

# Northeastern University

*Matthew Modoono for Northeastern University*

## **Graduate Catalog**

### **2023-2024**

# Table of Contents

Graduate Catalog .....	16
Information for Entering Students .....	17
Academic Resources .....	18
Libraries .....	19
Office of the University Registrar .....	20
Campus Resources .....	21
Center for Advancing Teaching and Learning Through Research .....	22
Disability Resource Center .....	23
Employer Engagement and Career Design .....	24
Public Safety .....	25
Health and Counseling .....	26
We Care .....	27
Information for International Students .....	28
Information Technology Services .....	29
Off Campus Engagement and Support .....	30
Office of the University Registrar .....	20
Financial Information .....	31
Bill Payment .....	32
Delivery of Services .....	35
Financial Aid Assistance .....	36
Student Refunds .....	39
Tuition and Fees .....	40
Academic Policies and Procedures .....	44
Accommodations for Students with Disabilities .....	45
Attendance Requirements .....	46
Campus Transfer and Campus Location Change .....	47
Clearing an Academic Deficiency .....	48
Code of Student Conduct .....	49
Course Credit Guidelines .....	50
Course Numbering System .....	51
Family Educational Rights and Privacy Act (FERPA) .....	52
Grade Change Policy .....	54
Grade Table and GPA .....	55
Leaves of Absence and University Withdrawal .....	57
Personal Information .....	60
Requesting and Clearing An Incomplete Grade .....	61
Retaking Courses .....	62
Student Bill of Academic Rights and Responsibilities .....	63
Student Responsibility Statement .....	66
Student Right-to-Know Act .....	67

Substituting Courses .....	68
University-Sponsored Travel .....	69
Academic Appeals Policies and Procedures .....	70
Academic Calendars .....	73
Academic Integrity Policy .....	74
Audit Policy .....	75
Cooperative Education .....	76
Departmental Jurisdiction .....	78
Dismissal from Class .....	79
Dropping a Class .....	80
Final Examinations and Related Policies on Other Exams .....	81
Full-Time Status .....	82
General Regulations .....	83
Graduation Requirements .....	87
Minimum Cumulative GPA .....	88
Overload Conditions for Graduate Assistants .....	89
Pass/Fail (Satisfactory/Unsatisfactory) Grading .....	90
Regulations and Requirements for All Graduate Degree Programs .....	91
Regulations and Requirements for Graduate Certificate Programs .....	93
Regulations and Requirements for the Master's Degree .....	94
Regulations and Requirements for PlusOne Degree Combinations .....	95
Regulations and Requirements for Professional Doctorate Degree Programs .....	96
Regulations and Requirements for the Certificate of Advanced Graduate Study .....	98
Regulations and Requirements for Doctor of Philosophy (PhD) Programs .....	99
Regulations and Requirements for Interdisciplinary Graduate Degrees .....	101
Definitions .....	102
PhD Programs .....	103
Experiential PhD .....	107
College of Arts, Media and Design .....	109
Academic Policies and Procedures .....	110
General Information .....	111
Master's Degree Policies .....	112
Graduate Student Classification .....	113
School of Architecture .....	114
Master of Architecture—One-Year Program .....	115
Master of Architecture—Two-Year Program .....	116
Master of Architecture—Three-Year Program .....	118
Master of Architecture—Three-Year Program—Advanced Degree Entrance .....	120
Sustainable Urban Environments, MDes—One-Year Program .....	122
Sustainable Urban Environments, MDes—Two-Year Program .....	123
Art + Design .....	125
Experience Design, MFA .....	126
Information Design and Data Visualization, MFA .....	128

Experience Design, MS .....	131
Game Science and Design, MS .....	133
Information Design and Data Visualization, MS .....	135
Experience Design, Graduate Certificate .....	137
Game Experience Design, Graduate Certificate .....	138
Game Science, Graduate Certificate .....	139
Information Design and Visualization, Graduate Certificate .....	140
School of Journalism .....	141
Journalism, MA .....	142
Media Advocacy, MS .....	143
Media Innovation and Data Communication, MS .....	144
Interdisciplinary Programs .....	146
Interdisciplinary Design and Media, PhD .....	147
Arts Administration and Cultural Entrepreneurship, MS .....	152
Creative Collaboration and Multidisciplinary Design, MS .....	154
Creative Practice Leadership, MS .....	156
Extended Realities, MS .....	158
Urban Planning and Policy, MS .....	163
Arts Administration, Graduate Certificate .....	167
Cultural Entrepreneurship, Graduate Certificate .....	168
D'Amore-McKim School of Business .....	169
Master of Science .....	170
Business Analytics, MS .....	171
Business Analytics, MS—Online .....	172
International Management, MS .....	173
Management, MS .....	174
Accounting, MSA .....	185
Finance, MSF .....	187
Quantitative Finance, MSF .....	188
Master of Business Administration .....	190
Business Administration, MBA—Full-Time .....	191
Business Administration, MBA—Online .....	200
Business Administration, MBA—Part-Time .....	202
Combined Degrees .....	208
Accounting and Business Administration, MSAMBA .....	209
Finance and Business Administration, MSFMBA .....	211
Finance and Business Administration, MSFMBA—Online .....	220
Finance and Business Administration, MSFMBA—Part-Time .....	221
Quantitative Finance and Business Administration, MSFMBA .....	227
Dual Degrees .....	231
Law, JD / Accounting and Business Administration, MSAMBA .....	232
Law, JD / Business Administration, MBA—Full-Time .....	233
Law, LL.M. / Business Administration, MBA—Full-Time .....	234

Graduate Certificates .....	235
Accounting and Financial Decision Making, Graduate Certificate .....	236
Brand Management, Graduate Certificate .....	237
Business Administration, Graduate Certificate .....	238
Business Administration, Graduate Certificate—Online .....	240
Business Analytics, Graduate Certificate .....	242
Business Management for Healthcare, Graduate Certificate .....	243
Corporate Finance, Graduate Certificate .....	244
Corporate Innovation, Graduate Certificate .....	245
Corporate Renewal, Graduate Certificate .....	246
Entrepreneurship, Graduate Certificate .....	247
International Business, Graduate Certificate .....	248
Investments, Graduate Certificate .....	249
Leading People and Organizations, Graduate Certificate .....	250
Marketing, Graduate Certificate .....	251
Marketing Analytics, Graduate Certificate .....	252
Mutual Fund Management, Graduate Certificate .....	253
Supply Chain Management, Graduate Certificate .....	254
Sustainability and Business, Graduate Certificate .....	255
Khoury College of Computer Sciences .....	256
Academic Policies and Procedures .....	257
Absenteeism .....	258
Academic Integrity .....	259
Academic Probation and Dismissal .....	260
Certificates .....	261
Pass / Fail Policy .....	262
Transfer of Credit .....	263
Computer Science .....	264
Computer Science, PhD .....	267
Network Science, PhD .....	273
Artificial Intelligence, MS .....	277
Data Science, MS .....	279
Data Science, MS—Align .....	281
Game Science and Design, MS .....	133
Internet of Things, MS .....	286
Robotics, MS .....	290
Computer Science, MSCS .....	293
Computer Science, MSCS—Align .....	295
Cloud Software Development, Graduate Certificate .....	297
Computer Science, Graduate Certificate .....	298
Data Analytics, Graduate Certificate .....	299
Inclusive Computer Science Education, Graduate Certificate .....	300
Cybersecurity .....	301

Cybersecurity, PhD .....	302
Cybersecurity, MS .....	308
Cybersecurity, MS—Align .....	310
Cybersecurity, Graduate Certificate .....	313
Health Informatics .....	314
Personal Health Informatics, PhD .....	314
Health Informatics, MS .....	314
Interdisciplinary Programs .....	317
Network Science, PhD .....	273
Personal Health Informatics, PhD .....	322
Data Science, MS .....	279
Game Science and Design, MS .....	133
Robotics, MS .....	290
Data Analytics, Graduate Certificate .....	299
College of Engineering .....	334
Academic Policies .....	335
Academic Dismissal Policy .....	336
Academic Integrity Policy .....	337
Academic Standing Policy .....	338
Appeals Policy .....	339
Attendance Policy .....	340
Course Registration .....	341
Course Selection .....	342
Dissertation Committee .....	343
Graduate Student Grievance Policy .....	344
PhD Student Progress and Review .....	345
Program Completion .....	346
Reenrollment Policy for Full-time Students .....	347
Bioengineering .....	348
Bioengineering, PhD .....	349
Interdisciplinary Engineering, PhD .....	357
Bioengineering, MSBioE .....	360
Chemical Engineering .....	364
Chemical Engineering, PhD .....	366
Interdisciplinary Engineering, PhD .....	357
Pharmaceutical Engineering, MS .....	374
Chemical Engineering, MSChE .....	376
Process Safety Engineering, Graduate Certificate .....	379
Civil and Environmental Engineering .....	380
Civil and Environmental Engineering, PhD .....	382
Climate Science and Engineering, MS .....	385
Engineering and Public Policy, MS .....	387
Civil Engineering with Concentration in Data and Systems, MSCivE .....	390

Civil Engineering with Concentration in Construction Management, MSCivE .....	393
Civil Engineering with Concentration in Geotechnical/Geoenvironmental Engineering, MSCivE .....	395
Civil Engineering with Concentration in Structures, MSCivE .....	397
Civil Engineering with Concentration in Transportation, MSCivE .....	399
Civil Engineering with Concentration in Water, Environmental, and Coastal Systems, MSCivE .....	401
Environmental Engineering, MSEnvE .....	403
Sustainable Building Systems, MSSBS .....	405
Climate and Engineering, Graduate Certificate .....	407
Sustainability Engineering, Graduate Certificate .....	408
Electrical and Computer Engineering .....	409
Computer Engineering, PhD .....	411
Cybersecurity, PhD .....	302
Electrical Engineering, PhD .....	419
Applied Physics and Engineering, MS .....	421
Data Science, MS .....	279
Internet of Things, MS .....	286
Robotics, MS .....	290
Wireless and Network Engineering, MS .....	432
Electrical and Computer Engineering with Concentration in Communications, Control, and Signal Processing, MSECE .....	434
Electrical and Computer Engineering with Concentration in Computer Systems and Software, MSECE .....	439
Electrical and Computer Engineering with Concentration in Computer Networks and Security, MSECE .....	444
Electrical and Computer Engineering with Concentration in Computer Vision, Machine Learning, and Algorithms, MSECE .....	448
Electrical and Computer Engineering with Concentration in Electromagnetics, Plasma, and Optics, MSECE .....	453
Electrical and Computer Engineering with Concentration in Hardware and Software for Machine Intelligence, MSECE .....	458
Electrical and Computer Engineering with Concentration in Microsystems, Materials, and Devices, MSECE .....	463
Electrical and Computer Engineering with Concentration in Power Systems, MSECE .....	467
Electrical and Computer Engineering Leadership, MSECEL .....	472
Mechanical and Industrial Engineering .....	473
Industrial Engineering, PhD .....	475
Mechanical Engineering, PhD .....	478
Advanced and Intelligent Manufacturing, MS .....	481
Data Analytics Engineering, MS .....	485
Human Factors, MS .....	490
Industrial Engineering, MSIE .....	493
Engineering Management, MSEM .....	497
Energy Systems, MSEneS .....	504
Energy Systems, MSEneS—Academic Link Program .....	507
Mechanical Engineering with Concentration in General Mechanical Engineering, MSME .....	509
Mechanical Engineering with Concentration in Materials Science, MSME .....	512
Mechanical Engineering with Concentration in Mechanics and Design, MSME .....	514
Mechanical Engineering with Concentration in Mechatronics, MSME .....	517
Mechanical Engineering with Concentration in Thermofluids, MSME .....	520
Operations Research, MSOR .....	523

Data Analytics Engineering, Graduate Certificate .....	526
Energy Systems, Graduate Certificate .....	527
Energy Systems Management, Graduate Certificate .....	528
Engineering Business, Graduate Certificate .....	529
Engineering Economic Decision Making, Graduate Certificate .....	531
Engineering Management, Graduate Certificate .....	532
Lean Six Sigma, Graduate Certificate .....	533
Renewable Energy, Graduate Certificate .....	534
Sustainable Energy Systems, Graduate Certificate .....	535
Supply Chain Engineering Management, Graduate Certificate .....	536
Technology Systems Management, Graduate Certificate .....	537
Multidisciplinary Programs .....	538
Information Systems, MSIS .....	539
Information Systems, MSIS–Bridge .....	541
Cyber-Physical Systems, MS .....	542
Data Architecture and Management, MS .....	544
Software Engineering Systems, MS .....	545
Telecommunication Networks, MS .....	547
Blockchain and Smart Contract Engineering, Graduate Certificate .....	549
Broadband Wireless Systems, Graduate Certificate .....	550
Engineering Leadership, Graduate Certificate .....	551
IP Telephony Systems, Graduate Certificate .....	553
Software Engineering Systems, Graduate Certificate .....	554
Interdisciplinary Graduate Programs .....	555
Cybersecurity, PhD .....	302
Interdisciplinary Engineering, PhD .....	357
Product Development, MS .....	565
Graduate Certificate Programs .....	567
Bouvé College of Health Sciences .....	568
Academic Policies and Procedures .....	569
Background Checks .....	570
Health Requirements .....	571
Liability Insurance .....	572
Requirements for Clinical, Internships, and Practicum Courses .....	573
Financial Awards .....	575
Advising .....	576
Course Substitution .....	577
Transfer of Credit .....	578
Academic Affairs Appeals Process .....	579
Academic Dismissal .....	581
Academic Probation Policy .....	582
Academic Progression .....	583
Academic Standing .....	584

Graduation Policies .....	585
Interdisciplinary Programs .....	586
Healthcare Leadership, DMSc .....	587
Network Science, PhD .....	273
Personal Health Informatics, PhD .....	314
Health Informatics, MS .....	314
Pharmaceutical Engineering, MS .....	374
Real-World Evidence in Healthcare and Life Sciences, MS .....	599
Health Informatics, MS / Physician Assistant, MS .....	601
Law, JD / Public Health, MPH .....	602
Pharmacy, PharmD—Direct Entry / Public Health, MPH .....	603
Physician Assistant, MS / Public Health, MPH .....	604
Public Health, MPH / Health Informatics, MS .....	605
Early Intervention, Graduate Certificate .....	606
Health Informatics Management and Exchange, Graduate Certificate .....	607
Health Informatics Privacy and Security, Graduate Certificate .....	607
Health Informatics Software Engineering, Graduate Certificate .....	607
Patient Safety, Graduate Certificate .....	607
School of Clinical and Rehabilitation Sciences .....	608
Speech-Language Pathology, MS .....	611
Healthcare Leadership, DMSc .....	587
Physician Assistant, MS .....	616
Health Informatics, MS / Physician Assistant, MS .....	601
Physician Assistant, MS / Public Health, MPH .....	604
Human Movement and Rehabilitation Sciences, PhD .....	620
Physical Therapy, DPT—Postbaccalaureate Entry .....	623
Human Movement and Rehabilitation Sciences, MS .....	629
Extreme Medicine, Graduate Certificate .....	631
School of Community Health and Behavioral Sciences .....	632
Counseling Psychology, PhD .....	634
School Psychology, PhD .....	636
School Psychology, CAGS .....	638
Applied Behavior Analysis, MS .....	639
Applied Educational Psychology, MS .....	641
Applied Psychology, MS .....	642
Counseling Psychology, MSCP .....	643
Early Intervention, Graduate Certificate .....	606
Personal Health Informatics, PhD .....	314
Population Health, PhD .....	646
Public Health, MPH .....	650
Public Health, MPH—Accelerated .....	652
Exercise Science, MS—Online .....	654
Health Informatics, MS .....	314

Real-World Evidence in Healthcare and Life Sciences, MS .....	599
Law, JD / Public Health, MPH .....	602
Pharmacy, PharmD—Direct Entry / Public Health, MPH .....	603
Physician Assistant, MS / Public Health, MPH .....	604
Public Health, MPH / Health Informatics, MS .....	605
Health Informatics Management and Exchange, Graduate Certificate .....	665
Health Informatics Privacy and Security, Graduate Certificate .....	666
Health Informatics Software Engineering, Graduate Certificate .....	667
School of Nursing .....	668
Nursing, PhD .....	669
Nurse Anesthesia, DNP .....	672
Nursing, DNP—Post-Master’s .....	674
Nursing—Adult-Gerontology Nurse Practitioner, Acute Care, CAGS .....	675
Nursing—Adult-Gerontology Nurse Practitioner, Primary Care, CAGS .....	676
Nursing—Psychiatric-Mental Health Nurse Practitioner, CAGS .....	677
Nursing—Neonatal Nurse Practitioner, CAGS .....	678
Nursing—Pediatric Nurse Practitioner, Acute Care, CAGS .....	679
Nursing—Pediatric Nurse Practitioner, Acute and Primary Care, CAGS .....	680
Nursing—Pediatric Nurse Practitioner, Primary Care, CAGS .....	681
Nursing, MS .....	682
Nursing, MS—Direct Entry .....	686
Patient Safety, Graduate Certificate .....	607
Pediatric Nurse Practitioner, Acute Care, Graduate Certificate .....	692
School of Pharmacy and Pharmaceutical Sciences .....	693
Biomedical Science, PhD .....	694
Medicinal Chemistry and Drug Discovery, PhD .....	701
Pharmaceutics and Drug Delivery, PhD .....	707
Pharmacology, PhD .....	713
Pharmacy, PharmD .....	719
Pharmacy, PharmD—Direct Entry .....	720
Biomedical Science, MS .....	726
Medicinal Chemistry and Drug Discovery, MS .....	729
Pharmaceutical Engineering, MS .....	374

## Information for Entering Students

Graduate education at Northeastern University integrates the highest level of scholarship across disciplinary boundaries with significant research and experiential learning opportunities in Boston and around the world. Northeastern offers hundreds of graduate programs, ranging from doctoral and full-time master's programs to part-time programs and graduate certificates, including an array of innovative PhD and master's programs designed to prepare students for emerging new fields. Students are able to take courses on campus, online, or in hybrid formats. This multidimensional learning environment offers students the knowledge and experience to excel and the flexibility to create the educational experience that best meets their needs. Our graduates are well positioned to meet the diverse demands of careers in academia, industry, and the professions.

## Libraries

### Northeastern University Library

Website (<https://library.northeastern.edu>)

617.373.8778

The Northeastern University Library serves the entire Northeastern community—in Boston, Oakland, across the global campus network, and online. The Library provides collections and services supporting research and teaching across disciplines. Its collections are extensive, with a large proportion available digitally. The Library's collections include more than 1 million e-books; almost 500,000 print titles; more than 150,000 licensed e-journals; and more than 200,000 streaming audio and visual titles. Access to print and electronic materials is provided through Scholar OneSearch, the Library's discovery platform. The Library's Archives and Special Collections hold historical records and publications of Northeastern and unique materials preserving the history of Boston's social movements, public infrastructure, neighborhoods, and natural environments.

Services provided by the Library include both on-site and online research help, the latter including 24/7 live chat with a reference librarian; subject-specialist librarians who provide in-depth consultation and research support for each academic program at the university; and an interlibrary loan system for providing materials not readily available at Northeastern. The Library actively supports the unique needs of graduate students in research and publishing through services such as citation management workshops, research data support, and digital scholarship services.

The Snell Library building in Boston is open to all Northeastern students, faculty, and staff. Spaces in the building include areas for group work and quiet individual study, with more than 30 group study rooms with whiteboards and plug-in displays for collaborative group work. Individual study rooms are also available for graduate students. The Library supports a range of creative activities and includes studios for audio recording, video production, and 3D printing.

F. W. Olin Library in Oakland is open to all Northeastern students, faculty, and staff, as well as Mills College and Northeastern University alumni and community members. The Library offers a collection of 200,000 volumes and other media supporting the curricular needs of the programs on the Oakland campus. Spaces in the building include areas for quiet study and group work, including reservable study rooms, a seminar room, and the student lounge. F. W. Olin Library houses special collections in the Elinor Raas Heller Rare Book Room. Oakland special collections include early printed books, contemporary fine press and artists' books, and the Mills College Archive.

---

### School of Law Library

Website (<https://law.northeastern.edu/library/>)

617.373.3332

The School of Law Library, located on four floors in the Knowles Law Center, includes a comprehensive collection of U.S. legal materials in print and in electronic format. Of particular note is the library's collection in the areas of public interest law; international human rights law; and public health, death penalty issues, and progressive lawyering. More information can be found at the School of Law Library webpage (<https://law.northeastern.edu/library/>).

## Office of the University Registrar

The Office of the University Registrar provides an important link between the university's academic programs and policies and the student. It administers a number of specific services, including class scheduling, registration, record functions, verification of enrollment, reporting, and transcript services.

The Office of the University Registrar utilizes the Student Hub (<https://me.northeastern.edu/>) to provide students convenient access to information and services, including class schedules and registration, most recent grades, unofficial transcripts, and transcript and enrollment verification requests.

Office of the University Registrar website (<https://registrar.northeastern.edu/>)

registrar@northeastern.edu

617.373.2300

617.373.5351 (fax)

### **Maintenance of Student Records**

The Office of the University Registrar is responsible for ensuring appropriate maintenance and safekeeping of student records. The transcript, which is stored electronically and maintained indefinitely, is the holistic record of student attendance and degree progress. In the event that the university discontinues operations, the archive of student records would be maintained by:

Massachusetts Department of Higher Education

One Ashburton Place

Room 1401

Boston, MA 02108

## Campus Resources

- Center for Advancing Teaching and Learning Through Research (p. 22)
- Disability Resource Center (p. 23)
- Employer Engagement and Career Design (p. 24)
- Public Safety (p. 25)
- University Health and Counseling Services (p. 26)
- We Care (p. 27)

## Center for Advancing Teaching and Learning Through Research

catlr@northeastern.edu

Website (<https://learning.northeastern.edu/>)

617.373.3157

617.373.7779 (fax)

The Center for Advancing Teaching and Learning Through Research provides professional development for all graduate students at Northeastern University in their roles as teaching assistants, instructors, and future faculty and professionals. We provide a range of opportunities for graduate students to develop effective teaching skills, including course design and communication. CATLR is committed to supporting your success at Northeastern and beyond, and we welcome you to:

- Participate in workshops and other events to learn about effective practices in teaching and course design and to adapt them for your own current or future use.
- Meet one-on-one with a CATLR consultant to discuss any aspect of teaching or preparing for the academic job market and postdoctoral careers, including developing course syllabi, teaching statements, teaching portfolios, and diversity statements.
- Invite a CATLR consultant to observe your class, recitation, lab, studio, or guest lecture and to meet with you afterward to share and discuss their observations in relation to your own goals and reflections.
- Learn more about our self-paced Future Faculty Program, designed for you to reflect on and prepare for the various dimensions of teaching in higher education.

All of CATLR's services are provided on a formative and confidential basis.

## Disability Resource Center

617.373.2675

617.373.7800 (fax)

Website (<http://www.northeastern.edu/drc/>)

Northeastern University and the Disability Resource Center are committed to providing disability services that enable students who qualify under Section 504 of the Rehabilitation Act and the Americans with Disabilities Act Amendments Act to participate fully in the activities of the university. To receive accommodations through the DRC, students must provide appropriate documentation that substantiates a disability and demonstrates a current significant limitation. Accommodations are provided based on an evaluation of the information provided by students, and their clinicians, on a case-by-case basis. These services are available for, but not limited to, students with the following diagnoses:

- Learning disabilities and/or ADHD
- Autism spectrum disorders
- Chronic or degenerative disorders
- Hearing loss
- Mobility impairments
- Psychiatric disorders
- Traumatic or acquired brain injury
- Vision impairments

Students should provide documentation to the DRC at their earliest convenience to allow for sufficient time for review. After the documentation has been reviewed, a disability specialist will contact the student regarding appropriate next steps. Visit the DRC website (<http://www.northeastern.edu/drc/>) for additional information or contact staff at 617.373.2675.

## Employer Engagement and Career Design

Website (<https://careers.northeastern.edu>)

103 Stearns Center  
617.373.2430  
[careers@northeastern.edu](mailto:careers@northeastern.edu)

Employer Engagement and Career Design serves a diverse and sustainable global network of learners, alumni, and employers, forming a powerful ecosystem that nurtures lifelong career design and partnerships by enabling learners to:

- Choose a major and explore career options that fit an individual's unique attributes
- Take advantage of experiential learning opportunities
- Make career decisions that will engage students and alumni in productive and fulfilling work
- Prepare for and conduct successful job searches
- Create meaningful and effective engagement with employers
- Contribute to meeting global and societal needs

We collaborate closely with the co-op community in all colleges and campuses across the global university while offering a dynamic framework of career design as lifelong learning with distinctive advising and programs to support learners at all stages of their journey. We are committed to supporting all learners and employer partners in eliminating biases and inequitable systems that stand in the way of achieving their goals and fostering an inclusive and just society.

## Public Safety

### Northeastern University Police Department

100 Columbus Place

617.373.3333 (EMERGENCY—police, fire, medical)

617.373.3934 (TTY emergency or nonemergency)

617.373.2121 (nonemergency regular business)

Website (<https://nupd.northeastern.edu/>)

*Public Safety Division Administrative Offices*

617.373.2696

*Personal Safety*

617.373.2121

The Public Safety Division is committed to working with Northeastern University faculty, students, staff, and neighbors to build relationships and keep our campus thriving. Our work extends far beyond Boston, as we support learners in their academic and experiential endeavors around the world. The Public Safety Division is comprised of three sections: Police Department, Emergency Management, and International Safety.

The Northeastern University Police Department (<https://nupd.northeastern.edu/>) is a full-service and accredited police agency that comprises patrol and investigative divisions providing 24-hour service. NUPD has developed robust crime-detection and prevention strategies centered on technology and campus community engagement. Our well-trained officers are ready and willing to assist all members of our community.

A personal safety escort (<https://nupd.northeastern.edu/our-services/safety-escort-services/>) can be provided from one on-campus location to another, any time of day, whenever personal safety is a concern. You'll need to provide your name, Northeastern ID number, and location. Safety escorts usually arrive in 10 to 15 minutes. A special, nighttime off-campus escort service, called the RedEye, runs from dusk to dawn to transport students to their residence within two miles from the center of campus. Every night from 7 p.m. until 6 a.m., the RedEye van will pick students up at the Snell Library. In order to use this escort, you must book a ride in advance using the RedEye app, or you can book a ride at the RedEye dispatch center located at the Northeast Security office in the Ruggles Substation.

SafeZone (<https://nupd.northeastern.edu/safezone/>) is a mobile safety app that is unique to Northeastern. SafeZone is a smartphone app that any student or staff member can download and use for free. This app will connect you directly to the NUPD should you need our assistance or emergency support while you are on campus.

NUPD encourages you to not only familiarize yourself with all of the services provided by NUPD but to also utilize the services and safety-related tips provided. If you see something that does not look or feel right, NUPD encourages you to say something by contacting NUPD at 617.373.2121 or utilizing the SafeZone app.

#### **LOST AND FOUND ([HTTPS://NUPD.NORTHEASTERN.EDU/OUR-SERVICES/LOST-AND-FOUND/](https://nupd.northeastern.edu/our-services/lost-and-found/))**

If you have lost an item on Northeastern's Boston campus, call 617.373.3913. If your item has been turned in, we will contact you by telephone or email. If you have found an item on campus, return it to our headquarters located at 100 Columbus Place. If you suspect the item has been stolen, call the NUPD at 617.373.2121 to report the theft.

#### **UNIVERSITY EMERGENCY INFORMATION ([HTTP://WWW.NORTHEASTERN.EDU/EMERGENCY/](http://www.northeastern.edu/emergency/))**

617.373.2000 (snow emergencies)

617.373.3333 (police, medical, or fire emergencies)

Northeastern is committed to providing members of its community with a safe and secure place in which to live, work, and study.

The university is prepared to respond to emergencies and urgent situations that require immediate action. A trained team of police officers, EMTs, health and counseling experts, student affairs and residential life staff, and other professionals form a coordinated group that is able to manage a wide range of potential situations.

NU Alert, emergency broadcast communication messages, are sent to the email addresses and telephone numbers students, faculty, and staff have provided the university. For more information on NU Alert and Emergency Planning, visit the NUPD website (<https://nupd.northeastern.edu/safety/emergency-planning/>).

## Health and Counseling

### 24-hour Mental Health Support

Mental health support is available at any time from any location through Find@Northeastern for all full-time degree-seeking students. Call 877.233.9477 (U.S.), 855.229.8797 (Canada), or +1.781.457.7777 (International) to connect with a mental health clinician who is there to listen, guide, and help. In addition, through Find@Northeastern, students have access to unlimited free counseling sessions with therapists in their local area, connection to specialized treatment providers, and free access to Headspace and SilverCloud. Learn more here (<https://www.northeastern.edu/uhcs/find-at-northeastern/>).

---

#### BOSTON

University Health and Counseling Services (<https://www.northeastern.edu/uhcs/>)  
 70 Forsyth Building, Suite 135, Boston MA 02115  
 617.373.2772  
[uhcs@northeastern.edu](mailto:uhcs@northeastern.edu)

University Health and Counseling Services provides medical and mental healthcare for students in Massachusetts. UHCS clinicians are board-certified and licensed practitioners who provide confidential assessment and treatment of medical and mental health concerns, as well as referrals to specialists in the local Boston area. Visit UHCS (<https://www.northeastern.edu/uhcs/>) for more information, including access to care, NUSHP, medical leave of absence, and timely health updates.

---

#### OAKLAND

Counseling and Psychological Services (<https://oakland.northeastern.edu/student-resources/health-and-wellness/counseling-and-psychological-services/>)  
 Cowell Building, Oakland, CA 94613  
 510.430.2111  
[oakland-counseling@northeastern.edu](mailto:oakland-counseling@northeastern.edu)

Counseling and Psychological Services provides mental health support for students on the Oakland campus. Located in the Cowell Building, CAPS offers brief therapy, groups, outreach services, and referrals to supportive resources. Visit CAPS (<https://oakland.northeastern.edu/student-resources/health-and-wellness/counseling-and-psychological-services/>) for more information, including additional mental health resources available through Find@Northeastern.

Student Health Center (<https://www.millscollege.clinic/>)  
 CPM 117, Oakland, CA 94613  
 510.431.1108

The Student Health Center provides on-campus confidential healthcare to students enrolled at Mills at Northeastern University. Services offered include primary and preventive care, basic treatment for illnesses and injuries, laboratory and pharmacy services, and referrals to specialty care and imaging services. The Student Health Center is an outpatient clinic staffed by a board-certified and licensed nurse practitioner and supported by a team that includes a board-certified physician.

## We Care

617.373.7591

wecare@northeastern.edu (we\_care@northeastern.edu)

Website (<http://www.northeastern.edu/wecare/>)

We Care assists students who are experiencing unexpected challenges to maintain their academic progress. The staff works with students to coordinate among university offices, to offer appropriate referrals, and to help develop viable options to support their continued success at the university. We Care also provides guidance to faculty and staff in identifying Northeastern resources and policies to help students succeed.

## Information for International Students

### Office of Global Services

Website (<http://www.northeastern.edu/ogs/>)

617.373.2310

617.373.8788 (fax)

The Office of Global Services provides advice and support services to over 20,000 international students and scholars who represent approximately 147 nations.

OGS serves as a "home away from home" for all international students and offers a wide array of **programs and services** to assist international students with their cultural adjustment, academic success, and professional growth. Throughout the year, OGS hosts cocurricular events that celebrate culture and the rich diversity of the campus. These events are encouraged as a way to gain familiarity with Northeastern University in a cross-cultural context while also facilitating the formation of friendships across cultures. OGS promotes meaningful interaction and intercultural understanding among citizens of all countries and their local peers, providing educational and cultural enrichment opportunities for all members of Northeastern. All students in the Northeastern community are welcome to participate in our events.

OGS provides **comprehensive immigration advising services** to assist international students in understanding the benefits and restrictions of being an international student, as governed by the federal immigration regulations set forth by the country of the student's study location within the Northeastern University Global Network. OGS advises students on the complexities of immigration compliance and interfaces with various government agencies.

During **international student orientation**, international students will receive an overview of the immigration compliance requirements along with information and resources to support academic success, student life, campus safety, and cultural adjustment.

During every required academic term, international students must maintain **full-time status and appropriate on-ground presence** at Northeastern to comply with federal immigration regulations. Note that timely registration for courses is especially important so that international students may remain in compliance with Northeastern's reporting requirements to the federal government about where they are studying. Because understanding federal regulations is complex and often nuanced, international students should consult with OGS if they have questions about their individual status.

OGS—United States (<https://international.northeastern.edu/ogs/student-support/global-campuses/canada/>)

Information for international students and scholars attending Northeastern in the United States, including I-20 (F-1) or DS-2019 (J-1) issuance, visa processing, general guidelines, orientation, events and programs, and support services. F-1 and J-1 students are encouraged to regularly review the guidelines on maintaining status (<https://international.northeastern.edu/ogs/current-students/understanding-visa-requirements/guidelines-on-maintaining-status/>).

OGS—Canada (<https://international.northeastern.edu/ogs/student-support/global-campuses/canada/>)

Information for international students attending the Northeastern program in Canada, including study permit compliance and extension, work eligibility, co-op work permit application, Post-Graduation Work Permit application, general guidelines, and support services.

Visa Immigration Compliance Team (<https://www.nulondon.ac.uk/study/international-students/visa/visasupport/>)—United Kingdom

The visa compliance team in London is committed to providing comprehensive support to international students throughout their CAS (Certificate of Acceptance for Studies) and UK student visa application processes. Their role encompasses assisting students in both pre- and postenrollment visa compliance activities.

The team also offers full support for an in-person enrollment on the first day at Northeastern University, London—which is a crucial process where the university verifies the information provided by international students and ensures their right to study in the UK. It is the university's responsibility to ensure that every international student possesses the correct visa to study in the UK. Once enrollment is successfully completed and all requested information is submitted, the visa compliance team issues a student ID card as a confirmation of the student's enrollment with Northeastern University, London.

The visa compliance team remains available throughout the student's enrollment life cycle to provide advice, guidance, and comprehensive support for any issues related to student visas. This includes addressing changes in program or any other matters related to visas or immigration, until the international student graduates.

## Information Technology Services

IT Services is the university's central group that provides technology services, solutions, and support to all Northeastern University students. Visit the Connect To Tech guide (<https://connect-to-tech.northeastern.edu/students/>) for information and key technology resources that are particularly helpful to students, including:

- Northeastern accounts
- Access to email
- Laptop recommendations and discounts
- Canvas learning management system
- Software such as Office 365 and Adobe Creative Cloud
- Frequently used websites and mobile apps

### Technology Support and IT Service Desk

Technology support is available 24/7 online or by phone and email. Walk-up support is available at the Tech Bar on the Boston and Oakland campuses. [G \(https://service.northeastern.edu/tech/?id=its\\_contact\\_us\)](https://service.northeastern.edu/tech/?id=its_contact_us)**et IT Support >**

[service.northeastern.edu/tech \(https://service.northeastern.edu/tech/\)](https://service.northeastern.edu/tech/)

617.373.HELP [4357]

[help@northeastern.edu](mailto:help@northeastern.edu)

Visit the Tech Service Portal (<https://service.northeastern.edu/tech/>) to search for how-tos and FAQs, borrow a laptop or other equipment, start a live chat, and search other resources.

Occasionally, interruptions to university systems, services, and tools can happen—when they do, get updates about them through Northeastern's IT status page (<https://its.northeastern.edu/status/>).

## Off Campus Engagement and Support

617.373.8480

[offcampus@northeastern.edu](mailto:offcampus@northeastern.edu)

Off Campus Engagement and Support and our Network Housing team at Northeastern University provide support and education related to off-campus housing, renters' rights information, and campus and community connection. We offer many resources, special programs, and events to help you find off-campus housing in Boston and across the Northeastern network; connect with roommates; stay involved on campus; and serve as a link to your peers, alumni, and community. For students on co-op, our Network Housing support offers leased housing options in popular co-op locations.

We also help you understand your rights and responsibilities as a renter, understand your lease, and how to navigate landlord issues. Peer Community Ambassadors plan programs and events for you, are here to answer all of your questions, and help you meet your neighbors.

Our extensive website offers a host of resources including an apartment search database (<http://aptsearch.northeastern.edu/>); information on neighborhoods and transportation; as well as Northeastern, City of Boston, and Network Housing resources and relocation services.

Off Campus Engagement and Support publishes an e-newsletter that provides valuable tips and information on upcoming programs and events both on campus and off campus. Individuals interested in receiving our newsletter can sign up here (<http://offcampus.sites.northeastern.edu/newsletter/>) or email us at [offcampus@northeastern.edu](mailto:offcampus@northeastern.edu).

For more information, visit Off Campus Engagement and Support (<http://offcampus.sites.northeastern.edu/>).

## Office of the University Registrar

The Office of the University Registrar provides an important link between the university's academic programs and policies and the student. It administers a number of specific services, including class scheduling, registration, record functions, verification of enrollment, reporting, and transcript services.

The Office of the University Registrar utilizes the Student Hub (<https://me.northeastern.edu/>) to provide students convenient access to information and services, including class schedules and registration, most recent grades, unofficial transcripts, and transcript and enrollment verification requests.

Office of the University Registrar website (<https://registrar.northeastern.edu/>)

registrar@northeastern.edu

617.373.2300

617.373.5351 (fax)

## Maintenance of Student Records

The Office of the University Registrar is responsible for ensuring appropriate maintenance and safekeeping of student records. The transcript, which is stored electronically and maintained indefinitely, is the holistic record of student attendance and degree progress. In the event that the university discontinues operations, the archive of student records would be maintained by:

Massachusetts Department of Higher Education

One Ashburton Place

Room 1401

Boston, MA 02108

## Financial Information

- Bill Payment (p. 32)
- Delivery of Services (p. 35)
- Financial Aid Assistance (p. 36)
- Student Refunds (p. 39)
- Tuition and Fees (p. 40)

## Bill Payment

### Student Financial Services

617.373.2270

617.373.8735 (fax)

studentaccounts@northeastern.edu

Full payment of tuition and other related charges is due prior to the start of the term as specified on the original bill. For questions related to the billing process, late fees, payment methods, tuition payment plan, and refunds, contact us at the phone number and email address provided above.

### E-Bill

Tuition bills are generated electronically and are available via the Student Hub. Once your billing statement is available, you will be notified via email.

Bills must be paid by the due date on the initial billing statement. If a bill has not been received by the first week of the semester, contact Student Accounts. Transcripts and other academic records will not be released until all financial obligations to the university have been met.

### Payment of Tuition

Full payment of tuition, fees, and other related charges are due prior to the start of each semester. Payments will be accepted for billable charges only. The university is not able to process payments for more than the balance due on the student's account.

Accepted methods of payment are:

- **Electronic check (e-check):** Payments can be made online via NUPay on the Student Hub and are processed the same day they are received by the university.
- **International payments using Flywire:** Northeastern University has partnered with Flywire to streamline the international wire payment process to the university. This service provides students and their families a safe, cost-effective, and convenient method of making payments to Northeastern in foreign currencies. To learn more about international payments through Flywire, visit the Student Financial Services website (<https://studentfinance.northeastern.edu/billing-payments/payment-methods/>).
- **Monthly payment plan:** The monthly payment plan, administered through Flywire, allows students to divide their educational costs into smaller, more manageable installments. For additional information, visit the Student Financial Services website (<https://studentfinance.northeastern.edu/billing-payments/financing-options/>).
- **Supplemental loans:** There are a number of educational loan programs available to assist students in financing their education. Review options at the Student Financial Services website (<https://studentfinance.northeastern.edu/billing-payments/financing-options/>).

For additional information regarding available payment and financing options, visit the Student Financial Services website (<https://studentfinance.northeastern.edu/billing-payments/>).

### Student Financial Responsibility Agreement

As compelled by federal law, all students who enroll in classes at Northeastern are required to complete and accept the Student Financial Responsibility Agreement (<https://studentfinance.northeastern.edu/billing-payments/sfra/>). This agreement must be completed once per academic year and is located on the Student Hub. Failure to complete the SFRA will result in a hold that prevents attendance.

### VA Education Benefits

In accordance with Title 38 USC 3679 (e), covered individuals utilizing Chapter 31 or Chapter 33 education benefits at Northeastern University will not have any penalty imposed on their account nor will they be required to take out additional funding due to pending or late payments from the Department of Veterans Affairs as long as the Dolce Center for the Advancement of Veterans and Servicemembers has a current Certificate of Eligibility or VRE Authorization on file AND a Request for VA Benefit Certification is submitted through the Student Hub (<https://me.northeastern.edu>) portal.

COEs must be submitted before the start of the student's first term but do not need to be resubmitted unless entitlement information changes. Students are also required to complete the Request for VA Benefit Certification form through the Student Hub (<https://me.northeastern.edu>) portal before the start of each term they wish to use VA benefits. Students may have a hold placed on the account if there is an outstanding balance after payment from the VA is received by Northeastern.

### Discrepancies in Your Bill

Discrepancies in your bill should be addressed in writing via email ([studentaccounts@northeastern.edu](mailto:studentaccounts@northeastern.edu)) to Student Financial Services. Include your name, Northeastern ID, account number, dollar amount in question, date of invoice, and any other information you believe is relevant.

If there is a discrepancy in your bill, pay the undisputed part of the bill to avoid responsibility for any late fees or financial holds.

## Late Fees

Late fees can be placed on accounts any time after the due date if the account remains fully or partially unpaid. The university reserves the right to assess late fees after the due date on the bill and monthly thereafter if any of the balance due remains unpaid. Late fees may be based on a percentage of the balance due.

If a student or payer wishes to dispute a late fee assessment, they must do so, in writing, to [studentaccounts@northeastern.edu](mailto:studentaccounts@northeastern.edu). Please be sure to include the student's name, Northeastern ID, and reason for the dispute in the email.

In cases where students default on financial obligations, the student is liable for the outstanding balance, collection costs, and any legal fees incurred by the university during the collection process.

## Tuition Paid Directly by Employers

When a third party pays tuition directly to the university, the student must provide the Office of Student Accounts with a purchase order or a written statement of intent to pay by the third party prior to the first week of classes. If there are stipulations associated with the payment agreement, such as a minimum grade level, then the student must either pay the university directly or enroll in one of the payment options.

Documents pertaining to a third-party agreement can be emailed to [thirdparty@northeastern.edu](mailto:thirdparty@northeastern.edu), faxed to 617.373.8735, or mailed to the address below:

Student Financial Services  
Northeastern University  
ATTN: Third-Party Billing  
354 Richards Hall  
360 Huntington Ave  
Boston, MA 02115

## Tuition Reimbursement

Many companies, embassies, and agencies directly reimburse students for their educational expenses upon successful completion of courses. In these situations, the student is responsible for paying the bill at the beginning of the semester or selecting another payment option. Tuition may not be left unpaid pending reimbursement by a third party. Check with your human resources department to see if you qualify.

If your company requires an official transcript to process the tuition reimbursement, you may request your transcript online (visit the Office of the University Registrar website (<https://registrar.northeastern.edu/article/transcript-requests/>) for additional information about the transcript request process). Transcripts should be requested prior to the due date on your initial billing statement. Should there be a balance due on your account after the due date, your account may be subject to holds and a transcript will not be available until the balance due is resolved.

## Tuition and Fees and Default Policy

Tuition rates, all fees, rules and regulations, courses, and course content are subject to revision by the president and the Board of Trustees at any time. In cases where the student defaults on their tuition, the student shall be liable for the outstanding tuition and all reasonable associated collection costs incurred by the university, including attorneys' fees.

## Northeastern University Student Health Plan (NUSHP)

### GENERAL INFORMATION

Since September 1989, Massachusetts law (M.G.L. c.15A, § 18) has required every full-time and part-time student enrolled in a certificate, diploma, or degree-granting program in a Massachusetts institution of higher learning to participate in a Student Health Plan or in a health benefit plan with comparable coverage.

The Northeastern University Student Health Plan defines a full-time student as having full-time student status and enrolled in any amount of credits of a full-time curriculum.

NUSHP defines a part-time student as having part-time student status and enrolled in at least 75% of credits of the full-time curriculum (CPS undergraduate students—9 credits, CPS graduate students—6 credits).

The health fee is assessed each term on a student's account based on these definitions unless the student has previously waived the health plan fee in the current academic year.

Students on co-op or on study abroad are considered active students and will be enrolled in and billed for NUSHP each year.

Students enrolled in prematriculation and online programs are not eligible for NUSHP.

### HEALTH INSURANCE WAIVER

Eligible students are automatically enrolled in NUSHP each academic year and may waive NUSHP via the Student Hub (<https://me.northeastern.edu>) once they have been billed for NUSHP. In addition, to be eligible to waive, comparable coverage must be effective from the beginning of the term the student meets Student Health Program requirements.

The burden of proof that the alternative insurance is adequate falls upon the student choosing to waive. By submitting the waiver form, the student will be accepting responsibility for all medical expenses incurred, and neither Northeastern University nor its Student Health Plan will be responsible for these expenses.

Northeastern reserves the right to verify that the student's insurance meets the criteria indicated. Disciplinary action may be taken if a student knowingly waives NUSHP without comparable coverage.

Visit the NUSHP website (<https://www.northeastern.edu/nushp/>) for waiver deadlines.

## Delivery of Services

Northeastern University assumes no liability for delay or failure to provide educational or other services or facilities due to causes beyond its reasonable control. Causes include, without limitation, power failure, fire, strikes by university employees or others, damage by natural elements, and acts of public authorities. The university will, however, exert reasonable efforts, when it judges them to be appropriate, to provide comparable services, facilities, or performance; but its inability or failure to do so shall not subject the university to liability.

In the event that Northeastern determines it must suspend or alter its operations in whole or in part due to epidemic, pandemic, other public health emergency, extreme weather, natural disaster, acts or threatened acts of terrorism or war, or any single act or combination of events beyond the university's control, Northeastern may suspend, reduce, terminate and/or modify its operations in whole or in part, which may or may not include offering online or other alternative learning options, in its discretion. In any such event, Northeastern is under no obligation to refund or credit any portion of tuition, fees, or other charges paid or owed, but it may do so in its discretion.

Northeastern reserves the sole right to promulgate and change rules and regulations and to make changes of any nature in its program; calendar; admissions policies, procedures, and standards; degree requirements; fees; and academic schedule whenever necessary or desirable, including, without limitation, changes in course content and class schedule, the cancellation of scheduled classes and other academic activities, and the substitution of alternatives for scheduled classes and other academic activities. In any such case, the university will give whatever notice is reasonably practical.

Northeastern will endeavor to make available to its students a fine education and a stimulating and congenial environment. However, the quality and rate of progress of an individual's academic career and professional advancement upon completion of a degree or program are largely dependent on the individual's own abilities, commitment, and effort. In many professions and occupations, there are also requirements imposed by federal and state statutes and regulatory agencies for certification or entry into a particular field. These requirements may change while a student is enrolled in a program and may vary from state to state or country to country. Although the university stands ready to help its students find out about requirements and changes in them, it is the student's responsibility to initiate the inquiry.

## Financial Aid Assistance

### Student Financial Services

617.373.5899 (Graduate)

617.373.2897 (College of Professional Studies)

sfs@northeastern.edu

studentfinance.northeastern.edu (<https://studentfinance.northeastern.edu/>)

Northeastern University is available to assist students in developing a plan for financing a Northeastern education. Through a variety of options—including federal financial aid, Northeastern's monthly payment plan, supplemental loans, and your own resources—a plan can be designed that will make your education costs affordable. Visit the Student Financial Services website (<https://studentfinance.northeastern.edu/>) or contact the office directly for additional information.

### How to Apply

To apply for federal financial aid programs, students must submit the Free Application for Federal Student Aid (<https://studentaid.gov/h/apply-for-aid/fafsa/>) and include Northeastern's FAFSA school code, 002199. Students are strongly encouraged to submit their FAFSA by the priority filing deadline of **March 1** to ensure they are considered for all available financial aid programs.

To electronically sign your FAFSA, you will need your FSA ID. If you do not have one or have forgotten your FSA ID, visit the Federal Student Aid website (<https://studentaid.gov/>) to obtain one before starting the FAFSA.

### Federal Financial Aid Eligibility

Students in the graduate colleges must meet the following criteria to be eligible for federal financial aid:

- Be enrolled in at least 4 credits per term for federal financial aid, unless you are on a co-op, clinical rotation, residency, or are enrolled in a full-time or part-time stand-alone course
- Be a U.S. citizen or eligible noncitizen
- Be matriculated in a degree-granting program

*Please note that students enrolled in graduate certificate programs are not eligible for federal financial aid.*

- Have received a high school diploma or GED
- Be registered with Selective Service (if required)
- Not be convicted of a drug-related crime in the last year
- Not be in default from previous student loans
- Maintain satisfactory academic progress (<https://studentfinance.northeastern.edu/policies-procedures/satisfactory-academic-progress/>)

### Awarding Timelines

New students are awarded on an ongoing basis throughout the spring after we have been notified that they have been accepted into their program.

Returning students are awarded throughout the summer.

For information regarding your financial aid application, log into the Student Hub.

### Typical Graduate Financial Aid Award

Eligible students who file the FAFSA will be automatically considered for the Federal Direct Unsubsidized Loan, provided that all eligibility requirements have been met. The maximum amount that a student may borrow per academic year in the Federal Direct Unsubsidized Loan program is \$20,500.

For more information about the Federal Direct Loan Program, visit the Student Financial Services website (<https://studentfinance.northeastern.edu/applying-for-aid/graduate/types-of-aid/>).

### Graduate Assistantships and Scholarships

Graduate assistantships and awards are offered directly by the individual graduate schools or academic departments. Students seeking such assistance should contact their graduate school for eligibility criteria.

To review a description of available scholarships, visit the Student Financial Services website (<https://studentfinance.northeastern.edu/applying-for-aid/graduate/types-of-aid/>).

### Health Professions Student Loans and Nursing Student Loans

These federal loan programs carry a 5% interest rate during repayment. You must demonstrate financial need and meet Northeastern's priority filing date for consideration, as funds are limited. Northeastern is the lender, and repayment is made directly to Northeastern.

To be eligible for the Federal Nursing Student Loan, students must be enrolled at least half-time in the Bouvé College of Health Sciences. These loans carry a nine-month grace period prior to repayment following graduation, withdrawal, or a drop below half-time status. Repayment on the loan is for a period of up to 10 years with a minimum \$40 monthly payment. The loan may be prepaid at any time without penalty.

To be eligible for the Health Professions Loan Program, applicants must be enrolled full-time in the School of Pharmacy in the Bouvé College of Health Sciences. Additionally, students who would like to be considered for the Health Professions Loan Program must include parent income information when completing the FAFSA. These loans carry a 12-month grace period. Repayment on the loan is for a period of up to 10 years with a minimum \$40 monthly payment. The loan may be prepaid at any time without penalty.

### **Physician Assistant Loan**

The Physician Assistant Loan is awarded to full-time students in the graduate physician assistant program who demonstrate financial need after filing the FAFSA. The interest rate is fixed at 7%. Northeastern is the lender, and repayment is made directly to Northeastern. The loan amounts range from \$1,000 to \$3,000, depending upon the student's financial need. Repayment begins one month after the student ceases to be enrolled full-time at Northeastern.

### **Federal Direct Graduate PLUS Loan**

Unlike Federal Direct Unsubsidized Loans, the Federal Direct Graduate PLUS Loan (<https://studentfinance.northeastern.edu/billing-payments/financing-options/>) requires credit approval by the direct loan servicer.

Students have up to 25 years to repay the Federal Direct Graduate PLUS Loan. The Federal Direct Graduate PLUS Loan can be consolidated with Federal Direct Unsubsidized and Perkins loans upon graduation.

Graduate PLUS loans do not have a grace period. Repayment begins after a student is no longer enrolled at least half-time. Students who drop below half-time status and then reenroll above half-time status will need to request their loans be deferred again through their assigned direct loan servicer.

Graduate students who wish to apply for a Federal Direct Graduate PLUS Loan can do so online at [studentaid.gov](https://studentaid.gov) (<https://studentaid.gov/app/launchPLUS.action/?plusType=gradPlus>). For assistance with financial planning or determining the amount to apply for, please reach out to Student Financial Services.

### **Supplemental Student Loans**

There are a number of educational loan programs available to assist students in covering their expenses over and above any federal financial aid that may be awarded to them from Student Financial Services. Most private lenders have credit and income requirements that must be met before being approved for these programs. Additional information regarding private loans is available here (<https://studentfinance.northeastern.edu/billing-payments/financing-options/>). Student Financial Services recommends to students that, when researching the loan and lender that best meets their needs, they make sure they take into consideration the interest rate; quality of customer service; and origination, disbursement, and/or repayment fees.

## **General Financial Policies and Procedures**

### **FINANCIAL AID POLICIES**

Student Financial Services reserves the right to adjust a student's initial Offer of Financial Assistance based upon information brought to the office's attention subsequent to extension of the offer, including, but not limited to, increased or new institutional scholarships, outside scholarships, or revised family financial data.

### **APPEAL/CHANGE IN CIRCUMSTANCES**

If the student feels that the aid process does not accurately reflect their situation, or if family circumstances change during the year, the student should notify Student Financial Services for further evaluation. We may request additional documentation from you that might indicate a change in financial circumstances.

### **CHANGE IN ENROLLMENT STATUS**

Students must notify Student Financial Services about any change in planned period of enrollment, whether due to withdrawal from a class, a leave of absence, a change in co-op or academic division, or withdrawal from the university. Students should be aware that any change in enrollment status may result in a change in federal or institutional aid eligibility. It is the student's responsibility to notify Student Financial Services about any change in enrollment status and to ensure understanding of the ramifications of such changes. It is highly recommended that whenever possible, students discuss the impact of such changes with their financial aid counselor before making them.

### **OUTSIDE SOURCES OF AID**

Students must notify Student Financial Services of any aid received from outside sources, such as scholarships. Receipt of these sources may require an adjustment to a student's financial aid award.

### **REAPPLICATION PROCESS**

Students must reapply for financial aid each year by filing the FAFSA (<https://studentaid.gov/h/apply-for-aid/fafsa/>) online. To receive priority consideration for aid, the federal processor must receive the FAFSA by **April 1**.

### **SATISFACTORY ACADEMIC PROGRESS**

To continue receiving financial aid, graduate students must maintain the academic requirements for satisfactory progress set forth by their college. Refer to the Student Financial Services website (<https://studentfinance.northeastern.edu/policies-procedures/satisfactory-academic-progress/>) for more information about how satisfactory progress impacts financial aid eligibility.

### **VERIFICATION**

If a student is selected for verification (<https://studentfinance.northeastern.edu/federal-verification-process/>), Student Financial Services may be required to collect additional documents, including tax returns and other financial documents, to verify the information provided on the FAFSA. Aid cannot be disbursed until this process is completed.

### **RETURN OF TITLE IV FUNDS**

Northeastern is required by federal statute to recalculate federal financial aid eligibility for students who withdraw, drop out, are dismissed, or take a leave of absence prior to completing 60% of a term. Recalculation is based on the percentage of earned aid using the Federal Return of Title IV funds formula. Federal regulations require students to obtain at least one A, B, C, D, or S in at least one course for the term; students who receive all unsuccessful grades for a term (F, NE, W, I, U) may be considered unofficially withdrawn from the term and subject to an aid recalculation, including the possible loss of financial aid for that term.

## Student Refunds

### Refund Policies

Inquiries about credit balances should be directed to Student Accounts. Credit balances on a student's account will be automatically refunded.

Note the following exceptions:

- If the credit in your account is due to a Parent PLUS Loan, supplemental loan, and/or payment plan payment(s), the credit balance will be refunded to the bill payer on record unless a Refund Authorization form (<https://studentfinance.northeastern.edu/forms/>), stating that funds may be released directly to the student, is received from that borrower.
- If a credit card has been used to pay any portion of the amount due, the refund must be made first to that credit card. If the credit balance on the account exceeds the amount that was paid via credit card, these additional funds will be refunded by direct deposit or check.

For additional information regarding student refunds, including Frequently Asked Questions, visit the Student Financial Services website (<https://studentfinance.northeastern.edu/policies-procedures/student-refund-requests/>).

### Official Withdrawal Adjustments

Students who officially withdraw, either from a course or from the university, during an academic term will receive a tuition refund based on the policy specified below. Institutional funds awarded by Northeastern University will be adjusted based on the actual charges incurred during the semester. Funds from federal Title IV programs will be returned to the government according to federal regulations. The federal government Return of Funds Policy dictates that a student's eligibility for federal financial aid is determined by the number of days enrolled during the semester. The refund will be calculated from the day the student submits an official notification of withdrawal to the Office of the University Registrar.

