORGANIZATIONS (FORMERLY CNS 490) | 4 quarter hours (Graduate)

Students taking this course will gain real-world experience by partnering with a non-profit, community-based organization to assess information security needs and propose recommendations that improve the organization's security and privacy practices. Within the context of an assigned non-profit organization, students will work in teams to conduct a security risk assessment using industry standards as guidance; write a formal risk assessment report for the organization's management; identify and propose cost-effective security safeguards that may consist of security policies, technologies, or procedures; define a plan to test, monitor, and train system users on recommended security safeguards.

CSEC 440 is a prerequisite for this class

CSEC 533 | ENTERPRISE SECURITY INFRASTRUCTURE CONTROLS AND REGULATORY COMPLIANCE (FORMERLY CNS 533) | 4 quarter hours (Graduate)

Design, implementation, support and management of control methods in enterprise environments. Focus is on how these controls can help organizations achieve regulatory compliance. Review of Sarbanes-Oxley and its impact on IT systems. Detailed study of how risk assessment methods, information security program management and ERP systems can be used to fulfill regulatory and legal requirements. Control Objectives for Information and related Technology (COBIT) guidelines and best practices for SOX compliance. Security management standards (ISO 17799, BS 7799 and ISO 27001) .

CSEC 440 is a prerequisite for this class

CSEC 587 | INFORMATION SECURITY GOVERNANCE (FORMERLY CNS 587) | 4 quarter hours
(Graduate)

In this course, students apply their knowledge of information security and regulatory compliance to analysis and evaluation of governance, risk management, and compliance problems. Students will learn the meaning of IT governance by examining the differences between governance and management; gaining hands-on application of industry governance frameworks; evaluating an information security program; defining incidence response policy; assessing risk; and defining regulatory compliance strategy. Students will discover how good information security governance adds value to an organization.

CNS 477 and (IS 444 or CNS 490 or CNS 533 or CSC 439 or NET 577) are prerequisites for this class.

CSEC 594 | COMPUTER INFORMATION AND NETWORK SECURITY CAPSTONE (FORMERLY CNS 594) | 4 quarter hours
(Graduate)

Design, setup and configuration of realistic enterprise computing and networking environments. Securing the infrastructure and integration of different services and technology in efficient, secured and redundant manners. Technologies will include: open-source and commercial products, firewalls, Virtual Private Networks (VPNs), authentication systems, Intrusion Detection Systems (IDS), advanced routing mechanisms (OSPF, BGP, IS-IS), highly redundant and robust networking.

NET 477 or CSEC 533 is a prerequisite for this class.

CSEC 597 | TOPICS IN COMPUTER INFORMATION AND NETWORK SECURITY (FORMERLY CNS 597) | 1-4 quarter hours
(Graduate)

Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit. PREREQUISITE(S): For specific prerequisites, see syllabus or consult course instructor. (variable credit)

CSEC 599 | INDEPENDENT STUDY (FORMERLY CNS 599) | 1-4 quarter hours
(Graduate)

Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable Credit. PREREQUISITE(S): None. (variable credit)

Data Science (DSC)

DSC 323 | DATA ANALYSIS AND REGRESSION | 4 quarter hours
(Undergraduate)

Topics include multiple regression and correlation methods, model building and validation processes, analysis of variance, logistic regression and regularized regression techniques.

IT 223 or MAT 351 or MAT 137 is a prerequisite for this course.

DSC 324 | ADVANCED DATA ANALYSIS | 4 quarter hours
(Undergraduate)

The course will teach advanced statistical techniques to discover information from large sets of data. The course topics include visualization techniques to summarize and display high dimensional data, dimensional reduction techniques such as principal component analysis and factor analysis, clustering techniques for discovering patterns from large datasets, and classification techniques for decision making. The methods will be implemented using standard computer packages.

CSC 324 or DSC 323 or consent of instructor is a prerequisite for this class.

DSC 333 | INTRODUCTION TO BIG DATA PROCESSING | 4 quarter hours
(Undergraduate)

This course will explore different approaches and a framework for performing data analytics on a dynamic, heterogeneous cluster of computing nodes. The course will begin with studying principles behind MapReduce and implementation of custom distributed queries using Hadoop. It will then expand to cover higher-level languages and tools within Hadoop ecosystem (e.g., Pig, Hive) and cluster configuration techniques. Finally, the course will delve into a comparative evaluation of several NoSQL and NewSQL databases that make fundamentally different assumptions for data processing (e.g., OLAP vs OLTP, disk-bound vs in-memory or real-time streaming data). The primary focus of the course will be hands-on implementation and tuning performance for large-scale clusters and data sets.

CSC 355 is a prerequisite for this class.

DSC 341 | FOUNDATIONS OF DATA SCIENCE | 4 quarter hours
(Undergraduate)

The course is an introduction to the Data Mining (DM) stages and its methodologies. The course provides students with an overview of the relationship between data warehousing and DM, and also covers the differences between database query tools and DM. Possible DM methodologies to be covered in the course include: multiple linear regression, clustering, k-nearest neighbor, decision trees, and multidimensional scaling. These methodologies will be augmented with real world examples from different domains such as marketing, e-commerce, and information systems. If time permits, additional topics may include privacy and security issues in data mining. The emphasis of this course is on methodologies and applications, not on their mathematical foundations.

IT 223 (or MAT 137 or MAT 242 or MAT 341 or MAT 353) is a prerequisite for this class.

DSC 345 | MACHINE LEARNING | 4 quarter hours
(Undergraduate)

This course introduces students to machine learning techniques and builds upon the background and skills learned in the previous data science and statistics courses. The course topics include advanced methods and algorithms for supervised and unsupervised learning, and ensemble methods. Through research paper discussion and hands-on assignments, the course will also cover recent applications of machine learning, such as autonomous navigation, biomedical informatics, biometrics, and text and web mining.

(CSC 367 or DSC 341) and (CSC 334 or DSC 324) are prerequisites for this class.

DSC 365 | DATA VISUALIZATION | 4 quarter hours
(Undergraduate)

This course will be an introduction to data visualization techniques for exploration and analysis of data sets from a wide range of fields including commercial, financial, medical, scientific and engineering applications. Topics will include visual encoding of numeric data, effective visualization design, graphical integrity, visualizing distributions and correlation, false-color techniques for feature extraction and enhancement, basic network graph visualization, geospatial visualization and some additional topics.

(IT 223 or MAT 137) and CSC 241 and CSC 241 are prerequisites for this class.

DSC 390 | TOPICS IN DATA SCIENCE | 4 quarter hours
(Undergraduate)

Specific topics will be selected by the instructor and may vary each quarter. This course is repeatable.

**DSC 394 | DATA SCIENCE PROJECT | 4 quarter hours
(Undergraduate)**

This course provides students with the opportunity to apply and integrate the knowledge they have acquired during the degree program. Students may work in teams and will work on real world data analytics projects using their skills and knowledge. At the end of the course, they submit a complete report summarizing analyses and study outcomes, and present results to the class.

(CSC 367 or DSC 341) and CSC 301 are prerequisites for this class.

**DSC 423 | DATA ANALYSIS AND REGRESSION | 4 quarter hours
(Graduate)**

Multiple regression and correlation, residual analysis, analysis of variance, and robustness. These topics will be studied from a data analytic perspective, supported by an investigation of available statistical software.

IT 403 is a prerequisite for this class.

**DSC 424 | ADVANCED DATA ANALYSIS | 4 quarter hours
(Graduate)**

The course will teach advanced statistical techniques to discover information from large sets of data. The course topics include visualization techniques to summarize and display high dimensional data, dimensional reduction techniques such as principal component analysis and factor analysis, clustering techniques for discovering patterns from large datasets, and classification techniques for decision making. The methods will be implemented using standard computer packages.

CSC 423 or DSC 423 or consent of instructor is a prerequisite for this class.

**DSC 425 | TIME SERIES ANALYSIS AND FORECASTING | 4 quarter hours
(Graduate)**

The course introduces students to statistical models for time series analysis and forecasting. The course topics include: autocorrelated data analysis, Box-Jenkins models (autoregressive, moving average, and autoregressive moving average models), analysis of seasonality, volatility models (GARCH-type, GARCH-M type, etc.), forecasting evaluation and diagnostics checking. The course will emphasize applications to financial data, volatility modeling and risk management. Real examples will be used throughout the course.

CSC 423 or DSC 423 or MAT 456 or consent is a prerequisite for this class.

**DSC 430 | PYTHON PROGRAMMING | 4 quarter hours
(Graduate)**

This course builds the skills necessary to use Python to develop larger programs and libraries. Students will learn to design, implement and debug Python functions and programs, including stochastic and object-oriented techniques. The course will cover Python data structures, and Python facilities for working with files, strings, regular expressions, databases and URLs. The course will also include an introduction to the Pandas package for data management, the NumPy package for scientific computing, and the Matplotlib package for visualization.

CSC 401 or IS 411 is a prerequisite for this class.

**DSC 433 | SCRIPTING FOR DATA ANALYSIS | 4 quarter hours
(Graduate)**

Data access and transformation with modern statistical software such as SAS and R. Report writing, data graphing and visualization, writing macros and functions to automate tasks and statistical analyses.

IT 403 and (CSC 401 or IT 411) are prerequisites for this class.

**DSC 441 | FUNDAMENTALS OF DATA SCIENCE | 4 quarter hours
(Graduate)**

An introduction to the Knowledge Discovery Technologies covering all stages of a data mining process: domain understanding, data collection and selection, data cleaning and transformation, dimensionality reduction, pattern discovery, evaluation, and knowledge extraction. The course provides a comprehensive overview of data mining techniques used to realize these stages, including traditional statistical analysis and machine learning techniques. Students will analyze large datasets and develop modeling solutions to support decision making in various domains such as healthcare, finance, security, marketing, customer relationship management (CRM), and multimedia.

IT 403 or DSC 423 or ECO 520 is a prerequisite for this class.

**DSC 450 | DATABASE PROCESSING FOR LARGE-SCALE ANALYTICS | 4 quarter hours
(Graduate)**

The course covers core concepts of database systems with focus on applications in large-scale analytics. Topics include relational databases, scheme normalization, SQL queries for data integration and data cleaning, database programming for ETL, and nontraditional database systems for unstructured data.

DSC 430 is a prerequisite for this class.

**DSC 465 | DATA VISUALIZATION | 4 quarter hours
(Graduate)**

An introduction to data visualization techniques to enhance the exploration and analysis of large data sets from a wide range of fields including commercial, financial, medical, scientific and engineering applications. Topics include visual encoding of numeric data, graphical integrity and effective visualization design, visualizing distributions and correlation, false-color techniques for feature extraction and enhancement, basic network visualization and graph layout, isosurface generation, geospatial visualization and volumetric rendering techniques. The course explores both existing visualization software packages and code interfaces for data visualization.

(IT 403 or MAT 453) and (CSC 401 or IT 411 or IS 411 or MAT 449) are prerequisites for this class.

**DSC 478 | PROGRAMMING MACHINE LEARNING APPLICATIONS | 4 quarter hours
(Graduate)**

The course will focus on the implementations of various data mining and machine learning techniques using a high-level programming language. Students will have hands on experience developing both supervised and unsupervised machine learning algorithms and will learn how to employ these techniques in the context of popular applications including automatic personalization, recommender systems, searching and ranking, text mining, group and community discovery, and social media analytics.

(DSC 441 and DSC 430) or CSC 480 are prerequisites for this class.

**DSC 480 | SOCIAL NETWORK ANALYSIS | 4 quarter hours
(Graduate)**

This course is an introduction to the concepts and methods of social network analysis. Students will learn to extract and manage data about network structure and dynamics, and to analyze, model and visualize such data. Students will use software tools to model and visualize network structure and dynamics. Specific network applications to be discussed include online social networks, collaboration networks, and communication networks.

(DSC 423 or SOC 412 or PSY 411) is a prerequisite for this class.

**DSC 484 | WEB DATA MINING | 4 quarter hours
(Graduate)**

An in-depth study of the knowledge discovery process and its applications in Web mining, Web analytics and business intelligence. The course provides coverage of various aspects of data collection and preprocessing, as well as basic data mining techniques for segmentation, classification, predictive modeling, association analysis, and sequential pattern discovery. The primary focus of the course is the application of these techniques to Web analytics, user behavior modeling, e-metrics for business intelligence, Web personalization and recommender systems. Also addressed are privacy and ethical issues related to Web data mining. Students can choose from three types of final course projects: implementation projects, research papers, or data analysis projects. Throughout the course, the students will learn and use a variety of data mining tools to analyze sample data sets as part of class assignments. **IT 403 and (CSC 451 or CSC 453 or CSC 455 or DSC 450) are prerequisites for this class.**

**DSC 510 | HEALTH DATA SCIENCE | 4 quarter hours
(Graduate)**

The course will focus on data science methods used in clinical studies and public health applications. Students will be introduced to a variety of health care data from electronic health records to payer data, geospatial and unstructured data, and will learn how to solve data science problems in the health sector. Topics include overview of healthcare analytics and typical research questions, epidemiology, data ethics, governance and security, applications of modeling techniques and machine learning methods to a variety of case studies in health care. **DSC 441 is a prerequisite for this class.**

**DSC 540 | ADVANCED MACHINE LEARNING | 4 quarter hours
(Graduate)**

The course is for students with prior background in data mining or machine learning techniques, and covers more advanced modeling techniques, including ensemble learning, extended linear models such as support vector machines, probabilistic graphical models, mixture and latent variable models, matrix factorization and link analysis. Application of the models will be presented in popular domains such as Web and social media analytics, text mining, crime analysis, community discovery, and health informatics.

CSC 412 and (DSC 441 or CSC 480) are prerequisites for this class.

**DSC 590 | TOPICS IN DATA SCIENCE | 4 quarter hours
(Graduate)**

Specific topics will be selected by the instructor and may vary each quarter. This course is repeatable.

**DSC 672 | DATA SCIENCE CAPSTONE | 4 quarter hours
(Graduate)**

The capstone course provides an opportunity for students to integrate and apply the analytics skills and knowledge learned in the classroom to real world data. Students work in teams on a large scale analytics project. At the end of the course, students submit a report summarizing their analyses and study outcomes, and present results to the class. **PREREQUISITE(S):** Instructor consent required.

Decision Analytics (DA)

**DA 150 | ANALYTICS IN ACTION SEMINARS | 2 quarter hours
(Undergraduate)**

In these seminars, students describe and assess how they have applied or are applying something that they have learned to their work in industry or community, and students learn from practicing decision analytics professionals about the specific opportunities and challenges these individuals encounter in their work with data. (2-4 quarter hours)

**DA 200 | DATA ANALYTICS | 4 quarter hours
(Undergraduate)**

This course is designed as an introduction to fundamental techniques of data analytics and the various fields, such as various business and decision sciences (accountancy, economics, finance, marketing, management, operations, and healthcare), which use data to gain insights and make informed decisions. In this course students will learn various analytical tools and demonstrate their ability to execute, understand, present, and discuss analytical results. Thus, building a strong foundation in supporting data-driven decision making in various fields of interest. Major topics include the applications of logical and financial functions; data visualization and manipulation, and what-if analysis. (4 credit hours)

**DA 220 | DATA MINING | 2-4 quarter hours
(Undergraduate)**

In this course, students will be introduced to data mining and will learn techniques including cluster, classification, association, and decision tree analysis to discover patterns in datasets. Students are expected to have a good understanding of databases and parametric statistics prior to the course. The course is highly applied and hands-on, using a problem-based approach to problem solving. Pre-Requisites: IT 223 Data Analysis and IT 240 Introduction to Databases. (2-4 quarter hours)

**DA 233 | APPLIED INFORMATION MANAGEMENT SYSTEMS | 4 quarter hours
(Undergraduate)**

This course introduces students to the key concepts in the field of Management Information Systems (MIS) and enhances understanding of the issues that business organizations face when developing and managing information systems. In this course, students will be presented with a broad overview of the field to first examine the increasing impact of information technology in business organizations, and second, in preparation for more advanced courses in data analytics and information systems. Specifically, the three major topics covered include (1) e-businesses and networks, (2) databases, as well as (3) enterprise resource planning (ERP) and process models. These topics are designed to prepare students for further inquiry on web analytics, data mining, project management, supply chain management, as well as business in general. By completing the course, students should be better equipped to apply IT skills to solve business problems, to participate in IT projects, and to communicate more knowledgeably with IT professionals. (4 quarter hours)

**DA 240 | TEXT ANALYTICS | 2 quarter hours
(Undergraduate)**

Although analytics can be thought of as inductive data analysis, involving huge data sets, the data organizations face are not always quantitative. From the comments on rating scales to consumer reports, some quantitative scales can be arbitrary. Using a market-leading analytics tool, students will explore a different form of analytics 'text analytics' to perform content analysis of unstructured textual documents, or textual data. The course takes a hands-on, scenario-based approach, thus enabling students to have multiple opportunities to apply their skills to different problems. Upon completion, students will not only learn about text analytics, but also have a strong grasp of a market-leading analytics tool. Pre-Requisite: Foundations of Analytics and IT 223 Data Analysis. (2-4 quarter hours)

**DA 340 | ACCELERATING ORGANIZATION INTELLIGENCE: WHAT'S THE STORY? | 2 quarter hours
(Undergraduate)**

This course focuses on developing the curiosity of students in decision analytics. Rather than verifying hypotheses, students will dig deeper to discover the right questions to ask and develop solutions. Having understood the emerging field of decision analytics and how analyzing Big Data can solve many current organization problems, this course adopts market-leading software to answer the preceding two questions. In this course, students will use this software to understand datasets, analyze datasets, visualize and share their findings. Through a series of problems, students will analyze a company's current position, identify problematic areas, develop insights for decision-making, develop compelling visuals and dashboards, build scenarios, and work collaboratively with companies (subject to availability). The hands-on approach enables students to build on existing knowledge on analytics to develop specific skills in using market-leading software. In addition, students will have the opportunity to use their own data for analysis in their focus areas. Pre-Requisite: Descriptive Analytics. (2-4 quarter hours)

**DA 350 | QUALITATIVE ANALYTICS | 2-4 quarter hours
(Undergraduate)**

While analytics often imply the use of predictive models, research problems do not always allow researchers to use quantitative methods. In this course, we look at problems that require a qualitative approach through an introduction to qualitative methods, hands on analysis of qualitative data, and discussion of ethics involved in empirical inquiry. (2-4 quarter hours)

Design (DES)

**DES 111 | DRAWING FOR DESIGNERS I | 2 quarter hours
(Undergraduate)**

The first in a 3 quarter sequence of general drawing courses. An introduction to composition, line, and rendering in black and white media. Students will develop technical skills of drawing to enable them to express their ideas visually. The course will cover techniques and materials used for documentation of designs, including perspective, spatial understanding, and figure drawing. Drawing exercises will be combined with critiques, discussions, and demonstrations.

Status as a Theatre Undergraduate or Graduate student (or concentration in Production Design in the School of Cinematic Arts) is a prerequisite for this course.

**DES 112 | DRAWING FOR DESIGNERS II | 2 quarter hours
(Undergraduate)**

The second in a 3 quarter sequence of general drawing courses. An introduction to composition, line, and rendering in black and white media. Students will develop technical skills of drawing to enable them to express their ideas visually. The course will cover techniques and materials used for documentation of designs, including perspective, spatial understanding, and figure drawing. Drawing exercises will be combined with critiques, discussions, and demonstrations.

(Status as a Wig & Makeup Design Major) or (DES 111 and status as an Undergraduate or Graduate Theatre student) or (DES 111 and a Production Design concentration in the School for Cinematic Arts) are prerequisites for this class.

**DES 113 | DRAWING FOR DESIGNERS III | 2 quarter hours
(Undergraduate)**

The third in a 3 quarter sequence of general drawing courses. An introduction to composition, line, and rendering in black and white media. Students will develop technical skills of drawing to enable them to express their ideas visually. The course will cover techniques and materials used for documentation of designs, including perspective, spatial understanding, and figure drawing. Drawing exercises will be combined with critiques, discussions, and demonstrations.

DES 112 and status as a Theatre School Undergraduate or Graduate student (or Production Design concentration in the School for Cinematic Arts) are prerequisites for this class.

**DES 141 | ELEMENTS OF DESIGN | 4 quarter hours
(Undergraduate)**

The course will develop and strengthen abilities to observe, visualize, and visually communicate conceptual ideas through design problem solving. Students will develop an understanding of how design principles create meaning in performance based art forms. Assignments will stimulate and refine intuitive design sensibilities and skills relative to the elements of design and composition. Project work will explore various 2-D and 3-D means of visual communication.

Status as a Theatre Undergraduate or Graduate student (or concentration in Production Design in the School of Cinematic Arts) is a prerequisite for this course.

**DES 142 | PRINCIPLES OF DESIGN | 4 quarter hours
(Undergraduate)**

The course will develop and strengthen abilities to observe, visualize, and visually communicate conceptual ideas through design problem solving. Students will develop an understanding of how design principles create meaning in performance based art forms. Assignments will stimulate and refine intuitive design sensibilities and skills relative to the elements of design and composition. Project work will explore various 2-D and 3-D means of visual communication.

DES 141 and status as an Undergraduate or Graduate Theatre student (or Production Design concentration in the School for Cinematic Arts) are prerequisites for this class.

**DES 143 | SCRIPT ANALYSIS | 4 quarter hours
(Undergraduate)**

A study of theatre text analysis. Using dramatic literature from naturalism to the avant garde, students will dissect how plays work structurally with an eye toward design and technology.

and status as an Undergraduate or Graduate Theatre student (or Production Design concentration in the School for Cinematic Arts) are prerequisites for this class.

**DES 208 | SOUND DESIGN I | 4 quarter hours
(Undergraduate)**

Fundamentals of Sound Design - This introductory course teaches the fundamentals of how to approach the artistry of sound design through the understanding of the physics of sound, and the tools by which you will manipulate it. It is recommended that you have some knowledge of computer sound software programs.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 209 | SOUND DESIGN I | 4 quarter hours
(Undergraduate)**

History of Music and Implementation of Sound to Visual - Students will learn the history of music from ancient formats to present day from an intercontinental perspective, and how the music was notated, recorded, produced, and distributed globally. Students will apply practical knowledge from the prior quarter to form and apply soundscapes to visual images emphasizing research.

DES 208 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 210 | SOUND DESIGN I | 4 quarter hours
(Undergraduate)**

Design Organization and Script Analysis - An in depth exploration with the process of creating a sound design for a specific script. The students will learn how to analyze the script for sound design, create the cues for the script, and learn the process of how to approach a concept and see it through to its final design.

DES 209 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 215 | WIG & MAKEUP DESIGN AND TECHNOLOGY 1 | 4 quarter hours
(Undergraduate)**

First in a three course sequence. Introduction to the study of facial anatomy, chiaroscuro, and color theory as it applies to makeup design and application for theatre and film. Corrective and age makeup, contour and expression, texturing techniques, and basic injury-makeup are explored. Testing makeup's ability to read under stage lights of varying intensity/color and discussions of how makeup reads onstage in a variety of venues. A whimsical or animal-based makeup design with training in using Aquacolor and cream makeup will be a final project.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 216 | WIG & MAKEUP DESIGN AND TECHNOLOGY 1 | 4 quarter hours
(Undergraduate)**

Second in a three-course sequence. An introduction to basic makeup prosthetics, adhesives, and three-dimensional makeup techniques such as wax, nose putty, and latex. Techniques used for eyebrow blocking and reshaping explored. Use of crepe hair to build brows and mustaches. Advanced study in injury makeup, in addition to the study of various stage blood and delivery systems. Beginning training in hair ventilation techniques. Special topics in cultural theatrical makeup practices. Final project will consist of a fantasy makeup design and application.

DES 215 and status as an undergraduate or graduate Theatre student is a prerequisite for this class.

**DES 217 | WIG & MAKEUP DESIGN AND TECHNOLOGY 1 | 4 quarter hours
(Undergraduate)**

Third course in a three-course sequence. Makeup and hair design in conjunction with script and character analysis explored. Stylized makeup will be studied. Introduction to high definition/film makeup techniques. Training in wig prep and application techniques, including pin curling and pin curl alternatives. Wig roller sets, pinning on a wig, and applying facial hair. Head wraps and tracings for ventilation patterning will be created. Students will create a mustache from scratch. Introduction to cultural and period makeup techniques.

DES 216 and status as an undergraduate or graduate Theatre student is a prerequisite for this class.

**DES 220 | INTRODUCTION TO COSTUME DESIGN | 4 quarter hours
(Undergraduate)**

An introduction to costume design for the stage. Students will explore costume silhouette and detail as it relates to the elements and principles of design. Students will learn the steps in a typical design process for costume design, including script analysis, research, and paperwork.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 230 | PROJECTION DESIGN I | 4 quarter hours
(Undergraduate)**

First course in three course sequence. An introduction to the methods of projection design, with exposure to both historical and contemporary practice. The development and communication of projection, video and media ideas. Script analysis, images, visual research, lighting concepts. The observation of light, and the development of oral, written and visual communication of lighting ideas.

DES 143 and status as an Undergraduate or Graduate Theatre student are prerequisites for this class.

**DES 231 | PROJECTION DESIGN I | 4 quarter hours
(Undergraduate)**

Second course in three course sequence. An introduction to the methods of projection design, with exposure to both historical and contemporary practice. The development and communication of projection, video and media ideas. Script analysis, images, visual research, lighting concepts. The observation of light, and the development of oral, written and visual communication of lighting ideas.

DES 230 and status as an Undergraduate or Graduate Theatre student are prerequisites for this class.

**DES 232 | PROJECTION DESIGN I | 4 quarter hours
(Undergraduate)**

Third course in three course sequence. An introduction to the methods of projection design, with exposure to both historical and contemporary practice. The development and communication of projection, video and media ideas. Script analysis, images, visual research, lighting concepts. The observation of light, and the development of oral, written and visual communication of lighting ideas.

DES 231 and status as an Undergraduate or Graduate Theatre student are prerequisites for this class.

**DES 240 | LIGHTING TECHNOLOGY | 2 quarter hours
(Undergraduate)**

Technical and mechanical aspects of lighting. A detailed study of standard equipment, lamps, connectors, control systems, hanging positions, procedures and practices for the lighting designer. (2 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 241 | SCENE DESIGN I | 4 quarter hours
(Undergraduate)**

First of a 3-course sequence. An introduction to the methods of scenic design, with exposure to both historical and contemporary practice. Students become familiar with the mechanical aspects of scenery and stages, and assimilate the principles of design and the technical requirements of a script into a fully developed scene design.

DES 143 and status as an Undergraduate or Graduate Theatre student are prerequisites for this class.

**DES 242 | SCENE DESIGN I | 4 quarter hours
(Undergraduate)**

Second of a 3-course sequence. An introduction to the methods of scenic design, with exposure to both historical and contemporary practice. Students become familiar with the mechanical aspects of scenery and stages, and assimilate the principles of design and the technical requirements of a script into a fully developed scene design.

DES 241 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 243 | SCENE DESIGN I | 4 quarter hours
(Undergraduate)**

Third of a 3-course sequence. An introduction to design research techniques and use of research in creating, and detailing, environments that reflect a particular period.

TEC 152 & DES 143 and status as a Theatre School undergraduate or graduate student (or concentration in Production Design in the School of Cinematic Arts) are prerequisites for this course.

**DES 244 | COSTUME DESIGN I | 4 quarter hours
(Undergraduate)**

First of a 3-course sequence. An introduction to costume design. Students will explore the design process, costume silhouette and detail, and script and character analysis.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 245 | COSTUME DESIGN I | 4 quarter hours
(Undergraduate)**

Second of a 3-course sequence. An introduction to costume design. Students will explore the design process, costume silhouette and detail, and script and character analysis within the context of historical theatrical costuming.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 246 | COSTUME DESIGN I | 4 quarter hours
(Undergraduate)**

Third of a 3-course sequence. An introduction to costume design. Students will explore the design process, costume silhouette and detail, and script and character analysis within the context of historical theatrical costuming.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 247 | LIGHTING DESIGN I | 4 quarter hours
(Undergraduate)**

First course in a 3 course sequence. The development and communication of lighting ideas. Script analysis, images, visual research, lighting concepts. The observation of light, and the development of oral, written and visual communication of lighting ideas.

DES 143 and status as an Undergraduate or Graduate Theatre student are prerequisites for this class.

**DES 248 | LIGHTING DESIGN I | 4 quarter hours
(Undergraduate)**

Second course in a 3 course sequence. The development and communication of lighting ideas. Script analysis, images, visual research, lighting concepts. The observation of light, and the development of oral, written and visual communication of lighting ideas.

DES 247 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 249 | LIGHTING DESIGN I | 4 quarter hours
(Undergraduate)**

Third course in a 3 course sequence. The development and communication of lighting ideas. Script analysis, images, visual research, lighting concepts. The observation of light, and the development of oral, written and visual communication of lighting ideas.

DES 248 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 250 | MATERIALS AND PROCESSES | 4 quarter hours
(Undergraduate)**

Students will become familiar with both the general concept of theatrical production and the specifics at The Theatre School. Students will also be introduced to the most common scenic construction materials, their strengths, limitations, and the tools used to manipulate these materials. Students will understand and practice the safety procedures of TTS production spaces while demonstrating proficiency with shop tools and equipment sufficient to complete construction assignments.

Status as a Theatre Undergraduate or Graduate student (or concentration in Production Design in the School of Cinematic Arts) is a prerequisite for this course.

**DES 252 | SCENOGRAPHIC DRAFTING | 3 quarter hours
(Undergraduate)**

First course in a 2 course sequence. With an emphasis on practical work in substantial projects, students learn the organization of the technical documentation of scenery. Scenic drafting conventions are studied and applied to the comprehensive communication of a design.

TEC 153 and status as an Undergraduate or Graduate Theatre student (or Production Design concentration in the School for Cinematic Arts) are prerequisites for this class.

**DES 253 | SCENOGRAPHIC DRAFTING | 3 quarter hours
(Undergraduate)**

Second course in a 2 course sequence. With an emphasis on practical work in substantial projects, students learn the organization of the technical documentation of scenery. Scenic drafting conventions are studied and applied to the comprehensive communication of a design.

DES 252 and status as an Undergraduate or Graduate Theatre student (or Production Design concentration in the School for Cinematic Arts) are prerequisites for this class.

**DES 260 | GLOBAL HISTORY OF COSTUME, HAIR, AND MAKEUP | 4
quarter hours
(Undergraduate)**

3)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 261 | GLOBAL HISTORY OF COSTUME, HAIR, AND MAKEUP | 4
quarter hours
(Undergraduate)**

3)

DES 260 and status as an undergraduate or graduate Theatre student is a prerequisite for this class.

**DES 271 | DESIGN PRODUCTION PRACTICE I | 3 quarter hours
(Undergraduate)**

First course in a 3 course sequence. Design students do practical work on planning, constructing, rigging, painting, crewing, and running of productions. Areas may include scenery, costumes, lighting, or sound. (3 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 272 | DESIGN PRODUCTION PRACTICE I | 3 quarter hours
(Undergraduate)**

Second course in a 3 course sequence. Design students do practical work on planning, constructing, rigging, painting, crewing, and running of productions. Areas may include scenery, costumes, lighting, or sound. (3 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 273 | DESIGN PRODUCTION PRACTICE I | 3 quarter hours
(Undergraduate)**

Third course in a 3 course sequence. Design students do practical work on planning, constructing, rigging, painting, crewing, and running of productions. Areas may include scenery, costumes, lighting, or sound. (3 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 284 | MODEL BUILDING | 3 quarter hours
(Undergraduate)**

The course focuses on creating professional quality scale models of stage scenery. Students will learn to work with a variety of materials (foamcore, board, paper, wood, and metal, and appropriate glues), will find sources for scale furnishings, and will learn a variety of techniques such as soldering and casting.

DES 143, TEC 152 and status as an Undergraduate or Graduate Theatre student (or Production Design concentration in the School for Cinematic Arts) are prerequisites for this class.

**DES 285 | MEDIA FOR DESIGNERS | 3 quarter hours
(Undergraduate)**

An advanced level class on rendering skills with different media: Charcoal Graphite. Pastels/Color pencils and Water Color/Acrylic/Acrylic markers. These will be practically explored in the classroom within a project context, and will be geared towards developing an advanced, refined and individual method of communicating design ideas and concepts.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 286 | FIGURE DRAWING FOR THEATRE | 4 quarter hours
(Undergraduate)**

By creating drawings from live models, students will learn about body structure and musculature, and will develop their skills in figure drawing, and 'drawing what you see'.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 290 | PORTRAITURE FOR THE WIG AND MAKEUP ARTIST | 4 quarter hours
(Undergraduate)**

In-depth study of the head, face, and hair through drawing from live models. Focus of study is on anatomy and multiple forms of artistic medium are explored. Theatrical lighting and its effect on facial features will be explored alongside the illusion created by makeup applied on the model.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 308 | SOUND DESIGN II | 4 quarter hours
(Undergraduate)**

Analysis and Psychoacoustics - Delving into the why and then the how of the choices we make in sound design students learn how to bring an audience on an emotional journey through psychoacoustics and analysis of a specific script. Guest directors are present to aid in the students' understanding of communication of their ideas.

DES 210 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 309 | SOUND DESIGN II | 4 quarter hours
(Undergraduate)**

Intro to Composition - Students will learn both simple and advanced methods of music composition using MIDI, hardware and software samplers and keyboards. Students will create several pieces of composed music including scores for theatre and film and integrate other learned skills to create sound designs for both published and new plays.

DES 308 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 310 | SOUND DESIGN II | 4 quarter hours
(Undergraduate)**

Advanced Design and Technology - An advanced look at sound design and how to implement it with greater understanding. Advanced paperwork and advanced analysis of plays from the canonical work to new plays. Guests are invited to give a range of implementation ideas that students can learn from.

DES 309 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 315 | WIG & MAKEUP DESIGN AND TECHNOLOGY 2 | 4 quarter hours
(Undergraduate)**

The first course in a three-course sequence. Wig and facial hair ventilation and styling techniques. Specialized training in the techniques used to create realistic facial hair. Study of the natural hair growth and patterns, along with study of hair of various ethno-profiles. Techniques for cutting, styling, and coloring. Advanced period makeup techniques will be explored in concert with historical hairstyles and facial hair grooming techniques. Script analysis, visual research, and design of wigs, hair, and makeup for theatrical text will be explored.

DES 217 and status as an undergraduate or graduate Theatre student is a prerequisite for this class.

DES 316 | WIG & MAKEUP DESIGN AND TECHNOLOGY 2 | 4 quarter hours (Undergraduate)

The second course in a three-course sequence. Wig and facial hair ventilation and styling techniques. Specialized training in the techniques used to create realistic facial hair. Study of the natural hair growth and patterns, along with study of hair of various ethno-profiles. Techniques for cutting, styling, and coloring. Advanced period makeup techniques will be explored in concert with historical hairstyles and facial hair grooming techniques. Script analysis, visual research, and design of wigs, hair, and makeup for theatrical text will be explored.

DES 315 and status as an undergraduate or graduate Theatre student is a prerequisite for this class.

DES 317 | WIG & MAKEUP DESIGN AND TECHNOLOGY 2 | 4 quarter hours (Undergraduate)

The third course in a three-course sequence. Wig and facial hair ventilation and styling techniques. Specialized training in the techniques used to create realistic facial hair. Study of the natural hair growth and patterns, along with study of hair of various ethno-profiles. Techniques for cutting, styling, and coloring. Advanced period makeup techniques will be explored in concert with historical hairstyles and facial hair grooming techniques. Script analysis, visual research, and design of wigs, hair, and makeup for theatrical text will be explored.

DES 316 and status as an undergraduate or graduate Theatre student is a prerequisite for this class.

DES 320 | ADVANCED MAKEUP | 3 quarter hours (Undergraduate)

In this course students will design a character makeup involving both facial prosthetics and ventilated hair. Three types of facial prosthetics are produced: silicone, foamed latex and slush molded latex. Face casting, clay sculpting and mold making are taught as steps to creating the final prosthetic. A ventilated hair piece is produced with attention to techniques of pattern making, hair processing, ventilating and hair dressing. Painting techniques are reviewed as final makeup is put together. Each year the class will choose one "extra" technique to pursue. Past pursuits have been: Kabuki Makeup with Kabuki master Shozo Sato, Tooth casting and stage teeth. (3 quarter hours)

PRF 214, 215 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 330 | PROJECTION DESIGN 2 | 4 quarter hours (Undergraduate)

First course in three course sequence. Basic techniques are incorporated into a comprehensive approach to projection design with the emphasis on aesthetics. The analysis of scripts in visual terms, visual research methods, style in the theater, and the development of a design concept, are studied through projects in contrasting styles of production designs. Students will demonstrate familiarity and skill in the use of equipment, cueing and playback, and the exploration of projection as character.

DES 232, TEC 232 and status as an Undergraduate or Graduate Theatre student are prerequisites for this class.

DES 331 | PROJECTION DESIGN 2 | 4 quarter hours (Undergraduate)

Second course in three course sequence. Basic techniques are incorporated into a comprehensive approach to projection design with the emphasis on aesthetics. The analysis of scripts in visual terms, visual research methods, style in the theater, and the development of a design concept, are studied through projects in contrasting styles of production designs. Students will demonstrate familiarity and skill in the use of equipment, cueing and playback, and the exploration of projection as character.

DES 330 and status as an Undergraduate or Graduate Theatre student are prerequisites for this class.

DES 332 | PROJECTION DESIGN 2 | 4 quarter hours (Undergraduate)

Third course in three course sequence. Basic techniques are incorporated into a comprehensive approach to projection design with the emphasis on aesthetics. The analysis of scripts in visual terms, visual research methods, style in the theater, and the development of a design concept, are studied through projects in contrasting styles of production designs. Students will demonstrate familiarity and skill in the use of equipment, cueing and playback, and the exploration of projection as character.

DES 331 and status as an Undergraduate or Graduate Theatre student are prerequisites for this class.

DES 340 | TOPICS: ADVANCED LIGHTING TECHNOLOGY | 4 quarter hours (Undergraduate)

Rotating instruction in advanced lighting technology includes: types of intelligent lighting fixtures, LED fixtures, computer control consoles (types and programming), and visualizer programs as well as their integration into theatrical design. Additional topics covered are concert/live event lighting design including: professional practice and protocols, equipment, rigging, consoles and documentation of those designs.

DES 240 and status as an undergraduate or graduate Theatre student is a prerequisite for this class.

DES 341 | SCENE DESIGN II | 4 quarter hours (Undergraduate)

First course in a 3 course sequence. Basic techniques are incorporated into a comprehensive approach to scene design with the emphasis on aesthetics. The analysis of scripts in visual terms, visual research methods, style in the theater, and the development of a design concept, are studied through projects in contrasting styles of stage designs.

DES 243 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 342 | SCENE DESIGN II | 4 quarter hours (Undergraduate)

Second course in a 3 course sequence. Basic techniques are incorporated into a comprehensive approach to scene design with the emphasis on aesthetics. The analysis of scripts in visual terms, visual research methods, style in the theater, and the development of a design concept, are studied through projects in contrasting styles of stage designs.

DES 341 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 343 | SCENE DESIGN II | 4 quarter hours
(Undergraduate)**

Third course in a 3 course sequence. Basic techniques are incorporated into a comprehensive approach to scene design with the emphasis on aesthetics. The analysis of scripts in visual terms, visual research methods, style in the theater, and the development of a design concept, are studied through projects in contrasting styles of stage designs.

DES 342 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 344 | COSTUME DESIGN II | 4 quarter hours
(Undergraduate)**

First course in a 3 course sequence. Lectures and projects in costume design for the modern drama, specifically from realism through 21st century styles. Design projects include script interpretation, rendering techniques, budgets, and fabric selections.

DES 246 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 345 | COSTUME DESIGN II | 4 quarter hours
(Undergraduate)**

Second course in a 3 course sequence. Lectures and projects in costume design for the modern drama. Design projects include team collaboration, script interpretation, rendering techniques, budgets, and fabric selections.

DES 344 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 346 | COSTUME DESIGN II | 4 quarter hours
(Undergraduate)**

Third course in a 3 course sequence. Lectures and projects in costume design for the modern drama, specifically from realism through 21st century styles. Design projects include script interpretation, rendering techniques, budgets, and fabric selections.

DES 345 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 347 | LIGHTING DESIGN II | 4 quarter hours
(Undergraduate)**

First course in a 3 course sequence. The implementation of lighting ideas. Practice in the translation of lighting ideas into actual designs. Light pads, lighting paperwork, Vectorworks, the use of equipment and the exploration of realistic lighting styles.

DES 249 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 348 | LIGHTING DESIGN II | 4 quarter hours
(Undergraduate)**

Second course in a 3 course sequence. The implementation of lighting ideas. Practice in the translation of lighting ideas into actual designs. Light pads, lighting paperwork, Vectorworks, the use of equipment and the exploration of realistic lighting styles.

DES 347 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 349 | LIGHTING DESIGN II | 4 quarter hours
(Undergraduate)**

Third course in a 3 course sequence. The implementation of lighting ideas. Practice in the translation of lighting ideas into actual designs. Light pads, lighting paperwork, Vectorworks, the use of equipment and the exploration of realistic lighting styles.

DES 348 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 361 | THEATRICAL COLLABORATION | 3 quarter hours
(Undergraduate)**

An investigation, through research and discussion, of the conceptual problems of physically mounting specific, assigned scripts from the classic and modern theatre, covering a broad stylistic range. Students will submit proposals for designs and justify their ideas through literary and pictorial research. The directorial and collaborative problems of arriving at a production concept, up to, but not including fully-realized design documentation, is emphasized through a series of projects. (3 quarter hours)

Status as a 2nd, 3rd or 4th year BFA Lighting, Scenery, Costume Design and Dramaturgy students, or MFA students is a prerequisite for this class.

**DES 362 | THEATRICAL COLLABORATION | 3 quarter hours
(Undergraduate)**

An investigation, through research and discussion, of the conceptual problems of physically mounting specific, assigned scripts from the classic and modern theatre, covering a broad stylistic range. Students will submit proposals for designs and justify their ideas through literary and pictorial research. The directorial and collaborative problems of arriving at a production concept, up to, but not including fully-realized design documentation, is emphasized through a series of projects. (3 quarter hours)

Status as a 2nd, 3rd or 4th year BFA Lighting, Scenery, Costume Design and Dramaturgy students, or MFA students is a prerequisite for this class.

**DES 371 | DESIGN PRODUCTION PRACTICE II | 4 quarter hours
(Undergraduate)**

First course in a 3 course sequence. For all design students. Through demonstration, discussion, lecture, and projects, students explore thAssignments will be commensurate with ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 372 | DESIGN PRODUCTION PRACTICE II | 4 quarter hours
(Undergraduate)**

Second course in a 3 course sequence. For all design students. Through demonstration, discussion, lecture, and projects, students explore thAssignments will be commensurate with ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 373 | DESIGN PRODUCTION PRACTICE II | 4 quarter hours
(Undergraduate)**

Third course in a 3 course sequence. For all design students. Demonstration, discussion, lecture, and projects. Assignments will be commensurate with ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 384 | RENDERING FOR DESIGNERS I | 3 quarter hours
(Undergraduate)**

First course in a 3 course sequence. Using color pencils, pastel and markers, the fundamentals of drawing will be explored with primary emphasis on working from observation. The course develops insights in the mechanisms of visual perception, how the individual components of the drawing relate to the whole and compositional organization. Each student works to represent accurately and proportionately objects, planes, and volumes in color by developing hand-to-eye coordination with line and tone and color.

DES 113 or DES 286 and status as an Undergraduate or Graduate Theatre student (or Production Design concentration in the School for Cinematic Arts) are prerequisites for this class.

**DES 385 | RENDERING FOR DESIGNERS II | 3 quarter hours
(Undergraduate)**

Second course in a 3 course sequence. Using color pencils, pastel and markers, the fundamentals of drawing will be explored with primary emphasis on working from observation. The course develops insights in the mechanisms of visual perception, how the individual components of the drawing relate to the whole and compositional organization. Each student works to represent accurately and proportionately objects, planes, and volumes in color by developing hand-to-eye coordination with line and tone and color.

DES 384 and status as an Undergraduate or Graduate Theatre student (or Production Design concentration in the School for Cinematic Arts) are prerequisites for this class.

**DES 386 | RENDERING FOR DESIGNERS III | 3 quarter hours
(Undergraduate)**

Third course in a 3 course sequence. Using color pencils, pastel and markers, the fundamentals of drawing will be explored with primary emphasis on working from observation. The course develops insights in the mechanisms of visual perception, how the individual components of the drawing relate to the whole and compositional organization. Each student works to represent accurately and proportionately objects, planes, and volumes in color by developing hand-to-eye coordination with line and tone and color.

DES 386 and status as an Undergraduate or Graduate Theatre student (or Production Design concentration in the School for Cinematic Arts) are prerequisites for this class.

**DES 387 | SCENE PAINTING | 2 quarter hours
(Undergraduate)**

First course in a 3 course sequence. Discussion of the formulation and handling of scene paints and dyes, brushes and tools, and techniques. Practical laboratory work in problems of the realistic representation of a variety of textures and materials at scenic scale. (2 quarter hours)

Status as a Theatre Undergraduate or Graduate student (or concentration in Production Design in the School of Cinematic Arts) is a prerequisite for this course.

**DES 388 | SCENE PAINTING | 2 quarter hours
(Undergraduate)**

Second course in a 3 course sequence. Discussion of the formulation and handling of scene paints and dyes, brushes and tools, and techniques. Practical laboratory work in problems of the realistic representation of a variety of textures and materials at scenic scale leads to fully developed illusionistic and pictorial stage scenery. (2 quarter hours)

Status as a Theatre Undergraduate or Graduate student (or concentration in Production Design in the School of Cinematic Arts) is a prerequisite for this course.

**DES 389 | SCENE PAINTING | 2 quarter hours
(Undergraduate)**

Third course in a 3 course sequence. Discussion of the formulation and handling of scene paints and dyes, brushes and tools, and techniques. Practical laboratory work in problems of the realistic representation of a variety of textures and materials at scenic scale leads to fully developed illusionistic and pictorial stage scenery. (2 quarter hours)

DES 388 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 399 | INDEPENDENT STUDY | 1-4 quarter hours
(Undergraduate)**

Independent Study (variable credit)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 400 | SPECIAL TOPICS IN DESIGN | 4 quarter hours
(Undergraduate)**

This course covers one topic in depth in a rotation. These are advanced topics not able to be covered in the other design classes. Using a rotation allows students the opportunity to take multiple topics.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 408 | SOUND DESIGN III | 4 quarter hours
(Undergraduate)**

Senior Capstone - Focusing on the individual student and their requested field of study. Students choose what they wish to learn to create a more specialized approach to the individual's specific skills. The student outlines their own curriculum in an area in which they wish further research or study.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 409 | SOUND DESIGN III | 4 quarter hours
(Undergraduate)**

Portfolio, Website, and the Business of Freelancing - Students prepare their own specific branding for their freelance career so they will have a complete packaging of their artwork. Students also learn about the language that is necessary for freelance contracts, union contracts, and how to approach filing taxes.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 410 | SOUND DESIGN III | 4 quarter hours
(Undergraduate)**

Different Careers in Sound Design - Each week will be an introduction to different careers possible within the field of Sound Design. This course will contain guest lectures from professional designers who specialize in each field. Allowing students to narrow their focus to what they wish to achieve after they graduate.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 415 | WIG & MAKEUP DESIGN AND TECHNOLOGY 3 | 4 quarter hours
(Undergraduate)**

First course in a three-course sequence. Students will explore advanced ventilating techniques, including developing wig foundations and advanced hand tying/wefting. Exploration in non-traditional materials and fantasy design for both wigs and makeup. The analysis of scripts and development of a design concept are studied through projects in contrasting styles of production design, including design for film and other various entertainment media. The business side of wig and makeup design will be explored, including budgeting for materials and labor. As a corollary, portfolio and resume building is developed.

DES 317 and status as an undergraduate or graduate Theatre student is a prerequisite for this class.

**DES 416 | WIG & MAKEUP DESIGN AND TECHNOLOGY 3 | 4 quarter hours
(Undergraduate)**

Second course in a three-course sequence. Students will explore advanced ventilating techniques, including developing wig foundations and advanced hand tying/wefting. Exploration in non-traditional materials and fantasy design for both wigs and makeup. The analysis of scripts and development of a design concept are studied through projects in contrasting styles of production design, including design for film and other various entertainment media. The business side of wig and makeup design will be explored, including budgeting for materials and labor. As a corollary, portfolio and resume building is developed.

DES 415 and status as an undergraduate or graduate Theatre student is a prerequisite for this class.

DES 417 | WIG & MAKEUP DESIGN AND TECHNOLOGY 3 | 4 quarter hours (Undergraduate)

Third course in a three-course sequence. Students will explore advanced ventilating techniques, including developing wig foundations and advanced hand tying/wefting. Exploration in non-traditional materials and fantasy design for both wigs and makeup. The analysis of scripts and development of a design concept are studied through projects in contrasting styles of production design, including design for film and other various entertainment media. The business side of wig and makeup design will be explored, including budgeting for materials and labor. As a corollary, portfolio and resume building is developed.

DES 416 and status as an undergraduate or graduate Theatre student is a prerequisite for this class.

DES 430 | PROJECTION DESIGN 3 | 4 quarter hours (Undergraduate)

First course in three course sequence. Students complete assignments in the conceptual analysis and fulfillment of projects covering a wide variety of genres; including designs for the classical and modern drama, opera, architecture, installation art and the ballet. As a corollary, portfolios of a professional caliber are developed. Students will show competency in synthesizing their design and technical skills in projects that expand beyond theatre. They will create and be practiced in sharing a portfolio of their design work.

DES 332 and status as an Undergraduate or Graduate Theatre student are prerequisites for this class.

DES 431 | PROJECTION DESIGN 3 | 4 quarter hours (Undergraduate)

Second course in three course sequence. Students complete assignments in the conceptual analysis and fulfillment of projects covering a wide variety of genres; including designs for the classical and modern drama, opera, architecture, installation art and the ballet. As a corollary, portfolios of a professional caliber are developed. Students will show competency in synthesizing their design and technical skills in projects that expand beyond theatre. They will create and be practiced in sharing a portfolio of their design work.

DES 430 and status as an Undergraduate or Graduate Theatre student are prerequisites for this class.

DES 432 | PROJECTION DESIGN 3 | 4 quarter hours (Undergraduate)

Third course in three course sequence. Students complete assignments in the conceptual analysis and fulfillment of projects covering a wide variety of genres; including designs for the classical and modern drama, opera, architecture, installation art and the ballet. As a corollary, portfolios of a professional caliber are developed. Students will show competency in synthesizing their design and technical skills in projects that expand beyond theatre. They will create and be practiced in sharing a portfolio of their design work.

DES 431 and status as an Undergraduate or Graduate Theatre student are prerequisites for this class.

DES 441 | SCENE DESIGN III | 4 quarter hours (Undergraduate)

First course in a 3 course sequence. Students complete assignments in the conceptual analysis and fulfillment of projects covering a wide variety of genres, including designs for the classical and modern drama, opera, and the ballet. As a corollary, portfolios of a professional caliber are developed.

DES 343 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 442 | SCENE DESIGN III | 4 quarter hours (Undergraduate)

Second course in a 3 course sequence. Students complete assignments in the conceptual analysis and fulfillment of projects covering a wide variety of genres, including designs for the classical and modern drama, opera, and the ballet. As a corollary, portfolios of a professional caliber are developed.

DES 441 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 443 | SCENE DESIGN III | 4 quarter hours (Undergraduate)

Third course in a 3 course sequence. Students complete assignments in the conceptual analysis and fulfillment of projects covering a wide variety of genres, including designs for the classical and modern drama, opera, and the ballet. As a corollary, portfolios of a professional caliber are developed.

DES 442 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 444 | COSTUME DESIGN III | 4 quarter hours (Undergraduate)

First course in a 3 course sequence. Costume design for the diverse styles of the pre-modern drama evolving through lecture and project work. Projects will include script interpretation, developing a professional portfolio, discussions on career planning, and the exploration of design for a classical text.

DES 346 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 445 | COSTUME DESIGN III | 4 quarter hours (Undergraduate)

Second course in a 3 course sequence. Costume design for diverse styles of drama evolving through lecture and project work. Projects will include script interpretation, developing a professional portfolio, discussions on career planning, and the exploration of costume design within the areas of musical theater, opera, dance, film, television and commercials.

DES 444 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 446 | COSTUME DESIGN III | 4 quarter hours (Undergraduate)

Third course in a 3 course sequence. Costume design for diverse styles of drama evolving through lecture and project work. Projects will include script interpretation, developing a professional portfolio, discussions on career planning, and the exploration of costume design within the areas of musical theater, opera, dance, film, television and commercials.

DES 445 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 447 | LIGHTING DESIGN III | 4 quarter hours (Undergraduate)

First course in a 3 course sequence. Complete lighting design projects in a variety of styles and methods of presentation including unit set, multi-set, musicals, operas. Cuing, scenery and backdrop design will also be covered.

DES 349 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 448 | LIGHTING DESIGN III | 4 quarter hours
(Undergraduate)**

Second course in a 3 course sequence. Complete lighting design projects in a variety of styles and methods of presentation including unit set, multi-set, musicals, operas. Cuing, scenery and backdrop design will also be covered.

DES 447 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 449 | LIGHTING DESIGN III | 4 quarter hours
(Undergraduate)**

Third course in a 3 course sequence. Complete lighting design projects in a variety of styles and methods of presentation including unit set, multi-set, musicals, operas. Cuing, scenery and backdrop design will also be covered.

DES 448 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 471 | DESIGN PRODUCTION PRACTICE III | 5 quarter hours
(Undergraduate)**

For all design students. Assignments will be commensurate with ability and experience. (5 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 472 | DESIGN PRODUCTION PRACTICE III | 5 quarter hours
(Undergraduate)**

For all design students. Assignments will be commensurate with ability and experience. (5 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 473 | DESIGN PRODUCTION PRACTICE III | 5 quarter hours
(Undergraduate)**

For all design students. Assignments will be commensurate with ability and experience. (5 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 484 | PHOTOSHOP FOR DESIGNERS | 3 quarter hours
(Undergraduate)**

Students will work through the process of creating professional renderings of stage scenery, costumes, and lighting, by using Photoshop to manipulate and transform their original sketches. Through this process, the students will master the tools available in Photoshop, and will create portfolio-ready rendering works.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 485 | PROJECTION DESIGN | 3 quarter hours
(Undergraduate)**

Students are provided with basic design concepts, techniques and skills in the use of projection design for theatre. The course focuses on conceiving motion and still images for projection, communicating those ideas to the design team through story boards, and realizing those ideas through the use of Isadora video control software.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 486 | PORTFOLIO PREPARATION | 3 quarter hours
(Undergraduate)**

Students will work on developing a professional portfolio that showcases their design work to best advantage. Students will develop a consistent presentation style and will rework projects as necessary to increase the quality of their portfolio.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 490 | DESIGN INTERNSHIP | 5 quarter hours
(Undergraduate)**

The internship provides the student with an opportunity to learn by working with experienced professionals in an area related to his/her area of study at The Theatre School. (5 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**DES 641 | THEATRICAL COLLABORATION | 3 quarter hours
(Graduate)**

An investigation, through research and discussion, of the conceptual problems of physically mounting specific, assigned scripts from the classic and modern theatre, covering a broad stylistic range. Students will submit proposals for designs and justify their ideas through literary and pictorial research. The directorial and collaborative problems of arriving at a production concept, up to, but not including fully-realized design documentation, is emphasized through a series of projects. (3 quarter hours)

Status as a 2nd, 3rd or 4th year BFA Lighting, Scenery, Costume Design and Dramaturgy students, or MFA students is a prerequisite for this class.

**DES 642 | THEATRICAL COLLABORATION | 3 quarter hours
(Graduate)**

An investigation, through research and discussion, of the conceptual problems of physically mounting specific, assigned scripts from the classic and modern theatre, covering a broad stylistic range. Students will submit proposals for designs and justify their ideas through literary and pictorial research. The directorial and collaborative problems of arriving at a production concept, up to, but not including fully-realized design documentation, is emphasized through a series of projects. (3 quarter hours)

Status as a 2nd, 3rd or 4th year BFA Lighting, Scenery, Costume Design and Dramaturgy students, or MFA students is a prerequisite for this class.

Digital Humanities (DHS)

**DHS 460 | DIGITAL HISTORY | 4 quarter hours
(Graduate)**

Introduction to digital tools and methods for historical research.

**DHS 500 | INTRODUCTION TO DIGITAL HUMANITIES | 4 quarter hours
(Graduate)**

An introduction to tools and methods in digital humanities.

Digital Media Arts (DMA)

DMA 402 | INTRO TO VISUAL COMMUNICATIONS PRINCIPLES | 4 quarter hours

(Graduate)

This course introduces visual communication principles including, but not limited to, typography, color, movement and composition for print and screen applications. Students will create multiple projects and participate in class critiques to help build industry specific vocabulary, critical assessment, and familiarity with presenting creative work. Relevant creative methodologies and software used to prepare media for print and digital applications will also be covered. PREREQUISITE(S): None.

DMA 405 | INTRO TO VISUAL COMMUNICATION TOOLS | 4 quarter hours

(Graduate)

This course introduces visual communication tools including, but not limited to, Adobe Illustrator, Photoshop, InDesign, and website building tools (CMS), like Wordpress or Squarespace. Throughout the course, students will use these tools to create a personal portfolio website.

DMA 410 | DESIGN WORKSHOP | 4 quarter hours

(Graduate)

This course is an intensive study of the world of visual design with a specific focus on contemporary graphic design theories and practices expressing ideas and messages to specific audiences. It expands on the design skills developed in the introductory class (GD 200) including communication, conceptualization, typography, color, form, and structure. Students will study both commercial and artistic approaches producing projects that integrate designed graphics, photographs, illustration and text, and their intersection with moving technologies. Students will have the opportunity to produce sophisticated printed matter on state-of-the-art printing equipment or digital presentation for the web, screen or mobile devices. PREREQUISITE(S): None.

DMA 415 | AUDIO WORKSHOP | 4 quarter hours

(Graduate)

This course is an introduction to the world of interactive audio communication for multimedia. Students will study various uses of sound and music on stand-alone applications, mobile devices, and the internet. Students will learn to create and edit podcasts, deliver multimedia presentations, upload audio in various standard formats and attach audio files to social media platforms. Emerging hardware and software technologies will also be introduced. The course will also cover current trends and legalities of digital media. PREREQUISITE(S): None.

DMA 420 | DIGITAL MEDIA ARTS SURVEY | 4 quarter hours

(Graduate)

Introduces the field of Digital Media through a weekly focus on various media arts themes (for example, UX, video production, design management, etc.). Panel discussions where faculty members and industry professionals will share their work and answer questions will occur weekly. This class encourages students to clarify their course of study and build connections with faculty, professionals, and students with similar interests. In addition to panel discussions, students will also complete a series of trend reports and presentations that align with the weekly themes. PREREQUISITE(S): None.

DMA 425 | STILL IMAGE WORKSHOP | 4 quarter hours

(Graduate)

This course develops and expands the digital imaging skills introduced in the introductory class (DC 225), with a specific focus on their application in contemporary photographic practice. Advanced color correction, retouching, and compositing techniques are covered and complemented by further development of digital capture (scanning and digital cameras) and printing techniques. Assignments incorporate the technical aspects of specific skills while emphasizing their conceptual application. Digital acquisition and output utilizes ever-changing technology providing an understanding of advanced digital workflow and new processes as they apply to individual artistic practice. Students gain a wealth of technical understanding on topics such as color calibration and device profiling, file types and file management, and advanced color correction terms and techniques (gamma, color space, raster image processing and profile printing). Output methodologies and materials, including dye-based and pigment-based color inkjet prints, carbon-based black and white inkjet prints, digital color coupler printing, and a variety of experimental materials are explored. Assignments facilitate students' research and exploration of new techniques in the conception and production of their own work. PREREQUISITE(S): None.

DMA 445 | 360 VIDEO PRODUCTION | 4 quarter hours

(Graduate)

This class will focus on the development, production and post-production of live-action 360 video. The medium of virtual reality will be analyzed within the context of the evolution of time-based and interactive media. Experimental projects will offer students the opportunity to tell stories in new ways while exploring the affordances and challenges of the evolving medium.

DMA 475 | MOVING IMAGE WORKSHOP | 4 quarter hours

(Graduate)

This course introduces students to more sophisticated forms of image/sound manipulation, editing, and theory. Pre-production planning (storyboards, scripting, budgeting), further refinement of digital editing techniques, and basic post-production/visual effects are covered, as well as studio production techniques, such as chroma-keying and work with advanced cameras. Students are expected to achieve a level of technical competence and confidence necessary to undertake more ambitious independent work. The class views and discusses key contemporary works and related critical writings. PREREQUISITE(S): None.

DMA 480 | WEB/MEDIA DELIVERY WORKSHOP | 4 quarter hours

(Graduate)

This course is an intensive exploration of the opportunities and constraints of social media platforms for the distribution and curation of digital media artifacts. We will explore both commercial and academic platforms to develop an understanding of how different designs support different models of curation and distribution. As a project, students will select 2 platforms and create original digital installations using media they have authored in order to examine how the design of a social media platform influences how audiences interact with their installations. PREREQUISITE(S): None.

DMA 490 | PORTFOLIO | 4 quarter hours

(Graduate)

This course assists students preparing to enter the job market and emphasizes assembling a professional quality portfolio through workshops on advanced modeling and rendering techniques, visual composition, portfolio layout, design communication and presentation skills. Portfolio reviews by invited professionals are an integral component of this course. PREREQUISITE(S): None.

DMA 495 | SPECIAL TOPICS IN DIGITAL MEDIA ARTS WORKSHOP | 1-4 quarter hours (Graduate)

Specific topics selected by the instructor. Topic varies with teach offering. Contact instructor for more information. Credit counts towards DMA Advanced Workshop requirement. Prerequisite(s): See syllabus.

DMA 521 | DESIGN MANAGEMENT WORKSHOP | 4 quarter hours (Graduate)

In this course students learn to infuse design thinking into the business strategies of organizations, develop creative leadership, and refine project management planning skills. Based on a topic selected for the class, the outcome of the design process is manifested in a concept that satisfies the needs of the customer, market, producer and organization. Through documentation and a formal project presentation, students demonstrate their understanding of the design process and resolution of conflicting issues related to innovation and delivering digital media. PREREQUISITE(S): None.

DMA 525 | FOUNDATION OF DIGITAL MEDIA | 4 quarter hours (Graduate)

This introductory course will provide students with a detailed practical introduction to the technological practices, skills, and tools of digital communication. Students will engage with digital technology with the goals of learning and practicing technical skills across a range of technologies, including video, audio, graphic design, and human-computer interaction. Students work with still images, moving images and sound using integrated digital media applications. The course focuses on the technical, social and cultural competencies required to traverse media in online convergence environments. This class provides students a hands-on approach to digital communication. This course will also prepare students to work with digital technology at future jobs.

DMA 527 | CREATIVE PROCESS AND STRATEGY | 4 quarter hours (Graduate)

This course focuses on developing a creative process rooted in iteration, exploration and user-centered methodologies. Students will develop project concepts following the steps of research, analysis, ideation and prototyping to help establish an understanding of strategic creative planning and management. Concept documentation and critical assessment will also be practiced through regular class presentations and critiques. Students will explore and experiment with their own creative processes throughout the course.

DMA 405 is a prerequisite for this class.

DMA 530 | DESIGN THINKING AND STORYTELLING | 4 quarter hours (Graduate)

The course is an exploration of design as a form of storytelling. Design thinking and the human-centered design process will be examined, practiced and employed over the course of the quarter, culminating in a significant project. Groups will develop their quarter-long projects by utilizing the tools and approaches of design thinking through the lens of interactive design. Students learn the basics of conceptualizing for interactive media as well as gain proficiencies in using various tools to create interactive experiences.

DMA 535 | STORYTELLING ACROSS MEDIA | 4 quarter hours (Graduate)

This course introduces students to the theory and practice of multi-modal storytelling, i.e. the strategic use of two or more communication modes to make meaning, such as image, gesture, music, spoken and written language. While the application areas of storytelling may remain the same - from artistic expression to advertising, PR, journalism, documentary, activism and other persuasive forms - our means of meaning making are changing dramatically due to technological innovation, availability of digital media production tools, and the potential of immediate and universal online publication. Changing technological affordances demand an increased media literacy that includes a deep understanding of the specific strengths and weaknesses of various communication modes and their manifestation in digital media formats, so we can leverage them intentionally to create impactful, cohesive and emotionally compelling multi-modal texts and trans-media stories.

DMA 525 is a prerequisite for this class.

DMA 555 | DIGITAL MEDIA STUDIO | 4 quarter hours (Graduate)

Students explore studio-based collaborative creation of media arts projects and work processes. The course will include different methods and approaches rather than a discipline-specific focus. Depending on student interest, the projects will include image production and design through animation, film, sound, design, interactivity and photography. The computer is used as a creative solution to producing innovative projects emphasizing the construction of a portfolio of work. PREREQUISITE(S): None.

DMA 599 | INDEPENDENT STUDY | 1-4 quarter hours (Graduate)

Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable Credit. Prerequisite(s): Instructor and dean approval.

DMA 695 | THESIS I | 4 quarter hours (Graduate)

The thesis courses provide an opportunity for students to apply the skills they have learned to a professionally developed project of their interest. The project will be accompanied by a written analysis of the concept and documentation of the process. Students have the choice to work individually or in small teams. In Thesis I, students will be guided through in depth precedent and user research, surveying the field to develop a unique concept that will challenge their skills and understanding of the medium, while also seeking to contribute to the advancement of the field. Students will create a project plan and a series of prototypes and/or rough drafts to help develop and refine their concepts. Regular presentations with peers will be held weekly to prepare for a final concept presentation to a professional panel.

DMA 525 and DMA 527 are prerequisites for this class.

**DMA 698 | THESIS II | 4 quarter hours
(Graduate)**

The thesis courses provide an opportunity for students to apply the skills they have learned to a professionally developed project of their interest. The project will be accompanied by a written analysis of the concept and documentation of the process. Students have the choice to work individually or in small teams. In Thesis II, students will work in a studio format to refine the concept developed in Thesis I. Concept development will consist of on-going analysis and critique of the concept through user/audience testing to result in creation of a professional quality digital media piece or high-fidelity prototype. Students will have regular presentations to prepare them to defend their final thesis project before a panel of faculty and industry professionals.

DMA 695 is a prerequisite for this class.

E-Commerce Technology (ECT)

**ECT 250 | INTERNET, COMMERCE, AND SOCIETY | 4 quarter hours
(Undergraduate)**

An introduction of Internet technology, its application for commerce, and its social impact. This course surveys Internet technology, collaboration and commerce activities, digital media distribution, online communities, and social networking in the Internet environment.

**ECT 310 | INTERNET APPLICATION DEVELOPMENT | 4 quarter hours
(Undergraduate)**

Development of Internet-based applications using client and server-side scripting. Students will design and build an Internet application that accesses a database.

CSC 211 (or IT 231 or CSC 241 or CSC 243) is a prerequisite for this class.

**ECT 330 | ADVANCED INTERNET APPLICATION DEVELOPMENT | 4 quarter hours
(Undergraduate)**

This is a programming course focusing on advanced Internet technologies such as tiered design of Internet applications, transactions, creating components, and Web services.

(IT 211 or IT 231 or CSC 241 or CSC 243) is a prerequisite for this class.

**ECT 355 | INTERNET SYSTEMS: COLLABORATION, COMMERCE, AND MEDIA | 4 quarter hours
(Undergraduate)**

This course examines the application of Internet technology to support collaboration, commerce, and digital media distribution activities. It will focus on the latest technologies, new development models and their social impact. Students will explore different models and develop applications to support collaborative commerce.

ECT 310 (or ECT 330 or IT 232) is a prerequisite for this class.

**ECT 360 | INTRODUCTION TO XML | 4 quarter hours
(Undergraduate)**

An introduction to Extensible Markup Language (XML) and XML transformations. XML syntax, processing and validation. Namespaces. Transformations using XSLT and XPath. XML applications such as XHTML, RDF, SVG, XSL.

CSC 211 (or CSC 241 or CSC 243) is a prerequisite for this class.

**ECT 410 | DEVELOPMENT OF WEB-BASED BUSINESS APPLICATIONS | 4 quarter hours
(Graduate)**

Development of web-based business solutions using client-side and server-side technologies. Major topics include analysis and design of web projects for a business, web application design patterns, server-side programming, and access to databases.

CSC 401 or IT 411 is a prerequisite for this class.

**ECT 455 | E-COMMERCE WEB SITE ENGINEERING | 4 quarter hours
(Graduate)**

(Formerly ECT 555, cross-listed with HCI 513) An introduction to Web site engineering methods and processes to support e-commerce development. Web site engineering life cycle and user-centered design, including site goals, business models, value propositions, user analysis, information architecture, interface and navigation design, usability guidelines, database, testing, hosting strategies, usage metrics, and collaborative development. Technologies for e-commerce, shopping cart, digital payments, promotion strategies, and security issues. Students will build fully functional Web sites using database and client- and server-side technologies.

(CSC 401 or IT 411 or HCI 430) is a prerequisite for this class.

**ECT 480 | INTRANETS AND PORTALS | 4 quarter hours
(Graduate)**

Intranet development methodology. Data warehousing concept and On-Line analytic processing (OLAP) for information management. Enterprise information portals (EIP). Transforming information into knowledge. Major applications involve: decision support, customer applications and content personalization for intranet. Students will conduct case studies and projects.

ECT 424 is a prerequisite for this class.

**ECT 481 | INTERNET SUPPLY CHAIN MANAGEMENT | 4 quarter hours
(Graduate)**

This course examines system architectures, technologies, approaches, and infrastructure requirements in the context of supply chain systems. The focus is on the design, development and implementation of systems that facilitate the collaboration of an enterprise with its buyers and suppliers. Topics include development of messaging-based collaboration framework with web services. Students will design and implement a collaborative extranet system component in team projects.

CSC 401 or IT 411 is a prerequisite for this class.

**ECT 556 | ENTERPRISE ARCHITECTURE AND DESIGN | 4 quarter hours
(Graduate)**

This is an advanced course on the design and planning of enterprise architecture that enables intra-/multi-enterprise collaboration and interoperability. The emphasis is on the alignment between IT and organizational objectives through the integration of business architectures, data and information architecture, application architecture, technology architecture, interfaces and infrastructure. Topics include: frameworks, tools, and methodologies for enterprise architecture design; data and process modeling, application integration, implementation fundamentals, adaptability to changing organizational needs, and managing costs of implementation. Students will conduct case studies and develop architecture plans. Prerequisites: ECT 424 and SE 430.

ECT 424 and SE 430 are prerequisites for this class.

**ECT 565 | MOBILE ENTERPRISE | 4 quarter hours
(Graduate)**

Mobile enterprise information systems are becoming increasingly complex and consist of existing systems with enabling middleware to achieve end-to-end enterprise mobile solutions. Mobile infrastructure performs content adaptation, data synchronization, bridging corporate and mobile messaging systems and support mobile information portals. The course will discuss web services oriented component architecture and system integration with Adaptive Application Architecture (AAA) with Wireless application gateway (WAG) and Multi-channel Access Gateways (MAG) supporting mobile and wireless access for heterogeneous devices. Such concepts as content distribution, connectivity and security, scalability and load balancing, device management will be discussed. Additional topics include Location-aware applications supporting mobile knowledge workers, business process for value contribution, and investment decisions on mobile technologies. Students will become familiar with mobile enterprise tool suites, mobile messaging delivery platforms, wireless Web portals. Students will be implementing mobile enterprise solution components.

ECT 455 is a prerequisite for this class.

**ECT 582 | SECURE ELECTRONIC COMMERCE | 4 quarter hours
(Graduate)**

This course studies security requirements, threat modeling, and appropriate safeguards for e-commerce systems. Major topics include web application security, web service security, and web server security.

ECT 424 OR CSC 435 OR NET 463 is a prerequisite for this class.

**ECT 583 | ADVANCED SCRIPTING TECHNOLOGIES | 4 quarter hours
(Graduate)**

This course focuses on applying advanced scripting technologies in the design and development of large Web applications. Major topics include tiered application design, transacted Web applications, components, and Web services.

CSC 401 or IS 411 or IT 411 is a prerequisite for this class.

**ECT 587 | MOBILE COMMERCE TECHNOLOGY | 4 quarter hours
(Graduate)**

This course examines leading wireless and mobile technologies for consumer and enterprise mobile commerce. This course discusses how mobile technologies have changed the business community with an emphasis on major mobile platforms. Major topics include analysis and design of business applications in a mobile environment, and wireless user interface design. Students will develop mobile applications using a prominent mobile technology.

CSC 401 or IS 411 or IT 411 is a prerequisite for this class.

**ECT 589 | E-BUSINESS STRATEGIES | 4 quarter hours
(Graduate)**

Designed for ECT majors and IS majors in ECT concentration, this course focuses on the deployment of Internet and enterprise technologies to support organization's e-business initiatives and collaborative commerce. Conducted in the format of seminar, case analysis, and dialogue with industry practitioners, this course requires students to actively participate in the study of models and approaches for e-business technology implementation and transformation. Topics include: the impact of Internet on industry structure and organizational transformation, enterprise application architecture, planning and implementation of technology and process to support an increasingly collaborative and integrated environment for e-commerce. Students have to complete an organization case study of e-business technology implementation to fulfill the requirement of this capstone course. This course should be taken at the conclusion of the ECT program. PREREQUISITE(S): Completion of ten or more School of Computing MS level courses is required.

**ECT 596 | TOPICS IN E-COMMERCE TECHNOLOGY | 4 quarter hours
(Graduate)**

Independent study form required. PREREQUISITE(S): Consent of instructor.

**ECT 690 | RESEARCH SEMINAR | 1-4 quarter hours
(Graduate)**

Readings and discussion on current research topics. Students may register for this course no more than twice. PREREQUISITE(S): Consent of the instructor. (variable credit)

**ECT 696 | MASTER'S PROJECT | 4 quarter hours
(Graduate)**

Four credit hours. Students may register for this course only after their advisor has approved a written proposal for their project. Independent study form required. (PREREQUISITE(S): Consent of advisor).

**ECT 698 | MASTER'S THESIS | 2 quarter hours
(Graduate)**

(2 credit hours) Students may register for this course only after their advisor has approved a written proposal for their thesis. Students must continue to register for this course every quarter after their first registration in it until they complete their project or thesis to the satisfaction of their advisor. They earn two hours of credit for each such registration but only four hours of credit will apply for degree credit. Independent study form required. PREREQUISITE(S): Consent of advisor. (2 quarter hours)

Early Childhood Education (ECE)

**ECE 91 | CLINICAL EXPERIENCES WITH INFANTS AND TODDLERS | 1
quarter hour
(Undergraduate)**

Candidates will observe and interact with infants and toddlers (25 clock hours) and attend a weekly seminar in which they will be required to reflect on their experiences in relation to the development and learning processes of infants and toddlers. Appropriate early childhood lesson planning and assessment techniques and tools will be emphasized.

COREQUISITE: ECE 290. (1 credit hour)

**ECE 92 | CLINICAL EXPERIENCES WITH YOUNG CHILDREN AND FAMILIES | 1 quarter hour
(Undergraduate)**

Candidates will observe and interact with young children and their families in school and child care settings with family/parent education programs; family conferences and home visits will be included in the options. (25 clock hours). Candidates will meet once a week in a seminar to reflect and discuss topics around parental involvement, parental support, and building communities through connections between schools and homes. COREQUISITE: ECE 302. (1 credit hour)

**ECE 93 | CLINICAL EXPERIENCES WITH PRE-SCHOOLERS | 1 quarter hour
(Undergraduate)**

Candidates will observe and interact with preschool age children (25 clock hours) and attend a weekly seminar in which they will be required to reflect on their experiences in relation to the development and learning processes of preschool age children. Appropriate early childhood assessment and instructional methodologies will be emphasized. COREQUISITE: ECE 310. (1 credit hour)

An education major or minor is a prerequisite for this class.

**ECE 94 | CLINICAL EXPERIENCES IN PRIMARY GRADES | 1 quarter hour
(Undergraduate)**

Candidates will observe and interact with primary age children (25 clock hours) and attend a weekly seminar in which they are required to reflect on their experiences in relation to the development and learning processes in the primary years (K-3). Appropriate assessment and instructional methodologies for children in the primary grades will be emphasized. COREQUISITE: ECE 311. (1 credit hour)

An education major or minor is a prerequisite for this class.

**ECE 175 | EDUCATING THE TWENTY-FIRST CENTURY YOUNG CHILD | 4 quarter hours
(Undergraduate)**

Course is for students with interests in early childhood programs in the United States. Course explores issues influencing early childhood education, such as socio-historical factors, family policy, diversity, and federal/state regulations. Students examine programs using readings from the Vincentian Collection, child psychology, social theories and the current media. Students compare Vincentian Heritage, current and past federal policies, applying this study to their understanding of social justice to modern childcare practices. To guide students deeper into understanding the lives of young children, the course offers an option for service learning with Jumpstart, Chicago-area Head Start, and other early childhood education centers.

**ECE 280 | INTERNSHIP WITH INFANTS AND TODDLERS | 2 quarter hours
(Undergraduate)**

Candidates conduct 35 hours of supervised fieldwork in an infant/toddler center where they are observing and documenting behavior and interactions, planning activities, and assessing development in children ages birth to 3. Candidates will also participate in a twice a quarter, hour and a half, seminar to reflect and discuss aspects of infant/toddler development and care, making connections between theory and practice. Onsite meetings with groups of candidates will be held weekly for supervision and reflection on practice. Co-requisite ECE 290. (2 credit hours)

**ECE 286 | ART, MUSIC, AND MOVEMENT FOR THE YOUNG CHILD | 4 quarter hours
(Undergraduate)**

This course will focus on the theory, research, methods, and activities of art, music, and movement for young children birth through age 8. Emphasis will be on the integration of developmental domains, creative and critical thinking as developmental domains are integrated.

**ECE 290 | CHILD GROWTH AND DEVELOPMENT | 4 quarter hours
(Undergraduate)**

This course examines human growth and development of the child from pregnancy through age eight, including cognitive, language, physical, social, spiritual, creative, and emotional areas of development. Learning and development theories of young children, including those of Freud, Erikson, Bowlby, Piaget, Vygotsky, Bronfenbrenner, and other modern developmental theorists are explored. Pedagogical implications of these developmental theories are embedded in class discussions and course activities. COREQUISITE: ECE 280.

**ECE 298 | CHILD HEALTH SAFETY AND NUTRITION | 4 quarter hours
(Undergraduate)**

This course focuses on the interrelationships among child, family and the areas of health, safety and nutrition. Special emphasis will be placed upon the issues of health, safety and nutrition that affect young children from the ages of birth through age 8. Understanding cultural issues and special needs of individual children are addressed, as are aspects of health and safety. Central to this course is the acquisition of knowledge and application of practices that promote good nutrition, dental health, and the physical, social and emotional well being of young children. The course includes information on common diseases and health problems.

**ECE 302 | CHILD AND FAMILY IN THE URBAN COMMUNITY | 4 quarter hours
(Undergraduate)**

This course focuses on understanding the diversity of children and families in approaches to development, learning, and disability. Strategies in developing positive and supportive relationships with families of young children with special needs, including family-centered practices, will be explored. Particular attention is given to the challenges faced by teachers and other professionals in early intervention in assessing children's needs and providing services, which are reflective of the child's development within his/her diverse cultural and community context. In addition, the course examines ways to develop and maintain productive and collaborative relationships among professionals and families, communities, and other professionals across the range of support systems in the IFSP and IEP planning processes.

**ECE 303 | INTRODUCTION TO EARLY CHILDHOOD EDUCATION | 4 quarter hours
(Undergraduate)**

This course will introduce students to the professional ethics of early childhood education and the critical role of federal policy in the evolution of the field. Historical, sociological, philosophical, and psychological foundations of early childhood education are explored. Of special interest is a review of key theories and research that inform the development of early childhood education goals and practices, as well as administrative, pedagogical, and ethical professional standards for working with children from diverse communities. The course includes foci on Developmentally Appropriate Practice (DAP), inclusive pedagogical practice, appropriate use of technology with young children, and various curricular models: Montessori, Reggio Emilia, High Scope, and Creative Curriculum.

ECE 306 | FUNCTIONAL BEHAVIOR ASSESSMENT: INTERVENTION AND SUPPORT IN EARLY CHILDHOOD | 4 quarter hours (Undergraduate)

This course is designed to prepare early childhood pre-service teachers to work with children who present a variety of challenging behaviors in the classroom. Grounded in principles of Applied Behavior Analysis, the philosophy of the course is based on the premise that understanding the underlying causes of children's externalizing and internalizing behavior enables the teacher to utilize appropriate techniques in conducting behavior intervention and classroom management. Using Positive Behavioral Support and Functional Behavior Analysis (a competency required for all teachers under the provisions of IDEA), students will learn how to design and develop a Behavior Intervention Plan. Diverse methods for addressing a variety of behaviors are explored and practiced through field-based assignments that also include application of behavioral assessment and intervention tools, as well as techniques.

ECE 290 and edu major or minor

ECE 307 | LANGUAGE DEVELOPMENT IN EARLY CHILDHOOD (BIRTH TO 8) | 4 quarter hours (Undergraduate)

This course examines language acquisition and development in young children, including culturally and linguistically diverse learners and children with atypical language development. Attention will be given to dialectical issues as these apply to growth and development of linguistic competencies through the early childhood years. Explored in this course are the core topics of linguistic: morphology, syntax, semantics, pragmatics, phonetics, and phonology. Psycholinguistic and sociolinguistic theories anchor the discussion of language learning in childhood. Issues of language delay and processing of symbolic information to facilitate the development of articulation, fluency, voice, and functional language are included.

ECE 290 and edu major or minor

ECE 309 | YOUNG EXCEPTIONAL CHILD: METHODS AND CHARACTERISTICS | 4 quarter hours (Undergraduate)

This course is a survey of the field of early childhood special education, including the Early Intervention System. Characteristics of infants, toddlers, and young children with special needs are examined in this course. Methods of working with different disabilities during children's early years will be explored. Strengths and needs of families of young children with disabilities and collaboration with family members will be emphasized. Understanding the impacts of current legislation, policy, and research on practice is fostered and developed.

ECE 290 and edu major or minor

ECE 310 | PREPRIMARY PROGRAMS: CURRICULUM AND STRATEGIES | 4 quarter hours (Undergraduate)

Candidates will plan, implement, and evaluate activities that promote the physical, emotional, social, spiritual, cognitive, and creative development of preschool children from diverse cultural and socioeconomic backgrounds. Emphasis will be placed on creating learning environments that facilitate children's learning through play. Developmentally appropriate practices, with a particular emphasis on social studies, use of technology, and learning centers will be thoroughly investigated. COREQUISITE: ECE 381.

ECE 290 and edu major or minor

ECE 311 | CURRICULUM AND INSTRUCTION IN PRIMARY GRADES | 4 quarter hours (Undergraduate)

This course provides an examination of the objectives, content methods and materials used in the primary grades of elementary schools (K-3). A variety of teaching methods and classroom management strategies will be discussed and illustrated, including teacher-led and student-centered instruction. Candidates will be encouraged to reflect upon their own emerging educational philosophies and teaching styles as they take part in laboratory and clinical experiences. Many opportunities for planning, using and evaluating a variety of teaching methods will be offered. Each student will develop at least one teaching unit on a primary social studies theme. COREQUISITE: ECE 382.

ECE 290, ECE 310 and an Education major or minor are prerequisites for this class.

ECE 312 | BILINGUAL THEORY IN EARLY CHILDHOOD DEVELOPMENT | 4 quarter hours (Undergraduate)

This course is designed to equip bilingual and second language teachers with the knowledge and philosophy to work effectively in the education of early childhood language minority students in the context of bilingual/ESL programs. The course will explore the historical, political and legal foundations of bilingual education programs in the United States. It will examine different models of bilingual programs and the psycholinguistic and sociolinguistic principles upon which they are based.

ECE 313 | CROSS CULTURAL STUDIES IN EARLY CHILDHOOD EDUCATION | 4 quarter hours (Undergraduate)

The course will discuss the historical, philosophical and cultural foundations of education of young children in a multicultural society, emphasizing the role of ethnicity and cultural variables in development of young children within the context of families, childcare centers, and educational systems. Topics include: history of immigration and predictions for the future; the effects of population shifts on the education of English Language Learners and their families; the impact of laws, litigation and executive orders on bilingual/English-as-a-Second-Language education; understanding cultural and linguistic differences regarding locating and using educational resources.

ECE 314 | METHODS AND MATERIALS FOR DUAL LANGUAGE AND MULTILINGUAL LEARNERS | 4 quarter hours (Undergraduate)

This course focuses on best practices in teaching dual language and multilingual learners (DLL/ML), helping them to learn English while maintaining their native language, in bilingual/ESL early childhood classrooms, from birth through age 8. Candidates will demonstrate competencies with different approaches and methodologies currently used to support the development of listening, speaking, reading, and writing in social and academic contexts in learners' first and additional languages. Curriculum-based assessment, cultural awareness, and self-reflective practice will also be addressed. 17 hours of Field Experience required.

ECE 325 | SECOND LANGUAGE ACQUISITION AND EARLY LITERACY DEVELOPMENT | 4 quarter hours**(Undergraduate)**

This course will examine the process of learning and using a second language. Research in second language acquisition (SLA) is multi-disciplinary in nature, reflecting the complexity of language learning and use. Linguistic, psychological and social processes that underlie language learning and use will be introduced and applied to the understanding of this learning in young children. Language acquisition theory concerning relationships between early literacy and oral language development in first and subsequent languages will be explored. Understanding developed through this exploration will then be applied to the classroom in the form of strategies and literacy development activities.

ECE 326 | PRINCIPLES AND STRATEGIES FOR FAMILY ADVOCACY AND ACTION IN EARLY CHILDHOOD | 4 quarter hours**(Undergraduate)**

This course develops knowledge and skills to assist families of young children who face the stress of living in poverty. The focus will be on developing empathetic relationships with families so that family service and education can be optimized. Candidates will be assisted in learning to identify community resources and ways to support families in accessing resources. A focal point will be on ways to empower families, recognizing family strengths and respect for cultural variables, as they apply.

ECE 302 and an Education major or minor are prerequisites for this class.

ECE 327 | IMPACT OF PUBLIC POLICY ON FAMILIES OF YOUNG CHILDREN | 4 quarter hours**(Undergraduate)**

This course is grounded in social justice practice and designed to promote an understanding of the ethical principles, legal issues, policies, and law influencing the well being of families, including those families of young children with disabilities and those who are English Language Learners. A particular focus will be on how federal childcare and education policy affects and shapes early childhood practice and service delivery to families. This course explores historical development of laws and public policy affecting families. Ethics and ethical implications of social change will be explored.

ECE 328 | WORKING WITH FAMILIES OF CHILDREN WITH DISABILITIES AND CHRONIC ILLNESS | 4 quarter hours**(Undergraduate)**

This course will strengthen the knowledge and skills of early childhood educators and other professionals working with young children in cultural competency (at the individual and institutional level), family-centered care, family-professional partnerships, family-directed practices, and family empowerment. Candidates will develop best practices to assure the health and well being of children and their families and to honor the strengths, cultures, traditions and expertise that everyone brings to this relationship.

ECE 329 | YOUNG CHILDREN'S LITERATURE AND FAMILY LITERACY | 4 quarter hours**(Undergraduate)**

This class explores the joys of reading and provide strategies for candidates to awaken and encourage the joy of reading in the children and families with whom they work. It focuses on how early childhood educators are uniquely positioned to foster literacy in children and their families through thoughtful, theoretically based programming and activities.

ECE 331 | BEGINNING MATH AND SCIENCE INSTRUCTION | 4 quarter hours**(Undergraduate)**

This course applies child development principles to the planning of science and mathematics experiences for both typically and atypically developing young children. Emphasis is placed on understanding how children develop problem-solving skills, and on recognizing how teachers can facilitate inquiry-discovery experiences for young children with diverse learning styles and needs. Course assignments include participation in experiments and field-based experiences in mathematics and sciences. Teacher candidates are required to develop and provide developmentally and culturally appropriate activities in science and mathematics activities for young children.

ECE 290 and edu major or minor

ECE 332 | EARLY LITERACY AND ASSESSMENT FOR YOUNG CHILDREN WITH DISABILITIES | 4 quarter hours**(Undergraduate)**

This course focuses on the nature of the reading process, current literacy theory and practices, and research-based instructional strategies to develop literacy skills in emergent and developing readers and young children with reading/learning disabilities. Emphasis is placed on understanding the reading process, analyzing and applying research-based instructional practices, administering, analyzing, and interpreting formal and informal reading assessments, and making informed instructional decisions to meet the unique needs of individual readers. Differences in reading abilities will be examined in light of providing appropriate, effective, and meaningful literacy instruction for young children with disabilities.

ECE 333 | EARLY CHILDHOOD EDUCATION FOR LOW INCIDENCE DISABILITIES | 4 quarter hours**(Undergraduate)**

This course focuses on an examination of the developmental and learning characteristics of young children with low incidence disabilities. A specific focus is on educating early childhood students with Autism Spectrum Disorders and those with Intellectual Disabilities. A primary goal of this course is to understand the learning needs of these children, and to examine and evaluate various educational and therapeutic methods of working with them. A major part of this course is devoted specifically to the characteristics associated with and interventions for children with Autism Spectrum Disorders.

ECE 334 | SPECIAL EDUCATION CURRICULUM AND STRATEGIES FOR YOUNG CHILDREN | 4 quarter hours**(Undergraduate)**

Study of the theoretical and practical approaches to instruction for young children with high incidence disabilities. Emphasis is placed on the development of supportive learning environments, using special curricular and behavioral management strategies for all early childhood settings; application of collaborative practices with multiple service providers and families to meet the needs of diverse learners with high incidence disabilities. Strategies and materials for improving the social, emotional, and academic adjustment and functioning of young children with high incidence disabilities are examined. Includes teaching social and emotional curricula; implementing functional behavioral assessment; and monitoring growth and development in targeted areas. Strategies to increase the young child's self-awareness, self-management, self-control, self-reliance, and self-esteem are considered. Application of diagnostic information into teaching strategies and implementation of an instructional plan (IEP) is a central tenet of the course. It is recommended for students to take ECE 290 and ECE 309 and to have 25 clock hours of Level II Experience prior to taking this class.

ECE 375 | ASSESSMENT IN EARLY CHILDHOOD INCLUSIVE SETTINGS | 4 quarter hours (Undergraduate)

Candidates will study, use and evaluate early childhood assessment methods and tools that are appropriate for use with young children with diverse cultural and socioeconomic experiences. Focus of the course is on the teacher candidate's acquisition of knowledge and skills regarding an array of formal and informal assessment instruments and techniques used to gather information needed for making decisions about typical and atypical children served in individual and group learning situations. Focus is directed toward the development of curricular goals and instructional approaches that evolve from the development of curricular goals and instructional approaches that evolve from the assessment information. Such information is used to create learning plans, including Individual Family Service plans (IFSP) and Individualized Education Plan (IEP), serving child and family responsively.

ECE 290 and edu major or minor

ECE 377 | ASSESSMENT OF DUAL LANGUAGE AND MULTILINGUAL LEARNERS | 4 quarter hours (Undergraduate)

This course will focus on the discussion of basic principles and current approaches to assessment of dual language and multilingual learners (DLL/ML) in ESL and bilingual early childhood and early elementary educational settings. Candidates will learn about the different purposes of process and product assessment tools, authentic and curriculum-based forms of assessment, issues in the assessment of DLLs/MLs, and assessment in academic areas for early elementary MLs. Research on language and literacy acquisition in MLs vis a vis instruction and assessment will be discussed. Candidates will have opportunities to critically examine and learn how to administer assessment tools used in current practice. 17 hours Level 2 Field Experience required.

ECE 380 | EARLY CHILDHOOD SPECIAL EDUCATION PRACTICUM | 4 quarter hours (Undergraduate)

Supervised teaching in a cooperating school serving young children with disabilities for 150 clock hours; arranged in collaboration with supervising faculty member and the Field Experience Office. Candidates will reflect upon their teaching experiences with young children with disabilities and collaborate with colleagues and instructor to identify alternative strategies for problematic situations. Application and approval required prior to registration. Open only to DePaul students.

ECE 381 | INTERNSHIP IN PRESCHOOL SETTING | 2 quarter hours (Undergraduate)

Candidates conduct 35 hours of supervised field work in preschool during the winter quarter. The internship is designed to be taken by ECE teacher candidates before student teaching. Candidates enrolling in this internship have completed or are taking ECE 310: Preprimary Programs: Curriculum and Strategy concurrently. (2 credit hours)

ECE 290 and edu major or minor

ECE 382 | INTERNSHIP IN PRIMARY SETTING | 2 quarter hours (Undergraduate)

Candidates conduct 35 hours of supervised field work in a primary grade (K-3) during the spring quarter. The internship is designed for advanced ECE candidates to be taken before student teaching. Candidates taking this internship have taken ECE 311: Curriculum and Instruction in Primary Grades. (2 credit hours)

An education major or minor is a prerequisite for this class.

ECE 383 | INTERNSHIP IN EARLY CHILDHOOD ESL/BILINGUAL EDUCATION SETTINGS | 4 quarter hours (Undergraduate)

This course will focus on application of the theories of effective teaching practices and assessment procedures appropriate for young English Language learners. It will emphasize an application of knowledge gained from previous ESL/ELL courses and demonstration of skills necessary to work collaboratively and effectively with families of young English Language Learners. Professional behaviors that respect, value, and support all children's native language and culture will be reinforced. (100 clock hours)

ECE 313, ECE 314, ECE 325, ECE 377, and (BBE 305 and BBE 306) or (BBE 325 and BBE 366) are prerequisites for this class.

ECE 384 | EARLY CHILDHOOD EDUCATION CAPSTONE | 4 quarter hours (Undergraduate)

The senior capstone course is designed to help Candidates integrate the central emphases of their liberal learning studies curriculum with their professional behavior. It will provide prospective early childhood educators with opportunities to engage in activities requiring them to be reflective, to consider value commitments, to use critical and creative thinking, and to examine their practice from a multicultural perspective as they discuss issues specific to early childhood education. Candidates will develop a professional portfolio that reflects the standards of the various guiding professional organizations. The course is grounded in the College of Education's framework for an Urban Professional Multicultural Educator, which also reflects the goals of the Liberal Studies program. This course is taken before student teaching.

ECE 385 | EARLY CHILDHOOD STUDENT TEACHING | 12 quarter hours (Undergraduate)

This course requires students to participate in supervised teaching at a cooperating school, five full days per week, for an academic quarter. Part of the teaching will be in a preprimary setting and part will be in a primary setting. Feedback and discussion of issues encountered in student teaching as well as new materials and techniques of student teaching will be included. Application and approval are required. Open only to DePaul students. (12 credit hours)

ECE 387 | CAPSTONE SEMINAR IN EARLY CHILDHOOD EDUCATION | 2 quarter hours (Undergraduate)

This course is designed to help candidates integrate the central emphases of their Liberal Studies curriculum with their professional knowledge and behavior. It provides opportunities and activities to prospective educators that engage them in being analytic and reflective upon their major and related disciplines; guide them in further considering their value commitments and how they relate to their chosen profession; apply critical and creative thinking in addressing 'real-time' professional issues and needs; and examine extant practices from multicultural perspectives. Candidates develop a professional teaching portfolio that reflects the standards of the various guiding professional organizations and the Illinois State Board of Education (ISBE). The course is grounded in the College of Education's framework for an Urban Professional Multicultural Educator as well as the goals of the Liberal Studies program. The course is taken simultaneously with student teaching. COREQUISITE(S): ECE 385. (2 credit hours)

ECE 390 | DEVELOPMENTAL THERAPY STRATEGIES FOR INFANTS AND TODDLERS IN EARLY INTERVENTION | 4 quarter hours**(Undergraduate)**

This course will focus on the knowledge and skills needed to work effectively with young children from birth through age 3, who have disabilities and special learning needs. The course will use child-centered, play-based interventions and developmentally appropriate practice as the central approach. Furthermore, students will examine learning outcomes and related intervention (lessons), which will be used to effectively address these outcomes, as well as aligning ongoing assessment of the intervention strategies. Students will examine issues related to the impact that disability conditions have on young children's learning needs in all developmental domains. Additionally, students will explore issues related to intervention of young children within the context of families and caregivers - that is within natural and inclusive settings, such as the family's home, community settings, or center-based programs.

ECE 290, ECE 309 and an Education major or minor are prerequisites for this class.

ECE 391 | ASSESSMENT OF INFANT AND TODDLERS | 4 quarter hours (Undergraduate)

Built on a partnership with families, this course focuses attention on all aspects of development including social/emotional, cognitive, sensory/motor and communication. Beginning with observation and naturalistic assessment processes, teachers examine the principles of best practice for assessing babies and toddlers for service in infant/toddler care, Early Head Start and early intervention. Teacher candidates learn to administer screening tools, criterion referenced instruments and leading standardized instruments and procedures, including the transdisciplinary approach and the Hawaii Early Learning Profile.

ECE 290, ECE 309 and an Education major or minor are prerequisites for this class.

ECE 392 | WORKING WITH FAMILIES OF INFANTS AND TODDLERS: PARTNERSHIP AND COLLABORATION IN EARLY INTERVENTION | 4 quarter hours (Undergraduate)

This course will focus on the knowledge and skills needed to work effectively with families of young children from birth through age 3, who have disabilities and special learning needs. The course will examine philosophical foundations and collaboration strategies for teachers and other professionals working with families of young children with exceptionalities in Early Intervention programs and inclusive settings where the infants and toddlers may be served.

ECE 306 and an Education major or minor are prerequisites.

ECE 393 | INTERNSHIP EXPERIENCES WITH INFANTS, TODDLERS AND TWOS WITH SPECIAL NEEDS | 2 quarter hours (Undergraduate)

This course is a supervised internship, in which the candidates will practice early intervention strategies in a field experience of 40 clock hours with infants and toddlers with special needs. In this internship candidates will practice 1) assessment of infants and toddlers, 2) developmental therapy and play strategies with infants and toddlers, and 3) collaboration working in partnership with family members of children with special needs. Co-requisite: ECE 390; ECE 391; ECE 392. (2 credit hours)

ECE 395 | DESIGNING CURRICULUM FOR INFANTS AND TODDLERS | 4 quarter hours**(Undergraduate)**

Research in neuroscience indicates that the brain developmental foundation for all later learning is created in the first three years of life. The impact and impetus for the adults (families and caregivers) who nurture and teach children from birth to three will be explored in this course. The course will examine the developmental milestones, as well, as each child's developmental profile to create a developmentally appropriate curriculum to enhance the "foundation for all later learning". The course explores ways to provide a safe and challenging environment; to focus on play as a vehicle for learning for optimal developmental outcomes. Collaboration with families in addressing each child's development is featured in the course. Candidates will be expected to design curricula to meet the needs of linguistically and culturally diverse children, as well as young children with special needs.

ECE 398 | SPECIAL TOPICS IN EARLY CHILDHOOD EDUCATION | 4 quarter hours**(Undergraduate)**

This course offers intensive study of selected topics in the field of early childhood education and care. Course content and credits vary according to topic. Syllabus is tailored to the topic of special study. Example topics include: Implementing common core in kindergarten; Social-emotional learning programming in K-3; Using data to make curricular decisions in PK-3; Mentoring families who are teen-agers.

ECE 399 | INDEPENDENT STUDY IN EARLY CHILDHOOD EDUCATION | 4 quarter hours (Undergraduate)

(1-4 Credits) PREREQUISITE(S): Permission from instructor, program chair and associate dean.

ECE 490 | DEVELOPMENTAL THERAPY STRATEGIES FOR INFANTS AND TODDLERS IN EARLY INTERVENTION | 4 quarter hours (Graduate)

This course will focus on the knowledge and skills needed to work effectively with young children from birth through age 3, who have disabilities and special learning needs. The course will use child-centered, play-based interventions and developmentally appropriate practice as the central approach. Furthermore, students will examine learning outcomes and related intervention (lessons), which will be used to effectively address these outcomes, as well as aligning ongoing assessment of the intervention strategies. Students will examine issues related to the impact that disability conditions have on young children's learning needs in all developmental domains. Additionally, students will explore issues related to intervention of young children within the context of families and caregivers that is within natural and inclusive settings, such as the family's home, community settings, or center-based programs.

SCG 404 and T&L 427 (or equivalent) are prerequisites for this class.

ECE 491 | ASSESSMENT OF INFANT AND TODDLERS | 4 quarter hours (Graduate)

Built on a partnership with families, this course focuses attention on all aspects of development including social/emotional, cognitive, sensory/motor and communication. Beginning with observation and naturalistic assessment processes, teachers examine the principles of best practice for assessing babies and toddlers for service in infant/toddler care, Early Head Start and early intervention. Teacher candidates learn to administer screening tools, criterion referenced instruments and leading standardized instruments and procedures, including the transdisciplinary approach and the Hawaii Early Learning Profile.

SCG 404 and T&L 427 (or equivalent) are prerequisites for this class.

ECE 492 | WORKING WITH FAMILIES OF INFANTS AND TODDLERS: PARTNERSHIP AND COLLABORATION IN EARLY INTERVENTION | 4 quarter hours**(Graduate)**

This course will focus on the knowledge and skills needed to work effectively with families of young children from birth through age 3, who have disabilities and special learning needs. The course will examine philosophical foundations and collaboration strategies for teachers and other professionals working with families of young children with exceptionalities in Early Intervention programs and inclusive settings where the infants and toddlers may be served.

T&L 421 (or equivalent) is a prerequisite for this class.

ECE 493 | INTERNSHIP EXPERIENCES WITH INFANTS, TODDLERS AND TWOS WITH SPECIAL NEEDS | 2 quarter hours**(Graduate)**

This course is a supervised internship, in which the candidates will practice early intervention strategies in a field experience of 40 clock hours with infants and toddlers with special needs. In this internship candidates will practice 1) assessment of infants and toddlers, 2) developmental therapy and play strategies with infants and toddlers, and 3) collaboration working in partnership with family members of children with special needs. Co-requisite: ECE 490; ECE 491; ECE 492. (2 credit hours)

ECE 704 | SEMINAR IN RESEARCH IN CHILD DEVELOPMENT | 4 quarter hours**(Graduate)**

The focus of the seminar is to introduce the doctoral students to major research questions and issues in child development. The doctoral students will lead discussions on the most current and seminal research in the field of child development. In addition, the students will participate in analyses of existing US Policies in regards to child development. The seminar will have the following objectives: 1) Examination, analysis, and evaluation of the seminal and contemporary research and research methodologies in child development. 2) Examination and analysis of major theories of child development through a study of the original literature. 3) Examination and analysis of contemporary issues regarding maternal health and early development. 4) Examination, analysis, and evaluation of US policy approaches to maternal health and early child development and education.

Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 706 | CANDIDACY PAPER | 0 quarter hours**(Graduate)**

Registration in this course is required of all students who are not enrolled in a course but are completing a dissertation. It provides access to university facilities. Permission of advisor required. This registration indicates that a student has successfully completed the candidacy paper as specified in the Doctoral Student Handbook. (0 credit hours).

Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 714 | SEMINAR IN DEVELOPMENT, RISK, AND RESILIENCE | 4 quarter hours**(Graduate)**

This seminar will examine the concept of risk and its influence on child development within various frameworks such as environment, genetics and neurobiology, psychopathology, family, public policy and education. An issue of interest will be the development of children who are at-risk due to environmental factors. The U.S. policies in addressing this population will be examined. The seminar will have the following objectives: 1) In-depth analysis of the concepts of risk and resilience through examination of the original research literature. 2) Examination and analysis of various risk factors (e.g.: genetics, biology, poverty, family, socio political influences) with attention given to neurobiological risk factors, including disabilities. 3) Examination and analysis of factors of resilience (including implications for intervention and early childhood education). 4) Examination and analysis of U.S. Policies in relationship to promotion of resilience via early childhood intervention and education programs.

Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 724 | SEMINAR IN CURRICULAR APPROACHES IN EARLY CHILDHOOD EDUCATION | 4 quarter hours**(Graduate)**

This seminar will examine issues related to curriculum in early childhood education and intervention, including assessment and other contemporary schooling issues. An in-depth analysis of various theoretical approaches influencing curriculum design in early childhood and family intervention will be conducted, as well as a review of the most influential and current educational models guiding curriculum in current early childhood settings. Through participation in this seminar candidates will meet the following objectives: 1) Examination of theoretical approaches influencing early childhood curriculum design. 2) Examination and analysis of contemporary curricular and assessment issues in early childhood education. 3) Examination and analysis of current early childhood educational models guiding curriculum. 4) Observation and analysis of model early childhood programs. 5) Exploration of other relevant contemporary early childhood education issues.

Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 734 | SEMINAR IN EARLY CHILDHOOD PROGRAM DESIGN AND EVALUATION | 4 quarter hours**(Graduate)**

Doctoral students will examine the design and goals of various nationally funded early childhood programs from their philosophical and policy perspectives. Doctoral students will devote the major part of this seminar to conducting a research evaluation of one selected national early childhood program as a class team project. The research may require utilizing field research methodologies of one or more centers belonging to the selected program. When feasible the students will present their research findings in a local or national conference. The seminar will have the following objectives: 1) Understanding program design. 2) Developing program evaluation to match questions and address stakeholder needs. 3) Acquiring hands-on experience conducting a program evaluation on a selected early childhood program. 4) Written and oral dissemination of study.

Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 744 | SEMINAR IN CULTURE, LANGUAGE AND LEARNING | 4 quarter hours**(Graduate)**

This seminar will focus on examining the influences of culture and language in development and education of children. Current cross-cultural, cross-lingual educational research will be examined in detail. The seminar will have the following objectives: 1) In-depth examination and analysis of influences of race and culture on development based on current research. 2) Examination and analysis of multicultural issues, and implications for early education method and practices. 3) Examination and analysis of issues related to the education of interracial children. 4) Examination of bilingual issues and implications for early education methods and practices. 5) Examination and evaluation of current educational policies in relationship to bilingual and bicultural children in the US.

Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 759 | TEACHING INTERNSHIP IN EARLY CHILDHOOD EDUCATION | 4 quarter hours**(Graduate)**

This teaching internship is designed to respond to the growing need for preparing high quality teaching professionals in the field. Early Childhood Education Doctoral students acquire hands-on experience in college-level teaching in early childhood education or related fields. The doctoral student will teach one course under the supervision of an early childhood program faculty member. The course to be taught is recommended by the supervising faculty advisor based on the doctoral student's background and career goals. The major objectives of this internship are: 1) Demonstrating mastery of course content. 2) Demonstrating knowledge, skills, and dispositions for teaching college and university level students and pre-service early childhood professionals from diverse backgrounds.

Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 769 | RESEARCH INTERNSHIP IN EARLY CHILDHOOD EDUCATION | 4 quarter hours**(Graduate)**

This research internship is designed to provide an actual research experience in early childhood education. With the approval of the ECE program faculty, the candidates will work either with a faculty from the College of Education, from another college at DePaul University, or with a research associate or scientist at DePaul or in another institution to assist on a research project in one of the following areas: child development, early childhood education, child and family studies, developmental psychology or another closely related field. The student's progress will be followed up by an early childhood advising faculty. The internship has the following objectives: 1) Understanding DePaul's IRB protocol and application process to acquire certification for conducting research. 2) Acquiring first-hand experience while assisting research faculty in conducting various phases of research. 3) Collecting, analyzing, and interpreting data under supervision. 4) Understanding various research methodologies employed in the field of early childhood education.

Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 849 | SUPERVISED DISSERTATION PROPOSAL DEVELOPMENT | 4 quarter hours**(Graduate)**

Students register for this course for the quarter in which they defend their dissertation proposals. Permission of dissertation chair required.

ECE 859 | INDEPENDENT DISSERTATION RESEARCH: EARLY CHILDHOOD EDUCATION | 4 quarter hours**(Graduate)**

Students register for this course for the quarter in which they defend their dissertations. Permission of dissertation chair required.

Economics (ECO)

ECO 101 | INTRODUCTION TO ECONOMIC ISSUES | 4 quarter hours (Undergraduate)

This course will introduce students to basic concepts from both micro- and macroeconomics. The goal is for students to gain an appreciation of how economics can be used to understand the world. Students will enhance their analytical skills by using basic economic concepts to examine current domestic and international issues. Students will improve their oral communication skills during class discussions and debates. This course is intended for non-Commerce students and cannot be counted toward a major or minor in economics.

LSP 121 (or HON 180) or MAT 101 (or equivalent) are prerequisites for this class.

ECO 105 | PRINCIPLES OF MICROECONOMICS | 4 quarter hours (Undergraduate)

Principles of Microeconomics. Basic theories of micro (or individual) economic units; the theory of consumer demand, the firm, and distribution; pricing and production in competitive, monopolistic and oligopolistic industries.

MAT 101 (or equivalent) is a prerequisite for this class.

ECO 106 | PRINCIPLES OF MACROECONOMICS | 4 quarter hours (Undergraduate)

Principles of Macroeconomics. Fundamental theories of macro (or aggregate) economics: supply and demand, national income accounting and analysis, and international trade. Analysis of unemployment, and inflation, and policies designed to combat these and other current problems.

MAT 101 (or equivalent) is a prerequisite for this class.

ECO 198 | CURRENT ECONOMIC ISSUES | 2 quarter hours (Undergraduate)

This is a 2-hour special topics course. Content and format of this course are variable. This course format will facilitate an in-depth examination of a specific economic issue. The specific topic covered will be indicated in the class schedule. The goal of the topics course is to introduce students to the discipline of economics through the study of a specific issue at the introductory level. This course will generally not carry any prerequisites and will not be applicable toward the requirements of the Economics major or minor. The course can be repeated for credit when a different topic is scheduled.

ECO 250 | CAREER PREPARATION FOR ECONOMICS MAJORS | 2 quarter hours**(Undergraduate)**

Students will explore possible career options for economics majors while addressing three competency areas: self-management skills, career building skills, and general business skills. The course will focus on further developing students' quantitative skills as they research career options and will include the development of a portfolio as a final assignment. (2 quarter hours)

ECO 105, ECO 106 and status as an ECO major in either the College of Business or the College of Liberals Arts & Social Sciences is a prerequisite of this class.

**ECO 304 | ANALYTICS FOR ECONOMICS | 4 quarter hours
(Undergraduate)**

Students will learn how to interpret and apply the ordinary least squares regression model to answer important questions related to economics and business. The course incorporates real world applications of the ways in which these empirical methods are influencing decisions in businesses and government. Students will also analyze real data and learn how to design their own empirical studies. Students may not receive credit for ECO 304 and ECO 375.

MAT 137 and (BUS 102 or a declared BA Economics major) are prerequisites for this class.

**ECO 305 | INTERMEDIATE MICROECONOMICS | 4 quarter hours
(Undergraduate)**

This course is an extension of the topics introduced in Economics 105. It uses models to explain economic decision-making by consumers and firms. Students will examine how markets allocate resources, how market structure affects choices and social welfare, and the ways in which government can improve or impair markets.

ECO 105 (minimum of C-) and MAT 130 (or equivalent) are prerequisites for this class.

**ECO 306 | INTERMEDIATE MACROECONOMICS | 4 quarter hours
(Undergraduate)**

The purpose of this course is to develop macroeconomic models that assist in understanding the myriad economic problems facing us today, both domestic and foreign, and in evaluating proposed solutions. These static and dynamic models are used to understand interactions in the macroeconomy, and will serve as a tool in predicting the level of GDP, inflation, unemployment and interest rates. Models included are: traditional short-run Keynesian analysis; the New Classical market-clearing approach; and the recent work in Neo-Keynesian thought.

ECO 105, ECO 106 & MAT 130 (or equivalent) are prerequisites for this class.

**ECO 307 | MANAGERIAL DECISION MAKING | 4 quarter hours
(Undergraduate)**

This course introduces the students to various decision-making frameworks in managerial and business contexts. Through studying and applying analytical frameworks to common situations, students will learn and practice skills to become better decision makers. Topics include structural analysis, environmental forces, behavioral biases and cognitive constraints, and the role of incentives and motives in decision-making. Students will engage in various activities that develop and build their confidence to approach potentially complex and often ambiguous situations using formal tools. The class emphasizes the use of social cues, behavioral science insights, historical references, and organizational knowledge to improve decision outcomes. This course is appropriate for both Economics and Non-Economics majors.

ECO 105 is a prerequisite for this class.

**ECO 308 | BUSINESS STRATEGY | 4 quarter hours
(Undergraduate)**

Strategy affects outcomes everywhere, from business to sports to politics, and everyday life. This class will help students develop their strategic thinking and problem-solving capabilities in the business world. We demystify the strategic thought process using models and techniques that increase the creation of value and enhance efficiency for firms and consumers. We use an applied and hands-on methodology that emphasizes student interactions and critical thinking. Topics include, market selection, resource allocation choices, competitive dynamics, and situational analysis. Becoming familiar with strategic frameworks and tools will lead students to improve their skill set and ability to identify market challenges and manage organizational issues commonly encountered in business analyst and consulting positions. This course is appropriate for both Economics and Non-Economics majors.

ECO 105 is a prerequisite for this class.

**ECO 310 | URBAN ECONOMICS | 4 quarter hours
(Undergraduate)**

This course discusses the economic rationale for the existence of cities and urban areas. Location decision-making by both firms and households is analyzed with attention given to the resulting land values, land rents, population density gradients, and urban land use patterns. We study models of the supply and demand for housing, the measurement and determination of house value, and the corresponding problems of segregation, housing abandonment, property taxation, and public housing. Other urban problems such as poverty, crime, and transportation are also discussed.

ECO 105 is a prerequisite for this class.

**ECO 312 | THE CHICAGO ECONOMY | 4 quarter hours
(Undergraduate)**

The first part of this course will focus on changes in the Chicago metropolitan economy over time. Topics to be covered will include the development of the Chicago economy in the 19th Century, modern economic development, land use, and suburbanization. The second part of the course will focus on selected policy issues including poverty, housing, pollution, crime, education, transportation, and taxes.

ECO 105 is a prerequisite for this class.

**ECO 313 | MARKET STRUCTURE AND REGULATION OF BUSINESS | 4 quarter hours
(Undergraduate)**

This course examines the behavior of firms, especially how firms pursue business strategies, in real-world markets. What factors determine price and output? Why do firms like Apple, Google and Microsoft dominate their markets? And what are the implications of this dominance? Why does government intervene in market transactions? What has government done about mergers, price fixing, and false advertising?

A grade of C- or better in ECO 305 is a prerequisite for this course.

**ECO 314 | ECONOMICS OF THE PUBLIC SECTOR | 4 quarter hours
(Undergraduate)**

This course discusses market failures and the economic role of government. Topics covered will include: government interventions that correct market failures, the efficiency of government policies, collective decision-making and voting, as well as the theory of optimal taxation and the incentive effects of taxes. Specific government programs such as Social Security and welfare programs are also analyzed. The emphasis is on the revenues, expenditures and policies of the federal government.

A grade of C- or better in ECO 305 is a prerequisite for this course.

ECO 315 | INTRODUCTION TO MONEY AND BANKING | 4 quarter hours (Undergraduate)

Introduction to Money and Banking. The structure of the American banking system; role of the Federal Reserve System; private financial markets and institutions; the effectiveness of monetary policy, and international finance.

ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.

ECO 316 | EUROPEAN ECONOMIC HISTORY | 4 quarter hours (Undergraduate)

European Economic History. Major factors and institutions which have influenced the economic development of European nations. Impact of these nations on U.S. development is also discussed.

ECO 105 and ECO 106 are prerequisites for this course.

ECO 317 | AMERICAN ECONOMIC HISTORY | 4 quarter hours (Undergraduate)

This course addresses the major factors and institutions which have influenced the economic development of the United States, including differences in regional development, slavery, transportation improvements, western expansion, the rise of large scale business, and government policy responses.

ECO 105 and ECO 106 are prerequisites for this course.

ECO 318 | LABOR ECONOMICS AND ORGANIZATION | 4 quarter hours (Undergraduate)

Historical and theoretical analysis of labor groups and labor market problems (including wage determination, unemployment and discrimination), with particular reference to the dynamic economy of the United States.

ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.

ECO 319 | ECONOMICS AND GENDER | 4 quarter hours (Undergraduate)

This course covers economic trends concerning women in the economy and examines economic analyses of gender issues, with special emphasis on gender issues in the work place. The increase in the number of women in the work place has been a major change in labor markets, affecting workers, employers and families. Different economic perspectives are examined to give students an understanding of the range of contributions by economists to this field. The course also examines feminist economics which raises concerns about economic analysis in general and as it is applied to this field.

ECO 105 and ECO 106 are prerequisites for this course.

ECO 320 | ECONOMICS OF RELIGION | 4 quarter hours (Undergraduate)

This course examines selected economic and sociological aspects of religion in society. Some of the topics that are covered include marriage and divorce, fertility and population growth, schooling, church contributions and work.

ECO 105 and ECO 106 are prerequisites for this course.

ECO 321 | LAW & ECONOMICS | 4 quarter hours (Undergraduate)

The overall goal of this course will be to demonstrate how businesses and government interact by surveying the economic and legal aspects of this relationship. This course is designed to prepare students to engage in methods of formal inquiry. The students will examine the American historical aspects of this relationship from the industrial revolution to the present. All topics are discussed with an emphasis on real-world applications and will include: a review of microeconomic theory pertaining to market structures with an emphasis on oligopolies; the history of antitrust; a review of the US legal and political framework; government regulation and key judicial decisions affecting businesses and industries concentrating on the legal and economic logic of those decisions. Class will begin with a discussion of current events once a week and it is expected that each student will attempt to participate and be knowledgeable of what is occurring locally, nationally and internationally.

ECO 105 is a prerequisite for this class.

ECO 322 | FINANCIAL MARKET REGULATION | 4 quarter hours (Undergraduate)

This class explores policy approaches to regulating the financial system and the economy. The list of topics (such as regulation of banking, insurance and other financial services) changes depending on faculty and student interest. Other topics could include the solvency of Social Security and Illinois pension systems, student loans, cryptocurrencies, and providing financial services to underserved areas and groups. Students study the nature of market capitalism itself and proposals to reform it. This course builds on the Money and Banking course (ECO315 or FIN320) to permit deeper understanding of these issues.

ECO 315 or FIN 320 is a prerequisite for this class.

ECO 325 | THE ECONOMICS OF POVERTY | 4 quarter hours (Undergraduate)

This class addresses society's view of poverty. It begins with an introduction to theories of economic justice for perspective. The introduction is followed by empirical issues related to the measurement of poverty and identification of its causes. An assessment of programs designed to ameliorate the effects of poverty also is covered.

ECO 105 and ECO 106 are prerequisites for this course.

ECO 326 | HEALTH ECONOMICS | 4 quarter hours (Undergraduate)

Taking a microeconomic perspective, this course provides a comprehensive overview of the field of health economics building on economic principles, recent research, and problem-based learning. Students will consider conceptual and empirical analyses of: supply of and demand for health and medical services; role of insurance; influence of physicians and hospitals on price, quantity, and quality of services; factors that distort the market; and the impact of technological change on health care cost. The recent changes in federal law regarding health insurance coverage are considered as well.

ECO 105 (minimum of C-) and MAT 130 (or equivalent) are prerequisites for this class.

ECO 330 | RADICAL RESPONSES TO CAPITALISM | 4 quarter hours (Undergraduate)

The collapse of communism in Central and Eastern Europe and the continuing movement of the Chinese economy away from central planning means there are few real world economies in the 21st century that fully embrace the classic socialist model. However, there continues to be an influence exerted by socialist theory on policy in contemporary economies as well as a heterodox theoretical tradition. This course will examine the current influence of socialist thinking on various economies in the world and how the character of radicalism has evolved in recent decades.

ECO 105 and ECO 106 are prerequisites for this course.

ECO 333 | TOPICS IN GLOBAL ECONOMIES | 4 quarter hours (Undergraduate)

This course provides an introduction to the major changes in the global economy in the twentieth century. It will devote particular attention to comparative analysis of national economic institutions and performance and business conditions, as well as prominent international institutions such as the International Monetary Fund, World Bank, and World Trade Organization. Knowledge of microeconomic and macroeconomic analysis (Economics 105 and 106) will be presumed and applied to global economic flows and national institutions. Selection of countries and case studies from advanced and developing countries will vary according to recent economic developments.

ECO 106 is a prerequisite for this class.

ECO 334 | UNDERSTANDING CHINA'S ECONOMY | 4 quarter hours (Undergraduate)

The expansion of relations between China and foreign enterprises continues to entwine China's economy with those of the world. This course will analyze China's continuing evolution into a global market economy. We will examine China's impact on the world economy and the problems that must be overcome for China to continue its dynamic growth. We will further discuss the characteristics of China's evolution and how they can be extrapolated to other nations undergoing similar transitions.

ECO 105 and ECO 106 are prerequisites for this course.

ECO 335 | SUSTAINABLE STRATEGIES FOR ENERGY AND THE ENVIRONMENT | 4 quarter hours (Undergraduate)

This class explores the relationship between energy, business, the economy, the environment and society. An interdisciplinary approach and real world case studies are used to understand the various dimensions of sustainable energy strategies (economic, scientific, political, environmental) and how they impact business and society. In the end, students will be able to (1) assess the costs and benefits of different energy and environmental strategies, and (2) contribute to discussions about building more sustainable economies for the future.

ECO 105 is a prerequisite for this class.

ECO 336 | EXPLORING ECONOMICS & STATISTICS THROUGH SPORTS | 4 quarter hours (Undergraduate)

The main objective of this course is to have students use and understand economics analysis. It covers many of the basic principles/theories in microeconomics, using the sports industry to illustrate these topics. Students use concepts from Business core courses (microeconomics and statistics) to analyze questions such as 'Do large-city professional sports franchises have a competitive advantage over their small-market counterparts?' or 'Why did Chicago and the State of Illinois use \$463 million of public money to refurbish Soldier Field?'.

(ECO 105 and MAT 137 or equivalent) are prerequisites for this course.

ECO 340 | DEVELOPMENT OF ECONOMIC THOUGHT | 4 quarter hours (Undergraduate)

A study of the most influential contributions to our understanding of political economy broadly understood. An historical examination of the development of economic theories with special emphasis placed upon their relevance to present economic and political issues.

ECO 105, ECO 106, MAT 130 and (ECO 306 with a minimum grade of C-) are prerequisites for this class.

ECO 341 | BEHAVIORAL ECONOMICS | 4 quarter hours (Undergraduate)

Behavioral Economics incorporates insights from psychology to expand the standard models of economic choice. This course will examine the findings from the psychology literature that inform the issue of decision making, explore how these findings have challenged standard economic models, and examine how the findings are being incorporated into economic thinking about choice. In addition to an introduction to the Behavioral Economics literature, students will have the opportunity to develop a project of their own using behavioral economics to examine a current economic issue.

A grade of C- or better in ECO 305 is a prerequisite for this course.

ECO 359 | DEVELOPMENT ECONOMICS | 4 quarter hours (Undergraduate)

By some estimates, approximately 1.4 billion people live on less than \$1.25 a day. When the world's per capita GDP is \$10,000, why do so many people live on so little? Life expectancy in many parts of sub-Saharan Africa is less than 50 years, and in Burundi the average adult has less than three years of schooling. Why does this happen, and what can be done to change this? Students will learn how to objectively measure levels of poverty and development. Students will come to understand and analyze which types of interventions lead to improvements in people's lives. Using Stata, students will also learn techniques that researchers use to identify causal relationships between interventions and outcomes.

A grade of C- or better in ECO 305 is a prerequisite for this course.

ECO 360 | ECONOMICS OF LOW-INCOME COUNTRIES | 4 quarter hours (Undergraduate)

This course analyzes economic development issues in low-income countries. Attention is given to several key issues including agricultural and rural development, population growth, human capital, international trade, foreign resource flows, the role of the public sector, and environmental quality.

(ECO 105 or ECO 106) is a prerequisite for this class.

ECO 361 | INTERNATIONAL TRADE | 4 quarter hours (Undergraduate)

This course deals primarily with the trade side of international economic relations. The main objective is the development of analytical tools required for an understanding of the gains from trade and barriers to trade. Particular emphasis is placed on currently pressing issues including the impact of trade on domestic employment and income, international trade tensions, and the rise of regional trade blocks.

ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.

ECO 362 | INTERNATIONAL MONETARY ECONOMICS | 4 quarter hours (Undergraduate)

How does international trade and capital mobility affect a country's ability to use fiscal and monetary policy to promote economic growth and successful development? This question and others of international importance are examined in an environment where other countries' behavior matters. Topics to be explored include: the foreign exchange market under both fixed and floating exchange rate regimes, the balance of payments, economic policy in an "open" economy, and the role of international institutions such as the International Monetary Fund and World Bank.

ECO 106 and MAT 130 are prerequisites for this class.

ECO 363 | ECONOMICS OF THE EUROPEAN UNION | 4 quarter hours (Undergraduate)

The European Union, established in 1993 by the Treaty of Maastricht, has become the world's largest economy as a result of gradual incorporation of European countries. The euro represents approximately one fourth of the world's foreign currency reserves. In the economic and political-economic literature the euro has acquired relevance as a possible substitute of the U.S. dollar, especially during the period 2005 - 2010. However, as of 2008, along with the increase of trade among the EU countries, the single currency has been confronting issues with some of its weakest countries which are highly dependent on tourism [Greece, Ireland, Portugal, Italy and Spain]. The loss of independent monetary policy assigns a crucial role to fiscal policy as the only tool designed to stabilize the economy especially in times of recession. The budget deficit and the public debt levels of the weaker countries, during the world economic crisis of 2009, have also extended since then to the majority of the EU members. The political economy convenience of the single currency is now questioned in academic and business environments. The bail outs of Greece and Ireland by the European Central Bank and the International Monetary Fund, and the reduction of the Moody's credit ratings to several countries have considerably contributed to the panic of contagion.

ECO 105 and ECO 106 are prerequisites for this course.

ECO 376 | TIME SERIES ANALYSIS | 4 quarter hours (Undergraduate)

This course introduces time series regression models. Rather than focusing only on the technical and theoretical sides, primary attention is given to applications of time series regression models using economic and financial data. The data will be drawn from websites such as wsj.com and government website FRED (Federal Reserve Economic Data). The course will build upon the STATA programming skills learned in ECO375 [Introduction to Econometrics], particularly as they relate to extracting currently available data into the STATA program. Additionally, students will learn various methodologies to understand the time series processes in economics and finance.

ECO 304 or ECO 375 is a prerequisite for this class.

ECO 377 | ECONOMIC ANALYTICS USING SAS & R | 4 quarter hours (Undergraduate)

This course teaches advanced data analytical skills by identifying meaningful patterns of data and transforming patterns into statistical models to make more profitable decisions using big data. It covers descriptive, predictive, and prescriptive analytics. The class will introduce many practical methodologies through the use of SAS. The class covers the topics on advance levels of clustering analysis, discrete choice models, multivariate regression models, and neural network analysis to find the best suitable techniques to drive the best business decision. **ECO 304 or ECO 375, and a declared major in Economic Data Analytics (COB), Economics Honors (COB) or Economics Honors (LAS) are prerequisites for this class.**

ECO 379 | GAME THEORY | 4 quarter hours (Undergraduate)

Game Theory provides a series of frameworks and tools to analyze strategic interactions. This course introduces the game-theoretic approach and shows its usefulness in understanding situations arising in economics, business, and other areas where agents make interdependent decisions. The main goal is for students to develop the ability to think about strategic problems and make strategic decisions in a more disciplined way.

A grade of C- or better in ECO 305 is a prerequisite for this course.

ECO 380 | MATHEMATICAL ECONOMICS | 4 quarter hours (Undergraduate)

Review of various mathematical functions useful in formulating economic theories followed by elements of Matrix algebra and its application to concepts of micro and macro economic equilibria. Particular emphasis will be placed on differential calculus, including the use of partial derivatives. These mathematical tools will be applied to optimization problems in micro and macro economic theory.

ECO 105, MAT 135 (or equivalent) and MAT 136 (or equivalent) are prerequisites for this class.

ECO 393 | INTERNSHIP IN APPLIED ECONOMICS | 4 quarter hours (Undergraduate)

This course provides an opportunity to apply knowledge acquired in the classroom to a real world situation within a private or public enterprise. Registration is by permission of the instructor following internship approval. The course can be used to satisfy the Liberal Studies Experiential Learning requirement or as an open elective. The course is not applicable to the economics electives required for the major or minor in economics.

ECO 105 and ECO 106 are prerequisites for this course.

ECO 395 | CAPSTONE SEMINAR IN ECONOMICS | 4 quarter hours (Undergraduate)

A seminar in which students explore how the discipline of economics addresses issues from a different perspective than other disciplines within and beyond the social sciences. This course is the Liberal Studies Capstone Requirement for the LA&S Economics major and is restricted to LA&S economics majors with senior standing.

ECO 305, ECO 306 and status as an LAS Economics major with Senior standing is a prerequisite for this class.

ECO 398 | SPECIAL TOPICS | 4 quarter hours (Undergraduate)

Special Topics. Content and format of this course are variable. All topics will include an in-depth study of current issues in Economics. Subject matter will be indicated in class schedule. Prerequisites vary by topic.

**ECO 399 | INDEPENDENT STUDY | 4 quarter hours
(Undergraduate)**

An Independent Study may be available to students of demonstrated capability for intensive independent work in economics. Written permission of supervising faculty member, chair, and director of undergraduate programs is required prior to registration. (variable credit)

**ECO 435 | REAL ANALYSIS I | 4 quarter hours
(Graduate)**

This course covers real number system, completeness, supremum, and infimum, sequences and their limits, \liminf , \limsup , limits of functions, continuity.

(MAT 149 or MAT 152 or MAT 162 or MAT 172) and (MAT 141 or MAT 215) are a prerequisite for this class.

**ECO 436 | REAL ANALYSIS II | 4 quarter hours
(Graduate)**

This course follows ECO 435 and covers properties of continuous functions, uniform continuity, sequences of functions, differentiation, integration.

ECO 435 or MAT 335 or equivalents is a prerequisite for this class.

**ECO 500 | MONEY AND FINANCIAL SYSTEMS | 4 quarter hours
(Graduate)**

This course examines both the role of money in the economy from a functional and macroeconomic perspective as well as the structure and function of the most important financial institutions and financial markets. Topics covered include the role of the Federal Reserve as monetary policymaker, interest rate and exchange rate determination, the relationship between money and economic activity, and the organization and importance of money markets, capital markets, markets for derivative securities, commercial banks and other intermediaries in a well-functioning financial system.

MS in Taxation and MSAA students are restricted from registering for this class.

**ECO 501 | CONCEPTS OF MICRO AND MACRO ECONOMICS | 4 quarter hours
(Graduate)**

This course investigates the basic elements of the economic way of thinking. Students will begin with models of the consumer and the producer, looking specifically at demand and supply, elasticity, measures of efficiency, production and cost theory, and the determination of price and quantity under different market structures. The remainder of the course is devoted to analyzing the economy as a whole, focusing on the determination of Gross Domestic Product, the role of money and monetary policy, labor markets and unemployment, price stability, and short-run fluctuations in output.

Status as a graduate accountancy student is a prerequisite for this class.

**ECO 502 | ANALYSIS OF BUSINESS CONDITIONS | 2 quarter hours
(Graduate)**

This survey course in macroeconomics will cover the nature of macroeconomic activity including the component parts of aggregate expenditures and the nature of key indicators of the economy's performance. The roles of fiscal and monetary policy makers will be examined as well as the structure of the central bank.

MS in Taxation and MSAA students are restricted from registering for this class.

**ECO 503 | GLOBAL ECONOMY | 4 quarter hours
(Graduate)**

This course is designed to be an introduction to the economic environment in which businesses operate. With the increasing interdependence of national economies and the growing role of global enterprises, the understanding of international economic issues is vital to decision-makers. The material covered will include both socio-cultural aspects and economic and financial dimensions of global business. Students should obtain a grasp of the basic theory as well as a knowledge of the major current issues in the global economy.

**ECO 505 | ADVANCED MICROECONOMICS | 4 quarter hours
(Graduate)**

An advanced course in microeconomic theory. This course will present a systematic and rigorous analysis of price determination and the allocation of specific resources to particular uses.

Status as an Economics & Policy Analysis MS student (or instructor consent) is a prerequisite for this class.

**ECO 506 | ADVANCED MACROECONOMICS | 4 quarter hours
(Graduate)**

An advanced course in macroeconomic theory that examines the determination of income, employment, and prices, and their interrelations. Covers traditional Keynesian as well as alternative models of output, consumption, investment, money demand, inflation and unemployment. The dynamic character of income determination is emphasized, along with effects of government policy, economic institutions, and social goals.

ECO 502 or status as an Economics & Policy Analysis MS student is a prerequisite for this class.

**ECO 507 | DATA ANALYTICS I: REGRESSION ANALYSIS | 4 quarter hours
(Graduate)**

This course focuses on the tools and techniques used to statistically analyze economic data. We will focus on both theoretical understanding (why do we use such tools and how do they work) and applied understanding (the ability to carry on a research project using these tools). Students will learn Stata, which is the most widely used statistical analysis programming language in Economics. Students will learn the practical skills of how to choose the right tools for the analysis, how to prepare and inspect the data, and how to run an analysis that is robust, can be replicated, and can be understood and used by others - all extremely valuable qualities in real life work.

(GSB 420 or GSB 519 or equivalent) or status as an Economics and Policy Analysis MS student is a prerequisite for this class.

**ECO 508 | DATA ANALYTICS II: TIME SERIES AND PANEL DATA ANALYSIS | 4 quarter hours
(Graduate)**

This course focuses on advanced techniques used to statistically analyze economic data. We will focus on both theoretical understanding (why do we use such tools and how do they work) and applied understanding (the ability to carry on a research project using these tools). Topics to be covered include the analysis of time series and panel data, discrete choice models, simultaneous equations, forecasting and experimental methods. Students will learn statistical Stata commands that apply to the advanced topics covered.

ECO 507 is a prerequisite for this class.

**ECO 509 | BUSINESS CONDITIONS ANALYSIS | 4 quarter hours
(Graduate)**

This course teaches students how to use available economic data to assess business conditions. This is done by: (1) evaluating the sources and usefulness of data periodically released by government and private sources and (2) developing a macroeconomic framework that the student can use to analyze business conditions. Completion of this course will allow students to understand economic news and relate it to their business or job.

MS in Taxation and MSAA students are restricted from registering for this class.

**ECO 510 | DATA ANALYTICS III: CAUSAL INFERENCE | 4 quarter hours
(Graduate)**

This course is about the research designs and methods that researchers use to support causal inferences in the social sciences. Some specific topics include randomized experiments, instrumental variables, regression discontinuity designs, difference-in-differences models, regression analysis, and propensity score matching.

ECO 507 and ECO 508 are prerequisites for this class.

**ECO 511 | BUSINESS AND ECONOMIC FORECASTING | 4 quarter hours
(Graduate)**

This course surveys a number of quantitative techniques commonly used to forecast business and economic variables. Emphasis will be on techniques, their relative strengths and weaknesses and real-world economic applications. Topics include smoothing techniques, regression and econometric analysis and Box-Jenkins time series.

(GSB 420 or GSB 519 or equivalent) or status as an Economics and Policy Analysis MS student is a prerequisite for this class.

**ECO 513 | DEMYSTIFYING THE FEDERAL RESERVE BANK | 4 quarter hours
(Graduate)**

This is a course about monetary policy. The Federal Reserve has (and other central banks have) the capacity to directly control interest rates and the monetary base (money supply) with an impact on real output growth, unemployment, inflation and financial stability. The expected movement in these variables is important for business and consumer decisions. The Fed has been criticized as of late for policies that put us into the recent financial crisis and for policies that do not appear to be getting us quickly out of the current slowdown, but instead are setting the country up for higher inflation. This course will focus on the theory and evidence of what the Fed does (and other central banks do), why they do it and how what they do affects our well-being. It is meant to demystify their policies by providing a rationale behind their statements and actions. Unlike most courses that rely on textbooks, this course will have numerous topics and readings that do not yet appear in traditional texts. Consequently, it will include some of the latest (over the last couple of years or months) ideas on what central banking is and should be about.

ECO 502 or ECO 509 or ECO 506 is a prerequisite for this class.

**ECO 514 | INDUSTRIAL ORGANIZATION | 4 quarter hours
(Graduate)**

This course is concerned with how the market system directs production decisions under varying deviations from the competitive environment. The links between market structure, conduct and performance are examined. Topics include determinants of market structure, various theories of imperfect competition, price discrimination, predatory pricing, and antitrust policy.

ECO 555 or 505

**ECO 515 | MICROECONOMICS OF MARKET ORGANIZATION | 4 quarter hours
(Graduate)**

Imperfectly competitive markets are more common than perfectly competitive markets. This course is about the effects of imperfectly competitive market structure on the organization, pricing, product choice, and entry of firms. We will study the acquisition and use of market power, strategic competition across firms, private sector sources of market failure, and the role of government competition policy. Factor markets will also be discussed.

ECO 505 is a prerequisite for this class.

**ECO 516 | ECONOMICS OF THE PUBLIC SECTOR I | 4 quarter hours
(Graduate)**

Application of microeconomic analysis to the role of government in society. The theoretical foundation for the design of an efficient and equitable tax and expenditure program is presented and the impact of such a program on the economy is explored through general equilibrium analysis. Students must have a solid foundation in basic calculus.

ECO 505 or ECO 555 is a prerequisite for this class.

**ECO 517 | THE PUBLIC POLICY, BUSINESS, AND ETHICAL ENVIRONMENT OF GOVERNMENT | 4 quarter hours
(Graduate)**

Businesses are becoming more involved in deal making both in the public and private sector. Individuals now sit on the boards of public and private companies and are being asked to provide business analysis and networking skills. Moreover, many firms have established PACS and have set-up governmental practice sections. These firms are also becoming more dependent on the government for business opportunities and are more involved in fundraising on behalf of public officials in order to gain access and to influence the regulatory and legislative process. In fact many business people have raised money for both political parties with the hope of leveraging their contributions for future work or political appointments.

Status as a MSEP or MBA student required for this class.

**ECO 518 | LABOR ECONOMICS AND LABOR RELATIONS | 4 quarter hours
(Graduate)**

A study of the American labor force: measurement, characteristics and behavior under changing income, employment and technology. An examination of recent labor market developments provides the basis for a critical analysis and appraisal of contemporary wage theory. Topics include changes in the labor force, unemployment, wage determination, the minimum wage, internal labor markets, productivity, discrimination, unions and collective bargaining.

ECO 555 or 505

**ECO 520 | BUSINESS ANALYTICS TOOLS II | 4 quarter hours
(Graduate)**

This course teaches advanced data analytical skills by identifying meaningful patterns of data and transforming patterns into statistical models to make more profitable decisions using big data. It covers descriptive, predictive, and prescriptive analytics. The class will introduce many practical methodologies through the use of SAS. The class covers the topics on advance levels of clustering analysis, discrete choice models, multivariate regression models, and neural network analysis to find the best suitable techniques to drive the best business decision.

GSB 420 or GSB 519 is a prerequisite for this class.

**ECO 525 | GAME THEORY AND STRATEGY | 4 quarter hours
(Graduate)**

The goal of this course is to introduce students to game-theoretic way of thinking and show its usefulness in understanding various problems arising in business, economics, as well as many other disciplines and every day life. The tools used in game theory are analytical in nature, and hence the building blocks of the course will necessarily draw on analytics. The instructor's job will be to make these analytics accessible to students without using too much mathematics. Once students grasp these tools, a variety of applications will be presented, discussed, and illustrated using experiments. These applications will be mainly in the fields of business and economics, but will often span to other areas like law, politics, biology, and ethics. In this way, students will get a broad perspective of the multiple applications of game-theoretic reasoning.

ECO 555 or ECO 505 or instructor permission is a prerequisite for this class.

**ECO 526 | BUSINESS STRATEGY | 4 quarter hours
(Graduate)**

This class deals with firms' business plans and policies and how they change in response to various incentives and stimuli. We will discuss frameworks used to analyze and formulate business strategies. We will introduce tools and techniques for diagnosing a firm's competitive position, identifying managerial and organizational issues, evaluating plans of action, and anticipating the consequences of alternative decisions.

ECO 555 or ECO 505 or instructor permission is a prerequisite for this class.

**ECO 527 | BUSINESS REGULATION AND ANTITRUST | 4 quarter hours
(Graduate)**

This course examines the rationale for and efficiency of government regulation of business in the United States. Various forms of government regulation are evaluated to determine their effectiveness in promoting market efficiency. We will emphasize the importance of market structure and industrial performance, including the strategic interaction of firms. We will examine the behavior of individual markets in some detail, focusing on cost analysis, the determinants of market demand, investment behavior, market power, and the implications of government regulatory behavior.

ECO 555 or 505

**ECO 528 | STRATEGIES AND PROCESSES OF NEGOTIATIONS | 4 quarter hours
(Graduate)**

This course is geared towards developing negotiation skills that are important in both the business world as well as day to day life. We will consider both practical and theoretical aspects of negotiations. In the theoretical part, we will learn what factors affect negotiations success. For example, what is the alternative if an agreement is not reached? In the practical part, we will practice negotiations in class using relevant case studies.

ECO 555 is a prerequisite for this class.

**ECO 529 | STRATEGY AND ANTITRUST | 4 quarter hours
(Graduate)**

This class introduces major topics in the economics of imperfectly competitive industries, competition policy, and the economics of incentives and information. The main goals are to understand basic firm behaviors and interactions under various industry configurations, and to scrutinize these behaviors and interactions through the lenses of competition policies (antitrust laws and regulation). We will draw on microeconomic theory, game theory and competitive strategy, as well as empirical evidence and a variety of case studies.

ECO 555 or ECO 505 or instructor permission is a prerequisite for this class.

**ECO 530 | HISTORY OF ECONOMIC THOUGHT | 4 quarter hours
(Graduate)**

A study of the evolution of the science of economics. Emphasis is on the important contributions made to the field by the great thinkers, starting with the Physiocrats and extending to the work of contemporary institutional and post-Keynesian economists.

ECO 555 or 505

**ECO 531 | BUSINESS MODELS AND INNOVATION STRATEGY | 4 quarter hours
(Graduate)**

This course studies the intersection of three areas: (a) Business Models, (b) Innovation Strategy, and (c) Dynamic Competition. We will explore each of these areas through assessments of conceptual and empirical papers, case study assignments, student presentations, and an experiential consulting project with a local company. We will emphasize the tradeoffs in pursuing certain strategies given the constraints imposed by the competitive environment, the resources and capabilities of the firm, and the impact of technological innovation across various industries. Other topic areas include platform economics, networks and standards, intellectual property, and methods of pivoting business models in the presence of disruptive technologies.

ECO 555 or ECO 505 or instructor permission is a prerequisite for this class.

**ECO 535 | BEHAVIORAL ECONOMICS AND DECISION-MAKING | 4 quarter hours
(Graduate)**

Behavioral Economics studies the psychological processes and biases underlying decision-making in economics and other connected areas. The course focuses on optimality in decision-making by consumers and producers, and emphasizes where and how deviations from optimality affect the profitability of business strategies and the efficiency of economic policies. Students learn and discuss the most robust and relevant theoretical and empirical findings in Behavioral Economics through a variety of applications in economics, business, and managerial and policy-driven environments.

ECO 555 or ECO 505 or instructor permission is a prerequisite for this class.

**ECO 540 | THE BUSINESS OF HEALTH | 4 quarter hours
(Graduate)**

This course provides an overview of the healthcare sector, including the pharmaceutical and medical device industry, health insurance, healthcare providers, and public sector. The overarching perspective of the course will be through the critical lens of economics in that the underlying incentive mechanism (or lack thereof) will be probed and evaluated. Even students new to the healthcare sector will gain a wide-ranging understanding of the myriad ways in which the healthcare industry touches all of us.

Not available to MSEPA Students.

ECO 541 | HEALTHCARE DATA ANALYTICS | 4 quarter hours (Graduate)

This course will provide students with an overview of the complex data decision-makers in the healthcare industry must make sense of every day. These data include but are not limited to health insurance billing, electronic health records, patient satisfaction surveys, disease surveillance data, and others. A key overriding issue will be the development of skill to distinguish correlation from causation.

GSB 420 (or GSB 420 waiver) or GSB 519 (or GSB 519 waiver) or IT 403 (or IT403 milestone) is a prerequisite for this class.

ECO 542 | HEALTH ECONOMICS | 4 quarter hours (Graduate)

Health Economics is the study of the allocation of resources relating to health and the market for medical care. Taking a microeconomic perspective, this course provides a comprehensive overview of the field of health economics building on economic principles, recent research, and problem-based learning. Students will consider conceptual and empirical analyses of: supply of and demand for health and medical services; role of insurance; influence of physicians and hospitals on price, quantity, and quality of services; reimbursement mechanisms; factors that distort the market; and the impact of technological change on health care cost. Students will also learn how analytic tools such as cost-benefit and cost-effectiveness analyses can contribute to decision making for the provision and financing of health care.

ECO 505 or ECO 555 is a prerequisite for this class.

ECO 550 | REGIONAL AND URBAN ECONOMICS | 4 quarter hours (Graduate)

The course investigates the spatial character of an economic system. The first part of the course is concerned with theories in regional economics, including business and household location theory, urbanization, and regional development. The latter part of the course deals with urban economics, a specialized area concerned with the economic forces behind many urban problems. Topics include the economics of housing, transportation, poverty, crime and urban public finance.

ECO 555 or 505

ECO 555 | MANAGERIAL ECONOMICS | 4 quarter hours (Graduate)

This course focuses on the application of microeconomic principles to managerial decision making. These principles include the theories of consumer choice, production and cost as they relate to decisions made by firms and households under various industry configurations. Specific topics are consumer and market demand; elasticities; production theory; cost structure; profit maximization; market impacts of government interventions; externalities; and the effect of market structure on firm decisions on pricing, output and profit.

ECO 557 | INTERNATIONAL TRADE THEORY & POLICY | 4 quarter hours (Graduate)

Modern theories of international trade: classical theory of comparative advantage, factor proportions theory, factor price equalization, application of welfare economics to international trade, including regional economic integration, commercial policy and tariff problems. Cross-listed with IB 520.

ECO 555 or 505

ECO 558 | INTERNATIONAL MACROECONOMICS | 4 quarter hours (Graduate)

Analyzes traditional macroeconomic issues in a framework that allows for international trade and capital flows. Cross-listed as IB 521.

ECO 506 or ECO 509 is a prerequisite for this class.

ECO 560 | DEVELOPMENT OF THE AMERICAN ECONOMY | 4 quarter hours (Graduate)

This course describes the economic development of the United States by examining topics such as: colonial settlement patterns, the impact of the railroad, the development of the financial system and the Great Depression.

(ECO 505 or ECO 555) and (ECO 506 or ECO 509) are prerequisites for this class.

ECO 561 | ECONOMICS OF DEVELOPING COUNTRIES | 4 quarter hours (Graduate)

Introduction to the economist's analytical skills applied to problems of developing and newly industrialized countries. Studies economic theory of development, development policy, and decision-making in the developing world; several case studies are examined. Cross-listed with IB 525.

ECO 555 or 505

ECO 600 | THESIS RESEARCH | 4-8 quarter hours (Graduate)

Thesis Research.

ECO 798 | SPECIAL TOPICS | 4 quarter hours (Graduate)

Content and format of this course are variable. An in-depth study of current issues in economics. Subject matter will be indicated in class schedule.

ECO 799 | INDEPENDENT STUDY | 4 quarter hours (Graduate)

Available to graduate students of demonstrated capability for intensive independent work in economics.

Educating Adults (EA)

EA 505 | APPLIED INQUIRY PROJECT PROPOSAL I | 0.5 quarter hours (Graduate)

Each student will design his/her EA 528 Applied Inquiry Project, in consultation with the faculty mentor and a project advisor. Proposal I emphasizes selecting a project topic/focus, identifying the primary users, and conducting a literature review. Proposal II emphasizes shaping and designing the inquiry project, and outlining the final product(s). Upon completion of both phases, the proposal must be approved by the Academic Committee and Graduate Student Program Review Committee (GSPRC). (.5 quarter hour)

Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 506 | APPLIED INQUIRY PROJECT PROPOSAL II | 0.5 quarter hours (Graduate)

Each student will design his/her EA 528 Applied Inquiry Project, in consultation with the faculty mentor and a project advisor. Proposal I emphasizes selecting a project topic/focus, identifying the primary users, and conducting a literature review. Proposal II emphasizes shaping and designing the inquiry project, and outlining the final product(s). Upon completion of both phases, the proposal must be approved by the Academic Committee and Graduate Student Program Review Committee (GSPRC). (.5 quarter hours)

Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 507 | APPLIED INQUIRY PROJECT PROPOSAL I | 1 quarter hour (Graduate)

Each student will design his/her EA 528 Applied Inquiry Project, in consultation with the faculty mentor and a project advisor. Proposal I emphasizes selecting a project topic/focus, identifying the primary users, and conducting a literature review. Proposal II emphasizes shaping and designing the inquiry project, and outlining the final product(s). Upon completion of both phases, the proposal must be approved by the Academic Committee and Graduate Student Program Review Committee (GSPRC). (1 quarter hour)

Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 508 | APPLIED INQUIRY PROJECT PROPOSAL II | 1 quarter hour (Graduate)

Each student will design his/her EA 528 Applied Inquiry Project, in consultation with the faculty mentor and a project advisor. Proposal I emphasizes selecting a project topic/focus, identifying the primary users, and conducting a literature review. Proposal II emphasizes shaping and designing the inquiry project, and outlining the final product(s). Upon completion of both phases, the proposal must be approved by the Academic Committee and Graduate Student Program Review Committee (GSPRC). (1 quarter hour)

Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 515 | DEVELOPING PROFESSIONAL IDENTITY | 4 quarter hours (Graduate)

In this foundation course, students will situate their own area of practice in broader contexts of adult learning and adult education. Students will systematically reflect on their professional identity(ies), examine their practice in the context of philosophical traditions, and construct their "own philosophy" of education to guide their practice. They will expand their academic sources and professional networks. Students will begin work on their individual program portfolios, which will be constructed throughout their program.

Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 516 | DESIGNING EDUCATIONAL OFFERINGS | 4 quarter hours (Graduate)

In this course, students will be introduced to major components involved in designing educational offerings for adult learners in various face-to-face settings. Students will develop (or revise) a design plan for an educational offering appropriate to their selected adult clientele. In particular, they will articulate learning outcomes around which to build their design plan (backward design). They will apply theories, concepts, and principles of adult learning while making design decisions. While the design principles addressed in this course are relevant to on-line environments, students who wish to delve further into on-line learning/teaching technology are encouraged to do so through the MAEA Electives option.

EA 517 | FACILITATING ADULT LEARNING | 4 quarter hours (Graduate)

In this course, students will develop and hone skills to facilitate adult learning in a variety of settings. Students will learn about concepts that inform learner-centered methods and techniques of facilitating learning. Throughout the course, they will apply various methods and techniques in various settings and reflect on how these methods influence learning. The repertoire of skills that students develop as facilitators of learning will have both immediate and future application. While the concepts, methods, and techniques covered in this course are relevant to on-line learning, students who wish to delve further into facilitating on-line learning are encouraged to do so through the MAEA Electives option.

EA 518 | ENHANCING PRACTICE WITH THEORY IN ADULT LEARNING | 4 quarter hours (Graduate)

In this capstone course, students' practices in helping adults learn will be grounded in relevant theories, models, and principles of adult learning and development. Students will examine various strands of research and theory that support, challenge, and enhance their practices in working with adult learners in their selected settings. Students will have many opportunities to explore and share new ideas and approaches through the various perspectives studied, thereby enhancing one another's theoretical foundations.

EA 525 | CONDUCTING PRACTICE-BASED INQUIRY | 4 quarter hours (Graduate)

In this course, students will be introduced to methods, strategies, and techniques appropriate for qualitative research designs. Students will select a topic of inquiry (research topic) relevant to their individual practice setting. The history and philosophy of qualitative research in the social sciences will be briefly explored to provide the framework for designing a research plan appropriate to their selected inquiry topic. Students will investigate various literature related to their topic of inquiry, research designs, data collection and analysis strategies, and research reporting formats. In this way, EA 525 becomes a springboard for independent learning projects, including the Applied Inquiry Project (AIP). Students who wish to augment qualitative research with quantitative approaches are encouraged to do so through the MAEA Electives option.

EA 526 | ASSESSING ADULT LEARNING | 4 quarter hours (Graduate)

In this course, students will learn about and apply various approaches for assessing learning outcomes of individuals in ways that also contribute to the learning process. The assessment of adult learning entails examining the actual outcomes of learning activities in relation to intended outcomes in order to make determinations about, and continually improve, both student learning and facilitator instructional practices. Students will address these components as they develop an assessment plan relevant to their practice setting and gain skill in designing assessment instruments.

EA 528 | APPLIED INQUIRY PROJECT | 4 quarter hours (Graduate)

In consultation with the faculty mentor and a project guide, each student will design and carry out a project that addresses a significant question/issue in the student's area of practice, with the aim of enhancing practice informed by relevant frameworks and ideas. The final product must be approved by GSPRC.

Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 528C | APPLIED INQUIRY PROJECT CAPSTONE | 4 quarter hours (Graduate)

Within the structure of this course, students will complete their Applied Inquiry Projects (AIP), the culminating project of their Master of Arts in Educating Adults (MAEA) program. Key elements of the AIP are that it has a clear focus; draws on relevant literature; employs an appropriate inquiry design; and results in an applied product relevant to their area of practice in educating adults. Students will draw on learning from prior MAEA courses, in particular EA 525 [inquiry design] and EA 518 [adult learning theories]. Students may work on a project already in process (if they have already begun their AIP work independently), or select a project from among topics provided by the instructor. Structured guidance and assignments will support both pathways. A learning contract approach will be used for either option.

LLS 450B is a prerequisite for this class.

EA 535 | REFLECTIVE PRACTICE SEMINAR I | 0.5 quarter hours (Graduate)

This is a faculty mentor-guided session, which follows EA 515. Students revisit their selected area of practice, select purposes for their program portfolio, and plan for development of the Elements of Reflective Practice.

Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 536 | REFLECTIVE PRACTICE SEMINAR II | 0.5 quarter hours (Graduate)

Students meet with their faculty mentor for group reflection and review of their progress in the program. This seminar assists students in planning their electives, reflecting on applications of their learning and assessing growth in the Elements of Reflective Practice, mapping theories and concepts to their practice settings, and sharing approaches to their program portfolios.

Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 537 | REFLECTIVE PRACTICE SEMINAR III | 0.5 quarter hours (Graduate)

Meeting with their faculty mentor, this seminar offers students an opportunity to get feedback on plans for the Applied Inquiry Project, conduct an informal mid-program review, examine ways in which students are applying the three Elements of Reflective Practice, identify significant 'threads' across the curriculum, and present on aspects of their program portfolios.

Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 538 | REFLECTIVE PRACTICE SEMINAR IV | 0.5 quarter hours (Graduate)

Near the end of the program, students join their faculty mentors in a summit to review their program, engage in discussion on their next steps, review their credo of educating adults, reflect again on the three Elements of Reflective Practice, and present their program portfolio.

Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 540 | DESIGNING AND DELIVERING TECHNOLOGY-ENHANCED LEARNING OFFERINGS | 4 quarter hours (Graduate)

This course focuses on designing and delivering educational experiences using the web, digital video, animation, gaming and mobile delivery formats. Students explore instructional design theory and bridge its application into/through basic training in each of these technological applications, including consideration of relevant examples of best practices and instructions regarding when to employ each application. This course does not have prerequisites; however, students are expected to be familiar with basic learning design principles.

EA 541 | TEACHING WITH WRITING IN ANY COURSE | 2 quarter hours (Graduate)

This online course (six-modules) for teachers in any discipline focuses on making the most of writing as a tool for teaching and learning in undergraduate and graduate courses. In the course, teachers will explore practical ideas for in-class writing assignments that initiate discussions and provide quick input regarding student learning. Teachers will also learn strategies for developing assignments and providing feedback while maximizing efficiency and minimizing frustration. Opportunities to share ideas and receive coaching on current writing assignments and ways of giving feedback are included. This course does not have prerequisites; however, those taking it should have undergraduate or graduate courses that they wish to develop or revise and experience teaching at the college level that they can draw upon for discussions. (2 quarter hours)

EA 542 | DESIGNING OUTCOME BASED EVALUATION | 2-4 quarter hours (Graduate)

This course functions as a Graduate Faculty-Directed Independent Study/GFDIS. (See MAEA Guidebook for general GFDIS details.) Each student designs a plan for outcome-based program evaluation, along with evaluation tools, that are relevant to his/her practice setting. This evaluation approach is then considered in relation to other models and approaches to evaluation of education, training and professional development programs. Illustrations of current program evaluation practices are included (2 quarter hours)

EA 543 | INNOVATIVE FACILITATING GFDIS | 2 quarter hours (Graduate)

This course functions as a Graduate Faculty-Directed Independent Study/GFDIS. (See MAEA Guidebook for general GFDIS details.) Students participate in SNL's Adult Learning Innovation Institute (Module: Innovative Strategies for Facilitating Adult Learning), learn innovative strategies for engaging and motivating adult learners in various educational and training settings and subsequently apply their learning in specific ways within their practice settings. Students also receive feedback and coaching from instructors and institute peers. (Questions? For information regarding the Institute, contact caea@depaul.edu. For information regarding the GFDIS-course, contact its instructors.) (2 quarter hours)

EA 544 | BUILDING GAMES FOR LEARNING GFDIS | 4 quarter hours (Graduate)

This course functions as a Graduate Faculty-Directed Independent Study/GFDIS. (See MAEA Guidebook for general GFDIS details.) Technology advances make it possible to enhance social learning (interpersonal) in cost-efficient ways by creating simulations and other forms of virtual delivery. This course focuses on ways to apply game concepts and game techniques, supported by foundational theories, that can be applied in various settings, e.g., corporate, higher education, community-based. Using simulation software (Articulate Storyline provided by the instructor), students will produce interactive serious games for virtual delivery for their targeted audience. Students are expected to be proficient in use of Microsoft Word and Power Point and have a computer with Internet access.

EA 545 | PARTNERING FOR SOCIAL ACTION GFDIS | 4 quarter hours (Graduate)

This course functions as a Graduate-Faculty-Directed Independent Study/GFDIS. (See MAEA Guidebook for general GFDIS details.) This course provides opportunities for students to engage in community settings throughout Chicago. Students will learn how to: observe social agency in action; build relationships across class, race and other barriers to mutual understanding; and, actively participate in service opportunities with organizations addressing social justice concerns. In addition to hands-on engagement in the field, students will explore theories and principles related to community empowerment work in community settings. Students must contact the instructor prior to registering for this GFDIS to obtain information about available community settings/projects and time/schedule/location expectations. Onsite community project work and meeting schedule (max five) will be determined based on the selected project work.

EA 546 | EDUCATING FOR SOCIAL JUSTICE GFDIS | 4 quarter hours (Graduate)

This course functions as a Graduate-Faculty-Directed Independent Study/GFDIS. (See MAEA Guidebook for general GFDIS details.) Students critically examine and apply diverse ways of defining, analyzing and engaging in social justice education, as both educators and learners. Key dimensions of social justice approaches to education of adults (culture, ethics and politics; facilitation; curriculum development; and, educator as change-agent) will be addressed. In addition to critical reflection on assigned readings, students will observe social justice education in a community context (arranged by the instructor) and will apply social justice principles to an educational offering in their own practice sites.

EA 547 | DESIGNING ONLINE LEARNING | 4 quarter hours (Graduate)

This course functions as a Graduate Faculty-Directed Independent Study/GFDIS. (See MAEA Guidebook for general GFDIS details.) Course addresses the process of designing effective, learner-centered online offerings such as webinars, workshops, or modules for use in formal education or training settings. Using adult learning principles, best practices, and backward planning, learning outcomes, content, and assessments are developed and delivered in a virtual environment. Formal and informal learning communities are explored using social media for learner engagement and interaction. The instructor incorporates interactive lectures and group discussions. Assessment criteria and rubrics guide feedback for ongoing learning as well as for final evaluation of performance. Students will have an opportunity to design an offering specifically applicable to their needs and interests with regard to helping adults learn.

Education - General (EDU)

EDU 25 | BASIC TECHNOLOGY LITERACY | 0 quarter hours (Undergraduate)

This online course provides students with a knowledge about assembling, using, and troubleshooting basic technology hardware and software. In this course, students demonstrate understanding of basic computer setup and the use of peripheral devices such as printers, speakers, flash drives, scanners, digital cameras, videos, and computer software. (0 credit hours)

EDU 95 | CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH | 0 quarter hours (Undergraduate)

Required of all students. Observations and participatory experience with children and youth in a school or agency. This course is a prerequisite for student teaching and related professional courses. (0 credit hours)

EDU 100 | INTEGRATIVE KNOWLEDGE E-PORTFOLIO | 0 quarter hours (Undergraduate)

This course provides an introduction to the Digication e-portfolio platform and the development of integrative knowledge e-portfolios. Prerequisite: Permission of instructor. (0 credit hours)

EDU 115 | CRITICAL THINKING AND LEARNING STRATEGIES | 2 quarter hours (Undergraduate)

This 2 quarter hour course is designed to develop a learning community for transfer students and/or students who desire to advance academic skills and knowledge through professional writing, metacognitive study strategies, critical thinking and reading, and research and technology. (2 credit hours)

EDU 125 | THE SCIENCE OF HUMAN COGNITION | 4 quarter hours (Undergraduate)

In this course we will consider traditional and modern practices for measuring human cognition. We will read, think, and talk about these practices from a variety of social and cultural contexts. We will consider the application and value of cognitive neuroscience to the future of this field of study. We will also venture into how, over time, research into human cognition and how people learn has impacted schooling, teaching practices, and political agendas.

EDU 225 | DOING MATH WITH AGENCY: PERSONAL GROWTH AND SOCIAL CHANGE | 4 quarter hours (Undergraduate)

In this course, we explore ways of doing mathematics for personal growth and social change. We draw from our identities to make meaning from authentic problems that require basic skills with mathematics. We compare individual approaches to, and strategies for, doing mathematics based on our prior experiences and personal applications of mathematics. There are no timed tests or procedures to follow for doing our mathematics together. We explore the collaborative and engaging processes mathematics has to offer when we do it with agency, authority, and identity. Some years, this course will be taught as part of DePaul's Inside/Out Prison Exchange Program.

EDU 499 | LANGUAGE AND LITERACY PRACTICES ACROSS THE ACADEMY | 0 quarter hours (Graduate)

This course addresses issues related to the use of English in the Academy, particularly (1) in classrooms where English is not the native language of the instructor or students but is the language of instruction and/or (2) in scholarship written in English by non-native speakers of English. Topics include but are not limited to academic writing, curriculum development, classroom pedagogy, content pedagogical knowledge, globalization and international education, 21st century technologies, and English as a medium of instruction. Registration with permission of instructor only. (0 credit hours)

Elementary Education (EE)

EE 281 | INTRODUCTION TO EDUCATIONAL PRACTICE | 4 quarter hours (Undergraduate)

This is the first in a sequence of theory and practice courses that serves to familiarize teaching candidates with the world of elementary. Through observation and participation in schools, self-reflection, independently created assignments, cooperative learning assignments and classroom discussion, candidates will acquire familiarity with schools and classrooms including: social/cultural context, classroom climate, classroom management, curricular coherence, standards-based instruction, and teacher professional beliefs and practices. Written critical reflections and papers serve as initial foundation for the development of teaching philosophies. Required field experiences are integrated into this course.

EE 317 | PHYSICAL EDUCATION AND CLASSROOM MANAGEMENT IN THE ELEMENTARY SCHOOL | 4 quarter hours (Undergraduate)

The course is designed to promote an understanding of the contribution that Physical Education makes to the elementary school curriculum and the development of the whole child. Lesson planning, instructional delivery, and classroom management will be focused as students engage in 15-20 hours of supervised field experience teaching whole classes of children in local schools.

EE 281 and an Education major or minor are prerequisites for this class.

EE 324 | READING/LANGUAGE ARTS IN THE EARLY YEARS | 4 quarter hours (Undergraduate)

This course focuses on the curriculum content and sequence, instructional and assessment strategies as well as considerations integral to the creation of authentic, effective emergent literacy environments and engagements for kindergarten through third grade. Theory and practice principles are woven into course assignments and required field experiences designed to observe, teach, and reflect upon instructional decisions made for individual as well as groups of children. Prevailing curricular and instructional models (e.g., code-based, meaning-oriented, balanced) and their histories are compared and contrasted. The influences of development, home language(s) and dialect(s) (especially those of U.S. metropolitan areas), and educational settings are studied and applied to candidate instructional planning and teaching. Case studies and lesson planning facilitate the application of course content. **(EE 281 or ECE 290) and an Education major or minor are prerequisites for this class.**

EE 326 | READING/LANGUAGE ARTS IN THE INTERMEDIATE GRADES | 4 quarter hours (Undergraduate)

This course extends Emerging Reading and Language Arts to facilitate increased independence in students as strategic readers and competent writers. It focuses on the further development of reading comprehension and writing abilities in the intermediate grades. Emphasis is placed on the complex nature of literacy addressing issues such as content-area literacies, learning in and across languages, and critically consuming and producing a wide variety of texts (including online, multimedia and print based). Application of course material is facilitated through the design, teaching, and reflection on literacy lesson(s) for intermediate learners in required field experiences.

EE 281, EE 324, and an Education major or minor are prerequisites for this class.

EE 330 | URBAN EDUCATION RESIDENCY | 4 quarter hours (Undergraduate)

The Urban Education Residency is designed to enhance students' knowledge and experiences working in urban school settings. Working along professional urban educators, preservice elementary candidates will gain first-hand experience in best pedagogical practices that make teaching and learning culturally relevant in diverse urban elementary classrooms and support students' academic success. Students will build a repertoire of strategies that will enable them to become reflective and effective urban professional educators.

An education major or minor is a prerequisite for this class.

EE 333 | TEACHING AND LEARNING ELEMENTARY SCHOOL MATHEMATICS | 4 quarter hours (Undergraduate)

This course is an introduction to materials, processes for developing, and strategies for mathematical literacy in grades 1-6. Particular attention will be given to the theoretical views about how children learn mathematics, the proper use of manipulative materials, the development of mathematical thinking, e.g., skills in estimation, pattern recognition, or spatial perception; the use of technology, and ways to assess student progress. Daytime clinical hours are required. Note: MAT 111 may be taken as a prerequisite OR it may be taken concurrently with EE 333.

MAT 110, EE 281, and an Education major or minor are prerequisites for this class.

EE 334 | ELEMENTARY SCIENCE INQUIRY TEACHING STRATEGIES | 4 quarter hours (Undergraduate)

This course is an introduction to instructional strategies for helping students in grades 1-6 become science literate: i.e., to understand the nature of science and its impact on the world. Particular attention will be given to theoretical views about how children learn science and develop scientific process skills, e.g., skills in observing, classifying, collecting and interpreting data and questioning strategies, and ways to assess student progress. Daytime clinical hours are required.

EE 281 and an Education major or minor are prerequisites for this class.

EE 344 | ART AND MUSIC IN THE ELEMENTARY SCHOOL | 4 quarter hours (Undergraduate)

This course focuses on the arts (visual art, music, drama and dance) as an integral component of teaching and learning in the elementary school curriculum. Students will explore a variety of art forms and disciplines to develop a critical aesthetic and artistic vocabulary. Students learn to help children utilize artistic media in the exploration and expression of thoughts and feelings. Emphasis is placed on design, construction, and implementation, and assessment of authentic conceptual classroom arts activities that integrate the arts with other classroom curricula. Daytime clinical hours (10) are required during this course.

EE 281 and an Education major or minor are prerequisites for this class.

EE 347 | CHILDREN'S LITERATURE | 4 quarter hours (Undergraduate)

This course familiarizes students with quality children's literature for infancy through young adulthood. Students will select, discuss, critique, and share books appropriate for this age span, focusing primarily on ages 1-6 years. The influences of child development, culture, technology, and education stakeholders (i.e., parents, students, teachers, administrators, and their community) on literature selection are emphasized. Students will develop skills in evaluating books, responding to books, and using literature across the curriculum.

EE 355 | METHODS: CONTEMPORARY TEACHING OF SOCIAL STUDIES | 4 quarter hours (Undergraduate)

This course is an introduction to an integrated view of social studies for engaged citizenship. Through the study of strategies such as concept formation, historical inquiry, and role-play, and materials, such as primary sources, teacher candidates will apply principles of curricular integration to create curriculum/units that engage elementary learners in the exploration of issues, ideas, and perspectives that impact our world. Daytime clinical hours are required.

EE 281 and an Education major or minor are prerequisites for this class.

EE 356 | ASSESSMENT IN THE ELEMENTARY CLASSROOMS | 4 quarter hours (Undergraduate)

This course focuses on study, use, and evaluation of assessment practices in diverse, elementary school contexts. Assessment is addressed as part of instructional systems, attending to issues including: the appropriate use of standardized measures, formal and informal classroom assessment, portfolio development, as well as reporting to all stakeholders. This course also emphasizes ways of involving students and parents in assessment processes, how to observe and assess children individually and in classroom settings, and the use of numerous technologies as components of a classroom assessment system.

EE 281, SCU 337, and (EE 324, EE 333, EE 334, or EE 355) and an Education major or minor are prerequisites for this class.

EE 384 | CAPSTONE IN ELEMENTARY EDUCATION | 4 quarter hours (Undergraduate)

The senior capstone course is designed to help students integrate the central emphases of their liberal learning studies curriculum into their professional behavior. It will provide prospective elementary educators with opportunities to engage in activities requiring them to be reflective, to consider value commitments, to engage in critical and creative thinking, and to examine their practice from a multicultural perspective as they discuss issues specific to elementary education. The course is grounded in the College of Education's framework for an Urban Professional Multicultural Educator, which also reflects the goals of the Liberal Studies Program. COREQUISITE(S): EE 385.

EE 385 | ELEMENTARY STUDENT TEACHING | 10 quarter hours (Undergraduate)

Five school days a week supervised teaching in a cooperating school for a full academic quarter. Feedback and discussion of problems encountered in student teaching as well as new materials and techniques of student teaching. Application and approval required. Open only to DePaul students. (10 credit hours)

EE 387 | CAPSTONE SEMINAR IN ELEMENTARY EDUCATION | 2 quarter hours (Undergraduate)

The senior capstone course is designed to help students integrate the central emphases of their liberal learning studies curriculum into their professional behavior. It will provide prospective elementary educators with opportunities to engage in activities requiring them to be reflective, to consider value commitments, to engage in critical and creative thinking, and to examine their practice from a multicultural perspective as they discuss issues specific to elementary education. The course is grounded in the College of Education's framework for an Urban Professional Multicultural Educator, which also reflects the goals of the Liberal Studies Program. COREQUISITE(S): EE 385.

EE 399 | INDEPENDENT STUDY IN ELEMENTARY EDUCATION | 1-4 quarter hours (Undergraduate)

Permission of program chair required. (1 credit hour)

English (ENG)

ENG 101 | INTRODUCTION TO LITERATURE | 4 quarter hours (Undergraduate)

This course introduces students to the art of literary analysis. Through reading novels, stories, plays, and poems, students will develop the skills needed to gain a deeper appreciation of literature. Students will learn about the choices authors make to convey meaning, and will practice reading closely and deeply in order to understand the nuances of literary language. Each section of this course will focus on a specific theme (e.g. "Heroes and Villains," "Passion and Betrayal," "Coming of Age," etc.), and different sections will focus on different literary genres; please see the schedule for current offerings. This course is not repeatable.

ENG 102 | INTRODUCTION TO POETRY | 4 quarter hours (Undergraduate)

This course provides an introduction to poetry through the study of meter, rhyme, figurative language, form, and genre. Students will learn how to understand and appreciate poetry from a wide variety of periods and traditions. Students will leave the course with a greater appreciation for the beauty of language and with the interpretive skills needed to make reading any poem a rewarding experience.

ENG 103 | INTRODUCTION TO DRAMA | 4 quarter hours (Undergraduate)

One of the most ancient art forms, drama combines the art of storytelling with the excitement of live performance. Students will learn about dramatic structure and technique as they explore major themes in a selection of dramatic works from antiquity to the present. In addition to studying plays within their various historical and cultural contexts, students will consider the performance possibilities inherent in dramatic texts. Authors may include Sophocles, Shakespeare, Moliere, Henrik Ibsen, Arthur Miller, Samuel Beckett, Lorraine Hansberry, August Wilson, Caryl Churchill.

ENG 110 | LITERARY CLASSICS | 4 quarter hours
(Undergraduate)

This course focuses on great works of literature that are widely considered to be classics. Works studied might range from Greek drama up through modern American novels, by authors such as Shakespeare, Dante, Austen, Tolstoy, Goethe, Bronte, Dostoevsky, Hemingway, Yeats, Virginia Woolf, or Toni Morrison. Variable emphasis on different authors, texts, themes, and historical periods. See schedule for current offerings. This course is not repeatable.

ENG 120 | READING LITERATURE | 4 quarter hours
(Undergraduate)

Study of the elements and construction of literary texts, of the vocabulary of literary criticism, and of various literary modes and genres.

ENG 130 | THEMES IN LITERATURE | 4 quarter hours
(Undergraduate)

Introduction to the study of literature through selected literary texts focused on a particular theme. Variable topics. May not be repeated.

ENG 197 | CLOSE ENCOUNTERS WITH LITERATURE | 2 quarter hours
(Undergraduate)

This course provides a focused, in-depth exploration of a single literary text, theme, author, or topic. For example, one section of the course might focus just on Jane Austen's *Pride and Prejudice* and its adaptations, while another section might explore Shakespeare's sonnets or stories by Jhumpa Lahiri. Please see the schedule for current offerings. This course can be repeated with different topics. Two quarter hours credit.

ENG 198 | CREATIVE WRITING CLOSE UP | 2 quarter hours
(Undergraduate)

This course is a focused creative writing workshop that concentrates on a specific skill, genre, or topic. For instance, one section of the course might focus on writing dialogue, while another section might teach students to write flash fiction. Please see the schedule for current offerings. This course can be repeated with different topics. Two quarter hours credit. Applicable to the English major only with department permission.

ENG 201 | INTRODUCTION TO CREATIVE WRITING | 4 quarter hours
(Undergraduate)

This course provides an introduction to the art of writing poetry, short stories, and creative nonfiction. Students will study the work of published authors in order to learn about craft elements, techniques, language usage, and literary forms before composing and revising original poems, stories, and essays of their own.

ENG 205 | LITERATURE TO 1700 | 4 quarter hours
(Undergraduate)

This course will provide a general overview of literature written primarily in English up to 1700, with a focus on medieval and Renaissance literature. The course will focus on major literary movements and developments, and will situate important literary texts in their historical contexts. Topics might include generic emulation and adaptation, literary nationalism, the relationship between oral and written culture and popular and elite literature, the emergence of popular theater, the development of English as a language suitable for literary composition, gender and sexuality, and the historical importance accorded to same sex friendship. Authors studied might include Virgil, Geoffrey Chaucer, Margery Kempe, Sir Thomas Malory, Christopher Marlowe, William Shakespeare, Sir Philip Sidney, John Donne, George Herbert, Margaret Cavendish, and John Milton, as well as anonymous epics and morality plays, such as *Beowulf* and *Everyman*.

ENG 206 | LITERATURE FROM 1700 TO 1900 | 4 quarter hours
(Undergraduate)

This course will provide a general overview of literature written primarily in English between 1700 and 1900. The course will focus on major literary movements and developments, and will situate important literary texts in their historical contexts. Topics might include the rise of the novel; 18th-century satire; Gothic literature; Romanticism; Transcendentalism; literary responses to the American Revolution, the American Civil War, the Industrial Revolution, and the expansion of the British empire; slavery and abolition; women, domesticity, and early feminism; the Victorian novel; and the *Fin de Siecle*. Authors studied might include Daniel Defoe, Jonathan Swift, Benjamin Franklin, Jane Austen, Mary Shelley, John Keats, Frederick Douglass, Ralph Waldo Emerson, Nathaniel Hawthorne, Emily Dickinson, Mark Twain, Walt Whitman, Charlotte and Emily Bronte, Charles Dickens, and Oscar Wilde.

ENG 207 | LITERATURE FROM 1900 TO THE PRESENT | 4 quarter hours
(Undergraduate)

This course will provide a general overview of literature written primarily in English between 1900 and the present. The course will focus on major literary movements and developments, and will situate important literary texts in their historical contexts. Topics might include modernism and postmodernism; divisions between mass and high culture; literary responses to the World Wars, the feminist and civil rights movements, and immigration; and post-colonial literatures. Authors studied might include W. B. Yeats, T. S. Eliot, James Joyce, Virginia Woolf, Ernest Hemingway, Ralph Ellison, William Faulkner, Jean Rhys, Samuel Beckett, Tennessee Williams, Toni Morrison, Salmon Rushdie, Derek Walcott, Wole Soyinka, and Zadie Smith.

ENG 209 | TOPICS IN WRITING | 4 quarter hours
(Undergraduate)

Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

ENG 211 | GRAMMAR AND STYLE | 4 quarter hours
(Undergraduate)

An introduction to elements of the linguistic structure of English as they are employed to create stylistic effects in writing. The course aims at clarifying ways that language can affect audiences' perceptions and responses to writing.

ENG 216 | CREATING CHARACTERS | 4 quarter hours
(Undergraduate)

This cross-genre course—open to students interested in fiction, journalism, screenwriting, playwriting, animation, and game design—will introduce students to the tools writers use for making fictional characters and real people come alive on the page. In addition to studying the ways in which detail, setting, point of view and dialogue affect character, students will learn the art of the interview and the craft of writing nonfiction profiles. Participants will also gain basic skills in reading and responding to other students' stories in a workshop setting. This course is not repeatable.

ENG 218 | READING AND WRITING FICTION | 4 quarter hours
(Undergraduate)

An introduction to the art of fiction through analysis and criticism of fiction by established writers and through writing and revising the student's own stories.

ENG 219 | READING AND WRITING POETRY | 4 quarter hours
(Undergraduate)

An introduction to the art of poetry through analysis and criticism of poems by established poets and through writing and revising the student's own poems.

**ENG 221 | READING PROSE | 4 quarter hours
(Undergraduate)**

An introduction to close analytical reading of the fundamental prose genres that students will encounter in the English major, including short stories, novels, literary nonfiction, and criticism.

**ENG 222 | INTRODUCTION TO LINGUISTICS | 4 quarter hours
(Undergraduate)**

The focus of this course is on linguistics as the study of how language works in the minds and brains of its speakers, taking an approach that focuses on the mental representation of language. We develop a theory of language knowledge that includes knowledge of sound systems, sentence structure, and meaning, and along the way we investigate data from diverse languages to illustrate how linguists think and reason. We also draw connections between linguistic knowledge and other types of cognition, as well as connections between linguistics and related fields, including philosophy, psychology, and neuroscience.

**ENG 225 | THE HISTORY OF BOOKS | 4 quarter hours
(Undergraduate)**

This course is an introduction to the study of the book as an object and as a technology. It investigates the production of texts from handwritten manuscripts to modern digital media, with a particular focus on the influence of the printing press between the late Middle Ages and the early nineteenth century. We will explore the development and rise of what is now known as print culture, as well as related histories of authorship, reading, and publishing. Classes incorporate hands-on work with rare books and primary sources in DePaul's Special Collections alongside a range of digital tools. The final project will include a public outreach component that shares the history you have recovered with the community.

**ENG 228 | INTRODUCING SHAKESPEARE | 4 quarter hours
(Undergraduate)**

Introduction to the basic structures and conventions of representative plays by William Shakespeare, emphasizing film and stage interpretations. May not be taken by students who have completed ENG 328.

**ENG 231 | GOTHIC MONSTERS AND VILLAINS | 4 quarter hours
(Undergraduate)**

This course provides an introduction to Gothic narratives. Students will learn about the different ways authors use monsters, villains, and spooky settings to comment on social anxieties related to gender, sexuality, race, politics, technology, etc. Texts might include classics such as *Frankenstein*, *The Strange Case of Dr. Jekyll and Mr. Hyde*, and *Dracula*, as well as lesser known works drawn from the eighteenth century to the present. Variable emphasis. (See schedule for current offerings.) This course is not repeatable.

**ENG 232 | THE ROMANCE | 4 quarter hours
(Undergraduate)**

Introduction to the genre of the romance. Emphasis on characteristics of the genre in particular historical moments. Variable emphasis on particular historical periods or topics. (See schedule for current offerings.) This course is not repeatable.

**ENG 235 | SCIENCE FICTION | 4 quarter hours
(Undergraduate)**

Introduction to science fiction as a literary genre. Variable topics, such as the history of the genre, multi-media adaptations, cyberpunk, and global variants. This course is not repeatable.

**ENG 236 | GRAPHIC NOVELS AND SOCIAL JUSTICE | 4 quarter hours
(Undergraduate)**

This course will consider graphic novels and comics as literary, visual, and social art. The course will focus on graphic novels and comics that engage issues of social justice such as the Holocaust, the Civil Rights Movement, and the U.S. prison system. Discussion topics might include how comics and graphic novels use unique storytelling tools to convey big issues in powerful ways; how comics and graphic novels get readers to think differently about the role of art in violence, suffering, social struggle, objectification, voice, and self-expression; and how graphic novels help readers to imagine and reimagine history, create social change, and envision new futures. Throughout the course, students will consider how graphic novels work effectively both as narratives and as visual art.

**ENG 237 | HARRY POTTER | 4 quarter hours
(Undergraduate)**

This course provides a scholarly introduction to the Harry Potter series. Students will analyze the series through the lens of Joseph Campbell's theory of the hero's journey, and will contextualize Rowling's work through comparisons to Arthurian legend and other British novels. The course will also consider the ways in which the series acts as a commentary on social, cultural, and political issues. Texts will include the entire Harry Potter series as well as essays from literary scholars, historians, and political scientists. This course is not repeatable.

**ENG 245 | THE BRITISH NOVEL | 4 quarter hours
(Undergraduate)**

Studies in the British novel. Variable emphasis on particular historical periods or topics from 1700 to present.

**ENG 250 | GREAT WRITERS | 4 quarter hours
(Undergraduate)**

Introduction to the works of one or more writers of classic or influential literary texts. Authors vary; please see schedule for current offerings. This course is not repeatable.

**ENG 265 | THE AMERICAN NOVEL | 4 quarter hours
(Undergraduate)**

Studies in the American novel. Variable emphasis on the historical development, regional expression, multicultural scope, ethical engagement, and/or recurring thematic concerns of the genre.

**ENG 268 | LITERATURE ACROSS CULTURES | 4 quarter hours
(Undergraduate)**

Readings in literature by writers from various ethnic backgrounds. Works may be by American minority authors or by authors writing in English from outside Britain and the U.S. This course takes a comparative approach to studying concepts of ethnicity and identity in literature drawn from several ethnic traditions. Variable emphasis on different groups, genres, themes, or historical periods. See schedule for current offerings. This course is not repeatable.

**ENG 271 | AFRICAN AMERICAN LITERATURE | 4 quarter hours
(Undergraduate)**

Introduction to works of poetry, fiction, nonfiction, and/or drama by African-American authors.

**ENG 272 | LITERATURE AND IDENTITY | 4 quarter hours
(Undergraduate)**

Studies in the literary expression and representation of identity. Variable emphasis on different groups, genres, themes, or historical periods. (See schedule for current offerings.) This course is not repeatable.

**ENG 273 | GLOBAL ASIAN LITERATURE | 4 quarter hours
(Undergraduate)**

Introduction to selected authors, genres, and topics in Asian American or Asian diasporic literature from the mid-nineteenth century to the present. Variable emphasis on different groups, genres, or historical periods.

**ENG 275 | LITERATURE AND FILM | 4 quarter hours
(Undergraduate)**

Introduction to the comparative study of literature and film. Emphasis on construction of narrative, development of character, point-of-view, and adaptation across genres and mediums. (See schedule for current offerings.) This course is not repeatable.

**ENG 276 | LATINX LITERATURE | 4 quarter hours
(Undergraduate)**

Introduction to works of poetry, fiction, nonfiction, and/or drama by Latinx authors.

**ENG 279 | STUDIES IN LITERATURE | 4 quarter hours
(Undergraduate)**

Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

**ENG 280 | THE EPIC | 4 quarter hours
(Undergraduate)**

Introduction to the appreciation and analysis of epic as a cultural form, with attention to the genre in both its oral and written forms. Special consideration will be given to issues of gender, sexuality, and politics. Texts discussed will span a range of cultures and historical periods. Readings will vary but may include translations of Homer and Virgil, as well as epics by Milton, Margaret Atwood and Derek Walcott. This course is not repeatable.

**ENG 283 | GENDER IN LITERATURE | 4 quarter hours
(Undergraduate)**

Studies in representations of gender in literature. Variable emphasis on different groups, genres, themes, or historical periods. See schedule for current offerings. This course is not repeatable.

**ENG 284 | THE BIBLE AS LITERATURE | 4 quarter hours
(Undergraduate)**

Introduction to the major stories, genres (e.g., poems, parables, prophecies) and intra-textual echoes of the Bible.

**ENG 285 | LGBTQ LITERATURE | 4 quarter hours
(Undergraduate)**

Studies in representations of queer identities, sexualities, and communities by LGBTQ authors. Variable emphasis on different groups, genres, themes, or historical periods. See schedule for current offerings. This course is not repeatable.

**ENG 286 | TOPICS IN POPULAR LITERATURE | 4 quarter hours
(Undergraduate)**

Studies in the forms and functions of popular fiction. Variable emphasis. (See schedule for current offerings.) This course is not repeatable.

**ENG 288 | AUTOBIOGRAPHY AND BIOGRAPHY | 4 quarter hours
(Undergraduate)**

Introduction to the forms, functions, problems and purposes of life-writing.

**ENG 290 | THE CRAFT OF CREATIVE NONFICTION WRITING | 4 quarter hours
(Undergraduate)**

Writing and analyzing creative nonfiction. May be taken twice. May not be taken pass/fail.

ENG 201 or instructor permission is a prerequisite for this class.

**ENG 291 | THE CRAFT OF FICTION WRITING | 4 quarter hours
(Undergraduate)**

Writing and analyzing short prose fiction. May be taken twice. May not be taken pass/fail.

ENG 201 is a prerequisite for this class.

**ENG 292 | THE CRAFT OF POETRY WRITING | 4 quarter hours
(Undergraduate)**

Writing and analyzing poems. May be taken twice. May not be taken pass/fail.

ENG 201 is a prerequisite for this class.

**ENG 299 | CAREERS FOR ENGLISH MAJORS | 2 quarter hours
(Undergraduate)**

An introduction to the many careers available to English majors. The course will use literary and contemporary work-related readings along with guest speakers to help students explore their options and develop a unique career path. Two credit hours. Applicable to the English major only with department permission.

**ENG 300 | COMPOSITION AND STYLE | 4 quarter hours
(Undergraduate)**

Advanced instruction in invention, arrangement, and style, toward developing clear and effective prose styles.

WRD 104 or HON 100 is a prerequisite for this course.

**ENG 302 | SCIENCE AND NATURE WRITING | 4 quarter hours
(Undergraduate)**

This writing workshop will provide an introduction to the exciting, fast-growing field of writing about nature and science. We will define science in its broadest sense, and no prior science background is necessary. Students will read essays about the natural world and learn how to write in different genres that might include press releases, articles, and memoirs.

ENG 201 is a prerequisite for this class.

**ENG 303 | MAGAZINE WRITING | 4 quarter hours
(Undergraduate)**

In this writing workshop, students will explore the many varied forms of magazine writing. Students will analyze past and contemporary classics, generate ideas, and learn how to research and write in different genres that may include press releases, features, and creative articles. The course may also feature visits from guest professionals and alumni in the field.

ENG 201 is a prerequisite for this class.

**ENG 304 | TRAVEL WRITING | 4 quarter hours
(Undergraduate)**

This writing workshop provides an introduction to the travel essay. Students will craft the raw materials of experience, memory, and research into literary nonfiction. The course will investigate concepts of truth, accuracy, and authority, as well as questions about the very nature of travel. What does it mean to travel? Why do we do it? What do we gain in the process of uprooting ourselves, and what do we lose? In addition to creating their own travel essays, students will also read examples of classic and contemporary travel writing. The course does not require students to have extensive or international travel experience.

ENG 201 is a prerequisite for this class.

**ENG 305 | LITERARY MAGAZINES | 4 quarter hours
(Undergraduate)**

This course examines the literary magazine—exploring the missions, personalities, processes, histories, and aesthetics of print and/or online journals and little magazines publishing work by poets and creative prose writers. Variable emphasis. (See schedule for current offerings.)

ENG 201 or instructor permission is a prerequisite for this class.

ENG 306 | ADVANCED CREATIVE NONFICTION WRITING | 4 quarter hours (Undergraduate)

Writing and analyzing creative nonfiction, for students with prior workshop experience. May be taken twice. May not be taken pass/fail.

ENG 201 is a prerequisite for this class.

ENG 307 | ADVANCED FICTION WRITING | 4 quarter hours (Undergraduate)

Writing and analyzing short prose fiction, for students with prior workshop experience. May be taken twice. May not be taken pass/fail.

ENG 201 is a prerequisite for this class.

ENG 308 | ADVANCED POETRY WRITING | 4 quarter hours (Undergraduate)

Writing and analyzing poems, for students with prior workshop experience. May be taken twice. May not be taken pass/fail.

ENG 201 is a prerequisite for this class.

ENG 309 | ADVANCED TOPICS IN WRITING | 4 quarter hours (Undergraduate)

Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

ENG 201 is a prerequisite for this class.

ENG 312 | HISTORICAL FICTION | 4 quarter hours (Undergraduate)

In this combination seminar and writing workshop, students will read and write fiction that highlights the intersection of history and fiction, memory and imagination, fact and invention. Authors studied might include Alice Munro, Toni Morrison, Edward P. Jones, A.S. Byatt, or Colson Whitehead. Students will consider how each author retrieves, recreates, and then reinvents a past that inevitably weaves itself into the present. Keeping in mind the demands of historical fiction in terms of setting and characterization, this course will explore the elements that define strong fiction writing across genres (point of view, plot, theme, and metaphor, to name a few), and students will learn how to incorporate these elements into their own writing as they create new, original historical-fiction stories.

ENG 201 is a prerequisite for this class.

ENG 313 | SPECULATIVE FICTION | 4 quarter hours (Undergraduate)

In this writing workshop, students will read and write works of speculative fiction that ask what the world would be or could be under different circumstances. Students will study the narrative design of successful works of speculative fiction (including sub-genres such as magic realism, alternative history, post-apocalyptic, horror, dystopia, science fiction, and heroic fantasy), dissecting these works in an attempt to understand what defines the genre. This course will explore the elements that define strong fiction writing across genres (point of view, plot, theme, and metaphor, to name a few), and students will learn how to incorporate these elements into their own writing as they create their own original speculative fiction stories.

ENG 201 is a prerequisite for this class.

ENG 314 | SETTING IN FICTION | 4 quarter hours (Undergraduate)

This writing workshop will focus on the role of place and time in fiction, examining the ways in which they give rise to character and interact with other story elements. The course will place a heavy emphasis on reading in addition to helping students develop their own works of fiction.

ENG 201 is a prerequisite for this class.

ENG 317 | THE ART OF DESCRIPTION | 4 quarter hours (Undergraduate)

In this writing workshop, students will learn to write vivid and striking poetry and short but effective prose/fiction. Students will learn the art of description by writing scenes and vignettes: brief narratives and sketches characterized by great precision, economy of language, and accuracy of composition. A vignette: a short impressionistic scene that focuses on one moment or a fleeting slice of life is composed like a photograph or painting to give a trenchant impression about a character, an idea, a setting, or an object. The writing of vignettes requires utmost attention to detail, and requires a presence of mind and powers of keen observation that are important in any kind of creative writing. This course's goal is to help students write with clarity, power, and directness.

ENG 201 is a prerequisite for this class.

ENG 321 | ENGLISH LITERATURE TO 1500 | 4 quarter hours (Undergraduate)

Survey of English literature from the beginnings to 1500.

(ENG 220 and ENG 221) or (ENG 205 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

ENG 322 | CHAUCER | 4 quarter hours (Undergraduate)

Study of selected poetry and prose by Geoffrey Chaucer.

ENG 220 or (ENG 205 and ENG 101 or HON 101) is a prerequisite for this class.

ENG 323 | TOPICS IN MEDIEVAL LITERATURE | 4 quarter hours (Undergraduate)

See schedule for current offerings. This course is repeatable with different topics.

(ENG 220 and ENG 221) or (ENG 205 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

ENG 325 | ENGLISH RENAISSANCE LITERATURE | 4 quarter hours (Undergraduate)

Survey of English literature from 1500 to 1660.

(ENG 220 and ENG 221) or (ENG 205 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

ENG 327 | MILTON | 4 quarter hours (Undergraduate)

Study of selected poetry and prose by John Milton.

ENG 220 or (ENG 101 or HON 101) is a prerequisite for this class.

ENG 328 | STUDIES IN SHAKESPEARE | 4 quarter hours (Undergraduate)

Study of selected plays and poetry of William Shakespeare in relation to early modern English culture. Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

ENG 220 or ENG 101 or HON 101 or (THE 204 and THE 205 and THE 206) is a prerequisite for this class.

ENG 329 | TOPICS IN RENAISSANCE LITERATURE | 4 quarter hours (Undergraduate)

See schedule for current offerings. This course is repeatable with different topics.

(ENG 220 and ENG 221) or (ENG 205 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

ENG 330 | RESTORATION AND 18TH-CENTURY LITERATURE | 4 quarter hours (Undergraduate)

Survey of British literature from 1660 to 1780.

(ENG 220 and ENG 221) or (ENG 206 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

**ENG 332 | MAJOR AUTHORS BEFORE 1800 | 4 quarter hours
(Undergraduate)**

Study of one or two major authors whose works were published before 1800. This course is repeatable with different authors. (See schedule for current offerings.)

**ENG 335 | TOPICS IN EARLY AMERICAN LITERATURE | 4 quarter hours
(Undergraduate)**

Selected authors, genres and topics in American literature written before 1800. This course is repeatable with different topics.
(ENG 220 and ENG 221) or (ENG 206 and ENG 101 or HON 101) are prerequisites for this class.

**ENG 339 | TOPICS IN RESTORATION AND 18TH CENTURY BRITISH LITERATURE | 4 quarter hours
(Undergraduate)**

Selected authors, genres and topics in British Literature, 1660-1780. This course is repeatable with different topics.
(ENG 220 and ENG 221) or (ENG 206 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

**ENG 340 | 19TH-CENTURY BRITISH LITERATURE | 4 quarter hours
(Undergraduate)**

Survey of British literature from 1780 to 1900.
(ENG 220 and ENG 221) or (ENG 206 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

**ENG 342 | MAJOR AUTHORS 1800-1900 | 4 quarter hours
(Undergraduate)**

Study of one or two major authors whose works were published between 1800 and 1900. This course is repeatable with different authors. (See schedule for current offerings.)

**ENG 343 | LITERATURE OF THE ROMANTIC ERA | 4 quarter hours
(Undergraduate)**

Study of literature written primarily between 1780 and 1840. Topics will vary and may include English Romantic Poetry, Literature of the French Revolution, Transatlantic Romanticism, American Romanticism, Regency Fiction, or author-oriented studies of works by writers such as Percy Bysshe Shelley, Lord Byron, John Keats, Jane Austen, and Mary Shelley. See schedule for current offerings. This course is repeatable with different topics.

ENG 101 (or HON 101) and ENG 206 are prerequisites for this class.

**ENG 344 | VICTORIAN LITERATURE | 4 quarter hours
(Undergraduate)**

Study of literature written in the British Empire between 1830 and 1900. Topics will vary and may include the Victorian Novel, Victorian Women Writers, Literature of the British Empire, or author-oriented studies of works by writers such as the Bronte sisters, Charles Dickens, and Oscar Wilde. See schedule for current offerings. This course is repeatable with different topics.

ENG 101 (or HON 101) and ENG 206 are prerequisites for this class.

**ENG 345 | TOPICS IN 19TH-CENTURY AMERICAN LITERATURE | 4 quarter hours
(Undergraduate)**

Selected authors, genres and topics in nineteenth-century American literature. This course is repeatable with different topics.
(ENG 220 and ENG 221) or (ENG 206 and ENG 101 or HON 101) are prerequisites for this class.

**ENG 346 | 19TH-CENTURY IRISH LITERATURE | 4 quarter hours
(Undergraduate)**

This course focuses on some of the important works of nineteenth-century Irish literature. It sees them as engaging with the often traumatic political and social changes of their time.

**ENG 348 | TOPICS IN 19TH-CENTURY LITERATURE | 4 quarter hours
(Undergraduate)**

Selected authors, genres, and topics in 19th-century literature. This course is repeatable with different topics.
ENG 101 (or HON 101) and ENG 206 are prerequisites for this class.

**ENG 349 | TOPICS IN 19TH-CENTURY BRITISH LITERATURE | 4 quarter hours
(Undergraduate)**

Selected authors, genres and topics in British literature, 1780 - 1900. This course is repeatable with different topics.
(ENG 220 and ENG 221) or (ENG 206 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

**ENG 350 | MODERN BRITISH LITERATURE | 4 quarter hours
(Undergraduate)**

Survey of British literature in the twentieth century.
(ENG 220 and ENG 221) or (ENG 207 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

**ENG 351 | POSTCOLONIAL LITERATURE | 4 quarter hours
(Undergraduate)**

This course explores the cultural legacy of colonialism and imperialism through literature. Variable emphasis on different authors and national traditions. See schedule for current offerings. This course is repeatable with different topics.

**ENG 352 | GLOBAL ENGLISH LITERATURE | 4 quarter hours
(Undergraduate)**

Study of literature written in English from outside Britain, Ireland, and the U.S. Variable emphasis on different authors, national traditions, ethnic backgrounds, or historical periods. (See schedule for current offerings.) This course is repeatable with different topics.

**ENG 353 | TOPICS IN GLOBAL ASIAN LITERATURE | 4 quarter hours
(Undergraduate)**

Selected authors, genres, and topics in Asian-American or Asian diasporic literature. See schedule for current offerings. This course is repeatable with different topics.

**ENG 354 | THE IRISH REVIVAL | 4 quarter hours
(Undergraduate)**

The course invites a study of the cultural ferment of the decades from the 1890's to the 1920's in Ireland. Particular attention will be given to an introduction to the work of canonical writers such as Yeats and Joyce who emerged from it.

**ENG 355 | MODERN IRISH LITERATURE | 4 quarter hours
(Undergraduate)**

This course provides an introduction to Irish literature, including some poems in the Irish language with English translations on facing pages, written from the Literary Revival to the late twentieth century. It emphasizes the transitions from a colonized to a postcolonial society and the slow validation of the voices of Irish women writers.

**ENG 357 | TOPICS IN IRISH STUDIES | 4 quarter hours
(Undergraduate)**

Selected authors, genres, and topics in Irish literature and culture. This course is repeatable with different topics.

ENG 358 | TOPICS IN 20TH-CENTURY LITERATURE | 4 quarter hours (Undergraduate)

Selected authors, genres, and topics in 20th-century literature. This course is repeatable with different topics.

ENG 101 (or HON 101) and ENG 207 are prerequisites for this class.

ENG 359 | TOPICS IN MODERN BRITISH LITERATURE | 4 quarter hours (Undergraduate)

Selected authors, genres, and topics in twentieth-century British literature. This course is repeatable with different topics.

(ENG 220 and ENG 221) or (ENG 207 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

ENG 360 | AMERICAN LITERATURE TO 1830 | 4 quarter hours (Undergraduate)

Survey of American literature from the beginnings to 1830.

ENG220&221 or ENG 101& ENG 206

ENG 361 | 19TH-CENTURY AMERICAN LITERATURE | 4 quarter hours (Undergraduate)

Survey of 19th-century American literature. Authors studied might include Washington Irving, Nathaniel Hawthorne, Herman Melville, Frederick Douglass, Walt Whitman, Emily Dickinson, Mark Twain, Harriet Jacobs, and Kate Chopin.

ENG220&221 or ENG 101& ENG 206

ENG 362 | AMERICAN LITERATURE FROM 1865 TO 1920 | 4 quarter hours (Undergraduate)

Survey of American literature from 1865 to 1920.

ENG220&221 or ENG 101& ENG 206

ENG 363 | AMERICAN LITERATURE AFTER 1900 | 4 quarter hours (Undergraduate)

This survey focuses on twentieth- and twenty-first-century American literary works, authors, and movements. Coverage will explore several genres, and expose students to the diversity of some major American literary movements such as modernism, the Harlem Renaissance, and postmodernism. Authors studied might include William Faulkner, F. Scott Fitzgerald, Willa Cather, Zora Neale Hurston, Ernest Hemingway, Toni Morrison, and Junot Diaz.

(ENG 220 and ENG 221) or (ENG 101/HON 101 and ENG 207) or AMS 200 or AMS 201 are prerequisites for this class.

ENG 364 | TOPICS IN GENRE STUDIES | 4 quarter hours (Undergraduate)

Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

ENG 365 | TOPICS IN 20TH-CENTURY FICTION | 4 quarter hours (Undergraduate)

Selected authors, genres, and topics in 20th-century American literature. This course is repeatable with different topics.

(ENG 220 and ENG 221) or (ENG 207 and ENG 101 or HON 101) are prerequisites for this class.

ENG 366 | STUDIES IN POETRY | 4 quarter hours (Undergraduate)

Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

ENG 220 or (ENG 101 or HON 101) is a prerequisite for this class.

ENG 367 | TOPICS IN AMERICAN STUDIES | 4 quarter hours (Undergraduate)

Selected authors, genres, and topics in American literature and culture. This course is repeatable with different topics.

ENG 368 | STUDIES IN LITERATURE ACROSS CULTURES | 4 quarter hours (Undergraduate)

Selected authors, genres, and topics in literature by writers from various ethnic backgrounds. Works may be by American minority authors or by authors writing in English from outside Britain and the U.S. This course takes a comparative approach to studying concepts of ethnicity and identity in literature drawn from several ethnic traditions. This course is repeatable with different topics.

ENG 369 | TOPICS IN AMERICAN LITERATURE | 4 quarter hours (Undergraduate)

See schedule for current offerings. This course is repeatable with different topics.

(ENG 220 & 221) or (ENG 101 or HON 101 or AMS 200 or AMS 201) is a prerequisite for this class.

ENG 370 | HISTORY OF THE ENGLISH LANGUAGE | 4 quarter hours (Undergraduate)

Examination of the development of vocabulary and structure of English from its beginnings to contemporary British and American English usage.

ENG 371 | TOPICS IN AFRICAN AMERICAN LITERATURE | 4 quarter hours (Undergraduate)

Selected authors, genres, and topics in African American literature. See schedule for current offerings.

ENG 373 | MULTIETHNIC LITERATURE OF THE U.S. | 4 quarter hours (Undergraduate)

Readings in recent literature, primarily fiction, by American writers of various ethnic backgrounds, exploring the evolving concept of ethnicity in literature.

ENG 374 | NATIVE LITERATURE | 4 quarter hours (Undergraduate)

This course provides an introduction to a wide range of Native and First Nations literature. Students will read a selection of work, including some early contact and expansion texts, but will focus on the prose and poetry of mid-to-late 20th century and contemporary writers. Students will examine, compare and contrast the ways in which Native literary writing approaches agendas and ideas such as personal and community identity; racial and cultural stereotypes; social and cultural obligations and duties; self-expression and humor as acts of survival; re-appropriation and redefinition; and encounters with a dominant culture.

ENG 375 | STUDIES IN SHORT FICTION | 4 quarter hours (Undergraduate)

The development of European, English, and American short fiction.

ENG 101 (or HON 101) is a prerequisite for this class.

ENG 376 | CREATIVE WRITING AND SOCIAL ENGAGEMENT | 4 quarter hours (Undergraduate)

Study and practice of creative writing in the contexts of community service. (See schedule for current offerings.) This course is repeatable with different topics.

ENG 377 | TOPICS IN EDITING AND PUBLISHING | 4 quarter hours (Undergraduate)

Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

ENG 378 | LITERATURE AND SOCIAL ENGAGEMENT | 4 quarter hours (Undergraduate)

Study of selected literary works in the contexts of community service. See schedule for current offerings. This course is repeatable with different topics.

**ENG 379 | TOPICS IN LITERATURE | 4 quarter hours
(Undergraduate)**

See schedule for current offerings. This course is repeatable with different topics.

(ENG 220 and ENG 221) or (ENG 101 or HON 101) are prerequisites for this class.

**ENG 380 | MASTERPIECES OF WORLD LITERATURE | 4 quarter hours
(Undergraduate)**

Selected works in translation from Classical Antiquity to the present. Variable emphasis. (See schedule for current offerings.)

(ENG 220 and ENG 221) or (ENG 101 or HON 101) are prerequisites for this class.

**ENG 381 | LITERARY THEORY | 4 quarter hours
(Undergraduate)**

Study of the major approaches to analyzing literature, including formalist, historicist, psychoanalytic, post-structuralist, and feminist readings.

(ENG 220 and ENG 221) or (ENG 101 or HON 101) or instructor permission are prerequisites for this class. ENG220/221 or 101/HON 101 perm

**ENG 382 | MAJOR AUTHORS | 4 quarter hours
(Undergraduate)**

Study of one or two major writers. This course is repeatable with different authors. (See schedule for current offerings.)

**ENG 383 | WOMEN AND LITERATURE | 4 quarter hours
(Undergraduate)**

Study of literature by women, with attention to the traditions of women's literature, historical and theoretical perspectives on women as writers and readers, and issues of feminist literary history and criticism.

**ENG 384 | TOPICS IN LATINX LITERATURE | 4 quarter hours
(Undergraduate)**

Selected authors, genres, and topics in Latinx literature. See schedule for current offerings.

**ENG 385 | TOPICS IN LGBTQ LITERATURE | 4 quarter hours
(Undergraduate)**

Selected authors, genres, and topics in LGBTQ literature. See schedule for current offerings. This course is repeatable with different topics.

**ENG 386 | POPULAR LITERATURE | 4 quarter hours
(Undergraduate)**

Studies in selected forms of popular literature. Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

**ENG 387 | TOPICS IN CONTEMPORARY LITERATURE | 4 quarter hours
(Undergraduate)**

Study of selected late twentieth- and twenty-first century literary works, authors, and movements. Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

(ENG 220 and ENG 221) or (ENG 101 or HON 101) are prerequisites for this class.

**ENG 388 | TOPICS IN TRANSATLANTIC LITERATURE | 4 quarter hours
(Undergraduate)**

Study of transatlantic or circum-atlantic literary production and consumption. Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

(ENG 220 and ENG 221) or (ENG 101 or HON 101) are prerequisites for this class.

**ENG 389 | TOPICS IN COMPARATIVE LITERATURE | 4 quarter hours
(Undergraduate)**

See schedule for current offerings. This course is repeatable with different topics.

**ENG 390 | SENIOR CAPSTONE SEMINAR | 4 quarter hours
(Undergraduate)**

Variable emphasis. See schedule for current offerings. This course is not repeatable.

Senior Status and (ENG 220 and ENG 221) or (ENG 101 or HON 101 and ENG 205 and ENG 206 and ENG 207) are prerequisites for this class.

**ENG 391 | TEACHING ENGLISH | 4 quarter hours
(Undergraduate)**

Strategies for teaching composition, literature, and language skills to secondary-school students.

(ENG 220 and ENG 221) or (ENG 101 or HON 101) are prerequisites for this class.

