

Trusted. Respected. Preferred.

Welcome

Our Institution has been changing lives for nearly half a century. Pima Medical Institute provides quality education that enables our students to develop the cognitive and technical skills that are in demand in today's growing health care industry.

Thanks to our founders' vision and the dedication of our faculty and staff, more than 130,000 graduates have accomplished the goal of advancing their education to expand their opportunities. Many are serving their communities through meaningful health care careers, while others have continued their formal education through our degree completion programs or those of another institution.

Our impressive network of alumni demonstrates the commitment of our educators. In this catalog, you will read success stories shared by some of our graduates. Each story speaks to the value of the education the graduate received at Pima Medical Institute. As our Chairman of the Board, Richard L. Luebke, Jr., says, "... the only real measuring stick of a school's success is the achievement of its students."

As president and CEO of Pima Medical Institute, I am proud to welcome you into the fold of our supportive educational environment. We are serious about what we do, and we want you to become the best health care professional you can be.

Fred Freedman, President & CEO

YOUR SUCCESS IS OUR PRIORITY

Each year, thousands of students like you enroll in our programs and find their path to a meaningful career and lifelong learning. Our students are respected as some of the most qualified professionals in their fields and are often employed at preferred hospitals, clinics, and facilities in their communities. At Pima Medical Institute, you can realize your dream of being a health care professional, and we'll be with you every step of the way.

Founders and Philosophy

Pima Medical Institute started changing lives in 1972, when Richard L. Luebke, Sr., and his wife, JoAnn, brought to life their dream of providing students with a quality medical career education. They opened the first campus in Tucson, Arizona and trained students to become nursing assistants.

Eventually, brothers Richard L. Luebke, Jr. and Mark P. Luebke took the helm, introducing more programs and opening additional campuses to meet the growing demand for qualified health care professionals. Today, we have 18 campuses educating nearly 10,000 students per year in eight states in the western United States, as well as a growing online presence.

Our philosophy is based in a firm belief in the worth and potential of each student. We take pride in our collective ability to help stimulate and promote a student's sense of discovery, excellence, and self-worth through our high-quality programs.

Mission, History, and Leadership

Our mission

Is to improve the quality of people's lives by providing the best value in medical career education.

Trusted. Respected. Preferred.

Pima Medical Institute is the trade name of Vocational Training Institutes, Inc., an Arizona Corporation doing business in the states of Arizona, California, Colorado, Montana, Nevada, New Mexico, Texas, and Washington with main campuses located in Tucson AZ, Aurora CO, and Albuquerque, NM.

Two stockholders or groups own the outstanding shares of stock in the corporation: (1) Luebke Family Trust, comprised of the Luebke Revocable UA Trust (trustee: Robert Fleming) and the Luebke Capital Irrevocable (trustee: Richard L. Luebke, Jr), located at located at 40 N Swan Road, Suite 100, Tucson, AZ 85711; and (2) the Employee Stock Ownership Plan (trustee: Argent Trust Company) located at 40 N Swan Road, Suite 100, Tucson, AZ 85711.

This 2020-2021 academic catalog is volume number VIII and is maintained electronically at www.pmi.edu. It is effective through December 2021 and supersedes all previous editions. The campus-specific addendum and supplemental information are related to Pima Medical Institute's academic catalog published and printed January of 2020. A printed version of this catalog and the campus-specific catalog addenda can be provided upon request. Pima Medical Institute reserves the right to change, without notice, any of the information published in this catalog. These changes will not affect currently enrolled students without prior written consent.

Information in this 2020-2021 academic catalog, and addenda to this catalog, are property and copyright of Pima Medical Institute. Photographs and images within this 2020-2021 catalog include students, graduates, and faculty of Pima Medical Institute. This catalog is not intended for advertising or for students to disburse.

Catalog Guide

How do I:

- Explore the programs offered at PMI?
Use the Table of Contents at the front of the catalog to locate the page numbers for the many program options.
- Find the meanings for certain terms and abbreviations used in this catalog?
Refer to the Abbreviations and Definitions on page 23.
- Learn more about admissions requirements?
Turn to the Prospective Students section, which begins on page 135.
- Find out more about PMI's history?
Read about the Founders of the Institution on page 1.
- Investigate financial aid options?
Turn to the Financial Services section, which begins on page 149.
- Locate PMI campuses?
Refer to the maps included with each program in the program pages section, which begins on page 25.
- Learn about campus services?
See the Who's Who On Campus on page 6.
- Read about PMI alumni experiences?
View Success Stories within some of the program pages, which begin on page 25.

What are:

• Clock Hours and Credit Hours?

One **clock hour** represents a minimum of 50 minutes of instruction. The number of hours in a program are typically divided among theory (didactic, lecture) hours, laboratory (lab) hours, and externship/clinical hours.

- One **credit hour** is awarded as follows:
 - 15 clock hours of theory
 - 30 clock hours of lab
 - 45 clock hours of externship/clinical

• Program Outlines?

In the program pages section of this catalog you will see that all PMI programs have a program outline. Most of these outlines are divided into sequences or semesters. Within each sequence/semester, each course includes the course prefix and number, course title, the number of theory hours, laboratory (lab) hours, externship/clinical hours, and credits. For example, in the sample semester shown below, for PTA 110:

PTA (course prefix), 110 (course number), Introduction to Physical Therapy (course title). The course has 30 theory hours, 15 lab hours, and no extern hours. The total clock hours for the course is 45, and the total number of credits is 2.5.

General Education and Technical Education Courses

Courses within a program may include general education (or gen ed) and technical education courses. Gen ed courses provide a common foundation in subject areas such as: arts, humanities, and communications; behavioral and social sciences; biological and physical sciences; and mathematics. Gen ed courses are italicized in the program outlines. Can you identify the gen ed courses in the sample semester below? (CMT 100, BIO 100, MTH 100, CCM 135, CLE 120.) Technical education courses provide students with the core technical knowledge and skills required by the chosen field of study. In the sample semester below, the PTA 110 course is a technical education course.

Sample Semester

Semester I					
Course #	Course	Theory	Lab	Extern	Credits
CMT 100	Medical Terminology	15			1.0
BIO 100	Anatomy & Physiology I	45	30		4.0
PTA 110	Introduction to Physical Therapy	30	15		2.5
MTH 100	Math & Physics Applications	45			3.0
CCM 135	Communications for the Health Professions	45			3.0
CLE 120	Law & Ethics	15			1.0
Semester I Total		195	45	0	14.5

Campus Information

Main Campus

Tucson, Arizona

2121 North Craycroft Road, Tucson AZ 85712
Phone: (520) 326-1600; Fax: (520) 326-3945; Website: www.pmi.edu

Institutional Accreditation: Accrediting Bureau of Health Education Schools (ABHES).

State Agency: Licensed by Arizona State Board for Private Postsecondary Education.

Program Accreditation

Nursing: The Bachelor of Science in Nursing (RN to BSN) at Pima Medical Institute is accredited by the Commission on Collegiate Nursing Education, 655 K Street, Suite 750, Washington, DC 20001, (202) 887-6791, www.ccneaccreditation.org.

Occupational Therapy Assistant: The Occupational Therapy Assistant program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), 4720 Montgomery Lane, Suite 200, Bethesda, MD 20814-3449, ph: (301) 652-AOTA, website: www.acoteonline.org. Graduates of the program will be eligible to sit for the national certification examination for the occupational therapy assistant administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be a Certified Occupational Therapy Assistant (COTA). In addition, all states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. Note that a felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure.

Pharmacy Technician: The Pharmacy Technician training and education program at Pima Medical Institute Tucson, Arizona is accredited by the American Society of Health-System Pharmacists/Accreditation Council for Pharmacy Education (ASHP/ACPE); American Society of Health-System Pharmacists, 4500 East West Highway, Suite 900, Bethesda, MD 20814; ashp.org.

Physical Therapist Assistant: The Physical Therapist Assistant Program at Pima Medical Institute is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE), 1111 North Fairfax Street, Alexandria, Virginia 22314; telephone: (703) 706-3245; email: accreditation@apta.org; website: <http://www.capteonline.org>. If needing to contact the program/institution directly, please call (520) 326-1600 or email pimaptatucson@pmi.edu.

Radiography: The Radiography program is accredited by the Joint Review Committee on Education in Radiologic Technology, 20 North Wacker Drive, Suite 2850, Chicago, IL 60606-3182, ph: (312) 704-5300, email: mail@jrcert.org.

Respiratory Therapy: The Respiratory Therapy Program, #200336, Associate of Applied Science, in Tucson, Arizona holds Continuing Accreditation from the Commission on Accreditation for Respiratory Care (www.coarc.com).

Veterinary Technician: The Veterinary Technician Program has been granted full accreditation by the AVMA Committee on Veterinary Technician Education and Activities.

Approved by: Bureau of Indian Affairs, Department of Economic Security/Department of Vocational Rehabilitation/Workforce Innovation and Opportunity Act, Tucson Urban League.

Member of: Arizona Council for State Authorization Reciprocity Agreement, Arizona Private School Association, Better Business Bureau, Career Education Colleges and Universities (CECU), National Council for State Authorization Reciprocity Agreement.

Selected Programs Approved for Veterans Educational Benefits by: Arizona State Approving Agency.

Description of Facilities: The Tucson Campus occupies approximately 82,728 square feet and is divided into 13 major instructional areas. Each area contains appropriate instructional equipment and furniture.

Nonmain campuses associated with the Tucson main campus: AZ: East Valley, Mesa; CA: Chula Vista, San Marcos; CO: Colorado Springs, Denver; NV: Las Vegas; NM: Albuquerque; TX: El Paso, Houston, San Antonio; WA: Renton, Seattle.

Each area contains appropriate instructional equipment and furniture. English as a Second Language Instruction is not offered by Pima Medical Institute, Chula Vista, CA.

Nonmain Campus San Marcos, California

111 Campus Way, Suite 100, San Marcos, CA 92078
Phone: (760) 299-4500; Fax: (760) 268-1168; Website: www.pmi.edu

Institutional Accreditation: Accrediting Bureau of Health Education Schools (ABHES).

State Agency: Approved by State of California Bureau for Private Postsecondary Education. Pima Medical Institute is granted approval to operate under the terms of California Education Code (CEC) section 94890(a)(1) until February 28, 2023 per CEC section 94890(b).

Program Accreditation

Occupational Therapy Assistant: The Occupational Therapy Assistant program at the San Marcos campus has applied for accreditation and has been granted Candidacy Status by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, Suite 200, Bethesda, MD 20814-3449. ACOTE's telephone number c/o AOTA is (301) 652-AOTA and its Web address is www.acoteonline.org. The program must have a preaccreditation review, complete an on-site evaluation, and be granted Accreditation Status before its graduates will be eligible to sit for the national certification examination for the occupational therapy assistant administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be a Certified Occupational Therapy Assistant (COTA). In addition, all states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. Note that a felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure.

Physical Therapist Assistant: Graduation from a physical therapist assistant education program accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE), 1111 North Fairfax Street, Alexandria, VA 22314; phone; (703) 706-3245; accreditation@apta.org is necessary for eligibility to sit for the licensure examination, which is required in all states.

Pima Medical Institute-San Marcos campus is seeking accreditation of a new physical therapist assistant education program from CAPTE. On May 22, 2019, the program submitted an Application for Candidacy, which is the formal application required in the pre-accreditation stage. Submission

Campus Information

of this document does not assure that the program will be granted Candidate for Accreditation status. Achievement of Candidate for Accreditation status is required prior to implementation of the professional/technical phase of the program; therefore, no students may be enrolled in professional/technical courses until Candidate for Accreditation status has been achieved. Further, though achievement of Candidate for Accreditation status signifies satisfactory progress toward accreditation, it does not assure that the program will be granted accreditation.

Respiratory Therapy: The Respiratory Therapy Program, #200494, Associate of Applied Science, in San Marcos, California holds Continuing Accreditation from the Commission on Accreditation for Respiratory Care (www.coarc.com).

Approved by: California Department of Public Health-Radiologic Health Branch, California Department of Public Health-Laboratory Field Services Branch, Workforce Innovation and Opportunity Act/San Diego Workforce Partnership.

Member of: Better Business Bureau, California Association of Private Postsecondary Schools, Career Education Colleges and Universities (CECU), San Marcos Chamber of Commerce.

Selected Programs Approved for Veterans Educational Benefits by: Department of Veterans Affairs, California Department of Consumer Affairs
Description of Facilities: The San Marcos Campus occupies approximately 40,000 square feet and is divided into 10 major instructional areas. Each area contains appropriate instructional equipment and furniture. English as a Second Language Instruction is not offered by Pima Medical Institute, San Marcos, CA.

Nonmain Campus Colorado Springs, Colorado

5725 Mark Dabbling Boulevard, Suite 150, Colorado Springs, CO 80919
 Phone: (719) 482-7462; Fax: (719) 482-7500; Website: www.pmi.edu

Institutional Accreditation: Accrediting Bureau of Health Education Schools (ABHES).

State Agency: Approved and regulated by Colorado Department of Higher Education, Division of Private Occupational Schools.

Program Accreditation

Pharmacy Technician: The Pharmacy Technician training and education program at Pima Medical Institute Colorado Springs, Colorado is accredited by the Accreditation Council for Pharmacy Education/American Society of Health-System Pharmacists (ASHP/ACPE); American Society of Health-System Pharmacists, 4500 East West Highway, Suite 900, Bethesda, MD 20814; ashp.org.

Veterinary Technician: The Veterinary Technician Program has been granted full accreditation by the AVMA Committee on Veterinary Technician Education and Activities.

Medical Laboratory Technician: The Medical Laboratory Technician program is programmatically accredited by the Accrediting Bureau of Health Education Schools (ABHES), 7777 Leesburg Pike, Suite 314N, Falls Church, VA 22043; (703) 917-9503; www.abhes.org, info@abhes.org.

Member of: Better Business Bureau, Career Education Colleges and Universities (CECU), Colorado Association of Career Colleges and Schools.

Selected Programs Approved for Veterans Benefits by: Colorado Office of Veterans Education and Training.

Description of Facilities: The Colorado Springs campus occupies approximately 32,000 square feet and is divided into seven major instructional areas. Each area contains appropriate instructional equipment and furniture.

Nonmain Campus Denver, Colorado

7475 Dakin Street, Suite 100, Denver, CO 80221
 Phone: (303) 426-1800; Fax: (303) 412-8752; Website: www.pmi.edu

Institutional Accreditation: Accrediting Bureau of Health Education Schools (ABHES).

State Agency: Approved and regulated by Colorado Department of Higher Education, Division of Private Occupational Schools.

Program Accreditation

Occupational Therapy Assistant: The Occupational Therapy Assistant program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), 4720 Montgomery Lane, Suite 200, Bethesda, MD 20814-3449, ph: (301) 652-AOTA, website: www.acoteonline.org. Graduates of the program will be eligible to sit for the national certification examination for the occupational therapy assistant administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be a Certified Occupational Therapy Assistant (COTA). In addition, all states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. Note that a felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure.

Ophthalmic Medical Technician: Accredited by the International Council of Accreditation for Allied Ophthalmic Education Programs.

Pharmacy Technician: The Pharmacy Technician training and education program at Pima Medical Institute Denver, Colorado is accredited by the Accreditation Council for Pharmacy Education /American Society of Health-System Pharmacists (ASHP/ACPE); American Society of Health-System Pharmacists, 4500 East West Highway, Suite 900, Bethesda, MD 20814; ashp.org.

Campus Information

Member of: Career Education Colleges and Universities (CECU).

Selected Programs Approved for Veterans Benefits by: Texas Veterans Commission.

Description of Facilities: The Houston Campus occupies 65,00 square feet and an extended Vet Tech facility that, together, is divided into 15 major instructional areas. There are six computer labs. The Dental Assistant classroom includes six dental chairs and three x-ray machines. Dental equipment includes an ultrasonic, an autoclave, curing lights, amalgamators, model trimmers, a polishing lathe, an x-ray developer machine, a panoramic radiography machine and digital equipment. The Dental Hygiene department includes a classroom, 2 labs, dental clinic, and dental clinic lobby. The dental clinic equipment includes two ultrasonics, four autoclaves, 20 dental chairs, ten digital x-ray operatories, and panelipse machine. The Diagnostic Medical Sonography lab has ultrasound machines with gray-scale imaging capabilities, color Doppler and spectral Doppler capabilities along with a machine that provides 3D and 4D features. The medical assistant and phlebotomy labs are well equipped with 3 blood drawing chairs, venipuncture arms, CPR mannequins, mannequin arms, EKG machine, an examination table, microscopes, an autoclave, a centrifuge, human skeleton, urinalysis machine, urinometers, pulse oximeter, nebulizer, a microhematocrit, an otoscope, and glucometers. The medical administrative assistant program uses two of the computer labs. The Pharmacy Technician classroom is well-equipped with drug shelving, digital scales, a cash register, graduated cylinders, a vent hood, and pharmaceutical supplies. The Occupational Therapy Assistant Program has positioning and adaptive equipment used with adults and pediatric populations to address a wide variety of orthopedic, sensorimotor, and neurological conditions. In addition, there is ADL and IADL training equipment and areas that include but are not limited to laundry, kitchen, and bathroom appliances and furnishings and physical agent modalities used to address underlying impairments. The Physical Therapist Assistant program lab space contains 10 exam tables, 2 treatment mats, parallel bars, a training staircase, a treadmill, a pulley weight system, and myriad assistive devices. It is also equipped with appropriate modalities to administer thermotherapy, cryotherapy, electrical stimulation, iontophoresis, ultrasound, hydrotherapy, infrared light, intermittent compression, and mechanical traction. The Radiography program has two fully functional digital radiography x-ray labs complete with skeletal models, phantoms, patient and occupational shielding, gurney, sponge sets, markers, imaging teaching files, and other radiograph equipment commonly utilized in a modern patient care hospital settings. Classroom has teaching videos, posters, and anatomic models. The Respiratory Therapy space includes a fully functional lab with air and oxygen (as needed), a simulation room with SimMan™, mechanical ventilators (invasive and noninvasive), pulse oximeters, and arterial blood gas practice arms. The Nurse Aide and Patient Care Technician programs have a fully equipped dedicated lab with four beds and accompanying wall boards. The Veterinary Assistant classroom hosts cages, exam tables, centrifuges, microscopes, refractometers, an autoclave, an x-ray view box, an otoscope, and anatomical models. The Veterinary Tech extended location is in partnership with an animal shelter, Citizens for Animal Protection, and the Pima facility is located at 17555 Katy Freeway and houses the Veterinary Technician program and is equipped with all American Veterinary Medical Association essential equipment and supplies including a full surgical suite, surgical prep area, radiography area, and laboratory area equipment.

Nonmain Campus San Antonio, Texas

6550 First Park Ten Boulevard, San Antonio, TX 78213

Phone: (210) 966-9764; Fax: (210) 966-8974; Website: www.pmi.edu

Institutional Accreditation: Accrediting Bureau of Health Education Schools (ABHES).

State Agency: Approved and regulated by Texas Workforce Commission, Career Schools and Colleges, Austin, TX.

Member of: Career Education Colleges and Universities (CECU).

Description of Facilities: The San Antonio campus occupies approximately 66,000 square feet and is divided into 18 major instructional areas. Each area contains appropriate instructional equipment and furniture. Each program has dedicated space for lecture classroom and laboratories. Additionally, there are computer labs/lecture classroom combinations for the Medical Assistant, Medical Administrative Assistant, Phlebotomy Technician, Veterinary Assistant, Pharmacy Technician, and the Career Prep sequence. There is a classroom dedicated for general use that can accommodate 30-40 seats and two computer labs that hold thirty seats each. There are private offices for administrative, financial aid, faculty, and Career Services, which occupy approximately 3,000 square feet of space near the main lobby. There is additional space to accommodate future programs as follows: Diagnostic Medical Sonography, Surgical Technology, Veterinary Technician, Respiratory Therapy, Radiography, and Sterile Processing Technician.

Arizona SARA Council

Pima Medical Institute is approved to offer fully online distance education programs to NC-SARA member states' residents through the Arizona portal agency AZ SARA, <http://azsara.arizona.edu/>. The State Authorization Reciprocity Agreement is a voluntary agreement among its member states and US territories that establishes comparable national standards for interstate offering of postsecondary distance-education courses and programs. The State Authorization Reciprocity Agreement is overseen by a National Council of State Authorization Reciprocity Agreement, NC-SARA. Pima Medical Institute is an approved NC-SARA institution through the home state of Arizona.

Definitions for Key Terms

A

academic progress warning status: Students in nonterm (certificate) programs who have not maintained a minimum cumulative program GPA of 2.0 in a sequence are placed on academic progress warning status.

academic transcript: A student's academic history, which includes the student's name, date of birth, address, campus, program, enrollment status, start date, last date attended, course numbers, course titles, credits attempted, credits earned, grades, quality points, grade point average, and degree earned (if applicable). *See also* official transcript.

academic year: A minimum of 24 credits and 30 weeks in length.

attendance advisement: Students with absences in excess of five (5) percent of the total number of classroom hours in a nonterm program (certificate programs) or term program (degree programs) receive attendance advisement.

attendance warning: Students with absences of 10 percent of the total number of classroom hours in a sequence, program, or semester are placed on attendance warning.

B

Blackboard®: The learning management system used at Pima Medical Institute.

blended education: Instruction within a program or course that is provided in on-ground and distance education formats.

C

Career Prep Sequence: The Career Prep Sequence is designed to help students develop a foundation for these certificate programs: Dental Assistant (non-California campuses), Medical Administrative Assistant, Medical Assistant, Medical Billing and Coding, Patient Care Technician, Pharmacy Technician, Sterile Processing Technician, and Veterinary Assistant. Students in these programs must complete the full Career Prep sequence prior to externship.

Career Prep Sequence					
Course #	Course	Theory	Lab	Extern	Credits
CSK 100	Study Skills	15			1.0
CAT 150	Anatomy, Physiology, and Terminology	55			3.5
CCB 100	Computer Basics		15		0.5
CMF 95	Math Fundamentals	20			1.0
CHS 100	CPR & First Aid	10	5		0.5
Career Prep Sequence Total		100	20		6.5

clinical, clinical externship/practicum: Practical, hands-on application of skills learned in the classroom and/or laboratory that are conducted under the supervision of a qualified health care professional.

certificate: Credential awarded for successful completion of an academic program, generally less than two years in length where a degree is not earned. *See also* degree.

clock hour: A clock hour represents a minimum of 50 minutes of instruction. The number of hours in a program are typically divided among theory (lecture), laboratory (lab), and externship/clinical components and determine the number of credits in a course. One (1.0) credit hour equals 15 clock hours of theory, 30 clock hours of lab, and 45 clock hours of externship/clinical.

copyright infringement: The act of exercising, without permission or legal authority, one or more of the exclusive rights granted to the copyright owner under section 106 of the Copyright Act (Title 17 of the United States Code).

Abbreviations and Definitions

course number, prefix: Portion of course title that identifies its program and/or course content, such as CSK 100, CAT 150, and so on.

credit hours: One credit hour represents 15 clock hours of theory (lecture), 30 clock hours of lab, and 45 clock hours of externship/clinical.

D
degree: Credential awarded for successful completion of an academic program; PMI awards associate degrees and bachelor degrees.

degree completion programs: Associate degree programs or bachelor degree programs intended for applicants who will transfer credits that they have successfully completed in a previous health-related certificate or degree program.

delivery method: Manner in which a course and/or program is delivered to the student. PMI courses are delivered on-ground, online, and/or blended. Delivery methods for courses in each program are identified in each program's listing in this catalog.

directory information: Information contained in a student's education record that would not generally be considered harmful or an invasion of privacy if disclosed.

distance education: An educational process in which the instructor and student are separated by distance, with regular and substantive interaction between student and instructor occurring either synchronously and/or asynchronously.

E
enrollment agreement: Contract between the student and Pima Medical Institute that sets forth such criteria as fees, expenses, and payment plan as well as other stipulations.

externship: See clinical, clinical externship/practicum.

F
Family Educational Rights and Privacy Act (FERPA): Protects the privacy of student education records.

Federal Student Aid (FSA): Financial aid available from federal government funding sources. The Financial Services section of this catalog provides information about the various types of FSA available to students.

financial aid: Monetary assistance available to help students in meeting educational program costs.

Free Application for Federal Financial Aid (FAFSA): Application used to determine eligibility for federal financial aid programs.

G
general education (gen ed) courses: Subject areas regarded to be the common experience of all "educated" persons, including subject matter from the humanities, mathematics, sciences, and the social sciences.

grade point average (GPA): The average value of the accumulated final grades earned in courses over time.

H
hybrid education: See blended education.

L
laboratory: The facility/classroom where students are actively instructed while practicing skills/procedures presented in theory.

learning management system: A platform for the administration and management of courses, activities, and resources.

M
method of evaluation: Element of PMI course syllabus that identifies the components that are evaluated to determine grades.

minimum educational requirements: Standards for minimum and maximum semester credits and/or semester credit hours. PMI follows standards set forth by ABHES, by the states in which PMI maintains a campus location, and by relevant programmatic accrediting bodies. Applicable programs: associate of occupational science degree, associate of applied science degree, bachelor of science degree, master's degree. Each of these programs requires minimum and maximum semester credits and/or semester credit hours relevant to the concentration (or subject matter) areas and general education content.

N
nonterm-based programs: Certificate programs. See also term-based programs.

O
official transcripts: An official transcript is a student's academic transcript that is printed on PMI transcript paper, signed by designated PMI administrators, stamped with the PMI school seal, and sealed in an official transcript envelope. See also unofficial transcripts.

online education: See distance education.

P
personally identifiable information: Includes but is not limited to the student's name, any unique identifier, including social security number, and other information that alone or in combination is linked or linkable to a specific student.

S
satisfactory academic progress: PMI's policy on satisfactory academic progress consists of a qualitative measure, which is the grade point average (GPA), and a quantitative measure, which is the maximum time frame in which the program must be completed. To maintain satisfactory academic progress, students are required to maintain a minimum GPA and/or complete the program within one and one-half (1½) times the program length in order to maintain federal financial aid and VA education benefits.

student to instructor ratios: Defines the number of students per instructor for specified classroom, laboratory, and clinic instruction. In general, the laboratory ratio of students to instructor does not exceed 20 to 1. The Texas classroom ratio does not exceed 30 to 1. In other states, the classroom ratio does not exceed 35 to 1. The online classroom ratio does not exceed 25 to 1. Programmatic variations are published in the catalog addenda.

student portal: For PMI students, the electronic data system that houses their grades and other academic information.

T
term-based programs: Degree programs. See also nonterm-based programs.

transcript: The permanent educational record of a student's academic performance. See also official transcripts, unofficial transcripts.

transfer credit: Credit awarded for previous education and/or life experience.

U
unofficial transcripts: Transcripts printed on standard white paper and without signatures or PMI seal.

unsatisfactory progress: Indicates that the minimum cumulative GPA required for a program while enrolled in that program has not been met; this status may impact financial aid eligibility.

W
Wonderlic Scholastic Level Exam / Wonderlic SLE: An aptitude exam that assesses cognitive ability and problem solving.

Dental Assistant • Course Descriptions

CSK 100 Study Skills

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course provides students an opportunity to learn and adopt methods to promote success in school, work, and life. Topics include strategies to help students develop and improve their skills in time and stress management, reading comprehension and memorization, listening and note taking, and test preparation.

Prerequisites: None

CAT 150 Anatomy, Physiology, and Terminology

Total Course Hours: 55 (55 Theory, 0 Lab, 0 Extern) Semester Credits: 3.5

This course is designed to provide students with a basic knowledge of anatomy, physiology, and medical terminology. Medical terms are learned within the context of the structures and functions of the body systems (integumentary, musculoskeletal, nervous, endocrine, lymphatic, immune, cardiovascular, respiratory, digestive, urinary, reproductive) and the senses. Content also addresses pathology, procedures, and medications involved in treatment.

Prerequisites: None

CCB 100 Computer Basics

Total Course Hours: 15 (0 Theory, 15 Lab, 0 Extern) Semester Credits: 0.5

Through demonstration and hands-on experience, students will gain a general understanding of computers. Hardware, software, Microsoft products, and internet use are explained.

Prerequisites: None

CMF 95 Math Fundamentals

Total Course Hours: 20 (20 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

The course reviews basic mathematical skills including whole numbers, fractions, decimals, proportions, ratios, percentages, combined applications, and measurement systems. It provides students with a solid foundation for higher math concepts.

Prerequisites: None

CHS 100 CPR & First Aid

Total Course Hours: 15 (10 Theory, 5 Lab, 0 Extern) Semester Credits: 0.5

This course follows recognized standards that are designed to prepare students to provide basic first aid assistance and cardiopulmonary resuscitation (CPR) for adults, children, and infants. Students learn how to perform as an effective team member during multi-rescuer CPR situations and how to demonstrate the proper use of an automated external defibrillator (AED).

Prerequisites: None

DEN 120 Dental Anatomy and Pathology

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course features the anatomy and pathology of the oral cavity, head, and neck. Content emphasizes tooth structure, composition, and identification, the stages of tooth development, developmental disturbances, and management of diseases that affect oral and maxillofacial regions.

Prerequisites: None

DEN 100 Fundamentals of Dentistry

Total Course Hours: 45 (30 Theory, 15 Lab, 0 Extern) Semester Credits: 2.5

This course presents an overview of dentistry, including the responsibilities of dental professionals in maintaining and delivering safe and ethical care in the dental office. Course content addresses the role of the dental assistant in promoting oral health and provides practical hands-on activities for students.

Prerequisites: None

DEN 105 Dental Office Administration

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course presents the fundamentals of dental office administration. Students participate in hands-on activities to learn and practice a variety of office-based skills. Topics include communicating with patients and coworkers, appointment scheduling, accounting procedures, ordering and maintaining office inventory, preparing and maintaining patient records and insurance forms, and practical applications of current dental-office software.

Prerequisites: None

DEN 130 Dental Pharmacology

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course presents various medications administered in the dental office and prescribed to patients for pain management and various dental procedures. Content includes drug categories, classifications, forms, dosages, and methods of administration, with special emphasis on anesthetics used in dentistry.

Prerequisites: None

Dental Assistant • Course Descriptions

DEN 170 Clinical Dental Procedures

Total Course Hours: 90 (15 Theory, 75 Lab, 0 Extern) Semester Credits: 3.5

This course addresses the practical skills required to assist with and chart for a wide range of clinical dental procedures in such specialties as endodontics, periodontics, orthodontics, oral surgery, and prosthodontics. Course content includes the zones of activity, instruments and materials preparation and transfer, moisture management, amalgam, composites, sealant and matrix placement, crown and bridge restorations, tooth isolation, oral evacuation, and dental dam barrier application.

Prerequisites: None

DEN 175 Dental Equipment Use and Care

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course addresses the identification, application, care, and maintenance of various pieces of dental equipment, including burs and other instruments. Students participate in hands-on activities to gain skill and confidence in handling dental equipment in the operator

Prerequisites: None

DEN 160 Dental Radiography

Total Course Hours: 100 (30 Theory, 70 Lab, 0 Extern) Semester Credits: 4.0

This course provides an overview of dental radiography. Content includes radiation safety procedures for patient and operator, factors affecting radiographic images, and techniques for producing, processing, and mounting radiographs. Students learn to identify radiographic landmarks and use dental manikins to gain practical experience in radiography procedures.

Prerequisites: None

DEN 165 Dental Materials

Total Course Hours: 20 (5 Theory, 15 Lab, 0 Extern) Semester Credits: 0.5

This course addresses the characteristics of the properties that comprise dental laboratory materials. Students participate in hands-on activities to learn how to create alginate impressions, prepare study models, and how to mix specified dental materials.

Prerequisites: None

DEN 250 Externship

Total Course Hours: 240 (0 Theory, 0 Lab, 240 Extern) Semester Credits: 5.0

This course provides students with opportunities to apply professional skills learned in the classroom.

Prerequisites: Career Prep and Professional Sequences I, II, and III

I have had a lot of dental work done in the past, including jaw surgery, which was scary and life changing. The dentists and dental hygienists were amazing, but it was the dental assistants who sat with me and provided comfort. I decided I wanted to be part of something that offered that kind of compassion.

I had been working in retail and hadn't been in school for 12 years, so the Dental Assistant program was definitely a challenge. A month before I started the program, my brother passed away. It was the most difficult time in my life, and it felt impossible to start something new.

When I came to PMI, I felt like I had all the support in the world, even before they knew my situation. My instructors helped me believe I could be successful, and the lifelong friends I made while at PMI were encouraging and shared my journey.

I did my externship at Community Health Center of Snohomish County. The advisors at PMI placed me there because they thought it would be a perfect fit, and it was—I was hired immediately as a dental assistant. I am currently working and going back to school with the goal of becoming a forensic odontologist, which is someone who applies dental science for identification of unknown remains and bite marks. I know it's a unique field, but I want to be able to offer compassion and bring closure to families.

I was at PMI during the most difficult time of my life, and I am incredibly thankful to PMI and everyone involved in my success.

Ally Jenkins
Certificate, Dental Assistant, Seattle Campus

Dental Assistant (California Campuses)

Objective: To develop in students the personal traits, communication, office, and assisting skills needed to perform as an effective entry-level dental assistant.

Graduates of this program receive a certificate and are eligible to apply to take the California Registered Dental Assistant (RDA) license exam.

Admissions Requirements: In addition to the Admissions requirements in the Prospective Students section of this catalog, applicants must obtain Basic Life Support/CPR certification prior to the program start date. One week prior to the start of classes, students must attend an orientation session that addresses the campus environment, basic oral anatomy, and infection control.

Dental Assistant (California Campuses) • Course Descriptions

DEN 103 Dental Radiography I

Total Course Hours: 45 (10 Theory, 35 Lab, 0 Extern) Semester Credits: 1.5

This course includes an overview of the basics of dental x-rays and x-ray equipment, film and digital processing, safety precautions, and responsibilities of both dental assistant and patient during radiography procedures. Students participate in hands-on activities to meet Dental Board of California requirements, including but not limited to bitewing and bisecting techniques.

Prerequisites: None

DEN 104 Fundamentals of Dentistry I

Total Course Hours: 19 (19 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course addresses key historical, legal, and ethical aspects of dentistry, including the California Dental Practice Act and the Health Insurance Portability and Accountability Act (HIPAA). Other topics include the roles of dental team members, communication techniques, stages of tooth development, infection control, and development of skills to promote career success.

Prerequisites: None

DEN 109 Clinical Dental Procedures I

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This course addresses the dental specialties of endodontics, orthodontics, and oral/maxillofacial surgery. Students participate in hands-on activities to learn the dental assisting skills required for the most common procedures performed in these specialties.

Prerequisites: None

DEN 113 Dental Office Administration

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course focuses on the routine aspects of dental office administration. Topics include patient and coworker communication techniques, patient scheduling in electronic and manual practice management systems, patient records, dental insurance, basic accounting, and office inventory.

Prerequisites: None

DEN 125 Fundamentals of Dentistry II

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course provides an overview of dental terminology related to basic dentistry, anatomical and oral structures, and tooth origin and formation.

Prerequisites: None

DEN 129 Clinical Dental Procedures II

Total Course Hours: 94 (20 Theory, 74 Lab, 0 Extern) Semester Credits: 3.5

This course addresses the dental specialties of pediatric dentistry and periodontics. Students participate in hands-on activities to learn the dental assisting skills required for the most common procedures performed in these specialties and as a Registered Dental Assistant, including pit and fissure sealants, coronal polish, and techniques to promote oral health and hygiene.

Prerequisites: None

DEN 123 Dental Radiography II

Total Course Hours: 45 (10 Theory, 35 Lab, 0 Extern) Semester Credits: 1.5

This course includes an overview of the basics of dental x-rays, film and digital processing, safety precautions, and responsibilities of both dental assistant and patient during radiography procedures. Students participate in hands-on activities to meet Dental Board of California requirements, including but not limited to paralleling techniques and full-mouth x-rays on one patient.

Prerequisites: None

DEN 136 Microbiology and Dental Pharmacology

Total Course Hours: 34 (20 Theory, 14 Lab, 0 Extern) Semester Credits: 1.5

This course introduces students to basic microbiology and dental pharmacology. Content includes microorganisms of concern in the dental office, infection control measures to prevent disease transmission, common medications administered in the dental office, and how to monitor patients who are sedated for dental procedures.

Prerequisites: None

DEN 144 Fundamentals of Dentistry III

Total Course Hours: 45 (30 Theory, 15 Lab, 0 Extern) Semester Credits: 2.5

This course provides an overview of general anatomy and physiology, head and neck anatomy, and preparation for patient care and emergency management in the dental office.

Prerequisites: None

Dental Assistant (California Campuses) • Course Descriptions

DEN 143 Dental Radiography III

Total Course Hours: 45 (10 Theory, 35 Lab, 0 Extern) Semester Credits: 1.5

This course includes an overview of the basics of dental x-rays, film and digital processing, safety precautions, and responsibilities of both dental assistant and patient during radiography procedures. Students participate in hands-on activities to meet Dental Board of California requirements, including but not limited to intraoral, extraoral, digital, and full-mouth x-rays on three patients.

Prerequisites: None

DEN 154 Fundamentals of Dentistry IV

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

Students will learn basic dental terminology and abbreviations related to patient examination, the impact of nutrition on dental health, and standard infection control and disease prevention practices in the dental office.

Prerequisites: None

DEN 149 Chairside Assisting

Total Course Hours: 64 (30 Theory, 34 Lab, 0 Extern) Semester Credits: 3.0

This course addresses basic concepts of chairside assisting, including patient management, instrument set up and transfer, tray systems, maintaining the operating field, oral pathology, and charting. Students participate in hands-on activities to learn a range of chairside skills required of the dental assistant.

Prerequisites: None

DEN 128 Clinical Dental Procedures III

Total Course Hours: 45 (15 Theory, 30 Lab, 0 Extern) Semester Credits: 2.0

This course addresses the dental specialty of prosthodontics and its associated procedures. Students participate in hands-on activities to learn the dental assisting skills required for the most common procedures performed in this specialty, including but not limited to crowns, bridges, dentures, implants, and teeth whitening.

Prerequisites: None

DEN 164 Fundamentals of Dentistry V

Total Course Hours: 19 (15 Theory, 4 Lab, 0 Extern) Semester Credits: 1.0

This course focuses on safety standards and procedures in dentistry. Content includes OSHA and Cal/OSHA regulations, the identification, handling, and disposal of hazardous materials, and the significance of Safety Data Sheets (SDS) in the dental office.

Prerequisites: None

DEN 152 Dental Materials

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This course is designed to acquaint students with various types of dental materials, including but not limited to dental cements, bases, liners, matrices, and wedges. Students participate in hands-on activities to learn and demonstrate proper techniques for dental procedures involving such materials as well as how to operate specified equipment.

Prerequisites: None

DEN 200 Externship

Total Course Hours: 200 (0 Theory, 0 Lab, 200 Extern) Semester Credits: 4.0

This course provides students with opportunities to apply professional skills learned in the classroom.

Prerequisites: Professional Sequences I, II, III, IV, and V

Medical Administrative Assistant • Course Descriptions

CSK 100 Study Skills

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course provides students an opportunity to learn and adopt methods to promote success in school, work, and life. Topics include strategies to help students develop and improve their skills in time and stress management, reading comprehension and memorization, listening and note taking, and test preparation.

Prerequisites: None

CAT 150 Anatomy, Physiology, and Terminology

Total Course Hours: 55 (55 Theory, 0 Lab, 0 Extern) Semester Credits: 3.5

This course is designed to provide students with a basic knowledge of anatomy, physiology, and medical terminology. Medical terms are learned within the context of the structures and functions of the body systems (integumentary, musculoskeletal, nervous, endocrine, lymphatic, immune, cardiovascular, respiratory, digestive, urinary, reproductive) and the senses. Content also addresses pathology, procedures, and medications involved in treatment.

Prerequisites: None

CCB 100 Computer Basics

Total Course Hours: 15 (0 Theory, 15 Lab, 0 Extern) Semester Credits: 0.5

Through demonstration and hands-on experience, students will gain a general understanding of computers. Hardware, software, Microsoft products, and internet use are explained.

Prerequisites: None

CMF 95 Math Fundamentals

Total Course Hours: 20 (20 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

The course reviews basic mathematical skills including whole numbers, fractions, decimals, proportions, ratios, percentages, combined applications, and measurement systems. It provides students with a solid foundation for higher math concepts.

Prerequisites: None

CHS 100 CPR & First Aid

Total Course Hours: 15 (10 Theory, 5 Lab, 0 Extern) Semester Credits: 0.5

This course follows recognized standards that are designed to prepare students to provide basic first aid assistance and cardiopulmonary resuscitation (CPR) for adults, children, and infants. Students learn how to perform as an effective team member during multi-rescuer CPR situations and how to demonstrate the proper use of an automated external defibrillator (AED).

Prerequisites: None

MAA 100 Office Management

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This course introduces students to the daily operations of the medical office environment, including basic policies/procedures, appointment scheduling, telephone etiquette, patient reception and processing, billing procedures, and financial and medical records management.

Prerequisites: None

MAA 102 Introduction to Insurance and Coding

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course presents the fundamentals of insurance billing and coding procedures, including terminology, types of insurance, and coding methods and forms. Students participate in hands-on activities to practice completing sample claim forms similar to those used in medical office environments.

Prerequisites: None

MAA 104 Business Writing and Electronic Health Records

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

Course content focuses on the development and application of the business writing and technology skills typically required in a medical office environment. Students complete a typing assessment and participate in hands-on activities to compose various business-oriented documents and to become familiar with the operational aspects and data-security considerations of electronic medical records systems and electronic health records systems.

Prerequisites: None

MAA 132 Communication

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

Course content introduces students to the types of professional communication skills expected of medical administrative assistants. Topics include basic terminology, patient and coworker interactions, verbal and nonverbal cues, and listening skills, among others. Activities offer students opportunities to practice communication exchanges typically encountered in the medical office environment.

Prerequisites: Professional Sequence I

Medical Administrative Assistant • Course Descriptions

MAA 134 Vital Sign Basics

Total Course Hours: 15 (0 Theory, 15 Lab, 0 Extern) Semester Credits: 0.5

This lab-based course provides a hands-on approach to obtaining and documenting a patient's vital signs as part of a medical record. Discussion topics include the purpose of the medical history, recognizing normal and abnormal vital sign values, accepted charting and documentation methods, and HIPAA compliance considerations.

Prerequisites: Professional Sequence I

MAA 136 Computer Applications for the Medical Office

Total Course Hours: 60 (15 Theory, 45 Lab, 0 Extern) Semester Credits: 2.5

This course emphasizes the development and application of computer-based skills required in the medical office setting. Lab time offers students focused opportunities to familiarize themselves and practice with common word-processing, spreadsheet, and presentation software.

Prerequisites: Professional Sequence I

MAA 138 Medical Billing and Coding

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course is designed to enhance students' knowledge of billing and coding procedures through discussion and hands-on practice. Topics include patient payment issues, diagnostic and procedural coding, insurance claim forms, and third-party reimbursement.

Prerequisites: Professional Sequence I

MDA 136 Medical Law and Ethics

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course addresses legal and ethical considerations relevant to the medical office setting. Content includes legal terminology, professional competence, scope of practice rules, and regulatory compliance issues with particular focus on HIPAA and patient confidentiality requirements.

Prerequisites: Professional Sequence I

MAA 142 Electronic Health Records

Total Course Hours: 60 (15 Theory, 45 Lab, 0 Extern) Semester Credits: 2.5

Course content builds upon students' prior knowledge of and experience with electronic health records (EHR). Through focused lab exercises, students practice navigating a basic EHR system intended to prepare them for the types of tasks they will encounter in the medical office environment.

Prerequisites: Professional Sequence I

MAA 144 Written Communication in the Medical Office

Total Course Hours: 45 (30 Theory, 15 Lab, 0 Extern) Semester Credits: 2.5

This course emphasizes development and refinement of basic writing skills for the medical office. Various assignments reinforce proper writing mechanics and grammar usage, attention to detail, spelling, correct use of medical terminology and symbols, and a range of skills related to medical documentation. Students are expected to practice their keyboarding skills and complete a typing assessment by the end of the course.

Prerequisites: Professional Sequence I

MAA 155 Externship

Total Course Hours: 240 (0 Theory, 0 Lab, 240 Extern) Semester Credits: 5.0

This course provides students with opportunities to apply professional skills learned in the classroom.

Prerequisites: Career Prep and Professional Sequences I, II, and III

After suffering a severe back injury that really took a toll on my health, I found myself realizing I had to make a career change. I saw a commercial for Pima Medical Institute and that same day I called the school. The next day I went to the campus for a tour, and two hours later I enrolled in the Medical Administrative Assistant program.

I had many struggles while in the program. I was dealing with back pain that was unbearable at times, making it difficult to sit in class. The campus staff were very accommodating to my needs, which I was very grateful for. Financial struggles started occurring fast. I had to leave my job because of my injury. With family living so far away, we had no place to go. The next couple of months my family and I stayed at a hotel. Trying to make ends meet was very tough; there were even a couple of nights we slept in the car and utilized food pantries just to get by. Everyone at the school was so kind and supported us in many ways. I had many people to lean on and they always provided a safe place to release my emotions.

I am currently employed as a clinical secretary at dialysis facility, and I love it! I am proud of myself for persevering. My health is better and my family has a place to call home. It was all worth it!

Teresa Benally

Certificate, Medical Administrative Assistant, Albuquerque West Campus

Medical Assistant

Objective: To develop in students the personal traits and professional skills needed to perform as competent entry-level medical assistants. Curriculum content addresses a range of topics, including anatomy and physiology, routine laboratory procedures, and patient care procedures commonly performed in medical offices.

Graduates of this program receive a certificate. The courses within the program are acceptable for credit toward PMI's Health Care Administration Associate of Applied Science Degree Program.

Admissions Requirements: Refer to the Admissions information in the Prospective Students section of this catalog.

Medical Assistant • Course Descriptions

CSK 100 Study Skills

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course provides students an opportunity to learn and adopt methods to promote success in school, work, and life. Topics include strategies to help students develop and improve their skills in time and stress management, reading comprehension and memorization, listening and note taking, and test preparation.

Prerequisites: None

CAT 150 Anatomy, Physiology, and Terminology

Total Course Hours: 55 (55 Theory, 0 Lab, 0 Extern) Semester Credits: 3.5

This course is designed to provide students with a basic knowledge of anatomy, physiology, and medical terminology. Medical terms are learned within the context of the structures and functions of the body systems (integumentary, musculoskeletal, nervous, endocrine, lymphatic, immune, cardiovascular, respiratory, digestive, urinary, reproductive) and the senses. Content also addresses pathology, procedures, and medications involved in treatment.

Prerequisites: None

CCB 100 Computer Basics

Total Course Hours: 15 (0 Theory, 15 Lab, 0 Extern) Semester Credits: 0.5

Through demonstration and hands-on experience, students will gain a general understanding of computers. Hardware, software, Microsoft products, and internet use are explained.

Prerequisites: None

CMF 95 Math Fundamentals

Total Course Hours: 20 (20 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

The course reviews basic mathematical skills including whole numbers, fractions, decimals, proportions, ratios, percentages, combined applications, and measurement systems. It provides students with a solid foundation for higher math concepts.

Prerequisites: None

CHS 100 CPR & First Aid

Total Course Hours: 15 (10 Theory, 5 Lab, 0 Extern) Semester Credits: 0.5

This course follows recognized standards that are designed to prepare students to provide basic first aid assistance and cardiopulmonary resuscitation (CPR) for adults, children, and infants. Students learn how to perform as an effective team member during multi-rescuer CPR situations and how to demonstrate the proper use of an automated external defibrillator (AED).

Prerequisites: None

MAA 100 Office Management

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This course introduces students to the daily operations of the medical office environment, including basic policies/procedures, appointment scheduling, telephone etiquette, patient reception and processing, billing procedures, and financial and medical records management.

Prerequisites: None

MAA 102 Introduction to Insurance and Coding

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course presents the fundamentals of insurance billing and coding procedures, including terminology, types of insurance, and coding methods and forms. Students participate in hands-on activities to practice completing sample claim forms similar to those used in medical office environments.

Prerequisites: None

MAA 104 Business Writing and Electronic Health Records

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

Course content focuses on the development and application of the business writing and technology skills typically required in a medical office environment. Students complete a typing assessment and participate in hands-on activities to compose various business-oriented documents and to become familiar with the operational aspects and data-security considerations of electronic medical records systems and electronic health records systems.

Prerequisites: None

MDA 111 Examination Techniques

Total Course Hours: 45 (15 Theory, 30 Lab, 0 Extern) Semester Credits: 2.0

Content emphasizes the development and practice of skills required to assist physicians during a patient's physical examination. Lab exercises focus on such skills as exam room preparation and how to obtain and document a patient's medical history as well as vital signs and anthropometric measurements. Other hands-on exercises include patient positioning/draping and vision- and hearing-related tests. Students also complete a typing assessment to address the importance of accuracy when entering patient data in electronic medical records.

Prerequisites: Professional Sequence I

Medical Assistant • Course Descriptions

MDA 121 Clinical Aspects of Coding & Billing

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

Content reinforces and builds upon students' prior knowledge of coding and billing terminology and practices with focused attention on back-office (clinical) skills development. Topics include procedural and diagnostic coding systems, regulatory guidelines and HIPAA compliance, insurance authorization/verification, and other documentation related to patient records. Students are expected to recognize anatomy and physiology terms for coding assignment purposes.

Prerequisites: Professional Sequence I

MDA 130 Surgical Procedures

Total Course Hours: 45 (15 Theory, 30 Lab, 0 Extern) Semester Credits: 2.0

Content addresses knowledge and skills required to safely assist the medical provider with minor office-based surgical procedures. Through hands-on activities, students practice and demonstrate such skills as room and patient preparation, instrument identification, and proper pre/postoperative aseptic techniques, among others. Discussion topics include therapeutic modalities, mobility assistive devices, and terminology and guidelines associated with office-based surgeries.

Prerequisites: Professional Sequence I

MDA 106 Pharmacology

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This course introduces students to basic pharmacology principles and practices. Content addresses terminology, safety regulations, resources, dosage calculations, medication preparation and administration, patient education, and disposal of biohazardous materials. Lab-based activities provide students hands-on practice with common injections prior to demonstrating their proficiency with these required skills.

Prerequisites: Professional Sequence I

MDA 136 Medical Law and Ethics

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course addresses legal and ethical considerations relevant to the medical office setting. Content includes legal terminology, professional competence, scope of practice rules, and regulatory compliance issues with particular focus on HIPAA and patient confidentiality requirements.

Prerequisites: Professional Sequence I

MDA 120 Medical Office Laboratory Procedures

Total Course Hours: 45 (15 Theory, 30 Lab, 0 Extern) Semester Credits: 2.0

Content emphasizes the knowledge and skills required for routine laboratory procedures and tests. Topics include safety protocol, quality control and assurance, equipment use and maintenance, and processes for chemistry, immunology, and microbiology testing. Students practice and demonstrate skills for collecting a variety of specimens for culture testing and/or transport, including sputum, throat, urine, fecal, and wound. Other testing procedures include pulmonary function and electrocardiography.

Prerequisites: Professional Sequence I

MDA 125 Medical Office Laboratory Procedures

Total Course Hours: 45 (15 Theory, 30 Lab, 0 Extern) Semester Credits: 2.0

Content emphasizes the knowledge and skills required for routine laboratory procedures and tests with an emphasis on phlebotomy procedures. Topics include safety protocol, quality control and assurance, equipment use and maintenance, specimen collection, hematology, phlebotomy, and routine blood tests. Lab-based activities provide hands-on practice with common phlebotomy procedures prior to demonstrating proficiency with these required skills.

Prerequisites: Professional Sequence I

MDA 141 Medical Specialty Procedures

Total Course Hours: 45 (15 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

Content addresses medical assisting knowledge and skills required for specialty testing and procedures conducted in the medical office examination room. Students practice and demonstrate assisting skills for specified examinations, tests, and procedures related to the female and male reproductive systems, pediatrics, dermatology, neurology, gastroenterology, and gerontology/geriatrics.

Prerequisites: Professional Sequence I

MDA 131 Communication

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course focuses on the range of professional communication skills that are expected of medical assistants in the medical office setting. Topics include communication terminology, cultural sensitivity, verbal and nonverbal cues, and effective listening practices, among others. Students participate in role-play scenarios to develop and practice telephone communication strategies, patient education techniques, and other skills that encourage critical thinking with regard to interactions within the medical office environment.

Prerequisites: Professional Sequence I

MDA 275 Externship

Total Course Hours: 200 (0 Theory, 0 Lab, 200 Extern) Semester Credits: 4.0

This course provides students with opportunities to apply professional skills learned in the classroom.

Prerequisites: Career Prep and Professional Sequences I, II, III, and IV

Prerequisites: None

MAA 102 Introduction to Insurance and Coding

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course presents the fundamentals of insurance billing and coding procedures, including terminology, types of insurance, and coding methods and forms. Students participate in hands-on activities to practice completing sample claim forms similar to those used in medical office environments.

Prerequisites: None

MAA 104 Business Writing and Electronic Health Records

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

Course content focuses on the development and application of the business writing and technology skills typically required in a medical office environment. Students complete a typing assessment and participate in hands-on activities to compose various business-oriented documents and to become familiar with the operational aspects and data-security considerations of electronic medical records systems and electronic health records systems.

Prerequisites: None

MBC 110 - Principles of Insurance

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course addresses insurance terminology, basic structures of insurance plans, health reimbursement accounts, and types of government-sponsored insurance including Medicare and Medicaid. Students complete a plan summary and cost analysis utilizing various insurance plans.

Prerequisites: Professional Sequence I

Medical Billing and Coding • Course Descriptions

MBC 120 Clinical Medical Diagnostic Coding

Total Course Hours: 75 (45 Theory, 30 Lab, 0 Extern) Semester Credits: 4.0

This course is designed to teach diagnosis coding guidelines, conventions, specificity and coding practices, and requirements for patient diagnoses in clinical and outpatient settings using the International Classification of Diseases (ICD) Clinical Modifications (CM). Students have the opportunity to interpret medical record information and apply the correct coding classifications and sequencing.

Prerequisites: Professional Sequence I

MBC 135 – Medical Terminology and Patient Records

Total Course Hours: 30 (0 Theory, 30 Lab, 0 Extern) Semester Credits: 1.0

Using the medical terminology basics learned in CAT 150, this course presents an in-depth study of medical terms within the context of patient records. In order to translate coding and billing scenarios, students will focus on the identification and meaning of medical terminology within the patient record.

Prerequisites: Professional Sequence I

MBC 130 Medical Billing and Reimbursement Methods

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course provides students with a more in-depth look at the processes and procedures related to medical billing. Topics include compliance for medical practices, medical documentation as it pertains to claims and billing, and reimbursement strategies.

Prerequisites: Professional Sequence I

MBC 125 Hospital Diagnostic Medical Coding

Total Course Hours: 75 (45 Theory, 30 Lab, 0 Extern) Semester Credits: 4.0

This course is designed to teach coding guidelines and coding practices for diagnoses in a hospital setting using the International Classification of Diseases (ICD) Clinical Modifications (CM/PCS). Students have the opportunity to interpret hospital medical record information and apply the correct coding classifications and sequencing.

Prerequisites: Professional Sequence I

MBC 115 Electronic Health Records

Total Course Hours: 15 (0 Theory, 15 Lab, 0 Extern) Semester Credits: 0.5

Course content builds upon students' prior knowledge of and experience with electronic health records (EHR). Through focused lab exercises, students practice navigating a basic EHR system intended to prepare them for the types of tasks they will encounter in the medical office environment.

Prerequisites: Professional Sequence I

MBC 140 Procedural Medical Coding

Total Course Hours: 75 (45 Theory, 30 Lab, 0 Extern) Semester Credits: 4.0

This course is designed to teach coding guidelines and coding practices for procedural coding using the Current Procedural Terminology (CPT) and Healthcare Common Procedure Coding System (HCPCS). Students have the opportunity to translate descriptive procedures into numeric code(s) as dictated by current regulations and guidelines.

Prerequisites: Professional Sequence I

MBC 150 Claims Management

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course will allow students to understand and prepare health insurance claims for submission and reimbursement. Students will develop skills in claims management, auditing, and compliance.

Prerequisites: Professional Sequence I

MDA 136 Medical Law and Ethics

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course addresses legal and ethical considerations relevant to the medical office setting. Content includes legal terminology, professional competence, scope of practice rules, and regulatory compliance issues with particular focus on HIPAA and patient confidentiality requirements.

Prerequisites: Professional Sequence I

MBC 180 Certification Review

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This course will focus on helping students prepare to take a coding certification exam.

Prerequisites: Career Prep and Professional Sequences I, II, III, and IV

MBC 200 Medical Insurance, Billing, and Coding Capstone

Total Course Hours: 110 (0 Theory, 30 Lab, 80 Extern) Semester Credits: 2.5

In this course, students will demonstrate their knowledge of billing and coding through an online internship and on-ground externship. As part of the capstone, students will prepare a professional portfolio with evidence of their competencies.

Prerequisites: Career Prep and Professional Sequences I, II, III, and IV

Nursing Assistant/Nurse Aide

Objective: To provide students with didactic and clinical training in preparation for entry-level employment as a nursing assistant or nurse aide. Students have the opportunity to develop professional skills in bed making, patient transfer, and personal care techniques.

Graduates of this program receive a certificate.

Admissions Requirements: Refer to the Admissions information in the Prospective Students section of this catalog.

Course #	Course	Theory	Lab	Extern	Credits	Contact Hours
NA 101	Introduction to Health Care	15	7.5		1.0	22.5

NA 105	Externship			40	0.5	40.0
Program Total		52.5	37.5	40	4.5	130.0

Course Descriptions

NA 101 Introduction to Health Care

Total Course Hours: 22.5 (15 Theory, 7.5 Lab, 0 Extern) Semester Credits: 1.0

This course provides the student with an overview of the health care system and the scope of practice of the nursing assistant/nurse aide as a member of the health care team. Central to the course is a focus on the rights of patients/residents/clients and concern for their safety and well-being. Topics include ethics, components of effective communication, conflict resolution, social skills, technologies, charting, techniques for maintaining medical asepsis, and obtaining vital signs.

Prerequisites: None

NA 102 Nursing Arts I

Total Course Hours: 22.5 (15 Theory, 7.5 Lab, 0 Extern) Semester Credits: 1.0

This course introduces the basic anatomy and physiology of the human organ systems and the effects of the normal aging process on the systems. In addition, there is a survey of the common disorders that often result in the need for care in health care settings, and an introduction to the language of health care. The student will be introduced to the concepts of rehabilitation and restorative care, with a focus on promoting exercise and functioning and promoting skin integrity. Also emphasized is patient and resident safety, workplace safety, and protocols for responding to emergency situations.

Prerequisites: None

NA 103 Nursing Arts II

Total Course Hours: 22.5 (15 Theory, 7.5 Lab, 0 Extern) Semester Credits: 1.0

This course focuses on the skills and equipment used to promote basic daily care, with continued emphasis on resident dignity and safety. Techniques learned in previous courses are expanded upon to cover assistance with grooming, personal hygiene, urinary elimination, and bowel elimination. Also addressed is assisting with nutrition and fluids and related recordkeeping. Procedures related to specimen collection and testing are addressed.

Prerequisites: None

NA 104 Nursing Arts III

Total Course Hours: 22.5 (7.5 Theory, 15 Lab, 0 Extern) Semester Credits: 1.0

This course examines the role of the nursing assistant in the procedures of patient admission, transfer and discharge, and caring for residents with special care concerns, including the dying, people with dementia, and other health issues. Preoperative, perioperative, and postoperative care and care for orthopedic conditions are addressed. A brief introduction to caring for people through home health care is included.

Prerequisites: None

NA 105 Externship

Total Course Hours: 40.0 (0 Theory, 0 Lab, 40 Extern) Semester Credits: 0.5

The externship is an extension of the classroom experience to demonstrate, in an employment setting, the skills learned in the classroom.

Prerequisites: NA 101, NA 102, NA 103, NA 104

Patient Care Technician

Objective: To develop in students the personal traits and professional skills required to perform as competent entry-level patient care technicians (PCT). Students will also have the opportunity to gain knowledge and experience with procedures used in the emergency room, phlebotomy, electrocardiography (ECG), and hemodialysis.

Graduates of this program receive a certificate. The courses within the program are acceptable for credit toward PMI's Health Care Administration Associate of Applied Science Degree Program.

Admissions Requirements: In addition to the Admissions requirements in the Prospective Students section of this catalog. Applicants must be a certified nursing assistant (CNA) or successfully complete the PMI Nursing Assistant/Nurse Aide program and obtain a CNA certificate prior to entering the PCT sequences.

Patient Care Technician • Course Descriptions

CSK 100 Study Skills

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course provides students an opportunity to learn and adopt methods to promote success in school, work, and life. Topics include strategies to help students develop and improve their skills in time and stress management, reading comprehension and memorization, listening and note taking, and test preparation.

Prerequisites: None

CAT 150 Anatomy, Physiology, and Terminology

Total Course Hours: 55 (55 Theory, 0 Lab, 0 Extern) Semester Credits: 3.5

This course is designed to provide students with a basic knowledge of anatomy, physiology, and medical terminology. Medical terms are learned within the context of the structures and functions of the body systems (integumentary, musculoskeletal, nervous, endocrine, lymphatic, immune, cardiovascular, respiratory, digestive, urinary, reproductive) and the senses. Content also addresses pathology, procedures, and medications involved in treatment.

Prerequisites: None

CCB 100 Computer Basics

Total Course Hours: 15 (0 Theory, 15 Lab, 0 Extern) Semester Credits: 0.5

Through demonstration and hands-on experience, students will gain a general understanding of computers. Hardware, software, Microsoft products, and internet use are explained.

Prerequisites: None

CMF 95 Math Fundamentals

Total Course Hours: 20 (20 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

The course reviews basic mathematical skills including whole numbers, fractions, decimals, proportions, ratios, percentages, combined applications, and measurement systems. It provides students with a solid foundation for higher math concepts.

Prerequisites: None

CHS 100 CPR & First Aid

Total Course Hours: 15 (10 Theory, 5 Lab, 0 Extern) Semester Credits: 0.5

This course follows recognized standards that are designed to prepare students to provide basic first aid assistance and cardiopulmonary resuscitation (CPR) for adults, children, and infants. Students learn how to perform as an effective team member during multi-rescuer CPR situations and how to demonstrate the proper use of an automated external defibrillator (AED).

Prerequisites: None

PHL 110 Phlebotomy

Total Course Hours: 45 (15 Theory, 30 Lab, 0 Extern) Semester Credits: 2.0

This course provides instruction in methods of venipuncture and other blood collecting techniques, including the use of vacutainers, butterflies, and saline lock insertion techniques.

Prerequisites: None

PCT 120 Emergency Room Technician

Total Course Hours: 45 (15 Theory, 30 Lab, 0 Extern) Semester Credits: 2.0

This course focuses on the skills required of a patient care technician in the emergency room setting. Skills include wound care, Foley/straight catheterization including irrigations and removal, urine and stool sample collection, stabilization of orthopedic injuries, patient safety and application of restraints, application of cold and hot packs, maintenance and removal of nasogastric tubes, and IV site maintenance and discontinuation.

Prerequisites: None

PCT 130 General Systems Pathology

Total Course Hours: 15 (10 Theory, 5 Lab, 0 Extern) Semester Credits: 0.5

This course covers common medical conditions of the blood, lymphatic, immune, gastrointestinal, musculoskeletal, and genitourinary systems. Pathophysiology, diseases, and treatments are emphasized.

Prerequisites: None

PCT 100 Infection Control

Total Course Hours: 15 (10 Theory, 5 Lab, 0 Extern) Semester Credits: 0.5

Students will establish and maintain a sterile environment. Students will demonstrate utilization of standard precautions. Topics regarding safety and OSHA requirements in the workplace will be discussed.

Prerequisites: None

PCT 140 Electrocardiography

Total Course Hours: 75 (45 Theory, 30 Lab, 0 Extern) Semester Credits: 4.0

This course covers the application and analysis of electrocardiogram testing. Topics include electrocardiography, lead placement, and ECG interpretations.

Prerequisites: None

Patient Care Technician • Course Descriptions

PCT 135 Specific Systems Pathology

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course focuses on common medical conditions of the cardiovascular, respiratory, and neurological systems. Pathophysiology, diseases, and treatments are emphasized.

Prerequisites: None

PCT 110 Medical Documentation

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

The main focus of this course is the legal issues and guidelines of properly documenting medical information in a patient record. Topics include access and disclosure of medical information, patient confidentiality including HIPAA regulations, and ethical considerations.

Prerequisites: None

AP 110 Renal Anatomy and Physiology

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course covers renal anatomy and common kidney diseases. Students will focus on problems caused by kidney failure, associated complications, and the treatment options available.

Prerequisites: None

PCT 150 Principles and Practices of Hemodialysis

Total Course Hours: 45 (30 Theory, 15 Lab, 0 Extern) Semester Credits: 2.5

Students will be introduced to the scientific principles used in dialysis. Practices for obtaining vascular access will be learned. Students will receive instruction on the step-by-step procedures associated with all aspects of dialysis treatment.

Prerequisites: None

PCT 155 Hemodialysis Equipment and Water Treatment

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course will focus on the dialyzer design and the purpose and delivery of the dialysate system. Special consideration will be given to the water treatment and the equipment monitoring that is required during dialysis.

Prerequisites: None

PCT 105 Communication

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course provides the student with experience in the wide range of communication skills necessary for success as a patient care technician. Topics include verbal and nonverbal communication, speaking and listening critically, and consideration of age, cultural differences, and medical disabilities. Opportunities will be given to role-play patient interactions.

Prerequisites: None

PCT 180 Externship

Total Course Hours: 280 (0 Theory, 0 Lab, 280 Extern) Semester Credits: 6.0

This course provides students with opportunities to apply professional skills learned in the classroom.

Prerequisites: Career Prep Sequence, Emergency Room Sequence, Electrocardiography (ECG) Sequence, Hemodialysis Sequence, and a current CNA certificate

Success Story

I was looking for a career. A friend who was attending Pima Medical Institute's Nursing Assistant program encouraged me to consider it. Once I realized how inexpensive and fast the program was, I signed up. A funny thing happened—I fell in love with the medical field!

After completing the Nursing Assistant program, I worked in home health care for a time. When PMI called to tell me about their new Patient Care Technician (PCT) program, I was ready for my next challenge. I stepped into the new PCT program and loved the excitement of learning new skills and procedures. It was a perfect next step and it made me feel really good about myself. My instructor cared about me as a person and taught me how to be a professional. I attended classes in the mornings and worked as a transporter at HonorHealth Scottsdale Shea Medical Center. Upon graduation, I accepted a job offer in my hospital to work in the pre-op and recovery department as a level II PCT.

I'm so proud to be a graduate of PMI's first Patient Care Technician program. I love my job, and I would definitely recommend this program to others.

La Tasha Butler
Certificate, Patient Care Technician, East Valley Campus

Pharmacy Technician

Objective: To prepare students for entry-level employment as pharmacy technicians through development of professional skills in such areas as customer service, drug inventory management, and prescription preparation that includes training in sterile products and aseptic techniques. Students must complete and pass a sterile products certification course through the National Pharmacy Technician Association/NPTA as part of the graduation requirements.

Graduates of this program receive a certificate and are eligible to apply to take national examinations to become certified pharmacy technicians. The courses within the program are acceptable for credit toward PMI's Health Care Administration Associate of Applied Science Degree Program.

Admissions Requirements: Refer to the Admissions information in the Prospective Students section of this catalog.

CMF 95 Math Fundamentals

Total Course Hours: 20 (20 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

The course reviews basic mathematical skills including whole numbers, fractions, decimals, proportions, ratios, percentages, combined applications, and measurement systems. It provides students with a solid foundation for higher math concepts.

Prerequisites: None

CHS 100 CPR & First Aid

Total Course Hours: 15 (10 Theory, 5 Lab, 0 Extern) Semester Credits: 0.5

This course follows recognized standards that are designed to prepare students to provide basic first aid assistance and cardiopulmonary resuscitation (CPR) for adults, children, and infants. Students learn how to perform as an effective team member during multirescuer CPR situations and how to demonstrate the proper use of an automated external defibrillator (AED).

Prerequisites: None

PHA 115 Pharmacy Math

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course emphasizes mathematical concepts for pharmaceutical and business-math calculations. Students apply their knowledge to learn and practice the types of calculations required of pharmacy technicians in the pharmacy setting.