Tuition credits are granted through the first five weeks of a semester or first four weeks of a half semester, based on the date of the official withdrawal processed by the Office of the University Registrar. Nonattendance does not constitute official withdrawal. Credit policies vary according to the duration of the course. Typical tuition adjustments are made according to the following schedule. (The end of week three corresponds with the last day to drop a class without a W grade.)

#### **DURING FULL SEMESTER**

During weeks one through three—100% refund

During the fourth week—60% refund

During the fifth week—40% refund

After the fifth week—No refund

#### **SUMMER HALF SEMESTERS AND COURSES OFFERED IN PART-OF-TERM FORMAT**

During weeks one through two—100% refund

During the third week—50% refund

During the fourth week—25% refund

After the fourth week—No refund

### Leave of Absence Tuition and Fee Adjustments

Please refer to Leaves of Absence and University Withdrawal (p. 57).

### Disability Resource Center Tuition Adjustments

Students who are registered with Northeastern's Disability Resource Center (<http://www.northeastern.edu/drc/>) and who are approved for a disability-related reduced course load may be eligible to petition the DRC for tuition adjustments directly related to their documented disability. Further information is available from the DRC.

### State-, Province-, and Country-Specific Refund Policies

For state-, province-, and country-specific refund information, visit the Student Financial Services website (<https://studentfinance.northeastern.edu/policies-procedures/>).

## Tuition and Fees

*Please note: Courses taken outside of the student's home college may be billed at the per-credit rate of the college offering the course.*

### Bouvé College of Health Sciences

Graduate Program	Cost per Credit Hour
All graduate programs, excepting specific programs listed below.	\$1,815
• MS Applied Behavior Analysis	\$1,340
• BSN Nursing—Accelerated Program for Second-Degree Students (ABSN)	\$1,263
• DMSc Healthcare Leadership	\$1,000
• DNP Nurse Anesthesia (Clinical)	\$4,600 (in addition to tuition)
• DPT Physical Therapy—Postbaccalaureate Entry	\$20,100 (per semester)
• Graduate Certificate in Extreme Medicine	\$1,000
• MPH Public Health (Charlotte)	\$1,143
• MS Exercise Science	\$1,233
• MS Health Informatics	\$1,400
• MS Nursing—Direct Entry	\$21,750 (per semester)
• MS Nursing (Online)	\$975
• MS Physician Assistant	\$18,850 (per semester)
• MS Speech-Language Pathology	\$1,795
• PharmD Pharmacy—Direct Entry	\$31,000 (per semester)
• PharmD Pharmacy—Direct Entry, Clinical	\$15,395 (per semester)
• PharmD Pharmacy, Sixth Year (effective summer term 2014)	\$15,395 (per semester)

### COLLEGE OF ARTS, MEDIA AND DESIGN

Graduate Program	Cost per Credit Hour
All graduate programs (p. 109)	\$1,894

### COLLEGE OF ENGINEERING

Graduate Program	Cost per Credit Hour
All graduate programs (p. 334)	\$1,801

### COLLEGE OF PROFESSIONAL STUDIES

Graduate Program	Cost per Credit Hour
All graduate programs, except specific programs listed below.	\$850
• DLP Law and Policy (self-paced, 69 QH program; new students as of 7/1/20)	\$1,058
• Executive DLP Law and Policy (students entering prior to 7/1/19)	\$2,217

• Executive DLP Law and Policy (69 QH program; new students as of 7/1/20)	\$1,541
• EdD Education	\$1,008
• MEd Education; MAT Teaching (excluding MEd Higher Education Administration)	\$698
• MPS Analytics; MS Commerce and Economic Development; MPS Applied Machine Intelligence	\$960 (students entering before 7/1/20)
	\$1,016 (students entering 7/1/20–6/30/21)
	\$1,055 (students entering 7/1/21–6/30/22)
	\$1,116 (students entering 7/1/22–6/30/23)
• MPS Informatics and MPS Digital Media	\$933 (students entering before 7/1/20)
	\$986 (students entering 7/1/20–6/30/21)
	\$1,024 (students entering 7/1/21–6/30/22)
	\$1,084 (students entering 7/1/22–6/30/23)
• MS Global Studies and International Relations; MS Regulatory Affairs	\$874
• MSTC Technical Communication	\$874
• MEd Higher Education Administration	\$768
• Master's-level graduate courses for personal and professional enrichment (nondegree)	\$850

## COLLEGE OF SCIENCE

Graduate Program	Cost per Credit Hour
All graduate programs, except specific programs listed below.	\$1,791
• MS Biotechnology—Experiential	\$1,502
• MS Biotechnology—Toronto (Domestic)	\$672
• MS Biotechnology—Toronto (International)	\$1,021
• MS Bioinformatics—Toronto (Domestic)	\$928
• MS Bioinformatics—Toronto (International)	\$1,241
• MS Environmental Science and Policy	\$1,760
• MS Marine Biology	\$1,542

## COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Graduate Program	Cost per Credit Hour
All graduate programs, excepting specific programs listed below.	\$1,350
• MS Criminology and Criminal Justice	\$1,011
• MS Economics	\$1,483
• MPA Public Administration	\$985
• MPP Public Policy	\$946
• MS Security and Resilience Studies	\$946

• MA English	\$1,300
• MA History	\$1,300

**D'AMORE-MCKIM SCHOOL OF BUSINESS**

Graduate Program	Cost per Credit Hour
All graduate programs except specific programs listed below. Please also see the second table below for fees billed in addition to tuition for some programs.	\$1,755
• MBA Business Administration—Online	\$900 (students entering after 7/1/2022)
	\$1,640 (students entering before 6/30/2022)
• MS Management with concentrations in Digital Transformation in Healthcare or Healthcare Administration (online only)	\$800
• MSAMBA Accounting and Business Administration	\$72,150 (program rate)

Item	Fee
All campus-based, full-time graduate programs, except specific programs listed below.	\$1,600 billed in year 1 in two installments (\$800 each), fall and spring terms
• Business Administration, MBA—Full-Time	\$3,100 billed in year 1 in two installments (\$1,550 each), fall and spring terms
• Finance and Business Administration, MSFMBA	\$3,100 billed in year 1 in two installments (\$1,550 each), fall and spring terms
• Quantitative Finance and Business Administration, MSFMBA	\$3,100 billed in year 1 in two installments (\$1,550 each), fall and spring terms
• Law, JD / Business Administration, MBA	\$3,100 billed in year 1 in two installments (\$1,550 each), fall and spring terms
• LLM / Business Administration, MBA	\$3,100 billed in year 1 in two installments (\$1,550 each), fall and spring terms
• MS Management with concentration in Strategic Technology Leadership (hybrid only)	\$3,000 billed in year 1 in two installments (\$1,500 each), fall and spring terms
• MSA Accounting	\$0

**KHOURY COLLEGE OF COMPUTER SCIENCES**

Graduate Program	Cost per Credit Hour
All graduate programs, excepting specific programs listed below.	\$1,725
• MS Cybersecurity	\$1,625
• MS Data Science	\$1,793
• Graduate Certificate Data Analytics	\$1,793

**SCHOOL OF LAW**

Graduate Program	Cost per Credit Hour
All programs, excepting specific programs listed below.	\$60,408 (per academic year)
• JD Law, Part-Time Option (FlexJD)	\$45,300 (per academic year)
• LLM Law (On Ground)	\$60,408 (per academic year)
• LLM Law—Online	\$1,449
• MLS Legal Studies—Online	\$1,132

• MS Media Advocacy (interdisciplinary program with CAMD)	(Please see College of Arts, Media and Design above)
• Graduate certificates, Online	\$1,132

**DISSERTATION AND CONTINUATION**

Graduate Program	Cost per Credit Hour
Master's or doctoral continuation fee (flat rate)	Equivalent to the college per-credit-hour rate listed above
Dissertation (flat rate)	Equivalent to 1.5 times the college per-credit-hour rate listed above

**FEES**

Visit Fee Descriptions (<https://studentfinance.northeastern.edu/billing-payments/tuition-and-fees/fee-descriptions/>) for more details.

Item	Fee
Student Center Fee (per term, Boston campus only)	\$72, full-time \$10, part-time
College of Professional Studies Student Center Fee (per quarter, Boston campus only)	\$8.25
Student Recreation Fee (per term)	\$62, full-time \$30, part-time
College of Professional Studies Student Recreation Fee (per quarter, Boston campus only)	\$60
Student Activities Fee (per term, Boston campus only)	\$17
Residential Student Fee (per term)	\$35
Health and Counseling Fee	\$225
Health Plan Fee (yearly, optional) ( <a href="https://studenthealthplan.northeastern.edu">https://studenthealthplan.northeastern.edu</a> )	
Parking (per semester, optional) ( <a href="https://www.masparc.com/products/">https://www.masparc.com/products/</a> )	
International Student Fee	\$375

## Accommodations for Students with Disabilities

617.373.2675

617.373.7800 (fax)

Website (<http://www.northeastern.edu/drc/>)

Northeastern University and the Disability Resource Center are committed to providing disability services that enable students who qualify under Section 504 of the Rehabilitation Act and the Americans with Disabilities Act Amendments Act to participate fully in the activities of the university. To receive accommodations through the DRC, students must provide appropriate documentation that substantiates a disability and demonstrates a current significant limitation. Accommodations are provided based on an evaluation of the information provided by students, and their clinicians, on a case-by-case basis. These services are available for, but not limited to, students with the following diagnoses:

- Learning disabilities and/or ADHD
- Autism spectrum disorders
- Chronic or degenerative disorders
- Hearing loss
- Mobility impairments
- Psychiatric disorders
- Traumatic or acquired brain injury
- Vision impairments

Students should provide documentation to the DRC at their earliest convenience to allow for sufficient time for review. After the documentation has been reviewed, a disability specialist will contact the student regarding appropriate next steps. Visit the DRC website (<http://www.northeastern.edu/drc/>) for additional information or contact staff at 617.373.2675.

## Attendance Requirements

Class participation is essential to success no matter the course format or its delivery. Individual instructors may have course-specific attendance policies. It is the student's responsibility to ascertain what each instructor requires. Failure to meet attendance requirements may force a student to drop the applicable courses. Students should not make conflicting commitments until the class schedules for each semester are final. Permission to make up work may be granted by instructors for reasonable cause. Requests must be made immediately upon a student's return to class. Laboratory work can be made up only during the hours of regularly scheduled instruction.

### Absence Because of University-Sponsored Activities

Participation in university-sponsored activities, where the students are representing their university, college, or department, may cause absences from class that qualify as excused absences. Excused absences, with appropriate prior arrangement, are not subject to penalty, and missed work may be satisfied through agreement between the student and the instructor. University-sponsored activities that may justify excused absences include athletic competition, performing arts events, and research or other presentations.

Students must discuss absence(s) with instructors at least two weeks in advance of the university-sponsored activity, or as soon as possible if the activity is at the beginning of the term or is the result of an unforeseen circumstance. Instructors may require a written statement from the administrator in charge of the activity. Instructors are expected to make reasonable accommodations for these class absences, including administration of makeup assignments and exams whenever possible. It is expected that students seeking an excused absence will develop a plan and timetable to make up the missed coursework with their instructor(s). Note, however, that the requirements of some courses or programs may preclude such accommodations.

### Absence Because of Religious Beliefs

Any student who is unable, because of their religious beliefs, to attend classes or to participate in any examination, study, or work requirement should be provided with an opportunity to make up such examination, study, or work requirement that they may have missed because of such absence on any particular day, provided that such makeup examination or work does not create an unreasonable burden upon the university. Students should make appropriate arrangements with the instructor in advance of the absence, preferably at least two weeks before the religious observance.

### Absence Because of Jury Duty

Members of the university community are expected to fulfill their obligations to serve on a jury if called upon. A student selected for jury duty should inform their instructors. They will provide a reasonable substitute or compensatory opportunities for any required work missed. A student with such an absence will not be penalized in any way.

### Absence Because of Military Deployment

See "Leave of Absence Due to Military Deployment (<http://catalog.northeastern.edu/undergraduate/academic-policies-procedures/leaves-of-absence-withdrawal/#military>)."

### Other Absences

Unforeseen events or circumstances, including illness, may cause a student to be absent from class. Students must notify their instructors and academic advisor, as appropriate, as soon as possible to apprise them of the circumstances leading to their absence, as well as how much time will be missed. Students must work with their instructors to develop a plan, with a timetable, to make up missed coursework. Students cannot be required to provide medical documentation. (Faculty and students should note that the University Health and Counseling Services does not provide sick notes or medical excuses except for long-term illness.) Instructors are expected to make reasonable accommodations for warranted class absences, including administration of makeup assignments and exams, whenever possible.

### Extended Absences

A student who is absent from school for an extended period of time must inform their academic advisor by letter, email, or telephone. The expected length of the absence may determine whether the student should apply for a medical or emergency leave of absence (<http://catalog.northeastern.edu/undergraduate/academic-policies-procedures/leaves-of-absence-withdrawal/#medical>). It is strongly recommended that the student contact their academic advisor to discuss potential next steps, which could include incomplete grades; withdrawal from classes; or, in the event of an extended absence due to a chronic medical condition or disability, consultation with the Disability Resource Center to explore potential accommodation.

### Nonattendance

Nonattendance does not constitute official course dropping or withdrawal, which means the student is fully responsible for the academic and financial consequences. Like all grades for courses attempted and/or completed, a grade earned due to nonattendance impacts a student's academic progression, an international student's visa eligibility, and a federal financial aid recipient's aid eligibility and award.

## Campus Transfer and Campus Location Change

### Campus Transfer

Students may request an official campus transfer from their school/college to complete their program. The program has to be approved by the school/college academically AND meet regulatory requirements (state/provincial licensure). If the student is an international student, the program has to be offered in compliance with F-1/study permit requirements at the requested new home campus location. International students should seek advice from the Office of Global Services (<https://international.northeastern.edu/ogs/>) before the final decision to transfer to another campus.

### Campus Location Change

Students may request a campus location change to a new campus (the host campus) for a period no longer than one academic year (two consecutive semesters or three consecutive quarter terms) and no more than 50% of a degree program. It must be approved by the school/college academically, and courses must be offered that allow the student to make normal academic progress in compliance with regulatory requirements. In order for international students to change a campus location, the academic program has to be offered in compliance with F-1/study permit requirements at the requested host campus location.

## Clearing an Academic Deficiency

An academic deficiency occurs when a student fails to complete a course with a satisfactory grade. The deficiency may occur because the student has failed the course or because the student has passed the course but with a grade that does not meet the minimum required by the student's program.

Students who have academic deficiencies may be required to clear them before progressing within the curriculum, especially if a given course is a prerequisite for future coursework. Deficiencies may affect the student's expected year of graduation.

With the approval of the appropriate program faculty and/or academic advisor, students can clear deficiencies in the following ways:

1. Retake the same course at one of Northeastern University's colleges, which will result in a "retake" grade (see "Retaking Courses" in this section of the catalog).
2. Substitute a comparable course at one of Northeastern's colleges, which will result in a "retake" grade (see "Substituting Courses" in this section of the catalog).
3. Under special circumstances, if the course is not currently offered at Northeastern, a student may be advised to take a preapproved course at another institution outside Northeastern. The original grade will remain on the student's Northeastern transcript and will still be used in the calculation of the GPA.

## Code of Student Conduct

The Code of Student Conduct can be found on the Office of Student Conduct and Conflict Resolution (<http://www.northeastern.edu/osccr/code-of-student-conduct/>).

## Course Credit Guidelines

### Guidelines for Assigning Credit to Courses

The primary standard for establishing course credit at Northeastern University is the semester/quarter hour, or Carnegie Unit, the standard used by the federal government. One hour of credit is awarded for a lecture/seminar class meeting 50 minutes each week during a 15-week semester or 12-week quarter and also requiring a minimum of two hours of outside preparation each week by the student. An hour of contact time in the rest of the document is based on this 50-minute session.

- 2 semester/quarter hours (100 minutes per week of instruction plus 4–6 hours homework, or equivalent)
- 3 semester/quarter hours (150 minutes per week of instruction plus 6–9 hours homework, or equivalent)
- 4 semester/quarter hours (200 minutes per week of instruction plus 8–12 hours homework, or equivalent)

The Office of the University Registrar (<https://registrar.northeastern.edu/>) maintains the official record for all courses. In the event of error in any publication, the academic record will reflect the correct semester/quarter hours applicable to any degree requirement.

On occasion, course titles change, while the course number remains the same. Despite such title changes, the course is still considered to be the same course. Students who have taken the course under the old title and then take the course again under the new title are considered to have repeated the course.

#### NOTE ABOUT HOMEWORK AND STUDENT PREPARATION FOR CLASS

The credit hour assumes a set proportion of two hours of student preparation or homework for every hour spent in class. Northeastern wishes to emphasize that the federal government has established this as the minimum amount of work expected, and assigning more work does not in itself justify an increase in the credit value of the course. We also wish to note that there is great variation in the amount of time each student will need to devote to each course or to a specific form of study (e.g., reading, writing, completing problem sets), and, therefore, it is not possible to enforce any exact accounting of student work outside of class.

#### CREDIT ASSIGNMENT PROCESS

Northeastern uses the Carnegie Unit to determine class meeting time requirements. The actual amount of academic work that goes into a single credit hour is calculated as follows:

- One lecture (taught) or seminar (discussion) credit hour represents one hour per week (50 minutes) of scheduled class/seminar time and two hours of student preparation time.
- One laboratory or studio credit hour represents one hour per week of lecture or discussion time plus one to two hours per week of scheduled supervised or independent work, or a total of three hours in the lab or studio.

#### DEFINED INSTRUCTIONAL METHODS

- Traditional: meets fully on ground in a physical location with instructor present
- Hybrid: meets majority on ground in a physical location with instructor present with some online instructional component
- Live cast: meets fully on ground in a physical location with the instructor in a different location teaching synchronously and supported by an instructional assistant in the physical location
- Online: meets fully online

#### FULL-TIME AND HALF-TIME EXPERIENCES

Academic experiences integral to curriculum and requiring registration (but not credit bearing) have the following required hours of participation:

- Full-time experiences: 32–40 hours per week in a semester for a minimum of 11 weeks or 55 days, or in a quarter for 9 weeks or 45 days
- Half-time experiences: 16–31.99 hours per week in a semester for a minimum of 11 weeks or 55 days, or in a quarter for 9 weeks or 45 days (to achieve full-time status, graduate students must take 3 or more academic credits and undergraduate students must take 4 or more academic credits)
- Summer 1 or Summer 2 semester: minimum of 5 weeks or 25 workdays
- Summer quarter: 6 weeks or 30 workdays

International students must confer with the Office of Global Services to determine CPT requirements as appropriate.

## Course Numbering System

0001–0999

**Orientation and basic**

No degree credit

**Undergraduate**

1000–1999

**Introductory level (first year)**

Survey, foundation, and introductory courses, normally with no prerequisites and designed primarily for students with no prior background

2000–2999

**Intermediate level (sophomore/junior year)**

Normally designed for sophomores and above but in some cases open to freshman majors in the department

3000–3999

**Upper-intermediate level (junior year)**

Designed primarily as courses for juniors; prerequisites are normally required, and these courses are prerequisites for advanced courses

4000–4999

**Advanced level (senior year)**

Designed primarily for juniors and seniors; also includes specialized courses such as research, capstone, and thesis

**Graduate**

5000–5999

**First-level graduate**

Courses primarily for graduate students and qualified undergraduate students with permission

6000–6999

**Second-level graduate**

Generally for master's and clinical doctorate only

7000–7999

**Third-level graduate**

Master's- and doctoral-level courses; includes master's thesis

8000–8999

**Clinical/research/readings**

Includes comprehensive exam preparation

9000–9999

**Doctoral research and dissertation**

## Family Educational Rights and Privacy Act (FERPA)

### FERPA for Students—General Information

The Family Educational Rights and Privacy Act is a federal law that applies to educational institutions. Under FERPA, schools must allow students who are 18 years or over or attending a postsecondary institution:

- Access to their education records
- An opportunity to seek to have the records amended (see the *Student Handbook* for this procedure)
- Some control over the disclosure of information from the records

### FERPA General Guidance for Parental Disclosure

When a student turns 18 years of age or attends a postsecondary institution, the student, and not the parent, may access, seek to amend, and consent to disclosures of their education records.

If you are an undergraduate day student and you choose not to share information with your parents, Northeastern will, if asked, indicate that you have restricted access to your records.

### Release of Directory Information

The primary purpose of directory information is to allow Northeastern University to confirm attendance for employers, health insurance companies, and loan agencies. Northeastern may disclose appropriately designated “directory information” without written consent, unless you have advised the university to the contrary in accordance with the procedures below. If you choose not to release directory information, all communications with all third parties and agencies will need to be done through your written request to the university or in person.

As of June 30, 2016, Northeastern directory information includes:

- Student name
- Home address (city, state, country only)
- Major field of study
- College
- Class year
- Enrollment status (e.g., undergraduate or graduate, full-time or part-time)
- Dates of attendance
- Degrees, honors, and awards received
- Most recent educational agency or institution attended
- Sports activity participation, showing weight/height of members of athletic teams
- Participation in officially recognized activities

If Northeastern currently has permission to release data and you do not want the university to disclose directory information without your prior written consent, you must notify the university. Instructions are available at the Office of the University Registrar (<https://registrar.northeastern.edu/article/family-educational-rights-privacy-act-ferpa/>).

### Notification of Rights under FERPA

FERPA affords students certain rights with respect to their education records. These rights are:

1. The right to inspect and review the student’s education records within 45 days of the day the university receives a request for access. Students should submit to the registrar, dean, or head of the academic department (or appropriate official) written requests that identify the record(s) they wish to inspect. The university official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the university official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.
2. The right to request the amendment of the student’s education record that the student believes is inaccurate or misleading. Students may ask the university to amend a record that they believe is inaccurate or misleading. They should write the university official responsible for the record, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading. If the university decides not to amend the record as requested by the student, the university will notify the student of the decision and advise the student of their right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.
3. The right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent. One exception, which permits disclosure without consent, is disclosure to school officials with legitimate educational interest. A school official is defined as a person employed by the university in an administrative, supervisory, academic, or support staff position (including law enforcement unit and health staff); a person or company with whom the university has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a person assisting another school official in performing their

tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill their professional responsibility.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the university to comply with the requirements of FERPA. At Northeastern, the Office of the University Registrar, 271 Huntington Avenue, administers FERPA.

### **Additional Information**

Additional information can be obtained at the U.S. Department of Education's website (<http://www.ed.gov/policy/gen/guid/fpco/ferpa/>) or by writing to:

Family Policy Compliance Office  
U.S. Department of Education  
400 Maryland Avenue, SW  
Washington, D.C. 20202-5920

## Grade Change Policy

If a student has not graduated, a grade can be changed by a course instructor within 12 months of the end of the semester in which the grade was given.

If a student has graduated, or if more than 12 months have elapsed, a grade can only be changed by request of a course instructor with the approval of the college that offers the course.

If more than 24 months have elapsed, grades can no longer be changed.

If a course instructor is not available, course change requests may be initiated by the department or college that offers the course.

Colleges may place additional restrictions on how grades can be changed.

The grade change policy explains when a course instructor may change a student's grade to correct errors. This policy does not apply to incomplete grades or to student-initiated appeals to change grades. In particular, the grade change policy should not be used to allow a student to submit work after the completion of a class.

## Grade Table and GPA

### Grade Table

Grades are officially recorded by letters, evaluated as follows:

Letter Grade	Numerical Equivalent	Explanation
A	4.000	Outstanding achievement
A–	3.667	
B+	3.333	
B	3.000	Good achievement
B–	2.667	
C+	2.333	
C	2.000	Satisfactory achievement
C–	1.667	
D+	1.333	Undergraduate only
D	1.000	Undergraduate only/Poor achievement
D–	0.667	Undergraduate only
F	0.000	Failure
I		Incomplete
IP		In progress
CR		Credit (School of Law only)
HH		High Honor (School of Law only)
H		Honor (School of Law only)
P		Pass (School of Law only)
MP		Marginal Pass (School of Law only)
NE		Not enrolled
NG		Grade not reported by faculty
S		Satisfactory (pass/fail basis; counts toward total degree requirements)
U		Unsatisfactory (pass/fail basis)
X		Incomplete (pass/fail basis)
L		Audit (no credit given)
T		Transfer
W		Course withdrawal

An I, IP, or X grade shows that the student has not completed the course requirements.

The IP grade is intended for courses that extend over several terms. The time restrictions on the incomplete grade do not apply to the IP grade. While the IP grade is left unchanged, it is not included in computing the grade-point average. If the IP grade is never changed, the course does not count toward graduation requirements.

### Course Comments

The following notations may also appear on the student's transcript:

E	Course excluded from GPA
HON	Honors-level course
I	Course included in GPA

### GPA

Numerical equivalents for scholastic averages are weighted according to the number of hours the course carries. For example, suppose a student receives a grade of B in a course carrying 4 semester hours and a grade of A in a course carrying 1 semester hour. The weightings for these example courses are as follows:

<b>Grade</b>	<b>Numerical Equivalent</b>	<b>Semester Hours</b>	<b>Weight</b>
B	3.000	4	12
A	4.000	1	4
Totals:		5	16

The GPA for both courses would then be the total weight (16) divided by the total semester hours (5), or 3.200. Grades of I, IP, S, U, and X are not included in the calculation of the GPA. See Grade Table (p. 55) for a complete list of grades and numerical equivalents.

## Leaves of Absence and University Withdrawal

Students may request to take the following types of leaves of absence:

- Personal or Academic
- Medical or Emergency
- Military Deployment or Missionary Service

*Students in Prematriculation and Pathway programs (including N.U.in, Foundation Year, NU Immerse, Global Scholars, London Scholars, Global Pathways) do not fall under the leave of absence policy below. Students in these programs with emergent, medical, or personal circumstances that require a conversation about their ability to continue with their program of study should reach out to We Care ([https://studentlife.northeastern.edu/we-care/#\\_ga=2260687946268200191621858812-17152695181613325628](https://studentlife.northeastern.edu/we-care/#_ga=2260687946268200191621858812-17152695181613325628)) for further guidance.*

### General Leave of Absence Policy

Students who wish to take a leave of absence should complete a request through the Student Hub (<https://me.northeastern.edu>) (or via University Health and Counseling Services for a medical leave of absence, as described below) before the last day to drop without a W in a term. Please consult the Academic Calendar ([https://registrar.northeastern.edu/group/calendar/#\\_ga=222318140315109033061621260160-17152695181613325628](https://registrar.northeastern.edu/group/calendar/#_ga=222318140315109033061621260160-17152695181613325628)) for the last day to drop without a W in the term.

Students can request a leave until the last day to drop with a W in a term but should review the financial implications of withdrawing from courses on the Student Financial Services website (<https://studentfinance.northeastern.edu/policies-procedures/withdrawalleave-of-absence/>).

Students can take up to one year of leave.

Any leave of absence type, if approved, is subject to the following conditions:

- International students must make an appointment with the Office of Global Services (<https://international.northeastern.edu/ogs/>) to discuss leave of absence procedures in accordance with federal regulations.
- Students who do not return at the end of the leave will be withdrawn and must contact their college for reentry prior to the term start.
- Students must return to a university-sponsored activity that contributes toward the satisfaction of outstanding program requirements, such as registration for academic coursework.
- Students must be considered active in the period for which they are requesting a leave. Students are considered active when they are currently engaged in university-sponsored activity, such as academic coursework and co-op. If a student is withdrawn for personal reasons, the withdrawal can be reversed and a request for a leave of absence can only be processed if it is before the last day to drop without a W in a term. If the student has been administratively withdrawn, a request for leave of absence cannot be considered until the withdrawal is resolved.
- If a leave extends more than six months, students who have taken loans for education expenses may be required to begin repayment of those loans. Students who receive financial aid should meet with a financial aid counselor before going on a leave. Please see Return of Title IV Aid (<http://catalog.northeastern.edu/undergraduate/expenses/financial-aid/>) for the possible financial aid impact of a leave of absence.
- Students in university housing should refer to the Office of Housing and Residential Life for policy information.
- A student's enrollment status cannot include more than one academic year of consecutive nonclass enrollments. Students on leave for more than one year will be withdrawn from the university.
- If a student has taken multiple leaves, resulting in the postponement of expected graduation date of a calendar year, the next leave request will be processed as a withdrawal.
- While on leave, students are not allowed to take classes for credit toward their Northeastern University degree, either at Northeastern or at an outside institution.

Students on a leave of absence are considered active students and are able to register for classes in an upcoming term in a leave status. If a student is unable to register because they are inactive, the student should contact their college for reentry at the time of registration for the return term. Students are expected to register for classes upon returning from a leave of absence.

### LEAVE OF ABSENCE FOR INTERNATIONAL STUDENTS

International students must discuss maintenance of U.S. immigration status with an advisor at OGS before requesting any type of leave of absence.

### PERSONAL OR ACADEMIC LEAVE OF ABSENCE

Personal leaves of absence are general leaves of absence that do not meet the criteria of more specific leaves outlined in the catalog. Academic leaves are applied to a student record in the rare cases when a student has fulfilled the last remaining requirements abroad but final grades have been yet to be received at Northeastern; or are taking a leave of absence from Northeastern to pursue other academic work. A student interested in requesting a personal or academic leave of absence should speak with an academic advisor.

**MEDICAL OR EMERGENCY LEAVE OF ABSENCE**

Medical leave is an option available to those Northeastern students who develop a major medical condition that precludes class attendance, completion of requirements, and/or participation in co-op. Medical leave of absence requests must be initiated at UHCS (<https://www.northeastern.edu/uhcs/forms/medical-leave-of-absence/>).

Students on a medical leave will no longer have Husky Card access to the Marino Center, libraries, dining services, residence halls, and UHCS. If a student is in treatment at UHCS, they will be provided with referral resources for care in the community where they will reside during their medical leave. Students are not to be participating in student groups while on medical leave.

Emergency leaves may be granted when a student cannot continue attending class after the start of the term due to life-changing situations beyond the student's control. Students interested in requesting emergency leave are encouraged to contact We Care (<https://studentlife.northeastern.edu/wecare/>). Students can request an Emergency Leave of Absence via the Student Hub (<https://me.northeastern.edu>).

Students who have been granted a medical or emergency leave of absence due to extenuating circumstances may submit a Leave of Absence Refund Appeal Form ([https://service.northeastern.edu/sfs/?id=sc\\_cat\\_item&sys\\_id=50dc23cddb464150ebcdcafc13961951&sysparm\\_category=98921886db600d54ca10819b1396197e](https://service.northeastern.edu/sfs/?id=sc_cat_item&sys_id=50dc23cddb464150ebcdcafc13961951&sysparm_category=98921886db600d54ca10819b1396197e)) for financial consideration. If the appeal is approved, please note that housing and other fees will not be included in the appeal decision; refer to the Residence Hall and Dining License Agreement (<https://www.northeastern.edu/housing/license-agreement/>). Please only complete the Leave of Absence Refund Appeal Form if you have been approved for a medical or emergency leave of absence.

*Please note that any outstanding balance (including unpaid balances) for the academic term in which the leave is taken are still due to the university.*

Financial aid recipients must contact their financial aid counselor to understand the effects on aid received.

If the leave extends more than six months, students who have taken loans for education expenses may be required to start repayment of those loans.

Students enrolled in the Northeastern University Student Health Plan will remain enrolled in the plan for the plan year, ending August 31.

**LEAVE OF ABSENCE DUE TO MILITARY DEPLOYMENT OR MISSIONARY SERVICE**

When a student is called to active duty or missionary service, they must request the leave by filling out the proper request form through the Student Hub (<https://me.northeastern.edu>). Proof of official deployment or call to service paperwork will be required as an attachment when filling out the leave of absence request.

When a student is called during the term, the university will:

- Excuse tuition for that term. Any payment made will be credited to the student's account.
- Post a leave of absence for the term to hold a place for the student when they return.

If a student is called near the end of the term, the student and faculty members may determine that incomplete (I) grades are more appropriate. In this case, tuition will not be waived.

When a student returns to the university after completion, they will notify the college academic student services office if the leave was longer than one year; that office will in turn notify the Office of the University Registrar. The college academic student services office will assist the student with reentry and registration. If the leave was less than one year, the student should register for classes for the upcoming term prior to returning to campus.

International students who must take a leave of absence to engage in military service in their home country must also complete a form for leave of absence with OGS.

**RETURNING FROM A LEAVE OF ABSENCE**

Students on a leave of absence are considered active students and are able to register for classes in an upcoming term in a leave status. If a student is unable to register because they are inactive, they should contact their college for reentry at the time of registration for the return term. Students are expected to register for classes upon returning from a leave of absence.

Students who are withdrawn and are applying for Commencement may be reentered on a leave of absence, pending the college's approval, prior to the term in which they will graduate. International students returning from a leave of absence should contact OGS regarding the Student and Exchange Visitor Information System procedures three to four months prior to anticipated return date.

Students who wish to reenter the university following a medical leave must contact UHCS. Reentry from a medical leave requires receipt of all documentation delivered to UHCS approximately one month prior to the start of the term they wish to return. Once all documentation is received by UHCS, it will be reviewed and the student will be notified of the decision. Requests for reentry from medical leave must be completed no later than one week prior to the beginning of a term. Students must be enrolled in Northeastern classes for the term in which they wish to return from their medical leave of absence. More specific information about the reentry process can be found at the UHCS website (<https://www.northeastern.edu/uhcs/forms/medical-leave-of-absence/>).

**University Withdrawal**

Students seeking to withdraw from the university for any reason should meet with their academic advisor before completing the university withdrawal form online. Students should review the financial implications of withdrawing from all classes on the Student Financial Services website.

Students may be withdrawn from the university for financial, disciplinary, or academic reasons. Students looking to withdraw for medical reasons should reach out to UHCS ([mloa@northeastern.edu](mailto:mloa@northeastern.edu)) to review medical leave of absence.

## Personal Information

### **Change of Name**

Report all name changes to the Office of the University Registrar immediately. Official documentation of the name change is required.

### **Change of Address**

Report all address changes via the Student Hub (<https://me.northeastern.edu>). Both the permanent home address and the local address are required. International students must report any changes of local address or phone number via the Student Hub (<https://me.northeastern.edu>) within 10 days in order to ensure compliance with immigration regulations.

## Requesting and Clearing An Incomplete Grade

An incomplete grade may be reported by the instructor when a student has failed to complete a major component of a required course, such as homework, a quiz or final examination, a term paper, or a laboratory project. Students may make up an incomplete grade by satisfying the requirements of the instructor or, if the instructor is absent, the chair of the department. Be aware that instructors' policies on the granting of incomplete grades may vary and that the final decision on an incomplete grade is up to the instructor. Instructors may deny requests for an incomplete grade.

To request an incomplete grade, the student must obtain and complete in consultation with the instructor an Incomplete-Grade Contract (<https://registrar.northeastern.edu/article/incomplete-grade-contract/>) on which the precise agreement for clearing an incomplete grade is specified. The contract is then signed by the student, the instructor, and the student's academic advisor. Copies of the form are kept by the student, the instructor, and uploaded to the student's advising notes. The maximum time period for clearing an incomplete grade is restricted to 30 days from the end of the term in which the course was offered. Instructors may require a shorter due date before approving incomplete grade requests.

International students should consult with the Office of Global Services before requesting an incomplete grade to ensure that they will remain in compliance.

If the missing assignment(s) have not been submitted to the instructor within 30 days from the end of the term in which the course was offered, or the agreed upon due date, the grade entered will reflect the student's grade in the course for the work completed and the missing assignments receiving no credit toward the final grade. Changes in the final grade will be applied to the term in which the student was enrolled in the course. Any exception to this policy or extension of the deadline must be recommended by the college in which the course was offered and must be forwarded in writing to the Office of the University Registrar for implementation.

## Retaking Courses

When the appropriate course is available, students may retake a nonrepeatable course to earn a better grade. In all cases, the most recent grade earned in a course is the one used in calculating the overall grade-point average followed by the retake notation I, indicating the course grade is included in the overall GPA; however, previous grades remain on the transcript followed by the retake notation of E, signifying that that course grade has been excluded. Consult your academic advisor before retaking a course. Students are required to pay normal tuition for all retaken coursework.

When the course description for the student's registration term indicates that the course may be repeated up to a certain number of course completions, each completion of the course (up to the limit stated in the course description) will appear on the student's transcript, and the grade for each such completion will be used in the calculation of the student's overall GPA.

## Student Bill of Academic Rights and Responsibilities

*This bill was drafted by the Student Senate, the Vice President for Student Affairs, and members of the Faculty Senate. It was passed in the spring of 1992. It was then updated by the Student Body President, Vice President for Academic Affairs, and passed by the Student Senate in the Fall of 2017 and Faculty Senate in the Spring of 2018 for adoption in the Undergraduate Student Handbook (<http://www.northeastern.edu/osccr/code-of-student-conduct/>) for the 2018–2019 academic year.*

We, the students of Northeastern University, believe that a quality education is the paramount goal of all students. In order to fulfill this goal, the university recognizes certain rights and responsibilities, which follow below.<sup>1</sup> Northeastern University students recognize and accept that redress of complaints arising from these rights is limited to the procedures specified in “Student Academic Appeals Procedures”.<sup>2</sup>

### Course-Related Rights

#### ARTICLE 1

Students have the right to instructors who attend classes on time.

#### ARTICLE 2

Students have the right to receive grades and feedback in a timely manner, particularly in the case of sequentially related assignments. At least one summative assessment should be given and returned a week prior to the end of the withdrawal period. Students also have the right to view work they submit to satisfy course requirements after it is graded and receive their instructor's rationale for grades received on said work.

#### ARTICLE 3

Students have the right to adequate access to instructors. This includes instructors replying to communications from students in a timely manner, suggested to be within two business days, with the exception of during university recesses, as well as maintaining consistent office hours for in-person courses, occurring at the same time at least once a week. Instructors may change office hours by notifying students in a timely manner, suggested to be within two business days, barring extenuating circumstances.

#### ARTICLE 4

Students have the right to receive a course outline, which includes a fair and explicit grading policy, at the beginning of each course. Changes to the course outline that result in a deadline, assignment, major exam, or similar course event being introduced to or moved earlier in the schedule shall be communicated to students in a timely manner, suggested to be at least 10 business days prior to the new deadline.

#### ARTICLE 5

Students have the right to instructors who communicate the material pertaining to the course effectively in the English language except in the case of foreign language instruction.

#### ARTICLE 6

Students have the right to participate in and have access to Student Government Association teacher/course evaluations.

#### ARTICLE 7

Students have the right to have a list of all course materials that must be purchased. Possible substitutions for said course materials, (i.e., acceptable previous editions of textbooks, digital versions, library owned resources, etc.) should be made available to students at least a week prior to the start of the academic term.

#### ARTICLE 8

Students have the right to alternative grading arrangements if they are unable to attend a graded activity that takes place outside the scheduled class time.

### Rights to University Academic Services

#### ARTICLE 9

Students have the right to adequate access to effective academic services, including academic and co-op advising, as described in the student handbook and other university publications, provided by the university.

#### ARTICLE 10

Students have the right<sup>3</sup> to an environment conducive to learning and to faculty who respect students' academic freedom<sup>4</sup> in the classroom. When exercising academic freedom, students are expected to comply with all applicable university ethics, anti-harassment, and nondiscrimination policies.

#### ARTICLE 11

Students have the right to access university health resources provided by University Health and Counseling Services (<https://www.northeastern.edu/uahcs/>) (UHCS), and in accordance to Massachusetts State Law, to have access to a medical plan that they can purchase (Northeastern University Student Health Plan (<http://www.northeastern.edu/nushp/>)).

#### ARTICLE 12

Students have the right to access university resources provided by the university's Disability Resource Center in accordance with the Policy on Equal Opportunity ([https://www.northeastern.edu/policies/pdfs/Policy\\_on\\_Equal\\_Opportunity.pdf](https://www.northeastern.edu/policies/pdfs/Policy_on_Equal_Opportunity.pdf)). Students have the right to pursue informal and formal grievances through the procedures outlined by the Disability Resource Center (<https://drc.sites.northeastern.edu/>).

## Scheduling Rights

### ARTICLE 13

Students have the right to final exam schedules in accordance with established university policy, including non-conflicting final exam schedules.

### ARTICLE 14

Students have the right to attend any course session held prior to the end of the add/drop period so long as permission from the instructor is obtained in advance and all duly registered students have proper access to seating and other course resources.

### ARTICLE 15

Students will not be penalized for excused absences, with the understanding that students may need to make up for the academic commitment from which they were excused. Reasons for an excused absence include religious, medical issues, jury duty, bereavement, and military service. See this catalog (<http://catalog.northeastern.edu/undergraduate/academic-policies-procedures/attendance-requirements/>) and other applicable policies ([http://gonu.com/sports/2013/7/15/SASS\\_0715134535.aspx?path=sass](http://gonu.com/sports/2013/7/15/SASS_0715134535.aspx?path=sass)) for the full attendance and excusal policy.

## General Academic Rights

### ARTICLE 16

Students have the right to be informed, in a timely fashion, of proposed action to be taken against them.

### ARTICLE 17

Students have the right to the redress of academic grievances through the processes provided by the university.

### ARTICLE 18

Students have the right to university support and resources, such as the Office of Global Services (<https://www.northeastern.edu/ogs/>), with regard to their visa status.

### ARTICLE 19

In accordance with the Northeastern University's Nondiscrimination Policy ([https://www.northeastern.edu/policies/pdfs/Policy\\_on\\_Equal\\_Opportunity.pdf](https://www.northeastern.edu/policies/pdfs/Policy_on_Equal_Opportunity.pdf)), students have the right to a learning environment free of discrimination or harassment, including as provided for in Northeastern University's Title IX Policy (<http://www.northeastern.edu/titleix/title-ix-policy-2/>).

### ARTICLE 20

Northeastern University's policy on student produced intellectual property can be found under *Copyrightable Materials* in the *Undergraduate Student Handbook*.

### ARTICLE 21

Students have the right of access to their academic and financial aid records and maintenance of the privacy of these records, as provided by the Family Educational Rights and Privacy Act.

## Student Responsibilities

### ARTICLE 1

Contribute to a climate of open inquiry and honesty in all aspects of the university's academic life. This includes reviewing, and becoming familiar with, the Academic Integrity Policy on the OSCCR website.

### ARTICLE 2

Commit sufficient time and effort for study and for use of library, studio, laboratory, and computational facilities, as appropriate for each course.

### ARTICLE 3

Contribute to the classroom/laboratory/studio learning environment through discussion and active participation.

### ARTICLE 4

Acquire the necessary prerequisites for full participation in each academic course.

### ARTICLE 5

Attend scheduled classes regularly and on time, and arrive to class prepared, having completed all the readings and other assignments.

### ARTICLE 6

Seek out faculty and teaching assistants outside of class time, to obtain help with problems encountered in a given course.

### ARTICLE 7

Respect the academic freedom<sup>4</sup> of each faculty member and student.

### ARTICLE 8

Assist the university in its various self-evaluations (e.g., TRACE, surveys) by responding honestly and conscientiously.

### ARTICLE 9

Maintain effective communication with the university by providing permanent and local address information to the university through a system designated by the university, and by reading university email on a frequent and consistent basis.

**ARTICLE 10**

Act as positive representatives and genuine ambassadors of the university when studying and working in domestic and international settings associated with Northeastern University.

**ARTICLE 11**

Complete an entry (including itinerary, accommodation information, and contact information) using 'My Travel Plans,' located via the Student Hub (<https://me.northeastern.edu>) or other system as required by the university, prior to all university-sponsored travel outside of Massachusetts, including but not limited to: Study Abroad, Dialogues of Civilization, Foreign Exchange Programs like BSIB, Alternative Spring Break, Engineers without Borders, Co-op Placements outside of Massachusetts, etc.

**ARTICLE 12**

Complete all required activities prior to attending classes for their entrance date (including alcohol education, violence prevention programming, required reading, etc.).

**ARTICLE 13**

Have in their possession at all times the officially approved and properly validated photo identification card.

Students who fail to comply with these responsibilities could lose certain student privileges as well as face possible disciplinary sanctions under the Code of Student Conduct.

- <sup>1</sup> The student rights, through their representatives in the Student Government Association (SGA), described in these sections arise from faculty and staff employment responsibilities and obligations to the university. Northeastern University students recognize and accept that it is the sole prerogative of the university to enforce these obligations and responsibilities and to determine whether and to what extent they are being carried out or violated in specific instances. Northeastern University students recognize and accept that their ability to effect redress of complaints arising from these rights is limited to the procedures specified in the current *Undergraduate Student Handbook*.
- <sup>2</sup> The articles shall be interpreted by the Office of the Provost in conjunction with the Office of the Vice President for Student Affairs, and shall be monitored by the Student Government Association. Further, should any student discover that they have been subject to any violation of the principles stated herein, the student should follow the appropriate complaint resolution procedure in the *Undergraduate Student Handbook* (<http://www.northeastern.edu/osccr/code-of-student-conduct/>). The Student Government Association, if requested by the student, will monitor the progress of any student academic grievances.
- <sup>3</sup> Because the university operates on a twelve-month calendar in an urban environment, many construction, remodeling, renovation, and repair projects must take place while the university is in session, and other potential distractions from the learning process arise from the surrounding urban environment on which it is dependent but over which it exerts little or no control. Thus, though the university is committed to maintaining an appropriate learning environment for its students, Northeastern University students recognize and accept, as part of their relationship with the university, that the conditions described above may cause occasional disturbances to that environment.
- <sup>4</sup> For more on academic freedom, please refer to the AAUP's definition (<https://www.aaup.org/report/1940-statement-principles-academic-freedom-and-tenure/>).

## Student Responsibility Statement

By accepting responsibility for their education, students enhance the development of their academic, social, and career goals. As a condition of enrollment, students are responsible for reviewing, understanding, and abiding by the university's policies, regulations, procedures, requirements, and deadlines as described in all official publications, including the university's Academic Catalog, Northeastern and college websites, and official university email communications, as applicable.

Students are responsible for meeting the degree requirements of their academic programs in all respects, including completeness and correctness of course selection, compliance with prerequisite and corequisite requirements, completion of program and degree requirements through regular, comprehensive review and understanding of the degree audit, and observance of all academic regulations and deadlines.

Students are expected to seek guidance from appropriate university representatives, such as departmental program advisors, academic advisors, co-op coordinators, and the Office of the University Registrar (<https://registrar.northeastern.edu/>), to confirm their compliance with all applicable academic expectations and requirements.

## Student Right-to-Know Act

For information about the Student Right-to-Know Act, visit the Office of the University Registrar's website. (<https://registrar.northeastern.edu/article/student-right-to-know-act/>)

## Substituting Courses

In some cases, it may not be possible to retake a course if a student wishes to do so. In unusual circumstances, students may petition to substitute one course for another they have already taken, as long as the subject matter of both courses is substantially alike. With the approval of the student's academic advisor and the agreement of the department that offered the first course taken, a grade received in the new course will be labeled "Substitute" on the transcript and will be treated in the grade-point-average calculation as a "retake" grade, as described above. The original grade will remain on the student's Northeastern University transcript. Students should consult with their academic advisor before enrolling in any proposed substitute course. Students are required to pay normal tuition charges for all substitute coursework.

## University-Sponsored Travel

Northeastern University is committed to the health, safety, and security of its students and all other members of the university community. As a global institution, our university members undertake university travel around the world in pursuit of teaching, research, consulting, service, cocurricular activities, and work intended to advance learning and the interests of the university. The university supports standards and expectations associated with travel that are designed to reduce personal and university risk.

To enhance the health and safety of our students, you are required to comply with the university travel policies and guidance when undertaking university travel. These include, but are not limited to:

- **Registering University Travel**—Students, faculty, and staff are required to enter their travel itineraries and other requested information into the travel registry. To access the registry, go to the Student Hub (<https://me.northeastern.edu/>) and navigate to My Travel Plans to register your travel.
- **Review Destination Risks and Take Steps to Reduce Risks Before and During Travel**—Review the country briefing for your destination found in the Travel Security portal (<https://travelsecurity.garda.com/checkMail/>) and travel health and safety advice issued by the U.S. Department of State, the U.S. Centers for Disease Control and Prevention, other government organizations, the host nation, international organizations, etc. Travelers will be reminded about these sources via an email following trip registration.
- **Connectivity**—All students traveling on university programs must carry a cell phone with international calling, SMS, and cellular data capabilities. Phones must be able to receive incoming and make outgoing phone calls without relying solely on data-calling or a Wi-Fi signal. Phone number must be updated in the Student Hub (<https://me.northeastern.edu/>) profile and My Travel Plans registry before travel.
- **Complete Travel Petitions or Waivers**—Visit the Travel Protocols page (<https://globalsafety.northeastern.edu/travel-protocols/>) to determine what forms travelers are required to complete before participating in off-campus programming. The page also explains how to obtain approval to travel to a destination designated as high risk by the university.
- **Reduce Your Travel Cyber-Risk and Exposure**—Review and comply with the Policy on Portable Devices for High Cybersecurity Risk Destinations (<https://cpb-us-w2.wpmucdn.com/sites.northeastern.edu/dist/b/620/files/2020/09/Policy-on-Computers-and-Mobile-Devices-for-International-Travel.pdf>).
- **Personal Health Insurance**—All travelers are required to have personal health insurance that provides coverage while participating on university trips. Insurance requirements and an explanation of the university-provided urgent and emergency program can be viewed on the insurance and global safety support network pages of the university's global safety (<https://globalsafety.northeastern.edu/>) website.
- **Attend Predeparture Orientation**—PDO provides travelers with information about resources, requirements, safety, and security while traveling. Contact your program office to enroll in an in-person or online training.
- **Register Side Trips**—Side trips are travel that takes place prior to, during the course of, and/or immediately following a scheduled program but is not part of the program. Travelers are required to notify the university and register side trips.

Students are responsible for familiarizing themselves with the university travel policies and are encouraged to visit the university's global safety (<https://globalsafety.northeastern.edu/>) website for guidance. If you have questions related to travel or travel support, please email [mytravelplans@northeastern.edu](mailto:mytravelplans@northeastern.edu). If you need assistance during university travel, please call the university's 24-hour travel assistance line at +1.857.214.5332.

## Academic Appeals Policies and Procedures

Northeastern University affirms that it is essential to provide an appeals mechanism to students who believe that they have been erroneously, capriciously, inappropriately, or otherwise unfairly treated.

If a student feels that they have been the victim of harassment or of discrimination prohibited by law or by university policy, and that this constitutes a substantive basis for the appeal, the appeal shall first be pursued and investigated through the Office for University Equity and Compliance (<https://www.northeastern.edu/ouec/>). In such cases, the appeal described in Step 2 below is submitted to the appropriate dean(s) and a copy provided to the OUEC. Following a resolution of the harassment/discrimination issues, any remaining academic issues will be addressed, at the request of the student, according to the academic appeals procedures described herein.

Note that these policies and procedures apply to graduate students only.

Individual college appeal procedures can be viewed within the college's section of this catalog.

### Academic Appeals

It is the policy of the university that all students shall be treated fairly with respect to evaluations made of their academic performance, standing, and progress. The university presumes that academic judgments by its faculty are fair, consistent, and objective. Students must understand that the substitution of a different academic judgment for that of the original evaluator is a serious intrusion upon academic prerogatives entrusted to the faculty and others involved in academic evaluations. Nonetheless, the university believes it is essential to provide an appeals mechanism to students who believe that they have been erroneously, capriciously, inappropriately, or otherwise unfairly treated in an academic or cooperative education determination. This includes claims of misinterpretation or inequitable application of any academic provision of the *Graduate Catalog* or *Faculty Handbook*.

Decisions concerning admission or readmission into a program, including dismissals, and matters related to co-op employment (other than grades received) cannot be appealed beyond the college level. While program dismissals cannot be appealed beyond the college level, underlying academic judgments that led to a dismissal can be appealed.

Before invoking the appeals procedures, students are always encouraged to speak informally to their instructors or academic advisors about any determination or grade about which they have questions. If students choose to pursue an appeal, the process is described in the appeals section that follows.

A student may appeal an academic determination by submitting a written statement that details the action or judgment and the basis for the appeal. All parties shall cooperate and act expeditiously in processing the appeal to completion. Appeals shall be filed in a timely manner such that they can be considered during the academic year of the student's home unit.

All appeals should be initiated and resolved in a timely manner in accordance with the detailed time limits provided in this document.

Although students are entitled to seek the advice of outside legal counsel, students may not be represented by a lawyer in the informal or formal academic appeal procedures. A student may consult with the provost or their designee at any point in this procedure for advice or assistance.

It is strongly recommended that international students consult as soon as possible with the Office of Global Services to determine the possibility of any repercussion that the timing of an appeal may have on their immigration status.

### Scientific or Research Misconduct

Scientific or research misconduct is defined as fabrication, falsification, plagiarism, or other practices that seriously deviate from those that are commonly accepted within the academic and scientific community for proposing, conducting, or reporting research and does not include honest error or honest differences in interpretation or judgments of data. (Further information can be obtained from the U.S. Office of Research Integrity, Department of Health and Human Services (<https://ori.hhs.gov/>)). Possible incidences of misconduct are to be reported immediately to the provost or their designee, who will initiate the appropriate procedures. Findings of scientific or research misconduct cannot be appealed through the process below.

### Appeal of Final Grades and Outcomes of Other Academic Evaluative Processes

#### STEP 1. DISCUSS CONCERNS WITH INSTRUCTOR AND/OR ADMINISTRATOR

In many cases, students may choose to discuss their concerns with the faculty member who taught the course or a member of the qualifying exam committee. If after this conversation the student's concerns remain unresolved, or if the student is not comfortable discussing the issue with the instructor or other faculty member(s) involved, the student should request a meeting with the appropriate administrator (e.g., director, assistant or associate dean, chair, or group leader) to further discuss their concerns. If these initial attempts to address the issue fail to resolve the student's concerns, or the situation precludes a student from pursuing these steps, the student can initiate a formal appeal as follows. Note that this step should occur as soon as possible after the academic determination given the time frame for appeal statement submission described in Step 2.

#### STEP 2. PREPARE AN APPEAL STATEMENT

A student must initiate a formal appeal of an academic determination by submitting a written statement (the Statement) that specifies the details of the action or judgment that they seek to appeal. This Statement must start with a clear description of the basis for the appeal and should include: (1) basic facts about the situation leading to the appeal; (2) when the situation occurred; (3) who was involved; and (4) the resolution sought by the

student. All relevant supporting materials should be attached as addenda to the Statement. Appeals should avoid unsubstantiated, defamatory, or *ad hominem* accusations regarding the motivations of the faculty member or other persons involved in making the academic determination.

This Statement, and supporting materials, as submitted to and reviewed by the unit (i.e., college, school, department, or group responsible for reviewing the academic determination), will serve as the basis of the appeal throughout the appeals process, including at the university level.

Graduate students shall submit the Statement and all supporting materials to the college/school administrator specified in the college/school procedures.

The Statement must be submitted no later than 28 calendar days from the day when the academic determination is made available to the student. If a student wishes to dispute a grade in their final term, this must be done within 28 calendar days of degree conferral date.

### **STEP 3. COLLEGE/SCHOOL-LEVEL APPEAL**

A copy of this decision shall be sent to the college/school dean or their designee of the student's home college/school.

### **STEP 4. UNIVERSITY-LEVEL APPEAL**

If the student is not satisfied with the college/school's disposition of the matter, or if the appeal is not resolved within 35 calendar days after originally submitted to the college/school pursuant to Step 3, the student may further pursue the matter by requesting in writing within 10 calendar days of the notification from the college/school in Step 3 that the university convene the Academic Appeals Resolution Committee to review the issue. Students may obtain information on this process from the provost or their designee. This committee has been designated as the final authority on these matters.

#### **A. Academic Appeals Resolution Committee**

The Academic Appeals Resolution Committee shall be a standing committee consisting of the following:

- The provost or their designee, who shall be the chair of the committee, and nonvoting member.
- Three faculty members and one alternate faculty member (with the alternate serving in instances where there is a conflict of interest or when a member has to be replaced) all from different colleges appointed by the Faculty Senate Agenda Committee. Members will serve a one-year term with no term limits.
- If the appeal had at any point involved a matter of harassment/discrimination, the committee shall include a representative of the OUEC, who shall be a nonvoting member.

#### **B. Preliminary Matters**

Upon receiving an appeal, the committee shall obtain copies of all documentation related to the appeal from Steps 1, 2, and 3, including the procedures of the relevant unit and college/school. If the Academic Appeals Resolution Committee determines, by a majority vote, that the appeal is patently without substance or merit, it may dismiss the appeal.