**ENG 392 | INTERNSHIP | 1-4 quarter hours
(Undergraduate)**

Internship in such fields as writing, editing, and publishing supplemented by readings and assignments.

Junior standing or above and permission of the internship coordinator are a prerequisite for this class.

**ENG 397 | NEWBERRY LIBRARY SEMINAR | 4 quarter hours
(Undergraduate)**

Newberry Library Seminar.

**ENG 398 | LITERARY AND CULTURAL HERITAGE | 1-8 quarter hours
(Undergraduate)**

Study tours - locations, topics, fees, and credit vary.

**ENG 399 | INDEPENDENT STUDY | 1-8 quarter hours
(Undergraduate)**

Written permission of supervising faculty member and of department chair required before registration.

**ENG 400 | STRUCTURE OF MODERN ENGLISH | 4 quarter hours
(Graduate)**

A systematic outline of modern English from both traditional and contemporary linguistic perspectives. Examines descriptive grammars, word and phrase structure, syntax and semantics, and formal issues of style and rhetoric. Formerly ENG 416.

**ENG 401 | HISTORY OF THE ENGLISH LANGUAGE | 4 quarter hours
(Graduate)**

A systematic study of the nature, history and usage of the English language. The course traces the language from its origin to its present status in England and America.

**ENG 402 | HISTORY OF ENGLISH PROSE STYLE | 4 quarter hours
(Graduate)**

A survey of alternative theoretical approaches to the study of style, followed by intensive study of changes in the conventions of English prose from the Renaissance to the present.

**ENG 407 | LANGUAGE AND STYLE FOR WRITERS | 4 quarter hours
(Graduate)**

A comprehensive examination of structural elements and stylistic devices that experienced writers use across a number of creative and professional genres. Topics include components of style, sentence rhythm and prosody, diction choices, rhetorical punctuation, and the development of one's personal writing voice.

ENG 408 | STYLISTICS | 4 quarter hours

(Graduate)

Theory and practice in examining features of prose style, including linguistic, rhetorical and literary perspectives on style.

ENG 411 | CHAUCER | 4 quarter hours

(Graduate)

Chaucer's works in context of his milieu.

ENG 412 | STUDIES IN ARTHURIAN LITERATURE | 4 quarter hours

(Graduate)

Geoffrey of Monmouth, Wace, Layamon and Malory.

ENG 413 | STUDIES IN MEDIEVAL LITERARY FORMS | 4 quarter hours

(Graduate)

Alternating emphasis on poetic, narrative and dramatic genres of the 14th and 15th centuries.

ENG 419 | TOPICS IN MEDIEVAL LITERATURE | 4 quarter hours

(Graduate)

See schedule for current offering.

ENG 421 | STUDIES IN ENGLISH RENAISSANCE PROSE | 4 quarter hours

(Graduate)

Major prose works, including More's Utopia, Sidney's Apology for Poetry, Bacon's Essays, and Milton's Areopagitica.

ENG 422 | STUDIES IN ENGLISH RENAISSANCE POETRY | 4 quarter hours

(Graduate)

Alternating emphasis on the English epic, the 16th-century lyric, and the 17th-century lyric.

ENG 423 | STUDIES IN ENGLISH RENAISSANCE DRAMA | 4 quarter hours

(Graduate)

Tudor-Stuart drama, including works by Kyd, Marlowe, Jonson, Webster and Ford.

ENG 426 | THE ESSAY: HISTORY, THEORY, PRACTICE | 4 quarter hours

(Graduate)

Explores the history of the essay as genre from the Renaissance to the present, compares and contrasts literary essays with those written in most school settings, and offers students the opportunity to write their own extended essays on personal and professional topics. Formerly ENG 488.

ENG 427 | MILTON | 4 quarter hours

(Graduate)

Major poems and selected prose.

ENG 428 | STUDIES IN SHAKESPEARE | 4 quarter hours

(Graduate)

Study of selected plays through various critical and scholarly perspectives.

ENG 429 | TOPICS IN RENAISSANCE LITERATURE | 4 quarter hours

(Graduate)

See schedule for current offering.

ENG 431 | STUDIES IN THE EIGHTEENTH CENTURY NOVEL | 4 quarter hours

(Graduate)

Representative English prose fiction, including Defoe, Richardson, Fielding, Sterne and the Gothic novel.

ENG 432 | STUDIES IN RESTORATION AND EIGHTEENTH-CENTURY DRAMA | 4 quarter hours

(Graduate)

Studies in the comedy of manners, sentimental comedy, heroic drama, and bourgeois tragedy.

ENG 434 | STUDIES IN RESTORATION AND EIGHTEENTH CENTURY AUTHORS | 4 quarter hours

(Graduate)

Alternating emphasis on Dryden, Pope, Swift, Johnson, or other major authors.

ENG 439 | TOPICS IN RESTORATION AND EIGHTEENTH-CENTURY LITERATURE | 4 quarter hours

(Graduate)

See schedule for current offerings.

ENG 441 | STUDIES IN ENGLISH ROMANTIC PROSE | 4 quarter hours

(Graduate)

Major Romantic nonfiction prose writers, including Burke, Coleridge, Hazlitt, DeQuincey and Lamb.

ENG 442 | STUDIES IN ENGLISH ROMANTIC POETRY | 4 quarter hours

(Graduate)

Alternating emphasis on major Romantic poets, including Blake, Wordsworth, Coleridge, Byron, Shelley and Keats.

ENG 443 | STUDIES IN VICTORIAN PROSE | 4 quarter hours

(Graduate)

Major Victorian nonfiction prose writers, including Carlyle, Newman, Ruskin, Mill, Arnold and Pater.

ENG 444 | STUDIES IN VICTORIAN POETRY | 4 quarter hours

(Graduate)

Major Victorian poets, including Tennyson, Browning and Arnold.

ENG 445 | STUDIES IN NINETEENTH-CENTURY BRITISH FICTION | 4 quarter hours

(Graduate)

Alternating emphasis on major novelists including Dickens, Thackeray, the Brontes, Eliot, Trollope and Hardy.

ENG 446 | NINETEENTH-CENTURY IRISH LITERATURE | 4 quarter hours

(Graduate)

This course surveys a broad range of literature from nineteenth-century Ireland. It reads literature within the social and historical context of its day; in terms of the formation of individual, social and national identities; and within today's debate about Ireland's status at the time.

ENG 449 | TOPICS IN NINETEENTH-CENTURY BRITISH LITERATURE | 4 quarter hours

(Graduate)

See schedule for current offering.

ENG 451 | STUDIES IN THE MODERN BRITISH NOVEL | 4 quarter hours

(Graduate)

Alternating areas of emphasis, including Woolf, Joyce, Forster and Conrad.

ENG 452 | STUDIES IN MODERN BRITISH POETRY | 4 quarter hours

(Graduate)

Alternating areas of emphasis, including Yeats, Auden, Lawrence, Dylan Thomas, Eliot and Larkin.

ENG 453 | STUDIES IN MODERN DRAMA | 4 quarter hours

(Graduate)

Study of selected modern plays from 1870 to present. Authors studied might include Henrik Ibsen, Anton Chekhov, George Bernard Shaw, Eugene O'Neill, J. M. Synge, Tennessee Williams, Samuel Beckett, Caryl Churchill, Maria Irene Fornes, and Wole Soyinka.

**ENG 455 | MODERN IRISH LITERATURE | 4 quarter hours
(Graduate)**

This course uses both historical and theoretical approaches to Irish literature written from the Literary Revival to the late twentieth century. It emphasizes the transition from a colonized to a postcolonial society and the slow validation of the voices of Irish women writers.

**ENG 456 | CONTEMPORARY IRISH LITERATURE | 4 quarter hours
(Graduate)**

This course relates contemporary Irish literature to recent Irish history and to social and cultural change. It charts the ways in which patterns of individual, social and national identity have been challenged and renegotiated.

**ENG 459 | TOPICS IN MODERN BRITISH LITERATURE | 4 quarter hours
(Graduate)**

See schedule for current offering.

**ENG 464 | STUDIES IN AMERICAN AUTHORS | 4 quarter hours
(Graduate)**

Alternating emphasis on major writers, including Hawthorne, Melville, Poe, Whitman, Dickinson, Twain, Chopin, Crane, James, Wharton and Cather.

**ENG 465 | STUDIES IN THE MODERN AMERICAN NOVEL | 4 quarter hours
(Graduate)**

Alternating emphasis on major 20th-century writers, including Fitzgerald, Hemingway, Stein, Faulkner, Steinbeck, Porter, Penn Warren, Bellow, O'Connor, Oates and Morrison.

**ENG 466 | STUDIES IN MODERN AMERICAN POETRY | 4 quarter hours
(Graduate)**

Introduction to a wide range of twentieth-century American poetries, with alternating emphasis on modernists such as Frost, Eliot, Pound, Stevens, Williams, Moore, HD., Hughes, and Rukeyser as well as more recent figures and trends..

**ENG 467 | STUDIES IN AMERICAN DRAMA | 4 quarter hours
(Graduate)**

American dramatists and dramatic movements.

**ENG 469 | TOPICS IN AMERICAN LITERATURE | 4 quarter hours
(Graduate)**

See schedule for current offering.

**ENG 471 | BOOK AND MEDIA HISTORY | 4 quarter hours
(Graduate)**

Selected topics in book and media history.

**ENG 472 | LITERARY THEORY | 4 quarter hours
(Graduate)**

Studies in literary theory and cultural criticism.

**ENG 473 | TEACHING CREATIVE WRITING | 4 quarter hours
(Graduate)**

Prepares English teachers to teach creative writing at the secondary and college undergraduate levels. Models the planning and directing of effective workshops in poetry, creative nonfiction, and fiction writing. Formerly ENG 485.

**ENG 474 | TEACHING LITERATURE | 4 quarter hours
(Graduate)**

Prepares English teachers to teach literature at the secondary and college undergraduate levels. The course develops methods of teaching all literary genres, addresses problems in literacy, and focuses on the transactional nature of reading and writing.

**ENG 475 | TOPICS IN LITERATURE | 4 quarter hours
(Graduate)**

See schedule for current offering.

**ENG 476 | TOPICS IN GENRE AND FORM | 4 quarter hours
(Graduate)**

See schedule for current offerings. Formerly ENG 479.

**ENG 477 | TOPICS IN PUBLISHING | 4 quarter hours
(Graduate)**

See schedule for current offerings.

**ENG 478 | TOPICS IN TEACHING | 4 quarter hours
(Graduate)**

See schedule for current offerings.

**ENG 480 | INTRODUCTION TO CREATIVE WRITING | 4 quarter hours
(Graduate)**

An introductory creative writing course open to all DePaul graduate students and non-degree-seeking students with a bachelor's degree in any field.

**ENG 484 | WRITING WORKSHOP TOPICS | 4 quarter hours
(Graduate)**

See schedule for current offerings.

Status as a MAWP, MALP or MFACRWPB student is a prerequisite for this class.

**ENG 487 | TRAVEL WRITING | 4 quarter hours
(Graduate)**

Writing travel essays: history and forms of the literary travel essay; writing about travel for the book and magazine market.

Status as a MAWP, MALP or MFACRWPB student is a prerequisite for this class.

**ENG 488 | WRITING THE PERSONAL ESSAY | 4 quarter hours
(Graduate)**

Focuses on studying and writing creative nonfiction essays, with particular attention paid to voice, style, form and structure, narration and exposition, scene, and narrative distance.

Status as a MAWP, MALP or MFACRWPB student is a prerequisite for this class.

**ENG 489 | SCREENWRITING | 4 quarter hours
(Graduate)**

An introduction to the craft of screenwriting. Covers principles of plot, dramatic conflict, characterization, dialogue, and screenplay form. Students develop short dramatic and documentary screenplays.

Status as a MAWP, MALP or MFACRWPB student is a prerequisite for this class.

**ENG 490 | WRITING FOR MAGAZINES | 4 quarter hours
(Graduate)**

Covers the range of skills necessary for magazine writing. Discussion of the elements of style, humor, research, concept and imagery that characterize the literature of fact. Students investigate, compose and edit finished magazine articles to be submitted for publication.

Status as a MAWP, MALP or MFACRWPB student is a prerequisite for this class.

**ENG 491 | SCIENCE WRITING | 4 quarter hours
(Graduate)**

An introduction to the creative career of science writing. Students research, write, and market articles on such subjects as astronomy, genetics, health, and technology for newspapers, magazines, e-zines, and innovative journals. No prior science background required.

Status as a MAWP, MALP or MFACRWPB student is a prerequisite for this class.

**ENG 492 | WRITING FICTION | 4 quarter hours
(Graduate)**

A course in writing short stories. Emphasis is placed on class discussion of student writing.

Status as a MAWP, MALP or MFACRWPB student is a prerequisite for this class.

**ENG 493 | WRITING POETRY | 4 quarter hours
(Graduate)**

A course in writing and reading poetry. Emphasis is placed on class discussion of student writing.

Status as a MAWP, MALP or MFACRWPB student is a prerequisite for this class.

**ENG 494 | NOVELS I | 4 quarter hours
(Graduate)**

In this course students will generate a rough draft of a novel, considering the particular challenges of the novel form in terms of plot and structure. Students should apply for permission to enroll with an elevator pitch and outline for a project they would like to draft. By the end of the term, writing 20 pages a week, students should have a complete first draft of approximately 200 pages or 60,000 words. Students will share scenes and outlines with an eye toward completion of a draft rather than revision. This course is the first of a two-course sequence. The second course, ENG 495: Novels II, will focus on editing and revising the novel.

Any student who has a completed manuscript of approximately 200 pages can apply to take the second course without taking the first.

**ENG 495 | NOVELS II | 4 quarter hours
(Graduate)**

This course will focus on editing and revising the novel form, using published novels to demonstrate how fictional elements work together to create an organic whole. Students will discover how accomplished writers shape their stories using point of view, form, tone, characterization, plot, narrative time, significant detail, theme, metaphor, and precise language. These craft elements we will use as guidelines, not limitations, in the revising of our own novels. We will discuss student manuscripts in a space that encourages honest criticism, always balanced by respect for the writer. In class and during individual conferences, we will explore strategies for revision of each student's work. Any student who has a completed manuscript of approximately 200 pages can apply to take Novels II without having first taken Novels I.

**ENG 496 | TOPICS IN EDITING | 4 quarter hours
(Graduate)**

An introduction to editing principles and practices in professional and technical fields. See Schedule for current offerings.

**ENG 497 | WRITING THE LITERATURE OF FACT | 4 quarter hours
(Graduate)**

An advanced course in reading and writing true-life stories in the nonfiction tradition exemplified by such writers as Dickens, Agee, McPhee, and Didion.

Status as a MAWP, MALP or MFACRWPB student is a prerequisite for this class.

**ENG 500 | INDEPENDENT STUDY | 4-8 quarter hours
(Graduate)**

Written permission of supervising faculty member and of the program director is necessary before registration. Variable credit.

**ENG 501 | THESIS RESEARCH | 4 quarter hours
(Graduate)**

Written permission of supervising faculty member and of the program director is necessary before registration. Limited to four credits.

**ENG 502 | CANDIDACY CONTINUATION | 0 quarter hours
(Graduate)**

This 0-credit hour course is available to master's degree candidates who are actively working toward the completion of a thesis, project, or portfolio. Enrollment in this course is limited to three quarters and requires thesis/project advisor and graduate director approval and demonstration to them of work each quarter. Enrollment in this course allows access to the library and other campus facilities. This course carries and requires the equivalent of half-time enrollment status. The student may be eligible for loan deferment and student loans. This course is graded as pass/fail. (0 credit hours)

**ENG 503 | CANDIDACY MAINTENANCE | 0 quarter hours
(Graduate)**

This 0-credit hour course is available to graduate students who are not registered for a course in a given quarter but need to maintain active university status. Enrollment in this course is limited to three quarters and requires permission of the graduate director. Enrollment in this course allows access to the library and other campus facilities. This course does not carry an equivalent enrollment status and students in it are not eligible for loan deferment or student loans. This course is not graded. (0 credit hours)

**ENG 509 | INTERNSHIP | 4 quarter hours
(Graduate)**

Internship: Written permission of supervising faculty member and of the program director is necessary before registration. Limited to four credits.

English Language Academy (ELA)

**ELA A030 | ADVANCED WRITING AND WORD PROCESSING | 0 quarter hours
(CNET Systems)**

An advanced-level course in English-as-a-second-language writing. Students learn to write 3-to-5 page compositions including a research paper.

**ELA A031 | ADVANCED READING AND VOCABULARY DEVELOPMENT | 0 quarter hours
(CNET Systems)**

An advanced-level course in English-as-a-second-language reading. Students build on their reading skills by identifying intended audience, source and tone of a reading, acquire more literary terms, read longer newspaper articles, editorials, plays, and novels.

**ELA A032 | ADVANCED GRAMMAR | 0 quarter hours
(CNET Systems)**

An advanced-level course in English-as-a-second-language grammar. Students build on the work from previous levels with the future perfect and future perfect progressive tenses, negative and past forms of modals, passive voice, causative verbs, conditionals, and gerunds and infinitives.

**ELA A033 | ADVANCED SPOKEN ENGLISH AND LISTENING | 0 quarter hours
(CNET Systems)**

An advanced-level course in English-as-a-second-language spoken English. Among other skills, students learn to manage small group discussions, defend positions, speak persuasively, deliver a formal presentation, draw inferences from authentic speech, and takes notes from short lectures.

ELA B040 | UNIVERSITY BRIDGE WRITING: SERVICE, RESEARCH AND WRITING | 0 quarter hours
(CNEC Systems)

A university bridge-level course in English-as-a-second-language writing. Students learn to write first-person narrative and a research essay through participation in community service.

ELA B041 | UNIVERSITY BRIDGE READING AND VOCABULARY DEVELOPMENT | 0 quarter hours
(CNEC Systems)

A university bridge-level course in English-as-a-second-language reading. Students build on their reading skills by comparing points of view, paraphrasing and outlining ideas, acquiring higher-level literary terms, and read more complex articles, novels, plays, or several short stories.

ELA B042 | UNIVERSITY BRIDGE GRAMMAR | 0 quarter hours
(CNEC Systems)

A university bridge-level course in English-as-a-second-language grammar. Students build on the work from previous levels with more complex uses of such structures as auxiliary verbs, noun modifiers, adjective and adverb clauses, and unreal conditionals.

ELA B043 | UNIVERSITY BRIDGE SPOKEN ENGLISH AND LISTENING | 0 quarter hours
(CNEC Systems)

A university bridge-level course in English-as-a-second-language spoken English. Students master previous functions at the highest level, such as persuading, negotiating, and debating; deliver formal presentations; demonstrate skill at note taking and comprehending regional dialects.

ELA CP050 | UNIVERSITY EXPERIENCE RESEARCH AND WRITING | 0 quarter hours
(CNEC Systems)

University Experience Research and Writing provides non-native speaking students authentic experiences preparing and writing papers using American academic standards and styles. This course teaches students to select and effectively evaluate scholarly sources appropriate to their discipline, to organize their research and to present a thesis logically using American academic styles. Ideally, the course is taken in conjunction with CP052 University Experience Reading or other similar academic English reading course.

ELA CP051 | UNIVERSITY EXPERIENCE READING AND SURVEY OF TEXTS | 0 quarter hours
(CNEC Systems)

University Experience Reading & Survey of Texts provides university level reading instruction and prepares non-native speaking students to evaluate and categorize university level texts within their chosen discipline. The course focuses on using reading strategies that maximize reading efficiency and comprehension and is designed specifically for students who are preparing to enroll in university degree programs. The course is an ideal complement to CP050 University Experience Research and Writing.

ELA CP053 | UNIVERSITY EXPERIENCE ACADEMIC AND CLASSROOM CULTURE | 0 quarter hours
(CNEC Systems)

University Experience Academic and Classroom Culture prepares non-native speaking students for success in American university classrooms. The course focuses on becoming an effective oral communicator in university environments. Instruction helps students develop effective strategies for note taking, classroom participation, and successful interaction with other students and instructors in a variety of teaching modes that are common in American universities.

ELA CP054 | UNIVERSITY EXPERIENCE ADVANCED ENGLISH PRACTICE | 0 quarter hours
(CNEC Systems)

University Experience Advanced English Practice offers students a selection of options that allows them to address individual English language development needs from pronunciation to interviewing skills to advanced topics within their proposed discipline of study. The exact structure of this module is determined by individual student needs and each student works with an ELA advisor to select options that will provide maximum individual language growth. The individual student plan requires approval of the ELA director.

ELA EB1 | ENGLISH BASICS I | 0 quarter hours
(CNEC Systems)

This is an integrated, beginning-level ESL course.

ELA EB2 | ENGLISH BASICS II | 0 quarter hours
(CNEC Systems)

This is part two of an integrated, beginning-level ESL course.

ELA F000 | FOUNDATIONS WRITING AND WORD PROCESSING | 0 quarter hours
(CNEC Systems)

A beginning-level course in English-as-a-second-language writing. Students learn basic paragraph structure, topic sentences and how to support them. (Students should have an active vocabulary of 200-400 words in English.)

ELA F001 | FOUNDATIONS READING AND VOCABULARY DEVELOPMENT | 0 quarter hours
(CNEC Systems)

A beginning-level course in English-as-a-second-language reading. Students practice various reading skills, such as locating the main idea; study vocabulary acquisition; and read ESL specific readings and newspaper articles. (Students should have an active vocabulary of 200-400 words in English.)

ELA F002 | FOUNDATIONS GRAMMAR | 0 quarter hours
(CNEC Systems)

A beginning-level course in English-as-a-second-language grammar. Students work on basic grammar, such as simple tenses, modals, and articles, as well as nouns, pronouns, adjectives and adverbs. (Students should have an active vocabulary of 200-400 words in English.)

ELA F003 | FOUNDATIONS SPOKEN ENGLISH AND LISTENING | 0 quarter hours
(CNEC Systems)

A beginning-level course in English-as-a-second-language spoken English. Students learn many basic practical functions, such as asking for and giving opinions and leaving a simple message. (Students should have an active vocabulary of 200-400 words in English.)

ELA FA00 | FOUNDATIONS WRITING I | 0 quarter hours
(CNEC Systems)

A beginning-level course in English-as-a-second-language writing. Students learn basic paragraph structure, topic sentences and how to support them. (Students should have an active vocabulary of 100 or more words in English.)

ELA FA01 | FOUNDATIONS READING I | 0 quarter hours
(CNEC Systems)

A beginning-level course in English-as-a-second-language reading. Students practice various reading skills, such as locating the main idea; study vocabulary acquisition; and read ESL specific readings and newspaper articles. (Students should have an active vocabulary of 100 or more words in English.)

**ELA FA02 | FOUNDATIONS GRAMMAR I | 0 quarter hours
(CNEC Systems)**

A beginning-level course in English-as-a-second-language grammar. Students work on basic grammar, such as simple tenses, modals, and articles, as well as nouns, pronouns, adjectives and adverbs. (Students should have an active vocabulary of 100 or more words in English.)

**ELA FA03 | FOUNDATIONS SPOKEN ENGLISH I | 0 quarter hours
(CNEC Systems)**

A beginning-level course in English-as-a-second-language spoken English. Students learn many basic practical functions, such as asking for and giving opinions and leaving a simple message. (Students should have an active vocabulary of 100 or more words in English.)

**ELA FB00 | FOUNDATIONS WRITING II | 0 quarter hours
(CNEC Systems)**

A beginning-level course in English-as-a-second-language writing. Students learn basic paragraph structure, topic sentences and how to support them. (Students should have an active vocabulary of 200-400 words in English.)

**ELA FB01 | FOUNDATIONS READING II | 0 quarter hours
(CNEC Systems)**

A beginning-level course in English-as-a-second-language reading. Students practice various reading skills, such as locating the main idea; study vocabulary acquisition; and read ESL specific readings and newspaper articles. (Students should have an active vocabulary of 200-400 words in English.)

**ELA FB02 | FOUNDATIONS GRAMMAR II | 0 quarter hours
(CNEC Systems)**

A beginning-level course in English-as-a-second-language grammar. Students work on basic grammar, such as simple tenses, modals, and articles, as well as nouns, pronouns, adjectives and adverbs. (Students should have an active vocabulary of 200-400 words in English.)

**ELA FB03 | FOUNDATIONS SPOKEN ENGLISH II | 0 quarter hours
(CNEC Systems)**

A beginning-level course in English-as-a-second-language spoken English. Students learn many basic practical functions, such as asking for and giving opinions and leaving a simple message. (Students should have an active vocabulary of 200-400 words in English.)

**ELA H020 | HIGH INTERMEDIATE WRITING AND WORD PROCESSING | 0 quarter hours
(CNEC Systems)**

A high intermediate-level course in English-as-a-second-language writing. Students learn to write academic compositions using specific organizational patterns.

**ELA H021 | HIGH INTERMEDIATE READING AND VOCABULARY DEVELOPMENT | 0 quarter hours
(CNEC Systems)**

A high intermediate-level course in English-as-a-second-language reading. Students build on their reading skills by learning the difference between fact and opinion, understanding inferences, acquiring more literary terms, reading newspaper articles, short stories and novels.

**ELA H022 | HIGH INTERMEDIATE GRAMMAR | 0 quarter hours
(CNEC Systems)**

A high intermediate-level course in English-as-a-second-language grammar. Students build on the work from previous levels with perfect progressive tenses, adjective clauses, reflexive pronouns, and more advanced modals, adjectives and adverbs.

**ELA H023 | HIGH INTERMEDIATE SPOKEN ENGLISH AND LISTENING | 0 quarter hours
(CNEC Systems)**

A high intermediate-level course in English-as-a-second-language spoken English. Students practice such functions as supporting opinions, expressing empathy and compromise, reporting and summarizing; make a presentation; and listen effectively to authentic speech.

**ELA I010 | INTERMEDIATE WRITING AND WORD PROCESSING | 0 quarter hours
(CNEC Systems)**

An intermediate-level course in English-as-a-second-language writing. Students begin connecting paragraphs into longer essays.

**ELA I011 | INTERMEDIATE READING AND VOCABULARY DEVELOPMENT | 0 quarter hours
(CNEC Systems)**

An intermediate-level course in English-as-a-second-language reading. Students build on the work in the Foundations level and learn to restate the author's point of view, acquire literary terms, and read stories.

**ELA I012 | INTERMEDIATE GRAMMAR | 0 quarter hours
(CNEC Systems)**

An intermediate-level course in English-as-a-second-language grammar. Students build on the work in Foundations grammar and learn progressive and past tenses, question formation, noun clauses, and comparative and superlative forms of adjectives and adverbs.

**ELA I013 | INTERMEDIATE SPOKEN ENGLISH AND LISTENING | 0 quarter hours
(CNEC Systems)**

An intermediate-level course in English-as-a-second-language spoken English. Students practice such functions as giving advice, apologizing, complaining, asking for explanations and make a simple presentation.

**ELA T200 | GRAMMAR FOR TOEFL WRITING | 0 quarter hours
(CNEC Systems)**

An English-as-a-second-language course that reinforces and reviews the grammar skills necessary to excel on the Writing portion of the TOEFL (Test of English as a Foreign Language) iBT (Internet-Based Test) as well as in future academic pursuits.

**ELA T201 | TOEFL READING AND READING LAB | 0 quarter hours
(CNEC Systems)**

An English-as-a-second-language course that prepares students for the Reading portion of the TOEFL (Test of English as a Foreign Language) iBT (Internet Based Test) as well as for future academic study. Students learn and practice reading strategies and the variety of reading skills tested on the TOEFL iBT. In addition, students expand their academic vocabulary and knowledge of word roots. Moreover, students get valuable exposure to the testing lab environment by doing practice computerized tests in this skill area.

**ELA T202 | TOEFL WRITING AND INTEGRATED SKILLS | 0 quarter hours
(CNEC Systems)**

An English-as-a-second-language course that prepares students for the Writing and Integrated Skills portions of the TOEFL (Test of English as a Foreign Language) iBT (Internet Based Test) as well as for future academic study. Students learn and practice the writing skills necessary to produce the high-quality essays required during the writing portion of the test. They also practice and learn the skills necessary to synthesize and summarize information in a written format, as required in the Integrated Skills portion of the test. Moreover, students get valuable exposure to the testing lab environment by doing occasional practice writing and integrated skills computerized tests in this skill area.

ELA T203 | TOEFL SPEAKING AND INTEGRATED SKILLS | 0 quarter hours (CNEC Systems)

An English-as-a-second-language course that prepares students for the Speaking and Integrated Skills portions of the TOEFL (Test of English as a Foreign Language) iBT (Internet Based Test) as well as for future academic study. Students learn and practice the speaking skills and strategies which must be applied during the Integrated Skills portion of the test. Students also practice useful idioms that can be applied in both the listening and speaking portions of the test. Moreover, students get valuable exposure to the testing lab environment by doing occasional integrated skills computerized tests in this skill area.

ELA T204 | TOEFL PRACTICE TESTS | 0 quarter hours (CNEC Systems)

An English-as-a-second-language lab that allows students to apply the skills they have been learning and check their progress in a timed, self-testing environment.

ELA T205 | TOEFL LISTENING AND LISTENING LAB | 0 quarter hours (CNEC Systems)

An English-as-a-second-language course that prepares students for the listening portion of the TOEFL (Test of English as a Foreign Language) iBT (Internet-Based Test) as well as for future academic study. Students learn and practice the listening skills and strategies which must be applied during the listening portion of the test. Moreover, students get valuable exposure to the testing lab environment through computerized practice tests in this skill area.

ELA 100 | PRONUNCIATION WORKSHOP: A COURSE IN ACCENT REDUCTION | 0 quarter hours (CNEC Systems)

An English-as-a-second-language course designed to help students improve their pronunciation.

ELA 101 | TOEFL (TEST OF ENGLISH AS FOREIGN LANGUAGE) PREPARATION | 0 quarter hours (CNEC Systems)

An English-as-a-second-language course designed to help students prepare for the TOEFL (Test of English as a Foreign Language).

ELA 102 | GMAT/MBA (GRADUATE MANAGEMENT ADMISSION TEST/MASTERS IN BUSINESS ADMINISTRATION) PREPARATION | 0 quarter hours (CNEC Systems)

An English-as-a-second-language course designed to help students prepare for the GMAT (Graduate Management Admissions Test).

ELA 109 | VOCABULARY DEVELOPMENT FOR NON-NATIVE SPEAKERS OF ENGLISH | 0 quarter hours (CNEC Systems)

This class is designed to expand students' vocabulary by reinforcing ability to use vocabulary accurately, by use of new vocabulary-learning skills, and by acquisition of word decoding skills and strategies. Students will be introduced to approximately 25-40 new words per class. (Students in this class should have at least high intermediate proficiency in English.)

ELA 110 | TALKING BUSINESS | 0 quarter hours (CNEC Systems)

Talking Business is an intensive course for non-native English speakers preparing for business school or expanding their careers in the business world. The course will focus on improving students' vocabulary, knowledge of key concepts in business and economics, and listening and speaking skills related to those concepts. Each day, students will have the opportunity to read and listen to authentic materials as well as to engage in lively, informative discussion.

ELA 120 | ELA ORIENTATION AND NEW STUDENT REGISTRATION | 0 quarter hours (CNEC Systems)

New ELA students enroll in ELA 120 to reserve a place in a coming term. Only new students enroll in ELA 120.

ELA 130 | CONTINUING STUDENT REGISTRATION | 0 quarter hours (CNEC Systems)

Students wishing to continue enrollment at ELA select ELA 130. Only continuing students enroll in ELA 130.

ELA 300 | ELA TOPICS | 0 quarter hours (CNEC Systems)

Special courses and workshops offered by the English Language Academy.

ELA 301 | SIT TESOL PROGRAM | 0 quarter hours (CNEC Systems)

A 130-hour TESOL/TEFL certificate course during which students learn how to teach English-as-a-Second-Language, including 36 hours of practice teaching with ESL students. Taught by the School for International Training at DePaul's English Language Academy.

ELA 302 | DECEMBER INTERSESSION TOPICS | 0 quarter hours (CNEC Systems)

December Intersession Topics is an intensive course that seeks to develop the academic English skills of English-language students through exploration of current, controversial or topical matters that change from term to term.

ELA 305 | SUMMER LANGUAGE AND CULTURE | 0 quarter hours (CNEC Systems)

Summer Language and Culture a 4-week non-credit language and culture program that builds students' English language skills through in-class and experiential study of American culture and intercultural communication. The course also includes weekly excursions in the City of Chicago.

Environmental Science (ENV)

ENV 101 | INTRO TO ENVIRONMENTAL SCIENCE WITHOUT LAB | 4 quarter hours (Undergraduate)

ENV 101 provides an overview of how the natural world works, how we interact with it and how we can work to protect, restore and sustain it for the future. Topics include an overview of basic ecological principles, population, biodiversity, energy, natural resources and pollution. The course emphasis is on the science behind current environmental concerns. Social, ethical, economic, and political perspectives are considered in order to provide perspective and a fuller understanding of the issues and their solutions. Students cannot receive credit for both ENV 101 and ENV 102.

ENV 102 | INTRO TO ENVIRONMENTAL SCIENCE WITH LAB | 4 quarter hours**(Undergraduate)**

ENV 102 provides an overview of how the natural world works, how we interact with it and how we can work to protect, restore and sustain it for the future. Topics include an overview of basic ecological principles, population, biodiversity, energy, natural resources and pollution. The course emphasis is on the science behind current environmental concerns. Social, ethical, economic, and political perspectives are considered in order to provide perspective and a fuller understanding of the issues and their solutions. Lab investigations further develop scientific and environmental understandings. Students cannot receive credit for both ENV 101 and ENV 102.

MAT 120 or LSP 121 (or HON 180) or MAT 130 or above is a prerequisite for this class.

ENV 115 | ENVIRONMENTAL GEOLOGY | 4 quarter hours**(Undergraduate)**

An examination of the earth's materials and structures, and the processes responsible for their formation; how geologic processes and hazards influence human activities (and vice versa); and a discussion of geologic resources and the geological aspects of waste disposal and pollution. The course includes a three-hour lab. Students cannot receive credit for both ENV 115 and ENV 116.

MAT 120 or LSP 121 (or HON 180) or MAT 130 or above is a prerequisite for this class.

ENV 116 | GEOLOGY OF THE ENVIRONMENT | 4 quarter hours**(Undergraduate)**

This course examines the Earth's materials and structures, and the processes responsible for their formation, as well as how geologic processes and hazards influence human activities (and vice versa), including issues associated with climate change. Besides learning about the basic geologic facts and issues, this course places an emphasis in the history and thinking behind how each major geologic concept came about through scientific processes-i.e., integration of observations with inferences. Students cannot receive credit for both ENV 115 (Environmental Geology with Laboratory) and ENV 116 (this course).

ENV 117 | EARTH THROUGH TIME WITH LABORATORY | 4 quarter hours**(Undergraduate)**

A general introduction to the 4.6 billion-year geologic history of planet Earth. The course scientifically explores the history of the earth from its formation to present day, the origin and transformation of rocks, internal and external geologic processes and structures, evolution and extinction of organisms, and patterns of Earth's environmental conditions through time. The course includes a three-hour lab.

MAT 120 or LSP 121 (or HON 180) or MAT 130 or above is a prerequisite for this class.

ENV 118 | EARTH THROUGH TIME | 4 quarter hours**(Undergraduate)**

A general introduction to the 4.6 billion-year geologic history of planet Earth. The course scientifically explores the history of the earth from its formation to present day, the origin and transformation of rocks, internal and external geologic processes and structures, evolution and extinction of organisms, and patterns of Earth's environmental conditions through time.

MAT 120 or LSP 121 (or HON 180) or MAT 130 or above is a prerequisite for this course.

ENV 150 | FOUNDATIONS OF ENVIRONMENTAL STUDIES | 4 quarter hours**(Undergraduate)**

The purpose of this course is to introduce students to environmental studies. It presents students with an overview of the intersections between ecology, the social sciences, and the humanities that inform our vision of the rigor and power of interdisciplinary environmental studies. It draws upon the natural sciences, communication, geography, philosophy, religion, history, literature, art and design, and public policy to stress the interrelationships between human society and the natural world. Students will study the effects of the human use of the natural world and the interactions of culture, society, resources, and the environment. We will examine the social, political, and economic institutions that impact the environment. Particular attention will be paid to how the role of power and inequality contribute to environmental problems and how those problems in turn, impact certain groups more than others (e.g. citizens of undeveloped nations, people of color in urban areas).

ENV 151 | INTRODUCTION TO SUSTAINABILITY | 4 quarter hours**(Undergraduate)**

This course provides an interdisciplinary introduction to sustainability and examines the essential interdependence between environmental, human, and economic systems. The class focuses on the theories and practices that respect the Earth's ecological limits so that these systems remain viable now and into the future. Students will explore the interrelated environmental, social, and economic problems that we currently face at the local, national, and global scale and the solutions that individuals, governments, and institutions are implementing in an effort to ensure a sustainable future.

ENV 152 | ECOLOGICAL AND SOCIAL ECONOMICS | 4 quarter hours**(Undergraduate)**

In this course, students examine the role of the environment and natural resources in neoclassical, environmental and ecological economics. First, students study mechanisms for efficiently allocating scarce resources among specific alternative ends and take a brief foray into environmental economics and learn methods of resource/environmental valuation. We also discuss aspects of macroeconomics as it pertains to ecological economics. Students come away able to critically assess the benefits and drawbacks of these three ways that the economy incorporates the environment. It also encourages ethical reasoning as we discuss distribution of environmental benefits over generations and globally.

MAT 120 or LSP 121 (or HON 180) or MAT 130 or above is a prerequisite for this class.

ENV 160 | IDEAS OF NATURE | 4 quarter hours**(Undergraduate)**

This course is an introductory history of the ideas of nature that emerged over the last two and a half centuries in Europe and the United States. We examine how the conceptions, meanings, and values of nature today have been influenced by the Scientific and Industrial Revolutions, Romanticism, and evolutionary theory; notions of the sublime, the frontier, and wilderness; and the practices of conservation, preservation, and restoration. Also discussed are the ideological commitments of current environmentalisms, in particular sustainability.

**ENV 165 | NATIONAL PARKS HISTORY | 4 quarter hours
(Undergraduate)**

This course is designed, in part, as intensive introduction to the history of national parks, both in the United States and abroad, and will cover a broad swath of history, from the historical antecedents that influenced the founding of the America's earliest parks to twenty-first century issues throughout the world. By necessity, this will not be an exhaustive survey of the history of all fifty-nine national parks in the United States, let alone the roughly 7,000 national parks worldwide. Instead, we will use illustrative examples to highlight key moments in national park history, including nineteenth-century intellectual movements that inspired the creation of national parks, the debates over conservation and preservation, legislative acts such as the Antiquities Act and the National Park Service Organic Act, the democratization of tourism in America, the rise of the wilderness and environmental movements, the conservative revolution, the exportation of the national park ideal throughout the burgeoning world, and the future of American national parks. The historical knowledge gained through course readings and lectures will be essential for completion of both writing assignments and the two exams.

**ENV 170 | ENVIRONMENTAL ETHICS | 4 quarter hours
(Undergraduate)**

The environmental issues that confront us are both global and local; they involve political, economic and ethical decision-making by governments, corporations and citizens. Students will explore and evaluate diverse approaches to a range of such issues, as well as the ways different thinkers and different cultures have envisioned the relationship between human beings and the natural world-all with a view to understanding their own relationships to the natural world, their own environmental ethics.

**ENV 180 | ISSUES IN ENVIRONMENTAL DESIGN | 4 quarter hours
(Undergraduate)**

Issues in Environmental Design is an introductory course that will examine concepts, theories and practices across multiple scales of design, including architecture, landscape architecture and urban design. Students will discuss and evaluate the design decisions that compose our built environment with a focus on contemporary ideas of ecological sustainability. Examples of excellence will be explored through the examination of case studies. The underlying theme is the connection between culture and nature, and how we may reduce our negative impact on systems that support all life while building positive systems that support all life.

**ENV 181 | LANDSCAPE ARCHITECTURE | 4 quarter hours
(Undergraduate)**

This course will examine the process by which landscape architects contribute to the built environment. The course will culminate in the presentation of a student design proposal for an existing site in Chicago. In preparation, students will use literature and design examples to examine how political and aesthetic attitudes toward landscape architecture have evolved, from the pastoral focus of the 19th century to today's desire for adaptable and multifunctional spaces. Selection of readings and examples will be catered to key issues arising from the chosen design proposal site for that quarter. Students will become familiar with standard architectural representation methods (such as plan, section and model) and will learn how landscape architects engage with existing social and environmental conditions in the development of their aesthetic designs.

**ENV 200 | CITIES AND THE ENVIRONMENT | 4 quarter hours
(Undergraduate)**

This course focuses on the interactions between urban areas and the environment. It presents a discussion of the physical setting of cities; the water, energy, air and waste disposal needs of urban areas; and the effects of urban development on air, soil, and water quality, and the health of the community of non-human organisms. In particular, it presents this topic in the context of the emerging discipline of urban ecology, and introduces the notion of cities as social ecological systems where both people and nature interact.

**ENV 202 | RESOURCES, POPULATION, AND THE ENVIRONMENT | 4 quarter hours
(Undergraduate)**

A course on the relationship between the exploitation of the biological, mineral and energy resources of the earth to support an increasing population, and the environmental effects of this development. To provide an overview of the current debate on the relationship between the growing human population worldwide, the natural resources required to sustain this population, and the consequences of resource exploitation for managing environmental quality. We will integrate the ecological, economic, and policy factors involved in natural resource management.

**ENV 203 | CHEMISTRY FOR ENVIRONMENTAL STUDIES | 4 quarter hours
(Undergraduate)**

ENV 203 is a course for Environmental Studies majors that develops the fundamental concepts of chemistry with experimental exploration in the context of societal issues. Chemistry topics include atomic structure, chemical bonding, chemical reactions, thermodynamics, and acid-base behavior. These topics are discussed on a "need-to-know" basis, embedded in discussions of air pollution, ozone depletion, global climate change, energy, water pollution, and acid rain.

MAT 120 or LSP 121 (or HON 180) or MAT 130 or above is a prerequisite for this class.

**ENV 204 | ENERGY AND THE ENVIRONMENT | 4 quarter hours
(Undergraduate)**

This course is designed to provide students with the scientific tools necessary to understand and critically evaluate both personal and policy decisions regarding the variety of options (e.g. fossil fuel, solar, wind, etc.) for energy generation and use. The course also focuses on the environmental impacts of all forms of energy, from the extraction of fossil fuels and mineral resources from the earth, to the generation, distribution and consumption of energy, and ultimately emission of fossil fuel combustion products, notably carbon dioxide and other heat trapping gasses, to the atmosphere.

MAT 120 or LSP 121 (or HON 180) or MAT 130 or above is a prerequisite for this class.

**ENV 205 | BIOLOGY FOR ENVIRONMENTAL STUDIES | 4 quarter hours
(Undergraduate)**

This lecture-laboratory course for Environmental Studies majors introduces the fundamental concepts of biology that are critical for the understanding of a wide range of environmental issues, such as genetic engineering, overpopulation, conservation biology, and climate change. Under the framework of evolutionary biology, the content of this course includes basic cell biology, genetics, population biology, phylogeny, ontogeny, and biodiversity.

MAT 120 or LSP 121 (or HON 180) or (MAT 130 or above) is a prerequisite for this class.

**ENV 216 | EARTH SYSTEM SCIENCE | 4 quarter hours
(Undergraduate)**

An examination of the earth's materials and structures, and the processes responsible for their formation; how geologic processes and hazards influence human activities (and vice versa); and a discussion of geologic resources and the geological aspects of waste disposal and pollution. Students cannot receive credit for both ENV 115 and ENV 116.

MAT 120 or LSP 121 (or HON 180) or MAT 130 or above is a prerequisite for this class.

**ENV 217 | HUMAN IMPACTS ON THE ENVIRONMENT | 4 quarter hours
(Undergraduate)**

A science-based course that examines the interface between humans and the living and non-living environment, the consequences of these interactions, and options for mitigating environmental impacts.

**ENV 222 | TOPICS IN ENVIRONMENTAL STUDIES | 4 quarter hours
(Undergraduate)**

Variable topics in environmental studies.

**ENV 230 | GLOBAL CLIMATE CHANGE | 4 quarter hours
(Undergraduate)**

Climate change is a crucial issue facing society and involves intricate interactions between human pollution, processes in the Earth system and societal impacts. The course will cover the basic science of climate change and also consider its ethical dimensions. Solutions to climate change that incorporate sound science and social behavior will be explored through student-driven projects.

MAT 120 or LSP 121 (or HON 180) or MAT 130 or above is a prerequisite for this class.

**ENV 235 | ENVIRONMENTAL EDUCATION: THEORY AND PRACTICE | 4 quarter hours
(Undergraduate)**

This course, led by educators from the Chicago Academy of Sciences and its Peggy Notebaert Nature Museum (PNNM), examines theories and models of environmental education (EE) and the status of environmental literacy in the US. The goal is to equip you, as future environmental professionals, to effectively engage audiences in environmental topics and issues. In this experiential learning course, you will participate in and observe aspects of program implementation, development, and evaluation at PNNM. These experiences serve as an additional "text" for you to reflect on and connect with course content, and ultimately utilize in your future career paths. As a result of this course, you will be able to: 1. Articulate trends in environmental education theory and practice across a range of educational settings 2. Connect course content (readings, lectures, and discussion) to firsthand experiences with PNNM program development, implementation, and evaluation 3. Apply EE best practices in the development of an educational experience for audiences and topics aligned with PNNM.

**ENV 240 | INTRODUCTION TO HORTICULTURE | 4 quarter hours
(Undergraduate)**

This course introduces the principles and core practices involved in the culture of plants. Topics include the uses of plants and horticultural practices throughout history; the botanical and horticultural classification of plants; plant structure and function, growth and regulation; environmental requirements for plant growth; genetic modification of plants; plant reproduction and propagation; and plant pests and diseases. The course also considers environmental issues in horticulture including xeriscaping, biodiversity and the use of native plants, water management and rain gardens and hydroponics and container gardens.

**ENV 245 | URBAN AND COMMUNITY AGRICULTURE | 4 quarter hours
(Undergraduate)**

This course will acquaint students with the challenges, opportunities, practices, and transformative potential of urban agriculture. Taking an interdisciplinary, case-study approach, this course will explore issues such as food security, community gardening, farmers markets, the locavore food movement, entrepreneurial aspects of urban agriculture, methods of urban food production, and food consumption patterns. The course will meet in the classroom and on-site at the DePaul urban farm and greenhouses. In addition, students are expected to spend several hours each week outside of class time engaged in hands-on experience in urban farming at DePaul or at local sites arranged with the instructor.

**ENV 250 | APPLIED ECOLOGY | 4 quarter hours
(Undergraduate)**

This course provides a broad survey of ecological principles and methods of lab and field investigation. Topics include the distribution and abundance of organisms in nature including those factors that influence population size, growth, and regulation; species interactions; community organization and change; and ecosystem level processes that move matter and energy among the living and non-living parts of the environment. The lecture also integrates ecological theory with natural history and environmental issues. Lab goals are to help students 1) acquire experience in ecological methods and sampling techniques, 2) better understand ecological concepts, 3) develop skills in hypothesis testing, experimental design, and the analysis of ecological data and 4) gain an increased awareness of and appreciation for the complexity, diversity, and structure of the natural world.

MAT 120 or LSP 121 (or HON 180) or MAT 130 or above is a prerequisite for this class.

**ENV 260 | ENVIRONMENTAL DATA ANALYSIS | 4 quarter hours
(Undergraduate)**

This course will provide students with skills to implement the most common statistical methods used in the environmental sciences. It emphasizes statistical literacy and develops statistical thinking, examines real data to address authentic questions, and fosters active learning by experiencing statistics; student design studies, collect data, analyze data using graphs and numerical tools, interpret results, communicate statistical inferences with written and oral reports.

MAT 120 or LSP 121 (or HON 180) or MAT 130 or above is a prerequisite for this class.

**ENV 261 | MIXED METHODS IN ENVIRONMENTAL STUDIES | 4 quarter hours
(Undergraduate)**

Environmental studies as a discipline is increasingly interdisciplinary and requires knowledge and skills in not only the natural sciences, social sciences, and humanities, but also quantitative and qualitative analytical methods. In this class, students will learn how to effectively blend different theories and methodologies to examine interactions between humans and the environment. Skills gained will include survey design and implementation, qualitative interviewing and analysis, photo interpretation, case study, ethical considerations in environmentally-focused human subjects research, and more.

ENV 250 is either a prerequisite or co-requisite for this class.

**ENV 294 | SECOND YEAR SEMINAR | 2 quarter hours
(Undergraduate)**

The purpose of this course is to advance ecological literacy. The seminar presents the study of the environment to students in a philosophical, cultural, and historical context, and in addition makes them aware of some foundational ideas of the discipline through a selection of new and classic literature. (2 quarter hours)

ENV 300 | PLANT IDENTIFICATION | 4 quarter hours
(Undergraduate)

An in-depth overview of plant families and species in the Chicagoland area. Lectures will focus on morphology of plants, evolutionary relationships among plant families, and terminology of plant structures. Students will use botanical keys and manuals for the area to identify plants and will learn collection techniques. Plant species will be collected in their natural habitats during field trips.

ENV 250 or BIO 215 is a prerequisite for this class.

ENV 305 | ANIMAL DIVERSITY | 4 quarter hours
(Undergraduate)

This course investigates the diversity of animals, including invertebrates and vertebrates. Discussions include the origin and evolution of animals, species concepts, developmental biology, taxonomic classification, phylogenetic systematics, and conservation biology.

ENV 205 (or BIO 192) is a prerequisite for this class.

ENV 310 | ENVIRONMENTAL SOIL SCIENCE | 4 quarter hours
(Undergraduate)

An examination of the physical, chemical, biological and engineering properties of soils, their genesis and classification, how they function as sites of waste disposal, and their role in global agricultural production.

The course includes a three-hour lab and a mandatory Saturday field trip.
ENV 216 AND (ENV 203 OR (CHE 130 AND CHE 131) are prerequisites for this class.

ENV 315 | PLANT ECOLOGY | 4 quarter hours
(Undergraduate)

This course focuses on how plants are affected by abiotic factors in the environment and interactions with other organisms. Goals are to improve students' abilities to understand research papers, present overviews of current research, design experiments, and analyze data. The course includes weekly labs with greenhouse experiments or field trips followed by data analysis. Topics include germination ecology, pollination biology, competition between plants, and effects of herbivory.

ENV 250 or BIO 215 is a prerequisite for this class.

ENV 316 | CHEMISTRY OF EARTH SYSTEMS | 4 quarter hours
(Undergraduate)

This class focuses on the impact of pollution on the Earth's ability to provide clean air, water and food for human consumption. The industrialization of the economy during the last 150 years has greatly increased the amount of waste that is sent into the four Earth spheres: the atmosphere, hydrosphere, lithosphere and biosphere. These emissions directly harm organisms and also cycle back to pollute essential ecosystem services provided by the Earth. This class will consider the source, transport, transformation and ultimate fate of pollution emitted into the air, water and solid Earth. Examples will include relatively simple cases (agricultural pesticides harming birds) and range to more complex interactions (depletion of stratospheric ozone by CFCs and the increase in harmful ultraviolet radiation). The laboratory component will be project-based and some work can be completed outside of the assigned lab time.

ENV 216 and CHE 132 are a prerequisite for this class.

ENV 320 | CONSERVATION BIOLOGY | 4 quarter hours
(Undergraduate)

Conservation biology is an interdisciplinary field that has developed in response to the challenge of preserving species and ecosystems. With a specific focus on the Chicago area, students in this course will: assess key threats to biodiversity and the challenges associated with conservation of native communities, evaluate how different institutions implement conservation in the region, and engage with the primary literature related to the field of conservation biology.

BIO 215 or ENV 250 is a prerequisite for this class.

ENV 322 | ECOSYSTEM ECOLOGY | 4 quarter hours
(Undergraduate)

This course will introduce students to the conceptual and methodological tools of ecosystem ecology. The course will focus on understanding the fundamental structure and function of ecosystems but will also address very recent debates on the economic value of ecosystem services, the role of biological diversity in maintaining ecosystem processes, and the consequences of stressed and degraded ecosystems for human welfare. Finally, we assess the role of ecosystem ecology in designing sustainable restoration projects. The course includes a weekly lab.

BIO 215 or ENV 250 is a prerequisite for this class.

ENV 331 | URBAN ENVIRONMENTAL MONITORING | 4 quarter hours
(Undergraduate)

As the world's population shifts into cities, there is an increasing interest in measuring the quality of the urban environment. From air quality to soundscapes, urban dwellers want to live in an environment that is healthy and sustainable. However, deteriorated environmental conditions are widespread and often unfairly distributed with regards to race, ethnicity and class. Assuming that knowledge is power, person-centered environmental monitoring can identify hotspots, highlight injustices and lead to improvements. The class will focus on a new generation of wearable/deployable sensors that use cell phones and other technology advances to measure air, sound and visual quality. This project-driven class will have students personally investigating an urban environmental question using wearable sensors or easily deployable environmental monitors.

(MAT 120) or (LSP 121 or ON 180) or (MAT 130 or above) is a prerequisite for this class.

ENV 340 | URBAN ECOLOGY | 4 quarter hours
(Undergraduate)

Urban ecology has been described as an "upstart discipline." This is because it is relative new, and challenges the historical emphasis that scientific ecology has placed on pristine and wilderness locations. Thus, this novel discipline examines the way ecological ideas can increase our understanding of cities in ways that assist us in making cities more sustainable - cleaner, healthier and more biodiverse. We also examine how ecology as a discipline can be broadened by its encounter with disciplines that have historically paid more attention to the city: urban sociology, anthropology, geography, economics, demography, architecture and planning. In particular we develop the notion of the system as a "social ecological system. This course has a required lab; and some Saturday field trips.

BIO 215 or ENV 250 is a prerequisite for this class.

ENV 341 | URBAN FORESTS AS SOCIAL-ECOLOGICAL SYSTEMS | 4 quarter hours (Undergraduate)

Urban forests include all the trees, forests, and greenspaces in cities and towns. Urban forest management, or urban forestry, is the discipline/profession that seeks to plan and manage this green infrastructure in order to provide ecological, economic, and social benefits to all residents. Trees and vegetation have long been protected and planted in cities and towns for a variety of reasons. Recently, urban forestry has expanded to be a lead focus in the broader arena of urban ecology and urban ecosystem management, with a clear goal of creating sustainable ecosystems. This course will look at urban forests through the lens of social-ecological systems (SESSs) of linked human and natural components, with a focus on teaching students the hands-on skills of urban forest management. The course will utilize the talents of a number of guest speakers and field experience facilitators who are professionals in urban forestry to give students a practical, real world introduction to the subject. The DePaul University campus and the City of Chicago and surrounding region will serve as our field laboratory to view an actively managed urban forest. This course meets learning outcomes 1 and 4 for the Environmental Science and Studies majors, outcomes 5 through 8 for the Environmental Science major, outcome 6 in the Environmental Studies major, and outcome 9 for the sustainability concentration.

ENV 250 (or permission of instructor) is a prerequisite for this course.

ENV 344 | ENVIRONMENTAL JUSTICE AND ADVOCACY | 4 quarter hours (Undergraduate)

This course explores the roles of individuals and organizations in advocacy through the lens of environmental justice, particularly as power arrangements facilitate or impede consensus building. The course examines how legislation is written and how this process has impacted communities of color. Special attention is paid to advocacy techniques such as lobbying, movement-building, public education and litigation.

ENV 345 | URBAN AGRICULTURE | 4 quarter hours (Undergraduate)

This course will acquaint students with the challenges, opportunities, practices, and transformative potential of urban agriculture. Taking an interdisciplinary, integrative, case-study approach, this course will explore issues such as food access, food security, food deserts, community gardening, farmers markets, locavore food movement, entrepreneurial aspects of urban agriculture, method of food production, community nutrition, and food consumption patterns. The course will meet both in the classroom and on-site at an urban farm, where students will work in all aspects of the farm as well as learn to organize communities in an effort to help them create food security and access to healthy food systems.

ENV 350 | ENVIRONMENTAL SCIENCE AND STUDIES CAPSTONE | 4 quarter hours (Undergraduate)

This course examines basic core concepts of and current issues in environmental science drawing on perspectives of the liberal studies curriculum, including reflectiveness, value consciousness, critical and creative thinking, and a multicultural perspective.

Status as a senior Environmental Studies or Environmental Science major is a prerequisite for this class.

ENV 355 | INTRODUCTION TO ENVIRONMENTAL HEALTH | 4 quarter hours (Undergraduate)

Study of the environment factors that influence health. Topics include air and water pollution, global population and local community dynamics, toxicology, infectious and chemical agents, radiation, and management.

ENV 359 | ADVANCED ENVIRONMENTAL DATA ANALYSIS WITH R | 4 quarter hours (Undergraduate)

Advanced topics in design and analysis of environmental experiments using the free data science software, R. Students will apply univariate and multivariate statistics to publicly available environmental data, interpret results, make appropriate inferences from data, and communicate findings in written and oral format.

ENV 260 (or equivalent) is a prerequisite for this class.

ENV 360 | RESEARCH METHODS | 4 quarter hours (Undergraduate)

This course is intended for junior year Environmental Science majors who are preparing for their senior thesis research projects. Topics include the nature and philosophy of science, experimental design, scientific ethics, and scientific writing. Students will prepare a thesis research proposal on a topic to be determined in the first week of the course.

Status as an Environmental Science major with junior standing or above is a prerequisite for this class.

ENV 361 | RESEARCH IN ENVIRONMENTAL SCIENCE | 4 quarter hours (Undergraduate)

ENV 361 is for students who are currently working with an ENV faculty mentor on a research project. Restricted to students majoring in Environmental Science or Environmental Studies; permission of instructor required.

ENV 362 | SENIOR THESIS | 2 quarter hours (Undergraduate)

ENV 362 is designed for Environmental Science students working on their senior thesis. (2 quarter hours)

ENV 360 is a prerequisite for this class.

ENV 390 | SPECIAL TOPICS IN ENVIRONMENTAL SCIENCE | 2-4.5 quarter hours (Undergraduate)

Variable topics.

ENV 398 | TRAVEL/STUDY | 4-8 quarter hours (Undergraduate)

Foreign and domestic study tours by special arrangement with sponsoring programs: Variable credit.

ENV 399 | INDEPENDENT STUDY | 1-4 quarter hours (Undergraduate)

Variable credit. Permission of instructor and chair required.

ENV 400 | PLANT IDENTIFICATION | 4 quarter hours (Graduate)

An in-depth overview of plant families and species in the Chicagoland area. Lectures will focus on morphology of plants, evolutionary relationships among plant families, and terminology of plant structures. Students will use botanical keys and manuals for the area to identify plants and will learn collection techniques. Plant species will be collected in their natural habitats during field trips. Recommended prerequisite is ENV 250 or BIO 215 or the equivalent.

ENV 401 | INTRODUCTION TO URBAN BIODIVERSITY MANAGEMENT | 4 quarter hours**(Graduate)**

A fundamental reorientation in biodiversity conservation practice in the past generation concerns the recognition that the contemporary urban environment affords some exceptional opportunities for biodiversity conservation. Though many species avoid human dominated environments, there is now an acknowledgment that many species can tolerate or even thrive in metropolitan areas. Coyotes, and several species of raptors, for example, provide an illustration of this emerging diversity. Furthermore, the open space often set aside in cities afford opportunities for the rehabilitation of habitat in close proximity to people. This course will introduce the perspectives emerging from conservation biology, conservation planning, ecosystem management, restoration ecology, and reconciliation ecology that contribute to the thriving practice of urban biodiversity management.

ENV 402 | URBAN ECOLOGY | 4 quarter hours**(Graduate)**

Urban ecology has been described as an "upstart discipline". This is because it is relatively new, and challenges the historical emphasis that scientific ecology has placed on pristine and wilderness locations. Thus, this novel discipline examines the way ecological ideas can increase our understanding of cities in ways that assist us in making cities more sustainable - cleaner, healthier and more biodiverse. We also examine how ecology as a discipline can be broadened by its encounter with disciplines that have historically paid more attention to the city: urban sociology, anthropology, geography, economics, demography, architecture and planning. In particular, we explore "social ecological system" analysis as a way of framing question concerning people and nature in metropolitan settings.

ENV 403 | ECOLOGICAL DATA ANALYSIS WITH R | 4 quarter hours**(Graduate)**

This course will provide students with the skills to implement the most common statistical methods used in the environmental sciences. It builds upon students' prior knowledge of statistical thinking, and addresses real data to address the sorts of questions students are likely to encounter in their professional lives. The course fosters active learning by experiencing statistics; student design studies, collect data, analyze data using appropriate software, and amplifies students' ability to interpret results, communicate statistical inferences with written and oral reports.

ENV 404 | APPLIED ECOLOGICAL MANAGEMENT PRACTICUM | 4 quarter hours**(Graduate)**

Successful environmental management requires a balanced approach to the theoretical framing of problems and the practical implementation of solutions. Scientists can fail to be informed by phenomena that emerge in the field of practice, and conversely practitioners at times do not draw upon the best available scientific evidence. This course focuses both on the productive tension between theory and practice in environmental management, as well as the integration of ecological and social science in the applied discipline. Collaborating with multiple organizations in the region, the class consists of field visits, professional seminars and guest lectures, case studies, hands-on workshops and practicum research. Central themes include restoration ecology, traditional ecological knowledge, environmental justice, climate science, urban biocultural diversity, and volunteer stewardship.

ENV 405 | INTERNSHIP | 4 quarter hours**(Graduate)**

A course of study is set out in agreement with a supervising professor that outlines an internship experience, including reflective assignments. Permission of instructor and chair required.

ENV 406 | INDEPENDENT PROJECT | 4 quarter hours**(Graduate)**

A course of study is set out in agreement with a supervising professor that will inculcate the student with a very specific set of knowledge, or skill set.

ENV 407 | RESEARCH FOR MASTER THESIS | 4 quarter hours**(Graduate)**

This course prepares students for thesis research. In agreement with research supervisory the topics may include accounts of the nature and philosophy of science, experimental design, scientific ethics, and scientific writing. Students will prepare a thesis research proposal on a topic to be determined in the first week of the course.

ENV 410 | ENVIRONMENTAL SOIL SCIENCE | 4 quarter hours**(Graduate)**

An examination of the physical, chemical, biological and engineering properties of soils, their genesis and classification, how they function as sites of waste disposal, and their role in global agricultural production. The course includes a three-hour lab and a mandatory Saturday field trip. Recommended prerequisites for this class are LSP 120 or LSP 121 or MAT 130 or the equivalent and CHE 103 or CHE 130 or ENV 203.

ENV 415 | PLANT ECOLOGY | 4 quarter hours**(Graduate)**

This course focuses on how plants are affected by abiotic factors in the environment and interactions with other organisms. Goals are to improve students' abilities to understand research papers, present overviews of current research, design experiments, and analyze data. The course includes weekly labs with greenhouse experiments or field trips followed by data analysis. Topics include germination ecology, pollination biology, competition between plants, and effects of herbivory. Recommended prerequisites are ENV 250 or BIO 215 or the equivalent.

ENV 420 | CONSERVATION BIOLOGY | 4 quarter hours**(Graduate)**

Conservation biology is an interdisciplinary field that has developed in response to the challenge of preserving species and ecosystems. With a specific focus on the Chicago area, students in this course will: assess key threats to biodiversity and the challenges associated with conservation of native communities, evaluate how different institutions implement conservation in the region, and engage with the primary literature related to the field of conservation biology. Recommended prerequisite is ENV 250 or BIO 215.

ENV 422 | ECOSYSTEM ECOLOGY | 4 quarter hours**(Graduate)**

This course will introduce students to the conceptual and methodological tools of ecosystem ecology. The course will focus on understanding the fundamental structure and function of ecosystems but will also address very recent debates on the economic value of ecosystem services, the role of biological diversity in maintaining ecosystem processes, and the consequences of stressed and degraded ecosystems for human welfare. Finally, we assess the role of ecosystem ecology in designing sustainable restoration projects. Recommended prerequisite is ENV 250 OR BIO 215.

**ENV 425 | ANIMAL DIVERSITY | 4 quarter hours
(Graduate)**

This course investigates the diversity of animals, including invertebrates and vertebrates. Discussions include the origin and evolution of animals, species concepts, developmental biology, taxonomic classification, phylogenetic systematics, and conservation biology.

ENV 205 (or BIO 192) is a prerequisite for this class.

**ENV 440 | URBAN ECOLOGY | 4 quarter hours
(Graduate)**

In this course we examine the way ecological ideas can increase our understanding of cities in ways that assist us in making cities more habitable - cleaner, healthier and more biodiverse. We will pay considerable attention to the ways in which ecology can be broadened by its encounter with disciplines that have historically paid more attention to the city: urban sociology, anthropology, economics, demography, architecture and planning. This course has a required lab; some Saturday field trips.

**ENV 441 | URBAN FORESTS AS SOCIAL-ECOLOGICAL SYSTEMS | 4 quarter hours
(Graduate)**

Urban forests include all the trees, forests, and greenspaces in cities and towns. Urban forest management, or urban forestry, is the discipline/profession that seeks to plan and manage this green infrastructure in order to provide ecological, economic, and social benefits to all residents. Trees and vegetation have long been protected and planted in cities and towns for a variety of reasons. Recently, urban forestry has expanded to be a lead focus in the broader arena of urban ecology and urban ecosystem management, with a clear goal of creating sustainable ecosystems. This course will look at urban forests through the lens of social-ecological systems (SESSs) of linked human and natural components, with a focus on teaching students the hands-on skills of urban forest management. The course will utilize the talents of a number of guest speakers and field experience facilitators who are professionals in urban forestry to give students a practical, real world introduction to the subject. The DePaul University campus and the City of Chicago and surrounding region will serve as our field laboratory to view an actively managed urban forest. Recommended prerequisite is ENV 250 OR BIO 215.

**ENV 450 | THESIS RESEARCH | 1-8 quarter hours
(Graduate)**

This course is designed for students undertaking research projects in conjunction with their thesis.

**ENV 490 | SPECIAL TOPICS | 2-4 quarter hours
(Graduate)**

Variable topics. Variable credit.

**ENV 499 | INDEPENDENT STUDY | 2-4 quarter hours
(Graduate)**

Permission of instructor and chair required. Variable credit.

**ENV 502 | CANDIDACY CONTINUATION | 0 quarter hours
(Graduate)**

Students who have completed their coursework and are actively working on the requirements for the Master's thesis or final independent project must enroll in candidacy continuation each quarter of the academic year until the Master's requirement has been completed. This course carries the equivalent of half-time enrollment status. Course requires graduate program director approval and proof of work each quarter. Pass/No Pass grading. (0 credit hours)

**ENV 503 | CANDIDACY MAINTENANCE | 0 quarter hours
(Graduate)**

This course is meant for Master's students not actively working on their thesis or final independent project. It is only used to maintain active student status. It will not give the student full- or half-time enrollment status and will not permit deferment of student loans. Course requires graduate program director approval each quarter. (0 credit hours)

**ENV 506 | SUSTAINABILITY SCIENCE: ENVIRONMENTAL LIMITS, HUMAN NEEDS, & SYSTEMS THINKING | 4 quarter hours
(Graduate)**

This course aims to orient students to the problems of the 'Anthropocene': a new geologic epoch characterized by climate change, increasing human population, pollution of air, water and soil, overuse of natural resources, and underserving of human needs. This course will help students think about solutions to these challenges through the discipline of 'sustainability science' and build 'systems thinking' skills.

Graduate standing is a prerequisite for this class.

Experience Design (EXP)

**EXP 170 | MAKE IT AT DEPAUL | 2 quarter hours
(Undergraduate)**

This course combines the technical 'how to' skills of making, with more fundamental ideas underpinning the thought processes behind creative and design thinking that emerge through making. Throughout this course, students will be provided with contexts through which to learn, while being given the latitude to follow their intuition and to find their own problems. Students will tinker with digital fabrication, embedded systems, and hardware design through individual and group projects. No prior experience is required.

**EXP 210 | DESIGN AND FABRICATION FOR PHYSICAL SPACE WORKSHOP | 2-2.25 quarter hours
(Undergraduate)**

This workshop introduces students to design principles for public spaces and physical interaction. Students will explore space through wayfinding, installations, kiosks and other projects to understand the role technology plays in varying environments. A focus on 3D design principles and ergonomics will be a prominent theme throughout the course. Students will experiment with various materials, including cloth, clay, 3D printing and other 3D modeling materials.

**EXP 250 | HARDWARE DESIGN BASICS WORKSHOP | 2-2.25 quarter hours
(Undergraduate)**

This workshop applies problem solving and programming skills toward building physical systems using an array of fundamental skills. The course will cover basic electronics and hardware skills like soldering, circuit building, and basic programming for an electronic prototyping platform to interface with digital and analog inputs (sensors), control motors, and use displays. Throughout the workshop you will work in groups to build basic physical systems (e.g., controlling LEDs) to moderately sophisticated ones (e.g., developing remote controls).

GAM 240 or CSC 241 or IT 130 is a prerequisite for this class

**EXP 340 | DESIGNING FOR AUTONOMY | 4 quarter hours
(Undergraduate)**

Through the emergence of open source software, as well as widely-available and inexpensive hardware, creating autonomous robots has become easier than ever. This hands-on course will cover the evolution of robotics, including the concepts and philosophy behind autonomy that govern seemingly organic behavior. Student groups will use a framework to develop robots with a wide range of behaviors, including following, patrolling, avoiding, and exploring. Accompanying lectures will cover the theory and practical application behind designing for organic behavior.

EXP 250 and EXP 210 are prerequisites for this class.

**EXP 350 | DESIGNING FOR THE INTERNET OF THINGS | 4 quarter hours
(Undergraduate)**

From everyday household items like thermostats and locks to cities developing arrays of climate and traffic sensors, the world is increasingly becoming an interconnected system of aware and responsive devices. This course will cover the development and evolution of our connected world, and the possibilities for designing future products. Students will be introduced to ambient intelligence through exercises, collaborative projects, in-depth discussions, and instructor-led tutorials. The course will cover ambient sensing, communication, embedded systems, and designing experiences for the Internet of Things. Students will be familiar with the considerations involved in designing an interconnected system, and work in groups to prototype an "IoT" product.

UXD 210 and EXP 250 are the prerequisites for this class

**EXP 360 | PHYSICAL & INTERACTIVE EXHIBITS | 4 quarter hours
(Undergraduate)**

With the introduction of new, widely-available interactive technologies, physical computer-based exhibits are adapting to incorporate multi-touch interfaces, motion-sensing spaces, and interconnected systems. In this workshop, students will explore the development of interactive exhibits while utilizing skills in interaction design, physical technology, and desktop fabrication. Accompanying lectures will cover the affordances of physical space in design and the utilization of augmented reality, real-time sensing, eye tracking, and other technologies while rethinking how technology is used in museums and other public spaces.

EXP 250 and EXP 210 and UXD 210 are prerequisites for this class

**EXP 370 | GAMES AND PLAY IN PHYSICAL SPACE | 4 quarter hours
(Undergraduate)**

This course introduces hardware design and programming to designers and artists. Students will cover the knowledge needed to craft interactive experiences using microcontrollers, electronics, and programming. Students will experiment with circuitry, soldering, and designing for an electronic prototyping platform while developing small-sized physical games. No prior programming experience is required.

EXP 250 is a prerequisite for this class.

**EXP 390 | PHYSICAL TECHNOLOGY COLLABORATIVE STUDIO I | 4 quarter hours
(Undergraduate)**

This is the first course in a two-quarter sequence. The second quarter will be EXP 391. You will earn four quarter hours of credit for each quarter for a total of eight quarter hours of credit. You must complete both quarters to receive any credit. Students explore studio-based collaborative creation of physical technology projects and work processes. Students will work together in cross disciplinary teams to research and define design challenges that will be solved through the creation of physical technology projects. Students may work with community partners or other disciplines at DePaul to create applicable solutions with real-world context. Some examples of projects may include wearables, installations, toys, games, etc.

EXP 250 and EXP 210 and UXD 210 are prerequisites for this class

**EXP 391 | PHYSICAL TECHNOLOGY COLLABORATIVE STUDIO II | 4 quarter hours
(Undergraduate)**

This is the continuation of EXP 390. EXP 390 and EXP 391 must be taken as a sequence in two consecutive quarters.

EXP 390 is a prerequisite for this class.

**EXP 440 | DESIGNING PLAYFUL EXPERIENCES | 4 quarter hours
(Graduate)**

This course focuses on the pedagogy of play within the design dissemination and critique of designed experiences. The course will begin with an inquiry into the origins of the term, its role in human development, cultural ritual, and social interaction before moving on to a series of design investigations into the affordances of play as design principles for the creation of engaging experiences. Further, we will use the study of play mechanics as a way to broadly explore the larger concept of "playful systems." How might interesting play mechanics be used to structure interactive experiences in systems that aren't necessarily games? Students will explore systems such as museums, classrooms, and social media to apply these concepts.

HCD 450 OR HCI 440 OR GAM 424 OR DMA 530 is a prerequisite for this class.

**EXP 441 | DESIGNING LEARNING EXPERIENCES | 4 quarter hours
(Graduate)**

This course will focus on re-envisioning the future of learning, as a robust context for the application of experience design principles. Through a study of literature on human development, principles of learning and motivation, design processes, and the unique affordances of learning contexts, students will explore strategies for the design of innovative learning environments. From the design of mobile apps, to tools, to classroom spaces, to social interfaces, students will challenge their own thinking about what it means to learn and the role design can play in transforming the experiences of learners.

HCD 450 OR HCI 440 OR GAM 424 OR DMA 530 is a prerequisite for this class.

EXP 442 | DESIGNING INTERFACES FOR EMERGING TECHNOLOGIES | 4 quarter hours (Graduate)

This course focuses on the concept of "interface" as it relates to the design of human-centered experiences. From an inquiry into the design of digital interfaces for web and mobile platforms, to the exploration of non-digital social interfaces in day-to-day life, students will apply user research and design methods to prototype and test a range of interface solutions. The course is designed as a stepping stone to a student's own investigations and interests, as well as a space for exploration and experimentation with alternative design processes and methodologies. **HCD 450 OR HCI 440 OR GAM 424 OR DMA 530 is a prerequisite for this class.**

EXP 450 | PORTFOLIO WORKSHOP | 4 quarter hours (Graduate)

Students review previous course projects and prior work in order to prepare a final portfolio as well as their own design identity and a resume in preparation for job interviews. Visiting design professionals will present their work to the class and share their experiences in the field. Students will also learn presentational techniques and methods for career development.

HCD 421 is a prerequisite for this class.

EXP 480 | COLLABORATION STUDIO | 4 quarter hours (Graduate)

This is a unique type of studio course, pairing interdisciplinary teams of students with community-based organizations or groups to undertake real-world projects. Working in teams, students engage with a local group to study and identify an area of inquiry, to be formulated by students into one or more design problems to be solved. Applying user research methods, a rigorous design, design and production skills, and effective teamwork, the students propose and prototype solutions in partnership with members of the local community.

HCD 450 OR HCI 440 OR GAM 424 OR DMA 530 is a prerequisite for this class.

EXP 599 | INDEPENDENT STUDY | 4-8 quarter hours (Graduate)

This is an independent study course. This course may be repeated for credit. **PREREQUISITES:** Advisor and/or department consent.

Film & Television Documentary (DOC)

DOC 122 | ART OF DOCUMENTARY | 4 quarter hours (Undergraduate)

This course explores the variety of styles and concerns that shape documentaries. Students will learn the evolution of unique voices and influences in documentary. The course will examine the broad range of documentary practices from the earliest actualities to contemporary documentary media through weekly screenings. **PREREQUISITE(S):** NONE.

DOC 224 | DOCUMENTARY PRODUCTION I | 4 quarter hours (Undergraduate)

This introductory hands-on course introduces and explores a wide variety of documentary styles and techniques. Through screenings of classic and contemporary films, lecture, and discussion, students learn different styles of documentary storytelling and visualization and apply these to four exercises over the quarter. Every student will rotate through crew roles and produce, direct, shoot, and record sound.

FILM 101 or FILM 102 is a prerequisite for this class.

DOC 305 | DOCUMENTARY STORYTELLING | 4 quarter hours (Undergraduate)

The course is designed to further develop the skills needed for creating compelling and dramatic non-fictional storytelling. The class will investigate various approaches to documentary and analyze the basic narrative principles in various media. Regular viewing of documentary films will encourage discussion on topics of finding original stories, development of narratives, developing characters, story structure, the ethics of representation, and the question of "what is truth?" Students will create a proposal for a documentary film.

DOC 312 | EDITING THE DOCUMENTARY | 4 quarter hours (Undergraduate)

Editing the Documentary will expose students to the specialized post production workflow of documentary film. Utilizing a workshop atmosphere in combination with lectures and projects, students will gain an appreciation of the art and craft of documentary film editing. This course will cover an overview of current documentary trends and styles, explore various workflows to find the story in documentary footage, the ethical role of editor in shaping the stories of real people and events, how to apply the visual language of fiction to documentary film, use of archival media in a contemporary way, how to structure the story scene to scene and where to start and end the story.

POST 110 is a prerequisite for this class.

DOC 324 | DOCUMENTARY PRODUCTION II | 4 quarter hours (Undergraduate)

Through this course students experience all stages of making a documentary film, including developing an idea, writing a proposal, pre-production, production and post-production. Students work in teams to produce a short documentary. Students also analyze and discuss contemporary documentary films to inform their choices.

DOC 224 and POST 110 are prerequisites for this class.

DOC 326 | DOCUMENTARY PRODUCING | 4 quarter hours (Undergraduate)

The course will cover the key areas of producing for documentaries, which encompasses pre-production, production, marketing, fundraising, and community outreach and engagement. Students will gain knowledge of the ways in which producers engage with writers, directors, editors, grant making institutions, individual donors, festival marketplaces, exhibitors and broadcasters. This course will be project-based and include developing a fundraising and distribution plan, identifying audiences, grant writing and developing a proposal.

DOC 224 is a prerequisite for this class.

DOC 333 | DOCUMENTARY PRODUCTION SOUND WORKSHOP | 2 quarter hours (Undergraduate)

This course will give the student the confidence and technical skills to operate a documentary sound kit in dynamic shooting situations. This course will focus on applied sound recording techniques specific to the documentary format, including short and feature film projects. The students will record audio in controlled and uncontrolled situations while exercising the skills required in pre-production, production, and post-production of advanced documentary films. Students will evaluate their sound quality and troubleshoot various real life scenarios to connect to practical solutions.

DOC 339 | TOPICS IN DOCUMENTARY PRODUCTION | 2-2.25 quarter hours**(Undergraduate)**

This class will be a hands on workshop exploring a film production process or technique that has had a significant influence on the development of non-fiction storytelling and expression. Students will create short documentaries on topics of their choosing, utilizing and incorporating the method being taught. Specific topics will vary with each quarter. Classes will consist of lectures, screenings, in-class production, discussion and analyses, culminating in creative assignments. Students are encouraged to explore their individual creative voice and to use this knowledge to stimulate original work in their areas of interest.

DOC 224 is a prerequisite for this class.

DOC 352 | DOCUMENTARY CINEMATOGRAPHY | 4 quarter hours**(Undergraduate)**

This course focuses on the language, practice and art of visual storytelling in the documentary form. Students will examine the cinematographer's role in the ideation, shooting and editing of non-fiction film content. Through a series of screenings, lectures, experiential exercises, and class discussions, students will better understand the history and practice of cinematography as it pertains to story, character and structure - all through the prism of documentary. **PREREQUISITE(S):** None.

DOC 372 | DOCUMENTARY LAW AND ETHICS | 2-2.25 quarter hours**(Undergraduate)**

Students will explore the legal and ethical issues that can arise in the course of documentary and non-fiction media production. The course will discuss standards and practices; decision making and creative control; archival footage and its fair use; legal requirements and implications; the question of informed consent; and ethical issues ranging from paying subjects, staging and reenactments, to sale and resale footage. Case studies of selected documentary films will be presented and analyzed by the class. (2 credit quarter hours)

DOC 224 is a prerequisite for this class.

DOC 380 | FILMING WITH CHANGE AGENTS | 4 quarter hours**(Undergraduate)**

This practicum class works with community partners and collaborators to create films with a clear and strong call to action.

DOC 382 | THE PERSONAL DOCUMENTARY | 4 quarter hours**(Undergraduate)**

This class is designed to help students identify their personal voices through a variety of techniques, styles and tools of non-traditional documentary film making. Students explore their relationships to their subject matter and express themselves in creative and authentic ways through video. Although the class is process oriented, students are expected to finish a short personal documentary and to develop a proposal for future work.

DOC 224 is a prerequisite for this class.

DOC 384 | ADVANCED DOCUMENTARY PRODUCTION | 4 quarter hours**(Undergraduate)**

This advanced course in documentary production is designed for students who already have experience with making documentaries. In this course, each student will direct and produce a substantial short subject documentary or develop a long-form non-fiction project with worksample. Topics covered will include choice of subject matter, filmmaker's POV, dramatic structure, proposal writing, and a variety of technical, aesthetic, practical, and ethical concerns related to creating professional documentary projects.

DOC 224 and POST 110 are prerequisites for this class.

DOC 396 | ADVANCED TOPICS IN DOCUMENTARY | 4 quarter hours**(Undergraduate)**

This class will be an in-depth examination of a documentary filmmaker, film movement, production style or technique that has had a significant influence on the development of documentary storytelling and expression. Through lectures, screenings, readings, discussions, and creative assignments, students will analyze the distinctive traits of the selected topics within the broader context of cinema history and culture and apply them to their own projects. Specific topics will be selected by the instructor and will vary with each quarter.

DOC 399 | INDEPENDENT STUDY | 1-8 quarter hours**(Undergraduate)**

Variable credit. **PREREQUISITE(S):** Consent of dean.

DOC 405 | NON-FICTION STORYTELLING | 4 quarter hours**(Graduate)**

The course is designed to further develop the skills needed for creating compelling and dramatic non-fictional storytelling. The class will investigate various approaches to documentary and analyze the basic narrative principles in various media. Regular viewing of documentary films will encourage discussion on topics of finding original stories, research and development of narratives, developing characters, story structure, the ethics of representation, and the question of "what is truth?" Students will create a proposal for a documentary film.

DOC 412 | EDITING THE DOCUMENTARY | 4 quarter hours**(Graduate)**

Editing the Documentary will expose students to the specialized post production workflow of documentary film. Utilizing a workshop atmosphere in combination with lectures and projects, students will gain an appreciation of the art and craft of documentary film editing. This course will cover an overview of current documentary trends and styles, explore various workflows to find the story in documentary footage, the ethical role of editor in shaping the stories of real people and events, how to apply the visual language of fiction to documentary film, use of archival media in a contemporary way, how to structure story scene to scene and where to start and end the story.

POST 400 or POST 401 is a prerequisite for this class.

DOC 414 | INTRO TO DOCUMENTARY PRODUCTION | 4 quarter hours**(Graduate)**

This introductory hands-on course introduces and explores a wide variety of documentary styles and techniques. Through screenings, lecture, and discussion, students learn different styles of documentary storytelling and visualization and apply these to three exercises over the quarter. Every student will rotate through crew roles and produce/direct, shoot, and record sound.

DOC 424 | DOCUMENTARY PRODUCTION II | 4 quarter hours**(Graduate)**

Through this course students experience all stages of making a documentary film, including developing an idea, writing a proposal, pre-production, production and post-production. Students work in teams to produce a short documentary. Students also analyze and discuss contemporary documentary films to inform their choices.

DOC 414 and POST 400 are prerequisites for this class.

**DOC 426 | DOCUMENTARY PRODUCING | 4 quarter hours
(Graduate)**

The course will cover the key areas of producing for documentaries, which encompasses pre-production, production, marketing, fundraising, and community outreach and engagement. Students will demonstrate a knowledge of the ways in which producers engage with directors, editors, grant making institutions, individual donors, festival marketplaces, exhibitors and broadcasters. This course will be project-based and students will develop a proposal for a documentary, identify target audiences, identify relevant funding organizations and foundations, write grants, and develop a fundraising and distribution plan.

DOC 414 is a prerequisite for this class.

**DOC 433 | DOCUMENTARY SOUND WORKSHOP | 2 quarter hours
(Graduate)**

This course will give the student the confidence and technical skills to operate a documentary sound kit in dynamic shooting situations. This course will focus on applied sound recording techniques specific to the documentary format, including short and feature film projects. The students will record audio in controlled and uncontrolled situations while exercising the skills required in pre-production, production, and post-production of advanced documentary films. Students will evaluate their sound quality and troubleshoot various real life scenarios to connect to practical solutions.

**DOC 439 | TOPICS IN DOCUMENTARY PRODUCTION WORKSHOP | 2-2.25 quarter hours
(Graduate)**

This class will be a hands on workshop exploring a film production process or technique that has had a significant influence on the development of non-fiction storytelling and expression. Students will create short documentaries on topics of their choosing, utilizing and incorporating the method being taught. Specific topics will vary with each quarter. Classes will consist of lectures, screenings, in-class production, discussion and analyses, culminating in creative assignments. Students are encouraged to explore their individual creative voice and to use this knowledge to stimulate original work in their areas of interest.

DOC 414 or DOC 424 is a prerequisite for this course.

**DOC 452 | DOCUMENTARY CINEMATOGRAPHY | 4 quarter hours
(Graduate)**

This course focuses on the language, practice and art of visual storytelling in the documentary form. Students will examine the cinematographer's role in the ideation, shooting and editing of non-fiction film content. Through a series of screenings, lectures, experiential exercises and class discussions, students will better understand the history and practice of cinematography as it pertains to story, character and structure - all through the prism of documentary. **PREREQUISITE(S):** None.

**DOC 460 | INTERACTIVE DOCUMENTARY | 4 quarter hours
(Graduate)**

This course will introduce the evolving media form of interactive non-fiction storytelling. Students will examine the historical context of the genre, analyze the advantages and effectiveness of one media form over another, and explore current production styles and techniques of transmedia and interactive narratives. Students will create individual and group projects revolving around a contemporary theme utilizing different forms of media including film, audio, photography, animation, illustration, writing, and game design.

**DOC 472 | DOCUMENTARY LAW AND ETHICS | 2-2.25 quarter hours
(Graduate)**

Students will explore the legal and ethical issues that can arise in the course of documentary and non-fiction media production. The course will discuss standards and practices; decision making and creative control; archival footage and its fair use, legal requirements and implications; the question of informed consent; and ethical issues ranging from paying subjects, staging and reenactments, to sale and resale footage. Case studies of selected documentary films will be presented and analyzed by the class. (2 quarter hours)

DOC 414 is a prerequisite for this class.

**DOC 480 | FILMING WITH CHANGE AGENTS | 4 quarter hours
(Graduate)**

This practicum class works with community partners, non-profit organizations, and other collaborators to create films with a clear and strong call to action.

**DOC 482 | THE PERSONAL DOCUMENTARY | 4 quarter hours
(Graduate)**

This class is designed to help students identify their personal voices through a variety of techniques, styles and tools of non-traditional documentary filmmaking. Students explore their relationships to their subject matter and express themselves in creative and authentic ways through video. Although the class is process oriented, students are expected to finish a short personal documentary and to develop a proposal for future work.

DOC 414 is a prerequisite for this class.

**DOC 484 | ADVANCED DOCUMENTARY PRODUCTION | 4 quarter hours
(Graduate)**

This advanced course in documentary production is designed for students who already have experience with making documentaries. In this course, each student will direct and produce a substantial short subject documentary or develop a long-form non-fiction project with worksample. Topics covered will include choice of subject matter, filmmaker's POV, dramatic structure, proposal writing, and a variety of technical, aesthetic, practical, and ethical concerns related to creating professional documentary projects.

DOC 414 and POST 400 are prerequisites for this class.

**DOC 496 | ADVANCED TOPICS IN DOCUMENTARY | 4 quarter hours
(Graduate)**

This class will be an in-depth examination of a filmmaker, film genre, film movement, or film production technique that has had a significant influence on the development of non-fiction storytelling and expression. Through lectures, screenings, readings, discussions, critical writing assignments, and/or creative projects, students will analyze the distinctive traits of the selected topic within the broader context of documentary history and culture. Specific topics will be selected by the instructor and will vary with each quarter. Classes will consist of lectures, screenings, in-class discussions, analyses, as well as creative assignments. Students are encouraged to explore their individual creative "voice" and to use this knowledge to stimulate original work in their areas of interest.

**DOC 599 | INDEPENDENT STUDY | 1-8 quarter hours
(Graduate)**

Independent study form required. **PREREQUISITE(S):** Consent of instructor. (variable credit)

**DOC 701 | THESIS CONTINUATION | 0 quarter hours
(Graduate)**

Non-credit. Students admitted to MFA program who have completed all the required coursework and who are regularly using the facilities of the University for thesis production and/or post-production are required to be registered each quarter of the academic year until the thesis and defense have been completed.

FILM 510 or ANI 640 is a prerequisite for this class.

Film & Television Production (FILM)

**FILM 100 | INTRODUCTION TO CINEMA: THE ART OF MAKING MOVIES | 4 quarter hours
(Undergraduate)**

This lecture-based course will introduce students to the art of cinema from the point of view of the filmmaker. Through screenings of contemporary and classic films, students will gain an appreciation of the various crafts involved in the making of movies, such as: acting, directing, producing, screenwriting, cinematography, production design, editing, sound, or visual effects.

**FILM 101 | FOUNDATIONS OF CINEMA FOR MAJORS | 4 quarter hours
(Undergraduate)**

This course deals with visualization and cinema literacy skills. Drawing heavily on a wide array of historical examples, the course will examine the many expressive strategies potentially usable in the creation of moving image art forms: image construction and manipulation, editing, composition, sound, narrative, and performance. An emphasis will be placed on story and storytelling. In addition to analyzing the works of others, students will also produce their own projects - putting theory into practice. Prerequisite(s): None.

**FILM 102 | FOUNDATIONS OF CINEMA FOR NON-MAJORS | 4 quarter hours
(Undergraduate)**

This course will examine the craft, technology, and aesthetic principles of media production. Drawing heavily on a wide array of historical examples, the course will examine the many expressive strategies potentially usable in the creation of moving image art forms: the importance of story and controlling ideas, storytelling with images, the basics of composition and editing, and an examination of narrative, documentary, and experimental approaches. In addition to analyzing the works of others, students will also produce their own projects thus, putting theory into practice.

**FILM 104 | VIDEO FOR SOCIAL MEDIA | 4 quarter hours
(Undergraduate)**

An introduction to video production for social media. Students learn how to produce videos with consumer-grade equipment (including cell phones). The course covers the basic principles of shooting, editing and uploading to social media sites. The course offers students an opportunity to create media specifically targeted for social websites such as: Facebook, MySpace, Twitter, etc. Students will learn the production process from idea execution to distribution. PREREQUISITE(S): None.

**FILM 105 | FOUNDATIONS OF TELEVISION | 4 quarter hours
(Undergraduate)**

This course provides an introduction and framework of the history of television production. Evolving story forms will be examined from television's beginnings to the present. Developments in story and production styles will be analyzed and discussed. Professionals from different sectors of the Chicago television industry will speak to the class in panels.

**FILM 110 | DIGITAL CINEMA PRODUCTION I | 4 quarter hours
(Undergraduate)**

This course is a beginning workshop in narrative film production. The course provides an introduction to the fundamentals of cinema, including camera and lens technology, composition, lighting, directing and sound recording. Utilizing digital technology, students will produce several films with an emphasis on visual storytelling and personal expression.

**FILM 111 | CINEMA PRODUCTION FOR NON-MAJORS | 4 quarter hours
(Undergraduate)**

The course provides an introduction to the fundamentals of cinema production, including cinematography, directing and sound. Students will produce at least one fiction project with an emphasis on visual storytelling. PREREQUISITE(S): None.

**FILM 115 | TELEVISION PRODUCTION I | 4 quarter hours
(Undergraduate)**

An introduction to the basic principles, procedures, and techniques of television production. Students are organized in teams and create various TV broadcasts. Students learn how to operate TV switchers, TV cameras, sound, and graphic equipment. The course covers the fundamentals of producing, scripting, directing, and editing for television.

FILM 110 is a prerequisite for this class.

**FILM 116 | INTRODUCTION TO TV PRODUCTION FOR NON-MAJORS | 4 quarter hours
(Undergraduate)**

An introduction to the basic principles, procedures, and techniques of television production. This course will explore how to create a single-cam and a multi-cam television program. It will also introduce live and pre-recorded processes, practicing the essential activities that crews need to perform in these different formats.

FILM 110 or FILM 111 is a prerequisite for this class

**FILM 130 | FUNDAMENTALS OF SHORT FILM | 4 quarter hours
(Undergraduate)**

Students will study approximately 100 well-crafted and landmark short films from throughout film history. Through screenings, analysis, analysis and discussion, students will explore these short films' story structure, cinematic design and historical importance. Additionally, students will examine how the short film format can be used as an illustration of a filmmaker's skills in order to navigate the film industry. Short films will include: narrative, experimental, documentary, and animation from different parts of the world. PREREQUISITE(S): None.

**FILM 131 | HISTORY OF CINEMA PRODUCTION | 4 quarter hours
(Undergraduate)**

This course studies the origins and rise of cinema production from the perspective of a filmmaker. The course examines critical historical events that impacted the industry and the craft of filmmaking; the emergence of the studio system, the coming of sound, audience shifts, emergence of other media and the rise of digital technology. PREREQUISITE(S): NONE.

**FILM 145 | DIGITAL MEDIA LITERACIES | 4 quarter hours
(Undergraduate)**

This course is designed to help students develop an informed, critical and practical understanding of new communication media, including ways to read, write and produce in a digital environment. We will explore implications of these technologies and their uses in schools, communities, and workplaces. The course also focuses on practices involving current and future technologies that hold promise for the creation and distribution of all media.

FILM 165 | DIGITAL STILL PHOTOGRAPHY FOR NON-MAJORS | 4 quarter hours (Undergraduate)

This course is an introduction to the history and aesthetics of still photography and to the concept of photography as a descriptive and interpretive artistic medium. Students studying photographs in this context will discover relationships between individual photographers' choices and their own understanding of meaning. Discussions of the photos' cultural contexts and meanings will deepen their understanding of the role of still photography as a conduit for cultural values. Students will learn the fundamental concepts necessary to shoot, edit, manipulate, and print digital still photographs. Also, students will acquire the knowledge needed to analyze and critique existing work. Students will be required to use their own digital still cameras for this course.

FILM 170 | THE ART OF PRODUCTION DESIGN | 4 quarter hours (Undergraduate)

This course explores production design and art direction as a narrative art form in cinema and examines the collaborative relationship between director, production designer and cinematographer. Using films, observational readings, screenplays, lectures, research, and discussion, students will study the fundamentals of a production designer's approach towards visualizing and conceptualizing story. Students will also gain a historical perspective of how the role of production design has evolved and how advances in technology have influenced the various crafts.

FILM 184 | STAND-UP COMEDY | 4 quarter hours (Undergraduate)

Students will analyze and practice stand-up comedy as an art form, both onstage and as a foundation for film and television work. Students will learn about the history of stand-up comedy, particularly about the comedians who parlayed success on the stage into success in television and films. The process of how comedians create material and hone it on stage will be analyzed. Additionally, students will mine their own lives for material, creating original stand-up comedy routines and workshoping them in class. Finally, these routines will be performed in public, at venues such as the Main Stage at the world-renowned Zanies Comedy Club.

FILM 210 | CINEMA PRODUCTION II | 4 quarter hours (Undergraduate)

This course expands on topics covered in FILM 110 Digital Cinema Production I. Students will refine their skills in the areas of line-producing, pre-production, cinematography, lighting, sound recording, post production work flow.

FILM 250 and POST 124 are prerequisites for this class.

FILM 215 | TELEVISION PRODUCTION II: LIVE MULTICAM STUDIO PRODUCTION | 4 quarter hours (Undergraduate)

Students in this course will review the basic principles, procedures, and techniques of Live Multicam Studio Production. Gathered in production teams students will practice the different jobs in the television control room and studio. They will learn the use of switchers, TV cameras, audio boards, and graphic equipment, as well as the creation of a rundown timing sheet and their use in a live television broadcast. In addition, the course will cover fundamentals of pre-production, production, scripting, directing, floor managing and packaging content for a Multicam Live Talk and Variety TV Shows.

FILM 216 | PRODUCTION III: SCRIPTED MULTICAM STUDIO PRODUCTION | 4 quarter hours (Undergraduate)

Students in this course will review the principles, procedures, and techniques of television production of a Scripted Multicam Studio Production. Gathered in production teams students will practice the different jobs in the television control room and studio while producing multiple episodes of a scripted show. They will practice writing, producing, and directing scripted multi-camera episodic series, as well as creating shot sheets and blocking actors and cameras for live-to-tape shootings of their episodes. Finally, they will practice the procedures to edit and finish their programs.

FILM 228 | ETHICS IN COMPUTER GAMES AND CINEMA | 4 quarter hours (Undergraduate)

Societies function based on normative ethics utilizing common sense to distinguish between ethical and unethical behavior. Most of us are not aware of the underlying theories when arriving at ethical judgments about right and wrong. However, the fast pace of progress in information technologies and digital entertainment creates an environment, in which ethical challenges are particularly complex. In the eyes of many, games and movies are violent, offensive and immoral. This course will concentrate on analyzing the impact of digital entertainment on an individual and society. Implications of certain values embedded in games and movies will be discussed. Elements of the ethical code of conduct for a game or movie creator will be formulated. The issue of balancing individual creativity vs. cultural impact particularly on children will be discussed.

FILM 232 | CREATIVE METHODOLOGIES FOR FILM AND TELEVISION | 4 quarter hours (Undergraduate)

This class focuses on creative methods and processes useful for a variety of roles in film and television, including: ideation, divergent thinking, the role of environment/community, and how to avoid creative blocks. The class encourages students to embrace self-directed learning, explore who they are as creative individuals, and unlock the themes and forms at the core of their artistic visions.

FILM 233 | CINEMA & ART | 4 quarter hours (Undergraduate)

This course will provide an overview of avant-garde film, video, animation and installation, and the relationship of these cinematic forms to Modern and Contemporary art. Students will be introduced to the major styles and themes of alternative and experimental moving image work from the past hundred years. Cinema & Art places emphasis on moving image work that is not usually included in a survey of mainstream cinema or film history. A major concern for the class is first-hand exposure to these original sources, and an examination of the relationship of these works to mainstream cinema and other types of popular culture. Topics covered in the class include the avant-garde and kitsch, Surrealism, experimental film, abstract animation, video art, camp, and video installation. In addition to lectures by visiting artists and viewing films, videos, and installation work, students will produce a short creative work in the style of their choice that responds to the work studied during the quarter.

FILM 235 | FILM AESTHETICS: TIME, SPACE, AND MEMORY | 4 quarter hours
(Undergraduate)

This course introduces students to practical applications of aesthetics in the production and appreciation of cinema. Analyzing a diverse selection of films throughout the course, students will identify and define the aesthetic systems of time, space, and memory in the process of filmmaking. In doing so, students will enhance identification of the application of aesthetics in their own personal work. The culmination of the course will find students producing a media project encompassing the conceptual framework of the course.

FILM 236 | FILM PHILOSOPHY FOR MAJORS | 4 quarter hours
(Undergraduate)

Using film as a lens through which philosophical ideas are examined, students will analyze narrative or documentary films (classic or contemporary) on enduring philosophical questions such as: what is truth; what is right; or what is the meaning of life. Particular attention will be paid to the possible influence of philosophy on aesthetic and storytelling choices made by filmmakers. PREREQUISITE(S): None.

FILM 237 | FILM PHILOSOPHY | 4 quarter hours
(Undergraduate)

An introduction to philosophy, using film as a lens through which philosophical ideas are examined. In discussion and writing, students analyze narrative or documentary films (classic or contemporary) on enduring philosophical questions such as: what is truth; what is right; or what is the meaning of life.

FILM 245 | MEDIA LITERACIES | 4 quarter hours
(Undergraduate)

This course is designed to help students develop an informed, critical and practical understanding of new communication media, including ways to read, write and produce in a digital environment. We will explore implications of these technologies and their uses in schools, communities, and workplaces. The course also focuses on practices involving current and future technologies that hold promise for the creation and distribution of all media. Prerequisites: None.

FILM 250 | CINEMATOGRAPHY I | 4 quarter hours
(Undergraduate)

This course is an overview of the technologies and aesthetic principles of cinematography. The concepts covered will include digital formats, measurement and control of exposure, basic lens properties, camera support and movement, rules of composition and the placement and control of light. Class sessions will consist of lectures, demonstrations, hands-on exercises and screenings of selected film clips which demonstrate specific cinematography techniques.

FILM 110 is a prerequisite for this class.

FILM 251 | CINEMATOGRAPHERS AT WORK | 4 quarter hours
(Undergraduate)

This course explores the aesthetic and technological developments of cinematography from early cinema to the digital age by examining the works of notable cinematographers. Students will examine the changing styles of cinematography as an art form.

FILM 250 is a prerequisite for this class.

FILM 254 | IMAGE, OPTICS AND CINEMATIC MOTION (FORMERLY DC 274) | 4 quarter hours
(Undergraduate)

Cinematography is the scientifically grounded discipline of making lighting and camera choices in order to record moving images. This course deals with the basic mathematics, physics, and photochemistry that underlie cinematography and that motivate camera design and construction. A student who masters the foundations of cinematography through a mixture of lectures, readings, exercises, and labs will be able to evaluate and understand how motion based recording choices affect perception of moving images they see every day.

FILM 265 | DIGITAL STILL PHOTOGRAPHY | 4 quarter hours
(Undergraduate)

This course is an introduction to the history and aesthetics of still photography and to the concept of photography as a descriptive and interpretive artistic medium. Students will learn the fundamental concepts necessary to shoot, edit, manipulate, and print digital still photographs. Students will learn to scan, capture, correct and enhance digital images and prepare files for output on black and white and color printing devices. Introduces students to theories, terminology, and applications of digital imaging technologies. Students will acquire the knowledge needed to analyze and critique existing work. In addition, students will involve themselves in hands-on exercises with digital still photography, manipulation and printing. Demonstrations will facilitate learning software techniques and systems of working. Use of Adobe Photoshop will be extensively covered in this course.

FILM 270 | PRODUCTION DESIGN | 4 quarter hours
(Undergraduate)

In this course students will analyze the collaborative relationship between production designer, director and cinematographer as it relates to the role of production design. By the end of the term students will be able to demonstrate a comprehensive understanding of a production designer's role, critique the synthesis of stagecraft, set decoration, prop, costume, and make-up choices as narrative tools, and evaluate existing works as well as their own work.

FILM 170 or GD 105 is a prerequisite for this class.

FILM 279 | VISUAL DESIGN | 4 quarter hours
(Undergraduate)

Definition, analysis, and structure of visual components that cinema employs to support and emphasize the story. Theory of visual design will be applied through student still photos, as well as an original, visually-oriented, narrative or documentary short film, animation or game design.

FILM 110 is a prerequisite for this class.

FILM 280 | INTRODUCTION TO DIRECTING | 4 quarter hours
(Undergraduate)

This course is an introduction to directing for the screen. Topics include casting, script analysis, working with actors, and pre-visualization. Each student will direct and produce a short scene study. This course is NOT intended for students majoring in the BFA Film and Television Directing Concentration.

**FILM 281 | THE ART OF SCREEN ACTING | 4 quarter hours
(Undergraduate)**

This course will examine the role of acting, actors, and actor-director collaboration in the development of narrative cinema. The screen demanded a new approach to acting which differed markedly from the theatrical traditions which preceded it. Seminal practitioners of actor training such as Constantin Stanislavski and his American interpreters Lee Strasberg, Sanford Meisner, and Stella Adler and their students (such as Brando, Pacino, DeNiro, Hoffman, and Duvall) have had an incalculable influence on how screen actors prepare for a role and work with directors. This course will survey the major acting techniques and approaches, examine major films as case studies, and explore contemporary approaches to screen acting and actor-director collaboration in the cinema.