Prerequisites: None

PHA 120 Inventory Maintenance

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course emphasizes procedures and systems for inventory management of medications, equipment, supplies, and devices in the pharmacy setting. Students participate in hands-on activities to learn and practice standard procedures and documentation requirements for purchasing, receiving, and monitoring inventory along with proper identification, storage, and disposal of medications.

Prerequisites: None

PHA 200 Pharmacology

Total Course Hours: 45 (15 Theory, 30 Lab, 0 Extern) Semester Credits: 2.0

This course examines the anatomy, physiology, pathology, and pharmacology of the muscular, skeletal, and nervous systems. Content addresses the therapeutic effects of prescription and nonprescription medications as well as alternative therapies associated with these systems. Topics include drug interactions, dosages, indications, contraindications, and routes of administration.

Prerequisites: None

PHA 102 Pharmacy Law & Ethics

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course provides an overview of legal requirements and ethical considerations pertinent to pharmacy technicians. Topics include federal and state statutes that regulate the pharmacy industry, agencies responsible for regulatory enforcement, and codes of ethics for pharmacy professionals.

Prerequisites: None

Pharmacy Technician • Course Descriptions

PHA 125 Pharmacy Math

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course emphasizes mathematical concepts for pharmaceutical calculations used in reconstitutions, dilutions, and concentrations. Students apply their knowledge to learn and practice the types of calculations required of pharmacy technicians in the pharmacy setting.

Prerequisites: None

PHA 108 Pharmacy Technician Duties

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This course introduces students to the tasks and responsibilities of pharmacy technicians as well as expectations for professionalism in the work environment. Topics include types of pharmacy practice settings, health care team interactions, time and stress management, prescription-related matters, insurance claims, and recordkeeping practices. Students participate in hands-on activities to learn and practice various skills expected of pharmacy technicians.

Prerequisites: None

PHA 210 Pharmacology

Total Course Hours: 45 (15 Theory, 30 Lab, 0 Extern) Semester Credits: 2.0

This course examines the anatomy, physiology, pathology, and pharmacology of the gastrointestinal, respiratory, and cardiovascular systems. Content addresses the therapeutic effects of prescription and nonprescription medications as well as alternative therapies associated with these systems. Topics include drug interactions, dosages, indications, contraindications, and routes of administration as well as hematological agents used to treat blood disorders and diseases.

Prerequisites: None

PHA 135 Pharmacy Math

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course reviews mathematical concepts for pharmaceutical and intravenous (IV) calculations. Students apply their knowledge to learn and practice the types of calculations required of pharmacy technicians in the pharmacy setting.

Prerequisites: None

PHA 140 Principles of Customer Service

Total Course Hours: 15 (10 Theory, 5 Lab, 0 Extern) Semester Credits: 0.5

This course introduces students to customer service practices expected of pharmacy technicians. Topics include how to convey a professional image in the work place, communication modes and strategies for various customer and health care team interactions, listening and speaking techniques, and cultural competency awareness. Students participate in activities designed to develop and enhance effective customer service skills.

Prerequisites: None

PHA 220 Pharmacology

Total Course Hours: 45 (15 Theory, 30 Lab, 0 Extern) Semester Credits: 2.0

This course examines the anatomy, physiology, pathology, and pharmacology of the urinary, endocrine, lymphatic, and reproductive systems. Content addresses the therapeutic effects of prescription and nonprescription medications as well as alternative therapies associated with these systems. Topics include drug interactions, dosages, indications, contraindications, and routes of administration.

Prerequisites: None

PHA 225 Pharmacy Laboratory Skills

Total Course Hours: 45 (15 Theory, 30 Lab, 0 Extern) Semester Credits: 2.0

This course provides students with hands-on opportunities to develop and practice pharmacy technician skills in a simulated pharmacy environment. Topics range from sterile/nonsterile compounding procedures to preparing and dispensing various forms of medications according to industry standards. Special emphasis is placed on infection control, strategies to prevent medication errors, and quality assurance in the pharmacy setting.

Prerequisites: None

PHA 145 Pharmacy Math

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course emphasizes mathematical concepts for pharmaceutical calculations involving body weight and mass. Students apply their knowledge to learn and practice the types of calculations required of pharmacy technicians in the pharmacy setting.

Prerequisites: None

PHA 160 Pharmacy Computer Applications

Total Course Hours: 45 (15 Theory, 30 Lab, 0 Extern) Semester Credits: 2.0

This course explores the role of technology and computer-based medical information systems in the pharmacy environment. Topics include collection, entry, storage, retrieval, and transmission of customer, physician, and drug-related data. Students participate in hands-on activities to develop skills in navigating a pharmacy information system.

Prerequisites: None

Pharmacy Technician • Course Descriptions

PHA 230 Pharmacology

Total Course Hours: 45 (15 Theory, 30 Lab, 0 Extern) Semester Credits: 2.0

This course examines the anatomy, physiology, pathology, and pharmacology of the integumentary system and the eyes, ears, nose, and throat. Content addresses the therapeutic effects of prescription and nonprescription medications, including antineoplastic/oncology agents and anti-infective medications, as well as alternative therapies associated with these body structures. Topics include drug interactions, dosages, indications, contraindications, and routes of administration.

Prerequisites: None

PHA 240 Fundamentals of Chemistry

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course introduces basic chemistry concepts relevant to the human body and to the range of effects of medications within the body. Topics include drug absorption, distribution, metabolism, and excretion along with the chemical processes that drive these various interactions.

Prerequisites: None

PHA 250 Externship

Total Course Hours: 240 (0 Theory, 0 Lab, 240 Extern) Semester Credits: 5.0

This course provides students with opportunities to apply professional skills learned in the classroom.

Prerequisites: Career Prep and Professional Sequences I, II, III, and IV. In the state of Washington students must be registered pharmacy assistants to be eligible to participate in externship

I spent nine years as a helicopter mechanic in the Marine Corps. When I got out, I began working at the local airport as a mechanic. I didn't really feel like I was going anywhere in my job, so my wife—who had completed the Medical Assistant program through PMI - suggested I go to PMI and find a career I enjoyed. I decided to sign up for the Pharmacy Technician program.

I loved the program! In the Marine Corps, comradery is a big deal and I was used to having that close-knit family atmosphere. I came to PMI and immediately felt at home. My instructor was there to direct me and provide whatever I needed to be confident and successful. My training allowed me to transition easily into my externship, and before I had even finished, they offered me a position.

After graduation, I enrolled in PMI's Online Health Care Administration (HCA) Associate Degree Program. I was able to work full time, spend time with my family, and complete my homework each day. The instructors were flexible and easy to reach for guidance. I almost didn't notice I wasn't in a classroom setting. I had a great experience getting my associate's degree, so I enrolled in PMI's online Bachelor of Science in HCA. As a result of enrolling in this program, I am being trained to cover and assist our buyers. I love my new career; it's very fulfilling. My dream job ... coming back to PMI as an instructor!

Course Descriptions

CSK 100 Study Skills

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course provides students an opportunity to learn and adopt methods to promote success in school, work, and life. Topics include strategies to help students develop and improve their skills in time and stress management, reading comprehension and memorization, listening and note taking, and test preparation.

Prerequisites: None

CHS 100 CPR & First Aid

Total Course Hours: 15 (10 Theory, 5 Lab, 0 Extern) Semester Credits: 0.5

This course follows recognized standards that are designed to prepare students to provide basic first aid assistance and cardiopulmonary resuscitation (CPR) for adults, children, and infants. Students learn how to perform as an effective team member during multi-rescuer CPR situations and how to demonstrate the proper use of an automated external defibrillator (AED).

Prerequisites: None

PHL 101 Anatomy & Physiology/Medical Terminology

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course provides the basic knowledge of medical terminology, anatomy, and physiology that is required of a phlebotomist.

Prerequisites: None

PHL 102 Introduction to Laboratory & Communication

Total Course Hours: 20 (15 Theory, 5 Lab, 0 Extern) Semester Credits: 1.0

This course provides an overview of the laboratory and the types of communication skills expected of phlebotomists in the workplace. Students explore the care and use of laboratory equipment, procedures for collecting nonblood specimens, and how to interpret physicians' orders and various reports. Content also addresses ethical and legal aspects of the profession and the types of computer skills typically required of phlebotomists.

Prerequisites: None

PHL 103 Phlebotomy

Total Course Hours: 75 (15 Theory, 60 Lab, 0 Extern) Semester Credits: 3.0

This course instructs students in methods of venipuncture and other blood-collecting techniques, including the use of vacutainers, blood cultures, syringes, microtainers for finger and heel sticks, and butterflies. Students participate in hands-on activities to learn and practice various skills phlebotomists are expected to perform in the field. Content also emphasizes safety standards and addresses point-of-care testing procedures.

Prerequisites: None

PHL 200 Externship

Total Course Hours: 160 (0 Theory, 0 Lab, 160 Extern) Semester Credits: 3.5

This course provides students with opportunities to apply professional skills learned in the classroom.

Prerequisites: All Phlebotomy Technician Courses

Practical Nursing

Objective: To develop in students the personal traits and professional skills needed to perform as competent entry-level practical nurses. The program provides students with knowledge of anatomy and physiology, growth and development, pharmacology, nursing theory, and skills for patient care across the life span.

Graduates of this program are granted a certificate and are eligible to apply to take the National Council on Licensure Examination (NCLEX-PN®). Those who pass the NCLEX-PN® are qualified for state licensure or registration as a practical nurse.

Admission Requirements: In addition to the Admissions requirements in the Prospective Students section of this catalog, applicants must achieve a minimum score on the Pre-Entrance HESI Exam-PN®. An interview with the program director and/or faculty is required.

----------------------	--	------------	------------	------------	-------------

Practical Nursing • Course Descriptions

MTH 127 Med Math

Total Course Hours: 16 (16 Theory, 0 Lab, 0 Clinical) Semester Credits: 1.0

This course presents calculation, conversion, and computation of fractions, decimals, ratios, proportions, percents, measurements, abbreviations and data analysis. It also acquaints the student with the skills important for the health professional's application and critical thinking necessary for safe dosage calculations.

Prerequisites: None

CMT 102 Medical Terminology

Total Course Hours: 16 (16 Theory, 0 Lab, 0 Clinical) Semester Credits: 1.0

The course focuses on the development of a basic framework for the language of medicine. Through memorization and practice in spelling and pronunciation of medical roots, suffixes, and prefixes, students learn to create, analyze, and apply medical terms.

Prerequisites: None

HUN 100 Nutrition

Total Course Hours: 16 (16 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course acquaints students entering health professions with each of the major nutrients, nutritional requirements, methods used for planning nutritionally adequate and healthy diets and nutrition needs throughout the life span. Current nutrition issues/controversies will be discussed.

Prerequisites: None

ENG 115 Communication and Composition

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0

This course addresses the skills needed for effective oral and written communications in a variety of contexts. Among the topics addressed are verbal and nonverbal communication cues, active listening techniques, technical and professional writing, health literacy, cultural diversity, and professional courtesy.

Prerequisites: None

PSY 120 Human Development Across the Life Span

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0

This course addresses physical, cognitive, social, emotional and psychosexual components of human growth and development from birth to death.

Topics include analysis of activities that are directed toward developing, sustaining, and enhancing wellness during all stages of development in the journey toward psychosocial maturity. Students will explore the history and theories of growth and development, including the impact of ethnic, gender, and cultural factors on the process. The course provides opportunities for students to develop an understanding of shared decision-making among family, provider and community.

Prerequisites: None

NUR 104 Strategies for PN Success

Total Course Hours: 16 (16 Theory, 0 Lab, 0 Clinical) Semester Credits: 1.0

This course provides an opportunity to learn and adopt methods to promote success in school, work, and life. Topics include time management, reading skills, test-taking techniques, goal setting, and stress management.

Prerequisites: None

BIO 112 Anatomy and Physiology I

Total Course Hours: 40 (24 Theory, 16 Lab, 0 Clinical) Semester Credits: 2.0

This course provides students with the knowledge of the structure and function of the human body. Course content includes the organization of the human body including an introduction to each of the body systems, beginning with cellular structure. Other course topics include integumentary, fluids and electrolytes, musculoskeletal, disease and disease-producing organisms, benign and malignant cancers, and infectious diseases.

Prerequisites: None

NUR 105 Introduction to Nursing and Pharmacology

Total Course Hours: 88 (48 Theory, 40 Lab, 0 Clinical) Semester Credits: 4.0

This course introduces the role of the practical nurse and basic nursing. The historical perspective and elements of nursing as outlined by various nursing theories provide a framework for developing critical thinking in approaching health care. Additional topics include ethical/legal responsibilities, the PN Scope of Practice, State Nurse Practice Act, the nursing process, health teaching, and basic needs. The course also provides the foundational knowledge and principles of pharmacology.

Prerequisites: MTH 127 Med Math and NUR 104 Strategies for PN Success

BIO 113 Anatomy and Physiology II

Total Course Hours: 40 (24 Theory, 16 Lab, 0 Clinical) Semester Credits: 2.0

This course provides students with the knowledge of the structure and function of the human body. Course content focuses on the nervous, sensory, digestive, and urinary systems.

Prerequisites: Sequence II

NUR 150 Elder Care and Nursing Theory

Total Course Hours: 80 (64 Theory, 16 Lab, 0 Clinical) Semester Credits: 4.5

This course addresses the nursing theory, pharmacology concepts, and the skills required to collect data and contribute to a basic physical assessment. Students will focus on caring for the aging population while will provide culturally sensitive care and promoting independence. This course will also discuss the physical and cognitive changes that occur in the elderly. Students have opportunities to practice and demonstrate competency in simulated, interactive, and virtual settings.

Prerequisites: Sequence II; Concurrent enrollment in NUR 151 Clinical Foundations of Nursing I

Practical Nursing • Course Descriptions

NUR 151 Clinical Foundations of Nursing I

Total Course Hours: 95 (0 Theory, 0 Lab, 95 Clinical) Semester Credits: 2.0

This course provides the student with opportunities to apply concepts covered in Elder Care and Nursing Theory course. Application includes clinical practice and competency/performance testing in simulated, interactive, and virtual settings.

Prerequisites: Sequence II; Concurrent enrollment in NUR 150 Elder Care and Nursing Theory

BIO 116 Anatomy and Physiology III

Total Course Hours: 40 (24 Theory, 16 Lab, 0 Clinical) Semester Credits: 2.0

This course provides students with the knowledge of the structure and function of the human body. Content of this course focuses on blood, the cardiovascular system, the respiratory and endocrine systems.

Prerequisites: Sequences II and III

NUR 160 Adult Medical & Surgical Community Health Nursing Theory

Total Course Hours: 64 (48 Theory, 16 Lab, 0 Clinical) Semester Credits: 3.5

This course addresses the nursing theory, pharmacology concepts, and the skills required to collect data and contribute to a basic physical assessment of adults with various medical/surgical conditions. Emphasis is placed on cardiovascular, hematopoietic, respiratory, and endocrine systems. Concepts of community based nursing services are explored. Students will have opportunities to practice and demonstrate competency in simulated, interactive, and virtual settings.

Prerequisites: Sequences II and III; Concurrent enrollment in NUR 161 Clinical Foundations of Nursing II

NUR 161 Clinical Foundations of Nursing II

Total Course Hours: 95 (0 Theory, 0 Lab, 95 Clinical) Semester Credits: 2.0

This course provides the student with opportunity to apply concepts covered in Adult Medical & Surgical Community Health Nursing Theory course. Clinical hours take place in various settings including clinics, physician offices, community, and medical/surgical care agencies. Application includes clinical practice and competency/performance testing in simulated, interactive, and virtual settings.

Prerequisites: Sequences II and III; Concurrent enrollment in NUR 160 Adult Medical & Surgical Community Health Nursing Theory

BIO 117 Anatomy and Physiology IV

Total Course Hours: 40 (24 Theory, 16 Lab, 0 Clinical) Semester Credits: 2.0

This course provides students with the knowledge of the structure and function of the human body. Content of this course includes the male and female reproductive systems, development and birth, and heredity and hereditary diseases. Additional emphasis is placed on the lymph system and immunity.

Prerequisites: Sequences II, III, and IV

NUR 170 Maternal Child Nursing Theory

Total Course Hours: 64 (48 Theory, 16 Lab, 0 Clinical) Semester Credits: 3.5

This course addresses the nursing theory, pharmacology concepts, and the skills required to collect data and contribute to a basic physical assessment. All of which will be applied during the study of the pregnancy and the birth process. Focus is on the pediatric population from birth to adulthood.

Discussion will also include the immune, lymph, and reproductive systems. Students have opportunities to practice and demonstrate competency in simulated, interactive, and virtual settings.

Prerequisites: Sequences II, III, and IV; Concurrent enrollment in NUR 171 Clinical Foundations of Nursing III

NUR 171 Clinical Foundations of Nursing III

Total Course Hours: 95 (0 Theory, 0 Lab, 95 Clinical) Semester Credits: 2.0

This course provides the student with opportunities to apply concepts from all current and prior nursing courses in a variety of clinical settings. Clinical hours are provided in various pediatric, obstetric, community health, and adult medical/surgical agencies. Application includes clinical practice and competency/performance testing in simulated, interactive, and virtual settings.

Prerequisites: Sequences II, III, and IV; Concurrent enrollment in NUR 170 Maternal Child Nursing Theory

NUR 180 Pharmacology - Intravenous Therapy

Total Course Hours: 40 (24 Theory, 16 Lab, 0 Clinical) Semester Credits: 2.0

This course focuses on intravenous (IV) therapy, including the fundamentals of fluid administration, premixed IV fluids containing electrolytes and vitamins and premixed antibiotic solutions. Students are given the opportunity to develop their knowledge of pharmacology and the application of these concepts in the skills lab.

Prerequisites: Sequences I, II, III, IV, and V

NUR 200 Role Transition

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0

This course is designed to prepare the student for the National Council Licensure Examination for Practical/Vocational Nurses (NCLEX-PN®) and profession practice, by providing a comprehensive review of the technical coursework, mock examinations, and appropriate test taking strategies.

Prerequisites: Sequences I, II, III, IV, and V

NUR 205 Clinical Foundations of Nursing IV

Total Course Hours: 120 (0 Theory, 0 Lab, 120 Clinical) Semester Credits: 2.5

This course provides students with opportunities to apply learned theories and skill in a variety of clinical settings under the supervision of a qualified nursing faculty member. Students are given the opportunity to develop and implement a leadership project in collaboration with the clinical agency.

Prerequisites: Sequences I, II, III, IV, and V

Sterile Processing Technician

Objective: To provide students with entry-level training that will prepare them to function in the sterile processing and distribution areas of health care facilities. The program provides students with knowledge of surgical instruments, microbiology, medical equipment, surgical terminology, and storage and distribution, as well as the skills required for sterilization and decontamination.

Graduates of this program receive a certificate and are eligible to apply to take the Certified Registered Central Service Technician (CRCST) examination through the International Association of Healthcare Central Service Materiel Management (IAHCSCMM). The courses within the program are acceptable for credit toward PMI's Health Care Administration Associate of Applied Science Degree Program.

Admissions Requirements: Refer to the Admissions information in the Prospective Students section of this catalog.

Sterile Processing Technician • Course Descriptions

Courses that may be offered on-ground, online, and/or blended: CSP 110 Microbiology and Infection Control, CSP 115 Surgical Terminology, CSP 190 Certification Review.

CSK 100 Study Skills

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course provides students an opportunity to learn and adopt methods to promote success in school, work, and life. Topics include strategies to help students develop and improve their skills in time and stress management, reading comprehension and memorization, listening and note taking, and test preparation.

Prerequisites: None

CAT 150 Anatomy, Physiology, and Terminology

Total Course Hours: 55 (55 Theory, 0 Lab, 0 Extern) Semester Credits: 3.5

This course is designed to provide students with a basic knowledge of anatomy, physiology, and medical terminology. Medical terms are learned within the context of the structures and functions of the body systems (integumentary, musculoskeletal, nervous, endocrine, lymphatic, immune, cardiovascular, respiratory, digestive, urinary, reproductive) and the senses. Content also addresses pathology, procedures, and medications involved in treatment.

Prerequisites: None

CCB 100 Computer Basics

Total Course Hours: 15 (0 Theory, 15 Lab, 0 Extern) Semester Credits: 0.5

Through demonstration and hands-on experience, students will gain a general understanding of computers. Hardware, software, Microsoft products, and internet use are explained.

Prerequisites: None

CMF 95 Math Fundamentals

Total Course Hours: 20 (20 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

The course reviews basic mathematical skills including whole numbers, fractions, decimals, proportions, ratios, percentages, combined applications, and measurement systems. It provides students with a solid foundation for higher math concepts.

Prerequisites: None

CHS 100 CPR & First Aid

Total Course Hours: 15 (10 Theory, 5 Lab, 0 Extern) Semester Credits: 0.5

This course follows recognized standards that are designed to prepare students to provide basic first aid assistance and cardiopulmonary resuscitation (CPR) for adults, children, and infants. Students learn how to perform as an effective team member during multi-rescuer CPR situations and how to demonstrate the proper use of an automated external defibrillator (AED).

Prerequisites: None

CSP 105 Surgical Instruments

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This course presents and discusses basic and complex surgical instrumentation. The student will learn how instruments are manufactured, their structure, their classifications, and their categories based on functions. Students will learn to identify instrument damage and malfunction. The care and maintenance of complex surgical instruments, including powered and endoscopic instrumentation, will also be covered. Review and identification of surgical instruments will be performed in the lab setting.

Prerequisites: None

CSP 110 Microbiology and Infection Control

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course provides an overview of microbiology for central service professionals. The student will learn the basic facts about the identification and classification of microorganisms and nonbacterial organisms as well as their transmission. Control and destruction of microorganisms and infection prevention will be defined and discussed. Students will be given an overview of standard precautions, including the OSHA Bloodborne Pathogens Standard and the five principles of asepsis.

Prerequisites: None

CSP 100 Principles and Practices of Sterile Processing

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course is designed to introduce the primary responsibilities of the sterile processing technician. The student will learn the importance of the central service and sterile processing departments. Job duties, career growth, and professional development are also discussed. Federal regulations and professional and safety standards required for the successful management of the central sterile processing department will be introduced. Communication and human relations skills, as they relate to the central service and sterile processing departments, will also be presented.

Prerequisites: None

CSP 120 Sterilization Procedures and Practice

Total Course Hours: 90 (45 Theory, 45 Lab, 0 Extern) Semester Credits: 4.5

This course presents and discusses the techniques and protocols for processing instrumentation and supplies for use in the sterile environment. The student will learn sterile packaging and storage, high and low temperature sterilization methods, and point of use processing. Preparation of pack contents, packaging procedures, storage, and transport will be introduced. Steam, dry heat, and chemical sterilization will be presented along with a review of the parameters that are involved with each form of sterilization. Practice of these techniques will be performed in the lab setting.

Prerequisites: None

Sterile Processing Technician • Course Descriptions

CSP 130 Storage and Distribution

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course discusses the importance of all aspects of inventory management and storage. The student will learn the importance of managing inventory through the discussion of inventory replenishment systems, automated tracking systems, and important inventory management concepts. The management of patient care equipment and the surgical case cart system will be covered as well as the use of quality assurance in central service operations.

Prerequisites: None

CSP 140 Decontamination Procedures and Practice

Total Course Hours: 75 (30 Theory, 45 Lab, 0 Extern) Semester Credits: 3.5

This course presents the techniques and protocol for the cleaning, disinfection, and decontamination of surgical instrumentation. Personal protective equipment will be introduced and basic instrument cleaning procedures demonstrated. Point-of-use preparation and transport will also be discussed. Practice of these techniques will be performed in the lab setting.

Prerequisites: None

CSP 150 Medical Equipment

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course covers the management and maintenance of patient care equipment. The student will learn the basic types of patient care equipment and how to properly handle, clean, and disinfect soiled equipment. Procuring new and additional equipment will be reviewed. The importance of monitoring and recordkeeping will also be reviewed.

Prerequisites: None

CSP 115 Surgical Terminology

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course provides students with a medical terminology vocabulary for use in the central sterile processing and surgical settings. Students will build on the knowledge acquired in CAT 150 to learn and identify surgical terminology and will be introduced to common abbreviations used in surgery.

Prerequisites: CAT 150 Anatomy, Physiology, and Terminology

CSP 180 Externship

Total Course Hours: 400 (0 Theory, 0 Lab, 400 Extern) Semester Credits: 8.5

This course provides 400 hours of hands-on clinical experience in a hospital and/or surgery center facility. The student will apply the knowledge they acquired in the didactic portion of the program to the workplace. The student will hone their skills in patient care equipment, general cleaning, wrapping/packaging, assembling instrument sets, sterilization, storage and cleaning, case carts, distribution, and miscellaneous duties. This externship meets the clinical hour requirements to sit for the certification exam provided by IAHCSMM (International Association of Healthcare Central Service Materiel Management).

Prerequisites: Career Prep and Professional Sequences I, II, and III

CSP 190 Certification Review

Total Course Hours: 20 (20 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course provides students with a review of all aspects of the Sterile Processing Technician program to prepare them to take the certification exam offered by IAHCSMM (International Association of Healthcare Central Service Materiel Management). This certification will enable the student to receive the credentials of CRCST (Certified Registered Central Sterile Technician).

Prerequisites: Career Prep and Professional Sequences I, II, and III

Success Story

My husband and I have three children; we were both working but were barely able to pay our bills. I had spent several years working as a cook but I hated it. My dad is a nurse and my mom was a medical assistant for over 20 years, so I decided it was time to pursue a career in the medical field. I researched and chose Pima Medical Institute (PMI) because I was interested in their Sterile Processing Technician (SPT) program and they offered to help me with financial aid.

The SPT program was challenging, and I had some family struggles during my program. It was tough juggling school and being a mom to my three kids. Despite the challenges, I'm proud to say I graduated with a 4.0 GPA.

I'm now a sterile processing technician at a hospital in the Lovelace Health System. I learn more every day! I am the full-time provider for my family; we've moved from an apartment to a house and have gone from barely making it to having enough for extras.

PMI's SPT program gave me a career that has dramatically changed our lives. It feels so good to be able to provide for my family, and I love my job!

Students learn how to perform as an effective team member during multirescuer CPR situations and how to demonstrate the proper use of an automated external defibrillator (AED).

Prerequisites: None

VTa 125 Comparative Veterinary Anatomy & Physiology

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

An introductory study comparing the structures, functions, and disorders of the body systems of various domesticated animals and selected exotic animals. Students will develop their understanding of medical terminology to encompass common veterinary medical terms and abbreviations.

Prerequisites: None

VTa 130 Clinical Lab Procedures and Pathology

Total Course Hours: 75 (15 Theory, 60 Lab, 0 Extern) Semester Credits: 3.0

This course is an investigation into the basic laboratory procedures to determine the presence of a variety of pathogens of importance in the veterinary field. The student will have the opportunity to demonstrate collection procedures. Topics include laboratory equipment, hematology, urine and fecal analysis, parasitology, and the basics of clinical microbiology. Assisting with necropsy is also introduced.

Prerequisites: None

VTa 150 Animal Life Stages, Nutrition, and Husbandry

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course covers animal life stages from birth to old age and issues related to animal death. Special attention is given to preventive health care and the behavioral, dietary, housing, and social needs throughout the lifetime of the canine, feline, equine, and exotic species.

Prerequisites: None

VTa 160 Animal Nursing and Diagnostic Imaging

Total Course Hours: 75 (15 Theory, 60 Lab, 0 Extern) Semester Credits: 3.0

This course covers the basics of animal nursing including restraint techniques, physical exam and vital sign monitoring, ear and eye care, wound care and bandaging, and the basics of first aid and emergency medicine for small animals. Also addressed is the role of the veterinary assistant in the safe use of and positioning for diagnostic imaging modalities.

Prerequisites: None

Veterinary Assistant • Course Descriptions

VTA 110 Office Procedures

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

Students are introduced to facility types, paper and electronic recordkeeping, charting, client service and scheduling, OSHA safety regulations, and the role of the veterinary assistant in the veterinary clinic. This course emphasizes the importance of professionalism in communications with clients, coworkers, and potential employers.

Prerequisites: None

VTA 165 Pharmacology and Principles of Anesthesia

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides an introduction to the classification of medications, including classes and routes of administration and their effects on body systems. Instruction reviews the role of the veterinary assistant in assisting with the preparations for and restraint of an animal for anesthesia. Practice in pharmacological math is aided by a review of metric and conventional measurements and the use of dimensional analysis.

Prerequisites: None

VTA 170 Aseptic Technique and Surgical Assisting

Total Course Hours: 60 (15 Theory, 45 Lab, 0 Extern) Semester Credits: 2.5

This course trains the student in aseptic preparation of animals, personnel, instruments, and equipment for surgery. Topics include protocol for assisting surgeons in the operating room, descriptions of pre- and postoperative care, and assisting in a variety of basic procedures including animal dentistry.

Prerequisites: None

VTA 275 Externship

Total Course Hours: 240 (0 Theory, 0 Lab, 240 Extern) Semester Credits: 5.0

This course provides students with opportunities to apply professional skills learned in the classroom.

Prerequisites: Career Prep Sequence and Professional Sequences I, II, and III

I attended a university right after high school, but I was immature and didn't do well. Consequently, I dropped out and paid student loans for years. I worked in retail and restaurant management, often working two or three jobs at a time. My wife, who happens to be a PMI graduate, really encouraged me to consider going back to school. When I visited the PMI campus, I ended up enrolling in the Veterinary Assistant (VA) program.

My class schedule allowed me to continue working while going to school. It was difficult, and I had to overcome a lot of self-doubt! I was 27 years old and felt like I was starting over, but the instructors were really helpful. The creative, hands-on projects made it interesting and helped me feel prepared. Besides the VA curriculum, we were taught valuable things like résumé writing and professional etiquette.

I currently enjoy working at a BluePearl pet hospital as a veterinary assistant. It is a fast-paced, intense atmosphere, and I am exposed to many different procedures. I have the opportunity to listen to the doctors, view x-rays and ultrasounds, and learn more each day. I am working on getting to the top of my game as a VA and then plan to progress into the veterinary technician field. The hands-on, personal attention and challenging curriculum I was exposed to at PMI helped prepare me to be a professional. My education at PMI was second to none.

Rene Jackson
Certificate, Veterinary Assistant, Renton Campus

*Seattle program students also complete three restorative dentistry courses.

Dental Hygiene

Objective: To develop in students the personal traits and professional skills required to perform as competent entry-level dental hygienists through didactic instruction and hands-on laboratory and clinical experiences. Curriculum content addresses anatomy and physiology, dental practice management, ethics and laws in dental hygiene, general and oral pathology, patient management, pharmacology, public health dentistry, radiography, and other topics necessary for students to acquire the knowledge and skills they need to perform as effective members of the professional dental care team.

Graduates of this program receive an Associate of Applied Science Degree. Graduates of accredited programs are eligible to apply to take the National Board Dental Hygiene Examination/NBDHE and other board examinations as required for state licensure.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, an interview with the program director and/or faculty is required.

Dental Hygiene • Course Descriptions

PSY 125 Psychology

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0

This course introduces basic concepts in human psychology through an overview of the foundations of the discipline and a more in-depth look at contemporary approaches in the field. Among the many topics included are mental health, well-being, behavior, cognition, personality traits, life span development, social interactions, and various therapies used to treat psychological disorders.

Prerequisites: None

CCM 145 Communications & Composition

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0

This course addresses the skills needed for effective oral and written communications in a variety of contexts. Among the topics addressed are verbal and nonverbal communication cues, active listening techniques, technical and professional writing, health literacy, evaluating culturally diverse points of view, and professional courtesy.

Prerequisites: None

BIO 115 Anatomy & Physiology

Total Course Hours: 75 (45 Theory, 30 Lab, 0 Clinical) Semester Credits: 4.0

This course provides an introduction to the structures and functions of systems within the human body, including integumentary, musculoskeletal, endocrine, nervous, cardiovascular (including blood, heart, blood vessels, and circulation), lymphatic, respiratory, digestive, urinary, and reproductive. Course content addresses the roles of cellular, tissue, and organ structures with each system and within the human body as a whole.

Prerequisites: None

BIO 145 Microbiology & Immunology

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0

This course provides a scientific foundation in microbiology, immunology, and infectious disease transmission principles. Microbial topics cover cell structure, classification, metabolism, genetics, and roles in infectious disease. Immunity types and immunological disorders are presented along with specific pathogenesis and epidemiology of bacteria, fungi, and viruses.

Prerequisites: None

RDH 101 Introduction to Dental Hygiene

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0

This course introduces the role of a dental hygienist, beginning with the fundamental theoretical concepts of professionalism, law and ethics, oral health and disease, and the dental hygiene process of care.

Prerequisites: None

RDH 186 Dental Anatomy

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0

This course develops an understanding of the development and anatomy of human teeth. Disciplines include embryology, histology, and highly specific anatomical components of each deciduous and permanent tooth. Course content includes embryonic development, craniofacial development, tooth development and eruption sequences, anatomy of the periodontium and salivary structures, and specific morphology of each tooth.

Prerequisites: None

SOC 110 Sociology

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0

A survey of the basic concepts found within sociology including social organization, culture, socialization, groups, and human population. This course leads to an understanding of the sociological perspective of human behavior.

Prerequisites: Semester I courses

CHM 125 Chemistry/Biochemistry

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0

This course introduces the basic concepts of general chemistry as well as organic and inorganic chemistry and biochemistry.

Topics include elements and compounds, chemical equations, nomenclature, molecular structure, and the chemistry of proteins, carbohydrates, lipids, and other biological compounds.

Prerequisites: Semester I courses

BIO 136 Head & Neck Anatomy

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0

This course explores the anatomical features and functions of the head and neck region within the context of dental hygiene clinical practice. Students acquire in-depth understanding of the head and neck region through examination and identification of associated osteological structures and body systems.

Prerequisites: Semester I courses

Dental Hygiene • Course Descriptions

RDH 118 Medical Emergencies

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Clinical) Semester Credits: 1.0

This course is designed to instill a working knowledge of appropriate assessment procedures required to obtain and evaluate patient histories that may indicate patients at risk for medical emergencies in the dental setting. Students analyze case scenarios and apply critical thinking skills to accurately identify, treat, manage, and prevent various emergency situations.

Prerequisites: Semester I courses

RDH 116 Preclinical Dental Hygiene

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0

This course begins development of the professional competencies that will be continued throughout the dental hygiene theoretical and clinical curriculum. Among the topics included are clinical policy/procedure, maintaining a safe and aseptic work environment, patient assessment techniques, and duties related to basic instrumentation and equipment.

Prerequisites: Semester I courses

RDH 120 Preclinical Dental Hygiene Lab

Total Course Hours: 90 (0 Theory, 0 Lab, 90 Clinical) Semester Credits: 2.0

This course begins development of the clinical skills that will be continued throughout the dental hygiene sequence of classes.

Clinical concepts introduced and practiced include clinical policy/procedure, maintaining a safe and aseptic work environment, patient assessment techniques, and duties related to basic instrumentation and equipment.

Prerequisites: Semester I courses

RDH 211 Radiology

Total Course Hours: 75 (30 Theory, 45 Lab, 0 Clinical) Semester Credits: 3.5

This course provides the student with the scientific principles and clinical applications relating to the performance of dental radiographic procedures. Content emphasizes techniques of exposing, processing, mounting, and critically interpreting intraoral and panoramic radiographs, and provides students with radiation and infection control principles for use in practical applications. Laboratory experience allows students to gain initial radiographic skills that will be utilized throughout the clinical courses.

Prerequisites: Semester I courses

RDH 150 Dental Hygiene I

Total Course Hours: 45 (30 Theory, 15 Lab, 0 Clinical) Semester Credits: 2.5

This class continues the theoretic development of dental hygiene skills learned in the preclinical course as well as introducing new topics related to dental hygiene clinical treatment. Topics include patient communication strategies, recare and periodontal maintenance protocol, the referral process, anxiety management, air-powder polishers, use of power driven scaling instruments, and dental sealants.

Prerequisites: Semesters I and II courses

RDH 155 Clinical Dental Hygiene I

Total Course Hours: 120 (0 Theory, 0 Lab, 120 Clinical) Semester Credits: 2.5

This course applies previously learned skills in a clinical setting under direct professional supervision. Content emphasizes patient care through the application of assessment techniques, treatment planning, calculus detection, and basic instrumentation and procedures. Students are evaluated with the expectation of demonstrating beginning competency level in direct patient care.

Prerequisites: Semesters I and II courses

RDH 215 Biomaterials

Total Course Hours: 60 (15 Theory, 45 Lab, 0 Clinical) Semester Credits: 2.5

This course is a survey of materials used in dentistry, dental hygiene, and dental laboratory procedures. The chemical and physical properties of dental materials will be discussed with an emphasis on the handling, manipulation, and rationale for use of materials used in dental hygiene and dentistry.

Prerequisites: Semesters I and II courses

RDH 218 Periodontics

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0

This course examines the effects of periodontal disease on overall health. Through exploration of the epidemiology, etiology, microbiology, and immunology of various periodontal diseases, students develop skills that enable them to differentiate and evaluate the severity of the diseases and to develop and apply appropriate clinical treatment modalities.

Prerequisites: Semesters I and II courses

RDH 260 Pharmacology for Dental Hygiene

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0

This course covers the basic components of pharmacology with emphasis on the interaction with the biologic systems in the body as well as those that specifically affect oral health. Topics include therapeutic use, pharmacokinetics, pharmacodynamics, pharmacologic effects, adverse effects, drug interactions, and contraindications, among others.

Prerequisites: Semesters I and II courses

Dental Hygiene • Course Descriptions

RDH 175 Dental Hygiene II

Total Course Hours: 45 (30 Theory, 15 Lab, 0 Clinical) Semester Credits: 2.5

This course integrates the cognitive, psychomotor, and affective foundations of dental hygiene practice through exposure to increasingly complex patient cases, with emphasis on the development of advanced instrumentation, individualized risk assessment, and case management skills. Topics include evidence-based treatment for nonsurgical periodontal therapy, evaluation of treatment outcomes, and professional development strategies. Students participate in case-study presentations drawn from literature reviews that are designed to expand critical thought processes.

Prerequisites: Semesters I, II, and III courses

RDH 180 Clinical Dental Hygiene II

Total Course Hours: 150 (0 Theory, 0 Lab, 150 Clinical) Semester Credits: 3.0

This course introduces new concepts and techniques while providing opportunities to apply acquired skills and knowledge in the clinical setting under direct supervision. Students are expected to demonstrate advanced competency in patient assessment, diagnosis, management, and dental hygiene care planning. Topics and skills addressed include advanced instrumentation and communication techniques, care of oral prostheses, and cultural competence, among others. Students complete a periodontal documentation case study to demonstrate ability to evaluate and implement evidence-based practice techniques.

Prerequisites: Semesters I, II, and III courses

RDH 209 Nutrition & Cariology

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0

This course covers foundational biochemistry of nutrition, specific nutritional requirements throughout the life stages, special requirements for systemic diseases, and how nutrition relates to oral health and disease. These nutritional concepts are then applied to the field of cariology as it relates to the development, function, and progression or reversal of caries. Advanced topics relative to dental caries include pathophysiology, diagnosis, risk assessment, development of appropriate prevention and therapeutic strategies, and trends in caries research.

Prerequisites: Semesters I, II, and III courses

RDH 214 Patient/Pain Management

Total Course Hours: 75 (30 Theory, 45 Lab, 0 Clinical) Semester Credits: 3.5

This course conveys a working knowledge of theoretical and practical applications of various physical, chemical, and psychological modalities intended for pain and anxiety management. Topics address the safe, ethical, legal, and proficient administration of local anesthesia and nitrous oxide in the clinical setting.

Prerequisites: Semesters I, II, and III courses

RDH 220 General/Oral Pathology

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0

This course introduces general pathology concepts relevant to systemic and oral conditions. Discussion topics address recognition, description, and assessment of characteristics that deviate from normal findings. Students apply critical thinking skills to evaluate case studies that include laboratory, clinical, and radiographic data designed to elicit differential diagnoses of oral lesions.

Prerequisites: Semesters I, II, and III courses

RDH 223 Restorative Lab I (Seattle Campus Only)

Total Course Hours: 30 (0 Theory, 30 Lab, 0 Clinical) Semester Credits: 1.0

This course focuses on the development of restorative skills. Content emphasizes placement and carving of amalgam and composite restorations on a dentoform.

Prerequisites: Semesters I, II, and III courses

RDH 200 Dental Hygiene III

Total Course Hours: 45 (30 Theory, 15 Lab, 0 Clinical) Semester Credits: 2.5

This course applies concepts and principles introduced in earlier dental hygiene courses. Students participate in increasingly complex problem-based learning activities that are designed to develop critical thinking skills and that emphasize appropriate assessment and planning techniques for a variety of practice-related situations. Clinical preparation discussion topics include mock board requirements and patient competencies.

Prerequisites: Semesters I, II, III, and IV courses

RDH 205 Clinical Dental Hygiene III

Total Course Hours: 180 (0 Theory, 0 Lab, 180 Clinical) Semester Credits: 4.0

This course engages students in increasingly complex cases in which they apply knowledge and skills acquired in earlier semesters. Competencies include patient assessment, management, treatment, and evaluation as well as preventive measures as part of comprehensive patient care efforts. Additional requirements include appropriate patient selection and completion of clinical mock board examinations and a professional case study.

Prerequisites: Semesters I, II, III, and IV courses

Dental Hygiene • Course Descriptions

RDH 251 Treatment of Special Needs Patient Seminar

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0

This course explores various assessment and treatment practices for special needs populations. Content and activities focus on preparing students to identify appropriate treatment approaches for patients with medical, physical, and other special considerations. Students participate in activities designed to enhance their knowledge and understanding of various treatment strategies that are appropriate for a range of special needs situations.

Prerequisites: Semesters I, II, III, and IV courses

RDH 259 Community & Public Dental Health

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0

This course introduces public health concepts relevant to the field of dental hygiene. Content includes epidemiology, disease prevention, and advocacy for community access to dental care, among others. Students apply critical thinking skills to explore various research-related topics that incorporate biostatistics, study methods, and other considerations to advance knowledge and literature review competence. Student collaboration experiences culminate in designing a community health project that demonstrates understanding of needs assessment, planning, implementation, and outcome evaluations.

Prerequisites: Semesters I, II, III, and IV courses

RDH 233 Restorative Lab II (Seattle Campus Only)

Total Course Hours: 90 (15 Theory, 75 Lab, 0 Clinical) Semester Credits: 3.5

This course focuses on continued development of restorative skills. Amalgam, composite, glass ionomer, and provisional restorative materials will be covered as well as materials utilized for cements, bases, and liners. Students develop competency in placing, finishing, polishing, and evaluating composite and amalgam restorations.

Prerequisites: Semesters I, II, III, and IV courses

RDH 226 Review of Dental Hygiene

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0

This course provides a comprehensive review of the theory, concepts, and techniques taught in the preceding semesters to prepare students for the National Board Dental Hygiene Examination. Students participate in study groups to identify study topics, discuss case studies, and review practice questions.

Prerequisites: Semesters I, II, III, IV, and V courses

RDH 230 Dental Health Promotions

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0

This course applies the concepts of preventive dentistry, oral health education, and nutritional counseling to the development and implementation of oral health promotion programs. Communication and behavior modification skills are utilized to develop the student as a health educator. Students will be exposed to various preventive strategies that can be used to promote and maintain oral health. Emphasis is on community outreach into underserved areas/populations.

Prerequisites: Semesters I, II, III, IV, and V courses

RDH 240 Dental Hygiene IV

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Clinical) Semester Credits: 1.0

This course applies the concepts and principles introduced in earlier dental hygiene courses through problem-based learning activities with an emphasis on self-evaluation and lifelong learning. Topics include student preparation for the clinical board exam, mock board requirements, clinical setting preparation, and licensing requirements.

Prerequisites: Semesters I, II, III, IV, and V courses

RDH 245 Clinical Dental Hygiene IV

Total Course Hours: 180 (0 Theory, 0 Lab, 180 Clinical) Semester Credits: 4.0

This course assesses clinical competency while developing efficiency in preparation for professional employment. Students assess, plan, treat, and evaluate outcomes for patients with diverse medical, dental, and social histories with minimal assistance from clinical faculty. Students also participate in select clinics designed to simulate private practice settings as well as mock clinical boards.

Prerequisites: Semesters I, II, III, IV, and V courses

RDH 285 Restorative Clinic (Seattle Campus Only)

Total Course Hours: 60 (0 Theory, 0 Lab, 60 Clinical) Semester Credits: 1.0

This course expands the knowledge and skills developed in prior courses. Implementation, evaluation, and documentation of restorative procedures are performed on patients during a supervised clinical setting.

Prerequisites: Semesters I, II, III, IV, and V courses

RDH 291 Principles of Dental Hygiene Practice

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0

This course reinforces knowledge of prior content with a focus on career readiness. Students prepare for their transition from an academic setting to the dental practice environment through various activities designed to enhance opportunities for employment. Discussion topics include practice management, legal and ethical principles, and professional responsibilities and expectations.

Prerequisites: Semesters I, II, III, IV, and V courses

Diagnostic Medical Sonography

Objective: To prepare the student through didactic, laboratory, and clinical instruction in the theoretical knowledge, tasks, skills, and responsibilities required of an entry-level general sonographer. Within the framework of the curriculum is information related to anatomy and physiology, pathophysiology, ultrasound scanning techniques and protocols, the sonographer's scope of practice, medical terminology, patient care, medical communications, and professional medical ethics.

Graduates of this program receive an Associate of Applied Science Degree.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, an interview with the program director and/or faculty is required.

Diagnostic Medical Sonography • Course Descriptions

Courses that may be offered on-ground, online, and/or blended: BIO 115 Anatomy & Physiology, PHY 102 Physics, DMS 275 Sonography as a Profession, and DMS 285 Sonography Examination Review

BIO 115 Anatomy & Physiology

Total Course Hours: 75 (45 Theory, 30 Lab, 0 Extern) Semester Credits: 4.0

This course provides an introduction to the structures and functions of systems within the human body, including integumentary, musculoskeletal, endocrine, nervous, cardiovascular (including blood, heart, blood vessels, and circulation), lymphatic, respiratory, digestive, urinary, and reproductive. Course content addresses the roles of cellular, tissue, and organ structures with each system and within the human body as a whole.

Prerequisites: None

CCM 115 Communications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course addresses the wide range of communication skills necessary in health professions. Verbal and nonverbal communication, technical and professional writing, speaking and listening critically, evaluating and synthesizing material from diverse cultural sources and points of view, and other topics are included. Legal and ethical aspects of communication in health care are covered.

Prerequisites: None

CLE 115 Medical Law & Ethics

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course provides an overview of ethics and the law as they apply to medical professions and practice. Topics include: scope of practice, legal issues, ethical considerations, patient rights, informed consent, standards of care, documentation and coding, and the use of best practices to prevent legal difficulties.

Prerequisites: None

CMT 100 Medical Terminology

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

The course focuses on the development of a basic framework for the language of medicine. Through memorization and practice in spelling and pronunciation of medical roots, suffixes, and prefixes, students learn to create, analyze, and apply medical terms.

Prerequisites: None

MTH 140 Math Applications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with the fundamentals of college algebra necessary for understanding concepts and performing measurements and calculations in health care fields. Mathematical operations covered include fractions, decimals, algebraic equations, basic statistics, measurement, geometric concepts, and graphing functions.

Prerequisites: None

PHY 102 Physics

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides an overview of the fundamental concepts of physics. Topics include properties of matter, mechanics of measurement, force and motion, gravity, temperature and heat, sound waves, thermodynamics, electricity, and magnetism. Also addressed are atomic and nuclear physics.

Prerequisites: None

DMS 115 Patient Care

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides an introduction to the provision of safe, high-quality patient care. Topics include communication skills, professional sonographer/patient interaction, patient rights, privacy, identification and assessment, patient preparation for various sonographic examinations, infection control, patient transfer and immobilization, and body mechanics and ergonomics. Also addressed are emergency situations and the provision of care for patients with special needs and patients with tubes and oxygen administration devices.

Prerequisites: Semester I courses

DMS 125 Sonographic Physics & Instrumentation

Total Course Hours: 90 (90 Theory, 0 Lab, 0 Extern) Semester Credits: 6.0

This course applies basic principles of physics within diagnostic medical ultrasound. Topics include basic acoustic principles, wave analysis, propagation of waves in tissue, physics of pulse-echo, image optimization, hemodynamics, Doppler imaging principles, and the instrumentation of the ultrasound unit. Course content also addresses issues of quality assurance, quality control, imaging artifacts, and patient/sonographer safety. This course prepares the students for the ARDMS Sonography Principles and Instrumentation (SPI) exam.

Prerequisites: Semester I courses

Corequisite: DMS 125L Sonographic Physics & Instrumentation Lab

Diagnostic Medical Sonography • Course Descriptions

DMS 125L Sonographic Physics & Instrumentation Lab

Total Course Hours: 120 (0 Theory, 120 Lab, 0 Extern) Semester Credits: 4.0

This course introduces the operation of ultrasound instrumentation to ensure sonographic image optimization. Hands-on instruction provides experience in operating console controls and the transducer. Students learn the process of acquiring quality images through the manipulation of the 2-D gray scale, color Doppler, continuous-wave Doppler, and 2-D Doppler applications. Also addressed are the inspection and maintenance of the ultrasound unit, quality control/quality assurance, infection control, and ergonomic considerations.

Prerequisites: Semester I courses

Corequisite: DMS 125 Sonographic Physics & Instrumentation

DMS 135 Vascular Structures

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course introduces hemodynamics of the vascular system. Course content covers normal and pathological appearance of vascular structure images, common vascular studies, diagnostic test protocols, and interpretation of ultrasound findings. Also addressed are the principles and techniques of 2-D Doppler, color Doppler, power Doppler, and waveform interpretation.

Prerequisites: Semester I courses

DMS 195 Abdomen & Superficial Structures Sonography

Total Course Hours: 90 (90 Theory, 0 Lab, 0 Extern) Semester Credits: 6.0

This course introduces sonographic scanning of organs and structures of the abdomen and the superficial structures of the body. Instruction focuses on the sonographic and Doppler appearance of normal and abnormal organs, their vasculature, pathologies, and the processes of distinguishing normal anatomy from artifacts and pathologic conditions. Also covered are necessary modifications or extensions of the scope of the examination, prioritization of differential diagnoses, and preparation of a technical report.

Prerequisites: Semesters I and II courses

Corequisite: DMS 195L Abdomen and Superficial Structures Sonography Lab

DMS 195L Abdomen & Superficial Structures Sonography Lab

Total Course Hours: 120 (0 Theory, 120 Lab, 0 Extern) Semester Credits: 4.0

This course provides opportunities to refine skills in scanning, interpreting sonographic and Doppler findings, and recognizing normal anatomical variations and pathology of abdominal and superficial structures and their related vasculature. The student will practice interviewing, preparing, and positioning patients, gathering pertinent clinical data, selecting equipment, and choosing and manipulating sonographic controls to achieve quality sonographic images.

Prerequisites: Semesters I and II courses

Corequisite: DMS 195 Abdomen & Superficial Structures Sonography

DMS 200 Vascular Imaging I

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course reviews the anatomy, physiology, and pathologies of the arterial and venous systems of the abdomen and related hemodynamic considerations. Instruction focuses on recognition of normal images associated with 2-D spectral waveform analysis, color Doppler, and power Doppler. Also addressed are the most common vascular studies of the abdomen, standardized diagnostic test protocols, correlation of test data with other clinical information, interpretation of sonographic findings, and didactic content related to indirect physiological arterial testing.

Prerequisites: Semesters I and II courses

DMS 205 Introduction to Vascular Imaging Lab

Total Course Hours: 60 (0 Theory, 60 Lab, 0 Extern) Semester Credits: 2.0

This course provides students with hands-on experience in the techniques and protocols for the most commonly ordered vascular ultrasound studies that the general sonographer would be called upon to perform, with a focus on the carotid artery.

Prerequisites: Semesters I and II courses

DMS 242 Vascular Imaging II

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course introduces the normal anatomy and pathologies of the peripheral arterial and venous vasculature. Instruction focuses on recognition of the ultrasonic appearance of normal and abnormal images. Also addressed are the principles and techniques of spectral wave analysis, and interpretation of color Doppler and power Doppler.

Prerequisites: Semesters I, II, and III courses

Corequisite: DMS 242L Vascular Imaging II Lab

DMS 242L Vascular Imaging II Lab

Total Course Hours: 60 (0 Theory, 60 Lab, 0 Extern) Semester Credits: 2.0

This course introduces hands-on scanning of the anatomy of the peripheral arterial and venous vascular systems, and provides practice in refining skills in scanning, recognizing the sonographic appearance of normal anatomical variations and pathologies, and interpreting findings. Also addressed are the principles and techniques of 2-D Doppler, color Doppler, power Doppler, and waveform interpretation.

Prerequisites: Semesters I, II, and III courses

Corequisite: DMS 242 Vascular Imaging II

Diagnostic Medical Sonography • Course Descriptions

DMS 255 Obstetric & Gynecology Sonography

Total Course Hours: 90 (90 Theory, 0 Lab, 0 Extern) Semester Credits: 6.0

This course provides a comprehensive study of the anatomy, physiology, pathophysiology, and sonographic appearances of the female reproductive system, as well as the development and sonographic appearance of the fetal and extra-fetal anatomy. Sonographic studies focus on the fertilization process, clinical indications for obstetrical sonograms, characteristics of normal/abnormal gravid and nongravid uterine anatomy, and data collected to determine fetal age, weight, and biometry measurements.

Prerequisites: Semesters I, II, and III courses

Corequisite: DMS 255L Obstetric & Gynecology Sonography Lab

DMS 255L Obstetric & Gynecology Sonography Lab

Total Course Hours: 120 (0 Theory, 120 Lab, 0 Extern) Semester Credits: 4.0

This course provides the student opportunities to refine scanning and interpretation skills while following gynecologic and obstetric patient protocols. The student will gather pertinent clinical data in order to understand the total medical picture of the patient prior to the ultrasound examination. Also addressed are the special concerns and protocols regarding sonography and Doppler studies of the developing fetus and the related biometry measurements.

Prerequisites: Semesters I, II, and III courses

Corequisite: DMS 255 Obstetric & Gynecology Sonography

DMS 270 Clinical Practicum I

Total Course Hours: 540 (0 Theory, 0 Lab, 540 Extern) Semester Credits: 12.0

This course provides clinical experience under direct supervision of qualified clinical staff or DMS faculty member. Students will develop clinical competence expertise in scanning through observing, assisting, and performing the full range of sonographer responsibilities. Student learning and competence will be determined in part through frequent critique and evaluation of the performance of required competencies.

Prerequisites: Semesters I, II, III, and IV courses

DMS 275 Sonography as a Profession

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course examines the role and responsibilities of a sonographer in achieving and maintaining professional credentials and advancing expertise. Students will review ethical and legal aspects of professional practice as a sonographer. Also addressed are the skills required to transition into the workforce.

Prerequisites: Semesters I, II, III, and IV courses

DMS 280 Clinical Practicum II

Total Course Hours: 540 (0 Theory, 0 Lab, 540 Extern) Semester Credits: 12.0

This course advances the student's clinical experience under direct supervision of qualified clinical staff or DMS faculty member. Students gain expertise in scanning through observing, assisting, and performing the full range of sonographer responsibilities. Student learning and competence will be determined in part through frequent critique and evaluation of the performance of required competencies. By the completion of the course, students are expected to demonstrate the clinical skills and competence required of an entry-level sonographer.

Prerequisites: Semesters I, II, III, IV, and V courses

DMS 285 Sonography Examination Review

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course is designed to prepare the student for examination for certification by the American Registry of Diagnostic Medical Sonography (ARDMS).

Prerequisites: Semesters I, II, III, IV, and V courses

Health Care Administration

Objective: The Health Care Administration (HCA) program offers a general overview of the business, administrative, and organizational activities of health care. The program introduces students to health information technology, business communication, psychology, health care management, finance, and computer applications.

Graduates of this program receive an Associate of Applied Science Degree.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, applicants can apply for a block-transfer option to accelerate into semester three of the five-semester program by transferring 28 credits under the following conditions: 12 of the 28 transfer credits must be from a health care field. PMI certificate programs that block-transfer into semester three include Dental Assistant (non-California campuses), Medical Administrative Assistant, Medical Assistant, Medical Billing and Coding, Patient Care Technician, Pharmacy Technician, and Sterile Processing Technician. Transfer credit requirements are listed Prospective Students section of this catalog.

Health Care Administration • Course Descriptions

CCM 100 Communications

Total Course Hours: 48 (48 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with experience with the wide range of communication skills necessary for success in health professions. Verbal and nonverbal communication, technical and professional writing, speaking and listening critically, health literacy, evaluating and synthesizing material from diverse cultural sources and points of view, and other topics are included.

Prerequisites: None

CCL 111 Computer Literacy

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course provides a survey of the responsible and ethical uses of computers and related devices in academic and medical settings. Through demonstration and hands-on experience, students acquire a general understanding of computer technology. Topics include but are not limited to review of common terminology and hardware and software components and applications used in basic word processing, spreadsheets, and presentations. Students utilize technology to retrieve, evaluate, and synthesize information from diverse sources and points of view.

Prerequisites: None

BIO 121 Anatomy, Physiology, and Pathology

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course examines the structure and function of the systems within the human body. It also incorporates the interrelationships between the structures and systems, as well as common diseases and conditions associated with each system. The course content also includes foundational knowledge regarding the diagnosis, treatment, and prognosis for various diseases.

Prerequisites: None

CMT 115 Medical Terminology

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course focuses on the development of a basic framework for the language of medicine. Through memorization and practice in spelling and pronunciation of medical roots, suffixes, and prefixes, students learn to create, analyze, and apply medical terms as they relate to various anatomical, physiological, and pathological conditions. Medical records and reports are introduced to provide opportunities for students to apply the knowledge within the clinical environment.

Prerequisites: None

HCA 100 Office Management

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course introduces students to the daily operations of the medical office environment, including basic policies/procedures, appointment scheduling, telephone etiquette, patient reception and processing, billing and coding procedures, and financial and medical records management.

Prerequisites: None

HIT 155 Electronic Health Records

Total Course Hours: 90 (30 Theory, 60 Lab, 0 Extern) Semester Credits: 4.0

This course provides an overview of electronic health records (EHR) and the significance of EHR systems within the health care field. Students participate in hands-on activities to practice and hone their abilities to navigate and understand the EHR environment and general coding concepts.

Prerequisites: None

MTH 132 Basic College Mathematics

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course presents calculation, conversion, and computation of fractions, decimals, measurements, ratios, and proportions. It also introduces students to the application of these skills as required in the health care setting.

Prerequisites: None

HIT 135 Introduction to Insurance

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course addresses insurance terminology, coding basics for third-party reimbursement, and types of government-sponsored insurance including workers' compensation, Medicare, and Medicaid. Students complete sample insurance claim forms.

Prerequisites: None

ENG 101 English Composition I

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course reviews the basics of English composition, including how to plan, organize, write, edit, and revise written compositions. Grammar, sentence structure, spelling, punctuation, and vocabulary are reviewed as needed to help students practice and improve their writing skills.

Prerequisites: None

CPT 201 Computer Fundamentals

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course introduces students to the Windows environment and to Windows-based applications. Through a hands-on approach, students will achieve a working knowledge of Windows, Microsoft Word and Excel, and a brief introduction to Microsoft PowerPoint presentation software.

Prerequisites: CCB 100 Computer Basics or CCL 111 Computer Literacy

Health Care Administration • Course Descriptions

MTH 203 Math Applications

Total Course Hours: 48 (48 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with the fundamentals of college algebra. Mathematical operations covered include fractions, decimals, algebraic equations, basic statistics, word problems, and graphing.

Prerequisites: CMF 95 Math Fundamentals or MTH 132 Basic College Mathematics

HCA 201 Introduction to the Health Care System

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course introduces the basic structures and operations that have formed the present-day health care system in the United States. Students explore the broad and often complex range of concepts associated with the health care system and health care organizations, including individual services, cost structures, reform movements, and quality control, among others.

Prerequisites: None

HCA 210 Business Communications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course focuses on the practice of effective communication and writing within the contexts of business and the health care profession. Students analyze the psychology, semantics, planning, and principles of effective business writing.

Prerequisites: ENG 101 English Composition I

HCA 220 Health Care Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course explores various health care settings ranging from hospitals to nursing homes to clinics. Issues addressed include ethics, cost management, strategic planning and marketing, information technology, and human resources.

Prerequisites: None

ECN 101 Macroeconomics

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course presents an analysis of economic theory as applied to the operation of the economy as a whole. Topics covered include variables such as national income, employment, inflation, the roles of government expenditure, taxation, and fiscal policy as well as the Federal Reserve and monetary policy.

Prerequisites: None

SOC 115 Introduction to Sociology

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides a broad overview of sociology and how it applies to everyday life. Major theoretical perspectives, concepts, and methodologies are presented. Students will examine the influence of social groups and institutions, culture, and social structure on the process of socialization. Inequality and its effects upon these social contexts will also be explored. This course leads to an understanding of the sociological perspective of human behavior.

Prerequisites: None

PSY 201 Psychology

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course examines human behavior and its biological foundations, with emphasis on basic concepts and theories. The range of topics addressed includes adaptation, motivation, memory, learning, personality, and emotions. Human interactions in various contexts are also explored.

Prerequisites: None

HCA 213 Medical Law and Ethics

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides an overview of ethics and the law as they apply to medical practice. Topics include documentation, standards of care, professionalism and ethics, HIPAA, patient rights, informed consent, and employment discrimination.

Prerequisites: None

HCA 221 Human Resource Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is designed to provide a basic understanding of the various aspects of personnel management. Emphasis is placed on such topics as communication, recruiting, interviews/selection, promotion, performance appraisals, and job satisfaction.

Prerequisites: None

HCA 223 Health Care Finance

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course introduces financial management decision-making techniques for health care providers. Topics include financial management functions, managed care environments, financial statement analysis, working capital management, strategic planning, capital budgeting, cost of capital, variance analysis, and financing techniques.

Prerequisites: CPT 201 Computer Fundamentals and MTH 203 Math Applications

Medical Laboratory Technician

Objective: To develop in students the personal traits and professional skills required to perform as competent entry-level medical laboratory technicians. Students learn and practice the fundamentals of testing procedures on various body fluids, including urine, synovial fluid, cerebrospinal fluid, and blood. They also learn to differentiate between normal and abnormal test results and how to apply important safety concepts and practices—such as OSHA standards, universal precautions, and personal protective equipment—to laboratory practices.

Graduates of this program receive an Associate of Applied Science Degree and are eligible to apply to take the the American Society for Clinical Pathology (ASCP) Medical Laboratory Technician (MLT) certification examination.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, an interview with the program director and/or faculty is required.

Medical Laboratory Technician • Course Descriptions

CMT 120 Medical Terminology

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

Students who successfully complete this course will be able to understand and build an extensive medical vocabulary through memorization and practice in spelling and pronunciation of medical roots, suffixes, and prefixes. Students learn to create, analyze, and apply medical terms. Students should also be able to use the word building system to further define new medical terms as necessary.

Prerequisites: None

BIO 102 Anatomy & Physiology

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course focuses on the fundamentals of human anatomy and physiology. Subjects covered include the organization of the body, anatomy and physiology of cells and tissues, and the structures and functions of the following systems: cardiovascular, respiratory, endocrine, nervous, integumentary, musculoskeletal, lymphatic, digestive, urinary, and reproductive. Knowledge gained in this course will prepare the student for more complex theoretical and practical applications in subsequent technical courses.

Prerequisites: None

BIO 103 Human Pathology

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

Upon successful completion of this course, the student will have an understanding of the most common disease processes involved in all systems of anatomy and physiology.

Prerequisites: None

CCM 155 Communications for Health Care Professionals

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides an overview of the operation of computers and their application in the field of allied health. Topics include the effective use of oral, written and electronic communications skills, verbal and nonverbal communication, intercultural communication, technical and professional writing, and the applications of computers in allied health.

Prerequisites: None

CHM 100 General Chemistry

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is designed to give the student fundamental basic knowledge of chemistry in preparation for utilization in the clinical laboratory. This course will cover basic principles, vocabulary, molecular structures, methods of measurement, quantum theory, acids, bases, salts and an introduction to organic chemistry.

Prerequisites: None

MLT 101 Introduction to Medical Lab

Total Course Hours: 45 (30 Theory, 15 Lab, 0 Extern) Semester Credits: 2.5

This course is designed to introduce students to OSHA standards, personal protective equipment, the care and use of laboratory equipment including microscopes and proper techniques for handling of glassware. In addition, students will learn basic skills in hematology, urinalysis, microbiology, chemistry, and parasitology. QC documentation requirements and techniques used in lab reporting will also be presented.

Prerequisites: None

BIO 104 Molecular Biology

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Students who are enrolled in this course will learn the fundamentals of molecular biology. Students will have an understanding of cellular biology, genetics, metabolism, mitosis, and meiosis and how they relate to medical laboratory testing.

Prerequisites: None

MLT 111 Instrumentation and Quality Control

Total Course Hours: 45 (15 Theory, 30 Lab, 0 Extern) Semester Credits: 2.0

Students will be introduced to laboratory instrumentation including the spectrophotometer, perform linearity studies and incorporate all aspects of quality control required in the laboratory.

Prerequisite: MLT 101 Introduction to Medical Lab

MLT 121 Microbiology

Total Course Hours: 90 (15 Theory, 75 Lab, 0 Extern) Semester Credits: 3.5

Upon completion of this course students will have an understanding of the theories and principles applicable to clinical microbiology. The student will be able to recognize, isolate, and identify most common pathogens. These include the gram positive and gram negative organisms and most common fungi. The student will also be able to perform antimicrobial susceptibility tests for those pathogenic bacteria, along with biochemical studies.

Prerequisites: MLT 101 Introduction to Medical Lab

MTH 200 Math for Medical Specialties

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Upon completion of this course, students will have an understanding of mathematical concepts used in general chemistry, clinical chemistry, hematology, and basic physics needed for proper calculation in a medical setting.

Prerequisites: None

Medical Laboratory Technician • Course Descriptions

PHL 105 Phlebotomy

Total Course Hours: 75 (15 Theory, 60 Lab, 0 Extern) Semester Credits: 3.0

Students who successfully complete this course will have the ability to perform proper collection, handling, and processing of blood using various collection methods. In addition, they will have an understanding of other specimen collection techniques as well as proper labeling and required documentation in a medical laboratory.

Prerequisites: MLT 101 Introduction to Medical Lab

CLE 100 Medical Law and Ethics

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course addresses legal and ethical principles and practices in the workplace, particularly in health care settings. Topics include the laws that govern and limit professional scopes of practice, codes of ethics, ethical and legal issues, federal and state regulations, and medical negligence.

Prerequisites: Semesters I and II courses

MLT 131 Hematology

Total Course Hours: 90 (30 Theory, 60 Lab, 0 Extern) Semester Credits: 4.0

This course equips the student with the practices and principles explored in the hematology laboratory. Procedures covered include: complete blood counts with white blood cell counts, red blood cell counts, hemoglobin determinations, hematocrit values, blood smear differential, red cell indices, sedimentation rates, and reticulocyte counts and gene mutation.

Prerequisites: Semesters I and II courses

MLT 141 Clinical Chemistry

Total Course Hours: 45 (30 Theory, 15 Lab, 0 Extern) Semester Credits: 2.5

Upon completion of this course students will have an understanding of the theory and clinical interpretation of carbohydrates, lipids, and proteins needed for clinical laboratory testing. Students will have the ability to perform manual and automated laboratory determinations and spectrophotometer methods, and they will have an understanding of the standard operating procedures as well as quality assurance standards for all chemistry tests performed. Theory and clinical interpretation of enzymes, electrolytes, and toxic substances will be presented. Students will perform manual and automated laboratory determinations corresponding to theoretical study.

Prerequisites: Semesters I and II courses

MLT 151 Pathogenic and Parasitic Organisms

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

Students will learn about parasites and clinically important protozoans, nematodes, trematodes, cestodes, and such characteristics as geographical distribution, life cycle, pathology, morphology, and clinical diagnosis. This course provides practical procedures for the preparation, examination, and identification of common pathogenic parasites. Mycology and their reactions to the body and environment will be studied. Students will learn methods of collecting specimens, preparation of media, and microscopic examinations for the identification of common saprophytic and pathogenic fungi. Additional pathogenic microorganisms will be presented. Students will be introduced to the techniques for cultivation of anaerobes and identification schemes for less common pathogens.

Prerequisites: Semesters I and II courses

MLT 161 Immunology and Serology

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This course will introduce the students to immunology, the immune response and antigen/antibody testing which will include various serology tests used in the laboratory. Students will become familiar with virology terminology and understand the classifications of various viruses and the clinical manifestations of viruses.