#### **C. Investigation**

The Academic Appeals Resolution Committee shall investigate the matter under appeal by studying the relevant documents (the Statement, supporting documents, and additional accumulated documentation), interviewing the parties (especially the student and the involved faculty member), and taking any other action it deems appropriate. A resolution shall be rendered within 35 calendar days of appeal submission. At no time shall the committee be bound by rules of evidence but shall at all times conduct itself in a manner that is not arbitrary or capricious. The Academic Appeals Resolution Committee may, but is not required to, hold a hearing prior to resolving the issues. However, in all instances, the student and the involved faculty member shall have the right to appear separately and privately before the Academic Appeals Resolution Committee. The student shall have the right to have an advocate from the university community present during their testimony to the Academic Appeals Resolution Committee.

#### **D. Authority to Act**

The Academic Appeals Resolution Committee has been designated as the final authority on academic matters. At the conclusion of its investigation, the Academic Appeals Resolution Committee shall resolve, by majority vote, the issue by either upholding the finding of the college/school, in which case no further appeal is available, or granting such relief to the student as the Academic Appeals Resolution Committee deems appropriate. The Academic Appeals Resolution Committee shall not render a resolution that contradicts the prior findings or actions of the OUEC.

#### **E. Resolution**

All direct parties to the appeal, including but not limited to the student, the faculty member (or others involved in academic evaluations), the dean of the involved college(s), the Faculty Senate, and the registrar, shall be promptly informed in writing of the decisions and actions taken during this academic appeals procedure.

#### **F. Action**

The dean(s) or their designee in the involved college(s) shall take whatever action is necessary to implement fully the resolution of the Academic Appeals Resolution Committee.

#### **G. Appeal**

Once adjudicated, the matter is considered closed, and no further appeal can be instituted by the student or the involved faculty member with respect to the issue(s) raised at any level of the formal appeals resolutions procedures.

Step 1: Discuss concerns with instructor or appropriate administrator	Time frame: As soon as possible after academic determination (see note 1 below)
Step 2: Student prepares/submits appeals statement to unit or college/school	Time frame: Within 28 calendar days of academic determination
Step 3: Unit/college/school-level appeal process	Time frame: Decision notification within 35 calendar days of student appeal statement submission
Step 4: University-level appeal process	Time frame: Student submits within 10 calendar days of college/school decision; resolution rendered within 35 calendar days of appeal submission

Note 1: Step 1 should occur as soon as possible after the academic determination given the time frame for appeal statement submission described in Step 2.

## Academic Calendars

The graduate schools' programs are offered on a semester calendar consisting of 15 weeks. The College of Professional Studies graduate programs are offered on a quarter calendar consisting of 12 weeks.

### Quarter Programs

For student records that include quarter hours, the approved semester-hour conversion rate is (quarter hours) x 0.750. For example, a 4-credit quarter course is equivalent to a 3-credit semester course.

### Semester Programs

Traditional semester hours apply.

## Academic Integrity Policy

The university's complete Academic Integrity Policy (<http://www.northeastern.edu/osccr/academic-integrity-policy/>) is available through the Office of Student Conduct and Conflict Resolution.

## Audit Policy

Full-time Northeastern students may audit one class per term as an overload. In all colleges with the exception of the College of Professional Studies, there is no additional charge.

- Students are permitted to petition (<https://registrar.northeastern.edu/article/audit-policy/>) from the end of the course-add period to the end of the third week of classes.
- Permission is based on the availability of a seat in the class.
- Students must obtain advisor approval and meet the prerequisites and any other required approvals for the class.
- Instructor permission, as well as approval by the associate dean of the college offering the course, is required.
- The coursework required is at the discretion of the instructor.
- Once a student opts to audit a course, the audit status of the course cannot be changed.
- A signed Petition to Audit (<https://registrar.northeastern.edu/article/audit-policy/>) must be presented to the Office of the University Registrar during the designated audit-add period.
  - Students will not be registered for approved audited course(s) until after the add period is over for the intended term.
- Excluded courses are co-op, labs, language courses, any off-campus course, any online course, and any course required for the major or degree.
- Audits carry no academic credit.

## Cooperative Education

Website (<http://www.northeastern.edu/coop/>)

Cooperative education is the cornerstone of Northeastern University's experiential learning approach, in which on-campus study is enhanced by real-world experience through full-time employment at locations all over the world. Through co-op, students alternate periods of academic courses with periods of employment in positions related to their academic or career interests. This combination provides an integrated learning experience that enhances both in-class studies and career development.

### General Requirements

- Be a full-time student to participate in co-op.
- Complete all pre-co-op requirements as established by the college of the student.
- Make satisfactory progress toward degree completion, including grade-point average requirements as defined by the university, the colleges, and the major program curricula.
- Have accurate information about the co-op placement in the university's official co-op placement system, including specific start and end dates and meeting the minimum hour and day requirements.
- Not participate in co-op in the final term unless it is specified in the curriculum requirements of the program in the catalog.
- Resolve any previous disciplinary or academic probation issues, or have the cooperative education coordinator approve a plan to resolve these issues prior to applying for co-op jobs.
- Have any self-developed co-op approved by the cooperative education coordinator before accepting the position.
- Comply with any preemployment checks required by the employer, such as drug testing, credit checks, physical examinations, security clearance, and criminal record checks.
- Participate in Title IX training, as required.
- Complete any additional requirements (<https://careers.northeastern.edu/students/student-co-op/global-co-op/>) if participating in a global co-op.
- Work with the cooperative education coordinator if an Unsatisfactory (U) grade has been received for a past co-op to reestablish eligibility in accordance with the policies and requirements of the college.

### TRANSFER AND INTERNATIONAL STUDENTS:

- Transfer students from other universities must have met the same requirements in their major's co-op program as nontransfers and must have completed at least one semester of classes before starting co-op.
- International students must attend one academic year, or its equivalent, and obtain proper authorization from the Office of Global Services before engaging in co-op.

### Academic Requirements

1. **Be full-time while on co-op. Full-time status for co-op is defined as either:**
  - a. One full-time co-op job; 32–40 hours per week
  - b. Two simultaneous half-time co-op jobs; 16–31.99 hours each
  - c. One half-time co-op job; 16–31.99 hours with graduate students taking 3 or more academic credits or undergraduate students taking 6 or more academic credits
    - i. Undergraduate students on co-op in a summer 1 or summer 2 term may be registered for one half-time co-op without acquiring a second job or taking an accompanying class.
2. **Meet the minimum length requirements for an academic term:**
  - a. Semester full-term: minimum of 11 weeks or 55 workdays
  - b. Quarter full-term: minimum of 9 weeks or 45 workdays
  - c. Summer 1 or summer 2 term: minimum of 5 weeks or 25 workdays
3. **Receive a grade of Satisfactory or Unsatisfactory for the co-op experience.**

### Co-op Duration

Graduate Students Enrolled in Colleges Other than the College of Professional Studies:

- Students may be hired into co-op positions for periods of four to eight months in one of the following patterns:
  - Four months (spring, fall, or summer full terms)
  - Six months (spring term plus summer 1 term, or summer 2 term plus fall term)
  - Eight months (spring term plus summer full term, or summer full term plus fall term)
- In addition, students enrolled at a Canadian campus may be hired into co-op positions for periods of four to eight months, including continuous periods spanning the fall and spring semesters. In the case of such eight-month fall/spring term co-op assignments, students are required to enroll full-time in classes during the summer term immediately following the assignment. If a student only needs to take one additional

course to complete their program's requirements, they are only required to enroll in that one class in the summer term immediately following the assignment.

Graduate Students Enrolled in the College of Professional Studies:

- Students may be hired into co-op positions for periods of three months or six months.

### **Co-op Financial Planning**

- No tuition is charged while a student is on co-op only (students will pay room and board if they stay in university housing).
- If a student takes a credit-bearing class while on co-op, tuition will be charged at the per-credit rate.
- Students who wish to register for more than 4 credits while on full-time co-op must complete the Petition Registration form (<https://registrar.northeastern.edu/wp-content/uploads/sites/9/form-pet-reg-14.pdf>).
- Financial aid will be distributed to match the student's tuition bill and other allowable expenses.
- Students on co-op are required to maintain the same health insurance coverage (either through a private provider or through the university program) as they would while attending classes.

### **Registration for Co-op**

Students are registered for co-op based on a completed co-op record that meets the minimum hour and day requirements with accurate start and end dates in the university's official co-op database system. Students must be registered for the co-op work experience course by the end of the add period or alternately registered for classes if still searching for a job by this deadline. All co-op positions need to be approved by the university and entered as completed records in the official co-op database system by the last day to drop without a W for the respective semester.

### **Further Information**

For more detailed information about co-op policies and procedures, see the *Cooperative Education Student Handbook* on the Cooperative Education website (<https://www.northeastern.edu/coop/>).

## Departmental Jurisdiction

Certain departments of the university shall have the power to set down rules and regulations governing the operation of the departments' respective areas of responsibility. Such rules and regulations shall be in accord with the Student Bill of Academic Rights and Responsibilities (p. 63), as well as with the policies described in this document.

## Dismissal from Class

Students dismissed from classes for insubordination or other disciplinary reasons may not return without the approval of the college and the senior vice chancellor for student affairs.

## Dropping a Class

Not attending class does not constitute withdrawal. Students receiving a grade of W or NE in any course are responsible for the costs associated with that course. Students must drop courses using processes described below.

*Note: College of Professional Studies graduate students should consult the CPS graduate section of this catalog (p. 801) for class drop timelines specific to CPS graduate terms.*

### In Fall and Spring Semesters

- Through the third week of the semester, students may withdraw without any grade being posted to the transcript. Courses may be dropped via the Student Hub (<https://me.northeastern.edu/>).
- Between the fourth week and the last day of classes, course withdrawals are indicated by a W on the student's record. Courses may be dropped via the Student Hub. No financial adjustment is made for courses receiving a W grade.
- After the last day of classes, no withdrawals are accepted for any reason. A letter grade for the course will be posted on the transcript.
- Dropping below full-time enrollment may affect financial aid, health insurance eligibility, and the maintenance of proper nonimmigrant visa status.

### In Summer Half Semesters

- Through the second week of the half semester, students may withdraw without any grade being posted to the transcript. Courses may be dropped via the Student Hub.
- Between the third week and the last day of classes, course withdrawals are indicated by a W on the student's record. Courses may be dropped via the Student Hub. No financial adjustment is made for courses receiving a W grade.
- After the last day of classes, no withdrawals are accepted for any reason. A letter grade for the course will be posted on the transcript.
- Dropping below full-time enrollment may affect financial aid.

## Final Examinations and Related Policies on Other Exams

All final examinations, term papers, or projects must be returned to the student or be retained by the department for a period of one year.

## Full-Time Status

*Notes: Full-time status may be defined differently for federal loan purposes. The criteria below apply to students enrolled in colleges other than the College of Professional Studies. Please consult the College of Professional Studies section of this catalog (p. 791) for criteria that apply to students in CPS.*

A graduate student is considered a full-time student if enrolled in a minimum of 8 semester/quarter hours of credit for the semester with the following considerations:

- Students who hold stipended graduate assistantships will be considered full-time if enrolled for a minimum of 6 semester hours of credit.
- Students for whom English is a second language, at the discretion of their departments, will be considered full-time if they are enrolled in a minimum of 8 semester hours or three courses, whichever is less.
- Students holding Dean's scholarships, Diversity fellowships, Double Husky awards, or being supported by Graduate Student Scholarships will be considered full-time if they are enrolled in a minimum of 8 semester hours.
- Students enrolled in Dissertation or Continuation are considered full-time.
- International students enrolled in graduate programs at Northeastern University must consult with the Office of Global Services (<http://www.northeastern.edu/ogs/>) on all matters regarding the maintenance of full-time status.

## General Regulations

Review the general regulations that follow as well as all other regulations or limitations included throughout this catalog. Your success at Northeastern University depends, in part, on understanding your rights and fulfilling your responsibilities.

### Legal Rights and Responsibilities

#### GRIEVANCE PROCEDURE—SEXUAL HARASSMENT

The university's complete Policy on Equal Opportunity is available at the University Policies site (<https://policies.northeastern.edu/policy107/>).

No employee, agent, supervisory personnel, or faculty member shall exercise their responsibilities or authority in such manner as to make submission to "sexual advances, requests for sexual favors, or other verbal or physical conduct of a sexual nature" as an explicit or implicit term or condition of evaluation, employment, admission, advancement, or reward within the university. Neither shall any employee, agent, supervisory personnel, or faculty member make submission to or rejection of such conduct the basis for employment or academic decisions affecting any employee or student. Neither shall any employee, agent, supervisory personnel, or faculty member conduct themselves with respect to verbal or physical behavior of a sexual nature where such conduct has the purpose or effect of unreasonably interfering with an individual's work or academic performance or creating an intimidating, hostile, or offensive work or classroom environment.

Though sexual harassment will not be tolerated, the university recognizes that it is difficult to regulate emotional relationships between consenting adults. However, a consensual relationship may be suspect in instances in which one of the individuals has authority over the other. Therefore, no faculty or employee involved romantically or sexually with a student may teach or supervise that person either individually or as part of a group in any activity connected to the university.

Any student, teaching assistant, employee, or faculty member who feels that they have been the victim of sexual harassment may bring the matter to the attention of the director of the Office for University Equity and Compliance. Copies of the sexual harassment grievance procedure can be obtained from the Office for University Equity and Compliance (<https://www.northeastern.edu/ouec/reporting-options/titleix-prohibited-offenses/>).

#### HAZING

The university's Policy Prohibiting Hazing can be found at the University Policies site (<https://policies.northeastern.edu/policy606/>).

Additionally, Chapter 269 of the Massachusetts General Laws also prohibits hazing and requires that the university publish the following statutory provisions applicable in Massachusetts:

Section 17. Whoever is a principal organizer or participant in the crime of hazing, as defined herein, shall be punished by a fine of not more than three thousand dollars or by imprisonment in a house of correction for not more than one year, or both such fine and imprisonment. The term hazing as used in this section and in sections eighteen and nineteen, shall mean any conduct or method of initiation into any student organization, whether on public or private property, which willfully or recklessly endangers the physical or mental health of any student or other person. Such conduct shall include whipping; beating; branding; forced calisthenics; exposure to weather; forced consumption of any food, liquor, beverage, drug, or other substance; or any other brutal treatment or forced physical activity which is likely to adversely affect the physical health or safety of any such student or other person, or which subjects such student or other person to extreme mental stress, including extended deprivation of sleep or rest or extended isolation. Notwithstanding any other provisions of this section to the contrary, consent shall not be available as a defense to any prosecution under this action.

Section 18. Whoever knows that another person is the victim of hazing as defined in section seventeen and is at the scene of such crime shall, to the extent that such person can do so without danger or peril to himself or others, report such crime to an appropriate law enforcement official as soon as reasonably practicable. Whoever fails to report such crime shall be punished by a fine of not more than one thousand dollars.

Section 19. Each institution of secondary education and each public and private institution of postsecondary education shall issue to every student group, student team, or student organization that is part of such institution or is recognized by the institution or permitted by the institution to use its name and facilities or is known by the institution to exist as an unaffiliated student group, student team, or student organization, a copy of this section and sections seventeen and eighteen; provided, however, that an institution's compliance with the section's requirements that an institution issue copies of this section and sections seventeen and eighteen to unaffiliated student groups, teams, or organizations shall not constitute evidence of the institution's recognition or endorsement of said unaffiliated student groups, teams, or organizations.

Each such group, team, or organization shall distribute a copy of this section and sections seventeen and eighteen to each of its members, plebes, pledges, or applicants for membership. It shall be the duty of each such group, team, or organization, acting through its designated officer, to deliver annually to the institution an attested acknowledgement stating that such group, team, or organization has received a copy of this section and said sections seventeen and eighteen, that each of its members, plebes, pledges, or applicants has received a copy of sections seventeen and eighteen, and that such group, team, or organization understands and agrees to comply with the provisions of this section and sections seventeen and eighteen. Each institution of secondary education and each public or private institution of postsecondary education shall, at least annually, before or at the start of enrollment, deliver to each person who enrolls as a full-time student in such institution a copy of this section and sections seventeen and eighteen.

Each institution of secondary education and each public or private institution of postsecondary education shall file, at least annually, a report with the regents of higher education and, in the case of secondary institutions, the board of education, certifying that such institution has complied with its responsibility to inform student groups, teams, or organizations and to notify each full-time student enrolled by it of the

provisions of this section and sections seventeen and eighteen and also certifying that said institution has adopted a disciplinary policy with regard to the organizers and participants of hazing and that such policy has been set forth with appropriate emphasis in the student handbook or similar means of communicating the institution's policies to its students. The board of regents and, in the case of secondary institutions, the board of education shall promulgate regulations governing the content and frequency of such reports and shall forthwith report to the attorney general any such institution that fails to make such report.

### **USE OF ALCOHOL AND DRUGS**

The unlawful manufacture, distribution, dispensation, possession, or use of a controlled substance is prohibited in or on any Northeastern property. Any university employee or student determined to have violated this policy may be subject to disciplinary action up to and including dismissal. The use of alcohol while on Northeastern property is prohibited except where specifically authorized by the university. No employee may report to work while under the influence of alcohol or illegal drugs. Violation of these regulations may be reason to require evaluation/treatment for substance abuse in coordination with the University Center for Counseling and Student Development and/or for disciplinary action up to and including dismissal. Northeastern works to provide a drug-free workplace for all university employees and students. The Center for Counseling and Student Development provides resources for treatment and referral for students and employees with substance abuse problems. Educational programs for students, employees, and managers are presented through Human Resources Management, the Office of Housing and Residential Life, the Office of Prevention and Education at Northeastern, and University Health and Counseling Services and cover the dangers of alcohol and drug abuse, the availability of assistance for counseling and rehabilitation, and penalties for violating university policies. To comply with federal law, the university requires that employees directly engaged in performance of a grant or contract must notify their employers of any criminal drug statute conviction for a violation occurring in the workplace no later than five days after the conviction. The university must notify any federal contracting agency within 10 days of having received notice that an employee engaged in the performance of such contract has had a criminal drug statute conviction for a violation occurring in the workplace. The university will take appropriate action up to and including dismissal and/or require participation in an approved abuse assistance or rehabilitation program.

### **USE OF WEAPONS**

The use or possession on campus of firearms; explosive agents of any kind; as well as chemicals, mace, and tear gas, is specifically forbidden by the university Policy on Weapons on Campus (<https://policies.northeastern.edu/policy604/>). Violation of this university policy is cause for disciplinary action up to and including expulsion. In addition, it is worth noting that Massachusetts law states: "Whoever, not being a law enforcement officer and notwithstanding any license obtained by him under the provisions of chapter one hundred and forty, carries on his person a firearm as hereinafter defined, loaded or unloaded, in any building or on the grounds of any college or university without the written authorization of the board or officer in charge of said college or university shall be punished by a fine of not more than one thousand dollars or by imprisonment for not more than one year or both. For the purpose of this paragraph, 'firearm' shall mean any pistol, revolver, rifle, or smoothbore arm from which a shot, bullet, or pellet can be discharged by whatever means."

Massachusetts general law prohibits the possession of nunchaku or karate sticks; switchblades; knives; starter's pistols; ammunition; leather armbands or other clothing that has metallic spikes, points, or studs; or other dangerous weapons or articles. A student who possesses any articles for sporting purposes (for example, bow and arrows) should check with the University Police Department or the Department of Residential Life to determine whether such articles are among those prohibited by statute or university regulation. Northeastern also prohibits the possession of knives other than food utensils.

## **Policies and Procedures**

### **ANIMALS ON CAMPUS**

Pets are generally prohibited in university buildings but may be allowed in outdoor areas on university property. Pets do not include service animals or assistance animals, which may be permitted as accommodations for persons with disabilities in accordance with applicable federal and state laws. The full Policy on Animals on Campus is available at the University Policies site (<https://policies.northeastern.edu/policy610/>).

### **APPROPRIATE USE OF COMPUTER AND NETWORK RESOURCES POLICY**

The university Policy on Appropriate Use of Computer and Network Resources ([https://policies.northeastern.edu/policy700/#\\_ga=215664543514360587701691408242-3573326251685708090](https://policies.northeastern.edu/policy700/#_ga=215664543514360587701691408242-3573326251685708090)) is available from the Office of Information Security (<https://security.its.northeastern.edu/>).

### **BEHAVIOR ON CO-OP, ON EXTERNSHIPS, AND IN THE NEIGHBORHOOD**

As an urban institution, Northeastern is a part of the vibrant community and business life of the surrounding neighborhoods. Maintaining amicable and considerate relations between the university and local residents and businesses is essential to the continued cooperation of the university and its neighbors in civic projects and issues and to the furtherance of the university's broader mission to contribute to the general good of society. The university endeavors to foster conditions under which such beneficial relations exist. Consequently, the university must consider conduct on the part of members of the university community, whether on or off campus and whether isolated or continuing in nature, that is disruptive of these relations; that impairs, interferes with, or obstructs the lawful missions, processes, and functions of the university; or that is found by the university to be abhorrent or offensive to generally accepted standards of social behavior, as inimical to the university's interests.

The university's Code of Student Conduct governs student behavior on co-op, externships, and in the community surrounding the university. In addition, misbehavior in these settings may violate the law, policies of the co-op employer, or rules of the externship sponsor.

## **BICYCLES**

Wherever possible, students should use the bike racks available at various locations on campus. Bicycles should not be chained to fences, doors, trees, or other objects, and under no circumstances may bicycles be brought into any university building. The fire code dictates that all entrances, exits, corridors, and stairwells must be free and clear at all times. Bicycles found in violation of this code will be removed from the area.

## **CAMPUS ACCESS**

Northeastern is a private institution that retains the right to determine the policies and protocols regarding access to university property and premises and the use of campus facilities. Northeastern may, at its sole discretion, deny members of the public access at any time for any reason not prohibited by law, including but not limited to reasons related to university business, public safety, and/or to accommodate university or private events. Moreover, certain facilities, such as residence halls, are intended for use by residence hall residents only, and classrooms and laboratories are intended for use by members of the Northeastern academic community only. Access to such facilities is permitted only in accordance with applicable policies and directives. Certain of Northeastern's campuses maintain additional restrictions and procedures for campus access, which may be reviewed at the University Policies site (<https://policies.northeastern.edu/>) or on the campus's website. In all cases, the essential purposes of the university cannot be interrupted or disturbed by the access permitted to members of the public. The university reserves the right to rescind access privileges to any person who is violating or has violated university policy, protocol, procedure, practice, or applicable laws or regulations, regardless of whether the person is affiliated with the university.

## **COPYRIGHTABLE MATERIALS**

It is the general policy of the university that student papers or projects submitted in partial fulfillment of course requirements remain the property of the student authors.

This policy does not apply to:

1. "Work for hire" as defined by intellectual property laws
2. Work derived wholly or in part from other patented or copyrighted material
3. Work done as part of external grants or contracts in which the contracting documents or regulations define ownership
4. Work in which the university or its agents or employees contribute substantial time or resources
5. Work considered a thesis or dissertation

The university owns the copyright to any work created or developed by one or more students with the significant use of funds, space, facilities, equipment, materials, or other university resources. The university will not normally construe the payment of salary from unrestricted funds or the provision of office and library facilities as constituting significant use of funds, space, facilities, equipment, materials, or other resources of or administered by the university. Use of laboratory and/or computer facilities or assistance from one or more faculty or staff members to a student author specifically pertaining to the work constitutes significant use of university resources. In all cases, the provost or their designee shall make a good faith determination concerning significant use, which shall be final and binding on all parties.

In the case of a thesis generated by research performed in whole or in part by a student in the course of or pursuant to an agreement for sponsored research or other written agreement, including an agreement between the author(s) and the university, or utilizing equipment or facilities provided to the university under conditions that impose copyright restrictions, ownership or control shall be determined in accordance with such agreement or restrictions. In the absence of such agreement or restrictions, copyright ownership in such a thesis shall reside in the student. However, the student, as a condition of a degree award, must grant the university the royalty-free right to reproduce and publicly distribute copies of the thesis for limited and noncommercial purposes.

Where necessary to secure to the university an ownership of copyright, students shall assign such rights of copyright, or grant the specified rights of reproduction and distribution, to the university. The university reserves the right to employ, at its discretion, the materials or portions of any work created or developed in the course of an author's relationship with the university, or otherwise covered by the university Patent and Copyright Policy, for promotional, professional, or noncommercial purposes on a royalty-free basis. Certain courses taught at Northeastern involve students in individual or group assignments or projects involving the creation of materials, objects, or techniques that may be patentable or copyrightable. These courses generally require extraordinary levels of faculty organization and participation and/or substantial university resources.

1. Individual teachers or academic units may require that originals or copies of such papers or projects be retained either temporarily or permanently by the individual teacher or by the unit.
2. A thesis is a student work representing significant original or independent research and for which the student receives a substantial amount of credit toward a degree or certificate. Where there is a question concerning whether or not a student's work is a thesis, the provost or their designee shall make a good faith determination concerning same, which shall be final and binding on all parties.
3. Copies of the university patent and copyright policies are available from the Division of Research Development, 405 Lake Hall, 617.373.4587.

In accordance with university patent and copyright policies, in such courses the university is the owner of all rights in technology, computer programs, or other creative work that may be developed by the undergraduate or graduate student as part of the student's work in those courses. It is the university's intention, where applicable, to disclose and authorize the use of such technology, programs, or work to nonprofit organizations and to government agencies without a fee. The university may also have the opportunity to license such materials to a commercial enterprise, and in this event, it is the university's intention to share any revenue from such a license with student contributors in an amount determined in accordance with the then-existing university policy or plan. Students are informed early in the semester if the course in which they are enrolled falls within this category

and will be asked to sign a letter of agreement. Should the student decline to sign an agreement, they will be assigned to another course section—one in which such agreement is not required—or will be given alternative activities not involving such assignments or projects.

### **COPYRIGHTS AND PATENTS**

Any student who makes, as sole or joint inventor, an invention that involved significant use of university resources, including funds, space, facilities, equipment, or materials, or that is subject to terms of a sponsored research or other agreement between the university and another party, shall assign this invention and all associated applications and patents to the university or its designee unless the invention has been released to the inventor in accordance with the applicable provisions of the university patent policy. Any student, whether before or after terminating their association with the university, shall do whatever is necessary to enable the university or its designee to take out patents in any and all countries on such invention. The cost and expense of making such assignments and procuring such patents shall be borne by the university or its designee. When an invention is made by a student not involving significant use of funds, space, facilities, equipment, materials, or other resources of or administered by the university, the university will waive its rights, and the invention will be the exclusive property of the student, provided the student's rights in the invention are not altered by the terms of any financial aid received, including external sponsorship, scholarships, fellowships, traineeships, thesis expenses, or other assistance, whether or not administered by the university and provided the invention is not subject to third-party rights.

### **DEMONSTRATIONS**

The university supports as fundamental to the democratic process the rights of all members of the university community to express their views and to protest actions or opinions with which there is disagreement. A university is where individuals express diverse ideas and viewpoints in an atmosphere free of any physical force. The university insists that all demonstrations be peaceful and orderly and abide by university regulations.

- Demonstrators must not block corridors or entrances or use loud noise to disrupt a conference, meeting, or assembly.
- Demonstrations may not be conducted in faculty or administrative offices, classrooms, libraries, or study areas.
- Moving picket lines in university corridors are prohibited. (Protests may be registered by individuals or groups standing in a single line against a corridor wall, but corridors must be kept open at all times for the free passage of other members of the community.)

Students, faculty, or other members of the university community who violate these regulations will be subject to disciplinary action; violators also jeopardize their right to remain in the university community.

### **IDENTIFICATION CARDS**

All students must have in their possession at all times the officially approved and properly validated photo identification card. It will be necessary to show this card as a means of identification when using the library and campus recreational facilities, at athletic contests, at student elections, at University Health and Counseling Services, at Student Accounts, at the Office of the University Registrar, to campus police, and elsewhere around the university. An official photo identification card will be issued to new students during their initial orientation and registration periods. Replacements for lost cards can be obtained through Husky Card Services (<https://huskycard.sites.northeastern.edu/>). All members of the community should be prepared and willing to identify themselves and their guests upon request by authorized personnel.

### **JURY DUTY**

Northeastern expects students to fulfill their civic duties; the university cannot interfere in this process. Students who miss classes because of jury duty (<http://catalog.northeastern.edu/graduate/academic-policies-procedures/policies/>) must notify their professors in writing, explaining which classes will be missed on which days. The professors will work with students to make up missed assignments or exams. Upon completion of their jury duty, students must bring a copy of the documentation of their service to the appropriate professors. Students on co-op are expected to inform their supervisors if called to jury duty.

### **MEDIA AND PUBLIC APPEARANCES**

In all personal communications to newspapers or other media, as well as personal public appearances in which students identify themselves as members of the Northeastern community, it should be made clear that the opinions presented are a student's own and not necessarily those of the university. Students who appear on public programs as representatives of Northeastern must be particularly careful to avoid language or presentations that could be considered in bad taste or offensive.

### **SALES AND SOLICITATIONS**

The university's Policy on Non-Solicitation and Sales is available at the University Policies site (<https://policies.northeastern.edu/policy300/>).

### **SMOKING**

All locations, campuses, buildings, and outdoor areas owned and/or operated by the university are smoke free and tobacco free; details of the Policy on Tobacco and Smoke-Free Campus are at the University Policies site (<https://policies.northeastern.edu/policy607/>). The sale of cigarettes and other tobacco products is prohibited on campus. Smoking cessation information and programs are available. For further information, contact University Health and Counseling Services (<https://www.northeastern.edu/uahcs/>).

### **TAPE RECORDERS**

Students may not use tape recorders in the classroom without the instructor's consent. Students with disabilities who need a tape recorder in the classroom may make arrangements through the Disability Resource Center (<https://drc.sites.northeastern.edu/>).

### **TEXTBOOKS**

Students should purchase or have in their possession the assigned textbooks, problem books, manuals, and other supplies that may be necessary in a classroom or laboratory.

## Graduation Requirements

To be eligible to receive degrees, students must meet all academic requirements. They must also clear all financial and disciplinary deficiencies.

In addition, each program of study has specific academic requirements. These are specified for each program under the various schools and colleges in this catalog.

Students are expected to monitor their progress toward degree completion or certificate completion throughout their studies via their online degree audit, accessible via the Student Hub.

All eligible degree candidates must complete the graduation application by the applicable deadline. Before you apply to graduate through the Student Hub, we recommend you take the time to review your current program information, i.e., degree, major, and concentration.

## Minimum Cumulative GPA

Grades submitted to satisfy, in whole or in part, the requirements for any graduate degree or certificate of advanced study must yield a cumulative GPA of 3.000 or higher. This requirement may be supplemented by additional restrictions established by the graduate program or the college's graduate office such as, but not limited to, the maximum number of individual courses with grades below 3.000 that may be obtained without being required to withdraw or a minimum GPA in each semester.

Students falling below 3.000 are placed on academic probation. If the student remains on academic probation for two semesters, they may be terminated from the graduate program.

Not more than two courses or 6 semester hours of credit, whichever is greater, may be repeated to satisfy the requirements for the degree. The last grade earned in each of these repeated courses is counted in the calculation of the cumulative GPA.

More information regarding course grading and academic disputes may be found at Academic Appeals Policies and Procedures (p. 70).

## Overload Conditions for Graduate Assistants

Graduate assistants are expected to devote full-time effort to their studies and the duties of their award.

They are not permitted to hold any other job during the term of their assistantship; however, they may be offered limited extra work on campus. Graduate assistants who are not on F-1 or J-1 visas can be offered overload work that does not exceed an average of 6 hours a week or 90 hours a semester, for a total of 270 hours a year (or three semesters). As part of this work, graduate assistants may be hired to teach one 3-semester-hour course as an overload during the year (180 hours). The hours worked during the weeks between semesters are included in this total.

## Pass/Fail (Satisfactory/Unsatisfactory) Grading

The individual schools and colleges determine whether a course will be graded on a pass/fail basis.

## Regulations and Requirements for All Graduate Degree Programs

A copy of each graduate degree program as approved by the Board of Trustees and as officially amended is on file in the Office of the Provost. This record contains the goals, learning objectives, and all requirements for the program. All descriptions of the program in the university, college, and department publications must conform to this officially approved record.

Standards of admission are specific to certificate and degree programs and are found on each college's or offering unit's website.

### Admission Requirements

Prior to beginning a graduate program at Northeastern University, students must have met one of the following criteria:

1. Received a bachelor's degree or equivalent from an accredited college or university
2. Received a master's degree or equivalent degree from an accredited college or university
3. Received a first professional or equivalent degree from an accredited college or university
4. Been accepted into an approved bachelor's-to-graduate-degree program at Northeastern

### Transfer and Other Advanced Standing Credit

Transfer credits from other institutions (or other programs within the university) will only be accepted at the discretion of the student's destination academic unit and the associated college with the following constraints:

- For graduate certificate programs, a maximum of 3 semester hours or 4 quarter hours of credit earned at another institution may be accepted toward the credential being pursued at Northeastern, provided the credits meet the above-listed standards.
- For master's degree programs, a maximum of 30% of the credits required for the degree that are earned at another institution may be accepted toward the degree being pursued at Northeastern, provided the credits:
  1. Consist of work taken at the graduate level for graduate credit
  2. Carry grades of 3.000 or better
  3. Have been earned at an accredited institution
  4. Have not been used toward any baccalaureate or advanced degree or certificate at another institution

Advanced standing is based on criteria established by the offering school or college and implemented in coordination with the Office of the University Registrar. When applied, advanced standing reduces the total credits required to complete the primary program.

The combination of advanced standing and transfer credit shall not exceed 30% of the credits required for the degree. Credit for prior experiential or non-collegiate-sponsored learning is limited to 25% of the degree credits required for the degree.

Graduate course credits earned at Northeastern by undergraduate students enrolled in a PlusOne program will be applied toward both the undergraduate and graduate degrees as prescribed by the graduate program in which the student is enrolled, not to exceed 16 semester hours or 21 quarter hours. Transfer credit may not be applied to graduate degrees that are completed as part of a PlusOne program. Deviations from this limit shall be considered on a case-by-case basis by the University Graduate Curriculum Committee.

- Students may credit-share specified courses taken while in undergraduate status for both the bachelor's and PhD degrees. A student who departs from the program before receiving PhD candidacy may opt to use those courses toward a master's degree earned. However, such credit sharing cannot be used for more than two credentials, i.e., degrees and certificates. Please see above for limits on credit sharing between credentials.
- For doctoral programs, a maximum of 30% of the total semester hours of required coursework may be granted upon the recommendation of the admitting college's graduate committee.

Transfer credits must have been earned within five academic years of the date of matriculation in the Northeastern program to which they are to be applied.

Grades earned in courses to be applied as transfer credits are not counted as part of the overall grade-point average earned at Northeastern and are posted with a grade of T to the transcript.

### Provisional or Special Students

Students cannot be admitted under provisional conditions, i.e., requiring preparatory or remedial coursework that must be successfully completed for progression in the program. Special students are nondegree students taking courses, not to exceed 12 semester or 16 quarter hours, while not admitted to a specific program.

### Uniform Credit System

One credit hour of academic credit consists of three hours of work per week throughout the term, usually one hour of class contact and two hours of outside work. When students are registered for thesis credits, directed study, or internship, the appropriate number of credit hours will be determined

using the same method. Programs may vary the ratio of class time to preparation time depending on the learning outcomes and accreditation standards appropriate in their field(s).

A quarter hour is evaluated as three-quarters of a semester hour.

When students are registered for thesis credits, directed study, or internship, the appropriate number of credit hours will be determined using the same method.

Additional information on course and credit guidelines can be found here (p. 50).

### **Undergraduate Credit for Graduate Courses**

Undergraduate students who are juniors or seniors may enroll in graduate courses for credit toward their undergraduate degrees if they meet all prerequisites as determined by the graduate director and they receive permission from the instructor of the course and from the student's undergraduate academic advisor.

### **Time Limit for Course Credit**

Course credits earned in the program of graduate study, or accepted by transfer, are valid for a maximum of seven years unless the relevant graduate office grants an extension.

### **Academic Progression**

Grades submitted to satisfy, in whole or in part, the requirements for any graduate degree or certificate of advanced study must yield a cumulative GPA of 3.000 or higher. This requirement may be supplemented by additional restrictions established by the graduate office such as, but not limited to, the maximum number of individual courses with grades below 3.000 that may be obtained without being required to withdraw or a minimum GPA in each semester.

Students falling below 3.000 will be placed on academic probation. If the student remains on academic probation for two terms, they may be terminated from the graduate program. A PhD student will be considered to be on academic probation if their cumulative GPA falls below 3.000 and/or if they are not making acceptable research progress as defined by the college through an academic review process that occurs at least annually.

No more than two nonrepeatable courses may be retaken to satisfy the curricular requirements for the degree. A specific course may not be retaken more than once. The last grade earned in each of the retaken courses will be counted in the calculation of the cumulative GPA. Courses with a specified attribute of "repeatable" can be repeated up to the specified limit, and the earned grade in each occurrence of course completion will count toward the calculation of the cumulative GPA.

Any incomplete grades must be made up within one calendar year from the term in which the student took the class that resulted in the incomplete course grade.

### **Language Requirements**

The committee in charge of the degree program may establish a language requirement.

### **Required Training**

Graduate programs may require relevant training that all of the program's students must complete by deadlines communicated by the university or by the student's graduate program advisor.

## Regulations and Requirements for Graduate Certificate Programs

### Certificates That Appear on the Transcript

#### DEFINITION

A graduate certificate program is a program of study requiring at least three graduate courses and not fewer than 12 semester hours or 16 quarter hours of graduate credit. Successful completion of such a certificate program will be recorded on the student's transcript. Appropriate graduate credits taken as part of a graduate certificate program may be counted toward a graduate degree, at the discretion of the graduate degree program.

#### ADMISSION

All students admitted to a certificate program must satisfy the general requirements for admission as a graduate student and the requirements for the specific certificate program.

#### PROCEDURES FOR THE APPROVAL OF NEW CERTIFICATE PROGRAMS

New certificate programs are developed following the procedure outlined in the Guidelines for New Degree Programs found on the Office of the Provost website. (<https://provost.northeastern.edu/policies/>.html)

All new certificate programs require the approval of the University Graduate Curriculum Committee and notification of the Faculty Senate.

#### PROCEDURES FOR CERTIFICATE PROGRAM REVIEW

Certificate programs will be reviewed in the context of departmental reviews. Information about these reviews can be found on the Office of the Provost website. (<https://provost.northeastern.edu/policies/>)

#### GENERAL REGULATIONS

Except as indicated herein, certificate programs shall be subject to the same regulations and procedures as master's degree programs.

#### TRANSCRIPT NOTATION

Only approved degrees, certificates, and concentrations appear on the transcript.

## Regulations and Requirements for the Master's Degree

### Admissions Requirements

All students admitted to a master's program must satisfy the general requirements for admission as a graduate student and the requirements for the specific master's program. To be eligible for admission, with the exception of PlusOne students, applicants must have a bachelor's degree from an accredited college or university.

### Course Requirements

A candidate for the master's degree must satisfactorily complete an approved program conforming to the requirements of the graduate school and department or program in which the candidate is registered.

The requirements for the master's degree are a minimum of 30 semester hours beyond the bachelor's degree, except in the College of Professional Studies in which 45 quarter hours of graduate work are required. Undergraduate-level coursework will not be accepted to meet the requirements for the master's degree.

### Comprehensive Examination

The committee in charge of the degree program may require a final written or oral comprehensive examination(s) for partial fulfillment of degree requirements.

### Thesis

If a thesis is required in partial fulfillment of degree requirements, it must show independent work based, in part, on original material and must meet the approval of the student's thesis committee. The committee in charge of the degree program is responsible for providing instructions concerning preparation of the thesis.

The student must submit the thesis to ProQuest (or a university-sanctioned successor system) according to the time schedule provided by the relevant graduate office. Information on archiving a thesis is available in the relevant graduate office.

## Regulations and Requirements for PlusOne Degree Combinations

"PlusOne program" refers to any program in which students accelerate the attainment of the postbaccalaureate degree by applying graduate credits taken as an undergraduate toward both the undergraduate and graduate degrees.

### Credit Sharing

Not more than four graduate courses or 16 semester hours (or 21 quarter hours), whichever is greater, taken while a student is in undergraduate status and participating in an accelerated master's (so-called PlusOne) program at Northeastern University, may be used to satisfy the requirements for both the undergraduate and graduate degrees. Exceptions to this credit-sharing limit (due to significantly higher credit requirements for the graduate degree or other special provisions) must be approved through governance processes.

### Use of Master's-Level Credits Earned While in Undergraduate Status

Unless they have been accepted into and are enrolled in a designated PlusOne program before the undergraduate degree is conferred, students who took graduate classes to fulfill requirements toward an undergraduate degree at Northeastern may not use those credits later toward a master's degree. If the student took graduate classes resulting in credits beyond those used for the undergraduate degree program (were not used in undergraduate degree audit), those credits may be considered for use toward a subsequent degree program. If course credits are used toward both the undergraduate and graduate degrees in a PlusOne, they cannot be used for other credentials (e.g., a certificate).

Graduate course credits earned while a student was in undergraduate status and enrolled in a designated PlusOne program, used to fulfill requirements toward the undergraduate degree, and eligible to be applied toward the designated PlusOne master's degree program must be designated for such use within the subsequent three academic years after the student receives the bachelor's degree in which those credits were earned.

## Regulations and Requirements for Professional Doctorate Degree Programs

### Admissions Requirements

A student enrolled in a professional doctorate degree program must satisfy the general requirements for admission as a graduate student and the requirements for the specific professional doctorate degree program. To be eligible for admission, applicants must have a bachelor's degree from an accredited college or university.

### Academic Classification and Degree Candidacy

- Doctoral student: Students in this classification have been admitted to a doctoral program.
- Doctoral candidate: Each program in which the term candidacy is used shall have a policy defining candidacy. Students in this classification will have completed all departmental, college, and university requirements except for the dissertation (if applicable). These requirements vary by program but minimally include completion of approximately 30 semester hours or 45 quarter hours of acceptable graduate work beyond the bachelor's degree or possession of a previously earned master's degree that is acceptable to the department and certification by the graduate office. The requirements frequently include a comprehensive examination and/or a proposal defense.

### Academic Residency Requirement

In the context of a doctoral degree program, the residency requirement refers to either:

- A minimum number of credits or semesters that must be completed at the degree-granting institution
- A minimum duration during which the degree candidate must be enrolled full-time at the degree-granting institution

In those programs in which the term candidacy is used, after reaching candidacy, students must register for Dissertation for a minimum of two semesters in order to fulfill their formal residency requirement. Continuation status enrollment is for students who are postcandidacy, have completed all coursework and their residency requirement, and are actively engaged in completing a dissertation.

### Responsible Conduct of Research

All doctoral students for whom Responsible Conduct of Research training is required must complete training according to the university's Policy on Responsible Conduct of Research (<https://policies.northeastern.edu/policy500/>).

### Course Requirements

A candidate for the professional doctorate degree must satisfactorily complete an approved program conforming to the requirements of the graduate school and department or program in which the candidate is registered.

The requirements for the professional doctorate degree shall be determined by the program.

Undergraduate-level coursework will not be accepted to meet the requirements for the professional doctorate degree.

### Qualifying Examination(s)

In departments that require qualifying examinations, students must be notified in writing of the nature and regulations governing these examinations and of how their performance on the examinations will affect their normal progress toward the degree. The graduate office shall be made aware of the department regulations concerning such examinations.

### Dissertation Committee

For programs requiring the dissertation, the dissertation committee shall have at least three members, two of whom shall be from Northeastern University. The chair of the dissertation committee will be a faculty of Northeastern and will hold an appropriate terminal degree for the discipline. Exceptions to this policy may be granted by the dean of the relevant college (or their designee) based on the qualifications and experience of the faculty member who would serve as chair.

### Comprehensive Examination

For programs requiring a comprehensive examination, the committee in charge of the degree program may require a final written or oral comprehensive examination(s) for partial fulfillment of degree requirements.

### Thesis or Dissertation in Practice

If a thesis or dissertation in practice is required in partial fulfillment of degree requirements, it must show independent work based, in part, on original material and must meet the approval of the student's thesis committee. The committee in charge of the degree program is responsible for providing instructions concerning preparation of the thesis.

The student must submit the thesis to ProQuest (or a university-sanctioned successor system) according to the time schedule provided by the relevant graduate office. Information on archiving a thesis is available in the graduate office.

**Time Limitation for Achieving Candidacy and Degree Completion**

For programs in which the term candidacy is used, degree candidacy must be achieved within three years of entering the doctoral program. For all programs, the degree must be completed within seven years after entering the program. A student may request an extension of these time frames from the graduate office.

**Pursuit of an Academic Credential Outside Student's Major**

A student enrolled in a doctoral program may seek to pursue academic credentials (e.g., master's degree or certificate) outside of their major only if, prior to completing more than one-third of the required credits for that credential, they obtain the approval of their primary advisor, obtain the approval of the graduate office, and apply to and are accepted into the major offering that credential.

## Regulations and Requirements for the Certificate of Advanced Graduate Study

The Certificate of Advanced Graduate Study provides specialized study above the master's degree. It is a course of study that falls between the master's and doctoral degree and culminates in a graduate certificate.

### **Admissions Requirements**

An applicant for the CAGS must hold a master's degree in a related field from an accredited institution and must complete the admission procedure described in the material of the graduate schools. All students admitted to a CAGS program must satisfy the general requirements for admission as a graduate student and the requirements for the specific CAGS program.

### **Course Requirements**

A candidate for the CAGS must satisfactorily complete an approved program conforming to the requirements of the graduate school and department or program in which the candidate is registered. The candidate must complete a minimum of 24 semester hours or, in the case of the College of Professional Studies, 32 quarter hours of credit beyond the master's degree.

## Regulations and Requirements for Doctor of Philosophy (PhD) Programs

The formal requirements for the PhD degree are the following: completion of the coursework mandated by the individual degree program, fulfillment of the residency requirement, formal training in the Responsible Conduct of Research for students as appropriate, qualifying and/or comprehensive examination(s) or equivalent as required by the degree program, continuous registration, a final oral examination conducted by the student's PhD committee, and submission of a dissertation to the relevant graduate office and to ProQuest (or a university-sanctioned successor system) for archiving. The dissertation must be based on original and independent research.

---

### Admissions Requirements

All students admitted to a doctor of philosophy program must satisfy the general requirements for admission as a graduate student and the requirements for the specific PhD program.

### Academic Classification and Degree Candidacy

1. Doctoral student: Students in this classification have been admitted to a doctoral program.
2. Doctoral candidate: Every degree program shall have a policy defining candidacy. Students in this classification will have completed all departmental, college, and university requirements except for the dissertation. These requirements vary by program but minimally include completion of approximately 30 semester hours of acceptable graduate work beyond the bachelor's degree or possession of a previously earned master's degree that is acceptable to the admissions committee and certification by the graduate office. The requirements frequently include a comprehensive examination and/or a proposal defense.

### Academic Residency Requirement

In the context of a doctoral degree program, the residency requirement refers to either:

1. A minimum number of credits or semesters that must be completed through the degree-granting institution
2. A minimum duration during which the degree candidate must be enrolled full-time at the degree-granting institution

After reaching candidacy, students must register for Dissertation for a minimum of two consecutive semesters in order to fulfill their formal residency requirement. Continuation status enrollment is for students who are postcandidacy, have completed all coursework and their residency requirement, and are actively engaged in completing a dissertation.

### Responsible Conduct of Research

All doctoral students for whom Responsible Conduct of Research training is required must complete training according to the university's Policy on ([https://www.northeastern.edu/policies/Policy\\_on\\_Responsible\\_Conduct\\_of\\_Research.pdf](https://www.northeastern.edu/policies/Policy_on_Responsible_Conduct_of_Research.pdf)) Responsible Conduct of Research. ([https://www.northeastern.edu/policies/Policy\\_on\\_Responsible\\_Conduct\\_of\\_Research.pdf](https://www.northeastern.edu/policies/Policy_on_Responsible_Conduct_of_Research.pdf))

### Course Requirements

The program committee in charge of the degree program specifies the doctoral course requirements.

### Requirements for Candidacy

In programs that require qualifying examinations, students must be notified in writing of the nature and regulations governing these examinations and of how their performance on the examinations will affect their normal progress toward the degree. The graduate office shall be made aware of the program regulations concerning such examinations.

### Annual Review of Student Progress

Units shall define milestones for achieving satisfactory academic progress and shall establish a published process by which the academic progress of every PhD student will be evaluated through an annual review. A copy of each review shall be submitted to the student and the graduate office. If the annual academic review reports that a student is not making sufficient academic progress due to research performance, the PhD student will be placed on academic probation. After two consecutive semesters on academic probation, the student may be dismissed.

### PhD Dissertation Committee

The dissertation committee shall have at least three faculty members, two of whom shall be from Northeastern University. The chair of the dissertation committee (who is presumed to be the thesis advisor) will be a full-time tenured or tenure-track member of the faculty of Northeastern and will hold a PhD (or other research doctorate) or an appropriate terminal degree for the discipline. Colleges, the provost, or provost-designee may permit full-time faculty from other ranks: 1) on a case-by-case basis to serve in this role based on the research qualifications and experience of individual faculty members or 2) based on equivalent faculty definitions at locations operating under different faculty rank systems.

The PhD committee should be appointed early enough to advise in the formulation of the student's program and in refining the research topic for the dissertation. Within the constraints of the above criteria, the PhD program faculty will determine the process by which dissertation committees are established. The final list of dissertation committee members shall be reported to the college's associate dean for graduate education or administrative unit managing the degree program.

If a student's major advisor leaves Northeastern (including transition to emeritus status), that person may continue the research direction of the dissertation or thesis. However, a co-advisor must be appointed from the academic department or program. The student will then have two advisors, one an official member of the Northeastern faculty who will be available for research and administrative matters and the ex-Northeastern advisor. If a new major advisor is appointed, the former Northeastern faculty member may serve as an outside member of the committee.

### **Comprehensive Examination(s) and/or Proposal Defenses**

Degree programs may require a comprehensive examination(s) and/or an oral defense of the dissertation proposal as the final step before becoming a PhD candidate. The purpose of the comprehensive examination(s) is to test the knowledge and skills of the student in a particular area and their knowledge of recent research developments in the field. The administrative home unit for each PhD program shall establish the process by which comprehensive examination committees are established. Units may require an oral defense of the dissertation proposal in lieu of, or in addition to, a comprehensive examination.

### **Dissertation**

Candidates for the degree of Doctor of Philosophy must complete a dissertation that embodies the results of extended research and makes an original contribution to the field.

### **Oral Defense of the Dissertation**

An oral defense of the dissertation is required and must be held at least 14 calendar days before the degree conferral date. The defense shall be public and conducted with the committee members present either in person or via electronic means. After the public session, a private session may be held to examine material that is subject to a confidentiality agreement. Following the presentation, the candidate will field questions from the committee in public or private. In the case where neither the candidate nor the committee members are present in person on campus (i.e., the candidate and all committee members are connected only remotely via electronic means), there shall be a location established and technology enabled for public, in-person attendance of the defense by the university community and this accommodation made known to the university.

### **Submission of the Dissertation**

The student must submit the dissertation to ProQuest (or a university-sanctioned successor system) according to the time schedule provided by the relevant graduate office.

### **Time Limitation for Achieving Candidacy and Degree Completion**

Degree candidacy must be achieved within three years of entering the PhD program, and the PhD degree must be completed within seven years after entering the PhD program. A student may request an extension of these time frames from the graduate office.

### **Pursuit of an Academic Credential Outside Student's Major**

A student enrolled in a PhD program may seek to pursue academic credentials (e.g., master's degree or certificate) outside of their major only if, prior to completing more than one-third of the required credits for that credential, they obtain the approval of their primary advisor, obtain the approval of the graduate office, and apply to and are accepted into the major offering that credential.

## Regulations and Requirements for Interdisciplinary Graduate Degrees

Northeastern University offers both university- and college-approved interdisciplinary graduate programs for the student who wishes to pursue graduate studies in an area that substantially overlaps two or more units. The program will correspond in scope and depth to Northeastern's established degree standards but need not agree exactly with the regulations of individual units.

The general regulations and requirements for graduate programs apply to all interdisciplinary programs. Additional requirements are as follows.

Interdisciplinary degrees approved by the Board of Trustees and with curriculum listed in the Graduate Catalog will be administered by a unit designated by the provost. The unit may be within the Office of the Provost or within a college. Faculty oversight of these programs will be through a designated program committee or oversight group. For programs in colleges, the processes followed shall be determined by that unit. For degree programs administered through the Office of the Provost, a faculty group appointed by the provost will provide the faculty oversight.

## Definitions

- "College" refers to the College of Arts, Media and Design; the Bouvé College of Health Sciences; the D'Amore-McKim School of Business; the Khoury College of Computer Sciences; the College of Engineering; the College of Professional Studies; the College of Science; the College of Social Sciences and Humanities; the School of Law; and Mills College at Northeastern.
- "Graduate office" refers to either the designated graduate administration office in the a college (as defined above) or an equivalent academic and academic support office that exists outside a college that serves the functions of a college-based graduate office.
- "Graduate program" refers to all postbaccalaureate degree, nondegree, and certificate programs and packages of courses offered for graduate credit. Graduate programs shall not include programs or courses that are offered by the School of Law in support of the JD or LLM degree.

## PhD Programs

### Overview

Northeastern University offers the following PhD programs. The Experiential PhD (p. 107) page has additional information on doctoral programs that connect Northeastern to industry, government, and nonprofit partners.

### B

- Bioengineering, PhD (p. 349)
- Biology, PhD (p. 940)
- Biomedical Science, PhD (p. 694)

### C

- Chemical Engineering, PhD (p. 366)
- Chemistry, PhD (p. 953)
- Civil and Environmental Engineering, PhD (p. 382)
- Computer Engineering, PhD (p. 411)
- Computer Science, PhD (p. 267)
- Counseling Psychology, PhD (p. 634)
- Criminology and Justice Policy, PhD (p. 1052)
- Cybersecurity, PhD (p. 302)

### E

- Economics, PhD (p. 1060)
- Electrical Engineering, PhD (p. 419)
- English, PhD (p. 1067)

### H

- History, PhD (p. 1075)
- Human Behavior and Sustainability Sciences, PhD (p. 980)
- Human Movement and Rehabilitation Sciences, PhD (p. 620)

### I

- Industrial Engineering, PhD (p. 475)
- Interdisciplinary, PhD (p. 104)
- Interdisciplinary Design and Media, PhD (p. 147)
- Interdisciplinary Engineering, PhD (p. 357)

### M

- Marine and Environmental Sciences, PhD (p. 975)
- Mathematics, PhD (p. 991)
- Mechanical Engineering, PhD (p. 478)
- Medicinal Chemistry and Drug Discovery, PhD (p. 701)

### N

- Network Science, PhD (p. 273)
- Nursing, PhD (p. 669)

### P

- Personal Health Informatics, PhD (p. 314)
- Pharmaceuticals and Drug Delivery, PhD (p. 707)
- Pharmacology, PhD (p. 713)
- Physics, PhD (p. 1005)
- Political Science, PhD (p. 1082)
- Population Health, PhD (p. 646)
- Psychology, PhD (p. 1024)
- Public Policy, PhD (p. 1093)

**S**

- School Psychology, PhD (p. 636)
- Sociology, PhD (p. 1126)

**PhD Network**

The Northeastern University PhD Network is designed to build distinctive Experiential PhD (p. 107) opportunities and community among PhD students, providing students with support and resources universitywide to enhance their educational experience and career exploration.

At Northeastern, every PhD student has opportunities to acquire experience beyond traditional dissertation research. Exposure to and integration with our many industry and academic partners—through internships, fieldwork, and other collaborations—and in authentic settings—from laboratories, startup companies, and nonprofit institutions—lead to research with greater impact and broader career opportunities, both within and beyond academia. The PhD Network works with internal and external partners to grow and facilitate opportunities for PhD students.

Shared values unite PhD-centered activities at Northeastern:

- **Excellence with purpose:** All PhD programs combine academic rigor with societal impact, preparing critical thinkers to tackle the world's most challenging problems.
- **Innovative thinking:** Our education programs, mentoring activities, and research scholarship develop novel content and pathfinding approaches.
- **Crossing boundaries:** PhD students transcend disciplinary and international boundaries during their innovative educational journey.
- **Integrative education:** The integration of scholarship and research training with collaborative fieldwork and professional development provides a uniquely experiential education.
- **Inclusive diversity:** Students and faculty from diverse cultures and backgrounds drive excellence by bringing a wide range of perspectives to our distinctive programs.