**FILM 282 | ACTING FOR FILMMAKERS | 4 quarter hours
(Undergraduate)**

This course is designed to provide students who plan to work with actors in any aspect of film or television with a foundation in the actor's craft. This will be a hands-on, practical class in which all students will be required to participate fully in the exercises and scene work. Topics to be covered include: relaxation, concentration, trust, listening, sensory work, physical actions, improvisation, imagination, needs, circumstances, objectives, obstacles, scene analysis and scene work. The course will culminate in a staged scene to be presented in class.

**FILM 283 | DIRECTING I: SCRIPT ANALYSIS FOR DIRECTORS | 4 quarter hours
(Undergraduate)**

Script analysis informs a director's creative decision making. Through a series of practical exercises, students will learn the process of analyzing a script based on the film's narrative elements. In doing so they will uncover their unique vision for the story that will aid in collaboration with actors and crew.

**FILM 284 | DIRECTING II: CASTING AND REHEARSING | 4 quarter hours
(Undergraduate)**

Each film project requires a customized approach to casting and rehearsing. Students will learn to create individualized plans for any size cast (individuals, pairs, ensembles) and strategies that will take them from casting room to table read to set.

**FILM 285 | DIRECTING III: SCENE STUDY | 4 quarter hours
(Undergraduate)**

In this course students implement knowledge learned in casting and rehearsing to direct actors in micro-scenes increasing in complexity. Students will explore how staging changes from two- to three-person scenes and be introduced to ensemble work. The class culminates in exploring the relationship between camera and performance that will be deepened in subsequent courses.

FILM 284 is a prerequisite for this class.

**FILM 290 | TOPICS IN DIGITAL CINEMA | 4 quarter hours
(Undergraduate)**

Advanced study in cinema focusing on a specific genre each quarter such as: Science Fiction, Film Noir, Comedy, Action-Adventure, Nonfiction, etc. Please check the CDM website for description of specific quarter offering.

**FILM 298 | INTERNSHIP IN MEDIA PRODUCTION/POST-PRODUCTION | 4 quarter hours
(Undergraduate)**

This course offers students the opportunity to reflect on an internship while gaining professional experience, industry contact, and referrals while still in school. The class fulfills the Junior Year Experiential Learning credit and must be taken concurrently with an approved internship. Opportunities in post-production, motion picture production, advertising, television, animation, game design, graphic design, motion graphics and interactive media can qualify for the course. Classroom time is required. Admission to the program requires consent of internship course instructor after the verification of the student's internship. Prerequisites: Internship.

**FILM 299 | INTERNSHIPS IN MEDIA AND DESIGN (NON-EL) | 1-4 quarter hours
(Undergraduate)**

This course is an internship/independent study course for students who have already fulfilled their EL credit. This course offers students the opportunity to reflect on an internship while gaining professional experience, industry contact and referrals while still in school. Opportunities in post-production, motion picture production, advertising, television, animation, game design, graphic design, motion graphics and interactive media can all qualify for this course. Students will work independently on class assignments. Assignments will be determined by the instructor and based on the number of credits in which the student is enrolled. Admission to the program requires consent of the internship course instructor after verification of the student's internship. PREREQUISITE(S): Internship (variable credit)

**FILM 317 | ACTORS WORKING ON TELEVISION | 4 quarter hours
(Undergraduate)**

In this class, students will learn about and inhabit the role of the actor in auditions, networking, on set, and finally: reoccurring on multiple seasons of a show. They will understand and role play the professional expectations, hierarchies, and styles of communication necessary to confidently navigate the world of Television Production in the US and abroad. Students will get a sense of when it's appropriate for an actor to voice their perspective, and how actors navigate their status at every level of the process with an awareness of the system in which they are working. They will also analyze case studies regarding the power of the actor in character development once they have established themselves as a regular in multiple seasons of a series.

**FILM 318 | TV PRODUCTION WORKSHOP | 2-2.25 quarter hours
(Undergraduate)**

In this workshop students will produce projects for internal and external clients. Students will learn professional practices and work with clients to create projects such as promos, documentaries, commercials, short series and live events from concept inception to finished product. Through this process, students will examine different professional roles involved in the TV production process. PREREQUISITE(S): None (2 quarter hours)

**FILM 319 | LIVE EVENT/TALK TV WORKSHOP | 2-2.25 quarter hours
(Undergraduate)**

In this workshop students will produce events with guest artists presented in front of a live studio audience. Students will learn the professional practices and positions that constitute talk-show format television production. They will help prep each appearance and participate as crew members in the multi-camera production and telecasting of the events. Events are held on select Fridays and occasional Saturdays throughout the quarter, and attendance is required. May be repeated for credit. (2 quarter hours)

**FILM 321 | COMMERCIAL PRODUCTION | 4 quarter hours
(Undergraduate)**

This course will study the commercial production industry and the production techniques and processes of televised commercials and public service announcements. Industry standards for creating commercials for a client will be discussed. Additional topics include copywriting, style guides, casting, media, and client-relations.

FILM 110 is a prerequisite for this class.

**FILM 323 | MUSIC VIDEO PRODUCTION | 4 quarter hours
(Undergraduate)**

In this course, we will analyze ways in which artists combine visual imagery with music as with MTV-style music videos. The music business and how it relates/effects music videos. Each student will develop his or her own music video project from script to final edit with a local band of their choice, through their own scheduling process.

FILM 110 is a prerequisite for this class.

**FILM 325 | EXPERIMENTAL FILMMAKING I | 4 quarter hours
(Undergraduate)**

This production-based course explores breaking the boundaries of conventional cinema through experimental formal approaches, techniques and content. Students will create projects in the modes of key figures from the history of experimental and avant-garde film and video, such as Kenneth Anger, Stan Brakhage, Luis Bunuel, Maya Deren, Dana Hodgdon, David Lynch, Bill Viola, or Andy Warhol. Additionally, students will be encouraged to capture, edit and process material through non-traditional means, and to explore unconventional content. Screenings of experimental works may be tailored to the specific interests of students as projects develop. The influences of experimental cinema on conventional media such as Hollywood movies, commercials, and music video will also be analyzed.

POST 100 or POST 110 is a prerequisite for this class.

**FILM 326 | EXPERIMENTAL FILMMAKING II | 4 quarter hours
(Undergraduate)**

In this production-based course, students will build on skills gained in Experimental Filmmaking I with a focus on the professional execution of an experimental film project. From creating the abstract, to an intensive focus on pre-production, to non-traditional filming techniques, to critique through various stages of post-production, the student will be pushed to create a visionary work for the film festival circuit and beyond. Through this regimented process, the filmmaker will learn skills necessary to write grants, produce and package professional quality cinematic work targeted toward distribution success.

FILM 325 is a prerequisite for this class.

**FILM 345 | IMMERSIVE AND 360 VIDEO PRODUCTION | 4 quarter hours
(Undergraduate)**

This class will focus on the development, production and post-production of live-action 360 video. The medium of virtual reality will be analyzed within the context of the evolution of time-based and interactive media. Experimental projects will offer students the opportunity to tell stories in new ways while exploring the affordances and challenges of the evolving medium.

FILM 110 is a prerequisite for this class.

**FILM 348 | FILM FESTIVALS | 4 quarter hours
(Undergraduate)**

Film festivals and their role in independent cinema and the Hollywood studio system. The global proliferation of film festivals will be examined from the perspectives of both film studies scholars and film making professionals. Students will research the history of major festivals, develop festival strategies for students' own or other students' films, and attend film festival screenings, panels, and/or networking events.

PREREQUISITE(S): None (variable credit)

**FILM 350 | CINEMATOGRAPHY II | 4 quarter hours
(Undergraduate)**

This class explores the creation of visual imagery and meaning through cinematography. Students will study advanced cinematography techniques including visual language, composition and movement as well as advanced tools in lighting and camera.

FILM 250 and FILM 355 are prerequisites for this class.

**FILM 355 | LIGHTING I | 4 quarter hours
(Undergraduate)**

Introduction to safe and established practical operation of studio lighting and grip equipment. Students will learn a variety of basic lighting techniques, set electrical distribution, dolly set up, grip and lighting equipment.

**FILM 356 | LIGHTING II | 4 quarter hours
(Undergraduate)**

This course explores advanced lighting techniques with an emphasis on engaging the audience visually. Students will learn night exterior lighting techniques, practical location lighting approaches, Hollywood gag and moving lights applications. The proper, safe and efficient use of advanced lighting and grip equipment will be demonstrated - Hmi, LED, theatrical, large tungsten, fluorescent, overheads, rigging and dollies. Students will work together in groups to accomplish visual tasks each week.

FILM 355 is a prerequisite for this class.

**FILM 357 | CINEMATIC SPACE | 4 quarter hours
(Undergraduate)**

This seminar mixes theory and practice to expose students to an in-depth exploration of different techniques and possibilities concerning cinematic space. Beginning with an introduction to the fundamental differences between montage and mise-en-scene, the course will teach students the art and craft of designing, blocking and executing plan sequences, starting with static camera shots and ending in complex 3D camera moves.

FILM 350 is a prerequisite for this class.

**FILM 358 | ADVANCED CAMERA TECHNOLOGIES | 4 quarter hours
(Undergraduate)**

This course is an advanced camera workshop covering the specific jobs of 1st and 2nd Assistants, DIT and data manager in a narrative film environment. Students will learn how to build, maintain and utilize advanced camera equipment, follow set protocols, apply industry standard processes to safely record, download, protect and transcode media for editorial workflows.

FILM 250 is a prerequisite for this class.

**FILM 359 | VISUAL EFFECTS CINEMATOGRAPHY | 4 quarter hours
(Undergraduate)**

This course examines both traditional "in-camera" and contemporary digital visual effects techniques and the tools used to create them from a cinematographer's vantage point. Students will develop a sense of when to use each technique to achieve a specific visual task.

FILM 350 and FILM 355 are prerequisites for this class.

FILM 363 | CAMERA OPERATING WORKSHOP | 2-2.25 quarter hours (Undergraduate)

This course will refine a student's ability to operate a camera successfully in a variety of narrative film scenarios. Students will learn operating techniques to accomplish specific cinematic goals. This is a two-credit-hour course.

FILM 350 is a prerequisite for this class.

FILM 364 | CINEMATOGRAPHY III | 4 quarter hours (Undergraduate)

This seminar focuses on the art and craft of designing, blocking and executing planned sequences. It mixes theory and practice to expose students to an in-depth exploration of different techniques and possibilities concerning cinematic space. Emphasis will be on storytelling from the perspective of the cinematographer, specifically exploring how the camera is used to serve the narrative.

FILM 350 and FILM 356 (or permission from Instructor) are prerequisites for this class.

FILM 370 | ADVANCED PRODUCTION DESIGN | 4 quarter hours (Undergraduate)

In this course, students will construct a set from a prepared script. Beginning with the written page, students will synthesize through all the stages of construction including visualizing, drafting, constructing, painting and finishing.

FILM 270 is a prerequisite for this class.

FILM 375 | SCRIPT SUPERVISOR WORKSHOP | 2-2.25 quarter hours (Undergraduate)

This course explores the role of the script supervisor on a film or television project. The duties of this role that will be studied include: working with various departments during production, assisting in preserving screen direction, maintaining continuity through photographs and other tools, documenting script coverage with script notes and lining scripts, and assigning slate numbers. Professional script supervising software will be introduced and utilized. This is a two-credit-hour course.

FILM 376 | CASTING DIRECTOR WORKSHOP | 2-2.25 quarter hours (Undergraduate)

This course explores the role of the casting director/agency on a film or television project. The duties of this role that will be studied include: working with directors and producers, sourcing actors, posting calls, scheduling and running casting sessions, making offers and booking sheets, negotiating contracts, dealing with actor representation and implementing SAG guidelines. Professional casting software will be introduced and utilized. This is a two-credit-hour course.

FILM 377 | ASSISTANT DIRECTOR WORKSHOP | 2-2.25 quarter hours (Undergraduate)

This course explores the role of the assistant director on a film or television project. The duties of this role that will be studied include: working with directors, breaking down a script, scheduling using a one-liner and day out of days, managing cast and crew on set, directing extras, calling shots, keeping to a schedule, and creating call sheets and reports for each shoot day. Professional scheduling software will be utilized towards the pre-production of existing or future projects. This is a two-credit-hour course.

FILM 380 | PROJECT BLUELIGHT | 4 quarter hours (Undergraduate)

Production of a feature-length digital motion picture written by students or faculty within the Digital Cinema program. Students will work as crew under supervision of faculty members heading each of the various production areas. Goal is to produce a completed digital motion picture suitable for festivals or distribution.

FILM 381 | ACTING FOR FILMMAKERS II | 4 quarter hours (Undergraduate)

This course is designed to build upon a foundation of a filmmaker's knowledge of the actor's craft. This will be a hands-on, practical class in which all students will be required to participate fully in the exercises and scene work. Topics to be covered include: substitutions, relaxation, concentration, trust, listening, sensory work, physical actions, improvisation, imagination, needs, circumstances, objectives, obstacles, scene analysis and scene work.

FILM 282 is a prerequisite for this class.

FILM 384 | DIRECTING FOR TELEVISION | 4 quarter hours (Undergraduate)

In this class students will learn about the director's role in creating different genres of episodic television and web series. The class will explore how the TV director's role diverges from feature film direction in collaborating with the showrunner to incorporate the existing tone, tenor and style of the series into their creative decisions. Through a series of practical assignments, students will learn the intricacies of multiple-camera blocking, single-camera production, and the post-production processes of an episodic program.

FILM 115 is a prerequisite for this class.

FILM 385 | DIRECTING IV: BLOCKING FOR CAMERA | 4 quarter hours (Undergraduate)

This course builds on the skills developed in scene study and deepens the director's experience in staging actors and blocking for the camera. Through a series of visualization tools and practical exercises, students will explore the intersection between the camera, lighting, actors and movement in creating an onscreen performance.

FILM 285 is a prerequisite for this class.

FILM 386 | REHEARSAL WORKSHOP FOR DIRECTORS | 2-2.25 quarter hours (Undergraduate)

The rehearsal workshop deepens a director's understanding of effective rehearsal techniques. Students learn tools to work with any size cast (individuals, pairs and ensembles) at every stage of the process from table read to set.

FILM 285 is a prerequisite for this class.

FILM 387 | DIRECTING V: DIRECTING THE SHORT FILM | 4 quarter hours (Undergraduate)

Through managing the technical, theoretical and creative responsibilities of the director, students produce a narrative fiction short film. Students must enter with a finished, producible short film script with major principal pre-production elements in place. Advanced pre-production skills and topics to be covered include: script break down, schedule and budget, pre-visualization, creative collaboration and management, set procedures, and directing post-production and delivery.

FILM 385 is a prerequisite for this class.

FILM 390 | ADVANCED TOPICS IN CINEMA | 4 quarter hours (Undergraduate)

This class will be an in-depth examination of a filmmaker, film genre, or film movement that has had a significant influence on the development of cinematic storytelling and expression. Through lectures, screenings, readings, discussions, and critical writing assignments, students will analyze the distinctive traits of the selected topic within the broader context of cinema history and culture. Specific topics will be selected by the instructor and will vary with each quarter. PREREQUISITE(S): None.

**FILM 391 | TOPICS IN PRODUCTION | 4 quarter hours
(Undergraduate)**

This course allows advanced students to work in close conjunction with a faculty member to develop a digital media project. Topics focus on a specific genre or medium each quarter such as: traditional movie production (horror, comedy, action/adventure, documentary, experimental, etc.), animation (narrative, non-narrative, web-based, cinematic, etc.), and advanced digital game design (story, strategy, graphics, etc.). Students work to produce a five to ten minute project.

FILM 210 is a prerequisite for this class.

**FILM 392 | TOPICS IN TV PRODUCTION | 4 quarter hours
(Undergraduate)**

This course is a hands-on experience in television production of news and public affairs programs. Students learn through theory and practice the role TV Producers and their teams play in creating various TV programs. PREREQUISITE(S): None.

**FILM 393 | TOPICS IN STUDY ABROAD | 4 quarter hours
(Undergraduate)**

This practical course offers students an intensive experience studying cinema and/or television production abroad. Students will be introduced to the cultural context, practices, philosophies, styles and business of film and TV. Facility tours, screenings and cultural experiences may be used to supplement the classroom activities in order to deepen the understanding of the experience abroad. PREREQUISITE(S): None.

**FILM 396 | NON-CREDIT INDEPENDENT STUDY | 0 quarter hours
(Undergraduate)**

Registration through the online Independent Study application form, which requires a certification that the student is actively working on a project under a faculty member's supervision. Approval by the Dean is required. This course is for zero-credit hour.

**FILM 397 | CAPSTONE DEVELOPMENT | 4 quarter hours
(Undergraduate)**

In this course, students will create a proposal that outlines what they will do for their Senior Capstone Project. The project should be a culmination of all of the course work that the student did during their time in the School of the Cinematic Arts. Each project must adhere to the guidelines for their degree concentration. Students will begin to work on their projects in this class; the first version, cut, or draft of their project must be ready by the time the student begins FILM 398 Digital Cinema Capstone.

ANI 340 or SCWR 352 or SCWR 353 or FILM 210 is a prerequisite for this class.

**FILM 398 | DIGITAL CINEMA CAPSTONE | 4 quarter hours
(Undergraduate)**

This course provides a Digital Cinema-specific capstone experience for the student. Students must have completed at least one of the three Topics in Production courses before they enroll in this course. The capstone course will connect the students' Digital Cinema course work with the University courses s/he has taken through three components: student-generated production packages, class/instructor discussions, and the actual creation/production of the student's proposal. The production piece is the primary focus of this course.

**FILM 399 | INDEPENDENT STUDY | 1-8 quarter hours
(Undergraduate)**

Variable credit. PREREQUISITE(S): Consent of dean.

**FILM 401 | FUNDAMENTALS OF CINEMA PRODUCTION | 4 quarter hours
(Graduate)**

This course is a beginning workshop in narrative film production. The course provides an introduction to the fundamentals of cinema production, including camera and lens technology, composition, lighting, directing, sound recording, and basic editing. Students will produce several short films with an emphasis on visual storytelling and personal expression. PREREQUISITE(S): None.

**FILM 410 | PRODUCTION WORKSHOP | 4 quarter hours
(Graduate)**

Students work in teams to produce a completed project every two weeks. Each team will be assigned a specific genre or medium of cinema/media production. Students will be exposed to every aspect of media production from live action shooting to visual effects. Students will also learn how to work well in a team environment and be forced to adhere to deadlines, time constraints and medium limitations. PREREQUISITE(S) None.

**FILM 419 | LIVE EVENT/ TALK TV WORKSHOP | 2-2.25 quarter hours
(Graduate)**

In this workshop students will produce events with guest artists presented in front of a live studio audience. Students will learn the professional practices and positions that constitute talk-show format television production. They will help prep each appearance and participate as crew members in the multi-camera production and telecasting of the events. Events are held on select Fridays and occasional Saturdays throughout the quarter, and attendance is required. May be repeated for credit. (2 quarter hours)

**FILM 423 | MUSIC VIDEO PRODUCTION | 4 quarter hours
(Graduate)**

In this course, we will analyze ways in which artists combine visual imagery with music as with MTV-style music videos. The music business and how it relates/effects music videos. Each student will develop his or her own music video project from script to final edit with a local band of their choice, through their own scheduling process.

FILM 401 or FILM 410 is a prerequisite for this class.

**FILM 425 | EXPERIMENTAL FILMMAKING I | 4 quarter hours
(Graduate)**

This production-based course explores breaking the boundaries of conventional cinema through experimental formal approaches, techniques and content. Students will create projects in the modes of key figures from the history of experimental and avant-garde film and video, such as Kenneth Anger, Stan Brakhage, Luis Bunuel, Maya Deren, Dana Hodgdon, David Lynch, Bill Viola, or Andy Warhol. Additionally, students will be encouraged to capture, edit and process material through non-traditional means, and to explore unconventional content. Screenings of experimental works may be tailored to the specific interests of students as projects develop. The influences of experimental cinema on conventional media such as Hollywood movies, commercials, and music video will also be analyzed.

FILM 410 is a prerequisite for this class.

**FILM 426 | EXPERIMENTAL FILMMAKING II | 4 quarter hours
(Graduate)**

In this production-based course, students will build on skills gained in Experimental Filmmaking I with a focus on the professional execution of an experimental film project. From creating the abstract, to an intensive focus on pre-production, to non-traditional filmmaking techniques, to critique through various stages of post-production, the student will be pushed to create a visionary work for the film festival circuit and beyond. Through this regimented process, the filmmaker will learn skills necessary to write grants, produce and package professional quality cinematic work targeted toward having distribution success.

FILM 425 is a prerequisite for this class.

**FILM 430 | FUNDAMENTALS OF SHORT FILM | 4 quarter hours
(Graduate)**

Students will study approximately 100 well-crafted and landmark short films from throughout film history. Through these screenings, students will learn film vernacular, the roles these short films served their respective filmmakers and the concept of how "calling card" shorts can be used to illustrate a filmmaker's voice. Short film genres and styles that will be explored will include: narrative, experimental, documentary and animation, ranging from early silent films to contemporary films being screened at festivals today. PREREQUISITE(S): None.

**FILM 431 | FILM HISTORY FROM THE FILMMAKER'S PERSPECTIVE | 4 quarter hours
(Graduate)**

In film history, countless directors have established distinct directorial styles or voices through their unique use of film form and content. In this course, students will analyze the work of several of these directors through screenings, lectures and discussions of directorial choices in composition, movement, editing, production design, sound or story. Concepts will be applied to assignments that will help students develop their own directorial voices. PREREQUISITE(S): None.

**FILM 445 | IMMERSIVE AND 360 VIDEO PRODUCTION | 4 quarter hours
(Graduate)**

This class will focus on the development, production and post-production of live-action 360 video. The medium of virtual reality will be analyzed within the context of the evolution of time-based and interactive media. Experimental projects will offer students the opportunity to tell stories in new ways while exploring the affordances and challenges of the evolving medium.

FILM 410 is a prerequisite for this class.

**FILM 448 | FILM FESTIVALS (FORMERLY DC 493) | 4 quarter hours
(Graduate)**

Film festivals and their role in independent cinema and the Hollywood studio system. The global proliferation of film festivals will be examined from the perspectives of both film studies scholars and film making professionals. Students will research the history of major festivals, and attend film festival screenings, panels, and/or networking events. A festival strategy and budget will be developed for students' own films. PREREQUISITE(S): None (2 quarter hours)

**FILM 450 | CINEMATOGRAPHY | 4 quarter hours
(Graduate)**

In this course, students visually translate narrative scripts into meaningful and engaging imagery for cinema. Each week, students will visualize, block and shoot short sequences. Skills-building instruction will include the use of waveform monitors, light meters, cameras, optics, grip equipment, dollies, electricity, and lighting instruments. This class is a hands-on and experiential class with an emphasis on the cinematographer's practical and aesthetic visual choices.

FILM 401 or FILM 410 is a prerequisite for this class.

**FILM 455 | LIGHTING I | 4 quarter hours
(Graduate)**

Introduction to safe and established practical operation of studio lighting and grip equipment. Students will learn a variety of basic lighting techniques, set electrical distribution, dolly set up, grip and lighting equipment. PREREQUISITE(S): None or instructor permission.

**FILM 456 | LIGHTING FOR CINEMA II | 4 quarter hours
(Graduate)**

This continuation of FILM 455 Lighting for Cinema I is a hands-on and experiential class exploring advanced lighting techniques and skills. Students will learn the safe and efficient use of set electrical equipment, advanced lighting instruments and grip equipment, including HMI, LED and large Tungsten fixtures, dollies, overheads and specialty rigs.

FILM 455 is a prerequisite for this class.

**FILM 457 | CINEMATIC SPACE | 4 quarter hours
(Graduate)**

This seminar style course mixes theory and practice to explore ? cinematic space?. Students will learn both montage and mise-en-scene shooting techniques. Students will learn the art and craft of designing, blocking and executing planned sequences starting with a static camera and ending with complex camera movement.

FILM 450 is a prerequisite for this class.

**FILM 458 | ADVANCED CAMERA TECHNOLOGIES | 4 quarter hours
(Graduate)**

This course is an advanced camera workshop covering the specific jobs of 1st and 2nd Assistants, DIT and data manager in a narrative film environment. Students will learn how to build, maintain and utilize advanced camera equipment, follow set protocols, apply industry standard processes to safely record, download, protect and transcode media for editorial workflows.

FILM 450 is a prerequisite for this class.

**FILM 463 | CAMERA OPERATING WORKSHOP | 2-2.5 quarter hours
(Graduate)**

This course explores camera operating techniques to accomplish specific cinematic goals in a variety of filmmaking scenarios. This course is hands-on and experiential course designed to improve the student's ability to operate both static and moving cameras.

FILM 450 is a prerequisite for this class.

**FILM 464 | ADVANCED CINEMATOGRAPHY | 4 quarter hours
(Graduate)**

This seminar focuses on the art and craft of developing unique visual worlds for narrative scripts. Students will imagine, develop, experiment and refine visual choices to engage specific audiences. This course is a hands-on workshop style class where each week we will accomplish a variety of visual goals within a narrative filmmaking framework.

FILM 450 or FILM 455 is a prerequisite for this class.

**FILM 470 | PRODUCTION DESIGN | 4 quarter hours
(Graduate)**

Analysis of production design and art direction in motion pictures.

**FILM 479 | VISUAL DESIGN | 4 quarter hours
(Graduate)**

Definition, analysis, and structure of visual components that cinema employs to support and emphasize the story. Theory of visual design will be applied through student still photos, as well as an original, visually-oriented, narrative or documentary short film, animation or game design.

FILM 401 or FILM 410 or ANI 422 are prerequisites for this class.

**FILM 480 | PROJECT BLUELIGHT | 4 quarter hours
(Graduate)**

Production of a feature-length digital motion picture written by students or faculty within the Digital Cinema program. Students will work as crew under supervision of faculty members heading each of the various production areas. Goal is to produce a completed digital motion picture suitable for festivals or distribution. In addition to production work, graduate students are required to write a 7-10 page paper which analyzes the experience and how it relates to their MS/MFA course of study.

**FILM 481 | ACTING FOR FILMMAKERS | 4 quarter hours
(Graduate)**

This course is designed to provide students who plan to work with actors in any aspect of cinema or interactive media, with a foundation in the actor's craft. This will be a hands-on, practical class in which all students will be required to participate fully in the exercises and scene work. Topics to be covered include: relaxation, concentration, trust, listening, sensory work, physical actions, improvisation, imagination, needs, circumstances, objectives, obstacles, scene analysis and scene work. The course will culminate in a staged scene to be presented in class. PREREQUISITE(S): None.

**FILM 484 | DIRECTING ACTORS | 4 quarter hours
(Graduate)**

Emphasis on directing actors for film. Topics include script analysis, script interpretation, casting, rehearsals, director-actor relationship and director-actor communication. Projects will focus primarily on actor performance.

FILM 410 is a prerequisite for this class.

**FILM 485 | DIRECTING THE PRODUCTION | 4 quarter hours
(Graduate)**

Emphasis on directing the production. Topics covered include blocking actors, blocking camera, directing a crew, coverage and locations. Projects should include multiple setups and crews with, at the minimum, a producer, cinematographer and production designer.

FILM 484 is a prerequisite for this class.

**FILM 486 | REHEARSAL WORKSHOP FOR DIRECTORS | 2-2.25 quarter hours
(Graduate)**

The rehearsal workshop deepens a director's understanding of effective rehearsal techniques. Students learn tools to work with any size cast (individual, pairs and ensemble) at every stage of the process from table read to set.

FILM 484 is a prerequisite for this class.

**FILM 487 | DIRECTING THE SHORT MOTION PICTURE | 4 quarter hours
(Graduate)**

Through managing the technical, theoretical and creative responsibilities of the director, students produce a narrative fiction short film. Students must enter with a finished and previously workshopped, producible short film script with major principal pre-production elements in place. Advanced pre-production skills and topics to be covered include: script breakdown, schedule and budget, pre-visualization, creative collaboration and management, set procedures, and directing post-production and delivery.

FILM 485 and status as a Film & Television Directing MFA student is a prerequisite for this class.

**FILM 488 | DIRECTING ACTORS FOR THE CAMERA | 4 quarter hours
(Graduate)**

Directing students from SCA and acting students from TTS enroll in the same course and explore unique challenges and opportunities of collaboration between film directors and theater actors. Emphasis will be placed on the actor/director relationship, the relationship between the camera and performer, casting for film/TV, blocking for the camera and on-set technical considerations. Students will work toward the creation of a final, polished short film, using scripts written by screenwriting students. PREREQUISITE(S): None.

**FILM 489 | DIRECTING THE WEB SERIES | 4 quarter hours
(Graduate)**

This course is an introduction to directing narrative content for the Internet. Students will learn how to direct a production in an episodic or serialized environment where the primary goal is to maintain a tone and tenor consistent with the show-runner's vision. The course also covers the basic principles of budgeting, financing, casting, hiring talent, scheduling, securing locations, shooting and gathering social media artifacts for a series. Students will shepherd the project from idea execution through production, and finish the course with a five-episode web series.

FILM 487 is a prerequisite for this class.

**FILM 490 | ADVANCED TOPICS IN CINEMA | 4 quarter hours
(Graduate)**

This class will be an in-depth examination of a filmmaker, film genre, or film movement that has had a significant influence on the development of cinematic storytelling and expression. Through lectures, screenings, readings, discussions, and critical writing assignments, students will analyze the distinctive traits of the selected topic within the broader context of cinema history and culture. Specific topics will be selected by the instructor and will vary with each quarter.

**FILM 493 | TOPICS IN STUDY ABROAD | 4 quarter hours
(Graduate)**

This practical course offers students an intensive experience studying cinema and/or television production abroad. Students will be introduced to the cultural context, practices, philosophies, styles and business of film and TV. Facility tours, screenings and cultural experiences may be used to supplement the classroom activities in order to deepen the understanding of the experience abroad. PREREQUISITE(S): None.

**FILM 499 | INTERNSHIPS IN MEDIA AND DESIGN | 1-4 quarter hours
(Graduate)**

This is an internship/independent study course for graduate students, which offers the opportunity to reflect on an internship while gaining professional experience, industry contact and referrals while still in school. Opportunities in post-production, motion picture production, advertising, television, animation, game design, graphic design, motion graphics and interactive media can all qualify for the course. Students will work independently on class assignments. Assignments will be determined by the instructor and based on the number of credits in which the student is enrolled. Admission to the program requires consent of the internship course instructor after verification of the student's internship. PREREQUISITE(S): Internship. (variable credit)

**FILM 501 | ADVANCED PRE-PRODUCTION FOR THESIS | 4 quarter hours
(Graduate)**

Advanced concepts and techniques in pre-production for directors, such as: supervising fundraising, budgeting, and scheduling, crew assembly, casting and pre-visualization are taught in lecture and workshop. These concepts and techniques will be applied to the pre-production of MFA thesis films, laying the foundation necessary to begin principal photography. PREREQUISITE(S): None.

**FILM 510 | CINEMA THESIS I | 4 quarter hours
(Graduate)**

In this class, students work intensively on a thesis project proposal based on responses from the instructor, their classmates, and from graduate faculty thesis advisors. For narrative work, the goal is to finalize a shooting script for the thesis project. PREREQUISITE(S): Faculty permission.

**FILM 511 | CINEMA THESIS II (FORMERLY DC 566) | 4 quarter hours
(Graduate)**

In this class, students work intensively on a thesis project proposal based on responses from the instructor, their classmates, and from graduate faculty thesis advisors. For narrative work, the goal is to finalize pre-production for the thesis project.

FILM 510 and instructor consent are prerequisites for this class.

**FILM 560 | GRADUATE TEACHING SEMINAR | 4 quarter hours
(Graduate)**

This seminar exposes students to effective methods and professional practices of teaching undergraduate and graduate students. A variety of approaches to course materials and projects will be introduced and discussed in detail. In addition to work in class, students will work closely with a faculty member in order to gain first-hand knowledge, including class observation, of practical aspects of creative and academic instruction. PREREQUISITE(S): none. FORMERLY DC 560.

**FILM 599 | INDEPENDENT STUDY | 0 quarter hours
(Graduate)**

Independent study form required. PREREQUISITE(S): Consent of instructor. (variable credit)

**FILM 701 | THESIS CONTINUATION | 0 quarter hours
(Graduate)**

Non-credit. Students admitted to MFA program who have completed all the required coursework and who are regularly using the facilities of the University for thesis production and/or post-production are required to be registered each quarter of the academic year until the thesis and defense have been completed. (0 credit hours)

FILM 510 or ANI 640 is a prerequisite for this class.

Film & TV Creative Producing (CP)

**CP 310 | CREATIVE PRODUCING | 4 quarter hours
(Undergraduate)**

This course introduces students to how a production company operates. Students will learn how to build a film slate by identifying intellectual properties and developing them into viable projects. There will be an emphasis on story development with a focus on optioning material, talent packaging, and fund raising.

**CP 320 | INTRODUCTION TO FILM SCHEDULING AND BUDGETING | 4 quarter hours
(Undergraduate)**

This course will cover the fundamentals of film scheduling and budgeting. Students will learn how to break a script down and create a shooting schedule and working budget. Professional scheduling and budgeting software will be utilized in a lab setting.

**CP 323 | PRE-PRODUCTION WORKSHOP | 2-2.25 quarter hours
(Undergraduate)**

This two-credit course will provide valuable pre-production work on targeted productions, such as Project Bluelight (faculty or student-led), large-scale class projects, faculty creative projects, or independent and/or professional productions. Professional scheduling, budgeting and pre-visualization software may be utilized. PREREQUISITE(S): By instructor permission only.

**CP 340 | THE FUNDAMENTALS OF PRE PRODUCTION | 4 quarter hours
(Undergraduate)**

This course focuses on the key steps of pre-production for a feature film. Students will learn how to prep a film with a focus on cast and crew deals, location agreements, clearance, insurance, and working with the major unions.

**CP 343 | INDEPENDENT FILM PRODUCING | 4 quarter hours
(Undergraduate)**

This course introduces students to the principals and strategies of independent film producing with a focus on the following key areas: packaging material, fundraising, foreign sales, and festival and distribution strategies.

**CP 350 | PRODUCING FOR ANIMATION AND VFX | 4 quarter hours
(Undergraduate)**

This course introduces students to the key concepts behind producing for computer animation and the use of visual effects in live action filmmaking such as production planning, cost estimating production and post workflows.

**CP 360 | PRODUCING TELEVISION | 4 quarter hours
(Undergraduate)**

This is a course discussing the different roles of the television producer and show runners. Particular emphasis will be put on exploring and discussing the difference between line, segment, coordinating, field, executive (show-runner), and supervising producers. Students wear many television producer hats through the quarter, and will explore those roles in relation to different scripted and non-scripted formats. Examining and performing various tasks like budgets, staffing, and scheduling will give students a comprehensive view of the needs and responsibilities of different producers. Additional consideration will be given to the on-set roles and responsibilities of the showrunner in the television production environment. The class will culminate in the creation of short promo segments of various styles of television shows. PREREQUISITES: FILM 110, TV 306 OR TV 307.

**CP 364 | REALITY TELEVISION PRODUCTION | 4 quarter hours
(Undergraduate)**

Advanced production class develops a reality or factual show concept and treatment. Students will produce and cast a pilot based on their treatments. The class will focus on techniques and methods to build engagement and conflict within the reality or factual genre.

**CP 366 | THE BUSINESS OF TELEVISION | 4 quarter hours
(Undergraduate)**

Course provides historical background of the television business, beginning with the initial launch of the industry in the 1940s. Students examine the establishment of the regulatory system, including the Federal Communications Commission (FCC), the operational structure of stations and networks, the development of cable and satellite broadcasting, and the programming policies and strategies of the present broadcasting industry.

**CP 380 | CONTRACTS AND NEGOTIATIONS | 4 quarter hours
(Undergraduate)**

This course introduces students to the principals and strategies of entertainment law with a focus on the following key areas: chain of title, production legal, clearance, music licensing, and delivery requirements.

**CP 382 | DISTRIBUTION AND EXHIBITION | 4 quarter hours
(Undergraduate)**

This course explores the commercial and economic structure of the contemporary film industry. Topics to be covered include: the development of "Hollywood" as a distribution mechanism; the subsequent emergence of an independent commercial sector; the revenue stream from "box office" and ancillary markets, through distributors and to producers; the history and current state of theatrical exhibition; and emerging modes of content delivery.

**CP 390 | TOPICS IN CREATIVE PRODUCING | 4 quarter hours
(Undergraduate)**

Advanced study in producing focusing on a specific area each quarter. May be repeated for credit.

**CP 399 | INDEPENDENT STUDY | 1-8 quarter hours
(Undergraduate)**

Variable credit. PREREQUISITE(S): Consent of dean.

**CP 410 | CREATIVE PRODUCING | 4 quarter hours
(Graduate)**

This course introduces students to the role of the Creative Producer. Students will learn how to build a film and television slate by identifying intellectual properties and developing them into viable projects. There will be an emphasis on optioning material, talent packaging, and financing.

**CP 412 | FEATURE FILM DEVELOPMENT | 4 quarter hours
(Graduate)**

This course will focus on feature film development from a producer's perspective. Students will evaluate completed screenplays and the producer's role in developing them into films.

**CP 414 | TELEVISION DEVELOPMENT | 4 quarter hours
(Graduate)**

This course focuses on scripted television development from the producer's perspective. Emphasis will be placed on the industrial process and personnel of the networks, as well as the creative strategies needed to guide a project from concept ideation to hit series.

**CP 420 | SCHEDULING & BUDGETING | 4 quarter hours
(Graduate)**

This course will cover the fundamentals of film scheduling and budgeting. Students will learn how to break a script down and create a shooting schedule and working budget. Professional scheduling and budgeting software will be utilized in a lab setting.

**CP 423 | PRE-PRODUCTION WORKSHOP | 2-2.25 quarter hours
(Graduate)**

This two-credit course will provide valuable pre-production work on targeted productions, such as Project Bluelight (faculty or student-led), large-scale class projects, faculty creative projects, or independent and/or professional productions. Professional scheduling, budgeting and pre-visualization software may be utilized. PREREQUISITE(S): By instructor permission only. (2 quarter hours)

**CP 440 | PRE-PRODUCTION FOR PRODUCERS | 4 quarter hours
(Graduate)**

This course focuses on the fundamentals of pre-production for a feature film. Students will learn how to prep a film with a focus on cast and crew deals, location agreements, clearance, insurance, and working with the major unions.

**CP 442 | THE AGENCY | 2-2.25 quarter hours
(Graduate)**

This course will examine the essential role talent and literary agencies perform in the entertainment business. Students will learn how producers work with agencies to package films with talent and secure distribution for their projects. There will be a focus on the various departments at agencies including motion picture literary, story, talent, and packaging for television.

**CP 444 | THE TALENT MANAGER | 2-2.25 quarter hours
(Graduate)**

This course will examine the critical role the talent manager performs in today's entertainment industry. Students will learn how managers operate as producers and work with talent to develop and sell their projects to the studios.

**CP 446 | THE STUDIO EXECUTIVE | 2-2.25 quarter hours
(Graduate)**

This course provides an overview of the various departments at a major motion picture studio. Students will learn how studio executives develop projects and oversee production and distribution for the studio.

**CP 448 | THE NETWORK EXECUTIVE | 2-2.25 quarter hours
(Graduate)**

This course provides an overview of the television departments at a network. Students will learn how television executives develop shows for the network and manage productions.

**CP 450 | PRODUCING REALITY TELEVISION | 2-2.25 quarter hours
(Graduate)**

This course will examine the process for producing reality shows. Students will learn how to develop ideas for reality shows and create pitch decks. There will be an emphasis on producing techniques for signing and working with reality show talent.

**CP 452 | PRODUCING COMMERCIALS & MUSIC VIDEOS | 2-2.25 quarter hours
(Graduate)**

This course examines the process and production techniques for producing commercials and music videos. Industry standards for creating commercials and music videos for clients will be discussed. Additional topics include copywriting, style guides, casting, media, and client-relations.

**CP 460 | PRODUCING TELEVISION | 4 quarter hours
(Graduate)**

This course will examine the creative and business skills required for producing television. Students will review different genres and styles of television production while exploring the various roles in relation to specific scripted and non-scripted formats. Additional consideration will be given to the on-set roles and responsibilities of the showrunner on a television production.

**CP 480 | ENTERTAINMENT LAW FOR PRODUCERS | 4 quarter hours
(Graduate)**

This course introduces students to the principles and strategies of entertainment law with a focus on the following key areas: chain of title, production legal, clearance, music licensing, and delivery requirements. PREREQUISITE(S): None.

**CP 482 | DISTRIBUTION AND EXHIBITION | 4 quarter hours
(Graduate)**

Conventional and emerging modes of motion picture distribution with special emphasis on digital streaming and exhibition.

CP 484 | POST PRODUCTION FOR PRODUCERS | 4 quarter hours (Graduate)

This course will provide an overview of the post process for producers. Students will examine the key stages of post from edit to delivery, with an emphasis on producing visual effects for film and television.

CP 490 | TOPICS IN CREATIVE PRODUCING | 4 quarter hours (Graduate)

Advanced study in producing focusing on a specific area each quarter. May be repeated for credit.

CP 498 | PRE-PRODUCTION INTERNSHIP | 4 quarter hours (Graduate)

This is an internship course for graduate creative producing students, which offers the opportunity to reflect on an internship while gaining professional experience, industry contact and referrals while still in school. Students will intern at an entertainment company with a focus on the development and pre-production stages of film and television.

CP 499 | POST-PRODUCTION INTERNSHIP | 4 quarter hours (Graduate)

This is an internship course for graduate creative producing students, which offers the opportunity to reflect on an internship while gaining professional experience, industry contact and referrals while still in school. Students will intern at entertainment company with a focus on the production and distribution stages of film and television.

CP 511 | CREATIVE PRODUCING THESIS I | 4 quarter hours (Graduate)

Students will be required to complete a final thesis project that involves creating a professional deck for a movie or tv/streaming series. The thesis project will entail optioning and developing source material such as an original screenplay, and creating a deck detailing the potential talent attachments, financing plan, and distribution strategies. The purpose for the thesis projects is for the students to have a viable project upon graduation that they can set up at a production company or produce on their own independently.

CP 512 | CREATIVE PRODUCING THESIS II | 4 quarter hours (Graduate)

Students will revise their thesis projects based on the feedback from the instructor and thesis advisors. During this stage, students will be expected to be securing any story rights necessary for the completion of the project and finishing creating their professional decks.

CP 540 | PRODUCING FOR DIRECTORS: PITCHING, PACKAGING, AND DISTRIBUTION | 4 quarter hours (Graduate)

Current avenues for the development of the student director for a professional career will be explored, including film festivals, fundraising, self-distribution and pitching. Usable film festival strategies, self-distribution plans, and fundraising business plans will be created for the exploitation of existing or future projects.

FILM 487 is a prerequisite for this class.

CP 599 | INDEPENDENT STUDY | 1-8 quarter hours (Graduate)

Independent study form required. PREREQUISITE(S): Consent of instructor. Variable credit.

CP 701 | THESIS CONTINUATION | 0 quarter hours (Graduate)

Non-credit. Students admitted to MFA program who have completed all the required coursework and who are regularly using the facilities of the University for thesis production and/or post-production are required to be registered each quarter of the academic year until the thesis and defense have been completed.

FILM 510 or ANI 640 is a prerequisite for this class.

Film & TV Post-Production (POST)

POST 100 | VIDEO EDITING FOR NON-MAJORS | 4 quarter hours (Undergraduate)

Students analyze and assemble dramatic scenes under a variety of conditions and narrative strategies. Editing theories, techniques and procedures, issues of continuity, effects, movement and sound are examined as they relate to the fundamentals of cinematic montage and visual storytelling. This class presents a variety of topics and experiences that are designed to broaden the student's understanding of the art of cinematic storytelling and montage. Work on more advanced projects is integrated into the class as a means to an understanding of advanced editing tools and techniques. PREREQUISITE(S): NONE.

POST 110 | EDITING I | 4 quarter hours (Undergraduate)

Students analyze and assemble dramatic scenes under a variety of conditions and narrative strategies. Editing theories, techniques and procedures, issues of continuity, effects, movement and sound are examined as they relate to the fundamentals of cinematic montage and visual storytelling.

ANI 101 or ANI 201 or FILM 101 and major in the BA Animation, BFA Animation, BA Film & Television, BFA Film & Television, BS Information Technology Media Engineering concentration, or minor in Visual Effects are prerequisites for this class.

POST 120 | AUDIO FOR PODCASTS AND OTHER MEDIA | 4 quarter hours (Undergraduate)

This course is an introduction to the uses and practical applications of sound for multimedia. Students will study various uses of sound and music on the Internet from creative to professional websites. Using free or inexpensive hardware and software, students will learn to create and edit podcasts and attach audio files to programs and web pages such as Facebook, iTunes, Keynote, PowerPoint and other sites. The course will cover both Mac and PC applications so all students will be able to work on projects from their home computers. The course will also cover current legalities of digital media. PREREQUISITES: NONE.

POST 124 | SOUND DESIGN I | 4 quarter hours (Undergraduate)

This course is an introduction to sound editing and sound design. The course examines the place of sound in cinema, both artistic and technological. The course will cover the basics of sound, microphones, and analogue-to-digital conversion. Lectures, readings, and film clips will be used to illustrate the language of film sound, as practiced by film directors, sound designers, and editors. Students will learn to edit sound assignments with Pro Tools and current technologies. PREREQUISITE(S): None.

POST 125 | INTRODUCTORY PRO TOOLS WORKSHOP | 2-2.25 quarter hours (Undergraduate)

This workshop course offers introductory training on Pro Tools software. Topics include recording, editing, mixing, and processing functions. No experience necessary. PREREQUISITE(S): None (2 quarter hours)

**POST 128 | THE ART OF SOUND DESIGN AND FILM | 4 quarter hours
(Undergraduate)**

This lecture course is an introduction to the language of film sound and music as practiced by screenwriters, directors and producers. The course will cover the basics of sound, analyzing the use of sound and music in film and the roles of sound designers and composers in the filmmaking process. This course does not qualify as a prerequisite for upper-level sound courses and sound studio access.

**POST 200 | EDITING II | 4 quarter hours
(Undergraduate)**

This course expands on topics covered in DC 220. Emphasis is on developing the student's understanding of the art of cinematic storytelling and montage. Work on more advanced projects is integrated into the class as a means of mastering advanced editing tools and techniques.

POST 110 is a prerequisite for this class.

**POST 204 | HISTORY OF MOTION PICTURE EDITING | 4 quarter hours
(Undergraduate)**

This course studies the origins and rise of film editing as an art form, an industry, a set of technological practices ranging from analog film to digital video. The course examines critical historical events that impacted film editing: the emergence of the studio system, the coming of sound, narrative, experimental and documentary film, MTV, and audience shifts. For many, editing is the unique source of the art of filmmaking. This course addresses this question. **PREREQUISITE(S): NONE.**

**POST 224 | SOUND DESIGN II | 4 quarter hours
(Undergraduate)**

This course expands on topics covered in POST 124. Emphasis will be on mixing and editing techniques for music and sound effects. Coursework also includes the recording of natural sounds and special effects to reinforce images and the story. The course is intended for advanced students who wish to develop their skills and gain more experience in preparing and mixing soundtracks for traditional as well as interactive narratives.

GAM 250 or POST 124 is a prerequisite for this class.

**POST 280 | PRE - PRODUCTION FOR POST | 4 quarter hours
(Undergraduate)**

This course covers the technical aspects and decision-making processes of pre-production. It will cover various image capture and final output options, and will explain the concepts and methods of digital color, formats, codecs, compression and storage. Practical considerations about camera and codec selection will be explored through image capture and exhibition, including an introduction to digital intermediate concepts. Beginning-to-end workflows, including the creation and application of proxies, will be demonstrated and practiced.

FILM 110 is a prerequisite for this class.

**POST 303 | EDITING III | 4 quarter hours
(Undergraduate)**

This course provides an advanced workshop for students to edit their own narrative or documentary projects. Students will be expected to bring in their own footage, and will take their projects from logging, through rough cut, to picture lock. Post-production workflow, and basic sound design and color correction for picture editors will also be emphasized.

POST 200 is a prerequisite for this class.

**POST 304 | AVID MEDIA COMPOSER EDITING WORKSHOP | 2-2.5 quarter hours
(Undergraduate)**

This course provides an advanced workshop for students to learn how to use Avid Media Composer. Students will learn how to set up a project, import, organize, and edit media. Post-production workflow, basic sound design, and color correction for picture editors will also be emphasized.

**POST 305 | DAVINCI RESOLVE EDITING WORKSHOP | 2-2.5 quarter hours
(Undergraduate)**

This course provides an advanced workshop for students to learn how to edit using DaVinci Resolve. Students will learn how to set up a project, import, organize, and edit media. Post-production workflow, basic sound design, and color correction for picture editors will also be emphasized.

**POST 306 | EDITING STYLES AND TECHNIQUES | 4 quarter hours
(Undergraduate)**

This course is designed for editors looking for innovative ways to tell stories, by exploring how editing techniques have been pushed by artists working in the margins. Cutting edge editing techniques are a co-opting of historical and experimental styles, repackaged and used in a narrative context. A series of practical exercises and a freeform final project using found footage allow editors to explore the array of editing techniques adopted from experimental work while discovering their personal style as editors and storytellers. Editors will consider how form affects content and will reinvent techniques in ways to surprise modern audiences.

POST 110 is a prerequisite for this class.

**POST 309 | EDITING THE FEATURE FILM | 4 quarter hours
(Undergraduate)**

In this course, students will be introduced to the specialized post-production workflow of editing the feature film. Topics will include: understanding the script notes, organizing the project, editing scenes with a focus on performance and character arcs, working with sound effects and music, performing a temp mix, breaking the film into reels, and producing deliverables for the composer, sound editor, and color correction. **PREREQUISITE(S): POST 200.**

**POST 312 | EDITING THE DOCUMENTARY | 4 quarter hours
(Undergraduate)**

Editing the Documentary will expose students to the specialized post production workflow of documentary film. Utilizing a workshop atmosphere in combination with lectures and projects, students will gain an appreciation of the art and craft of documentary film editing. This course will cover an overview of current documentary trends and styles, explore various workflows to find the story in documentary footage, the ethical role of editor in shaping the stories of real people and events, how to apply the visual language of fiction to documentary film, use of archival media in a contemporary way, how to structure the story scene to scene and where to start and end the story.

POST 110 is a prerequisite for this class.

**POST 315 | EDITING FOR TELEVISION | 4 quarter hours
(Undergraduate)**

Class emphasizes editing and post production producing under tight deadlines. Students edit commercials, trailers, and PSA projects.

POST 110 and FILM 115 are prerequisites for this class.

**POST 318 | EDITING THE SHORT FORM | 4 quarter hours
(Undergraduate)**

Editing the Short Form will explore the world of TV commercials, music video, movie trailers and internet content for clients. Emphasis on the culture of commercial production environments, including the advertising agency, entertainment and music media business, as well as the broader online market for creation of motion content.

POST 110 is a prerequisite for this class.

**POST 319 | EDITING STUDIO | 4 quarter hours
(Undergraduate)**

This course provides practical experience in editing. Participants will apply learned editorial techniques into real-world experience, serving as editors for various projects that may include thesis, capstone and other student work. A key element of this course will be in-class discussions and critiques of students' work, to sharpen their editing and storytelling skills.

POST 200 is a prerequisite for this class.

**POST 321 | LOGIC PRO MIDI SEQUENCING WORKSHOP | 2-2.25 quarter hours
(Undergraduate)**

This course offers training on all aspects of MIDI sequencing in Logic Pro software. All aspects of MIDI will be covered including recording, programming, editing, mixing and processing functions.

PREREQUISITE(S): None (2 quarter hours)

**POST 322 | ABLETON LIVE WORKSHOP | 2-2.25 quarter hours
(Undergraduate)**

Ableton Live is a Digital Audio Workstation (DAW) software designed for recording, manipulating, and playing back audio and MIDI tracks both linearly and nonlinearly. Students will learn the basics of working within the Live interface to create musical arrangements, sound design, sequence MIDI instruments and samples, score Video, create DJ mixes, drum patterns, automate effects and mixing parameters. The course includes hands-on, guided demonstrations of the Live interface and tools for complex compositions, mixing, and live performances in any musical style. The course projects will emphasize exploration and experimentation.

**POST 323 | SOUND SYSTEM DESIGN | 4 quarter hours
(Undergraduate)**

This course deals with fundamental technologies and techniques associated with post-Production audio systems. The course incorporates theoretical creation, practical construction, utilization, and management of sound editing & mixing studios. Lectures, readings, and other examples will exhibit standard approaches and practices. Students will gain the technical expertise to construct and operate a working sound studio. Amongst other benefits, students will develop independence in the acquisitions and utilization of equipment and software used in the industry.

**POST 324 | SOUND MIXING I | 4 quarter hours
(Undergraduate)**

This workshop based course focuses on re-recording mixing for cinema using the stereo sound field. Subjects include mixing philosophies, techniques, advanced digital signal processing, and monitoring. A history of sound mixing will be covered. Several projects will be completed throughout the quarter.

POST 224 is a prerequisite for this class.

**POST 326 | SOUND MIXING II | 4 quarter hours
(Undergraduate)**

This workshop based course focuses on re-recording mixing for cinema using the surround sound field. Subjects included mixing philosophies, techniques, advanced digital signal processing, and monitoring. A history of surround sound mixing will be covered. Several projects will be completed throughout the quarter.

POST 324 is a prerequisite for this class.

**POST 328 | SCORING FOR FILM AND VIDEO | 4 quarter hours
(Undergraduate)**

Students are introduced to elements of music and ways in which these elements may be used to create a musical style that enhances the visual statement. Course emphasizes understanding the function of the score and how it relates to texture, color, and drama in music. Students explore their creativity using the tools available, work on projects of increasing complexity, and complete a score for their own film or video as a final project. Listening skills, music vocabulary, and business and legal aspects of the profession are also studied.

**POST 329 | SOUND DESIGN AND SCORING STUDIO | 4 quarter hours
(Undergraduate)**

This course is intended to provide practical experience in sound design and scoring for cinema, animation, and other media as well as to offer the opportunity to create quality materials to include in a demo reel or portfolio. Students will be serving as the sound and music crew for various projects that may include thesis, capstone and other student projects. A key element of this course will be in-class discussions and critiques of students' work, both to sharpen their sound designing, composing and critical listening skills.

**POST 330 | PRODUCTION SOUND I | 4 quarter hours
(Undergraduate)**

This workshop based course is an introduction to production recording/mixing and field recording. Subjects include microphone selection, basic acoustics, microphone techniques, single and dual system recording practices, and mixing. Several recording projects will be completed throughout the quarter. PREREQUISITE(S): None.

**POST 332 | PRODUCTION SOUND II | 4 quarter hours
(Undergraduate)**

This workshop based course expands on topics covered in Production Sound I. Students will advance their knowledge of pre-production, acoustics, and production recording/mixing techniques. Subjects include production management, microphone selection and techniques, advanced sound-for-camera workflows, professional dual system recording/ mixing practices, and post workflows. Several projects will be completed throughout the quarter.

POST 330 is a prerequisite for this class.

**POST 336 | ADVANCED SOUND RECORDING AND EDITING | 4 quarter hours
(Undergraduate)**

This workshop based course offers advanced sound recording and editing techniques. Subjects include voice processing, basic acoustics, room tone matching, sound effects recording, Foley recording, proximity processing, frequency analysis, and mixing. Several projects will be completed throughout the quarter.

POST 224 is a prerequisite for this class.

**POST 340 | COLOR CORRECTION | 4 quarter hours
(Undergraduate)**

Students acquire a working knowledge of the aesthetics and technical aspects of the post-production phase of color correction. Content addresses theory and application of color correction, image control, and manipulation techniques. Principles of color theory and the tools available to filmmakers engaged in the processes of electronic media and image manipulation are explored through lecture, interactive computer exercises, and hands-on experience with professional color correction software.

POST 110 is a prerequisite for this class.

**POST 344 | ADVANCED COLOR CORRECTION | 4 quarter hours
(Undergraduate)**

This class expands on topics covered in POST 340. Students will refine their skills in the areas of Primary, Secondary and Color FX room advanced grading techniques used by professional colorists. This class will explore more in detail colorist strategies, grading workflows, aesthetics and technical aspects of color correction for the digital cinema. Students will explore color correcting trends that are popular in feature films and national television commercials. Through a series of three short projects and a final project, students will practice using the techniques they study in class.

POST 340 is a prerequisite for this class.

**POST 348 | TITLE DESIGN | 4 quarter hours
(Undergraduate)**

This course explores the relationship between film and typography through an analysis of title design production in film, television, animation, and games. By studying examples from film and television history and the creative process behind those productions, students will develop an understanding of how to interpret and use typography to create narrative exposition on screen. Students will gain an appreciation and skill for working with text, image, and sound within time-based media that will add value, clarity, and sophistication to multimedia projects.

ANI 101 or ANI 201 or VFX 200 is a prerequisite for this class.

**POST 360 | SOUND & MUSIC SYNTHESIS FOR FILM | 4 quarter hours
(Undergraduate)**

This course focuses on the integration of perception, theory, and practice using digital electronic sound synthesis to create custom sound effects and music for visual media. Topics will cover the use and creation of digital electronic sound synthesizers, audio mixing, acoustics, and the history of electronic music in film. Students will learn how to use synthesizers to create customized sonic designs as well as how to apply them to film, video, and interactive experiences. Projects and labs will incorporate real-world examples, practical tutorials, and lectures that will include guests working in audiovisual media, sound design, and electronic music composition for film.

POST 124 or ANI 315 or GAM 250 is a prerequisite for this class.

**POST 364 | MAX CYCLING 74 WORKSHOP | 2-2.25 quarter hours
(Undergraduate)**

This course is a workshop style introduction to the object-oriented programming language Max, that is used by musicians, designers, filmmakers, and visual artists to create works of Interactive Media. The course will introduce the basics of programming in the Max environment and cover sound synthesis, sample playback, music instrument design, and audio-reactive animation.

**POST 380 | POST-PRODUCTION WORKSHOP | 2-2.25 quarter hours
(Undergraduate)**

This two-credit course will provide an opportunity for students to apply their post-production skills and work collaboratively on projects happening during the academic year. These projects can be Project Bluelight (faculty or student-led), large-scale class projects, faculty creative projects, or independent and/or professional productions. Students will work under faculty supervision and gain valuable experience collaborating as part of post-production team. Professional post-production applications, equipment, and facilities will be utilized. **PREREQUISITE(S):** By instructor permission only. (2 quarter hours)

**POST 384 | POST-PRODUCTION SEMINAR | 4 quarter hours
(Undergraduate)**

This course is an introduction and overview of Post Production, from the end of principle photography, through editing, to final delivery. Students will learn workflows, technical aspects, the online environment, and the best way to finish and deliver a film.

POST 110 is a prerequisite for this class.

**POST 388 | POST PRODUCTION WORKFLOWS | 4 quarter hours
(Undergraduate)**

This course explores the practices that underpin modern post production workflows. It considers a range of mediums and platforms, encompassing fiction and non-fiction story-telling. Students will learn how post is organized, across post departments, incorporating picture editing, music, sound design and audio post, titles, graphics and VFX. Topics include post production teams, individual responsibilities, scheduling, budgeting, collaboration and communication, mastering, delivery, archiving, and the impact of new and evolving technologies. Students will visit post-production companies to experience post professionals undertaking the varying roles.

**POST 390 | TOPICS IN POST-PRODUCTION SOUND | 4 quarter hours
(Undergraduate)**

Advanced study in post-production sound focusing on a specific area each quarter such as: A.D.R., Foley, Scoring, Sound Effects, Mixing, etc. May be repeated for credit. **PREREQUISITES:** NONE.

**POST 391 | ADVANCED TOPICS IN EDITING | 4 quarter hours
(Undergraduate)**

This class will be an in-depth examination of an editor, editing style, or editing theory that has had a significant influence on the development of cinematic storytelling and expression. Through lectures, screenings, readings, discussions, and editing assignments, students will analyze the distinctive traits of the selected topic within the broader context of cinema history and culture. Editing projects will be assigned through the quarter. Specific topics will be selected by the instructor and will vary with each quarter.

POST 110 is a prerequisite for this class.

**POST 394 | IT AND ENGINEERING FOR MEDIA CAPSTONE | 4 quarter hours
(Undergraduate)**

This course provides students with the opportunity to utilize and integrate acquired knowledge in information technology for media to an applied audio and video engineering project. Students will work in teams to design, create, and test a real world media technology solution. Completed projects will be presented and evaluated by the class.

CSC 382, NET 377 and POST 384 are prerequisites for this class.

POST 395 | ESTABLISHING A CREATIVE INDEPENDENT BUSINESS | 4 quarter hours (Undergraduate)

Students will learn the necessities and considerations when beginning and operating a freelance business in a creative discipline. Students will develop their creative portfolios and the best method(s) of displaying them, generate legal agreements for project work and begin the process of building and selling their brand and promoting its awareness. Students will also be introduced to accepted business practices in outreach and relationship management.

POST 399 | INDEPENDENT STUDY | 1-8 quarter hours (Undergraduate)

Variable credit. PREREQUISITE(S): Consent of dean.

POST 400 | EDITING | 4 quarter hours (Graduate)

Emphasis is on developing the student's understanding of the art of cinematic storytelling and montage. Work on more advanced projects is integrated into the class as a means of mastering advanced editing tools and techniques.

FILM 401 or FILM 410 is a prerequisite for this class.

POST 401 | EDITING INTENSIVE | 4 quarter hours (Graduate)

This course is an accelerated introduction to editing, from basic concepts to advanced methods and techniques. Emphasis is on developing the students' understanding of the art of cinematic storytelling and montage. Utilizing a workshop atmosphere students will work on advanced projects as a means of mastering advanced editing tools and techniques.

Status as a student in the MS Film and Television with concentration in Editing or Sound is a prerequisite for this class.

POST 403 | ADVANCED EDITING | 4 quarter hours (Graduate)

This course provides an advanced workshop for students to edit their own narrative or documentary projects. Students will be expected to bring in their own footage, and will take the projects from logging, through rough cut, to picture lock. Post-production workflow, and basic sound design and color correction for picture editors will also be emphasized.

POST 401 is a prerequisite for this class.

POST 404 | AVID MEDIA COMPOSER EDITING WORKSHOP | 2-2.5 quarter hours (Graduate)

This course provides an advanced workshop for students to learn how to use Avid Media Composer. Students will learn how to set up a project, import, organize, and edit media. Post-production workflow, basic sound design, and color correction for picture editors will also be emphasized.

POST 405 | DAVINCI RESOLVE EDITING WORKSHOP | 2-2.5 quarter hours (Graduate)

This course provides an advanced workshop for students to learn how to edit using DaVinci Resolve. Students will learn how to set up a project, import, organize, and edit media. Post-production workflow, basic sound design, and color correction for picture editors will also be emphasized.

POST 406 | EDITING STYLES AND TECHNIQUES | 4 quarter hours (Graduate)

This course is designed for editors looking for innovative ways to tell stories, by exploring how editing techniques have been pushed by artists working in the margins. Cutting edge editing techniques are a co-opting of historical and experimental styles, repackaged and used in a narrative context. A series of practical exercises and a freeform final project using found footage allow editors to explore the array of editing techniques adopted from experimental work while discovering their personal style as editors and storytellers. Editors will consider how form affects content and will reinvent techniques in ways to surprise modern audiences.

FILM 401 or FILM 410 is a prerequisite for this class.

POST 409 | EDITING THE FEATURE FILM | 4 quarter hours (Graduate)

In this course, students will be introduced to the specialized post-production workflow of editing the feature film. Topics will include: understanding the script notes, organizing the project, editing scenes with a focus on performance and character arcs, working with sound effects and music, performing a temp mix, breaking the film into reels, and producing deliverables for the composer, sound editor, and color correction. PREREQUISITE(S): POST 400.

POST 412 | EDITING THE DOCUMENTARY | 4 quarter hours (Graduate)

Editing the Documentary will expose students to the specialized post production workflow of documentary film. Utilizing a workshop atmosphere in combination with lectures and projects, students will gain an appreciation of the art and craft of documentary film editing. This course will cover an overview of current documentary trends and styles, explore various workflows to find the story in documentary footage, the ethical role of editor in shaping the stories of real people and events, how to apply the visual language of fiction to documentary film, use of archival media in a contemporary way, how to structure story scene to scene and where to start and end the story.

POST 400 or POST 401 is a prerequisite for this class.

POST 418 | EDITING THE SHORT FORM | 4 quarter hours (Graduate)

Editing the Short Form will explore the world of TV commercials, music video, movie trailers and internet content for clients. Emphasis on the culture of commercial production environments, including the advertising agency, entertainment and music media business, as well as the broader online market for creation of motion content.

POST 400 or POST 401 is a prerequisite for this class.

POST 419 | EDITING STUDIO | 4 quarter hours (Graduate)

This course provides practical experience in editing. Participants will apply learned editorial techniques into real-world experience, serving as editors for various projects that may include thesis, capstone and other student work. A key element of this course will be in-class discussions and critiques of students' work, to sharpen their editing and storytelling skills.

POST 401 is a prerequisite for this class.

**POST 420 | POST-PRODUCTION SOUND DESIGN | 4 quarter hours
(Graduate)**

This course expands on topics covered in POST 124. Emphasis will be on mixing and editing techniques for music and sound effects. Coursework also includes the recording of natural sounds and special effects to reinforce images and the story. The course is intended for advanced students who wish to develop their skills and gain more experience in preparing and mixing sound tracks for traditional as well as interactive narratives.

FILM 410 or ANI 422 is a prerequisite for this class.

**POST 421 | SOUND DESIGN INTENSIVE | 4 quarter hours
(Graduate)**

This accelerated course examines artistic and technological sound design in cinema. The course will cover the basics of sound, microphones, production and post-production sound processes. Lectures, readings, and film clips will be used to illustrate the language of film sound, as practiced by film directors, sound designers, and editors. Students will learn to edit sound assignments current Industry technologies. The second half of the course focuses on mixing and editing techniques for music and sound effects in film.

Status as a student in the MS Film and Television with concentration in Editing or Sound is a prerequisite for this class.

**POST 423 | SOUND SYSTEM DESIGN | 4 quarter hours
(Graduate)**

This course deals with fundamental technologies and techniques associated with post-Production audio systems. The course incorporates theoretical creation, practical construction, utilization, and management of sound editing & mixing studios. Lectures, readings, and other examples will exhibit standard approaches and practices. Students will gain the technical expertise to construct and operate a working sound studio. Amongst other benefits, students will develop independence in the acquisitions and utilization of equipment and software used in the industry.

**POST 424 | SOUND MIXING I | 4 quarter hours
(Graduate)**

This workshop based course focuses on re-recording mixing for cinema using the stereo sound field. Subjects include mixing philosophies, techniques, advanced digital signal processing, and monitoring. A history of sound mixing will be covered. Several projects will be completed throughout the quarter.

POST 421 is a prerequisite for this class.

**POST 426 | SOUND MIXING II | 4 quarter hours
(Graduate)**

This workshop based course focuses on re-recording mixing for cinema using the surround sound field. Subjects include mixing philosophies, techniques, advance digital signal processing, and monitoring. A history of surround sound mixing will be covered. Several projects will be completed throughout the quarter.

POST 424 is a prerequisite for this class.

**POST 428 | SCORING FOR FILM AND VIDEO | 4 quarter hours
(Graduate)**

Students are introduced to elements of music and ways in which these elements may be used to create a musical style that enhances the visual statement. Course emphasizes understanding the function of the score and how it relates to texture, color, and drama in music. Students explore their creativity using the tools available, work on projects of increasing complexity, and complete a score of their own film or video as a final project. Listening skills, music vocabulary, and business and legal aspects of the profession are also studied.

**POST 429 | SOUND DESIGN AND SCORING STUDIO | 4 quarter hours
(Graduate)**

This course is intended to provide practical experience in sound design and scoring for cinema, animation, and other media as well as to offer the opportunity to create quality materials to include in a demo reel or portfolio. Students will be serving as the sound and music crew for various projects that may include thesis, capstone and other student projects. A key element of this course will be in-class discussions and critiques of students' work, both to sharpen their sound designing, composing and critical listening skills.

**POST 430 | PRODUCTION SOUND I | 4 quarter hours
(Graduate)**

This workshop based course is an introduction to production recording/ mixing and field recording. Subjects include microphone selection, basic acoustics, microphone techniques, single and dual system recording practices, and mixing. Several recording projects will be completed throughout the quarter.

FILM 401 or FILM 410 is a prerequisite for this class.

**POST 432 | PRODUCTION SOUND II | 4 quarter hours
(Graduate)**

This workshop based course expands on topics covered in Production Sound I. Students will advance their knowledge of pre-production, acoustics, and production recording/mixing techniques. Subjects include production management, microphone selection and techniques, advanced sound-for-camera workflows, professional dual system recording/ mixing practices, and post workflows. Several projects will be completed throughout the quarter.

POST 430 is a prerequisite for this class.

**POST 436 | ADVANCED SOUND RECORDING AND EDITING | 4 quarter hours
(Graduate)**

This workshop based course offers advanced sound recording and editing techniques. Subjects include voice processing, basic acoustics, room tone matching, sound effects recording, Foley recording, proximity processing, frequency analysis, and mixing. Several projects will be completed throughout the quarter.

POST 421 is a prerequisite for this class.

**POST 440 | COLOR CORRECTION | 4 quarter hours
(Graduate)**

Students acquire a working knowledge of the aesthetics and technical aspects of the post-production phase of color correction. Content addresses theory and application of color correction, image control, and manipulation techniques. Principles of color theory and the tools available to filmmakers engaged in the processes of electronic media and image manipulation are explored through lecture, interactive computer exercises, and hands-on experience with professional color correction software.

POST 400 or POST 401 is a prerequisite for this class.

**POST 444 | ADVANCED COLOR CORRECTION | 4 quarter hours
(Graduate)**

This class expands on topics covered in POST 440. Students will refine their skills in the areas of Primary, Secondary and Color FX room advanced grading techniques used by professional colorists. This class will explore more in detail colorist strategies, grading workflows, aesthetics and technical aspects of color correction for the digital cinema. Students will explore color correcting trends that are popular in feature films and national television commercials. Through a series of three short projects and a final project, students will practice using the techniques they study in class.

POST 440 is a prerequisite for this class.

**POST 448 | TITLE DESIGN | 4 quarter hours
(Graduate)**

This course explores the relationship between film and typography through an analysis of title design production in film, television, animation, and games. By studying examples from film and television history and the creative process behind those productions, students will develop an understanding of how to interpret and use typography to create narrative exposition on screen. Students will gain an appreciation and skill for working with text, image, and sound within time-based media that will add value, clarity, and sophistication to multimedia projects.

**POST 460 | SOUND AND MUSIC SYNTHESIS FOR FILM | 4 quarter hours
(Graduate)**

This course focuses on the integration of perception, theory, and practice using digital electronic sound synthesis to create custom sound effects and music for visual media. Topics will cover the use and creation of digital electronic sound synthesizers, audio mixing, acoustics, and the history of electronic music in film. Students will learn how to use synthesizers to create customized sonic designs as well as how to apply them to film, video, and interactive experiences. Projects and labs will incorporate real-world examples, practical tutorials, and lectures that will include guests working in audiovisual media, sound design, and electronic music composition for film.

POST 420 is a prerequisite for this class.

**POST 480 | POST-PRODUCTION WORKSHOP | 2-2.25 quarter hours
(Graduate)**

This two-credit course will provide an opportunity for students to apply their post-production skills and work collaboratively on projects happening during the academic year. These projects can be Project Bluelight (faculty or student-led), large-scale class projects, faculty creative projects, or independent and/or professional productions. Students will work under faculty supervision and gain valuable experience collaborating as part of post-production team. Professional post-production applications, equipment, and facilities will be utilized. **PREREQUISITE(S):** By instructor permission only. (2 quarter hours)

**POST 484 | POST-PRODUCTION SEMINAR | 4 quarter hours
(Graduate)**

This course is an overview of Post Production, from the end of production, through editing, to final delivery. Topics covered will include workflows, technical aspects, and the online environment. The focus will be on the best way to finish and deliver a film.

POST 400 or POST 401 is a prerequisite for this class.

**POST 488 | POST PRODUCTION WORKFLOWS | 4 quarter hours
(Graduate)**

This course explores the practices that underpin modern post production workflows. It considers a range of mediums and platforms, encompassing fiction and non-fiction story-telling. Students will learn how post is organized, across post departments, incorporating picture editing, music, sound design and audio post, titles, graphics and VFX. Topics include post production teams, individual responsibilities, scheduling, budgeting, collaboration and communication, mastering, delivery, archiving, and the impact of new and evolving technologies. Students will visit post-production companies to experience post professionals undertaking the varying roles.

**POST 490 | TOPICS IN POST-PRODUCTION SOUND (FORMERLY DC 416) | 4 quarter hours
(Graduate)**

Advanced study in post-production sound focusing on a specific area each quarter such as: A.D.R., Foley, Scoring, Sound Effects, Mixing, etc. May be repeated for credit.

**POST 491 | ADVANCED TOPICS IN EDITING | 4 quarter hours
(Graduate)**

This class will be an in-depth examination of an editor, editing style, or editing theory that has had a significant influence on the development of cinematic storytelling and expression. Through lectures, screenings, readings, discussions, and editing assignments, students will analyze the distinctive traits of the selected topic within the broader context of cinema history and culture. Editing projects will be assigned through the quarter. Specific topics will be selected by the instructor and will vary with each quarter.

**POST 495 | ESTABLISHING A CREATIVE INDEPENDENT BUSINESS | 4 quarter hours
(Graduate)**

Students will learn the necessities and considerations when beginning and operating a freelance business in a creative discipline. Students will develop their creative portfolios and the best method(s) of displaying them, generate legal agreements for project work and begin the process of building and selling their brand and promoting it's awareness. Students will also be introduced to accepted business practices in outreach and relationship management.

**POST 499 | INTERNSHIPS IN MEDIA AND DESIGN | 1-4 quarter hours
(Graduate)**

This is an internship/independent study course for graduate students, which offers the opportunity to reflect on an internship while gaining professional experience, industry contact and referrals while still in school. Opportunities in post-production, motion picture production, advertising, television, animation, game design, graphic design, motion graphics and interactive media can all qualify for the course. Students will work independently on class assignments. Assignments will be determined by the instructor and based on the number of credits in which the student is enrolled. Admission to the program requires consent of the internship course instructor after verification of the student's internship. **PREREQUISITE(S):** Internship. (variable credit)

**POST 500 | ADVANCED EDITING FOR THESIS | 4 quarter hours
(Graduate)**

Advanced concepts and techniques in picture editing for directors, such as re-directing, re-writing, pace, tone and rhythm, are taught in lecture and workshop. These concepts and techniques will be applied to the editing phase of MFA Cinema thesis films, culminating in picture lock.

Status as a Film & Television Directing MFA student is a prerequisite for this class.

**POST 520 | ADVANCED SOUND WORKSHOP FOR THESIS | 2-2.25 quarter hours
(Graduate)**

Advanced concepts and techniques in sound design for directors, such as supervising sound editing, foley, ADR, music and mixing, are taught in lecture and workshop. These concepts and techniques will be applied to the editing phase of MFA Cinema thesis films, culminating in a final sound mix. **PREREQUISITE(S):** POST 500.

**POST 580 | ADVANCED FINISHING WORKSHOP FOR THESIS | 2-2.25 quarter hours
(Graduate)**

Advanced concepts and techniques in film finishing for directors, such as supervising color correction, titling, visual effects and deliverables, are taught in lecture and workshop. These concepts and techniques will be applied to the finishing phase of MFA Cinema thesis films, culminating in final film delivery. **PREREQUISITE(S):** POST 500.

**POST 599 | INDEPENDENT STUDY | 1-8 quarter hours
(Graduate)**

Independent study form required. PREREQUISITE(S): Consent of instructor. (variable credit)

Film & TV Screenwriting (SCWR)

**SCWR 100 | INTRODUCTION TO SCREENWRITING | 4 quarter hours
(Undergraduate)**

This course is an introduction to and overview of the elements of theme, plot, character, and dialogue in dramatic writing for cinema. Emphasis is placed on telling a story in terms of action and the reality of characters. The difference between the literary and visual medium is explored through individual writing projects and group analysis. Films and scenes examined in this class will reflect creators and characters from a wide range of diverse backgrounds and intersectional identities. Development of a synopsis and treatment for a short theatrical screen play: theme, plot, character, mise-en-scene and utilization of cinematic elements.

**SCWR 101 | SCREENWRITING FOR MAJORS | 4 quarter hours
(Undergraduate)**

This course introduces digital cinema majors to dramatic writing for motion pictures. The topics covered include theme, plot, story structure, character, and dialogue. Emphasis is placed on telling a story in visual terms. Films and scenes examined in this class will highlight creators and characters from a wide range of diverse backgrounds and intersectional identities.

**SCWR 110 | INCLUSIVE REPRESENTATION IN FILM & TV | 4 quarter hours
(Undergraduate)**

This course will interrogate the representation of people and communities across a range of intersectional identities in film and television through the lens of creators. Through readings, screenings and discussions students will examine how marginalized groups have been represented on screen, identifying harmful and stereotypical depictions and erasures from the past to the present day. Students will learn creative tools and tactics to combat harmful representation and implement these tactics in their own creative work. Emphasis will be placed on the importance of research, lived experience, and authenticity to ensure inclusive and equitable representation across all media platforms.

**SCWR 120 | FILM STRUCTURE FOR MAJORS | 4 quarter hours
(Undergraduate)**

A critical analysis of three-act film structure as well as an introduction to alternative narrative structures including, but not limited to, dual protagonist, ensemble, and non-linear structures. Films of multiple genres and eras by creators with a diverse range of intersectional identities will be examined. Students will develop a cinematic language with which to discuss films as well as a toolbox of techniques to use when making films.

**SCWR 121 | CLASSIC HOLLYWOOD FILM STRUCTURE | 4 quarter hours
(Undergraduate)**

Critical analysis of successful Hollywood films and their narrative structures. Films of multiple genres and eras by creators with a diverse and intersectional range of identities will be examined. Students will learn how to recognize classical three-act structure in finished films and scripts. Students will develop a cinematic language with which to discuss films as well as a toolbox of techniques to use when making films. Key story concepts to be discussed include: protagonist, antagonist, want versus need, elements of the future, poetic justice, planting and payoff, catalyst, climax, and Aristotelian terminology.

**SCWR 122 | SCRIPT TO SCREEN | 4 quarter hours
(Undergraduate)**

This analytical course examines the screenplay's evolution to the screen from a writer's perspective. Students will read feature length scripts of varying genres and then perform a critical analysis and comparison of the text to the final produced versions of the films. Storytelling conventions such as structure, character development, theme, and the creation of tension will be used to uncover alterations and how these adjustments ultimately impacted the film's reception.

**SCWR 123 | ADAPTATION: THE CINEMATIC RECRAFTING OF MEANING | 4 quarter hours
(Undergraduate)**

This course explores contemporary cinematic adaptations of texts and how these recent re-workings in film allow for a critical analysis of the culture in which they are created, promoted and received. What issues have an impact upon the borrowing and reinterpreting of previous works? How, when, and where can we identify such borrowing and reinterpretations in multiple contemporary iterations of the same narratives?.

SCWR 100 or SCWR 101 is a prerequisite for this class.

**SCWR 150 | TELEVISION GENRES | 4 quarter hours
(Undergraduate)**

Students will analyze and discuss some of the most important and influential shows in television history. Students will learn all about the writer-centric form of scripted television, where it's been and where it's heading. Students study serials and procedurals, network and cable shows, principal leads, partnerships and ensembles, comedy and drama, prevalent themes, innovations in content and form, the impact of DVR, and the impact of the internet. Course Description: This analytical course examines the screenplay's evolution to the screen from a writer's perspective. Students will read scripts of varying genres and then perform a critical analysis and comparison of the text to the final produced versions of the series. Storytelling conventions such as structure, character development, theme, and tension will be used to uncover alterations and how these adjustments ultimately impacted the show's reception. In addition to series of various genres, students will examine shows by, for, and about a diverse range of intersectional characters and creators reflective of our communities.

**SCWR 151 | TELEVISION GENRES FOR MAJORS | 4 quarter hours
(Undergraduate)**

This analytical course examines the screenplay's evolution to the screen from a writer's perspective. Students will read scripts of varying genres and then perform a critical analysis and comparison of the text to the final produced versions of the series. Storytelling conventions such as structure, character development, theme, and tension will be used to uncover alterations and how these adjustments ultimately impacted the show's reception. In addition to series of various genres, students will examine shows by, for, and about a diverse range of intersectional characters and creators reflective of our communities.

**SCWR 210 | THE FUNDAMENTALS OF COMEDY | 4 quarter hours
(Undergraduate)**

This course explores how Chicago became the cultural hub for comedy in America and the vital role The Second City has played in the modern style of improvisation. Through lectures and screenings, students will explore the history of comedy theory and where the form is headed next.

**SCWR 240 | INTRODUCTION TO PITCHING | 4 quarter hours
(Undergraduate)**

This course focuses on creating an inventory of new material for future writing projects by developing and pitching stories for studio and independent films, as well as cable, streaming, and network television series. Students will analyze the vital role of pitching in the entertainment industry and build a foundation towards mastering professional pitching techniques.

SCWR 100 or SCWR 101 is a prerequisite for this class.

**SCWR 250 | INTRODUCTION TO TELEVISION WRITING | 4 quarter hours
(Undergraduate)**

This course focuses on writing the sitcom and one-hour drama television formats. Students will examine the conventions of serialized and procedural series and will learn how the collaborative dynamic of the writer's room impacts story. The lectures and workshop provide a foundation of what it takes to be a professional staff writer and culminate in crafting a spec episode of a current television series.

(SCWR 100 or SCWR 101) and (SCWR 150 or SCWR 151) are prerequisites for this class.

**SCWR 301 | STORY DEVELOPMENT | 4 quarter hours
(Undergraduate)**

This course is designed to help the emerging writer focus their creativity into a viable original project for a feature film. The lectures, workshops, and assignments are designed to enable the student to identify and develop material they have a strong personal connection to. Emphasis is placed on extensive research of the subject matter, creating memorable characters, and crafting a strong dramatic throughline.

(SCWR 100 or SCWR 101) and (SCWR 120 or SCWR 121) are prerequisites for this class.

**SCWR 302 | WRITING THE FEATURE SCREENPLAY | 4 quarter hours
(Undergraduate)**

This course focuses on completing the first draft of a feature length screenplay. Emphasis will be placed on a foundation of character, structure, plot, and theme to bring the writer's vetted concept to fruition. The lectures, in-class workshops, and aggressive page deadlines are designed to culminate in a spec screenplay that showcases voice and command of screenwriting conventions.

SCWR 301 is a prerequisite for this class.

**SCWR 303 | REWRITING THE FEATURE FILM SCRIPT | 4 quarter hours
(Undergraduate)**

This class focuses on practical ways to approach the rewriting process for feature film screenplays. Through group workshops and assignments, students isolate issues with plot, character development, dialogue and pacing in their script and work on addressing them in a full draft rewrite. Student must possess a complete feature length script in order to enroll in the course.

SCWR 302 is a prerequisite for this course.

**SCWR 305 | WRITING ON ASSIGNMENT | 4 quarter hours
(Undergraduate)**

Modeled after professional writing assignments, this advanced course challenges students to complete a feature length screenplay within specific parameters provided by the instructor in ten weeks. Lectures and strict weekly page submission deadlines provide a practical framework on how to write quickly without sacrificing quality. Constructive analysis will be used in discussing produced scripts, weekly assignments and group workshops to reveal the writer's unique voice and perspective.

SCWR 302 is a prerequisite for this course.

**SCWR 306 | SCENE WRITING | 4 quarter hours
(Undergraduate)**

This course focuses on analyzing and developing the fundamental building block of film and television writing: the scene. Students will gain a greater understanding of how to craft engaging scenes and refine their unique voice on the page through weekly lectures, writing exercises, and workshops.

SCWR 302 or SCWR 352 or SCWR 353 is a prerequisite for this course.

**SCWR 307 | ADAPTATION | 4 quarter hours
(Undergraduate)**

This course will explore the process of adapting existing material into a feature screenplay or teleplay. With the professor's guidance, students will choose material from the public domain to adapt, and then formulate a logline, short pitch, treatment, and first act of a feature screenplay (or two acts of a teleplay). Students will also be exposed to the process by which media rights to existing material can be obtained, should they wish to pursue intellectual property in the future.

SCWR 302 or SCWR 352 or SCWR 353 is a prerequisite for this course.

**SCWR 308 | WRITING THE SHORT FILM FOR PRODUCTION | 4 quarter hours
(Undergraduate)**

Students will study the essential elements and conventions for writing the short film including but not limited to character, structure, and tension. Students will write a polished short film (no longer than 25 pages) designed to be produced. Students will learn how to put together a professional proposal to apply for internal or external production funds and financing.

SCWR 100 or SCWR 101 is a prerequisite for this class.

**SCWR 309 | CHARACTER DEVELOPMENT | 4 quarter hours
(Undergraduate)**

This course will explore creative methodologies geared at getting deeply into the minds and points of view of dramatic characters. Throughout the course, students will concentrate on one set of characters to refine an existing web series, feature film, or television pilot.

SCWR 100 or SCWR 101 is a prerequisite for this class.

**SCWR 310 | ADVANCED SCREENWRITING LAB | 4 quarter hours
(Undergraduate)**

This advanced course is designed to take existing writing projects (including but not limited to features, pilots, television specs, web series, short scripts) at various stages of development and provide the practical means to move forward through constructive workshop sessions. Stories will be broken down to examine concept viability and the overall execution of the narrative. Instructor and peer critiques will challenge the writer to enhance their voice on the page with the goal of creating work that is unique, engaging, and commercial.

SCWR 100 or SCWR 101 is a prerequisite for this class.

**SCWR 341 | PITCHING SEMINAR | 4 quarter hours
(Undergraduate)**

This advanced course focuses on developing vetted story pitches for existing student projects and how to pitch a unique take on intellectual property. The lectures and in-class workshops will focus on preparing for pitch meetings with an emphasis on how to read the dynamics of a room and creating a unique brand that resonates with producers and executives.

SCWR 240 is a prerequisite for this class.

**SCWR 342 | FEATURE DEVELOPMENT | 4 quarter hours
(Undergraduate)**

This course offers a practical approach to the screenwriter's role in the development of a feature film. Emphasis will be placed on obtaining a greater understanding of narrative conventions, script analysis and the film market. From agents to studio executives, we will examine the varying points of view that comprise the development process. Constructive analysis will be used to break down feature length produced screenplays and student work. The assignments and class discussions are designed to expose the inner workings of Hollywood and provide a framework for what it takes to succeed in the entertainment industry.

SCWR 100 or SCWR 101 is a prerequisite for this class.

**SCWR 345 | HOLLYWOOD HISTORY | 4 quarter hours
(Undergraduate)**

Students will gain a deeper appreciation of the history of the Hollywood film industry through behind-the-scenes access to working studios and theme parks, historical readings, presentations and discussions.

**SCWR 346 | FILMMAKERS SEMINAR | 4 quarter hours
(Undergraduate)**

Each week, students will be given the rare opportunity to speak directly with some of the industry's biggest players. Hollywood directors, writers, cinematographers, editors, producers, agents, managers, entertainment lawyers, development executives and others will come to class, discuss their journeys, offer advice, and answer questions. The class will culminate with an industry mixer, where these professionals, along with dozens more, will join the students for a relaxed evening of networking. This is an invaluable opportunity for students to begin to form meaningful relationships that can help them as they transition from student to filmmaker. Note: Students must be participating in the DePaul LA program to be eligible to enroll.

**SCWR 349 | STORYTELLING FOR VIDEO GAMES | 4 quarter hours
(Undergraduate)**

This course examines the writer's role in the game development process and how storytelling conventions like character, conflict, and plot are utilized to enhance gameplay. Emphasis will be placed on building an understanding of game narratives, interactivity, and working with design teams. Students will develop a design document highlighting characters, locations, dialogue scripting, and overall gameplay for an original video game idea.

SCWR 100 or SCWR 101 is a prerequisite for this class.

**SCWR 352 | WRITING THE HALF-HOUR SERIES | 4 quarter hours
(Undergraduate)**

This course focuses on writing the half-hour television series. Students will explore unique characters, structure multiple storylines, and develop the overall series while creating an original pitch deck and half-hour pilot. **SCWR 250 is a prerequisite for this class.**

**SCWR 353 | WRITING THE HOUR-LONG TELEVISION SERIES | 4 quarter hours
(Undergraduate)**

This course focuses on writing the hour-long television series. Students will explore unique characters, structure multiple storylines, and develop the overall series while creating an original pitch deck and hour-long pilot. **SCWR 250 is a prerequisite for this class.**

**SCWR 354 | REWRITING THE ORIGINAL TELEVISION PILOT | 4 quarter hours
(Undergraduate)**

This class focuses on practical ways to approaching the process of rewriting a script; specifically this class will focus on students' original television pilots. Through group workshops, lectures, readings, and assignments, students identify and improve problems in various areas of their teleplay including, but not limited to: plot, character development, dialogue and pacing. By the end of the quarter, students will have completed a full rewrite of their complete pilot script; therefore, students must possess a complete television pilot in order to enroll in the course. This course is repeatable.

SCWR 352 or SCWR 353 is a prerequisite for this class.

**SCWR 355 | THE WRITER'S ROOM | 4 quarter hours
(Undergraduate)**

This course enables students to develop a television series in an advanced workshop setting modeled after a professional writer's room. Emphasis will be placed on pitching ideas, breaking story, and examining the various roles that make the writer's room a creative and dynamic environment.

SCWR 352 or SCWR 353 is a prerequisite for this class.

**SCWR 360 | WRITING THE INDEPENDENT TELEVISION SERIES | 4 quarter hours
(Undergraduate)**

Students will study the conventions for writing and producing the independent television series, including concept and character development, narrative structure, story-world, budget constraints, and audience. Series of various styles and genres by creators with a diverse range of intersectional identities will be examined. Students will write an original, short-form, five-episode series.

SCWR 100 or SCWR 101 is a prerequisite for this class.

**SCWR 361 | PRODUCING THE INDEPENDENT TELEVISION SERIES | 4 quarter hours
(Undergraduate)**

This course is an immersive introduction to video production for the independent television series. Students learn how to produce a short-form, five-episode, independent series. The course covers the basic principles of directing, budgeting, financing, casting, hiring talent, scheduling, securing locations, shooting, creating safe, diverse, and inclusive sets, controlling continuity, and gathering social media artifacts for a series. Students learn the production process from idea execution through production.

SCWR 360 is a prerequisite for this class.

**SCWR 362 | MARKETING AND DISTRIBUTING THE INDEPENDENT TELEVISION SERIES | 4 quarter hours
(Undergraduate)**

Students study online marketing and distribution models for independent television in order to develop and prepare to launch their own independent series or pilot. Topics covered include: platform options, social media outreach, participatory culture, the unique qualities of online communities, press kits, the role of film festivals, and shifts in digital exhibition and distribution.

SCWR 361 or FILM 115 or CP 360

**SCWR 365 | SHOWRUNNING I | 4 quarter hours
(Undergraduate)**

This course provides an overview of the evolution of the Showrunner in network television, cable, and streaming media. Students will analyze how the success of a series is dependent on an astute Showrunner who knows how to handle the creative, financial, and managerial aspects of putting on a show. Emphasis will be placed on the vital role these executive producers play in the three stages of production to ensure the actualization and continuity of their artistic vision.

SCWR 250 is a prerequisite for this class.

**SCWR 366 | SHOWRUNNING II | 4 quarter hours
(Undergraduate)**

This advanced course enables students to take on the role of the Showrunner for the packaging and preproduction of an original television or web series. Through hands-on exercises, students will use their creative sensibilities and business acumen to develop a viable show bible, style guide, budget and schedule for a self-produced production or as part of a network pitch package.

SCWR 365 is a prerequisite for this class.

**SCWR 370 | CREATING FROM ABUNDANCE | 4 quarter hours
(Undergraduate)**

This course lays the foundation for successful improvisation in the current Chicago style, starting with the formation of the ensemble and exploring various elements of the creative process. Students experience what it means to be a part of a larger whole, create freely without self-judgement, and develop tools of play that will make them better communicators and filmmakers.

**SCWR 371 | CREATING COMEDIC CHARACTERS | 4 quarter hours
(Undergraduate)**

The essence of a good improvised scene is provided by strong character work. This course gives students a wealth of tools to create a variety of cinematic characters, each one driven by a unique perspective. They will continue to build on the fundamental skills of collaboration, play, and active listening while bringing more of themselves into their filmmaking.

SCWR 370 is a prerequisite for this class.

**SCWR 372 | IMPROVISATIONAL SCENE CONSTRUCTION | 4 quarter hours
(Undergraduate)**

This advanced course focuses on the mechanics of the various forms that an improvised scene can take. Students learn to build off character and premise to develop a fully fleshed out scene with a strong comedic arc. Emphasis will be placed on breaking down the aesthetic devices that comprise a cinematic scene.

SCWR 371 is a prerequisite for this class.

**SCWR 373 | TOPICS IN COMEDY | 4 quarter hours
(Undergraduate)**

This course features an in-depth study of comedy focusing on an aesthetic, history, or filmmaking method. Students will analyze the distinctive traits of the selected topic within the broader context of comedy film and television. Specific topics will be selected by the instructor and will vary with each quarter.

**SCWR 374 | EVOLUTION OF COMEDY | 4 quarter hours
(Undergraduate)**

This course examines the language, physicality, and structure of some of the most revered comedic films and television shows of all time. Students will analyze and discuss the conventions utilized in these works, how they influenced the era in which they were made, and what relevance they have to comedy filmmaking today.

SCWR 210 is a prerequisite for this class.

**SCWR 375 | COMEDIC STORYTELLING | 4 quarter hours
(Undergraduate)**

This course focuses on the most influential comedy writers from antiquity to today. Emphasis will be placed on the context for when these works were created, how they were received at the time, and how these pieces remain relevant. Students will immerse themselves in comedic structure and storytelling to build a frame of reference and to craft a distinct voice as a filmmaker.

SCWR 374 is a prerequisite for this class.

**SCWR 376 | THE BUSINESS OF COMEDY | 4 quarter hours
(Undergraduate)**

In this course, students explore the process of preparing to enter the professional marketplace as comedy writers. Emphasis will be placed on strategically evaluating the unique voice of existing projects for commercial viability, and curating a portfolio suitable for market demands and distribution trends.

SCWR 374 is a prerequisite for this class.

**SCWR 377 | STAND-UP COMEDY | 4 quarter hours
(Undergraduate)**

In this course, students will study and analyze stand-up comedy as a route to success in Film and Television. Students will learn about the history of stand up comedy and the comedians who parlayed success on the stage into success in television and films. Students will study the process of how comedians first created their material and honed/perfected it on stages around the world. Finally, students will mine their own lives for funny stories, creating original stand-up comedy routines (5 minutes), work-shopping them in class and eventually performing these routines on the Main Stage at Zanies Comedy Club.

**SCWR 378 | ADVANCED STAND UP COMEDY | 4 quarter hours
(Undergraduate)**

Students will focus on developing an original comedy set 5-10 minutes of original material connected conceptually and/or tonally then taking it from stage-to-screen. Students will create and develop their material in class, perform in front of peers, perform out at comedy clubs all in the service of crafting an original pitch for a longer project for the screen (web series, a TV show or movie).

FILM 184 or SCWR 377 is a prerequisite for this class.

**SCWR 379 | COMEDY, JOKE, AND SKETCH WRITING | 4 quarter hours
(Undergraduate)**

Students will learn techniques and formulas for joke writing, writing sketch comedy packages, and writing for news driven comedy shows. Students will apply these skills to their existing scripts as well as to developing new material.

SCWR 100 or SCWR 101 is a prerequisite for this class.

**SCWR 380 | COMEDY PRODUCTION | 4 quarter hours
(Undergraduate)**

This course introduces students to the collaborative nature of comedy film production. Emphasis is placed on discovering stories and characters with the creation of a short comedic non-fiction film. Building on that, students ideate, pitch, and produce short narrative film concepts to become proficient with current comedic filmmaking techniques.

SCWR 370 is a prerequisite for this class.

**SCWR 381 | COMEDY PRODUCTION II | 4 quarter hours
(Undergraduate)**

This course focuses on developing comedy filmmaking skills by refining the creative voice and technical proficiency. Students ideate, craft, and revise a short comedic script for production. This project then moves to the pre-production phase where emphasis is placed on casting, scouting, budgeting, and crew collaboration to ensure continuity of the comedic vision. Principal photography, editing, and final delivery of this project will be completed in SCWR 382 Comedy Production III.

SCWR 380 is a prerequisite for this class.

**SCWR 382 | COMEDY PRODUCTION III | 4 quarter hours
(Undergraduate)**

This advanced comedy filmmaking course focuses on the principal photography, editing, and final delivery of the project that originated in SCWR 381 Comedy Production II. Students will continue to hone their skills as directors, value the holistic fashion in which films are made by serving in different crew positions, and ensure the continuity of their comedic vision through the post-production workflow process.

SCWR 381 is a prerequisite for this class.

**SCWR 385 | DIRECTING COMEDY FOR FILM | 4 quarter hours
(Undergraduate)**

This course focuses on effective techniques for directing actors in comedy. Students will delve into text analysis, explore possibilities that reside within written works and craft comedic performances in scenes for film and television projects. Emphasis is put on effective casting, the importance of collaboration, and honing a unique point of view.

DC 210 and SCWR 376 are prerequisites for this class.

**SCWR 386 | DIRECTING COMEDY FOR FILM II | 4 quarter hours
(Undergraduate)**

This course is an on-camera workshop with a focus on crew collaboration and directing screen performances with actors. Students will prep, cast, rehearse and direct select scene exercises, which will be edited to understand the holistic approach to comedy filmmaking.

SCWR 385 is a prerequisite for this class.

**SCWR 390 | TOPICS IN SCREENWRITING | 4 quarter hours
(Undergraduate)**

Advanced study in screenwriting focusing on a specific genre each quarter such as: Science Fiction, Film Noir, Comedy, Action-Adventure, Nonfiction, etc. May be repeated for credit.

SCWR 100 or SCWR 101 is a prerequisite for this class.

**SCWR 392 | TOPICS IN LA | 2-6 quarter hours
(Undergraduate)**

This course features an in-depth study of an aesthetic, history, business or filmmaking method. Students will analyze the distinctive traits and application of the selected topic within the broader context of the film and television industry in Los Angeles. Specific topics will be selected by the instructor and will vary with each quarter.

**SCWR 397 | SCREENWRITING CAPSTONE I | 4 quarter hours
(Undergraduate)**

This course is the first half of a two-course sequence that provides students with a screenwriting capstone experience centered on the creation of an original feature-length screenplay, original television series pilot, or a full web series script. Students will develop an outline and treatment or series bible in preparation for writing the first draft of their capstone project. The development process will include assignments designed to aid students in enhancing workflow, honing the writer's unique voice, and preparing documents for the next steps in their careers, by drawing on concepts from their major and Liberal Studies coursework.

SCWR 302 or SCWR 352 or SCWR 353 is a prerequisite for this course.

**SCWR 398 | SCREENWRITING CAPSTONE II | 4 quarter hours
(Undergraduate)**

This course is the second half of a two-course sequence that provides students with a screenwriting capstone experience centered on the creation of an original feature length screenplay, original television series pilot or a full web series script. Students will write the first draft of their capstone project. The writing process will include assignments designed to aid students in enhancing workflow, honing the writer's unique voice, and preparing documents for the next steps in their careers, by drawing on concepts from their major and Liberal Studies coursework. The course sequence is designed to be taken in two consecutive quarters.

SCWR 397 is a prerequisite for this class.

**SCWR 399 | INDEPENDENT STUDY | 4 quarter hours
(Undergraduate)**

Variable credit. PREREQUISITE(S): Consent of dean.

**SCWR 400 | FOUNDATIONS OF SCREENWRITING | 4 quarter hours
(Graduate)**

Students begin their screenwriting journey with a strong foundation in the basic building blocks of solid, engaging storytelling. Students will mine their own lives in order to create memorable stories, characters, and settings. Films and other creative works analyzed in this class will reflect creators and stories from underrepresented groups, highlighting a wide range of diverse backgrounds and intersectional identities. Additionally, students will learn basic screenwriting skills such as character development, constructing atmosphere, and the fundamental components of a scene.

**SCWR 401 | WRITING THE FEATURE I | 4 quarter hours
(Graduate)**

This course focuses on creating a vetted concept and step outline for a feature length screenplay. Emphasis is put on idea origination and world building, forming engaging characters, and structuring an affecting plot with cause and effect storytelling. Through script readings, weekly assignments, and in-class workshops, students will hone their unique voice to craft the dramatic template for a cinematically viable story.

SCWR 400 and (SCWR 425 or SCWR 474) are prerequisites for this class.

**SCWR 402 | WRITING THE FEATURE II | 4 quarter hours
(Graduate)**

This course focuses on completing the first draft of a feature length screenplay. Students will bring their vetted concepts to life on the page by focusing on a foundation of character, theme, structure, and plot. The lectures, in-class workshops, and weekly page deadlines are designed to culminate in a spec script that showcases the writer's voice and command of screenwriting conventions .

SCWR 401 or SCWR 490 is a prerequisite for this class.

**SCWR 403 | REWRITING THE FEATURE | 4 quarter hours
(Graduate)**

This class focuses on rewriting the feature film screenplay. Through workshops and course discussions, students will learn how to identify missteps in their writing and develop a practical means to efficiently address these issues moving forward. Students must possess a complete feature length script to rewrite in order to enroll in the course.

SCWR 402 is a prerequisite for this class.

**SCWR 404 | INCLUSIVE SCREENWRITING | 4 quarter hours
(Graduate)**

This advanced course offers a critical exploration of how the storytelling practices central to creating film and television shape and reflect social constructions of race, gender, sexuality, class, ability, and more. Through readings, lectures, screenings, and screenplay analysis students examine how traditional Hollywood paradigms perpetuate harmful representation in order to reimagine their creative practices towards writing stories that reflect and honor a wide range of communities, perspectives, and intersectional identities.

**SCWR 405 | ADVANCED WRITING ON ASSIGNMENT | 4 quarter hours
(Graduate)**

This course provides a framework for students to complete a feature length screenplay within specific parameters provided by the instructor in ten weeks plus an additional treatment that would compliment their existing portfolio. Modeled after the techniques and deadlines of professional writing assignments, students learn how to meet the expectations of studio executives and producers without sacrificing their unique voice. PREREQUISITE(S): None.

**SCWR 406 | THE ART OF SCENE WRITING | 4 quarter hours
(Graduate)**

This advanced course asks students to move beyond convention in an effort to deconstruct the core elements of a scene: location, subject, conflict, and exposition. Through weekly lectures, writing exercises, and workshops we will examine a number of innovative screenwriting techniques to refine the writer's unique voice and enhance the commercial viability of their work.

SCWR 400 is a prerequisite for this class.

**SCWR 407 | SCREEN ADAPTATION | 4 quarter hours
(Graduate)**

This advanced course focuses on identifying and developing source material for the screen. Emphasis is placed on learning to negotiate the public domain when searching for material to adapt., as well as practical ways to acquire copyrighted material. Students will choose material from the public domain to adapt, and then formulate a logline, short pitch, treatment, and first act of a feature screenplay (or two acts of a teleplay).

**SCWR 408 | WRITING THE SHORT MOTION PICTURE | 4 quarter hours
(Graduate)**

In this screenwriting course students will study the essential elements and conventions of writing the short film, including character, structure, and conflict. They will examine the fundamental differences between feature and short films. Story development emphasis will be placed on compelling character-driven stories that can be produced on a modest budget. Students will be required to complete two short screenplays. PREREQUISITE(S): None.