Prerequisites: Semesters I and II courses

CMS 101 Career Marketing Strategies

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

Students create a portfolio including resumes, references, cover letters, and thank-you letters. Mock interviews will be conducted. Students learn how to evaluate job offers and skills.

Prerequisites: Semesters I, II, and III courses

MLT 171 Urinalysis and Body Fluids

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

During this course students will learn the physical, chemical, and microscopic examination of urine and its importance to a physician in the diagnosis of disease. Students will also learn proper processing and handling of other bodily fluids for laboratory testing.

Prerequisites: Semesters I, II, and III courses

MLT 181 Hemostasis and Specialty

Testing Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This course will prepare students with knowledge of procedures in coagulation and handling of samples. Studies include clotting mechanisms, platelet structure and function, and the maintenance of vascular integrity including both intrinsic and extrinsic systems. All areas of study will be substantiated with lab procedures and methods used to monitor these conditions. In addition, the students will examine abnormal blood smears to include leukemias and myeloproliferative disorders. Discussion will include cytochemical staining, flow cytometry and cytogenetics used to identify a variety of hematologic diseases.

Prerequisites: Semesters I, II, and III courses

Medical Laboratory Technician • Course Descriptions

MLT 191 Molecular Diagnostics

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course is designed to give the student a basic understanding of molecular techniques to aid in the diagnosis and monitoring of disease. These techniques will include nucleic acid isolation and sequencing, gel electrophoresis, polymerase chain reaction, hybridization, and DNA microarray. Students will be introduced to mass spectrophotometry and its application in the clinical laboratory. Identification of microorganisms will also be presented by discussing gene sequencing and MALDI-TOF mass spectrophotometry.

Prerequisites: Semesters I, II, and III courses

MLT 201 Immunohematology and Blood Banking

Total Course Hours: 90 (30 Theory, 60 Lab, 0 Extern) Semester Credits: 4.0

This course is designed to give the student a basic understanding of the immune system and blood banking and their relationship to clinical testing. The student will have a basic knowledge of antigen-antibody testing methods and be able to perform the necessary pipetting skills for these tests. In addition, the student will understand and be capable of performing ABO grouping, RH typing, compatibility testing, antibody identification, and component therapy. Donor screening, blood processing, and appropriate quality assurance procedures are also treated.

Prerequisites: Semesters I, II, and III courses

MLT 205 Medical Laboratory Review

Total Course Hours: 90 (30 Theory, 60 Lab, 0 Extern) Semester Credits: 4.0

Upon completion of this course, students will be prepared for the application process and testing procedures needed for completion of their certification exam. This course will provide review of all laboratory materials, competencies, and guidelines necessary for completion of the exam.

Prerequisites: Semesters I, II, III, and IV courses

MLT 210 Externship

Total Course Hours: 400 (0 Theory, 0 Lab, 400 Extern) Semester Credits: 8.5

An externship consists of 400-hour field experience in an appropriate location. This provides a clinical laboratory experience for the students in a CLIA-approved laboratory. Clinical experiences will expose students to the necessary skills required of the profession. The clinical experience covers the major sections of clinical laboratory testing, including chemistry, hematology/coagulation, body fluids/urinalysis, immunology/serology, immunohematology, and microbiology.

Prerequisites: Semesters I, II, III, and IV courses

After I obtained a bachelor degree in industrial microbiology, I found it challenging to find a job in the pharmaceutical or medical device industry as a microbiologist. Every time I looked for a job in the laboratories, they required certifications in medical laboratory technician (MLT) or medical laboratory sciences (MLS), which I didn't have. So, I decided to go back to school to get the certification I needed.

I started a medical laboratory technician program at another educational institution, but in June of 2017 that institution transferred the program to Pima Medical Institute (PMI). I think it was the best thing that could have happened to me and my peers because PMI took us in and helped us finish what we started.

At the time, I had just given birth and had three children to care for while going to school. Even though the obstacles were great, my family and the PMI instructors made the transition and process smooth and efficient. The MLT program instructors, program director, and administrative staff were always available to help with whatever I needed.

During my externship, I was hired as a quality specialist for a microbiology department with Infinity Laboratories. I've since decided I want more and am hoping to be accepted into a physician assistant program in the near future.

Pima Medical Institute prepared me for my profession. I am thankful to God, my family, and PMI for their support. PMI is an outstanding educational institution and prepares students for success. I am grateful to have been part of this organization.

Sheila Gonzalez

Nursing

Objective: To develop in students the personal traits and professional skills needed to perform as competent entry-level nurses. The program provides students with knowledge of anatomy and physiology, growth and development, pharmacology, nursing theory, and skills for patient care across the life span.

Graduates of this program receive an Associate of Applied Science Degree. Graduates of approved nursing programs are eligible to apply to take the National Council Licensure Examination (NCLEX-RN®). Those who pass the NCLEX-RN® are qualified to apply for state licensure or registration to practice nursing.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, applicants must achieve a minimum score on a nursing admissions test, and an interview with nursing faculty is required.

Nursing • Course Descriptions

ENG 127 English

Total Course Hours: 48 (48 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0

This course focuses on expository writing, oral presentation, and communication. Skills emphasize professional communication with other health professionals, patients, families, and other stakeholders. Written and oral work presented in this course will help the student improve the organization of presentations. APA format will be used for written materials.

Prerequisites: None

BIO 147 Human Anatomy and Physiology

Total Course Hours: 80 (48 Theory, 32 Lab, 0 Clinical) Semester Credits: 4.0

This course is a conceptual study of the structure and function of the human body including cells, tissues, and organs. Emphasis is on interrelationships among systems and concepts and their regulation of physiologic function necessary to maintain homeostasis.

Prerequisites: None

MTH 145 Applied Mathematics

Total Course Hours: 48 (48 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0

This course presents calculation, conversion, and computation of fractions, decimals, ratios, proportions, percentages, measurements, abbreviations, and data analysis. Content acquaints students with critical-thinking skills required for the health professional's role in evidence-based health care delivery. Concepts apply to dose calculation.

Prerequisites: None

HSC 125 Introduction to Health Care

Total Course Hours: 64 (32 Theory, 32 Lab, 0 Clinical) Semester Credits: 3.0

This course provides an introduction to the health care delivery system—medical terminology, safety, responsibilities, and selected skills related to achieving patient-centered care and meeting the basic human needs of family and community. Content addresses the wellness-illness continuum within the context of the health care delivery system while introducing concepts of oxygenation, circulation, and skin integrity. Students apply theoretical knowledge and practice fundamental skills using low-fidelity mannequins.

Prerequisites: None

PHI 116 Foundations of Human Potential

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0

This course assists students in managing issues that may impact learning, organization, and communication skills necessary to flourish personally and professionally. Students practice repetitive standardized electronic test-taking to improve critical thinking, test-taking ability, self-assessment techniques, self-prioritization, organization, and situational analysis.

Prerequisites: None

NUR 103 Strategies for RN Success

Total Course Hours: 24 (8 Theory, 16 Lab, 0 Clinical) Semester Credits: 1.0

This course provides an introduction to nursing practice and judgment, professionalism, role development, identity, and cultivation of critical thinking skills toward application of theory-to-practice.

Prerequisites: None

PSY 160 Human Development

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0

This course will guide the student's understanding and personal application of the basic psychological principles and biological processes that underlie social behavior, motivation, personality, emotion, perception, intelligence, human relations, communication, learning, and decision-making. Personal and professional reflection will assist the student in improving academic performance, professionalism, responsiveness, accountability, mutuality, excellence, and relationships.

Prerequisites: Semester I courses

BIO 175 Pathophysiology

Total Course Hours: 48 (48 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0

This course serves as a basis for students' understanding of structural and foundational alterations in health and the selected responses and strategies that modify them. Concepts addressed include chemical, biologic, biochemical, and psychological processes.

Prerequisites: Semester I courses

PHA 109 Pharmacology

Total Course Hours: 16 (16 Theory, 0 Lab, 0 Clinical) Semester Credits: 1.0

This course introduces students to the principles of pharmacokinetics, pharmacodynamics, pharmaceuticals, pharmacotherapeutics, and toxicology using the concepts of suitability, safety, and evaluation to optimize positive outcomes. The legal and ethical aspects related to drugs and medications are addressed.

Prerequisites: Semester I courses

Nursing • Course Descriptions

NUR 111 Pharmacology for Health Promotion and Maintenance

Total Course Hours: 16 (0 Theory, 16 Lab, 0 Clinical) Semester Credits: 0.5

This course will establish the knowledge, skills, and attitudes necessary to continuously improve quality and safety while preparing, administering, and evaluating the desired and/or adverse effects of medications provided for health promotion and maintenance of patients with stable and well-managed conditions.

Prerequisites: Semester I courses

NUR 126 Nursing's Role in Health Promotion

Total Course Hours: 208 (48 Theory, 64 Lab, 96 Clinical) Semester Credits: 7.0

Course content broadens the student's understanding of beginner novice nursing practice in evidenced-based health promotion and maintenance through a foundational platform of knowledge, skills, and attitude. Foundational concepts regarding the nurse's role and the nursing process are emphasized. Content targets health-altering events identified by various health care databases. Subsequent patient-care needs encountered across the life span that influence the wellness-illness state focus on the concepts of oxygenation, cardiac output, tissue perfusion, digestion, elimination, and skin integrity. Key concepts are correlated with simulation laboratory and clinical practice in various settings.

Prerequisites: Semester I courses

BIO 185 Nutrition

Total Course Hours: 16 (16 Theory, 0 Lab, 0 Clinical) Semester Credits: 1.0

This course presents the science of nutrition as it applies to everyday life. Students learn how to apply the logic of science to nutritional concerns. Topics include the six categories of nutrients—carbohydrates, fats, proteins, vitamins, minerals, and water. Students also examine the digestive process, energy balance, nutritional alterations, and the wellness-illness continuum relevant to nutrition. Discussion topics include local and global programs available to provide health-promotion practices with emphasis on cultural and population needs.

Prerequisites: Semesters I and II courses

PSY 225 Family Centered Care Across the Life Span

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0

This course will consider human activities across the life span that are directed toward developing, sustaining, and enhancing wellness during all stages of development in the journey toward psychosocial maturity. Primary emphasis is on the dynamics and development of individuals, family, local, and global communities. An emphasis on shared decision-making among family, provider, and community is developed. The history and theories of growth and development are explored as a foundation to explain and predict human life span events. The lived experiences of the developing individual and family are discussed within the dimension of physical and cognitive changes, holism, and cultural diversity.

Prerequisites: Semesters I and II courses

NUR 234 Acute Care Nursing Across the Life span

Total Course Hours: 240 (48 Theory, 48 Lab, 144 Clinical) Semester Credits: 8.0

This course will allow students to demonstrate, at an intermediate novice level, the nursing process while providing safe, evidence-based, holistic patient-centered care for patients across the life span. Students will demonstrate competent performance and integration of cumulative nursing knowledge, skills, and attitudes that reflect quality, safety, and accountability as well as judgment and decision-making in the provision of care in the simulation lab and in clinical practice.

Prerequisites: Semesters I and II courses

NUR 266 Professional Transition I

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0

This course assesses the student's progress toward mastery of core program concepts, provides a review of knowledge, skills, and attitudes necessary for contemporary professional practices, and analyzes the student's readiness to progress to a higher level of integration of professional theory and practice. Demonstration of critical thinking, creative problem-solving, and test-taking skills are essential for successful completion of this course.

Prerequisites: Semesters I and II courses

SOC 245 Sociology of Health

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0

Course content is designed to integrate students' knowledge of health, illness, and health care with sociological factors that impact the wellness-illness continuum, biomedicine, and the health care system. Students explore sociological conditions that affect the distribution of illness and/or disease at local, regional, and national levels, and then address ways in which sociological understanding can benefit the delivery and management of health care across society.

Prerequisites: Semesters I, II, and III courses

Nursing • Course Descriptions

NUR 209 Pharmacology for the Complex Patient

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0

This course advances the student's understanding, application, analysis, and evaluation of the professional nursing responsibilities related to prescribed and over-the-counter pharmacological agents that may be used across the life span to manage health-altering problems. Students discuss subsequent expected outcomes and unexpected effects that may arise in patients as a result of the use of these agents as well as medication error prevention and/or mitigation strategies. Emphasis is placed on pharmacological agents that influence the wellness-illness state related to oxygenation, cardiac output, tissue perfusion, digestion, nutrition, elimination, skin integrity, reproduction, cognition, mobility, biophysiological wellness, psychosocial wellness, and neurosensation, as well as metabolism and fluid, electrolyte, and acid-base imbalances. Multiple and complex health alterations within the context rehabilitation and end-of-life care treatment strategies are also addressed.

Prerequisites: Semesters I, II, and III courses

NUR 276 Nursing Care for the Complex Patient

Total Course Hours: 280 (48 Theory, 64 Lab, 168 Clinical) Semester Credits: 9.0

This course will allow students to demonstrate the nursing process at an advanced level of reasoning and problem solving in providing safe, evidence-based, holistic patient-centered plans for patients across the life span with multiple and/or complex health alterations. Students will demonstrate competent performance and integration of cumulative nursing knowledge, science, skills, theory, assessment, compassion, time management, delegations, and technology use and documentation that reflect quality, safety and accountability in the simulation lab and clinical practice.

Prerequisites: Semesters I, II, and III courses

HSC 280 Health Care Informatics

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Clinical) Semester Credits: 2.0

This course explores the roles of health care providers, consumers, and key stakeholders in collecting, managing, analyzing, and safeguarding data. Content provides an overview of national health care databases and emerging technologies and is designed to promote understanding of computerized work-flow processes that ensure safe and effective care delivery.

Prerequisites: Semesters I, II, III, and IV courses

NUR 286 Nursing Care in Challenging Situations

Total Course Hours: 304 (48 Theory, 64 Lab, 192 Clinical) Semester Credits: 9.5

This course provides students opportunities to demonstrate nursing processes at a graduate-novice level through focusing on competent integration of cumulative nursing knowledge, science, skills, and theory. Students apply knowledge and skills in delegation, assessment, interventions, outcomes, compassion and caring, and technology and documentation that reflect quality, safety, excellence, accountability, and responsibility in the provision of care for very complex, ambiguous, intensive, life-threatening, crisis, and aggressive altered-health states encountered across the life span and that are common to critical and life-challenging health conditions and outcomes. The capstone immersion/preceptorship experience requires students to demonstrate a cumulative level of competence in the care of a group of patients through application of common concepts, including advocacy, caring and compassionate behaviors, collaboration, communication, critical thinking, diversity, family and community roles, knowledge, skills, attitudes, legal and ethical comportment, lifelong learning, nursing process, professionalism, safety and quality, and skills and competencies.

Prerequisites: Semesters I, II, III, and IV courses

NUR 296 Role Development of the Graduate Nurse

Total Course Hours: 48 (48 Theory, 0 Lab, 0 Clinical) Semester Credits: 3.0

This course provides students the opportunity to demonstrate synthesis of knowledge from general education and nursing core courses as a basis for professional nursing practice at the graduate-novice level as a caregiver and provider of nursing practice, evaluator of nursing judgment, collaborator, coordinator, and contributor to professional identity, advocate for human flourishing, and scholar with a spirit of inquiry. This course is designed to guide the student in preparation for the NCLEX-RN®, directed by the NCLEX-RN® Detailed Test Plan. Study and test-taking strategies are discussed and implemented using the nursing process to resolve application, analysis, synthesis, and evaluation-level questions. Leadership and management roles of the graduate-novice professional nurse are examined.

Prerequisites: Semesters I, II, III, and IV courses

PROGRAM TYPE: **Associate Degree**

DELIVERY METHOD: **On-ground**

Las Vegas campus: On-ground, online, and/or blended (see course descriptions)

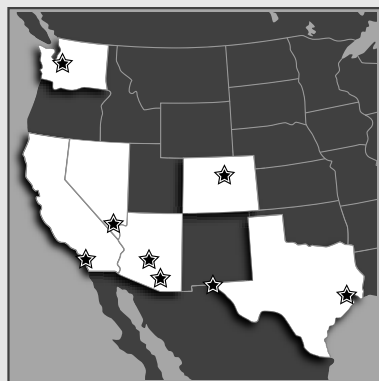

SEMESTER CREDITS: 70.5

(73.5 Las Vegas campus; program includes HST 205 Nevada History and US Constitution, which is 3.0 credits)

PROGRAM LENGTH	TOTAL
Program Hours	1,712 1,757*
Program Weeks	80
Program Semesters (16 weeks per semester)	5

* Las Vegas campus.

Campus Locations

AZ: Mesa, Tucson

CA: San Marcos

CO: Denver

NV: Las Vegas

TX: El Paso, Houston

WA: Renton

Occupational Therapy Assistant

Objective: To provide students with didactic and fieldwork training in preparation for entry-level employment as an occupational therapy assistant (OTA). Students have the opportunity to develop professional skills in activity analysis, growth and development, human occupations, principles of occupational therapy, therapeutic modalities, administrative procedures, and ethics and laws governing the practice of occupational therapy.

Graduates of this program at the El Paso and Houston campuses receive an Associate of Applied Science Degree, while graduates at other PMI campuses receive an Occupational Associate Degree. Graduates of accredited OTA programs are eligible to apply to take the national certification examination for occupational therapy assistant (COTA) administered by the National Board for Certification in Occupational Therapy (NBCOT).

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, an interview with the program director and/or faculty is required.

Semester I					
Course #	Course	Theory	Lab	Extern	Credits
CMT 105	Medical Terminology	16			1.0

Occupational Therapy Assistant • Course Descriptions

Courses may be offered on-ground, online, and/or blended (Las Vegas campus only): CCM 150 Communications for the Health Professions, CMT 105 Medical Terminology, HST 205 Nevada History and US Constitution, and PSY 130 Psychology.

CMT 105 Medical Terminology

Total Course Hours: 16 (16 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

The course focuses on the development of a basic framework for the language of medicine. Through memorization and practice in spelling and pronunciation of medical roots, suffixes, and prefixes, students learn to create, analyze, and apply medical terms.

Prerequisites: None

BIO 105 Anatomy and Physiology I

Total Course Hours: 80 (48 Theory, 32 Lab, 0 Extern) Semester Credits: 4.0

As the first part of a two-part anatomy and physiology introductory sequence, this course covers basic biological principles that are foundational to the study of anatomy and physiology including basic biochemistry, cellular structure and function, and organization of the human body. Students will learn the anatomy and physiology of the skeletal, muscular, nervous, and integumentary systems in this course. Pathology of these systems and the relationship of disease and disability to occupational therapy practice will be introduced.

Prerequisites: None

OTA 102 Introduction to Occupational Therapy

Total Course Hours: 48 (48 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

The course provides the student with an introduction to occupational therapy, including the various types of practice settings, client populations, roles, and the occupational therapy process. The foundation of occupational therapy will be explored—the profession's history, ethics standards, and occupational therapy values. A variety of resources will be introduced, including the standards of practice and the Occupational Therapy Practice Framework: Domain and Process.

Prerequisites: None

MTH 125 Math and Statistics

Total Course Hours 16 (16 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course is an introduction to college-level math and statistics. Students will learn how statistical data are compiled and interpreted. Knowledge gained in this course will prepare the student for more complex theoretical and practical applications in subsequent technical courses.

Prerequisites: None

CCM 150 Communications for the Health Professions

Total Course Hours: 48 (48 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides instruction on the wide range of communication skills necessary for success in health professions. Students will learn effective communication skills to enable appropriate and professional collaboration with client, family, and other professionals. Course content provides opportunities for students to communicate through a variety of media, to give and receive feedback, and to appreciate and consider the context of the variety of communication needs and styles of patients/clients, coworkers, other professionals, the general public and other contextual factors. Ethical and legal concerns related to documentation, effective use of written and oral communications, and those related to certain technologies are identified and explored.

Prerequisites: None

PSY 130 Psychology

Total Course Hours: 48 (48 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course begins to explore the psychological nature of humans and their interactions. Students will gain an understanding of basic psychological concepts as well as an awareness of self and how these elements provide a foundation for interfacing with the social environment. Topics include but are not limited to adaptation, psychological diagnoses and dysfunction, communication, group processes, and the impact of health on behavior.

Prerequisites: None

HST 205 Nevada History and US Constitution (Las Vegas Campus Only)

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

A survey of the history of the state of Nevada with focus on mining, gaming, government and recent developments in population expansion. The course will review the Nevada State Constitution and legal ramifications. The essentials of the US Constitution will also be examined. The course is designed to meet Nevada History/US Constitution associate degree requirements.

Prerequisites: None

BIO 106 Anatomy and Physiology II

Total Course Hours: 80 (48 Theory, 32 Lab, 0 Extern) Semester Credits: 4.0

This course is a continuation of BIO 105. Subjects covered include central and peripheral nervous system, lymphatic system, immune system, anatomy and physiology of the respiratory system, anatomy and physiology of the digestive system, urinary system, acid-base balance, and male and female reproductive systems. Knowledge gained in this course will prepare the student for more complex theoretical and conceptual discussions of structures and functions of the human body in future technical courses. The student will examine the body as a totally integrated and dynamic structure. Laboratory time will be available for specific anatomical structure identification.

Prerequisites: BIO 105 Anatomy & Physiology I and Semester I OTA-designated courses

Occupational Therapy Assistant • Course Descriptions

OTA 130 Occupational Analysis

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course introduces the concepts of task, activity, and performance analysis. Students will learn the basics of grading and adapting tools, materials, and the environment, which will be applied in subsequent OTA courses in order to develop the occupational performance of various populations. Students will learn to consider the domains of Occupational Therapy Practice Framework: Domain and Process in the process of activity analysis.

Prerequisites: BIO 105 Anatomy & Physiology I, PSY 130 Psychology, and Semester I OTA-designated courses

OTA 201 Documentation for the OTA

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course will discuss the relationship of practice models, frames of reference, pragmatic reasoning, and appropriate terminology to documentation to support performance, participation, health and well-being. The student will document according to pertinent reimbursement issues, practice setting guidelines, and steps within the occupational therapy process. The legal implications of documentation will be discussed. Students will demonstrate entry level use of various forms of documentation in print and electronic formats.

Prerequisites: BIO 105 Anatomy & Physiology I, CMT 105 Medical Terminology, and Semester I OTA-designated courses

OTA 108 Growth and Development

Total Course Hours: 48 (48 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course covers typical human growth and development as it occurs across the life span in physical, psychological, and cognitive domains. Emphasis will be placed on the relationship of development, health, and wellness to occupational performance in all stages of life. Multicultural perspectives as well as the impact of environmental, sociological, socioeconomic, and other diversity factors on human development will be considered.

Prerequisites: BIO 105 Anatomy & Physiology I, PSY 130 Psychology, and Semester I OTA-designated courses

OTA 115 Principles of OT in Mental Health

Total Course Hours: 64 (48 Theory, 16 Lab, 0 Extern) Semester Credits: 3.5.

This course focuses on the biological/psychological/social models of mental health practice, common diagnoses, and traditional and emerging practice settings. Students will be introduced to approaches and modalities commonly used in mental health settings and their integration with occupational therapy practice. The course will cover the use of groups, selected assessments, and other occupational performance-based interventions. A focus will be on performance skills, which include emotion regulation and cognition.

Prerequisites: BIO 105 Anatomy & Physiology I, PSY 130 Psychology, and Semester I OTA-designated courses

OTA 125 Kinesiology

Total Course Hours: 48 (32 Theory, 16 Lab, 0 Extern) Semester Credits: 2.5

This combined lecture and lab course acquaints students with principles of movement as it supports occupation. Students will review key concepts of anatomy and physiology and apply these to biomechanical function. Students will gain an appreciation for the structures of the body and basic physics concepts that allow functional mobility and activity. Students will apply kinesiology concepts to manual muscle testing, range of motion assessment, and analysis of movement.

Prerequisites: BIO 105 Anatomy & Physiology I, BIO 106 Anatomy & Physiology II, and Semesters I and II OTA-designated courses

OTA 110 Fundamentals of Occupational Therapy

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course provides an integration of the theoretical foundations of the profession with practice. Concepts that guide clinical reasoning in practice will be interwoven with the domain and process of occupational therapy. Students will begin to relate frames of reference to client populations and practice settings, and to use clinical reasoning effectively within the guidelines of roles, ethics, and scope of practice.

Prerequisites: BIO 105 Anatomy & Physiology I, BIO 106 Anatomy & Physiology II, PSY 130 Psychology, and Semesters I and II OTA-designated courses

OTA 206 Human Occupations I

Total Course Hours: 80 (48 Theory, 32 Lab, 0 Extern) Semester Credits: 4.0

This lecture/lab course presents a "toolbox" for commonly used intervention strategies. Students will learn treatment interventions commonly used in occupational therapy practice with an emphasis on occupation as an intervention technique as well as an outcome of treatment.

Activities preparatory to participation in occupation are also included. This "toolbox" includes techniques for client (re)training in ADLs, IADLs, transfers and mobility, use of adaptive equipment, neuromuscular function, and sensory perception as needed to address occupational needs.

Prerequisites: BIO 105 Anatomy & Physiology I, BIO 106 Anatomy & Physiology II, PSY 130 Psychology, and Semesters I and II OTA-designated courses

OTA 215 Principles of OT in Physical Health

Total Course Hours: 64 (48 Theory, 16 Lab, 0 Extern) Semester Credits: 3.5

This course examines the biological/psychological/social models of physical health and wellness, focusing on the common diagnoses and pathologies most often encountered in occupational therapy (OT) practice. Also introduced are examples of assessments used for various diagnoses and pathologies, especially those of the musculoskeletal and cardiopulmonary systems. Students will be introduced to tools and interventions commonly used in physical health and emerging practice settings and their integration with OT practice. Students will explore occupational therapy treatment and other occupational performance-based interventions within the scope, roles, frames of reference, and practice guidelines related to physical health and wellness. A focus will be performance skills that include motor and praxis and sensory-perceptual.

Prerequisites: BIO 105 Anatomy & Physiology I, BIO 106 Anatomy & Physiology II, and Semesters I and II OTA-designated courses

Occupational Therapy Assistant • Course Descriptions

OTA 220 Fieldwork I

Total Course Hours: 80 (0 Theory, 0 Lab, 80 Extern) Semester Credits: 1.5

This course provides the student with the opportunity to recognize the use of models of practice and occupational therapy skills in practice settings under the supervision of qualified and credentialed practitioner(s). Fieldwork consists of 80 hours of placement in selected settings.

Prerequisites: BIO 105 Anatomy & Physiology I, BIO 106 Anatomy & Physiology II, and Semesters I and II OTA-designated courses

OTA 209 Human Occupations II

Total Course Hours: 72 (40 Theory, 32 Lab, 0 Extern) Semester Credits: 3.5

This course is the culmination of didactic instruction in the academic program. Drawing on pertinent aspects of the domain of occupational therapy, students will analyze the client's occupational therapy needs, synthesize occupation-based interventions, and begin to critique their application of occupational therapy concepts. Students will examine the basic principles of physical agent modalities (PAMs) and other specialty interventions commonly used in occupational therapy practice, and practice techniques related to their use. Students will participate in hands-on scenarios simulating those situations likely to be encountered during fieldwork and in practice.

Prerequisites: BIO 105 Anatomy & Physiology I, BIO 106 Anatomy & Physiology II, and Semesters I, II, and III OTA-designated courses

OTA 230 Administrative Procedures

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course introduces the occupational therapy assistant (OTA) student to administrative procedures in practice and prepares them for contributing to program management. Students will participate in program development and evaluation activities, analysis of professional literature, and promotion of the profession. Students will explore management versus leadership skills and the application of administrative procedures.

Prerequisites: BIO 105 Anatomy & Physiology I, BIO 106 Anatomy & Physiology II, and Semesters I, II, and III OTA-designated courses

OTA 245 Pediatric Practice for the OTA

Total Course Hours: 72 (40 Theory, 32 Lab, 0 Extern) Semester Credits: 3.5

In this course students will examine limitations and obstacles to occupational engagement for people from birth through 21 years of age. Students will examine the role of the occupational therapy assistant (OTA) in pediatric settings and the function of occupational therapy in the field of pediatrics. Students will explore common disabilities and diagnoses and their implications for treatment in areas of occupation in traditional, community-based, and emerging practice settings. Students will learn treatment interventions commonly used by the OTA in pediatric practice. Students will synthesize occupation-based mental and physical health concepts related to occupational performance interventions with the pediatric population.

Prerequisites: BIO 105 Anatomy & Physiology I, BIO 106 Anatomy & Physiology II, and Semesters I, II, and III OTA-designated courses

OTA 250 Specific Populations for the OTA

Total Course Hours: 48 (32 Theory, 16 Lab, 0 Extern) Semester Credits: 2.5

In this course students will synthesize occupation-based mental and physical health concepts as applied to commonly used occupational performance interventions with neurological, bariatric, geriatric, and emerging populations. In addition to exploring treatment in traditional practice settings, students will generalize their knowledge, skills, and abilities to community-based settings and emerging practice settings. An emphasis will be placed on interacting with and teaching caregivers and family members.

Prerequisites: BIO 105 Anatomy & Physiology I, BIO 106 Anatomy & Physiology II, and Semesters I, II, and III OTA-designated courses

OTA 226 Professional Development Strategies

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This seminar course prepares the student for fieldwork and practice by examining professional development strengths and needs and formulating a plan for advocating for oneself and the profession. To accomplish this, students will explore supervisory needs, set goals for fieldwork success, and examine effective job search strategies. In addition, students will review and prepare for the National Board for Certification in Occupational Therapy (NBCOT) Certified Occupational Therapy Assistant (COTA®) exam.

Prerequisites: BIO 105 Anatomy & Physiology I, BIO 106 Anatomy & Physiology II, and Semesters I, II, and III OTA-designated courses

OTA 221 Fieldwork II A

Total Course Hours: 320 (0 Theory, 0 Lab, 320 Extern) Semester Credits: 7.0

This fieldwork course provides the student with the opportunity to apply learned models of practice and occupational therapy skills in a practice setting under the supervision of qualified and credentialed occupational therapy practitioner(s). This fieldwork consists of 320 hours of placement in selected settings.

Prerequisites: Semesters I, II, III, and IV courses

OTA 222 Fieldwork II B

Total Course Hours: 320 (0 Theory, 0 Lab, 320 Extern) Semester Credits: 7.0

This fieldwork course provides the student with the opportunity to apply learned models of practice and occupational therapy skills in a practice setting under the supervision of qualified and credentialed occupational therapy practitioner(s). This fieldwork consists of 320 hours of placement in selected settings.

Prerequisites: Semesters I, II, III, and IV courses

Ophthalmic Medical Technician

Objective: To develop in students the personal traits and professional skills needed to perform as competent entry-level ophthalmic technicians. The program introduces students to skills necessary to perform preliminary vision and diagnostic testing prior to physician examination. Training includes surgical assisting, ultrasound, digital photography, and light-based imaging of the eye with scanning lasers.

Graduates of this program receive an Associate of Occupational Studies Degree and are eligible to apply to take the Certified Ophthalmic Technician® (COT) examination administered by the Joint Commission on Allied Health Personnel in Ophthalmology® (JCAHPO).

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, an interview with the program director and/or faculty is required.

Ophthalmic Medical Technician • Course Descriptions

BIO 108 Anatomy & Physiology

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course focuses on the fundamentals of human anatomy and physiology and medical terminology. Subjects include the organization of the body, anatomy and physiology of cells and tissues, and the structures and functions of the following systems: cardiovascular, respiratory, endocrine, nervous, integumentary, musculoskeletal, lymphatic, digestive, urinary, and reproductive. Knowledge gained in this course will prepare the student for more complex theoretical and practical applications in subsequent technical courses.

Prerequisites: None

CLE 125 Law & Ethics

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

Instruction provides an overview of basic legal and ethical principles and practices as related to medical professions. Topics include ethical considerations, legal issues, medical documentation, medical negligence, and the workplace.

Prerequisites: None

CSK 100 Study Skills

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course provides students an opportunity to learn and adopt methods to promote success in school, work, and life. Topics include strategies to help students develop and improve their skills in time and stress management, reading comprehension and memorization, listening and note taking, and test preparation.

Prerequisites: None

MTH 130 Math Applications

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course provides a review of math operations, skills, and computations that are used in performing optics calculations. Knowledge gained in this course will prepare the student for more complex theoretical and practical applications in subsequent technical courses.

Prerequisites: None

PSY 105 Interpersonal Communications

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course begins to explore the psychological nature of humans and their interactions and provides students with an introduction to interpersonal communications. Students will gain an understanding of basic psychological concepts as well as an awareness of self and how these elements provide a foundation for interfacing with the social environment. Topics include but are not limited to adaptation, communication, group processes, and the impact of health on behavior. Communication concepts and critical thinking processes are introduced that can be used to influence professional behavior and improve relationships between caregivers, those they care for, and their families.

Prerequisites: None

OPH 100 Ocular Anatomy & Physiology

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Instruction on anatomy and physiology of the visual sensory organs and related structures.

Prerequisites: None

OPH 114 Ocular Disease

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

Instruction on pathologic conditions affecting the visual sensory organs and related structures, including signs, symptoms, and treatment of common ocular disorders. The course addresses systemic diseases and their impact on the eye and on vision, and implications for treatment.

Prerequisites: None

OPH 108 Refractometry

Total Course Hours: 105 (45 Theory, 60 Lab, 0 Extern) Semester Credits: 5.0

This course provides students with instruction in optical properties of the human eye, the interaction of light and lenses, and the laws governing optics. Methods will be taught to subjectively and objectively measure the refractive status of the eye.

Prerequisites: OPH 100 Ocular Anatomy & Physiology and OPH 114 Ocular Disease

OPH 112 Basic Skills

Total Course Hours: 90 (30 Theory, 60 Lab, 0 Extern) Semester Credits: 4.0

This lecture and laboratory class presents basic eye exam procedures and techniques. Students are instructed in how to obtain a complete ocular and medical history and perform visual acuity assessments. Students will learn to perform the basic eye exam including ancillary testing. Students apply concepts related to the basic nature of light and the refractive condition of the eye.

Prerequisites: OPH 100 Ocular Anatomy & Physiology and OPH 114 Ocular Disease

OPH 115 Patient Services

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

Instruction covers basic spectacle principles, the performance and documentation of lensometry, administration of ophthalmic medications, use of ocular dressings and shields, and other patient services. Students will be introduced to types of ophthalmic equipment and its maintenance. Students will perform lid eversion and tear production testing.

Prerequisites: OPH 100 Ocular Anatomy & Physiology and OPH 114 Ocular Disease

OPH 217 Contact Lenses

Total Course Hours: 90 (30 Theory, 60 Lab, 0 Extern) Semester Credits: 4.0

Instruction covers the basic concepts of contact lenses. Included are techniques for fitting and evaluation of various kinds of contact lenses. Students learn how to instruct patients in insertion, removal, and care of contact lenses. Students will learn keratometry and corneal topography and their application to contact lens fitting.

Prerequisites: Semesters I and II OPH-designated courses

Ophthalmic Medical Technician • Course Descriptions

OPH 222 Administrative Procedures

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course introduces the student to administrative procedures in practice and prepares them for contributing to the successful functioning of a clinic. Students will review the components of the various types of exams and related documentation. Also included is a focus on professional communication with patients and other health professionals. The application of critical thinking skills and self-reflective practices, and the role of continued professional development, will be stressed.

Prerequisites: Semesters I and II OPH-designated courses

OPH 214 Ocular Motility

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This lecture and laboratory class presents the fundamentals of ocular muscle balance and muscle interaction including current techniques for extraocular muscle evaluation.

Prerequisites: Semesters I and II OPH-designated courses

OPH 216 Special Diagnostics

Total Course Hours: 90 (30 Theory, 60 Lab, 0 Extern) Semester Credits: 4.0

Instruction covers the fundamental techniques of visual field testing, slit lamp external examination of the anterior segment of the eye, measurement of intraocular pressure, scanning laser ophthalmic diagnostic imaging, and special procedures.

Prerequisites: Semesters I and II OPH-designated courses

OPH 223 Surgical Assisting

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This course covers infection control, disinfection, sanitization, and sterilization methods and procedures. Students learn sterile technique and assisting methods for office and operating room surgical procedures.

Prerequisites: Semesters I, II, and III courses

OPH 207 Pharmacology

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

Students are instructed on the use and effects of ophthalmic pharmacologic agents. Included are topical, oral, and injected medications, as well as those used in intraocular surgery. Instruction also examines the impact and interactions of other prescription medications, over-the-counter medications, supplements, and herbal agents.

Prerequisites: Semesters I, II, and III courses

OPH 210 Clinical Externship I

Total Course Hours: 256 (0 Theory, 0 Lab, 256 Extern) Semester Credits: 5.5

Assignment to a physician's office or clinic to obtain practical experience to reinforce subject matter and skills learned in the classroom.

Prerequisites: Semesters I, II, and III courses

OPH 235 Optics and Advanced Refractometry

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

Instruction includes the optical properties of the human eye, lenses, the interaction of light, and the laws governing optics. Also addressed are the principles and challenges of advanced refractometry.

Prerequisites: Semesters I, II, and III courses

OPH 225 Ophthalmic Photography and Imaging

Total Course Hours: 90 (30 Theory, 60 Lab, 0 Extern) Semester Credits: 4.0

This lecture and laboratory course covers the fundamentals of ophthalmic photography including specific instruction in anterior and posterior segment digital photography and imaging as well as digital stereo photography. Included are essentials for fluorescein angiography, indocyanine green angiography, and scanning laser imaging.

Prerequisites: Semesters I, II, and III courses

OPH 230 Echography and Light-Based Imaging

Total Course Hours: 45 (15 Theory, 30 Lab, 0 Extern) Semester Credits: 2.0

Instruction on ultrasonic techniques and light-based imaging used to measure corneal thickness and length of eye and to view pathology within the eye. Students will gain an understanding of intraocular lens calculation and selection.

Prerequisites: Semesters I, II, and III courses

OPH 220 Clinical Externship II

Total Course Hours: 640 (0 Theory, 0 Lab, 640 Extern) Semester Credits: 14.0

Assignment to a physician's office or clinic to obtain practical experience to reinforce subject matter and skills learned in the classroom.

Prerequisites: Semesters I, II, III, and IV courses

Paramedic (Las Vegas)

Objective: To develop in students the personal traits and professional skills required to perform as a competent entry-level paramedic on an emergency services team. Students will be given the academic and field training necessary to provide prehospital assessment and care of patients. Topics include anatomy and physiology, patient assessment, traumatic injuries, airway management, and cardiology, among others.

Graduates of the program receive an Associate of Occupational Science Degree. Students who complete the first semester must obtain EMT (emergency medical technician) certification by successfully passing the National Registry of Emergency Medical Technicians (NREMT) certification examination at the EMT level before proceeding to the second semester. After successful completion of all didactic and clinical hours, students will be required to obtain a provisional license from the Southern Nevada Health District (SNHD) or other regulatory agency prior to beginning EMS 242 Field Internship. The provisional license requires that the applicant successfully pass a licensure examination. Total hours required to complete EMS 242 Field Internship may vary depending upon assigned schedule; as a result, the length of the program may be extended. Graduates of the Paramedic program are eligible to apply to take the NREMT certification examination at the paramedic level.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, applicants must be 18 years of age. An interview with the program director is also required. An applicant must provide evidence of a certificate/diploma from an approved EMT program and a current EMT certification to enter the program in the second semester.

Paramedic (Las Vegas) • Course Descriptions

Courses that may be offered on-ground, online, and/or blended: BIO 143 Anatomy and Physiology, EMS 162 ECG Interpretation-Advanced Cardiac Diagnostics, CLE 144 Medical Law and Ethics, HST 205 Nevada History and US Constitution.

EMS 102 Emergency Medical Technician

Total Course Hours: 225 (120 Theory, 75 Lab, 30 Extern) Semester Credits: 11.0

This course introduces the emergency medical services (EMS) system as well as the roles and responsibilities of emergency medical technicians (EMTs). Course content addresses the knowledge needed to respond to medical emergencies and trauma situations, including medical terminology, anatomy and physiology, patient assessment, airway management, pharmacology, shock, and patient resuscitation. Topics include cardiovascular emergencies, toxicology, psychiatric emergencies, bleeding, face and neck injuries, head and spine injuries, chest injuries, and orthopedic injuries, as well as specific patient populations and patient transportation considerations. Students participate in hands-on activities to practice the skills necessary for prehospital settings.

Prerequisites: None

EMS 103 National Registry EMT Review

Total Course Hours: 22.5 (15 Theory, 7.5 Lab, 0 Extern) Semester Credits: 1.0

This course includes a comprehensive review of the EMT coursework and a final skills exam.

Prerequisites: None

EMS 104 Field Experience Practicum

Total Course Hours: 90 (0 Theory, 0 Lab, 90 Extern) Semester Credits: 2.0

This course provides the paramedic student with an opportunity to apply skills learned in the classroom within a professional environment under the direct supervision of qualified allied health professionals. Rotations in this course include the emergency department and local EMS transport provider. The cumulative clinical hours must be completed prior to the last scheduled day of the course.

Prerequisites: None

MTH 142 College Algebra

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course introduces students to college-level algebra. Mathematical operations covered include basic operations (addition, subtraction, multiplication, division), fractions, decimals, algebraic equations, story problems, and graphing.

Prerequisites: Semester I courses

BIO 143 Anatomy and Physiology

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course introduces students to the structure and function of all systems within the human body. Cellular, tissue, and organ structures of each individual system are presented, followed by their functions as they relate within their system as well as to the entire body. Course content includes the structures and functions of the integumentary, musculoskeletal, endocrine, cardiovascular (including blood, heart, blood vessels, and circulation), lymphatic, respiratory, digestive, urinary, and reproductive systems.

Prerequisites: Semester I courses

EMS 111 Introduction to Paramedic Practice

Total Course Hours: 37.5 (30 Theory, 7.5 Lab, 0 Extern) Semester Credits: 2.0

This course introduces students to the field of emergency medicine services (EMS), including the history of EMS, types of practice models, and scopes of practice. Students learn and apply the terminology used to describe patient signs and symptoms, along with basic patient assessment techniques. They also explore the roles and responsibilities of the EMS provider on the health care team.

Prerequisites: Semester I courses

EMS 121 Pharmacology

Total Course Hours: 52.5 (45 Theory, 7.5 Lab, 0 Extern) Semester Credits: 3.0

This course addresses basic principles of pharmacology, drug classes, and toxicology. Topics include indications, contraindications, therapeutic effects, and side effects of medications. Students learn the administration of emergency medicines as outlined in the current paramedic scope of practice.

Prerequisites: Semester I courses

EMS 131 Airway Management

Total Course Hours: 37.5 (30 Theory, 7.5 Lab, 0 Extern) Semester Credits: 2.0

This course integrates comprehensive knowledge of anatomy, physiology, and pathophysiology into patient respiratory assessment. Students use tools of assessment to develop and implement a treatment plan to ensure a patent airway, provide adequate mechanical ventilation, and restore respiration for patients of all ages.

Prerequisites: Semester I courses

EMS 141 Patient Assessment and Diagnostics

Total Course Hours: 60 (45 Theory, 15 Lab, 0 Extern) Semester Credits: 3.5

This course focuses on initial patient assessment within the context of scene assessment. Students apply prior knowledge and clinical reasoning to evaluate scenarios, develop field impressions, modify assessments, and formulate treatment plans. The course also emphasizes the basic rules and mechanisms of common arrhythmias necessary for cardiac patient assessment.

Prerequisites: Semester I courses

EMS 152 Cardiology

Total Course Hours: 60 (45 Theory, 15 Lab, 0 Extern) Semester Credits: 3.5

This course covers assessment and prehospital management of cardiac emergencies. Topics include cardiovascular diseases and conditions, ECG interpretation, hyper- and hypotensive emergencies, and patient monitoring and treatment. Students also complete a 16-hour Advanced Cardiac Life Support (ACLS) course as part of this course.

Prerequisites: Semesters I and II courses

Paramedic (Las Vegas) • Course Descriptions

EMS 162 ECG Interpretation - Advanced Cardiac Diagnostics

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course will build on students previous ECG knowledge and will increase their knowledge of 12-lead ECGs, bundle branch blocks, infarction locations, and axis deviations in order to distinguish subtle ECG findings.

Prerequisites: Semesters I and II courses

EMS 172 Medical Emergencies and Advanced Life Support

Total Course Hours: 60 (45 Theory, 15 Lab, 0 Extern) Semester Credits: 3.5

This course emphasizes application of prior knowledge of anatomy, physiology, and pathophysiology to formulate assessments in the field. Students practice clinical reasoning skills to develop a prehospital treatment plan for patients suffering from a variety of disorders. Students also complete a 16-hour Advanced Medical Life Support (AMLS) course as part of this course.

Prerequisites: Semesters I and II courses

EMS 182 Pediatric Emergencies

Total Course Hours: 45 (30 Theory, 15 Lab, 0 Extern) Semester Credits: 2.5

This course covers assessment and prehospital management of neonatal and pediatric emergencies. Students also complete a 16-hour Pediatric Life Support (PALS) course as part of this course.

Prerequisites: Semesters I and II courses

EMS 192 Trauma

Total Course Hours: 75 (45 Theory, 30 Lab, 0 Extern) Semester Credits: 4.0

This course provides an overview of assessment and emergency out-of-hospital management of trauma patients. Content includes isolated and multisystem trauma. Students also complete a 16-hour Prehospital Trauma Life Support (PHTLS) course as part of this course.

Prerequisites: Semesters I and II courses

CLE 144 Medical Law and Ethics

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course provides an overview of law and ethics as they apply to medical practice. Topics include documentation, standards of care, professionalism and ethics, HIPAA, patient rights, informed consent, and employment discrimination.

Prerequisites: Semesters I, II, and III courses

EMS 211 Advanced Medical Emergencies

Total Course Hours: 60 (45 Theory, 15 Lab, 0 Extern) Semester Credits: 3.5

This course provides students opportunities to apply prior knowledge and skills to advanced medical emergency situations involving a variety of patient populations in such specialties as gynecology, obstetrics, neonatal care, pediatrics, geriatrics, and those with special challenges. Students also complete a 16-hour Geriatric Education for Emergency Medical Services (GEMS) course as part of this course.

Prerequisites: Semesters I, II, and III courses

EMS 221 ALS Operations

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course addresses field EMS operations, such as ground ambulance operations, air medical operations, multiple casualty incidents, and hazardous materials.

Prerequisites: Semesters I, II, and III courses

EMS 202 Clinical Externship

Total Course Hours: 290 (0 Theory, 0 Lab, 290 Extern) Semester Credits: 6.0

This course provides the paramedic student with an opportunity to apply previously learned knowledge and skills in a supervised clinical setting.

Rotations in this course include the emergency department and triage, anesthesia, adult and pediatric intensive care/critical care units, operating room, psychiatry, labor and delivery, burn unit, ICU, PACU, pediatric childcare clinic, and other elective rotations.

Prerequisites: Semesters I, II, and III courses

HST 205 Nevada History and US Constitution

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

A survey of the history of the state of Nevada with focus on mining, gaming, government and recent developments in population expansion. The course will review the Nevada State Constitution and legal ramifications. The essentials of the US constitution will also be examined. The course is designed to meet Nevada History/US Constitution associate degree requirements.

Prerequisites: None

EMS 232 National Registry Paramedic Review

Total Course Hours: 64 (56 Theory, 8 Lab, 0 Extern) Semester Credits: 4.0

This course reviews each of the skills stations that comprise the NREMT Psychomotor Examination and provides an overview of the NREMT Cognitive Examination (CBT), and prepares students for the SNHD ALS Licensure Examination. Content includes test-taking strategies.

Prerequisites: Semesters I, II, III, and IV courses

EMS 242 Field Internship

Total Course Hours: 360 (0 Theory, 0 Lab, 360 Extern) Semester Credits: 8.0

The field internship occurs after all core didactic, laboratory, and clinical experience has been successfully completed. This course provides the paramedic students a continuation of EMS 202, with an opportunity to apply previously learned knowledge and skills in a vehicular setting. Students will have the opportunity to act as teams leads in a variety of prehospital emergency situations.

Prerequisites: Semesters I, II, III, IV courses and requires a provisional license as issued by the SNHD

EMS 102 Emergency Medical Technician

Total Course Hours: 225 (120 Theory, 75 Lab, 30 Extern) Semester Credits: 11.0

This course introduces the emergency medical services (EMS) system as well as the roles and responsibilities of emergency medical technicians (EMTs). Course content addresses the knowledge needed to respond to medical emergencies and trauma situations, including medical terminology, anatomy and physiology, patient assessment, airway management, pharmacology, shock, and patient resuscitation. Topics include cardiovascular emergencies, toxicology, psychiatric emergencies, bleeding, face and neck injuries, head and spine injuries, chest injuries, and orthopedic injuries, as well as specific patient populations and patient transportation considerations. Students participate in hands-on activities to practice the skills necessary for prehospital settings.

Prerequisites: None

EMS 103 National Registry EMT Review

Total Course Hours: 22.5 (15 Theory, 7.5 Lab, 0 Extern) Semester Credits: 1.0

This course includes a comprehensive review of the EMT coursework and a final skills exam.

Prerequisites: None

EMS 104 Field Experience Practicum

Total Course Hours: 90 (0 Theory, 0 Lab, 90 Extern) Semester Credits: 2.0

This course provides the paramedic student with an opportunity to apply skills learned in the classroom within a professional environment under the direct supervision of qualified allied health professionals. Rotations in this course include the emergency department and local EMS transport provider. The cumulative clinical hours must be completed prior to the last scheduled day of the course.

Prerequisites: None

MTH 142 College Algebra

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course introduces students to college-level algebra. Mathematical operations covered include basic operations (addition, subtraction, multiplication, division), fractions, decimals, algebraic equations, story problems, and graphing.

Prerequisites: Semester I courses

BIO 143 Anatomy and Physiology

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course introduces students to the structure and function of all systems within the human body. Cellular, tissue, and organ structures of each individual system are presented, followed by their functions as they relate within their system as well as to the entire body. Course content includes the structures and functions of the integumentary, musculoskeletal, endocrine, cardiovascular (including blood, heart, blood vessels, and circulation), lymphatic, respiratory, digestive, urinary, and reproductive systems.

Prerequisites: Semester I courses

EMS 111 Introduction to Paramedic Practice

Total Course Hours: 37.5 (30 Theory, 7.5 Lab, 0 Extern) Semester Credits: 2.0

This course introduces students to the field of emergency medicine services (EMS), including the history of EMS, types of practice models, and scopes of practice. Students learn and apply the terminology used to describe patient signs and symptoms, along with basic patient assessment techniques. They also explore the roles and responsibilities of the EMS provider on the health care team.

Prerequisites: Semester I courses

EMS 121 Pharmacology

Total Course Hours: 52.5 (45 Theory, 7.5 Lab, 0 Extern) Semester Credits: 3.0

This course addresses basic principles of pharmacology, drug classes, and toxicology. Topics include indications, contraindications, therapeutic effects, and side effects of medications. Students learn the administration of emergency medicines as outlined in the current paramedic scope of practice.

Prerequisites: Semester I courses

EMS 131 Airway Management

Total Course Hours: 37.5 (30 Theory, 7.5 Lab, 0 Extern) Semester Credits: 2.0

This course integrates comprehensive knowledge of anatomy, physiology, and pathophysiology into patient respiratory assessment. Students use tools of assessment to develop and implement a treatment plan to ensure a patent airway, provide adequate mechanical ventilation, and restore respiration for patients of all ages.

Prerequisites: Semester I courses

EMS 141 Patient Assessment and Diagnostics

Total Course Hours: 60 (45 Theory, 15 Lab, 0 Extern) Semester Credits: 3.5

This course focuses on initial patient assessment within the context of scene assessment. Students apply prior knowledge and clinical reasoning to evaluate scenarios, develop field impressions, modify assessments, and formulate treatment plans. The course also emphasizes the basic rules and mechanisms of common arrhythmias necessary for cardiac patient assessment.

Prerequisites: Semester I courses

Paramedic (Mesa Campus) • Course Descriptions

EMS 152 Cardiology

Total Course Hours: 60 (45 Theory, 15 Lab, 0 Extern) Semester Credits: 3.5

This course covers assessment and prehospital management of cardiac emergencies. Topics include cardiovascular diseases and conditions, ECG interpretation, hyper- and hypotensive emergencies, and patient monitoring and treatment. Students also complete a 16-hour Advanced Cardiac Life Support (ACLS) course as part of this course.

Prerequisites: Semesters I and II courses

EMS 162 ECG Interpretation - Advanced Cardiac Diagnostics

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course will build on students previous ECG knowledge and will increase their knowledge of 12-lead ECGs, bundle branch blocks, infarction locations, and axis deviations in order to distinguish subtle ECG findings.

Prerequisites: Semesters I and II courses

EMS 172 Medical Emergencies and Advanced Life Support

Total Course Hours: 60 (45 Theory, 15 Lab, 0 Extern) Semester Credits: 3.5

This course emphasizes application of prior knowledge of anatomy, physiology, and pathophysiology to formulate assessments in the field. Students practice clinical reasoning skills to develop a prehospital treatment plan for patients suffering from a variety of disorders. Students also complete a 16-hour Advanced Medical Life Support (AMLS) course as part of this course.

Prerequisites: Semesters I and II courses

EMS 182 Pediatric Emergencies

Total Course Hours: 45 (30 Theory, 15 Lab, 0 Extern) Semester Credits: 2.5

This course covers assessment and prehospital management of neonatal and pediatric emergencies. Students also complete a 16-hour Pediatric Life Support (PALS) course as part of this course.

Prerequisites: Semesters I and II courses

EMS 192 Trauma

Total Course Hours: 75 (45 Theory, 30 Lab, 0 Extern) Semester Credits: 4.0

This course provides an overview of assessment and emergency out-of-hospital management of trauma patients. Content includes isolated and multisystem trauma. Students also complete a 16-hour Prehospital Trauma Life Support (PHTLS) course as part of this course.

Prerequisites: Semesters I and II courses

EMS 201 Clinical Practicum I

Total Course Hours: 150 (0 Theory, 0 Lab, 150 Extern) Semester Credits: 3.0

This course provides the paramedic student with an opportunity to apply previously learned knowledge and skills in a supervised clinical setting. Rotations in this course may include the emergency department, adult intensive care unit, pediatric intensive care unit, labor and delivery unit, burn, cath lab, psych, ICU, OR, pediatric childcare clinic, and prehospital experiences.

Prerequisites: Semesters I and II courses

CLE 144 Medical Law and Ethics

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course provides an overview of law and ethics as they apply to medical practice. Topics include documentation, standards of care, professionalism and ethics, HIPAA, patient rights, informed consent, and employment discrimination.

Prerequisites: Semesters I, II, and III courses

EMS 211 Advanced Medical Emergencies

Total Course Hours: 60 (45 Theory, 15 Lab, 0 Extern) Semester Credits: 3.5

This course provides students opportunities to apply prior knowledge and skills to advanced medical emergency situations involving a variety of patient populations in such specialties as gynecology, obstetrics, neonatal care, pediatrics, geriatrics, and those with special challenges.

Students also complete a 16-hour Geriatric Education for Emergency Medical Services (GEMS) course as part of this course.

Prerequisites: Semesters I, II, and III courses

EMS 221 ALS Operations

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course addresses field EMS operations, such as ground ambulance operations, air medical operations, multiple casualty incidents, and hazardous materials.

Prerequisites: Semesters I, II, and III courses

EMS 231 National Registry Paramedic Review

Total Course Hours: 53 (45 Theory, 8 Lab, 0 Extern) Semester Credits: 3.0

This course reviews each of the skills stations that comprise the NREMT Psychomotor Examination and provides an overview of the NREMT Cognitive Examination (CBT). Content includes test-taking strategies.

Prerequisites: Semesters I, II, and III courses

EMS 241 Clinical Practicum II

Total Course Hours: 360 (0 Theory, 0 Lab, 360 Extern) Semester Credits: 8.0

This course provides students opportunities to continue to build upon their skills and knowledge and apply them in a vehicular setting. Students act as team leads in a variety of prehospital emergency situations.

Prerequisites: Semesters I, II, and III courses

Physical Therapist Assistant

Objective: To prepare students to become integral members of the physical therapy health care team under the supervision of a licensed physical therapist. Curriculum content addresses anatomy and physiology, kinesiology, diseases and conditions, medical terminology, physical therapy interventions, data collection skills, treatment plans, administrative procedures, and ethics and laws governing the practice of physical therapy.

Graduates of this program at the Houston campus receive an Associate of Applied Science Degree, while graduates at other PMI campuses receive an Occupational Associate Degree. All graduates are eligible to apply to take the National Physical Therapy Examination for Physical Therapist Assistants (NPTE-PTA), which is administered by the Federation of State Boards of Physical Therapy (FSBPT).

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, an interview with the program director and/or faculty is required.

Physical Therapist Assistant • Course Descriptions

Courses that may be offered on-ground, online, and/or blended: HST 205 Nevada History and US Constitution (Las Vegas campus only).

CMT 100 Medical Terminology

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

The course focuses on the development of a basic framework for the language of medicine. Through memorization and practice in spelling and pronunciation of medical roots, suffixes, and prefixes, students learn to create, analyze, and apply medical terms.

Prerequisites: None

BIO 100 Anatomy & Physiology I

Total Course Hours: 75 (45 Theory, 30 Lab, 0 Extern) Semester Credits: 4.0

This course is the first of two basic anatomy and physiology courses in the program that are designed to introduce students to the key components of the human body and prepare them for more complex discussions that occur in the technical courses. Topics address the organizational levels and chemical processes within the body, including structural components of cells, tissues, blood, skin, and articulations. Through lecture and hands-on laboratory activities, students begin to examine the body as an integrated and dynamic structure with an emphasis on the skeletal and muscular systems and anatomical structure identification.

Prerequisites: None

PTA 110 Introduction to Physical Therapy

Total Course Hours: 45 (30 Theory, 15 Lab, 0 Extern) Semester Credits: 2.5

This course introduces students to the physical therapy profession from its early development to its present-day complexities. Course material emphasizes the role of the physical therapist assistant, general state-practice acts, scope of practice, types of practice settings, patient interactions, professional organizations, and the importance of lifelong professional growth and development. Lab topics address a range of basic patient care skills including infection control and patient positioning and draping.

Prerequisites: None

MTH 100 Math & Physics Applications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course covers the general math and physics applications needed to succeed as a physical therapist assistant. Topics include basic math operations, solving linear equations, graphing, and principles of mechanics, thermodynamics, sound, light, liquids, and electricity.

Prerequisites: None

CCM 135 Communications for the Health Professions

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course addresses the application of fundamental oral, written, and electronic communication theory and practice for health care practitioners. Verbal and nonverbal communication, technical and professional writing, speaking and listening critically, and evaluating and synthesizing material from diverse cultural sources and points of view are included. Also addressed are special considerations regarding documentation, electronic communication of medical information, the use and misuse of social media, consideration of context, situation, and audience factors such as health literacy, cultural diversity, and roles.

Prerequisites: None

CLE 120 Law & Ethics

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course addresses legal and ethical principles and practices in the workplace, particularly in health care settings. Topics include the laws that govern and limit professional scopes of practice, codes of ethics, ethical and legal issues, federal and state regulations, and medical negligence.

Prerequisites: None

HST 205 Nevada History and US Constitution (Las Vegas Campus Only)

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

A survey of the history of the state of Nevada with focus on mining, gaming, government and recent developments in population expansion. The course will review the Nevada State Constitution and legal ramifications. The essentials of the US Constitution will also be examined. The course is designed to meet Nevada History/US Constitution associate degree requirements.

Prerequisites: None

PTA 103 PTA Techniques

Total Course Hours: 75 (30 Theory, 45 Lab, 0 Extern) Semester Credits: 3.5

This lecture and laboratory course addresses the basic principles of, physiological responses to, and safe and effective application of thermal agents, electromagnetic radiation, ultrasound, soft tissue mobilization, hydrotherapy, electrical stimulation, traction, and compression.

Prerequisites: Semester I PTA-designated courses and BIO 100 Anatomy & Physiology I

BIO 109 Anatomy & Physiology II

Total Course Hours: 60 (45 Theory, 15 Lab, 0 Extern) Semester Credits: 3.5

This course is the second of the two anatomy and physiology courses in the program with an emphasis on the knowledge students will need to apply in their technical courses. Content addresses additional body systems, including cardiovascular, nervous, lymphatic, immune, reproductive, respiratory, digestive, urinary, endocrine, and special senses. Students participate in hands-on laboratory activities to identify internal organ structures, locate pulse points, and test reflexes and cranial nerves.

Prerequisites: Semester I PTA-designated courses and BIO 100 Anatomy & Physiology I

Physical Therapist Assistant • Course Descriptions

PTA 104 Fundamentals of Disease

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This class presents basic information about common medical conditions. Diseases of the cardiovascular, respiratory, nervous, endocrine, integumentary, immune, lymphatic, sensory, musculoskeletal, urogenital, and gastrointestinal systems are covered. Emphasis is placed on those conditions that could potentially affect the mobility of the person or the outcome of physical therapy treatment. Consideration is given to the diagnosis, treatment, and prognosis for various diseases. Through the study of specific diseases, the student will become familiar with doing research, reading professional literature, and using critical thinking in relation to how disease affects physical therapy treatments.

Prerequisites: Semester I PTA-designated courses and BIO 100 Anatomy & Physiology I

PTA 105 Growth & Development

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This class explores several theories that examine the relationship of structure and function with the development of movement skills throughout the life span. Students will also study changes that occur to major body systems during various phases of growth and development and how these changes affect health and wellness.

Prerequisites: Semester 1 PTA-designated courses and BIO 100 Anatomy & Physiology I

PTA 120 Introduction to Kinesiology

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course introduces students to the principles of kinesiology with an emphasis on biomechanical function and movement patterns, including osteokinematics, arthrokinematics, normal gait cycle, and optimal posture.

Prerequisites: Semester I PTA-designated courses and BIO 100 Anatomy & Physiology I

PTA 200 Kinesiology

Total Course Hours: 75 (30 Theory, 45 Lab, 0 Extern) Semester Credits: 3.5

This course broadens prior knowledge of kinesiology principles with an emphasis on biomechanical function. Students apply concepts of resistance, forces, and positioning to specific muscles and movement patterns by studying anatomical models of joints and muscles and other visual aids to enhance understanding of anatomy and movement. Lab activities focus on skills development and provide a range of competency-based practice opportunities along with analysis of gait and normal and abnormal biomechanical movement patterns.

Prerequisites: Semesters I and II PTA-designated courses and BIO 100 and BIO 109 (Anatomy & Physiology I and II)

PTA 201 Rehabilitation I

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This course addresses basic rehabilitation procedures and techniques. Students participate in hands-on activities to develop and practice skills in bed mobility and transfer techniques, general safety and infection control procedures, basic wheelchair management, gait training with ambulation aides, and measurement of vital signs.

Prerequisites: Semesters I and II PTA-designated courses and BIO 100 and BIO 109 (Anatomy & Physiology I and II)

PTA 205 Therapeutic Exercise I

Total Course Hours: 75 (45 Theory, 30 Lab, 0 Extern) Semester Credits: 4.0

This course explores the theoretical foundations for therapeutic exercise. Content addresses clinical indications for exercise as well as the basic principles of and physiological responses to therapeutic exercise protocols. Topics emphasized include special exercise considerations for the lower extremities and lumbopelvic regions.

Prerequisites: Semesters I and II PTA-designated courses and BIO 100 and BIO 109 (Anatomy & Physiology I and II)

PTA 210 Clinical Practicum I

Total Course Hours: 80 (0 Theory, 0 Lab, 80 Extern) Semester Credits: 1.5

This course provides the student with an opportunity to apply learned theories and skills in a clinical setting under direct supervision of a licensed physical therapist or licensed/certified physical therapist assistant. This practicum consists of two weeks of full-time (40 hours/week) clinical time.

Prerequisites: Semesters I, II, and III PTA-designated courses and BIO 100 and BIO 109 (Anatomy & Physiology I and II)

PTA 207 Therapeutic Exercise II

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This course continues the presentation of theoretical foundations for therapeutic exercise, including basic principles of and physiological responses to exercise. Topics emphasized include clinical indications for therapeutic exercise involving the shoulder girdle, upper extremity, and cervical/thoracic regions as well as the cardiopulmonary system.

Prerequisites: Semesters I, II, and III PTA-designated courses and BIO 100 and BIO 109 (Anatomy & Physiology I and II)

PTA 202 Rehabilitation II

Total Course Hours: 68 (38 Theory, 30 Lab, 0 Extern) Semester Credits: 3.5

This course explores the field of physical medicine and rehabilitation with a focus on the adult neurological patient. Content progresses from an overview of neurological assessment and treatment to the more common clinical syndromes related to motor and postural control. Students participate in hands-on activities to develop and practice relevant skills for this patient population.

Prerequisites: Semesters I, II, and III PTA-designated courses and BIO 100 and BIO 109 (Anatomy & Physiology I and II)

PTA 211 Clinical Practicum II

Total Course Hours: 280 (0 Theory, 0 Lab, 280 Extern) Semester Credits: 6.0

This course is a continuation of Clinical Practicum I and provides students with the opportunity to apply learned theories and skills in a clinical setting under direct supervision of a licensed physical therapist or licensed/certified physical therapist assistant. This practicum consists of seven weeks of full time (40 hours/week) clinical time.

Prerequisites: Semesters I, II, III, and IV PTA-designated courses, and BIO 100 and BIO 109 (Anatomy & Physiology I and II)

Physical Therapist Assistant • Course Descriptions

PTA 204 Administrative Procedures

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course examines the components included in the administration of the physical therapy practice. Topics include physical therapy practice, medical records, ethics, law, delegation and supervision, health insurance, and preparation for the workplace.

Prerequisites: Semesters I, II, III, and IV PTA-designated courses and BIO 100 and BIO 109 (Anatomy and Physiology I and II)

PTA 208 Special Topics

Total Course Hours: 66 (45 Theory, 21 Lab, 0 Extern) Semester Credits: 3.5

This course presents the theoretical foundations for treatment of some of the more specialized patient populations/diagnoses seen in the physical therapy clinic. Topics include indications for physical therapy interventions as well as the basic principles of and physiological responses to therapeutic exercise protocols, with an emphasis on particular exercises and functional training considerations for these populations.

Prerequisites: Semesters I, II, III, and IV PTA-designated courses and BIO 100 and BIO 109 (Anatomy and Physiology I and II)

PTA 209 PTA Seminar

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course provides a comprehensive review of technical coursework and prepares the student for transition into the workforce as an entry level physical therapist assistant. Through development of personal comprehensive study plans and participating in mock exams and other activities, students prepare to take the National Physical Therapist Examination (for physical therapist assistants). Students examine employment opportunities and review policies and procedures for applying for state licensure in their current location and in target employment markets.

Prerequisites: Semesters I, II, III, and IV PTA-designated courses and BIO 100 and BIO 109 (Anatomy and Physiology I and II)

PTA 212 Clinical Practicum III

Total Course Hours: 280 (0 Theory, 0 Lab, 280 Extern) Semester Credits: 6.0

This course is a continuation of Clinical Practicum II and provides students with the opportunity to apply learned theories and skills in a clinical setting under direct supervision of a licensed physical therapist or licensed/certified physical therapist assistant. This practicum consists of seven weeks of full time (40 hours/week) clinical time.

Prerequisites: Semesters I, II, III, and IV PTA-designated courses and BIO 100 and BIO 109 (Anatomy and Physiology I and II)

I've always been interested in sports and even considered becoming an orthopedic surgeon, but having kids at a young age derailed my plan. I decided it was time to pursue a career that I could take with me as the military moved our family. I found PMI and discovered they were launching a brand new Physical Therapist Assistant program. I knew immediately this was for me. I really enjoyed interacting with my classmates; they became like family. My instructors were great and extremely knowledgeable!

After graduation, the military moved us to Colorado Springs. I took my boards and ended up achieving a perfect score on my exam! Colorado Sport and Spine was seeking someone to work with their vestibular therapist, and because one of my clinical rotations had been in vestibular and balance, I was hired over the other applicants. I absolutely love my job and I have great coworkers and mentors. I truly owe it all to the experience PMI provided me.

The physical therapists I work under are committed to the betterment of our profession and supported me in my decision to get my bachelor's degree. I enrolled in PMI's Online Bachelor of Science in Physical Therapist Assistant Program. I appreciated that my classmates and I were able to tailor our online experience to fit our day-to-day jobs and other life commitments. I had a wonderful experience at PMI and have nothing but good things to say about both programs.