Explore the PhD Network website (<https://phd.northeastern.edu/network/resources/>) to learn more about:

- Resources that support PhD students' educational, professional, and personal lives
- Events created especially for PhD students, both at Northeastern and through our partners
- Funding in support of fellowships, internships, and conference attendance

**Interdisciplinary PhD - Overview**

Offering an individually tailored program of study, the Northeastern University Interdisciplinary Doctor of Philosophy program enables students to draw from the disciplines supporting their fields of research and provides flexibility to train the next generation of transdisciplinary and multidisciplinary researchers who will be needed to tackle society's most pressing problems that cross disciplinary boundaries.

The graduate group, consisting of faculty from across Northeastern, provides the overarching faculty oversight to the curriculum that is expected to cross multiple Northeastern colleges. The Interdisciplinary PhD option will only be available when the desired research curriculum cannot be supported by one of Northeastern's existing PhD programs. This PhD program is administered by the Office of the Provost.

Minimum academic standards, oversight, requirements, and milestones related to this new PhD are described below.

**GRADUATE GROUP**

This refers to the faculty committee that will provide academic oversight for the PhD program as a whole.

**DISSERTATION COMMITTEE**

Established by the graduate group for each PhD student, the dissertation committee consists of at least three faculty qualified to supervise the student's research and establishes the curriculum requirements in support of the PhD student's anticipated dissertation research. There should be at least one dissertation committee member representing each discipline associated with the proposed PhD, and it is strongly encouraged that an external individual is added as a fourth member of the dissertation committee. This external member must be qualified to supervise and guide PhD-level research. The dissertation committee also establishes the milestone requirements, specifically the format for the qualifying exam at the time of admission. One member of the dissertation committee will serve as the committee chair. Cochairs are permitted and encouraged to guide research at the intersection of disciplines.

**AREA OF SPECIALIZATION**

Students select an area of specialization, supported by their approved coursework and research areas and denoted on the student's transcript. The area of specialization will be recommended by the dissertation committee. The graduate group will review these areas of specialization within the context of existing PhD specializations. The graduate group will make the final decision about the area of specialization for each student. Area of specialization should be established by the end of the first year of academic study.

**ADMISSION TO CANDIDACY**

The admission to candidacy recognizes the wide range of disciplines that may participate in in this degree. To reach candidacy, PhD students must demonstrate their research ability through the application and synthesis of skills and knowledge and their ability to pose questions and solve problems. Students should achieve candidacy by the end of the second year of study. The admission to candidacy will include an assessment about the candidate's ability to perform societally impactful research by an external evaluator. Students who require more than

18 months to meet the requirements for candidacy will need to petition the dissertation committee and the graduate group to request extended time. Candidacy will be achieved with the following:

- The qualifying examination subject areas will be established at the time of admission, which will be aligned with the student’s proposed research project. A representative from the graduate group will convene the dissertation committee for the qualifying exams. To assess the student’s ability to perform impactful research, it is strongly recommended that an evaluator outside Northeastern (and not a member of the dissertation committee) be included as an examiner. The qualifying examination will normally include a written exam, oral exam, response to a journal paper, and/or other format deemed acceptable by the dissertation committee for the involved disciplinary areas.
- Progression to candidacy may also require a research paper requirement. Any paper requirements will be communicated at admission.
- The committee may require a presentation from the student before making its recommendation.

**DISSERTATION PROSPECTUS/PROPOSAL**

After the student has achieved sufficient depth in a field of study, the student prepares a proposal for a PhD dissertation. This process should take place within a year of achieving candidacy. The dissertation proposal describes the proposed research, including the relevant background materials from literature. The proposal should clearly specify the research questions to be addressed, the methods to be used, and a schedule of milestones to completion. A representative from the graduate group will convene the dissertation committee for the dissertation proposal. The dissertation proposal must be approved by the dissertation committee. It is strongly encouraged that the dissertation committee include an individual qualified to guide the research from outside Northeastern. Upon approval of the written proposal, the student must present the proposed work orally in a public forum, followed by a closed-door oral examination from the dissertation committee. The dissertation committee will submit the dissertation proposal results to the representative from the graduate group who will review and communicate the results to the student. The student may take the dissertation proposal examination twice, at most.

**DISSERTATION DEFENSE**

The dissertation defense is held in accordance with the bylaws of the University Graduate Curriculum Committee of the Northeastern Faculty Senate. The defense is convened by a representative from the graduate group and is chaired by a Northeastern faculty member approved by the graduate group and outside the dissertation committee. The dissertation committee will include an external examiner who is an individual with expertise in the area of study but not affiliated with the Northeastern global campus system or previously involved with the student’s research. The defense chair will communicate the results to the PhD candidate.

**Interdisciplinary PhD - Bachelor's Degree Entry  
Program Requirements for Bachelor's Degree Entry

- Core requirements *(curricula established by the dissertation committee)*
- Annual progress review
- Admission to candidacy
- Qualifying examination
- Dissertation prospectus/proposal
- Dissertation defense

**Core Requirements**

Code	Title	Hours
	Complete 30 semester hours of coursework in consultation with your dissertation committee.	30

The dissertation committee will provide oversight in coursework selection, provided that each student has training (via courses or experience) in prerequisite domain knowledge, research methods, and specific contexts. Students are required to enroll in a minimum of 30 semester hours of coursework approved by the dissertation committee. This coursework may include traditional courses, special topics courses, independent study, and discussant or other coursework taken via partner institution. The coursework should also include opportunities to develop the professional skills (such as communication, teaching, and leadership) required for the student’s field of research. Courses delivered at a partner outside Northeastern University may satisfy these course requirements provided an education or experiential PhD agreement exists with that organization. The dissertation committee will ensure that the 30 semester hours represent a balance of coursework across domain knowledge, research methods, application contexts, research integrity, colloquia, the research itself, and professional development. The dissertation committee should submit a plan of study to the graduate group during the first semester of a PhD student’s enrollment.

**Program Credit / GPA Requirements**

- 30 total semester hours required
- Minimum 3.000 GPA required

**Interdisciplinary PhD - Master's Degree Entry  
Program Requirements for Master's Degree Entry  
Milestones**

### Core Requirements

Code	Title	Hours
	Complete 12 semester hours of coursework in consultation with your dissertation committee.	12

The dissertation committee will provide oversight in coursework selection, provided that each student has training (via courses or experience) in prerequisite domain knowledge, research methods, and specific contexts. Students are required to enroll in a minimum of 12 semester hours of coursework approved by the dissertation committee. This coursework may include traditional courses, special topics courses, independent study, and discussant or other coursework taken via partner institution. The coursework should also include opportunities to develop the professional skills (such as communication, teaching, and leadership) required for the student's field of research. Courses delivered at a partner outside Northeastern University may satisfy these course requirements provided an education or experiential PhD agreement exists with that organization. The dissertation committee will ensure that the 12 semester hours represent a balance of coursework across domain knowledge, research methods, application contexts, research integrity, colloquia, the research itself, and professional development. The dissertation committee should submit a plan of study to the graduate group during the first semester of a PhD student's enrollment.

 Minimum 3.000 GPA required

## Experiential PhD

### Overview

The future of research will be collaborative. Researchers across academic institutions, industry, government, and other organizations will team up to solve complex real-world problems. Researchers will require technical proficiency as well as the ability to work with others, form teams, manage projects, and more—skills that go beyond the classroom. At Northeastern University, every PhD student and postdoctoral research associate has opportunities to acquire experiences beyond traditional research. Exposure to and integration with our many partners through unique programs in authentic settings from laboratories to startup companies to nonprofit institutions leads to greater impact and broader career opportunities, both within and beyond academia.

Northeastern's Experiential PhD programs offer such opportunities for current Northeastern PhD students and postdoctoral research associates and for full-time master's-level employees at companies, laboratories, and organizations who want to pursue a doctoral degree at Northeastern. The former occurs through the LEADERS program (p. 107), while the latter occurs through the Industry PhD program (p. 108). Traditional internships and sponsored research agreements are available to Northeastern students.

The LEADERS program is designed to enable researchers to develop professional skills through authentic career exploration opportunities at organizations in industry, government, and the nonprofit sector. Beyond the comfort zone of their own university research group, PhD students and postdoctoral research associates encounter new experiences that help shape their research perspective. They also bring fresh ideas and talent to their host organizations. Northeastern is one of the only universities in the world to offer students in all of its research-based doctoral-degree programs the option to learn and pursue research outside of their primary research group. These real-world placements are highly flexible and customizable, tailored to meet the needs of both Northeastern's PhD students and postdoctoral research associates and our institutional partners.

The Industry PhD is a first-of-its kind research-based doctoral program for full-time master's-level employees. Designed with input from external partners, employees pursue a research-based doctoral degree while maintaining their job and conducting research at the employer site. This enables employees to acquire new skills that will help them to advance in their careers and provides the organization with an opportunity to invest in their future leaders. By working closely with Northeastern faculty, employees will explore their research from a broader scientific perspective, enabling them to appreciate the research foundation of their day-to-day work and to pursue new areas of research for the company.

Experiential PhD programs offer robust benefits to both students and institutional partners. Students solve complex problems as part of their education and chart careers as future innovators. Our institutional partners receive many benefits as well, including:

- A deeper engagement in rapidly evolving fields of research
- Access to university facilities and senior faculty expertise
- Opportunities for senior leadership to mentor and copublish with students and to serve on their dissertation committees
- A chance to recruit emerging talent
- Opportunities to partner with Northeastern, an entrepreneurial research university known for its innovative collaborations with academia, government, and industry

### Experiential PhD Leadership, Graduate Certificate

At Northeastern University, PhD students enjoy a uniquely broad range of immersive opportunities to expand critical inquiry, learn, perform original research, and chart a path to professional success. Experiential PhD opportunities enable PhD students to step outside the comfort zone of their campus research group where students can pursue challenging, creative, customized assignments within industry, government, or the nonprofit sector that inform and enhance their pursuit of a research doctorate.

This Graduate Certificate in Experiential PhD Leadership aims to:

- **Challenge students to address complex problems** through experience within the context of real-world needs and challenges faced by industry, government, or nonprofit-sector organizations, broadening students' view of stakeholders and impact, shaping the very questions they raise and answer.
- **Equip students for a lifetime with the cultural agility, creativity, and professional skills**—public speaking and communications, meeting goals and expectations (e.g., project management for personal and professional purposes), teamwork, leadership, peer influence, leading from the middle—that they will need to translate their findings into impactful solutions.
- **Enrich every student's research group and, ultimately, fields of expertise** by fostering a collaborative, entrepreneurial, innovative approach to knowledge creation that expands their network far beyond academia to include intellectual and professional mentors and collaborators.

This graduate certificate designed for PhD students across all of Northeastern's research-based PhD programs provides students embarking on an experiential PhD with the preparation, project delivery, and guidance for contextual integration within the context of leadership development. All students pursuing this leadership certificate will be mentored by their sponsor supervisor and dissertation advisor(s).

Complete all courses and requirements listed below unless otherwise indicated.

A grade of B or higher is required in each course.

## Industry PhD

The Industry PhD is a first-of-its kind research-based doctoral program designed with input from external partners to provide a pathway for full-time master's-level employees. Designed with input from external partners, employees pursue a research-based doctoral degree while maintaining their job and conducting research at the employer site. This enables employees to acquire new skills that will help them to advance in their careers and provides the organization with an opportunity to invest in their future leaders. By working closely with Northeastern University faculty, employees will explore their research from a broader scientific perspective, enabling them to appreciate the research foundation of their day-to-day work and to pursue new areas of research for the company.

Experiential PhD programs offer robust benefits to both students and institutional partners. Students solve complex problems as part of their education and chart careers as future innovators. Our institutional partners receive many benefits as well, including:

- A deeper engagement in rapidly evolving fields of research
- Access to university facilities and senior faculty expertise
- Opportunities for senior leadership to mentor and copublish with students and to serve on their dissertation committees
- A chance to recruit emerging talent
- Opportunities to partner with Northeastern, an entrepreneurial research university known for its innovative collaborations with academia, government, and industry

The Industry PhD is applicable to any of our 35 doctoral programs. Applicants should follow the requirements of the program to which they are applying. In addition, the following Industry PhD terms (<https://phd.northeastern.edu/industry-and-experiential-phd-program/>) apply.

The College of Arts, Media and Design offers graduate programs that build on existing knowledge and establish innovative areas of inquiry and practice. We work with students to frame, research, and answer transformative questions. Together, we challenge, engage, and shape global cultures and marketplaces.

### Our Mission

We create a distinctive experiential education by leveraging emergent practices and scholarship in the arts, media, and design. Our unique combination of disciplines empowers innovative thinking and making. Our students become informed citizens and creative leaders with an entrepreneurial spirit.

### Graduate Studies in the College of Arts, Media and Design

Welcome to graduate studies at CAMD. We deliver an outstanding graduate education in traditional areas while exploring new approaches to this generation's transformative questions. Our graduate programs highlight intersectional approaches that bring together human, technological, and data literacies to push the boundaries of our disciplines.

We offer diverse program types to meet individual career and academic goals, including terminal degrees (Doctor of Philosophy, Master of Fine Arts, Master of Architecture); professional degrees (Master of Science, Master of Arts, Master of Design); PlusOne pathways; and Graduate Certificates. Our graduate degree programs are inherently interdisciplinary, led by research faculty across the departments of Art + Design, Architecture, Journalism, Music, and Theatre. Coursework incorporates a range of scholarly, applied, and experiential perspectives, complemented by lively community activities including lecture series, exhibitions, symposia, and more.

This is an exciting time to pursue advanced education and scholarship in creative fields. Never have the arts and culture been so clearly essential to our social, economic, and environmental future: From cultural outreach in underserved communities to designing ethical virtual environments for health and security; from green building innovation to cutting-edge journalism; from provocative performances and thought-provoking installations to incisive data visualizations that change how we view the world—our faculty and students are involved in a wealth of academic endeavors, creative enterprises, and professional experience.

Please use these resources to familiarize yourself with the diverse ranges of programs we offer. Don't hesitate to reach out to the graduate program faculty listed in your fields of interest, and be sure to visit CAMD's graduate programs website (<https://camd.northeastern.edu/graduate-students/>) often, where you'll find current news and links.

## Academic Policies and Procedures

- General Information (p. 111)
- Master's Degree Policies (p. 112)
- Graduate Student Classification (p. 113)

## General Information

Four units in the College of Arts, Media and Design offer programs at the graduate level:

- Architecture (p. 114)
- Art + Design (p. 125)
- Interdisciplinary (p. 146)
- Journalism (p. 141)

## Master's Degree Policies

The College of Arts, Media and Design graduate studies sets minimum standards for all students to fulfill. In addition, departments and programs may have requirements that exceed the standards outlined below. Finally, the CAMD Graduate Programs General Regulations booklet (found at the college's webpage (<https://camd.northeastern.edu/graduate-resources-policies/>)) further summarizes the expectations for student conduct, academic life, and the responsibilities of the students and the college to one another.

A candidate for the master's degree must complete a minimum of 30 semester hours of graduate-level coursework and such other study as may be required by the department in which the student is registered. To qualify for the degree, a minimum cumulative grade-point average of 3.000, equivalent to a grade of B, must be obtained. This average will be calculated each semester. A student who does not make satisfactory progress toward degree requirements, as specified by the individual department, may be terminated from the program.

To maintain current student status within CAMD, graduate students must make satisfactory progress in their degree, including working toward the graduation requirement of a GPA of 3.000 and the timely completion of coursework. See the university's policy on academic standing ("Minimum Cumulative GPA (p. 88)").

All students must be registered in the last semester of their program. Any student who does not attend Northeastern University for a period of one year will be required to apply for readmission.

### Electives

No more than 8 semester hours of electives may be taken outside of CAMD. Any additional non-CAMD elective hours will not count toward the degree.

### Graduate Student Scholarship

Students who are registered in degree programs are eligible for a CAMD Graduate Student Scholarship. Award recipients will receive an official award letter from CAMD graduate studies. Pay attention to this letter as it is an official contract that should be read carefully. The GSS is contingent on satisfactory academic progress toward the degree and meeting department-specific guidelines. Recipients must be in full-time status and be registered for a minimum of 8 semester hours. Note, however, that recipients remain eligible for the GSS in their final semester even if they are enrolled in less than 8 semester hours. Receipt of financial support administered by CAMD graduate studies requires that all students receiving awards must maintain a 3.000 cumulative GPA. Students whose cumulative GPA is below 3.000 will be placed on academic probationary status and are not eligible to receive the award while on probation. The GSS can be reactivated by raising the cumulative GPA to 3.000 in the subsequent semester; students who do not meet the minimum GPA requirement at the end of the next semester cannot receive additional probationary periods.

### Leave of Absence

Full-time students who are not involved in any academic endeavor for a period of time are required to petition the manager of student services, through their department, for a leave of absence (<http://catalog.northeastern.edu/graduate/academic-policies-procedures/policies/>) by completing the leave of absence petition through the Student Hub (<https://me.northeastern.edu>). CAMD graduate studies will not accept retroactive leave requests. Note that if a student is requesting a leave for medical reasons, students should contact University Health and Counseling Services (<http://www.northeastern.edu/uhrs/forms/>) at 617.373.2772. Leaves of absence generally are not approved for more than one calendar year at a time. International students must consult with an advisor at the Office of Global Services (<https://international.northeastern.edu/ogs/>) for proper guidance. Leaves of absence are not appropriate for master's degree students who are working on a thesis but are away from the Northeastern campus. Except in the case of medical leaves, being on an approved leave of absence does not extend the amount of time allowed for degree completion or the makeup of incomplete grades.

### Time Limitation

For the master's degree, course credits earned in the program of graduate study are valid for a maximum of seven years.

If students wish to apply for an extension of the time limit, they must submit a petition to their department of study. The petition must include a detailed plan for completion of all remaining degree requirements. In the case of time-limit extension requests for master's degree coursework, the department must certify that the content of each of the courses has not changed since the time the student completed the course. If deemed appropriate, the department will recommend approval of the extension to CAMD graduate studies.

### Changes in Requirements

The continuing development of CAMD graduate studies forces regular revision of curricula. When no hardship is imposed on the student because of changes and the facilities (e.g., equipment, technology, studios, etc.) of the college permits, the student is encouraged to meet the more recent program requirements. This requires application to change the catalog term of the student's program of study. To accomplish this, the student's advisor can assist the student with the process of applying to change catalog term. However, if it can be demonstrated that doing so imposes a substantial hardship, the requirements of the year in which the student matriculated will be applicable.

### Thesis

Theses are required in some programs and should demonstrate the individual's capacity to execute independent work based on original material. Registration for the thesis course is required. Theses must be approved by the departmental graduate committee and must receive a grade of B (3.000) or better to be accepted. Students who have not completed their thesis after having registered for the specified number of thesis credits must register and pay for Thesis Continuation.

## Graduate Student Classification

### Regular Student

Those students who are admitted to a degree program.

### Conditional Student

Students whose admissions files are missing documentation. A student who has not provided required documentation for admission by the due date for final grades for the student's first academic term will not be permitted to register for a future term.

### Special Student

Special students are enrolled on a part-time basis (no more than 6 semester hours per semester). Credit can be earned for a maximum of 12 semester hours over time. Students interested in taking more than 12 semester hours must make a formal application to the degree program through Northeastern University's online application portal ([https://app.applyyourself.com/AYApplicantLogin/fl\\_ApplicantConnectLogin.asp?id=neu-grad](https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=neu-grad)).

Special students who do not register for four consecutive semesters (excluding summer semester) will be subject to review and possible withdrawal by CAMD graduate studies.

### Student Status

For academic purposes, a graduate student is considered a full-time student if enrolled in a minimum of 8 semester hours of credit for the semester, with the following exceptions:

- A student is considered full time if enrolled in a full-time co-op (p. 76).
- Students enrolled in Dissertation or Continuation are considered full time.

*Note:* Full-time status may be defined differently for federal loan purposes. For information, contact Student Financial Services (<https://studentfinance.northeastern.edu/>), 617.373.5899.

## School of Architecture

Website (<https://camd.northeastern.edu/architecture/>)

### Daniel Adams, MArch

Associate Professor and Director of the School of Architecture

617.373.4637

da.adams@northeastern.edu

### Master of Architecture

Northeastern University offers a Master of Architecture degree accredited by the National Architectural Accrediting Board (<http://www.naab.org>).

The program leverages the school's outstanding faculty and pragmatically grounded curriculum. The physical and cultural context of Boston serves as a laboratory for the program's design studios and is design focused but with a different approach than many schools. We find opportunities for innovation within the real estate and construction industries and current policy debates—rather than outside them. This is how we intend to move architects to the center of the discussion about the future of our cities.

Students take courses in urban housing, practice-integrated design, and do original research on market-driven building types. The final degree project in the design studio offers an opportunity to leverage this research with real innovations in hybrid types, strategic alterations to existing ones, and to take on the challenge of finding prototypical solutions for systemic problems.

In addition to studio courses, graduate students take seminars in architectural theory and design strategy; and electives are available in real estate development, sustainable building techniques, urban landscape, and other topics. There is also a unique course that looks at case studies of architecture firms in practice, problem solving, and innovation. We seek to have students leave our program with a unique balance of technical, theoretical, and strategic tools to make a real difference in the profession.

### Master of Design for Sustainable Urban Environments

The Master of Design for Sustainable Urban Environments (MDes-SUEN) brings together the allied professional fields of environmental design, landscape architecture, and urban planning to offer advanced study and research opportunities in the design of ecologically and economically productive urban environments. The program seeks to supply graduates for the rapidly growing field of sustainable urbanism through a dynamic curricular mix of design, dialogue, and technical courses, enriched by diverse interdisciplinary electives.

The pedagogic and research focus of the MDes is the design, implementation, and management of sustainable urban environments from the scale of individual parcels to regional systems. Key topics include brownfield and waterfront revitalization, sustainable and secure pedestrian environments, urban habitat design and management, and green and blue infrastructure design and planning with an emphasis handling increased storm water and tidal influx in the urban landscape.

The MDes is a unique program of study in which urban landscape design, planning, and policy dovetail with environmental engineering, environmental science, art, and visualization. Boston's history of innovation in environmental design as well as its legacy of urban redevelopment provide a rich backdrop and laboratory of urban, infrastructural, and ecological prototypes that ideally position the program to creatively and critically explore local issues with global implications.

Contemporary urban theory includes a significant body of writing in the area of "Landscape-" and "Ecological-Urbanism," a critical discourse that looks at the full range of environmental strategies for urban sites with an emphasis on ecological thinking. The paradigm of sustainable environmental design is moving away from form-based planning toward dynamic ecosystem services. This program seeks to prepare students to be innovative and entrepreneurial designers able to combine economic, environmental, and social priorities to make next-generation public spaces and systems.

## Programs

### Master of Architecture (MArch)

- One-Year Program (p. 115)
- Two-Year Program (p. 116)
- Three-Year Program (p. 118)
- Three-Year Program—Advanced Degree Entrance (p. 120)

### Master of Design for Sustainable Urban Environments (MDes-SUEN)

- One-Year Program (p. 122)
- Two-Year Program (p. 123)

**Master of Architecture—One-Year Program**

This program gives eligible candidates the opportunity to get a NAAB-accredited (<http://www.naab.org>) Master of Architecture degree in one year.

Open to candidates with either a Bachelor of Science in Architecture from Northeastern University or a professional Bachelor of Architecture degree from an accredited North American program with at least one year of IDP-approved professional experience.

Students engage in a two-semester research and design project based on pertinent contemporary topics chosen by the graduate faculty, or students may propose an independent research and design project. Team research is conducted and compiled into online and physical research books. This body of compiled research then becomes the basis of the intellectual framework for the individual students' design projects. This final degree project parallels an in-depth two-semester professional practice sequence that analyzes all of the contingencies of successful architectural projects, including architectural offices and their project management strategies, real estate development criteria, and associated project finance.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Core Requirements**

Code	Title	Hours
<b>Professional Practice</b>		
ARCH 6430	Case Studies 1	4
ARCH 6440	Case Studies 2	4
<b>Topics and Seminars</b>		
ARCH 6330	Seminar in Modern Architecture	4
ARCH 6340	Graduate Topics in Architecture	4
<b>Research and Project</b>		
ARCH 7130	Master's Research Studio	6
ARCH 7140	Master's Degree Project	6

**Elective**

Code	Title	Hours
Students must complete a 4-semester-hour graduate elective.		4

**Program Credit/GPA Requirements**

32 total semester hours required  
 Minimum 3.000 GPA required

**Plan of Study**

Year 1

<b>18</b>		<b>14</b>		<b>0</b>		<b>0</b>		<b>0</b>

**Total Hours: 32**

## Master of Architecture—Two-Year Program

This program offers students who have earned a Bachelor of Science in Architecture from an institution other than Northeastern to engage in the urban-focused curriculum that is offered at the School of Architecture. Students are awarded a M.Arch degree, which is NAAB-accredited (<http://www.naab.org>).

### YEAR ONE

Options Studio offers topical content that best aligns with the research and practice expertise of the faculty, which provides students with the latest concepts in architectural design, theory, and research on a consistently updated and rotating basis. Students select their top choices of studio topics and instructors, giving them more flexibility in the areas for which they would like to focus their education. The Comprehensive Design Studio challenges the students to consider architectural connections at all scales, from the nut and bolt to the scale of the door or window to the scale of the whole building and the city. Additionally, students take classes in technology as well as architecture seminars.

### YEAR TWO

In the final year, students engage in a two-semester research and design project based on pertinent contemporary topics chosen by the graduate faculty, or students may propose an independent research and design project. Team research is conducted and compiled into online and physical research books. This body of compiled research then becomes the basis of the intellectual framework for the individual students' design projects. This final degree project parallels an in-depth two-semester professional practice sequence that analyzes all of the contingencies of successful architectural projects, including architectural offices and their project management strategies, real estate development criteria, and associated project finance.

## Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Elective (Optional)	4				
	<b>18</b>		<b>14</b>		

**Total Hours: 68**

## Master of Architecture—Three-Year Program

Open to candidates who do not have a Bachelor of Science in Architecture or equivalent.

Applicants from all disciplines are welcome. Those who have some architecture course work may be eligible for advanced placement.

The program requires three years of study. Students have the option to pursue a summer co-op opportunity managed by the university's co-op program.

After completing a first-year introductory curriculum, students in the three-year program merge into the two-year MArch curriculum. This is a NAAB-accredited (<http://www.naab.org>) degree program.

### YEAR ONE

In the first year, students take intensive studios, technology classes, and architectural history classes to immerse them in the studio culture of the school and to give them a strong foundation to begin the upper-level studios. The introductory graduate skills and design studios are specifically designed for the students in this program who do not have experience doing architectural drawing and designing. Students complete a series of projects that will give them an opportunity to develop the skills and the critical thinking needed in the graduate curriculum.

### YEAR TWO

The Option Studio offers topical content that best aligns with the research and practice expertise of the faculty, which provides students with the latest concepts in architectural design, theory, and research on a consistently updated and rotating basis. Students select their top choices of studio topics and instructors, giving them more flexibility in the areas for which they would like to focus their education. The Comprehensive Design Studio in the second semester challenges the students to consider architectural connections at all scales, from architectural detail, to architectural systems, to the whole building and its urban context.

### YEAR THREE

In the final year, students engage in a two-semester research and design project based on pertinent contemporary topics chosen by the graduate faculty, or students may propose an independent research and design project. Team research is conducted and compiled into online and physical research books. This body of compiled research then becomes the basis of the intellectual framework for the individual students' design projects. This final degree project parallels an in-depth two-semester professional practice sequence that analyzes all of the contingencies of successful architectural projects, including architectural offices and their project management strategies, real estate development criteria, and associated project finance.

## Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Elective (optional)		4			
			<b>18</b>	<b>14</b>	

**Total Hours: 104**

Total credits for the three-year track may range from 96–104 depending on optional electives.

## Master of Architecture—Three-Year Program—Advanced Degree Entrance

Open to candidates who do not have a Bachelor of Science in Architecture or an equivalent degree.

Students with some background in architecture may be eligible for advanced placement into the program. Advanced placement will be determined by an applicant's transcript and portfolio.

After completing a first-year introductory curriculum, students in the three-year program merge into the two-year MArch curriculum. This is a NAAB-accredited (<http://www.naab.org/>) degree program.

**Only select courses in the first year of the program will be waived.** All waivers are at the discretion of the school and applicants will be required to provide documentation for any waivers (78–100 credits total based on waivers).

The minimum course work for all students in the first year of the program is:

- Two studio courses (minimum 10 credits total)
- Two graduate electives (minimum 8 credits total)

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

All advanced-entry students must complete a minimum of 10 semester hours per semester in the first year. Course waivers are determined by the faculty and students should consult with their advisor.

### Prerequisites

Courses listed below may be waived as determined by faculty advisor.

Code	Title	Hours
<b>History</b>		
ARCH 2330	Architecture and the City in the Nineteenth Century	4
ARCH 2340	Modern Architecture	4

Total credits for the AP track may range from 78–104 depending on waivers and optional electives.

Note: Only courses in year one may be waived. Course waivers are at the discretion of the program director.

## Sustainable Urban Environments, MDes—One-Year Program

The one-year Master of Design for Sustainable Urban Environments (MDes-SUEN) is open to students holding an accredited, first-professional degree in landscape architecture, architecture, planning, or urban design. The 36-credit program offers a core sequence of advanced design research studios, proseminars, and urban ecology and technology workshops complemented by interdisciplinary electives.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
<b>Studio</b>		
SUEN 7130	Master's Research Studio: Design and the Resilient City	6
SUEN 7140	Master's Research Studio: Master's Project	6
<b>Proseminar</b>		
Complete 8 semester hours from the following (repeatable) courses:		8
SUEN 7320	Pro-Seminar: Issues in Designed Urban Environments	
SUEN 6340	Topics in Urban Environmental Design

**Sustainable Urban Environments, MDes—Two-Year Program**

The two-year Master of Design for Sustainable Urban Environments (MDes-SUEN) is open to students entering with a bachelor's degree in any field. The 64-credit program provides a full year of core skill sets including design; site analysis, implementation, and visualization; history/theory; and policy. This includes introduction to basic earthworks, water, and plants systems as well as the principles of landscape and urban ecology.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Core Requirements**

## Art + Design

Website (<https://camd.northeastern.edu/graduate-overview/>)

### **Dietmar Offenhuber, PhD**

Chair

### **Julia Hechtman, MFA**

Associate Chair

617.373.4340

The graduate programs in the Department of Art + Design are designed to cultivate capacity and fluency in a range of disciplines and practices to create and deliver value and benefit for an increasingly connected and diverse world. Spanning many subjects, interests, and intentions across disparate fields and manifold practices of art, media, and design, our master's and certificate programs will challenge and inspire you to push the boundaries of cultural production and stewardship and social and civic impact. We strive to empower you to bring your ideas to life through design conversations, media making, and artistic expression and enjoy richly rewarding careers and lives.

- Game Science (p. 139)
- Information Design and Visualization (p. 140)

## Experience Design, MFA

The Master of Fine Arts in Experience Design embraces research-driven design thinking for entrepreneurship, innovation, and other areas, preparing students to be vital contributors and leaders at the intersection of innovation and design.

Experience design is a holistic and integrative approach to design that utilizes investigation into the human experience in specific situations to improve its quality, given an understanding of human goals, needs, and desires. For example, in the context of healthcare, an experience designer does not focus on the design of any one technology product, information system, or physical space. Instead, the designer is charged with understanding and improving the overall sequence of events that impact the patient before and during a hospital stay as well as through follow-up care.

The experience design program moves beyond design thinking to produce outcomes that demonstrate the value of human-centered research and design methods. It draws on findings from a range of professional and scholarly disciplines (including business, psychology, human-computer interaction, engineering, cybernetics) to understand and shape specific situations. It extends across many industries and aspects of life: healthcare, technology, services, travel, education, entertainment, shopping, dining, and the nature of work itself.

Through examining how people behave in a real context in relation to emerging technologies, the Master of Fine Arts in Experience Design allows graduates from design and related disciplines (such as communications, computer science, business, architecture, art, journalism, humanities, and the social sciences) to gain knowledge and experience in the design competencies. To accomplish these goals, students study how to invoke cooperation, collaboration, and integration across disciplines and practices.

The Master of Fine Arts in Experience Design seeks to prepare students to be vital contributors and leaders of professional experience design teams where technological innovation intersects with design. Successful graduates should be able to analyze how people undergo real-world situations, enabling them to enrich experience by orchestrating new design-driven relationships. They will be equipped with the skills to identify shortcomings as well as opportunities for improved engagement between systems and elements—virtual or physical—with the humans who encounter them.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
<b>Required Core</b>		
ARTG 5120	Research Methods for Design	4
ARTG 5600	Experience Design Studio 1: Principles	4
ARTG 5610	Design Systems	4
ARTG 5620	Notational Systems for Experience	4
ARTG 5640	Prototyping for Experience Design	4
ARTG 6310	Design for Behavior and Experience	4
ARTG 6600	Experience Design Studio 2: Group and Interpersonal	4
ARTG 6700	Design Studio 3: Synthesis	4

## Information Design and Data Visualization, MFA

The Master of Fine Arts in Information Design and Data Visualization program uniquely combines design training and analytical methods with distinctive approaches to theoretical, visual, and technical aspects of visual communication. Successful graduates gain expertise in the visual and technological languages of data, applying modes of visual cognition, and using analytics tools to create interactive, data-driven communication and installations.

This design-centric program seeks to prepare graduates to collaborate across a variety of fields and settings, crossing the bridge between technology, public communication, and systems design. Successful graduates are prepared to be professional information designers and data visualization experts in design agencies, research institutions, industry, and public institutions, able to lead and collaborate in this dynamic and burgeoning interdisciplinary field of practice and research. Students also are well positioned to pursue PhDs and academic careers. Students have the unique advantage of studying at a major research university known for interdisciplinary collaboration located in Boston—a global center for technology, science, education, and culture—offering diverse opportunities for practice and research in information design and data visualization.

The MFA-IDDV curriculum includes studio courses and seminars in graphic, information, and interaction design; creative inquiry; research methodologies; data literacies; and visualization technologies. It integrates faculty instruction with visiting artists and researchers. The degree requires 60 credit hours over two academic years, with an option to engage in Northeastern's renowned co-op program. A thesis project, a written thesis, and an accompanying work exhibition in the thesis show are required.

Learn more about IDDV projects, students, and faculty at Information Design and Data Visualization (<http://northeastern.edu/visualization/>).

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Total Hours: 60

\*The second co-op must be a research-oriented co-op related to the thesis after completion of Design Studio 3: Synthesis (ARTG 6700) with the permission of the program coordinator.

## Experience Design, MS

The Master of Science in Experience Design embraces research-driven design thinking for entrepreneurship, innovation, and other areas, preparing students to be vital contributors and leaders at the intersection of innovation and design.

Experience design is a holistic and integrative approach to design that utilizes investigation into the human experience in specific situations to improve its quality, given an understanding of human goals, needs, and desires. For example, in the context of healthcare, an experience designer does not focus on the design of any one technology product, information system, or physical space. Instead, the designer is charged with understanding and improving the overall sequence of events that impact the patient before and during a hospital stay as well as through follow-up care.

The experience design program moves beyond design thinking to produce outcomes that demonstrate the value of human-centered research and design methods. It draws on findings from a range of professional and scholarly disciplines (including business, psychology, human-computer interaction, engineering, cybernetics) to understand and shape specific situations. It extends across many industries and aspects of life: healthcare, technology, services, travel, education, entertainment, shopping, dining, and the nature of work itself.

Through examining how people behave in a real context in relation to emerging technologies, the Master of Science in Experience Design allows graduates from design and related disciplines (such as communications, computer science, business, architecture, art, journalism, humanities, and the social sciences) to gain knowledge and experience in the design competencies. To accomplish these goals, students study how to invoke cooperation, collaboration, and integration across disciplines and practices.

The Master of Science in Experience Design seeks to prepare students to be vital contributors and leaders of professional experience design teams where technological innovation intersects with design. Successful graduates should be able to analyze how people undergo real-world situations, enabling them to enrich experience by orchestrating new design-driven relationships. They will be equipped with the skills to identify shortcomings as well as opportunities for improved engagement between systems and elements—virtual or physical—with the humans who encounter them.

The MS degree is intended for graduate students from related fields—media, design, communications, data science, and more—who would like to acquire competencies in experience design to complement their skills and address their professional needs. Embedded in the course offering of our Master of Fine Arts in Experience Design (p. 126) program, students in the MS program will have the opportunity to join MFA students for activities such as attending guest lectures and workshops.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
ARTG 5120	Research Methods for Design	4
ARTG 5600	Experience Design Studio 1: Principles	4
ARTG 5610	Design Systems	4
ARTG 5620	Notational Systems for Experience	4
ARTG 6310	Design for Behavior and Experience	4
ARTG 6600	Experience Design Studio 2: Group and Interpersonal	4

#### Electives

Code	Title	Hours
Complete two elective courses (4 credits each), such as these, in consultation with your advisor; multiple completions of ARTG 5000 may apply toward the elective requirement; other electives may be chosen in consultation with the program coordinator):		8

## Game Science and Design, MS

The **Master of Science (MS) in Game Science and Design** is a program that seeks to give students a comprehensive understanding of how successful game products are created in a player-centric environment. Successful graduates who wish to become professional game developers or game user research experts should be able to collaborate effectively in this dynamic and burgeoning field of practice and research. Focusing on the science of game development, students have an opportunity to learn the design and technological skills needed to build a game and develop a deep understanding of playability and analytics that makes products successful in an increasingly competitive marketplace.

The game industry has expanded to include social and mobile gaming; augmented and virtual reality; as well as games in health, education, and training. Rapid innovations are happening in player psychology, middleware, graphics and authoring tools, game mechanics, and artificial intelligence and narrative techniques. It has become an increasingly competitive space.

The selectiveness of the industry and the diversity of the skills required mean that students seeking entry need both broad and deep skills. As an emergent industry using diverse technology and collaborative practices, the game industry needs professionals with interdisciplinary skill sets who can blend knowledge about development with knowledge about evaluation methods and players' behavior and psychology.

Jointly offered by Northeastern's College of Arts, Media and Design and Khoury College of Computer Sciences (<https://www.khoury.northeastern.edu/>), the **Master of Science in Game Science and Design** is a one-of-a-kind interdisciplinary program that seeks to prepare students to meet this need by weaving together science and design. This is a two-year, 34-credit-hour program.

All admitted students will be assigned to an advisor who will help them select a pathway with a coherent set of electives depending on their career goals. The advisor will also monitor their progress through the master's degree.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
<b>Required Core</b>		
GSND 5110 and GSND 5111 and GSND 5112	Game Design and Analysis and Seminar for GSND 5110 and Recitation for GSND 5110	5

## Information Design and Data Visualization, MS

The Master of Science in Information Design and Data Visualization is a two-semester research- and analysis-oriented program focusing on visual interfaces to communicate and explore digital information. Successful graduates may become professional information designers and data visualization experts able to collaborate effectively in this dynamic and burgeoning field of practice and research, prepared to work in data-driven areas including design, technology, business, health, education, and public institutions. The curriculum is designed to train students in design principles, critical inquiry, and the analytical and creative practices needed to assume leadership roles in an evolving interdisciplinary field. Coursework focuses on the translation of data and information into visual languages and the integration of theoretical, cognitive, and technical aspects of visualizations that engage a broad range of audiences. From this master's program, students have multiple options to expand their advanced studies along diverse avenues, including adding graduate certificates in related topics such as user analytics, data analytics, experience design, and cultural entrepreneurship; engaging in co-op opportunities; and applying to proceed academically into a terminal Master of Fine Arts degree.

To learn more visit the Information Design and Data Visualization (<https://camd.northeastern.edu/program/information-design-and-visualization/>) page.

### Program Requirements

Boston-based students complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
ARTG 5100	Information Design Studio 1: Principles	4
ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	4
ARTG 5310	Visual Cognition	4
ARTG 5320	Statistics for Design	4
ARTG 5330	Visualization Technologies 1: Fundamentals	4
ARTG 6100	Information Design Studio 2: Dynamic Mapping and Models	4
ARTG 6110	Information Design Theory and Critical Thinking	4

#### Elective

Thesis (ARTG 7890) is required in lieu of an elective for Vancouver-based students in consultation with program coordinator.

Code	Title	Hours
Complete one of the following:		4
ARTG 5000	Topics in Design	
ARTG 5110	Information Design History	
ARTG 5120	Research Methods for Design

## Experience Design, Graduate Certificate

The Graduate Certificate in Experience Design embraces research-driven design thinking for entrepreneurship, innovation, and other areas, preparing students to be vital contributors and leaders at the intersection of innovation and design.

Experience design is a holistic and integrative approach to design that utilizes investigation into the human experience in specific situations to improve its quality, given an understanding of human goals, needs, and desires. For example, in the context of healthcare, an experience designer does not focus on the design of any one technology product, information system, or physical space. Instead, the designer is charged with understanding and improving the overall sequence of events that impact the patient before and during a hospital stay as well as through follow-up care.

The Graduate Certificate in Experience Design moves beyond design thinking to produce outcomes that demonstrate the value of human-centered research and design methods. It draws on findings from a range of professional and scholarly disciplines (including business, psychology, human-computer interaction, engineering, cybernetics) to understand and shape specific situations. It extends across many industries and aspects of life: healthcare, technology, services, travel, education, entertainment, shopping, dining, and the nature of work itself.

Through examining how people behave in a *real* context in relation to emerging technologies, the Graduate Certificate in Experience Design allows working professionals or graduates from design and related disciplines (such as communications, computer science, business, architecture, art, journalism, humanities, and the social sciences) to gain knowledge and experience in the design competencies. To accomplish these goals, students need to learn how to invoke cooperation, collaboration, and integration across disciplines and practices.

The Graduate Certificate in Experience Design is designed to prepare students to be vital contributors and leaders of professional experience design teams where technological innovation intersects with design. Successful graduates will be able to analyze how people undergo real-world situations, enabling them to enrich experience by orchestrating new design-driven relationships. They will be equipped with the skills to identify shortcomings as well as opportunities for improved engagement between systems and elements—virtual or physical—with the humans who encounter them.

The certificate is intended for practitioners and graduate students from related fields—media, design, communications, data science, and more—who would like to acquire competencies in experience design to complement their skills and address their professional needs. Embedded in the course offering of our Master of Fine Arts in Experience Design (p. 126) program, students in the certificate program will have the opportunity to join MFA students for activities such as attending guest lectures and workshops.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
ARTG 5610	Design Systems	4
ARTG 5620	Notational Systems for Experience	4
ARTG 6310	Design for Behavior and Experience	4

ARTG		

### Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

## Game Experience Design, Graduate Certificate

The Graduate Certificate in Game Experience Design offers training in the skills, tools, and methods needed to design successful game products, including social and mobile gaming; augmented and virtual reality; as well as games for health, education, and science. Students gain hands-on experience in designing games under faculty with industry expertise in game design. Game design courses focus on innovation; societal impact; and player-centric, experiential design approaches. The Graduate Certificate in Game Experience Design is a one-year, 17-semester-hour program. Upon successful completion of the certificate, students can opt to apply to the Master of Science in Game Science and Design and, if accepted, transfer credits gained through the certificate.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Required Courses

Code	Title	Hours
GSND 5110 and GSND 5111 and GSND 5112	Game Design and Analysis and Seminar for GSND 5110 and Recitation for GSND 5110	5
GSND 5130	Mixed Research Methods for Games	4

#### Electives

Code	Title	Hours
Complete 8 semester hours from the following (multiple completions of ARTG 5000 or GSND 6000 may apply to the elective requirement):		8
ARTG 5000	Topics in Design	
ARTG 5640	Prototyping for Experience Design	
GSND 6000	Advanced Topics in Game Design	
GSND 6240	Exploratory Concept Design	
GSND 6250	Spatial and Temporal Design	
GSND 6460	Generative Game Design	

#### Program Credit/GPA Requirements

17 total semester hours required  
Minimum 3.000 GPA required

## Game Science, Graduate Certificate

The Graduate Certificate in Game Science offers training in assessing, tracking, and analyzing player experience using game analytics methods and techniques, biometrics, and research methods including interviews and surveys. Students gain hands-on experience with these methods and techniques under faculty guidance with industry experts in game science. The game development process has shifted from “design, develop, release” to “design, develop, release, and continuously fine-tune based on user data.” Game science plays a critical role in this new process. The Graduate Certificate in Game Science is a one-year, 17-semester-hour program. Upon successful completion of the certificate, students can opt to apply to the Master of Science in Game Science and Design and, if accepted, transfer credits gained through the certificate.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Required Courses

Code	Title	Hours
GSND 5110 and GSND 5111 and GSND 5112	Game Design and Analysis and Seminar for GSND 5110 and Recitation for GSND 5110	5
GSND 5130	Mixed Research Methods for Games	4

#### Electives

Code	Title	Hours
Complete two of the following (multiple completions of ARTG 5000 or GSND 6001 may apply toward the elective requirement):		8
ARTG 5000	Topics in Design	
GSND 6001	Advanced Topics in Game Science	
GSND 6320	Psychology of Play	
GSND 6340	Biometrics for Design	
GSND 6350	Data-Driven Player Modeling	

### Program Credit/GPA Requirements

17 total semester hours required

Minimum 3.000 GPA required

## Information Design and Visualization, Graduate Certificate

The Graduate Certificate in Information Design and Visualization focuses on the data-driven analytical and visual design of information, preparing students to communicate visually while engaging advanced data analytics to produce meaningful information environments.

Successful graduates of the Certificate in Information Design and Visualization are professionals who are prepared to tackle new information communication challenges and communicate and collaborate with researchers in a variety of fields, as well as stakeholders and the public.

Throughout the course of the certificate, students master how to think visually, while also learning how to produce effective, meaningful visual information from various sources of data.

The certificate is intended for practitioners and graduate students from related fields—media, design, communications, data science, and more—who would like to acquire competencies in information design and data visualization to complement their skills and address their professional needs.

Embedded in the course offering of our Master of Fine Arts in Information Design and Visualization (p. 128) program, students in the certificate program have the opportunity to join MFA students for activities such as attending guest lectures and workshops.

To learn more, visit the Information Design and Visualization (<https://camd.northeastern.edu/visualization/>) portal.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
ARTG 5130	Visual Communication for Information Design	4
ARTG 5330	Visualization Technologies 1: Fundamentals	4

#### Electives

Code	Title	Hours
Complete two of the following (multiple completions of ARTG 5000 may apply toward the elective requirement):		8
ARTG 5000	Topics in Design	
ARTG 5100	Information Design Studio 1: Principles	
ARTG 5110	Information Design History	
ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	
ARTG 5310	Visual Cognition	
ARTG 5320	Statistics for Design	
ARTG 5430	Visualization Technologies 2: Advanced Practices	
ARTG 5710	Design for Dignity	
ARTG 6100	Information Design Studio 2: Dynamic Mapping and Models	
ARTG 6310	Design for Behavior and Experience	
ARTG 6330	Information Design Mapping Strategies	
ARTG 6555	Graphic Design Synthesis	
ARTG 6900	Special Topics in Design	
ARTG 5000 or 6000 level course		

### Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

## School of Journalism

Website (<http://www.northeastern.edu/camd/journalism/>)

### **Jonathan Kaufman, MA**

Professor and Director

617.373.3236

Welcome to the graduate programs at Northeastern University's School of Journalism. Our school offers three degrees: a Master of Arts in Journalism, a Master of Science in Media Innovation and Data Communication, and a Master of Science in Media Advocacy.

The Master of Arts in Journalism degree is designed to merge traditional journalism with the latest technology. Students new to the field or those with experience can choose one of two tracks—professional journalism or media innovation—to prepare them for the challenges faced by legacy and new media in the digital age. The Master of Science in Media Innovation and Data Communication degree focuses on new forms of data-driven media practice, creative digital storytelling, and strategies for fostering innovation in media fields. The Master of Science in Media Advocacy degree is designed to teach strategic advocacy skills and prepare graduates to succeed as resilient, media-empowered citizens in a global society. Moreover, these programs offer students hands-on training in preparation for careers in reporting, editing, multimedia design and production, social media, and data journalism.

As part of Northeastern's College of Arts, Media and Design, our graduate students are also part of an interdisciplinary and creative community. Our core curriculum is supplemented by electives that take advantage of course offerings from within our college and from other colleges in the university. And with our experiential education opportunities and outstanding co-op program, students do not have to wait until after graduation to begin developing skills as reporters, media advocates, or public relations professionals.

It is our goal to help you put your passion into practice. To that end, our graduate programs afford students the opportunity to study in Boston with a small and dedicated faculty of specialists with years of experience and extensive contacts in the media world.

## **Programs**

### **Master of Arts (MA)**

- Journalism (p. 142)

### **Master of Science (MS)**

- Media Advocacy (p. 143)
- Media Innovation and Data Communication (p. 144)

## Journalism, MA

The School of Journalism offers a dynamic Master of Arts degree that seeks to prepare students for the challenges faced by media organizations in the digital age. The degree trains students to become rigorous, ethical, and creative news reporters, editors, and content producers, as well as social media managers and video/audio specialists.

Both students new to the field and those with some experience can choose courses tailored to help them thrive in particular subject areas, such as criminal justice or climate change, or around specific technologies, such as podcasting or data visualization. Our programs are designed to merge the skills of professional journalism with knowledge of the latest information technologies.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
JRNL 6200	Enterprise Reporting 1	4
JRNL 6201	Enterprise Reporting 2	4
JRNL 6202	Perspective on Journalism Ethics	4
JRNL 6340	Fundamentals of Digital Journalism	4

#### Electives

Code	Title	Hours
Complete 20 semester hours in the following range:		20
JRNL 5309 to JRNL 7976		

Courses from other disciplines may be taken in consultation with your faculty advisor.

No more than two courses outside of CAMD may be taken.

#### Program Credit/GPA Requirements

36 total semester hours required

Minimum 3.000 GPA required

#### Plan of Study

##### Sample Plan of Study: Two Years with Co-op in Summer 2

Year 1							
Fall	Hours	Spring	Hours	Summer 1	Hours	Summer 2	Hours
JRNL 6100	1	JRNL 6201	4	Vacation	0	Co-op	0
JRNL 6200	4	JRNL 6202	4				
JRNL 6340	4	Elective 2	4				
Elective 1	4						
		<b>13</b>	<b>12</b>			<b>0</b>	<b>0</b>
Year 2							
Fall	Hours	Spring	Hours				
Co-op	0	Elective 3	4				
		Elective 4	4				
		Elective 5	4				
		<b>0</b>	<b>12</b>				

**Total Hours: 37**

**Media Advocacy, MS**

The Master of Science in Media Advocacy places particular focus on developing direct and indirect advocacy skills: that is, to influence government decision makers directly and to change minds indirectly through shifting public opinion. The program uniquely combines grounding in governmental structures and the legal system with sophisticated training in the latest communication techniques including social media, web communications, and videography, as well as data analytics and data-driven storytelling. Successful graduates will be empowered to promote the public agenda of employers ranging from mission-driven organizations, such as the ACLU or the Sierra Club, to industry leaders, such as hospitals and technology companies, to lobbying and strategic communications groups and political consulting firms.

**Program Requirements**

**Core Requirements**

Code	Title	Hours
JRNL 5400	Media and Advocacy in Theory and Practice	4
JRNL 5480	Research for Media Strategy	4
LW 6400	Law, Policy and Legal Argument	4
LW 7667	Law and Ethics of Advocacy	3

**Electives**

Code	Title	Hours
A minimum of 17 credits of electives is required. No more than 8 semester hours can be taken outside of the College of Arts, Media, and Design or the School of Law.		17

Complete a minimum of 4 semester hours of coursework from the College of Arts, Media, and Design. Choose from recommended focus areas of JRNL, ARTD, ARTG, COMM, and INAM (additional areas may be chosen in consultation with your adviser).

Complete a minimum of 5 semester hours of coursework from the School of Law.

**Program Credit/GPA Requirements**

32 total semester hours required  
 Minimum 3.000 GPA required

**Plan of Study**

**Sample One-and-a-Half Years with No Co-op**

Year 1

Elective 6	3-4							
		<b>12-15</b>						

**Total Hours: 33-39**

## Media Innovation and Data Communication, MS

The Master of Science will offer a distinctive approach to knowledge and innovation in media fields, an approach rooted in the rigor of professional journalism—with its emphasis on empowered knowledge acquisition, empirical verification, and storytelling in the public interest—but one keenly attuned to emerging, data-driven technologies and their potential. The program capitalizes on the revolution in data storytelling and computational methods in media work; the rapid evolution in video, animation, and augmented/virtual reality technologies; and social networks and digital analytics. Our graduates will be prepared to become leaders in media firms and outlets engaged with cutting-edge technologies and innovative digital startups, as well as a broad range of media and communications organizations across the rapidly evolving digital economy.

### Program Requirements

## Interdisciplinary Programs

Welcome to interdisciplinary graduate studies in the College of Arts, Media and Design. Here you'll find courses and programs that embrace shared dialogue and experiential learning across creative fields. These interdisciplinary doctoral programs, master's programs, and graduate certificates place collaboration at the core of their mission, integrating frameworks, methods, and practices to support students in developing truly innovative approaches and outcomes. Our interdisciplinary degree and certificate options provide a strong foundation of use-inspired, experientially informed coursework and research opportunities.

The PhD in Interdisciplinary Design and Media offers an innovative, globally aware, human-centered approach to advanced graduate study, focusing on practice-based research and scholarship applied to or conducted through making or creation.

The Master of Science in Creative Practice Leadership program brings together faculty, scholars, and practitioners across the performing arts, fine arts, and design fields to work with students to explore new forms of practice and leadership within contemporary culture. Students engage in a shared core, then develop a customized course of study, allowing focus on a breadth of issues.

The Master of Science in Arts Administration and Cultural Entrepreneurship and graduate certificate programs give students foundational to advanced training in the skills and techniques essential to leading arts and culture organizations today, combining the human literacies of collaboration and communication with the technical basis of arts organizational visioning, planning, and sustainable management.

The Master of Science in Urban Planning and Policy program is jointly offered between the college's School of Architecture and the School of Public Policy and Urban Affairs within the College of Social Sciences and Humanities. The curriculum provides a strong foundational knowledge base and allows specialization into the closely related areas of sustainable urban planning and contemporary approaches to urban policy for global cities.

### Programs

#### Doctor of Philosophy (PhD)

- Interdisciplinary Design and Media (p. 147)

#### Master of Science (MS)

- Arts Administration and Cultural Entrepreneurship (p. 152)
- Creative Practice Leadership (p. 156)
- Extended Realities
- Urban Planning and Policy (p. 163)

#### Graduate Certificate

- Arts Administration (p. 167)
- Cultural Entrepreneurship (p. 168)

## Interdisciplinary Design and Media, PhD

The PhD provides a rigorous, globally aware, practice-based, and human-centered approach to advanced scholarship. It aims to cultivate researcher-designers with a versatile repertoire of methods and a passion for applying those skills to the emerging epistemic perspective of integrated human, technological, and data frameworks within creative collaboration across disciplinary boundaries. The degree is designed to attract entrepreneurial self-starters who seek to break ground and invent new fields through hybrid and integrated approaches to knowledge creation.

The PhD emphasizes four pillars of excellence within a research culture:

- Engaging with the nature of human experience through innovative, interdisciplinary approaches to design
- Investigating new forms of digital media and data-driven communication across diverse disciplines
- Articulating how creativity can embrace connections between artistic practices, innovation, entrepreneurship, and research
- Connecting with changing forms of technology and media to foster shared experiences and exchange within local and global communities

The PhD is unique in its focus on practice-based research or scholarship applied to or conducted through making or creation. This is an emerging area that has been applied internationally to a wide range of creative fields and industries, many of which are represented within the College of Arts, Media and Design: music, theatre, design, studio art, games, architecture, journalism, and others. It differs from other forms of knowledge creation in that it rigorously cultivates the creation of artifacts as a mode of producing new knowledge, theories, and methodologies. Practice-based research integrates fields such as creativity and cognition or human-computer interaction to understand how practice operates, to enact that knowledge in practical applications, and to use the acts of creation themselves as a research methodology. PhD students will be encouraged to conduct their research in—and in some cases create—“living labs” embedded in real-world contexts and through on- and off-campus research partnerships.

The PhD degree program is composed of a common core and pathways of specialization. The core is centered around three areas: design research, which provides a methodology for understanding the ways design and media touch every aspect of daily life at every level of society; ethical practice, which engages with the humanistic concerns of design and cultural production; and experiential learning, which offers students the opportunity to produce research and conduct fieldwork with partner organizations.

Specialized pathways, customized according to the program of study as approved by the PhD advisors and vetted by external experts, include:

- Information design and visualization
- Design research
- Creative research

### Degree Requirements

#### POSTBACCALAUREATE ENTRY

The PhD degree requires completion of at least 48 semester credit hours beyond a bachelor's degree. Students who enter with an undergraduate degree will typically need five years to complete the program.