**SCWR 409 | CHARACTER DEVELOPMENT | 4 quarter hours
(Graduate)**

This advanced course will explore creative methodologies geared at getting deeply into the minds and points of view of dramatic characters. Throughout the course, students will concentrate on one set of characters to refine an existing web series, feature film, or television pilot.

**SCWR 410 | SCREENWRITING LAB | 4 quarter hours
(Graduate)**

This course focuses on instructor led workshop sessions to help writers take existing projects (including but not limited to features, pilots, television specs, web series, short scripts) at various stages of development and provide a means to move forward. Story will be deconstructed, from concept to individual scene work, in an effort to craft a viable narrative for the screen. PREREQUISITE(S): None.

**SCWR 420 | STORY STRUCTURES | 4 quarter hours
(Graduate)**

Advanced critical analysis of multiple film structures beginning with a solid understanding of classically structured linear narratives told in three acts and ultimately exploring non-traditional feature film structures including but not limited to: ensemble, multiple protagonist, non-linear and episodic. Films will range from classic Hollywood films to contemporary independent films. Students will learn various theorists' approaches to terminology (which may include Snyder, Field, Campbell, and Howard) in order to develop a language with which to discuss scripts and finished films, both other people's work as well as in developing their own. PREREQUISITE(S): None.

**SCWR 425 | GENRE STORYTELLING | 4 quarter hours
(Graduate)**

This advanced course examines the dramatic conventions of genre storytelling in film and television. Through extensive script readings and discussions, students will deconstruct the common features of genre in an effort to discern audience expectations and develop a methodology for narrative innovation in their own work. In addition to evaluating films and series of varying genres, students will examine work by, for, and about a diverse range of intersectional characters and creators reflective of our communities.

**SCWR 440 | DEVELOPING THE PITCH | 4 quarter hours
(Graduate)**

In this course, students will create an inventory of new material for future writing projects by developing and pitching stories for independent and studio films, as well as cable, streaming, and network television series. Through lectures, guest speakers, and workshop exercises, we will analyze the vital role of pitching in the entertainment industry, and build a foundation to help students master professional pitching techniques. Students will seek to mine their own lives, using their diverse backgrounds, experiences, and identities to highlight their unique perspectives in the projects they pitch.

**SCWR 441 | INDUSTRY AND PITCHING SEMINAR | 4 quarter hours
(Graduate)**

Students will learn the art and craft of pitching including the differences between pitching new or existing ideas, shaping pitches based on your audience, and pitching a take on existing source material. Students will also learn not only how to pitch projects, but to pitch themselves, focusing on what makes them unique as a writer/director/producer, the themes that connect their work, and how to present themselves as a brand. Industry professionals will visit class (live or via Skype) when appropriate. Students will also learn how to create pitches for existing material that is either in the common domain or material that the students have acquired the rights to work on.

**SCWR 442 | STUDIO DEVELOPMENT | 4 quarter hours
(Graduate)**

This advanced course examines the development process that enables the screenplay's journey from draft to screen. By crafting professional coverage and development notes, the class will deconstruct feature length scripts and student work in an effort to forge them into cinematically viable properties. The assignments and class discussions are designed to expose the inner workings of Hollywood and provide a framework for what it takes to succeed in the entertainment industry. Enrollment is only open to MFA students. PREREQUISITE(S): None.

**SCWR 445 | HOLLYWOOD HISTORY | 4 quarter hours
(Graduate)**

Students will gain a deeper appreciation of the history of the Hollywood film industry through behind-the-scenes access to working studios and theme parks, historical readings, presentations and discussions.

**SCWR 446 | FILMMAKERS SEMINAR | 4 quarter hours
(Graduate)**

Each week, students will be given the rare opportunity to speak directly with some of the industry's biggest players. Hollywood directors, writers, cinematographers, editors, producers, agents, managers, entertainment lawyers, development executives and others will come to class, discuss their journeys, offer advice, and answer questions. The class will culminate with an industry mixer, where these professionals, along with dozens more, will join the students for a relaxed evening of networking. This is an invaluable opportunity for students to begin to form meaningful relationships that can help them as they transition from student to filmmaker. Note: Students must be participating in the DePaul LA program to be eligible to enroll.

**SCWR 449 | STORYTELLING FOR VIDEO GAMES | 4 quarter hours
(Graduate)**

This course examines the writer's role in the game development process and how storytelling conventions like character, conflict, and plot are utilized to enhance gameplay. Emphasis will be placed on building an understanding of game narratives, interactivity, and working with design teams. Students will develop a design document highlighting characters, locations, dialogue scripting, and overall gameplay for an original video game idea.

**SCWR 450 | TELEVISION GENRES AND ANALYSIS | 4 quarter hours
(Graduate)**

The purpose of this class is to enable you to study scripted television from the professional's point of view. The course involves critical analysis of successful scripted television shows, their narrative structures and themes. Programs of various genres and eras will be examined. Students will learn how to recognize basic structural elements in finished episodes. Students will develop a language with which to discuss television as well as a toolbox of techniques to use when creating television. Key concepts to be discussed include: basic structure, types of shows, character tropes, means of creating and sustaining tension, themes and advancements in form.

**SCWR 451 | WRITING THE TELEVISION SPEC SCRIPT | 4 quarter hours
(Graduate)**

In this class, students will learn the basic teleplay structures for both half-hour and hour-long television shows. Students will choose an existing show and write a spec episode, practicing the skills of matching character voice, structure, and tone.

**SCWR 452 | WRITING THE HALF-HOUR SERIES | 4 quarter hours
(Graduate)**

This course focuses on writing the half-hour television series. Students will explore unique characters, structure multiple storylines, and develop the overall series while creating an original pitch deck and half-hour pilot. **SCWR 451 is a prerequisite for this class.**

**SCWR 453 | WRITING THE HOUR-LONG SERIES | 4 quarter hours
(Graduate)**

This course focuses on writing the hour-long television series. Students will explore unique characters, structure multiple storylines, and develop the overall series while creating an original pitch deck and hour-long pilot. **SCWR 451 is a prerequisite for this class.**

**SCWR 454 | REWRITING THE ORIGINAL TELEVISION PILOT | 4 quarter hours
(Graduate)**

This class focuses on practical ways to approaching the rewriting of a script; specifically this class will focus on students' original television pilots. Through group workshops, lectures, and readings, students will identify and improve problems in various areas of their teleplay including, but not limited to: plot, character development, dialogue, and pacing. By the end of the quarter, students will have completed a full rewrite of their complete pilot script; therefore, students must possess a complete television pilot in order to enroll in the course. This course is repeatable. **SCWR 452 or SCWR 453 is a prerequisite for this class.**

**SCWR 455 | ADVANCED WRITERS' ROOM | 4 quarter hours
(Graduate)**

This advanced course provides students the opportunity to develop a television series in a workshop setting modeled after a professional writers' room. From Writer's Assistant to Showrunner, we will examine the various roles that make the writers' room a creative and dynamic environment. Students will pitch ideas, break story, and ultimately uncover strategies to running the room for a full season. **SCWR 452 or SCWR 453 is a prerequisite for this class.**

**SCWR 460 | WRITING THE INDEPENDENT TELEVISION SERIES | 4 quarter hours
(Graduate)**

Students will study the conventions for writing and producing the independent television series, including concept and character development, narrative structure, story-world, budget constraints, and audience. Series of various styles and genres by creators with a diverse range of intersectional identities will be examined. Students will write an original, short-form, five-episode series.

SCWR 400 is a prerequisite for this class.

**SCWR 461 | WEB SERIES PRODUCTION | 4 quarter hours
(Graduate)**

This course is an immersive introduction to video production for the web. Students learn how to produce a five-episode web series. The course covers the basic principles of directing, budgeting, financing, casting, hiring talent, scheduling, securing locations, shooting, controlling continuity, and gathering social media artifacts for a series. Students learn the production process from idea execution through production and will work in teams producing two web series.

SCWR 460 is a prerequisite for this class.

**SCWR 462 | MARKETING AND DISTRIBUTING THE WEB SERIES | 4 quarter hours
(Graduate)**

Students study online marketing and distribution models for web television in order to develop and implement the launch of their own series. Topics covered include: platform options, social media outreach, participatory culture, press kits, and the role of film festivals.

SCWR 461 is a prerequisite for this class.

**SCWR 465 | SHOWRUNNING I | 4 quarter hours
(Graduate)**

This course provides an overview of the evolution of the Showrunner in network television, cable, and streaming media. Students will analyze how the success of a series is dependent on an astute Showrunner who knows how to handle the creative, financial, and managerial aspects of putting on a show. Emphasis will be placed on the vital role these executive producers play in the three stages of production to ensure the actualization and continuity of their artistic vision.

SCWR 451 is a prerequisite for this class.

**SCWR 466 | SHOWRUNNING II | 4 quarter hours
(Graduate)**

This advanced course enables students to take on the role of the Showrunner for the packaging and pre-production of an original television or web series. Through hands-on exercises, students will use their creative sensibilities and business acumen to develop a viable show bible, style guide, budget and schedule for a self-produced production or as part of a network pitch package.

SCWR 465 is a prerequisite for this class.

**SCWR 470 | CREATING FROM ABUNDANCE | 4 quarter hours
(Graduate)**

This course focuses on building a foundation for comedy improvisation as it pertains to creating cinematic stories. Students will develop the skills to work in a collaborative environment steeped in the tradition of Chicago-style techniques and philosophies. Fundamental improvisational concepts such as give-and-take, surrender, support, mirror, explore-and-heighten, environment, object work, scenic structure, character and choices, will be explored in-depth and applied in scenes.

**SCWR 471 | CREATING COMEDIC CHARACTERS | 4 quarter hours
(Graduate)**

Students delve into intermediate improvisation work with a focus on collaboration to identify premise, intention, point of view, and a character's usable subtext in a scene. Emphasis is placed on adapting improvised creations into a foundation for film and television material.

SCWR 470 is a prerequisite for this class.

**SCWR 472 | IMPROVISATIONAL SCENE CONSTRUCTION | 4 quarter hours
(Graduate)**

This advanced course explores the intersection between improvisation and the screenwriting process. Emphasis will be placed on the structures that comedic moments can take, from joke construction through longer narrative forms. Students will develop basic concepts into polished written scenes and will revise using targeted improvisations.

SCWR 471 is a prerequisite for this class.

**SCWR 474 | EVOLUTION OF COMEDY | 4 quarter hours
(Graduate)**

This course examines the language, physicality, and structure of some of the most revered comedic films and television shows of all time. Students will analyze and discuss the conventions utilized in these works, how they influenced the era in which they were made, and what relevance they have to comedy filmmaking today.

**SCWR 475 | ADVANCED COMEDIC STORYTELLING | 4 quarter hours
(Graduate)**

This course immerses students in the great tradition of comedic literature and gives them a strong foundation in all its forms. Students will read works from the classic comedic authors canon: Shakespeare, Plutarch, Parker, Gay, Toole among others. Students will learn how these seminal works were created, how they were received by the public, and how they have influenced contemporary cinematic storytelling.

DC 501 is a prerequisite for this class.

**SCWR 476 | THE BUSINESS OF COMEDY | 4 quarter hours
(Graduate)**

In this course, students explore the process of preparing to enter the professional marketplace as comedy writers. Emphasis will be placed on strategically evaluating the unique voice of existing projects for commercial viability, and curating a portfolio suitable for market demands and distribution trends.

SCWR 474 is a prerequisite for this class.

**SCWR 477 | STAND-UP COMEDY | 4 quarter hours
(Graduate)**

In this course, students will study and analyze stand-up comedy as a route to success in Film and Television. Students will learn about the history of stand up comedy and the comedians who parlayed success on the stage into success in television and films. Students will study the process of how comedians first created their material and honed/perfected it on stages around the world. Finally, students will mine their own lives for funny stories, creating original stand-up comedy routines (5 minutes), work-shopping them in class and eventually performing these routines on the Main Stage at Zanies Comedy Club.

**SCWR 478 | ADVANCED STAND-UP COMEDY | 4 quarter hours
(Graduate)**

Students will focus on developing an original comedy set 5-10 minutes of original material connected conceptually and/or tonally then taking it from stage-to-screen. Students will create and develop their material in class, perform in front of peers, perform out at comedy clubs all in the service of crafting an original pitch for a longer project for the screen (web series, a TV show or movie).

SCWR 477 is a prerequisite for this class.

**SCWR 479 | COMEDY, JOKE, AND SKETCH WRITING | 4 quarter hours
(Graduate)**

Students will learn techniques and formulas for joke writing, writing sketch comedy packets, and writing for news driven comedy shows. Students will apply these skills to their existing scripts as well as to developing new material.

**SCWR 480 | COMEDY FILMMAKING | 4 quarter hours
(Graduate)**

This introduction to film production focuses on collaboration, comedy and visual storytelling. Drawing on individual interests and observations, students produce a non-fiction short and then transition to developing a series of comedic narrative filmmaking exercises.

SCWR 476 is a prerequisite for this class.

**SCWR 481 | COMEDY FILMMAKING II | 4 quarter hours
(Graduate)**

In this course, students refine their filmmaking skills by meticulously climbing through the stages of pre-production for their original short comedy film. Students ideate, craft, and revise their screenplay, then prepare for production by casting, scouting, budgeting, and rehearsing. Principal photography, editing, and final delivery of this project should be completed in SCWR 482 Comedy Filmmaking III.

SCWR 480 is a prerequisite for this class.

**SCWR 482 | COMEDY FILMMAKING III | 4 quarter hours
(Graduate)**

In this advanced comedy filmmaking course, students will focus on the principal photography, editing, and final delivery of their original projects developed in SCWR 481 Comedy Filmmaking II. Reinforcing the importance of collaboration, students will work in different capacities on the projects of their classmates. Emphasis is placed on refining filmmaking skills and ensuring the continuity of the director's comedic vision through the post-production workflow process.

SCWR 481 is a prerequisite for this class.

**SCWR 490 | TOPICS IN SCREENWRITING | 4 quarter hours
(Graduate)**

Advanced study in screenwriting focusing on a specific genre each quarter such as: Science Fiction, Film Noir, Comedy, Action-Adventure, Nonfiction, etc. May be repeated for credit.

**SCWR 492 | TOPICS IN LA | 2-6 quarter hours
(Graduate)**

This course features an in-depth study of an aesthetic, history, business or filmmaking method. Students will analyze the distinctive traits and application of the selected topic within the broader context of the film and television industry in Los Angeles. Specific topics will be selected by the instructor and will vary with each quarter.

**SCWR 499 | INTERNSHIPS IN MEDIA AND DESIGN | 1-4 quarter hours
(Graduate)**

This is an internship/independent study course for graduate students, which offers the opportunity to reflect on an internship while gaining professional experience, industry contact and referrals while still in school. Opportunities in post-production, motion picture production, advertising, television, animation, game design, graphic design, motion graphics and interactive media can all qualify for the course. Students will work independently on class assignments. Assignments will be determined by the instructor and based on the number of credits in which the student is enrolled. Admission to the program requires consent of the internship course instructor after verification of the student's internship. **PREREQUISITE(S):** Internship. (variable credit)

**SCWR 500 | WRITING FOR FILM THESIS DEVELOPMENT | 4 quarter hours
(Graduate)**

Students will develop a feature-length thesis project in preparation for writing the first draft of their thesis screenplay. The development process will include assignments designed to aid students in choosing their thesis project, fostering a strong personal connection to that project, creating compelling three-dimensional characters, and designing a clear, effective narrative structure for the screenplay. This course will culminate with a completed outline or treatment, and a pitch session with each student's thesis committee.

SCWR 400 and (SCWR 451 or SCWR 401) are prerequisites for this class.

**SCWR 501 | WRITING FOR FILM THESIS I | 4 quarter hours
(Graduate)**

Students will complete an outline and first draft of their feature length screenplay. In a workshop environment, students will get extensive feedback from their instructor and peers.

SCWR 500 or SCWR 550 is a prerequisite for this class.

**SCWR 502 | WRITING FOR FILM THESIS II | 4 quarter hours
(Graduate)**

Students will revise their thesis feature script. In a workshop environment, students will receive notes to help revise their project. Students will also be expected to meet with their thesis committee to receive additional notes to be applied to the rewrite.

SCWR 501 is a prerequisite for this class.

**SCWR 550 | WRITING FOR TV THESIS DEVELOPMENT | 4 quarter hours
(Graduate)**

Students will select and then develop a television thesis project in preparation for writing the first draft of their thesis pilot. The development process will include assignments designed to aid students in choosing their thesis project, fostering a strong personal connection to that project, and creating compelling three-dimensional characters in a world or situation that will provide sustainable long-term conflict. The course will culminate with a completed show bible, an outline for the pilot, and a pitch session with each student's thesis committee.

SCWR 400 and (SCWR 401 or SCWR 402) are prerequisites for this class.

**SCWR 551 | WRITING FOR TV THESIS I | 4 quarter hours
(Graduate)**

Students will complete a show bible, pilot, and future episode of an original television concept. In a workshop environment, students will get extensive feedback from their instructor and peers.

SCWR 500 or SCWR 550 is a prerequisite for this class.

**SCWR 552 | WRITING FOR TV THESIS II | 4 quarter hours
(Graduate)**

Students will revise their television thesis scripts. In a workshop environment, students will receive notes to help revise their project. Students will also be expected to meet with their thesis committee to receive additional notes to be applied to the rewrite.

SCWR 551 is a prerequisite for this class.

**SCWR 599 | INDEPENDENT STUDY | 1-8 quarter hours
(Graduate)**

Independent study form required. **PREREQUISITE(S):** Consent of instructor. (variable credit)

**SCWR 701 | THESIS CONTINUATION | 0 quarter hours
(Graduate)**

Non-credit. Students admitted to MFA program who have completed all the required coursework and who are regularly using the facilities of the University for thesis production and/or post-production are required to be registered each quarter of the academic year until the thesis and defense have been completed. (0 credit hours)

FILM 510 or ANI 640 is a prerequisite for this class.

Finance (FIN)

**FIN 202 | QUANTITATIVE REASONING | 2 quarter hours
(Undergraduate)**

This course is designed to provide students with an overview of basic statistical tools of financial analysis. Students will become familiar with the design and application of spreadsheet models for the analysis of financial data and tests of hypotheses. (2 quarter hours)

FIN 310 is a prerequisite for this class.

**FIN 205 | LEARNING AND TEACHING FINANCIAL LITERACY | 4 quarter hours
(Undergraduate)**

Learn the fundamentals of financial literacy and teach these concepts to leaders of Chicago community groups that focus on helping limited-resource individuals.

**FIN 250 | CAREER EXPLORATION & PROFESSIONAL DEVELOPMENT | 2 quarter hours
(Undergraduate)**

This course is designed to help students articulate specific goals and implement strategies to successfully pursue career opportunities and help to develop a professional persona. Students will fine-tune their professional resume, begin to establish a personal brand, practice a variety of professional communications, and hone their interviewing skills. Students will participate in a variety of activities including lectures, assignments, and group collaboration.

Students must be intended or declared Finance majors to take this course.

FIN 251 | CAREER MANAGEMENT IN ACTUARIAL SCIENCE | 0 quarter hours**(Undergraduate)**

This course is designed to help you articulate your specific goals and implement strategies to successfully pursue opportunities as an Actuarial Science graduate and 21st century professional. You will fine-tune your professional resume, begin to establish your personal brand, practice a variety of professional communications, and hone your professional interviewing skills. Students will participate in a variety of activities including lectures, assignments, and group collaboration.

Status as a BSB Actuarial Science major or BS Actuarial Science major or BA/BS Math major with a concentration in Actuarial Science is a prerequisite for this class.

FIN 290 | FINANCE FOR NON-BUSINESS MAJORS | 4 quarter hours**(Undergraduate)**

This course will provide to non-business majors a foundation in the concepts and basic tools used in finance and financial management of the business firm, including time value of money, risk and return, interest rates and how companies raise money and reward their investors. Students will be able to understand at a basic level the financial statements, ratios and performance measures and financial markets and institutions they are likely to encounter in a general business environment. Students will also learn how to analyze and make more effective the operations of the firm from a financial perspective.

FIN 310 | INTRODUCTION TO FINANCE | 4 quarter hours**(Undergraduate)**

This course introduces students to the logic, principles, institutions, and terminology of finance. The goal of the course is to provide students with a basic understanding of the role of finance and its functions. It is designed to familiarize the students with tools necessary for making sound financial decisions, both at a personal level and at an enterprise level.

ACC 101, ECO 105, MAT 137 are prerequisites for this class. For Actuarial Science majors, ACC 101, ECO 105 and MAT 150 are prerequisites for this class.

FIN 311 | CORPORATE FINANCE | 4 quarter hours**(Undergraduate)**

The goal of the course is to provide students with the basic tools and theoretical background necessary to understand the corporate financial decision making process. Emphasis is on valuation principles with application to bonds, stocks, and capital budgeting as well as issues involving the capital structure, working capital, and dividend policy.

A grade of C- or higher in FIN 310 is a prerequisite for this class.

FIN 313 | INVESTMENT BANKING | 4 quarter hours**(Undergraduate)**

This course is designed to provide students with an overview of investment banking, focusing on valuation, mergers & acquisitions, leveraged buyouts, and debt capital markets. The course is intentionally taught from a practitioner's point of view, exposing students to various analytical tools and to a full appreciation of what is all required to complete an investment banking transaction. The course will foster collaboration skills through group case studies and presentations. A real world learning component designed to give students a true sense of working in an investment banking environment is integrated into the course.

A grade of C- or higher in FIN 310 is a prerequisite for this class.

FIN 315 | DATA ANALYTICS IN FINANCE | 4 quarter hours**(Undergraduate)**

Data analytics is transforming the field of finance. Firms can analyze internal data to optimize financial decision-making and investors can use sophisticated analytical tools to improve investment decisions. In the course, students will learn about this growing trend and how to use common software tools for analyzing data. The course provides experience in applying statistical models to financial data from a range of real-world cases. These skills will prepare students for the rapid evolution of data analytics in finance.

BUS 102 and FIN 310 are prerequisites for this class.

FIN 320 | MONEY AND BANKING | 4 quarter hours**(Undergraduate)**

The study of money and banking as a means to understanding how operations of our financial institutions affect functioning of our economic system and evaluation of monetary policies and goals.

ECO 106 and (a grade of C- or better in FIN 310 or a grade of A- or better in FIN 300) are prerequisites for this class.

FIN 323 | COMMERCIAL BANKING | 4 quarter hours**(Undergraduate)**

This course will analyze the role of commercial banks in the financial system and will focus on understanding what banks actually do, how they make money and how this has been changing over time, what risks they are exposed to and how they manage those risks. Students will learn how to analyze and evaluate banks' financial statements, develop an appreciation for the complexity of risk in banking and the role and responsibility of regulators. The course will introduce students to banking case studies designed to take concepts learned and how to apply them to real world situations. This real world learning experience will revolve around a corporate credit risk analysis.

A grade of C- or higher in FIN 310 is a prerequisite for this class.

FIN 324 | BANKING & CREDIT ANALYSIS | 4 quarter hours**(Undergraduate)**

This course is designed to give students practical insight into the role commercial banks play in the global financial system through corporate credit intermediation. Specifically, the course is oriented to understanding the credit analysis and loan origination process a bank goes through in the extension of corporate credit as well as the resulting implications on risk mitigation, loan structuring and pricing. Students will gain industry analysis and technical finance knowledge, while significantly improving their financial analysis capacity and excel modeling. A real-world learning component designed to give students a true sense of working in a commercial banking environment is integrated into the course.

FIN 310 & (FIN 333 or ACC 304 or ACC 307) are prerequisites for this course.

FIN 330 | INVESTMENTS: THEORY & PRACTICE | 4 quarter hours**(Undergraduate)**

This course focuses on Investment principles and problems. It seeks to develop the student's perception of risks and opportunities in investment instruments and markets. It will inform their description of the markets and the operational effects of current financial events upon the various markets.

A grade of C- or higher in FIN 310 is a prerequisite for this class.

FIN 333 | FINANCIAL STATEMENTS ANALYSIS | 4 quarter hours**(Undergraduate)**

Corporate performance and its effects on outstanding securities. Evaluation and interpretation of financial soundness of an enterprise. Economic, management and corporate financial factors as they affect specific security issues.

A grade of C- or higher in FIN 310 is a prerequisite for this class.

**FIN 335 | PORTFOLIO MANAGEMENT | 4 quarter hours
(Undergraduate)**

Theories and techniques to achieve superior selection and management of securities portfolios. Review and evaluation of significant literature. Problems of timing and strategies in response to changing economic and financial conditions.

FIN 330 is a prerequisite for this class.

**FIN 336 | EQUITY RESEARCH | 4 quarter hours
(Undergraduate)**

This course focuses on developing the knowledge and skills critical for analyzing equities (stocks) including using Bloomberg, Excel, and Thomson ONE to conduct industry analysis, company analysis, basic financial modeling, and valuation to communicate a successful stock pitch.

FIN 330 is a prerequisite for this class.

**FIN 340 | INTERNATIONAL FINANCE | 4 quarter hours
(Undergraduate)**

The objectives of this course include: understanding the effect of political and economic factors on the financial decision-making of the firm, determining the major factors influencing currency value; analyzing and managing the spectrum of risks arising from a firm's international operations; and acquiring knowledge of the international financial system and the major players in that system.

FIN 320 is a prerequisite for this class.

**FIN 350 | REAL ESTATE ANALYSIS | 4 quarter hours
(Undergraduate)**

This course introduces essential institutional, legal, regulatory, and financial aspects of real estate in the U.S. economy and financial system. The course incorporates demographic data for real estate market analysis and includes an exercise in land use planning. PREREQUISITE(S): Junior standing.

**FIN 355 | GLOBAL IPOs & VENTURE CAPITAL | 4 quarter hours
(Undergraduate)**

This course explores equity financing alternatives for young, innovative start-up companies, including their final funding step as a private company: their initial public offering (IPO), when they go public. These early-stage financial markets have been influenced by various economic systems and cultures around the world, and in turn there have been major cross-country differences in the motivation of and funding for innovation. This course has quantitative elements, but our focus will typically be on the analytics: on contract design, optimal regulation, balancing various risks and objectives, and structuring a deal to minimize conflicts of interest while optimizing incentives. A major focus of this course will be on why and how the venture capital industry developed, and how it funds and encourages innovation. This requires examining various economic and governmental systems and the incentives they provide for technological innovation and progress. Similarly, for IPOs, we will compare IPO markets and regulations in various countries, and explore how cultural and governmental systems have affected those markets. The IPO case studies will illustrate the three main IPO methods used around the globe.

FIN 310 or FIN 300 is a prerequisite for this class.

**FIN 362 | ENTERPRISE RISK MANAGEMENT | 4 quarter hours
(Undergraduate)**

Theories and techniques of risk management that employ statistical techniques which enhance risk decision-making. This course develops a framework of analysis that can be applied by corporate or investment risk managers.

FIN 311 and FIN 330 are a prerequisite for this class.

**FIN 363 | DERIVATIVES: PRICING & APPLICATIONS | 4 quarter hours
(Undergraduate)**

This is an advanced course that focuses on the pricing models for the four derivative instruments: forwards, futures, options and swaps. The first part of the course is devoted to the two general classes of derivative pricing models: discrete time and continuous time, with each model's properties discussed in detail. These models are then applied to a range of realistic pricing situations which include swaps, exotic options and fixed income derivatives. The course concludes with a detailed examination of value at risk.

FIN 330 is a prerequisite for this class.

**FIN 365 | PRINCIPLES OF RISK & INSURANCE | 4 quarter hours
(Undergraduate)**

This course surveys fundamental principles of risk, the risk management process, and insurance as a systematic approach to transfer and finance risk. It examines how insurance offers protection against major risks that firms and individuals face, how the insurance market is structured, and how and why the industry is regulated. This course also delves into theories and philosophies that provide insights into how the risk management industry functions in the larger society. Emphasis will be placed on understanding that insurance is just one of the techniques to be relied upon in planning a comprehensive risk management program.

A grade of C- or higher in FIN 310 is a prerequisite for this class.

**FIN 366 | FINANCIAL MODELING | 4 quarter hours
(Undergraduate)**

This course will focus on the use of EXCEL in implementing financial theory to solve practical, real world problems in finance.

FIN 311 and FIN 330 are a prerequisite for this class.

**FIN 367 | PROPERTY & LIABILITY INSURANCE | 4 quarter hours
(Undergraduate)**

This course identifies property and liability loss exposures that corporations commonly face and examines how they manage these exposures. The theories and principles governing insurance contracts addressing these risks are then discussed in detail. The course also offers cases and data for an analysis of the commercial property liability Insurance and Reinsurance industry and recent market performance.

FIN 365 is a prerequisite for this class.

**FIN 380 | CASES IN FINANCIAL DECISION MAKING | 4 quarter hours
(Undergraduate)**

This is the capstone course for students majoring in Finance. The course applies the case study methodology to hone the student's analytical skills with applied finance issues, as well as to further develop verbal and written communication skills, the ability to work effectively within teams, and to engage in reasoned debate. This course will provide students the opportunity to apply and integrate the knowledge acquired in their previous finance courses.

FIN 311 and FIN 330 are prerequisites for this class.

**FIN 381 | BEHAVIORAL FINANCE | 4 quarter hours
(Undergraduate)**

The primary objective of this course is to better understand investor behavior, return predictability in asset markets, and corporate decisions by considering behavioral aspects of decision making. We will discuss market efficiency, psychology of decision making, anomalies, investor behavior, limits of arbitrage, and behavioral corporate finance.

FIN 310 is a prerequisite for this class.

**FIN 393 | FINANCE INTERNSHIP | 4 quarter hours
(Undergraduate)**

An academically supervised working experience in a major financial institution. Registration in this program requires approval of the department internship director.

A grade of C- or higher in FIN 310 is a prerequisite for this class.

**FIN 395 | INVESTMENT SEMINAR | 4 quarter hours
(Undergraduate)**

Experience a rich learning and application opportunity focusing on financial investing. Learn methods to find the intrinsic value of a company's stock and explore catalysts that will increase the stock price. Make buy and sell recommendations for a 'live' portfolio.

FIN 330 is a prerequisite for this class.

**FIN 396 | HONORS SEMINAR | 2 quarter hours
(Undergraduate)**

This is a required course for all Honors Students in Finance. It is conducted on a year-long basis (Fall, Winter & Spring) for the benefit of the students in the program. Participants are required to attend all events sponsored by the class conductor. These include, but are not limited to, distinguished speakers series, networking luncheons, current topics forums, communications and protocol workshops, field trips and community service programs. All students are required to complete an empirical analysis paper, utilizing databases available to the department, as assigned by the seminar's conductor. (2 quarter hours)

Status as an Honors Finance student is a prerequisite for this class.

**FIN 397 | HONORS SEMINAR CONTINUATION | 0 quarter hours
(Undergraduate)**

This is a continuation of FIN 396 Honors Seminar. Students register for FIN 397 during autumn and winter quarters. Participants are required to attend all events sponsored by the seminar's coordinator. These include, but are not limited to, distinguished speakers series, networking luncheons, current topics forums, communications and protocol workshops, field trips and community service programs. All students are required to complete an empirical analysis paper, utilizing databases available to the department, as assigned by the coordinator.

Status as an Honors Finance student is a prerequisite for this class.

**FIN 398 | SPECIAL TOPICS | 4 quarter hours
(Undergraduate)**

Content and format of this course are variable. An in-depth study of current issues in finance. Subject matter will be indicated in class schedule.

FIN 310 is a prerequisite for this class.

**FIN 399 | INDEPENDENT STUDY | 4 quarter hours
(Undergraduate)**

Available to students of demonstrated capability for intensive independent work in finance. (variable credit)

Junior standing with at least 88 cumulative units is a prerequisite for this class.

**FIN 400 | FOUNDATIONS OF QUANTITATIVE ANALYSIS | 0 quarter hours
(Graduate)**

This course provides basic instruction in mathematical and statistical methods as a foundation for GSB 420 Applied Quantitative Analysis. This course will focus on strengthening students' algebra and calculus skills and provide basic instruction in statistical methods. (0 quarter hours)

**FIN 455 | PRINCIPLES OF FINANCIAL MANAGEMENT | 2 quarter hours
(Graduate)**

This course provides an introduction to finance. The goal of the course is to provide students with the basic tools and the background necessary to understand and analyze the corporate financial decision-making process. The course is designed to familiarize accounting students with tools necessary for making sound financial decisions at the enterprise level. Topics covered include concepts in time value of money and their application to stock and bond valuation, capital budgeting, portfolio management, firm's capital structure, dividend policy, and derivative instruments. (2 quarter hours)

Status as a graduate accountancy student is a prerequisite for this class.

**FIN 512 | COMMERCIAL BANKING | 4 quarter hours
(Graduate)**

The objective of this course is to analyze the role of commercial banks in the financial system in order to understand the problems and issues confronting bankers now and in the future. The student will learn to measure and evaluate bank performance; understand how banking firms make their money and how this has been changing over time; understand the management of assets and liabilities, the valuation of bank mergers and acquisitions, and how government policy influences the behavior of commercial banking firms. The course applies traditional finance and strategic management concepts to the management of financial institutions. The emphasis will be on developing a toolkit to solve problems not only in commercial banks but also in other financial services firms. The student will develop proficiency in relevant financial concepts, analytical frameworks, data analysis, and techniques in the field of financial economics. The course consists of a blend of lectures, discussions, and case studies.

FIN 555 is a prerequisite for this class

**FIN 513 | MONEY AND CAPITAL MARKETS | 4 quarter hours
(Graduate)**

This course analyzes interest rates, foreign exchange rates, federal funds futures market, the operation and regulation of financial institutions, and the impact of Central Bank actions on securities markets and the economy. The educational objective of the course is to provide graduate business students with the opportunity to acquire a thorough understanding of the theoretical and applied concepts that determine the operations of the money and capital markets. When you finish this course you will be able to demonstrate how the release of economic news about the real sector and the conduct of monetary policy influence the pricing of assets (interest rates and foreign exchange rates); measure and evaluate the impact of central bank actions on securities markets and the economy; understand the importance of having an independent central bank for macroeconomic performance; measure and evaluate the price volatility of interest-bearing securities; and understand how central bank monetary and regulatory actions can affect the stability and soundness of financial institutions. This course is designed to achieve maximum student involvement in order to add the greatest amount of value to their graduate educational experience. The emphasis will be on developing a toolkit to solve problems that financial analysts and other researchers encounter in security markets and financial institutions. We desire to become proficient in certain financial market concepts, analytical frameworks, data analysis, and various techniques in the field of financial economics. Accordingly, the course is structured to include extensive reading, several written statistical assignments, and class discussions that are based on the readings. These written assignments have three objectives: to make sure that the reading material has been absorbed in full measure; to serve as the foundation for class discussions; and, to provide students with the opportunity to demonstrate their understanding of the substantive class material and the ability to apply this material in "real world" situations.

FIN 555 is a prerequisite for this class

**FIN 523 | INVESTMENT ANALYSIS | 4 quarter hours
(Graduate)**

This course provides an introduction to capital markets and financial instruments with an emphasis on security valuation. It is not a course on personal investing. The course builds on FIN 555 and covers relevant aspects of fixed-income markets, asset pricing, portfolio management, equity markets, and derivatives markets. The course provides background material for both FIN 662 (Derivatives Valuation) and FIN 675 (Cases in Investments and Financial Engineering).

FIN 555 is a prerequisite for this class

**FIN 524 | FINANCIAL STATEMENT ANALYSIS | 4 quarter hours
(Graduate)**

This course provides an introduction to financial statement analysis from a global perspective by focusing on the International Financial Reporting Standards (IFRS). The emphasis is on the use of company financial reports to evaluate the historical, present, and prospective performance and financial soundness of a company for the purpose of financial decision-making.

FIN 555 is a prerequisite for this class

**FIN 525 | PORTFOLIO MANAGEMENT | 4 quarter hours
(Graduate)**

This course covers topics and techniques appropriate for institutional portfolio management. The course does not examine personal investment or personal portfolio management. The topics and readings are designed to be at the level of the portfolio management coverage in all the three levels of the CFA program.

FIN 523 is a prerequisite for this class.

**FIN 526 | ADVANCED TOPICS IN INVESTMENTS | 4 quarter hours
(Graduate)**

This course provides an understanding of several topics that are important to successful completion of the CFA examination. The course will focus on equity valuation including valuation of closely held companies, real estate valuation, venture capital, behavioral finance, hedge funds, distressed debt, commodity futures, and benchmarks. The course will proceed from simple valuation models to those used to value assets wherein daily mark-to-market accounting is not available (e.g., real estate, venture capital, etc.).

FIN 523 is a prerequisite for this class.

**FIN 528 | ALTERNATIVE INVESTMENTS | 4 quarter hours
(Graduate)**

Alternative investments are the fastest growing sector of the financial industry, and probably the least understood, including by many market professionals. Although the range of sophistication in people associated with alternative investments varies, it is more and more common to use them in investment strategies, either as direct investments, through funds of funds or structured products. The purpose of this course is to give students a good understanding and workable knowledge of the techniques that should be part of the toolkit of anyone investing in, analyzing and/or advising private and institutional clients on the inclusion of alternative investments in their portfolios. Because this course is geared for students wishing to pursue careers in Wealth Management or related fields, it will largely be taught from a practitioner's point of view. Throughout the course we will pay special attention to capital market trends as they relate to the various investment vehicles we discuss. We will also turn our attention to corporate governance issues as they pertain to alternative investment strategies.

FIN 523 is a prerequisite for this class.

**FIN 530 | REAL ESTATE INVESTMENT AND FINANCE | 4 quarter hours
(Graduate)**

Analysis of real estate investment opportunities and the characteristics that distinguish them from other assets. Emphasis is upon forecasting cash flows and estimating risk. Case analysis is an integral part of the course technique.

RE 527 or Completion or concurrent enrollment in FIN 555 is required

**FIN 540 | CORPORATE GOVERNANCE | 4 quarter hours
(Graduate)**

This course is designed to intersect three areas of interest: (a.) Entrepreneurial Finance and Private Equity; (b.) Family and Closely Held Firms, and; (c.) International Finance with special emphasis on cross-border valuation and access to finance. The course is, by nature, a finance course that deals with ventures, family, and closely held firms in an international context. The core question behind GEF is: "How do entrepreneurial managers, family firms, closely held firms and those who finance them design and execute ventures that effectively match opportunities and resources in an international context?" An overreaching insight of the GEF course is that the notions of risk and reward are as important in privately held as in publicly held firms. In privately held firms, however, entrepreneurs and financiers are often forced to make assumptions based on incomplete data. The course will provide you with the tools necessary to value these ventures domiciled in countries around the world.

FIN 551 | PROBLEMS IN CORPORATE FINANCIAL POLICY | 4 quarter hours**(Graduate)**

This course enables the student to apply the basic principles of corporate finance learned in FIN 555 and in FIN 553 to problems in corporate finance with the complexities encountered in practice. Through cases and discussion of topical issues, the course provides the student with an opportunity to analyze practical financial situations and problems. The course requires the student to be familiar with fundamental concepts such as valuation methods (WACC, Free Cash Flow and Capital Cash Flow, APV, Trading and Transaction Multiples), portfolio selection, CAPM, and analysis of capital structure. The course emphasis is sufficiently general so as to be of interest to a wide cross-section of students. At its most fundamental level, the course attempts to improve problem-solving skills that relate to problem definition, gathering and organizing the relevant information, developing feasible alternative courses of action, evaluating alternative choices, and recommending and defending the best course of action. In addition to analyzing specific problems or issues, the course will consider how these issues relate to the strategic objectives of the firm and examine the "big picture" assumptions that are used in the numerical calculations. FIN 553 is strongly recommended.

FIN 555 is a prerequisite for this class

FIN 552 | HEDGE FUND MANAGEMENT | 4 quarter hours**(Graduate)**

This is an experiential course focusing on investment analysis in the context of the hedge fund industry. The goal of this class is to give students working knowledge of the hedge fund industry by drawing upon the experience of simulated investment presentations to portfolio managers (in the classroom setting). It is designed to give students rigorous exposure to long/short equity strategies as a gateway to explore other fund strategies. Topics will include securities analysis, research strategies, short selling and portfolio management. The course will help students generate superior investment ideas by conducting creative, value-added research. Students will act as hedge fund analysts by working through the investment process: idea generation, analysis, and presentation, and should walk away with a working knowledge of the hedge fund industry.

FIN 523 is a prerequisite for this class.

FIN 553 | ADVANCED CORPORATE FINANCE | 4 quarter hours**(Graduate)**

This course builds on FIN 555 and focuses on fundamental themes in corporate finance. Topics covered include the analysis of capital investments, valuation methods, cost of capital, real options, agency costs, corporate governance, payout policy, equity issues, hybrid forms of financing, and mergers and acquisitions. The main theme of the course is on valuation and the overall focus is on enhancing enterprise value. The course also uses several case studies to illustrate the application of finance theory to practical problems.

FIN 555 is a prerequisite for this class

FIN 555 | FINANCIAL MANAGEMENT | 4 quarter hours**(Graduate)**

This course provides an introduction to concepts and techniques required to analyze and implement optimal financial decisions by firms and serves as the core course in the graduate finance curriculum. The course focuses on the effect of time and uncertainty on investment and financing decisions. It develops a framework for corporate financial decision-making. Topics covered include basic discounting techniques, stock and bond valuation, capital budgeting, portfolio theory, asset pricing, and capital structure. The course uses several case studies to illustrate the application of finance theory to practical problems.

(ACC 500 or ACC 502 or equivalent) and (GSB 420 or GSB 519 or equivalent) are prerequisites for this class.

FIN 557 | INTERNATIONAL FINANCE | 4 quarter hours**(Graduate)**

This course examines the effect of political and economic factors on the financial decision-making of the firm. The objective of the course is to enable the student to i) utilize the knowledge of the determinants of currency values, and the mechanism through which they work, to forecast changes in currency values ii) to analyze and manage the spectrum of risks arising from a firm's international operations and iii) to be familiar with how the international financial system works and with the major players in the system.

FIN 555 is a prerequisite for this class

FIN 558 | MERGERS AND ACQUISITIONS | 4 quarter hours**(Graduate)**

The course provides an overview of common corporate restructuring strategies and the economic motives for undertaking them. Topics covered include mergers, acquisitions, friendly and hostile takeovers, financial re-capitalization, leveraged buyouts, management buyouts, going private, convertible securities, tracking-stock, spin-offs, split-ups, carve-outs and reorganization under bankruptcy, liquidation, and out-of-court restructuring. The course integrates corporate governance and agency dimensions, financial and strategic management aspects, and legal and accounting considerations into a unified framework. This framework is then used to investigate issues such as pre-merger planning, fact-finding, accounting and tax implications, anti-trust problems, post-merger integration, and the short-term and long-term shareholder wealth consequences of financial and organizational restructuring transactions. The course examines transactions that significantly affect a corporation's assets, liabilities, and/or equity claims. Transactions will be examined from the perspectives of both the corporation (e.g. CFO and CEO) and the capital markets (e.g. investors). Common "arbitrage" trading strategies involving corporate transactions will also be discussed. A basic understanding of financial options and pricing is recommended.

FIN 555 and (FIN 551 or FIN 553) are prerequisites for this class.

FIN 559 | SUSTAINABLE VALUE CREATION | 4 quarter hours**(Graduate)**

This course examines how firms create and sustain value over time. The course explores environmental/social sustainability issues as real business risks through analysis and discussion of current events and case studies. The course begins with an introduction to financial statements and the data they contain to inform investors about a firm's financial position and value to investors. We then examine how common environmental/social sustainability issues and solutions impact firm value. Finally, we look beyond firms to the impact on public and private resources as firms seek to create sustainable value.

**FIN 562 | RISK MANAGEMENT | 4 quarter hours
(Graduate)**

This course examines risk management from a broad enterprise perspective by focusing on the various risks faced by a firm. The course covers various methods that can be used to minimize risk and its effect on firm value.

FIN 555 is a prerequisite for this class

**FIN 565 | PRINCIPLES OF RISK AND INSURANCE | 4 quarter hours
(Graduate)**

This course will provide students with an over view of the insurance industry and a foundation in the areas of property, casualty, and life insurance. Students will have a firm grasp of how insurance firms are able to meet their obligations while creating value for their stakeholders.

FIN 555 is a prerequisite for this class

**FIN 566 | RISK MANAGEMENT MODELING | 4 quarter hours
(Graduate)**

This course will use mathematical techniques via EXCEL to identify various risks and exposures affecting enterprises. Then, students will apply solutions that mitigate and control the risks and exposures as identified.

FIN 555 is a prerequisite for this class

**FIN 571 | FINANCING NEW VENTURES | 4 quarter hours
(Graduate)**

This course will focus on identifying, examining and evaluating various sources of original and growth capital. Emphasis will be on legal, financial and tax issues related to capital formation as well as specific problems experienced by the small-to-medium-sized firm undergoing rapid growth. Topics discussed will include financing startups, financial planning and strategy, going public, selling out and bankruptcy. A formal proposal for capital acquisition developed through field research will be required of each student. Cross-listed with MGT 571.

FIN 555 is a prerequisite for this class

**FIN 581 | BEHAVIORAL FINANCE | 4 quarter hours
(Graduate)**

After the development in the last four decades, Behavioral Finance has become an integral part of the toolkit that is essential for a successful career in any finance-related field: asset management, investment banking, corporate finance, finance-related policy work, among others. The traditional framework for thinking about financial markets assumes that all market participants are fully rational. The past four decades, however, have witnessed the emergence of an important new paradigm, behavioral finance, which argues that many financial phenomena are the result of less than fully rational thinking. In this course, we will cover the building blocks of behavioral finance: limits to arbitrage and psychology. Then, we will move on to applications to individual investor behavior, financial markets, corporate finance and policy. (Prerequisite: FIN 555)

FIN 555 is a prerequisite for this class

**FIN 595 | INVESTMENT SEMINAR I | 4 quarter hours
(Graduate)**

The Investment Seminar is intended to provide a rich learning and application opportunity focusing on financial investing. The learning module comes about through the fusion of academic knowledge gained from advanced courses in investments and corporate finance with the actual practice of analyzing securities and making and defending buy and sell recommendations for a "live" portfolio. Students taking the course are paired with executives from top financial firms and will present stock recommendations at company headquarters. The course is unique to collegiate business education and provides a definite competitive education and provides a definite competitive edge in the job market.

FIN 555 is a prerequisite for this class

**FIN 595-2 | INVESTMENT SEMINAR II | 0 quarter hours
(Graduate)**

This course is a continuation of FIN 595. The Investment Seminar is intended to provide a rich learning and application opportunity focusing on financial investing. The learning module comes about through the fusion of academic knowledge gained from advanced courses in investments and corporate finance with the actual practice of analyzing securities and making and defending buy and sell recommendations for a "live" portfolio. Students taking the course are paired with executives from top financial firms and will present stock recommendations at company headquarters. The course is unique to collegiate business education and provides a definite competitive education and provides a definite competitive edge in the job market.

FIN 595 is a prerequisite for this class.

**FIN 617 | TOOLS OF FINANCIAL ANALYTICS | 4 quarter hours
(Graduate)**

This course provides the student with a comprehensive introduction to the mathematics of finance. The course will focus on applying mathematical concepts, quantitative tools, and modeling techniques to practical problems encountered in finance.

**FIN 660 | IPOs AND VENTURE CAPITAL | 4 quarter hours
(Graduate)**

In IPOs and Venture Capital, we will explore equity financing alternatives for private companies, including their final funding step as a private company: their initial public offering or IPO, when they go public. Unlike many finance classes, this is not primarily a quantitative course. While there are some quantitative elements, the focus will typically be on the analytics: on contract design, optimal regulation, balancing various risks and objectives, and structuring a deal to minimize conflicts of interest and optimize incentives. Our focus will be largely on the U.S., but we will also cover fund-raising methods and options in other countries. We will work in part from Harvard Business School Case Studies. This course should be useful for those interested in investment banking, venture capital, private equity, or securities law, or those who hope to have a start-up of their own someday.

**FIN 662 | DERIVATIVES VALUATION | 4 quarter hours
(Graduate)**

This course focuses on the theory and practice of the valuation of derivative securities such as forward contracts, futures contracts, swaps, and options. The course also examines the underlying properties of each of these instruments and their use in managing the various risks faced by market participants.

FIN 523 and FIN 555 are prerequisites for this class.

**FIN 719 | EQUITY RESEARCH | 4 quarter hours
(Graduate)**

This course focuses on developing the knowledge and skills critical for analyzing equities (stocks) including using Bloomberg, Excel, and Thomson ONE to conduct industry analysis, company analysis, basic financial modeling, and valuation to communicate a successful stock pitch.

FIN 555 is a prerequisite for this class

**FIN 793 | INTERNSHIP | 4 quarter hours
(Graduate)**

Knowledge acquired in the classroom is applied in an actual business environment through varied theoretical and basic assignments under supervision in industry, government or public finance.

FIN 798 | SPECIAL TOPICS | 4 quarter hours**(Graduate)**

Content and format of this course are variable. In-depth study of current issues in finance. Subject matter will be indicated in class schedule. Offered variably.

FIN 799 | INDEPENDENT STUDY | 4 quarter hours**(Graduate)**

Available to graduate students of demonstrated capability for intensive independent work in finance.

Focus Area (FA)

FA 110 | ESSENTIALS OF TRAINING AND DEVELOPMENT | 2 quarter hours**(Undergraduate)**

This is a 5-week, 1-competence course on Employee Training and Development. Students will learn the basic processes of employee training and development, including needs assessment, theories of learning and behavior change, training design to support appropriate selection or development of training, delivery of training, issues of transfer, and assessment of results. (2 quarter hours)

FA 120 | ESSENTIALS OF COACHING | 2 quarter hours**(Undergraduate)**

Effective coaching has long been recognized as a key element of success in the world of sports. More recently, a new breed of coaches has emerged to help people transform their personal and professional lives. In this course, we will explore the theories, concepts, and techniques of personal life and business coaching. Students will learn about the history of coaching, its uses in personal and professional development and practical applications. Working individually, in pairs, and in small groups, students will practice coaching skills and keep a detailed learning journal. This course will be highly experiential and collaborative in nature. Students will learn concepts of coaching for personal development and professional effectiveness. In addition, students will learn models of collaborative learning and will apply one recognized model in the exploration of their coaching practice in the course. (2 credit hours)

FA 199 | CAREER ASSESSMENT AND PLANNING | 2 quarter hours**(Undergraduate)**

In this course, students use structured analysis and reflection, research and planning to create a professional development portfolio. Students learn strategies for reflecting, assessing strengths and growth opportunities, identifying support systems and agents, practicing smart goal setting, and attaining goals. Opportunities to return to this portfolio will be built into the major courses for purposes of ongoing assessment, reflection and planning.

FA 208 | SALES AND MARKETING MANAGEMENT FOR BUSINESS TODAY | 2 quarter hours**(Undergraduate)**

Sales Management is one of the most important jobs in business today. It is the focal point for managing customer relations, and is critical for sustaining profitability and growth. It draws on a broad spectrum of skills and offers many desirable career paths for both entry level as well as experienced workers. Sales Management techniques are applicable in a wide variety of business settings, and the basic framework and details apply in all of them. The purpose of this course is to present a practical, contemporary framework for Sales Management. It starts with basic sales analysis techniques for determining company position in the market. From there it explores modern sales techniques for facilitating the customer's buying decision. It then covers the major Sales Management job functions, such as Territory Management and Sales Training. The course concludes with a discussion of leadership and psychological skills that make for Sales Management excellence. Students will learn Sales Management via course lectures, textbook reading, Internet searches and independent research on the company they work for. (2-4 quarter hours)

FA 209 | CONSUMER BEHAVIOR INSIGHTS | 2 quarter hours**(Undergraduate)**

In the Consumer Behavior Insights course, students explore the processes that consumers use to make decisions. Understanding of consumer segments is developed and applied to create communication strategies using a decision-making framework. Through coursework, students demonstrate an understanding of various topics including how market intelligence is collected, market segmentation, the impact of various cultural influences on behavior, elements of persuasive communication and development of consumer-oriented strategies. Cultural norms influence receptivity to marketing communication messages. In-depth consumer knowledge of a sub-cultural segment is learned and applied as students conduct market research. Based on analysis, students develop communication objectives, positioning statements and strategies for consumer communication. The role of mass media is examined in two distinct areas. Mass media influence cultural values by reinforcing norms for consumer needs and wants. Mass media are also important means for communication of targeted advertising messages. (2-4 quarter hours)

**FA 214 | ENTREPRENEURIAL ACCOUNTING | 2 quarter hours
(Undergraduate)**

Entrepreneurial Accounting is a thorough coverage of financial and management accounting topics in an economically challenging business environment. Clear principles and procedures are used to demonstrate the complete accounting cycle in any type of organization: For-Profit or Non-Profit. General purpose financial statements are prepared and examined from a fundamental understanding of how for-profit and non-profit businesses operate in a dynamic and changing business marketplace. Specifically, the reach of this course will be on a global environment that is characterized by a high degree of uncertainty. We will examine a variety of accounting challenges faced by business from an international perspective. This will have important implications on the way a company becomes more competitive and thus profitable. As such each of you will be assigned a company on day one of class to manage through a series of accounting dilemmas often both inside and outside our borders. As you acquire the requisite skills (throughout the term) to meet those challenges you'll execute decisions that will change the management course of the company. It is through this individual decision making that you'll learn what works and what doesn't and why. This is not a static accounting course. Your decisions will have an impact on the direction of the company. We will also cover a series of topics that will enhance your understanding of financing techniques and options through detailed ratio-analysis. This will advance your ability to understand and seek creative financing for any ideas you might have in the future. This is essential if you have that entrepreneurial spark that just needs some financial backing and support to get started. As this is an accounting course we would expect some proficiency in basic quantitative /mathematical ability. You should also be able to use a calculator reasonably well. (2-4 quarter hours)

**FA 223 | ACCOUNTING AND FINANCE PRINCIPLES | 2 quarter hours
(Undergraduate)**

In this course, we will examine the role of accounting and financial management in the preparation, reporting and analysis of financial information. This topic is particularly important in today's economically challenging business world. Accounting and Finance concepts and principles serve as the bookends for our exploration. Clear principles and procedures are used to capture financial data, which can then be used to make economic and financial decisions. Specifically, the objective of this course is to present the fundamentals of accounting and finance to assist the non-accountant in understanding the financial statements of an organization and how financial information can be used in the management planning, control, and decision-making processes of both profit and non-profit seeking enterprises. Accounting is often called the language of business and as such, it is appropriate that as participants in the economic activities of our society we should have enough knowledge of this language to make informed decisions and judgments about our role in these economic activities. We will also cover a series of topics that will enhance your understanding of financial information, financing techniques and options through financial and ratio-analysis. This will advance your ability to understand and make relevant financing and investment decisions or develop viable future business strategies. (2-4 credit hours)

**FA 231 | PERSONAL FINANCIAL PLANNING | 2-4 quarter hours
(Undergraduate)**

This course will help students organize their financial lives by learning and implementing selected principles of accounting, finance, and management. The course will address value and risk determination by dealing specifically with the analysis of one's financial status, goal setting and planning, and decision making. Risk analysis, savings and investment principles, taxes, debt management, retirement, and estate considerations are areas which guide the financial management of individuals and businesses alike. (2-4 quarter hours)

**FA 238 | ENGAGING RESILIENCE IN ADULT LIFE | 2 quarter hours
(Undergraduate)**

Building & Engaging Resilience (in Adult Life) (4 credit hours) (Fac: Matamonasa): An ancient proverb reads: "Fall down seven times. Stand up eight." But how? What's involved in such flexibility, adaptability, tenacity, hardiness and resilience? What understandings, values and skills help? How does one develop these and nurture them across an adult lifetime? Through this seminar, participants will explore various concepts, models and "best practices" for growing, rebounding and selfguarding one's resilience given the challenges and uncertainties of adult life. (Questions? Contact instructor at amatamo1@depaul.edu.)

**FA 269 | ENTREPRENEURSHIP: HOW TO FIND AND FUND YOUR DREAM | 2 quarter hours
(Undergraduate)**

Did you know that 90% of new restaurants are doomed to fail? Have you always wanted to be your own boss? Are you presently conducting a small business from your garage that you'd like to make bigger and more profitable? Who makes a great entrepreneur? Are businesses easier to manage in the age of technology? In this course, Students will learn how to identify an appropriate small business for their talents and time restrictions. Learners will also consider methods of financing their dream work lives, and review the pit falls awaiting new businesses in today's economic climate. Students need not have a business in mind, but must be willing to consider how they might go about putting together a plan for a successful venture. Ideas about the definition of business in modern society, of entrepreneurship, about the psychological make up of the successful small business owner, and about the long term view for small businesses will also be covered. (2-4 quarter hours)

**FA 270 | STARTING UP AND RUNNING YOUR OWN BUSINESS | 2 quarter hours
(Undergraduate)**

This course will help students learn how to start and operate an independent business enterprise. We will address entrepreneurship, defining your markets, accounting basics, business plans, financing, establishing the business, hiring employees, business equipment, software, and marketing. Through readings, discussion, and home assignments, students will learn how to increase the probability of reaching their business goals while minimizing risks and costs. By applying management, financial, and software concepts and practices, students will have the knowledge to start and run a new business. (2-4 quarter hours)

**FA 288 | MARKETING FOR THE SOCIAL GOOD | 2 quarter hours
(Undergraduate)**

This is a ten week course on the nonprofit and public organizational issue of social marketing. Generally social marketing techniques are used to influence individuals, or groups to change their behavior in order to improve a social good such as: individual health, the environment, and the community. Students will develop an appreciation for the principles of social marketing and will be taught the techniques for conducting social marketing programs. Students will also learn how to develop social marketing plans and meaningful promotions, including utilizing imagery/art to understand and create advertisements. (2-4 quarter hours)

**FA 300 | PROJECT MANAGEMENT | 2-4 quarter hours
(Undergraduate)**

Project Management is a business concept which has received a great deal of attention over the last few years. Business managers are discovering that the complexity of human and technological systems forces workers to organize, prepare, and monitor project development in a way which was not necessary in simpler times. In this course, students will discuss and discover methods of project organization and execution which will help them achieve efficacy and success in the workplace. This course will cover concepts in describing project goals, setting priorities, identifying needs, and designing realistic time lines. Students will learn how to execute successful projects from start to finish. (2-4 quarter hours)

**FA 301 | EFFECTIVE LEADERSHIP IN A CHANGING PROFESSIONAL ENVIRONMENT | 2 quarter hours
(Undergraduate)**

In this leadership course, students will use readings, behavior/trait surveys, and case studies to understand leadership theories and models. Participants will learn to create, establish, and reinforce cultural rules of engagement designed to increase communication effectiveness and get the most out of the current human dynamic in their respective environments. Understanding these various leadership models allows students to reflect on their own style in today's culturally changing environments. (online) (2 credit hours)

**FA 302 | PROJECT MANAGEMENT: DESIGN AND ASSESSMENT | 2 quarter hours
(Undergraduate)**

Project Management is an important discipline that can benefit students in their careers as well as personal life. This course will explore project management methodologies, their common steps and tools. The course translates Project Management theory into a practical and effective methodology, starting with working definitions of Project and Project Management, the course examines project initiation, evaluation and organization using analytic techniques such as discounted cash flow and PERT/CPM. In addition, the course examines project execution and control, along with the documentation and communications skills needed to keep a project on track. The course concludes with an overview of project management applied to computer information systems development. (2 quarter hours)

**FA 304 | ADVANCED PROJECT COURSE | 4 quarter hours
(Undergraduate)**

The main purpose of this course is to guide you through the various steps involved in designing and carrying out an Advanced Project (AP) on a subject that is related to your particular focus Area (FA). Whether you want to address a practical problem or a theoretical question, in this course you will be guided through the process of investigating a problem or issue in depth, and establishing clear links between the definition of the problem or issue, discussion of conceptual issues, methods of investigations, analysis of findings, and practical applications. Successful completion of the Advanced Project will satisfy the F-11 and F-12 competences. This course satisfies a residency requirement.

LL 300 is a prerequisite for this class. This class is not open to BAC students.

**FA 310 | GENDER IN BUSINESS AND LEADERSHIP | 2 quarter hours
(Undergraduate)**

Women's work is never done. Not only are women mothers and wives, but these days the expectation is that women will take on leadership roles outside the home as well. What makes a woman a leader? How did the workplace differ when women were not corporate leaders? Who are today's prominent female leaders and how are they shaping our future? In this course, learners will study the lives and contributions of various important women from business, politics, and social action. Students will assess equality in management and leadership, the psychological make up of the woman leader, and the ways in which women's contributions to leadership differ from men's. Furthermore, the class will endeavor to define leadership, its consequences, and its personal ramifications. Students should expect to read extensively about the lives and characteristics of contemporary women who have surfaced in leadership roles. Learners will also identify women leaders in their own workplaces and communities and assess their involvement in the corporation and/or general public. (2-4 quarter hours)

**FA 313 | CHANGE MANAGEMENT: THEORY & PRACTICE | 2 quarter hours
(Undergraduate)**

Change management is a common term for all the processes, skills and practices used to prepare individuals, managers, and leaders to implement organizational changes. Simply put managing change, although difficult, is about the people side of change. Over this 5-weeks course theories, practices, and people management skills that are the foundation of sustainable change will be studied. The course emphasis is on deepening SCPS students' understanding of the challenges and opportunities associated with being an effective change advocate and creating successful change outcomes. (2 credit hours)

**FA 318 | UNDERSTANDING FINANCIAL STATEMENTS | 2 quarter hours
(Undergraduate)**

Business managers as well as investors must have a basic understanding of financial statements as not only a management tool but also as a way of communicating the financial and operational well-being of a company. This course teaches students the essential elements of financial statements, their interpretation and their impact on investors and society. This is a particularly important topic and skill in light of the recent corporate financial reporting scandals plaguing Wall Street and the nation. (2-4 quarter hour)

**FA 325 | CONNECTING THOUGHT AND BEHAVIOR | 2 quarter hours
(Undergraduate)**

This course introduces students to concepts of Cognitive Psychology. They will review the history and development of the field and explore how cognitive processes impact thought and behavior. Through an experiential learning process, students will explore the science behind such topics as perception, consciousness, memory, language, problem solving, reasoning and emotional experience and how these cognitive abilities impact their lives. (2-4 quarter hours)

**FA 330 | PROFESSIONAL COMMUNICATION IN THE WORKPLACE | 2 quarter hours
(Undergraduate)**

This course provides an overview of the fundamentals of professional writing. Through engaging in and reflecting upon a variety of professional writing tasks, you will learn the rhetorical theory and practice necessary for effective written communication in professional contexts. (online) (2 credit hours)

**FA 334 | HUMAN RESOURCE AND TALENT DEVELOPMENT FUNDAMENTALS FOR MANAGERS | 2 quarter hours
(Undergraduate)**

This course is designed as an introduction to the practices of human resources (HR) in a corporate environment. It will target the practices that managers need to know such as recruiting, training, hiring, and terminating employees as well as the basics of HR law. Additional content that will be addressed includes headcount management, performance appraisals, learning & development, compensation basics, and grievance processes. This course will equip managers with the information they need to know without making them Human Resource experts but rather how to work effectively with their HR counterparts. (2-4 hours)

**FA 335 | RISK MANAGEMENT IN THE WORKPLACE | 2 quarter hours
(Undergraduate)**

This overview course in risk management will introduce managers to the various types of risk that needs to be managed in the workplace. Numerous areas such as operational risk, market risk, global risk, and customer risk will be investigated. While this course is not to create students who will be experts in risk management this course will allow them to identify and analyze areas of potential risk to the assets of their organization. Students will use case studies to ensure that proper communication happens for key risks within the organization. (2-4 hours)

**FA 340 | IMPLEMENTING CORPORATE TRAINING PROGRAMS | 2 quarter hours
(Undergraduate)**

In this course, students will learn about the strategic process of effectively and efficiently implementing a corporate training program based on business drivers from design stages through measurement of results. This process includes defining requirements and success criteria, designing the process, implementing and powerfully communicating the program to the learners, and then understanding how to measure the success of the program. It is imperative to measure and report on the trends of the program and to understand why it is important. Using methodology and models that have been successful in numerous global and domestic companies, students in this course will create their own plan for implementation, communication, and measurement to ensure success in their future training program implementations. (2-4 quarter hours)

**FA 359 | ETHICAL BUSINESS BEHAVIOR | 2 quarter hours
(Undergraduate)**

Ethical Business Behavior explores the ethical issues that business decision-makers face and examines the moral principles that are used to help resolve these issues. Ethical decisions in the workplace can have tremendous influence on the individuals and the corporations involved. The outcomes of unethical behavior can affect reputations, trust and career path. Results have been as severe as loss of employment, physical harm to individuals, corporate bankruptcy and even impacts to the economy. Students are placed in decision-making roles through exercises, case studies and role-playing. Reasoning skills are honed through identification of ethical issues and alternative means to analyze these issues. Ethical behavior is evaluated using analytical skills to apply ethical concepts to business situations. (2-4 quarter hours)

**FA 387 | AFRICAN-AMERICAN STUDIES IN CRITICAL PERSPECTIVE | 2 quarter hours
(Undergraduate)**

This interdisciplinary 19th and 20th century African-American studies course examines the role of protest and resistance, the media, and cultural and artistic expression in African-American history. Vis-a-vis readings, documentaries, and discussion, the course intends to illustrate the multiple ways in which African-Americans have protested and resisted oppression while examining how such efforts have been framed in the media during varying historical eras. It defines 'media' broadly and analyzes its role, both via its traditional forms (print, television and radio) but also vis-a-vis other forms of entertainment/infotainment that were particularly unique to 19th century U.S. society (i.e. minstrelsy [1830-1920]). The course concludes with a discussion of the role of art and culture in refashioning thinking and transforming experience. The latter discussion promises to be rich and thought provoking and unearths some of the works of the raw and revolutionary artists of the 1960s while taking a careful look at novel cultural practices that emerged during this period.

French (FCH)

**FCH 101 | BASIC FRENCH I | 4 quarter hours
(Undergraduate)**

First quarter of beginning French. Listening, speaking, reading and writing French in a cultural context for the beginning student. This course is an introduction to the study of the French language and the culture of Francophone countries. Its methodology is based on two assumptions. The first assumption is that language and culture are inseparable. As students learn the French language, they will also gain insights about the French and Francophone people and their culture. The second assumption is that language is for communication. Studying a foreign language does not mean memorizing grammar rules, but internalizing these rules so that learners can use them as guidelines when they attempt to express themselves in spoken and written French. The course also centers on the explanation of cultural aspects of French life, especially as they differ from American life. In-class work is devoted to intensive communication practice, so that students are able to put the rules they study to use in talking about themselves and their personal interests in French.

**FCH 101S | BASIC FRENCH I FOR SUMMER | 6 quarter hours
(Undergraduate)**

(Covers the equivalent of FCH 101 and the first half of FCH 102.) The first half of beginning French. Listening to, speaking, reading, and writing French in a cultural context for the beginning student.

**FCH 102 | BASIC FRENCH II | 4 quarter hours
(Undergraduate)**

Second quarter of beginning French. Continued emphasis on the four skills in culturally-authentic situations. This course is a continued introduction to the study of the French language and the culture of Francophone countries. Its methodology is based on two assumptions. The first assumption is that language and culture are inseparable. As students learn the French language, they will also gain insights about the French and Francophone people and their culture. The second assumption is that language is for communication. Studying a foreign language does not mean memorizing grammar rules, but internalizing these rules so that learners can use them as guidelines when they attempt to express themselves in spoken and written French. The course also centers on the explanation of cultural aspects of French life, especially as they differ from American life. In-class work is devoted to intensive communication practice, so that students are able to put the rules they study to use in talking about themselves and their personal interests in French.

**FCH 103 | BASIC FRENCH III | 4 quarter hours
(Undergraduate)**

Third quarter of beginning French. Completion of the basic elements of the French language, spoken as well as written, with due regard to the cultural context of French expression. This course completes the introduction to the study of the French language and the culture of Francophone countries. Its methodology is based on two assumptions. The first assumption is that language and culture are inseparable. As students learn the French language, they will also gain insights about the French and Francophone people and their culture. The second assumption is that language is for communication. Studying a foreign language does not mean memorizing grammar rules, but internalizing these rules so that learners can use them as guidelines when they attempt to express themselves in spoken and written French. The course also centers on the explanation of cultural aspects of French life, especially as they differ from American life. In-class work is devoted to intensive communication practice, so that students are able to put the rules they study to use in talking about themselves and their personal interests in French.

**FCH 103S | BASIC FRENCH III FOR SUMMER | 6 quarter hours
(Undergraduate)**

(Covers the equivalent of the second half of FCH 102 and all of FCH 103.) The second half of beginning French. Further work on the basic elements of the French language, spoken as well as written, with due regard to the cultural context of French expression.

**FCH 104 | INTERMEDIATE FRENCH I | 4 quarter hours
(Undergraduate)**

First quarter of intermediate French. Intensive practice in the use of French through listening, speaking, reading, and writing, and continued enhancement of the cultural awareness intrinsic to those skills. This course emphasizes language as communication. It stresses the further development of listening, reading, speaking, and writing skills. It is designed to reinforce the students' knowledge of French grammar and vocabulary in realistic contexts. The course also incorporates information on many aspects of contemporary French/Francophone society since cultural awareness is essential for true communicative competence. All the material presented has a functional purpose so that it can be easily used in real-life language situations. Class activities are structured to give students the practice they will need in order to perform authentic communicative functions in real life. FCH 103 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 104S | INTERMEDIATE FRENCH I FOR SUMMER | 6 quarter hours
(Undergraduate)**

This intensive course covers the equivalent of FCH 104 and the first half of FCH 105. Focuses on listening, speaking, reading, and writing French in a cultural context for the intermediate-level student.

**FCH 105 | INTERMEDIATE FRENCH II | 4 quarter hours
(Undergraduate)**

Second quarter of intermediate French. More concentration on the four language skills in an authentic cultural context. This course emphasizes language as communication. It stresses the further development of listening, reading, speaking, and writing skills. It is designed to reinforce the students' knowledge of French grammar and vocabulary in realistic contexts. The course also incorporates information on many aspects of contemporary French/Francophone society since cultural awareness is essential for true communicative competence. All the material presented has a functional purpose so that it can be easily used in real-life language situations. Class activities are structured to give students the practice they will need in order to perform authentic communicative functions in real life. FCH 104 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 106 | INTERMEDIATE FRENCH III | 4 quarter hours
(Undergraduate)**

Third quarter of intermediate French. Developing more fluency in speaking, understanding, reading and writing French with a concomitant heightened awareness of the cultural dimensions of the French language. This course emphasizes language as communication. It stresses the further development of listening, reading, speaking, and writing skills. It is designed to reinforce the students' knowledge of French grammar and vocabulary in realistic contexts. The course also incorporates information on many aspects of contemporary French/Francophone society since cultural awareness is essential for true communicative competence. All the material presented has a functional purpose so that it can be easily used in real-life language situations. Class activities are structured to give students the practice they will need in order to perform authentic communicative functions in real life. FCH 105 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 106S | INTERMEDIATE FRENCH III FOR SUMMER | 6 quarter hours
(Undergraduate)**

This intensive course covers the equivalent of the second half of FCH 105 and all of FCH 106. Focuses on listening, speaking, reading, and writing French in a cultural context for the intermediate-level student.

**FCH 130 | MOLILSAP STUDY ABROAD | 2 quarter hours
(Undergraduate)**

This course is specially designed to complement the Modern Language Introductory Languages Study Abroad programs, linked to the third quarter of the first year language program. The course will be taught abroad.

**FCH 197 | SPECIAL TOPICS IN FRENCH | 4 quarter hours
(Undergraduate)**

See schedule for current offerings.

**FCH 198 | STUDY ABROAD | 1-8 quarter hours
(Undergraduate)**

Variable credit.

**FCH 199 | INDEPENDENT STUDY | 0.5-8 quarter hours
(Undergraduate)**

Variable credit.

**FCH 201 | ADVANCED COMMUNICATION I | 4 quarter hours
(Undergraduate)**

First quarter of advanced French. Developing culturally appropriate speech and writing through the study of speech acts and written documents within the context of a systematic study and review of grammar and an introduction to translation. Students will read and prepare orally all texts and questions assigned for each session. In class, time will be spent on oral communication activities. These activities will allow students to express their views and impressions with precise terminology and help students acquire greater fluency and accuracy. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 202 | ADVANCED COMMUNICATION II | 4 quarter hours
(Undergraduate)**

Second quarter of advanced French. Focus on the differences between speech and writing with an emphasis on the latter as expressed in compositions, editing, translation, and other writing activities. This course is designed to help students develop culturally appropriate speech, writing, and translation through the study of speech acts and written documents within the context of a systematic study and review of grammar. The course introduces sophisticated syntactical patterns of the language and increases students' vocabulary, thus enabling them to write more elaborate compositions and improve their oral communication skills in a culturally appropriate manner. All students become editors of DePaul's literary French magazine, Mille-Feuille, and participate in all stages of its publication. The overarching theme of the course is the geography of France. Students will gain an in-depth understanding of France's geography, and be introduced to some of the regional characteristics of its literature and culture, economy, cuisine, music, and handicraft. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 203 | ADVANCED COMMUNICATION III | 4 quarter hours
(Undergraduate)**

Third quarter of advanced French. Developing a sophisticated spoken and written fluency using authentic texts as models for elaborated discourse. Written texts and writing exercises reinforce oral expression through extensive (journal) writing and intensive writing (individual and team compositions). The course includes advanced grammar work, occasional translation, and vocabulary enrichment. It utilizes Internet resources to create a simulation. Students write collaborative chapters based on their work. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 204 | ADVANCED COMMUNICATION IV | 4 quarter hours
(Undergraduate)**

Continued refinement of advanced speaking skills by focusing on oral texts discussed in their sociocultural context. Backup support provided through written texts and exercises. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 261E | TERROIRS DU SUD: LAND, FOOD, AND LIFE IN THE SOUTH OF FRANCE | 4 quarter hours
(Undergraduate)**

TAUGHT IN ENGLISH. The term *terroir*, defined by Angela Murrills as "a marvelous French word that encompasses soil, sun, and rain and how they all affect what grows there" (66), is typically associated with the geography of wine. The notion of *terroir*, however, extends beyond the fruits of the vine to impact the lives and behavior of people. This partner course explores the concept of *terroir* in French culture, cuisine, history, politics, and literature. Through readings, discussion, film, and presentations, students in FCH 261E will discover the symbiotic relationship between the land of the South of France and its inhabitants. The readings will consist of firsthand narratives from Anglophone expatriates who have chosen to live in the regions of Languedoc and Provence, as well as translated fictional stories from Southern French authors. These primary texts will be supplemented by lectures, student presentations, and film. The objective of FCH 261E is for students to gain a holistic cultural understanding of land, food, and life in the South of France.

GEO 350 is a co-requisite for this class.

**FCH 270E | A FRENCH VILLAGE | 4 quarter hours
(Undergraduate)**

TAUGHT IN ENGLISH. In this class, students will watch "A French Village" (2009-2017), a French television series created under the guidance of historian Jean-Pierre Azema. Inspired by the events that took place in France during World War II, this seven-season series follows the lives of inhabitants of the fictional town of Villeneuve from the Nazi occupation of France early in the war to the immediate aftermath of the war, including trials for war crimes and genocide and struggles to survive in a devastated society. The class will focus on learning about the causes of the war, the major events that occurred in the occupied territories, and the behavior of characters that mirror actual circumstances.

**FCH 297 | SPECIAL TOPICS IN FRENCH | 4 quarter hours
(Undergraduate)**

See schedule for current offerings.

**FCH 298 | STUDY ABROAD | 1-8 quarter hours
(Undergraduate)**

Variable credit.

**FCH 299 | INDEPENDENT STUDY | 0.5-8 quarter hours
(Undergraduate)**

Variable credit.

**FCH 301 | THE MIDDLE AGES | 4 quarter hours
(Undergraduate)**

This course is an overview of medieval literature such as the *Chanson de Roland* and the poetry of Francois Villon. It looks at the diverse literary genres that characterize medieval literature and create its diversity. Some genres, such as the "roman courtois," are given special attention because of their singular importance. Readings are placed within the cultural context of their times in order to understand the values they convey. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 302 | SURVEY OF 17TH AND 18TH CENTURY FRENCH LITERATURE | 4 quarter hours (Undergraduate)

This course follows themes developed across two centuries of French literature from 1600 to the end of the ancien regime. It looks at notions such as religion and disbelief as they move from philosophers like Descartes and the French moralistes to the philosophes; it presents conceptions of theater, the novel, and the essay as they evolve from the "grand siecle" to the "siecle des lumieres." It looks at the unfolding of classical French literature in a historical context that moves from royal absolutism to the demands of political and intellectual freedom that arise during the Enlightenment. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 303 | ROMANTICS, REALISTS, AND REBELS | 4 quarter hours (Undergraduate)

This course is an introduction to the writings of the French Realists and to nineteenth-century reactions against Romanticism. Readings might include works by Balzac, Baudelaire, Rimbaud and Flaubert. The course objectives are to familiarize students with Realist writers in the tradition of French literature and to examine ways in which Realism helped define French literary thought in the nineteenth century. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 304 | FRENCH CIVILIZATION I | 4 quarter hours (Undergraduate)

A survey of French civilization from its Gallic origins to the end of the ancient regime, this course focuses primarily on the history and culture of France, although it accords special attention to broader international developments such as the crusades. Beyond the tensions and exchanges between Islam and Christianity, some of the other key subjects this course addresses are feudalism, the Renaissance, the wars of religion, the centralized monarchy, and the Enlightenment. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 305 | RENAISSANCE | 4 quarter hours (Undergraduate)

This course provides an overview of the literature of the French Renaissance with strong emphasis on its most distinguished writers. These may include Rabelais (novel), Ronsard and Du Bellay (poetry), and Montaigne (essays). The course also may treat some lesser literary figures such as D'Aubigne, Marot (poetry) and Garnier (theater). The course conveys a sense of the unfolding Renaissance aesthetic and objectives, ranging from the early exuberance of Rabelais to the later skepticism and caution of Montaigne. It chronicles the self-conscious attempt of French authors to create a literature that rivaled that of Greco-Roman antiquity. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 306 | SEVENTEENTH-CENTURY FRANCE | 4 quarter hours (Undergraduate)

This course is an overview of French literature of the classical period, i.e., the literature largely written during the reign of Louis XIV. The course approaches materials by genre covering theater (Corneille, Racine, Moliere), poetry (La Fontaine, Malherbe, Regnier, Tristan l'Hermite), the novel (Mme de LaFayette, Sorel, Furetiere), literary theory (Boileau), and the moralistes (Pascal, La Rochefoucauld, La Bruyere). FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 307 | THE AGE OF ENLIGHTENMENT | 4 quarter hours (Undergraduate)

This course presents the French Enlightenment as a period of multiple liberations: the promotion of political liberty (the revolt against the absolutist monarchy), the condemnation of human slavery (most particularly in the colonies where it was rampant), the rejection of religious authority and dogma in the secular sphere (critique of the Roman Catholic Church and the advocacy of deism and atheism in place of Christianity), the exaltation of sensuality and the passions (libertine literature and the contestation of monogamy). The course examines the new cultural ideal, the philosophe, who fills the salons of the period. The course ends with several texts from the French Revolution. Most of the readings come from key writers of the period such as Diderot, Montesquieu, Rousseau and Voltaire, though they also include other writers of lesser magnitude. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 308 | THE ROMANTIC MOVEMENT | 4 quarter hours (Undergraduate)

This course is a study of the works of Lamartine, Hugo, Vigny, and Musset, all major representatives of the Romantic movement in France. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 309 | THE FRENCH NOVEL | 4 quarter hours (Undergraduate)

Topics may include: 17th- and 18th-century novel; world of Balzac; Flaubert and Stendhal; Realism and Naturalism; contemporary novelists; survey of the novel. This course examines the structures and situations that often typify the novel and asks why the genre has enjoyed such a continuous popularity among readers over so many centuries. It treats topics such as the transformation of the hero/heroine, the relationship of the greater society to the protagonist, the trials of the protagonist, the cultural ideals embodied by the hero/heroine, and the implications of the fate of the main characters. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 310 | FRENCH DRAMA | 4 quarter hours (Undergraduate)

Topics include: classical drama; romantic drama; contemporary drama. This course examines theatre practices in France across several centuries looking at the various art forms that populated its stages: tragedy, comedy, existentialist theatre, theatre of the absurd and contemporary creations. In addition to reading plays spanning from the 17th to the 21st centuries and putting these in their social context, students may view filmed productions of theatre performances and attend plays if possible. Authors might include Racine, Corneille, Moliere, Beaumarchais, Musset, Ionesco, Beckett and Reza. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 311 | FRENCH POETRY | 4 quarter hours (Undergraduate)

Topics include: form and substance; Baudelaire, Rimbaud, Verlaine, Mallarme; contemporary poets. This course is an exploration of French poetry. It provides a history of French poetry while outlining the socio-historical and intellectual context for poetic creation. The course is also an introduction to the techniques of literary analysis as characterized by "explication de texte," a close reading that looks at the various components of texts: the imagery, the style, rhyme scheme, structure, characterization, tone, etc. leading to an understanding of the overall structure and meaning of the piece. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 312 | TWENTIETH CENTURY WRITERS | 4 quarter hours
(Undergraduate)**

This course introduces students to some of the most prestigious literary figures of the earlier period of the past century, such as Proust, Gide, Malraux, Camus, Sartre, and De Beauvoir. It explores their work in the novel and, when appropriate, in other genres. The course situates the texts and authors within an historical and stylistic framework that indicates major twentieth-century concerns. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 313 | THE SURREALIST REVOLUTION | 4 quarter hours
(Undergraduate)**

Nerval, Lautreamont, Breton, Aragon; films of Man Ray and Bunel. This course takes an interdisciplinary approach to the surrealist movement because the European avant-garde of the early twentieth century used all modes of expression to convey their artistic theories. The course explores surrealist writings and art of all kinds to assess the totality of surrealist modes of expression. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 314 | CONTEMPORARY FRENCH WRITERS | 4 quarter hours
(Undergraduate)**

This course is an exploration of texts written by French authors since the 1940's. Students are taught to analyze a series of novels and short stories as well as the themes they develop and the narrative strategies they adopt. This course will also study the theories that have shaped the period: existentialism, the New Novel, feminism, the literature of transgression, the question of being and language, and Neo-Realism. Authors might include: Bataille, Perec, Blanchot, Yourcenar, Duras, Tournier, LeClezio, Guibert, Cixous, Ernaux, Tremblay, Conde, Ben Jelloun. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 315 | CONTEMPORARY FRENCH CRITICISM | 4 quarter hours
(Undergraduate)**

Topics include: structuralist critics; feminist critics; post-modernist critics. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 316 | FRANCOPHONE LITERATURE OF AFRICA AND THE CARIBBEAN | 4 quarter hours
(Undergraduate)**

Classic and emerging writers of these regions. This course might include the contemporary Haitian writer Dany Laferriere in a multi-faceted course examining the historical, cultural, and political background of the Haitian question. Other iterations of this course might include writings of authors from Francophone Africa or the Caribbean studied within the context of their nations and of the Francophone world. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 317 | THE LITERATURE OF FRENCH CANADA | 4 quarter hours
(Undergraduate)**

Classic and contemporary French-Canadian writers. This course is an introduction to established authors of French Canada whose works are considered classics. Authors to be read might include Louis Hemon, Gabrielle Roy, Yves Theriault, Antonine Maillet, Anne Hebert, and Michel Tremblay. While acquainting students with several forms of Canadian literature, this course intends also to familiarize them with many aspects of French Canadian culture in all its diversity. Topics covered might include the way of life in the wilderness of the Eastern Canadian forest; the disenfranchised in Montreal; Eskimo life and the Inuit culture; "le grand derangement" the removal of the Acadians from their land, now known as Nova Scotia, to Louisiana. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 319 | FRENCH/FRANCOPHONE WOMEN WRITERS | 4 quarter hours
(Undergraduate)**

This course is an exploration of recent texts written in French by a variety of women across the globe. It gives students a chance to discuss not only the place of these women within their own society but also the specificity of their relationship to French culture and language. From France, to Senegal, Benin, Congo, Algeria, Quebec, Egypt, Vietnam and Guadeloupe, the course will allow students to travel across socio-geopolitical borders and to explore the narrative strategies specific to these women. A few films might further contextualize the material. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 320 | FRENCH FOR BUSINESS | 4 quarter hours
(Undergraduate)**

Advanced preparation for the use of French in the business world. This course focuses on acquiring business vocabulary, skills for dealing with French business partners, and the ability to comprehend specialized business journals and reports. It prepares students for using their knowledge of French in a business context. Extensive discussions of the role France plays in the European Union will also be included. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 321 | TRANSLATION | 4 quarter hours
(Undergraduate)**

Fundamental principles of translation. The main objective of this course is to introduce students to the fundamental principles of translation and to help them acquire the techniques for translating a range of texts from French into English, and to a lesser extent, from English into French, thus equipping them with proficiency in translating at an advanced level. Through a variety of translation assignments, students will be able to review French grammar, work within different registers and learn appropriate vocabulary, expand their reading and writing abilities in French and develop a sense of responsibility for the text translated. This course presents a survey of the latest technologies such as web-based dictionaries, and provides an introduction to translating technical documents in medicine, law, sports, travel, and business. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 322 | FRENCH GRAMMAR AND USAGE | 4 quarter hours
(Undergraduate)**

This course is an examination of French grammar as a linguistic system and of notions of "standard" in written and spoken French. Recommended for future teachers and students interested in grammatical analysis. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 323 | TRANSLATION II | 4 quarter hours
(Undergraduate)**

Continued introduction to fundamental principles of translation. The main objective of this course is to introduce students to the fundamental principles of translation and to help them acquire the techniques for translating a range of texts from French into English, and to a lesser extent, from English into French, thus equipping them with proficiency in translating at an advanced level. Through a variety of translation assignments, students will be able to review French grammar, work within different registers and learn appropriate vocabulary, expand their reading and writing abilities in French and develop a sense of responsibility for the text translated. This course presents a survey of translation theory and provides an introduction to translating documents in theory, journalism, hotel management, psychoanalysis, literature, advertising, cooking and cinema. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 324 | TRANSLATION III | 4 quarter hours
(Undergraduate)**

Intensive practice of French-English and English-French translation. The course includes a major portfolio project requiring collaborative work. It aims to equip students with proficiency in translating at an advanced level, to train them to locate and make appropriate use of reference material from a variety of sources, to write introductions and footnotes as needed, to help them understand the importance of familiarity with a subject matter and distinguish between various lexical fields, to teach them to comprehend and effectively manage the linguistic and cultural aspects of language transfer. Furthermore, the course provides students with an understanding of professional expectations in the field of translation. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 326 | FRENCH STYLISTICS | 4 quarter hours
(Undergraduate)**

An intensive writing course, providing rhetorical, linguistic, and literary analysis of varied styles of writing. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 329 | FRENCH CINEMA | 4 quarter hours
(Undergraduate)**

Topics in French film from its origins to the present day. A course on iconic French filmmakers of the last fifty years and their contributions to a creative reorientation of cinema in the context of the history of French cinema and film criticism. Topics might include: the New Wave and after, growing up in France and its colonies, love and eroticism, the representation of women in cinema, women directors and the deconstruction of female stereotypes, living on the margins, cinema of the suburbs, social renegades, the construction of the city. Through readings, class discussions, and film viewings, students gain an understanding of French films in light of their cultural and historical contexts. Directors studied might include: Francois Truffaut, Jean-Luc Godard, Diane Kurys, Claire Denis, Patrice Leconte, Andre Techine, Agnes Varda, Bertrand Blier, Matthieu Kassowitz and Sylvain Chomet. Students learn the basic concepts of film aesthetics necessary to an appreciation of cinema, along with a critical vocabulary in French for analyzing and discussing films. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 332 | FRENCH CIVILIZATION II | 4 quarter hours
(Undergraduate)**

Intellectual, political and social background from the rise of Napoleon to the current time. This course describes the various political mutations of France from the Empire of the early nineteenth century to the Fifth Republic. The course presents critical social, literary, and artistic developments throughout the two centuries under consideration. A sample of cultural topics includes impressionism and cubism in art, and romanticism, realism and existentialism in literature. The course devotes significant attention to the creation of late-nineteenth century and early twentieth-century Paris (a time of French cultural pre-eminence in the West) when the city, initially under Haussmann's urban renovation projects, began to take on the physical form that so many people associate with Paris today. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 333 | PASTEUR, MICROBES AND 19TH CENTURY FRANCE | 4 quarter hours
(Undergraduate)**

Louis Pasteur, one of the world's most important scientists, lived during a time of turmoil and explosive growth in France. A chemist and microbiologist, he is famous for his discoveries of the principles of vaccination, fermentation and pasteurization. In this course, students will read his scientific writings, as well as historical documents explaining the turbulent times in which Pasteur lived and worked. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 340 | CONTEMPORARY FRANCE | 4 quarter hours
(Undergraduate)**

This course is an introduction to contemporary France through articles, books, films, web sites, and, when possible, direct interaction with French people via social networks. Although the course emphasizes France as it is today, it also seeks to point out underlying cultural/historical factors that govern French responses to particular situations. The course covers numerous topics from both high and popular culture. When timely, it makes comparisons between diverging French and American cultural perspectives. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

**FCH 341 | INTRODUCTION TO FRENCH LITERATURE I | 4 quarter hours
(Undergraduate)**

(Required of all majors.) Taught in Autumn quarter every two years on a rotating basis with FCH 342. This course is a survey of French Literature from the Middle Ages through the seventeenth century (le grand siecle). It treats some of the major authors/texts of the medieval, renaissance and classical periods of French literature and offers readings from a variety of genres: poetry (epic, lay, ballad, sonnet), theater (religious, profane, farce, high drama), and prose (philosophical musings, aphorisms, essays, novel). The course provides an overview of approximately six hundred years of French literature. FCH 106 or equivalent, including placement test or permission of instructor, is recommended. Offered autumn quarter of even numbered years.

FCH 342 | INTRODUCTION TO FRENCH LITERATURE II | 4 quarter hours (Undergraduate)

(Required of all majors). Survey of French literature of the 18th and 19th centuries. Taught in Autumn quarter every two years on a rotating basis with FCH 341. By analyzing works and excerpts from major writings of the French canon, the course treats the progression from the Age of Enlightenment, putting an emphasis on the themes of love and virtue, to pre-Romanticism, and the libertine culture. The course then provides an overview of Romanticism and later nineteenth-century developments such as Symbolism in poetry and modernity. Authors to be read may include Rousseau, Sade, Laclos, Nerval, Hugo, Lamartine, Vigny, Balzac, Sand, Colet, Mme. d'Agouet, Mme. de Stael, and Flaubert. FCH 106 or equivalent, including placement test or permission of instructor, is recommended. Offered autumn quarter of odd numbered years.

FCH 345 | THE AFRICAN PRESENCE IN FRANCE | 4 quarter hours (Undergraduate)

This course offers a cultural studies perspective on the immigrant populations in France since the end of the colonial empire in Africa. It is designed to increase students' understanding of immigration in France as experienced by a variety of African communities. Through sociological documentaries, literature, manifestoes, legal documents, music, films and cooking, students will learn about the experiences and reshaped identities of first and second generation immigrants from both Western and Northern Africa. A brief introduction to the history of immigration in France and to the French colonization and subsequent decolonization of Africa will be provided. Countries discussed include Algeria, Morocco, Tunisia, Senegal, Cameroun, and Mali. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 350 | FRENCH PHONOLOGY AND PHONETICS | 4 quarter hours (Undergraduate)

(Required of all majors). An in-depth study of the language's sound system and intensive pronunciation practice. This course is designed to introduce advanced students to the structure of the sound system of the French language and—on a practical level—to help them improve their pronunciation. Lectures, discussions, practice sessions and group work are based on a main manual and various handouts as well as recordings of French speakers. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 395 | FOREIGN LANGUAGES ACROSS THE CURRICULUM | 2 quarter hours (Undergraduate)

The two credit FLAC course allows students to enrich their experience in the co-required course through added reading, writing, listening and speaking activities in French. Students must have the equivalent of 106 or higher ability in French to take this two credit component. Please contact the Department of Modern Languages if you have questions about these courses or about language placement.

FCH 397 | SPECIAL TOPICS IN FRENCH | 4 quarter hours (Undergraduate)

See schedule for offerings.

FCH 398 | STUDY ABROAD | 1-8 quarter hours (Undergraduate)

Variable credit. Students participating in the Institute of European Studies will be allowed to count a total of three courses (semester program) or five courses (year program) towards their major or minor requirements.

FCH 399 | INDEPENDENT STUDY | 1-4 quarter hours (Undergraduate)

Variable credit.

FCH 401 | THE MIDDLE AGES | 4 quarter hours (Graduate)

This course is an overview of medieval literature such as the Chanson de Roland and the poetry of Francois Villon. It looks at the diverse literary genres that characterize medieval literature and create its diversity. Some genres, such as the "roman courtois," are given special attention because of their singular importance. Readings are placed within the cultural context of their times in order to understand the values they convey.

FCH 402 | SURVEY OF 17TH AND 18TH CENTURY FRENCH LITERATURE | 4 quarter hours (Graduate)

This course follows themes developed across two centuries of French literature from 1600 to the end of the ancien regime. It looks at notions such as religion and disbelief as they move from philosophers like Descartes and the French moralistes to the philosophes; it presents conceptions of theater, the novel, and the essay as they evolve from the "grand siecle" to the "siecle des lumieres." It looks at the unfolding of classical French literature in a historical context that moves from royal absolutism to the demands of political and intellectual freedom that arise during the Enlightenment.

FCH 403 | ROMANTICS, REALISTS AND REBELS | 4 quarter hours (Graduate)

This course is an introduction to the writings of the French Realists and to nineteenth-century reactions against Romanticism. Readings might include works by Balzac, Baudelaire, Rimbaud and Flaubert. The course objectives are to familiarize students with Realist writers in the tradition of French literature and to examine ways in which Realism helped define French literary thought in the nineteenth century.

FCH 404 | FRENCH CIVILIZATION I | 4 quarter hours (Graduate)

A survey of French civilization from its Gallic origins to the end of the ancien regime, this course focuses primarily on the history and culture of France, although it accords special attention to broader international developments such as the crusades. Beyond the tensions and exchanges between Islam and Christianity, some of the other key subjects this course addresses are feudalism, the Renaissance, the wars of religion, the centralized monarchy, and the Enlightenment.

FCH 405 | RENAISSANCE | 4 quarter hours (Graduate)

This course provides an overview of the literature of the French Renaissance with strong emphasis on its most distinguished writers. These may include Rabelais (novel), Ronsard and Du Bellay (poetry), and Montaigne (essays). The course also may treat some lesser literary figures such as D'Aubigne, Marot (poetry) and Garnier (theater). The course conveys a sense of the unfolding Renaissance aesthetic and objectives, ranging from the early exuberance of Rabelais to the later skepticism and caution of Montaigne. It chronicles the self-conscious attempt of French authors to create a literature that rivaled that of Greco-Roman antiquity.

FCH 406 | SEVENTEENTH-CENTURY FRANCE | 4 quarter hours (Graduate)

This course is an overview of French literature of the classical period, i.e., the literature largely written during the reign of Louis XIV. The course approaches materials by genre covering theater (Corneille, Racine, Moliere), poetry (La Fontaine, Malherbe, Regnier, Tristan l'Hermite), the novel (Mme de LaFayette, Sorel, Furetiere), literary theory (Boileau), and the moralistes (Pascal, La Rochefoucauld, La Bruyere).

**FCH 407 | AGE OF ENLIGHTENMENT | 4 quarter hours
(Graduate)**

This course presents the French Enlightenment as a period of multiple liberations: the promotion of political liberty (the revolt against the absolutist monarchy), the condemnation of human slavery (most particularly in the colonies where it was rampant), the rejection of religious authority and dogma in the secular sphere (critique of the Roman Catholic Church and the advocacy of deism and atheism in place of Christianity), the exaltation of sensuality and the passions (libertine literature and the contestation of monogamy). The course examines the new cultural ideal, the philosophe, who fills the salons of the period. The course ends with several texts from the French Revolution. Most of the readings come from key writers of the period such as Diderot, Montesquieu, Rousseau and Voltaire, though they also include other writers of lesser magnitude.

**FCH 408 | THE ROMANTIC MOVEMENT | 4 quarter hours
(Graduate)**

This course is a study of the works of Lamartine, Hugo, Vigny, and Musset, all major representatives of the Romantic movement in France.

**FCH 409 | THE FRENCH NOVEL | 4 quarter hours
(Graduate)**

Topics may include: 17th- and 18th-century novel; world of Balzac; Flaubert and Stendhal; Realism and Naturalism; contemporary novelists; survey of the novel. This course examines the structures and situations that often typify the novel and asks why the genre has enjoyed such a continuous popularity among readers over so many centuries. It treats topics such as the transformation of the hero/heroine, the relationship of the greater society to the protagonist, the trials of the protagonist, the cultural ideals embodied by the hero/heroine, and the implications of the fate of the main characters.

**FCH 410 | FRENCH DRAMA | 4 quarter hours
(Graduate)**

Topics include: classical drama; romantic drama; contemporary drama. This course examines theatre practices in France across several centuries looking at the various art forms that populated its stages: tragedy, comedy, existentialist theatre, theatre of the absurd and contemporary creations. In addition to reading plays spanning from the 17th to the 21st centuries and putting these in their social context students may view filmed productions of theatre performances and attend plays if possible. Authors might include Racine, Corneille, Moliere, Beaumarchais, Musset, Ionesco, Beckett and Reza.

**FCH 411 | FRENCH POETRY | 4 quarter hours
(Graduate)**

Topics include: form and substance; Baudelaire, Rimbaud, Verlaine, Mallarme; contemporary poets. This course is an exploration of French poetry. It provides a history of French poetry while outlining the socio-historical and intellectual context for poetic creation. The course is also an introduction to the techniques of literary analysis as characterized by "explication de texte," a close reading that looks at the various components of texts: the imagery, the style, rhyme scheme, structure, characterization, tone, etc. leading to an understanding of the overall structure and meaning of the piece.

**FCH 412 | TWENTIETH CENTURY WRITERS | 4 quarter hours
(Graduate)**

This course introduces students to some of the most prestigious literary figures of the earlier period of the past century, such as Proust, Gide, Malraux, Camus, Sartre, and De Beauvoir. It explores their work in the novel and, when appropriate, in other genres. The course situates the texts and authors within an historical and stylistic framework that indicates major twentieth-century concerns.

**FCH 413 | THE SURREALIST REVOLUTION | 4 quarter hours
(Graduate)**

Nerval, Lautreamont, Breton, Aragon; films of Man Ray and Bunel. This course takes an interdisciplinary approach to the surrealist movement because the European avant-garde of the early twentieth century used all modes of expression to convey their artistic theories. The course explores surrealist writings and art of all kinds to assess the totality of surrealist modes of expression.

**FCH 414 | CONTEMPORARY FRENCH WRITERS | 4 quarter hours
(Graduate)**

This course is an exploration of texts written by French authors since the 1940's. Students are taught to analyze a series of novels and short stories as well as the themes they develop and the narrative strategies they adopt. This course will also study the theories that have shaped the period: existentialism, the New Novel, feminism, the literature of transgression, the question of being and language, and Neo-Realism. Authors might include: Bataille, Perec, Blanchot, Yourcenar, Duras, Tournier, LeClezio, Guibert, Cixous, Ernaux, Tremblay, Conde, Ben Jelloun.

**FCH 415 | CONTEMPORARY FRENCH CRITICISM | 4 quarter hours
(Graduate)**

Topics include: structuralist critics; feminist critics; post-modernist critics.

**FCH 416 | FRANCOPHONE LITERATURE OF AFRICA AND THE CARIBBEAN | 4 quarter hours
(Graduate)**

Classic and emerging writers of these regions. This course might include the contemporary Haitian writer Dany Laferriere in a multi-faceted course examining the historical, cultural, and political background of the Haitian question. Other iterations of this course might include writings of authors from Francophone Africa or the Caribbean studied within the context of their nations and of the francophone world.

**FCH 417 | THE LITERATURE OF FRENCH CANADA | 4 quarter hours
(Graduate)**

Classic and contemporary French-Canadian writers. This course is an introduction to established authors of French Canada whose works are considered classics. Authors to be read might include Louis Hemon, Gabrielle Roy, Yves Theriault, Antonine Maillet, Anne Hebert, and Michel Tremblay. While acquainting students with several forms of Canadian literature, this course intends also to familiarize them with many aspects of French Canadian culture in all its diversity. Topics covered might include the way of life in the wilderness of the Eastern Canadian forest; the disenfranchised in Montreal; Eskimo life and the Inuit culture; "le grand derangement" the removal of the Acadians from their land, now known as Nova Scotia, to Louisiana.

**FCH 419 | FRENCH WOMEN WRITERS | 4 quarter hours
(Graduate)**

This course is an exploration of recent texts written in French by a variety of women across the globe. It gives students a chance to discuss not only the place of these women within their own society but also the specificity of their relationship to French culture and language. From France, to Senegal, Benin, Congo, Algeria, Quebec, Egypt, Vietnam and Guadeloupe, the course will allow students to travel across socio-geopolitical borders and to explore the narrative strategies specific to these women. A few films might further contextualize the material.

FCH 420 | FRENCH FOR BUSINESS | 4 quarter hours
(Graduate)

Advanced preparation for the use of French in the business world. This course focuses on acquiring business vocabulary, skills for dealing with French business partners, and the ability to comprehend specialized business journals and reports. It prepares students for using their knowledge of French in a business context. Extensive discussions of the role France plays in the European Union will also be included.

FCH 421 | TRANSLATION | 4 quarter hours
(Graduate)

Fundamental principles of translation. The main objective of this course is to introduce students to the fundamental principles of translation and to help them acquire the techniques for translating a range of texts from French into English, and to a lesser extent, from English into French, thus equipping them with proficiency in translating at an advanced level. Through a variety of translation assignments, students will be able to review French grammar, work within different registers and learn appropriate vocabulary, expand their reading and writing abilities in French and develop a sense of responsibility for the text translated.

This course presents a survey of the latest technologies such as web-based dictionaries, and provides an introduction to translating technical documents in medicine, law, sports, travel, and business.

FCH 422 | FRENCH GRAMMAR AND USAGE | 4 quarter hours
(Graduate)

This course is an examination of French grammar as a linguistic system and of notions of "standard" in written and spoken French. Recommended for future teachers and students interested in grammatical analysis.

FCH 423 | TRANSLATION II | 4 quarter hours
(Graduate)

Continued introduction to fundamental principles of translation. The main objective of this course is to introduce students to the fundamental principles of translation and to help them acquire the techniques for translating a range of texts from French into English, and to a lesser extent, from English into French, thus equipping them with proficiency in translating at an advanced level. Through a variety of translation assignments, students will be able to review French grammar, work within different registers and learn appropriate vocabulary, expand their reading and writing abilities in French and develop a sense of responsibility for the text translated. This course presents a survey of translation theory and provides an introduction to translating documents in theory, journalism, hotel management, psychoanalysis, literature, advertising, cooking and cinema.

FCH 424 | TRANSLATION III | 4 quarter hours
(Graduate)

Intensive practice of French-English and English-French translation. The course includes a major portfolio project requiring collaborative work. It aims to equip students with proficiency in translating at an advanced level, to train them to locate and make appropriate use of reference material from a variety of sources, to write introductions and footnotes as needed, to help them understand the importance of familiarity with a subject matter and distinguish between various lexical fields, to teach them to comprehend and effectively manage the linguistic and cultural aspects of language transfer. Furthermore, the course provides students with an understanding of professional expectations in the field of translation.

FCH 426 | FRENCH STYLISTICS | 4 quarter hours
(Graduate)

An intensive writing course, providing rhetorical, linguistic, and literary analysis of varied styles of writing. Cross-listed with FCH 326.