Marri Mattson
Associate Degree, Physical Therapist Assistant Program, Las Vegas Campus
Bachelor Degree, Physical Therapist Assistant Program, Online Education

Radiography

Objective: To develop the personal traits and professional skills needed to perform as competent entry-level radiologic technologists. Students will be presented with information in anatomy and physiology, methods of patient care, psychology, medical terminology, radiographic techniques, and communications.

Graduates of this program receive an Associate of Applied Science Degree. Graduates are qualified to apply to take the American Registry of Radiologic Technologists (ARRT) examination for certification.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, an interview with the program director and/or faculty is required.

Radiography • Course Descriptions

Courses that may be offered on-ground, online, and/or blended at the Chula Vista, Denver, El Paso, Houston, Las Vegas, Seattle, and Tucson campuses: CMT 105 Medical Terminology, CCM 110 Communications, CCL 115 Computer Literacy, CLE 110 Medical Law and Ethics. **Additional courses that may be offered on-ground, online, and/or blended at the Chula Vista, Denver, El Paso, Houston, and Tucson Campuses:** RAD 245 Radiography III. **Additional courses that may be offered on-ground, online, and/or blended at the Las Vegas Campus:** RAD 245 Radiography III, HST 205 Nevada History and US Constitution.

BIO 130 Anatomy and Physiology I

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

The objective of this course is to provide the student with knowledge of the structure and function of the human body. Cells and tissues will be described, and organs will be discussed as components of their respective systems. Course content includes the structure and function of the integumentary and musculoskeletal systems.

Prerequisites: None

CCL 115 Computer Literacy

Total Course Hours: 16 (16 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course provides a survey of the responsible and ethical uses of computers and related devices in academic and medical settings. Topics include but are not limited to review of common hardware and software to incorporate basic word processing, spreadsheets, and presentation software. Students will utilize technology to retrieve, evaluate and synthesize information from diverse sources and points of view.

Prerequisites: None

CCM 110 Communications

Total Course Hours: 48 (48 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course addresses the wide range of communication skills necessary for success in health professions. Topics include verbal and nonverbal communication, technical and professional writing, speaking and listening critically, health literacy, and evaluating and synthesizing material from diverse cultural sources and points of view, among others.

Prerequisites: None

CMT 105 Medical Terminology

Total Course Hours: 16 (16 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

The course focuses on the development of a basic framework for the language of medicine. Through memorization and practice in spelling and pronunciation of medical roots, suffixes, and prefixes, students learn to create, analyze, and apply medical terms.

Prerequisites: None

MT 203 Math Applications

Total Course Hours: 48 (48 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with the fundamentals of college algebra. Mathematical operations covered include fractions, decimals, algebraic equations, basic statistics, word problems, and graphing.

Prerequisites: None

RAD 105 Radiography I

Total Course Hours: 16 (16 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course provides the student with introduction to the field of radiologic technology through a broad overview of the radiography curriculum. Content areas include imaging equipment, image production, radiation protection, imaging modalities, and professional growth and development.

Prerequisites: None

RAD 110 Positioning I

Total Course Hours: 80 (48 Theory, 32 Lab, 0 Extern) Semester Credits: 4.0

This course covers basic terminology, anatomy, and radiographic procedures. Laboratory practice is through peer simulation and/or radiographic exposure of man-made models.

Prerequisites: None

BIO 140 Anatomy and Physiology II

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

A continuation of BIO 130, this course content includes the structure and function of the endocrine, nervous, cardiovascular (including blood, heart, blood vessels, and circulation), lymphatic, respiratory, digestive, urinary, and reproductive systems.

Prerequisites: BIO 130 Anatomy and Physiology I

CLE 110 Medical Law and Ethics

Total Course Hours: 16 (16 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

Students are provided an overview of ethics and the law as they apply to medical professions and practice. Topics include scope of practice, legal issues, ethical considerations, patient rights, informed consent, standards of care, documentation, and workplace issues, including employment discrimination.

Prerequisites: None

Radiography • Course Descriptions

RAD 120 Positioning II

Total Course Hours: 72 (40 Theory, 32 Lab, 0 Extern) Semester Credits: 3.5

This course is a continuation of RAD 110. Students will also learn advanced positioning skills for age-specific populations. Laboratory practice is through peer simulation and/or radiographic exposure of man-made models.

Prerequisites: Semester I courses

RAD 125 Physics

Total Course Hours: 48 (48 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides an in-depth analysis of radiologic physics. Some of the topics and principles covered include atomic structure, electricity, electromagnetism, equipment operation and maintenance, x-ray production, and x-ray interactions.

Prerequisites: Semester I courses

RAD 130 Principles of Exposure

Total Course Hours: 48 (48 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course covers the factors that affect the diagnostic quality of radiographic images. Topics covered include image acquisition, digital imaging systems, image processing, beam limitation, grids, contrast, receptor exposure, spatial resolution, and structural considerations.

Prerequisites: Semester I courses

RAD 135 Methods of Patient Care

Total Course Hours: 56 (48 Theory, 8 Lab, 0 Extern) Semester Credits: 3.0

Students are instructed in basic patient care skills as they apply to radiologic technology. Emphasis is placed on safety, infection control, aseptic techniques, administration of contrast media, venipuncture, pharmacology, patient assessment, care of the critical patient and emergency care, and the care of tubes, catheters and vascular lines. In California, this course will provide the education and training for venipuncture certification.

Prerequisites: Semester I courses

HST 205 Nevada History and US Constitution (Las Vegas Campus Only)

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

A survey of the history of the state of Nevada with focus on mining, gaming, government and recent developments in population expansion. The course will review the Nevada State Constitution and legal ramifications. The essentials of the US Constitution will also be examined. The course is designed to meet Nevada History/US Constitution associate degree requirements.

Prerequisites: None

PSY 135 Interpersonal Relations

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course explores the psychological nature of humans and their interactions. Students will gain an understanding of basic psychological concepts as well as an awareness of self and how these elements provide a foundation for the interaction of the individual within the social and health care environments. Topics include but are not limited to perception, adaptation, communication, group processes, and the impact of health on behavior.

Prerequisites: None

RAD 140 Radiographic Biology

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course provides the student with instruction on x-ray interactions with matter, radiation effects on the molecular and cellular levels, acute and long-term radiation responses, and radiation protection principles.

Prerequisites: Semesters I and II courses

RAD 205 Clinical Externship I

Total Course Hours: 492 (0 Theory, 0 Lab, 492 Extern) Semester Credits: 10.5

Clinical experience under supervision of clinical staff and faculty correlated with theories presented in the classroom.

Prerequisites: Semesters I and II courses

RAD 210 Advanced Radiographic Imaging & Special Procedures

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course presents radiography skills and equipment used in various imaging procedures and advanced modalities. Topics include but are not limited to cardiovascular and interventional radiography, computed tomography imaging, magnetic resonance imaging, mammography, bone densitometry, ultrasound, nuclear medicine, and radiation oncology.

Prerequisites: Semesters I, II, and III courses

RAD 220 Pathology I

Total Course Hours: 16 (16 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course provides an overview of radiographic pathology. Topics include pathologies of the musculoskeletal, respiratory, gastrointestinal, hepatobiliary, and urinary systems.

Prerequisites: Semesters I, II, and III courses

Radiography • Course Descriptions

RAD 225 Clinical Externship II

Total Course Hours: 492 (0 Theory, 0 Lab, 492 Extern) Semester Credits: 10.5

This course is a continuation of RAD 205 and provides the student with clinical experience under the supervision of clinical staff and faculty. Students will develop clinical competence by performing a variety of radiographic procedures on a diverse patient population. Student learning and competence will be determined in part through frequent critique and evaluation, as well as specific formative and summative assessment tools. Students are expected to demonstrate increasing clinical skill and competence.

Prerequisites: Semesters I, II, and III courses

RAD 230 Radiography II

Total Course Hours: 48 (48 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course builds upon the foundations of classroom theory and practical externship in the critique of radiographic image quality, with an emphasis on image analysis. In California, this course includes fluoroscopic equipment and procedures, enabling graduates to be eligible to apply to take the California State Fluoroscopy Permit Examination.

Prerequisites: Semesters I, II, III, and IV courses

RAD 235 Pathology II

Total Course Hours: 16 (16 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course is a continuation of RAD 220. Topics include pathologies of the hematopoietic, cardiovascular, nervous, endocrine, and reproductive systems, and diseases and trauma.

Prerequisites: Semesters I, II, III, and IV courses

RAD 240 Clinical Externship III

Total Course Hours: 492 (0 Theory, 0 Lab, 492 Extern) Semester Credits: 10.5

This course is a continuation of RAD 225 and provides the student with clinical experience under the supervision of clinical staff and faculty. Students will develop clinical competence by performing a variety of radiographic procedures on a diverse patient population. Student learning and competence will be determined in part through frequent critique and evaluation, as well as specific formative and summative assessment tools. Students are expected to demonstrate increasing clinical skill and competence.

Prerequisites: Semesters I, II, III, and IV courses

RAD 245 Radiography III

Total Course Hours: 56 (56 Theory, 0 Lab, 0 Extern) Semester Credits: 3.5

This course is designed to prepare the student for examination for certification by the American Registry of Radiologic Technologists (ARRT).

Prerequisites: Semesters I, II, III, IV, and V courses

RAD 250 Clinical Externship IV

Total Course Hours: 492 (0 Theory, 0 Lab, 492 Extern) Semester Credits: 10.5

This course is a continuation of RAD 240 and provides the student with clinical experience under the supervision of clinical staff and faculty. Students will develop clinical competence by performing a variety of radiographic procedures on a diverse patient population. Student learning and competence will be determined in part through frequent critique and evaluation, as well as specific formative and summative assessment tools. Students are expected to demonstrate the clinical skill and competence as required of an entry-level radiographer.

Prerequisites: Semesters I, II, III, IV, and V courses

I had gone to college for several years and had finally determined my career path. I first came to PMI in 2005 after the college I was attending in Hawaii discontinued their radiologic technologist program. I chose PMI because it was the best and fastest way to get to my goal. Like many students, I needed to bring in an income while in school. So anytime my school schedule changed during my clinical externships, I found a new job that would accommodate my schedule. During PMI's bachelor program I was a new mom and had both a full- and part-time job. Both programs were completely doable during these times in my life as long as I committed myself and knew that each one would better my future.

My instructors were knowledgeable and completely prepared me for my profession. I was hired directly out of school at one of my externship sites, Banner-University Medical Center, where I've been working for nearly 10 years. I continued to advance myself through education; getting my CT certification and my bachelor's degree through PMI's Online program. The idea of teaching future technologists and being able to share my knowledge got me excited, so I began teaching part time at PMI. Eventually, I became a full time instructor.

PMI gave me a great start on my career path. My goal now is to share that same knowledge and passion with my students. Thanks PMI!

Jolene Pobrislo
Associate Degree, Radiography, Tucson Campus
Bachelor Degree, Radiologic Sciences, Online Education

Advanced Placement Track–Radiography

Objective: To develop in students the personal and professional skills needed to perform as competent entry-level radiologic technologists. Students will be presented with information in anatomy and physiology, methods of patient care, medical terminology, radiographic techniques, and communications.

Graduates of this program receive an Associate of Applied Science Degree and are qualified to apply to take the American Registry of Radiologic Technologists (ARRT) examination for certification.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, applicants must document a minimum of 1,716 hours of clinical experience in radiologic sciences. In addition, applications must document graduation from one of the following: a United States military program in radiologic sciences; a JRCERT accredited radiologic sciences program; a foreign program in radiologic sciences equivalent in length to one year or more of college coursework; or an approved or licensed limited scope radiography program. One year of college coursework is defined as 30 credit hours. Students are granted 39.5 credits for previous radiologic sciences education and experience. Refer to the Transfer Credit information in the Prospective Students section of this catalog.

Advanced Placement Track–Radiography • Course Descriptions

PSY 135 Interpersonal Relations

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course explores the psychological nature of humans and their interactions. Students will gain an understanding of basic psychological concepts as well as an awareness of self and how these elements provide a foundation for the interaction of the individual within the social and health care environments. Topics include but are not limited to perception, adaptation, communication, group processes, and the impact of health on behavior.

Prerequisites: None

MT 203 Math Applications

Total Course Hours: 48 (48 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with the fundamentals of college algebra. Mathematical operations covered include fractions, decimals, algebraic equations, basic statistics, word problems, and graphing.

Prerequisites: None

CCL 111 Computer Literacy

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course provides a survey of the responsible and ethical uses of computers and related devices in academic and medical settings. Through demonstration and hands-on experience, students acquire a general understanding of computer technology. Topics include but are not limited to review of common terminology and hardware and software components and applications used in basic word processing, spreadsheets, and presentations. Students utilize technology to retrieve, evaluate, and synthesize information from diverse sources and points of view.

Prerequisites: None

CCM 110 Communications

Total Course Hours: 48 (48 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course addresses the wide range of communication skills necessary for success in health professions. Topics include verbal and nonverbal communication, technical and professional writing, speaking and listening critically, health literacy, and evaluating and synthesizing material from diverse cultural sources and points of view, among others.

Prerequisites: None

BIO 130 Anatomy & Physiology I

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

The objective of this course is to provide the student with knowledge of the structure and function of the human body. Cells and tissues will be described, and organs will be discussed as components of their respective systems. Course content includes the structure and function of the integumentary and musculoskeletal systems.

Prerequisites: None

RAD 111 Positioning I

Total Course Hours: 64 (64 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course covers basic terminology, anatomy, and radiographic procedures.

Prerequisites: BIO 130 Anatomy and Physiology I

RAD 126 Physics

Total Course Hours: 48 (48 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides an in-depth analysis of radiologic physics. Some of the topics and principles covered include atomic structure, electricity, electromagnetism, equipment operation and maintenance, x-ray production, and x-ray interactions.

Prerequisites: MT 203 Math Applications

RAD 136 Methods of Patient Care

Total Course Hours: 56 (56 Theory, 0 Lab, 0 Extern) Semester Credits: 3.5

Students are instructed in basic patient care skills as they apply to radiologic technology. Emphasis is placed on safety, infection control, aseptic techniques, administration of contrast media, venipuncture, pharmacology, patient assessment, care of the critical patient and emergency care, and the care of tubes, catheters and vascular lines. In California, this course will provide the education and training for venipuncture certification.

Prerequisites: None

CLE 110 Medical Law & Ethics

Total Course Hours: 16 (16 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

Students are provided an overview of ethics and the law as they apply to medical professions and practice. Topics include scope of practice, legal issues, ethical considerations, patient rights, informed consent, standards of care, documentation, and workplace issues, including employment discrimination.

Prerequisites: None

Advanced Placement Track–Radiography • Course Descriptions

BIO 140 Anatomy & Physiology II

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

A continuation of BIO 130, this course content includes the structure and function of the endocrine, nervous, cardiovascular (including blood, heart, blood vessels, and circulation), lymphatic, respiratory, digestive, urinary, and reproductive systems.

Prerequisites: BIO 130 Anatomy and Physiology I

RAD 121 Positioning II

Total Course Hours: 64 (64 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course is a continuation of RAD 111. Students will also learn advanced positioning skills for age-specific populations.

Prerequisites: RAD 111 Positioning I, BIO 130 and 140 (Anatomy and Physiology I and II)

RAD 141 Radiographic Biology

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course provides the student with instruction on x-ray interactions with matter, radiation effects on the molecular and cellular levels, acute and long-term radiation responses, and radiation protection principles.

Prerequisites: RAD 126 Physics, BIO 130 and 140 (Anatomy and Physiology I and II)

RAD 231 Radiography II

Total Course Hours: 48 (48 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course builds upon the foundations of classroom theory and practical experience in the field in the critique of radiographic image quality, with an emphasis on image analysis.

Prerequisites: RAD 126 Physics, RAD 111 Positioning I

RAD 221 Pathology I

Total Course Hours: 16 (16 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course provides an overview of radiographic pathology. Topics include pathologies of the musculoskeletal, respiratory, gastrointestinal, hepatobiliary, and urinary systems.

Prerequisites: BIO 130 and 140 (Anatomy and Physiology I and II), RAD 111 Positioning I

RAD 131 Principles of Exposure

Total Course Hours: 48 (48 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course covers the factors that affect the diagnostic quality of radiographic images. Topics covered include image acquisition, digital imaging systems, image processing, beam limitation, grids, contrast, receptor exposure, spatial resolution, and structural considerations.

Prerequisites: RAD 126 Physics, RAD 111 Positioning I

RAD 236 Pathology II

Total Course Hours: 16 (16 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course is a continuation of RAD 221. Topics include pathologies of the hematopoietic, cardiovascular, nervous, endocrine, and reproductive systems, and diseases and trauma.

Prerequisites: Semesters I, II, and III courses

RAD 211 Advanced Radiographic Imaging & Special Procedures

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course presents radiography skills and equipment used in various imaging procedures and advanced modalities. Topics include but are not limited to cardiovascular and interventional radiography, computed tomography imaging, magnetic resonance imaging, mammography, bone densitometry, ultrasound, nuclear medicine and radiation oncology.

Prerequisites: Semesters I, II, and III courses

RAD 246 Radiography III

Total Course Hours: 56 (56 Theory, 0 Lab, 0 Extern) Semester Credits: 3.5

This course is designed to prepare the student for examination for certification by the American Registry of Radiologic Technologists (ARRT).

Prerequisites: Semesters I, II, and III courses

RAD 256 Clinical Externship IV

Total Course Hours: 252 (0 Theory, 0 Lab, 252 Extern) Semester Credits: 5.5

This course provides the student with clinical experience under the supervision of clinical staff and faculty. Students will develop clinical competence by performing a variety of radiographic procedures on a diverse patient population. Student learning and competence will be determined in part through frequent critique and evaluation, as well as specific formative and summative assessment tools. Students are expected to demonstrate the clinical skill and competence as required of an entry-level radiographer.

Respiratory Therapy

Objective: To provide students with academic and clinical training in preparation for employment as a registered respiratory therapist. Students have the opportunity to develop professional skills in advanced respiratory care techniques (including neonatal, pediatric, and adult special care procedures), general and advanced pharmacology, cardiopulmonary disease, patient assessment, and therapeutics.

Graduates of the program receive an Associate of Applied Science Degree and are eligible to apply to take the National Board for Respiratory Care Therapist Multiple-Choice (TMC) Examination. Those who meet the threshold on the TMC are eligible to take the Clinical Simulation Examination (CSE) to obtain the Registered Respiratory Therapist (RRT) credential.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, an interview with the program director and/or faculty is required.

Respiratory Therapy • Course Descriptions

Courses that may be offered on-ground, online, and/or blended (blended delivery is limited to the Houston, Mesa, and Tucson campuses):
CCB 108 Introduction to Computers & Health Care Communications, CMT 105 Medical Terminology, RES 140 Cardiopulmonary Diseases, CLE 185 Law and Ethics, RES 200 Pulmonary Rehabilitation & Wellness, CCM 210 Professional Communications, RES 275 NBRC Review Course.

CCB 108 Introduction to Computers & Health Care Communications

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course provides an overview of the operation of computers and their application in the field of allied health. Topics include the effective use of oral, written, and electronic communications skills, verbal and nonverbal communication, intercultural communication, technical and professional writing, and the applications of computers in allied health. Students will develop critical-thinking skills as they locate reliable sources of information, and evaluate and synthesize that information in written format to support evidence-based practice.

Prerequisites: None

CMT 105 Medical Terminology

Total Course Hours: 16 (16 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

The course focuses on the development of a basic framework for the language of medicine. Through memorization and practice in spelling and pronunciation of medical roots, suffixes, and prefixes, students learn to create, analyze, and apply medical terms.

Prerequisites: None

MT 102 Math Applications

Total Course Hours: 32 (32 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course provides the student with the fundamentals of college algebra. Content includes fractions, decimals, percents, ratios, and algebraic equations. Additional topics include a review of the metric system, scientific notation, graphing, and dosing calculations.

Prerequisites: None

CHP 110 General Sciences

Total Course Hours: 38 (38 Theory, 0 Lab, 0 Extern) Semester Credits: 2.5

This course introduces chemistry concepts of atomic theory, the use of the periodic chart, and chemical bonding and balancing equations. This course also includes an introduction to basic physics, which includes laws of gaseous particles and diffusion, relative humidity, temperature, conversion, pressure, and partial pressures.

Prerequisites: None

BIO 126 Anatomy & Physiology

Total Course Hours: 62 (62 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

The objective of this course is to provide the student with knowledge of the structure and function of the human body. Cells, tissues, and organs are described and discussed as components of their respective systems. Course content includes the structure and function of the integumentary, musculoskeletal, endocrine, cardiovascular (including blood, heart, blood vessels, and circulation), lymphatic, immune, respiratory, digestive, urinary, and reproductive systems.

Prerequisites: None

MB 115 Microbiology

Total Course Hours: 22 (22 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course presents the basics of microbiology. Topics include bacteriology, virology, mycology, equipment processing, and infection control in the clinical setting.

Prerequisites: None

AP 116 Cardiac Anatomy & Physiology

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

Provides an in-depth study of the heart, including the functions of the heart, its components, and the chemical and physical processes involved.

Prerequisites: None

AP 117 Pulmonary Anatomy & Physiology

Total Course Hours: 74 (74 Theory, 0 Lab, 0 Extern) Semester Credits: 4.5

The course provides an in-depth study of the lungs and their functions, including pulmonary structure and the physiology of gas transport.

Prerequisites: None

PC 121 Patient Assessment

Total Course Hours: 34 (20 Theory, 14 Lab, 0 Extern) Semester Credits: 1.5

Introduces the techniques of observation, palpation, percussion, and auscultation, and performance of vital signs for head-to-toe patient evaluation. Also introduced are communication techniques for interaction with patients and their families.

Prerequisites: None

HST 205 Nevada History and US Constitution (Las Vegas Campus Only)

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

A survey of the history of the state of Nevada with focus on mining, gaming, government and recent developments in population expansion.

The course will review the Nevada State Constitution and legal ramifications. The essentials of the US Constitution will also be examined. The course is designed to meet Nevada History/US Constitution associate degree requirements.

Prerequisites: None

Respiratory Therapy • Course Descriptions

RX 150 Pharmacology

Total Course Hours: 34 (34 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

Presents major pharmacological agents used in treating cardiopulmonary diseases. Provides knowledge of pharmaceutical classification, drug action and modes of administration, the metric system, medications, and special handling procedures.

Prerequisites: AP 116 Cardiac Anatomy & Physiology and AP 117 Pulmonary Anatomy & Physiology

RES 130 Cardiopulmonary Diagnostics

Total Course Hours: 72 (44 Theory, 28 Lab, 0 Extern) Semester Credits: 3.5

This course presents an introduction to basic cardiopulmonary diagnostic testing. Topics include but are not limited to ABGs, PFTs, EKGs, CXRs, bronchoscopy, and pulmonary function testing, which includes the machines, equipment, and accessories utilized for diagnosis.

Prerequisites: AP 116 Cardiac Anatomy & Physiology and AP 117 Pulmonary Anatomy & Physiology

RES 140 Cardiopulmonary Diseases

Total Course Hours: 40 (40 Theory, 0 Lab, 0 Extern) Semester Credits: 2.5

In-depth study of cardiopulmonary diseases, the etiology of each disease, the clinical manifestations of each disease, and the appropriate management of the disease by the respiratory care practitioner.

Prerequisites: AP 116 Cardiac Anatomy & Physiology and AP 117 Pulmonary Anatomy & Physiology

RES 160 Respiratory Pediatrics

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

The focus of this course is to introduce assessment skills needed to treat the pediatric patient, study diseases particular to pediatrics, and appropriate therapies and resuscitative procedures.

Prerequisites: AP 116 Cardiac Anatomy & Physiology and AP 117 Pulmonary Anatomy & Physiology

RES 170 Respiratory Therapeutics I

Total Course Hours: 56 (32 Theory, 24 Lab, 0 Extern) Semester Credits: 2.5

The course provides an introduction to medical gas, storage systems, oxygen devices, monitoring systems, and the use of hyperbaric oxygen related to respiratory care.

Prerequisites: AP 116 Cardiac Anatomy & Physiology and AP 117 Pulmonary Anatomy & Physiology

RES 175 Respiratory Therapeutics II

Total Course Hours: 108 (48 Theory, 60 Lab, 0 Extern) Semester Credits: 5.0

This course covers the various therapeutic modalities used in respiratory care. Indications, side effects, hazards, and basis for application are stressed. Specific focus on technologies for airway clearance and hyperinflation.

Prerequisites: AP 116 Cardiac Anatomy & Physiology and AP 117 Pulmonary Anatomy & Physiology

CLE 185 Law and Ethics

Total Course Hours: 24 (24 Theory, 0 Lab, 0 Extern) Semester Credits: 1.5

This course addresses basic legal and ethical principles and practices as they relate to medical professions. Topics include scope of practice, ethical considerations, legal issues, medical negligence, and the workplace. Students will examine aspects of service delivery that affect quality of patient care, including ethical and legal decision-making.

Prerequisites: Semesters I and II courses

RES 190 Respiratory Care Practicum I

Total Course Hours: 252 (0 Theory, 0 Lab, 252 Extern) Semester Credits: 5.5

Basic therapeutic modalities used by respiratory care practitioners in a hospital, which may include emergency room, medical/surgical, and pediatric general floor clinical settings. Included are modalities of aerosol therapy, humidity therapy, hyperinflation, oxygen therapy, chest physiotherapy, airway care, and arterial blood gas sampling and analysis. Learners will assess, analyze, and apply therapeutic modalities based upon patient outcomes.

Prerequisites: Semesters I and II courses

RES 200 Pulmonary Rehabilitation & Wellness

Total Course Hours: 20 (20 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course presents the basic elements required in designing the components of a cardiopulmonary rehabilitation program. Topics include community and individual health promotion, patient education, family training, smoking cessation programs, and how to deal with tobacco issues. Instruction also focuses on the importance and benefits of home health care.

Prerequisites: Semesters I and II courses

RES 210 Critical Care Techniques

Total Course Hours: 50 (34 Theory, 16 Lab, 0 Extern) Semester Credits: 2.5

Instructional focus is centered on emergency management and maintenance of artificial airways according to AHA ACLS standards.

Prerequisites: Semesters I and II courses

RES 241 Emergency Care

Total Course Hours: 52 (36 Theory, 16 Lab, 0 Extern) Semester Credits: 2.5

This course provides knowledge of basic and advanced life support, triage techniques, and identification of pathophysiology. Topics include emergency care applications and management of drowning, hypo- and hyperthermia, shock, poisons, drug overdose, burns, diving accidents, and other types of trauma.

Prerequisites: Semesters I and II courses

Respiratory Therapy • Course Descriptions

RES 221 Advanced Patient Assessment

Total Course Hours: 46 (28 Theory, 18 Lab, 0 Extern) Semester Credits: 2.0

This course provides knowledge and application of advanced patient assessment techniques and skills in respiratory therapy. Interpretation of laboratory data and the nutritional status of the critical care patient are stressed.

Prerequisites: Semesters I and II courses

RES 250 Advanced Pharmacology

Total Course Hours: 46 (46 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides a review of respiratory specific drugs, cardiac drugs, sedatives, and pain maintenance drugs as they relate to cardiopulmonary function. Also addressed are vaccinations currently recommended for adult respiratory patients.

Prerequisites: Semesters I, II, and III courses

RES 230 Advanced Pulmonary Diagnostics

Total Course Hours: 38 (38 Theory, 0 Lab, 0 Extern) Semester Credits: 2.5

An in-depth course that provides knowledge of arterial blood gas analysis, pulmonary function testing, chest radiography, cardiac stress testing, and assessment of sleep disorders.

Prerequisites: Semesters I, II, and III courses

RES 280 Introduction to Mechanical Ventilation

Total Course Hours: 116 (58 Theory, 58 Lab, 0 Extern) Semester Credits: 5.5

This course introduces the indications, mechanics, and physiologic effects of mechanical ventilation. Topics include initiation, monitoring, management, and discontinuance of mechanical ventilation.

Prerequisites: Semesters I, II, and III courses

RES 290 Respiratory Care Practicum II

Total Course Hours: 252 (0 Theory, 0 Lab, 252 Extern) Semester Credits: 5.5

Structured to provide the learner with opportunities to apply respiratory care modalities in intensive care settings. Included are modalities for pulmonary functions, polysomnography, arterial blood gas sampling and interpretation of results, airway care, bronchoscopy, and ventilator management for adult and pediatric patients. The learner will have the opportunity to assess, analyze, and apply therapeutic modalities based upon patient outcomes, using appropriate AARC CPG-based upon ventilator management.

Prerequisites: Semesters I, II, and III courses and RES 280

CCM 210 Professional Communications

Total Course Hours: 16 (16 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course provides a review of the communication skills and practices related to seeking employment and advancing in the workplace. Topics include different modes of effective professional communication, job market exploration, résumé writing, and preparation of cover letters, the importance of references and recommendations, and the interviewing process. Emphasis is placed on customer service, supervision, job success, and ongoing advancement in the profession.

Prerequisites: Semesters I, II, III, and IV courses

RES 270 Cardiovascular Diagnostics

Total Course Hours: 50 (50 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

An in-depth course designed to instruct the learner on the application and analysis of electrocardiogram testing, ECG interpretation, and hemodynamic monitoring.

Prerequisites: Semesters I, II, III, and IV courses

RES 260 Respiratory Perinatology

Total Course Hours: 50 (50 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Provides an in-depth study of normal neonatal anatomy and physiology, labor and delivery, high-risk infants, resuscitation, mechanical ventilation, and common neonatal pathologies and modalities for their treatment.

Prerequisites: Semesters I, II, III, and IV courses

RES 286 Advanced Mechanical Ventilation

Total Course Hours: 78 (46 Theory, 32 Lab, 0 Extern) Semester Credits: 4.0

This course provides the student with knowledge of advanced concepts and applications of mechanical ventilation including high frequency ventilation to adult, pediatric, and neonatal patients.

Prerequisites: Semesters I, II, III, and IV courses

RES 295 Respiratory Care Practicum III

Total Course Hours: 216 (0 Theory, 0 Lab, 216 Extern) Semester Credits: 4.5

This course involves clinical application of the diagnostic and therapeutic modalities presented in the classroom and lab setting. Emphasis is placed on neonatal, pediatric and adult mechanical ventilation, airway management, and cardiopulmonary monitoring of patients.

Prerequisites: Semesters I, II, III, IV, and V courses

RES 275 NBRC Review Course

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course is designed to prepare the learner for the National Board for Respiratory Care Therapist Multiple-Choice (TMC) Examination and the Clinical Simulation Examination (CSE).

Prerequisites: Semesters I, II, III, and IV courses

Surgical Technology

Objective: To prepare competent, entry-level surgical technologists with curriculum that addresses the three learning domains: cognitive (knowledge), psychomotor (hands-on skills), and affective (professional behavior and conduct). Students develop the skills required to become an integral member of the surgical team, which includes surgeons, anesthesiologists, registered nurses, and other personnel who deliver patient care before, during, and after surgery.

Graduates of this program receive an Associate of Applied Science Degree.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, an interview with the program director and/or faculty is required.

Surgical Technology • Course Descriptions

Courses that may be offered on-ground, online, or blended: BIO 118 Medical Terminology, SUR 245 Professional Development, and SUR 270 Certification Preparation.

BIO 122 Anatomy and Physiology I

Total Course Hours: 60 (45 Theory, 15 Lab, 0 Extern) Semester Credits: 3.5

This course is designed to provide a comprehensive foundation of the basic structure and function of the human body. Medical terminology related to body structures and function is introduced. Body organization, chemistry, cell structure, and tissues are reviewed. Systems covered include the integumentary, skeletal, muscular, nervous, and endocrine. The course also incorporates the interrelationships between the structures and systems, as well as the common illnesses and conditions associated with each system.

Prerequisites: None

BIO 118 Medical Terminology

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course focuses on the development of a basic framework for the language of medicine. Through memorization and practice in spelling and pronunciation of medical roots, suffixes, and prefixes, students learn to create, analyze, and apply medical terms.

Prerequisites: None

MTH 131 Mathematics Applications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course presents calculation, conversion, and computation of fractions, decimals, measurements, ratios, and proportions. It also introduces students to the application of these skills as required in the health care setting.

Prerequisites: None

CCM 140 Communications

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course addresses a wide range of communication skills necessary in health professions. Students will apply accepted communication conventions while considering context, situation, the influence of nonverbal actions, and audience factors such as diversity and roles.

Prerequisites: None

SUR 100 Introduction to Surgical Technology

Total Course Hours: 60 (45 Theory, 15 Lab, 0 Extern) Semester Credits: 3.5

This course is an introduction to the field of surgical technology. The history of the profession along with the roles and responsibilities of a surgical technologist are covered. The course content also includes foundational knowledge regarding the organizational, physical, and safety aspects of both hospitals and surgical suites. Legal and ethical issues are discussed.

Prerequisites: None

BIO 132 Anatomy and Physiology II

Total Course Hours: 60 (45 Theory, 15 Lab, 0 Extern) Semester Credits: 3.5

A continuation of BIO 122, this course is designed to provide a comprehensive foundation to the basic structure and function of the cardiovascular, lymphatic, respiratory, digestive, urinary, reproductive, and the endocrine systems. The course also incorporates the interrelationships between the structures and systems, as well as the common illnesses and conditions associated with each system.

Prerequisites: Semester I courses

BIO 133 Microbiology

Total Course Hours: 75 (60 Theory, 15 Lab, 0 Extern) Semester Credits: 4.5

This course presents the basics of microbiology. The course content focuses on microorganisms, pathogens, and disease transmission and prevention.

Prerequisites: Semester I courses

SUR 140 Surgical Patient Care

Total Course Hours: 75 (45 Theory, 30 Lab, 0 Extern) Semester Credits: 4.0

This course addresses the physical and psychosocial aspects of the surgical patient. Topics and skills addressed include moving, handling, and positioning patients, and performing vital signs, skin preparation, urinary catheterization, open gloving, and draping.

Prerequisites: Semester I courses

SUR 120 Principles and Practice of Surgical Technology

Total Course Hours: 90 (60 Theory, 30 Lab, 0 Extern) Semester Credits: 5.0

This course focuses on the responsibilities of a surgical technologist in the pre-, post-, and intraoperative phases of surgery. Emphasis is placed on ensuring patient safety through proper scrubbing, gowning, and gloving. Other topics covered include: surgical instrumentation, decontamination, sterilization, disinfection, wounds, wound healing, suture material, and stapling devices. Case preparation and surgical case management utilizing the principles of aseptic technique are demonstrated and practiced.

Prerequisites: Semester I courses

Surgical Technology • Course Descriptions

SUR 200 Surgical Pharmacology and Anesthesia

Total Course Hours: 90 (60 Theory, 30 Lab, 0 Extern) Semester Credits: 5.0

This course introduces surgical pharmacology and anesthesia. Medications commonly used in surgery and the procedures for properly identifying, handling, and storing them are emphasized. Anesthetic agents and equipment are also introduced.

Prerequisites: Semesters I and II courses

SUR 210 Endoscopic Principles and Procedures

Total Course Hours: 90 (60 Theory, 30 Lab, 0 Extern) Semester Credits: 5.0

This course explores endoscopic surgery and minimally invasive surgery. Topics include the preparation, maintenance, required cleaning, and surgical procedures appropriate for each type of endoscope. The use of physics, lasers, and robotics in the surgical setting is introduced.

Prerequisites: Semesters I and II courses

SUR 220 Basic Surgical Procedures

Total Course Hours: 120 (60 Theory, 60 Lab, 0 Extern) Semester Credits: 6.0

This course covers the basic surgical procedures used in the several areas of surgery, including general, obstetrics and gynecology, genitourinary, plastic and reconstructive, ophthalmic, ENT, and oral and maxillofacial. Topics addressed for each surgical specialty include related anatomy and terminology, common surgical procedures, pathophysiology, appropriate instrumentation, supplies, anesthesia method, patient positioning, prepping and draping, incision, basic procedural steps, complications, special medications, and specimen handling.

Prerequisites: Semesters I and II courses

SUR 230 Advanced Surgical Procedures

Total Course Hours: 120 (60 Theory, 60 Lab, 0 Extern) Semester Credits: 6.0

This course covers advanced surgical procedures used in several areas of surgery, including orthopedic, peripheral vascular, thoracic and pulmonary, cardiac, neuro, pediatric, and emergency trauma. Topics addressed for each surgical specialty include related anatomy and terminology, common surgical procedures, pathophysiology, appropriate instrumentation, supplies, anesthesia method, patient positioning, prepping and draping, incision, basic procedural steps, complications, special medications, and specimen handling.

Prerequisites: Semesters I, II, and III courses

SUR 240 Clinical Preparation and Practice

Total Course Hours: 75 (15 Theory, 60 Lab, 0 Extern) Semester Credits: 3.0

This course acts as a bridge from the didactic to the clinical portion of the program. Lab experiences focus on practicing the daily routines in the surgical setting, identifying operating room etiquette, and refining lab skills. The course includes a final lab practical which is a prerequisite for continuing to the clinical portion of the program.

Prerequisites: Semesters I, II, and III courses

SUR 245 Professional Development

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course covers the skills required to transition into the workforce as an entry-level surgical technologist. Topics include goal setting, assertiveness, time management, decision-making, résumé writing, and employment skills.

Prerequisites: Semesters I, II, and III courses

SUR 250 Clinical Practicum I

Total Course Hours: 120 (0 Theory, 0 Lab, 120 Extern) Semester Credits: 2.5

This course provides students with the opportunity to apply learned theories and skills in a clinical setting under the supervision of a preceptor. The practicum begins with a rotation in sterile processing. The next rotation is a transition to the surgical setting, which provides experience in the preoperative, intraoperative, and postoperative phases of surgery. Course requirements include maintaining case records of participation in surgical procedures for documentation of case requirements.

Prerequisites: Semesters I, II, and III courses and SUR 240 Clinical Preparation and Practice

SUR 260 Clinical Practicum II

Total Course Hours: 480 (0 Theory, 0 Lab, 480 Extern) Semester Credits: 10.5

This course is a continuation of SUR 250. Under the supervision of a preceptor, students participate in the intraoperative stage of surgery and perform preoperative and postoperative duties. Course requirements include documentation of the minimum 120 surgical procedures necessary for successful program completion. Upon completion of the term, entry-level proficiency in general surgery and specialty services is required.

Prerequisites: Semesters I, II, III, and IV courses

SUR 270 Certification Preparation

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course is designed to prepare the student for the NBSTSA certification examination. A comprehensive review of the technical coursework, mock examinations, and test-taking strategies are covered.

Prerequisites: Semesters I, II, III, and IV courses

Veterinary Technician

Objective: To develop in students the personal traits and professional skills needed to perform as competent entry-level veterinary technicians (VT). The program provides students with knowledge of medical terminology, anatomy and physiology, examination techniques, and radiologic, dental, and surgical procedures as they relate to veterinary care.

Graduates of this program receive an Associate of Applied Science Degree. Graduates of accredited programs are eligible to take the Veterinary Technician National Examination (VTNE) and applicable state board examinations.

Admissions Requirements: In addition to the Admissions requirements and Transfer Credit criteria listed in the Prospective Students section of this catalog, an interview with the program director and/or faculty is required. Applicants must provide evidence of a certificate/diploma from a veterinary assistant program and upon evaluation may successfully transfer 30 credits. Applicants with less than one year of experience as a veterinary assistant must have a GPA of 3.0.

Veterinary Technician • Course Descriptions

Courses that may be offered on-ground, online, and/or blended: CCM 111 Communications, MTH 129 Math Applications, SCI 120 Foundations in Biology and Chemistry, VTT 176 Introduction to Veterinary Technology, VTT 262 Veterinary Technician Seminar, and HST 205 Nevada History and US Constitution (Las Vegas Campus Only).

CCM 111 Communications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with experience with the wide range of communication skills necessary for success in health professions. Verbal and nonverbal communication, technical and professional writing, speaking and listening critically, health literacy, evaluating and synthesizing material from diverse cultural sources and points of view, and other topics. Legal and ethical issues in communication are also addressed.

Prerequisites: None

MTH 129 Math Applications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with the fundamentals of college algebra, and includes common formulae and calculations used in applied settings. Topics include fractions, decimals, linear equations, basic statistics, and pharmaceutical math.

Prerequisites: None

SCI 120 Foundations in Biology and Chemistry

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course provides an introduction to the fundamentals of chemistry and various life sciences as they relate to veterinary technology. Topics include inorganic and organic chemistry, biochemistry, cellular biology, and the biology of various life processes. This course provides a foundation for applied coursework in veterinary technology.

Prerequisites: None

VTT 176 Introduction to Veterinary Technology

Total Course Hours: 25 (25 Theory, 0 Lab, 0 Extern) Semester Credits: 1.5

This course presents the student with an introduction to veterinary science and the role of the credentialed veterinary technician on the veterinary team. Topics include the history of the field, scope of practice, ethical and legal issues, professionalism, and a survey of employment opportunities. This course provides the opportunity to learn and adopt methods and life skills that aid success in a professional degree program and the workplace and promote lifelong learning.

Prerequisites: None

VTT 222 Food and Fiber Animal

Total Course Hours: 55 (45 Theory, 10 Lab, 0 Extern) Semester Credits: 3.0

This course introduces the veterinary nursing student to livestock and animal science. This includes an overview of various segments of the livestock industry. Building on previous anatomy and physiology coursework, the primary focus of the course is the nursing and medicine of food animals. Coursework and lab exercises cover restraint, behavior, husbandry, nursing care, sampling techniques, bandaging, and radiography as well as medicine and a review of common surgeries of food and fiber species (bovine, caprine, ovine, camelid, and swine).

Prerequisites: Professional Sequence I

VTT 224 Diagnostic Imaging for Veterinary Technicians

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course furthers the training in radiology, begun in veterinary assistantship, with advanced studies in screens, positioning, and contrast studies. Students will learn to utilize a portable radiology machine. The course introduces the student to basic ultrasound techniques and digital radiography.

Prerequisites: Professional Sequence I

VTT 226 Small Animal Nursing

Total Course Hours: 75 (15 Theory, 60 Lab, 0 Extern) Semester Credits: 3.0

This course provides advanced training in various nursing procedures within the veterinary technician's scope of practice. Topics include catheterization, aspiration, centesis, endotracheal and gastric intubation, rectal and reproductive procedures, sensory organ exams and testing, and bandaging techniques.

Prerequisites: Professional Sequence I

VTT 232 Laboratory Animal Science

Total Course Hours: 35 (20 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course provides an overview of the principles of laboratory animal research and the role of the veterinary technician in the husbandry and nursing of small mammalian species as well as participation in research activities. Students will work with selected species that may include mice, rats, guinea pigs, and rabbits as well as other small mammals. The use of primates and nonmammalian species will be discussed.

Prerequisites: Professional Sequence I

Veterinary Technician • Course Descriptions

VTT 234 Laboratory Procedures for Veterinary Technicians

Total Course Hours: 65 (30 Theory, 35 Lab, 0 Extern) Semester Credits: 3.0

This course focuses on diagnostic tests performed in the veterinary laboratory and includes discussion of various diseases and disorders of the body systems. Experience in bacteriology, endocrinology, hematology, serology, and parasitology is part of the curriculum.

Prerequisites: Professional Sequence I

VTT 236 Anatomy and Physiology for Veterinary Technicians

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This course provides an in-depth analysis of the anatomy and physiology of the domestic species, with focus on the cat and dog. In the lab sessions, students will identify anatomical features and demonstrate an understanding of body function. Necropsy technique is mandatory.

Prerequisites: Professional Sequence I

VTT 242 Dentistry Techniques

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course presents the tasks and techniques within the scope of practice of a veterinary technician. Included are examination, cleaning, scaling, polishing, and in some jurisdictions, extractions. Tooth anatomy and terminology is reviewed as well as the common veterinary dental diseases and disorders. Also addressed are protocols for veterinary dental radiography and assisting the DVM in advanced techniques.

Prerequisites: Professional Sequence I

VTT 244 Pharmacology for Veterinary Technicians

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course focuses on those pharmacological topics within the scope of the veterinary technician. Topics include a review of pharmaceutical math and a detailed examination of the physiology and chemistry of drug effects on the nervous system. Also presented is a discussion of the proper protocol for many injectable and inhalant anesthetics, analgesics, and anti-inflammatories. Chemotherapeutics, antimicrobial, antiparasitic, and euthanasia agents are also addressed.

Prerequisites: Professional Sequence I

VTT 246 Surgical Nursing for Veterinary Technicians

Total Course Hours: 70 (30 Theory, 40 Lab, 0 Extern) Semester Credits: 3.0

In defining the veterinary technician's role in surgical nursing, the student will be exposed to the intricacies of the anesthesia machine and receive training in setting, adjusting, and maintaining the unit. The student will evaluate, medicate, anesthetize, prepare, and monitor a variety of surgical patients as well as learn the protocol as a sterile scrub nurse. A review and demonstration of various monitoring equipment is provided, and the student will participate in several surgeries of various intensities.

Prerequisites: Professional Sequence I

VTT 248 Clinic Surgery and Lab

Total Course Hours: 15 (0 Theory, 15 Lab, 0 Extern) Semester Credits: 0.5

This course provides opportunities for the students to advance their experience with surgical and anesthetic procedures and protocols through observation and applied practice. Students will deepen their understanding of laboratory and surgical procedures from assessment to follow-up care. Students will practice a variety of lab skills appropriate to their level of study.

Prerequisites: Professional Sequence I

VTT 252 Exotic Animal Medicine and Nursing

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course presents an overview of the various exotic animals that are an increasing part of the pet population. The focus is on the anatomy, behavior, nutrition, diseases, and restraint of various reptilian, amphibian, and avian groups as well as some of the exotic small mammals. Lab activities will include the restraint and physical examination of these species. Basic nursing techniques of these species are addressed.

Prerequisites: Professional Sequence I

VTT 254 Equine Medicine and Nursing

Total Course Hours: 60 (45 Theory, 15 Lab, 0 Extern) Semester Credits: 3.5

This course introduces the veterinary nursing student to equine medicine and the role of the veterinary technician in the equine practice. Lecture and lab activities develop a more advanced understanding of equine anatomy and physiology and covers restraint, behavior, husbandry, nursing and sampling techniques, bandaging, and radiography. Content includes the common causes of lameness in the horse as well as the more commonly performed surgical procedures. Toxicological principles and the more common diseases and disorders of the horse will also be discussed.

Prerequisites: Professional Sequence I

Veterinary Technician • Course Descriptions

VTT 256 Emergency Procedures

Total Course Hours: 40 (30 Theory, 10 Lab, 0 Extern) Semester Credits: 2.0

This course covers the role of the veterinary technician in emergency procedures, both at an emergency clinic and at the veterinary hospital. Topics include assessment and triage, shock pathophysiology and treatment, trauma, CPR review, toxicology, anesthetic and surgical emergencies, and the veterinary technician's role in maintenance of the veterinary emergency crash kit.

Prerequisites: Professional Sequence I

VTT 258 Clinic Surgery and Lab

Total Course Hours: 30 (0 Theory, 30 Lab, 0 Extern) Semester Credits: 1.0

This course provides opportunities for the students to advance their experience with surgical and anesthetic procedures and protocols through observation and applied practice. Students will deepen their understanding of laboratory and surgical procedures from assessment to follow-up care. Students will practice a variety of lab skills appropriate to their level of study.

Prerequisites: Professional Sequence I

VTT 262 Veterinary Technician Seminar

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course is designed to prepare the learner for the Veterinary Technician National Examination (VTNE). Content includes a comprehensive review of program content and the opportunity to participate in a simulated VTNE exam.

Prerequisites: Professional Sequences I through V

VTT 291 Externship

Total Course Hours: 225 (0 Theory, 0 Lab, 225 Extern) Semester Credits: 5.0

This course provides students with opportunities to apply professional skills learned in the classroom.

Prerequisites: Professional Sequences I through V and all laboratory competencies

HST 205 Nevada History and US Constitution (Las Vegas Campus Only)

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

A survey of the history of the state of Nevada with focus on mining, gaming, government and recent developments in population expansion. The course will review the Nevada State Constitution and legal ramifications. The essentials of the US Constitution will also be examined. The course is designed to meet Nevada History/US Constitution associate degree requirements.

Prerequisites: None

Success Story

After working at an animal shelter for about 10 years, I realized I wanted to become a veterinary technician. I did my research online and found that PMI's Veterinary Technician Program had a good reputation, and their morning classes worked perfectly with my schedule. I was able to be a single mom, go to classes in the morning, and work in the afternoon. I had previous degrees that I didn't use, and I've always enjoyed learning, but PMI's program was very accelerated. I learned so much so fast. My instructors were great and gave us really good feedback. I realize I was a bit of a late bloomer in deciding to go back to school at age 34, but I'm so glad I did.

During my externship, I worked at Veterinary Specialty Center where I got great experience ... and a job! I recently became the internal medicine lead technician. I love my job in internal medicine, and I'm always learning. In fact, I am working toward my veterinary technician specialty license and spend my vacation time in Mexico to participate in spay and neuter clinics. I have to say, it feels good to be surrounded by these graduates because I know they are well-trained and knowledgeable. This program really does set you up for success.

The Online programs are delivered from Tucson, AZ.

Bachelor of Science in Health Care Administration

Objective: To foster critical thinking abilities, communication competence, and leadership capacity with an advanced understanding of health care management services and delivery. Students will develop strategies to analyze behavioral, ethical, and cultural trends that impact management in health care systems with diverse populations. They will also demonstrate the ability to evaluate ethical, legal, and regulatory policies, and demonstrate a mastery of core business theories as applied to health care systems.

Graduates of this program receive a Bachelor of Science Degree.

Admissions Requirements: Applicants to this degree completion program must have completed a total of 64 semester credits at the postsecondary level. The 64 transfer credits shall consist of 14 general education, 26 health science technical, and 24 related credits. Transfer credits into this program must meet the following conditions: awarded by a nationally or regionally accredited institution; grade of "C" or better; and numbered 100 and above. Transfer credits must include a math course. See additional Admissions and Transfer Credit requirements in the Prospective Students section of this catalog.

Bachelor of Science in Health Care Administration • Course Descriptions

CPT 301 Microcomputer Applications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course prepares students to utilize Windows-based applications within the Windows environment. Through a hands-on approach, students will achieve advanced application knowledge of Windows, word processing, presentation software, and spreadsheets.

Prerequisites: None

ENG 310 Technical Writing

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is the study of technical communications. Topics include conducting audience and needs analyses, organizing and writing clear, precise, and grammatically correct workplace prose, and producing a variety of routine professional reports and correspondence.

Prerequisites: None

BUS 215 Basic Accounting

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course introduces the fundamentals of financial accounting with an emphasis on the role of accounting in the monitoring of organizational operations. Also addressed are related concepts critical to decision-making, which include financial statement analysis, accounting and managerial control of cash, accounts receivable, inventory and budgeting, and the production of meaningful financial reports.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 310 Health Care Law and Compliance

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Health care law and compliance is important because of its financial and emotional impact on health care professionals, patients, and health care facilities. This content is geared toward legal and compliance issues that affect the employee and employer directly. In addition, this content gives guidance on risk management techniques, including reporting, that can help mitigate noncompliance.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

SOC 325 Culture and Human Diversity

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course explores the nature and sources of cultural differences and the impact of cultural diversity on our changing society. Students will examine characteristics of cultural systems and how they influence behavior in family, workplace, educational, and medical settings. Students will discuss the challenges and benefits of communicating in culturally sensitive ways.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

PHI 301 Critical Thinking

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course examines the components of and barriers to critical thinking. Students will examine premises and fallacies in various types of arguments. Students will evaluate components of persuasive communications.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 430 Patient Information & Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Patient information management is important because of the integral role a health care professional has within the team. It is essential for the health care professional to provide all members of the team with a thorough patient record to ensure quality patient care.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 325 Leadership in Health Care Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course presents best practices for leading health care organizations in a changing environment. Topics include strategic planning, the impact of cultural change, and employee engagement. Also addressed are skills related to internal and external assessment, facilitation, and negotiation and collaboration skills.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

BUS 210 Introduction to Marketing

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course presents basic marketing concepts, theories, and strategies. Also examined are the impacts of social factors, including demographic trends, cultural change, and changes in the political and legal environment impacting marketing decision-making.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

Bachelor of Science in Health Care Administration • Course Descriptions

MTH 311 Research Methods

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

The course will provide an overview of the important concepts of research design, data collection, and interpretative analysis. Students will gain an overview of research design, methodology and technique, format and presentation, and data management and analysis. Students will analyze research articles to determine accuracy and validity of findings, as well as their appropriateness and usefulness to the profession. Students will use information literacy concepts to develop a research proposal.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 410 Long-Term Care

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course provides a survey of the types of long-term care settings, and the purpose of and challenges presented by each. Settings include short-term and long-term skilled nursing facilities, assisted living facilities, subacute care, adult day care, and hospice. Also addressed are issues related to home health care. Students will explore administrative and management skills required by long-term care facilities today and those projected for the future.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 420 Managing Emergency Response Operations

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course provides students with an introduction to the strategic and tactical nature of decision-making and management in the volatile and complex environments created by crises and disasters encountered in domestic, regional, and international settings. Also addressed are the social, economic, and political aspects of disaster planning, preparedness, and mitigation responses.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 440 Health Care Policy

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course examines the role of governmental legislation and regulation on the provision of health care services in the United States. Also addressed are the roles of stakeholders on the financing and provision of services, and their influence on the public policy making process.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 450 Health Insurance and Reimbursement

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides students with an overview of the processes and procedures related to medical billing and insurance reimbursement in the United States. Topics include the roles and responsibilities of health care professionals in ensuring accurate and timely reimbursement for health care services and provisions of Medicare, Medicaid, and other federal and state administered payment programs. Also addressed is the impact of health care reform and government regulations on the operation and performance of the private health insurance industry and on public programs.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 460 Introduction to Public and Community Health

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides an overview of the field of public health with an emphasis on the role of public health agencies in resolving community health problems. Students will examine social, political, economic, geographic, demographic, and physiological factors affecting health care status of communities and individuals.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 470 Quality Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with a solid foundation in quality management and teamwork within the health care environment. Quality management is important to ensure the proper functioning of equipment and compliance with various standards. Health care professionals should have an understanding of the activities and their role in leading the quality management process.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 490 Professional Capstone

Total Course Hours: 75 (75 Theory, 0 Lab, 0 Extern) Semester Credits: 5.0

This capstone course focuses on the synthesis of professional knowledge and critical thinking skills in preparation for professional advancement and lifelong learning. This course provides students with an opportunity to implement research skills to formulate strategies to manage various challenges they will encounter in the health care environment. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future. Content focuses on the application of intellectual inquiry, information literacy, and the use of scholarly research methods.

Prerequisites: Semesters I, II, and III courses

Bachelor of Science in Nursing (RN to BSN)

Objective: To prepare graduates to assume roles requiring increased leadership capability and clinical responsibility in the delivery of care to individuals, families, communities, and global populations. The program is enhanced by general education credits that enable nurse generalists to expand their knowledge base, and to prepare associate degree and diploma nurse graduates for increased responsibility in an ever-evolving health care environment. Curriculum content focus areas include: theories, concepts, and principles important for development of nursing leadership and management knowledge, skills, and attitudes; evidence-based research analysis and utilization; and pertinent clinical, fiscal, legal, and political trends confronting health care and the nursing profession.

Graduates of this program receive a Bachelor of Science Degree in Nursing.

Admissions Requirements: Admission to the program requires that applicants maintain an active and unencumbered license as a registered nurse and be employed as a registered nurse. In addition, applicants must have completed a total of 70 semester credits of specific coursework at the postsecondary level. The 70 transfer credits shall consist of 42 nursing credits and 16 general education credits.

Registered nurses who have successfully completed an associate degree nursing program from a nationally or regionally accredited college or university will receive a maximum of 42 semester credits for prelicensure nursing coursework. Graduates of a recognized diploma school may be required to take additional lower division courses to meet the overall credits to graduate from the program. The following lower division courses must be transferred or completed prior to admission to the BSN program: English composition, 3 credits; biological sciences (anatomy and physiology or microbiology) 4 credits; social sciences (psychology/sociology), 5 credits; and mathematics, 3 credits. Furthermore, lower division general education courses numbered 100 or 200 may be eligible for up to 21 semester transfer credits.

Upper division general education courses numbered 300 or 400 may be eligible for up to 18 semester transfer credits, as determined through official transcript review, provided that a grade of "C" or better is achieved, that course descriptions and content are similar to that of PMI courses, and that the courses are in at least one of the following subject areas: arts or foreign language; humanities; biological, physical, and social sciences; written and oral communication; mathematics; and computer applications. See additional Admissions and Transfer Credit requirements in the Prospective Students section of this catalog.

Bachelor of Science in Nursing (RN-BSN) • Course Descriptions

CPT 301 Microcomputer Applications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course prepares students to utilize Windows-based applications within the Windows environment. Through a hands-on approach, students will achieve advanced application knowledge of Windows, word processing, presentation software, and spreadsheets.

Prerequisites: None

ENG 310 Technical Writing

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is the study of technical communications. Topics include conducting audience and needs analyses, organizing and writing clear, precise, and grammatically correct workplace prose, and producing a variety of routine professional reports and correspondence.

Prerequisites: None

REL 200 World Religions

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course will explore basic tenets of each faith in order to gain the ability to discuss each religion and its corresponding history, practice, and relationship to other faiths. This will also provide students with the framework for evaluating the culture impact of religions in our world today.

Prerequisites: None

NUR 300 Role Transition and Professional Development

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides an opportunity for the generalist nurse to broaden his/her perspective of the role of the professional nurse in health care delivery. Role differentiation of the baccalaureate prepared nurse is explored in the context of contemporary and future nursing practice. Role transition to the baccalaureate level nurse as provider, designer, coordinator, manager of care, and member of profession is examined. Students will explore the history of nursing, nursing theory, research utilization, and moral, ethical, and legal standards of conduct related to practice as a baccalaureate prepared care provider, nurse leader, and member of the nursing profession. Emphasis is placed on identification of the importance of and strategies for success as a lifelong learner.

Prerequisites or corequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

PHI 301 Critical Thinking

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course examines the components of and barriers to critical thinking. Students will examine premises and fallacies in various types of arguments. Students will evaluate components of persuasive communications.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

NUR 320 Integrated Health Assessment for the Experienced Nurse

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course facilitates use of a systematic approach to complete an integrated health assessment. It includes a focus on the biological, psychological, and sociological aspects of individuals across the life span. The purpose of this course is to broaden the learners' knowledge base, increase assessment skills, and facilitate ability to apply these skills in a clinical setting. Selection and use of appropriate assessment tools are explored. Documentation and interpretation of assessment findings is included. Aberrations in health status resulting from selected societal and environmental issues are addressed.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

NUR 380 Nursing Informatics

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course examines the history of health care informatics, current issues, basic informatics concepts, and health information management systems. This course further explores the present and potential impact of health care informatics on the discipline of nursing, the health care delivery system, and the patient, family, and community. The role of the nurse in collecting, managing, processing, and safeguarding data to assist the multidisciplinary team in making decisions and inferences based on both qualitative data and quantitative information for the care of patients, groups, communities, and populations is further examined. Legal and ethical concerns, such as patient privacy, consent, and the importance of utilizing empirical and experiential knowledge to broaden the scope of and enhance professional nursing practice are presented. The student is provided the opportunity to develop the knowledge base and skills necessary to effectively utilize information technology in a variety of areas of nursing practice to improve patient safety and work effectiveness.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

SPA 210 Spanish for the Medical Professional

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course will focus on the simple phrases, terminology, and pronunciation necessary to communicate with Spanish-speaking clients in a health care setting. Students will also examine cultural and social factors that may impact communication in a health care setting.

Prerequisites: None

MTH 311 Research Methods

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

The course will provide an overview of the important concepts of research design, data collection, and interpretative analysis. Students will gain an overview of research design, methodology and technique, format and presentation, and data management and analysis. Students will analyze research articles to determine accuracy and validity of findings, as well as their appropriateness and usefulness to the profession. Students will use information literacy concepts to develop a research proposal.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

Bachelor of Science in Nursing (RN-BSN) • Course Descriptions

NUR 425 Foundations of Evidence-Based Nursing Practice

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides a foundation for understanding evidence-based nursing practice through the use of the research process, clinical judgment, and interprofessional perspectives. Skills necessary to critically read and evaluate both qualitative and quantitative nursing research and to use the results of research in practice are developed in this course. The historical, legal, and ethical aspects of nursing research are considered. This course also focuses on the evaluation and utilization of research and other sources of knowledge necessary to address patient needs, provide quality care, implement best practices, facilitate innovations, and eliminate evidence-based practice barriers.

Prerequisites or corequisites: ENG 310 Technical Writing, CPT 301 Microcomputer Applications, and MTH 311 Research Methods; Semesters I and II NUR-designated courses

SOC 325 Culture and Human Diversity

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course explores the nature and sources of cultural differences and the impact of cultural diversity on our changing society. Students will examine characteristics of cultural systems and how they influence behavior in family, workplace, educational, and medical settings. Students will discuss the challenges and benefits of communicating in culturally sensitive ways.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

NUR 400 Transcultural Nursing Practice

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides a theoretical framework for the delivery of culturally competent nursing care. This course examines the role of the nurse in providing culturally appropriate care for increasingly diverse populations while navigating obstacles that culture can place on the patient/family experience. Through presentation of the history and theory behind cultural competence in nursing, the course offers key information regarding health beliefs and the impact of culture on both health and illness. Health care disparities, policy development, health care systems, and the role of national and global health care agencies in and along the health/illness continuum are examined.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications; Semesters I and II NUR-designated courses

NUR 440 Quality Improvement in Nursing and Health Care Organizations

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

In this course continuous quality improvement is introduced as a foundation for quality care and patient safety. Data to monitor the processes and outcomes of nursing care are discussed. Methods to design and test changes to continuously improve the quality and safety of health care are explored.

Prerequisites: ENG 310 Technical Writing, CPT 301 Microcomputer Applications, and MTH 311 Research Methods; Semesters I, II, and III NUR-designated courses

Prerequisites or corequisites: NUR 425 Foundations of Evidence-Based Nursing Practice

NUR 475 Community Oriented Nursing Practice and Global Health Issues

Total Course Hours: 75 (75 Theory, 0 Lab, 0 Extern) Semester Credits: 5.0

This course explores the demands of the dynamic health care system that require nurses to have an understanding of both community health nursing and population-focused practice. Nurses must be able to span systems of care and focus on the needs of aggregates, no matter where health care services are provided and/or needed. This course further explores population-focused decision-making, community-based strategies for health promotion and disease prevention, primary care services, and disaster prevention and planning, which are emerging issues at the forefront of health care services. The epidemiological process guides the survey of current public health issues. The course focuses on prevention, the health issues of underserved, vulnerable, or culturally diverse populations at the local, state, national, and international levels. Health care inequities are also addressed.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications; Semesters I, II, and III NUR-designated courses

NUR 480 Nursing Leadership & Health Care Management

Total Course Hours: 90 (90 Theory, 0 Lab, 0 Extern) Semester Credits: 6.0

This course provides the student an opportunity to focus on the application, synthesis, and evaluation of concepts and nursing issues studied throughout the RN to BSN program. This course examines leadership principles related to organizational culture and change including concepts of team, delegation, motivation, negotiation, and problem-solving within an organizational context. The BSN student develops skills to assist the health care organization through periods of transformation while building a culture of quality and safety. The student uses nursing research to contribute to the profession by identifying evidence-based solutions to clinical practice and administrative situations. The course facilitates a greater understanding of the role of the nurse as a member of an interdisciplinary team using communication, collaboration, technology, and resource management and provides strategies for handling challenges that arise in health care organizations to better assist nurse leaders in creating a healing environment for both consumers and health care providers.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications; Semesters I, II, and III NUR-designated courses

Bachelor of Science in Physical Therapist Assistant

Objective: To provide advanced foundational, technical, and evidence-based knowledge necessary to progress skills, enhance professionalism, and apply critical thinking beyond the associate degree level. The program follows a philosophy that an upwardly transitioning education for physical therapist assistants will better meet the needs of graduates, employers, and society.

Graduates of this program receive a Bachelor of Science Degree.

Admissions Requirements: Applicants to this degree completion program must have graduated from a physical therapist assistant (PTA) program accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE). Admission to the program requires an applicant to have completed a total of 66 semester credits of specific coursework at the postsecondary level. The 66 transfer credits shall consist of 15 general education, 39 PTA technical, and 12 related credits. Transfer credits into this program must meet the following conditions: awarded by a nationally or regionally accredited institution; grade of "C" or better; and numbered 100 and above. General education transfer credits are required to be from a broad sampling of various educational experiences, including arts & humanities, business, information systems, social sciences, or natural sciences. Licensure/certification as a PTA in a state within the United States is required prior to taking courses in semesters three and four. (Note: CAPTE does not accredit degree completion programs.) See additional Admissions and Transfer Credit requirements in the Prospective Students section of this catalog.

Bachelor of Science in Physical Therapist Assistant • Course Descriptions

ENG 310 Technical Writing

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is the study of technical communications. Topics include conducting audience and needs analyses, organizing and writing clear, precise, and grammatically correct workplace prose, and producing a variety of routine professional reports and correspondence.

Prerequisites: None

CPT 301 Microcomputer Applications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course prepares students to utilize Windows-based applications within the Windows environment. Through a hands-on approach, students will achieve advanced application knowledge of Windows, word processing, presentation software, and spreadsheets.

Prerequisites: None

CHM 300 Chemistry

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This course is an integrated study of both organic and biochemistry. Topics include elements and compounds, chemical equations, nomenclature, molecular structure, and the chemistry of proteins, carbohydrates, lipids, and other biological compounds. Students will also have the opportunity to participate in online laboratory experiments.

Prerequisites: None

SOC 325 Culture and Human Diversity

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course explores the nature and sources of cultural differences and the impact of cultural diversity on our changing society. Students will examine characteristics of cultural systems and how they influence behavior in family, workplace, educational, and medical settings. Students will discuss the challenges and benefits of communicating in culturally sensitive ways.

Prerequisites: None

BUS 220 Health Care Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course explores a wide variety of health care settings, from hospitals to nursing homes and clinics. Important issues in health care management, such as ethics, cost management, strategic planning and marketing, information technology, and human resources are explored.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

MTH 311 Research Methods

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

The course will provide an overview of the important concepts of research design, data collection, and interpretative analysis. Students will gain an overview of research design, methodology and technique, format and presentation, and data management and analysis. Students will analyze research articles to determine accuracy and validity of findings, as well as their appropriateness and usefulness to the profession. Students will use information literacy concepts to develop a research proposal.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

PTA 315 Exercise Physiology

Total Course Hours: 75 (45 Theory, 30 Lab, 0 Extern) Semester Credits: 4.0

This lecture and laboratory class examines exercise physiology through applied knowledge of the human body's physiologic responses and adaptations to acute exercise, prolonged training, and other stressors. The course reviews body systems responsible for the generation and conservation of energy necessary for varied exercise intensities. Students are required to complete various exercise protocols and physiological measurements.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

PTA 350 Evidence-based Practice for the PTA

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This class reviews the history, rationale, elements, and value of evidence-based practice in physical therapy. Emphasis is placed on intellectual inquiry and information literacy in preparation for future classes and projects. This course provides students with practical knowledge of steps in the evidence-based process and how to critically analyze results in research articles.