#### ADVANCED ENTRY

Students can petition for an advanced entry, which requires completion of at least 28 semester hours. Advanced entry requires an advanced degree (MS, MA, MFA, etc.) or extensive experience aligned with the research direction of the candidate. While students can qualify for advanced entry upon acceptance, the decision for students to continue in the advanced program is made after the first year, where they have to demonstrate that they do not need additional coursework and can complete the program in four years.

### Qualifying Examination

The qualifying exam is a written and/or oral examination in the primary and secondary research fields that ensures the student is intimately familiar with the relevant scholarly work in their area of concentration. The pedagogical role is not in the examination itself but in the rigorous preparation of the primary and secondary fields by the student, approved by the advisor. Prior to the qualifying exam, the student prepares a document that outlines the selected primary and secondary fields, provides an overview of the current state of research, and assembles a list of relevant literature that will serve as the basis for the examination. The emphasis of the examination (for example, short essays, a lecture presenting a scholarly argument) is to be useful for the dissertation research. Typically, the student takes the qualifying examination during the second year.

### Dissertation Proposal Defense

To ensure students complete satisfactory dissertations that are appropriate for their focus area(s), all students are required to submit and defend a dissertation proposal prior to advancing to candidacy. The dissertation proposal is a detailed document outlining the scholarly context, methods, arguments, and activities underpinning the dissertation. It will include a detailed research plan and timeline and is to be approved by the student's dissertation committee, which the student has to assemble in advance. The student then defends the accepted dissertation proposal in the context of the research seminar, inviting feedback from faculty and other students. The dissertation proposal defense is open to the entire CAMD PhD community and constitutes the last step before degree candidacy.

### Degree Candidacy

A student is considered a PhD degree candidate after:

- Successfully completing core and specialization courses with a minimum of a 3.000 cumulative GPA and no grades lower than a B in core courses
- Passing the qualifying exam
- Submitting and successfully defending the dissertation proposal

## Advising and Committee Formation

Each entering student will be assigned to a faculty advisor based on their interests who will guide students in completing their core requirements of their degree. Ideally, this person will also serve as their thesis committee chair, but they may transition to another committee chair as they transition into ABD status. As part of this process, in addition to their thesis committee chair, they will also be expected to identify two other readers representing their secondary and, if applicable, tertiary discipline areas. The advisory committee will be responsible for guiding the students through their individual research proposal process, helping them to develop a robust research methodology and clear plan for completion. The advisory committee will also be responsible for identifying an appropriate external expert to consult at key stages of degree progression. The advisors will also guide the students through the thesis project and its written component. Where applicable, committee members will also mentor and support the student through funded research.

## Dissertation Defense

Each student will, with the aid of their advisor and committee, define the final product. The research component will typically consist of empirical and/or theoretical scholarship created using a methodology appropriate for the topic and field that is fully integrated with the practice component. The synergy between creative practice and research can take the form of knowledge production through a variety of potential means: production of digital and physical artifacts, software and hardware applications, games, paintings, documentaries, comics, exhibitions, design projects or products, theatrical productions, musical compositions, performances, or other formats. The work will include a written dissertation that can also be paired with other modes of conveyance, such as a documentary, demonstration, performance, or exhibition. A key function of the dissertation will be to contextualize the practical work in contemporary scholarship and discourse, clearly articulating its rationale and contribution to the field. Over the course of their studies, students are expected to produce peer-reviewed submissions based on their work.

The dissertation defense follows a similar format to the proposal defense. Acceptable dissertation models may include long-form (book-style) dissertations, multiple publishable papers, a system build-evaluate model, or other creative formats enumerated above.

## Arts Administration and Cultural Entrepreneurship, MS

The arts and cultural industries are key drivers of each nation's economy, contributing more than \$730 billion annually in the United States alone. While the economic impact of the arts and cultural industries can be measured, their social impacts are often underestimated. Music, dance, visual art, and theatre are critical to how we perceive, interpret, and critique the world and people around us. The arts articulate our beliefs, politics, familial and community ties, and history.

Arts administrators are the bridge between creative practitioners and audiences and between arts institutions and supportive stakeholders. In today's digitally driven, highly competitive, and increasingly global economy, traditional institutions for visual and performing arts face critical sustainability challenges. Leaders in the arts must adopt the creative thinking and problem-solving skills of an entrepreneur in order to envision new models for creative practice, audience engagement, and funding.

The interdisciplinary Master of Science in Arts Administration and Cultural Entrepreneurship (AACE) prepares arts leaders to both convey the human necessity of creative expression and apply creative thinking to manage resources, inspire audience engagement, and sustain financial support. The arts, and audience opportunities to experience them, are more dynamic and diverse than ever before, flourishing in major arts institutions as well as nonhierarchical organizations, from artist-run spaces and community organizations to annual festivals and pop-up exhibitions. It is time for a transformation in leadership training that matches the ingenuity of today's most exciting experiments in music, dance, theatre, and the visual arts. Arts leaders must also be equipped with the administrative, analytical, and technological skill sets necessary to excel within the complex, interdependent arts ecosystem.

The AACE curriculum is designed to meet the changing needs of arts leaders, from administrators in arts institutions to creative practitioners and entrepreneurs eager to make their art startup a reality. The program focuses on leadership innovation in a range of performance, visual arts, and cultural organizations. As an intellectual and practical course of study that merges the expertise of academics, creative professionals, administrators, and entrepreneurs, the program's aim is to support sustainable creative practice.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
<b>Arts Administration Foundation</b>		
AACE 6000	Arts and Culture Organizational Leadership	3
AACE 6010	Planning for Arts and Cultural Organizations	3
AACE 6020	Experiential Study in Arts Administration	3
<b>Cultural Entrepreneurship Foundation</b>		
AACE 6200	Programming and Community Engagement for Cultural Entrepreneurs	3
AACE 6210	Building Value Through Cultural Enterprise	3
AACE 6300	Fundraising in the Arts	3

#### Electives

Code	Title	Hours
<b>Arts Administration Directed Elective</b>		
Complete one of the following:		3
AACE 6110	Information Technology for Arts and Cultural Organizations	
AACE 6120	Advocacy and the Arts	
<b>Cultural Entrepreneurship Directed Elective</b>		
Complete one of the following:		3
AACE 6220	Innovative Approaches to Audience Engagement	
ENR 6210	Managing Operations in Early Stage Ventures	
ENR 6212	Business Planning for New Ventures	
ENR 6214	Social Enterprise	
ENR 6216	Global Social Entrepreneurship and Innovation	
ENR 6218	Business Model Design and Innovation	
ENR 6240	Emerging and Disruptive Technologies	
ENR 6250	Lean Design and Development	

#### Experiential Electives in Arts Leadership

Complete two of the following courses not taken to fulfill the above requirements:		6
AACE 6110	Information Technology for Arts and Cultural Organizations	

AACE 6120	Advocacy and the Arts
AACE 6220	Innovative Approaches to Audience Engagement

## Creative Collaboration and Multidisciplinary Design, MS

### Overview

The Master of Science in Creative Collaboration and Multidisciplinary Design is an executive education degree rooted in the creative process as the main driver for adaptive thinking, dynamic communication, and empowering collaboration. In today's highly networked organizational structures, current and future leaders will need the skills to navigate the creative process, respond to shifting landscapes with agility, and articulate their vision through multiple modalities in ways that inspire, connect, and call others to action. This highly interactive, experiential degree will provide students with a combination of design skills and creativity techniques in a project-based learning environment to foster innovative leadership and empower communication. Graduates will leave with a flexible toolkit to nurture their individual creativity, adaptability in the face of rapid change, and skills to become well-rounded strategists and communicators.

### Program Requirements

#### Program Requirements

Code	Title	Hours
<b>Foundation</b>		
INAM 5300	Principles of Design	2
INAM 5305	User Observation and Design Planning	2
INAM 5310	Principles of Creative Collaboration	2
<b>Seminars</b>		
INAM 5507	Foundations of Data Visualization	1
INAM 5508	Visual Data Encodings	1
<b>Experiential</b>		
INAM 5400	Facilitating Creative Collaboration	2
INAM 5405	The Agile Mindset and Design-Led Innovation	2
INAM 5410	Persuasion and the Power of Storytelling	2
<b>Studio</b>		
INAM 5415	Design Studio: Fundamentals of Iterative Prototyping	2
<b>Capstone</b>		
INAM 6900	Interdisciplinary Capstone	4

### Electives

Code	Title	Hours
Complete 12 semester hours of electives from one of the ranges below (or in consultation with your graduate advisor):		12
INAM 5300 to INAM 5349		
INAM 5400 to INAM 5449		
INAM 5500 to INAM 5549

## Creative Practice Leadership, MS

Admissions to this program have been suspended.

Website (<https://camd.northeastern.edu/program/creative-practice-leadership/>)

Through a series of four transdisciplinary core courses and four discipline-weighted, student-selected electives in the performing and visual arts, the MS Creative Practice Leadership offers a two-semester, intensive, Masters-level program of training in and exploration of new approaches to leadership in the fields of critical creative practice, cultural entrepreneurship, and innovation in the arts and entertainment industries. Grounded in a broadly interdisciplinary approach, the goal is to enable administrators and practitioners in the creative professions to become transformational leaders and change agents for a rapidly evolving cultural environment.

The MS Creative Practice Leadership engages administration, curation, advocacy and other forms of cultural communication and intermediation from the point of view that creative practice leadership must become more than an outwardly successful business or administrative exercise; rather, such leadership must re-examine past assumptions about, and envision new parameters for how, success is defined. The ethos underlying the design of courses in this program is that leadership in the arts and creative industries brings a responsibility to the progress, vitality and sustainability of the world that those creative enterprises seek to embrace, a responsibility that requires critical thinking and deeply thoughtful exploration, along with the skills necessary for implementation.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
INAM 6100	Critical Foundations of Creative Practice	4
INAM 6200	Topics in Communication Strategies	4
INAM 6210	Projects in Interdisciplinary Creative Practice	4
INAM 6300	Models for Applied Inquiry in Creative Practice	4

#### Electives

Code	Title	Hours
Complete 16 semester hours in the following subject areas in consultation with your advisor.		16
AACE, ARTG, ARTH, COMM, INAM, JRNL, MUSI, THTR, 5000 level or above

## Extended Realities, MS

### Overview

The Master of Science in Extended Realities seeks to open the new technologies, methods, practices, and skills of extended realities (XR) to students. XR includes augmented, virtual, and mixed reality. XR technologies have seen explosive growth over the last decade of mixed reality.

This program is structured to allow students flexibility and specialization to choose a path that matches their interest. Students have the opportunity to focus on a single concentration area or a mix of course electives depending upon their professional background and aspirations. The College of Arts, Media and Design partners closely with Bouvé College of Health Sciences, the College of Engineering, the D'Amore McKim School of Business, and Khoury College of Computer Sciences to offer additional concentrations that provide breadth and depth of knowledge.

The Master of Science in Extended Realities welcomes students from a diverse range of backgrounds because of the applications of XR technology used in many disciplines and industries, including medicine, business, entertainment, architecture, and journalism.

Some concentrations may require a technical background and are noted in the requirements.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Extended Reality Core

Code	Title	Hours
<b>Required Courses</b>		
EXRE 5010 and EXRE 5011	Immersive Media: Extended Realities (XR) History, Theory, and Impact and Seminar for EXRE 5010	5
EXRE 5020	Developing Extended Realities (XR)	4
EXRE 5030	Designing Extended Realities (XR)	4
EXRE 6500	Extended Realities (XR) Studio	4
EXRE 7500 or EXRE 7990	Extended Realities (XR) Project Thesis	4
GSND 5122	Business Models in the Game Industry	1

#### Extended Reality Concentration Options

Complete one of the following options:

- Artificial Intelligence (p. 158)
- Data Visualization (p. 159)
- Entrepreneurship (p. 159)
- Experience Design (p. 159)
- Game Design (p. 159)
- Game Science (p. 160)
- Human Computer Interaction (p. 160)
- Human Movement Science (p. 160)
- Information Ethics (p. 160)
- Marketing (p. 161)
- Media Innovation and Advocacy (p. 161)
- Public History (p. 161)
- Wireless Networking (p. 161)
- XR Design (p. 162)
- XR Development (p. 162)

#### Program Credit/GPA Requirements

34 total semester hours required. Some concentrations may require more than 34 semester hours to complete.

Minimum 3.000 GPA required

#### ARTIFICIAL INTELLIGENCE CONCENTRATION

Code	Title	Hours
Requires a background in computer science.		
Complete three of the following:		12

CS 5097	Mixed Reality	
CS 5100	Foundations of Artificial Intelligence	
CS 6120	Natural Language Processing	
CS 6140	Machine Learning	

**DATA VISUALIZATION CONCENTRATION**

Code	Title	Hours
<b>Required Courses</b>		
ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	4
ARTG 5330	Visualization Technologies 1: Fundamentals	4
<b>Electives</b>		
Complete 4 semester hours from the following:		4
ARTG 5310	Visual Cognition	
ARTG 6110	Information Design Theory and Critical Thinking	
ARTG 6330	Information Design Mapping Strategies	

**ENTREPRENEURSHIP CONCENTRATION**

Code	Title	Hours
<b>Required Courses</b>		
INNO 6200	Enterprise Growth and Innovation	3
<b>Electives</b>		
Complete 9 semester hours from the following:		9
ENTR 6210	Managing Operations in Early Stage Ventures	
ENTR 6212	Business Planning for New Ventures	
ENTR 6214	Social Enterprise	
ENTR 6218	Business Model Design and Innovation	
ENTR 6240	Emerging and Disruptive Technologies	
ENTR 6241	Entrepreneurial Marketing and Selling	
ENTR 6250	Lean Design and Development	
ENTR 6300	Managing a Technology-Based Business	
GE 5030	Iterative Product Prototyping for Engineers	
INNO 6230	Platform Innovation	
MKTG 6214	New Product Development	

**EXPERIENCE DESIGN CONCENTRATION**

Code	Title	Hours
<b>Required Courses</b>		
ARTG 5610	Design Systems	4
ARTG 6310	Design for Behavior and Experience	4
<b>Electives</b>		
Complete 4 semester hours from the following:		4
ARTG 5600	Experience Design Studio 1: Principles	
ARTG 5620	Notational Systems for Experience	
ARTG 5640	Prototyping for Experience Design	

**GAME DESIGN CONCENTRATION**

Code	Title	Hours
<b>Required Courses</b>		
GSND 5110 and GSND 5111 and GSND 5112	Game Design and Analysis and Seminar for GSND 5110 and Recitation for GSND 5110	5
<b>Electives</b>		
Complete 8 semester hours from the following:		8
GSND 6000	Advanced Topics in Game Design	

GSND 6240	Exploratory Concept Design	
GSND 6250	Spatial and Temporal Design	

**GAME SCIENCE CONCENTRATION**

Code	Title	Hours
<b>Required Courses</b>		
GSND 5110 and GSND 5111 and GSND 5112	Game Design and Analysis and Seminar for GSND 5110 and Recitation for GSND 5110	5
<b>Electives</b>		
Complete at least 8 semester hours from the following:		8
GSND 6001	Advanced Topics in Game Science	
GSND 6330 and GSND 6331	Player Experience and Recitation for GSND 6330	
GSND 6340	Biometrics for Design	
GSND 6350	Data-Driven Player Modeling	

**HUMAN COMPUTER INTERACTION CONCENTRATION**

Code	Title	Hours
<b>Required Courses</b>		
CS 5340	Computer/Human Interaction	4
<b>Electives</b>		
Complete 8 semester hours from the following:		8
ARTG 5710	Design for Dignity	
CS 5097	Mixed Reality	
CS 5170	Artificial Intelligence for Human-Computer Interaction	
CS 6350	Empirical Research Methods	
CS 7390	Special Topics in Human-Centered Computing	
GSND 6340	Biometrics for Design	

**HUMAN MOVEMENT SCIENCE CONCENTRATION**

Code	Title	Hours
<b>Required Courses</b>		
PT 7001	Core Concepts in Rehabilitation Science and Research	3
PT 7005	Experimental Design and Applied Statistics	4
<b>Electives</b>		
Complete 7–8 semester hours from the following:		7-8
PT 5133	Kinesiology	
PT 5150	Motor Control, Development, and Learning	
PT 5321	Applications of Biomechanics in Human Function and Movement	
PT 5410	Functional Human Neuroanatomy	
PT 7010	Measurement and Analysis of Human Movement and Bioinstrumentation	
PT 7020	Technologies in Movement and Rehabilitation Science	

**INFORMATION ETHICS CONCENTRATION**

Code	Title	Hours
<b>Required Courses</b>		
Complete two of the following:		8
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
PHIL 5005	Information Ethics	
PHIL 5010	AI Ethics	
<b>Elective</b>		
Complete one of the following:		4
PHIL 5001	Global Justice	
PHIL 5005	Information Ethics	
PHIL 5010	AI Ethics	

**MARKETING CONCENTRATION**

Code	Title	Hours
<b>Required Courses</b>		
MKTG 6200	Creating and Sustaining Customer Markets	3
<b>Electives</b>		
Complete 9 semester hours from the following:		9
MKTG 6210	Marketing Research	
MKTG 6212	International Marketing	
MKTG 6214	New Product Development	
MKTG 6216	Market Focused Strategy	
MKTG 6218	Managing Customer Engagement in a Service World	
MKTG 6222	Digital Marketing	
MKTG 6223	Brand and Advertising Management	
MKTG 6224	B2B and Strategic Sales	
MKTG 6226	Consumer Behavior	
MKTG 6230	Driving Marketing Performance: Measure, Analyze, Profit	
MKTG 6234	Marketing Analytics	

**MEDIA INNOVATION AND ADVOCACY CONCENTRATION**

Code	Title	Hours
<b>Required Courses</b>		
JRNL 5400	Media and Advocacy in Theory and Practice	4
JRNL 6340	Fundamentals of Digital Journalism	4
<b>Elective</b>		
Complete one of the following:		4-5
ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	
JRNL 5311	Design for Storytelling	
JRNL 6305	Topics (and optional ARTG 5151)	
JRNL 6341	Telling Your Story with Data	

**PUBLIC HISTORY CONCENTRATION**

Code	Title	Hours
<b>Required Courses</b>		
HIST 5237	Issues and Methods in Public History	4
Complete the following (repeatable) course twice:		4
HIST 8410	Fieldwork in History 1 (to be taken twice)	
<b>Elective</b>		
Complete one of the following:		4
HIST 5241	Exhibits and Museums	
HIST 7219	Topics in Cultural History	
HIST 7250	Topics in Public History	

**WIRELESS NETWORKING CONCENTRATION**

Code	Title	Hours
<b>Required Courses</b>		
EECE 7374	Fundamentals of Computer Networks	4
<b>Electives</b>		
Complete 8 semester hours from the following:		8
EECE 5155	Wireless Sensor Networks and the Internet of Things	
EECE 5576	Wireless Communication Systems	
EECE 7364	Mobile and Wireless Networking	

**XR DESIGN CONCENTRATION**

Code	Title	Hours
<b>Required Courses</b>		
GSND 6520	3D Modeling and Asset Creation Principles	4
<b>Electives</b>		
Complete at least 8 semester hours from the following:		8-9
ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	
ARTG 5310	Visual Cognition	
ARTG 5610	Design Systems	
ARTG 6310	Design for Behavior and Experience	
EXRE 5973	Topics in Extended Realities (XR)	
GSND 5110 and GSND 5111 and GSND 5112	Game Design and Analysis and Seminar for GSND 5110 and Recitation for GSND 5110	
GSND 6250	Spatial and Temporal Design	
GSND 6330	Player Experience	
GSND 6340	Biometrics for Design	
GSND 6460	Generative Game Design	
JRNL 6340	Fundamentals of Digital Journalism	

**XR DEVELOPMENT CONCENTRATION**

Code	Title	Hours
<b>Required Courses</b>		
CS 5097	Mixed Reality	4
<b>Electives</b>		
Complete 8 semester hours from the following:		8
CS 5150	Game Artificial Intelligence	
CS 5170	Artificial Intelligence for Human-Computer Interaction	
CS 5310	Computer Graphics	
CS 5335	Robotic Science and Systems	
CS 5340	Computer/Human Interaction	
CS 5850	Building Game Engines	
CS 6140	Machine Learning

## Urban Planning and Policy, MS

The Master of Science in Urban Planning and Policy program trains leaders interested in building just and sustainable solutions to today's critical urban problems. Students in the program develop the theoretical and analytical tools to understand contemporary challenges of social, racial, and environmental injustice in cities and urban regions. They develop professional tools to work effectively in the realms of planning, policy, politics, and advocacy to impact urban challenges, including affordable housing provision, equitable and sustainable economic growth, sustainable transportation, and climate change adaptation and mitigation. This innovative program combines the expertise in urban planning and policy analysis data analytics of the School of Public Policy and Urban Affairs with expertise in physical planning, design, and data visualization at the School of Architecture. The core curriculum of the program provides students with a solid foundation in essential skills and concepts, including techniques of effective community engagement, research design and statistics, economic analysis, legal foundations of urban planning and policy, and the history of urban development and urban planning. Students also have the opportunity to develop substantial expertise in a specialization area, including urban analytics, urban sustainability and resilience, urban design and physical planning, and urban development policy and planning.

The optional cooperative education experience (co-op) is available to eligible students. Cooperative education is central to both the Northeastern experience and to the College of Social Sciences and Humanities experiential liberal arts framework. Northeastern's signature co-op ecosystem provides qualified master's students with six-month work experiences in businesses, nonprofits, and government agencies in Boston and across the United States. Graduate students take their work from campus learning spaces, apply their knowledge outside of the classroom, and then bring knowledge and skills gained in community learning spaces back to our campus learning spaces during the cocurricular experiential integration course.

In addition to the co-op option, students in the program have opportunities to gain experience in the application of their knowledge and skills via internships, class projects, and a capstone research report. They graduate prepared for careers working for state and local government, federal agencies, community development corporations and other nonprofit organizations, research institutes, and as private-sector planning consultants.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
<b>Planning and Policy</b>		
PPUA 6201	The 21st-Century City: Urban Opportunities and Challenges in a Global Context	4
PPUA 6502	Economic Analysis for Policy and Planning	4
SUEN 6340	Topics in Urban Environmental Design	4
<b>Research Design</b>		
INSH 6300	Research Methods in the Social Sciences	4
<b>Quantitative Techniques</b>		
Students in the urban analytics focus area are encouraged to take INSH 5301.		
Choose one from the following:		4
INSH 5301	Introduction to Computational Statistics	
INSH 6500	Statistical Analysis	
<b>Planning Law</b>		
Choose one from the following:		2-4
LPSC 5201	Law and the City	
PPUA 5201	Urban Planning and the Law	
<b>Planning and Social Justice</b>		
Choose one from the following:		2-4
PPUA 5233	Contemporary Community Development	
PPUA 5235	Participatory Community Planning Methods	
PPUA 6219	Race, Justice, and Belonging in Planning Practice	

#### Focus Areas

Complete one of the following focus areas:

- Urban Design and Physical Planning (p. 164)
- Urban Analytics (p. 164)
- Sustainability and Resilience (p. 164)
- Urban Development Policy and Planning (p. 165)

**URBAN DESIGN AND PHYSICAL PLANNING**

Requires two consecutive semesters of Co-op Work Experience and Experiential Integration:		2
PPUA 6964 and INSH 6864	Co-op Work Experience and Experiential Integration	

### Program Credit/GPA Requirements

48 total semester hours required (50 with optional co-op)

Minimum 3.000 GPA required

## Arts Administration, Graduate Certificate

Today's arts sector is more vital and dynamic than ever, flourishing in both arts institutions and "non-hierarchical organizations," from artist-run spaces to community organizations. This context, paired with changes in the funding climate over the past 30 years, has generated a need to transform leadership training in the arts. Creative thinkers must be equipped with administrative, analytical, entrepreneurial, and technological skill sets to work within the complex, interdependent arts and cultural ecosystem.

The **Graduate Certificate in Arts Administration** offers an interdisciplinary graduate program focused on leadership innovation in performance, visual arts, cultural, and community organizations.

The Graduate Certificate in Arts Administration challenges students to create diverse, viable, and sustainable arts and culture projects and organizations; to use entrepreneurial practices in order to create transformation; to develop and deploy new arts and culture sector-focused business and analytic skills; and to design innovative planning and engagement strategies. Course and project work embeds experiential opportunities to explore and demonstrate transformational arts management approaches.

The required curriculum includes three core and one directed elective for a total of 12 credit hours. All courses can be completed online.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
AACE 6000	Arts and Culture Organizational Leadership	3
AACE 6010	Planning for Arts and Cultural Organizations	3
AACE 6020	Experiential Study in Arts Administration	3

#### Elective

Code	Title	Hours
Complete one of the following:		
AACE 6110	Information Technology for Arts and Cultural Organizations	3
AACE 6200	Programming and Community Engagement for Cultural Entrepreneurs	
AACE 6210	Building Value Through Cultural Enterprise (Building Value through Cultural Enterprise)	

### Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

## Cultural Entrepreneurship, Graduate Certificate

Cultural entrepreneurs combine their passion for creative and cultural products and programs with creative, out-of-the-box thinking to forge the resilience of the arts sectors and the wider communities they serve. Cultural entrepreneurs employ innovative approaches to audience engagement – like a roving theater company, pop-up museum, or a smartphone app for artistic collaboration – to deliver artistic value to wide and diverse audiences and make a positive social, environmental, and economic impact. Today's cultural entrepreneurs operate in diverse professional environments, from consulting for organizational transformation to launching a creative startup. By understanding community impacts and activating a range of cultural and creative experiences, cultural entrepreneurs play a crucial role in ensuring the vitality of artistic engagement, advancing community goals, and strengthening society.

The **Graduate Certificate in Cultural Entrepreneurship** empowers students with a critical, creative perspective on arts programming and management and a myriad of creative management tools that harness new technologies for artistic engagement.

The Graduate Certificate in Cultural Entrepreneurship offers an interdisciplinary program to create diverse and viable projects and organizations for artistic experience and positive social impact. The program prepares students to become innovators in a range of artistic and cultural disciplines, from music, visual art, theater, and dance to community-building and transformation. The curriculum offers students the opportunity to identify opportunities for evolution in the arts and cultural sectors and to develop critical, creative practices; leadership acumen; and skill sets in arts management, strategic planning, and performance analysis to conceive and implement creative, cultural programming for community engagement and positive impact.

The program learning objectives provide students with opportunities to:

- Develop an understanding of methods and tools used to conceptualize, scope, pilot, evaluate, iterate and launch cultural entrepreneurship projects;
- Align creative practice and arts enterprise strategies with opportunities, challenges and resources to achieve desired impact;
- Apply communication, engagement and evaluation techniques to develop and sustain diverse audiences and stakeholder relationships;
- Engage in critical analysis of the work of peers and industry leaders by analyzing and contextualizing the quality, viability and sustainability of culturally-driven entrepreneurship.

The required curriculum includes three core courses and one directed elective for a total of 12 semester hours. All courses can be completed online.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
AACE 6200	Programming and Community Engagement for Cultural Entrepreneurs	3
AACE 6210	Building Value Through Cultural Enterprise (Building Value through Cultural Enterprise)	3
AACE 6220	Innovative Approaches to Audience Engagement (Experiential Study in Cultural Entrepreneurship)	3

#### Elective

Code	Title	Hours
Complete one of the following:		3
AACE 6000	Arts and Culture Organizational Leadership	
AACE 6010	Planning for Arts and Cultural Organizations	
AACE 6110	Information Technology for Arts and Cultural Organizations	
ENTR 6212	Business Planning for New Ventures

## D'Amore-McKim School of Business

Website ([https://damore-mckim.northeastern.edu/?utm\\_medium=website&utm\\_source=catalog](https://damore-mckim.northeastern.edu/?utm_medium=website&utm_source=catalog))

**David De Cremer, PhD**, Dunton Family Dean

**Kate E. Klepper, MBA**, Associate Dean of Graduate Programs

Northeastern University's D'Amore-McKim School of Business has built and sustained a legacy of excellence for 100 years. Our graduate programs prepare leaders with a curriculum focused on technology, data analytics, and uniquely human skills like critical thinking, creativity, and an entrepreneurial mindset.

D'Amore-McKim is part of a thriving global network, attracting some of the best and brightest faculty across the business world. Many are founders of tech startups and respected management leaders, and our students benefit daily from their research and expertise.

Experience-fueled learning is at the heart of everything we do. Our students do more than master skills in their chosen business field. They put the knowledge gained from a demanding curriculum to work as they apply what they've learned to authentic business challenges. This educational model sets us apart.

## Master of Science

Northeastern University's D'Amore-McKim School of Business develops leaders and thinkers who will guide the future of work in an ever-evolving digital landscape. D'Amore-McKim master's degree programs help students build specialized expertise and gain a competitive advantage.

Our innovative master's programs—taught with D'Amore-McKim's focus on the tech economy—prepare students to excel in a data-driven business world. Students learn from our respected business faculty, many of whom are consultants, founders of tech start-ups, and respected management leaders. Students study alongside diverse classmates who share their passions and interests.

Students enroll in D'Amore-McKim's master's degrees for full-time or part-time study.

### Programs

## Business Analytics, MS

Northeastern University D'Amore-McKim School of Business's Master of Science in Business Analytics ([https://damore-mckim.northeastern.edu/programs/ms-business-analytics/?utm\\_source=internal-referral&utm\\_medium=nu-catalog&utm\\_campaign=msba](https://damore-mckim.northeastern.edu/programs/ms-business-analytics/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=msba)) prepares students to lead in a business world driven by Big Data.

### Make Data-Driven Business Decisions

Students build the skills to know what data to analyze and understand how to leverage that data for strategic decision making. Classwork provides exposure to data mining, statistical and quantitative analysis, multivariate testing, and predictive modeling. Students explore how to build sales, enhance marketing, or strengthen a company's infrastructure.

### Integrate Classroom and Professional Experiences

Through in-class case studies and a capstone project, professors share real company data so that students apply their knowledge to actual business challenges. They gain unique perspectives as they learn from renowned experts who have led through times of rapid change. Through an optional graduate co-op, students translate ideas into action as they complete a project for an organization.

### Complete the Degree in as Few as 12 Months

Students complete seven courses throughout the first two semesters and an optional career management class developed by the Graduate Career Center advisor. Students may complete their final three courses over the summer term or can extend their studies and complete their program in the fall term.

Students enroll in this 30-semester-hour master's degree program for full-time study.

## Program Requirements

### Core Requirements

Code	Title	Hours
MISM 6200	Introduction to Business Analytics	3
MISM 6202	Foundations of Data Analysis for Business	3
MISM 6205	Data Wrangling for Business	3
MISM 6210	Information Visuals and Dashboards for Business	3
MISM 6212	Data Mining and Machine Learning for Business	3
MISM 6213	Business Information Design, Quality, and Strategy	3
MISM 6214	Business Analytics Capstone	3

### Elective Coursework

Code	Title	Hours
In consultation with advisor, complete 9 graduate-level semester hours for which prerequisites have been met:		9
HRMG 6223	Global Talent Management	
MISM 6201	Database Management for Business

Minimum 3.000 GPA required

## Business Analytics, MS—Online

Northeastern University D'Amore-McKim School of Business's Online Master of Science in Business Analytics ([https://damore-mckim.northeastern.edu/programs/ms-business-analytics/?utm\\_source=internal-referral&utm\\_medium=nu-catalog&utm\\_campaign=msba](https://damore-mckim.northeastern.edu/programs/ms-business-analytics/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=msba)) prepares working professionals to lead in a business world driven by Big Data.

### Make Data-Driven Business Decisions

Students build the skills to know what data to analyze and understand how to leverage that data for strategic decision making. Classwork provides exposure to data mining, statistical and quantitative analysis, multivariate testing, and predictive modeling. Students explore building sales, enhancing marketing, or strengthening a company's infrastructure.

### Integrate Classroom and Professional Experiences

Through in-class case studies and a capstone project, professors share real company data so that students apply their knowledge to actual business challenges. They gain unique perspectives as they learn from renowned experts who have led through times of rapid change.

### Learn From Anywhere, Anytime

Listen to lectures, access course materials, and submit assignments by deadlines in this 100% online program. All courses are seven weeks long, and you'll focus on one course at a time for an intensive learning experience.

Students enroll in this 30-semester-hour master's degree program for online study.

## Program Requirements

### Core Requirements

Code	Title	Hours
MISM 6200	Introduction to Business Analytics	3
MISM 6202	Foundations of Data Analysis for Business	3
MISM 6205 or MISM 6203	Data Wrangling for Business Business Analytics Methods	3
MISM 6210	Information Visuals and Dashboards for Business	3
MISM 6212	Data Mining and Machine Learning for Business	3
MISM 6213	Business Information Design, Quality, and Strategy	3
MISM 6214	Business Analytics Capstone	3

### Elective Coursework

Code	Title	Hours
In consultation with advisor, complete 9 graduate-level semester hours from the following for which prerequisites have been met:		9
HRMG 6223	Global Talent Management	
MKTG 6232	Engaging Customers and Markets	
MKTG 6294	Customer-Centric Research Methods for Marketing	
MKTG 6295	Customer Performance Modeling	
STRT 6210	Workforce Metrics and Analytics	

### Program Credit/GPA Requirements

## International Management, MS

Northeastern University D'Amore-McKim School of Business's Master of Science in International Management program is designed to prepare students to bridge local and international operations quickly and confidently.

### Develop a Global Mindset

Students have an opportunity to develop critical thinking skills to handle the challenges organizations and businesses face when operating across borders and cultures. Core courses focus on cultural agility, leadership, and workforce management. Students explore topics ranging from international trade to globalization of the world economy.

### Integrate Classroom and Professional Experiences

Students obtain real-world experiences that help them to gain a fresh perspective while using relevant skills. They apply their knowledge to actual business challenges through class projects.

Students can gain experience tackling real business issues faced by a company aligned with their career aspirations through the "Make Your Case" consulting program. Students build storytelling and case-writing skills while gaining inside exposure to their chosen industry.

Students may enroll in this 30-semester-hour master's degree program for full-time and part-time study.

### Program Requirements

## Management, MS

### Overview

Northeastern University's D'Amore-McKim School of Business MS in Management ([https://damore-mckim.northeastern.edu/programs/ms-x/?utm\\_source=internal-referral&utm\\_medium=nu-catalog&utm\\_campaign=msx](https://damore-mckim.northeastern.edu/programs/ms-x/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=msx)) program enables students to gain the business knowledge and specialized expertise needed in today's digitally driven economy.

Students enroll in this 30-semester-hour master's degree program for full-time, part-time, or hybrid study. There are four ways to earn this master's degree:

### MS in Management: Boston Campus

The MS program in management on our Boston campus allows students to personalize all aspects of their degree, including core coursework, to match their specific professional goals. Four core classes each represent a key domain: managing organizations, data-driven management, strategy and growth, and finance and operations. Students without a background in these areas have an opportunity to build foundational skills, and those with previous experience expand their knowledge in higher-level courses.

Students may focus their learning by selecting a market-aligned concentration. They'll personalize their program by selecting electives from the entire portfolio of graduate-level courses taught by D'Amore-McKim's industry-leading faculty. Or they may choose to take one elective from a diverse list of eligible graduate courses offered by other Northeastern colleges.

### MS in Management: Oakland Campus

#### CONCENTRATION IN ENTREPRENEURSHIP

The MS program in management on our Oakland campus helps students build the expertise and perspective to succeed in a new business venture. All students take the same entrepreneurship-focused core coursework fostering networking within the cohort. Students have an opportunity to learn to design winning competitive strategies, from product and service development to venture financing, business plans, go-to-market strategy, and managing high-performance teams. Students also complete a four-course concentration in entrepreneurship to deepen their learning.

By studying in the Bay Area, students have access to some of the most successful tech and social ventures, allowing them to build their network while gaining the tangible skills to launch their own enterprise.

### MS in Management: Online Only

#### CONCENTRATION IN DIGITAL TRANSFORMATION IN HEALTHCARE

#### CONCENTRATION IN HEALTHCARE ADMINISTRATION

The online MS program in management focuses on healthcare and leverages a unique partnership between Northeastern University and the Mayo Clinic College of Medicine and Science. Coursework provides a deep understanding of the technical skills, regulatory frameworks, and managerial competencies necessary to join the next generation of healthcare pioneers.

Students choose one of two concentrations: digital transformation in healthcare or healthcare administration. Digital transformation in healthcare is designed for current healthcare executives who want to leverage emerging technologies better. Healthcare administration offers business and healthcare knowledge tailored for those entering the industry.

### MS in Management: Online with On-Campus Residencies

#### CONCENTRATION IN STRATEGIC TECHNOLOGY LEADERSHIP

The MS program in management with a concentration in strategic technology leadership is designed to prepare executives and senior leaders to harness digital technology and innovation. They develop expertise in solving challenges with cutting-edge technologies and deepen their knowledge of strategies for managing technology adoption.

Students develop a project business plan under the guidance of a seasoned executive mentor. Classes are hybrid, with live online interactive courses and three in-person residencies in Boston or London.

## Program Requirements

### Core Requirements

Code	Title	Hours
<b>Managing Organizations</b>		
In consultation with advisor, complete 3 graduate-level semester hours for which prerequisites have been met. Choose from the following:		
HRMG 6200	Managing People and Organizations	3
HRMG 6212	Creating an Innovative Organization	
HRMG 6223	Global Talent Management	
INTB 6226	Becoming a Global Leader	
MGMT 6213	Managing Ethics in the Workplace and Marketplace	
MGMT 6214	Negotiations	

MGMT 6225	Sustainability and Leadership	
MGMT 6226	Sustainability and the Business Environment	
<b>Data-Driven Management</b>		
In consultation with advisor, complete 3 graduate-level semester hours for which prerequisites have been met. Choose from the following:		3
ACCT 6200	Financial Reporting and Managerial Decision Making 1	
MISM 6200	Introduction to Business Analytics	
MISM 6202	Foundations of Data Analysis for Business	
MISM 6203	Business Analytics Methods	
MISM 6210	Information Visuals and Dashboards for Business	
MISM 6212	Data Mining and Machine Learning for Business	
MKTG 6200	Creating and Sustaining Customer Markets	
MKTG 6234	Marketing Analytics	
SCHM 6215	Supply Chain Analytics	
STRT 6210	Workforce Metrics and Analytics	
<b>Strategy and Growth</b>		
In consultation with advisor, complete 3 graduate-level semester hours for which prerequisites have been met. Choose from the following:		3
INNO 6200	Enterprise Growth and Innovation	
INNO 6222	Competing in Dynamic, Innovation-Driven Markets	
INNO 6225	Acquisitions, Alliances, and Growth	
INTB 6200	Managing the Global Enterprise	
MKTG 6216	Market Focused Strategy	
SCHM 6213	Global Supply Chain Strategy	
STRT 6200	Strategic Decision Making in a Changing Environment	
<b>Finance and Operations</b>		
In consultation with advisor, complete 3 graduate-level semester hours for which prerequisites have been met. Choose from the following:		3
FINA 6309	Foundations of Accounting and Finance	
MKTG 6230	Driving Marketing Performance: Measure, Analyze, Profit	
SCHM 6201	Operations and Supply Chain Management	
SCHM 6214	Sourcing and Procurement	
SCHM 6221	Sustainability and Supply Chain Management	
SCHM 6223	Managing Healthcare Supply Chain Operations	

## Concentration Options

Students may complete one of the following concentrations. Not all concentrations are available at all locations; please refer to your advisor or admissions coach for the course availability each semester at your location. Courses taken to fulfill concentrations may be used toward the elective section below.

- Accounting Analytics (p. 177)
- Analytics (p. 177)
- Brand Management
- Business Management for Healthcare (p. 178)
- Corporate Finance
- Corporate Innovation
- Digital Transformation in Healthcare
- Entrepreneurship (p. 179)
- Healthcare Administration (p. 179)
- International Business (p. 180)
- Investments (p. 180)
- Leading People and Organizations (p. 180)
- Marketing (p. 181)
- Marketing Analytics (p. 181)
- Operations and Supply Chain Management (p. 181)

- Public Health (p. 182)
- Strategic Technology Leadership (p. 182)
- Sustainability and Business (p. 182)

## Electives

Code	Title	Hours
In consultation with advisor, complete 18 graduate-level semester hours for which prerequisites have been met. Choose from the following subject codes:		18
ACCT, BUSN, ENTR, FINA, HRMG, INNO, INTB, MECN, MGMT, MKTG, MISM, SCHM, STRT		
In consultation with advisor, students may also select an interdisciplinary elective, for which prerequisites have been met, offered in partnership with other Northeastern University colleges. Choose from the following:		
AACE 6000	Arts and Culture Organizational Leadership	
ARTG 5150	Information Visualization Principles and Practices	
ARTG 5151	Information Design Critique Seminar	
ARTG 5330	Visualization Technologies 1: Fundamentals

MGMT 6280	Innovation for Next-Generation Products and Systems

**CONCENTRATION IN DIGITAL TRANSFORMATION IN HEALTHCARE**

Code	Title	Hours
------	-------	-------

To earn the Concentration in Digital Transformation in Healthcare, students must complete the following four core courses of the core curriculum of this program:

MISM 6200	Introduction to Business Analytics	
MGMT 6213	Managing Ethics in the Workplace and Marketplace	
SCHM 6223	Managing Healthcare Supply Chain Operations	
STRT 6220	Strategic Management for Healthcare Organizations	

**Required**

HINF 5101	Introduction to Health Informatics and Health Information Systems	3
HINF 6404	Patient Engagement Informatics and Analytics	3
INNO 6200	Enterprise Growth and Innovation	3
MGSC 6281	Service Innovation and Management	3

**Electives**

In consultation with advisor, complete 6 graduate-level semester hours for which prerequisites have been met. Choose from the following:

FINA 6220	Healthcare Finance	
or FINA 6309	Foundations of Accounting and Finance	
HINF 5105	The American Healthcare System	
HRMG 6220	Health Organization Management	
MISM 6210	Information Visuals and Dashboards for Business	
MISM 6212	Data Mining and Machine Learning for Business	

**CONCENTRATION IN ENTREPRENEURSHIP**

Code	Title	Hours
------	-------	-------

**Electives**

In consultation with advisor, complete 12 graduate-level semester hours for which prerequisites have been met. Choose from the following:

ENTR 6210	Managing Operations in Early Stage Ventures	
ENTR 6212	Business Planning for New Ventures	
ENTR 6214	Social Enterprise	
ENTR 6218	Business Model Design and Innovation	
ENTR 6219	Financing Ventures from Early Stage to Exit	
ENTR 6240	Emerging and Disruptive Technologies	
ENTR 6241	Entrepreneurial Marketing and Selling	
ENTR 6250	Lean Design and Development	
ENTR 6340	The Technical Entrepreneur as Leader	
FINA 6260	Entrepreneurial Finance and Venture Capital	
GE 5030	Iterative Product Prototyping for Engineers	
INNO 6230	Platform Innovation	
MKTG 6214	New Product Development	

**CONCENTRATION IN HEALTHCARE ADMINISTRATION**

Code	Title	Hours
------	-------	-------

To earn the Concentration in Healthcare Administration, students must complete the following four core courses of the core curriculum of this program:

FINA 6309	Foundations of Accounting and Finance	
or SCHM 6223	Managing Healthcare Supply Chain Operations	
MISM 6200	Introduction to Business Analytics	
MGMT 6213	Managing Ethics in the Workplace and Marketplace	

STRT 6220	Strategic Management for Healthcare Organizations	
<b>Required</b>		
HRMG 6200	Managing People and Organizations	3

## Accounting, MSA

Northeastern University D'Amore-McKim School of Business's Master of Science in Accounting is designed to prepare students for a career in the rapidly evolving accounting industry.

### Build Deep Accounting Expertise

Students build on their undergraduate accounting major and have an opportunity to gain the knowledge, skills, and credit hours needed to pursue CPA licensure and launch their careers in just seven months. Classwork deepens their expertise through advanced accounting topics, management best practices, and data analytics skills. The Board of Public Accountancy in Massachusetts has approved the program curriculum.

### Select a Track

Students may specialize in either audit or tax, guiding them toward the career that best suits their goals. The audit track offers intense exposure to ethics, auditing research, and forensic accounting. The tax track explores the intricacies of the tax industry so that students may gain a comprehensive understanding of taxation at all levels, from local to international.

### Integrate Classroom and Professional Experiences

Students have opportunities to obtain real-world experiences that help them gain a fresh perspective while using relevant skills. They apply their knowledge to actual business challenges through class projects. Students gain unique perspectives as they learn from industry-leading faculty with years of practice as both PhDs and CPAs at Big 4 and other public accounting firms.

Students enroll in this 30-semester-hour master's degree program for full-time study.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
<b>Accounting</b>		
ACCT 6203	Business Entity Taxation	3
ACCT 6204	Financial Reporting for Integrated Multinational Enterprises	3
ACCT 6229	Accounting for Foreign Currency Transactions	1
<b>Ethics</b>		
ACCT 6253	Ethics in the Accounting Profession	3
<b>Financial Reporting</b>		
ACCT 6207	Contemporary and Emerging Issues in Financial Reporting	3
ACCT 6216	Financial Reporting for Governments and Nonprofit Entities	2

#### Tracks

Complete one of the following tracks:

##### AUDIT TRACK

Code	Title	Hours
ACCT 6205	Auditing in a Big Data Environment	3
ACCT 6217	Corporate Governance, Ethics, and Financial Reporting	3
ACCT 6254	Accounting Research and Communication	3

##### TAXATION TRACK

ACCT 6248	Income Taxation of Trusts and Estates
ACCT 6292	Tax Research, Practice, and Ethics

**Program Credit/GPA Requirements**

30 total semester hours required

Minimum 3.000 GPA required

## Finance, MSF

Northeastern University D'Amore-McKim School of Business' Master of Science in Finance ([https://damore-mckim.northeastern.edu/programs/ms-finance/?utm\\_medium=website&utm\\_source=catalog&utm\\_campaign=ptmsf](https://damore-mckim.northeastern.edu/programs/ms-finance/?utm_medium=website&utm_source=catalog&utm_campaign=ptmsf)) helps students cultivate the high-level knowledge needed to drive financial strategy in today's tech economy.

### Develop Deep Finance Expertise

Core courses and elective offerings help students become financial experts with the skills to diversify financial portfolios, effectively minimize risks, maximize return on investments, and sustain growth. Students interested in pursuing the Chartered Financial Analyst designation will find CFA preparations integrated into their coursework.

### Integrate Classroom and Professional Experiences

Students will have opportunities to obtain real-world experiences that help them gain a fresh perspective while using relevant skills. They apply their knowledge to actual business challenges through class projects.

Students can apply to participate in a student-managed mutual fund, The 360 Huntington Fund, where they gain valuable experience performing equity research and portfolio management. By participating in the Fund, students may earn one semester hour per semester with the option to fulfill a 3 semester hours elective course requirement by participating for three terms.

Students enroll in this 30-semester-hour master's degree program for part-time study.

## Program Requirements

### Core Requirements

Code	Title	Hours
FINA 6200	Value Creation through Financial Decision Making	3
FINA 6202	Analysis of Financial Institutions and Markets	3
FINA 6203	Investment Analysis	3
FINA 6204	International Financial Management	3
FINA 6205	Financial Strategy	3
FINA 6206	Finance Seminar	3

### Electives

Code	Title	Hours
In consultation with advisor, complete 12 graduate-level semester hours for which prerequisites have been met:		12
FINA 6207	Financial Modeling	
FINA 6211	Financial Risk Management	
FINA 6212	Fixed Income Securities and Risk	
FINA 6214	Mergers and Acquisitions	
FINA 6215	Business Turnarounds	
FINA 6216	Valuation and Value Creation	
FINA 6217	Real Estate Finance and Investment

FINA 6220	Healthcare Finance	
FINA 6260	Entrepreneurial Finance and Venture Capital	
FINA 6292	Advanced Topics in Finance	
FINA 6360	Fund Management for Analysts	
FINA 6361	Fund Management for Managers	

A maximum of one graduate-level business course may be taken from the following subject codes:

ACCT, BUSN, ENTR, FINA, HRMG, INNO, INTB, MECN, MGMT, MKTG, SCHM, and STRT

### Program Credit/GPA Requirements

30 total semester hours required

Minimum 3.000 GPA required

## Quantitative Finance, MSF

Northeastern University D'Amore-McKim School of Business's Full-Time MS in Quantitative Finance is designed to prepare students to thrive in a rapidly changing finance industry transformed by technology and innovation.

### Cultivate Advanced Finance and Fintech Skills

This quantitative finance curriculum emphasizes the intersection of finance and data analytics. Coursework integrates economics, mathematics, and computer science with financial theory and application. Students interested in pursuing the Chartered Financial Analyst designation will find CFA preparations integrated into their coursework.

### Integrate Classroom and Professional Experiences

Students will have opportunities to obtain real-world experiences that help them gain a fresh perspective while using relevant skills. Through an optional graduate co-op, students translate ideas into action as they complete a project for an organization.

Students can apply to participate in a student-managed mutual fund, The 360 Huntington Fund ([https://damore-mckim.northeastern.edu/programs/360-huntington-fund/?utm\\_medium=website&utm\\_source=catalog&utm\\_campaign=msqf](https://damore-mckim.northeastern.edu/programs/360-huntington-fund/?utm_medium=website&utm_source=catalog&utm_campaign=msqf)), where they can gain experience performing equity research and portfolio management. By participating in the Fund, students may earn 1 semester hour per semester with the option to fulfill a 3-semester-hour elective course requirement by participating for three terms.

### Complete the Degree in as Few as 12 Months

In the first two semesters, students complete six required courses, one elective, and an optional career development program developed by the Graduate Career Center advisors. They may complete the remaining three elective courses over the summer term or extend their studies and complete their electives in the fall term.

Students enroll in this 30-semester-hour master's degree program for full-time study.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
FINA 6203	Investment Analysis	3

## Master of Business Administration

Northeastern University's D'Amore-McKim School of Business prepares students to navigate a global and ever-evolving business world. A D'Amore-McKim MBA prepares students for the future of work in a digitally driven economy.

MBA students integrate broad business knowledge with a deep understanding of the future of technological advancement. They build in-demand skills leveraging actual company data through projects as they learn from a faculty of consultants, respected management leaders, and startup founders. This prepares our students to become innovative leaders.

Integrating classroom instruction with authentic, experience-powered learning is what we do best at D'Amore-McKim. It's an approach that expands students' knowledge base, develops their creative mindset, and prepares them to meet the shifting demands of today's business world. Students in our MBA programs will have ample opportunities to dive headfirst into experiences that will give them fresh perspectives and in-demand skills.

Students enroll in D'Amore-McKim MBA programs full time, part time, or for online study.

### Programs

- Business Administration, MBA—Full-Time (p. 191)
- Business Administration, MBA—Online (p. 200)
- Business Administration, MBA—Part-Time (p. 202)

## Business Administration, MBA—Full-Time

Northeastern University's D'Amore-McKim School of Business has reinvented the Full-Time MBA ([https://damore-mckim.northeastern.edu/programs/full-time-mba/?utm\\_source=internal-referral&utm\\_medium=nu-catalog&utm\\_campaign=ftmba](https://damore-mckim.northeastern.edu/programs/full-time-mba/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=ftmba)) for today's rapidly changing world. Our Full-Time MBA program integrates business knowledge with a deep understanding of technology, preparing students to stay ahead of change and become the leaders that today's business world demands. Students will choose from a wide-ranging list of in-demand electives and concentrations—including our signature MBA x concentrations—allowing them to develop a unique nonbusiness skill set.

### Integrate Classroom and Professional Experiences

Learning by doing is a hallmark of a Northeastern MBA. Students apply their knowledge to actual business challenges through experience-fueled electives and class projects. Through a corporate residency, students translate ideas to action for three, six, or up to 12 months. Far removed from the typical internship, students work full-time at a leading firm or startup in their field and have significant responsibilities as they work to deliver on organizational goals.

### Select Two Concentrations

Students will specialize their degree by selecting two in-demand business concentrations. Or, they could choose to add expertise in another professional area by choosing an interdisciplinary MBA x concentration in a highly relevant field offered through partnerships with other Northeastern colleges.

### Build an Interdisciplinary Skill Set

Students will select six interdisciplinary (non-business) semester hours of their choice. They can mix and match the content that interests them from a diverse list of eligible graduate courses across Northeastern colleges.

## Program Requirements

### Core Requirements

Code	Title	Hours
<b>Marketing</b>		
MKTG 6318	Customer Value and the Enterprise	2
<b>Strategic Decision Making</b>

PHTH 5120	Race, Ethnicity, and Health in the United States	3
PHTH 5212	Public Health Administration and Policy	3
PHTH 5214	Environmental Health	3
PHTH 6208	Urban Community Health Assessment	3

#### CONCENTRATION IN MBA X SOFTWARE DEVELOPMENT

Code	Title	Hours
------	-------	-------

CS 5500	Foundations of Software Engineering	4
CS 5520	Mobile Application Development	4
CS 5610	Web Development	4

## Business Administration, MBA—Online

Northeastern University's D'Amore-McKim School of Business prepares business leaders to navigate the challenges of today's tech-forward business world. D'Amore-McKim's Online MBA ([https://damore-mckim.northeastern.edu/programs/online-mba/?utm\\_medium=website&utm\\_source=catalog&utm\\_campaign=omb](https://damore-mckim.northeastern.edu/programs/online-mba/?utm_medium=website&utm_source=catalog&utm_campaign=omb)) program helps students build broad business skill sets and specialized knowledge in their field. In this flexible program, students build skills that they can apply in real-time—and complete their degree 100% online in as little as 18 months.

### Integrate Classroom and Professional Experiences

Learning by doing is a hallmark of a Northeastern University MBA. Students apply their knowledge to actual business challenges through experience-fueled electives and class projects. Students gain unique perspectives as they learn from entrepreneurs and executives at top firms who have led through times of rapid change.

### Live Faculty Connect Sessions

Optional live faculty sessions offer a collaborative and interactive learning environment where students can connect with their professors and peers weekly to discuss course concepts, receive feedback, and gain valuable insights.

### EXPO Courses

In the EEBA 6401 Experiential Business Decision Making course, students take on the role of a C-suite business executive and tackle a real business challenge for an actual company, all while gaining real-time feedback from a seasoned C-suite executive.

### Societal Challenge Courses

In the societal challenge courses, students build upon the skills gained in the core course focusing on stakeholder values and societal challenges by selecting either a diversity, equity, and inclusion course or a sustainability course. The skills gained through these courses are designed to prepare students for immediate impact and are exactly what employers are seeking.

In the EEBA 6403 EXPO Challenge: Diversity, Equity, and Inclusion course, students work as a team to solve a DEI-related business problem. The course format includes case studies, Q&A sessions, and guidance and feedback from industry experts and seasoned faculty members.

In the EEBA 6402 EXPO Challenge: Sustainability course, students work in teams to bring their experience and newly learned skills to solve a real sustainability-related business problem. These problems could range from environmental sustainability issues to societal challenges associated with climate change. The course format includes case studies, Q&A sessions, and guidance and feedback from industry experts and seasoned faculty members.

## Program Requirements

### Business Core Requirements

Code	Title	Hours
ACCT 6318	Analyzing Accounting Data for Strategic Decision Making	2
EEBA 6401	Experiential Business Decision Making	3
FINA 6318	Financial Management	2
HRMG 6318	Managing the Organization	2
INNO 6318	Innovation Driven Strategy	2
MKTG 6318	Customer Value and the Enterprise	2
SCHM 6318	Managing Operations and the Supply Chain	2
STRT 6318	Strategic Planning for the Future	2

### Societal Challenges Core

Code	Title	Hours
BUSN 6402	Stakeholder Values and Societal Challenges in Business	2
In consultation with advisor, complete one of the following:		2
EEBA 6402	EXPO Challenge: Sustainability	
EEBA 6403	EXPO Challenge: Diversity, Equity, and Inclusion	

### Business Electives

Code	Title	Hours
In consultation with advisor, complete 24 graduate-level semester hours for which prerequisites have been met. Choose from the following subject codes:		24
ACCT, BUSN, ENTR, FINA, HRMG, INTB, MECN, MGMT, MKTG, SCHM, STRT, and TECE		

In consultation with advisor, complete 5 semester hours of experiential elective coursework.