FCH 429 | FRENCH CINEMA | 4 quarter hours
(Graduate)

Topics in French film from its origins to the present day. A course on iconic French filmmakers of the last fifty years and their contributions to a creative reorientation of cinema in the context of the history of French cinema and film criticism. Topics include: the New Wave and after, growing up in France and its colonies, love and eroticism, the representation of women in cinema, women directors and the deconstruction of female stereotypes, living on the margins, cinema of the suburbs, social renegades, the construction of the city. Through readings, class discussions, and film viewings, students gain an understanding of French films in light of their cultural and historical contexts. Directors studied might include: Francois Truffaut, Jean-Luc Godard, Diane Kurys, Claire Denis, Patrice Leconte, Andre Techine, Agnes Varda, Bertrand Blier, Matthieu Kassowitz and Sylvain Chomet. Students learn the basic concepts of film aesthetics necessary to an appreciation of cinema, along with a critical vocabulary in French for analyzing and discussing films.

FCH 432 | FRENCH CIVILIZATION II | 4 quarter hours
(Graduate)

Intellectual, political and social background from the rise of Napoleon to the current time. This course describes the various political mutations of France from the Empire of the early nineteenth century to the Fifth Republic. The course presents critical social, literary, and artistic developments throughout the two centuries under consideration. A sample of cultural topics includes impressionism and cubism in art, and romanticism, realism and existentialism in literature. The course devotes significant attention to the creation of late-nineteenth century and early twentieth-century Paris (a time of French cultural pre-eminence in the West) when the city, initially under Haussmann's urban renovation projects, began to take on the physical form that so many people associate with Paris today.

FCH 433 | PASTEUR, MICROBES AND 19TH CENTURY FRANCE | 4 quarter hours
(Graduate)

Louis Pasteur, one of the world's most important scientists, lived during a time of turmoil and explosive growth in France. A chemist and microbiologist, he is famous for his discoveries of the principles of vaccination, fermentation and pasteurization. In this course, students will read his scientific writings, as well as historical documents explaining the turbulent times in which Pasteur lived and worked.

FCH 440 | CONTEMPORARY FRANCE | 4 quarter hours
(Graduate)

This course is an introduction to contemporary France through articles, books, films, web sites, and, when possible, direct interaction with French people via social networks. Although the course emphasizes France as it is today, it also seeks to point out underlying cultural/historical factors that govern French responses to particular situations. The course covers numerous topics from both high and popular culture. When timely, it makes comparisons between diverging French and American cultural perspectives.

FCH 441 | INTRODUCTION TO FRENCH LITERATURE I | 4 quarter hours (Graduate)

Taught in Autumn quarter every two years on a rotating basis with FCH 442. This course is a survey of French Literature from the Middle Ages through the seventeenth century (le grand siècle). It treats some of the major authors/texts of the medieval, renaissance and classical periods of French literature and offers readings from a variety of genres: poetry (epic, lay, ballad, sonnet), theater (religious, profane, farce, high drama), and prose (philosophical musings, aphorisms, essays, novel). The course provides an overview of approximately six hundred years of French literature.

FCH 442 | INTRODUCTION TO FRENCH LITERATURE II | 4 quarter hours (Graduate)

Survey of French literature of the 18th and 19th centuries. Taught in Autumn quarter every two years on a rotating basis with FCH 441. By analyzing works and excerpts from major writings of the French canon, the course treats the progression from the Age of Enlightenment, putting an emphasis on the themes of love and virtue, to pre-Romanticism, and the libertine culture. The course then provides an overview of Romanticism and later nineteenth-century developments such as Symbolism in poetry and modernity. Authors to be read may include Rousseau, Sade, Laclos, Nerval, Hugo, Lamartine, Vigny, Balzac, Sand, Colet, Mme. d'Agouet, Mme. de Stael, and Flaubert.

FCH 445 | THE AFRICAN PRESENCE IN FRANCE | 4 quarter hours (Graduate)

This course offers a cultural studies perspective on the immigrant populations in France since the end of the colonial empire in Africa. It is designed to increase students' understanding of immigration in France as experienced by a variety of African communities. Through sociological documentaries, literature, manifestoes, legal documents, music, films and cooking, students will learn about the experiences and reshaped identities of first and second generation immigrants from both Western and Northern Africa. A brief introduction to the history of immigration in France and to the French colonization and subsequent decolonization of Africa will be provided. Countries discussed include Algeria, Morocco, Tunisia, Senegal, Cameroun, and Mali.

FCH 450 | FRENCH PHONOLOGY AND PHONETICS | 4 quarter hours (Graduate)

An in-depth study of the language's sound system and intensive pronunciation practice, this course is designed to introduce students to the structure of the sound system of the French language and—on a practical level—to help them improve their pronunciation. Lectures, discussions, practice sessions and group work are based on a main manual and various handouts as well as recordings of French speakers.

FCH 491 | FRENCH FOR READING | 4 quarter hours (Graduate)

Intensive review of basics of French grammar, vocabulary and sentence structure, for reading knowledge of scholarly articles in French.

FCH 496 | PRACTICUM IN FRENCH INSTRUCTION | 4 quarter hours (Graduate)

Supervised practice in language instruction, paired with a mentor instructor in a beginning or intermediate language course. Students observe a class, teach a lesson or lessons, assist in assessment and lesson planning, and complete individualized assignments to develop their skills as classroom language instructors. Repeatable.

FCH 497 | SPECIAL TOPICS IN FRENCH | 4 quarter hours (Graduate)

See schedule for current offerings.

FCH 498 | STUDY ABROAD | 1-8 quarter hours (Graduate)

Variable credit.

FCH 499 | INDEPENDENT STUDY | 1-8 quarter hours (Graduate)

Variable credit.

Game Development (GAM)

GAM 102 | MECHANICS OF GAME DESIGN | 4 quarter hours (Undergraduate)

This course introduces students to the design and implementation of core mechanics and game loops for real-time digital games. In order to hone an eye for detail and a deeper understanding of how design decisions ripple out across different systems, this class focusses on a single game genre, such as 2D platforming games, walking simulators, or stealth games. Students will play several games from that genre, analyze their affordances, and develop prototypes of specific subsystems. Topics to be covered include genre history, game feel, interaction design, procedural rhetoric, systems design, common scripting patterns. **GAM 240 is a prerequisite for this class.**

GAM 180 | UNREAL ENGINE WORKSHOP | 2-2.25 quarter hours (Undergraduate)

This course focuses on teaching students the fundamentals to Unreal Engine. By the end of the course the students will build a small game from scratch in the Unreal Engine. No programming knowledge is required to take this course. Students will learn basic concepts of the Unreal Engine, from learning the interface of UE4 to scripting basic behaviors with blueprints. Students will also learn the basics of several different modules in UE4.

GAM 181 | UNITY WORKSHOP | 2-2.25 quarter hours (Undergraduate)

This course focuses on teaching students the fundamentals of Unity. By the end of the course the students will build a small game from scratch in the Unity. No programming knowledge is required to take this course. Students will learn basic concepts of the Unity Game Engine from learning the interface of Unity to scripting basic behaviors in C#. Students will also learn the basics of several different modules in Unity Engine.

GAM 200 | PLAY | 4 quarter hours (Undergraduate)

Exploring the concept of "play" from a variety of disciplinary perspectives including sociology, anthropology, psychology, literary and theater studies and the arts, this course discusses "play" as a central force in cultural, social, artistic and personal development. It intends to raise awareness for the ways in which "play" can promote creativity, mental and emotional health, problem solving as well as personal and social change. It analyzes the role of "play" as an element of negotiation and reconciliation between disparate forces within the individual and with others.

GAM 201 | HISTORY OF VIDEOGAMES | 4 quarter hours (Undergraduate)

This course provides an overview of the history of modern interactive entertainment starting with the early developments of the late 1940s up until the present day. The course covers five longitudinal perspectives, or themes. For each theme students will become familiar with notable game titles, events, people, technologies, game mechanics and genres.

**GAM 205 | GAMES LITERACY | 4 quarter hours
(Undergraduate)**

This lecture course introduces students to the evolving forms, uses, and design of games. Topics covered include the relationship between game design and play, the role of games in fueling the technological imagination, the changing contexts in which games are designed and played (art, social impact, health, education), and the rise of the independent games sector. Students will produce weekly written responses to course material, lead a seminar discussion in small teams, and produce a final written or multimedia paper. PREREQUISITE(S): None.

**GAM 206 | HISTORY OF GAMES | 4 quarter hours
(Undergraduate)**

From "The Royal Game of Ur" (2500+ BCE) to "World of Warcraft" (2004), games have been a constant in human history. The forms of games, their experiential qualities, and their cultural significance have varied enormously from era to era and place to place. This class will examine particular games and game genres in their historical context using a case study format. We will focus on "indoor" games, those of chance and skill, as opposed to physical games and sports. The examples will be chosen (i) to have global scope and historic diversity, (ii) to relate to games that students will find familiar, and (iii) to raise particular issues in historical interpretation, the use of primary sources and changing concepts of leisure activity.

**GAM 208 | VIRTUAL WORLDS AND ONLINE COMMUNITIES | 4 quarter hours
(Undergraduate)**

Environments such as social networking sites, multiplayer online games and other online communities are becoming an increasingly large part of how we work, play, and learn. This course introduces the fundamentals for the interdisciplinary study of cyberculture and online social behavior. By examining core scholarship in this area, together with analyzing an existing virtual world, game, or online community, students will learn to research and understand new technologically-enabled social forms as they are emerging.

WRD 104 is a prerequisite for this class.

**GAM 224 | GAME DESIGN FOR NON-MAJORS | 4 quarter hours
(Undergraduate)**

This course approaches the study of computer games from three angles: first, as examples of media that can be analyzed and critiqued for their thematic elements, formal structure, plot and interactive appreciation; second, as complex software artifacts subject to technological constraints and the product of a labor-intensive design and implementation process; and three as a cultural artifact with behaviors and associations comparable in import to other popular art forms. Students will study the principles of game design and use them both to analyze existing games and to develop their own original game ideas. Students will also learn about the process of game development, starting from the game's narrative concept and moving to consideration of a game's components: the representation of the player, of artifacts, the virtual world that contains them and the interaction between them and the player.

**GAM 226 | FUNDAMENTALS OF GAME DESIGN | 4 quarter hours
(Undergraduate)**

This course provides students a practical foundation in game design with a focus on concept development, design decomposition, and prototyping. Using game design theory, analysis, physical prototyping, playtesting, and iteration students learn how to translate game ideas, themes, and metaphors into gameplay, game pitches, and design documents. Students will analyze and recognize play that exists in important games, stories, and other media.

**GAM 228 | ETHICS IN COMPUTER GAMES AND CINEMA | 4 quarter hours
(Undergraduate)**

Societies function based on normative ethics utilizing common sense to distinguish between ethical and unethical behavior. Most of us are not aware of the underlying theories when arriving at ethical judgments about right and wrong. However, the fast pace of progress in information technologies and digital entertainment creates an environment in which ethical challenges are particularly complex. In the eyes of many, games and movies are violent, offensive and immoral. This course will concentrate on analyzing the impact of digital entertainment on an individual and society. Implications of certain values embedded in games and movies will be discussed. Elements of the ethical code of conduct for a game or movie creator will be formulated. The issue of balancing individual creativity vs. cultural impact, particularly on children, will be discussed.

**GAM 229 | PRESENTATION AND COMMUNICATION | 4 quarter hours
(Undergraduate)**

GAM 229 focuses on effective written and oral communication for designers in the professional world and beyond. While covering the basics of writing various design documents from high concepts to production guidelines, and teaching various presentation formats and techniques, GAM 229 aims to raise students' awareness for the "human" aspects of becoming an effective communicator and offers experimental, creative solutions to communication problems, such as team or client issues. Based on psychology research, this course offers insights on what it takes to "hear others" and "be heard" and to create constructive, productive relationships. PREREQUISITE(S): None.

**GAM 230 | INTRO TO GAME PRODUCTION | 4 quarter hours
(Undergraduate)**

Game development is a big business, and production teams can now exceed one hundred people. This course is an introduction to the production methods used in the game industry, and to the demanding role of the Producer on the game development team. Students will work to develop skills in team building, project presentation, organization, and dealing with people. Subjects covered include scheduling tools, collaborative software, project management, vendor relations, inter-departmental relations, and quality assurance.

GAM 245 is a prerequisite for this class.

**GAM 231 | HISTORY AND DESIGN OF ROLE-PLAYING GAMES | 4 quarter hours
(Undergraduate)**

Students learn the history of role-playing games and the process of world-building to collaboratively design and develop their own games that advance the genre. Topics include the psychological and social opportunities unique to the genre, as well as its history from table-top, to live-action and massively multi-player. Class time consists of lectures, workdays, workshops, playtests, and critiques.

GAM 224 or GAM 226 is a prerequisite for this class

**GAM 240 | PLAYGRAMMING | 4 quarter hours
(Undergraduate)**

This workshop introduces computer programming to artists and game designers. Programming is an art, but before students can create masterpieces they first need to explore, play, and sketch with code. Students learn basic concepts and techniques of computation and apply these to craft gameplay experiences, improvisational experiments, and software toys. Students will author code from scratch and remix code to complete their weekly projects. No prior programming experience or knowledge is required. PREREQUISITE(S): None.

**GAM 244 | GAME DEVELOPMENT I | 4 quarter hours
(Undergraduate)**

This course provides students additional theory and practice with an emphasis on game design and storytelling for games. Students continue learning about game development processes and techniques and how to apply advanced game design principles to create components of a 2D game.

**GAM 245 | GAME DEVELOPMENT II | 4 quarter hours
(Undergraduate)**

In this course students will develop skills in game design and development through the creation of a 2D digital game designed from a set of client based restrictions. Emphasis will be placed on teamwork and development pipelines for the design and creation of assets and systems. Students will use a combination of prototyping, storyboarding, user stories, character breakdowns, system breakdowns and flowcharts in the design portion of the game. The goals of all design done in this course will focus around designing for the needs of a client; solving problems identified by the client; and providing transparency via reports and milestone deliverables.

GAM 226 and (GAM 244 or CSC 241 or CSC 243) are prerequisites for this class

**GAM 250 | GAME SOUND DESIGN I | 4 quarter hours
(Undergraduate)**

This course is an introduction to the principles of digital audio and the methods employed to create, edit, and deliver sound for video games. The course examines the place of sound in video games, both artistic and technological. The course will cover the basics of sound in the physical and digital realm, sound effects editing, and sound effects delivery. Lectures, discussions, and videos will be used to examine the art and the process of adding sound to video games. Students will learn to edit sound assignments with Pro Tools and other current technologies.

**GAM 312 | PLAYTESTING | 4 quarter hours
(Undergraduate)**

In this course, students will learn how to identify design goals, form hypothesis about their designs, develop good research and interview questions, plan and conduct playtests, as well as how to evaluate playtest data so it can inform design iterations and help to make better games.

GAM 226 is a prerequisite for this class.

**GAM 315 | GAME SOUND DESIGN 2 | 4 quarter hours
(Undergraduate)**

This course expands on topics covered in GAM 250. Students will further their knowledge of recording techniques for voiceover, sound effects, and music; editing voiceover and music; and mixing. The course will also introduce audio implementation using Unity. Coursework will utilize the recording studio extensively for in-class and out-of-class work. The course is intended for advanced students who wish to develop their skills and gain more experience in preparing and mixing sound design for video games.

GAM 250 or POST 124 is a prerequisite for this class.

**GAM 316 | SCORING FOR GAMES | 4 quarter hours
(Undergraduate)**

Students are introduced to elements of music and ways in which these elements may be used to create a musical style that enhances video games. The course emphasizes understanding the function of the score and how it relates to texture, color, and drama in music. Students explore their creativity using the tools available, work on projects of increasing complexity, and complete a score for their own video game as a final project. Listening skills, music vocabulary, and business and legal aspects of the profession are also studied.

GAM 250 or POST 124 is a prerequisite for this class.

**GAM 317 | GAME SOUND DESIGN AND SCORING STUDIO | 4 quarter hours
(Undergraduate)**

This course is intended to provide practical experience in audio production for video games, as well as to offer the opportunity to create quality materials to include in a demo reel or portfolio. It will build on the background and skills acquired in Game Sound Design 1 and Game Sound Design 2. Students will study the sound designs of different genres of video games, and then complete five projects in which they will be creating the sound designs for games of those genres. A key element of this course will be in-class discussions and critiques of students' work, both to sharpen their sound designing and critical listening skills.

**GAM 325 | APPLIED 3D GEOMETRY | 4 quarter hours
(Undergraduate)**

Review of mathematical foundation and techniques needed for the development of 3D graphics and game systems. This class will provide the foundation in linear algebra and 3D geometry required for implementing common tasks in 3D graphics and game systems. Topics include: vectors, matrices, transforms, coordinate changes, projections, intersection.

CSC 301 is a prerequisite for this class.

**GAM 326 | GAMES WITH A PURPOSE PRE-PRODUCTION | 4 quarter hours
(Undergraduate)**

This course introduces students to the growing field of Games With A Purpose (GWAP) and its manifold application areas such as health, education, social and personal change, activism, journalism, politics and advertising. After laying the theoretical foundation of games as expressive and persuasive media with transformational power, and establishing a framework for the design and assessment of GWAPs, the course focuses on the conceptualization, prototyping, playtesting and evaluation of concrete, client-based projects for purposes beyond entertainment. Instructor Permission Required.

GAM 392 or GAM 362 is a prerequisite for this class

**GAM 329 | PHYSICAL PROTOTYPING FOR GAMES | 4 quarter hours
(Undergraduate)**

This course will approach the study of Game Design with a focus on breaking designs into manageable elements and prototyping those elements in order to refine play. Students will learn how to develop game ideas and game systems with a focus on play procedures, rules, and designing for various types of possible players. Prototyping will involve various real world media in addition to paper write-ups and layouts. Students will engage in brainstorming exercises, develop game ideas and systems, and review and repurpose existing game mechanics. This course will help students find the balance between hard (planned logical) design and soft (more organic/emergent) design in order to develop compelling gameplay.

GAM 226 or GAM 224 is a prerequisite for this course

**GAM 330 | ADVANCED GAME PRODUCTION | 4 quarter hours
(Undergraduate)**

This course builds on the fundamentals covered in earlier courses (GAM230 or IS372/ECT372) by providing a practical, hands-on context in which students can learn the tools and techniques game producers use to manage and organize assets, workflows, tasks, bugs, resources, and personnel. In this course, students combine classroom lectures and lab time to learn production theory, tools, and techniques fundamental to successful game development. Through this experience, students learn the skills and knowledge needed to have an immediate, positive impact on game development. Topics include: the process to refine ideas for game concepts, gameplay, and narrative; quality assurance of subjective elements including gameplay and art; design and art outsourcing pipelines; and feedback strategies and community management.

GAM 230 or IS 372 or ECT 372 is a prerequisite for this class

**GAM 333 | THE BUSINESS OF GAMES | 4 quarter hours
(Undergraduate)**

This course gives an introduction to the business aspects of the game development industry, including development, publishing, distribution and marketing. Subjects covered include game development contracts, milestone-based development, management techniques, marketing, customer and community support, personnel, budgeting, outsourcing, pipelines, and external partnerships.

GAM 229 is a prerequisite for this class.

**GAM 334 | THE BUSINESS OF INDIE GAMES | 4 quarter hours
(Undergraduate)**

This class will explore how to successfully run an indie game company using an arsenal of best practices. Topics include how to write a game design document for marketability and a business plan for an indie studio, as well as how to build and maintain relationships with the media. Students will also gain an understanding of how indie games fit into the game industry as a whole.

GAM 229 is a prerequisite for this class.

**GAM 340 | PRACTICAL SCRIPTING FOR GAMES | 4 quarter hours
(Undergraduate)**

This workshop introduces game scripting to artists and game designers. A game script is a short list of commands that control something in a game, such as how a character moves, or an enemy's behavior. Students will learn to read, modify, and author scripts that generate and affect a variety of game elements over the course of weekly projects.

GAM 245 or CSC 241 or CSC 242 or CSC 243 is a prerequisite for this class.

**GAM 341 | INTRODUCTION TO LEVEL DESIGN | 4 quarter hours
(Undergraduate)**

Level design is the art of creating believable environments, stages and missions for video games. This course explores topics including architecture, flow, pacing and puzzles. Using a 3D level editor, students will investigate technical design issues including the construction, texturing, lighting and scripting of modern game levels. The roles, duties and challenges of the level designer will also be discussed.

GAM 245 is a prerequisite for this class.

**GAM 342 | ADVANCED LEVEL DESIGN | 4 quarter hours
(Undergraduate)**

This class builds on topics covered in earlier courses, with a focus on creating believable worlds for videogames. This course emphasizes designing large exterior environments, advanced mission scripting, and integrated storytelling. Using a 3D level editor and formal level design process, students create fun, polished, memorable virtual worlds.

GAM 341 or GAM 392 is a prerequisite for this class

**GAM 350 | PHYSICS FOR GAME DEVELOPERS | 4 quarter hours
(Undergraduate)**

The course concentrates on Newton's Laws of Motion, kinematics and kinetics. This theory will be applied to problems that a game programmer must understand e.g. collisions between objects, projectiles and their trajectories, real-time simulation of motion. Special objects such as cars, aircraft and ships will be discussed. Students will apply and implement laws of physics.

GAM 372 or (SE 350 and CSC 361) are prerequisites for this class.

**GAM 351 | EXPRESSIVE AUDIO SCRIPTING IN GAMES | 4 quarter hours
(Undergraduate)**

This workshop is for game designers, sound designers and programmers to learn how to creatively use audio in game engines. Students develop skills to effectively shape and manipulate game audio to achieve intended dramatic experiences. Topics include key terms and techniques, industry trends in game audio implementation, and how to advance the medium of games through audio. Students listen and critique each other's work, learning to assess game audio in terms of narrative, aesthetics and quality.

**GAM 353 | TOOL PROGRAMMING FOR GAME DEVELOPMENT | 4 quarter hours
(Undergraduate)**

This course focuses on the parsing and conditioning of game related assets for real-time game engines. Topics include the content pipeline, processing or standard file formats using modern API, integration of external tools, run-time file format design, command line and graphical user interfaces.

GAM 372 or (SE 350 and CSC 361) are prerequisites for this class.

**GAM 355 | SOLO GAME DEVELOPMENT PROJECT | 4 quarter hours
(Undergraduate)**

Students independently create a complete short video game serving as its designer, programmer, and artist. The project is structured around a compressed development cycle that supports an appropriately scoped, polished game. From brainstorming an innovative concept to rapidly prototyping and iterating on gameplay, the course focuses on core gameplay loops and game feel. A survey of noteworthy games developed by single authors in short timeframes provides students with references to draw from.

GAM 340 and GAM 341 are prerequisites for this class

**GAM 362 | MAKING DEEP GAMES | 4 quarter hours
(Undergraduate)**

This workshop investigates the process of designing games about the human condition. It specifically focuses on the potential of games to tackle profound and abstract ideas (e.g. loyalty, dignity, courage and trust) by way of metaphor and analogy. Assignments will explore metaphorical games, games for persuasion and games for self-expression. Special emphasis is placed on the analysis of personal experiences and how they can be translated systematically into game designs that generate non-typical gameplay content.

GAM 226 or GAM 224 is a prerequisite for this course

**GAM 365 | ADVANCED GAME DESIGN | 4 quarter hours
(Undergraduate)**

This is a studio course in which students work in teams to design and develop slices of polished small-scale gameplay experiences. The focus is on developing team-based creative and technical processes to produce innovative, engaging, and playable games. Teams will iteratively design and develop two distinct gameplay experiences or "vertical slices." Each slice will demonstrate an understanding of the role of game mechanics, game art, audio, and technology platform in creating a cohesive and compelling gameplay.

(GAM 340 and GAM 341) or GAM 355 is a prerequisite for this class.

**GAM 368 | AUGMENTED REALITY GAME DESIGN AND DEVELOPMENT | 4 quarter hours
(Undergraduate)**

In this workshop students cultivate the skills to design, program and develop augmented reality (AR) games. Students learn about the unique affordances and design opportunities inherent to the platform. Based on the studio model, each student adopts a role on the development team, such as programmer, designer, and artist, and each is responsible for contributing professional work consistently each week. Because the platform of AR games presents unique challenges to developers (players often feel disoriented or over-tasked) teams first create a dozen AR toys, and build up the most promising experiences into games. Class time consists of lectures, workshops, workdays, playtests, critiques, and class discussions.

GAM 245 is a prerequisite for this class.

**GAM 369 | VIRTUAL REALITY GAME DEVELOPMENT | 4 quarter hours
(Undergraduate)**

In this workshop students cultivate the skills to design, program, and develop VR (virtual reality) games. Students learn about the unique affordances and design opportunities inherent to the platform. Topics include the history of VR, VR art, as well as toy design and development. Students collaboratively develop cutting-edge VR toys and games using the studio model in which each student adopts a professional role on the team such as programmer, designer, and artist. Class time consists of lectures, workshops, workdays, playtests, critiques, and class discussions.

GAM 245 is a prerequisite for this class.

**GAM 370 | RENDERING AND GRAPHICS PROGRAMMING | 4 quarter hours
(Undergraduate)**

This programming class will present the rendering pipeline and basic shader creation. Students will create their own graphics package using a high-level graphics API such as Direct X. Topics covered include illumination techniques, Gouraud and Phong shading, antialiasing techniques, texture mapping, blending and environment mapping.

GAM 325 and CSC 361

**GAM 372 | OBJECT-ORIENTED GAME DEVELOPMENT | 4 quarter hours
(Undergraduate)**

Students will learn principles and techniques needed to build robust and efficient large scale game software systems. Principles of object-oriented modeling, design, implementation, and testing of large-scale game systems will be emphasized. Topics include design patterns, application frameworks, architectural design, and the applications in the software development process to improve the extensibility, maintainability, and reliability of software systems.

CSC 361 is a prerequisite for this class

**GAM 374 | GAME ENGINE PROGRAMMING I | 4 quarter hours
(Undergraduate)**

Students will develop a basic 3D game engine. The focus will be on the implementation challenges and interdependencies between systems such as asset management, rendering, simple collisions, input/output, alarms, etc. Emphasis will be placed on developing the skills needed for robust, efficient, and portable implementation.

GAM 372 and GAM 325 are prerequisites for this class

**GAM 376 | ARTIFICIAL INTELLIGENCE FOR COMPUTER GAMES | 4 quarter hours
(Undergraduate)**

Artificial Intelligence (AI) is one of the essential components of a computer game. The course introduces basic concepts of AI. Emphasis will be placed on applications of AI in various genres of computer games. In the implementation component of this course students will be exposed to the existing AI game engines (middleware), which contain implemented AI algorithms that are ready to be applied into game code. These algorithms include: decision trees, pathfinding, neural networks, and script-driven game object behaviors.

GAM 372 or (SE 350 and CSC 361) are prerequisites for this class.

**GAM 377 | GAME ENGINE PROGRAMMING II | 4 quarter hours
(Undergraduate)**

This class is a continuation of GAM 374. Students develop more complex systems for their 3D game engines: improved collision systems, terrain generation, and particle systems. Other advanced engine services are discussed and students are expected to research and implement one such system: sounds management, lighting system, tiered/broad phase collision system, advanced camera manipulation, etc.

GAM 374 is a prerequisite for this class.

**GAM 378 | STRATEGY GAMES PROGRAMMING | 4 quarter hours
(Undergraduate)**

Turn-based and real-time strategy games. Abstract strategy games such as chess, backgammon, and bridge. Game themes and presentation of fantasy, historical and futuristic gaming scenarios. Ethically responsible content and social impact of different cultures, ethnicities, genders on the game play and game audience will be addressed. Game-player resource management. Implementation of strategy engines, 2D presentation and isometric projection.

GAM 376 is a prerequisite for this class.

**GAM 380 | CONSOLE GAME DEVELOPMENT ENVIRONMENTS | 4 quarter hours
(Undergraduate)**

Specialized computers for games with high-end graphics and sound capabilities and other specialized input and output devices form one of the largest game markets. In this advanced programming course students will gain hands-on experience writing and porting code for game consoles.

CSC 393 and CSC 374 are prerequisites for this class.

**GAM 382 | SERIOUS GAMES | 4 quarter hours
(Undergraduate)**

Explores the role of computer games and simulations for education and training. Topics include: overview of the science of learning, analysis of games for different purposes and types of content, assessment of learning, and learning through game creation. Students will design, implement, and evaluate a serious game. Development of socially responsible and ethical behaviors will be a primary objective.

GAM 245 is a prerequisite for this class.

**GAM 383 | GAME STUDIO DEVELOPMENT | 4 quarter hours
(Undergraduate)**

This course focuses on the development cycle in a large game studio with a focus on pushing out a game targeted towards a commercial platform. The game in question is an ongoing development taking place over a number of years. Students participate quarterly and a public build will be made available at the end of the school year. This class can be taken multiple times but requires permission from the instructor each time. Each student will have a particular role in the studio where they will focus on developing mastery to help build the game over the course of the quarter. Available design roles include: Level Design, Gameplay design, UI Design, Graphic Design, Character Animation, Blueprint Specialist, Balancing, Narrative and Dialog, Writing, Cinemas and cutscenes, Production. Getting into the class requires the student to show a portfolio or display some level of mastery in one of the available areas to participate. This is an experiential learning credit class.

**GAM 386 | GAME PROGRAMMING FOR MOBILE DEVICES | 4 quarter hours
(Undergraduate)**

In this course we introduce major mobile hardware platforms and their operating systems. Issues related to game design for handheld devices will be presented. The strong technical component of this course includes game programming for a handheld device with a wireless internet connection enabling multiplayer game architecture. Such concepts as: building a custom game library, multiplayer game programming, infrared, wireless and socket communication between devices will be discussed.

CSC 371 is a prerequisite for this class.

**GAM 391 | GAME PERFORMANCE OPTIMIZATION | 4 quarter hours
(Undergraduate)**

This game programming class will focus on developing software to efficiently use the fixed CPU power and resources that are found in today's console and mobile devices. This course will use real-world game examples that demonstrate performance and optimization issues that software architects face in game development. These problems include: performance enhancements through extended matrix instruction set, dynamic memory usages, performance related to increasing run-time systems to very large scale, C++ language enhancements and extensions, algorithms, streaming and profiling. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 374.

**GAM 392 | GAME MODIFICATION WORKSHOP | 4 quarter hours
(Undergraduate)**

In this course, students will develop skills in game design and development through the construction of a "mod" of an existing game. Emphasis will be placed on the game development life cycle from concept through release, on productivity in a team environment, and on effective project management practices.

GAM 365 or GAM 372 or (ANI 344 and GAM 341) are prerequisites for this class

**GAM 394 | GAME DEVELOPMENT PROJECT I | 4 quarter hours
(Undergraduate)**

Students work in teams to design and develop a videogame that demonstrates their mastery of game design and development. Additionally, students will reflect on ethical decision making and professional ethics in the game industry. This course and its continuation, GAM 395, must be taken consecutively.

GAM 377 or GAM 392 is a prerequisite for this class.

**GAM 395 | GAME DEVELOPMENT PROJECT II | 4 quarter hours
(Undergraduate)**

Continuation of GAM 394.

GAM 394 is a prerequisite for this class.

**GAM 397 | TOPICS IN GAME DESIGN | 4 quarter hours
(Undergraduate)**

Specific topics selected by the instructor. Topic varies with each offering. Contact instructor for more information. Prerequisite(s): See syllabus.

**GAM 398 | TOPICS IN GAME PROGRAMMING | 1-4 quarter hours
(Undergraduate)**

Specific topics will be selected by the instructor and will vary with each quarter. PREREQUISITE(S): See syllabus (variable credit)

**GAM 399 | INDEPENDENT STUDY | 1-8 quarter hours
(Undergraduate)**

Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable credit. PREREQUISITE(S): None (variable credit)

**GAM 420 | CREATIVE COMPUTATION | 4 quarter hours
(Graduate)**

Students are introduced to the affordances of computers and digital technology as a medium using foundational texts from the discipline of digital media while being introduced to programming. The course teaches students to discover how to effectively and creatively communicate their ideas using accessible coding environments and engines and challenges them to build playful, interactive applications.

**GAM 424 | GAME DESIGN WORKSHOP | 4 quarter hours
(Graduate)**

This course is an introduction to both the theory and practice of game design. Students will explore fundamental elements of game design and put these concepts to work in designing, prototyping, playtesting, and developing both physical and computer games. The course will cover formal elements of games, game dynamics, game narratives, and the dramatic components of games. Students will study the game design process including brainstorming, conceptualization, creation of design documentation, and play-testing. PREREQUISITE(S): none.

**GAM 425 | APPLIED 3D GEOMETRY | 4 quarter hours
(Graduate)**

Review of mathematical foundation and techniques needed for the development of 3D graphics and game systems. This class will provide the foundation in linear algebra and 3D geometry required for implementing common tasks in 3D graphics and game systems. Topics include: vectors, matrices, transforms, coordinate changes, projections, intersection, interpolation and random number generator.

CSC 403 is a prerequisite for this class.

**GAM 426 | GAME SOUND DESIGN 2 | 4 quarter hours
(Graduate)**

Students will further their knowledge of recording techniques for voiceover, sound effects, and music; editing voiceover and music; and mixing. The course will also introduce audio implementation using Unity. Coursework will utilize the recording studio extensively for in-class and out-of-class work. The course is intended for advanced students who wish to develop their skills and gain more experience in preparing and mixing sound designs for video games.

**GAM 427 | SCORING FOR GAMES | 4 quarter hours
(Graduate)**

Students are introduced to elements of music and ways in which these elements may be used to create a musical style that enhances video games. The course emphasizes understanding the function of the score and how it relates to texture, color, and drama in music. Students explore their creativity using the tools available, work on projects of increasing complexity, and complete a score for their own video game as a final project. Listening skills, music vocabulary, and business and legal aspects of the profession are also studied.

GAM 426 is a prerequisite for this course.

**GAM 428 | GAME SOUND DESIGN AND SCORING STUDIO | 4 quarter hours
(Graduate)**

This course is intended to provide practical experience in audio production for video games, as well as to offer the opportunity to create quality materials to include in a demo reel or portfolio. It will build on the background and skills acquired in Game Sound Design 2. Students will study the sound designs of different genres of video games, and then complete five projects in which they will be creating the sound designs for games of those genres. A key element of this course will be in-class discussions and critiques of students' work, both to sharpen their sound designing and critical listening skills.

**GAM 430 | ART GAMES BOOTCAMP | 4 quarter hours
(Graduate)**

Students learn to appreciate and advance games as an artistic medium in this bootcamp by making work that is avant-garde in its formal aesthetics or sociopolitical force. Every two weeks students rapidly develop and complete an art game that challenges the conventional wisdom of what games are, how and why we play them, and the role they perform in popular culture.

**GAM 440 | GAMES WITH A PURPOSE BOOTCAMP | 4 quarter hours
(Graduate)**

This game design bootcamp focuses on the rapid yet deliberate creation of short games with a purpose beyond entertainment. Every two weeks, students are expected to deliver a completed game project that addresses a real-life issue, has a clear statement of intent and uses the specific properties of games as a medium to achieve its declared purpose.

**GAM 450 | PHYSICS FOR GAME DEVELOPERS | 4 quarter hours
(Graduate)**

The course concentrates on Newton's Laws of Motion, kinematics and kinetics. This theory will be applied to problems that a game programmer must understand e.g. collisions between objects, projectiles and their trajectories, real-time simulation of motion. Special objects such as cars, aircraft and ships will be discussed. Students will apply and implement laws of physics.

CSC 461 and (SE 456 or SE 450) are prerequisites for this class.

**GAM 451 | EXPRESSIVE AUDIO SCRIPTING FOR GAMES | 4 quarter hours
(Graduate)**

This workshop is for game designers, sound designers and programmers to learn how to creatively use audio in game engines. Students develop skills to effectively shape and manipulate game audio to achieve intended dramatic experiences. Topics include key terms and techniques, industry trends in game audio implementation, and how to advance the medium of games through audio. Students listen and critique each other's work, learning to assess game audio in terms of narrative, aesthetics and quality. PREREQUISITE(S): None.

**GAM 453 | TOOL PROGRAMMING FOR GAME DEVELOPMENT | 4 quarter hours
(Graduate)**

This course focuses on the parsing and conditioning of game related assets for real-time game engines. Topics include the content pipeline, processing or standard file formats using modern API, integration of external tools, run-time file format design, command line and graphical user interfaces. Adaptive real-time modification of data structures in game using managed languages (such as C#) reflection will be explored. **CSC 461 and (SE 456 or SE 450) are prerequisites for this class.**

**GAM 462 | RITUAL, MYTH AND GAMES | 4 quarter hours
(Graduate)**

This class focuses on the intersection of ritual, myth, and games, and how they can facilitate personal transformation through contemplation of the "existential givens": birth, death, freedom, isolation, identity and the "meaning of life". We will draw on philosophy, anthropology, sociology, spiritual practices, psychotherapy as well as game design, theatre / performance study and fabrication ("making") to develop an interdisciplinary, creative framework for the design of playful, myth-based, transformational experiences. Our focus is on non-digital and hybrid playspaces to take full advantage of the power of embodiment and physio-psychological immersion in ritual performance and the enactment of myth. PREREQUISITE(S): None.

**GAM 470 | RENDERING AND GRAPHICS PROGRAMMING | 4 quarter hours
(Graduate)**

This programming class will present the rendering pipeline and basic shader creation. Students will create their own graphics package using a high-level graphics API such as Direct X. Performance issues will be considered as part of the API design. Topics covered include illumination techniques, Gouraud and Phong shading, antialiasing techniques, texture mapping, blending and environment mapping, reflection and hardware instancing.

GAM 425 and CSC 461 are prerequisites for this class.

**GAM 475 | REAL - TIME SOFTWARE DEVELOPMENT | 4 quarter hours
(Graduate)**

Real-time software development. Topics include runtime library construction, abstracting low-level systems, custom data containers, memory tracking, framework development, real-time design patterns, low-level drivers, and graphics engine development. Design and implementation of multi-heap memory management system with aligned allocations with cross heap tracking. Exploration of run-time control of behavior through real-time data driven messaging. Interface development to create a responsive optimized access to abstract data types. Students will design, develop and implement a real-time application (i.e. Graphics engine) that integrates multiple user-developed libraries with real-time constraints.

CSC 461 and (SE 456 or SE 450) are prerequisites for this class.

**GAM 476 | ARTIFICIAL INTELLIGENCE FOR COMPUTER GAMES | 4 quarter hours
(Graduate)**

Artificial Intelligence (AI) is one of the essential components of a computer game. The course introduces basic concepts of AI. Emphasis will be placed on applications of AI in various genres of computer games. In the implementation component of this course students will be exposed to the existing AI game engines (middleware), which contain implemented AI algorithms that are ready to be applied into game code. These algorithms include: decision trees, pathfinding, neural networks, and script-driven game object behaviors.

CSC 461 and (SE 456 or SE 450) are prerequisites for this class.

GAM 486 | GAME PROGRAMMING FOR MOBILE DEVICES | 4 quarter hours**(Graduate)**

In this course we introduce major mobile hardware platforms and their operating systems. Issues related to game design for handheld devices will be presented. The strong technical component of this course includes game programming for a handheld device with a wireless internet connection enabling multiplayer game architecture. Such concepts as: building a custom game library, multiplayer game programming, infrared, wireless and socket communication between devices will be discussed.

CSC 471 is a prerequisite for this class.

GAM 491 | GAME PERFORMANCE OPTIMIZATION | 4 quarter hours**(Graduate)**

This game programming class will focus on developing software to efficiently use the fixed CPU power and resources that are found in today's console and mobile devices. This course will use real-world game examples that demonstrate performance and optimization issues that software architects face in game development. These problems include: performance enhancements through extended matrix instruction set, dynamic memory usages, performance related to increasing run-time systems to very large scale, C++ language enhancements and extensions, algorithms, streaming and profiling. **PREREQUISITE(S):** CSC 400 and CSC 403 and CSC 407.

GAM 499 | TOPICS IN COMPUTER GAME DESIGN AND DEVELOPMENT | 1-4 quarter hours**(Graduate)**

Variable topics course in computer game design and development. May be repeated for credit. **PREREQUISITE(S):** Permission of instructor (variable credit)

GAM 520 | GAME DESIGN PROSEMINAR | 4 quarter hours**(Graduate)**

In this foundational seminar course, students are exposed to significant written works that examine the medium of games in historical, cultural, and social contexts. Students analyze and interpret games in classroom discussions and written explorations that reveal the meaning and values of games as cultural artifacts. In doing so, they learn to situate their own critical practice within the history of the medium. **PREREQUISITE(S):** GAM 420.

GAM 530 | GAMES STUDIES PROSEMINAR | 4 quarter hours**(Graduate)**

This seminar class introduces students to a broad range of historical and current topics in game studies. It aims to support creative practice by expanding the theoretical foundation established in Game Design Proseminar with additional, deep insight into disciplines that relate to games, play, players, learning, activism, and art. **PREREQUISITE(S):** GAM 520.

GAM 540 | GAME DEVELOPMENT PRACTICUM | 4 quarter hours**(Graduate)**

This course introduces the creation of a term-long project in teams. In contrast to studio classes where students can work alone or with others and decide what games they want to create, the practicum requires students to make games about a specific topic or theme proposed by faculty. This can include a requirement of working with a client, involving subject matter experts in the design process, developing a site-specific art game installation, or working with a novel platform such as a wearable device.

GAM 550 | INCUBATION STUDIO | 4 quarter hours**(Graduate)**

Students situate their creative practice within historical, aesthetic, and social contexts. This includes an introspective analysis of why they want to design games. Students identify potential research areas or creative catalysts for their thesis projects, conducting research, critiquing and analyzing relevant work, technologies, and reference materials. The final course assignment is a thesis proposal outlining their project plans for Thesis Studio, which each student must get approved by their advisor before entering Thesis Studio. **PREREQUISITE(S):** GAM 530 and GAM 540.

GAM 575 | REAL-TIME SOFTWARE DEVELOPMENT II | 4 quarter hours**(Graduate)**

Real-time software development with asset conversion. Topics include offline data conversion, asset packing, data driven application behavior, hierarchy base scene management, profiling and debugging large opaque data, runtime formats for low-level drivers, and advanced visualization techniques. Design and implementation of hierarchy based data systems with dynamic real-time modifications. Exploration of run-time control of behavior through real-time data driven messaging. Implementation of the complete application process: tool creation, asset condition, responsive loading and data driven runtime behavior. Students will design, develop and implement a real-time application (i.e. Animation engine) that integrates large real-time converted data assets with real-time constraints.

GAM 475 is a prerequisite for this class.

GAM 576 | GPU ARCHITECTURE | 4 quarter hours**(Graduate)**

Real-time application GPU development. Topics include GPU pipeline, data parallelization, hierarchy data flow on GPU, asset compression, non-graphics data processing, graphics rendering and data conversion. Design and implementation of parallel GPU applications across multiple GPU cores. Exploration of different parallelization techniques for large (non-graphical) computationally heavy systems. Developing and debugging blind data flow on GPU hardware. Students will design, develop and implement a real-time GPU application (i.e. Skinned Animation rendering engine) that integrates large converted data assets using 100s of parallel GPU cores.

GAM 575 is a prerequisite for this class.

GAM 594 | GAMING AND ENTERTAINMENT TECHNOLOGY CAPSTONE | 4 quarter hours**(Graduate)**

This course gives students an opportunity to utilize knowledge obtained in this degree program in developing a computer game, from conceptualization, design, to implementation. Issues in project management and configuration management will also be addressed. This work will constitute a major part of the project portfolio that students have developed during their study. **PREREQUISITE(S):** Completion Of Foundation Courses.

GAM 597 | TOPICS IN GAME DESIGN | 4 quarter hours**(Graduate)**

Specific topics selected by the instructor. Topic varies with each offering. Contact instructor for more information. **PREREQUISITE(S):** See syllabus.

GAM 598 | TOPICS IN GAME PROGRAMMING | 1-4 quarter hours**(Graduate)**

Specific topics will be selected by the instructor and will vary with each quarter. **PREREQUISITE(S):** For specific prerequisites, see syllabus or consult course instructor. (variable credit)

**GAM 599 | INDEPENDENT STUDY | 1-8 quarter hours
(Graduate)**

Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable credit. PREREQUISITE(S): None (variable credit)

**GAM 600 | THESIS STUDIO | 4 quarter hours
(Graduate)**

Students demonstrate their abilities as professional contributing artists in the field of games through the completion of a thesis project that advances the medium of games historically, aesthetically, or socially. Students will be required to publically show their thesis work as well as defend it before an appointed committee of faculty knowledgeable in the field. PREREQUISITE(S): GAM 550.

**GAM 690 | GAME DEVELOPMENT STUDIO I | 4 quarter hours
(Graduate)**

In this course and its continuation GAM 691, students will work in small teams to design and implement a computer game. The courses must be taken consecutively.

GAM 475 is a prerequisite for this class.

**GAM 691 | GAME DEVELOPMENT STUDIO II | 2-4 quarter hours
(Graduate)**

Continuation of GAM 690. (variable credit)

GAM 474 or SE 456 are a prerequisite for this class

**GAM 695 | MASTER'S GAME RESEARCH STUDY | 4 quarter hours
(Graduate)**

Students interested in a more in-depth study of a particular game area will register for this course and work with a faculty member (not necessarily their academic advisor) on a research project. The work involved may include system development, empirical studies, or theoretical work. Can be taken for up to 8 credit-hours. PREREQUISITE(S): GAM 575 and consent of research advisor.

Geography (GEO)

**GEO 101 | ENVIRONMENTAL GEOGRAPHY | 4 quarter hours
(Undergraduate)**

An introduction to the history, scope, and breadth of environmental inquiry within Geography. The course will be divided between Physical Geography -- that is, the spatial aspects of the Geosystem including the Atmosphere, Hydrosphere, Lithosphere, and Biosphere, and geographical perspectives of and approaches to the Human-Environment, to include Hazards Geography, Resource Geography, Cultural and Political Ecology.

**GEO 103 | URBANIZATION | 4 quarter hours
(Undergraduate)**

The course explores the evolution of urban forms and structures in the United States from the perspective of geography. In addition to studying the historic emergence of the American urban system, the course covers processes and phenomena associated with the spatial organization of housing, transportation, commercial and industrial land-use planning, as well as urban poverty, local governance, and issues of race, gender and sexuality.

**GEO 133 | URBAN GEOGRAPHY - EXPERIENTIAL LEARNING | 4 quarter hours
(Undergraduate)**

The course provides an in depth analysis of a Chicago neighborhood, connecting this to wider U.S. trends in urbanization and urban development. Students conduct a research project, through archival study and field work.

GEO 140 | MAPPING WORKSHOP FOR ONLINE STORYTELLING | 2 quarter hours

(Undergraduate)

This 2-credit workshop introduces students from any major to software that provides narrative driven online maps that combine cartography with text and images. Software packages such as ESRI StoryMap, Carto, GoogleMaps, QGIS Cloud and Leaflet will be introduced, with a special focus on accessible and well designed visualizations that can communicate effectively to a wide audience.

GEO 172 | CULTURAL GEOGRAPHY: THE NATURE-CULTURE INTERFACE | 4 quarter hours

(Undergraduate)

How do artists depict the natural world and how does culture contribute to those depictions? For example, how do lyrics and music portray nature, and how is this related to a sense of place and even identity? How do landscapes represented in visual media construct, reinforce, or challenge ideas about a place? What does the design of parks and green space say about cultural values? And how do writers use the natural world in literature to contribute to plot development and create a mood? In this course we will analyze how nature is represented in forms of culture? visual arts, music, design, and literature. Students will learn to critically evaluate how places are understood through these cultural forms, and consider not only the ways that culture shapes these representations, but also the ways that these representations shape or reinforce ideas about the natural world and humans? place in it. We will draw on research in the discipline of geography for our case studies and topics. Since the 1970s, research in geography has analyzed how places and landscapes are represented and understood through the arts, and also how arts and culture manifest themselves in places and landscapes. For example, studies of landscape design and public parks, such as Chicago's own Lincoln Park, reveal not only cultural values and aesthetic tastes, but also the role played by political power and class hierarchies in the development of such spaces. Utilizing cultural geography resources, students will develop the theoretical skills to examine the nature-culture interface.

**GEO 200 | SUSTAINABLE URBAN DEVELOPMENT | 4 quarter hours
(Undergraduate)**

This course focuses on the application and meaning of 'sustainability' to our discussion and understanding of cities, urban communities, and the urbanization process. The course conceptualizes sustainability as residing at the intersection of political, economic, social, and ecological thinking and examines its utility and flexibility towards urban form and function. The course pursues the topic of urban sustainability through the lenses of scale (e.g., local vs. global), justice (e.g., social vs. ecological), and diversity (e.g., cultural vs. biotic).

**GEO 201 | GEOPOLITICS | 4 quarter hours
(Undergraduate)**

A survey of theories of geopolitics and international relations, the course explores issues of international security and organization, regional integration, and nationalism, state formation and conflict. Historic geopolitical cases from Europe (Northern Ireland, EU, Balkans), the Middle East and North Africa, and the Russian realm, provide opportunities to assess theoretical approaches and profile the security and foreign policy concerns of the U.S. in the new millennium.

**GEO 204 | RELIGIOUS GEOGRAPHY | 4 quarter hours
(Undergraduate)**

Religion and geography are fundamentally intertwined. From the establishment of theocratic states that control territory, to the sprawl of US suburbia that has led to megachurches, the role of religion in shaping the earth's cultural landscape is undeniable. Religious beliefs shape geographies - there are places that, through faith, become sacred; elsewhere religious individuals and groups struggle to claim places in the name of their beliefs. This course will examine case studies from around the world to explore the intersection of geography and religion.

**GEO 205 | RACE, JUSTICE, AND THE URBAN ENVIRONMENT | 4 quarter hours
(Undergraduate)**

A theoretical and applied investigation of the social, political, and economic processes influencing the spatial distribution of environmental amenities and harms across the U.S. urban landscape, with particular focus on urban structure and the role of environmental justice struggles in shaping urban policy and the urban landscape.

**GEO 206 | BOUNDARIES AND IDENTITIES | 4 quarter hours
(Undergraduate)**

A critical survey of the manner in which social, political, ethnic, gender and racial identities are being constructed by modernity and post-modernity. Cross-listed as INT 206 and PAX 206. Recommended for GEO majors when taught by Professor Nast.

**GEO 210 | INTERNATIONAL ENVIRONMENTAL CONSERVATION | 4 quarter hours
(Undergraduate)**

The purpose of this course is to explore the relationship between our physical environment and society by focusing on natural resources. While the course introduces key concepts in environmental thought (conservation, preservation, sustainable development, etc.), another aim is to introduce students to some of the practical aspects of working in resource and environmental management. Lectures and readings examine contemporary environmental issues internationally. The textbook focuses on mainstream models of nature-society relations such as rational planning in resource management and sustainable development, while the additional readings and videos will introduce students to critiques of the mainstream approaches and suggest alternatives to them. The issues covered in this course include climate change, atmospheric pollution, freshwater resources and water quality, forestry and biodiversity loss, food production and distribution and sustainable lifestyles.

**GEO 211 | BIOGEOGRAPHY | 4 quarter hours
(Undergraduate)**

Biogeography is the study of the distribution of plants and animals on the earth's surface, and the historical and ecological factors and human activities responsible. It asks questions such as: Why were placental mammals absent from (pre-European) Australia, while marsupials were abundant? How are current plant species' distributions different from those of the past, and what implications does this have for their ability to respond to global changes? Why have islands sustained so many extinctions compared to mainlands? Why are there so many insect species in the tropics and so few at high latitudes? How are humans changing the distribution and abundances of plant and animals? This course explores these and other such questions. The goal is to understand biodiversity patterns and processes across earth, and how this knowledge can help maintain biological communities in human-dominated, 21st century landscapes.

**GEO 215 | INTERNATIONAL DEVELOPMENT AND REGIONAL INEQUALITY | 4 quarter hours
(Undergraduate)**

This course charts the economic transformation in the Third World / Global South. The first third of the course examines theories of development and underdevelopment before moving on to a critique of the concept of development as a modernist paradigm using a postcolonial framework. The rest of the course examines the restructuring of the agricultural, manufacturing and service sectors, including the financial sector, in non-Western countries.

**GEO 219 | WOMEN AND SCIENCE | 4 quarter hours
(Undergraduate)**

In this course, we will examine the evolving relationship between women and science. There are growing opportunities for and representation of women in scientific fields in many parts of the world, but there are historical contexts that should be considered and remaining challenges that are being addressed. We will begin the course with a review of the scientific method- what is this process and what about it has enabled it to attain legitimacy as a way of knowing the world? We will also learn about female scientists in the fields of environmental geography and ecology who have broken gender norms and boundaries and made notable scientific contributions. Students will learn through several case studies of both well-known scientists as well as those who are less widely recognized. Finally, we will examine aspects of science and culture that have impacted women's participation and achievements.

**GEO 220 | OCEANOGRAPHY | 4 quarter hours
(Undergraduate)**

Develops the concepts of physical oceanography. Topics include the chemical and physical properties of seawater, the dynamics of ocean currents and circulations, the physics of water waves and tides, the interaction of the ocean with the atmosphere, the formation of coastlines, and the effects of pollution on the ocean. Cross-listed with PHY 220.

MAT 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.

**GEO 225 | EARTH'S CHANGING CLIMATE | 4 quarter hours
(Undergraduate)**

The dynamic atmospheric processes which control day-to-day weather and the longer term processes which determine prevailing climatic conditions are the two principal foci of this course. Special topics include weather systems, climate change, global warming, and human impacts on climate. Cross-listed with PHY 225.

MAT 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.

**GEO 231 | HISTORICAL GEOGRAPHY OF CHICAGO | 4 quarter hours
(Undergraduate)**

An exploration of Chicago's urban geography, focusing in detail on topics such as historical geography, industrial development, community development, built environment (i.e., housing/architecture), transportation and neighborhood change. Cross-listed with HST 240 and AMS 240.

**GEO 233 | COMPARATIVE URBANISM | 4 quarter hours
(Undergraduate)**

An exploration of non-U.S. urban and planning traditions, through the urban morphological and comparative study of the foundation, and social-political forces that shaped cities such as Paris, St. Petersburg, Istanbul, Bombay-Mumbai, Hong Kong, and Mexico City.

**GEO 240 | HISTORY OF CARTOGRAPHY | 4 quarter hours
(Undergraduate)**

The course explores the history of mapmaking as a dimension and expression of the intellectual, scientific, technological, and political transformation of society. Focusing primarily on Europe and North America, the course covers the prevailing schools of thought and practitioners, and the structures and forces that shaped them. The course includes hands-on study of archival quality maps in DePaul's Special Collections and other regional institutions. Short field trip to the Newberry Library required.

**GEO 241 | GEOGRAPHIC INFORMATION SYSTEMS I: DIGITAL MAPPING | 4 quarter hours
(Undergraduate)**

Geographic Information Systems (GIS) are widely used in fields such as urban planning, environmental monitoring, marketing, law enforcement, public health, disaster management, and data journalism, among many others. Students will learn to make digital maps, manipulate and query tabular data, use coordinate systems, and conduct spatial analysis and write code for digital mapping through lectures and hands-on exercises using ArcGIS. The course is the first in a five-course undergraduate GIS certificate. Cross-listed with PSC 201.

(MAT120 or HON 180) or (MAT 130 or above) or instructor permission is a prerequisite for this course.

**GEO 242 | GEOGRAPHIC INFORMATION SYSTEMS II: COMMUNITY GIS | 4 quarter hours
(Undergraduate)**

An intermediate-level course focusing on applications of GIS for community development. Students conduct real-world GIS projects for community organizations in Chicagoland. Students will learn to design and create geographic information products that meet community partners' needs through the process of proposing, defining, and implementing GIS projects in collaboration with community partners. The course teaches an intermediate-level GIS skills, including address geocoding, spatial join, proximity analysis, and density mapping. Instruction is accomplished through lectures and hands-on exercises using ArcGIS.

GEO 241 or PSC 201 is a prerequisite for this class.

**GEO 243 | EARTH OBSERVATION | 4 quarter hours
(Undergraduate)**

Earth observation is the gathering of information about the planet via remote sensing technologies. This introductory level course covers how images of Earth are acquired via satellite and airborne sensors as well as how to process and interpret them to better understand our planet. The fundamentals of geospatial technology and introductory satellite-based remote sensing algorithms will be taught via lectures and hands-on labs.

GEO 241 is a prerequisite for this class.

**GEO 260 | GLOBALIZATION AND RESOURCES | 4 quarter hours
(Undergraduate)**

An exploration of globalization and the politics and flow of natural resources between the developed and developing world, especially since World War II. Using case studies from around the world, the course introduces students to competing paradigms of environmental and resource destruction and to the complexities and contingencies of social and environmental change in the "new" global economy.

**GEO 266 | WORLD ECONOMY: STATES, MARKETS AND LABOR | 4 quarter hours
(Undergraduate)**

This course introduces students to competing economic and political frameworks that analyze the interaction of states, markets and societies. The overall theme of the course is the spread of capitalism and the tandem disembedding of economic relations from social relations beginning with the Industrial Revolution in the 18th century through to the early 21st century.

**GEO 269 | CULTURAL AND POLITICAL ECOLOGY | 4 quarter hours
(Undergraduate)**

The course introduces students to the theoretical foundations and evolution of critical Political Ecology and its assessment of environmental change and social vulnerability in the developing world. The course traces the history of the discipline to its early roots in geography, anthropology, and ecology and tracks its emergence as a theoretically sophisticated critique of the global spread of economic development and environmental policy.

**GEO 299 | KNOWLEDGE, PLACE AND POWER | 4 quarter hours
(Undergraduate)**

An exploration of the social construction of knowledge through the historic evolution of geographic thought. This class interrogates geography's role in how space and place have been created to support existing hierarchies, and how geographic thought has evolved to contest these hierarchies. Students will engage with a variety of intellectual frameworks such as positivism, Marxism, feminism, postcolonial theory, and poststructuralism, among others.

**GEO 300 | GEOGRAPHICAL INQUIRY | 4 quarter hours
(Undergraduate)**

An in depth exploration of modern debates within geography. Students prepare their own geographic research project and participate at a regional conference.

**GEO 301 | ECONOMIC INEQUALITY AND POLITICAL TRAUMA | 4 quarter hours
(Undergraduate)**

The term trauma has been deployed in many parts of the world in the context of the rise of populist movements as voting blocs, without constructing a coherent conceptual framework for understanding how the concept of trauma explains political phenomena such as electoral outcomes. This course provides a framework for understanding how historical legacies, economic inequality and contemporary political contexts are linked.

**GEO 310 | GREEN INFRASTRUCTURE | 4 quarter hours
(Undergraduate)**

Green Infrastructure (GI) goes beyond the conventional conservation efforts of creating and maintaining national and state parks and wildlife refuges. Instead, GI promotes conservation that takes place at different spatial scales to create a network of open spaces out of existing open spaces and green corridors as well as offering strategies for constructing green spaces out of abandoned urban spaces.

**GEO 315 | THE STATE AND ECONOMIC GROWTH | 4 quarter hours
(Undergraduate)**

This course focuses on the role of the state in economic growth. The first half of the course studies the historical background, theory and criticism of the role of the state in economic growth, including the transitional economies of post-Communist countries. The second half examines case studies from different Asian and Eastern and Central European countries in the key moments of the incorporation of those states and their societies into the globalized economy. Some topics covered include corruption, transitioning informal economies and industrial policy.

**GEO 316 | THE EUROPEAN UNION | 4 quarter hours
(Undergraduate)**

An integration of political geographic and international relations perspectives on European integration: Special emphases on political philosophies and theories of integration, the geopolitics of block formation and enlargement, institutional structure, the evolution of policies, and the future directions of the European Union. Cross-listed with PSC 340 and IRE 106.

**GEO 330 | SUSTAINABLE URBAN TRANSPORTATION | 4 quarter hours
(Undergraduate)**

The course introduces transportation geography and explores the characteristics of sustainable transportation systems. From electric vehicles to new services like car and bike sharing, the course examines the role that transportation plays in environmental, social, and economic sustainability. Students will learn about current issues in urban transportation (both passenger and freight), and receive an introduction to tools and techniques used by transportation planners, e.g., Geographic Information Systems (GIS). Formerly GEO 230.

**GEO 333 | URBAN PLANNING | 4 quarter hours
(Undergraduate)**

A seminar on the intellectual history and theories of urban planning and design, and their application in urban settings in the U.S. and abroad. Systematic study of case studies leads to the investigation of current urban planning issues in Chicago.

**GEO 334 | URBAN/CITY DESIGN | 4 quarter hours
(Undergraduate)**

The course introduces the study of "city/urban design": one of the building professions, which include architecture, landscape architecture, sculpture, and land design from a distinctly geographic perspective. It addresses the evolution of concepts, ideas, and practices of the urban design profession through case studies, and discusses designs' impacts on the quality of urban life, and the city's 'legibility', access, and equity. This, primarily, studio/skills-based course introduces students to key techniques shared by the building professions: 'figure-ground' and perspective drawing, urban sketching, georeferencing, 'rephotography', site analysis, 3D object design and printing, and physical model-building.

**GEO 335 | GEODESIGN | 4 quarter hours
(Undergraduate)**

The course builds on Geography's considerable geotechnology curriculum (GIS and remote sensing) to deliver a survey of emerging theories of, and evolving practices in Geodesign. Described as a platform for organizing project conceptualization and decision-making, site analysis, design requirements, stakeholder participation and collaboration, design modeling, simulation, realization, and evaluation, Geodesign is a new, strategic, interdisciplinary field of professional practice with critical applications for engineering-intensive urban and regional planning projects. Project planning and decision-making require the consideration of a broad range of information, concepts, and tools that entangle earth and human system inputs. Geodesign integrates data analytical needs of building professions (architecture, landscape architecture, urban design, and land design), regulatory fields (urban and environmental planning), environmental sciences, and engineering into a decision-making and plan realization platform that is built with special consideration to a project's geospatial structure.

**GEO 339 | TOPICS IN ARCHITECTURE AND URBANISM | 4 quarter hours
(Undergraduate)**

Cities are changing dramatically as a result of the accelerated circulation of finance capital worldwide, the emergence of new information and data visualization technologies, the expansion of credit, the ceaseless retrenchment of population groups inside and around cities, and the emergence of new architectural and planning paradigms. The course explores and researches aspects of these transformative processes and their impacts on race, class, economic prosperity, and the contingencies of quality of urban life. A significant research and writing project is required in this specialist high-level course.

**GEO 340 | PLACES, HUMANITIES AND GEOGRAPHIC INFORMATION SYSTEMS | 4 quarter hours
(Undergraduate)**

The course examines applications of GIS to digital humanities. The course focuses on techniques for processing geospatial data and making maps from sources related to humanities subject using a popular open source GIS software, QGIS. The course examines digital humanities projects that use GIS, and ways to deal with challenges to work with humanities data in addition to fundamentals of GIS. Students will learn techniques for map design, image georeferencing, mapping texts, mapping changes, and mapping qualitative data. The class is largely conducted through lectures and hands-on activities in a GIS laboratory.

**GEO 343 | EARTH OBSERVATION II | 4 quarter hours
(Undergraduate)**

This course incorporates imagery from satellite and airborne sensors to teach intermediate-level remote sensing techniques for earth observation. There will be an emphasis on conducting computationally intensive remote sensing tasks (such as machine learning) and using programming languages to efficiently process images. The course culminates in a self-directed remote sensing research project. Prereq. GEO 243.

GEO 243 is a prerequisite for this course.

**GEO 344 | GEOGRAPHIC INFORMATION SYSTEMS III: SPATIAL ANALYSIS FOR SUSTAINABILITY | 4 quarter hours
(Undergraduate)**

An advanced-level course. Students conduct spatial analysis into sustainability issues of their interest. Students will learn techniques for suitability analysis, point pattern analysis, network analysis, and spatial interpolation with GIS. Instruction is accomplished through lectures and hands-on computer lab exercises using ArcGIS.

GEO 242 is a prerequisite for this class.

**GEO 345 | PROGRAMMING IN PYTHON FOR GIS | 4 quarter hours
(Undergraduate)**

Knowledge of a scripting language is a valuable skill for GIS analysts. Students will learn the basics of Python (a programming language), including script writing and implementation. By completing this course, students should be able to manipulate GIS data, automate GIS work flows, and develop customized GIS tools by writing script in Python in ArcGIS. The class is largely conducted through hands-on activities in a GIS laboratory.

GEO 241 or PSC 201 is a prerequisite for this class.

**GEO 346 | GIS ANALYSIS OF ENVIRONMENTAL AND PUBLIC HEALTH | 4 quarter hours
(Undergraduate)**

Spatial data visualization and GIS applications are increasingly at the forefront of health data analysis. This course will examine health data using GIS and topics will be drawn from GIS applications that explore epidemiology, local and global health inequalities, and the role of GIS in public health, using data visualization, network and site analysis, and applied GIS research techniques. Cross-listed with GEO 446.

GEO 241 or PSC 201 is a prerequisite for this class.

**GEO 347 | WEB GIS AND SPATIAL DATA VISUALIZATION ON THE WEB | 4 quarter hours
(Undergraduate)**

This project-oriented course will enable students to independently develop Web-based This project-oriented course will give students exposure to a wide variety of customizable web applications that allow for visualization of 2D and 3D geospatial data. The course introduces current developments in Web GIS technologies, their applications, and topics relevant to the creation, manipulation, and hosting of spatial datasets online. Students will learn how to use Web GIS mapping tools and how to configure and publish web-enabled interactive maps using commercial internet map servers. Using data collected using drone photography and other sources, students will additionally be introduced to how to create and host on the web 3D geospatial scenes. In addition to ArcGIS Online, open-source web mapping libraries such as Folium and Leaflet will be introduced, as well as physical 3D printing of GIS maps. Cross-listed with GEO 447.

GEO 241 or PSC 201 is a prerequisite for this class.

**GEO 348 | SPATIAL DATA SCIENCE | 4 quarter hours
(Undergraduate)**

Data that carry location markers have become prevalent. Examples include demographic data from census, crime incidents through open government, location traces from smartphones, imagery from satellite, and pollution data from sensors. There will be more needs for spatially integrating and analyzing data to make better sense of and make connection among data. The course examines fundamental concepts and methods for spatial data science through a series of activities for creating, exploring, wrangling, and analyzing spatial data. Topics include web scraping, geocoding, exploratory spatial data analysis, spatial data quality, regionalization, and hot spot detection. The course focuses on creating reproducible workflow for spatial data science projects using relevant Python libraries with a Jupyter Notebook that enables interactive computing on the web. GEO 345 or CSC 241 or the permission of instructor is the prerequisite of GEO 348.

GEO 345 or GEO 445 or CSC 241 or CSC 242 or CSC 401 or with instructor permission is a prerequisite for this course.

**GEO 350 | WORLD OF WINE | 4 quarter hours
(Undergraduate)**

An analysis of the geographical factors that influence the global production and distribution of wine. Students must be 21 years of age or older.

**GEO 351 | GEOGRAPHY, FOOD AND JUSTICE | 4 quarter hours
(Undergraduate)**

While the need for food is universal, geographies of food production, distribution and consumption are anything but even. This leads to multiple issues of food injustice at a variety of scales. This course critically examines the contemporary global food system with the goal of providing students with skills and knowledge to engage in food justice activism. Students study the development of food systems and how inequalities have emerged in production, distribution and consumption. The course then explores food justice movements including the emergence of alternative food networks in the U.S and internationally. Assignments may engage students in local food projects and or/advocacy campaigns.

**GEO 369 | RISKS, HAZARDS AND NATURAL DISASTERS | 4 quarter hours
(Undergraduate)**

This course is about the interaction of humans with extreme natural and anthropogenic events like storms, earthquakes and climate change. We will examine how people become vulnerable to such events, how they are affected by them, how they contribute to causing them, how they cope - or fail to cope - and what they do when existing adjustments are unsuccessful. You will learn how disasters are the product of multiple and interacting forces; biophysical processes are only part of the equation. We will explore how livelihoods, places and institutions come together to create hazardous situations and disastrous outcomes. We will look at trends in hazards and losses, and the distribution of vulnerability and hazard impacts within and across populations and places. For a variety of global environmental and social reasons, losses from hazards and disasters are projected to increase at increasing rates into the foreseeable future. Hazards and the disasters they generate, thus, are inherently engaging subjects. They also depend on a multidisciplinary approach for their investigation and mitigation, bringing in the insights of natural scientists, social scientists, engineers, planners, emergency managers, first responders, and others. Geography is a very active discipline in the investigation of hazards, with its physical science, social science, and mapping traditions, as well as its ability to integrate these very different conceptual approaches with practical applications at all stages of the disaster cycle.

**GEO 391 | STATISTICAL DATA ANALYSIS FOR GIS | 4 quarter hours
(Undergraduate)**

This course examines statistical concepts and techniques that are applied to geographic problems. Topics include descriptive statistics and inferential statistics geared toward working with geographic data in GIS. Students will learn techniques for summarizing variables, testing difference of means, spatial autocorrelation, hot spot analysis, and correlation analysis through lectures and hands-on exercises using statistics and GIS software.

GEO 241 or PSC 201 is a prerequisite for this class.

**GEO 395 | SEMINAR IN SELECTED TOPICS | 4-8 quarter hours
(Undergraduate)**

Upper-division seminar exploring selected geographical issues.

**GEO 398 | INTERNSHIP | 1-6 quarter hours
(Undergraduate)**

The course combines academic study with practical experience obtained through work in an extramural internship setting. The internship course requires academic output in the form of a research journal, paper, or other project.

**GEO 399 | INDEPENDENT STUDY | 1-4 quarter hours
(Undergraduate)**

Intensive study of a topic of special interest. Private conferences with instructor or supervised reading and research. Variable credit.

Junior or Senior standing and department consent are a prerequisite for this class.

**GEO 430 | SUSTAINABLE URBAN TRANSPORTATION | 4 quarter hours
(Graduate)**

The course introduces transportation geography and explores the characteristics of sustainable transportation systems. From electric vehicles to new services like car and bike sharing, the course examines the role that transportation plays in environmental, social, and economic sustainability. Students will learn about current issues in urban transportation (both passenger and freight), and receive an introduction to tools and techniques used by transportation planners, e.g., Geographic Information Systems (GIS).

**GEO 433 | URBAN PLANNING | 4 quarter hours
(Graduate)**

A seminar on the intellectual history and theories of urban planning and design, and their application in urban settings in the U.S. and abroad. Systematic study of case studies leads to the investigation of current urban planning issues in Chicago.

**GEO 440 | PLACES, HUMANITIES AND GEOGRAPHIC INFORMATION SYSTEMS | 4 quarter hours
(Graduate)**

This course explores the issues raised by digital humanities in art history through a specific focus on the digital mapping of art historical questions. Students will focus on advanced discussions of digital mapping but also apply these theoretical and methodological concerns to art historical problems. Students will learn techniques of map design, mapping texts, mapping changes, and mapping qualitative humanities data as they develop their own historical project.

**GEO 441 | GEOGRAPHIC INFORMATION SYSTEMS (GIS) FOR COMMUNITY DEVELOPMENT | 4 quarter hours
(Graduate)**

This course will focus on applications of Geographic Information Systems (GIS) to community studies and community development. As an amalgam of information technologies (e.g. database management, Web 2.0) and earth measurement technologies (e.g. global positioning systems, remote sensing), GIS is rapidly entering the realm of community development. The course will explain how GIS works; enable students to learn techniques including mapping, spatial analysis, and data management; and provide students with the opportunity to apply GIS to community development. Cross-listed with MPS 552.

**GEO 442 | GEOGRAPHICAL INFORMATION SYSTEMS (GIS) FOR SUSTAINABLE URBAN DEVELOPMENT | 4 quarter hours
(Graduate)**

An intermediate-level GIS course focusing on the application of GIS skills to real-world problems. Students as a group will conduct GIS projects that are proposed by community-based organizations (CBOs) that work towards promoting sustainability in Chicagoland. Topics include remote sensing, GPS, geocoding, hot spot detection, spatial interpolation, and network analysis. The course also explores case studies on using GIS for sustainable urban development. PREREQUISITE(S): GEO 441 or MPS 552 (GIS for Community Development).

GEO 441 or MPS 552 or instructor permission is a prerequisite for this course.

**GEO 443 | EARTH OBSERVATION II | 4 quarter hours
(Graduate)**

This course incorporates imagery from satellite and airborne sensors to teach intermediate-level remote sensing techniques for earth observation. There will be an emphasis on conducting computationally intensive remote sensing tasks (such as machine learning) and using programming languages to efficiently process images. The course culminates in a self-directed remote sensing research project.

GEO 441 or equivalent is a prerequisite for this course.

**GEO 445 | PROGRAMMING IN PYTHON FOR GIS | 4 quarter hours
(Graduate)**

Knowledge of a scripting language is a valuable skill for GIS analysts. Students will learn the basics of Python (a programming language), including script writing and implementation. By completing this course, students should be able to manipulate GIS data, automate GIS work flows, and develop customized GIS tools by writing script in Python in ArcGIS. The class is largely conducted through hands-on activities in a GIS laboratory. Cross-listed with GEO 345.

GEO 441 or MPS 552 or instructor permission is a prerequisite for this course.

**GEO 446 | GIS ANALYSIS OF ENVIRONMENTAL AND PUBLIC HEALTH | 4 quarter hours
(Graduate)**

Spatial data visualization and GIS applications are increasingly at the forefront of health data analysis. This course will examine health data using GIS and topics will be drawn from GIS applications that explore epidemiology, local and global health inequalities, and the role of GIS in public health, using data visualization, network and site analysis, and applied GIS research techniques.

GEO 441 or MPS 552 or instructor permission is a prerequisite for this course.

GEO 447 | WEB GIS AND SPATIAL DATA VISUALIZATION ON THE WEB | 4 quarter hours (Graduate)

This project-oriented course will enable students to independently develop Web-based This project-oriented course will give students exposure to a wide variety of customizable web applications that allow for visualization of 2D and 3D geospatial data. The course introduces current developments in Web GIS technologies, their applications, and topics relevant to the creation, manipulation, and hosting of spatial datasets online. Students will learn how to use Web GIS mapping tools and how to configure and publish web-enabled interactive maps using commercial internet map servers. Using data collected using drone photography and other sources, students will additionally be introduced to how to create and host on the web 3D geospatial scenes. In addition to ArcGIS Online, open-source web mapping libraries such as Folium and Leaflet will be introduced, as well as physical 3D printing of GIS maps. Cross-listed with GEO 347.

GEO 441 or MPS 552 or instructor permission is a prerequisite for this course.

GEO 448 | SPATIAL DATA SCIENCE | 4 quarter hours (Graduate)

Data that carry location markers have become prevalent. Examples include demographic data from census, crime incidents through open government, location traces from smartphones, imagery from satellite, and pollution data from sensors. There will be more needs for spatially integrating and analyzing data to make better sense of and make connection among data. The course examines fundamental concepts and methods for spatial data science through a series of activities for creating, exploring, wrangling, and analyzing spatial data. Topics include web scraping, geocoding, exploratory spatial data analysis, spatial data quality, regionalization, and hot spot detection. The course focuses on creating reproducible workflow for spatial data science projects using relevant Python libraries with a Jupyter Notebook that enables interactive computing on the web. GEO 445 or CSC 402 or the permission of instructor is the prerequisite of GEO 448.

GEO 445 or CSC 401 or with instructor permission is a prerequisite of this class.

GEO 469 | RISKS, HAZARDS AND NATURAL DISASTERS | 4 quarter hours (Graduate)

This course is about the interaction of humans with extreme natural and anthropogenic events like storms, earthquakes and climate change. We will examine how people become vulnerable to such events, how they are affected by them, how they contribute to causing them, how they cope - or fail to cope - and what they do when existing adjustments are unsuccessful. You will learn how disasters are the product of multiple and interacting forces; biophysical processes are only part of the equation. We will explore how livelihoods, places and institutions come together to create hazardous situations and disastrous outcomes. We will look at trends in hazards and losses, and the distribution of vulnerability and hazard impacts within and across populations and places. For a variety of global environmental and social reasons, losses from hazards and disasters are projected to increase at increasing rates into the foreseeable future. Hazards and the disasters they generate, thus, are inherently engaging subjects. They also depend on a multidisciplinary approach for their investigation and mitigation, bringing in the insights of natural scientists, social scientists, engineers, planners, emergency managers, first responders, and others. Geography is a very active discipline in the investigation of hazards, with its physical science, social science, and mapping traditions, as well as its ability to integrate these very different conceptual approaches with practical applications at all stages of the disaster cycle.

GEO 491 | STATISTICAL DATA ANALYSIS FOR GIS | 4 quarter hours (Graduate)

This course examines statistical concepts and techniques that are applied to geographic problems. Topics include descriptive statistics and inferential statistics geared toward working with geographic data in GIS. Students will learn techniques for summarizing variables, testing difference of means, spatial autocorrelation, hot spot analysis, and correlation analysis through lectures and hands-on exercises using statistics and GIS software.

GEO 441 or MPS 552 or instructor permission is a prerequisite for this course.

GEO 499 | INDEPENDENT STUDY [GRADUATE] | 2-4 quarter hours (Graduate)

Intensive study of a topic of special interest. Private conferences with instructor of supervised reading and research. Variable credit. Instructor consent required.

German (GER)

GER 101 | BASIC GERMAN I | 4 quarter hours (Undergraduate)

GER 101 is the first quarter of the first-year college German sequence. It introduces the students to the study of language and culture of German speaking countries. The course focuses on the development of all four critical language skills—listening, reading, writing and speaking—while also introducing aspects of German-speaking societies that differ from American society. In-class work will be devoted primarily to communication activities, so that students will be able to utilize the structures and vocabulary you learn to express themselves meaningfully and to function in a German-speaking setting. To maximize each student's engagement with the language, students will be talking and listening to each other as much as to the instructor. At the end of the three-course sequence, students will be in command of the basic elements of German language and culture, and should be able to function with relative ease in German-speaking countries. Students will be able to comprehend and engage in basic conversations, write clearly and effectively in German, and read simple but genuine texts.

GER 101S | BASIC GERMAN I FOR SUMMER | 6 quarter hours (Undergraduate)

(Covers the equivalent of the GER 101 and the first half of GER 102.) The first half of beginning German. The basic elements of the German language, spoken as well as written, with due regard to the cultural context of German expression.

GER 102 | BASIC GERMAN II | 4 quarter hours
(Undergraduate)

GER 102 is the second quarter of the first-year college German sequence. It continues to introduce the students to the study of language and culture of German speaking countries. The course focuses on the development of all four critical language skills—listening, reading, writing and speaking—while also introducing aspects of German-speaking societies that differ from American society. In-class work will be devoted primarily to communication activities, so that students will be able to utilize the structures and vocabulary to express themselves meaningfully and to function in a German-speaking setting. To maximize each student's engagement with the language, students will be talking and listening to each other as much as to the instructor. At the end of the three-course sequence, students will be in command of the basic elements of German language and culture, and should be able to function with relative ease in German-speaking countries. Students will be able to comprehend and engage in basic conversations, write clearly and effectively in German, and read simple but genuine texts.

GER 103 | BASIC GERMAN III | 4 quarter hours
(Undergraduate)

GER 103 is the third quarter of the first-year college German sequence. It continues to introduce the students to the study of language and culture of German speaking countries. The course focuses on the development of all four critical language skills—listening, reading, writing and speaking—while also introducing aspects of German-speaking societies that differ from American society. In-class work will be devoted primarily to communication activities, so that students will be able to utilize the structures and vocabulary to express themselves meaningfully and to function in a German-speaking setting. To maximize each student's engagement with the language, students will be talking and listening to each other as much as to the instructor. At the end of the three-course sequence, students will be in command of the basic elements of German language and culture, and should be able to function with relative ease in German-speaking countries. Students will be able to comprehend and engage in basic conversations, write clearly and effectively in German, and read simple but genuine texts.

GER 103S | BASIC GERMAN II FOR SUMMER | 6 quarter hours
(Undergraduate)

(Covers the equivalent of the second half of GER 102 and all of GER 103.) The second half of beginning German. Further work on the basic elements of the German language, spoken as well as written, with due regard to the cultural context of German expression.

GER 104 | INTERMEDIATE GERMAN I | 4 quarter hours
(Undergraduate)

This course is the first quarter of second-year college German, and emphasizes language as communication in real-life situations and as a means to immerse ourselves in the cultures of German-speaking countries. Though students will review and perfect their knowledge of German grammar throughout the year, they will focus on the perfection of the four language skills reading, writing, listening and speaking. Students will have ample opportunities to express themselves in German, acquire basic discussion strategies, and gain insight into many aspects of the contemporary cultures and societies of German-speaking countries. GER 103 or equivalent, including placement test or permission of instructor, is recommended.

GER 105 | INTERMEDIATE GERMAN II | 4 quarter hours
(Undergraduate)

This course is the second quarter of second-year college German, and emphasizes language as communication in real-life situations and as a means to immerse ourselves in the cultures of German-speaking countries. Though students will review and perfect their knowledge of German grammar throughout the year, they will focus on the perfection of the four language skills reading, writing, listening and speaking. Students will have ample opportunities to express themselves in German, acquire basic discussion strategies, and gain insight into many aspects of the contemporary cultures and societies of German-speaking countries. GER 104 or equivalent, including placement test or permission of instructor, is recommended.

GER 106 | INTERMEDIATE GERMAN III | 4 quarter hours
(Undergraduate)

This video-based course is designed to develop and expand skills in German and explore ideas, cultural topics and themes from the German-speaking world. Course activities will include: learning from authentic video clips and films; visiting (in textbook and video) various cities and regions in the German-speaking world, exploring the variety and the similarities; practicing skills in German by discussing cultural issues and authentic readings; interpreting graphics and charts on topics of German culture; structured listening and writing practice; reading literary and nonliterary texts of increasing difficulty; summarizing verbally and in writing what is read, heard, and learned; writing compositions and short texts of various types; researching a topic; preparing and presenting results to the class (oral and written). GER 105 or equivalent, including placement test or permission of instructor, is recommended.

GER 130 | MOLILSAP STUDY ABROAD | 2 quarter hours
(Undergraduate)

This course is specially designed to complement the Modern Language Introductory Languages Study Abroad programs, linked to the third quarter of the first year language program. The course will be taught abroad.

GER 197 | SPECIAL TOPICS IN GERMAN | 4 quarter hours
(Undergraduate)

See schedule for current offerings.

GER 198 | STUDY ABROAD | 1-8 quarter hours
(Undergraduate)

Variable credit.

GER 199 | INDEPENDENT STUDY | 0.5-4 quarter hours
(Undergraduate)

Variable credit.

GER 201 | ADVANCED GERMAN I: COMING TO TERMS WITH THE PAST | 4 quarter hours
(Undergraduate)

The third year of German focuses on four primary linguistic skills: comprehension, reading, writing and speaking. Development in each of these areas is achieved through the introduction, consideration, and analysis of longer German stories, increasingly complex discussions of said texts, and the review, and hopefully ultimate mastery, of various vocabularies and advanced-level grammar. Ample time will be devoted to speaking and developing oral proficiency in class as well. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 202 | ADVANCED GERMAN II: READING THE FOREIGN/FOREIGN READING | 4 quarter hours
(Undergraduate)

The third year of German continues strengthening four primary linguistic skills: comprehension, reading, writing and speaking. The main goal is to achieve oral proficiency. Ample time will be devoted to speaking and developing oral proficiency in class as well. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 203 | ADVANCED GERMAN III: THE UNCANNY AND THE SELF | 4 quarter hours
(Undergraduate)

The third year of German continues strengthening four primary linguistic skills: comprehension, reading, writing and speaking. The main goal is oral proficiency. Ample time will be devoted to speaking and developing oral proficiency in class as well. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 272E | WORKING THROUGH THE PAST: MEMORY AND MEMORIAL IN GERMANY AND THE U.S. | 4 quarter hours
(Undergraduate)

TAUGHT IN ENGLISH. How does a shattered nation come to terms with its past? Recent events in the U.S. have revealed the depth of our societal divides, especially in the debate over memory and memorials. But these are not uniquely American questions: other places have navigated a reckoning with their own traumatic pasts. Philosopher Susan Neiman, author of "Learning from the Germans: Race and the Memory of Evil," calls Germany's relationship to its history "grown up." The German project of "coming to terms with the past": that is, the decades-long process of confronting its record of Nazism and working through the trauma of the Holocaust reflects this "grown up" relationship to history, one that integrates the question of guilt and responsibility into the national story. This process, while always unfinished, has helped Germany reshape its identity to become what it is today: a harbor for refugees, a global leader in green energy, and a model social welfare and educational system. In this course, we'll learn about Germany's process of coming to terms with the past: what it consists of, how it was initiated, and how it informs Germans' self-understanding today and ask, how can a country acknowledge its guilt while also building its future? How do individual Germans incorporate the idea of collective guilt into their understanding of themselves? What kinds of people and events has Germany chosen to remember in monuments and memorials? And what kind of work remains to be done in Germany in relation to its history? In short: what can we learn from the Germans about coming to terms with the American past? Note to German students: this course is taught in English and does not replicate the content of GER 201.

GER 274E | REVOLUTION ON THE STAGE: BERLIN, EPIC THEATER, AND THE 20TH CENTURY | 4 quarter hours
(Undergraduate)

TAUGHT IN ENGLISH. One of the most influential thinkers of the twentieth century, the revolutionary Marxist playwright Bertolt Brecht was witness to the crises that defined his age: the First and Second World Wars, the postwar division of Germany into East and West, and more personally, his own exile in the U.S. during the Nazi regime. Brecht criticized the changing face of Europe and the world in his writing, and his ideas about war and pacifism, capitalism, religion, fascism, inequality, and exile feel remarkably relevant today. In this course, we'll think about those ideas as we learn about Brecht's radical transformation of the stage, manifested in the theory of Epic Theater and the "Alienation/ Estrangement Effect:" two concepts that promoted critical distance and political awareness in the theater instead of the traditional focus on identification and catharsis. Berlin was highly progressive and experimental in the "Golden Twenties," and we'll also discuss the artistic, political, and social milieu there that informed Brecht's activist art: his work is characterized by collaborations with artists and musicians, and many of his plays feature musical pieces informed by jazz and the cabaret. We'll consider Brecht in exile, too, and think about the ways that his experiences as a displaced person shaped his writing and relate to current discussions about borders and belonging. Finally, we'll explore the question of Brecht's continued relevance and why his ideas still resonate with contemporary audiences. To that end, this course will include viewings and excursions, including visits to theaters and concert venues for live performances when possible.

GER 275 | EXORCISM, MESMERISM, PSYCHOANALYSIS: THE GERMAN UNCONSCIOUS MIND | 4 quarter hours
(Undergraduate)

This course is taught in English. Using the wrong word while speaking or writing, jokes, free association, dreams, listening to regressed patients 'on the couch,' all of which are deeply rooted in specific cultural times and places: these are the traditional means for exposing and learning about the workings of the unconscious mind, considered by Freudian psychoanalysis to be the repository of instinctually driven thoughts, fantasies, and inclinations that put individual people in conflict with societal expectations. This course examines closely those means and the conclusions drawn from them by Sigmund Freud and his followers. The course also gives consideration to the work of two important early but unwitting experimentations with the unconscious: demonic exorcism as practiced by German priest Johann Joseph Gassner and 'magnetic sleep' (now seen as a precursor to hypnosis) as practiced by Austrian physician Franz Anton Mesmer. This appraisal will allow us to debate the thesis of whether an engagement with the unconscious mind results in new or re-conceptualizations of the individual by societal institutions such as the church and mainstream medicine, so that the formerly chronically ill are by turns seen to be possessed, in need of redistribution of 'magnetic fluid,' neurotic, hysteric, or simply understood to be children within adults. We conclude by reviewing the psychoanalytic tool and human faculty of Einfühlung, or empathy, which, rather than just meaning feeling sorry for another person, is used clinically to perceive through feeling and sensation what another person feels without necessarily having had even remotely similar experiences. Freud borrowed this idea from Romantic-era theories and methods for translating literature.

**GER 276E | GREEN GERMANY: NATURE AND THE GERMAN MIND | 4 quarter hours
(Undergraduate)**

TAUGHT IN ENGLISH. For decades, Germany has been considered an environmental trailblazer: it's a leader in developing sustainable and renewable energies; politically, its Green Party is ascendant, with real representation in the German parliament; and as of 2019, half of Germany's energy came from renewable sources. In many ways, green technologies are affordable options for individual consumers around the world because of the investments made by Germany in the 1990s and early 2000s. How has Germany managed to create an energy policy that other countries, including the U.S., have failed to attain? This course attempts to answer this question by first considering the German relationship to nature and how it changed over time: from the earliest Germanic tribes and their ancient nature worship; to the German Romantics and their conception of nature as something overpowering and sublime; to Nazi Germany, where nature became associated with ideas of race and belonging; and finally, to today's German brand of environmentalism, which perceives nature as an endangered thing to be conserved and protected. We'll look at these phases through the perspective of thinkers and scientists who influenced the place of science in the world, including Alexander von Humboldt, Johann Wolfgang von Goethe, and Albert Einstein. This will give us an idea of the cultural context from which Germany approaches nature and the environment today, so that we can understand why it has been compelled to move toward a more sustainable future. Finally, we'll connect these ideas to real-life experiences: we'll speak and meet with representatives from "green" German companies here in Chicago in order to better understand the science and technology behind "Green Germany" now.

**GER 277E | COFFEEHOUSES AND CULTURE IN TURN OF THE CENTURY VIENNA | 4 quarter hours
(Undergraduate)**

TAUGHT IN ENGLISH. Vienna around 1900 was the setting for major innovations in the arts, literature, sciences, and philosophy, and the developments that emerged from this time and place shaped 20th century thought and culture. Central to the rich intellectual life in turn of the century Vienna was the Viennese coffeehouse, a place that encouraged the exchange of ideas and served as a spatial extension of the private sphere. Using the coffeehouse as a kind of experiential environment, this course will look at the ideas that emerged from the cafe interiors of Vienna 1900: Freud's theories of the unconscious, dreams, and (female) hysteria; the artworks of Gustav Klimt and the Viennese Secessionists; the "Young Vienna" literary circle; the new musical language of Arnold Schoenberg; and the radicalism of modernist architecture. Further, we'll discuss spatial and sociological theories of coffeehouse culture and consider the function that coffeehouses serve today in Vienna and in Chicago, too. This course includes several excursions which may vary from quarter to quarter depending on public health measures (to the Metropolis coffeehouse for a coffee tasting and roasterie tour, the Art Institute, and the Chicago Symphony Orchestra/ Lyric Opera).

**GER 278E | MAKING GRIMMS' FAIRY TALES | 4 quarter hours
(Undergraduate)**

TAUGHT IN ENGLISH. Fairy tales spark our imaginations and inspire great artists in a variety of mediums from around the world, whether in commercial format like Disney or in illustrations that speak to sides of human nature that can make us uncomfortable. Of these tales, Grimms' Children's and Household Tales (known to us today as "Grimms' Fairy Tales") are some of the most powerful for how they use predictable narrative outcomes to give space to conflicts of power, gender, generational difference, and class. This course takes on all these issues while reading in English translation all 156 tales in the original edition of the fairytale collection. People who think they know these stories are in for a wild ride (for starters, they were originally never intended for children) as we peel back the layers of meaning in the tales and consider how and why the Grimm Brothers turned the stories they collected into now-familiar fairy tales: a process which may have originated in dedication to German nature and nation, but has been seen by some as a harbinger of Nazi fascism.

**GER 279E | KAFKA AND THE KAFKAESQUE | 4 quarter hours
(Undergraduate)**

TAUGHT IN ENGLISH. In this course, we'll start by considering Franz Kafka's identity as an outsider many times over - starting with his Jewish, German-speaking background in turn of the century Prague - and how this fundamental "otherness" intruded upon his life and writing alike. We'll also discuss Kafka's influences both small and large: his relentless, tortured relationship with his father; his inability to commit to a romantic partner; illness and his conception of his body; and finally, his work as a lawyer at the Worker's Accident Insurance Institute of the Kingdom of Bohemia, a 14-year position that shaped his understanding of opaque bureaucratic systems and the impotence of the individual to penetrate them. Further, we'll consider what's meant by the word "Kafkaesque," a concept that describes both the hopelessness of existence in the modern world of bureaucracy, but also calls to mind the absurd, the dreamlike, and the hilariously funny. We won't just focus on writings by Kafka, either: we'll also look at how his alien condition influenced writers and filmmakers from all parts of the world, such as the German writer Daniel Kehlmann and the filmmakers David Lynch and Martin Scorsese, among others.

**GER 297 | SPECIAL TOPICS IN GERMAN | 4 quarter hours
(Undergraduate)**

See schedule for current offerings.

**GER 298 | STUDY ABROAD | 1-8 quarter hours
(Undergraduate)**

Variable credit.

**GER 299 | INDEPENDENT STUDY | 0.5-8 quarter hours
(Undergraduate)**

Variable credit.

GER 301 | ORIGINS OF THE GERMAN LANGUAGE TO 1600 | 4 quarter hours**(Undergraduate)**

The modern understanding of the German nation has its origins in a number of tribes that emerged from southern Scandinavia and northern Germany before the Common Era. This course will trace the development of "Germany" (a term that was not commonly used until the 1500s) in the Medieval period and into the 16th century, when Martin Luther and his 95 Theses initiated the movement that would later be known as the Protestant Reformation. In the exploration of this history, and of the evolution of the German language, students will read representative works of literature which will question the category of literature altogether. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 302 | PLAY, PERSONALITY, AND POLITICS IN SCHILLER'S LETTERS ON ART | 4 quarter hours**(Undergraduate)**

Dramatist, playwright, and critic Friedrich Schiller used publicly published letters to experiment with and articulate his understanding of the value and function of art in the ordinary lives of human beings. His minute examination led him to grand claims that range widely beyond art in the narrow sense. This course traces three of them while reading the entirety of the letters and considering the impact of the medium he used in his thinking—letters ostensibly written to one person but made available to a wider public. In so doing we'll investigate the claim that play, personality, and politics result in and extend from a type of coherence that has its origin in early life. Schiller writes that human beings only play when being human "in the fullest sense of the word," a statement which points us toward the role of art as a process of amplification, or something that "makes full." GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 304 | WORD-SCRIPT-STAGE-WORLD: DAS THEATER | 4 quarter hours**(Undergraduate)**

This course is designed to familiarize students with some of the outstanding dramas written in German speaking countries during the last half century. Students will explore dramas that ignited hot public debates on account of their weighty topics, science and ethics, or science as power, more precisely, political power: "What do scientific discoverers do when they feel responsibility towards the world?" Towards the end of the 20th century, and with the rise of critical feminist thought, the fierce satirical drama of the Nobel Prize winning Austrian playwright Elfriede Jelinek on science, and the power games of gender garners attention. Her work and those of other artists will be explored. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 305 | COMPOSING REALITY: WRITING IN GERMAN | 4 quarter hours**(Undergraduate)**

Topics include: prose from 1600 to Goethe; from the Romantic to the Realistic periods; prose of the 20th century. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 306 | THE NOVELLE | 4 quarter hours**(Undergraduate)**

From Goethe to Grass. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 307 | FROM SOUND TO STRUCTURE: GERMAN POETRY | 4 quarter hours**(Undergraduate)**

Instead of treating poems as potentially boring puzzles that can only be solved with some piece of arcane knowledge not available to average people, this course approaches the history of poems written in German by focusing on the various tools available to poets. What if sound (the sound of individual words but also the cumulative sound, including tone, which words make when put in a certain order) were more important than meaning or expression? What if lines, rather than sentences, made for a more reliable unit of composition? What if metaphor and simile actually created relationships between different things rather than those relationships existing prior to the poem? Students will be expected to experiment with these techniques themselves, and we will use our focus on those techniques as a constant that takes us through the periods comprising literary history in German-speaking countries. The variety of these periods, taken together, should serve to keep the subject matter lively. Even if the materials sacrifice depth for breadth, the course will reserve time for such luminaries as the Minnesingers, Holderlin, Goethe & Schiller, Trakl, Rilke, Brecht, Bachmann, and others, while touching on occasional oddballs like Heinz Herbeck and contemporaries such as Monika Rinck and Nora Gomringer. The aims of this course are to be better able to experience poems rather than decode them, and to situate them in their literary classification.

GER 308 | GOETHE AND HIS ERA | 4 quarter hours**(Undergraduate)**

This course explores one of the great, canonical works of German literature, Goethe's peculiar and provocative interpretation of the legendary figure of Dr. Faustus. By spending an entire quarter with this one text, students have time to gain a thorough appreciation for its depth, complexity, and poetic excellence. Classroom discussions will focus in part on a close reading of the text in its various dimensions: characterization, motivation, plot-structure and plot-development, poetic form (meter and rhyme), and poetic imagery (metaphors, similes, etc.). Students will also examine the philosophical questions raised by Faust and Mephisto's rich and probing dialogues and also consider the larger cultural and historical significance of Goethe's Faust. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 311 | BREAKING NEWS IN THE GERMAN-SPEAKING WORLD | 4 quarter hours**(Undergraduate)**

This course examines the many facets of contemporary Germany and Austria via five focused two week units: Politics; Business and the Environment; Film and Culture; Literature; and Communication/Social Media. We'll engage with several German-language media (internet, television, film, print) to understand the happenings of the German-speaking world in the present day. Moreover, the course includes several outings and/or events that will expose us to German-related happenings in Chicago. These will generate further, comparative discussions about representations of contemporary Germany and Austria in the U.S. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

**GER 312 | GERMAN INTELLECTUAL HISTORY | 4 quarter hours
(Undergraduate)**

This course is designed to introduce the student to some of the most powerful and influential German thinkers in Western civilization of the 19th and 20th century, whose names are synonymous with revolutionary thinking, and whose philosophies have deeply shaped the Weltanschauung of 20th century man. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

**GER 313 | TURN OF THE CENTURY VIENNA | 4 quarter hours
(Undergraduate)**

A world center of modern art and thought: Freud, Wittgenstein, Klimt, Kokoschka, Kafka, Schoenberg. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

**GER 314 | BERLIN AND THE GOLDEN TWENTIES | 4 quarter hours
(Undergraduate)**

Berlin in the 1920s was a dynamic, modern city marked by contrasts: the trauma of soldiers returning from the First World War and the decadence of the future-forward metropolis; an ever-growing tension between liberalism and an increasingly radical political right; and the emergence of the progressive Weimar Republic, which was characterized by (often violent) political turmoil and dramatic economic instability. These "Golden Twenties" also gave rise to innovations in the arts, film, theater, literature, music, philosophy, architecture, social sciences, and technology throughout Germany and Europe...and Berlin was at the center of it all. In this course, we'll learn about some of the major social movements, filmmakers, writers, artists, and musicians in this great metropolis of the early twentieth century as we consider the conflicts that plagued Germany's young democracy. We'll also discuss what led to the end of these "Golden Twenties" and the collapse of the Weimar Republic: a fragmented political left unable to overcome a conservative coalition that ultimately rallied around Adolf Hitler, thanks to the tragic miscalculation that, once in power, he could be controlled. Throughout the course, we'll also think about the meaning of 1920s Berlin for us today, as we reflect on the parallels between current events and this turbulent period of German history.

**GER 315 | LITERATURE AFTER 1945 (EAST AND WEST) | 4 quarter hours
(Undergraduate)**

Reconstruction of German literature and coming to terms with the past: "Gruppe 47", Grass, Böll, Enzensberger. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

**GER 317 | WOMEN WRITERS OF GERMAN EXPRESSION | 4 quarter hours
(Undergraduate)**

Studies in literature and social issues from all periods of German, Austrian and Swiss history. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

**GER 318 | THE CONTEMPORARY GERMAN FILM | 4 quarter hours
(Undergraduate)**

In this course, we'll take a look at ten German-language films released since 2010, which are diverse in both genre and theme: German comedies; indie and art house films; popular movies; period films; and dramatic films that speak to Germany's multicultural identity and the current European refugee crisis. We'll also discuss some of the most influential filmmakers working in German-language cinema today, which run the gamut from relative newcomers to established auteurs: Margarethe von Trotta, Florian Henckel von Donnersmarck, Christian Petzold, Fatih Akin, Markus Schleinzer, and Maren Ade, among others. Above all else, we'll consider the ways these works speak to German and Austrian identities, and how they reflect contemporary discussions and debates in the German-speaking world. Completion of GER 106 or equivalent is recommended.

**GER 319 | MULTICULTURAL GERMANY: LITERATURE, FILM, FOOD, CULTURE | 4 quarter hours
(Undergraduate)**

This course asks students to consider how a variety of cultural products: film, literature, theater, food, etc., communicate and interpret experiences relevant to migrants in Germany, particularly in Berlin. We'll consider the migrant and refugee experience in Germany over the past several centuries, focusing on postwar-era "guest workers" and, most immediately, the influx of refugees to Germany from Syria, Afghanistan, and Iraq that spiked in 2015/16. By engaging with texts, films, and other cultural products created by members of these groups, students will be encouraged to think critically about representations of refugees and immigrants in media and discourse, to consider, for example, how even the contemporary labeling of refugees in Europe as a "crisis" generates a certain kind of response. The course will end with a look toward the future of multiculturalism in Germany and consider the possibility of a pan-European multicultural literature and film.

**GER 320 | ADVANCED COMMERCIAL GERMAN | 4 quarter hours
(Undergraduate)**

This course will approach the concept of Geschäftsdeutsch on two levels: first with an examination of Germany, Austria, the European Union, and the German industry and economy, and second, with an exploration of the German professional world (i.e. the processes involved in searching, applying, and interviewing for an internship or employment in a German speaking country). Students will practice in class through role playing, skits, writing example letters, resumes, and CVs, etc. A number of guest speakers from the German business community in Chicago are possible. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

**GER 321 | TRANSLATION | 4 quarter hours
(Undergraduate)**

The primary objective of this course is to immerse the student in the process of translation from German into English (and to a lesser extent from English into German) to successfully complete a variety of translation projects for professional, academic, artistic, or personal purposes, thus equipping the students with proficiency in translating at an advanced level. Through various translation assignments, students will be able to review German grammar, work within different registers and learn appropriate vocabulary, expand their reading and writing in German while developing a sense of responsibility for the text translated. This course will present a survey of translation theory, particularly as it relates to Germany, and probe the usefulness of technology. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 324 | ELFRIEDE JELINEK: WRITING ANGER, WRITING RESISTANCE | 4 quarter hours (Undergraduate)

Elfriede Jelinek, winner of the 2004 Nobel Prize in Literature, has been labeled by critics as a "Nestbeschmutzerin" in her native Austria: one who befouls their own nest. Jelinek's works deal with themes as varied as feminism, capitalism, violence, the patriarchy, the environment, Austrian and American politics, the media, and above all else, power. Though Jelinek has gradually retreated into a kind of "innere Emigration" over the past three decades due to several social phobias and her targeting by Austria's political right wing in the 1990s, she remains a dominant voice on the world stage thanks to her outspokenness, the often brutal violence and vulgarity of her works, and her remarkable use of language. In his celebration of Jelinek's Nobel Prize, Dr. Sture Packalen describes her writing as a kind of action: "To employ language is for [Jelinek] a form of resistance to life and society." In this course, we'll consider several works from various points in Jelinek's career, starting in the 1970s with her feminist text "Women as Lovers," and ending with her 2017 Muppet-inspired play "On the Royal Road: the Burgher King," which satirized American politics and the election of Donald Trump. We'll also consider some of Jelinek's Austrian literary predecessors and learn about the political backdrop against which these texts were created. Throughout the quarter, we'll think about the ways that Jelinek both channels and expresses anger in her writing, and how her body of work can be seen as a form of resistance in Austria.