Prerequisites: MTH 311 Research Methods, ENG 310 Technical Writing, and CPT 301 Microcomputer Applications

PHI 301 Critical Thinking

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course examines the components of and barriers to critical thinking. Students will examine premises and fallacies in various types of arguments. Students will evaluate components of persuasive communications.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

PTA 375 Patient Communication, Motivation, and Learning

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is focused on patient communication, motivation, and teaching techniques used to support physical therapist assistants in achieving optimal treatment outcomes. Foundational topics on psychosocial aspects are examined in the context of working health care professionals and include professionalism, ethics, values, multiculturalism, and spirituality. Types of communication styles and motivational strategies are explored in relationship to patient understanding and learning.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

Bachelor of Science in Physical Therapist Assistant • Course Descriptions

PTA 415 Inpatient Care Practice

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course provides an avenue for practicing physical therapist assistants to research topics of interest related to inpatient practice including emergent, acute, subacute, neurologic, cardiopulmonary, and skilled nursing care. Additional topics comprise patient and workplace management issues. Students apply evidence-based methodology and techniques in the context of clinical problem-solving, clinical approaches, and physical therapy interventions through development of an in-service presentation.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

PTA 420 Outpatient Care Practice

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course provides practicing physical therapist assistants the opportunity to research topics of interest related to outpatient practice, including orthopedic, sport, school, geriatric, home health care, and health/wellness. Additional topics comprise new treatment concepts and outpatient management issues. Students apply evidence-based methodology and techniques in the context of clinical problem-solving, clinical approaches, and physical therapy interventions through development of an in-service presentation.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HLT 360 Pharmacology for Rehab Clinicians

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides basic knowledge of pharmacological agents and their applications in rehabilitation populations. Topics include basic principles of pharmacology, classifications of medications, and actions and effects of drugs that can have an impact upon the safe and effective delivery of rehabilitation interventions.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HLT 410 Pathophysiology

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

A rich appreciation of the characteristics and manifestations of diseases caused by alterations or injury to the structure or function of the body are essential to the health care professional. The in-depth study of pathophysiology allows the professional to communicate better with other health care professionals, including physicians and scientists, as well as with the patient, for the history and physical assessment.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

PTA 435 Clinical Kinesiology

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This class reviews the study of human movement as it relates to the practice of physical therapy. Biomechanical principles are reviewed and applied to human motion and function. Abnormal gait, posture, and movement are examined in relationship to disease or injury. The course culminates in a patient case study in which students integrate advanced kinesiology principles.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

PTA 460 Practice Specific Rehabilitation

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This class is designed to further the professional development and lifelong learning habits of physical therapist assistants by exposing them to a variety of special topics through review of current research. Specific patient populations are explored including pediatrics, geriatrics, orthopedics, women's health, wound care, neurology, and cardiopulmonary.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

PTA 490 Professional Capstone

Total Course Hours: Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course provides students with an opportunity to identify and develop research skills necessary to create a solution for an existing health care issue and also develop a professional portfolio. Content focuses on the synthesis of professional knowledge and critical thinking skills in preparation for professional advancement and lifelong learning. Course structure is designed to enhance student comprehension of information literacy concepts as well as expand student capacity for intellectual inquiry and the effective application of scholarly research methods.

Prerequisites: Semesters I, II, and III courses

Bachelor of Science in Radiologic Sciences

Objective: To prepare graduates for employment responsibilities where knowledge and skills beyond those typically attained at the associate degree level are required or preferred, with emphasis on developing professional leadership skills, applying critical thinking skills, and acquiring advanced knowledge of health care systems. General education content gives students the opportunity to explore and integrate information beyond the specific focus of their major and to build a foundation for lifelong learning. The program is based upon the core curriculum guidelines of the American Society of Radiologic Technologists (ASRT), which recognizes the baccalaureate degree as the professional level of radiologic science education.

Graduates of this program receive a Bachelor of Science Degree.

Admissions Requirements: Applicants to this degree completion program must hold an American Registry of Radiologic Technologists (ARRT) certification. Admission to the program requires an applicant to have completed a total of 70 semester credits of specific coursework at the postsecondary level consisting of 15 general education, 46 radiography technical, and 9 related credits. Transfer credits must meet the following conditions: awarded by a nationally or regionally accredited institution; grade of "C" or better; and numbered 100 and above. General education transfer credits are required to be from a broad sampling of various educational experiences, including arts & humanities, business, information systems, social sciences, or natural sciences. See additional Admissions and Transfer Credit requirements in the Prospective Students section of this catalog.

Bachelor of Science in Radiologic Sciences • Course Descriptions

ENG 310 Technical Writing

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is the study of technical communications. Topics include conducting audience and needs analyses, organizing and writing clear, precise, and grammatically correct workplace prose, and producing a variety of routine professional reports and correspondence.

Prerequisites: None

CPT 301 Microcomputer Applications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course prepares students to utilize Windows-based applications within the Windows environment. Through a hands-on approach, students will achieve advanced application knowledge of Windows, word processing, presentation software, and spreadsheets.

Prerequisites: None

BUS 220 Health Care Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course explores a wide variety of health care settings, from hospitals to nursing homes and clinics. Important issues in health care management, such as ethics, cost management, strategic planning and marketing, information technology, and human resources are explored.

Prerequisites: None

SPA 210 Spanish for the Medical Professional

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course will focus on the simple phrases, terminology, and pronunciation necessary to communicate with Spanish-speaking clients in a health care setting. Students will also examine cultural and social factors that may impact communication in a health care setting.

Prerequisites: None

HLT 330 Pharmacology

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

An exploration of pharmacology is necessary to provide the student with comprehensive knowledge concerning drugs and their applications as health care professionals. Drug regulations, types of drugs, and drug administration are included. Discussions will integrate the selection of drugs with their appropriate use and possible effects.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

PHI 301 Critical Thinking

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course examines the components of and barriers to critical thinking. Students will examine premises and fallacies in various types of arguments. Students will evaluate components of persuasive communications.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

MTH 311 Research Methods

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

The course will provide an overview of the important concepts of research design, data collection, and interpretative analysis. Students will gain an overview of research design, methodology and technique, format and presentation, and data management and analysis. Students will analyze research articles to determine accuracy and validity of findings, as well as their appropriateness and usefulness to the profession. Students will use information literacy concepts to develop a research proposal.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 310 Health Care Law & Compliance

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Health care law and compliance is important because of its financial and emotional impact on health care professionals, patients, and health care facilities. This content is geared toward legal and compliance issues that affect the employee and employer directly. In addition, this content gives guidance on risk management techniques, including reporting, that can help mitigate noncompliance.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

RA 411 Advanced Sectional Anatomy

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course provides a detailed overview of human sectional anatomy in the axial, sagittal, coronal, and oblique planes. Successful completion of this course will assist the imaging professional in understanding the physical relationship of internal structures, as well as identifying anatomy as it is commonly displayed through computed tomography (CT) and magnetic resonance imaging (MRI).

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

Bachelor of Science in Radiologic Sciences • Course Descriptions

RA 403 Advanced Modalities

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides students with an opportunity to increase their understanding of advanced imaging modalities, specifically computed tomography (CT) and magnetic resonance imaging (MRI). A wide range of topics will be explored, including the function and application of advanced imaging technologies as well as current issues and trends. The course will also explore facets of the advanced imaging environment from an administrative perspective. Successful completion of this course will enhance the student's ability to manage advanced imaging personnel and resources by providing a broad foundation of practical knowledge in the area.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

RA 350 Advanced Patient Assessment & Treatment

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

As the role of the medical imaging professional continues to expand, more knowledge is needed in all areas. Patient care is no exception. Advanced patient care skills are essential elements of providing high quality patient care. This course focuses on patient education, assessment, communication, preprocedural and postprocedural care, and proper charting and documentation. Technologists' responsibilities and intervention in cases of critical patient need will be discussed.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 430 Patient Information & Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Patient information management is important because of the integral role a health care professional has within the team. It is essential for the health care professional to provide all members of the team with a thorough patient record to ensure quality patient care.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

SOC 325 Culture and Human Diversity

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course explores the nature and sources of cultural differences and the impact of cultural diversity on our changing society. Students will examine characteristics of cultural systems and how they influence behavior in family, workplace, educational, and medical settings. Students will discuss the challenges and benefits of communicating in culturally sensitive ways.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HLT 410 Pathophysiology

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

A rich appreciation of the characteristics and manifestations of diseases caused by alterations or injury to the structure or function of the body are essential to the health care professional. The in-depth study of pathophysiology allows the professional to communicate better with other health care professionals, including physicians and scientists, as well as with the patient, for the history and physical assessment.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 470 Quality Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with a solid foundation in quality management and teamwork within the health care environment. Quality management is important to ensure the proper functioning of equipment and compliance with various standards. Health care professionals should have an understanding of the activities and their role in leading the quality management process.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

RA 490 Professional Capstone

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This is a capstone course focusing on the synthesis of professional knowledge and critical thinking skills in preparation for professional advancement and lifelong learning. This course provides students with an opportunity to identify and develop research skills necessary to create a solution for an existing health care issue. The course content is geared to increase and disseminate intellectual inquiry, information literacy, and the use of scholarly research methods.

Prerequisites: Semesters I, II, and III courses

Bachelor of Science in Respiratory Therapy

Objective: To offer the highest quality education that fosters critical thinking, encourages professional leadership and development, and inspires a strong appreciation of ethical values and cultural diversity. A respiratory therapist entering the program will acquire the skills and knowledge above what is typically attained at the associate degree level. The comprehensive curriculum promotes lifelong learning and instills within students the professional attitudes needed to become successful communicators, critical thinkers, global citizens, and conscientious leaders.

Graduates of this program receive a Bachelor of Science Degree.

Admissions Requirements: Applicants to this degree completion program must be registered respiratory therapist (RRT). Admission to the program requires that an applicant possess a high school diploma or recognized equivalency and have completed a total of 71 semester credits of specific coursework at the postsecondary level. The 71 transfer credits shall consist of 15 general education, 44 respiratory therapy technical, and 12 related credits. Transfer credits into this program must meet the following conditions: awarded by a nationally or regionally accredited institution; grade of "C" or better; and numbered 100 and above. General education transfer credits are required to be from a broad sampling of various educational experiences including arts & humanities, business, information systems, social sciences, or natural sciences. See additional Admissions and Transfer Credit requirements in the Prospective Students section of this catalog.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

RES 425 Public Health

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is an introduction to the issues in the public health arena. Topics include public health education, aging populations and their special issues, pulmonary rehabilitation, health promotion, and the current political views on health care within diverse populations.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

RES 435 Infectious Disease Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is designed for the department manager to investigate the impact and issues encountered with infectious disease. Topics include staff management in the midst of an infectious disease crisis, current issues and trends in respiratory disease, and the growing issue of drug resistant organisms.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

Bachelor of Science in Respiratory Therapy • Course Descriptions

RES 440 Home Health

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is an introduction to home health and its specific issues. Topics include discharge planning, case management, reimbursement and Medicare. Students will be introduced to outcome-based home care and disease management.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 430 Patient Information & Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Patient information management is important because of the integral role a health care professional has within the team. It is essential for the health care professional to provide all members of the team with a thorough patient record to ensure quality patient care.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

SOC 325 Culture and Human Diversity

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course explores the nature and sources of cultural differences and the impact of cultural diversity on our changing society. Students will examine characteristics of cultural systems and how they influence behavior in family, workplace, educational, and medical settings. Students will discuss the challenges and benefits of communicating in culturally sensitive ways.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HLT 410 Pathophysiology

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

A rich appreciation of the characteristics and manifestations of diseases caused by alterations or injury to the structure or function of the body are essential to the health care professional. The in-depth study of pathophysiology allows the professional to communicate better with other health care professionals, including physicians and scientists, as well as with the patient, for the history and physical assessment.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 470 Quality Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with a solid foundation in quality management and teamwork within the health care environment. Quality management is important to ensure the proper functioning of equipment and compliance with various standards. Health care professionals should have an understanding of the activities and their role in leading the quality management process.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

RES 490 Professional Capstone

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This is a capstone course focusing on the synthesis of professional knowledge and critical thinking skills in preparation for professional advancement and lifelong learning. This course provides students with an opportunity to identify and develop research skills necessary to create a solution for an existing health care issue. The course content is geared to increase and disseminate intellectual inquiry, information literacy, and the use of scholarly research methods.

Prerequisites: Semesters I, II, and III courses

Success
Story

I have been working as a respiratory therapist since 2002. In 2008, I was promoted to manager of the respiratory department at Tippah County Hospital in Ripley, MS. I loved what I was doing, but I knew I wanted to further my education by obtaining a bachelor's degree. In 2014, I came across some information about Pima Medical Institute on Facebook. I did more research, not really knowing what to expect, and found all of my college classes would transfer and I wouldn't need any prerequisites to begin the online Bachelor of Science in Respiratory Therapy (BSRT) Program. It was such an effortless process to apply and get accepted that within two days I was ready to begin my new program!

I had never taken an online class before and was quite nervous. But, I only had to take two classes at a time, and assignments were clearly laid out so they were easily accomplished. The instructors were amazing and were always very responsive to my emails with questions. I was able to continue to work full-time and be a mom to my two boys and a wife to my husband of 13 years. Seeing how proud they were of me made it all worth it.

I graduated with honors in 2016. I am the director of respiratory at my facility, and I have no plans to leave. But, should I choose to pursue something else, I know many doors will be open thanks to my BSRT degree from Pima Medical Institute.

Wendy Newby
Bachelor Degree, Respiratory Therapy, Online Education

Advanced Cardiac Life Support (ACLS)

Objective: To provide the health care provider with the advanced knowledge and skills required to respond to cardiopulmonary emergencies. The course includes information regarding airway management and related pharmacology.

Participants who successfully complete this course receive continuing education and ACLS certification.

Admissions Requirements: One-day renewal course attendees must hold current ACLS provider certification, expired less than three months. If not currently ACLS certified, two-day provider course attendees must be health care providers whose daily occupations or volunteer activities demand proficiency in the knowledge and skills of ACLS and who are authorized to perform some or all of these functions. A basic EKG class is strongly recommended prior to taking ACLS for the first time.

COURSE DESCRIPTION

EMS 80 Advanced Cardiac Life Support

Total Course Hours: 16 (8 Theory, 8 Lab, 0 Extern)

At the conclusion of this course, each participant will be able to demonstrate appropriate techniques in resuscitating the adult patient. A strong emphasis will be placed on appropriate dysrhythmia recognition and management. The American Heart Association Basic Life Support (BLS) Provider course is included with all ACLS classes.

This continuing education course is not included within PMI's grant of accreditation.

Course #	Course	Theory	Lab
EMS 80	Advanced Cardiac Life Support	8	8
ACLS Total		8	8
Course Total		8	8

Pediatric Advanced Life Support (PALS)

Objective: To provide the health care provider with the knowledge and skills required to respond to emergencies in infants and children.

Participants who successfully complete this course receive continuing education and PALS certification.

Admissions Requirements: One-day renewal course attendees must hold current PALS certification, expired less than three months. If not currently PALS certified, two-day provider course attendees must be health care providers whose daily occupations or volunteer activities demand proficiency in the knowledge and skills of PALS and who are authorized by state law to perform some or all of these functions.

COURSE DESCRIPTION

EMS 80 Advanced Cardiac Life Support

Total Course Hours: 16 (8 Theory, 8 Lab, 0 Extern)

At the conclusion of this course, each participant will be able to demonstrate appropriate techniques in resuscitating the critically injured or ill child. A strong emphasis will be placed on appropriate assessment and management of the respiratory and shock states.

This continuing education course is not included within PMI's grant of accreditation.

Course #	Course	Theory	Lab
EMS 90	Pediatric Advanced Life Support	8	8
PALS Total		8	8
Course Total		8	8

Expanded Duties Dental Assistant (EDDA)

Objective: To teach the dental assistant the expanded duties, techniques, procedures, and different applications that will prepare students for advanced dental assistant employment.

Participants who successfully complete this course receive continuing education credit.

Admissions Requirements: Successful completion of an approved dental assistant program or one year of experience as a dental assistant.

Course Description

ED 01 Expanded Duties Dental Assistant

Total Course Hours: 40 (15 Theory, 25 Lab, 0 Extern)

This course prepares dental assistants for expanded duties within the dental office. Content addresses various techniques, procedures, and applications that comprise the types of expanded duties that are performed under the supervision of a dentist.

This continuing education course is not included within PMI's grant of accreditation.

Course #	Course	Theory	Lab
ED 01	Expanded Duties Dental Assistant	15	25
EDDA Total		15	25
Course Total		15	25

Mammography

Objective: To provide the radiographer with the knowledge of patient care, image production, and procedures necessary for practice in a clinical setting prior to taking the American Registry of Radiologic Technologists (ARRT) Post Primary Mammography Certification Exam.

Participants who successfully complete this course receive a certificate of completion.

Admissions Requirements: Current enrollment in a JRCERT-accredited program for radiography, or holds current radiography certification from the American Registry of Radiologic Technologists (ARRT).

Course Description

RAD 271 Mammography

Total Course Hours: 40 (40 Theory, 0 Lab, 0 Extern) Semester Credits: 0

This course includes a review of the anatomy and physiology of the breast, an overview of breast cancer categories and other pathologies, related terminology, and the patient interview and education process. Students will view normal and pathologic mammographic images and other illustrations. Students will learn about the various mammographic positions, proper breast compression, and how to position patients with special needs. Students will also learn about equipment operation and quality assurance/quality control, and learn about various methods of breast imaging to include a focus on digital breast imaging and tomosynthesis (DBT), with review on magnetic resonance imaging (MRI), ultrasound, sentinel node mapping, and interventional procedures.

This continuing education course is not included within PMI's grant of accreditation.

Success Story

I moved to the United States from the Philippines in 2011. I worked at a bait shop and as a nursing assistant, but I was uncertain and not my best self. I wanted to do more in the medical field. I would see commercials for Pima Medical Institute; the students looked so happy, and for a long time, a goal of mine was one day attending PMI.

In 2017, I rearranged my work schedule so I could finally attend PMI. I was so thankful for the opportunity and met so many wonderful people. I faced challenges, like starting work at 6:00AM and working all day before attending evening classes. I also questioned whether I could still learn at my age. However, my instructors encouraged me, and my classmates became lifelong friends.

PMI matched me with a perfect site for my externship, and I enjoyed every minute. I applied for and was offered jobs at four different organizations; some even included sign-on bonuses. I chose Swedish Ballard Primary Care where I assist an internal doctor and nurse practitioner. After just 45 days of employment, I was given a raise and encouraged to take on additional roles. As a result, I am considering continuing my education with PMI's Online Health Care Administration Associate Degree Program in order to someday become a clinical administrator.

I am so happy, and I am able to help support my family in the Philippines. I am thankful for everyone at PMI. I would not be where I am today without their help and support.

Ruth Gacusan
Certificate, Medical Assistant, Seattle Campus

Success Story

I was an emergency medical technician (EMT) for 10 years in Pinal County, but I always wanted to become a paramedic. I was waiting for the right time and the right program. I found out about PMI's Paramedic program through my work. We have a partnership with PMI, so their classes fit with our shift schedules and allow us to work full-time and go to school. It's a grueling schedule, but it's doable. Typically, I would work a 24-hour work shift, then go directly to an 8-hour class, and then repeat that process.

The instructors were fantastic! They have experience in the field and offer a wealth of information. I was able to meet and become friends with some great people in my classes. The program was challenging, but honestly the most difficult piece for me was time management. Making time for class and my clinical hours, on top of being a father to three children—and my job, where I'm also an instructor—was the toughest part. The company I work for has a spot for me as soon as I pass my boards; moving from EMT to Paramedic also happens to come with a significant pay raise.

PMI has a great Paramedic program, and I would certainly recommend it to others, especially other seasoned EMTs like me.

Roberto Aranda III
Associate Degree, Paramedic, Mesa Campus

Prospective Students

Prospective Students

Admissions

PIMA MEDICAL INSTITUTE (PMI) does not discriminate on the basis of disability in admissions or access to, or treatment or employment in, its programs and activities. The School is committed to compliance with Section 504 of the Rehabilitation Act of 1973 and its regulations. Refer to the Reasonable Accommodations section in this catalog.

In addition to the Institutional requirements described in this section, some programs have other requirements specific to their programs, which are included in the programs' admissions materials and/or policies and procedures manuals. The admissions process for Online programs may vary. Refer to the program pages in this catalog for information.

Application Process

Steps in the application process for prospective students include:

1. Submit application form and high school verification (listed below) to the appropriate PMI campus admissions office; applicants under the legal age must have written approval of a parent or legal guardian.
2. Meet with a PMI admissions representative to discuss career interests and goals. The representative helps identify programs that are best suited to each applicant's career aspirations. For degree program applicants, an interview with the program director and/or faculty may also be required.
3. Pass required entrance exam(s).
4. Submit necessary documentation to the selected PMI campus and meet program-specific admission requirements (varies by program).
5. If applicable, submit transfer of credit documentation.

High School Verification

Proof of valid high school completion or equivalent must be submitted. Applicants must submit one or more of the following documents dependent upon campus location and/or program:

- High school diploma
- High school transcript
- General Equivalency Diploma (GED®); requires applicant to provide a copy of the GED® report, a certificate indicating successful completion of the GED®, or a verification report supporting the successful completion of the GED®. Attestation of a GED® cannot be accepted.
- An official academic transcript that shows successful completion of at least a two-year program that is acceptable for full credit toward a bachelor's degree.
- DD Form 214 Certificate of Release for Discharge from Active Duty if it indicates that the individual is a high school graduate, or equivalent.
- Attestation of graduation. For applicants to PMI certificate or degree programs in the states of California, New Mexico, Nevada, and Texas, attestation is not permitted.
- A state certificate awarded after passing an authorized test and that the state recognizes as equivalent to a high school diploma. This includes evidence of a passing score on tests recognized by the state and similar to the GED®, such as the High School Equivalency Test (HiSET®) and the Test Assessing Secondary Completion™ (TASC).

Homeschool

Applicants who have completed a secondary school education in a homeschool setting that is treated as a homeschool or private school under state law may attest to their completion of

secondary school. If the respective state issues a secondary completion credential, the applicant must submit the credential. A homeschool transcript meeting the state requirements must be submitted for all degree program applicants and for all applicants to campuses located in California, Nevada, New Mexico, and Texas.

In addition to the criteria listed above, externship sites providing externship opportunities may have a minimum age requirement. There is no guarantee that a student who is younger than 18 years of age at the time of the clinical rotation can be placed for that rotation.

Foreign Transcripts

Applicants presenting foreign transcripts must have their transcripts evaluated by an agency (NACE or AICE member) that attests to the qualitative and quantitative equivalency of the foreign education.

Language Proficiency

PMI entrance exams/admission tests, enrollment agreements, and primary instructional language are in English¹. Students are expected to speak English in the classroom and laboratory during scheduled class time and formal learning activities. PMI does not provide English-language services.

To demonstrate language proficiency, prospective students are required to take an entrance exam or provide evidence of successful completion of an associate degree or higher at an institution recognized by the US Department of Education (USDE) or Council for Higher Education Accreditation (CHEA).

For international applicants, the minimum English requirement is 65-78 on the Test of English as a Foreign Language (TOEFL®), 5.5-6.0 on the International English Language Testing System (IELTS™), or the equivalent.

PMI is authorized under federal law to enroll individuals who qualify for nonimmigrant status. Several PMI campuses in the following locations are approved through the Student and Exchange Visitor Program (SEVP) and are eligible to sponsor international student visas:

- Arizona: East Valley, Mesa, Phoenix, Tucson
- California: Chula Vista, San Marcos
- Colorado: Aurora, Colorado Springs, Denver
- Montana: Dillon
- Nevada: Las Vegas
- New Mexico: Albuquerque, Albuquerque West
- Texas: El Paso, Houston
- Washington: Renton, Seattle

Entrance Exams

Applicants must meet a minimum score for one or more entrance exams, which are designed to measure cognitive and general math abilities of prospective students.

Wonderlic Scholastic Level Exam (SLE): Applicants must meet minimum cut scores, which vary by program. Exceptions require signed authorization from the PMI Corporate Director of Education. A passing entrance exam score is good for one year from date of testing for admission consideration. For reentry/reenroll students, a passing entrance score is good for one

¹ Exception: Spanish language general education courses, such as SPA 210 Spanish for the Medical Professional, include instruction and support materials written and published in Spanish

Prospective Students

year from the last day of attendance. The exam may be waived for applicants who submit official transcripts that document completion of an associate degree or higher.

PMI Math Admissions Test: Applicants to associate degree programs and the Pharmacy Technician and Practical Nursing certificate programs must achieve minimum scores on this test.

Background Check, Drug Testing

Applicants are informed of how a criminal record may impact their ability to progress through a program, attend clinical rotations, graduate, and/or obtain employment in the field of study. As part of the enrollment process, every prospective PMI student must sign a *Criminal Background Disclosure and Advisement* form.

Depending on the program, a background check and/or drug screening may be required prior to enrollment, during progression through the program, and/or prior to externship/clinical training. A “for cause” drug or alcohol screening test may be required if impaired behavior is observed during class or while attending externship/clinical. Applicants are advised that the cost of the background check/drug screen is an out-of-pocket expense. Prospective students may contact an admissions representative and/or program director of the program of interest for more information regarding these requirements.

Vaccination Requirement

The PMI Career Services Department and/or the program director maintains a list of vaccination requirements, which is available upon request. Applicants are advised that the cost of required vaccinations and titers are an out-of-pocket expense.

Transfer Credit

Applicants may request credit for previous education and/or life experience. Determination is made after full evaluation of required documentation and completion of other relevant assessments. Application for previous education and/or life experience transfer credit must be received prior to the start of the program.

Credit for previous education: Applicants who have successfully completed equivalent coursework within a designated time frame are eligible to seek transfer credit. Applicants must submit their request for a credit transfer evaluation, with supporting documentation, to the program director or faculty coordinator prior to the start of the program. Official transcripts must be provided to award credit. Specific criteria is available from the campus admissions office (Table 1).

Transfer courses must be similar in content (with similar course objectives) to PMI courses within a program; they must also have an equal or greater number of credits. Transfer courses must also be of equivalent division level or higher. For example, if a prospective student requests transfer credits for the PMI course CCM 210 Professional Communication, then the transfer course must be a 200-level or higher course.

Courses being considered for transfer credit must be from an institution accredited by an agency recognized by USDE or CHEA. Foreign degree evaluation by an agency accredited by the National Association of Credential Evaluation Services (NACES®) or the Association of International Credential Evaluators, Inc. (AICE) is required for transfer of foreign credits.

Table 1: Transfer Credit Criteria for Previous Education

Component	Criteria
Grade	Completed with grade of “C” or higher.
Time Frame	Other than degree completion: No more than seven (7) years have elapsed since completion of previous education.
	Degree completion: Applicants must have graduated within the past five (5) years OR provide recent evidence of practice in a relevant vocation; additional requirements may apply depending on program.
Content	Similar in content and course objectives to the PMI course.
Division Level	Transfer courses must be at the same or higher division level as the PMI course.
Credits	Equal or greater number of credits when compared with the PMI course.
Accreditation	Completed at an institution recognized by USDE or CHEA.

Note: PMI does not guarantee the transfer of credits from or to any other institution.

In compliance with the US Department of Veterans Affairs (VA) policy, PMI will inquire about and maintain a written record of previous education and training, including military training, traditional college coursework and vocational training of the veteran or eligible person covered under policy 38 CFR 21.4253(d)(3). Previous transcripts will be evaluated and credit granted as appropriate.

Assessment of equivalency, additional requirements: Courses may require a higher level of proficiency. Skill competencies may be assessed to determine if the applicant’s knowledge and/or skills are within the standards of the program. Applicants may be required to pass all skill competencies required of the respective course, a written comprehensive exam prior to transfer credit approval, and/or a comprehensive skill evaluation, if applicable, prior to transfer credit approval.

Due to ongoing curricula revision, transferability of PMI courses with the same course number expires three (3) years from the course end date. PMI courses that have expired (over 3 years) may be eligible to be considered for transfer of credit.

Degree completion programs: Degree completion programs transfer credits toward completion of an associate’s or bachelor’s degree, and are intended for applicants transferring credits for courses they have successfully completed from a previous health science certificate or degree program. Bachelor degree completion programs include a concentration of general education courses and higher level technical and field-specific courses that advance the knowledge attained at the associate degree level.

Financial considerations: Students who have been granted credit for previous education will be credited the cost per credit of the course(s) transferred. A nonrefundable \$150.00 processing fee will be charged for each course transferred. Financial credit can only be applied to forthcoming PMI tuition. Transfer of credit within PMI programs is not subject to a processing fee.

PMI accepts no more than 25 percent of the program’s total credits for transfer. Applicants to degree completion programs may transfer up to 74 percent² of the total number of credits and pay a one-time processing fee of \$150. Transfer credits for these applicants and advanced placement track applicants are awarded

² Applicants to PMI’s Advanced Placement Track Radiography (APTR) program can transfer up to 49 percent of the total number of credits. APTR applicants who have a degree and have graduated from a JRCERT-approved full-scope radiography program can transfer up to 74 percent of the total number of credits.

Prospective Students

financial credit based upon the per-credit-hour fee schedule noted on the enrollment agreement.

Credit for life experience: Applicants may be eligible to receive credit for life experience. However, unlike credit awarded for previous education, financial credit is not awarded. Requests must be submitted in writing to the appropriate PMI representatives before the start of the program to which the applicant is applying. Program directors, campus directors, and/or other designated PMI personnel review requests. Evaluation criteria typically includes documentation of appropriate experiences, academic assessments, and demonstration of professional skills. A minimum score of 77 percent is required on all required assessments. Applicants must pass the professional skills based on the evaluation criteria for those skills. Transcripts will reflect the earned grade. The final decision to grant or deny credit for life experience is made by the campus director.

Transferability of credits and credentials earned at PMI: The credit measurement is equivalent to semester hours for purposes of transfer of credit. Transferability of credits earned at PMI is at the discretion of the receiving college, university, or other educational institution. Students considering transferring to any institution should not assume that credits earned in any program of study at PMI will be accepted by the receiving institution. Similarly, the ability of a degree, certificate, diploma, or other academic credential earned at PMI to satisfy an admission requirement of another institution is at the discretion of the receiving institution. Accreditation does not guarantee credentials or credits earned at PMI will be accepted by or transferred to another institution. To minimize the risk of having to repeat coursework, students should contact the receiving institution in advance for evaluation/determination of transferability of credits and/or acceptability of degrees, diplomas, or certificates earned.

Reentry/Reenrollment

Former students who withdrew or were terminated may be eligible to reenter or reenroll into the same program if they meet specified criteria. Availability to reenter/reenroll may be limited based on program capacity and the number of enrolled students. Students are eligible for reentry/reenrollment a maximum of two (2) times in the same program.

Certificate (nonterm-based) programs:

Reentry: Students who were withdrawn/terminated from a certificate (nonterm-based) program may be eligible to reenter the same program if the student's return date occurs within 180 days of the last date attendance.

Reenrollment: Students who were withdrawn/terminated from a certificate (nonterm-based) program may be eligible to reenroll in the same program if the student's return date is beyond 180 days from the last date of attendance. Returning students may need to meet additional programmatic requirements.

Degree (term-based) programs:

Reenrollment: Students who were withdrawn/terminated from a degree (term-based) program may be eligible to reenroll in the same program. Returning students who are terminated or have withdrawn maintain the right to reapply to the program provided that PMI policy requirements are met. Returning students may need to meet additional programmatic requirements.

Students who reenter or reenroll may be required to audit and/or successfully demonstrate competency in skills and knowledge learned in previously completed coursework before enrolling in courses needed for program completion.

Any balance due from a prior enrollment at PMI must be satisfied or a payment plan arranged before reentry/reenrollment will be considered. If a year or more has passed since the last date of attendance, the student must retake the entrance exam(s).

Upon reentry/reenrollment students are responsible for the cost of courses to be taken. Courses required for the completion of any program will be determined by the campus director and/or the program director. The Financial Services section of this catalog provides information about related charges for reentry and reenrollment.

Technology Requirements for Online Courses

Students enrolled in Online courses will need to meet the following technology requirements:

- Windows 7 and up
- MAC OS 10.8 and up
- 4 GB RAM
- 20 GB free disk space
- Internet access – 28.8 kbps speed or above (Broadband connection highly recommended)
- Soundcard and speakers
- Webcam

Reasonable Accommodations

PMI is committed to compliance with Section 504 of the Rehabilitation Act of 1973 and its regulations and the Americans with Disabilities Act (ADA) of 1990. PMI does not discriminate on the basis of disability in admission to, or access to, or treatment or employment in, its programs and activities. PMI has adequate hallways, doorways, classrooms, bathrooms, student lounges, and designated parking areas to accommodate disabled students. Elevators are available at campus locations with multiple floors to assist students to upper-level classrooms. Each PMI campus has a compliance coordinator who ensures Section 504 compliance. Applicants and students seeking reasonable accommodations are required to communicate the specific need by submitting the *Reasonable Accommodations* form to the campus compliance coordinator. Grievances or complaints concerning Section 504 and Americans with Disabilities Act (ADA) matters should be directed to the compliance coordinator.

Affirmative Action

In compliance with Title IX of the 1972 Education Amendments, the Equal Employment Opportunity Act of 1972, Title VII of the Civil Rights Act of 1964 as amended, and Section 504 of the Rehabilitation Act of 1973, it is the policy of PMI not to discriminate against any person on the basis of race, color, religion, creed, national origin, sex, age, marital or parental status, or disability in all of its educational and employment programs and activities, its policies, practices, and procedures. No person will be retaliated against for bringing a claim of discrimination or for advocating on behalf of someone else. To report any violations of Title IX or any discrimination laws, contact PMI Title IX Coordinator, Liby Lentz, at 40 N Swan Road, Suite 100, Tucson, AZ 85711 or TitleIXCoordinator@pmi.edu.

Current Students

Current Students

PMI faculty and staff strive to help and support students throughout their participation in their selected programs of study. Safety is a priority at all PMI campuses, and students' information is safeguarded according to guidelines set forth in laws and in PMI policies and procedures.

Personally Identifiable Information

Personally identifiable information, or PII, includes but is not limited to the student's name, any unique identifier, including social security number, and other information that alone or in combination is linked or linkable to a specific student. PMI is required by law to collect and store educator and student information and to protect the privacy of data collected, used, shared, and stored by the School.

Student education records are official and confidential documents protected by the Family Educational Rights and Privacy Act (FERPA; see FERPA section below) and other state and federal laws. With the increasing use of technology in education, it is imperative that information that identifies individual students and their families is protected from misappropriation and misuse. The information may be shared internally with educators or administrators with a legitimate educational interest, but it is otherwise unlawful for any PMI employee or other person to divulge, or make known in any way, any such personal information without the written consent of the student.

PMI may collect information concerning an individual, some of which may be linked to various third parties, in order to fulfill its duties as required by law. This information must remain confidential and may not be published in any way that would identify the individual. Unless required by local, state, or federal law, PMI will not disclose information that allows any individual to be personally identified. The Institution has steps in place to reduce the likelihood that such information is personally identifiable.

Family Educational Rights and Privacy Act (FERPA)

The Family Educational Rights and Privacy Act (FERPA) of 1974 protects the privacy of student education records. The Act defines an "eligible student" as a student who has reached 18 years of age or is attending an institution of postsecondary education. The Act defines "Parent" to mean a parent of a student and includes a natural parent, a guardian, or an individual acting as a parent in the absence of a parent or a guardian. An educational agency or institution shall give full rights under the Act to either parent, unless the agency or institution has been provided with evidence that there is a court order, State statute, or legally binding document relating to such matters as divorce, separation, or custody that specifically revokes these rights. When a student becomes an eligible student (turns 18), the rights under FERPA accorded to the parents, and consent required from the parents, transfer to the eligible student.

Under FERPA, parents and eligible students have the right to:

1. Inspect and review the student's education records within 45 days after the day Pima Medical Institute (PMI) receives a request for access. A parent or eligible student should submit to the Campus Director a written request that identifies the record(s) the parent/eligible student wishes to inspect. The School official will make arrangements for access and notify the parent/eligible student of the time and place where the records may be inspected. If the records are not maintained

by the School official to whom the request was submitted, that official shall advise the parent/eligible student of the correct official to whom the request should be addressed.

2. Request the amendment of the student's education records that the parent/eligible student believes is inaccurate, misleading, or otherwise in violation of the student's privacy rights under FERPA. A parent/eligible student who wishes to ask PMI to amend a record should write the Campus Director, clearly identify the part of the record the parent/eligible student wants changed, and specify why it should be changed. If PMI decides not to amend the record as requested, PMI will notify the parent/eligible student in writing of the decision and the parent/eligible student's right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the parent/eligible student when notified of the right to a hearing.
3. Provide written consent before PMI discloses personally identifiable information (PII) from the student's education records, except to the extent that FERPA authorizes disclosure without consent. PMI discloses education records without a parent/eligible student's prior written consent under the FERPA exception for disclosure to School officials with legitimate educational interests. A School official is a person employed by PMI in an administrative, supervisory, academic, research, or support staff position (including law enforcement unit personnel and health staff); or a student serving on an official committee, such as a disciplinary or grievance committee. A School official also may include a volunteer or contractor outside of PMI who performs an institutional service or function for which the School would otherwise use its own employees and who is under the direct control of the School with respect to the use and maintenance of PII from education records, such as an attorney, auditor, or collection agent or a student volunteering to assist another School official in performing his or her tasks. A School official typically has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibilities for PMI.
4. File a complaint with the US Department of Education concerning alleged failures by the PMI to comply with the requirements of FERPA. The name and address of the office that administers FERPA is: Family Policy Compliance Office, US Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202.

Directory Information

FERPA permits public disclosure of directory information without the parent/eligible student's consent unless the parent/eligible student has requested that directory information be withheld. Directory information is information contained in a student's education record that would not generally be considered harmful or an invasion of privacy if disclosed. PMI defines the following as directory information:

- student name
- PMI email address
- photograph
- campus
- field of study
- dates of attendance
- grade level
- enrollment status
- degrees
- honors & awards

Current Students

PMI does not publish a student directory. A student's directory information may be released to an inquirer, unless the parent/eligible student specifically requests that directory information be withheld. FERPA does not require that directory information be released. Parents/eligible students may elect to withhold directory information by completing and signing the *Request to Withhold Directory Information* form, which places the student record in a confidentiality hold status. This form is available from the Student Services Department. The signed form along with a copy of photo identification must be taken in person, mailed, or emailed to the Student Services Department on the respective campus within 10 days of the first day of class. A request to withhold directory information is in effect permanently, even if the student is no longer enrolled at PMI.

A parent's/eligible student's request for withhold of directory information does not permit the student to be anonymous in the classroom (including an online classroom) nor to impede or be excluded from classroom communication. The directory information withhold can be removed if the parent/eligible student submits a written request for removal.

Release of Nondirectory Information

Parents/eligible students may provide consent to release nondirectory information (financial and academic records) to designated third parties by completing the *FERPA Release Consent* form in the PMI Student Portal. The release remains in effect until the consent is revoked in writing and the revocation is delivered to PMI.

FERPA permits the disclosure of PII from a student's education records, without consent of the student, if the disclosure meets certain conditions found in § 99.31 of the FERPA regulations. Except for disclosures to school officials, disclosures related to some judicial orders or lawfully issued subpoenas, disclosures of directory information, and disclosures to the student, § 99.32 of FERPA regulations requires the institution to record the disclosure. Eligible students have a right to inspect and review the record of disclosures.

Student Records

Records Retention

Student records include academic transcripts, financial aid, and other documentation as required by law and/or the Institution. Academic transcripts for all courses completed and/or attempted are permanently retained by the Institution. Financial aid records are maintained for five (5) years after the end of the final award year in which the student last attended. Other documentation includes enrollment agreements, admissions documents, financial records, attendance records, externship evaluations, and placement documents, all of which are maintained for five (5) years (or longer based upon state requirements) from the fiscal year during which the student was last enrolled.

Academic Transcripts

PMI maintains a student's academic history in the form of an academic transcript, which includes the student's name, date of birth, address, campus, program, enrollment status, start date, last date attended, course numbers, course titles, credits attempted, credits earned, grades, quality points, grade point average, and degree earned (if applicable).

Official transcripts are printed on PMI transcript paper, signed by designated PMI administrators, stamped with the PMI school

seal, and sealed in an official transcript envelope. Unofficial transcripts are printed on standard white paper and do not contain signatures or PMI seal.

PMI students and graduates may request transcripts, at no cost, either by written request to the campus registrar or through the alumni link on the PMI website (<https://alumni.pmi.edu/transcript/>). Release of transcripts to graduates is contingent upon payment in full of all debt owed to the School and may require up to two weeks for delivery.

Health and Safety

PMI strives to ensure a safe learning environment for all students. PMI campuses address safety, health, and well-being with students as outlined in the PMI policies and procedures manual, catalog addenda, and relevant student handbooks. Students are advised that clinical externship sites may have additional requirements; students must meet the requirements of their assigned site(s). These requirements may include but are not limited to: additional criminal background check(s); preclinical and/or "for cause" drug, alcohol, marijuana, and/or tobacco screening; regulatory and safety learning modules; and infectious disease screenings. Any or all of these additional site-specific requirements may cause the student to incur additional costs.

Crime Awareness

PMI collects, maintains, and disseminates data regarding crimes committed on and around campus in compliance with the Crime Awareness and Campus Security Act of 1990, and the Hate Crimes Statistics Act, (The Clery Act, 34 CFR 668.46) as amended on Nov. 1, 1999. PMI publishes an annual *Campus Safety and Security Report* that includes PMI's crime awareness policies and procedures. This report is available at each campus (and <https://pmi.edu/consumerinfo#Health-and-Safety>).

Harassment, Violence, Sexual Assault

It is the practice at PMI to ensure that employees and students enjoy a learning environment that is based upon mutual respect, trust, and dignity. The administration of PMI fully supports all local, state, and federal laws governing violence and harassment and will cooperate to the fullest extent possible.

Harassment of any kind will not be tolerated and includes: actions, words, jokes, or comments based on an individual's gender, race, ethnicity, age, religion, disability, or any other protected status; actions intended to intimidate or cause fear; and any form of unwelcome behavior of a sexual nature including verbal, nonverbal, written, and physical actions.

PMI does not tolerate sexual violence in any form, including but not limited to sexual assault, rape, harassment, exploitation, intimidation, dating violence, domestic violence and/or stalking. PMI, in a good faith effort to comply with amendments to the Clery Act, as mandated by Section 304 of the "Violence Against Women Reauthorization Act of 2013," is committed to ongoing development of prevention and awareness programs, policies, and procedures.

An individual who has reason to believe that he or she is the victim of sexual or another form of harassment should immediately report the incident to his or her campus director or associate director in written form. An investigation will be initiated no later than five (5) business days and corrective action taken when warranted. No action will be taken against

Current Students

those reporting harassment, regardless of the investigation's outcome. With alleged victim's permission, the appropriate authorities will be contacted. The campus director will conduct an additional investigation following PMI procedures. Those found to be engaging in any form of harassment will be subject to termination.

Firearms, Weapons

PMI strictly prohibits the possession of firearms and weapons on all campuses. Other than police officers or military personnel on active duty, no person, including a licensee, may possess firearms anywhere on campus, whether in a building or on the grounds. This prohibition extends to School-owned and School-controlled locations, including sites leased for educational purposes. Any student, faculty, or staff member violating this policy will be sanctioned, up to and including expulsion or termination. Additionally, violations of this policy may result in criminal prosecution.

Emergency Reporting, Notification, Evacuation

PMI provides reporting, notification, evacuation, and lockdown procedures for alerting the campus community about significant emergencies or dangerous situations that involve an immediate threat to the health or safety of students or employees on the campus. Each campus has an emergency management plan that is reviewed on an annual basis.

Timely warning: PMI promotes campus safety by providing a notification procedure for alerting the campus community of a serious, ongoing, or continuous threat. In the event a situation arises, either on or off campus, that in the judgment of the campus director or emergency management leader constitutes a serious, ongoing, or continuing threat, a campuswide "timely warning" will be issued.

Safety Standards

The Occupational Safety and Health Administration (OSHA) and any other pertinent safety guidelines are followed during laboratory activities, off-campus clinical activities, and off-campus PMI activities.

Insurance

Students are informed about their responsibilities to have insurance coverage throughout their enrollment at PMI. Transportation and/or vehicle insurance includes coverage for travel to and from off campus clinical experiences. Some clinical sites require that students have medical/health coverage prior to beginning their clinical rotation.

Accident insurance applies to injuries sustained during PMI scheduled, supervised, and sponsored activities, but it excludes coverage for injury incurred while traveling to and from the school campus, externship sites, and any other school-sponsored activity. Students without private insurance may be provided a limited amount of accident insurance coverage. In the event a student is injured during a PMI scheduled, supervised, and sponsored activity, the student must report the injury to a campus representative and file/sign/submit an incident report to the campus within 24 hours of the incident. When the injured student arrives at the medical treatment facility, if the student has his or her own medical insurance coverage, he or she must provide that information to the facility for billing purposes. The school's insurance company will not pay claims for students who have any form of insurance coverage.

Pregnancy

Students are informed of the health risks and possible limitations associated with participation in a PMI program during pregnancy. Pregnant students are not required to report pregnancy to School officials. It is suggested that pregnant students seek information regarding their health or the health of the fetus relative to the demands of the course of study. Students who wish to declare their pregnancy may contact an instructor associated with their program or their program director. Alternatively, they may contact their campus's student services coordinator, associate director, or campus director.

In accordance with Title IX of the Education Amendments of 1972 and the Office of Civil Rights of the USDE requirements, the Institution provides protection to pregnant students. While the Institution does not generally grant leaves of absence for its degree students, the Institution does treat pregnancy, childbirth, false pregnancy, termination of pregnancy, and recovery from, as a justification for an exception. A leave of absence may be granted for the period of time deemed medically necessary by the student's physician, as provided in a written and signed statement from the physician. At the conclusion of the leave of absence, the student will be reinstated to the status that was held when the leave began and will not be required to submit documentation of medical release.

Informed Consent, Patients' Rights

Students are made aware of their rights and the rights of others and have signed a consent form, where applicable, regarding simulations, recording and imaging, drug screening, and/or background check. In lab courses, where applicable, students will participate as subjects or patient simulators when engaged in laboratory and clinical experiences. Students may be required to sign a laboratory participation form during orientation.

Students are informed of contraindications and precautions prior to participating in procedures. Although a student is not required to disclose personal medical information, it is the responsibility of the student to inform the instructor if he/she is unable to participate as a subject due to precautions and/or contraindications.

PMI Drug and Alcohol Policy

PMI aims to provide an environment of academic success, health, and safety for students, employees, and visitors. All PMI locations are drug-free and alcohol-free, prohibiting the consumption of alcohol or use of drugs while on campus or at an off-campus site where education is delivered, such as at an externship site or clinical education facility. The use of illicit drugs and alcohol erodes the capacity to perform, think, and act responsibly. Long-term abuse can have a profound effect on a person's health and well-being. Any form of such substance abuse is considered to create a danger in the School to both students and others. It can be grounds for termination of enrollment or employment at this Institution.

The Drug-Free Schools and Communities Act of 1989 (Public Law 101-226, 20 U.S.C. §1145g) requires institutions receiving federal funds or financial assistance to establish and enforce a program to prevent the unlawful possession, use, or distribution of illicit drugs, prescription medications, and alcohol by students and employees. The program includes a description of the health risks associated with the use of illicit drugs and alcohol, standards of conduct, sanctions under federal/state/local laws

Current Students

and campus policy, information on preventing drug and alcohol abuse, and available counseling and treatment options. (Details: <https://pmi.edu/about-pmi/drug-and-alcohol-abuse-prevention>.)

Smoking, Vaping

Smoking and vaping are prohibited in all enclosed areas within the PMI campus without exception. This includes common areas, auditoriums, classrooms, conference and meeting rooms, private offices, elevators, hallways, students and employee lounges, stairs, restrooms, and all other enclosed facilities.

Infectious Diseases

Students who have been diagnosed with a communicable disease (i.e., mumps, chicken pox, hepatitis, measles, etc.) must notify the campus director or associate director in writing and submit documentation of the illness. Students may not attend classes or externship while contagious. Students may return to class only with a physician's signed statement indicating they are no longer contagious.

Vaccinations

The PMI Career Services Department and/or the program director maintains a list of vaccination requirements, which is available upon request.

Student Conduct

Students are expected to follow applicable policies and procedures in all academic settings, including clinical externships. Students who violate policies, procedures, interfere with the progress of other students, or engage in any form of dishonesty, upon proof, are subject to termination. Policy violations are directed to campus administration for disciplinary action. Students who have been terminated due to policy violations may appeal under the provisions in the grievance procedure outlined in this catalog. Refunds made to students who have been terminated are subject to the terms of the enrollment agreement. Several student conduct policies are outlined below.

Dress Code, Professionalism

PMI has a universal dress code and professionalism policy. These requirements apply to all students while in attendance at School, extern sites/clinical settings, volunteer activities, and PMI-affiliated field trips. The policy addresses numerous aspects that comprise professionalism, such as uniforms, identification badges, and personal hygiene, among others.

Academic Integrity

PMI enforces standards of honesty and integrity in all academic-related work and does not tolerate plagiarism, intentional misrepresentation, or misconduct.

Classrooms, Laboratories, Student Areas

Classrooms and laboratories are to be kept clean and neat. Students are provided with a lounge for use outside assigned class sessions. It is each student's responsibility to assist in maintaining the orderly appearance of these areas. The student lounge should be free of all student materials upon departure. Food and chewing gum are prohibited in classrooms. Water is allowed in the classroom in a sealed container unless otherwise noted by the instructor. Other beverages, food, and chewing gum are prohibited in laboratories, computer labs, and libraries.

Equipment, Supplies

PMI provides various equipment and supplies for student use. Equipment/supplies must be used in accordance with prescribed procedures. Under no circumstances are students to use equipment/supplies during or outside of classroom hours without instructor supervision. Equipment should be turned off and covered when not in use. Problems encountered when using equipment must be reported immediately to the instructor.

Copyright Infringement, Computer Use/Sharing

Copyright infringement is the act of exercising, without permission or legal authority, one or more of the exclusive rights granted to the copyright owner under section 106 of the Copyright Act (Title 17 of the United States Code). These rights include the right to reproduce or distribute a copyrighted work. In the file-sharing context, downloading or uploading substantial parts of a copyrighted work, without authority or permission, constitutes an infringement.

Penalties for copyright infringement include civil and criminal penalties. In general, anyone found liable for civil copyright infringement may be ordered to pay either actual damages or "statutory" damages affixed at not less than \$750 and not more than \$30,000 per work infringed. For "willful" infringement, a court may award up to \$150,000 per work infringed. A court can, in its discretion, also assess costs and attorneys' fees. For details, see Title 17, US Code, Sections 504, 505. Willful copyright infringement can also result in criminal penalties, including imprisonment of up to five years and fines of up to \$250,000 per offense.

Computing resources include all computers, related equipment, software, data, and local area networks for which the School is responsible as well as networks throughout the world to which the School provides computer access. PMI computing resources are intended to be used for its programs of instruction and research and to conduct the legitimate business of the School.

All users must have proper authorization for the use of the computing resources and are responsible for complying with all legal and ethical guidelines of PMI computing resources. Users also have a responsibility to respect the privacy, copyrights, and intellectual property rights of others, and their use of PMI computer resources must be in accordance with School policy and applicable state and federal laws. Unauthorized distribution of copyrighted material, including unauthorized peer-to-peer file sharing, may result in civil and criminal liabilities to the parties involved. Any responsible party not in compliance with copyright rules and regulations can face probation, termination and/or face sanctions in accordance with state and federal laws. (Violations are outlined on the PMI website <https://pmi.edu/pdf/consumer-information/copyright-policy-ab.aspx>.)

Social Media

Students are required to follow PMI social media standards, which outline the acceptable use of social media technologies, including any references to the School and/or School-related personnel and activities. By submitting content to any PMI social media sites, users understand and acknowledge that this information is available to the public and that the organization may choose to use this information for internal and external promotional purposes. (See <https://pmi.edu/pdf/consumer-information/pima-medical-institute-social-media-policy.aspx>.)

Current Students

Academic Standards and Expectations

PMI courses are designed to challenge students to develop skills that they will apply in their selected health fields. Students must maintain satisfactory academic progress in order to graduate.

Academic Schedule

Students are advised of academic schedules prior to enrollment. Academic programs are in session throughout the calendar year except for holidays and a two-week winter break (Table 2). The academic calendar may be altered due to holidays. PMI reserves the right to change, modify, or reschedule a program of study or class periods. These changes will not increase the cost of a program nor reduce time and/or content presented to enrolled students.

Class starts, postponements: Class starts occur at various times throughout the year; schedules are published in catalog addenda, which are available at each campus. Class postponements by the School within 30 days of the original starting date will not alter the terms and conditions of the enrollment agreement. However, class postponements by the School beyond 30 days of the original starting date will terminate the enrollment agreement with all monies paid by the student to be refunded in full.

Classroom/lab breaks, mealtimes: Breaks of 10 minutes per hour, not exceeding 40 minutes per four (4) hours, are required during scheduled class/lab time. PMI does not specify times for meals; however, students may eat meals outside of the classrooms and labs in designated areas during authorized classroom/lab breaks.

Course Assessments, Grades

Instructors may assess students' knowledge of course content through a variety of assessments, including but not limited to homework, projects, quizzes, classroom and lab activities, and examinations/tests. Students will meet course objectives with in-class and outside-of-class assignments, such as reading, papers, portfolios, and projects. These assignments are outlined in the respective course. Students are required to complete regular classroom work as well as outside assignments. The amount of time will vary by course and student ability.

Course grades are recorded as letters and percentages; PMI does not award pass/fail grades. Grades are posted in the PMI learning management system, and students can view their grades at any time during their enrollment. Final grades are posted in the PMI Student Portal. Grades for all courses completed and attempted are recorded on students' permanent transcripts according to the grading system (Table 3). Students have the right to appeal a final grade within 10 business days, after which point the grade is final.

Table 2: Holidays Observed

Month – Date	Holiday Observed
January – 3 rd Monday	Martin Luther King Jr. Day
May – last Monday	Memorial Day
July – 4 th	Independence Day
September – 1 st Monday	Labor Day
November – 4 th Thursday	Thanksgiving
November – 4 th Friday	Veterans Day observed
December/January – two weeks that include Dec 25 and Jan 1	Winter Break

Table 3: Grading Scale

Grade	Standing	Percentage*	Points
A	Excellent	93-100%	4.0
B	Good	85-92%	3.0
C	Average	77-84%	2.0
F	Failing	Below 77%	0.0
INC	Incomplete		
TR	Transfer Credit		
X	Leave of Absence		
W	Withdrawn		
T	Terminated		

* PMI's electronic student information system rounds grades to the nearest whole number, which provides a letter grade for student transcripts.

Grading scale definitions: The grading scale comprises the following grades:

A, B, C, F—These letter grades represent the student's standing and also appear as percentages. Points are used in determining the GPA (grade point average).

Incomplete (INC)—An incomplete grade is given when required coursework has not been completed by the end of the term. Coursework includes assignments and activities other than examinations. All work must be completed within two weeks from the end of the term. Failure to comply with the two-week limit results in the incomplete grade reverting to a grade of "0" (zero) for the coursework. Students should contact the instructor within the aforementioned two-week period to makeup incomplete work. An incomplete grade is not included in the calculation of the GPA but will count as hours attempted for the purpose of calculating the successful course completion percentage.

Transfer credit (TR)—Represents approved credit that has been transferred. For details, see the Transfer Credit explanation in the Prospective Students section of this catalog. Transfer credits are not included in the calculation of the GPA but will count toward credits attempted and credits earned.

Leave of absence (X)—Indicates student has taken an approved leave of absence. For details, see the Leave of Absence explanation in the Current Students section of this catalog. Leave of absence is not included in GPA or hours attempted for the purpose of calculating the successful course completion percentage.

Withdrawn (W)—Applies to courses that were not completed at the time of a student's withdrawal. The W is considered a permanent designation and remains on the student's transcript even if the student retakes the course(s). A student returning to the same program is required to repeat courses that carry a W designation, and the earned grade for repeated courses is recorded on the student's transcript. A W designation is not included in the calculation of the GPA but will count as hours attempted for the purpose of calculating the successful course completion percentage.

Terminated (T)—Indicates that a student has been terminated by the School. The T designation applies to courses that were not completed at the time of termination; it is a permanent

Current Students

designation and remains on the student's transcript even if he/she returns and retakes the course(s). A returning student is required to repeat courses that carry a T designation. The earned grade for repeated courses is also recorded on the student's transcript. The T designation is not included in GPA or hours attempted for the purpose of calculating the successful course completion percentage.

Academic Progress and Advisement

Academic advising will be provided to meet individual student needs. Students are apprised of their academic progress and are able to access grades and feedback through the PMI learning management system. Final grades will be available within the PMI Student Portal. Additionally, students receive a notification at the midpoint and end of each course.

Academic progress warning: Students in nonterm (certificate) programs who have not maintained a minimum cumulative program GPA of 2.0 in a sequence are placed on academic progress warning status. Students who achieve a cumulative program GPA of 2.0 after the end of the subsequent sequence will be removed from academic progress warning status. Students who do not achieve a cumulative program GPA of 2.0 while on academic progress warning status will be placed on unsatisfactory progress status at the end of the payment period. The student has the right to appeal the determination of not meeting satisfactory progress based upon extenuating circumstances; inability to master course material is not an extenuating circumstance. The student request should be submitted in writing to the campus director. Refer to the Satisfactory Academic Progress section (which follows).

Satisfactory Academic Progress

PMI's policy on satisfactory academic progress consists of a qualitative measure, which is the grade point average (GPA), and a quantitative measure, which is the maximum time frame in which the program must be completed.¹

To maintain satisfactory academic progress, students are required to maintain a minimum GPA and/or complete the program within one and one-half (1½) times the program length in order to maintain federal financial aid and VA education benefits. PMI will inquire about and maintain a written record of previous education and training, including military training, traditional college coursework and vocational training of the veteran or eligible person covered under policy 38 CFR 21.4253(d)(3).

Nonterm-based (certificate) program standards: Students must maintain a cumulative GPA of 2.0 in their current program and must complete their program within one and one-half (1½) times the published length of the program measured in weeks.

Unsatisfactory progress—Students in nonterm-based programs are evaluated for satisfactory academic progress at the end of each course beginning after the first payment period has been attempted. Students who have not maintained a minimum cumulative program GPA of 2.0 lose financial aid funding. Upon successful completion of previously funded credits, students regain federal financial aid eligibility for the remaining program credits.

If a student is not able to complete the program within one and one-half (1½) times the program length of the program measured in weeks, the student can continue on a cash basis within the academic limits set forth in the course-repetition policies but will no longer be eligible for financial aid.

Term-based (degree) program standards: Students must maintain a GPA of 2.0 in their current program and must complete their program within one and one-half (1½) times the published length of the program measured in credits.

Financial aid warning—Students in term-based programs are evaluated for satisfactory academic progress at the end of each term. To maintain satisfactory academic progress, students must successfully complete 67 percent of their attempted credits with a 2.0 or greater cumulative program GPA. Students who have not maintained a minimum cumulative program GPA of 2.0 and completed 67 percent of their attempted credits in a term are placed on *financial aid warning status*. Students placed on this status are still eligible for federal financial aid during this time. Students who achieve a cumulative program GPA of 2.0 and complete 67 percent of their attempted credits after the end of their subsequent term will be removed from financial aid warning status. Students who do not achieve a cumulative program GPA of 2.0 and do not complete 67 percent of the attempted credits will lose their eligibility for federal financial aid until they achieve satisfactory academic progress or a financial aid appeal has been submitted and approved.

Financial aid appeal process—The student has the right to appeal the determination of not meeting satisfactory progress based upon extenuating circumstances. The student request should be submitted in writing to the campus director within five (5) days of notification. A committee will review appeals on a case-by-case basis. Appeal approval may be granted for extenuating circumstances beyond the control of the student. Inability to master course material is not an extenuating circumstance. All decisions made by the committee are final.

Financial aid probation—If a submitted financial aid appeal is approved, students will be placed on a status of *financial aid probation* and can only receive one term of funding eligibility.

Unsatisfactory progress—If an approved financial aid appeal is not in place, the student will lose financial aid funding. The student can continue on a cash basis within the academic limits set forth in the course repetition policies but will no longer be eligible for financial aid.

If a student is not able to complete the program within one and one-half (1½) times the program length of the program measured in weeks, the student can continue on a cash basis within the academic limits set forth in the course-repetition policies but will no longer be eligible for financial aid.

Failed Course/Course Repetition

Students may repeat a failed or attempted course a maximum of two (2) additional times and then are subject to termination. Only the highest grade is considered for GPA evaluation, but all attempted credits are included for measurement of maximum time frame. Attendance in a course constitutes an attempt.

¹ *Transfer credits relative to maximum time frame:* All transfer credits will be considered when calculating maximum time frame. Maximum time frame will be limited to one and one-half (1½) times the prescribed length of coursework actually taken at PMI.

Current Students

Externship

Students must complete all classroom requirements with a cumulative GPA of 2.0 prior to beginning externship. While on externship, students are required to attend the externship full-time (typically 40 hours per week) unless otherwise noted in the appropriate catalog addendum. Some programs may have additional externship-related policies in program-specific catalog addenda and/or student handbooks.

Failed Externship/Repetition

Students may repeat a failed/attempted externship a maximum of one (1) time. Only the highest externship grade is considered for GPA evaluation. All attempted externship credits are included in the measurement of maximum time frame.

Withdrawal

A student maintains the right to withdraw from a program any time after the cancellation period. Notice of withdrawal must be made in person to the School when possible. In the event the student cannot make the request in person, the student may contact the School via phone or written correspondence.

Termination

Students terminated from a program have 60 days to appeal by following the grievance procedure outlined in this catalog. Students who do not appeal within 60 days of the date of termination forfeit further rights to appeal. Terminated students may apply for reentry/reenrollment upon the following conditions: A minimum of one grading period must elapse from the end of the grading period in which the date of termination occurred; provide a written plan detailing how the student has addressed the issues that led to the termination. Refer to Reentry/Reenrollment in the Prospective Students section of this catalog.

Attendance/Absence

Students are to notify PMI prior to class time if they are going to be absent or late unless circumstances prohibit advanced notice. Notice of prolonged absence must be made in person or by letter to the appropriate School administrator, as designated by the campus director. All absence time, including late arrivals and early departures, regardless of reason, is recorded and becomes part of the student record.

Attendance in an online course requires classroom activity such as submitting an assignment, posting to a discussion, or completing a quiz. Students are required to login to the learning management system and complete graded activities on a regular basis.

Attendance awards: Perfect attendance awards are conferred only to on-ground students who have completed all required sequence, program, and/or semester hours. Absences due to military duty and/or civic duty requirements must still be recorded as an absence in the system; however, absences that do not exceed 14 days will not impact a student's eligibility for perfect attendance awards.

Attendance advisement: Students with absences in excess of five (5) percent of the total number of classroom hours in a nonterm program (certificate program) or term program (degree program) receive attendance advisement.

Attendance warning: Students with absences of 10 percent of the total number of classroom hours in a sequence, program, or semester are placed on attendance warning.

Termination for unsatisfactory attendance: Absences in excess of 15 percent of the total sequence, program, or semester classroom hours may result in termination for unsatisfactory attendance.² Certificate program students who are accepted through the readmission process are subject to this attendance policy based on the total number of hours remaining at the point of readmission. Students absent for 14 consecutive calendar days, including weekends, from the last date of academically related activity, including externship, may be terminated.

Externship/clinical absences: Students in the following programs must makeup all externship absences prior to graduation—such absences are not deleted from the 15 percent “total program” calculation; any externship absences in excess of 15 percent³ of the scheduled clinical hours may result in termination: Advanced Placement Track Radiography, Dental Assistant, Dental Assistant (California campuses), Medical Administrative Assistant, Medical Assistant, Medical Billing and Coding, Nursing Assistant/Nurse Aide, Patient Care Technician, Pharmacy Technician, Phlebotomy Technician, Practical Nursing, Sterile Processing Technician, and Veterinary Assistant.

Degree program externship/clinical absence: Degree students are expected to earn the total number of clinic hours published for the program; however, students may be absent up to six (6.0) percent of the scheduled externship/clinical hours each term for these programs: Dental Hygiene, Diagnostic Medical Sonography, Medical Laboratory Technician, Nursing, Occupational Therapy Assistant, Ophthalmic Medical Technician, Paramedic, Physical Therapist Assistant, Radiography (excluding Advanced Placement Track–Radiography), Respiratory Therapy, Surgical Technology, and Veterinary Technician.

Absences must be requested by the student and excused by the clinical director or program director. Absences exceeding six (6.0) percent of total clinical time, as published in this catalog, must be made up prior to the start of the subsequent semester or graduation from the program, as determined by the program director. Students with excessive absences may not be able to makeup the time prior to the start of the subsequent term, which may interrupt the student's academic progress. A minimum number of clinical hours must be completed in order for students to graduate from the program; the minimum number includes the allowance set in the PMI policy. Reporting of clinic hours in the attendance logging system must accurately reflect hours attended by the student.

Examination makeup policy: Students absent on examination day are given a makeup examination on the first day they return to class or on a date assigned by the instructor. Unless otherwise specified, examinations include all written exams, lab exams, quizzes, and tests.

For degree programs, if the instructor is unavailable on the day the student returns, the program director may arrange an alternative day/time. Due to the nature of lab examinations, the retake may require a different scheduling process and will be determined by the instructor for the course.

Grades on all makeup examinations will be reduced by 10 percent from the earned score. A grade of zero is given for examinations not taken on the day of return or assigned date.

² In Nevada, VA beneficiary students will be terminated for unsatisfactory attendance under this section.

³ In Nevada, VA beneficiary students will be terminated for externship absences in excess of 15 percent of the scheduled clinical hours.

Current Students

With the proper documentation, the score reduction may be waived for students who are absent due to jury duty, military obligation, death of an immediate family member, or birth of a child. Online programs may provide additional waivers.

Leave of Absence (LOA)

Students may request a LOA for circumstances that will require a prolonged absence. Prior to granting LOA status, the School must determine if there is a reasonable expectation that the student will return from the leave. Students requesting LOA must complete a *Leave of Absence Request* form available from the campus Student Services Department.

LOA may be granted for up to a maximum of 180 days in a 12-month period. Students may request more than one LOA during a 12-month period provided the total time granted does not exceed 180 days. Time spent during an approved LOA is not considered accrued time for a course or program. When calculating the maximum time frame for a student's approved LOA, the School ensures that it accounts for all periods of nonattendance (including weekends, holidays, and scheduled breaks).

Students who do not complete the LOA request form and are not attending scheduled courses are marked absent and will be terminated if the number of absences exceeds 14 consecutive calendar days (including weekends, holidays, and scheduled breaks).

Degree (term-based) programs: Students in degree programs may be granted an administrative leave for an interruption in the academic schedule. Eligibility for this type of leave requires that the student must have recorded attendance in the current term, but due to an interruption in the academic schedule, additional required courses are not available within the current term.

State/jurisdiction exceptions: In Texas, leaves of absence are not permitted for programs and seminars of 40 hours or less. In programs and seminars of 200 hours or less, no more than two (2) leaves of absence are permitted in a 12-month calendar period; a leave of absence in this case may be no more than 30 total calendar days. In programs and seminars of more than 200 hours but less than 600 hours, no more than two (2) leaves of absence are permitted; a leave of absence in this case may be no more than 60 total calendar days.

Graduation Requirements

Students are awarded a certificate or degree when they have successfully completed the program of study with a minimum grade average of 77 percent in each course, completed an exit interview with Financial Services and Career Services personnel, and have paid in full all debt owed to the School. Graduation date is recorded as the last date of attendance, not the exit interview date or the date of the graduation ceremony. PMI awards the *honors distinction* at graduation to those students completing a certificate or degree with a 3.75 GPA and a passing grade of all courses attempted, including externship and clinicals. Some programs may have additional graduation-related policies in their programmatic student handbooks.

Campus and Online Resources

Various resources are available to PMI students and graduates.

Career Services Department

The Career Services Department at each campus is responsible for assisting students with professional development throughout their program as well as providing graduates with job placement assistance in their field of study upon completion of their program. The Career Services Professional Workshop Series topics includes résumé, cover letter, portfolio building, workplace professionalism, and interviewing techniques.

While job placement cannot be guaranteed, the Career Services Department provides PMI graduates with job placement assistance, which includes assistance with the credentialing process (if required), applications, mock interviews, and follow-ups. This department also hosts career fairs and works with employers to identify career opportunities for PMI graduates. Career placement assistance is ongoing for all PMI alumni.

Student Services Department

The Student Services Department provides guidance and support to facilitate student success. Department personnel monitor student attendance and academic progress. Resources available to students include academic advising, tutoring, and special accommodations. This department maintains referrals for off-campus housing (PMI does not offer housing or dormitories), childcare, social services, and community agencies. This department also organizes campus activities and conducts mandatory new-student orientation. Student orientation provides an overview of campus and program operations and expectations, campus safety and security, and available resources, as well as instructs students on how to utilize the PMI Student Portal, learning management system, and electronic library. Online student orientation also includes a systems check and an overview of the Online education expectations.

Financial Services Department

The Financial Services Department provides resources to address available funding sources including federal financial aid sources. Student Finance Officers guide students through the application process for funding sources and provide students with options to finance school expenses. Refer to the Financial Services section of this catalog.

Electronic Library

PMI has an extensive online/electronic library that can be accessed both on and off campus with an appropriate internet connection when logged into a PMI Blackboard course. This library affords students and instructors access to numerous journals with thousands of full-text, peer-reviewed articles and more than 100,000 books. The library includes databases of journals and books; EBSCO and ProQuest provide access to full-text journal articles, while ProQuest Ebook Central™ provides access to ebooks.

Current Students

Program and Campus Transfer

Students may be eligible to transfer between campuses and certain programs.