5

EEBA 6401

Experiential Business Decision Making

**Program Credit/GPA Requirements**

50 total semester hours required

Minimum 3.000 GPA required

## Business Administration, MBA—Part-Time

Northeastern University's D'Amore-McKim School of Business prepares business leaders to navigate the challenges of today's tech-forward business world. D'Amore-McKim's Part-Time MBA ([https://damore-mckim.northeastern.edu/programs/part-time-mba/?utm\\_medium=website&utm\\_source=catalog&utm\\_campaign=part-time-mba](https://damore-mckim.northeastern.edu/programs/part-time-mba/?utm_medium=website&utm_source=catalog&utm_campaign=part-time-mba)) program helps students build broad business skill sets and specialized knowledge in their field. In this flexible program, students build skills they can apply in real time—and complete their degree part-time.

### Integrate Classroom and Professional Experiences

Learning by doing is a hallmark of a Northeastern MBA. Students apply their knowledge to actual business challenges through experience-fueled electives and class projects. Students gain unique perspectives as they learn from entrepreneurs and executives at top firms who have led through times of rapid change.

### Select Up to Two Concentrations

Students may specialize their degree by selecting up to two in-demand business concentrations. Students gain exposure to diverse perspectives as they build competencies in multiple disciplines. This combination prepares them to lead in a complex business world.

## Program Requirements

### Core Requirements

Code	Title	Hours
<b>Accounting</b>		
ACCT 6200	Financial Reporting and Managerial Decision Making 1	3
ACCT 6201	Financial Reporting and Managerial Decision Making 2	1.5
<b>Management</b>		
HRMG 6200	Managing People and Organizations	3
INTB 6200	Managing the Global Enterprise	3
MGSC 6200	Information Analysis	3
MGSC 6204	Managing Information Resources	1.5
SCHM 6201	Operations and Supply Chain Management	3
STRT 6200	Strategic Decision Making in a Changing Environment	3
<b>Marketing</b>		
MECN 6200	Global Competition and Market Dominance	3
MKTG 6200	Creating and Sustaining Customer Markets	3
<b>Finance</b>		
FINA 6200	Value Creation through Financial Decision Making	3
<b>Entrepreneurship</b>		
INNO 6200	Enterprise Growth and Innovation	3

### Optional Concentration

Students may complete up to two of the following concentrations. Courses taken to fulfill concentrations may be used toward the elective section below.

- Analytics (p. 203)
- Brand Management (p. 203)
- Business Management for Healthcare (p. 203)
- Corporate Finance (p. 204)
- Corporate Innovation (p. 204)
- Corporate Renewal (p. 204)
- Entrepreneurship (p. 204)
- International Business (p. 205)
- Investments (p. 205)
- Leading People and Organizations (p. 205)
- Marketing (p. 206)
- Marketing Analytics (p. 206)
- Mutual Fund Management (p. 206)
- Operation and Supply Chain Management (p. 206)
- Sustainability and Business (p. 206)

**Electives**

Code	Title	Hours
In consultation with advisor, complete 27 graduate-level semester hours for which prerequisites have been met. Choose from the following subject codes:		27
ACCT, BUSN, ENTR, FINA, HRMG, INNO, INTB, MECN, MGMT, MKTG, SCHM, and STRT		
No more than 6 semester hours can be drawn from 1-semester-hour courses.		

**Program Credit/GPA Requirements**

60 semester hours required  
 Minimum 3.000 GPA required

**CONCENTRATION IN ANALYTICS**

Code	Title	Hours
<b>Required</b>		
MISM 6200	Introduction to Business Analytics	3
<b>Electives</b>		
In consultation with advisor, complete 6 graduate-level semester hours from the following for which prerequisites have been met:		6
MISM 6202	Foundations of Data Analysis for Business

SCHM 6221	Sustainability and Supply Chain Management

## Combined Degrees

Northeastern University's D'Amore-McKim School of Business prepares leaders with deep business expertise. Our interdisciplinary combined degrees merge courses from two powerful D'Amore-McKim degree programs—the foundation of business expertise from our renowned MBA and deep skills of a specialized master's degree. Students complete their course of study by earning one combined degree.

Integrating classroom instruction with authentic, experience-powered learning is what we do best at D'Amore-McKim. It's an approach that expands students' knowledge base, develops their creative mindset, and prepares them to meet the shifting demands of today's business world. Students in our combined degree programs will have opportunities to dive headfirst into experiences that will give them fresh perspectives and in-demand skills.

Combined degree programs merge many core requirements from a D'Amore-McKim MBA with a specialized master's degree, allowing students to finish their program in less time than it would take to earn the two degrees separately. With this unique blend of knowledge, students become adaptable leaders prepared to navigate the complexity of decision making and tackle global business challenges head-on.

Students enroll in combined degree programs for full-time or part-time study.

### Programs

- Accounting and Business Administration, MSAMBA (p. 209)
- Finance and Business Administration, MSFMBA (p. 211)
- Finance and Business Administration, MSFMBA—Online (p. 220)
- Finance and Business Administration, MSFMBA—Part-Time (p. 221)
- Quantitative Finance and Business Administration, MSFMBA (p. 227)

## Accounting and Business Administration, MSAMBA

### Overview

Northeastern University D'Amore-McKim School of Business' Master of Science in Accounting/Master of Business Administration (<https://damore-mckim.northeastern.edu/programs/ms-accounting-mba/>) combined-degree program puts nonaccounting majors on an accelerated path toward a successful career in accounting.

### CULTIVATE DEEP ACCOUNTING KNOWLEDGE AND FUNDAMENTAL BUSINESS SKILLS

This 15-month curriculum is constructed in partnership with some of the leading accounting firms. Students will build knowledge in both accounting and business, including a four-course concentration in business analytics.

### ANALYTICS CONCENTRATION

Students will develop their analytical skills through an MBA concentration in analytics. Through four courses students use data to support business decision making and create a measurable improvement on organizational performance.

### INTEGRATE CLASSROOM AND PROFESSIONAL EXPERIENCES

Students will have opportunities to obtain real-world experiences that help them gain a fresh perspective while using relevant skills. They apply their knowledge to actual business challenges through class projects. Starting in January, students leverage their newly acquired skills in a three-month paid corporate residency at a Big 4 or another top accounting firm. Far removed from the typical internship, students work full-time as an associate and have significant responsibilities to deliver on organizational goals.

Students may enroll in this 68-semester-hour master's degree program for full-time study.

### Program Requirements

#### Business Administration Core Requirements

Code	Title	Hours
<b>Marketing</b>		
MKTG 6318	Customer Value and the Enterprise	2
<b>Strategic Decision Making</b>

## Finance and Business Administration, MSF MBA

### Overview

Northeastern University's D'Amore-McKim School of Business prepares resilient finance leaders to weather a changing business world. The Full-Time MS in Finance/MBA ([https://damore-mckim.northeastern.edu/programs/full-time-ms-finance-mba/?utm\\_source=internal-referral&utm\\_medium=nu-catalog&utm\\_campaign=ftmsfmba](https://damore-mckim.northeastern.edu/programs/full-time-ms-finance-mba/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=ftmsfmba)) combined degree program integrates business knowledge with a deep understanding of finance, preparing students to be the leaders that today's business world demands.

### Integrating Classroom and Professional Experiences

Learning by doing is a hallmark of a Northeastern MBA. Students apply their knowledge to actual business challenges through experience-fueled electives and class projects. Students will gain invaluable experience at the intersection of business and finance through a corporate residency, translating ideas into action for three, six, or up to 12 months. Far removed from the typical internship, students work full-time at a leading firm or startup in their field and have significant responsibilities as they work to deliver on organizational goals.

### Develop Deep Finance Expertise

Students pursue a major in finance laser-focused on financial theory and practice. Students gain advanced financial skills and high-level knowledge to drive financial strategy, increase shareholder value, support flexible operating models, minimize risk, and maximize revenue through their finance courses.

Students can gain valuable experience performing equity research and portfolio management in a student-managed mutual fund, the 360 Huntington Fund. By participating in the Fund, students may complete 1 semester hour of coursework, with the option to fulfill a 3-semester-hour elective course requirement by participating for three terms.

### Select a Concentration

Students specialize their degree by selecting a concentration. Our faculty recommend the analytics concentration. Or, students may choose another in-demand business concentration or add expertise in another professional area by choosing an interdisciplinary MBA x concentration offered through partnerships with other Northeastern colleges.

### Program Requirements

#### Business Administration Core Requirements

Code	Title	Hours
<b>Marketing</b>		
MKTG 6318	Customer Value and the Enterprise	2
<b>Strategic Decision Making</b>		
ACCT 6318	Analyzing Accounting Data for Strategic Decision Making	2

<b>Code</b>	<b>Title</b>	<b>Hours</b>
DS 5110	Introduction to Data Management and Processing	4
DS 5220	Supervised Machine Learning and Learning Theory	4
DS 5230	Unsupervised Machine Learning and Data Mining	4

**CONCENTRATION IN MBA X DATA VISUALIZATION**

<b>Code</b>	<b>Title</b>	<b>Hours</b>
<b>Required</b>		
ARTG 5150	Information Visualization Principles and Practices	3
ARTG 5151	Information Design Critique Seminar	1
ARTG 5330	Visualization Technologies 1: Fundamentals	4
<b>Electives</b>		
In consultation with advisor, complete 4 graduate-level semester hours for which prerequisites have been met. Choose from the following:		4
ARTG 5310	Visual Cognition	
ARTG 6110	Information Design Theory and Critical Thinking	
ARTG 6330	Information Design Mapping Strategies	

**CONCENTRATION IN MBA X EXPERIENCE DESIGN**

<b>Code</b>	<b>Title</b>	<b>Hours</b>
<b>Required</b>		
ARTG 5610	Design Systems	4
ARTG 6310	Design for Behavior and Experience	4
<b>Electives</b>		
In consultation with advisor, complete 4 graduate-level semester hours for which prerequisites have been met. Choose from the following:		4
ARTG 5600	Experience Design Studio 1: Principles	
ARTG 5620	Notational Systems for Experience	
ARTG 5640	Prototyping for Experience Design	

**CONCENTRATION IN MBA X GAME DESIGN AND ANALYTICS**

<b>Code</b>	<b>Title</b>	<b>Hours</b>
<b>Required</b>		
GSND 5110	Game Design and Analysis	4
GSND 6350	Data-Driven Player Modeling	4
<b>Electives</b>		

In consultation with advisor, complete 4 graduate-level semester hours for which prerequisites have been met. Choose from the following: 4

GSND 6320	Psychology of Play	
GSND 6330	Player Experience	
GSND 6340	Biometrics for Design	
GSND 6350	Data-Driven Player Modeling	

### CONCENTRATION IN MBA X INFORMATION ETHICS

**Code** **Title** **Hours**  
In consultation with advisor, complete 8 graduate-level semester hours for which prerequisites have been met. Choose from the following: 8

CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
PHIL 5005	Information Ethics	
PHIL 5010	AI Ethics	

In consultation with advisor, complete 4 graduate-level semester hours for which prerequisites have been met. Choose from the following: 4

PHIL 5001	Global Justice	
PHIL 5005	Information Ethics	
PHIL 5010	AI Ethics	

### CONCENTRATION IN MBA X MEDIA INNOVATION AND ADVOCACY

**Code** **Title** **Hours**  
**Required**

JRNL 5400	Media and Advocacy in Theory and Practice	4
JRNL 6340	Fundamentals of Digital Journalism	4

#### Electives

In consultation with advisor, complete 4 graduate-level semester hours for which prerequisites have been met. Choose from the following: 4

ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	
JRNL 5311	Design for Storytelling	
JRNL 6305	Topics	
JRNL 6341	Telling Your Story with Data	

### CONCENTRATION IN MBA X PUBLIC HEALTH

<b>Code</b>	<b>Title</b>	<b>Hours</b>
PHTH 5120	Race, Ethnicity, and Health in the United States	3
PHTH 5212	Public Health Administration and Policy	3
PHTH 5214	Environmental Health	3
PHTH 6208	Urban Community Health Assessment	3

### CONCENTRATION IN MBA X SOFTWARE DEVELOPMENT

<b>Code</b>	<b>Title</b>	<b>Hours</b>
CS 5500	Foundations of Software Engineering	4
CS 5520	Mobile Application Development	4
CS 5610	Web Development	4

### ELECTIVES

**Code** **Title** **Hours**  
**Experiential Requirement**

In consultation with advisor, complete 3 semester hours from the following: 3

BUSN 6351	Experiential Education	
BUSN 6945	Washington Campus Seminar	
ENTR 5000	New Venture Development	
FINA 6360	Fund Management for Analysts	
FINA 6361	Fund Management for Managers	
INTB 6230	Global Field Study	

INTB 6238	Global Project	
MKTG 6606	Digital, Analytics, Technology, and Automation Advanced Research Practicum	
<b>Open Electives</b>		
In consultation with advisor, complete 6 graduate-level semester hours for which prerequisites have been met. Choose from the following subject codes:		6
ACCT, BUSN, ENTR, FINA, HRMG, INNO, INTB, MECN, MGMT, MKTG, SCHM, and STRT		
<b>Interdisciplinary Requirement</b>		
In consultation with advisor, complete 6 graduate-level semester hours, for which the requirements have been met, offered in partnership with other Northeastern University colleges. Choose from the following:		6
AACE 6000	Arts and Culture Organizational Leadership	
ARTG 5150	Information Visualization Principles and Practices	
ARTG 5151	Information Design Critique Seminar	
ARTG 5330	Visualization Technologies 1: Fundamentals	
ARTG 5600	Experience Design Studio 1: Principles	
ARTG 5610	Design Systems	
ARTG 5620	Notational Systems for Experience	
ARTG 5640	Prototyping for Experience Design	
ARTG 6110	Information Design Theory and Critical Thinking	
ARTG 6310	Design for Behavior and Experience	
ARTG 6330	Information Design Mapping Strategies	
BINF 6200	Bioinformatics Programming	
BINF 6308	Bioinformatics Computational Methods 1	
BINF 6309	Bioinformatics Computational Methods 2

## Finance and Business Administration, MSFMBA—Online

### Overview

Northeastern University's D'Amore-McKim School of Business prepares leaders highly skilled in finance and business. Our Online Master of Science in Finance/Master of Business Administration ([https://damore-mckim.northeastern.edu/programs/online-ms-finance-mba/?utm\\_source=internal-referral&utm\\_medium=nu-catalog&utm\\_campaign=onlinemsfmba](https://damore-mckim.northeastern.edu/programs/online-ms-finance-mba/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=onlinemsfmba)) combined degree program integrates business knowledge with a deep understanding of finance, preparing students to be the leaders that today's business world demands. In this flexible program, students build skills that they can apply in real time—and complete their degree virtually.

### Program Requirements

#### Core Requirements

Code	Title	Hours
<b>Accounting</b>		
ACCT 6272	Financial Statement Preparation and Analysis	2.25
ACCT 6273	Identifying Strategic Implications in Accounting Data	2.25
<b>Management</b>		
HRMG 6200	Managing People and Organizations	3

Minimum 3.000 GPA required

## Finance and Business Administration, MSFMBA—Part-Time

Northeastern University's D'Amore-McKim School of Business prepares leaders highly skilled in finance and business. D'Amore-McKim's Part-Time MS in Finance/MBA ([https://damore-mckim.northeastern.edu/programs/part-time-ms-finance-mba/?utm\\_source=internal-referral&utm\\_medium=nu-catalog&utm\\_campaign=ptmsfmba](https://damore-mckim.northeastern.edu/programs/part-time-ms-finance-mba/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=ptmsfmba)) combined degree program integrates business knowledge with a deep understanding of finance, preparing students to be the leaders that today's business world demands. In this flexible program, students build skills they can apply in real time—and complete their degree part-time.

### Integrating Classroom and Professional Experiences

Learning by doing is a hallmark of a Northeastern MBA. Students apply their knowledge to actual business challenges through experience-fueled electives and class projects. Students benefit from the experience of their faculty as finance experts and business leaders who understand today's challenges because they've experienced them firsthand.

### Develop Deep Finance Expertise

Students pursue a major in finance laser-focused on financial theory and practice. Students have an opportunity to gain advanced financial skills and high-level knowledge to drive financial strategy, increase shareholder value, support flexible operating models, minimize risk, and maximize revenue through the finance courses.

Students can gain experience performing equity research and portfolio management in a student-managed mutual fund, The 360 Huntington Fund. By participating in the Fund, students may earn one semester hour per semester with the option to fulfill a 3-semester-hour elective course requirement by participating for three terms.

### Select a Concentration

Students specialize their degree by selecting a concentration. They gain exposure to diverse perspectives as they build competencies in multiple disciplines. This combination of their finance major and a concentration of their choosing prepares them to lead in a complex business world.

## Program Requirements

### Core Requirements

Code	Title	Hours
<b>Accounting</b>		
ACCT 6200	Financial Reporting and Managerial Decision Making 1	3
ACCT 6201	Financial Reporting and Managerial Decision Making 2	1.5
<b>Management</b>		
HRMG 6200	Managing People and Organizations	3
INTB 6200	Managing the Global Enterprise	3
MGSC 6200	Information Analysis	3
MGSC 6204	Managing Information Resources	1.5
SCHM 6201	Operations and Supply Chain Management	3
STRT 6200	Strategic Decision Making in a Changing Environment	3
<b>Marketing</b>		
MECN 6200	Global Competition and Market Dominance	3
MKTG 6200	Creating and Sustaining Customer Markets	3
<b>Entrepreneurship</b>		
INNO 6200	Enterprise Growth and Innovation	3
<b>Finance</b>		
FINA 6200	Value Creation through Financial Decision Making	3
FINA 6203	Investment Analysis	3
FINA 6204	International Financial Management	3
FINA 6205	Financial Strategy	3
FINA 6206	Finance Seminar	3

### Optional Concentrations

Students may complete up to two of the following concentrations. Courses taken to fulfill concentrations may be used toward the electives section below.

- Analytics (p. 222)
- Brand Management (p. 222)
- Business Management for Healthcare (p. 223)

- Corporate Finance (p. 223)
- Corporate Innovation (p. 223)
- Corporate Renewal (p. 224)
- Entrepreneurship (p. 224)
- International Business (p. 224)
- Investments (p. 224)
- Leading People and Organizations (p. 225)
- Marketing (p. 225)
- Marketing Analytics (p. 225)
- Mutual Fund Management (p. 225)
- Operations and Supply Chain Management (p. 226)
- Sustainability and Business (p. 226)

## Electives

Code	Title	Hours
<b>Finance Electives</b>		
In consultation with advisor, complete 12 graduate-level semester hours of FINA courses for which prerequisites have been met.		12
<b>Business Electives</b>		
In consultation with advisor, complete 15 graduate-level semester hours from the following for which prerequisites have been met:		15
ACCT, BUSN, ENTR, FINA, HRMG, INNO, INTB, MECN, MGMT, MKTG, SCHM, and STRT		

## Program Credit/GPA Requirements

72 total semester hours required  
Minimum 3.000 GPA required

### CONCENTRATION IN ANALYTICS

Code	Title	Hours
<b>Required</b>		
MISM 6200	Introduction to Business Analytics	3
<b>Electives</b>		
In consultation with advisor, complete 6 graduate-level semester hours from the following for which prerequisites have been met:		6
MISM 6202	Foundations of Data Analysis for Business	
MISM 6205	Data Wrangling for Business	
MISM 6210	Information Visuals and Dashboards for Business	
MISM 6212	Data Mining and Machine Learning for Business

<b>Required</b>		
FINA 6203	Investment Analysis	3
FINA 6219	Portfolio Management	3
<b>Electives</b>		
Complete 3 semester hours through our student-managed mutual fund. Each course is 1 semester hour and may be taken multiple times. At least 1 semester hour must be as a fund manager (FINA 6361).		3

FINA 6360	Fund Management for Analysts
or FINA 6361	Fund Management for Managers

**CONCENTRATION IN OPERATIONS AND SUPPLY CHAIN MANAGEMENT**

<b>Code</b>	<b>Title</b>	<b>Hours</b>
In consultation with advisor, complete 9 graduate-level semester hours from the following for which prerequisites have been met:		9

SCHM 6211	Logistics and Transportation Management
SCHM 6213	Global Supply Chain Strategy
SCHM 6214	Sourcing and Procurement
SCHM 6215	Supply Chain Analytics
SCHM 6221	Sustainability and Supply Chain Management
SCHM 6223	Managing Healthcare Supply Chain Operations
SCHM 6224	Demand Planning and Forecasting

**CONCENTRATION IN SUSTAINABILITY AND BUSINESS**

<b>Code</b>	<b>Title</b>	<b>Hours</b>
In consultation with advisor, complete 9 graduate-level semester hours from the following for which prerequisites have been met:		9

ENTR 6214	Social Enterprise
ENTR 6216	Global Social Entrepreneurship and Innovation
INTB 6217	Creating Sustainable Competitive Advantage through Global Innovation
MECN 6205	Sustainability and the Economics of Markets
MGMT 6225	Sustainability and Leadership
MGMT 6226	Sustainability and the Business Environment
SCHM 6221	Sustainability and Supply Chain Management

## Quantitative Finance and Business Administration, MSFMBA

Northeastern University's D'Amore-McKim School of Business positions students to become fintech leaders ready for the rapidly changing financial services industry. The Full-Time MS in Finance/MBA ([https://damore-mckim.northeastern.edu/programs/full-time-ms-finance-mba/?utm\\_source=internal-referral&utm\\_medium=nu-catalog&utm\\_campaign=ftmsfmba](https://damore-mckim.northeastern.edu/programs/full-time-ms-finance-mba/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=ftmsfmba)) combined degree program integrates business knowledge with advanced mathematical and technical skills.

### Integrating Classroom and Professional Experiences

Learning by doing is a hallmark of a Northeastern MBA. Students apply their knowledge to actual business challenges through experience-fueled electives and class projects. Students will gain invaluable experience at the intersection of business and finance through a corporate residency, translating ideas into action for three, six, or up to 12 months. Far removed from the typical internship, students work full-time at a leading firm or startup in their field and have significant responsibilities as they work to deliver on organizational goals.

### Cultivate Advanced Finance and Fintech Skills

Students pursue a major in quantitative finance that emphasizes the intersection of technology and business analytics with finance. Coursework integrates economics, mathematics, and computer science with financial theory and application. Students have an opportunity to develop mathematically demanding quantitative skills and fintech expertise.

Students can gain valuable experience performing equity research and portfolio management in a student-managed mutual fund, The 360 Huntington Fund. By participating in the Fund, students may earn 1 semester hour per semester with the option to fulfill a 3-semester-hour elective course requirement by participating for three terms.

### Select a Finance Concentration

Students specialize their degree by selecting a corporate finance or investments concentration. In the corporate finance concentration, students master a range of financial, analytical, and communication skills for increasing profitability and shareholder value. In the investments concentration, students become knowledgeable managers of assets for individuals or institutions, building their expertise in capital allocation, valuation, or risk management.

### Program Requirements

#### Business Administration Core Requirements

Code	Title	Hours
<b>Marketing</b>		
MKTG 6318	Customer Value and the Enterprise	2
<b>Strategic Decision Making</b>		
ACCT 6318	Analyzing Accounting Data for Strategic Decision Making	2

### **Program Credit/GPA Requirements**

67 total semester hours required

Minimum 3.000 GPA required

## Dual Degrees

Northeastern University's D'Amore-McKim School of Business prepares leaders with deep business expertise. Our interdisciplinary dual degree programs offer a powerful opportunity for students to build their future-forward business skills through an MBA and a deep foundation in a nonbusiness area. Dual degree students earn two degrees simultaneously—an MBA and a second degree in a nonbusiness field from another Northeastern school or college.

At Northeastern, experience is at the heart of everything we do. Our experience-powered educational model fuses robust classroom education with real-world application. Northeastern students benefit from opportunities to apply what they've learned in the classroom to real challenges in business and the industry of their second degree.

Dual degree programs merge many core requirements from a D'Amore-McKim MBA with a specialized master's degree, allowing students to finish their program in less time than it would take to earn the two degrees separately. This distinctive blend of knowledge and skill positions dual degree students to lead in two sectors.

Students enroll in dual degree programs for full-time study.

### Programs

- Law, JD / Accounting and Business Administration, MSAMBA (p. 232)
- Law, JD / Business Administration, MBA—Full-Time (p. 233)
- Law, LLM / Business Administration, MBA—Full-Time (p. 234)

## Law, JD / Accounting and Business Administration, MSAMBA

The Northeastern University School of Law and the D'Amore-McKim School of Business offer a combined degree that results in a Juris Doctor and Master of Science in Accounting and Business Administration. Students without a previous accounting background study how to operate effectively in specialized fields such as taxation law, corporate finance, or mergers and acquisitions. Students have an opportunity to gain advanced legal expertise alongside future-forward accounting and business knowledge.

Our combined degree program is a full-time, four-year course of study. Students usually complete two years of the law curriculum, followed by 15 months of the combined accounting and business administration curriculum, before returning to finish their studies at the School of Law.

Students gain valuable work experience in law and public accounting before they graduate. They can make a real impact during two co-ops in legal departments, law firms, government agencies, judges' chambers, or other legal settings. Students also experience working as an accounting associate during the busy tax season through a corporate residency at Big 4 or other globally known accounting firms.

Students concurrently pursue the two degrees and may count 12 semester hours of nonlaw coursework from the accounting and business administration curriculum toward the law curriculum. The corporate residency at an accounting firm may fulfill the requirement for the third co-op required for the law curriculum. Students are encouraged to consult their law advisor to select accounting and business classes that satisfy JD requirements.

## Law, JD / Business Administration, MBA—Full-Time

The JD/MBA dual degree is offered through a partnership between Northeastern University School of Law and the D'Amore-McKim School of Business to position students to operate in increasingly interdependent legal and business spheres. As new technology disrupts industries and data availability and sophisticated use shifts the business landscape, our JD/MBA (<https://damore-mckim.northeastern.edu/programs/jd-mba/>) students prepare to guide corporate-level strategy and become the leaders businesses need.

Our JD/MBA program is a full-time, four-year course of study that includes three semester-long co-op work experiences arranged through Northeastern Law. Students complete three years of law school, taking a break after either year one or two to complete a year of business courses.

Students specialize their program by selecting two in-demand business concentrations from the D'Amore-McKim School of Business. Or, they may add expertise in another professional area by selecting an interdisciplinary MBA x concentration in a highly relevant field offered through partnerships with other Northeastern colleges.

Students concurrently pursue the two degrees and may count 9 semester hours of nonlaw coursework from the JD curriculum toward the interdisciplinary and elective requirements of the MBA degree and up to 12 semester hours from the MBA curriculum toward the JD degree. Students should work with their MBA advisor to select JD courses that will fulfill MBA requirements and with their law advisor to choose MBA courses that will satisfy JD requirements.

**Law, LLM / Business Administration, MBA—Full-Time****Law, LLM / MBA**

The LLM/MBA dual degree is offered through a partnership between Northeastern University School of Law and the D'Amore-McKim School of Business to position students to harness legal and business skills to serve their clients' needs. In the LLM/MBA (<https://damore-mckim.northeastern.edu/programs/llm-mba/>) program, students prepare to assume leadership positions where they'll navigate complex legal issues, answer their clients' calls for legal expertise, and engage as partners to develop new models for businesses, nonprofit organizations, and governments worldwide.

The LLM/MBA program is a full-time, 20-month course of study. Students start taking classes in business school, take law courses next, and finish with business courses.

Students specialize their program by selecting two in-demand business concentrations from the D'Amore-McKim School of Business. Or, they could add expertise in another professional area by choosing an interdisciplinary MBA x concentration in a highly relevant field offered through partnerships with other Northeastern colleges.

Students concurrently pursue the two degrees and may be able to count up to 12 semester hours of coursework toward both degrees. Students should consult their MBA and LLM program advisors for more information.

**Law, LLM—Experiential / MBA**

The LLM/MBA dual degree is offered through a partnership between Northeastern Law and the D'Amore-McKim School of Business to position students to harness business and legal skills to serve their clients' needs. In the LLM/MBA (<https://damore-mckim.northeastern.edu/programs/llm-mba/>) program, students prepare to assume leadership positions where they'll navigate complex legal issues, answer their clients' calls for legal expertise, and engage as partners to develop new models for businesses, nonprofit organizations, and governments worldwide.

The LLM/MBA program is a full-time, two-year course of study that includes a semester-long co-op work experience arranged through Northeastern Law. During the course of their studies, students take classes in business school and the School of Law and complete a law co-op.

Students specialize their degree by selecting two in-demand business concentrations from the D'Amore-McKim School of Business. Or, they could add expertise in another professional area by selecting an interdisciplinary MBA x concentration in a highly relevant field offered through partnerships with other Northeastern colleges.

Students will concurrently pursue the two degrees and may be able to count up to 12 semester hours of coursework toward both degrees. Students should consult their MBA and LLM program advisors for more information.

## Graduate Certificates

Northeastern University's D'Amore-McKim School of Business helps professionals quickly develop the knowledge they need through short-term programs focused on a specific business area. Students in D'Amore-McKim's graduate certificates may choose to fill in gaps in their business knowledge or strengthen their skills in market-aligned areas to expand their career potential.

Here, students will have the opportunity to learn from our respected business faculty, many of whom are consultants, respected management leaders, and startup founders. Students will study alongside classmates with diverse backgrounds who share their passions and interests.

Students enroll in our 12–15 credit graduate certificate programs for full-time, part-time, or online study.

### Programs

- Accounting and Financial Decision Making, Graduate Certificate (p. 236)
- Brand Management, Graduate Certificate (p. 237)
- Business Administration, Graduate Certificate (p. 238)
- Business Administration, Graduate Certificate—Online (p. 240)
- Business Analytics, Graduate Certificate (p. 242)
- Business Management for Healthcare, Graduate Certificate (p. 243)
- Corporate Finance, Graduate Certificate (p. 244)
- Corporate Innovation, Graduate Certificate (p. 245)
- Corporate Renewal, Graduate Certificate (p. 246)
- Entrepreneurship, Graduate Certificate (p. 247)
- International Business, Graduate Certificate (p. 248)
- Investments, Graduate Certificate (p. 249)
- Leading People and Organizations, Graduate Certificate (p. 250)
- Marketing, Graduate Certificate (p. 251)
- Marketing Analytics, Graduate Certificate (p. 252)
- Mutual Fund Management, Graduate Certificate (p. 253)
- Supply Chain Management, Graduate Certificate (p. 254)
- Sustainability and Business, Graduate Certificate (p. 255)

## Accounting and Financial Decision Making, Graduate Certificate

Northeastern University D'Amore-McKim School of Business' Graduate Certificate in Accounting and Financial Decision Making ([http://www.damore-mckim.northeastern.edu/academic-programs/certificates/accounting/?utm\\_medium=website&utm\\_source=catalog&utm\\_campaign=gcafdm](http://www.damore-mckim.northeastern.edu/academic-programs/certificates/accounting/?utm_medium=website&utm_source=catalog&utm_campaign=gcafdm)) helps students build critical skills for essential financial practices, positioning them for a managerial role. Students learn to see business problems clearly, identify the strategic implications of potential solutions, and develop innovative ways to achieve organizational goals.

In just five courses—with the option to take a sixth to deepen their learning—students will advance their understanding of critical financial practices and build the skills necessary to analyze financial statements, assess risk, and make informed decisions. Depending on the electives they choose, they'll explore critical topics in greater depth, such as resource acquisition, capital budgeting, and information technology.

Students may enroll in the Graduate Certificate in Accounting and Financial Decision Making for full-time or part-time study.

### Program Requirements

#### Core Requirements

Code	Title	Hours
ACCT 6200 and ACCT 6201	Financial Reporting and Managerial Decision Making 1 and Financial Reporting and Managerial Decision Making 2	4.5
FINA 6219	Portfolio Management	3
MGSC 6200	Information Analysis	3

#### Elective

Code	Title	Hours
In consultation with advisor, complete one graduate-level course for which prerequisites have been met. Some courses may fulfill requirements of the MBA program.		
HRMG 6200	Managing People and Organizations	1.5-3
INNO 6200	Enterprise Growth and Innovation	
INTB 6200	Managing the Global Enterprise	
MECN 6200	Global Competition and Market Dominance	
MGSC 6204	Managing Information Resources	
MKTG 6200	Creating and Sustaining Customer Markets	
STRT 6200	Strategic Decision Making in a Changing Environment	

#### Program Credit/GPA Requirements

12 total semester hours required; may complete a maximum of 15 semester hours

Minimum 3.000 GPA required

## Brand Management, Graduate Certificate

Northeastern University D'Amore-McKim School of Business' Graduate Certificate in Brand Management ([https://damore-mckim.northeastern.edu/programs/brand-management-certificate/?utm\\_source=internal-referral&utm\\_medium=nu-catalog&utm\\_campaign=GCBM](https://damore-mckim.northeastern.edu/programs/brand-management-certificate/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=GCBM)) helps students create and manage brands that resonate with consumers. Students develop a strategic mindset and specialized skills equipped for today's dynamic digital marketing environment.

In just four courses—with an option to take a fifth to deepen your learning—you'll learn how to develop an integrated brand strategy that helps position an organization for growth. Your coursework will explore the brand-building process across platforms, and you'll choose electives that take a deeper look at topics such as consumer behavior, marketing research, and innovation.

Students may enroll in our Graduate Certificate in Brand Management for part-time study.

### Program Requirements

#### Core Requirements

Code	Title	Hours
MKTG 6200	Creating and Sustaining Customer Markets	3
MKTG 6230	Driving Marketing Performance: Measure, Analyze, Profit	3

#### Electives

Code	Title	Hours
In consultation with advisor, complete 6 graduate-level semester hours for which prerequisites have been met:		6
MKTG 6210	Marketing Research	
MKTG 6214	New Product Development	
MKTG 6218	Managing Customer Engagement in a Service World	
MKTG 6226	Consumer Behavior	
MKTG 6230	Driving Marketing Performance: Measure, Analyze, Profit	

#### Program Credit/GPA Requirements

12 total semester hours required; may take a maximum of 15 semester hours

Minimum 3.000 GPA required

## Business Administration, Graduate Certificate

Northeastern University D'Amore-McKim School of Business's Graduate Certificate in Business Administration ([https://damore-mckim.northeastern.edu/programs/business-administration-certificate/?utm\\_medium=content&utm\\_source=catalog&utm\\_campaign=dmsb-melt-avglo-comp-bos-bus-gcbaa-con-2022\\_02\\_25-gcba\\_catalog](https://damore-mckim.northeastern.edu/programs/business-administration-certificate/?utm_medium=content&utm_source=catalog&utm_campaign=dmsb-melt-avglo-comp-bos-bus-gcbaa-con-2022_02_25-gcba_catalog)) helps students gain forward-thinking, relevant, in-demand business skills.

There are four ways to earn this graduate certificate:

### Part-Time MBA Path Curriculum

Students take six foundational quantitative and business classes from the D'Amore-McKim MBA curriculum in the Part-Time MBA Path (<https://damore-mckim.northeastern.edu/programs/business-administration-certificate/academic-details/part-time-mba-path-curriculum/>).

### Build-Your-Own Curriculum

Students can align their courses to their professional goals by choosing one area of focus or widening their scope and building expertise on all business fundamentals as they build their curriculum (<https://damore-mckim.northeastern.edu/programs/business-administration-certificate/academic-details/build-your-own-curriculum/>).

### Eight-Month International Student Cohort Curriculum

Students take five courses as a part of an international student cohort. Students expand their business knowledge in financial reporting, managerial decision making, information analysis, and managing information resources.

### Accelerated Four-Month Curriculum

Students build business expertise in just one semester through our four-month certificate ([http://www.damore-mckim.northeastern.edu/academic-programs/certificates/business-administration/academics/accelerated/?utm\\_medium=website&utm\\_source=catalog&utm\\_campaign=gcba](http://www.damore-mckim.northeastern.edu/academic-programs/certificates/business-administration/academics/accelerated/?utm_medium=website&utm_source=catalog&utm_campaign=gcba)). Students can select any graduate-level business courses offered that semester, provided they meet course prerequisites.

Students may enroll in the Graduate Certificate in Business Administration for full-time or part-time study.

## Program Requirements

### Part-Time MBA Path Curriculum

Code	Title	Hours
ACCT 6200	Financial Reporting and Managerial Decision Making 1	3
ACCT 6201	Financial Reporting and Managerial Decision Making 2	1.5
FINA 6200	Value Creation through Financial Decision Making	3
HRMG 6200	Managing People and Organizations	3
MGSC 6200	Information Analysis	3
MGSC 6204	Managing Information Resources	1.5

### Eight-Month International Student Cohort Curriculum

Code	Title	Hours
ACCT 6200	Financial Reporting and Managerial Decision Making 1	3
HRMG 6200	Managing People and Organizations	3
INNO 6200	Enterprise Growth and Innovation	3
INTB 6200	Managing the Global Enterprise	3
MKTG 6200	Creating and Sustaining Customer Markets	3

### Build-Your-Own Curriculum

Code	Title	Hours
------	-------	-------

In consultation with advisor, complete 12–15 graduate-level semester hours for which prerequisites have been met. Choose from the following subject codes:

ACCT, BUSN, ENTR, FINA, HRMG, INTB, MECN, MGMT, MKTG, SCHM, STRT, and TECE

### Accelerated Four-Month Curriculum

Code	Title	Hours
------	-------	-------

In consultation with advisor, complete 12–15 graduate-level semester hours for which prerequisites have been met. Choose from the following subject codes:

ACCT, BUSN, ENTR, FINA, HRMG, INTB, MECN, MGMT, MKTG, SCHM, STRT, and TECE

## Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

## Business Administration, Graduate Certificate—Online

Northeastern University D'Amore-McKim School of Business' Online Graduate Certificate in Business Administration ([http://www.damore-mckim.northeastern.edu/academic-programs/certificates/business-administration/?utm\\_medium=website&utm\\_source=catalog&utm\\_campaign=gcba](http://www.damore-mckim.northeastern.edu/academic-programs/certificates/business-administration/?utm_medium=website&utm_source=catalog&utm_campaign=gcba)) helps students gain forward-thinking, in-demand business skills. Students can align their interests with their goals by choosing one area of focus, or they may choose to widen their scope and build expertise on all business fundamentals.

Students select four classes from finance, marketing, sustainability, entrepreneurship, investments, management, healthcare, or supply chain management.

12 total semester hours required

Minimum 3.000 GPA required

## Business Analytics, Graduate Certificate

Northeastern University D'Amore-McKim School of Business's Graduate Certificate in Business Analytics ([https://damore-mckim.northeastern.edu/programs/business-analytics-certificate/?utm\\_medium=content&utm\\_source=catalog&utm\\_campaign=dmsb-melt-evg-glo-comp-bos-bus-gcba-con-2022\\_02\\_25-gcbanalytics\\_catalog](https://damore-mckim.northeastern.edu/programs/business-analytics-certificate/?utm_medium=content&utm_source=catalog&utm_campaign=dmsb-melt-evg-glo-comp-bos-bus-gcba-con-2022_02_25-gcbanalytics_catalog)) is designed to equip students to use data to analyze information, generate insights, and translate them into sound strategy. Students build expertise in up-to-the-moment methods for using analytics in business.

In just four courses—with the option to take a fifth to deepen their knowledge base—students view the business world through a datacentric lens. Depending on their chosen electives, students explore critical topics in greater depth, such as advanced data mining techniques, visual dashboards, artificial intelligence, and programming languages.

Students may enroll in the Graduate Certificate in Business Analytics for full-time study.

### Program Requirements

#### Core Requirements

Code	Title	Hours
MISM 6200	Introduction to Business Analytics	3

#### Electives

Code	Title	Hours
In consultation with advisor, complete 9 graduate-level semester hours for which prerequisites have been met:		9
MISM 6202	Foundations of Data Analysis for Business	
MISM 6205	Data Wrangling for Business	
MISM 6210	Information Visuals and Dashboards for Business	
MISM 6212	Data Mining and Machine Learning for Business	
MISM 6213	Business Information Design, Quality, and Strategy	
SCHM 6215	Supply Chain Analytics	

#### Program Credit/GPA Requirements

12 total semester hours required; may take a maximum of 15 semester hours

Minimum 3.000 GPA required

## Business Management for Healthcare, Graduate Certificate

Northeastern University D'Amore-McKim School of Business' Graduate Certificate in Business Management for Healthcare ([https://damore-mckim.northeastern.edu/programs/business-management-healthcare-certificate/?utm\\_source=internal-referral&utm\\_medium=nu-catalog&utm\\_campaign=gcbmh](https://damore-mckim.northeastern.edu/programs/business-management-healthcare-certificate/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=gcbmh)) helps students gain critical business knowledge, up-to-the-moment technical skills, and a core understanding of key healthcare issues.

In just four courses—with an option to take a fifth to deepen their learning—students study the fundamentals of the American healthcare system and identify its unique challenges and opportunities. Depending on the electives they choose, students can take a deeper look at health policy, health informatics, and supply chain management for healthcare.

Students enroll in the Graduate Certificate in Business Management for Healthcare for part-time study.

### Program Requirements

#### Core Requirements

Code	Title	Hours
HINF 5105	The American Healthcare System	3
HRMG 6220	Health Organization Management	3
STRT 6220	Strategic Management for Healthcare Organizations	3

#### Electives

Code	Title	Hours
In consultation with advisor, complete 3 graduate-level semester hours from the following for which prerequisites have been met:		3
HINF 5101	Introduction to Health Informatics and Health Information Systems	
PHTH 5232	Evaluating Healthcare Quality	
PHTH 5234	Economic Perspectives on Health Policy	
SCHM 6223	Managing Healthcare Supply Chain Operations	

#### Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

## Corporate Finance, Graduate Certificate

Northeastern University D'Amore-McKim School of Business's Graduate Certificate in Corporate Finance ([https://damore-mckim.northeastern.edu/programs/corporate-finance-certificate/?utm\\_source=internal-referral&utm\\_medium=nu-catalog&utm\\_campaign=gccf](https://damore-mckim.northeastern.edu/programs/corporate-finance-certificate/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=gccf)) helps students advance their finance careers by building cutting-edge business planning, financial analysis, and investment management skill sets.

In just four courses—with the option to take a fifth course to further their learning—students have an opportunity to develop a deeper understanding of domestic and international markets, building a rich context for effective financial decision making. Depending on their chosen electives, students explore critical topics in greater depth, such as investment banking, mergers and acquisitions, and business turnarounds.

Students enroll in the Graduate Certificate in Corporate Finance for part-time study.

### Program Requirements

#### Core Requirement

Code	Title	Hours
FINA 6205	Financial Strategy	3

#### Electives

Code	Title	Hours
In consultation with advisor, complete 9 graduate-level semester hours from the following for which prerequisites have been met. Some courses may also apply to requirements of the MBA program.		9

ACCT 6200	Financial Reporting and Managerial Decision Making 1
FINA 6204	International Financial Management
FINA 6213	Investment Banking
FINA 6214	Mergers and Acquisitions
FINA 6215	Business Turnarounds
FINA 6216	Valuation and Value Creation
FINA 6260	Entrepreneurial Finance and Venture Capital
HRMG 6200	Managing People and Organizations
INTB 6200	Managing the Global Enterprise
MECN 6200	Global Competition and Market Dominance

INNO 6222	Competing in Dynamic, Innovation-Driven Markets
INNO 6225	Acquisitions, Alliances, and Growth
HRMG 6212	Creating an Innovative Organization
HRMG 6280	The Human Side of Innovation
MGMT 6280	Innovation for Next-Generation Products and Systems
MKTG 6214	New Product Development

#### Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

## Corporate Renewal, Graduate Certificate

Northeastern University D'Amore-McKim School of Business's Graduate Certificate in Corporate Renewal ([https://damore-mckim.northeastern.edu/programs/corporate-renewal-certificate/?utm\\_source=internal-referral&utm\\_medium=nu-catalog&utm\\_campaign=gccr](https://damore-mckim.northeastern.edu/programs/corporate-renewal-certificate/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=gccr)) is designed to prepare students with the skills and knowledge to reinvent troubled companies. Students develop an agile and strategic mindset—and a portfolio of skills from multiple disciplines.

In just four courses—with the option to take a fifth course to expand their learning—students have an opportunity to develop a deeper understanding of the management and financial issues companies face when they're in crisis and to build skills to facilitate the process of reinvention and restructuring. They study the essentials of guiding companies through workouts, bankruptcies, liquidations, and restructuring—and help them find success on the other side. Depending on their chosen electives, students explore critical topics in greater depth, such as strategic planning, innovation, and negotiation.

Students may enroll in our Graduate Certificate in Corporate Renewal for full-time or part-time study.

### Program Requirements

#### Core Requirements

Code	Title	Hours

MKTG 6216	Market Focused Strategy	

#### Program Credit/GPA Requirements

12 total semester hours required; may complete a maximum of 15 semester hours

Minimum 3.000 GPA required

## Entrepreneurship, Graduate Certificate

Northeastern University D'Amore-McKim School of Business's Graduate Certificate in Entrepreneurship ([https://damore-mckim.northeastern.edu/programs/entrepreneurship-certificate/?utm\\_source=internal-referral&utm\\_medium=nu-catalog&utm\\_campaign=gce](https://damore-mckim.northeastern.edu/programs/entrepreneurship-certificate/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=gce)) is designed to help students learn how to launch a cutting-edge venture and develop a business plan for a high-potential idea. Students have an opportunity to build a strong foundation of business knowledge that includes product development, planning, and competitive strategies.

In just four courses—with the option to take a fifth course to deepen their knowledge base—students study core business skills and essential best practices for commercializing innovation in a digital economy. Depending on their chosen electives, students explore critical topics in greater depth, such as disruptive technologies, lean design, or financing.

Students may enroll in the Graduate Certificate in Entrepreneurship for full-time or part-time study.

### Program Requirements

#### Core Requirement

Code	Title	Hours
INNO 6200	Enterprise Growth and Innovation	3

#### Electives

Code	Title	Hours
In consultation with advisor, complete 9 graduate-level semester hours from the following for which prerequisites have been met:		9

ENTR 6210	Managing Operations in Early Stage Ventures
ENTR 6212	Business Planning for New Ventures
ENTR 6214	Social Enterprise
ENTR 6218	Business Model Design and Innovation
ENTR 6219	Financing Ventures from Early Stage to Exit
ENTR 6240	Emerging and Disruptive Technologies
ENTR 6241	Entrepreneurial Marketing and Selling
ENTR 6250	Lean Design and Development
ENTR 6300	Managing a Technology-Based Business
FINA 6260	Entrepreneurial Finance and Venture Capital
GE 5030	Iterative Product Prototyping for Engineers

#### Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

## International Business, Graduate Certificate

Northeastern University D'Amore-McKim School of Business's Graduate Certificate in International Business ([https://damore-mckim.northeastern.edu/programs/international-business-certificate/?utm\\_source=internal-referral&utm\\_medium=nu-catalog&utm\\_campaign=gcib](https://damore-mckim.northeastern.edu/programs/international-business-certificate/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=gcib)) helps students cultivate a global mindset and develop the cultural agility required to lead in an increasingly globalized business world.

In just four courses—with the option to take a fifth to deepen their knowledge base—students study international trade issues, legal and political considerations for decision making, international currency markets, and significant cultural and ethical issues. Depending on their chosen electives, students explore critical topics in greater depth, such as competing in emerging markets or issues affecting global supply chain design.

Students may enroll in the Graduate Certificate in International Business for full-time or part-time study.

### Program Requirements

#### Core Requirements

Code	Title	Hours
INTB 6200	Managing the Global Enterprise	3
INTB 6212	Cultural Aspects of International Business	3

#### Electives

Code	Title	Hours
In consultation with advisor, complete 6 graduate-level semester hours from the following for which prerequisites have been met:		6
FINA 6204	International Financial Management	
INNO 6200	Enterprise Growth and Innovation	
INTB 6226	Becoming a Global Leader	
INTB 6230	Global Field Study	
INTB 6249	Digitization of International Business	
MECN 6200	Global Competition and Market Dominance	
MKTG 6212	International Marketing	
SCHM 6213	Global Supply Chain Strategy	

#### Program Credit/GPA Requirements

12 total semester hours required; may take a maximum of 15 semester hours

Minimum 3.000 GPA required

## Investments, Graduate Certificate

Northeastern University D'Amore-McKim School of Business's Graduate Certificate in Investments ([https://damore-mckim.northeastern.edu/programs/investments-certificate/?utm\\_source=internal-referral&utm\\_medium=nu-catalog&utm\\_campaign=gci](https://damore-mckim.northeastern.edu/programs/investments-certificate/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=gci)) is designed to equip students with a deep understanding of global markets, financial best practices, and quantitative and analytical tools.

In just four courses—with the option to take a fifth course to deepen their knowledge base—students have an opportunity to learn cutting-edge theories and quantitative tools for identifying, valuing, and analyzing investment choices. Depending on their chosen electives, students explore critical topics in greater depth, such as real estate investing, personal financial planning, risk management, and insurance.

Students enroll in our Graduate Certificate in Investments for part-time study.

### Program Requirements

Code	Title	Hours
FINA 6203	Investment Analysis	3

#### Electives

Code	Title	Hours
In consultation with advisor, complete 9 graduate-level semester hours from the following for which prerequisites have been met. Some courses may also apply to requirements of the MBA program.		9

ACCT 6200	Financial Reporting and Managerial Decision Making 1
FINA 6211	Financial Risk Management
FINA 6212	Fixed Income Securities and Risk
FINA 6213	Investment Banking
FINA 6217	Real Estate Finance and Investment
FINA 6219	Portfolio Management
HRMG 6200	Managing People and Organizations
INTB 6200	Managing the Global Enterprise
MECN 6200	Global Competition and Market Dominance
MKTG 6200	Creating and Sustaining Customer Markets
STRT 6200	Strategic Decision Making in a Changing Environment

#### Program Credit/GPA Requirements

12 total semester hours required; may take a maximum of 15 semester hours

Minimum 3.000 GPA required

## Leading People and Organizations, Graduate Certificate

Northeastern University D'Amore-McKim School of Business' Graduate Certificate in Leading People and Organizations ([https://damore-mckim.northeastern.edu/programs/leading-people-certificate/?utm\\_source=internal-referral&utm\\_medium=nu-catalog&utm\\_campaign=gclpo](https://damore-mckim.northeastern.edu/programs/leading-people-certificate/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=gclpo)) helps students develop cutting-edge skills for developing and leading successful teams.

In just four courses—with the option to take a fifth course to deepen their knowledge base—students learn essential principles for building and leading high-performing and collaborative teams. Depending on the electives chosen, students explore critical topics in greater depth, such as health organization management, negotiating, or leading for environmental sustainability.

Students may enroll in our Graduate Certificate in Leading People and Organizations for full-time and part-time study.

### Program Requirements

#### Core Requirement

Code	Title	Hours
HRMG 6200	Managing People and Organizations	3

#### Electives

Code	Title	Hours
In consultation with advisor, complete 9 graduate-level semester hours from the following for which prerequisites have been met:		9

HRMG 6212	Creating an Innovative Organization
HRMG 6218	Great Companies
HRMG 6220	Health Organization Management
HRMG 6223	Global Talent Management
MGMT 6214	Negotiations
STRT 6210	Workforce Metrics and Analytics

#### Program Credit/GPA Requirements

12 semester hours required; may take a maximum of 15 semester hours

Minimum 3.000 GPA required

## Marketing, Graduate Certificate

Northeastern University D'Amore-McKim School of Business' Graduate Certificate in Marketing ([https://damore-mckim.northeastern.edu/programs/marketing-certificate/?utm\\_source=internal-referral&utm\\_medium=nu-catalog&utm\\_campaign=gcm](https://damore-mckim.northeastern.edu/programs/marketing-certificate/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=gcm)) prepares students to leverage digital marketing tools to capitalize on trends and communicate powerfully with an audience.

In just four courses—with the option to take a fifth course to deepen their knowledge base—students learn how technology transforms the ways companies engage their customers. They dive into topics such as social media, marketing research, consumer behavior, marketing analysis, planning and strategy, and innovation.

Students may enroll in our Graduate Certificate in Marketing for full-time or part-time study.

### Program Requirements

#### Core Requirement

Code	Title	Hours
MKTG 6200	Creating and Sustaining Customer Markets	3

#### Electives

Code	Title	Hours
In consultation with advisor, complete 9 graduate-level semester hours from the following for which prerequisites have been met:		9

MKTG 6210	Marketing Research
MKTG 6212	International Marketing
MKTG 6214	New Product Development
MKTG 6216	Market Focused Strategy
MKTG 6218	Managing Customer Engagement in a Service World
MKTG 6222	Digital Marketing
MKTG 6223	Brand and Advertising Management
MKTG 6224	B2B and Strategic Sales
MKTG 6226	Consumer Behavior
MKTG 6230	Driving Marketing Performance: Measure, Analyze, Profit
MKTG 6234	Marketing Analytics

#### Program Credit/GPA Requirements

12 total semester hours required; may take a maximum of 15 semester hours

Minimum 3.000 GPA required

## Marketing Analytics, Graduate Certificate

Northeastern University D'Amore-McKim School of Business' Graduate Certificate in Marketing Analytics ([https://damore-mckim.northeastern.edu/programs/marketing-analytics-certificate/?utm\\_source=internal-referral&utm\\_medium=nu-catalog&utm\\_campaign=gcma](https://damore-mckim.northeastern.edu/programs/marketing-analytics-certificate/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=gcma)) empowers students with the skills they need to turn data into smart marketing strategies.

In just four courses—with the option to take a fifth course to further their learning—students focus on the role of data and technology in a modern marketing strategy, from customer relationship management to performance measurement. They develop analytical, computational, and strategic thinking skills that will help them link the insights they generate to the marketing results they want.

Students enroll in our Graduate Certificate in Marketing Analytics for part-time study.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
MKTG 6200	Creating and Sustaining Customer Markets	3
MKTG 6234	Marketing Analytics	3

#### Electives

Code	Title	Hours
In consultation with advisor, complete 6 graduate-level semester hours from the following for which prerequisites have been met:		6
MKTG 6210	Marketing Research	
MKTG 6216	Market Focused Strategy	
MKTG 6222	Digital Marketing	
MKTG 6230	Driving Marketing Performance: Measure, Analyze, Profit	

### Program Credit/GPA Requirements

12 total semester hours required; may take a maximum of 15 semester hours

Minimum 3.000 GPA required

## Mutual Fund Management, Graduate Certificate

Northeastern University D'Amore-McKim School of Business' Graduate Certificate in Mutual Fund Management ([http://www.damore-mckim.northeastern.edu/academic-programs/certificates/mutual-fund-management/?utm\\_medium=website&utm\\_source=catalog&utm\\_campaign=gcmfm](http://www.damore-mckim.northeastern.edu/academic-programs/certificates/mutual-fund-management/?utm_medium=website&utm_source=catalog&utm_campaign=gcmfm)) helps students build the skills to become knowledgeable asset managers that create value by spotting opportunities and capitalizing on growth.

In just four courses—with the option to take a fifth course to deepen your knowledge base—students learn the essentials of managing funds, including allocating assets, managing risk, and complying with regulations. Depending on the electives chosen, students explore critical topics in greater depth, such as market analysis or fixed-income securities.

Students may enroll in our Graduate Certificate in Mutual Fund Management for part-time study.

### Program Requirements

#### Core Requirements

Code	Title	Hours
In consultation with advisor, complete 9 graduate-level semester hours for which prerequisites have been met:		9
FINA 6202	Analysis of Financial Institutions and Markets	
FINA 6203	Investment Analysis	
FINA 6212	Fixed Income Securities and Risk	
FINA 6219	Portfolio Management	
FINA 6360	Fund Management for Analysts (Complete 3 semester hours through our student managed mutual fund. Each course is 1 semester hour and may be taken multiple times.)	

#### Electives

Code	Title	Hours
In consultation with advisor, complete 3 graduate-level semester hours for which prerequisites have been met:		3
FINA 6202	Analysis of Financial Institutions and Markets	
FINA 6203	Investment Analysis	
FINA 6211	Financial Risk Management	
FINA 6212	Fixed Income Securities and Risk	
FINA 6213	Investment Banking	
FINA 6217	Real Estate Finance and Investment	
FINA 6219	Portfolio Management	
FINA 6360	Fund Management for Analysts (Complete 3 semester hours through our student managed mutual fund. Each course is 1 semester hour and may be taken multiple times.)	

#### Program Credit/GPA Requirements

12 total semester hours required; may take a maximum of 15 semester hours

Minimum 3.000 GPA required

## Supply Chain Management, Graduate Certificate

Northeastern University D'Amore-McKim School of Business' Graduate Certificate in Supply Chain Management ([https://damore-mckim.northeastern.edu/programs/supply-chain-management-certificate/?utm\\_source=internal-referral&utm\\_medium=nu-catalog&utm\\_campaign=gcscm](https://damore-mckim.northeastern.edu/programs/supply-chain-management-certificate/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=gcscm)) helps students become skilled supply chain leaders who can respond to disruption with agility and confidence.