GER 325 | KAFKA AND THE KAFKAESQUE | 4 quarter hours (Undergraduate)

In this course, we'll start by considering Franz Kafka's identity as an outsider many times over from a Jewish, German-speaking family in turn of the century Prague and how Kafka's fundamental otherness intruded upon his life and writing alike. We'll take a look at Kafka's influences both small and large: the domestic world of the family home and the oversized role that his father occupied in it, and the larger sociocultural milieu of Prague and the Austro-Hungarian Empire, where Kafka lived, wrote, and carried on several long-term relationships. We'll also consider what's meant by the word *kafkaesque*, a concept that describes both the hopelessness of existence in the modern world of bureaucracy, but also calls to mind the absurd, the dreamlike, and the hilariously funny. Our readings will include a number of stories by Kafka, some written correspondence between Kafka and his friends, family, and romantic partners, and finally, his unfinished novel "Amerika" (also known as "The Man who Disappeared" or "The Missing Person"). But this course will not only focus on writings by Kafka we'll also look at how his alien condition influenced writers and filmmakers from all parts of the world, such as the German-language writers Jan Peter Bremer and Daniel Kehlmann, English-language writers like Philip Roth, and the filmmakers David Lynch and Woody Allen, among others. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 328 | GERMAN FILM SINCE 2010 | 4 quarter hours (Undergraduate)

In this course, we'll take a look at ten German-language films released since 2010, which are diverse in both genre and theme: German comedies; indie and art house films; popular movies; period films; and dramatic films that speak to Germany's multicultural identity and the current European refugee crisis. We'll also discuss some of the most influential filmmakers working in German-language cinema today, which run the gamut from relative newcomers to established auteurs: Margarethe von Trotta, Florian Henckel von Donnersmarck, Christian Petzold, Fatih Akin, Markus Schleinzer, and Maren Ade, among others. Above all else, we'll consider the ways these works speak to German and Austrian identities, and how they reflect contemporary discussions and debates in the German-speaking world. Each class meeting will include a weekly film screening and associated discussion. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 329 | MEISTERWERKE OF GERMAN CINEMA | 4 quarter hours (Undergraduate)

The "German National Cinema" has changed nearly as much as the face of the German nation itself over the course of the twentieth century. Films made in the various "Germanies" in the past hundred years are a reflection of, and reaction to, the political, social, and artistic climates confronting German-speaking filmmakers. Students will investigate the motivations surrounding the production of certain historically significant films, as well as the messages that were conveyed to the contemporary audience through the cinema of the period. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 330 | COMING TO TERMS WITH THE PAST | 4 quarter hours (Undergraduate)

The theme of this course, and the subject we will engage with through our readings, discussions, films, and assignments, is one central to Germany and German-speaking countries: *Vergangenheitsbewältigung*, or confronting the past or coming to terms with it (the German word implies "having overcome" the past). Our work will focus on the various ways that human beings can come to terms with the past and the potential consequences of doing and not doing so. The vocabulary that students will be expected to learn represents vocabulary used in seminars - that is, the words students will need to convert their understanding of what they have read outside of class into things they can say in a university-level classroom. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 331 | READING THE FOREIGN/FOREIGN READING | 4 quarter hours (Undergraduate)

This course furthers the linguistic independence of the student by thematizing the foreign or foreignness through an encounter with specific texts, all originally written in German but whose existence is in some way indebted to something conventionally outside the German language or German culture; thus, what unites the majority of our German texts is that they have in some way been influenced by something un-German. Moreover, the student shall be charged with consciously considering, or experiencing more fully, her or his position to the language. The arena of this experiencing will primarily, but not exclusively, be the human activity of reading. Thus, students will be asked not only to consider abstractly concepts of the foreign, but also document and better understand their experience of being a foreign reader, whatever that may come to mean from one person to another. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

**GER 332 | THE UNCANNY AND THE SELF | 4 quarter hours
(Undergraduate)**

This course will explore the themes of das Unheimliche ("The Uncanny") and how it relates to ideas of the Self. Described as "the opposite of what is familiar," das Unheimliche existed in literature long before the twentieth century, but was famously examined at length in Sigmund Freud's 1919 essay, "Das Unheimliche," and has been popularized in the modern moment via the notion of the "Uncanny Valley." Our course will consider iterations and examples of das Unheimliche in seminal Germanic literary and filmic works ranging from the late 18th to the 21st centuries and will also reflect on how such uncanny distortions of reality affect ideas and experiences of the Self. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

**GER 351 | GERMAN PHONOLOGY AND PHONETICS | 4 quarter hours
(Undergraduate)**

An in-depth study of the language's sound system and intensive pronunciation practice. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

**GER 395 | FOREIGN LANGUAGES ACROSS THE CURRICULUM | 2 quarter hours
(Undergraduate)**

The two credit FLAC course allows students to enrich their experience in the co-required course through added reading, writing, listening and speaking activities in German. Students must have the equivalent of 106 or higher ability in German to take this two credit component. Please contact the Department of Modern Languages if you have questions about this course or about language placement.

**GER 397 | SPECIAL TOPICS IN GERMAN | 4 quarter hours
(Undergraduate)**

See schedule for current offerings.

**GER 398 | STUDY ABROAD | 1-8 quarter hours
(Undergraduate)**

Variable credit.

**GER 399 | INDEPENDENT STUDY | 0.5-8 quarter hours
(Undergraduate)**

Variable credit.

**GER 401 | INTRODUCTION TO GERMAN LITERATURE I: FROM ORIGINS TO 1600 | 4 quarter hours
(Graduate)**

The modern understanding of the German nation has its origins in a number of tribes that emerged from southern Scandinavia and northern Germany before the Common Era. It was not until the reign of Charlemagne in the eighth and early ninth centuries that the process of uniting most of the Germanic provinces was completed under the Carolingian Empire, which was later to be absorbed into the Holy Roman Empire. The course will trace these developments, as well as that of "Germany" (indeed a term that was not commonly used until the 1500s) in the Medieval period and into the 16th century, when Martin Luther and his 95 Theses initiated the movement that would later be known as the Protestant Reformation. Students will read representative works of literature that explore the traditions, attitudes, and mindsets of Germanic peoples in their respective eras.

**GER 402 | PLAY, PERSONALITY, AND POLITICS IN SCHILLER'S LETTERS ON ART | 4 quarter hours
(Graduate)**

Dramatist, playwright, and critic Friedrich Schiller used publicly published letters to experiment with and articulate his understanding of the value and function of art in the ordinary lives of human beings. His minute examination led him to grand claims that range widely beyond art in the narrow sense. This course traces three of them while reading the entirety of the letters and considering the impact of the medium he used in his thinking—letters ostensibly written to one person but made available to a wider public. In so doing we'll investigate the claim that play, personality, and politics result in and extend from a type of coherence that has its origin in early life. Schiller writes that human beings only play when being human "in the fullest sense of the word," a statement which points us toward the role of art as a process of amplification, or something that "makes full."

**GER 404 | WORD-SCRIPT-STAGE-WORLD: DAS THEATER | 4 quarter hours
(Graduate)**

This course is designed to familiarize students with some of the outstanding dramas written in German speaking countries during the last half century. Students will explore dramas that ignited hot public debates on account of their weighty topics, science and ethics, or science as power, more precisely, political power: "What do scientific discoverers do when they feel responsibility towards the world?" Towards the end of the 20th century, and with the rise of critical feminist thought, the fierce satirical drama of the Nobel Prize winning Austrian playwright Elfriede Jelinek on science, and the power games of gender garners attention. Her works and those of other artists will be explored.

**GER 405 | COMPOSING REALITY: WRITING IN GERMAN | 4 quarter hours
(Graduate)**

Topics include: prose from 1600 to Goethe; from the Romantic to the Realistic periods; prose of the 20th century.

**GER 406 | THE NOVELLE | 4 quarter hours
(Graduate)**

From Goethe to Grass.

**GER 407 | FROM SOUND TO STRUCTURE: GERMAN POETRY | 4 quarter hours
(Graduate)**

Topics include: from the Baroque to Holderlin; from Romanticism to the present.

**GER 408 | GOETHE AND HIS ERA | 4 quarter hours
(Graduate)**

This course explores one of the great, canonical works of German literature, Goethe's peculiar and provocative interpretation of the legendary figure of Dr. Faustus. By spending an entire quarter with this one text, students have time to gain a thorough appreciation for its depth, complexity, and poetic excellence. Classroom discussions will focus in part on a close reading of the text in its various dimensions: characterization, motivation, plot-structure and plot-development, poetic form (meter and rhyme), and poetic imagery (metaphors, similes, etc.). Students will also examine the philosophical questions raised by Faust and Mephisto's rich and probing dialogues and also consider the larger cultural and historical significance of Goethe's Faust.

**GER 410 | GERMAN CIVILIZATION II | 4 quarter hours
(Graduate)**

Social, intellectual and artistic developments in Germany from unification in 1871 to reunification in 1990.

GER 411 | BREAKING NEWS IN THE GERMAN-SPEAKING WORLD | 4 quarter hours (Graduate)

This course examines the many facets of contemporary Germany and Austria via five focused two week units: Politics; Business and the Environment; Film and Culture; Literature; and Communication/Social Media. We'll engage with several German-language media (internet, television, film, print) to understand the happenings of the German-speaking world in the present day. Moreover, the course includes several outings and/or events that will expose us to German-related happenings in Chicago. These will generate further, comparative discussions about representations of contemporary Germany and Austria in the U.S.

GER 412 | GERMAN INTELLECTUAL HISTORY | 4 quarter hours (Graduate)

This course is designed to introduce the student to some of the most powerful and influential German thinkers in Western civilization of the 19th and 20th century, whose names are synonymous with revolutionary thinking, and whose philosophies have deeply shaped the Weltanschauung of 20th century man.

GER 413 | TURN OF THE CENTURY VIENNA | 4 quarter hours (Graduate)

A world center of modern art and thought: Freud, Wittgenstein, Klimt, Kokoschka, Kafka, Schoenberg.

GER 414 | BERLIN AND THE GOLDEN TWENTIES | 4 quarter hours (Graduate)

Berlin in the 1920s was a dynamic, modern city marked by contrasts: the trauma of soldiers returning from the First World War and the decadence of the future-forward metropolis; an ever-growing tension between liberalism and an increasingly radical political right; and the emergence of the progressive Weimar Republic, which was characterized by (often violent) political turmoil and dramatic economic instability. These "Golden Twenties" also gave rise to innovations in the arts, film, theater, literature, music, philosophy, architecture, social sciences, and technology throughout Germany and Europe...and Berlin was at the center of it all. In this course, we'll learn about some of the major social movements, filmmakers, writers, artists, and musicians in this great metropolis of the early twentieth century as we consider the conflicts that plagued Germany's young democracy. We'll also discuss what led to the end of these "Golden Twenties" and the collapse of the Weimar Republic: a fragmented political left unable to overcome a conservative coalition that ultimately rallied around Adolf Hitler, thanks to the tragic miscalculation that, once in power, he could be controlled. Throughout the course, we'll also think about the meaning of 1920s Berlin for us today, as we reflect on the parallels between current events and this turbulent period of German history.

GER 415 | LITERATURE AFTER 1945 (EAST AND WEST) | 4 quarter hours (Graduate)

Reconstruction of German literature and coming to terms with the past: "Gruppe 47", Grass, Böll, Enzensberger.

GER 416 | LITERATURE OF THE WEIMAR YEARS | 4 quarter hours (Graduate)

Mann, Hesse, Kafka, Brecht.

GER 417 | WOMEN WRITERS OF GERMAN EXPRESSION | 4 quarter hours (Graduate)

Studies in literature and social issues from all periods of German, Austrian and Swiss history.

GER 419 | MULTICULTURAL GERMANY: LITERATURE, FILM AND ART | 4 quarter hours (Graduate)

This course asks students to consider various literary/artistic media as ways of communicating and interpreting experiences relevant to migrants in Germany. The groups we'll explore include the Turkish and Italian guest workers ("Gastarbeiter") of the the 1950s and '60s that made West German (re-)construction possible; Afro-Germans, a long-understudied population that emerged largely from two main sources: descendants of Africans who migrated to Germany in relation to its African colonies, and to a much larger extent, the offspring born to German mothers and U.S. military fathers in centers of American occupation; and the most recent wave of refugees from Syria, Afghanistan, and Iraq. By engaging with writings, artwork, films, and music created by members of these populations, students will be encouraged to think critically about representations of refugees and immigrants in media and discourse –to consider, for example, how even the labeling of refugees in Europe as a "crisis" generates a certain kind of response. The course will end with a look toward the future of multiculturalism in Germany and consider the possibility of a pan-European multicultural literature and film.

GER 420 | ADVANCED COMMERCIAL GERMAN | 4 quarter hours (Graduate)

This course will approach the concept of Geschäftsdeutsch on two levels: first with an examination of Germany, Austria, the European Union, and the German industry and economy, and second, with an exploration of the German professional world (i.e. the processes involved in searching, applying, and interviewing for an internship or employment in a German speaking country). Students will practice through role playing, skits, writing example letters, resumes, and CVs, etc. A number of guest speakers from the German business community in Chicago are possible.

GER 421 | TRANSLATION | 4 quarter hours (Graduate)

The primary objective of this course is to immerse the student in the process of translation from German into English (and to a lesser extent from English into German) to successfully complete a variety of translation projects for professional, academic, artistic, or personal purposes, thus equipping the students with proficiency in translating at an advanced level. Through various translation assignments, students will be able to review German grammar, work within different registers and learn appropriate vocabulary, expand their reading and writing in German while developing a sense of responsibility for the text translated. This course will present a survey of translation theory, particularly as it relates to Germany, and probe the usefulness of technology.

GER 424 | ELFRIEDE JELINEK: WRITING ANGER, WRITING RESISTANCE | 4 quarter hours (Graduate)

Elfriede Jelinek, winner of the 2004 Nobel Prize in Literature, has been labeled by critics as a "Nestbeschmutzerin" in her native Austria: one who befouls their own nest. Jelinek's works deal with themes as varied as feminism, capitalism, violence, the patriarchy, the environment, Austrian and American politics, the media, and above all else, power. Though Jelinek has gradually retreated into a kind of "innere Emigration" over the past three decades due to several social phobias and her targeting by Austria's political right wing in the 1990s, she remains a dominant voice on the world stage thanks to her outspokenness, the often brutal violence and vulgarity of her works, and her remarkable use of language. In his celebration of Jelinek's Nobel Prize, Dr. Sture Packalen describes her writing as a kind of action: "To employ language is for [Jelinek] a form of resistance to life and society." In this course, we'll consider several works from various points in Jelinek's career, starting in the 1970s with her feminist text "Women as Lovers," and ending with her 2017 Muppet-inspired play "On the Royal Road: the Burgher King," which satirized American politics and the election of Donald Trump. We'll also consider some of Jelinek's Austrian literary predecessors and learn about the political backdrop against which these texts were created. Throughout the quarter, we'll think about the ways that Jelinek both channels and expresses anger in her writing, and how her body of work can be seen as a form of resistance in Austria.

GER 425 | KAFKA AND THE KAFKAESQUE | 4 quarter hours (Graduate)

In this course, we'll start by considering Franz Kafka's identity as an outsider many times over from a Jewish, German-speaking background in turn of the century Prague and how Kafka's fundamental "otherness" intruded upon his life and writing alike. We'll also take a look at Kafka's influences both small and large: the domestic world of the family home and the oversized role that his father occupied in it, and the larger sociocultural milieu of Prague and the Austro-Hungarian Empire, where Kafka lived, wrote, and carried on several long-term relationships with women, none of whom he could ever bring himself to marry. We'll also consider what's meant by the word "kafkaesque," a concept that describes both the hopelessness of existence in the modern world of bureaucracy, but also calls to mind the absurd, the dreamlike, and the hilariously funny. We won't just focus on writings by Kafka, either - we'll also look at how his alien condition influenced writers and filmmakers from all parts of the world, such as the German-language writer Daniel Kehlmann, English-language writers like Philip Roth, and the filmmakers David Lynch and Woody Allen, among others. This course is taught in German.

GER 429 | MEISTERWERKE OF GERMAN CINEMA | 4 quarter hours (Graduate)

The "German National Cinema" has changed nearly as much as the face of the German nation itself over the course of the twentieth century. Films made in the various "Germanies" in the past hundred years are a reflection of, and reaction to, the political, social, and artistic climates confronting German-speaking filmmakers. Students will investigate the motivations surrounding the production of certain historically significant films, as well as the messages that were conveyed to the contemporary audience through the cinema of the period.

GER 451 | GERMAN PHONOLOGY AND PHONETICS | 4 quarter hours (Graduate)

An in-depth study of the language's sound system and intensive pronunciation practice. Cross listed with GER 351.

GER 496 | PRACTICUM IN GERMAN INSTRUCTION | 4 quarter hours (Graduate)

Supervised practice in language instruction, paired with a mentor instructor in a beginning or intermediate language course. Students observe a class, teach a lesson or lessons, assist in assessment and lesson planning, and complete individualized assignments to develop their skills as classroom language instructors. Repeatable.

GER 497 | SPECIAL TOPICS IN GERMAN | 4 quarter hours (Graduate)

See schedule for current offerings.

GER 498 | STUDY ABROAD | 1-8 quarter hours (Graduate)

Variable credit.

GER 499 | INDEPENDENT STUDY | 1-8 quarter hours (Graduate)

Variable credit.

Graduate School of Business (GSB)

GSB 400 | FOUNDATIONS OF QUANTITATIVE ANALYSIS | 4 quarter hours (Graduate)

This course provides basic instruction in mathematical and statistical methods as a foundation for GSB420 Applied Quantitative Analysis. This course will focus on strengthening algebra and calculus skills and provide a basic introduction to statistical methods.

GSB 420 | BUSINESS ANALYTICS TOOLS | 4 quarter hours (Graduate)

This course provides foundational quantitative analytical skills to address typical problems that arise in business. The course emphasizes a problem-oriented approach utilizing software applications such as Excel for data analyses. The topics covered in the course include relevant mathematical concepts such as algebra and probability theory/application as well as a strong focus on fundamental statistical tools such as hypothesis testing, regression analysis and forecasting.

GSB 500 | U.S. BUSINESS CULTURE & PRACTICE | 4 quarter hours (Graduate)

The objective of this course is to develop an understanding of how to be successful in the U.S., both academically and professionally. The course covers the concepts, methods and tools necessary to face the challenges of studying and working in the U.S. Students will improve their skills in oral communication, practical business writing, and delivering presentations. Students will also gain knowledge of the career search process.

GSB 519 | BUSINESS ANALYTICS TOOLS (FORMERLY GSB420) | 4 quarter hours (Graduate)

This course provides foundational quantitative analytical skills required to understand and solve organizational problems. The course emphasizes a problem-oriented approach utilizing software applications primarily in Excel for data analyses. The topics covered in the course include relevant mathematical concepts such as algebra and probability theory/application as well as a strong focus on fundamental statistical tools such as hypothesis testing, regression analysis and forecasting.

GSB 525 | BUSINESS INNOVATION & DESIGN (FORMERLY MGT 573) | 4 quarter hours (Graduate)

This course explores the role of innovation in organizations and markets. An analysis of the forces behind creativity and innovation provides the foundation for understanding what determines successful innovation outcomes. Within organizations, the discussion focuses on people, including individual creativity, and process, such as Design Thinking, Inventive Problem Solving and others. The course also explores the role of creativity in the economy and the empirical measurement of innovation in order to provide a useful and pragmatic view. The class approach is largely applied and experiential, and includes group and individual projects and exercises that allow students to be immersed in the creativity and innovation process.

GSB 595 | DEVELOPING SUSTAINABLE STRATEGIES: PRACTICUM | 4 quarter hours (Graduate)

This course is designed to integrate the concept of strategy development into the larger ecological economic context of serving market/society needs in a finite world. The goal of strategy in organizations has traditionally been defined as one of value maximization, from the shareholder perspective exclusively. But the role of strategy is to guide organizations in competitively defining and meeting market/society's needs. Sustainable strategies take into account multiple perspectives by engaging in practices - principally systems thinking - to pursue opportunities in meeting market/society's needs that are economically viable, socially just, and operate responsibly within the constraints of a finite ecology. Students will demonstrate the literacies required to develop sustainable strategies that take into account all facets of the business venture (marketing, finance, management, design, production and distribution/life cycle analysis.) One key question will shape the trajectory of the course: 'How does one develop a competitive sustainable strategy to serve some market/society need?' Therefore, the focus of this course is for the student to select a need, determine the sustainable economic system to develop and deliver the product/service, and write and present the 'business case.' The student will also articulate the values and vision - personally and organizationally - driving the strategy.

GSB 599 | STRATEGIC MANAGEMENT CAPSTONE | 4 quarter hours (Graduate)

This capstone course challenges students to apply their general knowledge of business toward creating global competitive business strategies. The course content emphasizes identifying strategic alternatives, developing corporate and business strategies, and understanding the role of functional activities and organizational processes from a strategic viewpoint. Experiential learning is the primary mode of learning as students acquire the skills to make strategic decisions as part of a management team.

MGT 504 or MGT 502, FIN 555, ECO 555 and (ACC 500 or ACC 502) are prerequisites for this class.

GSB 600 | CANDIDACY CONTINUATION | 0 quarter hours (Graduate)

A non-credit registration that allows students to continue to use DePaul facilities such as the library, Career Development Center and the computer lab while not registered for credit-earning courses. (0 quarter hours)

GSB 631 | STRATEGIC FINANCIAL ANALYSIS | 4 quarter hours (Graduate)

This course is designed for all MBA students seeking to develop skills in strategic financial analysis. The course provides a deep, unabashed evaluation of corporate performance with a focus on traditional and cash-based measures, and strategic applications. Understanding the strengths and weaknesses of various types of financial analyses is a requirement for designing and developing business strategy, business execution systems, and understanding the performance of the company. Key managerial questions will be investigated in the course: When should a business grow? When is growth meaningless to investors? Why does an increase in net income, even over decades, still result in stock price drops? Why do companies report Return On Equity amidst abysmal stock returns? Why and when is stock price BAD for measuring managerial performance? Corporate managers today are plagued by these questions, leaving them to believe in market irrationality, or simply "the market doesn't understand my company". The course will be driven by actual review and evaluation of company financial statements, using several types of practical financial analysis methods and tools. The course provides deep insights into the world of investment analysis, corporate performance measurement, and strategic planning. This course will be useful for MBA candidates destined for higher levels of corporate management, management consulting, investment banking, equity research, or money management.

GSB 640 | PROBLEMS IN ETHICS: ISSUES IN BUSINESS | 4 quarter hours (Graduate)

A seminar in business ethics that centers on theoretical, practical and pedagogical issues. Cross-listed with PHL 640. Offered variably.

GSB 650 | RELIGIOUS ETHICS AND ECONOMICS | 4 quarter hours (Graduate)

This course will examine the thinking of social scientists, philosophers and theologians on the impact of religious values and institutions, on the origin and development of American capitalism and its relevance to contemporary business ethics. Cross-listed with PHL 650 and MLS 442. Offered variably.

GSB 793 | INTERNSHIP | 4 quarter hours (Graduate)

This is a unique opportunity in which knowledge gained in the classroom can be applied to an actual business environment. The intern will be immersed in a stimulating environment with a pool of established resources in industry or government.

GSB 798 | SPECIAL TOPICS | 4 quarter hours (Graduate)

Content and format of this course is variable. An in-depth study of current issues. Subject matter will be indicated in class schedule.

GSB 799 | INDEPENDENT STUDY | 4 quarter hours (Graduate)

Available for graduate students of demonstrated capability for intensive independent work in accountancy.

GSB 800 | INTRODUCTION TO RESEARCH METHODS | 2 quarter hours (Graduate)

This course is designed to introduce incoming executive doctoral students to the fundamentals of research methods. The course will begin with an overview of why we do research, the scientific method and causal inference. Students will then learn about the different types of validity and threats to validity. Finally, students will get an overview of different empirical research methods, including surveys, experiments, and analysis of archival data and will discuss the validity trade-offs of these different research methods. (2 quarter hours)

**GSB 801 | EMPIRICAL RESEARCH STUDIES | 6 quarter hours
(Graduate)**

This course is designed to teach doctoral students how to design and conduct empirical research studies. The first part of the course will focus on practical aspects of research, such as how to identify a problem, develop a good research question, develop a theory and perform a comprehensive literature review. The second part of the course will build on topics discussed in the Introduction to Research Methods course and further explore the different empirical research methods available to answer business research questions. Specifically, students will learn how to design research studies using process simulations, case/field studies, interviews, focus groups and surveys, experiments, and time-series and cross-sectional archival data. Construct measurement will be emphasized throughout the course. Students will discuss research ethics, with a special emphasis on IRB training and how to ethically perform research using human participants. (6 quarter hours)

**GSB 802 | STATISTICS IN BUSINESS RESEARCH | 4 quarter hours
(Graduate)**

This course presents the basics of using statistics in solving business problems and applications. Students will study several statistical methodologies, such as t-tests, ANOVA, correlation and simple regression analysis. A strong emphasis will be placed on understanding differences between different types of variables, when to use them, how to read them and interpret them. The course focuses on the selection, application, and interpretation of statistical techniques and requires SPSS statistical software to analyze data. Special importance will be given to topics of ethics in empirical research, data analysis and presentation. (4 quarter hours)

**GSB 803 | APPLIED MULTIVARIATE STATISTICS | 5 quarter hours
(Graduate)**

This course equips students with the skills needed to analyze data for advanced research using selected statistical techniques such as factor analysis, discriminant analysis, cluster analysis, and structural equation modeling. It enables students to apply these statistical techniques to a variety of business areas and problems so students can gain an applications-guided understanding of the statistical theories presented. The class includes topics of model specification, significance determination, nonlinear transformations, residual analysis, normality assessment, and outlier analysis, plus more advanced topics including autocorrelation, multicollinearity, heteroscedasticity and extrapolation. Students will do individual and group projects both in labs and in take-home assignments. The course emphasizes the selection, application, and interpretation of statistical techniques and requires SPSS statistical software to analyze data. (5 quarter hours)

**GSB 804 | FORECASTING AND PREDICTION | 4 quarter hours
(Graduate)**

In this course, students will study a variety of advanced statistical techniques, such as time series analysis, conjoint analysis, choice models and market diffusion models. The course topics include: autocorrelated data analysis, Box-Jenkins models (autoregressive, moving average, and autoregressive moving average models), analysis of seasonality, forecasting evaluation and diagnostics checking. Students will learn how to set up a conjoint experiment and apply it to setting prices and predicting sales. This course will also discuss approaches to modeling consumer choice behavior, such as logit and nested logit models, and study the relation between consumer choices and price, promotion, advertising, and product innovations and characteristics. All these techniques will be used as tools to predict product diffusion, market shares, and likelihood to purchase. Several datasets will be generated to help with analyzing real life prediction simulations. Students will also review and analyze significant academic publications presenting forecasting and predictive research projects. Learning these statistical methods will be assessed in individual and group exercises, simulation and predictive experiments. (3 quarter hours)

**GSB 805 | DATA SCIENCE AND VISUALIZATION | 2 quarter hours
(Graduate)**

This course is designed to familiarize students with data science and data visualization. It explores the boundaries of data science as well as the pipeline for the data science process. Specific topics include but are not limited to data cleaning, broad classes of algorithms in data science, data exploration and communicating of results using data visualization techniques. (2 quarter hours)

**GSB 806 | INSTITUTIONAL AND ACADEMIC RESEARCH DISSEMINATION | 2 quarter hours
(Graduate)**

With every project, analysis, business inquiry or research question, new knowledge is generated. In this course, students will discuss ways to create and disseminate this new knowledge both inside a business organization and outside, in the academic and trade media. Students will study how to develop a program of research to gather and create knowledge within various domains of theory and practice. Further, a special focus will be placed on how to position the results of empirical analyses and on how to write for a variety of publishing avenues, such as white papers, academic research journals, or trade publications. Students will be exposed to research on effective writing and will investigate the processes of disseminating the new knowledge for corporate approval and for research funding. (2 quarter hours)

**GSB 820 | LEADING ORGANIZATIONS THROUGH PEOPLE | 2-3 quarter hours
(Graduate)**

This seminar is design to develop foundational knowledge of leadership and related but broader organizational behavior research. Students will draw heavily on primary social and organizational psychology theories including, but not limited to: implicit person, attribution, social comparison, social exchange, attention, pro-social motivation, expectancy, goal-setting, job characteristics, and role theories. Students will examine how these fundamental theories shape the context of people, groups and organizations through primary organizational behavior domains including individual differences, motivation, performance, commitment, organizational citizenship, organizational climate, culture and context, power and influence, organizational justice, leader effectiveness, top management team effectiveness, leadership assessment and development.

GSB 821 | CONTEMPORARY TOPICS IN FINANCIAL RESEARCH | 3 quarter hours

(Graduate)

This course is designed to expose students to the prevailing research methods and topics in current financial research. Students will examine various topics throughout this seminar including but not limited to financial governance, corporate finance, behavioral finance, banking, and market efficiencies.

GSB 822 | MARKETING AND BUSINESS STRATEGY | 3 quarter hours

(Graduate)

This course surveys major topics in the evolving field of marketing and explores marketing's role in business strategy across a range of markets and industries. The focus of this doctoral seminar is to provide a critical review of selected scholarly and practitioner literature with an emphasis on their practical applications to organizations today. The course is designed to help doctoral students become conversant in prominent classical and contemporary marketing literature as well as to promote active discussions around major streams of marketing thought applied to current business challenges and opportunities. It also serves as a foundation course to prepare the student for further research and applied work in the areas of marketing and strategy.

GSB 823 | LEADING ORGANIZATIONAL DEVELOPMENT AND CHANGE | 4 quarter hours

(Graduate)

This seminar examines the conceptual underpinnings of organization development and provides exposure to contemporary literature on OD and change. Attention is given to OD practice and evidence-based interventions for managing planned change. Key topics explored include organization theory, foundations of planned organizational change, frames and models in organizational diagnosis, applying open-systems frames to diagnosis, designing major organizational interventions (including group, techno-structural, human process and strategic interventions). Practical attention paid to managing change and institutionalization through consultation/contracting and organizational learning.

GSB 824 | BEHAVIORAL DECISION THEORY | 3 quarter hours

(Graduate)

The goal of this course is to introduce doctoral students to prior research studies in behavioral decision theory. The course will cover seminal papers in the judgment and decision making literature, including those on heuristics and biases, context effects, prospect theory, mental accounting, regression to the mean, pattern seeking, sunk costs, and escalation of commitment. As part of the heuristics and biases topic, students will learn about biases in forecasting and prediction, such as the planning fallacy. Students will be introduced to normative models of belief updating and descriptive evidence on departures from the normative models, such as base rate neglect, belief perseverance, and primacy/recency effects. Finally, the course will cover several topics in psychology that are particularly relevant to business doctoral students: attribution theory, common problems in group decision making (groupthink, social conformity, and social influence), and the development of expertise. (3 quarter hours)

GSB 825 | BUSINESS ETHICS AND SOCIAL RESPONSIBILITY | 2 quarter hours

(Graduate)

This course is designed to examine contemporary research on leader and organizational ethics as well as corporate social responsibility. Key topics include corporate social responsibility and stakeholder management, role of business in society, environmental sustainability, corporate governance, accounting and finance, technology and privacy, employer responsibilities and employee rights. (2 quarter hours)

GSB 826 | CONTEMPORARY TOPICS IN ACCOUNTING RESEARCH | 3 quarter hours

(Graduate)

This course is designed to expose students to the current research methods and topics in accounting research. Students will examine various topics throughout this seminar including but not limited to forensic accounting, internal audit, information systems, data analytics, capital markets and managerial accounting.

GSB 827 | SEMINARS ON CURRENT TOPICS IN BUSINESS | 2 quarter hours

(Graduate)

This annually repeating seminar series is designed to examine contemporary issues in business from a variety of disciplinary perspectives. Through these seminars, students will develop the ability to critically evaluate published business-related research, study current business problems, identify the theoretical models needed to research these problems and perform the necessary empirical analyses to offer solutions to the research problem and managerial insights for industry applications. Early in the program, the seminars serve the important function of highlighting open research questions and introducing students to research active faculty who might be selected as their dissertation chair. In the final half of the program, the seminar series serves the equally important function of keeping the students engaged in issues relevant to their own interests. Each seminar will vary in length, depending upon the duration required to cover the topic. In order to keep the seminar series topical, seminars will be rotated based upon their relevance to the current business environment and cohort interest. (1-5 quarter hours)

GSB 828 | QUALITATIVE RESEARCH | 2 quarter hours

(Graduate)

This seminar provides exposure to leading edge qualitative research methods as they emerge in practice and research.

GSB 829 | DEVELOPMENTS IN ACCOUNTING RESEARCH | 3 quarter hours

(Graduate)

This seminar provides exposure to leading edge research topics in accounting.

GSB 840 | GROUP RESEARCH LAB I | 2 quarter hours

(Graduate)

This course is designed to help students engage with the entire research process, taking a research idea from conception to completion. Students are assigned to small groups and work with a faculty advisor to promote mastery in research method design and execution. The project culminates in a written manuscript and presentation to colleagues and faculty. (2 quarter hours)

**GSB 841 | GROUP RESEARCH LAB II | 2 quarter hours
(Graduate)**

This course is designed to help students engage with the entire research process, taking a research idea from conception to completion. Students are assigned to small groups and work with a faculty advisor to promote mastery in research method design and execution. The project culminates in a written manuscript and presentation to colleagues and faculty. (2 quarter hours)

**GSB 842 | DISSERTATION PROPOSAL LAB | 5 quarter hours
(Graduate)**

This research lab is designed to provide regular meetings with students' dissertation chair in preparation of the dissertation proposal.

**GSB 843 | DISSERTATION LAB II | 3 quarter hours
(Graduate)**

Dissertation lab designed to help students pursue their dissertation area of study. This class is part two of a two-part class. (8 quarter hours)

**GSB 850 | QUALITATIVE RESEARCH METHODS | 3 quarter hours
(Graduate)**

This course is designed to equip doctoral students with major methods in qualitative research design with a focus on the practical execution of qualitative research. Major qualitative methods are examined including conducting interviews, observations, ethnography, netnography, focus groups, and mixed methods. In addition, the course reviews methods for analyzing and presenting qualitative data.

**GSB 898 | SPECIAL TOPICS IN RESEARCH | 3-4 quarter hours
(Graduate)**

This special topics seminar provides exposure to leading edge research methods and statistics as they emerge in practice and research. (3-4 quarter hours)

**GSB 899 | CANDIDACY CONTINUATION | 0 quarter hours
(Graduate)**

Students admitted to candidacy for the doctoral degree who have completed all course requirements are required to be registered each quarter of the academic year until the dissertation has been completed. (0 credit hours)

Graphic Design (GD)

**GD 101 | CREATIVE STUDIO METHODS | 4 quarter hours
(Undergraduate)**

Creative Studio Methods is a required interdisciplinary foundation design course. It immerses new design students in a range of studio experiences as a means to introduce methods for approaching creative work. Short lectures or screenings present models, contexts, and inspiration for creative and critical design practices and provide students with, "courage by example." In-class exercises emphasize inquiry, experimentation, unknowns, playful risk, invention, flexibility, and agility. Visual and conceptual artifacts and outcomes are generated through process and analyzed/considered through group discussion. PREREQUISITE(S): None.

**GD 104 | DESIGN DRAWING PROCESS | 4 quarter hours
(Undergraduate)**

This course introduces students to drawing for the design process in print and media from initial concept development to sketches, presentation drawings and visualizations for graphic and interactive media. Topics include general arrangement as well as detailed and dimensional drawings providing essential preparation for classes in design and digital illustration software. PREREQUISITE(S): None.

**GD 105 | INTRO TO VISUAL DESIGN | 4 quarter hours
(Undergraduate)**

Students study the principles of composition and color theory, and how these are affected by movement, duration and display. Vector and bitmap manipulation tools are explored.

**GD 109 | WEB DESIGN TOOLS WORKSHOP | 2-2.25 quarter hours
(Undergraduate)**

This course introduces students to the basic languages used to build the front-end components of the web. Students will learn the basic syntax of HTML and CSS; a simple vocabulary of HTML elements and attributes, and CSS properties and values; best practices for preparing content for the web; and basic code patterns useful in web design. PREREQUISITE(S): None (2 quarter hours)

**GD 110 | WEB DESIGN | 4 quarter hours
(Undergraduate)**

An introduction to design process and strategy for the web. Students will be introduced to layout and composition, typography, color, and navigation concerns specific to web design. Projects will be created using both visual design applications and hand-coding with HTML and CSS. The class will also introduce basic components of hypertext transfer protocol, and web site deployment.

UXD 210 OR GD 200 is a prerequisite for this class.

**GD 150 | ILLUSTRATOR WORKSHOP | 2 quarter hours
(Undergraduate)**

This class will introduce students to the syntax, tools and methods of vector-based drawing using Adobe Illustrator. Topics and techniques covered during lectures will be reinforced through in-class exercises and projects. (2 quarter hours)

**GD 151 | PHOTOSHOP WORKSHOP | 2 quarter hours
(Undergraduate)**

This class will introduce students to the syntax, tools and methods of raster-based graphics and image editing/manipulation by using Adobe Photoshop. Topics and techniques covered during lectures will be reinforced through in-class exercises and projects. (2 quarter hours)

**GD 152 | INDESIGN WORKSHOP | 2 quarter hours
(Undergraduate)**

This class will cover fundamental typographic design and layout skills by using page layout software Adobe InDesign. Topics and techniques covered during lectures will be reinforced through in-class exercises and projects. (2 quarter hours)

**GD 153 | LETTERING WORKSHOP | 2 quarter hours
(Undergraduate)**

This course is an exploration of lettering techniques, both analog and digital. Students will experiment with historical and conceptual approaches to hand lettering. Both the formal and communicative uses of lettering will be studied. (2 quarter hours)

**GD 154 | ADVANCED CSS WORKSHOP | 2-2.25 quarter hours
(Undergraduate)**

A hands-on exploration of properties in the CSS3 specification. Students will explore advanced techniques such as pseudo-elements, complex shapes, pointer controls, keyframes and animation, and improved typographic controls. This class will also introduce techniques for device dependent styling. Previous experience with CSS and HTML is highly recommended. PREREQUISITE(S): None (2 quarter hours)

**GD 155 | HTML5 WORKSHOP | 2 quarter hours
(Undergraduate)**

This is a hands-on course in developing web pages and content using HTML5. In this course students will learn to create and edit web pages, applications, and/or games with HTML5 using text editors. The course will include weekly mixtures of lessons and exercises. (2 quarter hours)

**GD 156 | MEME WORKSHOP | 2-2.25 quarter hours
(Undergraduate)**

This course will provide an introduction to Memes: including history, theory, and evolution. Students will research how the democratization of digital tools allowed for memes to become a means of cultural communication and documentation of design, culture, and society on a global scale from self-help to humor, to politics and beyond. Additionally, students will study the importance of the re-purposed, re-appropriated, and re-used digital image as both a revolutionary and evolutionary design, as well as a piece of collected data for where it has traveled. This workshop includes lectures, discussions, critiques, presentations, hands-on activities, and lab (computer work) time and weekly assignments. Students will experiment with various tools for making memes: everything from open-source, free platforms to more traditional design software.

**GD 200 | GRAPHIC DESIGN: FORM | 4 quarter hours
(Undergraduate)**

This course introduces the principles and theories of graphic design. Processes and methodologies related to visual problem solving will be explored and techniques of visual design will be taught and incorporated into class projects. Projects will combine words, images and graphic elements to address design problems in meaningful ways that give your audience new understanding and experiences. Theories and visual movements will be examined through lectures and put into practice during class projects.

GD 105 or ART 105 or ANI 105 or GPH 211 is a prerequisite for this class

**GD 201 | INTRODUCTION TO VISUAL DESIGN RESEARCH | 4 quarter hours
(Undergraduate)**

This course introduces students to research methods used in design creative and professional practice. Theories, strategies and practical frameworks are studied in the preparation and creation of design artifacts.

**GD 205 | GRAPHIC DESIGN: CONCEPT | 4 quarter hours
(Undergraduate)**

This course introduces the process of ideation and conceptual problem solving in graphic design. Methodologies of research and iteration will be examined, with an emphasis on the role of analysis, conceptual thinking and visual production as the primary tasks of the graphic designer. Social and cultural considerations will be investigated through projects, exercises and lectures. Students will be introduced to strategies and tactics utilized to create design artifacts.

GD 105 or ART 105 or ANI 105 or GPH 211 is a prerequisite for this class

**GD 210 | DIGITAL ILLUSTRATION I | 4 quarter hours
(Undergraduate)**

Introduction to illustration development in image, line and photography, combining computer applications and hand-rendered approaches.

GD 105 or ART 105 or ANI 105 or GPH 211 is a prerequisite for this class

**GD 211 | INTERMEDIATE DIGITAL ILLUSTRATION | 4 quarter hours
(Undergraduate)**

Intermediate practice for illustration development in image, line and photography. Combining computer applications and hand-rendered approaches will be studied.

GD 105 or ANI 105 or ART 106 is a prerequisite for this class

**GD 215 | WEB DESIGN FOR COMMERCIAL PROJECTS | 4 quarter hours
(Undergraduate)**

This is a design-focused web class on intermediate concepts and techniques in the visual design, development and implementation of websites for commercial purposes. Students will use industry standard applications and design processes.

UXD 270 OR GD 110 is prerequisite for this class.

**GD 216 | WEB DESIGN FOR ARTISTS | 4 quarter hours
(Undergraduate)**

A design-focused web class that focuses on intermediate concepts and techniques in the visual design, development and implementation of websites for personal expression and artistic experimentation. Students will use industry standard design applications and some hand coding in HTML and CSS.

GD 110 or IT 130 or HCI 201 or ART 385 is a prerequisite for this class

**GD 217 | WEB INTERACTION WORKSHOP | 2-2.25 quarter hours
(Undergraduate)**

A hands-on introduction to integrating user activity into the visual language of web design. Students will learn fundamental skills necessary for basic interaction design, and will explore widely-adopted frameworks allowing them to capture events in the web browser, programmatically traverse a web page, and alter the design and content of a page based on the actions of the user. (2 quarter hours)

**GD 220 | HISTORIES OF DESIGN | 4 quarter hours
(Undergraduate)**

The history of design is an evolution in aesthetics, technology, style and visual communication. The class will encompass a survey of major movements in the field of design, notable designers and design materials. The nature of changing methods, materials, technologies and values are examined in the context of the social and political realities that shape communication. This course interrogates the diverse cultural definitions and functions of design across time and place. This introduction to broad movements in style and approach in global and diverse movements range from Western European and North American to essential intersections with Black, Latinx, and Asian movements acknowledging the historical exclusion of globally diverse artifacts, practices, practitioners and users.

**GD 221 | TRENDS IN CONTEMPORARY GRAPHIC DESIGN | 4 quarter hours
(Undergraduate)**

World movements in design and contemporary practice in print, web and experiential design.

GD 220 is a prerequisite for this class.

**GD 230 | TYPOGRAPHY: FORM | 4 quarter hours
(Undergraduate)**

This course introduces the principles and theories of graphic design. Processes and methodologies related to visual problem solving will be explored and techniques of visual design will be taught and incorporated into class projects. Projects will combine words, images and graphic elements to address design problems in meaningful ways that give your audience new understanding and experiences. Theories and visual movements will be examined through lectures and put into practice during class projects.

GD 105 or ART 105 or ANI 105 or GPH 211 is a prerequisite for this class

**GD 231 | TYPOGRAPHY IN MOTION | 4 quarter hours
(Undergraduate)**

Students explore different ways of transforming static form to moving, dynamic and dimensional form. Using both storytelling and abstraction, students will create typography sequences with intention, humor, and emotion. Students will work with appropriate software to create innovative and informative typographic design.

GD 230 OR GD 232 is a prerequisite for this class.

**GD 232 | TYPOGRAPHY: SYSTEMS | 4 quarter hours
(Undergraduate)**

This course is the study of the underlying formal principles that guide the use of typography in design. The study of the grid: how it is created and utilized as a means of organization and clarity will be examined through class projects and exercises. The use of micro- and macro-typographic principles will be put into practice and students will be introduced to multiple methodologies for organizing and utilizing typographic elements to create syntax.

GD 105 or ART 105 or ANI 105 or GPH 211 is a prerequisite for this class

**GD 250 | DESIGN STUDIO FIELD TRIP | 2 quarter hours
(Undergraduate)**

This 2-credit workshop offers field trips to design studios, allied fields workplace visits and relevant museums and gallery exhibitions. Students will research and study design studios in the Chicago area and attend networking events. Appropriate for Graphic Design, Interactive Media, Communication, and all other students interested in design and allied fields. Students will write a reflective paper after each trip. Be aware that there will be travel time before and after the class. (2 quarter hours)

**GD 260 | MOTION GRAPHICS | 4 quarter hours
(Undergraduate)**

This course will introduce the student to effective communication using motion graphics, including its application in the areas of film titles, broadcast and commercial design, interactive media, and gaming. The combination of music, visuals and typography will be explored following the basic theories of kinetic composition and aesthetics. Students will study the history of the field, including the work of pioneers such as Norman McLaren, Saul Bass and Len Lye.

Sophomore Standing and one of the following: ANI 105, ANI 101, GD 105, ART 105, GPH 211, DC 205 is a prerequisite for this class.

**GD 270 | SEMIOTICS AND VISUAL DESIGN | 4 quarter hours
(Undergraduate)**

Design and designed products can be interpreted as signs that are the result of human needs and desires. This course examines theoretical issues in how design of a message or product influences the user's decision to read it, use it or buy it. Semiotics theory examines these concepts as well as design value and criteria for evaluation in contemporary culture.

GD 200 OR GD 205 is a prerequisite for this class.

**GD 300 | GRAPHIC DESIGN: PROJECTS | 4 quarter hours
(Undergraduate)**

This course explores design problems in visual communication through word and image. Project content is largely based on the student's own research and writing. Analysis of meaning, structure, and communication to specific audiences is studied. Readings, design and writing projects in commercial graphic design and fine arts comprise the content of the course. Projects are graphic and expressionist in nature, structured to emphasize the relationship between form and content.

GD 200 and GD 230 are prerequisites for this class.

**GD 305 | INVESTIGATING THE MATERIAL GLITCH | 4 quarter hours
(Undergraduate)**

This course will investigate binary ideas fundamental to most design practice (good/bad, positive/negative, digital/analog) through the creation of images which are neither one nor the other—but fall into the space between, the space of a glitch. This course will use graphic printing-making methods as a tool to examine these ideas—including stencils, wood blocks, xerox transfers, and cyanotypes. Students will learn the technical aspects of each process. This course will be taught through discussion, critique, and studio work utilizing analog and digital drawing methods. There will also be instruction on the use of both the laser cutter and the CNC router in the DePaul makerspace.

GD 200 OR GD 205 is a prerequisite for this class.

**GD 315 | WEB DESIGN: ADVANCED PROJECTS | 4 quarter hours
(Undergraduate)**

This course will emphasize interactivity and professional presentation for advanced multimedia web sites for artistic and commercial projects. Advanced concepts and techniques in the visual design and implementation of web pages. Students will use industry standard web design applications and some hand coding in HTML and CSS.

GD 215 or GD 216 is a prerequisite for this class

**GD 330 | TYPOGRAPHY:PROJECTS | 4 quarter hours
(Undergraduate)**

This course is an advanced investigation into typography and text for verbal and visual expression. Analysis of meaning and structure, design composition, and communication to specific audiences is studied. Projects are both pragmatic (for example, textbook design), and expressionistic (found and constructed typographic compositions that are poetic and conceptual). Emphasis is placed on the study and creation of meaning in relation to audience, culture, and history. Some content is provided in certain projects and in others is largely based on the student's own research and writing.

GD 230 is a prerequisite for this class.

**GD 331 | HISTORY AND PRACTICE: FILM TITLE DESIGN | 4 quarter hours
(Undergraduate)**

This course combines the history of film title design examining the likes of the notorious title sequences of such graphic designers as Saul Bass in creating the Hitchcock movies through Stephen Frankfurt, Maurice Binder and Kyle Cooper's "Se7en." The study leads to the advanced practice of combining typography, graphics, and moving images to build professional projects for advertising design, web design, film design, game design and commercial ventures.

GD 230 and (ANI 260 or GD 231) are prerequisites for this class

**GD 332 | DESIGN FUTURES | 4 quarter hours
(Undergraduate)**

This course will provide an introduction to Design Futures (also called Design Fiction, Speculative Design and Critical Design): including history, theory and methods for speculation, design fiction, business strategy and appropriate elements of visual narrative and storytelling to showcase ideas, strategy, and foresight. How are futures imagined, prototyped and created over time? Where, how and for whom are futures being considered? Who is included and excluded? Where are opportunities to create alternative futures, and how might a designer engage and contribute? How can a designer consider and engage in future ethics in various phases of the design creation and product lifecycle? This course includes lectures, discussions, critiques/presentations, hands on activities, and lab (computer work) time and weekly assignments. Students will be expected to research, write, design and document their work. Hands-on making (studio work) will engage a range of approaches from business, art, tech, and design as a means to bring possible futures narratives to life, while the weekly readings and discussions will provide background for analysis of the studio work. Students will engage with emerging technology and future ethics including AR, digital fabrication, sensory design, and AI, among others through the lens of Graphic Design.

GD 200 AND GD 230 are prerequisites for this class.

**GD 338 | DIGITAL TYPEFACE DESIGN | 4 quarter hours
(Undergraduate)**

The course is an introduction to the formal, technical, and historical foundations of typeface design. Students will use a combination of analog and digital methods to explore the design of letterforms, numerals, and supporting material such as punctuation and diacritics in the production of usable digital fonts.

GD 230 AND GD 150 are prerequisites for this class.

**GD 340 | PUBLICATION DESIGN | 4 quarter hours
(Undergraduate)**

Design of multiple page documents: magazines, catalogs, and annual reports. Emphasis placed on research methodology, conceptual approach and audience. Knowledge of computer applications and typography are assumed.

GD 200 and GD 230 are prerequisites for this class.

**GD 341 | BOOK MAKING AND BINDING WORKSHOP | 2-2.25 quarter hours
(Undergraduate)**

This is an introductory course covering the basic principles of hand bookbinding including theories of book structure, review of paper information and bookbinding materials. The class will be a mixture of demonstrations and practical exercises, and each student will produce a variety of books and structures. (2 quarter hours)

GD 105 is a prerequisite for this class.

**GD 350 | PORTFOLIO WORKSHOP | 2-2.25 quarter hours
(Undergraduate)**

Students review previous course projects and prepare a final portfolio as well as their own design identity and a resume in preparation for job interviews and/or graduate school. Visiting design professionals will present their work to the class and share their experiences in the field. Students will also learn presentational techniques and methods for career development. (2 quarter hours)

GD 200, GD 210 and GD 230 are prerequisites for this class.

**GD 355 | PACKAGING DESIGN | 4 quarter hours
(Undergraduate)**

This course defines the role of packaging in product identification, presentation, and production. Projects will introduce the process of designing the graphic and physical forms of packaging design. Students will create 3-dimensional, physical packages including 2-dimensional branding, graphic and photographic image development. The materials of production, and consideration of user and market inherent in all commercial projects are covered, including the client's needs and desires in the market place.

GD 200 and GD 230 are prerequisites for this class.

**GD 356 | LOGO, BRANDING, AND VISUAL IDENTITY | 4 quarter hours
(Undergraduate)**

The course provides students with an understanding of methodologies and strategies used for logo development, branding, and visual identity. In this course, students will work on, in extended projects, exploring identity systems with various forms such as logo, stationary, packaging, signage, print and web design.

GD 200 and GD 230 are prerequisites for this class.

**GD 360 | ADVERTISING DESIGN | 4 quarter hours
(Undergraduate)**

Explores the function and practice of design in advertising in both social and art historical contexts. This course engages practical real life projects as well as projects that explore cultural and artistic practices.

GD 200 and GD 230 are prerequisites for this class.

**GD 365 | ADVANCED MOTION GRAPHICS | 4 quarter hours
(Undergraduate)**

This course builds on motion graphics fundamentals covered in ANI260 Motion Graphics. In Advanced Motion Graphics, students will work to develop a better understanding of how to develop a distinct visual style in both personal work and in work for clients. The course also focuses on gaining familiarity with contemporary styles and trends in professional motion graphics, and an awareness of Chicago-based motion graphics production.

ANI 260 is a prerequisite for this class.

**GD 380 | STRATEGY AND DESIGN WITH COMMUNITY CLIENT | 4 quarter hours
(Undergraduate)**

This course enables students to work from start to finish on client-based graphic design and projects. Students establish working relationships as individuals and in teams that utilize their skills to effectively evaluate the communication needs of an organization or business, develop design solutions that fulfill those needs, and negotiate the process between designers and clients. Objectives of the course include: improving student's developing design skills to an advanced level, creating awareness of current design trends, supporting student's development of independent working habits, utilizing integration of both hand-skills and the computer as design tools, and completing professional projects after staged client feedback and revisions.

GD 300 OR GD 330 is a prerequisite for this class.

GD 381 | GRAPHIC DESIGN PORTFOLIO DEVELOPMENT | 4 quarter hours (Undergraduate)

This course provides the student with an opportunity to prepare themselves for the workplace. During the course, students will refine a body of design work and publish their portfolio in both print and web formats. Students will design and develop their own visual identity, resume, cover letter, and business cards in preparation for job interviews and/or graduate school. They will also spend the quarter researching potential employers and learn about each company, agency, and/or studio so that they can strategically tailor their application process.

GD 110, GD 210 and GD 300 are prerequisites for this class.

GD 390 | SPECIAL TOPICS IN GRAPHIC DESIGN | 1-4.5 quarter hours (Undergraduate)

Specific topics selected by the instructor. Topic varies with each offering. Contact instructor for more information. Prerequisite(s): See syllabus.

GD 394 | CAPSTONE PROJECT I | 4 quarter hours (Undergraduate)

This two course sequence provides a Graphic Design-specific capstone experience for the student. The capstone course will connect the students' Graphic Design course work with the University courses s/he has taken through three components: student-generated design proposals, class/instructor discussions, and the actual creation/production of the student's proposal. The production piece is the primary focus of this course that takes place over two quarters.

(GD 300 OR GD 330) AND Senior Standing are prerequisites for this class.

GD 395 | CAPSTONE PROJECT II | 4 quarter hours (Undergraduate)

This two course sequence provides a Graphic Design-specific capstone experience for the student. The capstone course will connect the student's Graphic Design course work with the University courses s/he has taken through three components: student-generated design proposals, class/instructor discussions, and the actual creation/production of the student's proposal. The production piece is the primary focus of this course that takes place over two quarters.

GD 394 is a prerequisite for this class.

GD 399 | INDEPENDENT STUDY | 1-8 quarter hours (Undergraduate)

Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable credit. Prerequisite(s): Instructor and dean approval.

GD 400 | GRAPHIC DESIGN STUDIO | 6 quarter hours (Graduate)

Working closely with a faculty advisor, and guided by feedback from both faculty and peers, students will engage in a series of self-directed and wide-ranging design projects enhancing the breadth and depth of the skill set that they bring to the program. Students will also broaden their design practice and the cultural, political, social, and environmental impact of their work as designers. This series provides students the means to craft a strategy for their design thesis which will be the focus of year two.

GD 410 | DESIGN: RESEARCH, WRITING, MAKING DESIGN | 4 quarter hours (Graduate)

This course examines graphic design as a nexus among research methodology, writing and creative practice. Theories, strategies and practical frameworks will be explored as they relate to the culture and practice of contemporary design. This course is intended as a launch pad for students to engage in a process of critical inquiry into contemporary and historical design culture and to engender in them a fundamental value for intellectual activity as a defining component of their practice.

GD 420 | TYPOGRAPHIC COMMUNICATION | 4 quarter hours (Graduate)

The use of typography as a primary form of communication. This course will study the advanced theories of letterforms, type design, usability, legibility and complex grid structures. The course will also emphasize the study of human behavior, perception, biases, and preferences as it relates to the use and application of typography. Cultural implications within typographic practice will be explored. Elements of professional and academic theory will be applied to student projects.

GD 501 | GRAPHIC DESIGN THESIS PREP | 6 quarter hours (Graduate)

In collaboration with faculty advisors and peers, students begin an intensive development on their thesis proposal, working to define an area of study, articulate personal and professional goals, and generate a formal body of work and a written component into an edited and synthesized whole. A thesis project is an original body of work that reflects an increasing focus and considered view on a particular theme or topic accompanied by a written component that encapsulates and articulates the central ideas of the thesis and traces the progression and development of the thesis project. Critical theory, history, and reflection upon acquired knowledge are integrated as a part of this reflective process with an emphasis on specific objectives and clarity of outcomes in writing and physical output.

GD 502 | GRAPHIC DESIGN THESIS STUDIO | 6 quarter hours (Graduate)

Working closely with a faculty advisor, and guided by feedback from both faculty and peers, students will engage in a self-directed, design project and written thesis. Through further developing a design practice that values making, collaboration, writing, critique, and research-based inquiry, and driven by a thesis question developed during Design thesis prep, students are expected to investigate the designer's role in the creation of meaning. Both a complete written thesis and final design documents will be required for completion.

GD 510 | DESIGN LEADERSHIP | 4 quarter hours (Graduate)

Design Leadership is defined as relationship to a team, building and nurturing a creative space marked by psychological safety so the most innovative ideas may grow into solutions for whatever questions and tasks face the team. The team includes different kinds of designers, photographers, researchers, artists, strategists, and members of collaborating client teams in their various roles. Managing these dynamics with support and an environment of innovation and creative collaboration is essential. This course studies and practices all aspects of this world through theory, methodologies and practice in team building in the classroom among students and faculty, and with clients or community partners where possible and appropriate. The course will be run as a topics course to bring in different and timely perspectives.

GD 520 | TOPICS SEMINAR | 4 quarter hours (Graduate)

Specific topics selected by the instructor. Topic varies with each offering. Contact instructor for more information.

Greek (GRK)

GRK 101 | BASIC CLASSICAL GREEK I | 4 quarter hours (Undergraduate)

Basic Classical Greek 101 is the first ancient Greek reading course. It introduces students to the basics of the language of the ancient Athenians, Attic Greek, which includes the Greek alphabet, pronunciation and the beginnings of Greek grammar. Students will begin to develop reading and writing skills as they encounter small passages of ancient Greek text, the standard method for learning this ancient tongue being partly memorization and partly language immersion. Students will be expected to read through small passages of ancient Greek, but not without assistance. This course focuses primarily on syntax, grammar and memorization of paradigms, yet students also translate ancient Greek as they proceed, learning rudiments of the language as well as cultural aspects of the ancient Greeks at varying epochs.

GRK 102 | BASIC CLASSICAL GREEK II | 4 quarter hours (Undergraduate)

Basic Classical Greek 102 is the second ancient Greek reading course. It introduces students to the basics of the language of the ancient Athenians, Attic Greek, which includes the Greek alphabet, pronunciation and the beginnings of Greek grammar. Students will begin to develop reading and writing skills as they encounter small passages of ancient Greek text, the standard method for learning this ancient tongue being partly memorization and partly language immersion. Students will be expected to read through small passages of ancient Greek, but not without assistance. This course focuses primarily on syntax, grammar and memorization of paradigms, yet students also translate ancient Greek as they proceed, learning rudiments of the language as well as cultural aspects of the ancient Greeks at varying epochs.

GRK 103 | BASIC CLASSICAL GREEK III | 4 quarter hours (Undergraduate)

Basic Classical Greek 103 is the third ancient Greek reading course. It introduces students to the basics of the language of the ancient Athenians, Attic Greek, which includes the Greek alphabet, pronunciation and the beginnings of Greek grammar. Students will begin to develop reading and writing skills as they encounter small passages of ancient Greek text, the standard method for learning this ancient tongue being partly memorization and partly language immersion. Students will be expected to read through small passages of ancient Greek, but not without assistance. This course focuses primarily on syntax, grammar and memorization of paradigms, yet students also translate ancient Greek as they proceed, learning rudiments of the language as well as cultural aspects of the ancient Greeks at varying epochs.

GRK 104 | INTERMEDIATE CLASSICAL GREEK I | 4 quarter hours (Undergraduate)

Intermediate Ancient Greek is an introduction to ancient Greek poetry. This course will give students a review of grammar and forms along with reading exercises. Students concentrate on reading large sections of text in an effort to derive meaning and historical significance from the meter and the meaning of the ancient language. Continued drill on forms and reading for comprehension are the tools used by students. Students will be expected to read through passages of ancient Greek with relative dexterity, and they will begin to parse through the texts in class in order to inculcate the skills of navigating entire texts. Students begin to develop affinity for specific authors from the poetic tradition of the ancient Greeks. They shall have the opportunity to choose a specific work or poet in order to gain at least an introductory exposure to what may become their unique interest in the ancient world. This course emphasizes the completion of poems in order that the student becomes more comfortable with the ancient language. This course is a must for students of history, especially that of the western tradition, and it is imperative for the student interested in remaining capable of translating even the simplest ancient Greek passages. Greek 103 or equivalent, including placement test or permission of instructor, is recommended.

GRK 105 | INTERMEDIATE CLASSICAL GREEK II | 4 quarter hours (Undergraduate)

Intermediate Ancient Greek is an introduction to ancient Greek poetry. This course will give students a review of grammar and forms along with reading exercises. Students concentrate on reading large sections of text in an effort to derive meaning and historical significance from the meter and the meaning of the ancient language. Continued drill on forms and reading for comprehension are the tools used by students. Students will be expected to read through passages of ancient Greek with relative dexterity, and they will begin to parse through the texts in class in order to inculcate the skills of navigating entire texts. Students begin to develop affinity for specific authors from the poetic tradition of the ancient Greeks. They shall have the opportunity to choose a specific work or poet in order to gain at least an introductory exposure to what may become their unique interest in the ancient world. This course emphasizes the completion of poems in order that the student becomes more comfortable with the ancient language. This course is a must for students of history, especially that of the western tradition, and it is imperative for the student interested in remaining capable of translating even the simplest ancient Greek passages. Greek 104 or equivalent, including placement test or permission of instructor, is recommended.

**GRK 106 | INTERMEDIATE CLASSICAL GREEK III | 4 quarter hours
(Undergraduate)**

Intermediate Ancient Greek is an introduction to ancient Greek poetry. This course will give students a review of grammar and forms along with reading exercises. Students concentrate on reading large sections of text in an effort to derive meaning and historical significance from the meter and the meaning of the ancient language. Continued drill on forms and reading for comprehension are the tools used by students. Students will be expected to read through passages of ancient Greek with relative dexterity, and they will begin to parse through the texts in class in order to inculcate the skills of navigating entire texts. Students begin to develop affinity for specific authors from the poetic tradition of the ancient Greeks. They shall have the opportunity to choose a specific work or poet in order to gain at least an introductory exposure to what may become their unique interest in the ancient world. This course emphasizes the completion of poems in order that the student becomes more comfortable with the ancient language. This course is a must for students of history, especially that of the western tradition, and it is imperative for the student interested in remaining capable of translating even the simplest ancient Greek passages. Greek 105 or equivalent, including placement test or permission of instructor, is recommended.

**GRK 197 | SPECIAL TOPICS IN GREEK | 4 quarter hours
(Undergraduate)**

See schedule for current offerings.

**GRK 198 | STUDY ABROAD | 1-8 quarter hours
(Undergraduate)**

Variable credit.

**GRK 199 | INDEPENDENT STUDY | 0.5-8 quarter hours
(Undergraduate)**

Variable credit.

**GRK 297 | SPECIAL TOPICS IN GREEK | 4 quarter hours
(Undergraduate)**

See schedule for current offerings.

**GRK 298 | STUDY ABROAD | 1-8 quarter hours
(Undergraduate)**

Variable credit.

**GRK 299 | INDEPENDENT STUDY | 0.5-8 quarter hours
(Undergraduate)**

Variable credit.

**GRK 395 | FOREIGN LANGUAGES ACROSS THE CURRICULUM | 2 quarter hours
(Undergraduate)**

The two credit FLAC course allows students to enrich their experience in the co-required course primarily through added reading and writing activities in Ancient Greek. Students must have the equivalent of 106 or higher ability in Ancient Greek to take this two credit component. Please contact the Department of Modern Languages if you have questions about this course or about language placement.

**GRK 397 | SPECIAL TOPICS IN GREEK | 4 quarter hours
(Undergraduate)**

See schedule for current offerings.

**GRK 398 | STUDY ABROAD | 1-8 quarter hours
(Undergraduate)**

Variable credit.

**GRK 399 | INDEPENDENT STUDY | 0.5-8 quarter hours
(Undergraduate)**

Variable credit.

(Graduate)**

See schedule for current offerings.

**GRK 498 | STUDY ABROAD | 1-8 quarter hours
(Graduate)**

Variable credit.

**GRK 499 | INDEPENDENT STUDY | 4-8 quarter hours
(Graduate)**

Variable credit.

Health Communication (HTHC)

**HTHC 515 | INTRO TO HEALTH COMMUNICATION | 4 quarter hours
(Graduate)**

Because of the increasing degree of health consciousness in our society, individuals not only interact more frequently with health care providers, but health care organizations play more active roles in their surrounding communities. In addition, health care cultures are changing. Health care organizations play active social and political roles when responding to national health issues or crises. Hence, it is important that we, as consumers of health care, understand the communication challenges that are inherent within health care organizations, and how those can impact the effectiveness of our communication as a participant in health care contexts.

Status as a College of Communication Graduate Student or Health Informatics Student or department consent is a prerequisite for this class

**HTHC 516 | RESEARCH METHODS FOR HEALTH CARE PRACTITIONERS | 4 quarter hours
(Graduate)**

This course focuses on health care methodologies relevant to health care administration, including a cross-section of both qualitative and quantitative methodologies; designing questionnaires and surveys; the analysis and presentation of survey data; interviewing strategies; and the analysis and presentation of qualitative data. Students will also be provided with skilled technical writing assignments geared toward providing an understanding of how to most effectively present data within the contexts of reports, visuals for meeting or memoranda.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

**HTHC 517 | COMMUNICATION, HEALTH DISPARITIES, AND CULTURE | 4 quarter hours
(Graduate)**

The U.S. Department of Health and Human Services recognizes the role of communication in addressing health disparities. Health literacy (the process of obtaining, processing and understanding basic health information), for example, differs widely across cultural and other demographic identity markers. This course examines the role of communication in health literacy, health disparities, and cultural differences in approaches to health. (Previously HTHC 517 Health Care Literacy).

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

HTHC 519 | ASSESSMENT AND INTERVENTION FOR HEALTH CARE ADMINISTRATORS | 4 quarter hours**(Graduate)**

Health care practitioners must acquire management consulting skills necessary to identify areas in need of change within health care organizations. Problem identification, data collection, intervention and implementation phases of assessment and intervention are taught from the perspective of the health care organization. The course probes common management problems in health care, internal working relationship challenges as well as organizational structure issues that arise.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

HTHC 520 | HEALTH CARE CAMPAIGNS AND COMMUNITY ACTION | 4 quarter hours**(Graduate)**

This course will focus on the use of communication strategies to inform and influence individual and community decisions regarding health in the following contexts: the multidimensional nature of health communication; understanding empirical research in health communication; behavioral theories in health communication; rhetorical theories in health communication; legal and ethical concerns in health communication; the communication of risk and uncertainty; and the design of health campaigns.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

HTHC 521 | HEALTH AND FAMILY COMMUNICATION | 4 quarter hours**(Graduate)**

The course, Family and Health Communication, addresses health-related issues that families may experience, while situating them within a theoretical context. Using theories such as Family Systems Theory and Communication Privacy Management Theory, this course will take a Lifespan Approach to better understand family health issues. Some of the topics that will be covered in this course may include care giving responsibilities, long-term disease, disability, addiction, psychological disruption, sexual health, and end of life issues as affects the family system. Cultural and social norms, in addition to public and health policies are also addressed, as they provide insight into the larger scope of understanding family and health communication, as ultimately, the health of family members impact the functioning of the family system.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

HTHC 523 | TOPICS IN HEALTH COMMUNICATION | 4 quarter hours**(Graduate)**

Topics will include: Gay, Lesbian and Transgender Health Care Issues, Patient Advocacy, Communication and Constraint, Multicultural Communication in Health Care Contexts and Advance Care Planning. For a detailed course description, click the course link and view the Class Notes in the Enrollment Information tab.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

HTHC 524 | HEALTH CARE TEAMS & LEADERSHIP | 4 quarter hours**(Graduate)**

Modern organizations are increasingly interested in shifting their organizational structures towards the goal of creating self-managed work teams. Much of the health care delivery system is already structured formally or informally around the team concept, whether these be surgery teams, consulting office staff, or other health and wellness delivery personnel. Therefore, those pursuing a career in health care greatly benefits from knowledge and experience with two interdependent aspects of group dynamics: decision-making under conditions of uncertainty, and the philosophy and practice of developing groups into self-managed teams. This course will combine a lecture/discussion with a teamwork intensive action learning component towards the goal of making the student competent to either create or optimize the results of self-managed work teams in their own organization (if called upon to do so), or to understand and thrive in this work mode without stress.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

HTHC 525 | NARRATIVES IN HEALTH CARE | 4 quarter hours**(Graduate)**

Focusing on the performance and narrative paradigms of communication studies, the course will survey uses of performance and narrative methods to consider health communication relationships. Narrative and narrative performance are sites of health communication issues for marginalized populations, difficult conversations, and alternate means of reporting. For example, narrative and narrative performance are increasingly being used as part of medical curriculum, as a means to train health care professionals to understand the experiences of their patients, encourage deep listening, and foster different professional-patient relations. For cancer, HIV/AIDS, and other patients, performance becomes a means of speaking into mainstream and dominant discourses of health and to actively shape discourses from their own subjectivities. This increases the visibility of health care experiences in their gendered, sexualized, and racialized dimensions. Finally, narrative and narrative performance offers an additional means of visibility in catalyzing change in public, legislative, scholarly and relational arenas.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

HTHC 526 | SOCIAL CONSTRUCTION OF HEALTH AND ILLNESS | 4 quarter hours**(Graduate)**

Beginning with foundational theories and principles of social construction, the course examines cases illustrating socially-constructed features of healthcare. We discuss (a) medicine as a gendered and hierarchical institution, (2) specialized languages used to describe/construct specific illnesses (e.g. anorexia and obesity, addiction, depression, HIV/AIDS), and (3) how constructed realities become internalized through primary and secondary socialization within the family, through media, and through encounters with the health care system.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

**HTHC 592 | INDEPENDENT STUDY | 4 quarter hours
(Graduate)**

Students will be guided in the development of a special project that furthers their collaboration with an instructor and produces a report that demonstrates their mastery of critical content and competencies. The independent study option is intended for students who have demonstrated a mastery of course content, who would benefit from a sustained, focused collaboration with a relevant faculty member.

Status as a Graduate Health Communication student and Director consent is a prerequisite for this class.

**HTHC 599 | RESEARCH THESIS | 4 quarter hours
(Graduate)**

Enroll in 599 during the term you plan to defend your thesis or complete your final project. This is a graded, 4-credit hour course. Tuition is charged. You must have a scheduled defense/completion date to be approved for this class. Your thesis/project advisor needs to communicate this date to the Graduate Studies Director for your program, before you are allowed to enroll. Loan deferment is allowed to those registered for this class.

Status as a Graduate Health Communication student and Director consent is a prerequisite for this class.

**HTHC 601 | ACTIVE DEGREE COMPLETION | 0 quarter hours
(Graduate)**

This is a 0-credit hour course that is available to students who are working actively toward the completion of a thesis or project. Enrollment in this course is limited to the two quarters prior to the defense of the thesis/project and requires thesis/project advisor and graduate director approval and proof of work each quarter. Enrollment in this course allows access to the library and other campus facilities. This course carries half-time enrollment status and eligibility for loan deferment and student loans. This course is graded as pass/fail. (0 credit hours)

Graduate HTHCM students

**HTHC 602 | CANDIDACY CONTINUATION | 0 quarter hours
(Graduate)**

This is a 0-credit hour course that requires permission from the graduate director. Students can enroll in this course if they are finishing a course in which they received an incomplete (IN) and are not registered for any other regular credit-bearing courses in the quarter they plan to finish the incomplete. Enrollment in this course is limited to the two quarters following the quarter of the original incomplete (IN) grade. Enrollment in this course allows access to the library and other campus facilities. This course does not carry any enrollment status. Students enrolled in this course are not eligible for loan deferment or student loans. This course is not graded. (0 credit hours)

Graduate HTHCM students

Health Information Technology (HIT)

**HIT 421 | HEALTH INFORMATICS | 4 quarter hours
(Graduate)**

This course provides an overview of fundamental concepts of information management including the information that healthcare organizations generate and use, the importance of data quality, and external factors that impact healthcare data management. The curriculum will also examine information systems (i.e., the arrangement and interaction of information, processes, people, and technology) as well as system standards and security issues. Finally, special consideration will be given to management, responsibilities and challenges in aligning information technology (IT) planning with an organization's strategic planning as a means to create competitive advantage.

**HIT 422 | SYSTEM DESIGN FOR HEALTH CARE | 4 quarter hours
(Graduate)**

Course focus is on systems design for health care that enhances quality of patient care and satisfaction, staff efficiency, and improving patient outcomes. Specific topics include: database design; interface and dialogue design in the context of workflow; usability and human factors; report design; system implementation; and system maintenance. PREREQUISITE(S): None.

**HIT 430 | ELECTRONIC HEALTH RECORDS | 4 quarter hours
(Graduate)**

Comprehensive overview of principles and practices of Electronic Health Records (EHR) management, including data standards and integration, interoperability and information exchange models, data security, and privacy.

**HIT 440 | HEALTH INFORMATION EXCHANGE AND NETWORKING | 4 quarter hours
(Graduate)**

Course discusses electronic health information systems and their design, implementation and application including information security, privacy and integrity, data exchange standards, basic principles of telecommunications and infrastructure security, and discussion of challenges of adopting HIE systems.

**HIT 451 | ACCOUNTING AND FINANCIAL MANAGEMENT IN HEALTHCARE | 4 quarter hours
(Graduate)**

This course is intended to prepare the student to effectively interact with accounting and financial management staff and participate in various aspects of financial control and planning. The curriculum provides an historical perspective of financial management in healthcare, identifying trends in the industry and the forces that influence the financing of healthcare organizations. Financial statements, the interpretation and analysis of financial reports, and topics such as cost-benefit analysis, budgeting, and capital management will also be addressed. Consideration will be given to the cost effectiveness and financial future of healthcare organizations.

HIT 421 or HIT 422 is a prerequisites for this class.

**HIT 511 | HEALTHCARE MANAGEMENT IN NON-HOSPITAL SETTINGS | 4 quarter hours
(Graduate)**

While the hospital is the centerpiece of the healthcare system, so much healthcare is delivered outside this setting. Students will be introduced to many healthcare services outside the traditional setting of the hospital and gain knowledge of the operations of such healthcare settings. The course will be divided into four parts: Traditional care, Diagnosing, Acute-Care Treatment, and Chronic Care and within each area students will explore the basic settings such as outpatient clinics and surgical centers, pharmacies, outpatient laboratories, chiropractic centers, and adult day care, and hospice care. Prerequisite(s): Status as a Health Informatics student is a prerequisite for this class.

**HIT 515 | HEALTHCARE LAW | 4 quarter hours
(Graduate)**

This course reviews the American legal system as the context within which to consider contemporary medico-legal issues. The courses intent is to provide a legal framework where healthcare management issues can be explored in collaboration with legal counsel. The curriculum addresses such topics as: professional liability, corporate entity risk considerations, and relevant legislative activities reshaping the healthcare industry and tort reform initiatives. Case studies will augment the legal theories presented in the course. Prerequisite(s): Status as a Health Informatics student is a prerequisite for this class.

HIT 590 | TOPICS IN HEALTH INFORMATICS | 4 quarter hours (Graduate)

Advanced study focusing on a specific area of health informatics each quarter. May be repeated for credit. **PREREQUISITES:** Instructor consent required.

Health Science (HLTH)

HLTH 120 | EXPLORING THE HEALTH SCIENCES | 2-4 quarter hours (Undergraduate)

This course explores the growing and complicated landscape of the health professions. Students will explore a board range of careers available to people interested in the health of communities and individuals, helping them to identify their own skills, interests, and values. Designed for students in all majors who are interested in exploring a professional interest in health sciences, this course will include aspects of self-assessment and career exploration, health industry research, and connecting with individuals in the field. (2 quarter hours)

HLTH 133 | PREPARING FOR APPLICATION TO HEALTH PROFESSIONS | 2 quarter hours (Undergraduate)

The course is designed for DePaul students who are planning to apply in the current year to a graduate-level health professional program including dental, medicine, optometry, veterinary medicine, physician assistant, physical therapy, and podiatry. This course is especially helpful for students planning to participate in the Pre-Health Advising Committee during the current academic year. The goal for this course is to provide students with information about what applying to professional school will entail along with providing students an opportunity to prepare documents for their application. Class-time will include discovering student's interest in a clinical profession, learning how to articulate personal fit with their health profession of interest, creating a personal statement, mock interviews, and learning how to identify criteria for choosing target schools. To enroll, students must meet Pre-health Advising Committee eligibility.

HLTH 140 | MEDICAL TERMINOLOGY | 2 quarter hours (Undergraduate)

This course introduces the student to the specialized vocabulary of the Health Care environment. Terminology used in medical professions will be learned with an emphasis on understanding word roots and building vocabulary. Through studying each system of the body, terminology will be associated with specific anatomy, physiology, functions and minimal pathology of the human body. (2 quarter hours)

HLTH 150 | DISCOVERING DISEASE: SMALL POX, HIV, AND ZIKA | 4 quarter hours (Undergraduate)

This course will introduce students to science as a way of knowing through the examination of three viral diseases: Small Pox, HIV/ AIDS and the Zika virus. In each case we will start by examining early understandings of the illness and then build towards a general biological theory of disease. Specifically, we will study the key observations that were made, and the evidence that was gathered in order to construct a theory of these three diseases that could then be translated into medical treatments. Special attention will be paid to the significant missteps that occurred as scientists struggled to understand the nature of these diseases. A key assumption of this course is that the dead ends and wrong turns encountered during the scientific process are a crucial component of scientific discovery. Each section will conclude with an overview of the most current scientific knowledge of the disease, including current treatments and prevalence levels around the world.

HLTH 194 | HUMAN PATHOGENS AND DEFENSE | 4 quarter hours (Undergraduate)

This course will introduce students to the diverse microorganisms that cause significant disease within the human population. The biological basis of infectious disease will be explored with a focus on the mechanisms of viral and bacterial infection and spread. The principles behind tools used combat infection will be examined, including antiseptics, antibiotics/antivirals, and vaccination. The course also will profile how the human microbiome promotes health. The course is not appropriate for students who have taken BIO 210. Students practice standard microbial techniques in the laboratory, including bacterial culture, microscopy, antimicrobial testing, and species identification.

A grade of C- or higher in BIO 191 is a prerequisite for this class.

HLTH 195 | HUMAN FORM AND FUNCTION | 4 quarter hours (Undergraduate)

This course provides a foundation for studying biological functioning of the human organism. Students will explore the basic principles of chemistry, cellular and molecular biology, and human genetics. In addition, we will examine the integral relationship between form and function that has evolved into the human body, with particular attention paid to the investigation of tissue organization, the biology of movement, and critical organ systems (nervous, endocrine, cardiovascular, and urinary). Related topics in human health and disease will also be discussed. Students practice standard microbial techniques in the laboratory, including bacterial culture, microscopy, antimicrobial testing, and species identification.

A grade of C- or higher in BIO 191 is a prerequisite for this class.

HLTH 200 | FOUNDATIONS OF HEALTH SCIENCES | 4 quarter hours (Undergraduate)

This course introduces students to the B.S. in Health Sciences undergraduate program. Students will become familiar with the foundations of Health Sciences from biomedical, public health, historical, and political perspectives, and how each contributes to our understanding of human health and illness. Students will learn research methodologies applied to Health Sciences, as well as develop the skills to critically assess the results and implications of health research to critically consider the evidence base of health, medicine, and science. Upon completion of the course students will have developed skills and understanding that will serve as a foundation for the remainder of their coursework.

HLTH 201 | INTRODUCTION TO HEALTH SCIENCE | 4 quarter hours (Undergraduate)

This course introduces students to the B.S. in Health Sciences undergraduate program. The course aims to introduce students to the range of disciplines (biological, sociological, psychological, and political) found within the health sciences, and how each contributes to our understandings of human health and illness. This will allow the students to better understand the nature of health care delivery and the methods that will best improve the health status of both individuals and the population.

HLTH 202 | HEALTH RESEARCH LITERACY | 4 quarter hours (Undergraduate)

The purpose of this course is to provide students the methodology and skills required for literacy in health, and to comprehend the results of health sciences research. In this course students seeking careers in the health sciences will go beyond the health literacy level suggested for the general public in preparation for professional practice in clinical, policy, administrative, and basic science fields.

HLTH 201 is a prerequisite for this class.

HLTH 210 | INTRODUCTION TO PUBLIC HEALTH | 4 quarter hours (Undergraduate)

This course is designed to lay out the concepts, principles, and case outcomes of public health practice. It considers community health data source, classical intervention approaches, and the planning and evaluation of community health interventions.

HLTH 200 or 202 is a prerequisite for this class.

HLTH 218 | PUBLIC HEALTH SCHOLARS BOWL TEAM | 2-4 quarter hours (Undergraduate)

Students will research, prepare presentations about, and discuss public health topics such as the scourge of health disparities, the nuances of health education and promotion, and how to solve epidemiological mysteries. Students will also hone their quiz bowl skills through internal class practice rounds and complete out-of-class practice through online quizzes. The quarter culminates with student case study presentations based on the previous competition year's case study topic such as sleep disorders among college students and global health issues that can be tackled by student-led initiatives.

HLTH 220 | INTRO TO OCCUPATIONAL THERAPY | 4 quarter hours (Undergraduate)

Broad over view of the profession of occupational therapy (OT). Students will learn about the wide variety of places occupational therapists (OTs) work and the diverse populations OTs work with. Particular focus will be spent on the occupational therapy practice areas: children & youth, health & wellness/adults, productive aging, rehab & disability, work & industry, intellectual disabilities, mental health, and assistive technology. This course will provide students an on-line shadowing experience and specific information for applying to OT graduate programs.

HLTH 229 | ETHICS FOR HEALTH SCIENCES | 4 quarter hours (Undergraduate)

This course provides an introduction to the ethical and moral theories that frame our response to fundamental issues in the health sciences. Moral philosophers, such as Aristotle, Thomas Aquinas and Immanuel Kant, all pose questions about the nature of right and wrong, and what is meant by a good life. The first part of the course examines the work of these philosophers and then uses them in order to think through specific topics, including: confidentiality, informed consent and end of life decision-making; health care disparities and health care reform; and global health ethics. Students who have taken REL 229 Medicine, Ethics, and Society, or PHL 229 Biomedical Ethics should not enroll in this course.

HLTH 230 | FUNDAMENTALS OF HEALTH EDUCATION | 4 quarter hours (Undergraduate)

This course provides health education majors with a foundational understanding of the professional health education field. Students will examine health education's role in planning, implementing, and evaluating the behavioral health challenges that affect the wellbeing of individuals and communities. Students will learn and then practice designing and delivering a wide range of health education activities, grounded in behavioral change theories, in a variety of settings and to diverse audiences. Finally, students will critically examine these issues through a variety of academic experiences, including academic service in a community setting, in order to identify and apply health education practices and principles that contribute to health promotion and disease prevention.

HLTH 236 | GAY MEN'S HEALTH MATTERS | 4 quarter hours (Undergraduate)

The purpose of this course is to introduce students to health issues relevant to gay men. We will explore the effects of minority status, heterosexism, and homophobia on gay men's health, including but not limited to STD/HIV/AIDS, substance use and mental health. Students will review epidemiological data, theoretical frameworks, and community-based health promotion approaches in order to gain a broad perspective on risk and resilience factors, health indicators, and strategies for self-care applicable to gay men's health.

HLTH 240 | HEALTH STATISTICS | 4 quarter hours (Undergraduate)

This course will introduce the basic principles and procedures of statistics as commonly used in health sciences. The course will cover statistical methods for single variable or multivariate, quantitative, and categorical data sources. The main goal is to prepare students to interpret health data, analyze data using the correct analytical methods, and present the findings in a way that is accessible to the public. In addition, this class will focus on literature review and critical evaluation through article critiques. Finally, students will be introduced to the computer based analytical software SPSS for beginner level data analysis and interpretation.

MAT 100, MAT 101 or equivalent or higher is a prerequisite for this class.

HLTH 250 | HEALTH CARE POLICY IN THE UNITED STATES | 4 quarter hours (Undergraduate)

This course provides students with an overview of health policy creation and describes the history of healthcare policy in the United States. Students will explore the delivery and finance of health care as well as analyze health care law and regulation. Students will gain an understanding of how political and economic policy is used to mitigate disease and illness in varied environments and how policy affects the delivery of health care and public health services.

HLTH 210 is a prerequisite for this class.

HLTH 280 | HEALTH TOPICS | 2-4.5 quarter hours (Undergraduate)

Special topics in health sciences course designed for non-majors, or it may be used as an open elective for health sciences majors.

HLTH 301 | INTEGRATED HUMAN ANATOMY AND PHYSIOLOGY-A | 4 quarter hours (Undergraduate)

This course explores the fundamental principles of human anatomy and physiology that specifically relate to the sensation and perception of environmental stimuli, as well as the response to such challenges. In this context, broad consideration will be given to the body's various modes of cellular and tissue communication, with special emphasis on the interplay between the integumentary, skeletomuscular, nervous, and endocrine systems. In addition, the integrated approach will provide a strong foundation for the serial investigation of relevant topics relating to human health and disease, and clinical intervention. The required weekly laboratory component allows students to integrate and apply theory based lecture knowledge to hands-on anatomic and physiologic exercises, as well as provide critical analysis of course learning outcomes.

BIO 193 and (CHE 134 or CHE 138) are a prerequisite for this class.

HLTH 302 | INTEGRATED HUMAN ANATOMY AND PHYSIOLOGY-B | 4 quarter hours (Undergraduate)

This course explores the fundamental principles of human anatomy and physiology that specifically relate to the dynamic integration of critical organ systems. With the cardiovascular system as a starting point, students will investigate the complex orchestration of homeostatic mechanisms regulated by the respiratory, digestive, urinary, and reproductive systems. As with HLTH 301, the integrated approach will provide a strong foundation for the serial investigation of relevant topics relating to human health and disease, and clinical intervention.

HLTH 301 is a prerequisite for this class.

HLTH 310 | FUNDAMENTALS OF EPIDEMIOLOGY | 4 quarter hours (Undergraduate)

Epidemiology is generally considered to be the basic science of disease prevention. It encompasses the study of the distribution and determinants of health-related conditions in specified populations, and the application of this study to control health problems. This course will introduce students to methods employed by epidemiologists to collect data about the health of populations, to use epidemiologic data to generate and test hypotheses about the relationships between exposure and disease or other health conditions, and to use epidemiologic data that informs interventions and public policy that will address health problems and prevent their recurrence.

LSP 121 or a statistics course

HLTH 312 | QUALITATIVE HEALTH RESEARCH METHODS | 4 quarter hours (Undergraduate)

Introduction to qualitative theory and methods and their practical application in public health. Selected techniques including focus groups, surveys and in-depth interviews will be explored and students will have the opportunity to practice techniques for data collection, management and analysis.

HLTH 315 | MATERNAL AND CHILD HEALTH | 4 quarter hours (Undergraduate)

This course provides an overview of maternal and child health issues and trends that impact the health needs of women, children, and families. The course will involve a historical and current examination of the principles, programs, policies, and practices related to maternal and child health populations.

HLTH 210 is a prerequisite for this class.

HLTH 318 | HEALTH OF AGING POPULATIONS | 4 quarter hours (Undergraduate)

This course will address social science and basic science research, practice, and policy on the health of older populations. The rapidly increasing number and diversity of older Americans has broad implications for our health care and public health systems, as there will be an unprecedented demand on health care delivery and aging-related services. This course will introduce Health Sciences students to topics like the sociocultural and economic status of aging populations, theories of aging, aging policies, and aging health services. One objective of this course is to provide a foundation of aging health knowledge that can be utilized by Health Sciences students in future academic or professional careers.

HLTH 210 is a prerequisite for this class.

HLTH 320 | MOLECULAR VIROLOGY | 4 quarter hours (Undergraduate)

This lecture/seminar course is designed for students interested in the molecular details of virus replication and the interactions between viruses and host cells. Virus families that cause human disease are highlighted, however this course does not focus on the clinical aspects of virus infection and treatment. Students will review primary research articles and participate in group analyses of these works. Successful completion of BIO 250 Cell Biology is recommended prior to enrollment.

BIO 210 or BIO 250 is a prerequisite for this class.

HLTH 325 | PHYSIOLOGY OF POVERTY | 4 quarter hours (Undergraduate)

Low socioeconomic status is associated with psychological stress, nutritional challenges, and toxin exposure, in addition to low access to high-quality healthcare and education often discussed. In the US, it is also inseparable from racism, on a personal and structural level. This course will consider the effects of these stressors in driving cardiovascular, metabolic, immunological, and neurological diseases that contribute to striking disparities in quality of life and lifespan. With the support of lecture introductions, students will interpret data from basic research, biomedical studies, and epidemiology, and integrate them with public health and sociological perspectives. Documentaries and popular texts will contextualize these data and foster reflection and discussion in class meetings. By the end of the course, students will be able to apply what they have learned from the breadth of their scientific and liberal arts coursework to understand the critical challenges in addressing the impacts of socioeconomic inequality on human health.

BIO 193 or (HLTH 194 and HLTH 195) is a prerequisite for this class.

HLTH 327 | PHYSIOLOGY AND SOCIAL IMPACT OF DRUG USE | 4 quarter hours (Undergraduate)

This course aims to explore the biological, psychological and social effects of drug (ab)use by examining the known physiology and brain's role in addictive behavior and dependency. The course specifically explores the physiology-based pharmacology of: 1) Stimulants such as cocaine and amphetamines, 2) Nicotine, 3) Alcohol, 4) Opioids and 5) Cannabis. Furthermore, the course will touch on the social implications of addiction and review current treatment and prevention methods assessing efficacy and exploring novel or alternative treatments.

HLTH 329 | HEALTH HUMANITIES | 4 quarter hours (Undergraduate)

The humanities and arts provide a unique insight into the human condition, suffering, personhood, and our relationship to medical and health technology. Through these practices, one can develop skills of observation, analysis, empathy and self-reflection, all of which are necessary for the provision of humane health care. In this course, students will explore health and medicine through the lenses of the humanities (literature, philosophy, ethics, history) and the arts (literature, theater, film, and visual arts).

Status as a junior and WRD 103 and 104 (or HON 100 and HON 101) are prerequisites for this class.

**HLTH 330 | HEALTH LEADERSHIP | 4 quarter hours
(Undergraduate)**

Health Leadership will prepare students for health leadership in diverse health care settings such as hospitals, public health departments, and community-based agencies. Students will identify and examine their own leadership skills, learn ways to build upon those skills for application in current and future career leadership roles, and gain new knowledge about health leadership trends and practice. The course will integrate lectures, multi-media, case studies, discussions, and reinforcing activities to develop and strengthen health leadership skills.

HLTH 210 is a prerequisite for this class.

**HLTH 335 | COMMUNITY HEALTH ASSESSMENT | 4 quarter hours
(Undergraduate)**

This course covers a range of community assessment processes focusing on health indicators within communities in Chicago. Students will be introduced to multiple data sources and methods. Implications of assessments will be framed within community health assessment requirements under the Affordable Care Act (ACA), as well as broader community needs and resources.

HLTH 210 is a prerequisite for this class.

**HLTH 336 | PROGRAM EVALUATION | 4 quarter hours
(Undergraduate)**

This course will introduce students to methods in program evaluation, including process evaluation, monitoring of outputs and outcomes, impact assessment, and cost analysis. Students will gain practical experience in the design of conceptual frameworks, development of indicators, development of an evaluation plan to measure impact. Students will learn how this information can be used to improve program management and effectiveness. The course will cover experimental, quasi-experimental, and non-experimental study designs, and consider the strengths and limitations of each.

HLTH 335 is a prerequisite for this class.

**HLTH 339 | BIOETHICS IN SOCIETY CAPSTONE SEMINAR | 4 quarter hours
(Undergraduate)**

This seminar is an interdisciplinary study of the function of bioethics in society. As a discipline and as a profession, bioethics stands as a distinctive barometer of our evolving and shifting conceptions not only of health and well-being, but of the world, society, and even ourselves. The seminar explores the history of bioethics, bioethics as a clinical practice, and the various questions that arise at this crossroad from health science, medical humanities, religious studies, sociological, and philosophical perspectives.

PHL 229 or HLTH 229 or REL 229 is a prerequisite for this class.

**HLTH 341 | DEATH AND DYING | 4 quarter hours
(Undergraduate)**

As the only species that is aware of its own mortality, this course examines the human experience of death and dying as a biological, medical, legal, social, and cultural process throughout time. Students will learn about the biological breakdown of the body, hospice & palliative care, advance care planning, funerary and mourning practices, disposal of the human body, and beliefs of what happens after death.

Junior Standing or above is a prerequisite for this class.

**HLTH 343 | CANNABIS STUDIES AND SOCIAL JUSTICE | 4 quarter hours
(Undergraduate)**

Cannabis has been recognized throughout history as a pharmacological agent to treat a variety of conditions. This history was interrupted by a series of prohibitions and criminalization policies that were driven by racism in the U.S. and elsewhere. This course examines systems of power that have perpetuated the criminalization of cannabis, the suppression of research into its viability as a pharmacological agent, as well as contemporary efforts to promote harm reduction, social justice and racial equity in the wake of the War on Drugs. Students will investigate the underlying structures that have created injustice among persons who use cannabis in the U.S., and they will study the ways in which racism has perpetuated inequality and oppression. Students will develop research skills by examining specific issues at the intersection of cannabis use or policy and social justice in depth, and evaluating approaches to redressing systemic injustice and creating a more equitable society. Readings will be supplemented by guest speakers from cannabis policy, research, and social justice spheres.

**HLTH 345 | FUNDAMENTALS OF ENVIRONMENTAL HEALTH | 4 quarter hours
(Undergraduate)**

This course provides an introduction to and overview of the key concepts and methodological approaches in the field of environmental health. Students will understand the reciprocal nature of our interactions with the environment: how the environment affects human well being as well as how we impact the health of the environment. An emphasis in this course is on application through laboratory-based exercises, analysis of real data sets, and participating in the practice of environmental health.

HLTH 210 is a prerequisite for this class.

**HLTH 346 | ENVIRONMENTAL OUTREACH THROUGH EXPERIENTIAL LEARNING | 4 quarter hours
(Undergraduate)**

In this course students will participate directly in environmental health by partnering with high school students in application-based service. Students will engage critically on concepts such as what it means to be a citizen, how to be an ally and provide access, and the guiding principles of working for peace and justice. The class will cover research methods, social and environmental justice work, asset and community-based approaches, culturally sustaining pedagogy, and science communication.

**HLTH 350 | HEALTH SCIENCES CAPSTONE | 4 quarter hours
(Undergraduate)**

The Senior Capstone will bring students from both concentrations in the Health Sciences major together in an opportunity to share biomedical and psycho-social perspectives in an examination of current health issues.

HLTH 250 and status as a senior Health Sciences major are prerequisites for this class.

HLTH 360 | INTRODUCTION TO GLOBAL HEALTH | 4 quarter hours (Undergraduate)

This course introduces students to the factors that explain the unequal distribution of health and disease in the world through a series of global health case studies. Particular attention is paid to the ways in which long standing global interdependencies that do not appear immediately related to health: the ties of global trade, of global finance, and of global governance, nevertheless play a role in explaining unequal experiences of sickness and health. The course will trace how health policy takes different forms in changing political-economic environments including discussions of primary health care systems (e.g. inadequate investment, health workforce migration management); disease specific policies (e.g., child survival, AIDS treatment); and economic policies (e.g. World Bank & IMF Structural Adjustment Programs, pharmaceutical patent protections).

HLTH 369 | INTRODUCTION TO STEM PEER MENTORING | 4 quarter hours (Undergraduate)

This course is designed for undergraduates who will be mentoring students in the College of Science and Health. The purpose of the course is to prepare mentors to welcome STEM students into the culture of the scientific community at DePaul. Mentors will encourage their peers to use tools and resources designed to help them build a sense of belonging and achieve academic success. The course will include readings, presentations, and activities, which will support the student's development as a peer mentor. Students will reflect on their experiences to inform their efforts in creating a supportive learning environment for their peers.

HLTH 370 | MOLECULAR MECHANISMS OF HUMAN DISEASE | 4 quarter hours (Undergraduate)

This course surveys current literature as a basis for discussing fundamental concepts in physiology, especially relating to the cellular and molecular determinants of human disease. In addition, connections will be drawn between the research literature and current clinical practices, including the development of therapeutic interventions. Topics will be selected with student input so as to meet individual needs and interests, and will include neurologic, cardiovascular, pulmonary, immunologic, and metabolic diseases. Students will read, review, and discuss primary research literature and group-present key findings in journal club format.

BIO 250 and HLTH 301 (or instructor permission) is a prerequisite for this course.

HLTH 375 | INTRODUCTION TO PHARMACOLOGY | 4 quarter hours (Undergraduate)

This course presents the basic principles of pharmacology, including, but not limited to pharmacokinetics, drug distribution, routes of administration, drug metabolism; pharmacodynamics, receptor theory, drug classification, drug action, and recent advances in pharmacotherapy. **One of the following is a prerequisite for this class: HLTH 301, HLTH 302, BIO 307, BIO 308 or NEU 201**

HLTH 376 | Molecular Mechanisms of Human Disease | 4 quarter hours (Undergraduate)

This course surveys current literature as a basis for discussing fundamental concepts in physiology, especially relating to the cellular and molecular determinants of human disease. In addition, connections will be drawn between the research literature and current clinical practices, including the development of therapeutic interventions. Topics will be selected with student input so as to meet individual needs and interests, and will include neurologic, cardiovascular, pulmonary, immunologic, and metabolic diseases. Students will read, review, and discuss primary research literature and group-present key findings in journal club format.

BIO 250 and HLTH 301 are prerequisites for this class.

HLTH 379 | PEER ADVISING IN HEALTH SCIENCES | 1 quarter hour (Undergraduate)

Peer Advising in Health Sciences is a course designed to connect our successful senior students with the broader population of Health Sciences majors, while providing Peer Advisors with an introduction to advising skills including active listening, providing open-minded guidance and support, interpreting university policies and guidelines, managing confidential information, and effective time management. (2 quarter hours)

HLTH 380 | TOPICS IN HEALTH SCIENCES | 2-4 quarter hours (Undergraduate)

Upper level course focused on a specific topic in Health Sciences that involves reading of primary literature and discussion.

HLTH 397 | MENTORED RESEARCH EXPERIENCE IN HEALTH SCIENCES | 2-4 quarter hours (Undergraduate)

The student and faculty research mentor will work together to formulate a research question based on current knowledge of the health sciences literature. They will develop a data analysis plan. The results and conclusions will be reported in a final project which may be a poster or oral presentation, or research manuscript. In addition, the student will reflect on how the project activities and experiences have contributed to their personal growth as a scientist and their future career plans. Relevant safety and ethical training will be based on the specific proposed research.

HLTH 399 | INDEPENDENT STUDY | 1-4 quarter hours (Undergraduate)

INDEPENDENT STUDY (1 quarter hour)

A Health Science major is a prerequisite for this class.

History (HST)

HST 111 | THE WORLD TO C.1500 | 4 quarter hours (Undergraduate)

This course will examine the phenomenon of civilization as experienced by West Asian, South Asian, East Asian, African, European, and Pre-Columbian American societies to 1500 A.D. Formerly HST 218.

**HST 112 | THE WORLD, C.1500-1914 | 4 quarter hours
(Undergraduate)**

For most of human history, people lived in groups whose cultures, faiths, economies and politics scarcely affected, or were even known to, other peoples. Then, beginning in the 13th Century C.E., this began to change. Slowly at first, and then ever-faster, all of the world's peoples became part of a single world civilization, whether they liked it or not. By about 1914, there was only one world civilization, with local variants. How and why did this happen? Who benefitted, and who did not, from this momentous change? This course seeks to answer these questions as we look at the world's civilizations and at the forces and events that drove them together.

**HST 113 | THE WORLD, 1900-PRESENT | 4 quarter hours
(Undergraduate)**

More change – political, economic, social, technological – occurred in the 20th Century than in all the previous years of human history combined. The world at end of the century, in 2001, was nothing like the world that our great-great-grandparents were born into just 100 years before. And, unlike previous eras, what happened on one place impacted everyone everywhere on earth. Why and how did such vast changes occur, and why did they happen so quickly? These are some of the themes that History 113 will address.

**HST 121 | LATIN AMERICA TO 1765: LIFE BEFORE AND AFTER COLUMBUS | 4 quarter hours
(Undergraduate)**

A survey of Latin American history that offers a continental approach to the colonial period. Special attention is given to Native American societies before 1492, to the Spanish conquest of Mexico and Peru, to the trade in African slaves (Spanish and Portuguese colonies), and to issues of race, class, and gender during the colonial period.

**HST 122 | LATIN AMERICA, 1765-1914 | 4 quarter hours
(Undergraduate)**

One of the main goals of this course is for students to determine whether the long 19th century was an era of revolution and social change or a continuation of colonial institutions and policies. To address this broad question, the course focuses on the Bourbon Reforms, the Wars of Independence, the problems associated with nation building, and the neo-colonial order. Through the analysis of some individual countries (for example Mexico, Argentina, and Brazil) students will study key issues like slavery, the "India question," race relations, class formation, social inequalities, authoritarianism, Church-State relations, liberalism, subaltern resistance, and North-South relations.

**HST 123 | LATIN AMERICA, 1914-2010 | 4 quarter hours
(Undergraduate)**

This is an introductory course designed to provide students with a basic and general knowledge of Latin American history from the 1910s to the present. The course highlights the challenges and failures the new republics faced. Due to the diverse historical experiences, cultures, and economic and political systems, the course will focus on the main social, political, and economic issues that shaped Latin America during the 20th century (democracy, social revolution, social justice, political violence, and repression).

**HST 131 | AFRICA TO 1800 | 4 quarter hours
(Undergraduate)**

A study of African history from earliest times, concentrating on the political, social and religious aspects of major African states and empires. Formerly HST 227.

**HST 132 | AFRICA, 1750-1900 | 4 quarter hours
(Undergraduate)**

The Age of Conquest. The origins of Afro-European relations and the political, economic and military causes of the European partition and occupation of the continent. Formerly HST 228.

**HST 133 | AFRICA, 1900-PRESENT | 4 quarter hours
(Undergraduate)**

The workings of the colonial system, the rise and course of independence movements, and the history of individual African states since independence. Formerly HST 229.

**HST 141 | THE MUSLIM WORLD, C. 600 CE TO 1100 | 4 quarter hours
(Undergraduate)**

Foundation of First Global Civilization (600-1100). A study of the emergence of Islam and the growth of the Islamic community from the time of the Prophet Muhammad until the end of the eleventh century. Formerly HST 223.

**HST 142 | THE MUSLIM WORLD, 1000-1500 | 4 quarter hours
(Undergraduate)**

Sultans, Khans and Shaykhs: Medieval Islamic History (1000-1500). A survey of Muslim history from the decline of the Arab caliphate to the rise of the great gunpowder empires, addressing themes of political expansion, military slavery, devastation brought about by the twin plagues of the Mongols and the Black Death, and the growth of Islamic mysticism. Formerly HST 224.

**HST 143 | THE MUSLIM WORLD, 1400-1920 | 4 quarter hours
(Undergraduate)**

Great Empires (1400-1920). Examines the social, cultural and economic histories of the Ottoman-Turkish, Safavid Iranian and Mughal-Indian empires which dominated the Muslim world in the crucial centuries between the end of the Mongol empire and the advent of European dominance. Formerly HST 225.