Program Transfer for Certificate/Nonterm Programs

Students active in a certificate/nonterm program may be permitted to transfer to a different certificate/nonterm program while remaining in an active status when the transfer is completed prior to attendance in program-specific (professional) sequences. Transfers are not permitted between certificate/nonterm programs and degree/term programs, nor are they permitted between degree/term programs.

Intercampus Transfer

Students may transfer between campuses that share the same USDE Office of Postsecondary Education identification number while remaining an active student in the same program. Students who complete the didactic portion of the program with only externship remaining are not transferred; enrollment remains with the original campus.

Grievance and Discrimination Complaint Procedure

PMI provides an avenue of due process for students (i.e., grievant) who do not agree with the Institution's determinations. Student concerns should first be addressed within the program or through student services. When a concern is not sufficiently addressed to the student's satisfaction, a formal written complaint may be initiated following the procedures outlined in this section.

Formal Written Complaints

Student grievances are recorded in writing on the appropriate campus form(s). Procedures described in this section may be used for the following types of grievances:

- a. Termination/readmission: Appeals from students who have been terminated from a program of study may appeal for readmission within 60 days of the termination date.
- b. Complaints: Complaints alleging discrimination on the basis of race, national origin, color, sex, disability, age by students, staff, or third parties. Such complaints must be filed within 30 days of the last alleged incident of discrimination.
- c. Other: Other student concerns that cannot be resolved through discussion with the instructor or program director.

Procedure

- a. The student must submit the substance of the grievance in written form to the campus director, associate director, or the PMI Title IX Coordinator, Liby Lentz, at TitleIXCoordinator@pmi.edu.
- b. An appointment will be made to meet with the campus director, associate director, or Title IX Coordinator.
- c. The campus director, associate director, or Title IX Coordinator will respond to the complaint within 10 working days of the meeting.
- d. If the grievance is still unresolved after meeting with one of the above-named individuals, the student may telephone or write the PMI Chief Executive Officer (CEO), Fred Freedman: 888-412-7462; 40 N Swan Road, Suite 100, Tucson AZ 85711. The student must submit the substance of the grievance in written form to the CEO, who will respond to the written complaint within 30 days of receipt, if possible.
- e. The CEO or designated PMI representative will conduct an

impartial investigation that will include a review of relevant documents. The student will have an opportunity to provide relevant information and evidence prior to the investigation.

- f. During or after the investigation, at the request of the complainant, PMI will consider various options to protect the complainant as appropriate, including but not limited to: a no-contact order (complainant may go to local law enforcement); health and mental services; academic support; opportunity to retake the class; withdraw without penalty.
- g. Further, PMI states that retaliation is absolutely forbidden and will discipline any person engaging in retaliatory conduct.
- h. If an actual hearing is convened at the request of the CEO, then both parties will have access to all the evidence at least 10 days before the hearing.
- i. One or both parties may be represented by a duly licensed attorney at the hearing.
- j. However, the formal rules of evidence shall not apply. Cross-examination of the parties may only be done by a party's attorney. No party to the hearing shall directly cross-examine another party.
- k. Documentation will be kept of all steps of the process by the Title IX coordinator.
- l. PMI will take all necessary steps to train the investigators, Title IX coordinator, adjudicators, etc., on the applicable laws and these procedures.
- m. Once the outcome of the complaint or grievance has been determined, written correspondence will be provided to all parties involved as assurance that corrective measures will be taken to prevent reoccurrence of a complaint related to discrimination of any kind.
- n. If the investigation determines that discrimination has occurred, corrective action will be taken, including consequences imposed on the individual found to have engaged in the discriminatory conduct, individual remedies offered or provided to the subject of the complaint, and/or staff or student training or other systemic remedies as necessary to eliminate discrimination and prevent it from reoccurring.
- o. If the complaint cannot be resolved after exhausting PMI's grievance procedure, the student may file a complaint with the appropriate state or accrediting agency listed in this catalog. Each agency has specific procedures for filing a grievance. Student is advised to contact the agency directly to ensure proper filing of concern.
- p. There shall be no conflict of interest or the appearance of a conflict of interest during any stage of the grievance process.
- q. If the investigation will take longer than 30 days, all parties will be apprised of the steps being taken.
- r. Sanctions can range from a written reprimand to expulsion from the School in the case of a student, or termination from employment in the case of an employee, depending on the nature and severity of the charges.
- s. PMI will keep the student's (i.e., accuser) identity confidential as much as possible. However, it may be necessary to release the student's name to the accused in order to fully investigate the grievance or charge.
- t. Evidence of past relationships will not be allowed as evidence in this process.

Financial Services

Financial Services

PMI participates in various federal and state student financial assistance programs, which are designed to assist students who are currently enrolled or accepted for enrollment but whose financial resources are inadequate to meet the full cost of their education. The primary responsibility for meeting the cost of education rests with individual students and/or their families. The Institution strives to assist every eligible student in obtaining financial aid.

Tuition and Fees

A registration fee is due with the signing of the student enrollment agreement and places the student on the roster of a future designated class. The tuition for any program is due on the starting date, unless a payment plan has been arranged in advance. Tuition payments are expected to be made on or before the due date. Tuition and fees are subject to change but are firm for those students already enrolled. Required textbooks may be included in the total program cost and are listed on the PMI website. A tuition price list, schedule of program beginning/ending dates, and faculty list are in the catalog addendum.

Students in term-based (degree) programs receiving a failing grade in a course or externship are charged tuition for repeating the failed course or externship. Charges are based on cost per credit noted in the most recently signed enrollment agreement. Students in nonterm-based (certificate) programs in an active status are not charged tuition for repeating a failed course or externship.

Financial Aid Sources

The majority of financial aid available to students is provided by the US government and is called Federal Student Aid (FSA), which is divided into three types: grants, work-study, and loans (details below). PMI also utilizes other sources of funding provided by the Institution or private agencies (see Other Funding section below).

Federal Student Aid Programs

As stated above, the three types of FSA are grants, work-study, and loans. All federal financial aid is awarded based on need, regardless of sex, age, race, color, religion, creed, or national origin. Need is defined as the difference between the cost of attendance (COA) and the expected family contribution (EFC). All Title IV financial aid funds received by PMI will be credited to the student's account (excluding work-study) in accordance with federal regulations.

Grants

For PMI students, options may include the Federal Pell Grant and the Federal Supplemental Educational Opportunity Grant.

Federal Pell Grant: This grant is designed to assist needy undergraduate students who desire to continue their education beyond high school. Federal Pell Grants are only awarded to undergraduate students who have not earned a bachelor degree or professional degree. Each student is entitled to apply for a Federal Pell Grant. Eligibility is determined by a student's need, COA, and amount of money appropriated by Congress to fund the program. The amount of the grant is determined by a standard formula used by the USDE. The amount of the grant available to a student will depend on the EFC, COA, and the Pell Lifetime Eligibility Used.

For many students, Federal Pell Grants provide a "foundation" of financial aid to which other aid may be added to defray the cost of college education. Students or prospective students may complete a Free Application for Federal Student Aid (FAFSA) to participate in the Federal Pell Grant program. The form is available through the PMI Financial Services Department, from a high school counselor, or by visiting <https://studentaid.ed.gov/sa/fafsa>. The application is transmitted electronically through the FAFSA Central Processing System (CPS), which determines the applicant's EFC.

Federal Supplemental Educational Opportunity Grant (FSEOG): Undergraduate students with the lowest EFC and who will also receive Federal Pell Grants for the award year have primary consideration for an FSEOG award. The amount of the grant and the number of students who may receive this grant depends on the availability of funds from the USDE.

Federal Work-Study Program

The Federal Work-Study Program (FWS) provides part-time employment to students who need the earnings to defray the cost of their education. Students may work on or off campus for a qualified public, private, or community service organization. Application for FWS may be made through the PMI Financial Services Department. Eligibility is based on financial need and availability of funds. PMI will attempt to place students in jobs related to their program of study, and work schedules will be arranged according to class schedules. The amount of the award and the number of students who may receive this award depends on the availability of funds from the USDE.

Federal Loan Programs

The USDE's federal student loan program is the William D. Ford Federal Loan (Direct Loan) Program. Federal loans include Direct Subsidized Loans, Direct Unsubsidized Loans, and PLUS Loans.¹

Direct Subsidized Loans: These low-interest loans are available to undergraduate students with financial need; the borrowed amount may not exceed the financial need. The USDE pays the interest on these loans while the student is in school at least half-time, for the first six months after the last date of attendance (i.e., the grace period) and during a period of deferment. Deferments after the student drops below half-time status are not automatic, and the student must contact the lender concerning his/her loan. Applications and deferment information can be obtained from the PMI Financial Services Department or from the lender.

If the student is a dependent undergraduate student, he/she may borrow up to the following:

- \$5,500 if student is a first-year student enrolled in a program of study that is at least a full academic year² (at least \$2,000 of this amount must be in unsubsidized loans)
- \$6,500 if student has completed the first year of study and the remainder of his/her program is at least a full academic year (at least \$2,000 of this amount must be unsubsidized loans)
- \$7,500 a year if student has completed two years of study and the remainder of his/her program is at least a full academic year (at least \$2,000 of this amount must be in unsubsidized loans)

¹ Direct subsidized and direct unsubsidized loans are also referred to as Stafford Loans or Direct Stafford Loans.

² An academic year is defined as a minimum of 24 credits and 30 weeks in length. The VA defines an academic year as the period from August 1 to July 31.

Financial Services

For periods of undergraduate study that are less than an academic year, the amounts the student can borrow will be less than those previously listed. Students may ask the PMI Financial Services Department for specific details. The aggregate loan limit for a dependent undergraduate student is \$31,000 (no more than \$23,000 of this amount may be subsidized loans).

If the student is an independent student or a dependent undergraduate student whose parents are unable to qualify for a PLUS Loan, he/she may borrow up to the following:

- \$9,500 if the student is a first-year student enrolled in a program of study that is at least a full academic year (at least \$6,000 of this amount must be in unsubsidized loans)
- \$10,500 if the student has completed the first year of study and the remainder of his/her program is at least a full academic year (at least \$6,000 of this amount must be in unsubsidized loans)
- \$12,500 a year if the student has completed two years of study and the remainder of his/her program is at least a full academic year (at least \$7,000 of this amount must be in unsubsidized loans)
- \$20,500 unsubsidized loan per academic year for students enrolled in a master's degree program

For periods of undergraduate study that are less than an academic year, the amounts the student can borrow will be less than those previously listed. The PMI Financial Services Department can provide specific details. The aggregate loan limit for an independent undergraduate student is \$57,500. (No more than \$23,000 of this amount may be subsidized loans.)

Interest rates and fees—Interest rate changes from year to year apply to Direct Subsidized Loans first disbursed on or after July 1 of each year through June 30 of the next year. For more information on prior and current interest rates, see: <http://studentaid.ed.gov/types/loans/interest-rates>. In addition, Direct Subsidized Loans have a loan fee assessed that the borrower is responsible to repay. For more information on prior/current loan fees, see: <http://studentaid.ed.gov/types/loans/interest-rates>.

Interest rate cap for military members—The interest rate on a borrower's loan may be changed to six (6) percent during the borrower's active duty military service. Borrower must contact the creditor (loan holder) in writing to request the interest rate adjustment and provide a copy of the borrower's military orders.

Direct Unsubsidized Loans: These loans are available to eligible students, regardless of family income, who do not qualify in whole or in part for Direct Subsidized Loans. The loan is not awarded based on need; the term "unsubsidized" means that interest is not paid for the student. The student may make monthly or quarterly interest payments to the lender or allow the accrued interest to capitalize.

The terms of these loans are the same as those for a Direct Subsidized Loan with the following exceptions:

- Federal government does not pay interest on student's behalf.
- Student must pay all interest that accrues on the loan during enrollment and the grace period. The student may make monthly or quarterly interest payments to the lender or allow the accrued interest to capitalize.

Federal PLUS Loans: These loans are available to parents of dependent students to help pay for the educational expenses of the student. Parents of dependent students include the biological or adoptive parent(s). The PLUS Loan is also available to stepparents if their income and assets are taken into consideration when calculating the student's EFC.

PLUS Loans are not based on need; however, when combined with other resources, the loan cannot exceed the student's cost of education. Parents may borrow up to the COA minus other aid per eligible dependent student. The interest rate is variable and is set on July 1 of each year. A loan fee will be deducted proportionately each time a loan disbursement is made. For more information on loan fees, see: <http://studentaid.ed.gov/types/loans/interest-rates>.

Repayment of a PLUS Loan begins within 60 days of the final disbursement unless the parent qualifies for and is granted a deferment by the lender. There is no grace period on these loans. Interest begins to accumulate at the time the first disbursement is made, and parents will begin repaying both the principal and interest while the student is in school. Although the minimum payment amount is \$50.00 per month with at least five (5) years but no more than 10 years of repayment, the actual payment and schedule is determined by the amount borrowed. Applications can be obtained from PMI's Financial Services Department or from the lender. For deferment information, contact the PMI Financial Services Department.

Loan Advisement: The USDE requires that any student receiving a Direct Loan be notified concerning his/her loan. PMI advises each student regarding loan indebtedness and gives first-time borrowers an entrance test and all students an exit interview regarding the loan to make sure the student understands the amount borrowed and the student's rights and responsibilities regarding repayment.

The student should report to the PMI Financial Services Department prior to withdrawal or graduation for loan advising. The purpose of this session is to inform the student of his/her tentative total loans received while in attendance at PMI and refunds that may be made. The session also provides the student with an estimated payment schedule. Students who have received federal loans at PMI will be sent an email upon withdrawal or graduation containing the link to the National Student Loan Data System (NSLDS) exit-counseling website.

FSA Eligibility, Application, and Borrower Policies

Most of the information dissemination activities required by the USDE have been satisfied within this catalog. However, PMI Student Financial Services personnel are available, in accordance with federal regulations, to discuss consumer information in more detail with prospective and current students.

Eligibility

To be eligible for federal student aid, a student must:

1. Be enrolled as a regular student in an eligible program of study on at least a half-time basis (with the exception of Pell, FSEOG, and FWS);
2. Have a high school diploma or the equivalent;
3. Be a US citizen or national or an eligible noncitizen; verification of eligible noncitizen status may be required;
4. Have financial need (except for some loan programs) as determined by a need-analysis system approved by USDE;

Financial Services

5. Maintain satisfactory academic progress (refer to Satisfactory Academic Progress section in the Current Students section of this catalog);
6. Provide required documentation for the verification process and determination of dependency status;
7. Have a valid social security number;
8. Have borrowed less than the total aggregate loan limits for the Title IV financial aid programs;
9. Be registered with the Selective Service System, if required; and
10. Sign an updated Student Identity & Statement of Educational Purpose.

Application

To apply for FSA, a student must complete the Free Application for Federal Student Aid (FAFSA); see <https://studentaid.ed.gov/sa/afsa>. FAFSA is used to determine eligibility for all types of federal financial aid programs. The information provided in the completed FAFSA application is used to calculate need and helps determine eligibility. When combined with other aid and resources, a student's aid package may not exceed the COA. The PMI Financial Services Department can assist students with the completion of this form and answer related questions. Once processed, the application produces an EFC, which determines eligibility.

Federal regulations require that funds for Direct Subsidized and Direct Unsubsidized loans cannot be released nor can a Federal PLUS loan application be certified until financial aid information has been received from all colleges an applicant attended. Financial aid information is necessary even if the student did not receive any aid. PMI may obtain this information by using the financial aid information received from the NSLDS page of the student's Student Aid Report (SAR)/Institutional Student Information Record (ISIR).

Financial aid from federal programs is not guaranteed from one year to the next—students must reapply every year. Also, if students change institutions, their aid does not automatically go with them. Students should check with their new institutions to determine the correct procedures for reapplying for financial aid.

Policy and Procedures for Verification: The verification process is as follows:

1. All applicants selected by the federal CPS will be verified.
2. Selected applicants must submit required verification documents within twenty-one (21) days of notification.
3. Verification notification will be communicated to the student electronically via the PMI Student Portal upon receipt of official ISIR.
4. If the student fails to provide the required documentation within the established time frame, then the student will be treated as "cash-paying" until the documents are provided.
5. If the student does not meet the deadline and is not capable of making a cash payment at the end of the deadline, he/she will be dismissed from PMI. The student may reenter PMI only when he/she can provide the documentation.
6. The PMI Financial Services Department reserves the right to make exceptions to the above-stated policies due to extenuating circumstances on a case-by-case basis.
7. Students will be given a clear explanation of the documentation needed to satisfy the verification requirements and the process for document submission.
8. PMI will inform students in a timely manner of the

consequences of failing to complete the verification requirements and the actions PMI will take if the student does not submit the requested documentation within the time period specified by PMI.

9. Students will be informed of their responsibilities regarding the verification of application information, including PMI's deadline for completion of any actions required. This information will be communicated to the student electronically via the PMI Student Portal.
10. Students will be notified by an electronic updated award letter via the PMI Student Portal if the results of verification change the student's scheduled award.
11. PMI will assist the student in correcting erroneous information and resolve all conflicting information.
12. Any suspected case of fraud will be reported to the (regional) Office of the Inspector General (OIG) or, if more appropriate, to a state or local law enforcement agency having jurisdiction to investigate the matter. Referrals to state or local agencies will be reported on an annual basis to the OIG.
13. No interim disbursements of Title IV aid will be made prior to the completion of verification.
14. PMI will apply a \$25.00 tolerance policy to data elements required for verification.

Borrower Rights and Responsibilities

When a student takes on a student loan, he/she has certain rights and responsibilities. Before the first loan disbursement, the borrower has the right to receive the following information:

1. The full amount of the loan;
2. The interest rate;
3. When the student must start repaying the loan;
4. The effect borrowing will have on the student's eligibility for other types of financial aid;
5. A complete list of any charges the student must pay (loan fees) and information on how those charges are collected;
6. The yearly and total amounts the student can borrow;
7. The maximum repayment periods and the minimum repayment amount;
8. An explanation of default and its consequences;
9. An explanation of available options for consolidating or refinancing the student loan; and
10. A statement that the student can prepay the loan at any time without penalty.

Before leaving the School, the borrower has the right to receive the following information:

1. The amount of the student's total debt (principal and estimated interest), what the student's interest rate is, and the total interest charges on the loan(s);
2. A loan repayment schedule that lets the student know when his/her first payment is due, the number and frequency of payments, and the amount of each payment;
3. If the student has a Federal Direct Loan, the name of the lender or agency that holds the student's loan(s), where to send the student's payments, and where to write or call if the student has questions;
4. The fees the student should expect during the repayment period, such as late charges and collection or litigation costs if delinquent or in default;
5. An explanation of available options for consolidating or refinancing the student's loan; and
6. A statement that the student can repay his/her loan without penalty at any time.

Financial Services

The borrower has the following responsibilities:

1. Understand that by signing the promissory note the borrower is agreeing to repay the loan according to the terms of the note;
2. Make payments on the loan even if the borrower does not receive a bill or repayment notice;
3. If the borrower applies for a deferment or forbearance, he/she must still continue to make payments until notification that the request has been granted;
4. Notify the appropriate representative (institution, agency, or lender) that manages the loan when the student graduates, withdraws from college, or drops below half-time status; changes his/her name, address, or social security number; or transfers to another institution; and
5. Receive entrance advising before being given the first loan disbursement and to receive exit advising before leaving the School.

In addition, students must meet the standards for satisfactory academic progress in order to remain eligible to continue receiving financial assistance, as well as to remain eligible to continue as a student of PMI. Refer to the Satisfactory Academic Progress information in the Current Students section of this catalog. A graduate's financial aid repayment commencement is determined by their last date of attendance.

Other Funding Sources

Alternative Source Loans

Alternative source loans enable the student to contribute to his/her education while in school. It is PMI's practice to exhaust all federal funding options that offer no repayment or low-interest repayment options before reviewing alternative source loans with students. Students utilizing alternative source loans will be encouraged to utilize the alternative source with the lowest interest and fees and the most equitable repayment options available to them; however, the final selection ultimately resides with the student and/or student's parent or legal guardian. PMI has no preferred lender relationships.

Veterans Education Benefits

PMI is approved to offer designated programs for veterans training. Applications for veterans benefits may be picked up at PMI or by contacting the VA. Approval of training benefits to be awarded is the responsibility of the VA. All students applying for veterans education benefits through PMI must supply verification of high school graduation or GED certificate. All former postsecondary education from an accredited institution must be verified with official college transcripts.

PMI Alumni Scholarship

In addition to federal aid, PMI graduates may qualify for the PMI Alumni Scholarship to continue their education in a PMI program. Details of this scholarship award are available through the PMI Financial Services Department.

Refund and Return Policies

An applicant who fails to meet the enrollment requirements is entitled to a refund of all monies paid. All monies paid by an applicant are refunded, minus a cancellation charge of \$100.00 if the applicant cancels enrollment within three (3) days (five [5] days in Washington) after signing an enrollment agreement and making an initial payment but prior to the start of classes.

Withdrawal/Termination Refund Policy

Students who withdraw or are terminated from a course or program of study are charged according to the settlement policy on the enrollment agreement. If a student withdraws, then his or her financial aid is terminated. If a student reenrolls, the length of the program may be extended. The student will receive notification of the refund of any loan, which will include the date that the refund was made. When any of the following occurs, the effective withdrawal date, also known as the date of determination, for the student shall be:

1. The date the student notifies the Institution of withdrawal, or the date of withdrawal, whichever is earlier.
2. The 14th consecutive calendar day following absences in all coursework.
3. The date when the Institution terminates the student's enrollment.

Return of Title IV Refund Policy

The PMI Financial Services Department is required by federal statute to recalculate aid eligibility for students who withdraw, drop out, or are dismissed having completed 60 percent or less of a payment period or term. Recalculations are based on the following Federal Return of Title IV funds formula:

1. The PMI Financial Services Department will calculate the percentage of the payment period that the student has completed at the time of withdrawal. The percentage of the payment period completed equals the number of calendar days completed in the payment period divided by the total number of calendar days in the payment period (any scheduled break of five consecutive days or more is excluded from this calculation). The percentage of the payment period completed represents the percentage of aid earned by the student. If the student completed more than 60 percent of the payment period, the student will have earned 100 percent of the federal financial aid for the payment period.
2. If the student completed 60 percent or less of the payment period, the PMI Financial Services Department will calculate the amount of aid earned by the student. That amount is determined by multiplying the total federal financial aid for the payment period times the percentage of aid earned by the student.
3. The amount of aid earned by the student is then compared to the total federal financial aid for the payment period.
4. If the amount of aid earned by the student is less than the amount of aid that was disbursed, the Institution is required to return the unearned portion of the funds. In some instances, the student may be required to return a portion of the funds as well. Funds returned may result in a tuition balance owed by the student.
5. If the amount of aid earned by the student is more than the amount of aid that was disbursed, the Institution may owe the student a post-withdrawal disbursement.

This calculation concerning federal financial aid is separate and distinct from the State Refund Policy, and may result in the student owing additional funds to the Institution to cover tuition charges previously paid by federal financial aid prior to the student withdrawal. If a student plans to withdraw, the student should notify the Institution. The student should meet with the PMI Financial Services Department representative to determine the amount of funds that must be returned on the student's behalf (if applicable). Refunds are then allocated in the following order:

Financial Services

1. Direct Unsubsidized Loans
2. Direct Subsidized Loans
3. Direct PLUS loans
4. Federal Pell Grant
5. Federal Supplemental Educational Opportunity Grant

Return of Military Tuition Assistance Program Funds

For students participating in the Military Tuition Assistance program, PMI will use the FSA statutory schedule to determine the amount of Military Tuition Assistance Program funds a student has earned when he or she ceases attendance based on the period the student was in attendance. The only exclusion will be for military students who are deployed during a payment period, and then the PMI Student Deployment Policy will be used. This policy states that military students and their spouses called to active duty or deployed from their home station will be allowed to withdraw from the currently enrolled term/payment period by providing a copy of military orders. Military service means service, whether voluntary or involuntary, in the US Armed Forces (including US National Guard or Reserve) on active duty, active duty for training, or full-time US National Guard duty, or order to active duty. The length of the absence (including all prior absences for military), including only the time the student actually served in the military, cannot exceed five (5) years. Students without sufficient completion of coursework will be withdrawn without grade penalty. Withdrawn courses must be repeated in their entirety. All tuition charges/payments related to the term/payment period that is interrupted will be refunded. Reentering students should contact the PMI Financial Services Department to ensure a smooth transition back to an active student status. Current tuition and policies (or policy revisions) for military students will apply to all returning students upon reentry.

PMI must return the lesser of the amount of FSA funds and Military Tuition Assistance program funds that the student does not earn or the amount of Institutional costs that the student incurred for the payment period or period of enrollment multiplied by the percentage of funds that were not earned. The student (or parent, if a federal PLUS loan) must return or repay, as appropriate, any FSA loan funds in accordance with the terms of the loan, and the remaining unearned FSA program grant (not to exceed 50 percent of the grant) as an overpayment.

State-Specific Cancellation and Refund Policies

PMI expects that most students who begin classes at the Institution will successfully complete their education. However, sometimes conditions or circumstances beyond the control of students and PMI require that students withdraw or cancel. Following are the state-specific cancellation and refund policies.

California

In California, the student has the right to cancel an enrollment agreement, without any penalty or obligation, through attendance of the first class session or the seventh calendar day after enrollment, whichever is later. The student maintains the right to withdraw from a program any time after the cancellation period and may receive a pro rata refund if the student has completed 60 percent or less of the scheduled days in the current payment period through the last day of attendance.

Notice of cancellation or withdrawal must be made in writing to the appropriate campus. For Chula Vista: Pima Medical Institute, 780 Bay Blvd. Suite 101, Chula Vista, CA 91910. For San Marcos: Pima Medical Institute, 111 Campus Way, San Marcos, CA 92078.

The effective date of termination is the date of proper mailing of student's notification or the date the written notice is hand-delivered to the school. Refunds are calculated from the last date of attendance. If the student fails to return issued materials, the student will be responsible for the cost of those materials. Uniforms that have been worn cannot be returned. Withdrawal may be effectuated by the student's written notice or by the student's conduct, including but not limited to a student's lack of attendance for 10 consecutive days or more or failure to return from a leave of absence.

California Refund Policy

A student withdrawing from class after seven (7) days will receive a prorated refund of tuition, which will be calculated as follows: If the student has completed 60 percent or less of the scheduled days in the current payment period in his or her program through the last day of attendance:

1. Deduct a nonrefundable registration fee of \$100 and the Student Tuition Recovery Fund fee if listed as due from the total tuition charge;
2. Divide this figure by the number of days in the program;
3. The quotient is the daily charge for the program;
4. The amount owed by the student for purposes of calculating a refund is derived by multiplying the total days scheduled by the daily charge for instruction;
5. The refund would be any amount in excess of the figure derived in item (4) that was paid by the student;
6. The refund amount shall be adjusted for equipment, if applicable:
 - a. The refund will be issued within 45 days of the receipt of the student's written notice of termination. If the student has completed more than 60 percent of the period of attendance for which the student was charged, the tuition is considered earned and the student will receive no refund.
 - b. The student will receive a statement reporting the amount of refund and to whom the refund was made within 10 days of the refund date.
 - c. If the student has received federal student financial aid funds, the student is entitled to a refund of monies not paid from federal student financial aid program funds.
 - d. The cancellation and refund policy applies to both on-ground and the distance-education programs.

California Tuition Recovery Fund

The State of California established the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic loss suffered by a student in an educational program at a qualifying institution, who is or was a California resident while enrolled, or was enrolled in a residency program, if the student enrolled in the institution, prepaid tuition, and suffered an economic loss. Unless relieved of the obligation to do so, the student must pay the state-imposed assessment for the STRF, or it must be paid on the student's behalf, if the student is in an educational program, who is a California resident, or is enrolled in a residency program, and prepay all or part of the student's tuition.

The student is not eligible for protection from the STRF and is not required to pay the STRF assessment, if the student is not a California resident, or is not enrolled in a residency program. It is important that the student keeps copies of the enrollment agreement, financial aid documents, receipts, or any other information that documents the amount paid to the school. Questions regarding the STRF may be directed to the Bureau

Financial Services

for Private Postsecondary Education, 2535 Capitol Oaks Drive, Suite 400, Sacramento, CA 95833, (916) 431-6959 or (888) 370-7589. To be eligible for STRF, the student must be a California resident or enrolled in a residency program, prepaid tuition, paid or deemed to have paid the STRF assessment, and suffered an economic loss as a result of any of the following:

1. The institution, a location of the institution, or an educational program offered by the institution was closed or discontinued, and the student did not choose to participate in a teach-out plan approved by the Bureau or did not complete a chosen teach-out plan approved by the Bureau.
2. The student was enrolled at an institution or a location of the institution within the 120-day period before the closure of the institution or location of the institution, or was enrolled in an educational program within the 120-day period before the program was discontinued.
3. The student was enrolled at an institution or a location of the institution more than 120 days before the closure of the institution or location of the institution, in an educational program offered by the institution as to which the Bureau determined there was a significant decline in the quality or value of the program more than 120 days before closure.
4. The institution has been ordered to pay a refund by the Bureau but has failed to do so.
5. The institution has failed to pay or reimburse loan proceeds under a federal student loan program as required by law, or has failed to pay or reimburse proceeds received by the institution in excess of tuition and other costs.
6. The student has been awarded restitution, a refund, or other monetary award by an arbitrator or court, based on a violation of this chapter by an institution or representative of an institution, but has been unable to collect the award from the institution.
7. The student sought legal counsel that resulted in the cancellation of one or more of the student's student loans and has an invoice for services rendered and evidence of the cancellation of the student loan or loans.

To qualify for STRF reimbursement, the application must be received within four (4) years from the date of the action or event that made the student eligible for recovery from STRF. A student whose loan is revived by a loan holder or debt collector after a period of noncollection may, at any time, file a written application for recovery from STRF for the debt that would have otherwise been eligible for recovery. If it has been more than four (4) years since the action or event that made the student eligible, the student must have filed a written application for recovery within the original four-year period, unless the period has been extended by another act of law. However, no claim can be paid to any student without a social security number or a taxpayer identification number.

Colorado

In Colorado, an applicant rejected by the School is entitled to a refund of all monies paid. The applicant may cancel this contract and receive a full refund of all monies paid to date if cancellation is made in writing to the campus director and postmarked/ hand-delivered to PMI at the address stated herein within three (3) business days after the date of signature. An applicant requesting cancellation more than three (3) days after signing an enrollment agreement and making an initial payment, but prior to starting classes, is entitled to a refund of all monies paid minus a cancellation charge of \$100.

If a student withdraws after commencement of classes, the School will retain a cancellation charge plus a percentage of tuition based on the percentage of contact days (see Colorado Refund Policy below). The refund is based on the last date of recorded attendance. The earned tuition percentage is based on the number of scheduled clock hours in the enrollment period divided by the total clock hours in the enrollment period. A student shall receive a full tuition refund if the School discontinues the program within a period of time a student could reasonably complete the program. This period of time shall not be any longer than 1½ times the normal duration of the program. The policy for granting credit for previous training shall not impact the refund policy.

Colorado Refund Policy

Students not accepted to the School are entitled to all monies paid. Students who cancel this contract by notifying the School within three (3) business days are entitled to a full refund of all tuition and fees paid. Students who withdraw after three (3) business days, but before commencement of classes, are entitled to a full refund of all tuition and fees paid except the cancellation charge of \$100 or 10 percent of the contract price, whichever is less.

In the case of students withdrawing after commencement of classes, the School will retain a cancellation charge plus a percentage of tuition and fees, which is based on the percentage of contact hours attended, as described in the Colorado Institutional Refund Policy tables (below). Refunds are calculated on the tuition and registration fee only. No refunds will be due on workbooks, uniforms, and supplies. Full refunds will be issued in the event courses/programs are discontinued. All refunds are based on the actual last day of attendance. Refunds will be made within 30 days of a student's withdrawal or termination date.

The official date of withdrawal or termination of a student shall be determined in the following manner: The date on which the School receives written notice of the student's intention to discontinue the training program; or the date on which the student violates published School policy, which provides for termination.

Should a student fail to return from an excused leave of absence, the effective date of termination for a student on a leave of absence is the earlier of the date the School determines the student is not returning or the day following the expected return date.

COLORADO INSTITUTIONAL REFUND POLICY: ON-GROUND PROGRAMS

A student terminating or withdrawing training:	Is entitled to a refund of:
Within first 10% of enrollment period	90% less \$100 cancellation charge
After 10% but within the first 25% of enrollment period	75% less \$100 cancellation charge
After 25% but within the first 50% of enrollment period	50% less \$100 cancellation charge
After 50% but within the first 75% of enrollment period	25% less \$100 cancellation charge
After 75% of enrollment period	no refund

Financial Services

COLORADO INSTITUTIONAL REFUND POLICY: DISTANCE EDUCATION
(refund is based on the number of lessons completed)

A student terminating or withdrawing training:	Is entitled to a refund of:
Veterinary Technician Online Lessons 1-3	90% less \$100 cancellation charge
Veterinary Technician Online Lessons 4-7	75% less \$100 cancellation charge
Veterinary Technician Online Lessons 8-15	50% less \$100 cancellation charge
Veterinary Technician Online Lessons 16-22	25% less \$100 cancellation charge
Veterinary Technician Online Lessons 23-29	NO REFUND

Arizona & Montana

Arizona & Montana Refund Policy

Refunds are calculated on tuition and registration fee only. No refunds will be due on textbooks, uniforms, and supplies. Full refunds will be issued in the event courses/programs are discontinued. Refunds for a cancellation are made within 30 days from the date of cancellation. A cancellation fee is not charged if applicant cancels the enrollment within three (3) business days of signing an enrollment agreement, but prior to starting classes.

ARIZONA & MONTANA INSTITUTIONAL REFUND POLICY

A student terminating training:	Is entitled to a refund of:
Within first 10% of enrollment period	90% less \$100 cancellation charge
After 10% but within the first 30% of the enrollment period	70% less \$100 cancellation charge
After 30% but within the first 60% of the enrollment period	40% less \$100 cancellation charge
After 60% of the enrollment period	no refund

Nevada

Nevada Refund Policy

PMI follows the Nevada Statute for refund policy:

1. If PMI has substantially failed to furnish the training program agreed upon in the enrollment agreement, PMI shall refund to a student all the money the student has paid;
2. If a student cancels his or her enrollment before the start of the training program, PMI shall refund to the student all the money the student has paid, minus: (a) 10 percent of any amount paid to retain his or her seat in the training program or \$100, whichever is less; and (b) Any amount paid as a nonrefundable deposit that was designated as nonrefundable in materials provided to potential applicants for the purpose of qualifying students for admission to the training program, including, without limitation, to perform a background investigation, obtain transcripts, evaluate the applicant or any other such activity;
3. If a student withdraws or is expelled by PMI after the start of the training program and before the completion of more than 60 percent of the program, PMI shall refund the student a pro rata amount of the tuition agreed upon in the enrollment agreement, minus 10 percent of the tuition agreed upon in the enrollment agreement or \$100, whichever is less; and
4. If a student withdraws or is expelled by PMI after completion of more than 60 percent of the training program, PMI is not required to refund the student any money and may charge the student the entire cost of the tuition agreed upon in the enrollment agreement.
5. If a refund is owed, PMI shall pay the refund to the person or entity who paid the tuition within 15 calendar days after the:
 - A. Date of cancellation by a student of his or her enrollment;
 - B. Date of termination by PMI of the enrollment of a student;
 - C. Last day of an authorized leave of absence if a student fails to return after the period of authorized absence; or

d. Last day of attendance of a student, whichever is applicable.

Books, educational supplies, or equipment for individual use are not included in the refund policy. A separate refund will be paid by PMI to the student if those items were not used by the student. Disputes must be resolved by the campus director for refunds on a case-by-case basis.

For the purposes of this section:

- The period of a student's attendance must be measured from the first day of instruction as set forth in the enrollment agreement through the student's last day of actual attendance, regardless of absences;
- The period of time for a training program is the period set forth in the enrollment agreement; and
- Tuition must be calculated using the tuition and fees set forth in the enrollment agreement and does not include books, educational supplies, or equipment that are listed separately from the tuition and fees.

Refunds will be calculated on the tuition and registration fee only. No tuition refunds will be due on workbooks, uniforms, and supplies. Full refunds will be issued in the event courses/programs are discontinued.

NEVADA INSTITUTIONAL REFUND POLICY

Withdrawal or termination during:	Percent of enrollment period charges to be retained by PMI:
First day through and including 60% of enrollment period	Pro rata % remaining + \$100 registration fee
Greater than 60% through the remainder of enrollment period	100% of tuition charges

The State of Nevada maintains an account for student indemnification, which may be used to indemnify a student or enrollee who as suffered damage as a result of: discontinuance of operation or violation by such institution of any provision of Commission on Postsecondary Education; Private Postsecondary Educational Institutions regulations. Information regarding the Account for Student Indemnification are as follows:

NRS 394.553 Account for Student Indemnification

1. The Account for Student Indemnification is hereby created in the State General Fund. The existence of the Account does not create a right in any person to receive money from the Account. The Administrator shall administer the Account in accordance with regulations adopted by the Commission.
2. Except as otherwise limited by subsection 3, the money in the Account may be used to indemnify any student or enrollee who has suffered damage as a result of:
 - (a) The discontinuance of operation of a postsecondary educational institution licensed in this state; or
 - (b) The violation by such an institution of any provision of NRS 394.383 to 394.560, inclusive, or the regulations adopted pursuant thereto.
3. If a student or enrollee is entitled to indemnification from a surety bond pursuant to NRS 394.480, the bond must be used to indemnify the student or enrollee before any money in the Account may be used for indemnification.
4. In addition to the expenditures made for indemnification pursuant to subsection 2, the Administrator may use the money in the Account to pay extraordinary expenses incurred to investigate claims for indemnification or resulting from the discontinuance of the operation of a postsecondary

Financial Services

educational institution licensed in this state. Money expended pursuant to this subsection must not exceed, for each institution for which indemnification is made, 15 percent of the total amount expended for indemnification pursuant to subsection 2 or \$10,000, whichever is less.

5. No expenditure may be made from the Account if the expenditure would cause the balance in the Account to fall below \$10,000.
6. Interest and income earned on the money in the Account, after deducting any applicable charges, must be credited to the Account.
7. The money in the Account does not lapse to the State General Fund at the end of any fiscal year. <https://www.leg.state.nv.us/NRS/NRS-394.html>

New Mexico

New Mexico Refund Policy

1. Cooling-off period: Any student signing an enrollment agreement or making an initial deposit or payment toward tuition and fees of the institution shall be entitled to a cooling-off period of at least three (3) work days from the date of agreement or payment or from the date that the student first visits the institution, whichever is later. During the cooling-off period, the agreement can be withdrawn and all payments shall be refunded. Evidence of personal appearance at the institution or deposit of a written statement of withdrawal for delivery by mail or other means shall be deemed as meeting the terms of the cooling-off period.
2. Refunds prior to commencing instruction: Following the cooling-off period but prior to the beginning of instruction, a student may withdraw from enrollment, effective upon personal appearance at the institution or deposit of a written statement of withdrawal for delivery by mail or other means, and the institution shall be entitled to retain no more than \$100 or five (5) percent in tuition or fees, whichever is less, as registration charges.
3. Nontraditional instruction: In the case of students enrolling for nontraditional instruction, a student may withdraw from enrollment following the cooling-off period, prior to submission by the student of any lesson materials and effective upon deposit of a written statement of withdrawal for delivery by mail or other means, and the institution shall be entitled to retain no more than \$100 or five (5) percent in tuition or fees, whichever is less, as registration charges or an alternative amount that the institution can demonstrate to have been expended in preparation for that particular student's enrollment. Upon request by a student or by the department, the institution shall provide an accounting for such amounts retained under this standard within five (5) business days.
4. Refunds following commencement of instruction: An institution licensed by the department shall adhere to either the following tuition refund schedule or to a schedule established by the institution's accrediting body and recognized by the USDE. Exceptions may be made on a case-by-case basis by the department or its designee.

A student may withdraw after beginning instruction or submitting lesson materials, effective upon appearance at the institution or deposit of a written statement of withdrawal for delivery by mail or other means. In accordance with the USDE guidelines, the institution shall be entitled to retain, as registration charges, no more than \$100 or five (5) percent of tuition and fees, whichever is less. Additionally, institutions

are eligible to retain tuition and fees earned and state gross receipts taxes at a pro rata amount as shown in this table, as outlined by USDE:

Date of student withdrawal as a percent of enrollment period for which the student was obligated*	Portion of tuition & fees obligated and paid that are eligible to be retained by the institution
On 1st class day	0%
After 1st day; within 10%	10%
After 10%; within 25%	25%
After 25%; within 50%	50%
50% or thereafter	100%

*Note: Enrollment period for which the student was "obligated" means a quarter, semester, or other term of instruction followed by the institution that the student has begun and for which the student has agreed to pay tuition.

- a. Tuition/fee refunds must be made within 30 calendar days of the institution receiving written notice of a student's withdrawal or of the institution terminating enrollment of the student, whichever is earlier.
- b. Upon request by a student or the Department, the institution shall provide an accounting for such amounts retained under this standard within five (5) business days.
- c. The institution's payment and refund policies shall be clearly articulated in the institution's catalog and as part of all enrollment agreements.
- d. Tuition and fee charges shall be the same for all students admitted to a given program for a given term of instruction. An institution may not discount its tuition and fees charged to individual students as an incentive to quick enrollment or early payment. An institution may negotiate special rates with business, industrial, governmental, or similar groups for group training programs and may establish special rates for students who transfer between programs. An institution may charge a reasonable carrying fee associated with deferred or time payment plans.
- e. In the case of vocational/technical/occupational programs, an institution shall be able to demonstrate that its tuition and fees for completing each program are reasonable in relation to the earnings that a graduate or completer of the program can be reasonably expected to earn.

Texas

In Texas and in accordance with the Texas Education Code, Section 132.061(f) a student who is obligated for the full tuition may request a grade of "incomplete" if the student withdraws for an appropriate reason unrelated to the student's academic status. A student receiving a grade of incomplete to reenroll in the program during the 12-month period following the date the student withdraws and complete those incomplete subjects without payment of additional tuition. (Title 40, Texas Administrative Code, Section 807.241-245).

Texas Cancellation Policy

A full refund will be made to any student who cancels the enrollment contract within 72 hours (until midnight of the third day excluding Saturdays, Sundays, and legal holidays) after the enrollment contract is signed. A full refund will also be made to any student who cancels enrollment within the student's first three scheduled class days, except that the school may retain not more than \$100 in any administrative fees charged, as well as items of extra expense that are necessary for the portion of the program attended and stated separately on the enrollment agreement.

Financial Services

Texas Refund Policy

1. Refund computations will be based on scheduled course time of class attendance through the last date of attendance. Leaves of absence, suspensions, and school holidays will not be counted as part of the scheduled class attendance.
2. The effective date of termination for refund purposes will be the earliest of the following:
 - a. The last day of attendance, if the student is terminated by the school;
 - b. The date of receipt of written notice from the student; or
 - c. Ten school days following the last date of attendance.
3. If tuition and fees are collected in advance of entrance, and if after expiration of the 72 hour cancellation privilege the student does not enter school, not more than \$100 in any administrative fees charged shall be retained by the school for the entire residence program or synchronous distance education course.
4. If a student enters a residence or synchronous distance education program and withdraws or is otherwise terminated after the cancellation period, the school or college may retain not more than \$100 in any administrative fees charged for the entire program. The minimum refund of the remaining tuition and fees will be the pro rata portion of tuition, fees, and other charges that the number of hours remaining in the portion of the course or program for which the student has been charged after the effective date of termination bears to the total number of hours in the portion of the course or program for which the student has been charged, except that a student may not collect a refund if the student has completed 75 percent or more of the total number of hours in the portion of the program for which the student has been charged on the effective date of termination. More simply, the refund is based on the precise number of course time hours the student has paid for, but not yet used, at the point of termination, up to the 75 percent completion mark, after which no refund is due. Form CSC-1040R provides the precise calculation.
5. Refunds for items of extra expense to the student, such as books, tools, or other supplies are to be handled separately from refund of tuition and other academic fees. The student will not be required to purchase instructional supplies, books, and tools until such time as these materials are required. Once these materials are purchased, no refund will be made. For full refunds, the school can withhold costs for these types of items from the refund as long as they were necessary for the portion of the program attended and separately stated in the enrollment agreement. Any such items not required for the portion of the program attended must be included in the refund.
6. A student who withdraws for a reason unrelated to the student's academic status after the 75 percent completion mark and requests a grade at the time of withdrawal shall be given a grade of "incomplete" and permitted to reenroll in the course or program during the 12-month period following the date the student withdrew without payment of additional tuition for that portion of the course or program.
7. A full refund of all tuition and fees is due and refundable in each of the following cases:
 - a. An enrollee is not accepted by the school;
 - b. If the course of instruction is discontinued by the school and this prevents the student from completing the course; or
 - c. If the student's enrollment was procured as a result of any misrepresentation in advertising, promotional

materials of the school, or representations by the owner or representatives of the school.

A full or partial refund may also be due in other circumstances of program deficiencies or violations of requirements for career schools and colleges.

8. A student of the school or college who withdraws from the school or college as a result of the student being called to active duty in a military service of the United States or the Texas National Guard may elect one of the following options for each program in which the student is enrolled:
 - a. If tuition and fees are collected in advance of the withdrawal, a pro rata refund of any tuition, fees, or other charges paid by the student for the program and a cancellation of any unpaid tuition, fees, or other charges owed by the student for the portion of the program the student does not complete following withdrawal;
 - b. A grade of incomplete with the designation "withdrawn-military" for the courses in the program, other than courses for which the student has previously received a grade on the student's transcript, and the right to reenroll in the program, or a substantially equivalent program if that program is no longer available, not later than the first anniversary of the date the student is discharged from active military duty without payment of additional tuition, fees, or other charges for the program other than any previously unpaid balance of the original tuition, fees, and charges for books for the program; or
 - c. The assignment of an appropriate final grade or credit for the courses in the program, but only if the instructor or instructors of the program determine that the student has: (1) satisfactorily completed at least 90 percent of the required coursework for the program; and (2) demonstrated sufficient mastery of the program material to receive credit for completing the program.
9. The payment of refunds will be totally completed such that the refund instrument has been negotiated or credited into the proper account(s), within 60 days after the effective date of termination.

Washington

Washington Refund Policy

Refunds are calculated on the tuition and registration fee only. No refunds will be due on workbooks, uniforms, and supplies. Full refunds will be issued in the event courses/programs are discontinued. Student refunds are made within 30 calendar days from the date of determination.

WASHINGTON INSTITUTIONAL REFUND POLICY

A Student Terminating Training:	Is entitled to a refund of:
First week of class or up to 10%, whichever is less	90% less a \$100 registration fee
Second week through & including 25% of enrollment period	75% less a \$100 registration fee
Greater than 25% through & including 50% of enrollment period	50% less a \$100 registration fee
After 50% of the enrollment period	no refund

Mesa Tucson	7 - 8	N/A	Added	<p>The Associate Degree Nursing Program does not currently have programmatic accreditation. The lack of national nursing accreditation may limit future educational and career options for students. The Pima Medical Institute Associate Degree Nursing program (system) holds pre-accreditation status from the National League for Nursing (NLN) Commission for Nursing Education Accreditation (CNEA), located at 2600 Virginia Avenue, NW, Washington, DC, 20037. Holding pre-accreditation status does not guarantee that initial accreditation by NLN CNEA will be received. They can be contacted at 800-669-1656 or through their website at www.nln.org/accreditation-services.</p>

San Antonio	14	Veterinary Technician: The Veterinary Technician program at PMI San Antonio is currently not accredited by the American Veterinary Medical Association (AVMA) Committee on Veterinary Technician Education and Activities (CVTEA). The initial application has been accepted but that does not guarantee accreditation and the application does not grant any temporary status of accreditation. Most states require candidates to pass the Veterinary Technician National Examination (VTNE) before being issued a license to practice and eligibility requirements may vary by state.	Updated	Veterinary Technician: The Veterinary Technician Program San Antonio campus has been granted initial accreditation by the AVMA Committee on Veterinary Technician Education and Activities.
San Marcos	9	Approved by the State of California Bureau for Private Postsecondary Education. Pima Medical Institute is granted approval to operate under the terms of California Education Code (CEC) section 94890(a)(1) until February 28, 2023 per CEC 94890(b).	Updated	State of California Bureau for Private Postsecondary Education. Pima Medical Institute is granted approval to operate under the terms of California Education Code (CEC) section 94890(a)(1) until February 28, 2023 per CEC 94890(b). Approval to Operate means compliance with the standards as set forth in the CEC and 5, CCR.
San Marcos	9	The Occupational Therapy Assistant program at the San Marcos campus has applied for accreditation and has been granted Preaccreditation Status by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 6116 Executive Boulevard, Suite 200, North Bethesda, MD 20852-4929. ACOTE's telephone number c/o AOTA is (301) 652-AOTA and its web address is www.acoteonline.org . The program must complete an on-site evaluation and be granted Accreditation Status before its graduates will be eligible to sit for the national certification examination for the occupational therapy assistant administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be a Certified Occupational Therapy Assistant (COTA). In addition, all states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. Note that a felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure. There are no fees paid to PMI for international student visas.
Wonderlic Scholastic Level Exam	136 - 137	The exam may be waived for applicants who submit official transcripts that document completion of an associate degree or higher.	Updated	The exam may be waived for applicants who submit official transcripts that document completion of an associate degree or higher or successful completion of Futuro Jumpstart courses.

Prospective Students

Addendum to the 2020-2021 Catalog published January 2020

Section	Catalog Page(s)	Current Catalog Statement	Action	New or Revised Statement
Vaccination Requirements	137	N/A	Added	Campuses will follow all local, state, and national mandates related to vaccinations for businesses, schools, and provider facilities. Students are required to follow all clinical externship required vaccination requests and policies. Students who have a qualified exclusion may request an exemption; however, there is no guarantee that a clinical site will accept the exemption. If a student is unable to obtain the required vaccination, Pima Medical Institute cannot guarantee that a clinical site will be available, which could cause a delay in graduation or result in the student having to withdraw from the program.
Transfer Credit	137	Application for previous education and/or life experience transfer credit must be received prior to the start of the program.	Updated	Requests for transfer of credit should be submitted prior to the start of the program but no later than the end of the first week of the program start (or 5 business days from the first day the program begins).
Footnote	137	Applicants to PMI's Advanced Placement Track Radiography (APTR) program can transfer up to 49 percent of the total number of credits.	Updated	Applicants to PMI's Radiography-Bridge program can transfer up to 49 percent of the total number of credits.
Footnote	137	APTR applications who have a degree and have graduated from a JRCERT-approved full-scope Radiography program can transfer upto 74 percent of the total number of credits.	Removed	N/A
Credit for life experience:	138	Requests must be submitted in writing to the appropriate PMI representatives before the start of the program to which the applicant is applying.	Updated	Requests should be submitted in writing to the appropriate PMI representatives before the start of the program, but not later than the end of the first week of the program start (or 5 business days from the first day the program begins).
Credit for life experience:	138		Added	Life experience credit cannot be granted for clinical course(s); excluding the Radiography Bridge program, which requires prior academic coursework.
Reentry / Reenrollment	138	Former students who withdrew or were terminated may be eligible to reenter or reenroll into the same program if they meet specified criteria. Availability to reenter/reenroll may be limited based on program capacity and the number of enrolled students. Students are eligible for reentry/reenrollment a maximum of two (2) times in the same program.	Updated	Former students who withdrew or were terminated may be eligible to reenter or reenroll into the same program if they meet specified criteria. Availability to reenter/reenroll may be limited based on program capacity and the number of enrolled students. Students are eligible for reentry/reenrollment a maximum of two (2) times in the same program unless the readmission / reentry was related to course reschedules or changes in course availability.

Emergency Reporting, Notification, Evacuation	138	N/A	Added	<i>Natural Disaster Emergency Response Protocol:</i> during a natural disaster, Pima Medical Institute may temporarily suspend or modify standard operating procedures and policies based on federal, state, or accrediting agency mandates or guidelines.
Affirmative Action	138	In compliance with Title IX of the 1972 Education Amendments, the Equal Employment Opportunity Act of 1972, Title VII of the Civil Rights Act of 1964 as amended, and Section 504 of the Rehabilitation Act of 1973, it is the policy of PMI not to discriminate against any person on the basis of race, color, religion, creed, national origin, sex, age, marital or parental status, or disability in all of its educational and employment programs and activities, its policies, practices, and procedures. No person will be retaliated against for bringing a claim of discrimination or for advocating on behalf of someone else. To report any violations of Title IX or any discrimination laws, contact PMI Title IX Coordinator, Libby Lentz, at 40 N Swan Road, Suite 100, Tucson, AZ 85711 or TitleIXCoordinator@pmi.edu.	Replaced	In accordance with Title IX of the Education Amendments of 1972 and the Office of Civil Rights of the USDE requirements, the institution provides protection to pregnant students. PMI will treat pregnancy and recovery therefrom in the same manner as requests for reasonable accommodations for temporary disability. While Title IX may allow for absences to be excused, the Department of Education guidelines for Title IV funding supersede the Title IX. Refer to the Attendance /Absence policy in the catalog for more information.

Current Students

Addendum to the 2020-2021 Catalog published January 2020

Section	Catalog Page(s)	Current Catalog Statement	Action	New or Revised Statement
Terminated (T)	144 - 145	The T designation is not included in GPA or hours attempted for the purpose of calculating the successful course completion percentage.	Updated	The T designation is not included in the calculation of the GPA but will count as hours attempted for the purpose of calculating the successful course completion percentage.
Section Transfer (ST)	144 - 145	N/A	Added	Section Transfer (ST) has been added to Table 3: Grading Scale. <u>Section Transfer (ST)</u> - Represents that a student has transferred from one section of a program to another section in the <i>same</i> program. The ST designation is entered for coursed in the original session the student attended but did not complete. The appropriate letter grade is entered for each course the student completed in the session to which the student transferred.
Disqualified (DQ)	144 - 145	N/A	Added	Disqualified (DQ) has been added to Table 3: Grading Scale. Disqualified (DQ) - Indicates that a student started the program and completed coursework but did not meet the admission requirements. This designation requires prior approval from the Corporate Registrar Manager.
Satisfactory Progress	145	N/A	Added	COVID-19 (Q) – Applies to courses that were not completed due to reasons related to the COVID-19 pandemic. The Q is considered a permanent designation and remains on the student's transcript even if the student retakes the course(s). A student returning to the same program is required to repeat the course(s) that carry a Q designation, and the earned grade to the repeated course(s) is recorded on the student's transcript. A Q designation is not included in the calculation of the GPA or counted in the hours attempted for the purposes of calculating the successful course completion percentage.
Unsatisfactory Progress	145	N/A	Added	<i>Master's program standards:</i> Students must maintain a GPA of 3.0 in their current program and must complete their program within one and one-half (1½) times the published length of the program measured in credits. Only courses completed with a minimum grade of 2.0 may be applied toward program completion.
Financial aid warning (Master's program only)	145	N/A	Added	Students in term-based programs are evaluated for satisfactory academic progress at the end of each term. To maintain satisfactory academic progress, students must successfully complete 67 percent of their attempted credits with a 3.0 or greater cumulative program GPA. Students who have not maintained a minimum cumulative program GPA of 3.0 and completed 67 percent of their attempted credits in a term are placed on financial aid warning status. Students placed on this status are still eligible for federal financial aid during this time. Students who achieve a cumulative program GPA of 3.0 and complete 67 percent of their attempted credits after the end of their subsequent term will be removed from financial aid warning status. Students who do not achieve a cumulative program GPA of 3.0 and do not complete 67 percent of the attempted credits will lose their eligibility for federal financial aid until they achieve satisfactory academic progress or a financial aid appeal has been submitted and approved. If a submitted financial aid appeal is approved, students will be placed on a status of financial aid probation and can only receive one term of funding eligibility.
Failed Courses/Course Repetition	145	N/A		Students enrolled in a masters program may repeat a course that received a C or lower a maximum of one (1) time. Students may only repeat two (2) courses within their program of study and then are subject to termination. Only the highest grade is considered for GPA evaluation but all attempted credits are included for measurement of maximum time frame. Attendance in a course constitutes an attempt.
Externship	146	Students are directly supervised by the institution, which includes weekly attendance, oversight of clinical instruction and evaluation of the prescribed course activities.	Updated	Students are directly supervised by the institution, which includes monitoring weekly attendance and providing oversight of clinical instruction.
Externship	146	N/A	Added	Students cannot receive financial compensation or be used to replace or substitute employees of the facility while participating in the clinical externship.
Externship / clinical absences:	146	"Medical Administrative Assistant"	Added	"Health Care Administration - Certificate"
Degree program externship / clinical absence:	146	"Advanced Placement Track-Radiography"	Added	"Radiography-Bridge"
Degree program externship / clinical absence:	146	Nursing	Removed	N/A

Current Students

Addendum to the 2020-2021 Catalog published January 2020

Section	Catalog Page(s)	Current Catalog Statement	Action	New or Revised Statement
Leave of Absence (LOA)	147	<i>Degree (term-based) programs:</i> Students in degree programs may be granted an administrative leave for an interruption in the academic schedule. Eligibility for this type of leave requires that the student must have recorded attendance in the current term, but due to an interruption in the academic schedule, additional required courses are not available within the current term.	Updated	<i>Degree (term-based) programs:</i> Students in degree programs are not eligible for a leave of absence. Students who have successfully completed all active modules in the term but who have an academic interruption may be eligible to sign a letter of intent without having to withdraw from the program.
Graduation Requirments	147	N/A	Added	Students in a graduate program are awarded a degree when they have successfully completed the program of study with a minimum cumulative GPA of 3.0 or greater and have no more than 2 (two) qualifying courses with a grade of C.
Student Services Department	147	This department maintains referrals for off-campus housing (PMI does not offer housing or dormitories), childcare, social services, and community agencies.	Updated	This department maintains referrals for off-campus housing childcare, social services, and community agencies. PMI does not offer housing or dormitories nor is PMI responsible for finding or assisting a student in finding housing. The cost of housing located near each campus differs greatly depending on the location, the type of residence (single family, multi-unit, or high density), and if the residence is to be shared or occupied alone. Per the California Student Aid Commission data, the average housing cost in 2020/2021 is \$1,240.00.
Formal Written Complaints	148	Student grievances are recorded in writing on the appropriate campus form(s).	Updated	Student grievances must be submitted in writing.

Financial Services Information

Addendum to the 2020-2021 Catalog published January 2020

Section	Catalog Page(s)	Current Catalog Statement	Action	New or Revised Statement
Tuition and Fees	150	N/A	Added	The technology fee covers PMI's learning management system, technology support, and services used to enhance the student learning experience.
Tuition and Fees	150	N/A	Added	Pima Medical Institute does not penalize students using VA Educational benefit programs under Chapters 33 and 31 while waiting for payment from the Department of Veterans Affairs. Students will continue to have access to classes, libraries, and other institutional facilities as outlined and available in our catalog. No late fees will be assessed and student accounts will be considered on hold. Title 38 USC 3679 (e).
Grants	150	For PMI students, options may include the Federal Pell Grant and the Federal Supplemental Educational Opportunity Grant.	Updated	For PMI students, options may include the Federal Pell Grant, the Federal Supplemental Educational Opportunity Grant, and for California students, Cal Grant.
Grants	150	N /A	Added	<i>Cal Grant:</i> Undergraduate students who have met the requirements for Federal Student Aid (FAFSA) or California Dream Act Application (CADAA) are eligible for one of three types of Cal Grants. The type of Cal Grant awarded to a student is based off of their FAFSA or CADAA, Cal Grant GPA, the type of California colleges listed on FAFSA, and if the student is a recent high school graduate.
Veteran's Education Benefits	153	N/A	Added	Absences in excess of 15% of the total sequence, program, or semester classroom hours will result in a loss of VA benefits.
California Refund Policy	154	<p>A student withdrawing from class after seven (7) days will receive a prorated refund of tuition, which will be calculated as follows: If the student has completed 60 percent or less of the scheduled days in the current payment period in his or her program through the last day of attendance:</p> <ol style="list-style-type: none"> 1. Deduct a nonrefundable registration fee of \$100 and the Student Tuition Recovery Fund fee if listed as due from the total tuition charge; 2. Divide this figure by the number of days in the program; 3. The quotient is the daily charge for the program; 4. The amount owed by the student for purposes of calculating a refund is derived by multiplying the total days scheduled by the daily charge for instruction; 5. The refund would be any amount in excess of the figure derived in item (4) that was paid by the student; 6. The refund amount shall be adjusted for equipment, if applicable: <ol style="list-style-type: none"> a. The refund will be issued within 45 days of the receipt of the student's written notice of termination. If the student has completed more than 60 percent of the period of attendance for which the student was charged, the tuition is considered earned and the student will receive no refund. b. The student will receive a statement reporting the amount of refund and to whom the refund was made within 10 days of the refund date. c. If the student has received federal student financial aid funds, the student is entitled to a refund of monies not paid from federal student financial aid program funds. d. The cancellation and refund policy applies to both on ground and the distance-education programs. California Licensure Requirements

Addendum to the 2020-2021 Catalog published January 2020

CALIFORNIA LICENSURE REQUIREMENTS

The following statement applies to the Pharmacy Technician, Radiography, and Respiratory Therapy programs. The State of California requires graduates of Pharmacy Technician, Radiography, and Respiratory Therapy programs to be licensed, registered, or certified in order to obtain employment in the field. Relevant website links and licensure eligibility requirements are listed by program below:

PHARMACY TECHNICIAN - Pharmacy Technician Certification Board (PTCB) www.ptcb.org
California State Board of Pharmacy
www.pharmacy.ca.gov

List of Requirements for eligibility for licensure as a Pharmacy Technician in the State of California include the following:

1. Submit a sealed copy of a Practitioner Self-Query Report to the Board of Pharmacy at a cost of \$8.00.
2. Submit a Live Scan receipt, showing fingerprint submission information at a cost of \$69.00.
3. Submit a certified copy of High School transcripts or a certified copy of an official transcript of your General Education Development (GED) test results (cost may vary).
4. Submit an Affidavit of Completed Coursework or Graduation for Pharmacy Technician from one of the following: course which provides a minimum of 240 hours of instruction as specified in Title 16 California Regulation section 1793.6(c), course/program accredited by the American Society of Health-System Pharmacists or the Accreditation Council for Pharmacy Education instruction, or an Associate Degree in Pharmacy Technology program. Certified copy of Pharmacy Technician Certification Board certificate or armed services training copy of the DD214 can be submitted in place of the aforementioned affidavit.
5. Submit an application with attachments 1-4 above to the California State Board of Pharmacy with a passport photo attached and a fee of \$105.00.

NOTICE: Effective July 1, 2012, the State Board of Equalization and the Franchise Tax Board may share taxpayer information with the Board. You are obligated to pay your state tax obligation. This application may be denied or your license may be suspended if the state tax obligation is not paid.

RADIOGRAPHY - Joint Review Committee on Education in Radiologic Technology (JRCERT)
www.jrcert.org
American Registry of Radiologic Technologists Examination (ARRT)
<http://www.arrt.org>
California Department of Public Health Radiologic Health Branch (CDPH-RHB)
www.cdph.ca.gov/programs/pages/radiologichealthbranch.aspx

List of Requirements for eligibility for licensure as a Radiologic Technologist in the State of California include the following:

1. Graduation from an approved Radiography Technology program.
Student graduates from the PMI Chula Vista Radiologic Technology Program receive the following documentation:
 - a. An Associate of Occupational Science Degree in Radiologic Technology
2. The graduate completes the American Registry of Radiologic Technologists National Certification Examination.
3. Upon passing, and within 4-6 weeks the graduate receives the ARRT certification by mail
4. The graduate can then submit an application to the California Department of Public Health Radiologic Health Branch for the
5. Following the application, the graduate must submit the following with the application:
 - a. A copy of the ARRT certificate for Radiography.
 - b. A non-refundable application fee of \$112.00 in the form of a check or money order made payable to the CDPH-RHB.
 - c. The graduate will be notified of their application status within 30 calendar days of submission of the application.
6. Graduates from the PMI Chula Vista Radiologic Technology Program have the option of also submitting the Radiologic
 - a. The graduate must submit a copy of their current ARRT certificate or provide their California Diagnostic Radiologic
 - b. The application is found at <https://www.cdph.ca.gov/CDPH%20Document%20Library/ControlledForms/cdph8228.pdf>
 - c. The graduate must submit a non-refundable application fee of \$112.00 in the form of a check or money order made

California Licensure Requirements

Addendum to the 2020-2021 Catalog published January 2020

RESPIRATORY THERAPY - National Board for Respiratory Care (NBRC)

www.nbrc.org

Respiratory Care Board (RCB)

www.rcb.ca.gov

On July 23, 2014 AB 1972 was signed by Governor Edmund G. Brown Jr., establishing the Registered Respiratory Therapist (RRT) exam as the minimum requirement for licensure effective January 1, 2015. Therefore, the Respiratory Care Board (Board) will no longer recognize passage of the Certified Respiratory Therapist (CRT) examination by new graduates for licensure as of January 1, 2015.

Those students will be required to take the new Therapist Multiple-Choice Examination (the new version of the NBRC exam which will be available 1/15/15), and pass the RRT examination to qualify for licensure. The cost for the Therapist Multiple-Choice Examination will remain the same as the current cost for the CRT examination (\$190 for new applicants and \$150 for repeat applicants). However, students/applicants taking the new exam will now be required to apply for (and pass) the Clinical Simulation Examination, which includes a fee of \$200 (for both new and repeat applicants).*

Please contact the Board at 916.999.2190, or toll free at 866.375.0386 if you have any questions.

Before you apply for your examination you are strongly encouraged to review, in detail, the NBRC's Candidate Handbook. If you request your application for examination by calling the NBRC you will receive the handbook with your application. If you apply on-line or download the application, you can obtain a copy of the handbook by either:

- 1) visiting NBRC's website at www.nbrc.org. From the home page, click on "Examinations" then select "RRT." On the left side of the next screen click on "Candidate Handbook" or
- 2) calling the NBRC at 913.895.4900 and request a handbook be mailed to you.

List of Requirements for eligibility for licensure as a Respiratory Care Practitioner (RCP) in the State of California include the following:

1. Graduation from an CoARC approved Respiratory Therapy Program.
2. National Board of Respiratory Care (NBRC) to take the exam for RRT *credentialing*:
 - a. The exam Therapist Multiple Choice (TMC)(computer based exam; \$190.00)
 - b. Application online: www.nbrc.org
 - c. This exam can be scheduled and taken as soon as student is officially "cleared" for graduate status from PMI.
 - d. Must achieve a passing score, RRT level
 - e. Exam is taken at testing sites in CA (H&R Block, San Diego)
 - f. This is the graduate's *national credential*
 - g. This is the requisite exam for licensure status. (Alaska) does *not* have state licensure).
1. State of CA for licensure as a Respiratory Care Practitioner (RCP) Process.
 - a. This process can begin as early as 90 days prior to graduation (early filing helps to expedite the process).
 - b. Application online: www.rcb.ca.gov
 - c. *Live Scan* fingerprints / passport photos (2): \$70.00
 - d. Professional Ethics course must be taken online from the AARC or CSRC; passed with 80% or >, and completion
 - e. Applicant goes through FBI and DOJ *extensive* background checks
 - f. Licensure Application fee: \$300.00
 - g. DMV "H-6": complete 10 year driving history in all states with DL held: \$15.00/state

California Catalog Addendum

Addendum to the 2020-2021 Catalog published January 2020

Pima Medical Institute is a private institution and is licensed to operate under the terms of California Education Code (CEC) section 94890(a)(1) until February 28, 2024 per CEC section 94890(b). Approval to Operate means compliance with the standards as set forth in the CEC and 5, CCR.

If a student obtains a loan for an educational program the student will have the responsibility to repay the full amount of the loan plus interest, less the amount of any refund. If a student has received federal student financial aid funds the student is entitled to a refund of the moneys not paid from federal student financial aid program funds.

Any questions a student may have regarding this catalog that have not been satisfactorily answered by the institution may be directed to the Bureau for Private Postsecondary Education at 1747 North Market Blvd., Suite 225, Sacramento, CA 95834 or P.O. Box 980818, West Sacramento, CA 95798-0818, www.bppe.ca.gov, (888) 370-7589 or by fax (916) 263-1897.

As a prospective student, you are encouraged to review this catalog prior to signing an enrollment agreement. You are also encouraged to review the School Performance Fact Sheet, which must be provided to you prior to signing an enrollment agreement.

A student or any member of the public may file a complaint about this institution with the Bureau for Private Postsecondary Education by calling (888) 370-7589 or by completing a complaint form, which can be obtained on the bureau's internet web site (www.bppe.ca.gov).