In just four courses—with the option to take a fifth course to deepen their knowledge base—students build a strong portfolio of skills for optimizing supply chains from end to end, advancing their knowledge of sourcing, logistics, inventory management, and process control. They also have the opportunity to explore elective topics important to their professional goals, such as creating and managing sustainable supply chains.

Students may enroll in our Graduate Certificate in Supply Chain Management for full-time or part-time study.

### Program Requirements

#### Core Requirements

Code	Title	Hours
SCHM 6201	Operations and Supply Chain Management	3
SCHM 6213	Global Supply Chain Strategy	3

#### Electives

Code	Title	Hours
In consultation with advisor, complete 6 graduate-level semester hours for which prerequisites have been met:		6
SCHM 6211	Logistics and Transportation Management	
SCHM 6214	Sourcing and Procurement	
SCHM 6215	Supply Chain Analytics	
SCHM 6221	Sustainability and Supply Chain Management	
SCHM 6223	Managing Healthcare Supply Chain Operations	
SCHM 6224	Demand Planning and Forecasting	

#### Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

## Sustainability and Business, Graduate Certificate

Northeastern University D'Amore-McKim School of Business' Graduate Certificate in Sustainability and Business ([https://damore-mckim.northeastern.edu/programs/sustainability-business-certificate/?utm\\_medium=content&utm\\_source=catalog&utm\\_campaign=dmsb-melt-evg-glo-comp-bos-bus-gcsb-con-2022\\_02\\_25-gcsb\\_catalog](https://damore-mckim.northeastern.edu/programs/sustainability-business-certificate/?utm_medium=content&utm_source=catalog&utm_campaign=dmsb-melt-evg-glo-comp-bos-bus-gcsb-con-2022_02_25-gcsb_catalog)) helps students build the skills to increase efficiency, drive value, and build trust through sustainable practices.

In just four courses—with the option to take a fifth course to expand their learning—students learn to implement sustainable business strategies to create a competitive edge for organizations. Depending on the electives chosen, students may dive into social entrepreneurship, public policy, and sustainable supply chain management.

Students may enroll in our Graduate Certificate in Sustainability and Business for part-time study.

### Program Requirements

## Khoury College of Computer Sciences

Website (<https://khoury.northeastern.edu>)

**Elizabeth Mynatt, PhD**, Dean

**Ben Hescott, PhD**, Teaching Professor, Senior Associate Dean of Academic Programs and Student Experience

**Jodi Tims, PhD**, Associate Dean of Khoury College in the Global Network

**Amal Ahmed, PhD**, Associate Dean for Graduate Programs

**Meg Barry Bebis**, Senior Director for Graduate Student Services and Career Development

617.373.6840

khoury- ([Khoury-gradschool@northeastern.edu](mailto:Khoury-gradschool@northeastern.edu))[gradschool@northeastern.edu](mailto:gradschool@northeastern.edu) ([gradschool@ccs.neu.edu](mailto:gradschool@ccs.neu.edu))

At the Khoury College of Computer Sciences, we are inspired by our information-driven world and strive to make it a better place. Our students engage in rigorous learning and real-world co-op experiences. Our renowned faculty shapes minds, sparks innovation, and inspires ideas. Our interdisciplinary research breaks new ground to solve everyday problems.

Khoury maintains a strong research program with significant funding from the major federal research agencies and private industry. With a substantial increase in faculty strength and research funding in recent years, we are actively seeking highly motivated, bright, hardworking students who are interested in pursuing a PhD degree in computer science or in the interdisciplinary field of cybersecurity, network science, or personal health informatics. Graduate students and faculty members are involved in exciting projects in a wide range of research areas, including programming languages, software engineering, distributed and parallel computing, cryptography, network security, health informatics, network science, databases, information retrieval, robotics, visualization, and artificial intelligence. Colloquia and weekly research seminars contribute to the vibrant research atmosphere in the college.

Our curriculum encompasses both the breadth and depth needed for graduate school. Specialized, advanced courses for PhD students in computer science, cybersecurity, and personal health informatics are designed to prepare all students for research early in their doctoral education.

The Master of Science in Computer Science curriculum combines the study of basic algorithms and theoretical computer science principles with advanced programming and software design methods. It offers students the opportunity to develop the analytical and problem-solving skills needed to pursue challenging professional careers.

Khoury also offers the Master of Science in Artificial Intelligence, which provides a comprehensive framework of theory and practice in this emerging field and incorporates elements of data science, robotics, and machine learning; and the Master of Science in Cybersecurity focuses on information technology and incorporates the understanding of the social sciences, law, criminology, and management needed to prevent and combat cyberattacks.

In addition, we offer four interdisciplinary master's degree programs: the Master of Science in Health Informatics with Bouvé College of Health Sciences, which seeks to prepare graduates to use information technology to improve healthcare delivery and outcomes; the Master of Science in Data Science with the College of Engineering, which is designed to give students a comprehensive framework for processing, modeling, analyzing, and reasoning about data; the Master of Science in Robotics with the College of Engineering, which offers students an opportunity to obtain a comprehensive understanding of the algorithms, sensors, control systems, and mechanisms used in robotics; and the Master of Science in Game Science and Design with the College of Arts, Media and Design, which seeks to provide students with a comprehensive understanding of how successful game products are created in a player-centric environment.

The Align program enables intellectually curious students to earn a Master of Science in Computer Science or Data Science without a background in the field. Regardless of undergraduate major or prior programming experience, Align's custom curricula is designed to prepare students for high-demand industries.

Khoury College is a tightly knit community, and the faculty, staff, and students interact regularly through town hall meetings, social gatherings, lectures, and seminars. A diverse, multicultural graduate student body and faculty encourage rich extracurricular interaction. The Master's Council organizes a number of social events to promote friendship and camaraderie within the Khoury community.

## Academic Policies and Procedures

- Absenteeism (p. 258)
- Academic Integrity (p. 259)
- Academic Probation and Dismissal (p. 260)
- Certificates (p. 261)
- Pass / Fail Policy (p. 262)
- Transfer of Credit (p. 263)

## Absenteeism

Students are expected to attend all classes and lab sections for their registered courses. Any student who anticipates missing a class due to illness or emergency situations is expected to contact their professor as soon as possible.

While students are welcome to travel over winter and summer breaks, the Khoury College of Computer Sciences expects students to return to campus in a timely manner and to be present for the first week of classes each term. Students who do not arrive back to campus on time may be dropped from their classes until they return to campus. The Office of the University Registrar posts current and future academic calendars (<https://registrar.northeastern.edu/group/calendar/>) on their website so travel plans can be made accordingly.

Students who are hired as teaching assistants are to be present and fulfill all expected employment responsibilities for the entirety of the semester. The scope of employment will include but not be limited to first class welcome/orientation through the grading of final examinations or final projects. Any violation or neglect of these requirements will be considered a violation of the Student Code of Conduct.

## Academic Integrity

### Violation Submission and Review Process

In the event a faculty member finds a student in violation of the Academic Integrity Policy, faculty will be asked to submit a report to the Khoury College Academic Integrity Committee. The Academic Integrity Committee will convene on a regular basis to review all proposals and appeals. Students will be notified of the determination made by the Academic Integrity Committee after the nearest meeting takes place. Students will have the opportunity to appeal all decisions made by the college.

### Violations by Khoury College Master's Students

Students found in violation of the Academic Integrity Policy will be placed on deferred suspension by the college. A deferred suspension is the most serious formal warning for a violation of the Academic Integrity Policy and remains with the student for the remainder of their time in the program. Based on the severity of the violation, the Academic Integrity Committee may recommend one or more of the following sanctions:

- Removal of co-op privilege for the remainder of time in the MS program
- Suspension or deferral of co-op for one to two semesters
- Disqualification from paid graduate student positions within the college (i.e., graders, course assistants, TA/RA appointments)
- No further consequence beyond assignment of a deferred suspension

Students deemed to be in violation of the Academic Integrity Policy for a second instance may be terminated from their respective graduate program.

In accordance with university policy, the college maintains the right to override decisions issued by the Office of Student Conduct and Conflict Resolution in the area of academic performance.

Students will have the right to appeal any and all decisions issued by the Master's Academic Integrity Committee. The appeals process is outlined below.

### Appeals Process

Students are entitled to appeal all decisions made by the college's Academic Integrity Appeals Committee. The appeals committee will be comprised of a graduate co-op faculty member, the associate director of graduate student services, and one Khoury faculty member. Cases submitted concerning students from interdisciplinary programs will be reviewed by an appeals committee that includes a member of the partner college administration at the associate dean or faculty level. Student appeals will first be heard by the committee itself and then by the college dean. In the event the appeal is denied at both college levels, the student will have the right to have their appeal heard by a provost review committee. Appeals will be heard on a monthly basis, in accordance with the Academic Integrity Committee meeting schedule.

Details regarding the university appeal process can be found in the graduate catalog here (p. 70).

## Academic Probation and Dismissal

A student whose overall GPA falls below 3.000 will be automatically placed on academic probation and will be notified by the college. Once on probation, a student has one academic semester (summer excluded) to achieve a 3.000 GPA. If the GPA is still unsatisfactory at the end of that semester, the student will be eligible for dismissal from the graduate program. In programs that require prerequisite or Align bridge courses, these courses count toward the GPA for academic standing.

Students should refer to their program's requirements page regarding any applicable core GPA requirement.

### Appeals Process

Students are entitled to appeal dismissal and dismissal override decisions made by the college's Academic Standing Committee. Appeals should be submitted within five business days of dismissal notification. All appeals to the college should be submitted in writing. The appeals committee will be comprised of the associate dean of graduate programs, the associate dean of graduate program administration, the director of graduate operations, and an academic advisor. Cases submitted concerning students from interdisciplinary programs will be reviewed by an appeals committee that includes a member of the partner college administration at the associate dean or faculty level. Student appeals will first be heard by the committee itself and then by the college dean. Appeals will be reviewed within five business days of submission by the Academic Standing Committee. In the event the appeal is denied at both college levels, the student will have the right to have their appeal heard by a provost review committee.

Details regarding the university appeal process can be found in the graduate catalog here (p. 70).

## Certificates

### Admission Requirements

#### INTERNAL APPLICANTS/CURRENT GRADUATE STUDENTS AT NORTHEASTERN UNIVERSITY

Current Northeastern students will be required to submit an online application in order to have the certificate program added to their transcript. Please contact Khoury graduate admissions with any questions.

In order to be admitted to Khoury graduate certificate programs, current Northeastern students must be in good academic standing. Students on academic probation will not be admitted into a graduate certificate program. Students must apply for admission to a certificate program prior to their final term of study. Requests for admission in the final term will not be considered.

#### EXTERNAL APPLICANTS

To apply for admission to the Graduate Certificate in Data Analytics program, you must submit an online application that includes:

- PDF or scanned copies of unofficial undergraduate transcripts (you can submit official transcripts from colleges/universities attended at the time of admission)
- Statement of purpose including description of relevant work experience
- Three confidential letters of reference from individuals that know your academic record and/or potential for graduate study
- Official TOEFL examination scores (international students only)

Acceptance to Khoury is granted upon recommendation of the college graduate committee after a review of the completed application.

### Visa Compliance

Please note that the data analytics certificate is not an F-1-eligible program. International students enrolled in MS programs at the university are required to comply with all enrollment visa regulations regarding online course enrollment. Please contact the Office of Global Services if you have questions regarding your enrollment status.

### Certificate Coursework Applied to Khoury Graduate Degrees

Certificate coursework completed by graduate students may be used in some cases toward a Khoury graduate degree.

- Graduate Certificate in Data Analytics: With approval from the health informatics program director, selected students can substitute one course from the Graduate Certificate in Data Analytics for a technical core requirement in the Master of Science in Health Informatics degree, and up to two more courses from the Graduate Certificate in Data Analytics can be counted as electives for the Master of Science in Health Informatics degree.
- Graduate Certificate in Computer Science: Object-Oriented Design (CS 5004) is only eligible to be counted toward the MSCS degree provided that the student is enrolled in the MSCS-Align program; it is not eligible for inclusion in the MSCS program as a stand-alone elective.
- Graduate Certificate in Cloud Software Development: All four courses (16 credits) of the Graduate Certificate in Cloud Software Development are eligible to count toward the eight-course (32-credit) MSCS degree requirement.

### Academic Standing

In order to maintain good standing in the certificate programs, students must have a B average or better at the conclusion of each semester. A student whose overall grade-point average falls below 3.000 will be automatically placed on academic probation and will be notified by the college. Once on probation, a student has one academic semester (summer excluded) to achieve a 3.000 GPA. If the GPA is still unsatisfactory at the end of that semester, the student will be eligible for dismissal from the graduate certificate program. In programs that require a prerequisite, these courses count toward the GPA for academic standing.

If a student receives an F grade in any of the certificate courses, the student will be required to retake and pass that course in order to qualify for completion of the program.

### Graduation Requirements

Students must have an average GPA of 3.000 overall in the certificate course in order to complete the certificate program.

### Co-op

Students in the certificate program are not eligible to participate in the Khoury graduate co-op program.

## Pass / Fail Policy

### **Pass/Fail Policy**

Khoury College of Computer Sciences does not allow Khoury graduate students to elect a pass/fail grading basis for courses normally letter graded.

## Transfer of Credit

A maximum of 9 semester hours of credit obtained at another institution may be accepted toward the degree, provided the credits meet the following criteria:

- Work is completed at the graduate level for graduate credit
- Student received a grade of 3.000 or better
- Credits were earned at an accredited institution
- Credits have not been used toward any other degree

Transfer credit will be offered only for courses that match a course offered at Northeastern University and that have been approved by the graduate committee. However, no transfer credit will be given for courses listed as interdisciplinary courses.

Students can submit a request for transfer of credit after they have begun taking courses in the Khoury College of Computer Sciences. Please see your academic advisor for the procedure to submit a request.

## Computer Science

At the Khoury College of Computer Sciences, we are inspired by an increasingly interconnected society, informed by a rapidly changing job market, and focused on addressing the challenges of a complex world. Our goal is to equip students with knowledge as diverse as it is deep. Our programs provide a strong technical foundation and an essential understanding of computing concepts while integrating computer and data sciences across disciplines and industries.

Our master's degrees are advanced programs that are designed to prepare students to be job ready through a rigorous curriculum, innovative research, experiential learning, and a collaborative environment rich in faculty expertise.

Our research-driven doctoral programs offer students an opportunity to engage in exciting projects, a vibrant community, and a challenging curriculum that offers breadth and depth in areas both within computer science and across disciplines throughout Northeastern University.

Graduate education in computer science also features the top-ranked Northeastern co-op program, enabling students to supplement their classroom education with real-world experience in the field.

### Doctor of Philosophy in Computer Science

The PhD program in computer science is designed to prepare students for careers in academia and industry—from conducting research to developing systems to publishing and presenting papers. The rigorous curriculum provides a broad background in the fundamentals of computer science and advanced courses in a wide range of focus areas.

The past decade has witnessed a dramatic increase in Northeastern's international reputation for research and innovative educational programs. Since 2012, the Khoury College of Computer Sciences has hired 30 outstanding faculty members and plans to continue this strategic growth in the coming years, advancing its position (<http://csrankings.org/>) among the nation's top research universities. Today, the college has a diverse faculty (<https://www.ccis.northeastern.edu/role/tenured-and-tenure-track-faculty/>) of 75, working in a wide range of research areas (<https://www.ccis.northeastern.edu/research/research-areas/>). Twenty-two faculty members have joint appointments with other colleges and schools, including engineering, science, business, social sciences and humanities, health sciences, law and arts, and media and design.

### Master of Science in Artificial Intelligence

The Master of Science program in artificial intelligence is designed to give students a comprehensive framework for AI with specialization in one of five areas: vision, intelligent interaction, robotics and agent-based systems, machine learning, and knowledge management and reasoning. Students will engage in an extensive core intended to develop depth in all core concepts that build a foundation for AI theory and practice. Students will also be given the opportunity to build on the core knowledge of AI by taking a variety of elective courses selected from colleges throughout campus to explore key contextual areas or more complex technical applications. Program graduates will be well positioned to attain research and development positions in a rapidly growing field or to progress into doctoral-degree-related fields.

### Master of Science in Data Science

Khoury College of Computer Sciences and the Department of Electrical and Computer Engineering jointly offer an interdisciplinary Master of Science program in data science. This program is designed to give students a comprehensive framework for reasoning about data. Students will engage in extensive coursework intended to develop depth in data collection, storage, retrieval, manipulation, visualization, modeling, and interpretation. Students will also be able to choose elective courses from a variety of offerings in Khoury, the College of Engineering, and throughout the campus to explore areas that generate data or specialized data science applications. Students in the MS program in data science will complete a capstone course, working with real-world data and applying what they have learned during the program. Successful program graduates will be well positioned to attain data scientist and data engineer positions in a fast-growing field or to progress into doctoral degrees in related disciplines.

### Align Master of Science in Data Science

Students in the Align MS-DS program come from a variety of backgrounds, where they merge their existing knowledge with data science skills. Students will learn theoretical foundations and gain extensive experience with practical problems in the discipline, including data acquisition, storage, analysis, probabilistic modeling, model deployment, and presentation.

### Master of Science in Robotics

The Master of Science in Robotics program, offered jointly by the College of Engineering and the Khoury College of Computer Sciences at Northeastern, looks at this fundamentally interdisciplinary field from three connected angles: mechanical engineering, electrical engineering, and computer science.

Through a technically challenging curriculum, hands-on learning, and industry co-op placements, students have an opportunity to gain a comprehensive understanding of the algorithms, control systems, and mechanisms used in robotics to help them stand out in the field and make a transformative impact on society.

For more information on the program, please visit the College of Engineering program page here (p. 290).

### Master of Science in Computer Science

Northeastern's Master of Science in Computer Science is designed to prepare students for a variety of careers in computer science. The program combines both computing and important application domains—enabling students to increase their broad-based knowledge in the field while focusing

on one curricular concentration selected from a range of options including artificial intelligence, computer-human interaction, graphics, programming languages, software engineering, data science, networks, theory, game design, systems, and information security.

### **Align Master of Science in Computer Science**

MSCS-Align students come from a wide variety of backgrounds—with undergraduate majors ranging from math, biology, history, engineering, and classics. In this program, students have an opportunity to acquire both the knowledge needed to transition into a new career and the practical skills to build the next great app.

MSCS-Align Online—Take online courses from anywhere, with the flexibility to complete the courses fully online or transfer to one of our strategically located campuses after you've completed the bridge portion of the program. Align Online students will also have three in-person campus visits during the first two semesters to form peer and professional connections. The MSCS-Align Online option is not an F-1 compliant program.

### **Graduate Certificate in Cloud Software Development**

The Graduate Certificate in Cloud Software Development provides students of all backgrounds with the foundational skills needed to pursue a career in cloud computing. Through a four-course program that emphasizes hands-on, industry-facing experiential learning—via Khoury College's partnerships with leading cloud platform companies like AWS, Google, and Microsoft—you'll gain the technical ability, exposure, and experience to work on any cloud computing platform, as well as the career-building resources to put you on the fast track in this growing field.

### **Graduate Certificate in Computer Science**

The postbaccalaureate certificate is designed to give students a solid foundation in the mathematical and theoretical underpinnings of computer science, including the areas of discrete mathematics, basic programming, data structures, object-oriented programming, algorithms, and computer systems. The goal of the certificate is to provide foundational knowledge in computer science that is valuable in both the workplace for career advancement as well as to those looking to move into graduate programs within the discipline.

The Graduate Certificate in Computer Science will serve as the foundational premaster's courses in the Align program.

### **Graduate Certificate in Data Analytics**

The interdisciplinary Graduate Certificate in Data Analytics is offered through a collaboration between the Khoury College of Computer Sciences and the College of Social Sciences and Humanities. The certificate curriculum emphasizes the skills needed to bridge between emerging technological capacities and traditional policymaking processes. The program is designed to provide students with foundational knowledge in data science—including data management, machine learning, data mining, statistics, and visualizing and communicating data—that can be applied to data-driven decision making in any discipline.

### **Graduate Certificate in Inclusive Computer Science Education**

The Graduate Certificate in Inclusive Computer Science Education is designed to prepare students to teach computer science principles and concepts in the context of a K–12 environment. Building on the successful Computer Science—Align program, this certificate assumes no prior computer science experience. Through coursework and project-based learning, students have an opportunity to obtain the foundational knowledge necessary to teach basic computing concepts and programming at a variety of educational levels both as stand-alone courses and integrated into other disciplines. The certificate emphasizes how teachers can create an inclusive classroom environment, actively work to dispel stereotypes, and build student confidence. Students who finish this certificate will be well positioned to obtain K–12 certification in computer science.

## **Programs**

### **Doctor of Philosophy (PhD)**

- Computer Science (p. 267)
- Network Science (p. 273)

### **Master of Science (MS)**

- Artificial Intelligence (p. 277)
- Data Science (p. 279)
- Data Science—Align (p. 281)
- Game Science and Design (p. 133)
- Internet of Things (p. 286)
- Robotics (p. 290)

### **Master of Science in Computer Science (MSCS)**

- Computer Science (p. 293)
- Computer Science—Align (p. 295)

### **Graduate Certificate**

- Cloud Software Development (p. 297)
- Computer Science (p. 298)

- Data Analytics (p. 299)
- Inclusive Computer Science Education (p. 300)

## Computer Science, PhD

The PhD in Computer Science is designed to prepare students for careers in academia, industrial and national research labs, and technical leadership in industry and government. The rigorous curriculum provides a broad background in the fundamentals of computer science, advanced courses in a wide range of focus areas, and opportunity to make an impact at the forefront of computing. The program provides training in conducting research, publishing and presenting papers, developing systems, and establishing science and technology policy.

### Coursework

A minimum of 48 semester hours of coursework beyond the BS/BA degree is required of all students.

All students must demonstrate sufficient knowledge in the fundamentals of computer science, as well as the ability to carry out research in an area of computer science.

The student must maintain a minimum grade-point average of 3.500 among the six core courses and receive a grade of B or better in each of these courses. Students who have taken equivalent courses in other institutions may petition to be exempted from the course(s) (subject to the approval of the PhD computer science curriculum committee). Each student may repeat a course once for no more than three out of the six courses if they do not receive a B or better in the course. Students with a Master of Science in Computer Science may petition to the PhD computer science curriculum committee for an exemption from these courses. Petition forms are available on the college website.

The fields listed do not necessarily represent areas of specialization or separate tracks within the PhD program. Rather, they attempt to delineate areas on which the student must be examined in order to measure their ability to complete the degree. Therefore, they may be adjusted in the future to reflect changes in the discipline of computer science and in faculty interests within the Khoury College of Computer Sciences. Similarly, these fields do not represent the only areas in which a student may write their dissertation. They are, however, intended to serve as a basis for performing fundamental research in computer science.

### Paper Requirement

To demonstrate research ability, the student is required to submit to the PhD committee a research or a survey paper in an area of specialty under the supervision of a faculty advisor. A submitted paper from a student is considered to have fulfilled the paper requirement if:

1. The paper has been accepted by a selective conference.
2. The student has made a substantial contribution to the paper.
3. The advisor has endorsed the paper with a written statement indicating the student's contribution.
4. The PhD computer science curriculum committee has voted on a positive recommendation. The committee may require a presentation from the student before making a recommendation.

### Admission to Candidacy

Upon completion of the course and the research paper requirements, the student is admitted to candidacy for the PhD degree. It is highly recommended that the student complete the candidacy requirement by the end of their second year but no later than the third year.

### Residency

One year of continuous full-time study is required after admission to the PhD candidacy. It is expected that during this period the student will make substantial progress in preparing for the comprehensive examination.

### Teaching Requirement

All computer science PhD students must satisfy the teaching requirement in order to graduate. This requirement is fulfilled when the student works as a teaching assistant or instructor of record for one semester and during this semester:

- Teaches at least three hours of classes
- Prepares at least one assignment, or quiz, or equivalent

PhD students are expected to satisfy the teaching requirement some time after completing their first year and at least one semester prior to scheduling their PhD defense.

### Comprehensive Examination/Dissertation Proposal

After the student has achieved sufficient depth in a field of study, they prepare a proposal for the PhD dissertation. This process should take place no later than the end of the fifth year in residence. The student prepares a dissertation proposal, which describes the proposed research, including the relevant background materials from the literature. The proposal should clearly specify the research problems to be attacked, the techniques to be used, and a schedule of milestones toward completion.

The dissertation proposal must be approved by the dissertation committee. With the help of the advisor, a student selects the committee, consisting of at least four members, to be approved by the PhD computer science curriculum committee. The four members must include the advisor, two internal members, and an external member.

Upon approval of the written proposal, the student has to present the proposed work orally in a public forum, followed by a closed-door oral examination from the dissertation committee. The student may take the dissertation proposal examination twice, at most.

### Doctoral Dissertation

Upon successful completion of solving the research proposed in the dissertation proposal, the candidate has an opportunity to prepare the dissertation for approval by the dissertation committee. The dissertation must contain results of extensive research and make an original contribution to the field of computer science. The work should give evidence of the candidate's ability to carry out independent research. It is expected that the dissertation should be of sufficient quality to merit publication in a reputable journal in computer science.

### Doctoral Committee

With the help of the advisor, a student selects the committee, consisting of at least four members, to be approved by the PhD computer science curriculum committee. The four members must include the advisor, two internal members, and an external member.

### Dissertation Defense

The dissertation defense is held in accordance with the regulations of the University Graduate Curriculum Committee. It consists of a lecture given by the candidate on the subject matter of the dissertation. This is followed by questions from the dissertation committee and others in attendance concerning the results of the dissertation as well as any related matters. The defense is chaired by the PhD advisor.

### Time and Time Limitation

After the establishment of degree candidacy, a maximum of five years will be allowed for the completion of the degree requirements, unless an extension is granted by the college graduate committee.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Milestones

- Coursework
- Paper requirement
- Admission to candidacy
- Residency
- Teaching requirement
- Comprehensive examination/dissertation proposal
- Doctoral dissertation
- Doctoral committee
- Dissertation defense

### Course Area Requirements

A grade of B or higher is required in each course. A cumulative 3.500 GPA is required for the core requirement.

Students should refer to the course numbering table for graduate course leveling (p. 55).

Code	Title	Hours
Complete a total of six courses. Courses must cover at least four of the five areas, and a maximum of two courses may be at the 5000 level.		24
At least two courses must be 7000-level seminar courses.		
At least two courses must be 7000-level nonseminar courses.		
<b>Artificial Intelligence and Data Science</b>		
<i>Seminar Courses</i>		
CS 7170	Seminar in Artificial Intelligence	
CS 7270	Seminar in Database Systems	
<i>Nonseminar Courses</i>		
CS 7140	Advanced Machine Learning	
CS 7150	Deep Learning	
CS 7180	Special Topics in Artificial Intelligence	
CS 7200	Statistical Methods for Computer Science	
CS 7240	Principles of Scalable Data Management: Theory, Algorithms, and Database Systems	
CS 7280	Special Topics in Database Management	
CS 7290	Special Topics in Data Science	
CS 7380	Special Topics in Graphics/Image Processing	

*Other Courses*

CS 5100	Foundations of Artificial Intelligence
CS 5150	Game Artificial Intelligence
CS 5170	Artificial Intelligence for Human-Computer Interaction
CS 5180	Reinforcement Learning and Sequential Decision Making
CS 5200	Database Management Systems
CS 5330	Pattern Recognition and Computer Vision
CS 5335	Robotic Science and Systems
CS 5850	Building Game Engines
CS 6120	Natural Language Processing
CS 6140	Machine Learning
CS 6200	Information Retrieval
CS 6220	Data Mining Techniques
CS 6240	Large-Scale Parallel Data Processing
CY 6720	Machine Learning in Cybersecurity and Privacy
DS 5110	Introduction to Data Management and Processing

## Advanced Entry Program Requirements Coursework

Incoming PhD in Computer Science students who have already completed a Master of Science in Computer Science or an adjacent field may petition to the PhD in Computer Science program administration for advanced entry. Advanced entry petitions are reviewed by the program administration on a case-by-case basis. Please note that advanced standing does not waive by itself any part of the PhD coursework requirements.

As a degree conferral requirement, a minimum of 16 semester hours of coursework beyond the 32 semester hours of the master's degree is required of advanced entry PhD students (48 semester hours is required of standard entry PhD students). Students must maintain a minimum GPA of 3.500 as well as earn a grade of B or better in each course.

## Paper Requirement

Refer to the Computer Science, PhD, overview (p. 267), for research/survey paper requirements.

## Admission to Candidacy

Refer to the Computer Science, PhD, overview, (p. 267) for admission to candidacy requirements.

## Residency

Refer to the Computer Science, PhD, overview, (p. 267) for residency requirements.

## Teaching Requirement

Refer to the Computer Science, PhD, overview, (p. 267) for the teaching requirement.

## Comprehensive Examination/Dissertation Proposal

Refer to the Computer Science, PhD, overview, (p. 267) for comprehensive examination requirements.

Complete all courses and requirements listed below unless otherwise indicated.

### Milestones

Annual review  
 Course requirements  
 Paper requirement  
 Comprehensive exam

16 total semester hours required  
 Minimum overall 3.500 GPA required

## Network Science, PhD

Website (<http://www.networkscienceinstitute.org>)

The PhD program in network science aims to enhance our understanding of networks arising from the interplay of human behavior, sociotechnical infrastructures, information diffusion, and biological agents. This is an intrinsically multidisciplinary activity, with members of the network science community representing a wide range of fields including computer science, information science, complexity, physics, sociology, communication, organizational behavior, political science, and epidemiology. This is an interdisciplinary doctoral program focused on training students in network science across several colleges—including the College of Social Sciences and Humanities, the College of Science, the Khoury College of Computer Sciences, and Bouvé College of Health Sciences—with several research areas, including computational sciences, information sciences, health and life sciences, social sciences, and theoretical physics. See other collaborating colleges' catalog sections for possible elective courses.

Coursework is dependent on a student's area of research and subject to prior approval by their faculty advisor. Required coursework includes 20 semester hours of core courses in network science, plus an additional 20 semester hours of courses relevant to the students' area of research. A minimum of 40 credit hours of coursework is required, though the graduate program committee may recommend additional coursework based on student research interests.

Satisfactory progress in the program will be ongoing and formally evaluated at the end of both the first and second years of the program. Students are expected to maintain a cumulative GPA of 3.000 or better in all coursework. Students are not allowed to retake courses. A student who does not maintain the 3.000 GPA, or is not making satisfactory progress on their dissertation research, may be recommended for termination by the graduate program committee.

Each student will have one primary research advisor from the network science doctoral program faculty.

Students will be expected to select their research advisor by the end of the spring semester of their second year in the program.

The dissertation committee consists of at least four members: the dissertation advisor, one additional network science doctoral program faculty member, one member expert in the specific topic of research (can be from outside the university), and one additional tenured/tenure-track faculty member from the concentration department/conferring college. The dissertation advisor must be a full-time tenured or tenure-track member of the Northeastern University faculty. Students may repeat the comprehensive examination once if they are unsuccessful.

### Degree Candidacy

A student is considered a PhD candidate upon completion of all required coursework with a minimum cumulative GPA of 3.000, satisfactory completion of the qualification exam, and satisfactory completion of the comprehensive exam.

### Qualifying Examination

The qualification exam will be an oral examination of the material during the students' coursework. The exam will be an hour in length and consist of questions selected by network science faculty who comprise the qualifying examination and dissertation committee. Students will receive 50 to 80 potential questions, which they must be prepared to answer, one month before the exam. The exam will consist of a subset of these questions. The qualifying exam will be offered twice annually, in the fall and spring terms. All students are required to initially sit for the exam in the fall, typically in their third year of the PhD program. Students who do not pass the qualifying exam on their first attempt are expected to retake the exam in the spring term. Students may sit for the qualifying exam no more than twice.

Students who fail to complete the qualifying examination but who have completed all the PhD program's required coursework with a cumulative GPA of 3.000 or better will be awarded a terminal Master of Science in Network Science degree. Note that no students will be admitted directly into the network science program for receipt of a master's degree.

### Comprehensive Examination

Students must submit a written dissertation proposal to the dissertation committee. The proposal (with the aid and approval of their dissertation advisor) will outline a plan to carry out new and original research. The proposal should identify relevant literature, the research problem, the research plan, and the potential impact on the field. An oral presentation of the proposal will be made in an open forum before a public audience and the dissertation committee, followed by questions from noncommittee members. The written proposal must be given to committee members at least two weeks prior to the oral presentation. After the presentation, the student will meet with the dissertation committee to address any concerns raised in either the written proposal or the presentation. The comprehensive exam must precede the final dissertation defense by at least one year.

### Dissertation Defense

A PhD student must complete and defend a dissertation that involves original research in network science. The dissertation defense must adhere to Northeastern academic policies.

---

*Students who do not qualify for the doctoral degree, but who have completed required coursework with a cumulative GPA of 3.000 or better, may be eligible to receive a terminal Master of Science in Network Science (<http://catalog.northeastern.edu/graduate/social-sciences-humanities/interdisciplinary/network-science-ms/>). Note that no students will be admitted directly into the network science program to pursue a master's degree.*

## Artificial Intelligence, MS

The Master of Science in Artificial Intelligence program is designed to give students a comprehensive framework for AI with specialization in one of five areas: vision, intelligent interaction, robotics and agent-based systems, machine learning, and knowledge management and reasoning. Students may choose from three options: specialization, thesis, or coursework only. Students will engage in an extensive core intended to develop depth in all core concepts that build a foundation for AI theory and practice. Students will also be given the opportunity to build on the core knowledge of AI by taking a variety of elective courses, selected from colleges throughout campus, to explore key contextual areas or more complex technical applications. Program graduates will be well positioned to attain research and development positions in a rapidly growing field or to progress into doctoral-degree-related fields.

The Master of Science in Artificial Intelligence is comprised of eight courses: five core courses, two electives to be chosen from one of five specialization areas or coursework option, and one elective. The core courses are designed and developed by Khoury College faculty. Elective courses consist of graduate courses offered in Khoury and other partner colleges, including College of Arts, Media and Design; College of Engineering; College of Science; and College of Social Sciences and Humanities.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Core Requirements

A cumulative GPA of 3.000 or higher is required in the following core courses:

Code	Title	Hours
<b>Intelligence</b>		
CS 5100	Foundations of Artificial Intelligence	4
<b>Programming and Algorithms</b>		
CS 5010	Programming Design Paradigm	4
CS 5800	Algorithms	4
<b>Machine Learning</b>		
CS 6140	Machine Learning	4
<b>Interaction</b>		
CS 5170	Artificial Intelligence for Human-Computer Interaction	4

### Options

Complete one of the following options:

#### SPECIALIZATION OPTION

Code	Title	Hours
Complete two courses from one of the following specializations:		
<b>Vision</b>		
CS 5330	Pattern Recognition and Computer Vision	8
CS 7180	Special Topics in Artificial Intelligence	
EECE 5639	Computer Vision	
EECE 7370	Advanced Computer Vision	
<b>Intelligent Interaction</b>

**Program Credit/GPA Requirements**

32 total semester hours required

Minimum 3.000 GPA required

## Data Science, MS

Khoury College of Computer Sciences and the Department of Electrical and Computer Engineering jointly offer an interdisciplinary Master of Science in Data Science. This program is designed to give students a comprehensive framework for reasoning about data. Students engage in extensive coursework intended to develop depth in data collection, storage, retrieval, manipulation, visualization, modeling, and interpretation. Students are also able to choose elective courses from a variety of offerings in Khoury, the College of Engineering, and throughout the campus to explore areas that generate data or specialized data science applications. Successful program graduates are well positioned to attain data scientist and data engineer positions in a fast-growing field or to progress into doctoral degrees in related disciplines.

During the admissions process, applicants take a pretest to determine if the Master of Science in Data Science or Master of Science in Data Science (p. 281)– (p. )Align (p. 281) fits better with their current skill level. In addition, prospective applicants work with recruitment and enrollment coaching teams to select the appropriate program before applying.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Students should refer to the course numbering table for graduate course leveling (p. 55).

### Core Requirements

A cumulative GPA of 3.000 or higher is required in the following core courses.

Code	Title	Hours
Complete 20 semester hours from the following:		
<b>Data Management and Processing</b>		
DS 5110	Introduction to Data Management and Processing	4
<b>Algorithms</b>		
Complete 4 semester hours from the following:		
CS 5800	Algorithms	4
EECE 7205	Fundamentals of Computer Engineering	
<b>Machine Learning and Data Mining</b>		
DS 5220	Supervised Machine Learning and Learning Theory	4
DS 5230	Unsupervised Machine Learning and Data Mining	4
<b>Presentation and Visualization</b>		
DS 5500	Data Science Capstone	4

### Electives

Code	Title	Hours
Complete 12 semester hours from the following: <sup>1</sup>		
<b>Khoury College of Computer Sciences</b>		
CS 5100	Foundations of Artificial Intelligence	
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5200	Database Management Systems

### Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

<sup>1</sup> Students taking electives worth less than 4 semester hours (i.e., Bouvé courses) should enroll for an accompanying data science project course in the same semester to bring the cumulative semester hours to 4. In order to earn this additional credit, students are expected to work with faculty to design an additional project in line with the curricular aims of their chosen elective and the data science core learning outcomes.

## Data Science, MS—Align

Khoury College of Computer Sciences and the Department of Electrical and Computer Engineering jointly offer an interdisciplinary Master of Science in Data Science. This program is designed to give students a comprehensive framework for reasoning about data. Students engage in extensive coursework intended to develop depth in data collection, storage, retrieval, manipulation, visualization, modeling, and interpretation. Students are also able to choose elective courses from a variety of offerings in Khoury, the College of Engineering, and throughout the campus to explore areas that generate data or specialized data science applications. Successful program graduates are well positioned to attain data scientist and data engineer positions in a fast-growing field or to progress into doctoral degrees in related disciplines.

During the admissions process, applicants take a pretest to determine if the Master of Science in Data Science or Master of Science in Data Science—Align fits better with their current skill level. In addition, prospective applicants work with recruitment and enrollment coaching teams to select the appropriate program before applying.

The Master of Science in Data Science—Align curriculum is specifically designed to prepare incoming students without any prior programming experience. During the first semester of year one, students are expected to take foundational courses in computer science fundamentals, as well as a course in data structures/discrete mathematics. During their second semester, students will take coursework in programming for data science, as well as linear algebra and probability.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Students should refer to the course numbering table for graduate course leveling (p. 55).

### Align Bridge Coursework

Students are required to complete all bridge courses unless otherwise determined by the program.

A grade of B or higher is required in each course.

Code	Title	Hours
<i>Fundamentals</i>		
CS 5001 and CS 5003	Intensive Foundations of Computer Science and Recitation for CS 5001	4
<i>Discrete Structures</i>		
CS 5002	Discrete Structures	4
<i>Programming for Data Science</i>		
DS 5010	Introduction to Programming for Data Science	4
Additional Align Coursework		
DS 5020	Introduction to Linear Algebra and Probability for Data Science	4

### Core Requirements

A cumulative GPA of 3.000 or higher is required in the following core courses:

Code	Title	Hours
Complete 20 semester hours from the following:		
<b>Algorithms</b>		
Complete 4 semester hours from the following:		
CS 5800	Algorithms	4
EECE 7205	Fundamentals of Computer Engineering	
<b>Data Management and Processing</b>		
DS 5110	Introduction to Data Management and Processing	4
<b>Machine Learning and Data Mining</b>		
DS 5220	Supervised Machine Learning and Learning Theory	4
DS 5230	Unsupervised Machine Learning and Data Mining	4
<b>Presentation and Visualization</b>		
DS 5500	Data Science Capstone	4

### Electives <sup>1</sup>

**Program Credit/GPA Requirements**

40–48 total semester hours required

Minimum 3.000 GPA required

- <sup>1</sup> Students taking electives worth less than 4 SH (i.e., Bouvé courses) should enroll for an accompanying data science project course in the same semester to bring the cumulative SH to 4. In order to earn this additional 1 SH, students are expected to work with faculty to design an additional project in line with the curricular aims of their chosen elective and the data science core learning outcomes.

## Game Science and Design, MS

The **Master of Science (MS) in Game Science and Design** is a program that seeks to give students a comprehensive understanding of how successful game products are created in a player-centric environment. Successful graduates who wish to become professional game developers or game user research experts should be able to collaborate effectively in this dynamic and burgeoning field of practice and research. Focusing on the science of game development, students have an opportunity to learn the design and technological skills needed to build a game and develop a deep understanding of playability and analytics that makes products successful in an increasingly competitive marketplace.

The game industry has expanded to include social and mobile gaming; augmented and virtual reality; as well as games in health, education, and training. Rapid innovations are happening in player psychology, middleware, graphics and authoring tools, game mechanics, and artificial intelligence and narrative techniques. It has become an increasingly competitive space.

The selectiveness of the industry and the diversity of the skills required mean that students seeking entry need both broad and deep skills. As an emergent industry using diverse technology and collaborative practices, the game industry needs professionals with interdisciplinary skill sets who can blend knowledge about development with knowledge about evaluation methods and players' behavior and psychology.

Jointly offered by Northeastern's College of Arts, Media and Design and Khoury College of Computer Sciences (<https://www.khoury.northeastern.edu/>), the **Master of Science in Game Science and Design** is a one-of-a-kind interdisciplinary program that seeks to prepare students to meet this need by weaving together science and design. This is a two-year, 34-credit-hour program.

All admitted students will be assigned to an advisor who will help them select a pathway with a coherent set of electives depending on their career goals. The advisor will also monitor their progress through the master's degree.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
<b>Required Core</b>		
GSND 5110 and GSND 5111 and GSND 5112	Game Design and Analysis and Seminar for GSND 5110 and Recitation for GSND 5110	5
GSND 5122	Business Models in the Game Industry	1
GSND 5130 and GSND 5131	Mixed Research Methods for Games and Recitation for GSND 5130	4
<b>Thesis</b>		
GSND 6330 and GSND 6331	Player Experience and Recitation for GSND 6330	4
GSND 7990	Thesis	4

#### Electives

Code	Title	Hours
<b>Game Design or Development</b>		
Complete one of the following:		4
CS 5150	Game Artificial Intelligence	
CS 5850	Building Game Engines	
GSND 6000	Advanced Topics in Game Design	
GSND 6240	Exploratory Concept Design	
GSND 6250	Spatial and Temporal Design	
GSND 6460	Generative Game Design	
<b>Game User Research or Analytics</b>		
Complete one of the following:		4
CS 5340	Computer/Human Interaction	
GSND 6001	Advanced Topics in Game Science	
GSND 6320	Psychology of Play	
GSND 6340	Biometrics for Design	
GSND 6350	Data-Driven Player Modeling	

Code	Title	Hours
<b>Other Electives List</b>		
Complete any two of the previously listed courses or from the following (courses not listed below may be completed in consultation with your program coordinator).		8
If ARTG 5000 or GSND 6000 or GSND 6001 is completed more than once, the additional completions may be allowed toward the electives.		
Elective courses outside of CAMD are subject to availability and registration policy of the home college.		
ARTG 5000	Topics in Design	
ARTG 5130	Visual Communication for Information Design	
ARTG 5310	Visual Cognition	
ARTG 5330	Visualization Technologies 1: Fundamentals	
ARTG 5610	Design Systems	
ARTG 5640	Prototyping for Experience Design	
ARTG 6310	Design for Behavior and Experience	
CS 5520	Mobile Application Development	
CS 5610	Web Development	
DA 5020	Collecting, Storing, and Retrieving Data	
DA 5030	Introduction to Data Mining/Machine Learning	
GSND 6000	Advanced Topics in Game Design	
GSND 6001	Advanced Topics in Game Science	
INSH 5302	Information Design and Visual Analytics	
JRNL 6341	Telling Your Story with Data	

**Program Credit/GPA Requirements**

34 total semester hours required  
 Minimum 3.000 GPA required

**Plan of Study**

**Sample Two Years, One Co-op (Optional) Plan of Study**

Year 1					
Fall	Hours	Spring	Hours	Summer Full Semester	Hours
GSND 5110 and GSND 5111 and GSND 5112		5 Elective		4 Co-op (optional)	0
GSND 5130 and GSND 5131		4 Elective		4	
		<b>9</b>			<b>8</b>
<b>0</b>					
Year 2					
Fall	Hours	Spring	Hours		
GSND 5122		1 GSND 7990		4	
GSND 6330 and GSND 6331		4 Elective		4	
Elective		4			
		<b>9</b>			<b>8</b>

**Total Hours: 34**

Note: Co-op or Thesis Co-op is optional in consultation with faculty advisor.

## Internet of Things, MS

The Master of Science in Internet of Things is an interdisciplinary program administered by the Institute for the Wireless Internet of Things, the Department of Electrical and Computer Engineering, and the Khoury College of Computer Sciences. This program is aimed at preparing highly qualified researchers and a specialized workforce that will lead the development of a globally interconnected continuum of untethered devices and objects interacting with the physical environment, people, and each other. The program will provide students with the necessary knowledge and skills to understand, design, and implement autonomous wireless networked systems of tomorrow operating in uncertain, challenging, extreme environments, through a combination of coursework, master project research, and/or industry experience.

### Program Requirements

#### Core Requirements

Code	Title	Hours
EECE 5155	Wireless Sensor Networks and the Internet of Things	4
Complete one of the following:		4
EECE 5576	Wireless Communication Systems	
EECE 7364	Mobile and Wireless Networking	
Complete one of the following:		4
CS 5800	Algorithms	
CS 7800	Advanced Algorithms	
EECE 7205	Fundamentals of Computer Engineering	
Complete one of the following:		4
CS 6140	Machine Learning	
EECE 5612	Statistical Inference: An Introduction for Engineers and Data Analysts	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
EECE 5698	Special Topics in Electrical and Computer Engineering	
Complete one of the following:		4
EECE 7244	Introduction to Microelectromechanical Systems (MEMS)	
EECE 7368	High-Level Design of Hardware-Software Systems	
Complete two courses from the following for a total of 4 semester hours:		
EECE 7400	Special Problems in Electrical and Computer Engineering	1
INNO 6230	Platform Innovation	3
or MGMT 6280	Innovation for Next-Generation Products and Systems	
Complete one of the following:		4
CY 5120	Applied Cryptography	
CY 5150	Network Security Practices	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
CY 6740	Network Security	
CY 6760	Wireless and Mobile Systems Security	
EECE 5641	Introduction to Software Security	
EECE 5699	Computer Hardware and System Security	

### Options

#### COURSEWORK OPTION

Code	Title	Hours
Complete 4 semester hours from the course list below. (p. 286)		4

#### MASTER'S PROJECT OPTION

## Robotics, MS

For program contact information, please visit this website (<https://coe.northeastern.edu/academic-programs/ms-robo/>).

The multidisciplinary Master of Science program in robotics is offered by the College of Engineering and the Khoury College of Computer Sciences. The program is designed to provide students comprehensive training in algorithms, sensors, control systems, and mechanisms used in robotics.

### Gordon Institute of Engineering Leadership

#### Master's Degree in Robotics with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Robotics in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 40-semester-hour degree and certificate will require 24 semester hours of advisor-approved robotics technical courses.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
<b>Mechanical Engineering</b>		
Complete one of the following:		4
ME 5250	Robot Mechanics and Control	
ME 5659	Control Systems Engineering	
<b>Electrical and Computer Engineering</b>		
Complete one of the following:		4
EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5554	Robotics Sensing and Navigation	
<b>Computer Science</b>		
Complete one of the following:		4
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5335	Robotic Science and Systems	

#### Concentrations

Complete one of the following concentrations:

- Mechanical Engineering (p. 290)
- Electrical and Computer Engineering (p. 291)
- Computer Science (p. 291)

#### MECHANICAL ENGINEERING

Code	Title	Hours
Students in the mechanical engineering concentration follow the College of Engineering co-op policies.		
<b>Required Course</b>		
Complete one additional ME course not used to fulfill the core requirements:		4
ME 5250	Robot Mechanics and Control	
ME 5659	Control Systems Engineering	
<b>Complete one of the following options:</b>		
<i>Coursework Option</i>		
Complete 16 semester hours of courses from the elective course list. (p. 291)		16
<i>Project Option</i>		
ME 7945	Master's Project	4
Complete 12 semester hours of courses from the elective course list. (p. 291)		12
<i>Thesis Option</i>		

ME 7990	Thesis	8
Complete 8 semester hours of courses from the elective course list. (p. 291)		8

**ELECTRICAL AND COMPUTER ENGINEERING**

Code	Title	Hours
------	-------	-------

Students in the electrical and computer engineering concentration follow the College of Engineering co-op policies.

**Required Course**

Complete one additional EECE course not used to fulfill the core requirements: 4

EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5554	Robotics Sensing and Navigation	

**Complete one of the following options:***Coursework Option*

Complete 16 semester hours of courses from the elective course list. (p. 291) 16

*Project Option*

EECE 7674 Master's Project 4

Complete 12 semester hours of courses from the elective course list. (p. 291) 12

*Thesis Option*

EECE 7990 Thesis 8

Complete 8 semester hours of courses from the elective course list. (p. 291) 8

**COMPUTER SCIENCE**

Code	Title	Hours
------	-------	-------

Students in the computer science concentration follow the Khoury College of Computer Sciences co-op policies.

**Required Course**

Complete one additional CS course not used to fulfill the core requirements: 4

CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5335	Robotic Science and Systems	

**Complete one of the following options:***Coursework Option*

Complete 16 semester hours of courses from the elective course list. (p. 291) 16

*Project Option*

CS 8674 Master's Project 4

Complete 12 semester hours of courses from the elective course list. (p. 291) 12

*Thesis Option*

CS 8674 Master's Project 4

CS 7990 Thesis 4

Complete 8 semester hours of courses from the elective course list. (p. 291) 8

**Elective Course List**

Code	Title	Hours
------	-------	-------

CS 5097	Mixed Reality	
CS 5100	Foundations of Artificial Intelligence	
CS 5170	Artificial Intelligence for Human-Computer Interaction	
CS 5330	Pattern Recognition and Computer Vision	
CS 5340	Computer/Human Interaction	
CS 5800	Algorithms	
CS 6120	Natural Language Processing	
CS 6140	Machine Learning	
CS 6350	Empirical Research Methods	
CS 7140	Advanced Machine Learning	
CS 7150	Deep Learning	
CS 7180	Special Topics in Artificial Intelligence	
DS 5220	Supervised Machine Learning and Learning Theory	
EECE 5550	Mobile Robotics	

EECE 5552	Assistive Robotics

ME 5659	Control Systems Engineering
ME 5665	Musculoskeletal Biomechanics
ME 6200	Mathematical Methods for Mechanical Engineers 1
ME 6260	Introduction to Microelectromechanical Systems (MEMS)
ME 7247	Advanced Control Engineering

### Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

## Computer Science, MScS

Northeastern University's Master of Science in Computer Science is designed to prepare students for a variety of careers in computer science. The program combines both computing and important application domains—enabling you to increase your broad-based knowledge in the field while allowing you to delve deeper in specific areas through elective courses.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Students should refer to the course numbering table for graduate course leveling (p. 55).

### Core Requirements

Code	Title	Hours
<b>Programming</b>		
CS 5010	Programming Design Paradigm	4
<b>Algorithms</b>		
CS 5800	Algorithms	4

### Breadth Areas

Code	Title	Hours
Complete three courses from two of the following breadth areas:		12
<i>Systems and Software</i>		
CS 5400	Principles of Programming Language	
CS 5500	Foundations of Software Engineering	
CS 5520	Mobile Application Development	
CS 5600	Computer Systems	
CS 5610	Web Development	
CS 5700	Fundamentals of Computer Networking	
CS 6410	Compilers	
CS 6510	Advanced Software Development	
CS 6650	Building Scalable Distributed Systems	
CS 6710	Wireless Network	
<i>Theory and Security</i>		
CS 6760	Privacy, Security, and Usability	
CS 7805	Complexity Theory	
CY 5770	Software Vulnerabilities and Security	
CY 6740	Network Security	
<i>Artificial Intelligence and Data Science</i>		
CS 5100	Foundations of Artificial Intelligence	
CS 5150	Game Artificial Intelligence	
CS 5200	Database Management Systems	
CS 5330	Pattern Recognition and Computer Vision	
CS 6120	Natural Language Processing	
CS 6140	Machine Learning	
CS 6200	Information Retrieval	
CS 6220	Data Mining Techniques	
CS 6240	Large-Scale Parallel Data Processing	
CS 7140	Advanced Machine Learning	

### Electives

Code	Title	Hours
Complete 12 semester hours from the following: <sup>1</sup>		12
CS 5097	Mixed Reality	
CS 5100 to CS 7980		
CS 7990	Thesis	

CS 8674	Master's Project
CS 8982	Readings
CY 5010	Foundations of Information Assurance
CY 5130	Computer System Security
CY 5210	Information System Forensics
DS 5110	Introduction to Data Management and Processing
DS 5230	Unsupervised Machine Learning and Data Mining

<sup>1</sup> Specific electives such as CS 7980 Research Capstone, CS 7990 Thesis, or CS 8674 Master's Project may be required at certain Northeastern campuses. Students should consult with their program advisor when developing a plan of study.

### **Program Credit/GPA Requirements**

32 total semester hours required

Minimum 3.000 GPA required

## Computer Science, MSCS—Align

Master of Science in Computer Science—Align students come from a wide variety of backgrounds, with undergraduate majors including math, biology, history, engineering, and classics. The program begins with a two-semester introductory sequence, which provides the foundational knowledge for students from nontechnical backgrounds to succeed. Students have an opportunity to acquire both the knowledge needed to transition into a new career and the practical skills to build the next great app.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Align Bridge Coursework

Students are required to take all bridge courses unless otherwise determined by the program.

A grade of B or higher is required in each course.

Code	Title	Hours
<i>Fundamentals</i>		
CS 5001 and CS 5003	Intensive Foundations of Computer Science and Recitation for CS 5001	4
<i>Discrete Structures</i>		
CS 5002	Discrete Structures	4
<i>Object-Oriented Design</i>		
CS 5004 and CS 5005	Object-Oriented Design and Recitation for CS 5004	4
<i>Additional ALIGN courses</i>		
CS 5008 and CS 5009	Data Structures, Algorithms, and Their Applications within Computer Systems and Recitation for CS 5008	4

### Core Requirements

Code	Title	Hours
<b>Algorithms</b>		
CS 5800	Algorithms	4

## Program Credit/GPA Requirements

36-44 total semester hours required

Minimum 3.000 GPA required

## Cloud Software Development, Graduate Certificate

The Graduate Certificate in Cloud Software Development is designed to give students a strong foundation for working with cloud computing platforms like Amazon Web Services, Google Cloud, and Microsoft Azure. Through coursework and project-based learning, students gain the exposure needed to work across these platforms and also in hybrid platform environments. Cloud skills are in higher demand than ever before. However, there is a significant lack of qualified, skilled professionals to support this growth, especially for deployment in non-tech-related industries—such as manufacturing, transportation, travel, entertainment, and education—that rely increasingly on cloud platforms as part of their day-to-day operations. This certificate is aimed at addressing this skills gap utilizing the Khoury Align program’s innovative curriculum and student support model, as well as course-based experiential learning opportunities to train students for in-demand and high-paying jobs.

### Prerequisite

To ensure that all students have the foundation necessary to be successful in this program, each incoming student must demonstrate that they have taken undergraduate or graduate coursework in computer science or that they have comparable professional experience. This admission requirement can also be fulfilled by successful completion of Intensive Foundations of Computer Science (CS 5001).

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Core Requirements

Code	Title	Hours
CS 5004	Object-Oriented Design	4
CS 5610	Web Development	4
CS 6510	Advanced Software Development	4
CS 6620	Fundamentals of Cloud Computing	4

### Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

## Computer Science, Graduate Certificate

The postbaccalaureate certificate is designed to give students a solid foundation in the mathematical and theoretical underpinnings of computer science, including the areas of discrete mathematics, basic programming, data structures, object-oriented programming, algorithms, and computer systems. The goal of the certificate is to provide foundational knowledge in computer science that is valuable in both the workplace for career advancement, as well as to those looking to move into graduate programs within the discipline.

The courses in the Postbaccalaureate Certificate in Computer Science will serve as the foundational premaster's courses in the Align program. Students that successfully complete the five certificate courses with a B in each course or better will be eligible to matriculate into the Master of Science in Computer Science program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
CS 5001 and CS 5003	Intensive Foundations of Computer Science and Recitation for CS 5001	4
CS 5002	Discrete Structures	4
CS 5004 and CS 5005	Object-Oriented Design and Recitation for CS 5004	4
CS 5008 and CS 5009	Data Structures, Algorithms, and Their Applications within Computer Systems and Recitation for CS 5008	4

#### Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

## Data Analytics, Graduate Certificate

The interdisciplinary Graduate Certificate in Data Analytics is offered through a collaboration between the Khoury College of Computer Sciences and the College of Social Sciences and Humanities. The certificate curriculum emphasizes the skills needed to bridge between emerging technological capacities and traditional policymaking processes. The program is designed to provide students with foundational knowledge in data science—including data management, machine learning, data mining, statistics, and visualizing and communicating data—that can be applied to data-driven decision making in any discipline.