**HST 151 | INDIA TO 900 - FROM THE STONE AGE TO THE GOLDEN AGE | 4 quarter hours
(Undergraduate)**

The course follows the development of the history of the region from the earliest phases of human settlement, the first civilization in the Indus valley, and the formation of the Mauryan and Gupta empires. It will analyze the growth of different state structures from tribal/lineage based state to these great empires. It incorporates the rise of regional states and the growing importance of trade to linking South Asia with the West. It will also examine the development of different religious traditions from Vedic Brahmanism to Buddhism to Jainism and the very early days of Islam in the region. The central question of this course will be how to contextualize the relationship between structures like family, law, caste, community, state and the tumultuous changes in the subcontinent over this long period. Formerly HST 256.

HST 152 | INDIA FROM 900-1750 - SULTANS, MUGHALS, AND ISLAMIC EMPIRES | 4 quarter hours
(Undergraduate)

The course begins with the transformation of society from the 'ancient' to the 'medieval', and compares this to developments in Europe in the feudal age. It then incorporates specific political, social, and cultural developments in South Asia that came about with the establishment of powerful Islamic states in a region where Muslims were a minority. These issues will inform the analysis of the Ghaznavid and Ghurid invasions, the Delhi Sultanate, the Vijayanagara empire and the Mughal empire. The course will end with the Marathas and the decline of the Mughal empire, and the rising influence of the British. The central themes concern how the state, economy, culture, and society developed in the period when Islam became firmly embedded in South Asia.

HST 153 | INDIA FROM 1700-1950 - RISE AND FALL OF THE BRITISH RAJ | 4 quarter hours
(Undergraduate)

The course begins with the decline of the Mughal Empire, and then moves to examine the British empire, the nationalist movement and finally to independence and partition in 1947. The central questions of this course continue to be relevant in the post-colonial period: how we understand the distinctive form of modernity that has developed in South Asia. Taking a comparative approach as often as possible, the course examines the fundamental ways that Britain was transformed by the development of its empire as was colonial India. The course constantly deconstructs easy binaries of self and others/ East and West by examining the differences within Indian and British society. Formerly HST 257.

HST 161 | EAST ASIA TO C. 1200 | 4 quarter hours
(Undergraduate)

Outlines the history of the region (China, Korea and Japan) during the period of antiquity. Follows the development and the formation of dynastic rule in China and Korea and the imperial institution in Japan. Assesses the extent of the role of ancient Chinese philosophy, language, and statecraft in establishing a coherent region we now call "East Asia."

HST 162 | EAST ASIA c. 1200 TO 1800 | 4 quarter hours
(Undergraduate)

Begins with the transition of East Asia (China, Korea and Japan) from ancient to medieval society and compares it to developments in Europe during the feudal age. Explores the political, economic and cultural relations between the various states in the region as a whole as well as the specific local developments of state and society during this period. Examines the arrival of the first Europeans, traders and then Jesuit and Catholic missionaries, and the resulting radical social realignment within each society stemming from this encounter with the 'outside.'

HST 163 | EAST ASIA, c. 1800-PRESENT | 4 quarter hours
(Undergraduate)

Begins with the reshaping of East Asian relations from the late 18th century following the realignment of the region after the expulsion of European Catholic missionaries. Follows the radical shift in the relations between these countries as they all sought to respond to the imperial challenges that the West imposed. Explores the central role of Japan and its effort to build an empire in and beyond East Asia from the late 19th century through its defeat in World War II and the lasting historical legacy of that history in the region.

HST 171 | EUROPE, 400-1400 | 4 quarter hours
(Undergraduate)

The important components of European society during the Middle Ages, including rulers, knights, and peasants, churchmen and nuns, urban merchants, intellectuals, and artisans. Who were these Medieval people, what differentiated them, how did they interact with each other, and how and why did these interactions change over time? Formerly HST 210.

HST 172 | EUROPE, 1348-1789 | 4 quarter hours
(Undergraduate)

The development of new European ideologies in a time of heightened political and social conflict, from the rebirth of ancient culture in Renaissance Italy, to the religious debates of the Protestant Reformation; from the theories of absolute monarchy to the early revolutionary ideologies of the Enlightenment. Formerly HST 211.

HST 173 | EUROPE, 1789-PRESENT | 4 quarter hours
(Undergraduate)

This broad survey explores the development of modern Europe from the French Revolution to the fall of the Soviet Union, from the formation of the nation state to the emergence of a united Europe. Topics include industrialization, urbanization, the rise of mass politics, imperialism, and the world wars. Students will be introduced to ideologies like nationalism, liberalism, socialism, communism, and fascism as well as key developments in the arts and sciences. These topics have had global ramifications and are critical in understanding not only European history but also how today's world came to be.

HST 181 | UNITED STATES TO 1800 | 4 quarter hours
(Undergraduate)

A survey of the major social, political, economic and cultural themes in U.S. history from the earliest European settlements to the aftermath of the Revolution. Formerly HST 280.

HST 182 | UNITED STATES, 1800-1900 | 4 quarter hours
(Undergraduate)

A survey of the major social, political, economic and cultural themes in U.S. history from the aftermath of the Revolution to the Spanish-American War. Formerly HST 281.

HST 183 | UNITED STATES, 1900-PRESENT | 4 quarter hours
(Undergraduate)

A survey of the major social, political, economic and cultural themes in U.S. history from the Progressive era to the present. Formerly HST 282.

HST 185 | AMERICAN SOCIAL HISTORY AND CULTURE | 4 quarter hours
(Undergraduate)

This course will provide an overview of American History designed to provide a one-quarter overview of American history and culture. It will provide an overview of the central themes of American History from the colonial period to the present with a focus on social, popular, and cultural history. Cross-listed with AMS 200.

HST 200 | MEXICO AFTER INDEPENDENCE | 4 quarter hours
(Undergraduate)

This survey covers the history of Mexico from 1821 to the present. It will examine the difficulties of nation-building during the 19th Century, the Mexican Revolution (1910-1940), and the success and failure of the "Mexican Miracle."

HST 201 | MEXICAN AMERICAN (CHICAN@) HISTORY | 4 quarter hours
(Undergraduate)

This course examines four hundred years of Mexican American (Chican@) history (1598-present) with special attention given to the American Southwest. It will emphasize such themes as the construction of race, class, gender, citizenship, and nationality.

HST 202 | JEWISH EXPERIENCES IN THE AMERICAS | 4 quarter hours (Undergraduate)

This course is about Jewish History in the Americas from 1492 until the late 1800s. It combines colonial/national periods and covers different regions, including North America, Central America, South America, and the Caribbean.

HST 204 | FILM AND LATIN AMERICAN HISTORY | 4 quarter hours (Undergraduate)

An inquiry into the way film portrays historical events in Latin America.

HST 206 | MEXICO: FROM THE OLMECS TO INDEPENDENCE | 4 quarter hours (Undergraduate)

This course surveys the history of Mexico from the rise of the Olmec Civilization to Mexican Independence in 1821. It will examine the rise, fall, and continuities of Mesoamerican civilizations, the Spanish conquest, and the creation of the colonial order.

HST 208 | IMPERIAL RUSSIA | 4 quarter hours (Undergraduate)

This course examines political, economic, social, and cultural developments in Russia from the time of Peter the Great in the early 18th century to the collapse of tsarism in 1917. Topics include Westernization and resistance during the reigns of Peter the Great and Catherine the Great; reform and reaction under Alexander I and Nicholas I; Alexander II and the great reforms of the 1860's; industrialization and the transformation of Russian society in the second half of the nineteenth century; the rise of radicalism and emergence of revolutionary movements; and the revolutions of 1905 and February 1917.

HST 209 | THE RISE AND FALL OF THE SOVIET UNION | 4 quarter hours (Undergraduate)

This course examines major political, social, economic, and cultural developments in twentieth-century Russia from the collapse of tsarist rule through the fall of communism. Topics include the rise of Bolshevism and the October Revolution; the Civil War and allied intervention; the period of NEP and "revolutionary dreaming"; Stalin and Stalinism; the Great Patriotic War; Khrushchev and the "thaw"; Brezhnev and "developed socialism"; and the rise and fall of Mikhail Gorbachev.

HST 210 | PSYCHOTROPIC DRUGS IN MODERN AMERICAN HISTORY | 4 quarter hours (Undergraduate)

This course will engage you in historical inquiry about the intertwined social, political, and medical histories of psychotropic drugs, with an emphasis on the nineteenth and twentieth-century United States. A core thematic thread that runs throughout the course is how ideologies of race, class, and gender, as well as their institutional manifestations, have influenced the socioeconomic, political, legal, and medical statuses of drugs in US society. Broader contexts of international 'wars' on drugs, foreign trade, immigration, race relations, and medical pathologizations will be engaged as explanatory frameworks for understanding the so-called 'reefer madness' and similar discourses leading to the criminalization of marijuana and other psychotropics in the United States, in tandem with their prohibition through legislation and controlled-substance 'scheduling'. The more recent movements to legalize and decriminalize cannabis in its different forms, for both medical and recreational uses, offers a case-in-point for how psychotropic drugs in society are entangled with matters of racial justice. By engaging with this subject through an historical lens, you will develop core competencies in historical inquiry, civic engagement, and justice-based decision-making.

HST 211 | THE ART OF CRUSADING | 4 quarter hours (Undergraduate)

This course focuses on the Crusades. More specifically, it focuses on the world within which the Crusades were born and the Levantine kingdom built as a result of their initial success. Our study will depend on primary artistic, literary, and archaeological materials, as well as the secondary scholarship that has identified and interpreted these materials. Our understanding of this historical moment will be nuanced by the questions we ask of both. The payoff will be an appreciation for the religious, social, political, and artistic forces that defined the twelfth and thirteen centuries in Europe and in the Mediterranean basin, leading as they did to such fascinating phenomena as pilgrimage, the cult of relics, chivalry, holy war, the rise of military orders, and the establishment of the Latin Kingdom of Jerusalem itself. Cross-listed with HAA 233.

HST 212 | MEDIEVAL AND RENAISSANCE WOMEN | 4 quarter hours (Undergraduate)

Gender roles and ideologies in pre-modern and early modern Europe, from ancient Mediterranean and Germanic women to high Medieval ladies, nuns, serfs, and city women, from early feminism to the restrictions and opportunities brought by the Renaissance and Reformation. Emphasis on primary sources, especially women's writings.

HST 213 | MEDIEVAL MYSTICS IN EUROPE: 1000-1600 AD | 4 quarter hours (Undergraduate)

The evolution over time of theories and experiences of human union with God, and of varied Christian spiritual paths and practices, as described in mystical literature, saints' lives, religious art, and music. Emphasis on the monastic, urban, and courtly institutional contexts of the documents. Cross-listed as CTH 228.

HST 214 | EASTERN EUROPE TO 1699 | 4 quarter hours (Undergraduate)

A survey of the area's settlements by Slavic and non-Slavic peoples, the establishment of medieval states, the East European Renaissance and Reformation, the struggle of Cross and Crescent, and the growth of Habsburg and Ottoman power.

HST 215 | EASTERN EUROPE: 1699 TO 1914 | 4 quarter hours (Undergraduate)

A survey of the East European Enlightenment and absolutism, the Polish Partitions, and the effects of revolutionary ideas on multinational empires.

HST 216 | EASTERN EUROPE: 1914-PRESENT | 4 quarter hours (Undergraduate)

A survey of World War I and its effects in Eastern Europe; the rise of nation-states; the destruction of traditional agrarian societies; the impact of World War II; and the establishment and decline of Communist regimes.

HST 217 | THE VIKINGS: MEDIEVAL AMBASSADORS OF TERROR, TRADE AND MULTICULTURALISM | 4 quarter hours (Undergraduate)

An introduction to the history of the Vikings, from early Viking society in Scandinavia to the 'Norseman' Invasion of England in 1066. This course pays particular attention to what the Vikings had to say about themselves as well as to their interaction with other peoples, from North America to the Holy Roman and Byzantine Empires to the Muslim world.

HST 218 | EARLY CATHOLIC HISTORY: ORIGINS AND EXPANSION | 4 quarter hours
(Undergraduate)

This course is an introduction to the history of the Catholic Church and the evolution of Christian thought and practices, from the early Church to the thirteenth century. The course will include not only institutional history but also ecclesiastical, cultural, and social history of Catholicism in relation to foundational theological and spiritual texts written in this period. Main topics: The Early Church; Councils and Heresies; Missions in Northern Europe; Charlemagne, Carolingians and a new Roman Empire; Monasticism; Eastern Orthodoxy; Christianity and Islam (the Age of the Crusades); the Mystical Tradition; the Investiture Controversy. Cross-listed with CTH 220.

HST 219 | CATHOLIC HISTORY FROM MEDIEVAL TO MODERN: REFORM AND REVOLUTION | 4 quarter hours
(Undergraduate)

This course provides an overview of the history of Catholicism and its interactions with institutional, political, and social history from 1200 to the French Revolution. The main topics of the class are the origin of the Universities and Scholasticism; Mendicant Orders and their impact on the Medieval Society; the Challenges to Papal Monarchy; Humanism and Erasmus; the impact of the Age of the Reformation; the Council of Trent; the geographic discoveries and the New Worlds; the Enlightenment and the Scientific Revolution; the Catholic Church and the French Revolution. Cross-listed with CTH 221.

HST 220 | CATHOLICISM IN THE MODERN AGE: SECULAR AND SACRED | 4 quarter hours
(Undergraduate)

This course will offer a survey of the political, cultural and intellectual history of the Catholic Church from 1789 through the early twenty-first century. It will include discussions of the Catholic Church in relation to the French Revolution; the Catholic Church and the formation of modern nation-states (including, inter alia, the unification of Italy and the German Kulturkampf); the relation between the Church and Liberalism; intellectual movements like theological Modernism and ressourcement theology; the First Vatican Council; the Church, Fascism and Communism; the Second Vatican Council; the Emergence of a Global Church, Latin American Liberation Theology, and more. Cross-listed with CTH 222.

HST 221 | EARLY RUSSIA | 4 quarter hours
(Undergraduate)

This course examines political, economic, social, and cultural developments in Russia from the emergence of the Kievan state in the ninth century to the reign of Peter the Great in the early eighteenth century. Topics include the rise and fall of Kiev; the Mongol invasion and rule by the "Golden Horde;" the rise of Moscow and unification of Great Russia; the consolidation of tsarist authority and the reign of Ivan the Terrible; the Time of Troubles; and the early Romanov dynasty.

HST 222 | MODERN GERMANY, 1870-PRESENT | 4 quarter hours
(Undergraduate)

Following the path from Germany's unification in the late 19th century via two world wars, the country's division in the course of the Cold War, and ultimately the country's reunification at the close of the 20th century, one of the goals of this course is to introduce students to the major cornerstones of modern German history. Another objective, however, aims at using these events in the exploration of shifting ideas about what it has meant to be German, exploring what factors determined inclusion in or exclusion from the German community.

HST 226 | ISLAM AND THE WEST: A SURVEY OF ORIENTALISM | 4 quarter hours
(Undergraduate)

From "heresy" to "the Green Threat," this course studies the changing perceptions of Islam and the Islamic world held by those in "Western" societies from the time of the Crusades down to the contemporary era.

HST 228 | FOOD, HISTORY, IDENTITY IN THE BALKANS: THE UNBEARABLE SIMILARITY OF OTHER | 4 quarter hours
(Undergraduate)

This course explores how food, politics and identity intertwine in the Southeastern corner of the European continent, known as the Balkans. The region has always been considered as a "gastronomic hub" and a geographical and cultural bridge between Europe and Asia, East and West. This area includes today, entirely or partially, some 13 countries, with a total population of around 60 million, and has been since ancient times a crossroads of history, religions and culinary traditions. In spite of its strategically vital geopolitical location, the Balkans is still less known for many, it's often labeled as the "Other Europe." Further, in the imagination of Western Europe, the Balkans has come to be associated with stigmatizing stereotypes of instability, nationalistic wars, and backwardness. In this course, we'll analyze the interplay between food and identity, nationalism and gastronomy, and culture and history in one of the most gastronomically rich and tasty regions of Europe.

HST 232 | CULTURE AND POLITICS IN IMPERIAL CHINA | 4 quarter hours
(Undergraduate)

Examines the history of Chinese civilization from the early Shang kingship through the development of the Chinese Empire (221 B.C. - A.D. 1911). We will focus on systematic changes in political, economic, and social structures in China and the intellectual and cultural forms that each configuration produced. Topics include the growth of the Chinese empire, Chinese forms of Buddhism, and the development of Chinese philosophy, scholarship and literature.

HST 233 | THE RISE OF MODERN CHINA | 4 quarter hours
(Undergraduate)

Examines the history of Chinese civilization from the 18th century to the present. We will survey the height of the authority of the Qing Imperial government, its dissolution in the 19th century, and the creation of a revolutionary China in the 20th century. Topics include the Opium War and China's foreign relations, the introduction of Westernized technology and education, and the rise of Communism under the leadership of Mao Zedong. Also considers the ways in which our contemporary understanding of China is formed by recent developments in the media - Chinese news and film.

HST 234 | AUTHORS, IDEAS, AND EXPRESSION FROM THE RENAISSANCE TO THE ENLIGHTENMENT | 4 quarter hours
(Undergraduate)

This course entails close reading and discussion of significant texts in Western culture from the Renaissance to the Enlightenment. Readings will reflect different genres and perspectives. Potential authors may include, for example, Machiavelli, Erasmus, Pisan, Luther, Teresa of Avila, Cervantes, Montaigne, Descartes, Locke, Voltaire, Wollstonecraft, Swift, Equiano, and Rousseau. Cross-listed with CPL 211.

HST 235 | EUROPEAN EXPANSION: AGE OF DISCOVERY | 4 quarter hours
(Undergraduate)

A survey of the political, intellectual and scientific roots of the expansion of Europe and of the main voyages of discovery between 1400 and 1825.

**HST 236 | A WORLD OF EMPIRES: 1400-2000 | 4 quarter hours
(Undergraduate)**

Most people equate 'empire' with Europe, and see the European empires of the 18th-20th centuries as both unique and inevitable. In fact, empires dominated much of the world for the past 600 years and not all of them were European. This course looks at these empires, European and non-European and asks: how and why were empires created? How did they help shape the world we live in today? Why do empires, which seem to be so powerful and immortal, fall, and why do they often do so with stunning speed? Our study will include such things as history, technology, culture, war, economics, and most especially the people who created, sustained and finally overthrew empires. Through this, we will understand how the world of today, a legacy of empires, came to be.

**HST 237 | HISTORY OF THE CITY OF ROME | 4-8 quarter hours
(Undergraduate)**

Topics in the history of urban Rome from antiquity through the modern age.

**HST 238 | WITCHCRAFT IN THE WESTERN WORLD: GENDER, CULTURE, AND THE LAW | 4 quarter hours
(Undergraduate)**

This course explores witchcraft in Western history, emphasizing the intense witch-hunting during the sixteenth and seventeenth centuries in Europe and European colonies. Connections between witchcraft and other contemporary developments—including the Renaissance, Reformation, the scientific revolution, and imperialism—are examined alongside pertinent issues in the history of gender and sexuality.

**HST 239 | WOMEN IN MODERN EUROPE, 1800-PRESENT | 4 quarter hours
(Undergraduate)**

This course will explore the diversity of women's and girls' experiences across Europe as they negotiate between public and private spheres, daily life and great events, Europe and the world. Themes may include industrialization, suffrage, imperialism, "new women," fascism, and communism.

**HST 240 | HISTORY OF CHICAGO | 4 quarter hours
(Undergraduate)**

A history of the founding and development of Chicago from a frontier village to a major industrial, commercial and cultural center. This course will focus on the changing lives of ordinary Chicagoans. Cross-listed with AMS 240 and GEO 231.

**HST 241 | WORLD REFUGEE CRISIS | 4 quarter hours
(Undergraduate)**

This is a survey of global refugee crisis and internal displacement between 1945 and the present. The course will focus on the following issues and challenges: human rights, definitions and causes of crisis, internal/external displacements, 'environmental' refugees, protection and integration, refugee children, and conflict resolutions in post-war societies.

**HST 242 | HISTORY OF HUMAN RIGHTS IN EUROPE | 4 quarter hours
(Undergraduate)**

This course will explore the evolution and implications of the idea that all human beings possess the same "inalienable rights." Topics will include human rights advocates, their strategies and arguments, and how human rights claims have evolved and intersected with political, institutional, and legal structures since the eighteenth century.

**HST 243 | HISTORY OF THE CATHOLIC CHURCH IN THE U.S. | 4 quarter hours
(Undergraduate)**

This course traces the development of the Catholic Church from a missionary enterprise to the position of a major social, political, and economic institution. The course will examine the manner in which the hierarchical institution of the Catholic Church has related to the liberal ideal of American democracy.

**HST 244 | COMMUNITY ENGAGEMENT AND CHICAGO HISTORIES: BACK OF THE YARDS | 4 quarter hours
(Undergraduate)**

This course offers an introduction to the Chicago neighborhood of Back of the Yards through the lens of multiple, intersecting histories, including histories of Chicago and the US in the twentieth and twenty-first centuries, as well as the broader, transnational dynamics of industrialization, deindustrialization, immigration, ethnicity, and neoliberalism. Course will include Service Learning component with neighborhood organization.

**HST 246 | AFRICAN-AMERICAN HISTORY TO 1800 | 4 quarter hours
(Undergraduate)**

This course primarily focuses on the colonial era with an emphasis on topics such as the construction of race and gender, the Black Atlantic, the emergence of African diasporic cultures in the Americas, slavery, black political thought, resistance, and the Revolutionary War. Cross Listed with ABD 256.

**HST 247 | AFRICAN-AMERICAN HISTORY, 1800-1900 | 4 quarter hours
(Undergraduate)**

The African experience in America is expansive, beginning in the colonial era and lasting through the present day. This course will focus on a portion of that history—that spanning the 19th century. The course is organized thematically, with an emphasis on topics such as resistance, the construction of race, slavery and the law, gender and slavery, the nature of antebellum free black life, abolition, the Civil War, and Reconstruction. Cross Listed with ABD 257.

**HST 248 | AFRICAN-AMERICAN HISTORY, 1900 TO PRESENT | 4 quarter hours
(Undergraduate)**

The African experience in America is expansive, beginning in the colonial era and lasting through the present day. This course will focus on only a portion of that history—1900 to the present. This course is organized thematically with an emphasis on topics such as migration, urbanization, segregation, 20th century constructions of blackness, arts & culture, African Americans and the World Wars, black political thought, freedom movements, and criminalization. Cross Listed with ABD 258.

**HST 249 | ORIGINS OF THE FIRST WORLD WAR, 1871-1917 | 4 quarter hours
(Undergraduate)**

Examines the development of the European (and Great Power imperial) state system after the unification of Germany; the formation (and global implications) of the pre-war alliance structure; the political and social movements of nationalism, imperialism, and militarism; the naval race; and the July Crisis of 1914.

HST 250 | ORIGINS OF THE SECOND WORLD WAR, 1914 - 1941 | 4 quarter hours (Undergraduate)

Examines the European (and world) state system in the aftermath of the First World War and the Russian Revolution; the attempts to forge a new international equilibrium at the Paris Peace Conference and after; the rise of Hitler and Nazism; appeasement; the immediate origins of the Second World War in Europe; and the rise of militarism and advent of war in East Asia.

HST 251 | ORIGINS OF THE COLD WAR, 1917 - 1953 | 4 quarter hours (Undergraduate)

Examines the rise of the United States as a world power; the diplomatic significance of the Russian Revolution; the wartime alliance between Great Britain, the United States and the Soviet Union; the collapse of the international order in the aftermath of the Second World War; and the advent of the Cold War.

HST 252 | THE AGE OF THE COLD WAR: 1945-1991 | 4 quarter hours (Undergraduate)

The origins, nature and progress of the Cold War from the end of World War II until the collapse of the Soviet Union.

HST 253 | HISTORY OF THE MODERN OLYMPICS | 4 quarter hours (Undergraduate)

This course will examine the Modern Olympics: the oldest and most inclusive institutionalized effort to engender international exchange and perpetuate peacefulness through athletic excellence. Relying on a mix of primary and secondary sources, the course will touch on an array of important issues, including globalization, race relations, gender issues, the rise of popular culture, and terrorism.

HST 254 | AMERICAN URBAN HISTORY | 4 quarter hours (Undergraduate)

An overview, examining American urban life from the early days of the colonial seaport, through the rise of the smoky industrial center, to today's troubled "dual city" of the rich and the poor. Throughout the course, we will focus on how urbanization affected the lives of the diverse peoples who experienced it. We will also explore the ways in which city life contributed to changes in American culture, and to a greater acceptance of social and cultural diversity.

HST 255 | THE HISTORY OF THE FIRST WORLD WAR | 4 quarter hours (Undergraduate)

The Great War created the modern world. This course will discuss the major theatres of the war, the range of combatants, the effect of the war on homefronts and civil societies, changes to military technologies, and consequences of the war. This course will provide an introduction to the Great War and its ramifications for students unfamiliar with it.

HST 256 | AXIS AND ALLIES: THE SECOND WORLD WAR | 4 quarter hours (Undergraduate)

The second world war was the most destructive conflict in world history. Its scope was global and its impact was felt by millions people throughout the world. This course will examine the nature of the wartime experience for the combatants and civilians, how the war was waged by different societies and their governments, and the impact of the conflict on the post-war world.

HST 258 | WOMEN IN HISTORY | 4 quarter hours (Undergraduate)

A comparative study of women's social, cultural, political, economic roles over time in three parts of the world.

HST 259 | HISTORY OF WESTERN SCIENCE | 4 quarter hours (Undergraduate)

A survey of scientific thought and discovery from the ancient Greeks to the early 20th century.

HST 260 | LGBTQ+ AMERICAN HISTORY, WW2 TO THE PRESENT | 4 quarter hours (Undergraduate)

This course surveys LGBTQ+ (lesbian, gay, bisexual, transgender, and queer+) history in America from World War 2 to the present. Through primary and secondary source readings and class discussion we will examine how understandings of LGBTQ+ sex and sexuality have been constructed in the past, leading us up to our present. Special attention is paid to readings that draw revealing connections between LGBTQ+ sexuality and race, class, and gender.

HST 261 | CATHOLICISM IN WORLD HISTORY I: JESUS TO 1500 | 4 quarter hours (Undergraduate)

A study of the development of the Catholic Church from the time of Jesus to the Renaissance. Religious movements, piety and art as well as theology and ecclesiastical history will be examined. Cross-listed as REL 213 and CTH 205.

HST 262 | CATHOLICISM IN WORLD HISTORY II: 1500 - PRESENT | 4 quarter hours (Undergraduate)

A study of the development of Catholicism since 1500 exploring the Catholic Reformation, Catholicism's encounter with the Enlightenment, the missionary movement and the Catholic Church in the United States. Cross-listed as REL 214 and CTH 206.

HST 263 | JAPAN TO C. 1200 | 4 quarter hours (Undergraduate)

Follows the formation of a unified state in central Japan during the 5th and 6th centuries. Considers the influence of Korean immigrants and Chinese philosophy and statecraft on the unification of Japan in early antiquity. Explores rise of Japan's aristocratic court culture in Nara and Kyoto as well as powerful Buddhist institutions and the emergence of the warrior class in Eastern Japan. Formerly HST 230.

HST 264 | JAPAN c.1200 - 1800 | 4 quarter hours (Undergraduate)

Follows the emergence of the warrior class and the system of dual political authority until the 14th century, with the imperial court in Kyoto and the samurai elite in Kamakura. Continues with an examination of the early modern processes of urbanization and the growth of a monetary economy, changes in social organization, major cultural innovations, and religious/intellectual movements.

HST 265 | JAPAN, c. 1800-PRESENT | 4 quarter hours (Undergraduate)

Follows the radical transformation of Japanese politics, society, and economy with the commercialization of the countryside, the weakening of samurai rule, and increased, often hostile, contact with Western imperialist nations. Explores expansion of Japan as an imperialist nation from the middle of the 19th century and the lasting legacy of that expansion in the region. Explores WWII and postwar political, economic, social changes in contemporary Japan.

HST 266 | IRELAND, 1450 - 1800, CONQUEST, COLONIZATION & REBELLION | 4 quarter hours
(Undergraduate)

This course offers a survey of Irish history from the end of the middle ages to the union of Ireland and Great Britain in 1800. It traces the ways in which Ireland was brought under great English (later British) control through processes of agreement, conquest and colonization; and the ways in which various groups within Ireland sought to resist such developments.

HST 267 | MENTAL ILLNESS IN U.S. HISTORY AND CULTURE | 4 quarter hours
(Undergraduate)

This course examines dominant and shifting conceptions of mental illness in the United States during the 20th and 21st centuries. We will historically contextualize the course by examining major historical changes in medical thinking about mental illness, including degenerative (eugenic), psychoanalytic, and pharmaceutical (biomedical) approaches. We will also explore the evolving medical, social and institutional management of suffering people over time, including the employment of various physical and pharmacological therapies and the roles of asylums, hospitals, prisons, community centers and public "homeless" spaces as holding areas. Drawing from a wide range of scholarly sources, including history, anthropology, sociology, medicine, and interdisciplinary cultural studies areas such as Disability Studies, Madness Studies, Gender/ Sexuality Studies and Feminist Studies, and Critical Race and Ethnic Studies, we will explore how normative standards of social behavior have been used to understand and define "illness" and "health," and the various ways impacted persons have responded to and at times resisted those definitions. This class will also take an intersectional approach, underlining how integrated systems of racism, classism, homophobia, sexism, ableism and colonialism have resulted in specific kinds of trauma that have made some social groups more vulnerable to medical coercion and abuse. Finally, we will analyze the historical and present strategies that mental health and disability justice advocates have employed to enact civil rights legislation, critique the medical/ pharmacological establishment, and promote alternative forms of therapy and care. Our examination will incorporate a variety of primary source materials, including popular histories and documentary films, mass media and creative works, medical archives, social media activity, legal documents, and oral histories.

HST 268 | IRELAND, 1800-PRESENT | 4 quarter hours
(Undergraduate)

Survey of Irish history from 1800 to 2000. Examines the course of Irish history from the Act of Union (creating the United Kingdom), through the struggles and reforms of the 19th century (Catholic Emancipation, the Famine and Irish diaspora, Fenianism, Land Reform and Home Rule), to the creation of the modern nation-state of the 20th century (the Easter Rising, partition and civil war, the role of Eamon deValera, the Republic, and the Troubles). Topics include the contributions of Irish culture and its influence in Europe and the world.

HST 269 | MUSEUMS, MATERIAL CULTURE AND MEMORY: INTRODUCTION TO PUBLIC HISTORY | 4 quarter hours
(Undergraduate)

How is the past remembered in public venues like museums? How do history museums shape how we understand past? How do historians use material culture (objects like coins or folk art) to interpret the past for the public? Public history refers to history that you find in public spaces--outside of the pages of academic journals, and beyond university walls. We encounter examples of public history through exhibits, performances, walking tours, visits to historic sites, the world wide web, etc. This course familiarizes you with examples of public history, and trains you to critically analyze and thoughtfully engage with public historical interpretations.

HST 270 | U.S. HISTORICAL LANDSCAPE | 4 quarter hours
(Undergraduate)

The course considers how the American landscape has been shaped by native occupants, and later, by agricultural settlement and industrial development. A key theme is how culture has shaped the physical world we inhabit, from 1500 to circa 1950.

HST 271 | OLD REGIME AND REVOLUTIONARY FRANCE | 4 quarter hours
(Undergraduate)

This course provides students with a firm foundation in the history of early modern France, ca. 1500-1800, including major developments of the period and an understanding of the relationship between the French revolution and the period that preceded it. Topics will include (among others) the rise of absolutist monarchy, the Enlightenment, French colonialism, pre-revolutionary social and economic conditions, and the French Revolution.

HST 272 | FASCISM AND COUNTER REVOLUTION | 4 quarter hours
(Undergraduate)

What is Fascism? How and why did this early 20th century political movement and ideology that openly preached racial hatred, genocide, and the necessity of war attract so many millions of followers all over the world? What exactly did Fascists believe? These are some of the issues that this course addresses. We will explore the development of fascism during the 1920s and 1930s both as a philosophy and as a form of political action. The course examines Fascism's opponents – socialism and democracy – and looks at how supporters of these ideologies responded to the Fascist challenge. And we will consider what the possible responses to Fascism are, and whether or not Fascism still exists, even in the United States.

HST 273 | HISTORY OF SEXUALITY IN EUROPE | 4 quarter hours
(Undergraduate)

This course will explore key ideas, practices and patterns across multiple European societies from the French Revolution until the present. Key topics may include demographics, identities, sexology, and sexual consumerism.

HST 274 | INTELLIGENCE IN 20TH CENTURY | 4 quarter hours
(Undergraduate)

A study of intelligence gathering and analysis in the twentieth century (and beyond). This course will address the role intelligence played in the politics, diplomacy, and strategy of the leading world powers. Special consideration will be given to the eras of the two world wars, the cold war, and the emerging nations in the post-war period. The course is comparative in nature and will examine the intelligence communities of the United States, the European powers, the Soviet Union, Japan, China, and Israel.

HST 275 | SEX IN AMERICA, PURITANS TO VICTORIANS | 4 quarter hours (Undergraduate)

This course surveys the history of three centuries of American ideas about sex and sexuality. By focusing on sexual variation from the era of colonial settlement through the end of the nineteenth century, this course will challenge conventional interpretations of sex in early America.

HST 276 | SEX IN AMERICA, LATE VICTORIANS TO PRESENT | 4 quarter hours (Undergraduate)

This course will provide an overview of the history of American sexuality from the late 19th century through the present. The course will draw from social and cultural history, the history of medicine and psychology, legal and political history, literature, mass media, and gender studies in order to understand the creation of modern sexual identities.

HST 277 | WAR AND PEACE IN THE MODERN AGE | 4 quarter hours (Undergraduate)

A survey of military history from 1648 to the present with emphasis on the relationship between armed forces and the societies that create them, the impact of technology on warfare, and efforts to limit deadly conflict.

HST 278 | HISTORY OF AMERICAN RELIGION | 4 quarter hours (Undergraduate)

A survey of major religious traditions, movements, and themes in American history from the colonial period to the present, including the relationship between religious values and beliefs and other aspects of American culture.

HST 279 | WESTWARD EXPANSION IN U.S. | 4 quarter hours (Undergraduate)

This course examines the competition among Native American nations, European empires, and the emerging governments of the United States and Mexico to control the North American region from roughly the Appalachian Mountains to the Pacific Ocean from approximately 1775 to 1890. The class will examine environmental changes, military campaigns, trade links, settlement patterns, and government policies.

HST 280 | HISTORY OF US NATIONAL PARKS | 4 quarter hours (Undergraduate)

At its core, this course examines the intersection of American history and the natural world, following a classic definition of environmental history as the interaction between humans and the environment in the past. Specifically, this course examines the historical development of America's national parks, analyzing how a truly American idea of national parks as idealized nature: what Wallace Stegner once called "America's best idea" led to preservation efforts all over the country and throughout time. In addition to studying the historical development of national parks, this course will also use national parks as lens for studying important themes in American history. Like microhistory, national park history allows historians to "ask large questions in small places." This course asks large questions in green places. This course examines some important themes in American history, including: assessing the idea of American exceptionalism (including nationalism and imperialism, but also American anxiety), changing definitions of economic progress, the rise of federal political power, the development of identity (including American identity, gender, ethnic, race, etc), and American conceptions of the environmental world. Cross-listed with ENV 165.

HST 281 | IDEAS OF NATURE IN US HISTORY | 4 quarter hours (Undergraduate)

This course scrutinizes different conceptions of nature throughout a broad span of Western history, and includes an examination of diverse ideas that include pre-contact Native American conceptions of their environments, colonial-era attitudes toward the dwindling resources of Europe and the vast potential of the North American continent, 19th century movements such as Romanticism, Transcendentalism, acclimatization, conservation, and preservation, and 20th century ideas concerning wilderness preservation, Deep Ecology, and restoration. At heart, this course is designed as an intellectual history of nature. This class concentrates on the ideas of seminal thinkers concerned with the natural world, and examine how these men and women impacted history through their beliefs and philosophies, through their written works, through art, and through modern media such as film and television. Cross-listed with ENV 160.

HST 282 | AMERICAN INDIAN HISTORY, 18TH CENTURY TO THE PRESENT | 4 quarter hours (Undergraduate)

Through primary source readings, lectures, and scholarly essays, we will grapple with how American Indian people have been affected by U.S. settler colonialism, and how they have both adapted to and resisted social, political, economic, or cultural changes, broadly tracing changes over time from the 18th century to the present. Themes covered will include but not be limited to battles over sovereignty, civil rights, and self-determination.

HST 283 | ASIAN-AMERICAN IMMIGRATION AND HISTORY, 1840-1965 | 4 quarter hours (Undergraduate)

This course surveys Asian American history from the early nineteenth century to 1965. It explores the changing experiences of Asian immigrants and their citizen descendants in the United States within the larger context of immigration and race relations in American history. The course deals with the following broad themes: causes and processes of migration, responses from American society, and experience of immigration.

HST 284 | HISTORY OF EDUCATION IN THE UNITED STATES | 4 quarter hours (Undergraduate)

Thematic study of the educational developments in U.S. History.

HST 285 | ANCIENT ROME: AUGUSTUS TO CONSTANTINE | 4 quarter hours (Undergraduate)

This course examines the history of the Roman Empire from its beginnings under Augustus (27 BCE-14 CE) to its reorganization under Diocletian (284-305 CE) and Constantine (306-337 CE). Both textual and archaeological sources will be used to understand political, economic, and social developments.

HST 288 | WOMEN IN UNITED STATES HISTORY | 4 quarter hours (Undergraduate)

The history of women's work, family, and political lives in America.

HST 290 | ANCIENT EGYPT | 4 quarter hours (Undergraduate)

This course traces the developments of Egyptian civilization from its earliest beginnings to the Arab/Muslim conquest. Emphasis will be on assessing material culture with students being introduced to techniques of Egyptian archaeology and papyrology.

HST 291 | ANCIENT WORLD HISTORY: MESOPOTAMIA AND THE FERTILE CRESCENT | 4 quarter hours
(Undergraduate)

Analyzes the early civilizations in the Fertile Crescent through an examination of material culture. Attention will also be given to the archaeology and archaeological methods of the Near East including Jericho and Catalhoyuk.

HST 292 | KINGS, CASTLES AND CATHEDRALS: THE WORLD OF MEDIEVAL ENGLAND | 4 quarter hours
(Undergraduate)

A survey of cultural, social, economic, and constitutional developments in England from the Norman Conquest to the Glorious Revolution.

HST 293 | ISLAND AND EMPIRE: MODERN BRITAIN SINCE 1688 | 4 quarter hours
(Undergraduate)

A social, economic, cultural, and political survey of modern Britain and the British Empire. Topics covered will include the industrial revolution, the class system, the constitution, colonial expansion, and English literature. The course will situate the history of modern Britain within the context of European and world civilizations.

HST 294 | ANCIENT GREECE | 4 quarter hours
(Undergraduate)

Traces the development of Greek civilization through an examination of material culture. Emphasis will be on the major monuments and artifacts of the Greek world from prehistory to the Classical Age. Students will also be introduced to techniques and methods of classical archaeology.

HST 295 | AMERICAN HISTORY AND FILM/TV | 4 quarter hours
(Undergraduate)

This course examines American History and popular media. Depending on the instructor, it may focus on how American History has been depicted in popular media or it may emphasize the history and development of popular media. Contact instructor for syllabus.

HST 296 | ANCIENT ROME: ORIGINS TO THE END OF THE REPUBLIC | 4 quarter hours
(Undergraduate)

This course traces the development of Rome from a small settlement on the banks of the Tiber in the eighth century BCE to a Mediterranean power in the first century BCE. Both textual and archaeological sources will be used to understand political, economic, and social institutions of the Archaic and Republican periods.

HST 297 | IMPERIAL SPAIN, 1469-1808 | 4 quarter hours
(Undergraduate)

Analysis of Spain and Spanish empire between 1468-1808. During this period, Spain united and became a leading global power with enormous consequences for Western and world history. Emphasis on the political, economic, socio-cultural history of Iberian society.

HST 298 | INTRODUCTION TO HISTORICAL SOURCES AND METHODS | 4 quarter hours
(Undergraduate)

This is the first of two introductory core courses required of all history majors, history minors, and education majors with a concentration in history. In this course, students will learn the varied ways in which scholars interpret the past, focusing particularly on the evidence and arguments used by historians in their work. To that end, students will learn about the varieties of primary sources (textual, material, oral) as well as the varied methods historians use to analyze such evidence. In addition, students will practice analyzing primary source evidence in oral and written presentations, learn how to use the library for historical research, and how to discern scholarly arguments in secondary sources. **(WRD 103 and WRD 104) or HON 100 or HON 101 is a prerequisite for this course.**

HST 299 | CRAFT OF HISTORY | 4 quarter hours
(Undergraduate)

This course is the second of two introductory core courses required of all history majors, history minors, and education majors with a concentration in history. In this class, students will bring to bear the skills in historical sources and methods learned in HST 298 to complete a substantial independent research project. To that end, students will learn how to identify a historical question or problem about which to conduct research; how to find, obtain, and evaluate primary source evidence to research; how to build a secondary source bibliography using reference works, monographs, and scholarly journal articles; and develop and execute a coherent plan for writing and revising a substantial research paper (of at least 10 pages in length) based on an integrated use of both primary and secondary sources.

A grade of C- or above in HST 298 is a prerequisite for this course.

HST 300 | NEWBERRY LIBRARY SEMINAR | 4.5 quarter hours
(Undergraduate)

Along with undergraduate students from other universities, students participate in a research seminar at the Newberry Library, an internationally renowned institution for humanities and social science research. With guidance from an interdisciplinary team of instructors and professionals at the Newberry, each student carries out an original research project based on materials in the Newberry Library's collections. Seminar topics change annually. Admission is competitive, by application. Instructor permission is required to enroll.

HST 301 | U.S. LABOR HISTORY | 4 quarter hours
(Undergraduate)

This course will explore the history of American labor from 1877 to the present. We will particularly focus upon the work of recent American labor historians who examine such themes as the relationship between ethnicity, race, gender, and class; how and why work has changed; the role of unions, families, churches and other working-class institutions in workers' lives; the relationship between working-class cultures and mass cultures; and how capitalism, the state, and workers themselves have shaped class relations.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 302 | MAPS IN HISTORY AND CULTURE | 4 quarter hours
(Undergraduate)

Examines maps in multiple cultures and the relationship of these to local geographies and perception of place.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

**HST 303 | TOPICS IN LATIN AMERICAN HISTORY | 4 quarter hours
(Undergraduate)**

Topics in Latin American History.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

**HST 306 | COLONIAL LATIN AMERICA: POWER & DEVELOPMENT OF A MULTI-RACIAL SOCIETY | 4 quarter hours
(Undergraduate)**

The multicultural origins of colonial rule in the Americas from the 15th to the early 19th century.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

**HST 308 | EUROPE FROM CONFLICT TO CONSENSUS | 4 quarter hours
(Undergraduate)**

The course will examine the emergence of a European identity during the second half of the twentieth century. Special attention will be given to the evolution of the European Union and NATO as representative institutions.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

**HST 310 | INTER-AMERICAN AFFAIRS | 4 quarter hours
(Undergraduate)**

A mostly twentieth-century survey of political relationships between the United States and Latin American nations, emphasizing dependency and interdependence theories.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

**HST 311 | THE HISTORY OF THE CARIBBEAN: FROM COLUMBUS TO CASTRO | 4 quarter hours
(Undergraduate)**

The history of the Caribbean from colonial times to the present, with special emphasis on the factors that give each nation its particular character.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

**HST 312 | LATINOS IN THE UNITED STATES | 4 quarter hours
(Undergraduate)**

A survey of the history, politics, and culture of the major Latino groups in the United States: Mexicans, Puerto Ricans, Cubans, Dominicans, and Central Americans. Traces the history of these groups from the 19th century to the present by analyzing their impact on the United States.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

**HST 313 | THE OLD SOUTH | 4 quarter hours
(Undergraduate)**

Considers the history of the southern states before the Civil War, focusing especially on the growth of southern slavery, the development of African-American culture, the socio-economic features of a slave society, as well as the distinctive political and ideological contours of the region.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

**HST 314 | THE CUBAN REVOLUTION | 4 quarter hours
(Undergraduate)**

General analysis of the impact of the Cuban Revolution on Cuban society and the international political arena. The historical background of the revolution as well as its accomplishments and shortcomings will be emphasized.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

**HST 316 | GOD, SELF, AND SOCIETY IN MEDIEVAL CULTURE | 4 quarter hours
(Undergraduate)**

The roots of Western thought in medieval education, literature, philosophy, and science. The interactions between high theology, mysticism, and popular culture. History and autobiography.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

**HST 317 | INDIVIDUAL AND SOCIETY IN RENAISSANCE ITALY | 4 quarter hours
(Undergraduate)**

The flowering of culture, humanism and the arts in fourteenth- and fifteenth-century Italy. Renaissance politics, patronage and diplomacy. Religion and the Papacy.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

**HST 318 | THE AGE OF REFORMATIONS | 4 quarter hours
(Undergraduate)**

Late medieval religion and society; the Reformations of Luther and Calvin, and the Catholic reform movements. Nationalism and the state in sixteenth-century Europe. The expanding world.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

**HST 319 | IMMIGRANT AMERICA | 4 quarter hours
(Undergraduate)**

An overview of the ethnic experience in American society, how ethnic diversity has shaped America as America has re-shaped the lives of immigrants.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

**HST 320 | TOPICS IN WORLD HISTORY | 4 quarter hours
(Undergraduate)**

Variable topics. Consult course schedule for current listings.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

**HST 321 | TOPICS IN AFRICAN HISTORY | 4 quarter hours
(Undergraduate)**

Variable topics. Consult course schedule for current listings.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

**HST 322 | TOPICS IN ASIAN HISTORY | 4 quarter hours
(Undergraduate)**

Variable topics. Consult course schedule for current listings.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

**HST 323 | THE CULTURES OF EARLY CHRISTIANITY | 4 quarter hours
(Undergraduate)**

Late antique and early medieval intellectual history in social context.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 324 | COLONIAL LATIN AMERICA: AGE OF CONQUEST, 15TH - 17TH CENTURIES | 4 quarter hours**(Undergraduate)**

This course examines the complexities of the Age of Conquest and focuses on the historical experience of Indigenous societies during the early colonial period. Special attention is given to the social and economic structures of Indigenous societies before 1492, the Spanish exploration and conquest, the presence of Indigenous allies and their role in the dynamics of conquest/colonization, the demographic catastrophe that followed the conquest, and the social, cultural, and economic characteristics of early colonial societies.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 328 | ENGLISH CONSTITUTIONAL HISTORY | 4 quarter hours**(Undergraduate)**

A study of Anglo-Saxon institutions; feudalism after the Norman conquest; growth of the common law; foundations of Parliament and the development of central administrative systems.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 329 | SPECIAL TOPICS IN HISTORY | 4 quarter hours**(Undergraduate)**

Variable topics. Consult course schedule for current listings.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 330 | TOPICS IN EUROPEAN HISTORY | 4 quarter hours**(Undergraduate)**

Variable topics. Consult course schedule for current listings.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 331 | THE NATION AND NATIONALISM IN EUROPE | 4 quarter hours**(Undergraduate)**

Examines the emergence of nations and nationalism in modern Europe as well as nationalists' use and abuse of history.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 332 | FRENCH REVOLUTION AND NAPOLEON | 4 quarter hours**(Undergraduate)**

Analyzes the demise of the Old Regime, rise and fall of revolutionary idealism, and the emergence of Napoleon.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 333 | VICTORIAN ENGLAND | 4 quarter hours**(Undergraduate)**

A detailed study of selected political, social, economic and cultural themes in 19th century England.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 334 | BRITAIN IN THE TWENTIETH CENTURY | 4 quarter hours**(Undergraduate)**

An in-depth look at selected themes in recent British history including the economic and imperial decline of Great Britain.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 335 | THE AGE OF ENLIGHTENMENT IN EUROPE | 4 quarter hours**(Undergraduate)**

Analyzes European society and culture in the late 17th and 18th centuries and the intellectual movements that grew out of this historical context, which is frequently considered the cradle of modern Western history and thought.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 337 | REVOLUTION AND NATIONALISM IN IRELAND, 1798 - 1923 | 4 quarter hours**(Undergraduate)**

This course traces the evolution of Irish nationalism from the United Irishmen Revolt (1798) through the creation of the Irish Free State (1921) and the end of the Civil War (1923). It explores agrarian violence, parliamentary politics and armed revolt, focusing on how these combined to produce Irish independence.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 338 | THE GREAT WAR, 1914 - 1918 | 4 quarter hours**(Undergraduate)**

By using a variety of perspectives—social, cultural, intellectual, political—this course will examine and re-examine the ways that the First World War shaped and affected the modern world. After examining the broader causes of the war, the course will work outward from the battlefields to the home fronts, to the empires, and throughout the post-war world. Although this course focuses on European history, instructors may also examine its global context.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 339 | HISTORY FROM PICTURES: VISUAL CULTURE IN EAST ASIAN HISTORY | 4 quarter hours**(Undergraduate)**

How do historians use paintings, woodblock prints, lithographs, photographs, postcards, and other visual artifacts in understanding the past? How do visual objects differ from conventional documents as sources of historical evidence? In this course, we will investigate the methodological approaches to writing history using visual artifacts as primary source material. In particular, we will consider the impact of these issues on the writing of East Asian history.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 340 | CULTURE AND GENDER IN JAPAN | 4 quarter hours**(Undergraduate)**

Examines gender and society in early modern and modern Japanese history [c.1600-present].

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 341 | PEASANTS IN MODERN EUROPEAN HISTORY | 4 quarter hours**(Undergraduate)**

An analysis of the significance and ultimate disappearance of the peasantry, formerly the numerically dominant group in European society, emphasizing both its social history and the methods needed to study the non-literate.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 342 | TOPICS IN AFRICAN-AMERICAN HISTORY | 4 quarter hours (Undergraduate)

Variable topics. Consult course schedule for current listings.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 343 | CRIME AND PUNISHMENT | 4 quarter hours (Undergraduate)

What kinds of crimes were committed in the past? And how did societies punish the criminal? We will examine the changes in crimes and punishments from the eighteenth through the twentieth centuries in Europe, particularly the United Kingdom and her colonies. We will explore the ways that the developing state conceptualized and treated criminality and the consequences of state discipline on criminality.

A grade of C- or above in HST 298 is a prerequisite for this course.

HST 346 | AFRICAN-AMERICAN INTELLECTUAL HISTORY | 4 quarter hours (Undergraduate)

African-American contributions in the areas of philosophy, theology, politics, literature, and art from 1619 to the present.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 349 | THE HOLOCAUST | 4 quarter hours (Undergraduate)

This course places the Shoah, the Holocaust of European Jewry, at the center of a broader discussion of anti-Semitism, the rise of Nazism, the conduct of World War II, and the persecution and murder of other groups designated as outsiders or as enemies of the Nazi regime. Close attention is given to interpreting the behavior and experiences of perpetrators, victims, bystanders, and resisters, to the role of the churches, and to the politics of post-Holocaust legal proceedings and the complex work of memory and representation.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 352 | MEDIEVAL INDIA | 4 quarter hours (Undergraduate)

Examines the social, cultural and political histories of South Asia from prehistoric times to the waning of the Mughal Empire.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 353 | MODERN INDIA AND PAKISTAN | 4 quarter hours (Undergraduate)

Examines the modern history of India, giving special attention to India as a prototype of economic and political change in the Third World.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 354 | U.S. WOMEN'S HISTORY | 4 quarter hours (Undergraduate)

The purpose of this course is to introduce students to the history of women's work, family, and political lives in America. This intensive reading and discussion course is also designed to provide a detailed overview of recent historical literature and historiographic interpretations in American Women's history.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 355 | GANDHI AND THE WORLD | 4 quarter hours (Undergraduate)

This course is a political and intellectual history of the individual, his times, and his legacy. The course is designed around a thorough analysis of Gandhi's own writing, significant critiques, and his world legacy.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 359 | SOCIETY AND CULTURE IN THE LATE SOVIET ERA | 4 quarter hours (Undergraduate)

This seminar focuses on the society and culture of the USSR in the late Soviet period (i.e., from Stalin's death in 1953 to Gorbachev's resignation in 1991). It emphasizes themes such as: evolving notions of the individual in a collective society; tensions between emerging national (ethnic) and supranational (Soviet) identities; attitudes toward science and technology; city and countryside; consumption and consumerism; popular culture and celebrity, work and leisure, religion and orthodoxy; memory and commemoration; sexuality, gender roles, youth culture, and more.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 360 | DOING DIGITAL HISTORY | 4 quarter hours (Undergraduate)

This course introduces students to the rapidly expanding world of digital history. Students taking the course will enhance their understanding of the conceptual, theoretical, and ethical issues involved in doing digital history, and learn to use digital tools while working individually and collaboratively on digital history projects.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 361 | TOPICS IN ISLAMIC HISTORY | 4 quarter hours (Undergraduate)

Variable topics. Consult course schedule for current listings.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 362 | ATLANTIC HISTORY, 1492-1825 | 4 quarter hours (Undergraduate)

An examination of intercontinental exchanges and cross-cultural links across the Atlantic ocean that both separated and united the Western Hemisphere, Europe, and Africa in the pre-industrial era.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 363 | MODERN BALKANS (EUROPE) | 4 quarter hours (Undergraduate)

The establishment of national states, the social transformation from peasant to industrial societies, and the effects of war and revolution in southeastern Europe since the late 18th century.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 364 | PALESTINE UNDER THE BRITISH MANDATE | 4 quarter hours (Undergraduate)

This course examines the foundation and evolution of the British Mandate of Palestine from 1914 to 1948 in its British imperial, Middle Eastern, and world historical contexts. Students will engage primary and secondary sources associated with controverted issues, including Zionism, creation of the Mandate, immigration, and inter-communal conflict.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 365 | THE CRUSADES | 4 quarter hours**(Undergraduate)**

Addresses the European Crusades to the Holy Land from a World Historical Perspective.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 366 | THE MODERN MIDDLE EAST AND NORTH AFRICA | 4 quarter hours**(Undergraduate)**

The history of the region since 1800. Topics covered include the end of Ottoman Empire, the impact of European Imperialism and the renewal of Islam.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 367 | US-MEXICAN BORDERLANDS | 4 quarter hours**(Undergraduate)**

This course examines the history of the U.S.-Mexican borderlands from its creation in 1848 to the present. What makes the U.S.-Mexican borderlands so unique and volatile is that it is one of the few regions in the world where two nations that so distinct in economic formations, political systems, and cultural values come into permanent contact. The course will focus on key issues that have historically shaped the borderlands such as violence, contraband, migrations, race and income inequality.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 368 | SOCIAL MOVEMENTS IN LATIN AMERICA | 4 quarter hours**(Undergraduate)**

This course examines how Native Americans, slaves, peasants, and other subaltern people actively resisted their subservient status in Latin America. It will cover a variety of protest movements, from "pre-modern" (such as millenarian movements, slave rebellions, urban riots, and "race" wars) to "modern" (such as social revolutions).

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 369 | REVOLUTIONS IN LATIN AMERICA | 4 quarter hours**(Undergraduate)**

This course surveys, analyzes, and compares a series of revolutionary movements, conflicts, and regimes in 20th Century Latin America.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 370 | AMERICAN COLONIAL HISTORY | 4 quarter hours**(Undergraduate)**

The European's first contact, exploration, and settlement of the Eastern seaboard, with discussion of significant political, economic, and social consequences.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 371 | THE AMERICAN REVOLUTION | 4 quarter hours**(Undergraduate)**

The establishment of American independence, adoption of the Constitution; the first years of the republic considered in analytical detail.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 372 | ANTEBELLUM AMERICA | 4 quarter hours**(Undergraduate)**

This course treats the significant social, political, economic, and cultural developments shaping America and Americans during the first fifty years of the nineteenth century.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 373 | THE CIVIL WAR ERA | 4 quarter hours**(Undergraduate)**

This course examines the primary causes, events, and outcomes of the American Civil War, 1861-1865. Topics and themes include the sectional differences and similarities between the North and the South from 1820 until secession, including the role of slavery in fostering those sectional differences; the political crises that led to secession; aspects of military strategy and major military events of the war, including guerrilla warfare; the leading political figures of the period; the nature of life on the homefront; the impact of the war on slavery and the contributions of slaves and free blacks to the war; the role of gender and race in shaping the experience of the war; and dissent and disloyalty in both the Confederacy and the Union.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 374 | EMERGENCE OF MODERN AMERICA, 1877-1914 | 4 quarter hours**(Undergraduate)**

New cultural patterns, political party battles, growth of big business and organized labor, women's suffrage movement, Populism and the Progressive Era.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 375 | THE GREAT DEPRESSION AND THE NEW DEAL ERA | 4 quarter hours**(Undergraduate)**

A consideration of World War I, the Twenties, the Great Depression, and the New Deal.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 376 | THE UNITED STATES SINCE 1940 | 4 quarter hours**(Undergraduate)**

Significant developments in American life during the period after World War II.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 377 | HISTORY OF POVERTY IN THE UNITED STATES | 4 quarter hours**(Undergraduate)**

The class will examine changes in the underclass, in perceptions of the poor, and in the remedies used to address poverty in the United States from the late eighteenth to the early twenty-first centuries.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 378 | THE AMERICAN WEST IN THE 20TH CENTURY | 4 quarter hours**(Undergraduate)**

This course explores cultural, social, and political interaction in the American West during the 20th century. Themes include popular culture, state-federal relationships, environmental changes, urbanization, political and social movements, immigration, and cultural formation.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 379 | RECONSTRUCTION AND THE RISE OF JIM CROW | 4 quarter hours (Undergraduate)

This course covers the history and culture of the post-Civil War United States, particularly the political epoch called Reconstruction and the establishment of the subsequent system of racial apartheid in the South commonly referred to as Jim Crow (approximately 1863-1930). Topics and themes include the major political, legal, and economic changes that occurred during the Reconstruction period; African American political and social leadership during Reconstruction; the role of Civil War veterans in the United States; the role of gender and race in establishing new legal and cultural norms under Jim Crow; the central role played by violence, particularly lynching and extralegal terrorism, in creating and maintaining segregation; and the establishment of debt peonage and convict leasing as white-controlled systems of labor control.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 380 | GENDER, TECHNOLOGY AND CULTURE IN 20TH CENTURY AMERICA | 4 quarter hours (Undergraduate)

Why are cars and computers "masculine," but telephones and typewriters "feminine"? How did technological artifacts and systems constitute, mediate, and reproduce gender identities and relations? The course raises questions about the relationship between gender and technology, examining how everyday technologies defined and redefined the workplace, home, and personal identity.

HST 299 or instructor consent is a prerequisite for this course.

HST 381 | AMERICAN POPULAR CULTURE 1890s-1930s | 4 quarter hours (Undergraduate)

Students in this course will chart the rise of several industries, engage in close textual analysis of cultural products such as films and vaudeville performances, and study the reception and social impact of key figures, products, and events in the United States from the 1890s through the 1930s. Cross-listed with AMS 340.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 382 | CHICAGO HISTORY MUSEUM EXPERIENCE | 4 quarter hours (Undergraduate)

Experience history in Chicago. The course is taught by a Chicago History Museum (CHM) curator/archivist and takes place at the CHM. Expect group work and field trips. Students develop skills and knowledge relevant to public history careers, and will gain a firm conceptual understanding of public history historiography, and of how the Chicago History Museum does public history. Students apply this knowledge to class discussions, assignments, and actual museum projects.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 383 | BORDERLANDS AND FRONTIERS IN AMERICA | 4 quarter hours (Undergraduate)

Consideration of the changing conceptions of frontiers in American history with attention to the development of historical borderlands communities.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 384 | TOPICS IN AMERICAN HISTORY | 4 quarter hours (Undergraduate)

Variable topics. Consult course schedule for current listings.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 385 | UNITED STATES CONSTITUTIONAL HISTORY TO 1865 | 4 quarter hours (Undergraduate)

Examines the English colonial charters, the constitutional aspects of the American Revolution and the federal Constitution; explores ratification issues, judicial power, the concepts of the Federal system, separation of powers, Foreign Affairs and national security as defined in the U.S. Constitution with reference to major Supreme Court decisions in these areas.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 386 | UNITED STATES CONSTITUTIONAL HISTORY SINCE 1865 | 4 quarter hours (Undergraduate)

Problems of civil liberties, rights of accused, privacy and constitutional issues and controversies arising during and after World War II, including the major decisions of the Warren court, Burger court and Rehnquist court..

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 387 | TOPICS IN RUSSIAN HISTORY | 4 quarter hours (Undergraduate)

Each time this course is taught, it will examine in depth a specific problem, issue, theme, or moment in Russian history as described in the course subtitle. Possible offerings include: "Mass Culture in the Soviet Union and Post-Soviet Russia," "Stalin and Stalinism," "Crime and Criminality in Russia," "The Russian Revolution," "Gender and Sexuality in Russia," and "The Rise and Fall of the New Soviet Man."

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 388 | THE COURT AND THE U.S. BILL OF RIGHTS | 4 quarter hours (Undergraduate)

An examination of historical, philosophical, and legal developments related to the Bill of Rights in the U.S. Constitution. The course will also examine how the Bill of Rights has been affected by Supreme Court appointments, court decisions, and constitutional amendments.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 389 | TOPICS IN PUBLIC HISTORY | 4 quarter hours (Undergraduate)

Public history is a field of history that requires its practitioners to use the skills and methods of academic history with an eye towards connecting the public with that history. This seminar focuses on the skills, methods, sources and themes that are relevant to historians whose work takes them outside of the classroom. Theme of the seminar will vary with instructors. Some off-campus fieldtrips may be required.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 390 | CAPSTONE IN HISTORICAL RESEARCH AND WRITING | 4 quarter hours (Undergraduate)

The History Capstone in Historical research and Writing allows students to engage in deep and sustained historical research and writing, with multiple opportunities for instructor feedback and student revision. It is also an excellent way for students to experience firsthand the linkages between broad reading in a given field and subsequent primary-source based research in that field. Every autumn and winter quarter, certain 300-level course offerings will be designated as Capstone-linked classes. Students ready to take this course can choose among the offerings as suits their interests.

A grade C- or above in HST 299 is a prerequisite for this class.

HST 391 | DOING LOCAL AND COMMUNITY HISTORY | 4 quarter hours (Undergraduate)

Collaborative learning groups work with community partners to produce tangible end-of-quarter public history projects. This course carries experiential learning credit.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 392 | PUBLIC HISTORY INTERNSHIP | 4 quarter hours (Undergraduate)

Students have interned with the National Parks Service, the Field Museum, the DuSable, the Chicago History Museum, the Floating Museum, the Evanston History Center, the Frances Willard House Museum and Memorial Archives, the National Public Housing Museum, the Peggy Notebaert Nature Museum, Lake County Historical Museum, and a host of other archives, museums, and historical organizations. In addition to evaluations from a site supervisor, a faculty member assigns readings and evaluates students' reflective writing. The Public History Concentration Director can discuss internship search strategies with students (at least a quarter in advance), and can help students match interests with public history venues. Note: internship placement is incumbent upon the student.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 394 | AFRICAN-AMERICAN URBAN HISTORY | 4 quarter hours (Undergraduate)

Examination of the African American experience in American cities: from slave era, to the migration, to the present.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 395 | ISSUES IN NON-U.S. LEGAL HISTORY | 4 quarter hours (Undergraduate)

Designed to develop in the prelaw student analytical and adversarial skills useful in the practice of law, and to confront controversial issues dealing with values of the lawyer and the citizen.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 396 | ORAL HISTORY: MEMORY, METHOD AND PRACTICE | 4 quarter hours (Undergraduate)

An introduction to the techniques of oral history with particular emphasis on public history.

A C- or better in HST 298 (or instructor consent) is a prerequisite for this course.

HST 398 | STUDY TOUR | 1-8 quarter hours (Undergraduate)

An in-depth, on-site overview of the historical, political, social and economic reality of a foreign country. Credit variable.

HST 399 | INDEPENDENT STUDY | 1-4.5 quarter hours (Undergraduate)

Majors only. Credit variable.

Junior standing or above is a prerequisite for this class.

HST 421 | THE HISTORICAL DISCIPLINE | 4 quarter hours (Graduate)

This course introduces students to the fundamental concerns and skills necessary for the study of history at the graduate level. It does this by providing a "history of history," giving students an overview of the growth and development of the academic discipline of history, by addressing issues of methodology, historiography and historical philosophy, and by providing students with an awareness of current concerns, controversies, and debates in the discipline. Restricted to students in the MA in History program.

Status as an MA in History student is a prerequisite for this class.

HST 422 | SEMINAR IN PRIMARY SOURCE ANALYSIS | 4 quarter hours (Graduate)

This course builds upon HST 421. It focuses on issues raised by the analysis of historical evidence, and exposes students to the many practical and theoretical tools by which historians construct historical knowledge out of this "raw" material. The course will include study of primary sources, methods of analysis and authentication, and ways in which different kinds of sources are integrated into coherent historical narratives.

HST 431 | COLLOQUIUM IN AMERICAN HISTORY | 4 quarter hours (Graduate)

Variable topics. Consult course schedule for current listings.

HST 432 | COLLOQUIUM IN LATIN AMERICAN HISTORY | 4 quarter hours (Graduate)

Variable topics. Consult course schedule for current listings.

HST 433 | COLLOQUIUM IN AFRICAN HISTORY | 4 quarter hours (Graduate)

Variable topics. Consult course schedule for current listings.

HST 434 | COLLOQUIUM IN ASIAN HISTORY | 4 quarter hours (Graduate)

Variable topics. Consult course schedule for current listings.

HST 435 | COLLOQUIUM IN EUROPEAN HISTORY | 4 quarter hours (Graduate)

Variable topics. Consult course schedule for current listings.

HST 436 | COLLOQUIUM IN ISLAMIC HISTORY | 4 quarter hours (Graduate)

Variable topics. Consult course schedule for current listings.

HST 437 | COLLOQUIUM IN WORLD HISTORY | 4 quarter hours (Graduate)

Variable topics. Consult course schedule for current listings.

HST 438 | COLLOQUIUM: SPECIAL TOPICS IN HISTORY | 4 quarter hours (Graduate)

Variable topics. Consult course schedule for current listings.

**HST 489 | GRADUATE CAPSTONE | 4 quarter hours
(Graduate)**

This is an intensive seminar in which students are asked to analyze a number of important works of scholarship drawn from the breadth and complexity of the historical discipline. The course allows students to synthesize the many skills they have learned in their earlier classes, notably the ability to read and assess historical monographs. They will thereby demonstrate their competence in analyzing historical arguments, their knowledge of both historiography and historical content, and their proficiency in understanding the variety of primary sources and methods of interpreting them.

**HST 492 | GRADUATE INTERNSHIP | 4 quarter hours
(Graduate)**

Internship.

**HST 497 | INDEPENDENT STUDY | 4-8 quarter hours
(Graduate)**

Independent Study.

**HST 499 | THESIS RESEARCH | 4-8 quarter hours
(Graduate)**

Between four and eight hours credit to be determined by the department.

**HST 500 | CANDIDACY CONTINUATION | 0 quarter hours
(Graduate)**

This 0-credit hour course is available to master's degree candidates who are actively working toward the completion of a thesis, project, or portfolio. Enrollment in this course is limited to three quarters and requires thesis/project advisor and graduate director approval and demonstration to them of work each quarter. Enrollment in this course allows access to the library and other campus facilities. This course carries and requires the equivalent of half-time enrollment status. The student may be eligible for loan deferment and student loans. This course is graded as pass/fail. (0 credit hours)

**HST 501 | CANDIDACY MAINTENANCE | 0 quarter hours
(Graduate)**

This 0-credit hour course is available to graduate students who are not registered for a course in a given quarter but need to maintain active university status. Enrollment in this course is limited to three quarters and requires permission of the graduate director. Enrollment in this course allows access to the library and other campus facilities. This course does not carry an equivalent enrollment status and students in it are not eligible for loan deferment or student loans. This course is not graded. (0 credit hours)

Honors (HON)

**HON 100 | RHETORIC AND CRITICAL INQUIRY | 4 quarter hours
(Undergraduate)**

This course covers the fundamentals of research and leads students through a sequence of writing assignments which require them to take positions and persuade audiences about issues of public concern. Students will create effective academic discourse, develop critical thinking skills, explore issues of form and style, and examine arguments. HON 100 is required for all Honors students. Open only to students in the University Honors Program.

Membership in the University Honors Program is a prerequisite for this class.

**HON 101 | WORLD LITERATURE | 4 quarter hours
(Undergraduate)**

Honors 101 focuses on the way writers use language to construct their worlds. Reading, writing, and informed discussion are at the heart of this course, which uses texts from a range of cultures and historical periods to explore how literary works represent issues of human importance.

Membership in the University Honors Program is a prerequisite for this class.

**HON 102 | HISTORY IN GLOBAL CONTEXTS | 4 quarter hours
(Undergraduate)**

With the goal of enhancing historical literacy and critical thinking, this course invites students to explore how the interdisciplinary tools of historical inquiry aid them in their encounter with the multicultural past through study of a particular society or societies. Students discover how historians extract meaning from primary and secondary sources while exploring the problems and issues involved in analyzing and using a variety of sources. Topics of this course vary and are set by the faculty. Each section of HON 102 will be subtitled to indicate its topic; please see the schedule for current offerings.

Membership in the University Honors Program is a prerequisite for this class.

**HON 104 | RELIGIOUS WORLDVIEWS AND ETHICAL PERSPECTIVES | 4 quarter hours
(Undergraduate)**

This course helps students understand religious worldviews by allowing them to examine individual religious traditions. The course situates several religious traditions within a comparative framework; students gain knowledge of the nature and function of religion in a broad spectrum of human experience, encounter a variety of religious experiences and expressions, find in them common patterns, structures, and concerns, and become aware of the different ways of being religious. Each section will, in some way, address a variety of religious expressions and actions such as ritual, myth, ethics, cosmology, space, and time.

Membership in the University Honors Program is a prerequisite for this class.

**HON 105 | PHILOSOPHICAL INQUIRY | 4 quarter hours
(Undergraduate)**

Providing an introduction to philosophy as a mode of inquiry, this course explores, from a variety of perspectives, the questions central to the human condition, placing philosophical positions within the context of human values. Students will address the themes of knowledge, action, and human identity, considering how one thinks critically about such questions and what it means to inquire about the human condition in a rational manner. Readings will be drawn from both primary philosophical texts and relevant material from other disciplines.

Membership in the University Honors Program is a prerequisite for this class.

**HON 110 | HONORS DISCOVER CHICAGO | 4 quarter hours
(Undergraduate)**

Honors Discover Chicago courses acquaint first-year honors students with the metropolitan community, its neighborhoods, cultures, people, institutions, organizations and issues. Students will also learn about university life and resources and will become acquainted with the honors scholarly community. The course begins with Immersion Week, one week prior to the official start of the autumn quarter, then continues through the first eight weeks of the quarter. Learning in HON 110 is accomplished through a variety of means including first-hand observation, reflection, discussion, writing, site visits, and encounters with Chicagoans both in the classroom and on excursions. Students will select a particular Honors Discover course from available offerings. Students with credit for HON 110 cannot receive credit for HON 111.

Membership in the University Honors Program is a prerequisite for this class.

**HON 111 | HONORS EXPLORE CHICAGO | 4 quarter hours
(Undergraduate)**

Honors Explore Chicago courses acquaint first-year honors students with the metropolitan community, its neighborhoods, cultures, people, institutions, organizations and issues. Students will also learn about university life and resources and will become acquainted with the honors scholarly community. Learning in HON 111 is accomplished through a variety of means including first-hand observation, reflection, discussion, writing, site visits, and encounters with Chicagoans both in the classroom and on excursions. Students will select a particular Honors Explore course from the available offerings. Students with credit for HON 111 cannot receive credit for HON 110.

Membership in the University Honors Program is a prerequisite for this class.

**HON 180 | DATA ANALYSIS AND STATISTICS | 4 quarter hours
(Undergraduate)**

Using real-world data and open-ended investigations from a variety of disciplines, students apply quantitative and statistical reasoning skills to focus on outcomes of analysis. Students will explore the nature and description of data, probability theory, sampling, variability, estimation, analysis of correlation, hypothesis testing, and experiment design to become critical users of quantitative information. Open only to students in the University Honors Program.

Membership in the University Honors Program and (MAT 095 and MAT 100) or MAT 101 or placement by test are prerequisites for this class.

**HON 201 | STATES, MARKETS, AND SOCIETIES | 4 quarter hours
(Undergraduate)**

This course focuses on the organization of economic, political and social relationships within the global system, including analysis of how these relationships affect the distribution of power, resources, well-being and cultural capital in different societies. It covers such topics as phases in the growth of global trade and investment; the role of economic incentives; the historical and conceptual relationship between markets; social stratification, culture, and forms of popular participation; and the development challenges posed by international inequality and social marginality.

Membership in the University Honors Program, Sophomore standing or above, and HON 100 are prerequisites for this class.

**HON 203 | SEMINAR IN MULTICULTURALISM | 4 quarter hours
(Undergraduate)**

Students will choose from a variety of seminar offerings, each focusing on a specific complex issue related to issues of identity. The seminar will develop students' understanding of various dimensions of identity, such as race, nationality, ethnicity, class, gender, language, religion, sexual orientation, and disability.

Membership in the University Honors Program, Sophomore standing or above, and HON 100 are prerequisites for this class.

**HON 205 | INTERDISCIPLINARY ARTS | 4 quarter hours
(Undergraduate)**

This course offers interdisciplinary study of two or more art forms in a particular historical period, looking at relations among the arts and between art and its cultural contexts. Students will develop a critical vocabulary for the analysis of works in the visual arts, theater, music, literature, or other art forms. Work in the course will be interdisciplinary and will include readings, classroom exercises, visits to relevant performances or exhibits, and papers. Variable topics; please see the schedule for current offerings.

Membership in the University Honors Program, Sophomore standing or above, and HON 100 are prerequisites for this class.

**HON 207 | TOPICS IN COGNITIVE STUDIES | 4 quarter hours
(Undergraduate)**

Working under the assumption that processes of human thinking can be understood in formal and symbolic ways, this course is designed to introduce students to the interdisciplinary field of cognitive science by constructing and evaluating theories of how we perceive, speak, reason, and learn. Only open to students in the University Honors Program.

Membership in the University Honors Program, Sophomore standing or above, and HON 100 or WRD 104 are prerequisites for this class.

**HON 208 | TOPICS IN SOCIO-CULTURAL INQUIRY | 4 quarter hours
(Undergraduate)**

Focusing on the mutual impact of society, culture, and individuals, students will study and apply theories emphasizing human relationships as influenced by social and cultural forces.

Membership in the University Honors Program, Sophomore standing or above, and HON 100 or WRD 104 are prerequisites for this class.

**HON 225 | HONORS LAB SCIENCE TOPICS | 4 quarter hours
(Undergraduate)**

Students in Honors 225 will investigate a particular scientific topic or issue using readings, discussions, papers, and laboratory work. In the process of investigation they will learn about the nature and processes of science and will be able to describe and explain their work in writing; some projects may be done in teams. All sections of Honors 225 include a laboratory component. Please see the Schedule of Classes for current offerings.

HON 180 (or one of the following: MAT 135, MAT 137, MAT 140, MAT 150, MAT 242, PSY 240, IT 223, LSP 120) and membership in the University Honors Program are prerequisites for this class.

**HON 300 | HONORS RESEARCH SEMINAR | 2-5 quarter hours
(Undergraduate)**

This course, offered occasionally, invites students to enhance their skills in conducting research on issues of interest. Please see the schedule for current offerings. Open only to students in the University Honors Program.

HON 301 | HONORS JUNIOR SEMINAR IN MULTICULTURALISM | 4 quarter hours (Undergraduate)

This seminar asks students to conduct research on complex issues related to multiculturalism. Topics may cover various dimensions of identity including issues of race and ethnicity, class, gender, language, religion, sexual orientation, disability and nationality. Students are encouraged to develop a critical perspective about the meaning of multiculturalism and to understand the historical and/or contemporary manifestations of inequality. All students prepare research projects and participate in seminar discussions. Variable topics; please see the schedule for current offerings. This course meets the university's requirement in multiculturalism and the Honors Program Junior Seminar requirement.

Membership in the University Honors Program, Junior standing or above, and HON 100 or WRD 104 are prerequisites for this class.

HON 302 | SEMINAR IN SOCIAL JUSTICE | 4 quarter hours (Undergraduate)

Students will choose from a variety of seminar offerings, each focusing on systems of power, oppression, and privilege through a social justice lens. Students will investigate the underlying structures that create injustice in contemporary society, and they will study the ways in which racism and the legacy of colonialism perpetuate inequality and oppression. They will develop their research skills by researching at least one complex issue in depth and evaluating approaches to redressing systemic injustice and creating a more equal society.

Membership in the University Honors Program, Junior standing or above, and HON 100 or WRD 104 are prerequisites for this class.

HON 350 | HONORS SENIOR SEMINAR | 4 quarter hours (Undergraduate)

This course, which meets the capstone requirement for the University Honors Program, is designed to engage students in a discussion of meaning and values, and to foster skills in interdisciplinary research and writing. In a seminar setting, students explore a designated topic, develop related projects, and pursue work in an area defined by the Honors faculty member who designed the particular course. Seminars will be offered in broad interdisciplinary areas, allowing seniors to choose from diverse topics. Please see the schedule for current offerings. Only open to students in the University Honors Program.

Status as a senior in the University Honors program is a prerequisite for this class.

HON 351 | HONORS SENIOR SEMINAR IN SERVICE LEARNING | 4 quarter hours (Undergraduate)

This course, which meets the capstone requirement for the University Honors Program, is designed to foster skills in interdisciplinary research and writing. The course also brings students into the community to explore theories of service and the relationship between altruism and activism. Outside of class, students will devote a minimum of three hours each week to service work at one of the sites offered through the course, prompting them to consider the role that service will play in their lives after DePaul. This course also meets the university's Experiential Learning requirement for students who have not yet fulfilled this requirement. Only open to students in the University Honors Program.

Status as a senior in the University Honors program is a prerequisite for this class.

HON 395 | HONORS SENIOR THESIS | 4 quarter hours (Undergraduate)

Honors students are encouraged to undertake a senior thesis, an independent interdisciplinary research project proposed by the student and carried out under the supervision of a faculty advisor. Students electing to complete a senior thesis must submit an application signed by a faculty director and a two-page project description to the Honors Program Director by the eighth week of the quarter prior to that in which the project will be done. Completion of the thesis project meets the capstone requirement for the Honors Program. Open only to students in the University Honors Program.

Membership in the University Honors Program, Junior standing or above, and HON 100 or WRD 104 are prerequisites for this class.

HON 397 | HONORS STUDY TOUR I | 4-8 quarter hours (Undergraduate)

Study tours with faculty leaders. Research, reflection, and writing on site-specific topics and issues. Variable topics. See the Schedule for current offerings. Open only to students in the University Honors Program.

Membership in the University Honors Program is a prerequisite for this class.

HON 398 | HONORS STUDY TOUR II | 4-8 quarter hours (Undergraduate)

A continuation of Honors 397. See the Schedule for current offerings.

Membership in the University Honors Program is a prerequisite for this class.

HON 399 | HONORS INDEPENDENT STUDY | 2-4 quarter hours (Undergraduate)

Independent Study.

Membership in the University Honors Program is a prerequisite for this class.

Hospitality Leadership (HSP)

HSP 100 | INTRODUCTION TO HOSPITALITY | 4 quarter hours (Undergraduate)

This course takes a survey perspective in introducing students to the global hospitality industry, its associations, organizations and businesses. This course provides an overview of the historical evolution and development of modern, lodging, food & beverage, private club, meetings & events, and other hospitality related industries. Current and future career opportunities are explored.

HSP 101 | INTRODUCTION TO GLOBAL TOURISM | 4 quarter hours (Undergraduate)

This course takes a cross-disciplinary approach to examine the many facets of tourism. Specific analysis of world travel destinations, customs and traditions, visitor attractions, political, religious and other cultural differences as these relate to the tourism industry will be introduced.

This course evaluates tourism globally while identifying economic, socio-cultural, and environmental impacts on host destinations from the perspectives of the local communities as well as the traveler. The basic dimensions of sustainability, civic engagement, ethics, service and the historical perspective that are integral to the tourism industry will be covered from a social science perspective, in order to provide students with the kind of practical knowledge that can be applied in many fields of study.

HSP 200 | HOSPITALITY SERVICES AND EXPERIENCE MANAGEMENT | 4 quarter hours

(Undergraduate)

The concepts of service, service delivery and service recovery in different cultural and geographic contexts are explored. These include the full range from limited service through deluxe, the intentional decisions of management about what and how much service to offer, the quality of service, delivering service for rather than to someone, and how to transform a service event into a repeatable, memorable experience.

HSP 203 | HOSPITALITY LEADERSHIP & SELF DEVELOPMENT | 2 quarter hours

(Undergraduate)

The primary goal of the course is to move students towards the development and understanding of the foundations of leadership, differentiating leadership from management, and emphasizing the core traits and other personal qualities required of successful hospitality leaders. The course further focuses on the importance of a leader's character, values and professionalism as the basis for ethical decision-making in an organizational context. (2 quarter hours)

HSP 204 | HOSPITALITY LEADERSHIP & TEAMS | 2 quarter hours

(Undergraduate)

The successful delivery of hospitality products and services is often a result of interdisciplinary teams working together. In this course, students will explore the composition and functionality of hospitality teams, how guest and operational problems are identified and solved through group interaction and dynamics, and how team performance is assessed through guest satisfaction. (2 quarter hours)

HSP 207 | HOSPITALITY LAW, ETHICS & RISK | 2 quarter hours

(Undergraduate)

Legal and ethical concepts in the hospitality industry are explored. Laws specific to the hospitality industry are introduced. Ethical perspectives are identified and applied to hospitality operations. Administrative law and government regulation of hospitality is also discussed.

HSP 208 | MANAGING PEOPLE & THE CHICAGO UNION ENVIRONMENT | 2 quarter hours

(Undergraduate)

The unique qualities of human resources management relative to all segments of the hospitality industry are explored in this class. The five major areas of focus Include: (a) recruitment and selection (b) training and career development (c) turnover and retention (d) recognition and performance management and (e) labor relations within the hospitality industry. Specific attention is paid to approaches used by unions to organize as well as methods used by management to combat labor organization.

HSP 100 is a prerequisite for this class.

HSP 250 | MANAGING YOUR HOSPITALITY CAREER | 2 quarter hours

(Undergraduate)

This course is designed to explore and manage the professional expectations, career realities, and opportunities of your hospitality major. Students will participate in hands-on resume building activities, practice interviews, and apply research and evaluation skills to execute job search and career management strategies. Students will learn about Career Center resources and internship opportunities as ways to prepare for successful job searches and to maximize their potential for long-term professional growth. (2 quarter hours)

HSP 301 | LEADERSHIP SPEAKER SERIES I | 1 quarter hour

(Undergraduate)

Industry professionals will address service leadership and current issues in hospitality and tourism. Speakers will address the role of leadership in the creation and delivery of service. This course should be completed during a student's junior year. (1 quarter hour)

HSP 302 | LEADERSHIP SPEAKER SERIES II | 1 quarter hour

(Undergraduate)

Industry professionals will address service leadership and current issues in hospitality and tourism. Speakers will address the role of leadership in the creation and delivery of service. This course should be completed during a student's senior year. (1 quarter hour)

HSP 303 | HOSPITALITY INTERNSHIP I | 2 quarter hours

(Undergraduate)

This course is a supervised and structured industry learning experience. It is designed for students to concurrently obtain practical experience and course credit through a formal internship in a functional department within hospitality operations. Site is to be chosen in collaboration with faculty. Students must win acceptance through an interview with a hospitality professional who will supervise the practicum. Potential sites could include one of Chicago's many hotels, private clubs, convention centers, tourism offices, airports, airlines, spas or restaurants. Students are required to work a minimum of 50 hours needed for completion over a 10-week quarter. (2 quarter hours)

HSP 304 | HOSPITALITY INTERNSHIP II | 2 quarter hours

(Undergraduate)

This course is a supervised and structured industry experience. It is designed for students to concurrently obtain practical experience and course credit through a formal internship in a functional department within hospitality operations. This course reflects the importance of providing additional real-world job experience within a unique sector other than that experienced from the student's completion of their first internship. This course is designed to advance and contrast students experiences within both practica.. Site is to be chosen in collaboration with faculty. Students must win acceptance through an interview with a hospitality professional who will supervise the practicum. Potential sites could include one of Chicago's many hotels, clubs, convention centers, tourism offices, airports, airlines, spas and restaurants. Students are required to work a minimum of 50 hours needed for completion over a 10-week quarter. (2 quarter hours)

HSP 303 is a corequisite for this class.

HSP 309 | ADVANCED HOSPITALITY METRICS AND ANALYTICS | 4

quarter hours

(Undergraduate)

This course develops the ability to define and solve complex real-world problems within the hospitality industry. Unique hospitality performance metrics, such as lodging metrics (RevPAR), foodservice metrics (food & beverage cost), and event metrics (ROI, session analytics), will be identified and evaluated. Aspects of the analytical process will be addressed including: problem definition, data collection, quantitative concepts & methodologies, data analysis and storytelling. The unique qualities of financial management and managerial accounting relative to the hospitality industry are also explored in this course. Real-world data and reporting from hospitality management applications will be developed to support decision-making. Students will utilize Excel and hospitality specific data visualization software to report findings.

BUS 102, MAT 137 and ACC 102 are prerequisites for this course.

**HSP 320 | PRIVATE CLUB MANAGEMENT | 4 quarter hours
(Undergraduate)**

This course explores the management of, and leadership roles within, private city, country, and athletic clubs. Topics include: the general manager function; organizational structure of clubs; the role of the board of directors; membership requirements; equity and non-equity clubs; tax-exempt clubs and nontax-exempt clubs; duties and leadership responsibilities of department heads in private clubs; governmental regulations; the future of clubs; and the relationship of private clubs to the hospitality industry.

**HSP 321 | FOOD PRODUCTION MANAGEMENT | 2 quarter hours
(Undergraduate)**

This laboratory-based course is an introduction to the basic principles of food production. Topics include culinary terminology, theory and application of food preparation techniques, food product identification and fabrication. (2 quarter hours)

A declared Club Management Concentration is a prerequisite for this class.

**HSP 322 | QUANTITY FOODSERVICE MANAGEMENT | 2 quarter hours
(Undergraduate)**

Analysis of factors affecting quantity food production and service in the foodservice industry, emphasizing adherence to food quality and service, ethical evaluation of food products and commercial equipment, planning and coordinating food production activities for large groups, and the impact of operations upon environmental sustainability. (2 quarter hours)

HSP 321 and a declared Club Management concentration are prerequisites for this class.

**HSP 323 | ADVANCED PRIVATE CLUB MANAGEMENT | 4 quarter hours
(Undergraduate)**

An in-depth, international, comprehensive study and analysis of the senior club manager's role in operating a successful private club. Focused on advanced methods and issues including: career planning, club bylaws and rules, legal and ethical concerns, facility design and management, special enterprises within the club, break even and financial analysis, club feasibility and marketing, research interests, membership services, CCM certification and promotion/public relations. Case studies and a comparison of international approaches to managing clubs will be used to augment lectures and discussions.

HSP 320 is a prerequisite for this class.

**HSP 330 | RESTAURANT OPERATIONS | 4 quarter hours
(Undergraduate)**

This course is designed to introduce the major components of food and beverage service management and to differentiate those components from management in other hospitality segments. The course focuses on management procedures, service styles and safety in food service operations. The course examines the basics of several types of restaurants, including independents and chains. Catering operations will also be addressed.

**HSP 331 | FOODSERVICE PURCHASING | 4 quarter hours
(Undergraduate)**

Details the standards of quality as applied to food, supplies and related products used in the foods industry. Provides methods and criteria for recognizing quality, evaluating, specifying, purchasing and inspecting these products. The use of technology in the purchasing component of the foodservice industry is detailed.

**HSP 332 | BEVERAGE MANAGEMENT | 4 quarter hours
(Undergraduate)**

This course is an overview of the commercial beverage industry. Emphasis is on management's role and responsibility in operating a facility serving alcoholic beverages. Principles and practices regarding the production, selection, purchasing, storage and service of beverage alcohol in the hospitality industry are detailed.

**HSP 333 | INTERNATIONAL WINE EDUCATION & MANAGEMENT | 4
quarter hours
(Undergraduate)**

The purpose of this course is to introduce students to wine management best practices in the hospitality industry. The course introduces students to the regional grape varieties and wine making styles around the globe along with the science that underlies practical wine production issues. The course focuses on multiple aspects of the wine service process, including understanding wine styles and products, judging quality, service techniques, creating food and wine pairings, developing sales and marketing promotions, and determining cost and pricing decision-making. Students must be legal drinking age by start of course.

**HSP 335 | CRAFT BEER EDUCATION AND MANAGEMENT | 4 quarter
hours
(Undergraduate)**

The course aims to introduce students to the business of craft beer. It emphasizes the process and ingredients of beer production and underlying science that impacts it, the history of traditional beer producing countries and regions, as well as the implications of style, quality and cost decisions that take place throughout the manufacturing of beer. The course will explore trends in the craft beer industry and how they impact the greater hospitality industry. The course will illustrate key impacts of business decisions in the development of brewery concepts, covering operations, legal requirements, equipment, and supplies. Additionally, sensory analysis, product knowledge, and service techniques will be taught.

**HSP 340 | LODGING PROPERTY MANAGEMENT | 4 quarter hours
(Undergraduate)**

Practices and systems utilized in the operational management of the hotel, including front office, reservations, uniform service, and housekeeping areas. Coordination with F&B, catering, sales & marketing, and other departments are explored. Computer systems used as property management systems are introduced and discussed.

**HSP 341 | RESORT & SPA MANAGEMENT | 4 quarter hours
(Undergraduate)**

The range of resort and spa operations are explored and analyzed. Key topics unique to these geographic and programmatic settings are discussed, including issues in guest relations, the design of programs and amenities, the role of golf courses, tennis facilities, swimming pools and water sports, spas, the impact of operations upon environmental sustainability, and the importance of conference/meeting events in the resort industry.

**HSP 342 | TIME SHARE MANAGEMENT | 4 quarter hours
(Undergraduate)**

The course focus is upon the concepts of timeshare management. Topics include historical background, development process, market analysis, exchange systems, ownership and calendar issues, ethical obligations, budgeting, and customer relations.

**HSP 343 | CASINO MANAGEMENT | 4 quarter hours
(Undergraduate)**

Explore the history and development of gaming, casino operations including slots, table games, sports and Internet betting, credit and casino accounting, casino hotels and casino foodservice, and the marketing of the core gaming products. A central focus will be on current trends as well as the primary management and financial elements unique to operating a casino.

**HSP 350 | EVENT PLANNING | 4 quarter hours
(Undergraduate)**

This course focuses on the fundamentals and core issues of event and meeting management. Development of time-lines, checklists and request for proposals are covered. The course emphasizes planning, budgeting, marketing, public relations, food and beverage and contract and lease negotiations.

**HSP 351 | EVENT TOURISM | 4 quarter hours
(Undergraduate)**

Provides a comprehensive coverage of worldwide tourism destinations, examining the basic principles of underlying the development of tourist demand, supply and transportation, together with a broad survey of world tourism by generating regions and by destination regions. The convention and visitors bureau (CVB) or local governmental tourism agency is discussed as an integral part of destination marketing and addresses its place and importance in the local hospitality industry and larger, general business community. Issues explored include organizational structure, financing, ethical decision-making, numerous audiences, impact upon environmental sustainability, and its sales and service missions.

**HSP 352 | EVENT PRODUCTION | 4 quarter hours
(Undergraduate)**

This course examines the production and execution of special events. It is designed to help hospitality leadership students learn the theories of event management with exposure to actual events and event planners. The student will learn how to formulate event strategies for destinations. The course will focus on planning, developing, managing, and implementing all types of events, such as entertainment events, corporate events, cultural events, sporting events and festivals.

HSP 350 is a prerequisite for this class.

**HSP 353 | EVENT SALES, SERVICE & PROMOTION | 4 quarter hours
(Undergraduate)**

The course focuses on the modes and methods of sales and promotion used in booking conventions and trade shows, including identifying sponsors marketing to attendees, exhibitors and other participants. The course also looks at the division of administrative responsibility in operations. Students will explore organizing, arranging and operating conventions, trade shows and expositions.

**HSP 355 | ADVANCED EVENT MANAGEMENT | 4 quarter hours
(Undergraduate)**

This course introduces advanced management and decision making specific to the events industry. Analysis of current issues and future trends in meeting, exhibition and event management and their impact on other sectors within the hospitality industry will be explored.

HSP 350 is a prerequisite for this class.

**HSP 362 | REVENUE, PRICING & DISTRIBUTION | 4 quarter hours
(Undergraduate)**

The principles and practices involved in hotel revenue maximization, pricing strategies, and distribution channels are the focus of this course. Topics will include definitions, roles and strategies as they relate to revenue, pricing and distribution. Additional discussion of inventory control and performance analysis will also be part of the class.

HSP 206 is a prerequisite for this class.

**HSP 372 | BRANDING & CUSTOMER LOYALTY | 4 quarter hours
(Undergraduate)**

Learn to identify branding strategies and the role branding plays in customer loyalty. As a focus, customer relationship management is explored. Topics include current trends and changes in the perceptions of branding and loyalty, as well as understanding customer demands, expectations and needs.

**HSP 386 | HOSPITALITY ACCOUNTING I: REVENUES & EXPENSES | 4 quarter hours
(Undergraduate)**

The application of accounting principles as utilized in the hospitality industry is explored. The purpose of this class is to advance the hospitality student's knowledge of accounting concepts related to the income statement using the hospitality industry version of the Uniform System of Accounts. The class increases the student's understanding of the importance of revenue recognition, expense classification, and matching of revenue and expenses for operational analysis purposes. Students will study payroll accounting, withholding and tax reporting requirements and regulations specific to the hospitality industry along with labor variances and their relevance to understanding operations and performance versus budgets.

A grade of C- or better in ACC 102 is a prerequisite for this class.

**HSP 396 | HOSPITALITY STRATEGY | 4 quarter hours
(Undergraduate)**

Hospitality strategy is a capstone course designed to expose students to a strategic perspective on issues that concern the firm as a whole. This viewpoint is integrative in that it draws on concepts from the functional disciplines (i.e. Marketing, Finance, Accounting, Operations) in the diagnosis, analysis and resolution of complex business situations. Students will read, discuss and apply a body of theory and techniques from the field of strategic management. The course emphasizes the development of practical problem solving skills. Corporate strategy is examined from the perspective of: strategic choice, the link between strategy and organization, and the management of strategic change. Examples will be drawn from various hospitality operations around the world. The course emphasizes the use of group decision-making, self-directed work teams, and formal group reports and presentations. **(FIN 300 or FIN 310), MGT 300, MKT 301 and Senior standing are prerequisites for this class.**

**HSP 398 | SPECIAL TOPICS IN HOSPITALITY | 4 quarter hours
(Undergraduate)**

Special Topics. Content and format of this course are variable. An in-depth study of current issues in hospitality. Subject matter and prerequisites will be indicated in class schedule.

**HSP 399 | INDEPENDENT STUDY | 4 quarter hours
(Undergraduate)**

Available to students of demonstrated capability for intensive independent work in Hospitality Leadership. (variable credit)

HSP 502 | MANAGING THE GUEST/EMPLOYEE EXPERIENCE | 4 quarter hours**(Graduate)**

This course is designed to examine highly developed principles of the guest experience, the guest/employee interface, and the role employee development and service delivery plays within the hospitality industry. Leadership of various hospitality service operations will be studied in the context of realms of experience and guest quality assurance. Experience realms will be grounded in the constructs of unique hospitality experiences that engage guests in an inherently personal way. Topics will include: customer care and loyalty programs, creativity and innovation, employee skill development, service operation strategies, product design, capturing guest identity, and customer co-creation.

HSP 503 | ADVANCED HOSPITALITY LEADERSHIP AND PERFORMANCE | 4 quarter hours**(Graduate)**

The goal of this course is to examine advanced hospitality leadership practices within the various industry segments. Leadership principles and hospitality management approaches will be examined through the lens of financial and human capital performance. Topics include: critical decision-making, hospitality team dynamics and service performance, financial feasibility in operational delivery, brand and marketplace competency, ethics and values.

HSP 505 | SERVICE & INNOVATION IN TOURISM DEVELOPMENT | 4 quarter hours**(Graduate)**

This course examines the interaction and interdependency of tourism technology and service systems in the context of tourism development, service leadership, innovation, and social media. Students will apply contemporary tourism development theory surrounding technology and service systems including: market development, human capital productivity, network-based service systems, efficiency and effectiveness in information processing, user generated content issues, and other opportunities.

HSP 506 | HOSPITALITY STRATEGY & OPERATIONAL PERFORMANCE | 4 quarter hours**(Graduate)**

The goal of this course is to evaluate and construct innovative hospitality strategies and then implement models of strategy within hospitality organizations. The course will enable students to analyze hospitality service systems through the lens of competitive strategy and service-oriented product positioning. Topics include: hospitality strategy, competitive analysis, systems thinking, service product life-cycle evolution, hospitality organizational structure and service systems, integrated hospitality operational diagnostics, and operational performance metrics.

HSP 550 | NON-PROFIT EVENTS MANAGEMENT | 4 quarter hours**(Graduate)**

Non-Profit event management is evolving into a complex and dynamic discipline within the hospitality industry. This course examines the nature and structural components of event management within the non-profit sector. The course design will incorporate event conceptualization and evaluation techniques unique to the non-profit hospitality product delivery. Topics will include: market segmentation, strategic analysis for event planning, financial literacy, managerial and operational logistics, governmental and non-governmental advocacy, sponsorship development and fundraising, contract execution and administration.

MGT 500 is a prerequisite for this class.

HSP 551 | NON-PROFIT FOODSERVICE MANAGEMENT | 4 quarter hours**(Graduate)**

Non-profit hospitality foodservice encompasses a broad array of institutions, associations and organizations on a local, regional and national level. This advanced course in non-profit foodservice management examines the leadership requirements associated with National philanthropic and local grass-roots community organizations including soup kitchens, meals on wheels programs, emergency shelters, community alliances, and food pantries. Topics include: menu development and nutritional elements of non-profit foodservice operations, licensing and inspection requirements, food handling and OSHA work safety guidelines, food sourcing and distribution, national and local initiatives programming, and developing marketing networks/partners.

MGT 500 and (MGT 502 or MGT 504) are prerequisites for this class.

HSP 561 | MANAGING REVENUE TO MAXIMIZE FINANCIAL PERFORMANCE | 4 quarter hours**(Graduate)**

This course explores revenue management within the hospitality industry from a comprehensive perspective as it pertains to the importance of generating business revenues and contributions to the overall service-firm financial performance. Revenue management principles and practices within the hospitality sector have advanced in both sophistication and complexity, increasing the need for enhanced development of human capital, investments in data analytics, and systems integrated approaches to successful revenue generation. Topics include: Inventory and price management, consumer behavior, e-commerce, and demand based forecasting.

HSP 562 | HOSPITALITY DISRUPTORS, CURRENT TRENDS, AND THEIR IMPLICATIONS FOR LEADERS | 4 quarter hours**(Graduate)**

This course examines current hospitality trends associated with industry disruptors and their impact on service distribution channels. Students apply critical thinking and decision-making skills to the complex relationships of revenue generation, expense management, current technologies, and operational benchmarks to achieve organizational profitability objectives. Topics include disruptions to global distribution networks, technology applications, branding perspectives, digital communications, customer segmentation, product marketing, competitive positioning, human capital resources, and service processes.

HSP 563 | HOSPITALITY RESEARCH ANALYSIS & FINANCIAL METRICS | 4 quarter hours**(Graduate)**

This course provides a comprehensive perspective of various hospitality financial performance constructs and key industry operating performance benchmarks, including how to design studies to collect the data to analyze. Students will learn the fundamentals of research methodology and then be indoctrinated to hospitality industry metrics and the critical nature of linking analysis with decision-making in order to achieve organizational profitability objectives. Topics include; research methodology, interpretation of financial statements, data collection, using research findings, and operations flow-through.

HSP 793 | PRACTICUM IN APPLIED HOSPITALITY LEADERSHIP | 4 quarter hours (Graduate)

Experiential learning plays an important role in applying academic knowledge to real-world business challenges and opportunities. This practicum in applied hospitality leadership engages students in a practical, experiential, multidisciplinary approach to learning, which fosters development of personal and professional skills. Under the direction of the course faculty, students assume the role of researchers/advisors to key Chicago hospitality organizations that seek guidance on business strategy or challenging operational issues. Projects might include; leadership assessments service-process improvements, service innovation, event planning, club management and others. Students work closely with sponsoring organizations and supervising faculty to identify the scope of the projects, collect information and conduct analysis, and then report findings and/or recommendations. Major outcomes include an oral presentation to faculty and a written report for management.

HSP 798 | SPECIAL TOPICS | 4 quarter hours (Graduate)

Content and format of this course are variable. An in-depth study of current issues in hospitality. Subject matter will be indicated in class schedule. Offered variably.

HSP 799 | INDEPENDENT STUDY | 4 quarter hours (Graduate)

Available to graduate students of demonstrated capability for intensive independent work in hospitality.

Human Centered Design (HCD)

HCD 421 | DESIGN AND HUMAN EXPERIENCE | 4 quarter hours (Graduate)

This foundational course focuses on understanding the design process and how users, communities, and society are impacted by technology. This course will cover a breadth of technologies such as educational technologies, health systems, social tools, games, etc. An interdisciplinary course that draws from the fields of computer science, psychology, sociology, and economics, students will reflect on the social, political, and economic context and impact of technology use locally and globally. PREREQUISITE(S): None.

HCD 450 | THEORIES AND METHODS IN HUMAN-CENTERED DESIGN | 4 quarter hours (Graduate)

This is a foundational course that introduces human-centered design methods and creative problem solving using a systems approach. Theories and methods that consider people as part of complex societies and the challenges of designing for impact are explored, with particular attention to approaches that involve technology and collaborations across organizations. In addition to core design methods such as interviews and contextual inquiry, students will learn and apply methods such as design workshops, diary studies, cultural probes, design charrettes, and experience prototyping. PREREQUISITE(S): NONE.

HCD 510 | RESEARCH METHODS AND PRACTICE OF SCHOLARSHIP | 4 quarter hours (Graduate)

This course provides students with in-depth knowledge of how to conduct a qualitative research study. Specifically, students will learn various approaches to conducting research including: ethnography, grounded theory, actor-network theory, and discourse analysis. Furthermore, students will learn how to propose a research study as well as how to effectively communicate research scholarship. PREREQUISITE(S): None.

HCD 525 | MEDIA THEORY PROSEMINAR | 4 quarter hours (Graduate)

This course explores the key traditions of disciplinary and theoretical inquiry that contribute to the study of Digital Media, including media theory, literary-critical theory, visual culture and the cultural studies of media, communications theory, and performance studies. Students will examine key texts in each of these areas and explore their application to representative digital artifacts. PREREQUISITE(S): None.

HCD 590 | ADVANCED TOPICS IN HUMAN CENTERED DESIGN | 4 quarter hours (Graduate)

HCD topic varies with offering. Contact instructor for more information. PREREQUISITE(S): Completion of the HCD core courses or consent of the instructor. May be repeated for credit.

HCD 599 | INDEPENDENT STUDY | 8.00 quarter hours (Graduate)

Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable Credit. PREREQUISITE(S): None (variable credit)

HCD 601 | HISTORY OF TECHNOLOGY AND SOCIETY SEMINAR | 4 quarter hours (Graduate)

This course will provide a foundational understanding of the historical relationship between technologies and humans with particular focus on how technological innovations have impacted shifts in how humans work, communicate, and learn. PREREQUISITE(S): None.

HCD 699 | RESEARCH | 8.00 quarter hours (Graduate)

Research course supervised by an instructor. Independent Study Form required. Variable credit. Can be repeated for credit. (variable credit)

HCD 701 | CANDIDACY DISSERTATION RESEARCH | 0 quarter hours (Graduate)