This institution has not had a pending petition in bankruptcy, is not operating as a debtor in possession, has not filed a petition within the preceding five years, and has not had a petition in bankruptcy filed against it within the preceding five years that resulted in reorganization under Chapter 11 of the United States Bankruptcy Code (11 U.S.C. Sec.1101 et seq.).

NOTICE CONCERNING TRANSFERABILITY OF CREDITS AND CREDENTIALS EARNED AT OUR INSTITUTION.

The transferability of credits you earn at Pima Medical Institute is at the complete discretion of an institution to which you may seek to transfer. Acceptance of the degree, diploma, or certificate you earn in your program is also at the complete discretion of the institution to which you may seek to transfer. If the credits, or degree, diploma, or certificate that you earn at this institution are not accepted at the institution to which you seek to transfer, you may be required to repeat some or all of your coursework at that institution. For this reason you should make certain that your attendance at this institution will meet your educational goals. This may include contacting an institution to which you may seek to transfer after attending Pima Medical Institute to determine if your credits, or degree, diploma, or certificate will transfer.

Online and On-ground Articulation Agreements

Pima Medical Institute (PMI) has four articulation agreements with the following institutions: Chadron State College (CSC), Grand Canyon University (GCU), Montana State University, Billings (MSU), and University of Phoenix (UOP). In addition, PMI maintains an education agreement with Chamberlain College of Nursing. The agreements allow PMI students to pursue online or on-ground baccalaureate degree completion programs or advanced degrees. GCU allows for both PMI degree and non-degree students to transfer credit, while MSU, CSC and UOP are specific to the transfer of credit for PMI degree students.

Additional information about the agreements is included on the following pages. PMI supports the pursuit of life-long learning. In turn, PMI offers degree completion programs and maintains agreements with other institutions to provide graduates with multiple options for continuing their education.

Jen Spurlin
Corporate Education Director
Pima Medical Institute

Pima Medical Institute does not guarantee the transfer of credit to any other institution. The college and/or university to which a student applies determine transfer of credit. The articulation agreements in this guide are subject to change.

Student Credit Transfer Options

Addendum to the 2020-2021 Catalog published January 2020

REGIONALLY ACCREDITED INSTITUTIONS

CHADRON STATE COLLEGE

1000 Main St.
Chadron NE 69337
(308) 432-6000
www.csc.edu

Chadron State College (CSC) allows transfer of credit for the following PMI associate degree programs: Dental Hygiene, Occupational Therapy Assistant, Physical Therapist Assistant, Radiography, Respiratory Therapy, and Veterinary Technician.

Graduates of PMI associate degree programs listed above can transfer up to 70 credits from the earned PMI degree toward fulfillment of the 120 credits required for completion of CSC's Bachelor of Applied Science (BAS) degree. Graduates of PMI associate degree programs listed above can also transfer 66 credits from the earned PMI degree towards fulfillment of the 120 credits required for completion of a CSC Bachelor of Arts or Bachelor of Science degree.

For more information regarding transferring to CSC, contact the Start Office at 800-242-3766 x6060

GRAND CANYON UNIVERSITY

3300 West Camelback Road
Phoenix, AZ 85017
(800) 800-9776
www.gcu.edu

Grand Canyon University (GCU) allows transfer of credit for PMI degree and non-degree students.

PMI associate degree graduates can transfer up to 84 credits to GCU. Several bachelor degree options are available, many specific to fields of study at PMI. PMI bachelor degree graduates can transfer into several GCU graduate programs.

For more information with regard to transferring to GCU and obtaining a discount contact Rob Radar, Office: 520-792-7818, cell: 619-261-8875 or email: Robert.Rader@gu.edu

MONTANA STATE UNIVERSITY

1500 University Drive
Billings, MT 59101
www.msubillings.edu

Mountain State University (MSU) allows transfer of credit for PMI degree students.

PMI graduates can transfer up to 36 credits from an earned PMI associate's degree. The Bachelor of Applied Science (BAS) and Bachelor of Science in Liberal Studies (BSLS) degree completion programs at MSU are intended to provide online degree completion opportunities for PMI students who have completed an Associate of Occupational Science Degree in Radiography or Respiratory Therapy.

For more information regarding transferring to MSU, contact the New Student Services department at 800-656-6782 x2888; email: admissions@msubillings.edu

Student Credit Transfer Options

Addendum to the 2020-2021 Catalog published January 2020

UNIVERSITY OF PHOENIX

www.phoenix.edu/pmistudents

University of Phoenix (UOP) allows transfer of credit for PMI degree students. Credit from associate degrees awarded at PMI, will transfer to UOP; however, additional general education credits may be needed to fulfill the program requirements.

Students from PMI will be granted admission to a baccalaureate degree program at the UOP based on academic requirements as a result of having earned an associate degree.

PMI bachelor degree graduates can transfer into several UOP graduate programs.

For more information regarding transferring to UOP contact a representative from the respective campus location.

Contact for PMI Students, Graduates, and Employees (Faculty and Staff):

Stefanny Gerard – 617-984-9643

Stefanny.Gerard@phoenix.edu

CHAMBERLAIN COLLEGE

www.chamberlain.edu/info/pimamedicalinstitute

877-298-8234

PMI Associate Degree Nursing graduates who pass the NCLEX and maintain current, active Registered Nurse licensure will be awarded up to 82 proficiency credits hours through the Chamberlain College of Nursing Articulation Plan (CCAP), which includes 37 liberal arts and science credits and 45 nursing credits.

**Student Tuition Recovery Fee (STRF): Per BPPE, the institution collects an assessment of fifty cents (\$.50) per one thousand dollars (\$1,000) of institutional charges.

***Program Outline is unique to CV and SM, due to CA regulations

(Changes in Bold)

The registration fee is charged for each enrollment, unless returning to the same program within 180 days.

Certificate programs only have one period of attendance. Total charges for a period of attendance and the total charges for the entire program are the same.

Additional student expenses may include, but are not limited to required immunizations, health insurance, background check, drug screening, clinical registration fees, and travel/parking expenses related to clinical externships or field trips. Please contact the campus administrator for additional information.

STUDENT TUITION RECOVERY FUND (STRF)
Addendum to the 2020-2021 Catalog published January 2020

STATE OF CALIFORNIA
STUDENT TUITION RECOVERY FUND (STRF)

The State of California established the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic loss suffered by a student in an educational program at a qualifying institution, who is or was a California resident while enrolled, or was enrolled in a residency program, if the student enrolled in the institution, prepaid tuition, and suffered an economic loss. Unless relieved of the obligation to do so, you must pay the state imposed assessment for the STRF, or it must be paid on your behalf, if you are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition.

You are not eligible for protection from the STRF and you are not required to pay the STRF assessment, if you are not a California resident, or are not enrolled in a residency program.

It is important that you keep copies of your enrollment agreement, financial aid documents, receipts, or any other information that documents the amount paid to the school. Questions regarding the STRF may be directed to the Bureau for Private Postsecondary Education, 1747 North Market Blvd., Suite 225, Sacramento, CA 95834, (916) 574-8900 or (888) 370-7589.

To be eligible for STRF, you must be a California resident or enrolled in a residency program, prepaid tuition, paid or deemed to have paid the STRF assessment, and suffered an economic loss as a result of any of the following:

1. The institution, a location of the institution, or an educational program offered by the institution was closed or discontinued, and you did not choose to participate in a teach-out plan approved by the Bureau or did not complete a chosen teach-out plan approved by the Bureau.
2. You were enrolled at an institution or a location of the institution within the 120 day period before the closure of the institution or location of the institution, or were enrolled in an educational program within the 120 day period before the program was discontinued.
3. You were enrolled at an institution or a location of the institution more than 120 days before the closure of the institution or location of the institution, in an educational program offered by the institution as to which the Bureau determined there was a significant decline in the quality or value of the program more than 120 days before closure.
4. The institution has been ordered to pay a refund by the Bureau but has failed to do so.
5. The institution has failed to pay or reimburse loan proceeds under a federal student loan program as required by law, or has failed to pay or reimburse proceeds received by the institution in excess of tuition and other costs.
6. You have been awarded restitution, a refund, or other monetary award by an arbitrator or court, based on a violation of this chapter by an institution or representative of an institution, but have been unable to collect the award from the institution.
7. You sought legal counsel that resulted in the cancellation of one or more of your student loans and have an invoice for services rendered and evidence of the cancellation of the student loan or loans.

To qualify for STRF reimbursement, the application must be received within four (4) years from the date of the action or event that made the student eligible for recovery from STRF.

A student whose loan is revived by a loan holder or debt collector after a period of noncollection may, at any time, file a written application for recovery from STRF for the debt that would have otherwise been eligible for recovery. If it has been more than four (4) years since the action or event that made the student eligible, the student must have filed a written application for recovery within the original four (4) year period, unless the period has been extended by another act of law.

However, no claim can be paid to any student without a social security number or a taxpayer identification number.

Program Information

Addendum to the 2020-2021 Catalog published January 2020

Program	Catalog Page(s)	Action	Notification
Certificate and Degree Programs (except Online programs)	pg. 26 - 49, 53 - 58	Updated	<p>As PMI returns to campus, programs may be either on-ground or hybrid. Programs designated as 'On-Ground' mean the program is offered on campus and students are expected to attend class in person. Programs designated as 'Hybrid' mean the program is offered using a combination of on-ground and online formats. Programs, courses, lectures, and labs that are scheduled to be on ground require the student to physically attend on campus on the days/times announced. Refer to the program's Prospective Student Handout for information on the delivery method of each course within the hybrid programs.</p> <p>On-ground programs/courses will be taught on campus barring any emergencies impacting the regular operations of campus facilities, in which case students may be notified of a change to Hybrid delivery. For programs/courses that are taught via Hybrid delivery method, on-ground courses may have to transition to an online format until it is safe for students and employees to return to campus in event of an emergency where the campus is fully or partially closed for a period of time.</p>
Dental Assistant	29	Updated	The Dental Assistant program in California has transitioned to a hybrid format where theory/didactic hours may be taught in a combination of on-ground and/or online. All laboratory hours, lab competencies, and skills assessments are conducted on-ground.
Medical Billing and Coding	39	Added	Under "Courses that may be offered on-ground, online, and/or blended": MBC 180 Certification Review, MBC 200 Medical Insurance, Billing, and Coding Capstone
Multiple: Certificate and Associate Degree	38, 39, 53, 54, 65, 66, 80, 81, 87, 88, 90, 91, 93, 94, 97, 98, 104, 105, 108, 109, 111, 112	Updated	The term "blended" has been updated to "hybrid".
Pharmacy Technician	45	Updated	A sterile products certification course is offered through the National Pharmacy Technician Association/NPTA as part of the program.
Radiography	100	Removed Replaced with	<p>In California, this course includes fluoroscopic equipment and procedures, enabling graduates to be eligible to apply to take the California State Fluoroscopy Permit Examination.</p> <p>As of October 1, 2020, the State of California no longer requires graduates of the Radiography program to take the Fluoroscopy Permit Examination in order to obtain a fluoroscopy permit but are required to apply for a fluoroscopy permit. Applications and fees can be found on the California Department of Public Health Radiologic Health Branch webpage (CDPH-RHB).</p>

Program Information

Addendum to the 2020-2021 Catalog published January 2020

Refer to Program Information pages (i.e., Program Outline and/or Course Descriptions) at the end of this document.

Program	Catalog Page(s)	Action	Notification
Health Care Administration - BS	116-118	Updated	The BS Health Care Administration program have minor changes to courses and credit hours.
Health Care Administration - Certificate	32 - 34, 69	Updated	Medical Administrative Assistant program title has been updated to Health Care Administration - Certificate.
Online	69, 101, 116, 119, 122, 125, 128	Updated	All fully-online degree programs have been updated from 15 week semesters to 16 week semesters, extending the length of each program.
Radiography-Bridge	101 - 103	Updated	Advanced Placement Track Radiography program title has been updated to Radiography-Bridge.
Radiography-Bridge	101 - 103	Updated	The Radiography-Bridge program have minor changes to courses and credit hours.
Respiratory Therapy - Houston Only	104 - 107	Updated	Semester Credits: 89.0 Program Hours: 2,025 Please refer to updated catalog pages in the back for the program outline and course descriptions.
Respiratory Therapy - (excluding Houston)	104 - 107	Updated	Graduates of the program receive an Associate Occupational Science Degree and are eligible to apply to take the National Board for Respiratory Care Therapist Multiple-Choice (TMC) Examination. Semester Credits: 85.0/88.0* Program Hours: 1,955/2,000* *Las Vegas only Please refer to updated catalog pages in the back for the program outline and course descriptions.
Veterinary Assistant	56 - 58	Removed Replaced with	The VA program is no longer available on the El Paso campus. The VTT program specific to the El Paso campus.
Veterinary Technician (El Paso)	111 - 114	Added	The Veterinary Technician program has been expanded to include Veterinary Assistant coursework; however, there is no longer an exit point for veterinary assistants. Graduates of a Veterinary Assistant program may be eligible to transfer a limited number of courses. Refer to the Transfer Credit section in the Catalog for eligibility requirements.

State Licensure Determination Disclosure Certificate Programs

In compliance with [34 CFR 668.43](#) Pima Medical Institute has made a reasonable effort to determine graduate eligibility for licensure in all states for programs designed and advertised as leading to licensure. The chart below lists PMI programs and states where the curriculum meets licensure requirements, states where the curriculum does not meet licensure requirements, and states in which PMI has been unable to determine if the curriculum meets state licensure requirements. All consumers should be advised that due to the frequent changes to state statutes, rules, and regulations PMI cannot guarantee licensure based on the lists below.

Program	Program does not lead to licensure or Licensure Not Required	Meets Licensure Requirements	Does Not Meet Licensure Requirements	No Licensure Determination	Notes
Dental Assistant	Alabama, Alaska, Arizona, Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Kansas, Kentucky, Louisiana, Maine, Maryland, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming	California (<i>Chula Vista and San Marcos Programs ONLY</i>)	California*, Iowa, Massachusetts, Montana**		<p>*Graduates from DA programs at the following campuses are not eligible for licensure in the state of California: Mesa, Phoenix, Tucson, Aurora, Colorado Springs, Denver, Las Vegas, Albuquerque, El Paso, Houston, San Antonio, Renton, and Seattle</p> <p>** <i>The State of Montana does not have licensure requirements for this profession; however, regulations prohibit hiring of non-CODA (Commission on Dental Accreditation) trained Dental Assistants.</i></p> <p>Contact information for State Licensing Boards in which the PMI program Does Not Meet licensure requirements can be found HERE.</p>
Health Care Administration	Licensure not required				
Medical Assistant	Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Utah, Vermont, Virginia, West Virginia, West Virginia, Wisconsin, Wyoming	South Dakota, Washington

Health Care Administration Certificate

Objective: To develop in students the personal traits and professional skills needed to perform as competent entry-level professionals in the field of health care administration. The program provides students with knowledge of medical terminology, law, office management, medical insurance, computers, and accounting procedures.

Graduates of this program receive a certificate. The courses within the program are acceptable for credit toward PMI's Health Care Administration Associate of Applied Science Degree Program.

Admissions Requirements: Refer to the Admissions information in the Prospective Students section of this catalog.

Health Care Administration Certificate • Course Descriptions

Courses that may be offered on-ground, online, and/or blended: CSK 100 Study Skills, CAT 150 Anatomy, Physiology, and Terminology; CCB 100 Computer Basics; CMF 95 Math Fundamentals; CHS 100 CPR & First Aid; MAA 100 Office Management; MAA 102 Introduction to Insurance and Coding; MAA 104 Business Writing and Electronic Health Records; MAA 132 Communication; MAA 136 Computer Applications for the Medical Office; MAA 138 Medical Billing and Coding; MAA 136 Medical Law and Ethics; MAA 142 Electronic Health Records; MAA 144 Written Communication in the Medical Office

CSK 100 Study Skills

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course provides students an opportunity to learn and adopt methods to promote success in school, work, and life. Topics include strategies to help students develop and improve their skills in time and stress management, reading comprehension and memorization, listening and note taking, and test preparation.

Prerequisites: None

CAT 150 Anatomy, Physiology, and Terminology

Total Course Hours: 55 (55 Theory, 0 Lab, 0 Extern) Semester Credits: 3.5

This course is designed to provide students with a basic knowledge of anatomy, physiology, and medical terminology. Medical terms are learned within the context of the structures and functions of the body systems (integumentary, musculoskeletal, nervous, endocrine, lymphatic, immune, cardiovascular, respiratory, digestive, urinary, reproductive) and the senses. Content also addresses pathology, procedures, and medications involved in treatment.

Prerequisites: None

CCB 100 Computer Basics

Total Course Hours: 15 (0 Theory, 15 Lab, 0 Extern) Semester Credits: 0.5

Through demonstration and hands-on experience, students will gain a general understanding of computers. Hardware, software, Microsoft products, and internet use are explained.

Prerequisites: None

CMF 95 Math Fundamentals

Total Course Hours: 20 (20 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

The course reviews basic mathematical skills including whole numbers, fractions, decimals, proportions, ratios, percentages, combined applications, and measurement systems. It provides students with a solid foundation for higher math concepts.

Prerequisites: None

CHS 100 CPR & First Aid

Total Course Hours: 15 (10 Theory, 5 Lab, 0 Extern) Semester Credits: 0.5

This course follows recognized standards that are designed to prepare students to provide basic first aid assistance and cardiopulmonary resuscitation (CPR) for adults, children, and infants. Students learn how to perform as an effective team member during multi-rescuer CPR situations and how to demonstrate the proper use of an automated external defibrillator (AED).

Prerequisites: None

MAA 100 Office Management

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This course introduces students to the daily operations of the medical office environment, including basic policies/procedures, appointment scheduling, telephone etiquette, patient reception and processing, billing procedures, and financial and medical records management.

Prerequisites: None

MAA 102 Introduction to Insurance and Coding

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course presents the fundamentals of insurance billing and coding procedures, including terminology, types of insurance, and coding methods and forms. Students participate in hands-on activities to practice completing sample claim forms similar to those used in medical office environments.

Prerequisites: None

MAA 104 Business Writing and Electronic Health Records

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

Course content focuses on the development and application of the business writing and technology skills typically required in a medical office environment. Students complete a typing assessment and participate in hands-on activities to compose various business-oriented documents and to become familiar with the operational aspects and data-security considerations of electronic medical records systems and electronic health records systems.

Prerequisites: None

MAA 132 Communication

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

Course content introduces students to the types of professional communication skills expected of medical administrative assistants. Topics include basic terminology, patient and coworker interactions, verbal and nonverbal cues, and listening skills, among others. Activities offer students opportunities to practice communication exchanges typically encountered in the medical office environment.

Prerequisites: Professional Sequence I

Health Care Administration Certificate • Course Descriptions

MAA 134 Vital Sign Basics

Total Course Hours: 15 (0 Theory, 15 Lab, 0 Extern) Semester Credits: 0.5

This lab-based course provides a hands-on approach to obtaining and documenting a patient's vital signs as part of a medical record. Discussion topics include the purpose of the medical history, recognizing normal and abnormal vital sign values, accepted charting and documentation methods, and HIPAA compliance considerations.

Prerequisites: Professional Sequence I

MAA 136 Computer Applications for the Medical Office

Total Course Hours: 60 (15 Theory, 45 Lab, 0 Extern) Semester Credits: 2.5

This course emphasizes the development and application of computer-based skills required in the medical office setting. Lab time offers students focused opportunities to familiarize themselves and practice with common word-processing, spreadsheet, and presentation software.

Prerequisites: Professional Sequence I

MAA 138 Medical Billing and Coding

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course is designed to enhance students' knowledge of billing and coding procedures through discussion and hands-on practice. Topics include patient payment issues, diagnostic and procedural coding, insurance claim forms, and third-party reimbursement.

Prerequisites: Professional Sequence I

MDA 136 Medical Law and Ethics

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course addresses legal and ethical considerations relevant to the medical office setting. Content includes legal terminology, professional competence, scope of practice rules, and regulatory compliance issues with particular focus on HIPAA and patient confidentiality requirements.

Prerequisites: Professional Sequence I

MAA 142 Electronic Health Records

Total Course Hours: 60 (15 Theory, 45 Lab, 0 Extern) Semester Credits: 2.5

Course content builds upon students' prior knowledge of and experience with electronic health records (EHR). Through focused lab exercises, students practice navigating a basic EHR system intended to prepare them for the types of tasks they will encounter in the medical office environment.

Prerequisites: Professional Sequence I

MAA 144 Written Communication in the Medical Office

Total Course Hours: 45 (30 Theory, 15 Lab, 0 Extern) Semester Credits: 2.5

This course emphasizes development and refinement of basic writing skills for the medical office. Various assignments reinforce proper writing mechanics and grammar usage, attention to detail, spelling, correct use of medical terminology and symbols, and a range of skills related to medical documentation. Students are expected to practice their keyboarding skills and complete a typing assessment by the end of the course.

Prerequisites: Professional Sequence I

MAA 155 Externship

Total Course Hours: 240 (0 Theory, 0 Lab, 240 Extern) Semester Credits: 5.0

This course provides students with opportunities to apply professional skills learned in the classroom.

Prerequisites: Career Prep and Professional Sequences I, II, and III

After suffering a severe back injury that really took a toll on my health, I found myself realizing I had to make a career change. I saw a commercial for Pima Medical Institute and that same day I called the school. The next day I went to the campus for a tour, and two hours later I enrolled in the Medical Administrative Assistant program.

I had many struggles while in the program. I was dealing with back pain that was unbearable at times, making it difficult to sit in class. The campus staff were very accommodating to my needs, which I was very grateful for. Financial struggles started occurring fast. I had to leave my job because of my injury. With family living so far away, we had no place to go. The next couple of months my family and I stayed at a hotel. Trying to make ends meet was very tough; there were even a couple of nights we slept in the car and utilized food pantries just to get by. Everyone at the school was so kind and supported us in many ways. I had many people to lean on and they always provided a safe place to release my emotions.

I am currently employed as a clinical secretary at dialysis facility, and I love it! I am proud of myself for persevering. My health is better and my family has a place to call home. It was all worth it!

Teresa Benally
Certificate, Medical Administrative Assistant, Albuquerque West Campus

Medical Billing and Coding

Objective: To develop in students the traits and skills needed to perform as competent entry-level medical billing and coding professionals. Students develop practical knowledge of medical terminology, medical insurance, billing and reimbursement methodology, patient records, principles of diagnostic and procedural coding, and claims management.

Graduates of this program receive a certificate. The courses within the program are acceptable for credit toward PMI's Health Care Administration Associate of Applied Science Degree Program.

Admissions Requirements: Refer to the Admissions information in the Prospective Students section of this catalog.

- Catalog addendum for PMI 2020-2021 Academic Catalog published January 2020 (07.20.2020)

Medical Billing and Coding • Course Descriptions

Note: Theory hours and computer-based lab hours may be taught on-ground, online, and/or blended (all noncomputer-based lab hours will be taught on-ground).

CSK 100 Study Skills

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course provides students an opportunity to learn and adopt methods to promote success in school, work, and life. Topics include strategies to help students develop and improve their skills in time and stress management, reading comprehension and memorization, listening and note taking, and test preparation.

Prerequisites: None

CAT 150 Anatomy, Physiology, and Terminology

Total Course Hours: 55 (55 Theory, 0 Lab, 0 Extern) Semester Credits: 3.5

This course is designed to provide students with a basic knowledge of anatomy, physiology, and medical terminology. Medical terms are learned within the context of the structures and functions of the body systems (integumentary, musculoskeletal, nervous, endocrine, lymphatic, immune, cardiovascular, respiratory, digestive, urinary, reproductive) and the senses. Content also addresses pathology, procedures, and medications involved in treatment.

Prerequisites: None

CCB 100 Computer Basics

Total Course Hours: 15 (0 Theory, 15 Lab, 0 Extern) Semester Credits: 0.5

Through demonstration and hands-on experience, students will gain a general understanding of computers. Hardware, software, Microsoft products, and internet use are explained.

Prerequisites: None

CMF 95 Math Fundamentals

Total Course Hours: 20 (20 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

The course reviews basic mathematical skills including whole numbers, fractions, decimals, proportions, ratios, percentages, combined applications, and measurement systems. It provides students with a solid foundation for higher math concepts.

Prerequisites: None

CHS 100 CPR & First Aid

Total Course Hours: 15 (10 Theory, 5 Lab, 0 Extern) Semester Credits: 0.5

This course follows recognized standards that are designed to prepare students to provide basic first aid assistance and cardiopulmonary resuscitation (CPR) for adults, children, and infants. Students learn how to perform as an effective team member during multi-rescuer CPR situations and how to demonstrate the proper use of an automated external defibrillator (AED).

Prerequisites: None

MAA 100 Office Management

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This course introduces students to the daily operations of the medical office environment, including basic policies/procedures, appointment scheduling, telephone etiquette, patient reception and processing, billing procedures, and financial and medical records management.

Prerequisites: None

MAA 102 Introduction to Insurance and Coding

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course presents the fundamentals of insurance billing and coding procedures, including terminology, types of insurance, and coding methods and forms. Students participate in hands-on activities to practice completing sample claim forms similar to those used in medical office environments.

Prerequisites: None

MAA 104 Business Writing and Electronic Health Records

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

Course content focuses on the development and application of the business writing and technology skills typically required in a medical office environment. Students complete a typing assessment and participate in hands-on activities to compose various business-oriented documents and to become familiar with the operational aspects and data-security considerations of electronic medical records systems and electronic health records systems.

Prerequisites: None

MBC 110 - Principles of Insurance

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course addresses insurance terminology, basic structures of insurance plans, health reimbursement accounts, and types of government-sponsored insurance including Medicare and Medicaid. Students complete a plan summary and cost analysis utilizing various insurance plans.

Prerequisites: Professional Sequence I

Medical Billing and Coding • Course Descriptions

MBC 120 Clinical Medical Diagnostic Coding

Total Course Hours: 75 (45 Theory, 30 Lab, 0 Extern) Semester Credits: 4.0

This course is designed to teach diagnosis coding guidelines, conventions, specificity and coding practices, and requirements for patient diagnoses in clinical and outpatient settings using the International Classification of Diseases (ICD) Clinical Modifications (CM). Students have the opportunity to interpret medical record information and apply the correct coding classifications and sequencing.

Prerequisites: Professional Sequence I

MBC 135 – Medical Terminology and Patient Records

Total Course Hours: 30 (0 Theory, 30 Lab, 0 Extern) Semester Credits: 1.0

Using the medical terminology basics learned in CAT 150, this course presents an in-depth study of medical terms within the context of patient records. In order to translate coding and billing scenarios, students will focus on the identification and meaning of medical terminology within the patient record.

Prerequisites: Professional Sequence I

MBC 130 Medical Billing and Reimbursement Methods

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course provides students with a more in-depth look at the processes and procedures related to medical billing. Topics include compliance for medical practices, medical documentation as it pertains to claims and billing, and reimbursement strategies.

Prerequisites: Professional Sequence I

MBC 125 Hospital Diagnostic Medical Coding

Total Course Hours: 75 (45 Theory, 30 Lab, 0 Extern) Semester Credits: 4.0

This course is designed to teach coding guidelines and coding practices for diagnoses in a hospital setting using the International Classification of Diseases (ICD) Clinical Modifications (CM/PCS). Students have the opportunity to interpret hospital medical record information and apply the correct coding classifications and sequencing.

Prerequisites: Professional Sequence I

MBC 115 Electronic Health Records

Total Course Hours: 15 (0 Theory, 15 Lab, 0 Extern) Semester Credits: 0.5

Course content builds upon students' prior knowledge of and experience with electronic health records (EHR). Through focused lab exercises, students practice navigating a basic EHR system intended to prepare them for the types of tasks they will encounter in the medical office environment.

Prerequisites: Professional Sequence I

MBC 140 Procedural Medical Coding

Total Course Hours: 75 (45 Theory, 30 Lab, 0 Extern) Semester Credits: 4.0

This course is designed to teach coding guidelines and coding practices for procedural coding using the Current Procedural Terminology (CPT) and Healthcare Common Procedure Coding System (HCPCS). Students have the opportunity to translate descriptive procedures into numeric code(s) as dictated by current regulations and guidelines.

Prerequisites: Professional Sequence I

MBC 150 Claims Management

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course will allow students to understand and prepare health insurance claims for submission and reimbursement. Students will develop skills in claims management, auditing, and compliance.

Prerequisites: Professional Sequence I

MDA 136 Medical Law and Ethics

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course addresses legal and ethical considerations relevant to the medical office setting. Content includes legal terminology, professional competence, scope of practice rules, and regulatory compliance issues with particular focus on HIPAA and patient confidentiality requirements.

Prerequisites: Professional Sequence I

MBC 180 Certification Review

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This course will focus on helping students prepare to take a coding certification exam.

Prerequisites: Career Prep and Professional Sequences I, II, III, and IV

MBC 200 Medical Insurance, Billing, and Coding Capstone

Total Course Hours: 110 (0 Theory, 30 Lab, 80 Extern) Semester Credits: 2.5

In this course, students will demonstrate their knowledge of billing and coding through an online internship and on-ground externship. As part of the capstone, students will prepare a professional portfolio with evidence of their competencies.

Prerequisites: Career Prep and Professional Sequences I, II, III, and IV

Nursing Assistant/Nurse Aide

Objective: To provide students with didactic and clinical training in preparation for entry-level employment as a nursing assistant or nurse aide. Students have the opportunity to develop professional skills in bed making, patient transfer, and personal care techniques.

Graduates of this program receive a certificate.

Admissions Requirements: Refer to the Admissions information in the Prospective Students section of this catalog.

- Catalog addendum for PMI 2020-2021 Academic Catalog published January 2020 (02.01.2021)

Course #	Course	Theory	Lab	Extern	Credits	Contact Hours

Note: Theory hours and computer-based lab hours may be taught on-ground, online, and/or blended. Lab competencies and skills assessments will be conducted on-ground.

NA 110 Foundational Principles for the Nursing Assistant/Nurse Aide

Total Course Hours: 85 (45 Theory, 40 Lab, 0 Extern) Semester Credits: 4.0

This course covers a wide range of topics that provide the student with an overview of the health care system and the scope of practice of the nursing assistant/nurse aide as a member of the health care team. Content focuses on residents' rights, safety, and well-being. Topics include the language of health care, basic anatomy and physiology, survey of common disorders, and effects of the aging, among others. Also addressed are roles and responsibilities of the nursing assistant/nurse aide in various settings, communication, caring for residents with special care concerns, and hands-on skills development in such areas as documentation, vital signs, specimen collection, and equipment/supplies needed to promote basic daily care of residents.

Prerequisites: None

NA 115 Nursing Assistant/Nurse Aide Externship

Total Course Hours: 40 (0 Theory, 0 Lab, 40 Extern) Semester Credits: 0.5

The externship is an extension of the classroom experience to demonstrate, in an employment setting, the skills learned in the classroom.

Prerequisites: NA 110

Respiratory Therapy

Objective: To provide students with academic and clinical training in preparation for employment as a registered respiratory therapist. Students have the opportunity to develop professional skills in advanced respiratory care techniques (including neonatal, pediatric, and adult special care procedures), general and advanced pharmacology, cardiopulmonary disease, patient assessment and therapeutics.

Graduates of the program receive an Associate Occupational Science Degree and are eligible to apply to take the National Board for Respiratory Care Therapist Multiple-Choice (TMC) Examination. Those who meet the threshold on the TMC are eligible to take the Clinical Simulation Examination (CSE) to obtain the Registered Respiratory Therapist (RRT) credential.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, an interview with the program director and/or faculty is required.

Respiratory Therapy • Course Descriptions

Note: Theory hours and computer-based lab hours may be taught on-ground, online, and/or blended (all noncomputer-based lab hours will be taught on-ground).

MT 103 Math Applications *Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0*

This course provides the student with the fundamentals of college algebra. Content includes fractions, decimals, percents, ratios, and algebraic equations. Additional topics include a review of the metric system, scientific notation, graphing, and dosing calculations.

Prerequisites: None

CHP 111 Respiratory Sciences *Total Course Hours: 70 (70 Theory, 0 Lab, 0 Extern) Semester Credits: 4.5*

This course introduces chemistry concepts of atomic theory, the use of the periodic chart, and chemical bonding and balancing equations. This course will also include an introduction to basic physics, which includes laws of gaseous particles and diffusion, fluid dynamics, relative humidity, temperature, conversion, pressure, and partial pressures.

Prerequisites: None

BIO 127 Anatomy & Physiology *Total Course Hours: 70 (70 Theory, 0 Lab, 0 Extern) Semester Credits: 4.5*

The objective of this course is to provide the student with knowledge of the structure and function of the human body. Cells, tissues, and organs are described and discussed as components of their respective systems. Course content includes the structure, function, and medical terminology for the integumentary, musculoskeletal, endocrine, cardiovascular (including blood, heart, blood vessels, and circulation), lymphatic, immune, respiratory, digestive, urinary, and reproductive systems.

Prerequisites: None

MB 120 Microbiology *Total Course Hours: 20 (20 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0*

This course presents the basics of microbiology. Topics include bacteriology, virology, mycology, equipment processing, and infection control in the clinical setting.

Prerequisites: None

AP 116 Cardiac Anatomy & Physiology *Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0*

Provides an in-depth study of the heart, including the functions of the heart, its components, and the chemical and physical processes involved.

Prerequisites: None

AP 118 Pulmonary Anatomy & Physiology *Total Course Hours: 75 (75 Theory, 0 Lab, 0 Extern) Semester Credits: 5.0*

The course provides an in-depth study of the lungs and their functions, including pulmonary structure and the physiology of gas transport. Topics include the anatomy of the airways and thorax and its relation to the function of gas movement in and out of the lungs. Pressure gradients, diffusion, perfusion, and ventilation are studied in detail. The course will use formulae for arterial (CaO₂), alveolar (PAO₂), venous (CvO₂) and capillary (CcO₂) blood flow and gas exchange, oxygen delivery (DO₂), and consumption (VO₂). A detailed review of acid-base balances and interpretation of arterial blood gases is also an integral part of the course.

Prerequisites: None

PC 122 Patient Assessment *Total Course Hours: 35 (20 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5*

Introduces the techniques of observation, palpation, percussion and auscultation, and performance of vital signs for head-to-toe patient evaluation. Also introduced are communication techniques for interaction with patients and their families.

Prerequisites: None

HST 205 Nevada History and US Constitution *Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0*

A survey of the history of the state of Nevada with focus on mining, gaming, government and recent developments in population expansion. The course will review the Nevada State Constitution and legal ramifications. The essentials of the US Constitution will also be examined. The course is designed to meet Nevada History/US Constitution Associate degree requirement. *(Las Vegas Campus only)*

Prerequisites: None

RX 151 Pharmacology *Total Course Hours: 40 (40 Theory, 0 Lab, 0 Extern) Semester Credits: 2.5*

Presents major pharmacological agents used in treating cardiopulmonary diseases. Provides knowledge of pharmaceutical classification, drug action and modes of administration, the metric system, medications, and special handling procedures.

Prerequisites: AP 116 Cardiac Anatomy & Physiology and AP 118 Pulmonary Anatomy & Physiology

RES 131 Cardiopulmonary Diagnostics *Total Course Hours: 70 (40 Theory, 30 Lab, 0 Extern) Semester Credits: 3.5*

This course presents an introduction to basic cardiopulmonary diagnostic testing. Topics include but are not limited to ABGs, ECGs, CXR, and pulmonary function testing, which includes the machines, equipment, and accessories utilized for diagnosis.

Prerequisites: AP 116 Cardiac Anatomy & Physiology and AP 118 Pulmonary Anatomy & Physiology

RES 141 Cardiopulmonary Diseases *Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0*

In-depth study of cardiopulmonary diseases, the etiology of each disease, the clinical manifestations of each disease, and the appropriate management of the disease by the respiratory care practitioner.

Prerequisites: AP 116 Cardiac Anatomy & Physiology and AP 118 Pulmonary Anatomy & Physiology

RES 160 Respiratory Pediatrics *Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0*

The focus of this course is to introduce assessment skills needed to treat the pediatric patient and to study diseases and appropriate therapies and resuscitative procedures particular to pediatrics.

Prerequisites: AP 116 Cardiac Anatomy & Physiology and AP 118 Pulmonary Anatomy & Physiology

Respiratory Therapy • Course Descriptions

RES 180 Respiratory Therapeutics I *Total Course Hours: 55 (30 Theory, 25 Lab, 0 Extern) Semester Credits: 2.5*

The course provides an introduction to medical gas, storage systems, oxygen devices, monitoring systems, and the use of hyperbaric oxygen related to respiratory care.

Prerequisites: AP 116 Cardiac Anatomy & Physiology and AP 118 Pulmonary Anatomy & Physiology

RES 185 Respiratory Therapeutics II *Total Course Hours: 90 (40 Theory, 50 Lab, 0 Extern) Semester Credits: 4.0*

This course covers the various therapeutic modalities used in respiratory care. Indications, side effects, hazards, and basis for application are stressed. Specific focus is on technologies for airway clearance and hyperinflation.

Prerequisites: AP 116 Cardiac Anatomy & Physiology and AP 118 Pulmonary Anatomy & Physiology

RES 190 Respiratory Care Practicum I *Total Course Hours: 252 (0 Theory, 0 Lab, 252 Extern) Semester Credits: 5.5*

This course addresses basic therapeutic modalities used by respiratory care practitioners in a hospital, which may include emergency room, medical/surgical, and pediatric general floor clinical settings. Included are modalities of aerosol therapy, humidity therapy, hyperinflation, oxygen therapy, chest physiotherapy, airway care, and arterial blood gas sampling and analysis. Learners will assess, analyze, and apply therapeutic modalities based upon patient outcomes.

Prerequisites: Semesters I and II courses

RES 201 Pulmonary Rehabilitation & Wellness *Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0*

This course presents the basic elements required in designing the components of a cardiopulmonary rehabilitation program. Topics include community and individual health promotion, patient education, family training, smoking cessation programs, and how to deal with tobacco issues. Instruction also focuses on the importance and benefits of home health care.

Prerequisites: Semesters I and II courses

RES 211 Critical Care Techniques *Total Course Hours: 55 (40 Theory, 15 Lab, 0 Extern) Semester Credits: 3.0*

Instructional focus is centered on emergency management and maintenance of artificial airways according to AHACLS standards.

Prerequisites: Semesters I and II courses

RES 242 Emergency Care *Total Course Hours: 50 (35 Theory, 15 Lab, 0 Extern) Semester Credits: 2.5*

This course provides knowledge of basic and advanced life support, triage techniques, and identification of pathophysiology. Topics include emergency care applications and management of drowning, hypo- and hyperthermia, shock, poisons, drug overdose, burns, diving accidents, and other types of trauma. *Prerequisites:* Semesters I and II courses

RES 222 Advanced Patient Assessment *Total Course Hours: 50 (30 Theory, 20 Lab, 0 Extern) Semester Credits: 2.5*

This course provides knowledge and application of advanced patient assessment techniques and skills in respiratory therapy. Interpretation of laboratory data and the nutritional status of the critical care patient are stressed.

Prerequisites: Semesters I and II courses

RES 251 Advanced Pharmacology *Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0*

This course provides a review of respiratory specific drugs, cardiac drugs, sedatives, and pain maintenance drugs as they relate to cardiopulmonary function. Also addressed are vaccinations currently recommended for adult respiratory patients.

Prerequisites: Semesters I, II, and III courses

RES 231 Advanced Pulmonary Diagnostics *Total Course Hours: 40 (40 Theory, 0 Lab, 0 Extern) Semester Credits: 2.5*

An in-depth course that provides knowledge of arterial blood gas analysis, pulmonary function testing, chest radiography, cardiac stress testing, and assessment of sleep disorders.

Prerequisites: Semesters I, II, and III courses

RES 281 Introduction to Mechanical Ventilation *Total Course Hours: 120 (60 Theory, 60 Lab, 0 Extern) Semester Credits: 6.0*

This course introduces the indications, mechanics, and physiologic effects of mechanical ventilation. Topics include initiation, monitoring, management, and discontinuance of mechanical ventilation.

Prerequisites: Semesters I, II, and III courses

RES 290 Respiratory Care Practicum II *Total Course Hours: 252 (0 Theory, 0 Lab, 252 Extern) Semester Credits: 5.5*

Structured to provide the learner with opportunities to apply respiratory care modalities in intensive care settings. Included are modalities for pulmonary functions, polysomnography, arterial blood gas sampling and interpretation of results, airway care, bronchoscopy, and ventilator management for adult and pediatric patients. The learner will have the opportunity to assess, analyze, and apply therapeutic modalities based upon patient outcomes, using appropriate AARC CPG-based upon ventilator management.

Prerequisites: Semesters I, II, and III courses and RES 281 Introduction to Mechanical Ventilation

CCM 211 Professional Communications *Total Course Hours: 25 (25 Theory, 0 Lab, 0 Extern) Semester Credits: 1.5*

This course provides a review of the communication skills and practices related to seeking employment and advancing in the workplace. Topics include different modes of effective professional communication, job market exploration, résumé writing and preparation of cover letters, the importance of references and recommendations, and the interviewing process. Emphasis is placed on customer service, supervision, job success, and ongoing professional advancement.

Prerequisites: Semesters I, II, III, and IV courses

RES 270 Cardiovascular Diagnostics *Total Course Hours: 50 (50 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0*

An in-depth course designed to instruct the learner on the application and analysis of electrocardiogram testing, EST interpretation, and hemodynamic monitoring.

Prerequisites: Semesters I, II, III, and IV courses

Respiratory Therapy • Course Descriptions

RES 260 Respiratory Perinatology *Total Course Hours: 50 (50 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0*

Provides an in-depth study of normal neonatal anatomy and physiology, labor and delivery, high-risk infants, resuscitation, mechanical ventilation, and common neonatal pathologies and modalities for their treatment.

Prerequisites: Semesters I, II, III, and IV courses

RES 287 Advanced Mechanical Ventilation *Total Course Hours: 80 (50 Theory, 30 Lab, 0 Extern) Semester Credits: 4.0*

This course provides the student with knowledge of advanced concepts and applications of mechanical ventilation including high frequency ventilation to adult, pediatric, and neonatal patients.

Prerequisites: Semesters I, II, III, and IV courses

RES 295 Respiratory Care Practicum III *Total Course Hours: 216 (0 Theory, 0 Lab, 216 Extern) Semester Credits: 4.5*

This course involves clinical application of the diagnostic and therapeutic modalities presented in the classroom and lab setting. Emphasis is placed on neonatal, pediatric and adult mechanical ventilation, airway management, and cardiopulmonary monitoring of patients.

Prerequisites: Semesters I, II, III, IV, and V courses

RES 275 NBRC Review Course *Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0*

This course is designed to prepare the learner for the National Board for Respiratory Care Therapist Multiple-Choice Examination (TMC) and the Clinical Simulation Examination (CSE).

Prerequisites: Semesters I, II, III, and IV courses

Respiratory Therapy (Houston Campus)

Objective: To provide students with academic and clinical training in preparation for employment as a registered respiratory therapist. Students have the opportunity to develop professional skills in advanced respiratory care techniques (including neonatal, pediatric, and adult special care procedures), general and advanced pharmacology, cardiopulmonary disease, patient assessment and therapeutics.

Graduates of the program receive an Associate of Applied Science Degree and are eligible to apply to take the National Board for Respiratory Care Therapist Multiple-Choice (TMC) Examination. Those who meet the threshold on the TMC are eligible to take the Clinical Simulation Examination (CSE) to obtain the Registered Respiratory Therapist (RRT) credential.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, an interview with the program director and/or faculty is required.

Respiratory Therapy (Houston Campus) • Course Descriptions

Note: Theory hours and computer-based lab hours may be taught on-ground, online, and/or blended (all noncomputer-based lab hours will be taught on-ground).

CCB 125 Computer Applications *Total Course Hours: 25 (25 Theory, 0 Lab, 0 Extern) Semester Credits: 1.5*

This course provides an overview of the operation of computers and their applications. Topics include but are not limited to review of common hardware and software to incorporate basic word processing, spreadsheets, presentation software, internet resources, and computer safety, privacy, and security. Students will utilize technology to retrieve, evaluate, and synthesize information from diverse sources and points of view.

Prerequisites: None

MT 104 Math Applications *Total Course Hours: 35 (35 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0*

This course provides the student with the fundamentals of college algebra. Content includes fractions, decimals, percents, ratios, and algebraic equations. Additional topics include a review of the metric system, scientific notation, graphing, and dosing calculations.

Prerequisites: None

CHP 112 General Sciences *Total Course Hours: 35 (35 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0*

This course introduces chemistry concepts of atomic theory, the use of the periodic chart, and chemical bonding and balancing equations. This course will also include an introduction to basic physics, which includes laws of gaseous particles and diffusion, fluid dynamics, relative humidity, temperature, conversion, pressure, and partial pressures.

Prerequisites: None

BIO 127 Anatomy & Physiology *Total Course Hours: 70 (70 Theory, 0 Lab, 0 Extern) Semester Credits: 4.5*

The objective of this course is to provide the student with knowledge of the structure and function of the human body. Cells, tissues, and organs are described and discussed as components of their respective systems. Course content includes the structure, function, and medical terminology for the integumentary, musculoskeletal, endocrine, cardiovascular (including blood, heart, blood vessels, and circulation), lymphatic, immune, respiratory, digestive, urinary, and reproductive systems.

Prerequisites: None

MB 120 Microbiology *Total Course Hours: 20 (20 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0*

This course presents the basics of microbiology. Topics include bacteriology, virology, mycology, equipment processing, and infection control in the clinical setting.

Prerequisites: None

AP 116 Cardiac Anatomy & Physiology *Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0*

Provides an in-depth study of the heart, including the functions of the heart, its components, and the chemical and physical processes involved

Prerequisites: None

AP 118 Pulmonary Anatomy & Physiology *Total Course Hours: 75 (75 Theory, 0 Lab, 0 Extern) Semester Credits: 5.0*

The course provides an in-depth study of the lungs and their functions, including pulmonary structure and the physiology of gas transport. Topics include the anatomy of the airways and thorax and its relation to the function of gas movement in and out of the lungs. Pressure gradients, diffusion, perfusion, and ventilation are studied in detail. The course will use formulae for arterial (CaO₂), alveolar (PAO₂), venous (CvO₂) and capillary (CcO₂) blood flow and gas exchange, oxygen delivery (DO₂), and consumption (VO₂). A detailed review of acid-base balances and interpretation of arterial blood gases is also an integral part of the course.

Prerequisites: None

PC 122 Patient Assessment *Total Course Hours: 35 (20 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5*

Introduces the techniques of observation, palpation, percussion and auscultation, and performance of vital signs for head-to-toe patient evaluation. Also introduced are communication techniques for interaction with patients and their families.

Prerequisites: None

RX 151 Pharmacology *Total Course Hours: 40 (40 Theory, 0 Lab, 0 Extern) Semester Credits: 2.5*

Presents major pharmacological agents used in treating cardiopulmonary diseases. Provides knowledge of pharmaceutical classification, drug action and modes of administration, the metric system, medications, and special handling procedures.

Prerequisites: AP 116 Cardiac Anatomy & Physiology and AP 118 Pulmonary Anatomy & Physiology

RES 131 Cardiopulmonary Diagnostics *Total Course Hours: 70 (40 Theory, 30 Lab, 0 Extern) Semester Credits: 3.5*

This course presents an introduction to basic cardiopulmonary diagnostic testing. Topics include but are not limited to ABGs, ECGs, CXR, and pulmonary function testing, which includes the machines, equipment, and accessories utilized for diagnosis.

Prerequisites: AP 116 Cardiac Anatomy & Physiology and AP 118 Pulmonary Anatomy & Physiology

RES 141 Cardiopulmonary Diseases *Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0*

In-depth study of cardiopulmonary diseases, the etiology of each disease, the clinical manifestations of each disease, and the appropriate management of the disease by the respiratory care practitioner.

Prerequisites: AP 116 Cardiac Anatomy & Physiology and AP 118 Pulmonary Anatomy & Physiology

RES 160 Respiratory Pediatrics *Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0*

The focus of this course is to introduce assessment skills needed to treat the pediatric patient and to study diseases and appropriate therapies and resuscitative procedures particular to pediatrics.

Prerequisites: AP 116 Cardiac Anatomy & Physiology and AP 118 Pulmonary Anatomy & Physiology

Respiratory Therapy (Houston Campus) • Course Descriptions

RES 180 Respiratory Therapeutics I *Total Course Hours: 55 (30 Theory, 25 Lab, 0 Extern) Semester Credits: 2.5*

The course provides an introduction to medical gas, storage systems, oxygen devices, monitoring systems, and the use of hyperbaric oxygen related to respiratory care.

Prerequisites: AP 116 Cardiac Anatomy & Physiology and AP 118 Pulmonary Anatomy & Physiology

RES 185 Respiratory Therapeutics II *Total Course Hours: 90 (40 Theory, 50 Lab, 0 Extern) Semester Credits: 4.0*

This course covers the various therapeutic modalities used in respiratory care. Indications, side effects, hazards, and basis for application are stressed. Specific focus is on technologies for airway clearance and hyperinflation.

Prerequisites: AP 116 Cardiac Anatomy & Physiology and AP 118 Pulmonary Anatomy & Physiology

CLE 186 Law and Ethics *Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0*

This course addresses basic legal and ethical principles and practices as they relate to medical professions. Topics include scope of practice, ethical considerations, legal issues, medical negligence, and the workplace. Students will examine aspects of service delivery that affect quality of patient care, including ethical and legal decision-making.

Prerequisites: Semesters I and II courses

CCM 160 Communications *Total Course Hours: 25 (25 Theory, 0 Lab, 0 Extern) Semester Credits: 1.5*

This course provides an overview of the concepts and components of communication. Topics include the effective use of oral, written, and electronic communications skills, verbal and nonverbal communication, and intercultural communication. Students will develop critical-thinking skills as they locate reliable sources of information and evaluate and synthesize that information in written format.

Prerequisites: Semesters I and II courses

RES 190 Respiratory Care Practicum I *Total Course Hours: 252 (0 Theory, 0 Lab, 252 Extern) Semester Credits: 5.5*

This course addresses basic therapeutic modalities used by respiratory care practitioners in a hospital, which may include emergency room, medical/surgical, and pediatric general floor clinical settings. Included are modalities of aerosol therapy, humidity therapy, hyperinflation, oxygen therapy, chest physiotherapy, airway care, and arterial blood gas sampling and analysis. Learners will assess, analyze, and apply therapeutic modalities based upon patient outcomes.

Prerequisites: Semesters I and II courses

RES 201 Pulmonary Rehabilitation & Wellness *Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0*

This course presents the basic elements required in designing the components of a cardiopulmonary rehabilitation program. Topics include community and individual health promotion, patient education, family training, smoking cessation programs, and how to deal with tobacco issues. Instruction also focuses on the importance and benefits of home health care.

Prerequisites: Semesters I and II courses

RES 211 Critical Care Techniques *Total Course Hours: 55 (40 Theory, 15 Lab, 0 Extern) Semester Credits: 3.0*

Instructional focus is centered on emergency management and maintenance of artificial airways according to AHA ACLS standards.

Prerequisites: Semesters I and II courses

RES 242 Emergency Care *Total Course Hours: 50 (35 Theory, 15 Lab, 0 Extern) Semester Credits: 2.5*

This course provides knowledge of basic and advanced life support, triage techniques, and identification of pathophysiology. Topics include emergency care applications and management of drowning, hypo- and hyperthermia, shock, poisons, drug overdose, burns, diving accidents, and other types of trauma.

Prerequisites: Semesters I and II courses

RES 222 Advanced Patient Assessment *Total Course Hours: 50 (30 Theory, 20 Lab, 0 Extern) Semester Credits: 2.5*

This course provides knowledge and application of advanced patient assessment techniques and skills in respiratory therapy. Interpretation of laboratory data and the nutritional status of the critical care patient are stressed.

Prerequisites: Semesters I and II courses

RES 251 Advanced Pharmacology *Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0*

This course provides a review of respiratory specific drugs, cardiac drugs, sedatives, and pain maintenance drugs as they relate to cardiopulmonary function. Also addressed are vaccinations currently recommended for adult respiratory patients.

Prerequisites: Semesters I, II, and III courses

RES 231 Advanced Pulmonary Diagnostics *Total Course Hours: 40 (40 Theory, 0 Lab, 0 Extern) Semester Credits: 2.5*

An in-depth course that provides knowledge of arterial blood gas analysis, pulmonary function testing, chest radiography, cardiac stress testing, and assessment of sleep disorders.

Prerequisites: Semesters I, II, and III courses

RES 281 Introduction to Mechanical Ventilation *Total Course Hours: 120 (60 Theory, 60 Lab, 0 Extern) Semester Credits: 6.0*

This course introduces the indications, mechanics, and physiologic effects of mechanical ventilation. Topics include initiation, monitoring, management, and discontinuance of mechanical ventilation.

Prerequisites: Semesters I, II, and III courses

Respiratory Therapy (Houston Campus) • Course Descriptions

RES 290 Respiratory Care Practicum II *Total Course Hours: 252 (0 Theory, 0 Lab, 252 Extern) Semester Credits: 5.5*

Structured to provide the learner with opportunities to apply respiratory care modalities in intensive care settings. Included are modalities for pulmonary functions, polysomnography, arterial blood gas sampling and interpretation of results, airway care, bronchoscopy, and ventilator management for adult and pediatric patients. The learner will have the opportunity to assess, analyze, and apply therapeutic modalities based upon patient outcomes, using appropriate AARC CPG-based upon ventilator management.

Prerequisites: Semesters I, II, and III courses and RES 281 Introduction to Mechanical Ventilation

CCM 211 Professional Communications *Total Course Hours: 25 (25 Theory, 0 Lab, 0 Extern) Semester Credits: 1.5*

This course provides a review of the communication skills and practices related to seeking employment and advancing in the workplace. Topics include different modes of effective professional communication, job market exploration, résumé writing and preparation of cover letters, the importance of references and recommendations, and the interviewing process. Emphasis is placed on customer service, supervision, job success, and ongoing professional advancement.

Prerequisites: Semesters I, II, III, and IV courses

RES 270 Cardiovascular Diagnostics *Total Course Hours: 50 (50 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0*

An in-depth course designed to instruct the learner on the application and analysis of electrocardiogram testing, EST interpretation, and hemodynamic monitoring.

Prerequisites: Semesters I, II, III, and IV courses

RES 260 Respiratory Perinatology *Total Course Hours: 50 (50 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0*

Provides an in-depth study of normal neonatal anatomy and physiology, labor and delivery, high-risk infants, resuscitation, mechanical ventilation, and common neonatal pathologies and modalities for their treatment.

Prerequisites: Semesters I, II, III, and IV courses

RES 287 Advanced Mechanical Ventilation *Total Course Hours: 80 (50 Theory, 30 Lab, 0 Extern) Semester Credits: 4.0*

This course provides the student with knowledge of advanced concepts and applications of mechanical ventilation including high frequency ventilation to adult, pediatric, and neonatal patients.

Prerequisites: Semesters I, II, III, and IV courses

RES 295 Respiratory Care Practicum III *Total Course Hours: 216 (0 Theory, 0 Lab, 216 Extern) Semester Credits: 4.5*

This course involves clinical application of the diagnostic and therapeutic modalities presented in the classroom and lab setting. Emphasis is placed on neonatal, pediatric, and adult mechanical ventilation, airway management, and cardiopulmonary monitoring of patients.

Prerequisites: Semesters I, II, III, IV, and V courses

RES 275 NBRC Review Course *Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0*

This course is designed to prepare the learner for the National Board for Respiratory Care Therapist Multiple-Choice Examination (TMC) and the Clinical Simulation Examination (CSE).

Prerequisites: Semesters I, II, III, and IV courses

Veterinary Technician

Objective: To develop in students the personal traits and professional skills needed to perform as competent entry-level veterinary technicians (VT). The program provides students with knowledge of medical terminology, anatomy and physiology, examination techniques, and radiologic, dental, and surgical procedures as they relate to veterinary care.

Graduates of this program receive an Associate of Applied Science Degree. Graduates of accredited programs are eligible to take the Veterinary Technician National Examination (VTNE) and applicable state board examinations.

Admissions Requirements: In addition to the Admissions requirements and Transfer Credit criteria listed in the Prospective Students section of this catalog, an interview with the program director and/or faculty is required. Applicants must provide evidence of a certificate/diploma from a veterinary assistant program and upon evaluation may successfully transfer 30 credits. Applicants with less than one year of experience as a veterinary assistant must have a GPA of 3.0.

Veterinary Technician • Course Descriptions

Courses that may be offered on-ground, online, and/or blended: CCM 111 Communications, MTH 129 Math Applications, SCI 120 Foundations in Biology and Chemistry, VTT 176 Introduction to Veterinary Technology, VTT 262 Veterinary Technician Seminar, and HST 205 Nevada History and US Constitution (Las Vegas Campus Only).

CCM 111 Communications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with experience with the wide range of communication skills necessary for success in health professions. Verbal and nonverbal communication, technical and professional writing, speaking and listening critically, health literacy, evaluating and synthesizing material from diverse cultural sources and points of view, and other topics. Legal and ethical issues in communication are also addressed.

Prerequisites: None

MTH 129 Math Applications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with the fundamentals of college algebra, and includes common formulae and calculations used in applied settings. Topics include fractions, decimals, linear equations, basic statistics, and pharmaceutical math.

Prerequisites: None

SCI 120 Foundations in Biology and Chemistry

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course provides an introduction to the fundamentals of chemistry and various life sciences as they relate to veterinary technology. Topics include inorganic and organic chemistry, biochemistry, cellular biology, and the biology of various life processes. This course provides a foundation for applied coursework in veterinary technology.

Prerequisites: None

VTT 176 Introduction to Veterinary Technology

Total Course Hours: 25 (25 Theory, 0 Lab, 0 Extern) Semester Credits: 1.5

This course presents the student with an introduction to veterinary science and the role of the credentialed veterinary technician on the veterinary team. Topics include the history of the field, scope of practice, ethical and legal issues, professionalism, and a survey of employment opportunities. This course provides the opportunity to learn and adopt methods and life skills that aid success in a professional degree program and the workplace and promote lifelong learning.

Prerequisites: None

VTT 222 Food and Fiber Animal

Total Course Hours: 55 (45 Theory, 10 Lab, 0 Extern) Semester Credits: 3.0

This course introduces the veterinary nursing student to livestock and animal science. This includes an overview of various segments of the livestock industry. Building on previous anatomy and physiology coursework, the primary focus of the course is the nursing and medicine of food animals. Coursework and lab exercises cover restraint, behavior, husbandry, nursing care, sampling techniques, bandaging, and radiography as well as medicine and a review of common surgeries of food and fiber species (bovine, caprine, ovine, camelid, and swine).

Prerequisites: Professional Sequence I

VTT 224 Diagnostic Imaging for Veterinary Technicians

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course furthers the training in radiology, begun in veterinary assistantship, with advanced studies in screens, positioning, and contrast studies. Students will learn to utilize a portable radiology machine. The course introduces the student to basic ultrasound techniques and digital radiography.

Prerequisites: Professional Sequence I

VTT 226 Small Animal Nursing

Total Course Hours: 75 (15 Theory, 60 Lab, 0 Extern) Semester Credits: 3.0

This course provides advanced training in various nursing procedures within the veterinary technician's scope of practice. Topics include catheterization, aspiration, centesis, endotracheal and gastric intubation, rectal and reproductive procedures, sensory organ exams and testing, and bandaging techniques.

Prerequisites: Professional Sequence I

VTT 232 Laboratory Animal Science

Total Course Hours: 35 (20 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course provides an overview of the principles of laboratory animal research and the role of the veterinary technician in the husbandry and nursing of small mammalian species as well as participation in research activities. Students will work with selected species that may include mice, rats, guinea pigs, and rabbits as well as other small mammals. The use of primates and nonmammalian species will be discussed.

Prerequisites: Professional Sequence I

Veterinary Technician • Course Descriptions

VTT 234 Laboratory Procedures for Veterinary Technicians

Total Course Hours: 65 (30 Theory, 35 Lab, 0 Extern) Semester Credits: 3.0

This course focuses on diagnostic tests performed in the veterinary laboratory and includes discussion of various diseases and disorders of the body systems. Experience in bacteriology, endocrinology, hematology, serology, and parasitology is part of the curriculum.

Prerequisites: Professional Sequence I

VTT 236 Anatomy and Physiology for Veterinary Technicians

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This course provides an in-depth analysis of the anatomy and physiology of the domestic species, with focus on the cat and dog. In the lab sessions, students will identify anatomical features and demonstrate an understanding of body function. Necropsy technique is mandatory.

Prerequisites: Professional Sequence I

VTT 242 Dentistry Techniques

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course presents the tasks and techniques within the scope of practice of a veterinary technician. Included are examination, cleaning, scaling, polishing, and in some jurisdictions, extractions. Tooth anatomy and terminology is reviewed as well as the common veterinary dental diseases and disorders. Also addressed are protocols for veterinary dental radiography and assisting the DVM in advanced techniques.

Prerequisites: Professional Sequence I

VTT 244 Pharmacology for Veterinary Technicians

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course focuses on those pharmacological topics within the scope of the veterinary technician. Topics include a review of pharmaceutical math and a detailed examination of the physiology and chemistry of drug effects on the nervous system. Also presented is a discussion of the proper protocol for many injectable and inhalant anesthetics, analgesics, and anti-inflammatories. Chemotherapeutics, antimicrobial, antiparasitic, and euthanasia agents are also addressed.

Prerequisites: Professional Sequence I

VTT 246 Surgical Nursing for Veterinary Technicians

Total Course Hours: 70 (30 Theory, 40 Lab, 0 Extern) Semester Credits: 3.0

In defining the veterinary technician's role in surgical nursing, the student will be exposed to the intricacies of the anesthesia machine and receive training in setting, adjusting, and maintaining the unit. The student will evaluate, medicate, anesthetize, prepare, and monitor a variety of surgical patients as well as learn the protocol as a sterile scrub nurse. A review and demonstration of various monitoring equipment is provided, and the student will participate in several surgeries of various intensities.

Prerequisites: Professional Sequence I

VTT 248 Clinic Surgery and Lab

Total Course Hours: 15 (0 Theory, 15 Lab, 0 Extern) Semester Credits: 0.5

This course provides opportunities for the students to advance their experience with surgical and anesthetic procedures and protocols through observation and applied practice. Students will deepen their understanding of laboratory and surgical procedures from assessment to follow-up care. Students will practice a variety of lab skills appropriate to their level of study.

Prerequisites: Professional Sequence I

VTT 252 Exotic Animal Medicine and Nursing

Total Course Hours: 30 (15 Theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course presents an overview of the various exotic animals that are an increasing part of the pet population. The focus is on the anatomy, behavior, nutrition, diseases, and restraint of various reptilian, amphibian, and avian groups as well as some of the exotic small mammals. Lab activities will include the restraint and physical examination of these species. Basic nursing techniques of these species are addressed.

Prerequisites: Professional Sequence I

VTT 254 Equine Medicine and Nursing

Total Course Hours: 60 (45 Theory, 15 Lab, 0 Extern) Semester Credits: 3.5

This course introduces the veterinary nursing student to equine medicine and the role of the veterinary technician in the equine practice. Lecture and lab activities develop a more advanced understanding of equine anatomy and physiology and covers restraint, behavior, husbandry, nursing and sampling techniques, bandaging, and radiography. Content includes the common causes of lameness in the horse as well as the more commonly performed surgical procedures. Toxicological principles and the more common diseases and disorders of the horse will also be discussed.

Prerequisites: Professional Sequence I

Veterinary Technician • Course Descriptions

VTT 256 Emergency Procedures

Total Course Hours: 40 (30 Theory, 10 Lab, 0 Extern) Semester Credits: 2.0

This course covers the role of the veterinary technician in emergency procedures, both at an emergency clinic and at the veterinary hospital. Topics include assessment and triage, shock pathophysiology and treatment, trauma, CPR review, toxicology, anesthetic and surgical emergencies, and the veterinary technician's role in maintenance of the veterinary emergency crash kit.

Prerequisites: Professional Sequence I

VTT 258 Clinic Surgery and Lab

Total Course Hours: 30 (0 Theory, 30 Lab, 0 Extern) Semester Credits: 1.0

This course provides opportunities for the students to advance their experience with surgical and anesthetic procedures and protocols through observation and applied practice. Students will deepen their understanding of laboratory and surgical procedures from assessment to follow-up care. Students will practice a variety of lab skills appropriate to their level of study.

Prerequisites: Professional Sequence I

VTT 262 Veterinary Technician Seminar

Total Course Hours: 15 (15 Theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course is designed to prepare the learner for the Veterinary Technician National Examination (VTNE). Content includes a comprehensive review of program content and the opportunity to participate in a simulated VTNE exam.

Prerequisites: Professional Sequences I through V

VTT 291 Externship

Total Course Hours: 225 (0 Theory, 0 Lab, 225 Extern) Semester Credits: 5.0

This course provides students with opportunities to apply professional skills learned in the classroom.

Prerequisites: Professional Sequences I through V and all laboratory competencies

HST 205 Nevada History and US Constitution (Las Vegas Campus Only)

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

A survey of the history of the state of Nevada with focus on mining, gaming, government and recent developments in population expansion. The course will review the Nevada State Constitution and legal ramifications. The essentials of the US Constitution will also be examined. The course is designed to meet Nevada History/US Constitution associate degree requirements.

Prerequisites: None

A graphic with the words "Success Story" written in a large, black, cursive script. The text is centered on a white rectangular background, which is set against a light gray background.

After working at an animal shelter for about 10 years, I realized I wanted to become a veterinary technician. I did my research online and found that PMI's Veterinary Technician Program had a good reputation, and their morning classes worked perfectly with my schedule. I was able to be a single mom, go to classes in the morning, and work in the afternoon. I had previous degrees that I didn't use, and I've always enjoyed learning, but PMI's program was very accelerated. I learned so much so fast. My instructors were great and gave us really good feedback. I realize I was a bit of a late bloomer in deciding to go back to school at age 34, but I'm so glad I did.

During my externship, I worked at Veterinary Specialty Center where I got great experience ... and a job! I recently became the internal medicine lead technician. I love my job in internal medicine, and I'm always learning. In fact, I am working toward my veterinary technician specialty license and spend my vacation time in Mexico to participate in spay and neuter clinics. I have to say, it feels good to be surrounded by these graduates because I know they are well-trained and knowledgeable. This program really does set you up for success.

Joanna Horne
Associate Degree, Veterinary Technician, Seattle Campus

Veterinary Technician—El Paso Campus

Objective: To develop in students the personal traits and professional skills needed to perform as competent entry-level veterinary technicians (VT). The program provides students with knowledge of medical terminology, anatomy and physiology, examination techniques, and radiologic, dental, and surgical procedures as they relate to veterinary care.

Graduates of this program receive an Associate of Applied Science Degree. Graduates of accredited programs are eligible to take the Veterinary Technician National Examination (VTNE) and applicable state board examinations.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, an interview with the program director and/or faculty is required.

Veterinary Technician (El Paso) • Course Descriptions

Note: Theory hours and computer-based lab hours may be taught on-ground, online, and/or blended (all noncomputer-based lab hours will be taught on-ground).

CCB 115 Computer Basics

Total Course Hours: 15 (15 theory, 0 Lab, 0 Extern) Semester Credits: 1.0

Through demonstration and hands-on experience, students will gain a general understanding of computers. Hardware, software, Microsoft products, and internet use are explained.

Prerequisites: None

VTA 127 Comparative Veterinary Anatomy, Physiology, and Terminology

Total Course Hours: 60 (60 theory, 0 Lab, 0 Extern) Semester Credits: 4.0

An introductory study comparing the structures, functions, and disorders of the body systems of various domesticated animals and selected exotic animals. Students will develop their understanding of medical terminology to encompass common veterinary medical terms and abbreviations.

Prerequisites: None

VTA 130 Clinical Lab Procedures and Pathology

Total Course Hours: 75 (15 theory, 60 Lab, 0 Extern) Semester Credits: 3.0

This course is an investigation into the basic laboratory procedures to determine the presence of a variety of pathogens of importance in the veterinary field. The student will have the opportunity to demonstrate collection procedures. Topics include laboratory equipment, hematology, urine and fecal analysis, parasitology, and the basics of clinical microbiology. Assisting with necropsy is also introduced.

Prerequisites: None

VTA 132 Clinical Proficiency

Total Course Hours: 30 (0 theory, 30 Lab, 0 Extern) Semester Credits: 1.0

This course provides the student with opportunities to apply the concepts covered in VTA 127, VTA 130, and VTA 165. Application includes competency/performance testing in simulated and interactive modalities.

Prerequisites: None

VTA 165 Pharmacology and Principles of Anesthesia

Total Course Hours: 45 (45 theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides an introduction to the classification of medications, including classes and routes of administration and their effects on body systems. Instruction reviews the role of the veterinary assistant in assisting with the preparations for and restraint of an animal for anesthesia. Practice in pharmacological math is aided by a review of metric and conventional measurements and the use of dimensional analysis.

Prerequisites: None

MT 100 Math Fundamentals

Total Course Hours: 30 (30 theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course reviews basic mathematical skills including whole numbers, fractions, decimals, proportions, ratios, percentages, combined applications, and measurement systems. It provides students with a solid foundation for higher math concepts.

Prerequisites: None

VTA 110 Office Procedures

Total Course Hours: 15 (15 theory, 0 Lab, 0 Extern) Semester Credits: 1.0

Students are introduced to facility types, paper and electronic record keeping, charting, client service and scheduling, OSHA safety regulations, and the role of the veterinary assistant in the veterinary clinic. This course emphasizes the importance of professionalism in communications with clients, coworkers, and potential employers.

Prerequisites: None

VTA 133 Clinical Proficiency

Total Course Hours: 30 (0 theory, 30 Lab, 0 Extern) Semester Credits: 1.0

This course provides the student with opportunities to apply the concepts covered in VTA 160 and VTA 170. Application includes competency/performance testing in simulated and interactive settings.

Prerequisites: None

VTA 150 Animal Life Stages, Nutrition, and Husbandry

Total Course Hours: 45 (0 theory, 45 Lab, 0 Extern) Semester Credits: 3.0

This course covers animal life stages from birth to old age and issues related to animal death. Special attention is given to preventive health care and the behavioral, dietary, housing, and social needs throughout the lifetime of the canine, feline, equine, and exotic species.

Prerequisites: None

VTA 160 Animal Nursing and Diagnostic Imaging

Total Course Hours: 75 (15 theory, 60 Lab, 0 Extern) Semester Credits: 3.0

This course covers the basics of animal nursing including restraint techniques, physical exam and vital sign monitoring, ear and eye care, wound care and bandaging, and the basics of first aid and emergency medicine for small animals. Also addressed is the role of the veterinary assistant in the safe use of and positioning for diagnostic imaging modalities.

Prerequisites: None

VTA 170 Aseptic Technique and Surgical Assisting

Total Course Hours: 60 (15 theory, 45 Lab, 0 Extern) Semester Credits: 2.5

This course trains the student in aseptic preparation of animals, personnel, instruments, and equipment for surgery. Topics include protocol for assisting surgeons in the operating room, descriptions of pre- and postoperative care, and assisting in a variety of basic procedures including animal dentistry.

Prerequisites: None

Veterinary Technician (El Paso) • Course Descriptions

CCM 111 Communications

Total Course Hours: 45 (45 theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with experience with the wide range of communication skills necessary for success in health professions. Verbal and nonverbal communication, technical and professional writing, speaking and listening critically, health literacy, evaluating and synthesizing material from diverse cultural sources and points of view, and other topics. Legal and ethical issues in communication are also addressed.

Prerequisites: Semesters I and II courses

MTH 129 Math Applications

Total Course Hours: 45 (45 theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with the fundamentals of college algebra, and includes common formulae and calculations used in applied settings. Topics include fractions, decimals, linear equations, basic statistics, and pharmaceutical math.

Prerequisites: Semesters I and II courses

PSY 102 Introduction to Psychology

Total Course Hours: 30 (30 theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course will be a combination of lecture, simulation, demonstration, and student participation. Lab time, if applicable, provides hands-on experiences, small group discussions, simulations, and return demonstration of newly acquired skills.

Prerequisites: Semesters I and II courses

SCI 120 Foundations in Biology and Chemistry

Total Course Hours: 60 (60 theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course provides an introduction to the fundamentals of chemistry and various life sciences as they relate to veterinary technology. Topics include inorganic and organic chemistry, biochemistry, cellular biology, and the biology of various life processes. This course provides a foundation for applied coursework in veterinary technology.

Prerequisites: Semesters I and II courses

VTT 176 Introduction to Veterinary Technology

Total Course Hours: 25 (25 theory, 0 Lab, 0 Extern) Semester Credits: 1.5

This course presents the student with an introduction to veterinary science and the role of the credentialed veterinary technician on the veterinary team. Topics include the history of the field, scope of practice, ethical and legal issues, professionalism, and a survey of employment opportunities. This course provides the opportunity to learn and adopt methods and life skills that aid success in a professional degree program and the workplace and promote lifelong learning.

Prerequisites: Semesters I and II courses

VTT 242 Dentistry Techniques

Total Course Hours: 30 (15 theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course presents the tasks and techniques within the scope of practice of a veterinary technician. Included are examination, cleaning, scaling, polishing, and in some jurisdictions, extractions. Tooth anatomy and terminology is reviewed as well as the common veterinary dental diseases and disorders. Also addressed are protocols for veterinary dental radiography and assisting the DVM in advanced techniques.

Prerequisites: Semesters I and II courses

VTT 222 Food and Fiber Animal

Total Course Hours: 55 (45 theory, 10 Lab, 0 Extern) Semester Credits: 3.0

This course introduces the veterinary nursing student to livestock and animal science. This includes an overview of various segments of the livestock industry. Building on previous anatomy and physiology coursework, the primary focus of the course is the nursing and medicine of food animals. Coursework and lab exercises cover restraint, behavior, husbandry, nursing care, sampling techniques, bandaging, and radiography as well as medicine and a review of common surgeries of food and fiber species (bovine, caprine, ovine, camelid, and swine).

Prerequisites: Semesters I, II, and III courses

VTT 224 Diagnostic Imaging for Veterinary Technicians

Total Course Hours: 30 (15 theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course furthers the training in radiology, begun in veterinary assistantship, with advanced studies in screens, positioning, and contrast studies. Students will learn to utilize a portable radiology machine. The course introduces the student to basic ultrasound techniques and digital radiography.

Prerequisites: Semesters I, II, and III courses

VTT 226 Small Animal Nursing

Total Course Hours: 75 (15 theory, 60 Lab, 0 Extern) Semester Credits: 3.0

This course provides advanced training in various nursing procedures within the veterinary technician's scope of practice. Topics include catheterization, aspiration, centesis, endotracheal and gastric intubation, rectal and reproductive procedures, sensory organ exams and testing, and bandaging techniques.

Prerequisites: Semesters I, II, and III courses

VTT 232 Laboratory Animal Science

Total Course Hours: 35 (20 theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course provides an overview of the principles of laboratory animal research and the role of the veterinary technician in the husbandry and nursing of small mammalian species as well as participation in research activities. Students will work with selected species that may include mice, rats, guinea pigs and rabbits as well as other small mammals. The use of primates and nonmammalian species will be discussed.

Prerequisites: Semesters I, II, and III courses

Veterinary Technician (El Paso) • Course Descriptions

VTT 236 Anatomy and Physiology for Veterinary Technicians

Total Course Hours: 60 (30 theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This course provides an in-depth analysis of the anatomy and physiology of the domestic species, with focus on the cat and dog. In the lab sessions, students will identify anatomical features and demonstrate an understanding of body function. Necropsy technique is mandatory.

Prerequisites: Semesters I, II, and III courses

VTT 239 Laboratory Procedures for Veterinary Technicians

Total Course Hours: 75 (30 theory, 45 Lab, 0 Extern) Semester Credits: 3.5

This course focuses on diagnostic tests performed in the veterinary laboratory and includes discussion of various diseases and disorders of the body systems. Experience in bacteriology, endocrinology, hematology, serology, and parasitology is part of the curriculum.

Prerequisites: Semesters I, II, and III courses

VTT 244 Pharmacology for Veterinary Technicians

Total Course Hours: 45 (45 theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course focuses on those pharmacological topics within the scope of the veterinary technician. Topics include a review of pharmaceutical math and a detailed examination of the physiology and chemistry of drug effects on the nervous system. Also presented is a discussion of the proper protocol for many injectable and inhalant anesthetics, analgesics, and anti-inflammatories. Chemotherapeutics, antimicrobial, antiparasitic, and euthanasia agents are also addressed.

Prerequisites: Semesters I, II, and III courses

VTT 246 Surgical Nursing for Veterinary Technicians

Total Course Hours: 70 (30 theory, 40 Lab, 0 Extern) Semester Credits: 3.0

In defining the veterinary technician's role in surgical nursing, the student will be exposed to the intricacies of the anesthesia machine and receive training in setting, adjusting, and maintaining the unit. The student will evaluate, medicate, anesthetize, prepare, and monitor a variety of surgical patients, as well as learn the protocol as a sterile scrub nurse. A review and demonstration of various monitoring equipment is provided, and the student will participate in several surgeries of various intensities.

Prerequisites: Semesters I, II, and III courses

VTT 252 Exotic Animal Medicine and Nursing

Total Course Hours: 30 (15 theory, 15 Lab, 0 Extern) Semester Credits: 1.5

This course presents an overview of the various exotic animals that are an increasing part of the pet population. The focus is on the anatomy, behavior, nutrition, diseases, and restraint of various reptilian, amphibian, and avian groups, as well as some of the exotic small mammals. Lab activities will include the restraint and physical examination of these species. Basic nursing techniques of these species are addressed.

Prerequisites: Semesters I, II, and III courses

VTT 254 Equine Medicine and Nursing

Total Course Hours: 60 (45 theory, 15 Lab, 0 Extern) Semester Credits: 3.5

This course introduces the veterinary nursing student to equine medicine and the role of the veterinary technician in the equine practice. Lecture and lab activities develop a more advanced understanding of equine anatomy and physiology and covers restraint, behavior, husbandry, nursing and sampling techniques, bandaging, and radiography. Content includes the common causes of lameness in the horse as well as the more commonly performed surgical procedures. Toxicological principles and the more common diseases and disorders of the horse will also be discussed.

Prerequisites: Semesters I, II, and III courses

VTT 256 Emergency Procedures

Total Course Hours: 40 (30 theory, 10 Lab, 0 Extern) Semester Credits: 2.0

This course covers the role of the veterinary technician in emergency procedures, both at an emergency clinic and at the veterinary hospital. Topics include assessment and triage, shock pathophysiology and treatment, trauma, CPR review, toxicology, anesthetic and surgical emergencies, and the veterinary technician's role in maintenance of the veterinary emergency crash kit.

Prerequisites: Semesters I, II, and III courses

VTT 273 Clinical Proficiency

Total Course Hours: 45 (0 theory, 45 Lab, 0 Extern) Semester Credits: 1.5

This course provides the student with opportunities to apply the concepts covered in VTT 246, 252, 254, and 256. Application includes competency/performance testing in simulated and interactive settings.

Prerequisites: Semesters I, II, and III courses

VTT 262 Veterinary Technician Seminar

Total Course Hours: 15 (15 theory, 0 Lab, 0 Extern) Semester Credits: 1.0

This course is designed to prepare the learner for the Veterinary Technician National Examination (VTNE). Content includes a comprehensive review of program content and the opportunity to participate in a simulated VTNE exam.

Prerequisites: Semesters I through V courses

VTT 292 Externship

Total Course Hours: 240 (0 theory, 0 Lab, 240 Extern) Semester Credits: 6.0

This course provides students with the opportunity to apply skills learned in the classroom, and/or laboratory setting, within a professional environment supervised by qualified health care professionals.

Prerequisites: Semesters I through V courses and all laboratory competencies

Health Care Administration

Objective: To prepare students with the industry knowledge and professional skills necessary for entry-level employment in the administrative health care field. A curriculum focused on basic business, administrative, and organizational concepts of health care will also prepare students to further their education in an advanced degree program.

Graduates of this program receive an Associate of Applied Science Degree.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, applicants can apply for a block-transfer option to accelerate into semester three of the five-semester program by transferring 28 credits under the following conditions: 12 of the 28 transfer credits must be from a health care field. PMI certificate programs that block-transfer into semester three include Dental Assistant, Health Care Administration-Certificate, Medical Assistant, Medical Billing and Coding, Patient Care Technician, Pharmacy Technician, and Sterile Processing Technician. Transfer credit requirements are listed Prospective Students section of this catalog.

Health Care Administration • Course Descriptions

CCM 101 Communications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with experience in a wide range of communication skills necessary for success in health professions. Verbal and nonverbal communication, technical and professional writing, speaking and listening critically, health literacy, evaluating and synthesizing material from diverse cultural sources and points of view, and other topics are included.

Prerequisites: None

CCL 100 Computer Literacy

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course provides a survey of the responsible and ethical uses of computers and related devices in academic and medical settings. Through demonstration and hands-on experience, students acquire a general understanding of computer technology. Topics include, but are not limited to, common terminology, hardware/software components, and applications used in basic word processing, spreadsheets, and presentations. Students utilize technology to retrieve, evaluate, and synthesize information from diverse sources and points of view.

Prerequisites: None

BIO 121 Anatomy, Physiology, and Pathology

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course examines the structure and function of the systems within the human body. It also incorporates the interrelationships between the structures and systems, as well as common diseases and conditions associated with each system. The course content also includes foundational knowledge regarding the diagnosis, treatment, and prognosis for various diseases.

Prerequisites: None

CMT 115 Medical Terminology

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course focuses on the development of a basic framework for the language of medicine. Through memorization and practice in spelling and pronunciation of medical roots, suffixes, and prefixes, students learn to create, analyze, and apply medical terms as they relate to various anatomical, physiological, and pathological conditions. Medical records and reports are introduced to provide opportunities for students to apply the knowledge within the clinical environment.

Prerequisites: None

HCA 100 Office Management

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course introduces students to the daily operations of the medical office environment, including basic policies/procedures, appointment scheduling, telephone etiquette, patient reception and processing, billing and coding procedures, and financial and medical records management.

Prerequisites: None

HIT 155 Electronic Health Records

Total Course Hours: 90 (30 Theory, 60 Lab, 0 Extern) Semester Credits: 4.0

This course provides an overview of electronic health records (EHR) and the significance of EHR systems within the health care field. Students participate in hands-on activities to practice and hone their abilities to navigate and understand the EHR environment and general coding concepts.

Prerequisites: None

MTH 132 Basic College Mathematics

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course presents calculation, conversion, and computation of fractions, decimals, measurements, ratios, and proportions. It also introduces students to the application of these skills as required in the health care setting.

Prerequisites: None

HIT 135 Introduction to Insurance

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course addresses insurance terminology, coding basics for third-party reimbursement, and types of government-sponsored insurance including workers' compensation, Medicare, and Medicaid. Students complete sample insurance claim forms.

Prerequisites: None

ENG 101 English Composition I

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course reviews the basics of English composition, including how to plan, organize, write, edit, and revise written compositions. Grammar, sentence structure, spelling, punctuation, and vocabulary are reviewed as needed to help students practice and improve their writing skills.

Prerequisites: None

CPT 201 Computer Fundamentals

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course introduces students to the Windows environment and to Windows-based applications. Through a hands-on approach, students will achieve a working knowledge of Windows, Microsoft Word and Excel, and a brief introduction to Microsoft PowerPoint presentation software.

Prerequisites: CCB 100 Computer Basics or CCL 111 Computer Literacy

Health Care Administration • Course Descriptions

MTH 210 Math Applications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with the fundamentals of college algebra. Mathematical operations covered include fractions, decimals, algebraic equations, basic statistics, word problems, and graphing.

Prerequisites: CMF 95 Math Fundamentals or MTH 132 Basic College Mathematics

HCA 201 Introduction to the Health Care System

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course introduces the basic structures and operations that have formed the present-day health care system in the United States. Students explore the broad and often complex range of concepts associated with the health care system and health care organizations, including individual services, cost structures, reform movements, and quality control, among others.

Prerequisites: None

HCA 210 Business Communications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course focuses on the practice of effective communication and writing within the contexts of business and the health care profession. Students analyze the psychology, semantics, planning, and principles of effective business writing.

Prerequisites: ENG 101 English Composition I

HCA 220 Health Care Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course explores various health care settings ranging from hospitals to nursing homes to clinics. Issues addressed include ethics, cost management, strategic planning and marketing, information technology, and human resources.

Prerequisites: None

ECN 101 Macroeconomics

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course presents an analysis of economic theory as applied to the operation of the economy as a whole. Topics covered include variables such as national income, employment, inflation, the roles of government expenditure, taxation, and fiscal policy as well as the Federal Reserve and monetary policy.

Prerequisites: None

SOC 115 Introduction to Sociology

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides a broad overview of sociology and how it applies to everyday life. Major theoretical perspectives, concepts, and methodologies are presented. Students will examine the influence of social groups and institutions, culture, and social structure on the process of socialization. Inequality and its effects upon these social contexts will also be explored. This course leads to an understanding of the sociological perspective of human behavior.

Prerequisites: None

PSY 201 Psychology

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course examines human behavior and its biological foundations, with emphasis on basic concepts and theories. The range of topics addressed includes adaptation, motivation, memory, learning, personality, and emotions. Human interactions in various contexts are also explored.

Prerequisites: None

HCA 213 Medical Law and Ethics

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides an overview of ethics and the law as they apply to medical practice. Topics include documentation, standards of care, professionalism and ethics, HIPAA, patient rights, informed consent, and employment discrimination.

Prerequisites: None

HCA 221 Human Resource Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is designed to provide a basic understanding of the various aspects of personnel management. Emphasis is placed on such topics as communication, recruiting, interviews/selection, promotion, performance appraisals, and job satisfaction.

Prerequisites: None

HCA 230 Accounting for Health Care Management

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course introduces the fundamentals of financial and managerial accounting with an emphasis on the role of accounting in the management of health care organizations. The course addresses the users and uses of financial and managerial reports related to various types of health care entities. Emphasis is on topics such as financial statement preparation, revenue cycle management, budgeting and ratio analysis.

Students will also have the opportunity to develop skills performing basic accounting functions utilizing MS Excel.

Prerequisites: CPT 201 Computer Fundamentals and MTH 210 Math Applications

Radiography—Bridge

Objective: To develop in students the personal and professional skills needed to perform as competent entry-level radiologic technologists. Students will be presented with information in anatomy and physiology, methods of patient care, medical terminology, radiographic techniques, and communications.

Graduates of this program receive an Associate of Applied Science Degree and are qualified to apply to take the American Registry of Radiologic Technologists (ARRT) examination for certification.

Admissions Requirements: In addition to the Admissions requirements listed in the Prospective Students section of this catalog, applicants must document a minimum of 1,599 hours of clinical experience in radiologic sciences. In addition, applications must document graduation from one of the following: a United States military program in radiologic sciences; a JRCERT-accredited radiologic sciences program; a foreign program in radiologic sciences equivalent in length to one year or more of college coursework; or an approved or licensed limited scope radiography program. One year of college coursework is defined as 30 credit hours. Students are granted 36.5 credits for previous radiologic sciences education and experience. Refer to the Transfer Credit information in the Prospective Students section of this catalog.

-catalog addendum for PMI 2020-2021 Academic Catalog published January 2020 (9.15.2021)

Radiography—Bridge • Course Descriptions

Semester I

CCL 100 Computer Literacy

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course provides a survey of the responsible and ethical uses of computers and related devices in academic and medical settings. Through demonstration and hands-on experience, students acquire a general understanding of computer technology. Topics include but are not limited to review of common terminology and hardware and software components and applications used in basic word processing, spreadsheets, and presentations. Students utilize technology to retrieve, evaluate, and synthesize information from diverse sources and points of view.

Prerequisites: None

CCM 112 Communications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course addresses the wide range of communication skills necessary for success in health professions. Topics include verbal and nonverbal communication, technical and professional writing, speaking and listening critically, health literacy, and evaluating and synthesizing material from diverse cultural sources and points of view, among others.

Prerequisites: None

MTH 210 Math Applications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with the fundamentals of college algebra. Mathematical operations covered include fractions, decimals, algebraic equations, basic statistics, word problems, and graphing.

Prerequisites: None

BIO 134 Anatomy and Physiology I

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

The objective of this course is to provide the student with knowledge of the structure and function of the human body. Cells and tissues will be described, and organs will be discussed as components of their respective systems. Course content includes the structures and functions of the integumentary and musculoskeletal systems.

Prerequisites: None

Semester II

RAD 112 Positioning I

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course covers basic terminology, anatomy, and radiographic procedures.

Prerequisites: BIO 134 Anatomy and Physiology I

BIO 144 Anatomy and Physiology II

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

A continuation of BIO 134, this course content includes the structure and function of the endocrine, nervous, cardiovascular (including blood, heart, blood vessels, and circulation), lymphatic, respiratory, digestive, urinary, and reproductive systems.

Prerequisites: BIO 134 Anatomy and Physiology I

RAD 122 Positioning II

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is a continuation of RAD 112 and covers basic terminology, anatomy, and radiographic procedures.

Prerequisites or Corequisites: RAD 112 Positioning I, BIO 134 and BIO 144 (Anatomy and Physiology I and II)

PSY 140 Interpersonal Relations

Total Course Hours: 30 (30 Theory 0 Lab, 0 Extern) Semester Credits: 2.0

This course explores the psychological nature of humans and their interactions. Students will gain an understanding of basic psychological concepts as well as an awareness of self and how these elements provide a foundation for the interaction of the individual within the social and health care environments. Topics include but are not limited to perception, adaptation, communication, group processes, and the impact of health on behavior.

Prerequisites: None

Semester III

RAD 132 Positioning III

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is a continuation of RAD 112 and RAD 122 and covers basic terminology, anatomy, and radiographic procedures. Students will also learn advanced positioning skills for age-specific populations.

Prerequisites: RAD 112 Positioning I, RAD 122 Positioning II, BIO 134 and BIO 144 (Anatomy and Physiology I and II)

RAD 134 Methods of Patient Care

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Students are instructed in basic patient care skills as they apply to radiologic technology. Emphasis is placed on safety, infection control, aseptic techniques, administration of contrast media, venipuncture, pharmacology, patient assessment, care of the critical patient and emergency care, and the care of tubes, catheters and vascular lines. In California, this course will provide the education and training for venipuncture certification.

Prerequisites: None

Radiography—Bridge • Course Descriptions

RAD 128 Physics

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides an in-depth analysis of radiologic physics. Some of the topics and principles covered include atomic structure, electricity, electromagnetism, equipment operation and maintenance, x-ray production, and x-ray interactions.

Prerequisites: MTH 210 Math Applications

CLE 112 Medical Law and Ethics

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Students are provided an overview of ethics and the law as they apply to medical professions and practice. Topics include scope of practice, legal issues, ethical considerations, patient rights, informed consent, standards of care, documentation, and workplace issues, including employment discrimination.

Prerequisites: None

Semester IV

RAD 138 Principles of Exposure

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course covers the factors that affect the diagnostic quality of radiographic images. Topics covered include image acquisition, digital imaging systems, image processing, beam limitation, grids, contrast, receptor exposure, spatial resolution, and structural considerations.

Prerequisites: RAD 128 Physics, RAD 112 Positioning I

RAD 238 Pathology

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides an overview of radiographic pathology. Topics cover pathologies of the following body systems: musculoskeletal, respiratory, gastrointestinal, hepatobiliary, urinary, hematopoietic, cardiovascular, nervous, endocrine, and reproductive systems. Traumatic injuries are also addressed.

Prerequisites: Semesters I, II, and III courses

RAD 232 Radiography II

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course builds upon the foundations of classroom theory and practical experience in the field in the critique of radiographic image quality, with an emphasis on image analysis.

Prerequisites: RAD 128 Physics, RAD 112 Positioning I, RAD 122 Positioning II, and RAD 132 Positioning III

RAD 142 Radiographic Biology

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with instruction on x-ray interactions with matter, radiation effects on the molecular and cellular levels, acute and long-term radiation responses, and radiation protection principles.

Prerequisites: RAD 128 Physics, BIO 134 and BIO 144 (Anatomy and Physiology I and II)

Semester V

RAD 248 Radiography III

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course is designed to prepare the student for examination for certification by the American Registry of Radiologic Technologists (ARRT).

Prerequisites: Semesters I, II, III, and IV courses

RAD 212 Advanced Radiographic Imaging and Special Procedures

Total Course Hours: 30 (30 Theory, 0 Lab, 0 Extern) Semester Credits: 2.0

This course presents radiography skills and equipment used in various imaging procedures and advanced modalities. Topics include but are not limited to cardiovascular and interventional radiography, computed tomography imaging, magnetic resonance imaging, mammography, bone densitometry, ultrasound, nuclear medicine and radiation oncology.

Prerequisites: Semesters I, II, III, and IV courses

RAD 256 Clinical Externship IV

Total Course Hours: 252 (0 Theory, 0 Lab, 252 Extern) Semester Credits: 5.5

This course provides the student with clinical experience under the supervision of clinical staff and faculty. Students will develop clinical competence by performing a variety of radiographic procedures on a diverse patient population. Student learning and competence will be determined in part through frequent critique and evaluation, as well as specific formative and summative assessment tools. Students are expected to demonstrate the clinical skill and competence as required of an entry-level radiographer.

Prerequisites: Semesters I, II, III, and IV courses

Bachelor of Science in Health Care Administration

Objective: To foster critical thinking abilities, communication competence, and leadership capacity with an advanced understanding of health care management services and delivery. Students will develop strategies to analyze behavioral, ethical, and cultural trends that impact management in health care systems with diverse populations. They will also demonstrate the ability to evaluate ethical, legal, and regulatory policies, and demonstrate a mastery of core business theories as applied to health care systems.

Graduates of this program receive a Bachelor of Science Degree.

Admissions Requirements: Applicants to this degree completion program must have completed a total of 64 semester credits at the postsecondary level. The 64 transfer credits shall consist of 14 general education, 26 health science technical, and 24 related credits. Transfer credits into this program must meet the following conditions: awarded by a nationally or regionally accredited institution; grade of "C" or better; and numbered 100 and above. Transfer credits must include a math course. See additional Admissions and Transfer Credit requirements in the Prospective Students section of this catalog.

Bachelor of Science in Health Care Administration • Course Descriptions

CPT 301 Microcomputer Applications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course prepares students to utilize Windows-based applications within the Windows environment. Through a hands-on approach, students will achieve advanced application knowledge of Windows, word processing, presentation software, and spreadsheets.

Prerequisites: None

ENG 310 Technical Writing

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is the study of technical communications. Topics include conducting audience and needs analyses, organizing and writing clear, precise, and grammatically correct workplace prose, and producing a variety of routine professional reports and correspondence.

Prerequisites: None

BUS 330 Fundamentals of Finance

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course introduces the fundamentals of finance as they apply to health care organizations. Topics include the financial structure of both investor-owned and not-for-profit entities, shareholder wealth maximization, financial statement analysis, the time value of money, risk and return, leasing, forecasting, financial markets, and capital budgeting decisions. Students will have opportunities to apply finance concepts in personal and professional contexts in this course.

Prerequisites: None

HCA 310 Health Care Law and Compliance

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Health care law and compliance is important because of its financial and emotional impact on health care professionals, patients, and health care facilities. This content is geared toward legal and compliance issues that affect the employee and employer directly. In addition, this content gives guidance on risk management techniques, including reporting, that can help mitigate noncompliance.

Prerequisites: None

SOC 325 Culture and Human Diversity

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course explores the nature and sources of cultural differences and the impact of cultural diversity on our changing society. Students will examine characteristics of cultural systems and how they influence behavior in family, workplace, educational, and medical settings. Students will discuss the challenges and benefits of communicating in culturally sensitive ways.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

PHI 301 Critical Thinking

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course examines the components of and barriers to critical thinking. Students will examine premises and fallacies in various types of arguments. Students will evaluate components of persuasive communications.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 430 Patient Information & Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Patient information management is important because of the integral role a health care professional has within the team. It is essential for the health care professional to provide all members of the team with a thorough patient record to ensure quality patient care.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 325 Leadership in Health Care Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course presents best practices for leading health care organizations in a changing environment. Topics include strategic planning, the impact of cultural change, and employee engagement. Also addressed are skills related to internal and external assessment, facilitation, and negotiation and collaboration skills.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

BUS 210 Introduction to Marketing

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course presents basic marketing concepts, theories, and strategies. Also examined are the impacts of social factors, including demographic trends, cultural change, and changes in the political and legal environment impacting marketing decision-making.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

Bachelor of Science in Health Care Administration • Course Descriptions

MTH 315 Statistical Concepts

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course introduces students to basic statistical concepts and statistical reasoning. Content encompasses core concepts of descriptive and inferential statistics with exploration of descriptive measures, graphical displays of data, sampling, distribution, measures of association, probability, and hypothesis testing. Common statistical tests, such as t tests, ANOVA, Pearson correlation, and Chi square will be introduced. Students will practice statistical reasoning in real-world contexts.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 410 Long-Term Care

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course provides a survey of the types of long-term care settings, and the purpose of and challenges presented by each. Settings include short-term and long-term skilled nursing facilities, assisted living facilities, subacute care, adult day care, and hospice. Also addressed are issues related to home health care. Students will explore administrative and management skills required by long-term care facilities today and those projected for the future.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

RSH 350 Introduction to Evidence Based Practice

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides a comprehensive overview of evidence-based practice (EBP) and the real-world application of research evidence. Emphasis is placed on developing practical skills that will enable students to find, read, and understand published research. Essential topics include developing a research question, performing evidence searches, analyzing research studies, and determining value and usefulness of evidence in practice.

Prerequisite or Corequisites: ENG 310 Technical Writing, CPT 301 Microcomputer Applications, and MTH 315 Statistical Concepts

HCA 440 Health Care Policy

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course examines the role of governmental legislation and regulation on the provision of health care services in the United States. Also addressed are the roles of stakeholders on the financing and provision of services, and their influence on the public policy making process.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 450 Health Insurance and Reimbursement

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides students with an overview of the processes and procedures related to medical billing and insurance reimbursement in the United States. Topics include the roles and responsibilities of health care professionals in ensuring accurate and timely reimbursement for health care services and provisions of Medicare, Medicaid, and other federal and state administered payment programs. Also addressed is the impact of health care reform and government regulations on the operation and performance of the private health insurance industry and on public programs.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 460 Public Health

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is an introduction to public health and the science related to protecting and improving the health of populations at local, regional, and global levels. Topics include health education and promotion, epidemiology, infectious disease and environmental issues. The roles of various agencies and personnel in public health will also be explored.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 470 Quality Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with a solid foundation in quality management and teamwork within the health care environment. Quality management is important to ensure the proper functioning of equipment and compliance with various standards. Health care professionals should have an understanding of the activities and their role in leading the quality management process.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 495 Professional Capstone

Total Course Hours: 90 (90 Theory, 0 Lab, 0 Extern) Semester Credits: 6.0

This capstone course focuses on the synthesis of professional knowledge and critical thinking skills in preparation for professional advancement and lifelong learning. This course provides students with an opportunity to implement research skills to formulate strategies to manage various challenges they will encounter in the healthcare administration setting. The course content focuses on the application of intellectual inquiry, information literacy, and the use of scholarly research methods to complete a professional project. Students will reflect on and evaluate their personal and professional growth, the benefits of lifelong learning, and the impact of these elements on their future.

Prerequisites: Semesters I, II, III, and IV courses

Bachelor of Science in Nursing (RN to BSN)

Objective: To prepare graduates to assume roles requiring increased leadership capability and clinical responsibility in the delivery of care to individuals, families, communities, and global populations. The program is enhanced by general education credits that enable nurse generalists to expand their knowledge base, and to prepare associate degree and diploma nurse graduates for increased responsibility in an ever-evolving health care environment. Curriculum content focus areas include: theories, concepts, and principles important for development of nursing leadership and management knowledge, skills, and attitudes; evidence-based research analysis and utilization; and pertinent clinical, fiscal, legal, and political trends confronting health care and the nursing profession.

Graduates of this program receive a Bachelor of Science Degree in Nursing.

Admissions Requirements: Admission to the program requires that applicants maintain an active and unencumbered license as a registered nurse and be employed as a registered nurse. In addition, applicants must have completed a total of 70 semester credits of specific coursework at the postsecondary level. The 70 transfer credits shall consist of 42 nursing credits and 16 general education credits.

Registered nurses who have successfully completed an associate degree nursing program from a nationally or regionally accredited college or university will receive a maximum of 42 semester credits for prelicensure nursing coursework. Graduates of a recognized diploma school may be required to take additional lower division courses to meet the overall credits to graduate from the program. The following lower division courses must be transferred or completed prior to admission to the BSN program: English composition, 3 credits; biological sciences (anatomy and physiology or microbiology) 4 credits; social sciences (psychology/sociology), 5 credits; and mathematics, 3 credits. Furthermore, lower division general education courses numbered 100 or 200 may be eligible for up to 21 semester transfer credits.

Upper division general education courses numbered 300 or 400 may be eligible for up to 18 semester transfer credits, as determined through official transcript review, provided that a grade of "C" or better is achieved, that course descriptions and content are similar to that of PMI courses, and that the courses are in at least one of the following subject areas: arts or foreign language; humanities; biological, physical, and social sciences; written and oral communication; mathematics; and computer applications. See additional Admissions and Transfer Credit requirements in the Prospective Students section of this catalog.

Bachelor of Science in Nursing (RN-BSN) • Course Descriptions

CPT 301 Microcomputer Applications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course prepares students to utilize Windows-based applications within the Windows environment. Through a hands-on approach, students will achieve advanced application knowledge of Windows, word processing, presentation software, and spreadsheets.

Prerequisites: None

ENG 310 Technical Writing

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is the study of technical communications. Topics include conducting audience and needs analyses, organizing and writing clear, precise, and grammatically correct workplace prose, and producing a variety of routine professional reports and correspondence.

Prerequisites: None

REL 200 World Religions

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course will explore basic tenets of each faith in order to gain the ability to discuss each religion and its corresponding history, practice, and relationship to other faiths. This will also provide students with the framework for evaluating the culture impact of religions in our world today.

Prerequisites: None

NUR 300 Role Transition and Professional Development

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides an opportunity for the generalist nurse to broaden his/her perspective of the role of the professional nurse in health care delivery. Role differentiation of the baccalaureate prepared nurse is explored in the context of contemporary and future nursing practice. Role transition to the baccalaureate level nurse as provider, designer, coordinator, manager of care, and member of profession is examined. Students will explore the history of nursing, nursing theory, research utilization, and moral, ethical, and legal standards of conduct related to practice as a baccalaureate prepared care provider, nurse leader, and member of the nursing profession. Emphasis is placed on identification of the importance of and strategies for success as a lifelong learner.

Prerequisites or corequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

PHI 301 Critical Thinking

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course examines the components of and barriers to critical thinking. Students will examine premises and fallacies in various types of arguments. Students will evaluate components of persuasive communications.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

NUR 320 Integrated Health Assessment for the Experienced Nurse

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course facilitates use of a systematic approach to complete an integrated health assessment. It includes a focus on the biological, psychological, and sociological aspects of individuals across the life span. The purpose of this course is to broaden the learners' knowledge base, increase assessment skills, and facilitate ability to apply these skills in a clinical setting. Selection and use of appropriate assessment tools are explored. Documentation and interpretation of assessment findings is included. Aberrations in health status resulting from selected societal and environmental issues are addressed.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

NUR 380 Nursing Informatics

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course examines the history of health care informatics, current issues, basic informatics concepts, and health information management systems. This course further explores the present and potential impact of health care informatics on the discipline of nursing, the health care delivery system, and the patient, family, and community. The role of the nurse in collecting, managing, processing, and safeguarding data to assist the multidisciplinary team in making decisions and inferences based on both qualitative data and quantitative information for the care of patients, groups, communities, and populations is further examined. Legal and ethical concerns, such as patient privacy, consent, and the importance of utilizing empirical and experiential knowledge to broaden the scope of and enhance professional nursing practice are presented. The student is provided the opportunity to develop the knowledge base and skills necessary to effectively utilize information technology in a variety of areas of nursing practice to improve patient safety and work effectiveness.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

SPA 210 Spanish for the Medical Professional

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course will focus on the simple phrases, terminology, and pronunciation necessary to communicate with Spanish-speaking clients in a health care setting. Students will also examine cultural and social factors that may impact communication in a health care setting.

Prerequisites: None

MTH 315 Statistical Concepts

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course introduces students to basic statistical concepts and statistical reasoning. Content encompasses core concepts of descriptive and inferential statistics with exploration of descriptive measures, graphical displays of data, sampling, distribution, measures of association, probability, and hypothesis testing. Common statistical tests, such as t tests, ANOVA, Pearson correlation, and Chi square will be introduced. Students will practice statistical reasoning in real-world contexts.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

Bachelor of Science in Nursing (RN-BSN) • Course Descriptions

NUR 425 Foundations of Evidence-Based Nursing Practice

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides a foundation for understanding evidence-based nursing practice through the use of the research process, clinical judgment, and interprofessional perspectives. Skills necessary to critically read and evaluate both qualitative and quantitative nursing research and to use the results of research in practice are developed in this course. The historical, legal, and ethical aspects of nursing research are considered. This course also focuses on the evaluation and utilization of research and other sources of knowledge necessary to address patient needs, provide quality care, implement best practices, facilitate innovations, and eliminate evidence-based practice barriers.

Prerequisites or corequisites: ENG 310 Technical Writing, CPT 301 Microcomputer Applications, and MTH 315 Statistical Concepts; Semesters I and II NUR-designated courses

SOC 325 Culture and Human Diversity

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course explores the nature and sources of cultural differences and the impact of cultural diversity on our changing society. Students will examine characteristics of cultural systems and how they influence behavior in family, workplace, educational, and medical settings. Students will discuss the challenges and benefits of communicating in culturally sensitive ways.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

NUR 400 Transcultural Nursing Practice

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides a theoretical framework for the delivery of culturally competent nursing care. This course examines the role of the nurse in providing culturally appropriate care for increasingly diverse populations while navigating obstacles that culture can place on the patient/family experience. Through presentation of the history and theory behind cultural competence in nursing, the course offers key information regarding health beliefs and the impact of culture on both health and illness. Health care disparities, policy development, health care systems, and the role of national and global health care agencies in and along the health/illness continuum are examined.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications; Semesters I and II NUR-designated courses

NUR 440 Quality Improvement in Nursing and Health Care Organizations

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

In this course continuous quality improvement is introduced as a foundation for quality care and patient safety. Data to monitor the processes and outcomes of nursing care are discussed. Methods to design and test changes to continuously improve the quality and safety of health care are explored.

Prerequisites: ENG 310 Technical Writing, CPT 301 Microcomputer Applications, and MTH 315 Statistical Concepts; Semesters I, II, and III NUR-designated courses

Prerequisites or corequisites: NUR 425 Foundations of Evidence-Based Nursing Practice

NUR 475 Community Oriented Nursing Practice and Global Health Issues

Total Course Hours: 75 (75 Theory, 0 Lab, 0 Extern) Semester Credits: 5.0

This course explores the demands of the dynamic health care system that require nurses to have an understanding of both community health nursing and population-focused practice. Nurses must be able to span systems of care and focus on the needs of aggregates, no matter where health care services are provided and/or needed. This course further explores population-focused decision-making, community-based strategies for health promotion and disease prevention, primary care services, and disaster prevention and planning, which are emerging issues at the forefront of health care services. The epidemiological process guides the survey of current public health issues. The course focuses on prevention, the health issues of underserved, vulnerable, or culturally diverse populations at the local, state, national, and international levels. Health care inequities are also addressed.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications; Semesters I, II, and III NUR-designated courses

NUR 480 Nursing Leadership & Health Care Management

Total Course Hours: 90 (90 Theory, 0 Lab, 0 Extern) Semester Credits: 6.0

This course provides the student an opportunity to focus on the application, synthesis, and evaluation of concepts and nursing issues studied throughout the RN to BSN program. This course examines leadership principles related to organizational culture and change including concepts of team, delegation, motivation, negotiation, and problem-solving within an organizational context. The BSN student develops skills to assist the health care organization through periods of transformation while building a culture of quality and safety. The student uses nursing research to contribute to the profession by identifying evidence-based solutions to clinical practice and administrative situations. The course facilitates a greater understanding of the role of the nurse as a member of an interdisciplinary team using communication, collaboration, technology, and resource management and provides strategies for handling challenges that arise in health care organizations to better assist nurse leaders in creating a healing environment for both consumers and health care providers.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications; Semesters I, II, and III NUR-designated courses

Bachelor of Science in Physical Therapist Assistant

Objective: To provide advanced foundational, technical, and evidence-based knowledge necessary to progress skills, enhance professionalism, and apply critical thinking beyond the associate degree level. The program follows a philosophy that an upwardly transitioning education for physical therapist assistants will better meet the needs of graduates, employers, and society.

Graduates of this program receive a Bachelor of Science Degree.

Admissions Requirements: Applicants to this degree completion program must have graduated from a physical therapist assistant (PTA) program accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE). Admission to the program requires an applicant to have completed a total of 66 semester credits of specific coursework at the postsecondary level. The 66 transfer credits shall consist of 15 general education, 39 PTA technical, and 12 related credits. Transfer credits into this program must meet the following conditions: awarded by a nationally or regionally accredited institution; grade of "C" or better; and numbered 100 and above. General education transfer credits are required to be from a broad sampling of various educational experiences, including arts & humanities, business, information systems, social sciences, or natural sciences. Licensure/certification as a PTA in a state within the United States is required prior to taking courses in semesters three and four. (Note: CAPTE does not accredit degree completion programs.) See additional Admissions and Transfer Credit requirements in the Prospective Students section of this catalog.

Bachelor of Science in Physical Therapist Assistant • Course Descriptions

ENG 310 Technical Writing

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is the study of technical communications. Topics include conducting audience and needs analyses, organizing and writing clear, precise, and grammatically correct workplace prose, and producing a variety of routine professional reports and correspondence.

Prerequisites: None

CPT 301 Microcomputer Applications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course prepares students to utilize Windows-based applications within the Windows environment. Through a hands-on approach, students will achieve advanced application knowledge of Windows, word processing, presentation software, and spreadsheets.

Prerequisites: None

CHM 300 Chemistry

Total Course Hours: 60 (30 Theory, 30 Lab, 0 Extern) Semester Credits: 3.0

This course is an integrated study of both organic and biochemistry. Topics include elements and compounds, chemical equations, nomenclature, molecular structure, and the chemistry of proteins, carbohydrates, lipids, and other biological compounds. Students will also have the opportunity to participate in online laboratory experiments.

Prerequisites: None

BUS 220 Health Care Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course explores a wide variety of health care settings, from hospitals to nursing homes and clinics. Important issues in health care management, such as ethics, cost management, strategic planning and marketing, information technology, and human resources are explored.

Prerequisites: None

SOC 325 Culture and Human Diversity

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course explores the nature and sources of cultural differences and the impact of cultural diversity on our changing society. Students will examine characteristics of cultural systems and how they influence behavior in family, workplace, educational, and medical settings. Students will discuss the challenges and benefits of communicating in culturally sensitive ways.

Prerequisites: None

MTH 315 Statistical Concepts

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course introduces students to basic statistical concepts and statistical reasoning. Content encompasses core concepts of descriptive and inferential statistics with exploration of descriptive measures, graphical displays of data, sampling, distribution, measures of association, probability, and hypothesis testing. Common statistical tests, such as t tests, ANOVA, Pearson correlation, and Chi square will be introduced. Students will practice statistical reasoning in real-world contexts.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

PTA 315 Exercise Physiology

Total course Hours: 60 (60 theory, 0 lab, 0 Extern) Semester Credits: 4.0

This course examines exercise physiology through applied knowledge of the human body's physiologic responses and adaptations to acute exercise, prolonged training, and other stressors. The course reviews body systems responsible for the generation and conservation of energy necessary for varied exercise intensities. Students are required to complete various exercise protocols and physiological measurements.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

PTA 350 Evidence-based Practice for the PTA

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This class reviews the history, rationale, elements, and value of evidence-based practice in physical therapy. Emphasis is placed on intellectual inquiry and information literacy in preparation for future classes and projects. This course provides students with practical knowledge of steps in the evidence-based process and how to critically analyze results in research articles.

Prerequisites or Corequisites: MTH 315 Statistical Concepts, ENG310 Technical Writing, and CPT301 Microcomputer Applications

PHI 301 Critical Thinking

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course examines the components of and barriers to critical thinking. Students will examine premises and fallacies in various types of arguments. Students will evaluate components of persuasive communications.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

PTA 375 Patient Communication, Motivation, and Learning

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is focused on patient communication, motivation, and teaching techniques used to support physical therapist assistants in achieving optimal treatment outcomes. Foundational topics on psychosocial aspects are examined in the context of working health care professionals and include professionalism, ethics, values, multiculturalism, and spirituality. Types of communication styles and motivational strategies are explored in relationship to patient understanding and learning.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

Bachelor of Science in Physical Therapist Assistant • Course Descriptions

PTA 415 Inpatient Care Practice

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course provides an avenue for practicing physical therapist assistants to research topics of interest related to inpatient practice including emergent, acute, subacute, neurologic, cardiopulmonary, and skilled nursing care. Additional topics comprise patient and workplace management issues. Students apply evidence-based methodology and techniques in the context of clinical problem-solving, clinical approaches, and physical therapy interventions through development of an in-service presentation.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

PTA 420 Outpatient Care Practice

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course provides practicing physical therapist assistants the opportunity to research topics of interest related to outpatient practice, including orthopedic, sport, school, geriatric, home health care, and health/wellness. Additional topics comprise new treatment concepts and outpatient management issues. Students apply evidence-based methodology and techniques in the context of clinical problem-solving, clinical approaches, and physical therapy interventions through development of an in-service presentation.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HLT 360 Pharmacology for Rehab Clinicians

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides basic knowledge of pharmacological agents and their applications in rehabilitation populations. Topics include basic principles of pharmacology, classifications of medications, and actions and effects of drugs that can have an impact upon the safe and effective delivery of rehabilitation interventions.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

PTA 435 Clinical Kinesiology

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This class reviews the study of human movement as it relates to the practice of physical therapy. Biomechanical principles are reviewed and applied to human motion and function. Abnormal gait, posture, and movement are examined in relationship to disease or injury. The course culminates in a patient case study in which students integrate advanced kinesiology principles.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

PTA 460 Practice Specific Rehabilitation

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This class is designed to further the professional development and lifelong learning habits of physical therapist assistants by exposing them to a variety of special topics through review of current research. Specific patient populations are explored including pediatrics, geriatrics, orthopedics, women's health, wound care, neurology, and cardiopulmonary.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HLT 410 Pathophysiology

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

A rich appreciation of the characteristics and manifestations of diseases caused by alterations or injury to the structure or function of the body are essential to the health care professional. The in-depth study of pathophysiology allows the professional to communicate better with other health care professionals, including physicians and scientists, as well as with the patient, for the history and physical assessment.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

PTA 490 Professional Capstone

Total Course Hours: Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course provides students with an opportunity to identify and develop research skills necessary to create a solution for an existing health care issue and also develop a professional portfolio. Content focuses on the synthesis of professional knowledge and critical thinking skills in preparation for professional advancement and lifelong learning. Course structure is designed to enhance student comprehension of information literacy concepts as well as expand student capacity for intellectual inquiry and the effective application of scholarly research methods.

Prerequisites: Semesters I, II, and III courses

Bachelor of Science in Radiologic Sciences

Objective: To prepare graduates for employment responsibilities where knowledge and skills beyond those typically attained at the associate degree level are required or preferred, with emphasis on developing professional leadership skills, applying critical thinking skills, and acquiring advanced knowledge of health care systems. General education content gives students the opportunity to explore and integrate information beyond the specific focus of their major and to build a foundation for lifelong learning. The program is based upon the core curriculum guidelines of the American Society of Radiologic Technologists (ASRT), which recognizes the baccalaureate degree as the professional level of radiologic science education.

Graduates of this program receive a Bachelor of Science Degree.

Admissions Requirements: Applicants to this degree completion program must hold an American Registry of Radiologic Technologists (ARRT) certification. Admission to the program requires an applicant to have completed a total of 70 semester credits of specific coursework at the postsecondary level consisting of 15 general education, 46 radiography technical, and 9 related credits. Transfer credits must meet the following conditions: awarded by a nationally or regionally accredited institution; grade of "C" or better; and numbered 100 and above. General education transfer credits are required to be from a broad sampling of various educational experiences, including arts & humanities, business, information systems, social sciences, or natural sciences. See additional Admissions and Transfer Credit requirements in the Prospective Students section of this catalog.

RSH 350 Introduction to Evidence Based Practice

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides a comprehensive overview of evidence-based practice (EBP) and the real-world application of research evidence. Emphasis is placed on developing practical skills that will enable students to find, read, and understand published research. Essential topics include developing a research question, performing evidence searches, analyzing research studies, and determining value and usefulness of evidence in practice.

Prerequisite or Corequisites: ENG 310 Technical Writing, CPT 301 Microcomputer Applications, and MTH 315 Statistical Concepts

HCA 310 Health Care Law & Compliance

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Health care law and compliance is important because of its financial and emotional impact on health care professionals, patients, and health care facilities. This content is geared toward legal and compliance issues that affect the employee and employer directly. In addition, this content gives guidance on risk management techniques, including reporting, that can help mitigate noncompliance.
Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

RA 411 Advanced Sectional Anatomy

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This course provides a detailed overview of human sectional anatomy in the axial, sagittal, coronal, and oblique planes. Successful completion of this course will assist the imaging professional in understanding the physical relationship of internal structures, as well as identifying anatomy as it is commonly displayed through computed tomography (CT) and magnetic resonance imaging (MRI).
Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

Bachelor of Science in Radiologic Sciences • Course Descriptions

RA 403 Advanced Modalities

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides students with an opportunity to increase their understanding of advanced imaging modalities, specifically computed tomography (CT) and magnetic resonance imaging (MRI). A wide range of topics will be explored, including the function and application of advanced imaging technologies as well as current issues and trends. The course will also explore facets of the advanced imaging environment from an administrative perspective. Successful completion of this course will enhance the student's ability to manage advanced imaging personnel and resources by providing a broad foundation of practical knowledge in the area.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

RA 350 Advanced Patient Assessment & Treatment

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

As the role of the medical imaging professional continues to expand, more knowledge is needed in all areas. Patient care is no exception. Advanced patient care skills are essential elements of providing high quality patient care. This course focuses on patient education, assessment, communication, preprocedural and postprocedural care, and proper charting and documentation. Technologists' responsibilities and intervention in cases of critical patient need will be discussed.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 430 Patient Information & Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Patient information management is important because of the integral role a health care professional has within the team. It is essential for the health care professional to provide all members of the team with a thorough patient record to ensure quality patient care.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

SOC 325 Culture and Human Diversity

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course explores the nature and sources of cultural differences and the impact of cultural diversity on our changing society. Students will examine characteristics of cultural systems and how they influence behavior in family, workplace, educational, and medical settings. Students will discuss the challenges and benefits of communicating in culturally sensitive ways.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HLT 410 Pathophysiology

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

A rich appreciation of the characteristics and manifestations of diseases caused by alterations or injury to the structure or function of the body are essential to the health care professional. The in-depth study of pathophysiology allows the professional to communicate better with other health care professionals, including physicians and scientists, as well as with the patient, for the history and physical assessment.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 470 Quality Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with a solid foundation in quality management and teamwork within the health care environment. Quality management is important to ensure the proper functioning of equipment and compliance with various standards. Health care professionals should have an understanding of the activities and their role in leading the quality management process.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

RA 490 Professional Capstone

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This is a capstone course focusing on the synthesis of professional knowledge and critical thinking skills in preparation for professional advancement and lifelong learning. This course provides students with an opportunity to identify and develop research skills necessary to create a solution for an existing health care issue. The course content is geared to increase and disseminate intellectual inquiry, information literacy, and the use of scholarly research methods.

Prerequisites: Semesters I, II, and III courses

Bachelor of Science in Respiratory Therapy

Objective: To offer the highest quality education that fosters critical thinking, encourages professional leadership and development, and inspires a strong appreciation of ethical values and cultural diversity. A respiratory therapist entering the program will acquire the skills and knowledge above what is typically attained at the associate degree level. The comprehensive curriculum promotes lifelong learning and instills within students the professional attitudes needed to become successful communicators, critical thinkers, global citizens, and conscientious leaders.

Graduates of this program receive a Bachelor of Science Degree.

Admissions Requirements: Applicants to this degree completion program must be registered respiratory therapist (RRT). Admission to the program requires that an applicant possess a high school diploma or recognized equivalency and have completed a total of 71 semester credits of specific coursework at the postsecondary level. The 71 transfer credits shall consist of 15 general education, 44 respiratory therapy technical, and 12 related credits. Transfer credits into this program must meet the following conditions: awarded by a nationally or regionally accredited institution; grade of "C" or better; and numbered 100 and above. General education transfer credits are required to be from a broad sampling of various educational experiences including arts & humanities, business, information systems, social sciences, or natural sciences. See additional Admissions and Transfer Credit requirements in the Prospective Students section of this catalog.

Bachelor of Science in Respiratory Therapy • Course Descriptions

ENG 310 Technical Writing

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is the study of technical communications. Topics include conducting audience and needs analyses, organizing and writing clear, precise, and grammatically correct workplace prose, and producing a variety of routine professional reports and correspondence.

Prerequisites: None

CPT 301 Microcomputer Applications

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course prepares students to utilize Windows-based applications within the Windows environment. Through a hands-on approach, students will achieve advanced application knowledge of Windows, word processing, presentation software, and spreadsheets.

Prerequisites: None

BUS 220 Health Care Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course explores a wide variety of health care settings, from hospitals to nursing homes and clinics. Important issues in health care management, such as ethics, cost management, strategic planning and marketing, information technology, and human resources are explored.

Prerequisites: None

SPA 210 Spanish for the Medical Professional

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course will focus on the simple phrases, terminology, and pronunciation necessary to communicate with Spanish-speaking clients in a health care setting. Students will also examine cultural and social factors that may impact communication in a health care setting.

Prerequisites: None

MTH 315 Statistical Concepts

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course introduces students to basic statistical concepts and statistical reasoning. Content encompasses core concepts of descriptive and inferential statistics with exploration of descriptive measures, graphical displays of data, sampling, distribution, measures of association, probability, and hypothesis testing. Common statistical tests, such as t tests, ANOVA, Pearson correlation, and Chi square will be introduced. Students will practice statistical reasoning in real-world contexts.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

PHI 301 Critical Thinking

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course examines the components of and barriers to critical thinking. Students will examine premises and fallacies in various types of arguments. Students will evaluate components of persuasive communications.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

RSH 350 Introduction to Evidence Based Practice

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides a comprehensive overview of evidence-based practice (EBP) and the real-world application of research evidence. Emphasis is placed on developing practical skills that will enable students to find, read, and understand published research. Essential topics include developing a research question, performing evidence searches, analyzing research studies, and determining value and usefulness of evidence in practice.

Prerequisite or Corequisites: ENG 310 Technical Writing, CPT 301 Microcomputer Applications, and MTH 315 Statistical Concepts

HCA 310 Health Care Law & Compliance

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Health care law and compliance is important because of its financial and emotional impact on health care professionals, patients, and health care facilities. This content is geared toward legal and compliance issues that affect the employee and employer directly. In addition, this content gives guidance on risk management techniques, including reporting, that can help mitigate noncompliance.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 460 Public Health

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is an introduction to public health and the science related to protecting and improving the health of populations at local, regional, and global levels. Topics include health education and promotion, epidemiology, infectious disease and environmental issues. The roles of various agencies and personnel in public health will also be explored.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

Bachelor of Science in Respiratory Therapy • Course Descriptions

RES 325 Polysomnography

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is a comprehensive study of sleep. Topics include normal sleep physiology, sleep disorders, and abnormal sleep physiology. Treatment and interventions will be introduced. The student will also be given information regarding sleep-lab management and research.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

RES 440 Home Health

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is an introduction to home health and its specific issues. Topics include discharge planning, case management, reimbursement and Medicare. Students will be introduced to outcome-based home care and disease management. *Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications*

HCA 430 Patient Information & Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Patient information management is important because of the integral role a health care professional has within the team. It is essential for the health care professional to provide all members of the team with a thorough patient record to ensure quality patient care.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

SOC 325 Culture and Human Diversity

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course explores the nature and sources of cultural differences and the impact of cultural diversity on our changing society. Students will examine characteristics of cultural systems and how they influence behavior in family, workplace, educational, and medical settings. Students will discuss the challenges and benefits of communicating in culturally sensitive ways. *Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications*

HLT 410 Pathophysiology

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

A rich appreciation of the characteristics and manifestations of diseases caused by alterations or injury to the structure or function of the body are essential to the health care professional. The in-depth study of pathophysiology allows the professional to communicate better with other health care professionals, including physicians and scientists, as well as with the patient, for the history and physical assessment.

Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications

HCA 470 Quality Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides the student with a solid foundation in quality management and teamwork within the health care environment. Quality management is important to ensure the proper functioning of equipment and compliance with various standards. Health care professionals should have an understanding of the activities and their role in leading the quality management process. *Prerequisites: ENG 310 Technical Writing and CPT 301 Microcomputer Applications*

RES 490 Professional Capstone

Total Course Hours: 60 (60 Theory, 0 Lab, 0 Extern) Semester Credits: 4.0

This is a capstone course focusing on the synthesis of professional knowledge and critical thinking skills in preparation for professional advancement and lifelong learning. This course provides students with an opportunity to identify and develop research skills necessary to create a solution for an existing health care issue. The course content is geared to increase and disseminate intellectual inquiry, information literacy, and the use of scholarly research methods.

Prerequisites: Semesters I, II, and III courses

I have been working as a respiratory therapist since 2002. In 2008, I was promoted to manager of the respiratory department at Tippah County Hospital in Ripley, MS. I loved what I was doing, but I knew I wanted to further my education by obtaining a bachelor's degree. In 2014, I came across some information about Pima Medical Institute on Facebook. I did more research, not really knowing what to expect, and found all of my college classes would transfer and I wouldn't need any prerequisites to begin the online Bachelor of Science in Respiratory Therapy (BSRT) Program. It was such an effortless process to apply and get accepted that within two days I was ready to begin my new program!

I had never taken an online class before and was quite nervous. But, I only had to take two classes at a time, and assignments were clearly laid out so they were easily accomplished. The instructors were amazing and were always very responsive to my emails with questions. I was able to continue to work full-time and be a mom to my two boys and a wife to my husband of 13 years. Seeing how proud they were of me made it all worth it.

I graduated with honors in 2016. I am the director of respiratory at my facility, and I have no plans to leave. But, should I choose to pursue something else, I know many doors will be open thanks to my BSRT degree from Pima Medical Institute.

Master of Science in Organizational Leadership Healthcare Administration Specialization

Objective: The Master of Science in Organizational Leadership prepares graduate students to lead diverse organizations amidst a rapidly changing global landscape. In-depth examination of traditional and contemporary theories, coupled with research on communication, organizational behavior, and managing change, provides the framework for building advanced leadership skills. Students will cultivate a personal leadership approach that inspires diverse teams to work together and effect positive change for the diverse communities in which they serve and operate. The curriculum is designed to equip students with practical and analytical tools to successfully lead organizations through today's organizational challenges. Graduates of this program receive a Master of Science Degree.

Healthcare Administration Specialization: The Master of Science in Organizational Leadership, Healthcare Administration Specialization, will prepare students with the leadership skills necessary to work in healthcare administration. Leaders in the healthcare field have unique challenges inherit to a multidisciplinary environment that is often changing. Students will gain an in- depth understanding of strategic management processes, problem solving through quality improvement strategies, financial management, and policies and processes surrounding healthcare administration.

Admission Requirements: Applicants to this degree program must have graduated with a minimum of a baccalaureate degree from an accredited program recognized by the US Secretary of Education or the Council for Higher Education Accreditation (CHEA) earning a 2.75 GPA or greater. For applicants with previous graduate level credits, see additional Admissions and Transfer Credit requirements in the Prospective Student section of this catalog.

GRD 501 Introduction to Graduate Writing and Critical Analysis

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Critical thinking, expressed through sound research and clear writing, is a foundation of all academic and professional pursuits. This course will establish expectations of graduate level writing and research, including use of American Psychological Association (APA) style and information research practices, in preparation for independent graduate writing tasks. Students will practice writing and research skills as well as self- and peer evaluation of work.

LDR 515 Leadership Theory and Practice

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is designed to deepen student understanding of leadership research, theories, and practices through critical analysis and application. Content examines the process of leadership and the leadership characteristics and skills necessary for guiding organizations. Organizational theory, strategic thinking, decision-making, organizational culture, and change in the context of leadership will be emphasized.

LDR 518 Strategic Communication

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides analytical approaches for communication in organizational contexts. Content will explore communication processes in multiple contexts and support the ability to adapt communication to meet the needs of various internal and external stakeholders. Communicating in a leadership role will be the primary focus.

LDR 525 Evidence-Based Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Evidence-based management is important in developing skills in using best available evidence for effective planning and decision-making as a leader. This course covers the foundations and evolution of evidence-based thinking in management at the executive leader level. The process of gathering, evaluating, and applying evidence to support decision-making in organizations will be emphasized. Field-based examples will be used to illustrate how leaders critically analyze available research and data in organizational decisions and processes.

LDR 555 Leading Diverse Teams

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

A large part of organizational leadership takes place in groups. This course focuses on exploring group dynamics and fostering an environment of collaboration, interdisciplinary action, and productive teamwork. Topics include relational leadership; developing and facilitating teams; influencing groups; and leveraging diversity to promote organizational effectiveness.

LDR 644 Leadership Ethics and Social Responsibility

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course deepens student understanding of the broader social environment in which organizations operate as well as the ethical and legal responsibilities that leaders owe to a variety of stakeholders. Content includes organizational social responsibility to understand and apply ethics from social, economic, and environmental perspectives.

LDR 610 Leading Change and Innovation

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course will focus on leadership practices in change management theory and the methods by which leaders effect change within organizations. Content will include strategies for managing change cycles, developing proactive change initiatives, and generating support for innovative organizational change.

HCA 570 Emerging Issues in Health Administration

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Health care leadership requires a broad understanding of the complex challenges facing health care organizations today. This course explores current and emerging issues related to policy and political climate, population/disease demographics, reimbursement, workforce, technology, and health disparities that influence decisions made about delivering health care services. Learners will personalize issues at local, regional, and national levels by assessing the impact those issues may have on their own real-world health care role and future leadership roles.

HCA 630 Health Care Finance

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course covers both the financial management challenges and best practice solutions in maintaining viability of health organizations. The focus is on financial analysis to direct strategic financial planning and decision-making. Emphasis is placed on the administrator's ability to translate financial information to stakeholders in health organizations.

HCA 655 Strategic Management of Patient-Centered Networks

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course explores the logic, structure, and best practices for patient-centered strategic management in health care. Content includes a systematic approach to formulating, implementing, and analyzing strategic initiatives to assist health care organizations in achieving better performance while meeting the needs of their patient consumers.

HCA 640 Leading Quality Improvement in Healthcare

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Leading quality improvement in healthcare addresses the broad area of risk management, covering key areas of patient safety, governance, and organization risks. Key statutes, standards and regulations that govern health care quality are discussed. This course explores basic claims administration, risk financing, and insurance principles and coverage. Topics include activities in organizational risk assessment, continuous quality improvement, and interpreting key occupational and safety issues.

LDR 690 Professional Capstone

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides an opportunity for students to synthesize theoretical knowledge, practical skills, and current research into a culminating capstone project. The project will address a complex problem, challenge, or issue related to the field of study and propose an innovative solution or practice, with emphasis on action-based leadership. Additional emphasis is placed upon the creation of a professional portfolio to highlight skills and achievements in the respective academic discipline.

Master of Science in Organizational Leadership

Public Health Administration Specialization

Objective: The Master of Science in Organizational Leadership prepares graduate students to lead diverse organizations amidst a rapidly changing global landscape. In-depth examination of traditional and contemporary theories, coupled with research on communication, organizational behavior, and managing change, provides the framework for building advanced leadership skills. Students will cultivate a personal leadership approach that inspires diverse teams to work together and effect positive change for the diverse communities in which they serve and operate. The curriculum is designed to equip students with practical and analytical tools to successfully lead organizations through today's organizational challenges. Graduates of this program receive a Master of Science Degree.

Public Health Administration Specialization: The Master of Science in Organizational Leadership, Public Health Administration Specialization, will prepare students with the leadership skills necessary to work in the Public Health setting. Leaders in public health promote and protect the health of populations and communities through prevention, action, and education of people and organizations concerning health initiatives. Students will be prepared as professionals in public health leadership roles to understand and analyze the healthcare data of various demographic groups, determine which socioeconomic factors may be contributing to health outcomes and to recognize how to address the needs of communities.

Admission Requirements: Applicants to this degree program must have graduated with a minimum of a baccalaureate degree from an accredited program recognized by the US Secretary of Education or the Council for Higher Education Accreditation (CHEA) earning a 2.75 GPA or greater. For applicants with previous graduate level credits, see additional Admissions and Transfer Credit requirements in the Prospective Student section of this catalog.

GRD 501 Introduction to Graduate Writing and Critical Analysis

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Critical thinking, expressed through sound research and clear writing, is a foundation of all academic and professional pursuits. This course will establish expectations of graduate level writing and research, including use of American Psychological Association (APA) style and information research practices, in preparation for independent graduate writing tasks. Students will practice writing and research skills as well as self- and peer evaluation of work.

LDR 515 Leadership Theory and Practice

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course is designed to deepen student understanding of leadership research, theories, and practices through critical analysis and application. Content examines the process of leadership and the leadership characteristics and skills necessary for guiding organizations. Organizational theory, strategic thinking, decision-making, organizational culture, and change in the context of leadership will be emphasized.

LDR 518 Strategic Communication

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides analytical approaches for communication in organizational contexts. Content will explore communication processes in multiple contexts and support the ability to adapt communication to meet the needs of various internal and external stakeholders. Communicating in a leadership role will be the primary focus.

LDR 525 Evidence-Based Management

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Evidence-based management is important in developing skills in using best available evidence for effective planning and decision-making as a leader. This course covers the foundations and evolution of evidence-based thinking in management at the executive leader level. The process of gathering, evaluating, and applying evidence to support decision-making in organizations will be emphasized. Field-based examples will be used to illustrate how leaders critically analyze available research and data in organizational decisions and processes.

LDR 555 Leading Diverse Teams

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

A large part of organizational leadership takes place in groups. This course focuses on exploring group dynamics and fostering an environment of collaboration, interdisciplinary action, and productive teamwork. Topics include relational leadership; developing and facilitating teams; influencing groups; and leveraging diversity to promote organizational effectiveness.

LDR 644 Leadership Ethics and Social Responsibility

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course deepens student understanding of the broader social environment in which organizations operate as well as the ethical and legal responsibilities that leaders owe to a variety of stakeholders. Content includes organizational social responsibility to understand and apply ethics from social, economic, and environmental perspectives.

LDR 610 Leading Change and Innovation

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course will focus on leadership practices in change management theory and the methods by which leaders effect change within organizations. Content will include strategies for managing change cycles, developing proactive change initiatives, and generating support for innovative organizational change.

PHA 605 Foundations in Public Health

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course introduces public health concepts and the skills required of public health leaders in community organizations and community health practice. Students will examine topics related to managing and leading public health enterprise at local, national, and global levels. Building public health competency through investigation of a variety of public health issues will support interdisciplinary skills, knowledge, and critical thinking demanded by today's public health leaders.

PHA 630 Health Informatics

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course explores health informatics from a public health and health-related research perspective with an emphasis on health information technology. Public health policy, structure and functions, public health data, surveillance, health communications, and global health informatics will be explored. Content will include the application of informatics to address public health-related problems.

PHA 650 Social, Behavioral, and Cultural Factors in Public Health

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course will deepen student understanding of the major social, behavioral, and cultural variables and issues that affect the health of populations. Frameworks and other theories presented in this course will focus on intervention strategies and program initiatives that address current public health problems and reduce health disparities.

PHA 655 Epidemiology

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

Epidemiology, as the basic science of public health, is the study of the distribution and determinants of population health as well as methods to improve disease outcomes. This course will equip students with foundational knowledge of epidemiology, research methods employed in epidemiology, and skills for interpreting existing evidence for the purposes of making public health or policy recommendations. Evaluation of epidemiologic study designs and measures of association for determining relationships will be explored.

LDR 690 Professional Capstone

Total Course Hours: 45 (45 Theory, 0 Lab, 0 Extern) Semester Credits: 3.0

This course provides an opportunity for students to synthesize theoretical knowledge, practical skills, and current research into a culminating capstone project. The project will address a complex problem, challenge, or issue related to the field of study and propose an innovative solution or practice, with emphasis on action-based leadership. Additional emphasis is placed upon the creation of a professional portfolio to highlight skills and achievements in the respective academic discipline.