For more information on the certificate, refer to the program's website (<https://www.northeastern.edu/graduate/program/graduate-certificate-in-data-analytics-boston-14423/>).

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
DA 5020	Collecting, Storing, and Retrieving Data	4
DA 5030	Introduction to Data Mining/Machine Learning	4
INSH 5301	Introduction to Computational Statistics	4
INSH 5302	Information Design and Visual Analytics	4

#### Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

## Inclusive Computer Science Education, Graduate Certificate

### Overview

This program is offered at the Portland, Maine campus.

The Graduate Certificate in Inclusive Computer Science Education is designed to prepare students to teach computer science principles and concepts in the context of a K–12 environment. Building on the successful Computer Science—Align program, this certificate assumes no prior computer science experience. Through coursework and project-based learning, students have an opportunity to obtain the foundational knowledge necessary to teach basic computing concepts and programming at a variety of educational levels both as stand-alone courses and integrated into other disciplines. The certificate emphasizes how teachers can create an inclusive classroom environment, actively work to dispel stereotypes, and build student confidence. Students who finish this certificate will be well positioned to obtain K–12 certification in computer science.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Core Requirements

Code	Title	Hours
CS 5001	Intensive Foundations of Computer Science	4
CS 5002	Discrete Structures	4
CS 5933	Advanced Computer Science Topics for Teachers	4
CS 5934	Introduction to Inclusive Computer Science Teaching	4

### Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

## Cybersecurity

Students can apply for admission to two distinct degree programs.

### Doctor of Philosophy (PhD) in Cybersecurity

A research-based, interdisciplinary PhD in cybersecurity spans theory and systems, from hardware to software security, from cryptography to policy, and from malware to wireless security. It seeks to prepare graduates to advance the state of the art of security in systems, networks, and the internet in industry, academia, and government. The interdisciplinary nature of the program distinguishes it from traditional doctoral degree programs in computer science, engineering, or social sciences and makes it unique in the Boston area.

### Master of Science (MS) in Cybersecurity

An industry-focused, interdisciplinary Master of Science in Cybersecurity combines knowledge of information security technology and cybersecurity hands-on tools with relevant knowledge from law, the social sciences, criminology, and management. The Master of Science in Cybersecurity is designed for students focused on cybersecurity careers in companies or government agencies, thus applying their knowledge to their workplaces to assess security threats and manage information security risks and technical and policy controls.

Northeastern University designations by the National Security Agency and the Department of Homeland Security:

- NSA/DHS Center of Academic Excellence in Cybersecurity—Cyber Defense Education
- NSA/DHS Center of Academic Excellence in Cybersecurity—Research
- NSA/DHS Center of Academic Excellence in Cybersecurity—Cyber Operations

### Align Master of Science (MS) in Cybersecurity

Without exception, every organization needs to protect their information system. Every day cyber risks are becoming more complex, and the sophistication and number of threats is growing continuously. For these reasons, cybersecurity professionals need to become more prepared, with a very solid background and with the capacity to evolve and adapt to the current and future information systems challenges.

Organizations are looking for well-rounded cybersecurity professionals, who, beside their understanding of information technologies, can also comprehend the many other dimensions that contribute to effective and efficient information systems security. Professionals with diversified backgrounds are particularly interesting because they are able to provide different approaches to complex cybersecurity problems.

Align-MSCY students are perfect cybersecurity professionals, because they have proven their adaptability to the cybersecurity field and also because they bring an invaluable experience and knowledge from other areas to contribute to a global perspective of an organization's cybersecurity posture.

## Programs

### Doctor of Philosophy (PhD)

- Cybersecurity (p. 302)

### Master of Science

- Cybersecurity (p. 308)
- Cybersecurity—Align (p. 310)

### Graduate Certificate

- Cybersecurity (p. 313)

## Cybersecurity, PhD

A research-based, interdisciplinary Doctor of Philosophy (PhD) in Cybersecurity combines a strong security technical foundation with a security policy and social sciences perspective. It seeks to prepare graduates to advance the state of the art of security in systems, networks, and the internet in industry, academia, and government. The interdisciplinary nature of the program distinguishes it from traditional doctoral degree programs in computer science, engineering, or social sciences and makes it unique in the Boston area.

Students who choose the PhD in Cybersecurity program have a strong desire to pursue academic research solving critical cybersecurity challenges facing today's society. The PhD program is a natural path for students in the college's Master of Science in Cybersecurity (<http://www.ccs.neu.edu/graduate/degree-programs/m-s-in-information-assurance/>) program who want to pursue research and students with bachelor's degrees and an interest in research-focused careers. Students who pursue careers in advancing the state of the art of cybersecurity have an opportunity to gain:

- A strong technical foundation in cybersecurity and an interdisciplinary perspective based on policy and social science
- A path to a research-focused career coupled with depth in information assurance research at a leading institution, one of the earliest designees by NSA/DHS as a National Center of Academic Excellence in Information Assurance Research, Information Assurance/Cyber Defense, and Cyber Operations
- The opportunity to work with and learn from faculty who are recognized internationally for their expertise and contributions in information assurance from Northeastern University's Khoury College of Computer Sciences, the Department of Electrical and Computer Engineering, and the College of Social Sciences and Humanities
- Access to research projects at Northeastern's research centers focused on security:
  - The Cybersecurity and Privacy Institute (<https://cyber.ccis.northeastern.edu/about/>): The mission of Northeastern's Cybersecurity and Privacy Institute is to safeguard critical technology. Forging partnerships with experts in industry, government, and academia worldwide, the Institute's faculty and students develop, protect, and enhance technologies on which the world relies—from mobile devices and “smart” IoT applications to tomorrow's self-driving cars and delivery drones. Their expertise spans algorithm auditing; cloud security; cryptography; differential privacy; embedded device security; internet-scale security measurements; machine learning; big data; security, malware, and advanced threats; network protocols and security; web and mobile security; and wireless network security.
  - The International Secure Systems Lab (<http://www.iseclab.org/>), affiliated with Northeastern, a collaborative effort of European and U.S. researchers focused on web security, malware, and vulnerability analysis; intrusion detection; and other computer security issues.
  - The ALERT Center (<http://www.northeastern.edu/alert/>), where Northeastern is the lead institution, a multiuniversity Department of Homeland Security Center of Excellence involved in research, education, and technology related to threats from explosives.

The benefits of the Boston area:

- World-renowned for academic and research excellence, the Boston area is also home to some of the nation's largest Department of Defense contractors and government and independent labs such as MIT Lincoln Lab, MITRE, and Draper Lab.

### Degree Requirements

The PhD in Cybersecurity degree requires completion of at least 48 semester credit hours beyond a bachelor's degree. Students who enter with an undergraduate degree will typically need four to five years to complete the program, and they will be awarded a master's degree en route to the PhD.

### Doctoral Degree Candidacy

A student is considered a PhD degree candidate after completing the core courses with at least a 3.500 GPA, with no grades lower than a B in the core courses, and either publishing a paper in a strong conference or journal or passing an oral exam that is conducted by a committee of three cybersecurity faculty members and based on paper(s) written by the student.

#### RESIDENCY

One year of continuous full-time study is required after admission to the PhD candidacy. During this period, the student will be expected to make substantial progress in preparing for the comprehensive examination.

#### TEACHING REQUIREMENT

All cybersecurity PhD students must satisfy the teaching requirement in order to graduate. This requirement is fulfilled when the student works as a teaching assistant or instructor of record for one semester and during this semester:

- Teaches at least three hours of classes
- Prepares at least one assignment or quiz or equivalent

PhD students are expected to satisfy the teaching requirement some time after completing their first year and at least one semester prior to scheduling their PhD defense.

**DISSERTATION ADVISING**

The doctoral dissertation advising team for each student consists of two cybersecurity faculty members, one in a technical area. When appropriate, the second faculty advisor will be from the policy/social science area.

**DISSERTATION COMMITTEE**

With the help of the advisor, a student selects the committee, consisting of at least four members, to be approved by the PhD cybersecurity curriculum committee. The four members must include the advisor, two internal members, and an external member.

**COMPREHENSIVE EXAMINATION**

A PhD student must submit a written dissertation proposal and present it to the dissertation committee. The proposal should identify the research problem, the research plan, and the potential impact of the research on the field. The presentation of the proposal will be made in an open forum, and the student must successfully defend it before the dissertation committee after the public presentation.

**DISSERTATION DEFENSE**

A PhD student must complete and defend a dissertation that involves original research in cybersecurity.

**AWARDING OF MASTER'S DEGREES**

Students who enter the PhD in Cybersecurity program with a bachelor's degree have the option of obtaining a master's degree from one of the departments participating in the program. To do so, they must meet all of the department's degree requirements.

**Program Requirements****Bachelor's Degree Entrance**

Complete all courses and requirements listed below unless otherwise indicated.

**Milestones**

Teaching  
 Qualifying exam and area exam  
 Annual review  
 Dissertation proposal  
 Dissertation committee  
 Dissertation defense

**Core Requirements**

A grade of B or higher is required in each core course. A cumulative 3.500 grade-point average is required for the core requirement.

CY 9991	Dissertation Term 2	
Complete the following (repeatable) course until graduation:		
CY 9996	Dissertation Continuation	

**Program Credit/GPA Requirements**

48 total semester hours required

Minimum 3.000 GPA required

**Advanced Entry Program Requirements****Degree Requirements**

Incoming PhD in cybersecurity students who have already completed a Master of Science in an adjacent field may petition to the graduate program administration for advanced entry. Advanced entry petitions are reviewed by the program administration on a case-by-case basis. Please note that

advanced entry does not waive by itself any part of the PhD coursework requirements. As a degree conferral requirement, a minimum of 16 semester hours of coursework beyond the 32 semester hours of the master's degree is required of advanced entry PhD students (48 semester hours is required of standard entry PhD students). A grade of B or higher is required in each course. A cumulative 3.500 GPA is required for the core requirement.

### Doctoral Degree Candidacy

Refer to the PhD Cybersecurity overview (p. 302) for admission to candidacy requirements.

### Residency

Refer to the PhD Cybersecurity overview (p. 302) for residency requirements.

### Teaching Requirement

## Cybersecurity, MS

Our Master of Science in Cybersecurity combines a solid understanding of information security technology with relevant knowledge from law, the social sciences, criminology, and management. The MS program is designed for working professionals and also recent graduates who want knowledge they can apply in workplaces to assess and manage information security risks effectively.

The cybersecurity program provides graduates with both the theoretical and experimental skills to perform professional cybersecurity duties. Due to the broad variety of positions that cybersecurity professionals may hold in the industry, our curriculum is designed to provide enough flexibility to our students to tailor their own careers appropriately.

The cybersecurity curriculum is intended to provide a comprehensive approach to cybersecurity, which includes both the technical skills and the contextual understanding that are fundamental to cybersecurity professions.

### Concentration in Criminology

Cybercrime has evolved into more advanced techniques and sophisticated structures. Cybersecurity professionals are of vital importance in crime investigations, and for that reason, they need to have a well-rounded background and knowledge. The Master of Science in Cybersecurity provides an interdisciplinary foundation that includes computer science technical courses, complemented with the contextual knowledge courses required for a proper holistic approach to cybercrime. The optional concentration in criminology and criminal justice will offer MSCY students an opportunity to obtain the fundamental principles and the most important practices that criminal justice professionals use.

### Gordon Institute of Engineering Leadership

#### MASTER'S DEGREE IN CYBERSECURITY WITH GRADUATE CERTIFICATE IN ENGINEERING LEADERSHIP

Students may complete a Master of Science in Cybersecurity in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The certificate program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour master's degree and certificate require 24 hours from the Master of Science in Cybersecurity (MS required courses, technical track, and contextual track).

### Program Requirements

#### Core Requirements

Code	Title	Hours
<b>Foundations</b>		
CY 5001	Cyberspace Technology and Applications <sup>1</sup>	4
CY 5010	Foundations of Information Assurance	4
<b>Technical Track</b>		
Complete 8 semester hours from the following:		8
CY 5120	Applied Cryptography	
CY 5130	Computer System Security	
CY 5150	Network Security Practices	
CY 5770	Software Vulnerabilities and Security	
CY 6740	Network Security	
CY 6760	Wireless and Mobile Systems Security	
<b>Contextual Track</b>		
Complete 8 semester hours from the following:		8
CY 5200	Security Risk Management and Assessment	
CY 5210	Information System Forensics	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
CY 5250	Decision Making for Critical Infrastructure	
CY 6200	Special Topics in IT Security Governance, Risk, and Compliance	
CY 6240	Special Topics in Privacy Law	
<b>Capstone</b>		
CY 7900	Capstone Project	4

#### Electives

Code	Title	Hours
Complete 4 semester hours from the following:		4
CRIM 6200	Criminology	
CRIM 6202	The Criminal Justice Process	

CRIM 6262	Evidence-Based Crime Policy
CS 5200	Database Management Systems
CS 5500	Foundations of Software Engineering
CS 5600	Computer Systems
CS 5610	Web Development
CS 5700	Fundamentals of Computer Networking
CS 6710	Wireless Network
CS 7580	Special Topics in Software Engineering
CS 7805	Complexity Theory
CY 5061	Cloud Security
CY 5062	Introduction to IoT Security
CY 5120	Applied Cryptography
CY 5130	Computer System Security
CY 5150	Network Security Practices
CY 5200	Security Risk Management and Assessment
CY 5210	Information System Forensics
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights
CY 5770	Software Vulnerabilities and Security
CY 6200	Special Topics in IT Security Governance, Risk, and Compliance
CY 6240	Special Topics in Privacy Law
CY 6720	Machine Learning in Cybersecurity and Privacy
CY 6740	Network Security

CY 7790	Special Topics in Security and Privacy
POLS 7341	Security and Resilience Policy
PPUA 6503	Managing People in Public and Nonprofit Sectors

### Concentration in Criminology

This optional concentration's required courses may count toward the contextual track, and its elective may count toward the major's elective area.

Code	Title	Hours
<b>Required</b>		
CRIM 6200	Criminology	4
CRIM 6202	The Criminal Justice Process	4
Complete one of the following:		4
CRIM 6262	Evidence-Based Crime Policy	
CY 5250	Decision Making for Critical Infrastructure	
CRIM elective <sup>2</sup>		

### Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

<sup>1</sup> A student who demonstrates prior mastery of the learning outcomes for Cyberspace Technology and Applications (CY 5001) may replace the course with elective coursework to meet the semester hours required for the degree. See the electives list for options.

<sup>2</sup> CRIM elective to be approved by director/associate director of MSCY.

## Cybersecurity, MS—Align

The Master of Science in Cybersecurity—Align program is designed for students with a BS/BA degree from all backgrounds. During the first semester of year one, students are expected to take foundational courses in computer science fundamentals, as well as a course in data structures/discrete mathematics. During their second semester, students take coursework in object-oriented design, as well as introductions to algorithms and computer systems.

Our Master of Science in Cybersecurity combines a solid understanding of information security technology with relevant knowledge from law, the social sciences, criminology, and management. The MS program is designed for working professionals and also recent graduates who want knowledge they can apply in workplaces to assess and manage information security risks effectively.

The cybersecurity program provides graduates with both the theoretical and experimental skills to perform professional cybersecurity duties. Due to the broad variety of positions that cybersecurity professionals may hold in the industry, our curriculum is designed to provide enough flexibility to our students to tailor their own careers appropriately.

The cybersecurity curriculum is intended to provide a comprehensive approach to cybersecurity, which includes both the technical skills and the contextual understanding that are fundamental to cybersecurity professions.

### Concentration in Criminology

Cybercrime has evolved into more advanced techniques and sophisticated structures. Cybersecurity professionals are of vital importance in crime investigations, and for that reason, they need to have a well-rounded background and knowledge. The Master of Science in Cybersecurity provides an interdisciplinary foundation that includes computer science technical courses, complemented with the contextual knowledge courses required for a proper holistic approach to cybercrime. The optional concentration in criminology and criminal justice will offer MSCY students an opportunity to obtain the fundamental principles and the most important practices that criminal justice professionals use.

CRIM elective <sup>1</sup>		

## Program Credit/GPA Requirements

36–44 total semester hours required

Minimum 3.000 GPA required

<sup>1</sup> CRIM elective to be approved by director/associate director of MSCY.

## Cybersecurity, Graduate Certificate

The certificate is designed to give students a solid foundation in cybersecurity. In the course work, students have the opportunity to be exposed to fundamental cybersecurity principles and information security concepts related to information systems, to explore issues involved in the security of computer systems, and to explore the techniques used in computer forensic examination. The goal of the certificate is to provide prospective cybersecurity professionals with an entry point to industry positions within eight months from admission and with reduced financial investment.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
CY 5010	Foundations of Information Assurance	4
CY 5130	Computer System Security	4

16 total semester hours required

Minimum 3.000 GPA required

## Health Informatics, MS

Northeastern University's interdisciplinary Master of Science in Health Informatics was the first MS in the field and is now one of the few that is fully interdisciplinary between health science and computer science.

The program seeks to prepare students to address the combined clinical, technical, and business needs of health-related professionals. Students may opt to select a concentration to deepen their knowledge in a particular area. Successful students graduate with the knowledge of how technology, people, health, and the healthcare system interrelate; the ability to use technology and information management to improve healthcare delivery and outcomes; and the skills to communicate effectively among healthcare practitioners, administrators, information technology professionals, and patients.

Please visit Bouvé College Learning Outcomes (<http://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

A grade of B– or higher is required in each course.

### Core Requirements

Code	Title	Hours
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
HINF 5105	The American Healthcare System	3

### Program Options

Choose one of the following options:

- Health Informatics (Without Concentration) (p. 314)
- Health Informatics with Health Informatics Analytics Concentration (p. 315)
- Health Informatics with Personal Health Informatics Concentration (p. 316)

### Program Credit/GPA Requirements

Minimum 33 total semester hours required

Minimum 3.000 GPA required

### HEALTH INFORMATICS (WITHOUT CONCENTRATION)

Code	Title	Hours
<b>Required Coursework in Addition to Core Requirements</b>		
<b>Business Management</b>		
Complete two of the following:		6
HINF 5407	Business Application of Decision Support in Healthcare	
HINF 6201	Organizational Behavior, Work Flow Design, and Change Management	
HINF 6202	Business of Healthcare Informatics	
HINF 6215	Project Management	
or EMGT 5220	Engineering Project Management	
HINF 6335	Management Issues in Healthcare Information Technology	
HINF 6240	Improving the Patient Experience through Informatics	
PHTH 5226	Strategic Management and Leadership in Healthcare	
<b>Health Informatics</b>		
Complete two of the following:		6
HINF 5102	Data Management in Healthcare	
HINF 5110	Global Health Information Management	
HINF 5200	Theoretical Foundations in Personal Health Informatics	
HINF 5300	Personal Health Interface Design and Development	
HINF 5301	Evaluating Health Technologies	
HINF 6205	Creation and Application of Medical Knowledge	
HINF 6350	Public Health Surveillance and Informatics	
HINF 6404	Patient Engagement Informatics and Analytics	

HINF 6405	Quantifying the Value of Informatics	
PHTH 5232	Evaluating Healthcare Quality	

**Technical**

Complete two of the following: 6

HINF 6220	Database Design, Access, Modeling, and Security	
HINF 6355	Interoperability Key Standards in Health Informatics	
HINF 6400	Introduction to Health Data Analytics	
PHTH 5202	Introduction to Epidemiology	
PHTH 5210	Biostatistics in Public Health	
PHTH 6210	Applied Regression Analysis	
PHTH 6400	Principles of Population Health 1	
PHTH 6440	Advanced Methods in Biostatistics	

One course from the following may count toward the technical core requirement:

DA 5020	Collecting, Storing, and Retrieving Data	
DA 5030	Introduction to Data Mining/Machine Learning	
INSH 5301	Introduction to Computational Statistics	
INSH 5302	Information Design and Visual Analytics	

**Capstone**

HINF 7701	Health Informatics Capstone Project	3

IE 5400	Healthcare Systems Modeling and Analysis	
IE 5640	Data Mining for Engineering Applications	
IE 6600	Computation and Visualization for Analytics	
IE 6700	Data Management for Analytics	
IE 7275	Data Mining in Engineering	

**PERSONAL HEALTH INFORMATICS CONCENTRATION**

Code	Title	Hours
<b>Required Coursework in Addition to Core Requirements</b>		
<i>Health Informatics</i>		
HINF 6205	Creation and Application of Medical Knowledge	3
<i>Technical</i>		
CS 5340	Computer/Human Interaction	4
Complete one of the following. Students must petition to take electives outside the approved list.		4
CS 5010	Programming Design Paradigm	
CS 5520	Mobile Application Development	
CS 5610	Web Development	
CS 6200	Information Retrieval	
Complete one of the following:		3
HINF 6220	Database Design, Access, Modeling, and Security	
HINF 6355	Interoperability Key Standards in Health Informatics	
<i>Theory and Evaluation</i>		
PHTH 5210	Biostatistics in Public Health <sup>1</sup>	3
Complete one of the following:		4
CS 6350	Empirical Research Methods (On campus only)	
HINF 5200	Theoretical Foundations in Personal Health Informatics	
<b>Culminating Experience</b>		
Complete one of the two options below.		6
<i>Thesis Option</i>		
Students must enroll in HINF 7990 for two semesters for a total of 6 semester hours with director approval only and under supervision of Personal Health Informatics faculty.		
HINF 7990	Thesis	
<i>Capstone Option</i>		
HINF 7701	Health Informatics Capstone Project	
Complete any course for a minimum of 3 semester from the Health Informatics (without concentration) curriculum, that has not been used in previous requirements.		

<sup>1</sup> Student may petition director to take a more advanced stats course, such as Applied Regression Analysis (PHTH 6210).

## Interdisciplinary Programs

### Doctor of Philosophy (PhD)

- Network Science (p. 273)
- Personal Health Informatics (p. 322)

### Master of Science (MS)

- Data Science (p. 279)
- Game Science and Design (p. 133)
- Health Informatics (p. 314)
- Internet of Things (p. 286)
- Robotics (p. 290)

### Graduate Certificate

- Data Analytics (p. 299)

## Network Science, PhD

Website (<http://www.networkscienceinstitute.org>)

The PhD program in network science aims to enhance our understanding of networks arising from the interplay of human behavior, sociotechnical infrastructures, information diffusion, and biological agents. This is an intrinsically multidisciplinary activity, with members of the network science community representing a wide range of fields including computer science, information science, complexity, physics, sociology, communication, organizational behavior, political science, and epidemiology. This is an interdisciplinary doctoral program focused on training students in network science across several colleges—including the College of Social Sciences and Humanities, the College of Science, the Khoury College of Computer Sciences, and Bouvé College of Health Sciences—with several research areas, including computational sciences, information sciences, health and life sciences, social sciences, and theoretical physics. See other collaborating colleges' catalog sections for possible elective courses.

Coursework is dependent on a student's area of research and subject to prior approval by their faculty advisor. Required coursework includes 20 semester hours of core courses in network science, plus an additional 20 semester hours of courses relevant to the students' area of research. A minimum of 40 credit hours of coursework is required, though the graduate program committee may recommend additional coursework based on student research interests.

Satisfactory progress in the program will be ongoing and formally evaluated at the end of both the first and second years of the program. Students are expected to maintain a cumulative GPA of 3.000 or better in all coursework. Students are not allowed to retake courses. A student who does not maintain the 3.000 GPA, or is not making satisfactory progress on their dissertation research, may be recommended for termination by the graduate program committee.

Each student will have one primary research advisor from the network science doctoral program faculty.

Students will be expected to select their research advisor by the end of the spring semester of their second year in the program.

The dissertation committee consists of at least four members: the dissertation advisor, one additional network science doctoral program faculty member, one member expert in the specific topic of research (can be from outside the university), and one additional tenured/tenure-track faculty member from the concentration department/conferring college. The dissertation advisor must be a full-time tenured or tenure-track member of the Northeastern University faculty. Students may repeat the comprehensive examination once if they are unsuccessful.

### Degree Candidacy

A student is considered a PhD candidate upon completion of all required coursework with a minimum cumulative GPA of 3.000, satisfactory completion of the qualification exam, and satisfactory completion of the comprehensive exam.

### Qualifying Examination

The qualification exam will be an oral examination of the material during the students' coursework. The exam will be an hour in length and consist of questions selected by network science faculty who comprise the qualifying examination and dissertation committee. Students will receive 50 to 80 potential questions, which they must be prepared to answer, one month before the exam. The exam will consist of a subset of these questions. The qualifying exam will be offered twice annually, in the fall and spring terms. All students are required to initially sit for the exam in the fall, typically in their third year of the PhD program. Students who do not pass the qualifying exam on their first attempt are expected to retake the exam in the spring term. Students may sit for the qualifying exam no more than twice.

Students who fail to complete the qualifying examination but who have completed all the PhD program's required coursework with a cumulative GPA of 3.000 or better will be awarded a terminal Master of Science in Network Science degree. Note that no students will be admitted directly into the network science program for receipt of a master's degree.

### Comprehensive Examination

Students must submit a written dissertation proposal to the dissertation committee. The proposal (with the aid and approval of their dissertation advisor) will outline a plan to carry out new and original research. The proposal should identify relevant literature, the research problem, the research plan, and the potential impact on the field. An oral presentation of the proposal will be made in an open forum before a public audience and the dissertation committee, followed by questions from noncommittee members. The written proposal must be given to committee members at least two weeks prior to the oral presentation. After the presentation, the student will meet with the dissertation committee to address any concerns raised in either the written proposal or the presentation. The comprehensive exam must precede the final dissertation defense by at least one year.

### Dissertation Defense

A PhD student must complete and defend a dissertation that involves original research in network science. The dissertation defense must adhere to Northeastern academic policies.

---

*Students who do not qualify for the doctoral degree, but who have completed required coursework with a cumulative GPA of 3.000 or better, may be eligible to receive a terminal Master of Science in Network Science (<http://catalog.northeastern.edu/graduate/social-sciences-humanities/interdisciplinary/network-science-ms/>). Note that no students will be admitted directly into the network science program to pursue a master's degree.*

## Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Milestones

Annual review  
 Qualifying exam  
 Dissertation committee  
 Dissertation proposal  
 PhD candidacy  
 Dissertation defense

### Core Requirements

## Personal Health Informatics, PhD

Northeastern University's Doctor of Philosophy in Personal Health Informatics is a transdisciplinary doctoral program focused on educating top researchers in the theoretical underpinnings, design, evaluation, and dissemination of consumer- and patient-focused health systems. Personal health technologies are those that non-health professionals interact with *directly*, both in and out of a clinical setting and in various life stages of illness and wellness.

Examples include:

- Assistive technologies that aid persons with disabilities
- Consumer wellness promotion technologies
- Patient education and counseling systems
- Interfaces for reviewing personal health records
- Advanced ambulatory monitoring for supporting health
- Automated elder care systems that monitor health and support independent living
- Social networking systems connecting families and their social and medical support networks

Developing personal health interface technologies requires that professionals have skills and experience designing systems for individual patients and consumers with a wide range of backgrounds in different contexts using a variety of media, while ensuring that fielded technologies are effective, reliable, and responsive to the needs of at-risk and patient populations. Critical skills and knowledge include needs assessment, theories of interface design and health behavior, rapid prototyping and implementation, experimental design with human subjects in challenging settings, and statistical data analysis and validation. Moreover, these skills must be deployed while working with, or leading, transdisciplinary teams.

The interdisciplinary nature of the program targets students who are interested in improving health and wellness using novel technologies that directly impact the lives of consumers and patients. This is a program for students who are not only technically strong but also socially conscious, design oriented, and interested in rigorously evaluating the technologies they imagine and build. The program provides a path for technical students to acquire more experience in the deployment and evaluation of health technologies in the field but also a path for students with health backgrounds to develop the technical skills needed to prototype and assess creative ideas they envision for improving care. The expected length of study is five years after the bachelor's degree.

### Admission Requirements

Students will be accepted with either of the following:

- A bachelor's or higher degree in a technical discipline (e.g., computer science or information science, computer systems engineering) with either academic or work experience demonstrating a commitment to working in health.
- A bachelor's or higher degree in a health science discipline (e.g., nursing, medicine, physical therapy, pharmacy, public health) with either some academic coursework in technology, such as a course in programming or design, or work experience where the applicant participated in the development, adaptation, or evaluation of consumer- or patient-facing health technology. (Otherwise outstanding applicants without programming skills may be advised to take an introductory programming course prior to entry; otherwise outstanding applicants without any formal experience working in health settings may be advised to spend some time volunteering in a medical or community health setting prior to entry.)

Applicants will be expected to have:

- A minimum 3.000 undergraduate GPA
- A minimum total GRE score of 300 or equivalent
- A minimum GRE academic writing score of 3.5
- For international applicants, a minimum TOEFL score of 105

### Minimum Academic Standards and Requirements

#### RESIDENCY REQUIREMENT

The residency requirement will follow the university's residency requirement for PhD programs (<http://catalog.northeastern.edu/graduate/general-admission-transfer-credit/regulations-phd-programs/>).

#### TEACHING REQUIREMENT

All personal health informatics PhD students must satisfy the teaching requirement in order to graduate. This requirement is fulfilled when the student works as a teaching assistant or instructor of record for one semester and during this semester:

- Teaches at least three hours of classes
- Prepares at least one assignment, or quiz, or equivalent

PhD students are expected to satisfy the teaching requirement some time after completing their first year and at least one semester prior to scheduling their PhD defense.

**DISSERTATION ADVISING**

Each student will have one primary advisor from the personal health informatics doctoral program faculty.

**DISSERTATION COMMITTEE**

The committee will consist of at least three members: the dissertation advisor, one additional personal health informatics doctoral program faculty member, and one member external to Northeastern who is an expert in the specific personal health informatics topic of research. The dissertation committee shall include experts with both health and technology backgrounds. The dissertation advisor must be a full-time member of the Northeastern faculty.

**QUALIFYING EXAMINATION**

The qualifying examination consists of a three-part exam conducted by a committee of three personal health informatics doctoral program faculty members, each overseeing one part of the exam. The research core of the exam is fulfilled with submission of a high-quality paper to a strong peer-reviewed conference or journal. The health component of the exam is fulfilled when the student passes a written exam developed by a faculty member with a health sciences background, and the technical component of the exam is fulfilled when the student passes an exam developed by a faculty member with a technical background. The content of the written exams and the paper topic are developed in consultation with each faculty member.

**DEGREE CANDIDACY**

A student is considered a PhD degree candidate upon meeting these conditions:

- Completion of core courses with a minimum GPA of 3.000 overall on the core courses
- Completion of the qualifying examination

**COMPREHENSIVE EXAM**

A PhD student must submit a written dissertation proposal to the dissertation committee. The proposal should identify the research problem, the research plan, and its potential impact on the field. A presentation of the proposal will be made in an open forum, and the student must successfully defend it before the dissertation committee.

**DISSERTATION DEFENSE**

A PhD student must complete and defend a dissertation that involves original research in personal health informatics.

**Curriculum Requirements****REQUIRED AND ELECTIVE COURSES**

The curriculum is designed to provide all PhD students with a strong foundation in principles critical to the design and evaluation of personal health interfaces. All students take six core courses (24 semester hours) and the user-interface practicum (1 semester hour). The student must maintain a minimum GPA of 3.500 among the six core courses and receive a grade of B or better in each of these courses. All students must also fulfill the programming fundamentals requirement (4 semester hours) and the statistics fundamentals requirement (4 semester hours), where some flexibility in course selection allows tailoring based on background and experience. Two additional research electives (8 semester hours) are selected based on research interests from the personal health informatics electives list. Students are also expected to participate in the personal health informatics seminar series during semesters when it is run.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Milestones**

Qualifying examination  
Annual review  
Dissertation proposal  
Dissertation committee  
Dissertation defense

**Core Requirements**

A grade of B or higher is required in each course. A cumulative 3.500 grade-point average is required for the core requirement.

## Data Science, MS

Khoury College of Computer Sciences and the Department of Electrical and Computer Engineering jointly offer an interdisciplinary Master of Science in Data Science. This program is designed to give students a comprehensive framework for reasoning about data. Students engage in extensive coursework intended to develop depth in data collection, storage, retrieval, manipulation, visualization, modeling, and interpretation. Students are also able to choose elective courses from a variety of offerings in Khoury, the College of Engineering, and throughout the campus to explore areas that generate data or specialized data science applications. Successful program graduates are well positioned to attain data scientist and data engineer positions in a fast-growing field or to progress into doctoral degrees in related disciplines.

During the admissions process, applicants take a pretest to determine if the Master of Science in Data Science or Master of Science in Data Science (p. 281)– (p. )Align (p. 281) fits better with their current skill level. In addition, prospective applicants work with recruitment and enrollment coaching teams to select the appropriate program before applying.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Students should refer to the course numbering table for graduate course leveling (p. 55).

### Core Requirements

A cumulative GPA of 3.000 or higher is required in the following core courses.

Code	Title	Hours
Complete 20 semester hours from the following:		
<b>Data Management and Processing</b>		
DS 5110	Introduction to Data Management and Processing	4
<b>Algorithms</b>		
Complete 4 semester hours from the following:		
CS 5800	Algorithms	4
EECE 7205	Fundamentals of Computer Engineering	
<b>Machine Learning and Data Mining</b>		
DS 5220	Supervised Machine Learning and Learning Theory	4
DS 5230	Unsupervised Machine Learning and Data Mining	4
<b>Presentation and Visualization</b>		
DS 5500	Data Science Capstone	4

### Electives

Code	Title	Hours
Complete 12 semester hours from the following: <sup>1</sup>		
<b>Khoury College of Computer Sciences</b>		
CS 5100	Foundations of Artificial Intelligence	
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5200	Database Management Systems	
CS 5330	Pattern Recognition and Computer Vision	
CS 5340	Computer/Human Interaction	
CS 5610	Web Development

PHTH 5210	Biostatistics in Public Health
PHTH 6224	Social Epidemiology
<b>College of Arts, Media and Design</b>	
GSND 5110	Game Design and Analysis
GSND 6350	Data-Driven Player Modeling

## Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

<sup>1</sup> Students taking electives worth less than 4 semester hours (i.e., Bouvé courses) should enroll for an accompanying data science project course in the same semester to bring the cumulative semester hours to 4. In order to earn this additional credit, students are expected to work with faculty to design an additional project in line with the curricular aims of their chosen elective and the data science core learning outcomes.

## Game Science and Design, MS

The **Master of Science (MS) in Game Science and Design** is a program that seeks to give students a comprehensive understanding of how successful game products are created in a player-centric environment. Successful graduates who wish to become professional game developers or game user research experts should be able to collaborate effectively in this dynamic and burgeoning field of practice and research. Focusing on the science of game development, students have an opportunity to learn the design and technological skills needed to build a game and develop a deep understanding of playability and analytics that makes products successful in an increasingly competitive marketplace.

The game industry has expanded to include social and mobile gaming; augmented and virtual reality; as well as games in health, education, and training. Rapid innovations are happening in player psychology, middleware, graphics and authoring tools, game mechanics, and artificial intelligence and narrative techniques. It has become an increasingly competitive space.

The selectiveness of the industry and the diversity of the skills required mean that students seeking entry need both broad and deep skills. As an emergent industry using diverse technology and collaborative practices, the game industry needs professionals with interdisciplinary skill sets who can blend knowledge about development with knowledge about evaluation methods and players' behavior and psychology.

Jointly offered by Northeastern's College of Arts, Media and Design and Khoury College of Computer Sciences (<https://www.khoury.northeastern.edu/>), the **Master of Science in Game Science and Design** is a one-of-a-kind interdisciplinary program that seeks to prepare students to meet this need by weaving together science and design. This is a two-year, 34-credit-hour program.

All admitted students will be assigned to an advisor who will help them select a pathway with a coherent set of electives depending on their career goals. The advisor will also monitor their progress through the master's degree.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
<b>Required Core</b>		
GSND 5110 and GSND 5111 and GSND 5112	Game Design and Analysis and Seminar for GSND 5110 and Recitation for GSND 5110	5
GSND 5122	Business Models in the Game Industry	1
GSND 5130 and GSND 5131	Mixed Research Methods for Games and Recitation for GSND 5130	4
<b>Thesis</b>

## Robotics, MS

For program contact information, please visit this website (<https://coe.northeastern.edu/academic-programs/ms-robo/>).

The multidisciplinary Master of Science program in robotics is offered by the College of Engineering and the Khoury College of Computer Sciences. The program is designed to provide students comprehensive training in algorithms, sensors, control systems, and mechanisms used in robotics.

### Gordon Institute of Engineering Leadership

#### Master's Degree in Robotics with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Robotics in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 40-semester-hour degree and certificate will require 24 semester hours of advisor-approved robotics technical courses.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
<b>Mechanical Engineering</b>		
Complete one of the following:		4
ME 5250	Robot Mechanics and Control	
ME 5659	Control Systems Engineering	
<b>Electrical and Computer Engineering</b>		
Complete one of the following:		4
EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5554	Robotics Sensing and Navigation	
<b>Computer Science</b>		
Complete one of the following:		4
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5335	Robotic Science and Systems	

#### Concentrations

Complete one of the following concentrations:

- Mechanical Engineering (p. 290)
- Electrical and Computer Engineering (p. 291)
- Computer Science (p. 291)

#### MECHANICAL ENGINEERING

Code	Title	Hours
Students in the mechanical engineering concentration follow the College of Engineering co-op policies.		
<b>Required Course</b>		
Complete one additional ME course not used to fulfill the core requirements:		4
ME 5250	Robot Mechanics and Control	
ME 5659	Control Systems Engineering	
<b>Complete one of the following options:</b>		
<i>Coursework Option</i>		
Complete 16 semester hours of courses from the elective course list. (p. 291)		16
<i>Project Option</i>		
ME 7945	Master's Project	4
Complete 12 semester hours of courses from the elective course list. (p. 291)		12
<i>Thesis Option</i>		

ME 7990	Thesis	8
Complete 8 semester hours of courses from the elective course list. (p. 291)		8

**ELECTRICAL AND COMPUTER ENGINEERING**

Code	Title	Hours
------	-------	-------

Students in the electrical and computer engineering concentration follow the College of Engineering co-op policies.

**Required Course**

Complete one additional EECE course not used to fulfill the core requirements: 4

EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5554	Robotics Sensing and Navigation	

**Complete one of the following options:***Coursework Option*

Complete 16 semester hours of courses from the elective course list. (p. 291) 16

*Project Option*

EECE 7674 Master's Project 4

Complete 12 semester hours of courses from the elective course list. (p. 291) 12

*Thesis Option*

EECE 7990 Thesis 8

Complete 8 semester hours of courses from the elective course list. (p. 291) 8

**COMPUTER SCIENCE**

Code	Title	Hours
------	-------	-------

Students in the computer science concentration follow the Khoury College of Computer Sciences co-op policies.

**Required Course**

Complete one additional CS course not used to fulfill the core requirements: 4

CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5335	Robotic Science and Systems	

**Complete one of the following options:***Coursework Option*

Complete 16 semester hours of courses from the elective course list. (p. 291) 16

*Project Option*

CS 8674 Master's Project 4

Complete 12 semester hours of courses from the elective course list. (p. 291) 12

*Thesis Option*

CS 8674 Master's Project 4

CS 7990 Thesis 4

Complete 8 semester hours of courses from the elective course list. (p. 291) 8

**Elective Course List**

ME 6260	Introduction to Microelectromechanical Systems (MEMS)
ME 7247	Advanced Control Engineering

### Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

## Data Analytics, Graduate Certificate

The interdisciplinary Graduate Certificate in Data Analytics is offered through a collaboration between the Khoury College of Computer Sciences and the College of Social Sciences and Humanities. The certificate curriculum emphasizes the skills needed to bridge between emerging technological capacities and traditional policymaking processes. The program is designed to provide students with foundational knowledge in data science—including data management, machine learning, data mining, statistics, and visualizing and communicating data—that can be applied to data-driven decision making in any discipline.

For more information on the certificate, refer to the program's website (<https://www.northeastern.edu/graduate/program/graduate-certificate-in-data-analytics-boston-14423/>).

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
DA 5020	Collecting, Storing, and Retrieving Data	4
DA 5030	Introduction to Data Mining/Machine Learning	4
INSH 5301	Introduction to Computational Statistics	4
INSH 5302	Information Design and Visual Analytics	4

#### Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

## College of Engineering

Website (<http://www.coe.neu.edu/academics/graduate-school-engineering/>)

**Gregory D. Abowd, PhD**, Dean

**Akram Alshawabkeh, PhD**, Senior Associate Dean for Research and Global University Campus

**Sagar Kamarthi, PhD**, Associate Dean for Graduate Education

130 Snell Engineering Center  
617.373.2711

The Graduate School of Engineering offers research and professional degree programs organized around a core curriculum that equips students with a solid foundation for technical and leadership positions in industry organizations, government laboratories, research laboratories, and educational institutions. By involving students in many levels of research, encouraging collaboration across departments, and partnering with outside institutions and organizations globally, Northeastern University engineering graduate students have the opportunity to gain a rich and experiential education in their chosen discipline.

Master of Science and doctoral degree programs are offered, as well as numerous graduate certificate programs that can be applied toward master's degree programs for lifelong learning. The GSE offers traditional full-time day and part-time evening master's and doctoral degree programs and part-time evening certificate programs. Programs are offered in Boston, Arlington, Seattle, Silicon Valley, Oakland, Portland (ME), Toronto, and Vancouver. A number of courses and degree programs are also available in a flexible online or hybrid format, which are well suited for distance learners. Innovative programs, such as interdisciplinary degrees, business/entrepreneurship pathways, and the Academic Link program for students without an undergraduate engineering degree (or who need additional preparatory coursework), enable students to personalize their learning experience.

## Academic Policies

- Academic Dismissal Policy (p. 336)
- Academic Integrity Policy (p. 337)
- Academic Standing Policy (p. 338)
- Appeals Policy (p. 339)
- Attendance Policy (p. 340)
- Course Registration (p. 341)
- Course Selection (p. 342)
- Dissertation Committee (p. 343)
- Grievance Policy (p. 344)
- PhD Student Progress and Review (p. 345)
- Program Completion (p. 346)
- Reenrollment Policy for Full-time Students (p. 347)

## Academic Dismissal Policy

A student placed on academic probation for a cumulative grade-point average of less than 3.000 will have one academic term to raise the cumulative GPA greater than or equal to 3.000. Students whose cumulative GPA is below 3.000 for two consecutive terms in which they took courses for credit (including Career Management for Engineers (ENCP 6000) or Introduction to Cooperative Education (ENCP 6100), if taken) will automatically be dismissed from their degree program at the end of the second term. Students in this situation may submit an Academic Dismissal Appeal form to the graduate school, *to be reviewed by the student's academic department*, to request a final one-term extension. Students whose cumulative GPA is below 3.000 for three consecutive terms will automatically be dismissed from their degree program.

*A student will also be dismissed from their degree program if they do not meet the requirements of their program.*

A student who is dismissed from their program may submit an appeal through the college's graduate appeals process.

Students dismissed from their program will receive a written notification from the Graduate School of Engineering.

## Academic Integrity Policy

Graduate students are expected to abide by the university's Academic Integrity Policy, as described in the Code of Student Conduct (<https://osccr.sites.northeastern.edu/code-of-student-conduct/>).

A faculty member who suspects that a graduate student has violated the university's Academic Integrity Policy must offer to meet with the student to discuss the suspected violation. The faculty member may ask the student to provide supporting documentation and may gather information from other students involved in the incident.

If the faculty member finds that the student has violated the Academic Integrity Policy, the faculty member may take action as the faculty member considers appropriate and can include adjusting the student's grade, requiring additional academic work, forfeiture of co-op opportunity, and/or failing the qualifying examination. In this case, the faculty member is encouraged to submit an information-only report about the incident to the university Office of Student Conduct and Conflict Resolution, which handles suspected violations of the Academic Integrity Policy. Any penalties must be imposed by the faculty member within three weeks of the suspected violation.

If the student is not satisfied with the faculty member's decision, the student may appeal to the department by contacting the department head (or designee) who should apply the department's procedures to review the case. If the suspected violation took place in a department or if it involved cooperative education, the appeal should be submitted to that unit. Otherwise, the appeal should be submitted directly to the college. The student should appeal within one week of the imposition of penalties.

The department will either affirm the faculty member's decision or substitute an alternative decision. The department's decision should be made within two weeks of receiving the appeal.

The student may appeal the department decision using the college's academic appeal process. The college will either affirm the department's decision or substitute an alternative decision.

The student may appeal the college decision using the university's academic appeal process.

The faculty member may appeal the department or college decision by submitting a complaint to OSCCR, which will determine whether the student is responsible for the suspected violation. OSCCR will make a recommendation to the senior vice provost for student affairs who will make a final decision.

If the student is found to be responsible for a violation by OSCCR, the faculty member may take action as appropriate. If the student is found to be not responsible for a violation, the faculty member cannot take action and if action was previously taken, the action must be reversed.

The dean (or designee) of the involved college shall take whatever action is necessary to implement the resolution of the case, including reporting a change of grade to the Office of the University Registrar.

## Academic Standing Policy

Academic standing at Northeastern University is determined by a student's cumulative grade-point average.

Academic probation is a period of time when a student must address and remediate academic deficiencies.

### Full-time Students

Full-time graduate students are expected to maintain a cumulative GPA of 3.000 or higher each term to remain in good academic standing and to progress toward graduation.

Students falling below a cumulative GPA of 3.000 are placed on academic probation for each academic term in which the cumulative GPA is below 3.000 after the completion of at least 8 semester hours. Full-time students must raise the cumulative GPA to 3.000 or higher after completion of at least 8 additional semester hours to regain good academic standing status.

### Part-time Students

Graduate students in official part-time status with the university are expected to maintain a cumulative GPA of 3.000 or higher each term to remain in good academic standing and to progress toward graduation.

Students falling below a cumulative GPA of 3.000 after at least 8 semester hours are completed are placed on academic probation. Part-time students must raise the cumulative GPA to 3.000 or higher after completion of at least 8 additional semester hours to regain good academic standing status.

### Summer Term

There are three semesters during the summer session: Summer 1, Summer 2, and Full Summer.

Academic standing for the summer terms will be reviewed and evaluated for all students at the end of the Summer 2 term. If students complete fewer than 8 semester hours during any of the summer semesters combined, their academic standing is evaluated after the completion of at least 8 semester hours.

## Appeals Policy

It is the policy of the university that all students shall be treated fairly with respect to evaluations made of their academic performance, standing, and progress. This policy provides an appeals mechanism to students who believe that they have been erroneously, capriciously, inappropriately, or otherwise unfairly treated in an academic determination.

The university presumes that academic judgments by its faculty are fair, consistent, and objective. Substitution of a different academic judgment for that of the original evaluator is a serious intrusion upon academic prerogatives entrusted to the faculty and others involved in academic evaluations.

This policy applies to appeals related to academic determinations in COE graduate courses, regardless of the student's home college, and graduate programs. Appeals related to graduate courses or programs offered by another college should be handled by that college. Appeals related to third-semester dismissals should be submitted directly to the college.

**Step 1.** The student should first speak with the involved faculty or staff member about any determination about which they have questions and attempt to reach a resolution.

**Step 2.** If the student is not satisfied with the decision, the student may appeal. If the appeal relates to a course or program offered by a department, the appeal should be submitted to that department. Otherwise, the appeal should be submitted directly to the college. Department appeals should be submitted to the department chair (or designee) who should apply the department's procedures to review the case. The student must appeal within four weeks of the academic determination.

A student shall initiate this appeal of an academic determination by submitting a written statement that specifies the details of the action or judgment that they seek to appeal. This statement must start with a clear description of the basis for the appeal and should include basic facts about the situation leading to the appeal, when the situation occurred, who was involved, and the resolution sought by the student. All relevant supporting materials should be attached as addenda to the statement. Appeals should avoid unsubstantiated, defamatory, or ad hominem accusations regarding the motivations of the faculty member or other persons involved in making the academic determination.

The department will either affirm the original decision or substitute an alternative decision. The department's decision shall be made in writing and include the reasoning behind the decision. The department's decision must be made within two weeks of receiving the appeal.

**Step 3.** The student may appeal the department's decision to the college. To initiate the college appeal, the student shall submit to the associate dean of graduate education their statement, the department's response, and any additional information the student would like to be considered. Appeals to the college are reviewed by the Graduate Appeals Committee, which makes recommendations to the associate dean for graduate education. The student shall be offered the opportunity to meet with the committee to make a statement, present relevant facts of the case, and respond to clarifying questions the committee may have regarding the case. The chair of the committee reserves the right to end this meeting after 10 minutes if no further relevant facts are forthcoming. The committee may invite faculty and staff members to discuss the case and share relevant information.

The committee will either affirm the original decision, substitute an alternative decision, or refer the case back to the department for additional consideration. The committee's decision shall be made in writing and include the reasoning behind the decision. The committee's decision must be made within two weeks of receiving the appeal.

**Step 4.** Upon receiving the recommendation of the committee, the associate dean for graduate education shall review the case and make a final decision for the college.

## Attendance Policy

In each term, students enrolled in on-ground sections are expected to be on campus and attending class beginning with the first day of classes. Students in online sections are expected to log in and participate in class beginning with the first day of classes.

Students who join a class after the first day of class during the university add period, or who are approved for late registration by the instructor and the Graduate School of Engineering, are responsible for all coursework missed prior to enrolling. Enrolled students who do not attend class during the first week of a semester risk being dropped from the course.

In the interest of students' success, the college does not support the arrival of students to class after the university add deadline. Students should not expect to be added to a class after the university add deadline and will be held responsible for the academic, financial, or immigration consequences due to their late or nonattendance without prior approval.

In cases where an enrolled student cannot arrive to campus by the first day of class due to circumstances beyond their control, it is the student's responsibility to contact the instructor for approval and notify the Graduate School of Engineering.

## Course Registration

Full-time students (domestic and international) in the Graduate School of Engineering must register for classes on an ongoing basis and carry a minimum of 8 semester hours of coursework per semester. Any student who is appointed to a stipended graduate assistantship is considered full time for the term(s) of appointment if enrolled for a minimum of 6 semester hours.

All graduate students who are registered for Dissertation Term 1, Dissertation Term 2, Dissertation Continuation, PhD Candidacy Preparation, PhD Exam Preparation, or a 0-semester-hour Research course are considered full time. Registration in these courses is restricted to students who qualify for registration in these courses.

The graduate school does not require part-time students to be enrolled for a certain minimum number of semester hours in any term. However, part-time students who are not enrolled for more than one term (excluding summer terms) should take a leave of absence from the university to maintain active student status to keep their student account active.

The maximum number of semester hours approved for a student in each term varies by the degree program. However, a student can petition their faculty advisor to request permission to register for more than the allowed maximum number of semester hours for a given term. Normally, no more than 12 semester hours (inclusive of transfer credits and advanced standing for MS programs) may be taken outside the College of Engineering, unless otherwise specified in the program requirements.

Registration in classes is mandatory to maintain an active status with the university. Students must be registered in all courses for a given term prior to the university course add deadline. Students should not register for an excessive number of courses or for multiple sections of the same course with the intention of dropping half or more of the courses during the first week of classes.

Students must be registered in their last semester of study. International students should consult with the Office of Global Services (<https://international.northeastern.edu/ogs/>) if they are intending to complete their program during the summer semester. Domestic students finishing their requirements in the summer semester must be registered either in the full summer, summer 1, or summer 2 term.

Any student who is financially withdrawn by Student Accounts prior to the start of any given semester will not be permitted to register for that semester until they rectify the outstanding financial obligation.

The Graduate School of Engineering will correct registration errors. Corrections may generate a new tuition bill.

Due to last-minute scheduling changes, the Graduate School of Engineering must occasionally substitute faculty or change class schedules after the registration period has begun. Any student registered for the original course will automatically be registered for the updated section should no major schedule conflicts be apparent. Otherwise, the graduate school or the department will contact all affected students for alternatives.

Northeastern University reserves the right to cancel, postpone, combine, or modify any class.

The Graduate School of Engineering does not allow College of Engineering graduate students to elect a pass/fail grading scheme for courses normally letter graded.

## Course Selection

Students should formulate a program of study in consultation with their assigned faculty advisor at the beginning of their program, during fall or spring orientation. Students should preselect courses whenever possible and plan to take them when offered, maintaining flexibility with alternate courses in mind. Courses other than the required courses are offered based on demand and are subject to faculty availability. Not all courses are offered every year; however, the graduate school will do everything possible to assure continuity of programs and permit students to make continuous progress toward earning their degrees.

### Prerequisite Courses/Undergraduate Courses

Students are not awarded credit toward graduate degree requirements for prerequisite courses unless expressly stated by the student's academic department. Students may occasionally be permitted by their advisor to take undergraduate courses. However, undergraduate courses do not count toward a graduate degree and may affect a student's eligibility to receive federal financial aid. Undergraduate courses do not count toward the graduate-level course load requirement for full-time students.

### Dissertation and Dissertation Continuation

Once program requirements are met for the PhD candidacy, PhD candidates must register for Dissertation Term 1 (XXXX 9990) and Dissertation Term 2 (XXXX 9991). Candidates must then register for Dissertation Continuation (XXXX 9996) in each subsequent semester (excluding the summer term) until the dissertation is complete and approved by the Graduate School of Engineering. Students completing their dissertation in the summer term must register for Dissertation Continuation. There is a 1-semester-hour tuition charge for Dissertation Continuation.

### MS Thesis and Thesis Continuation

Master's degree students who are completing a thesis must register for a total of 8 semester hours of Thesis. Students who have not completed their thesis but have already registered for the required number of thesis hours, and have no remaining coursework to complete the degree, may register for Thesis Continuation in their last semester (including summer term). There is a 1-semester-hour tuition charge for Thesis Continuation. Thesis Continuation may be taken only once.

### Petitions

Petitions are required in all cases where a student is requesting a change or exception to their current program or student status for the Graduate School of Engineering to maintain a complete and accurate record for all students.

## Dissertation Committee

A dissertation committee shall include a minimum of three members, or four members if there are two co-advisors. At least three committee members should hold a doctorate or an appropriate terminal degree for the discipline, and at least two shall be full-time Northeastern University faculty.

At least two committee members shall hold some appointment in the department that offers the degree that the student is seeking. At least one member of the committee must not have a primary appointment in the department that offers the degree that the student is seeking.

The chair of the dissertation committee, who is assumed to be the advisor, shall be a full-time tenured or tenure-track member of the faculty of Northeastern, shall hold some appointment in the department that offers the degree that the student is seeking, and will hold a doctorate or an appropriate terminal degree for the discipline.

Research and teaching faculty may serve as the chair of the dissertation committee with departmental approval. In this case, at least two members of the committee must be tenured or tenure-track full-time Northeastern faculty. Exceptions to this requirement may be granted by the dean (or designee) based on the qualifications and experience of the faculty member who would serve as chair.

## Graduate Student Grievance Policy

### Introduction

This policy describes steps a graduate student should follow to submit a grievance.

Students should first attempt to resolve an issue through informal means, for example, by communicating with appropriate faculty members or the program director. If the issue is not resolved, students should follow the steps described below.

Students who believe that they have been erroneously, capriciously, inappropriately, or otherwise unfairly treated in an academic or cooperative education determination should follow the appeals procedure described in the COE Graduate Appeals Policy or the COE Cooperative Education Appeals Policy, respectively. Subsequent academic appeals can be submitted by following the University Academic Appeals Policy and Procedure.

Northeastern University is committed to providing a living, learning and work environment that is safe and free from discrimination and harassment. This includes all allegations of discrimination including those based on race, color, religion, religious creed, genetic information, sex (including pregnancy or pregnancy-related condition, sexual assault, sexual harassment, stalking, domestic violence), gender, gender identity, sexual orientation, age, national origin, ancestry, veteran or disability status. If a student makes a claim of discriminatory acts prohibited by law or by university policy, the grievance shall first be pursued through the Office of University Equity and Compliance and its procedures. When this has been completed, any aspects of the grievance that remain unresolved may then be brought to the grievance procedure.

Graduate students can contact the Ombuds for Graduate Students that offers confidential, impartial, and informal assistance to graduate students who have concerns related to their university experience.

Note that the college prohibits retaliation against a student for filing a grievance.

### Grievance procedure

A graduate student who would like to complain about their treatment by a College of Engineering employee (faculty or staff) may submit a grievance. A written description of the complaint should be submitted within 60 days of the alleged activity. The description should state the exact nature of the grievance, against whom it is filed, and the remedy sought.

The student should submit the complaint to the chair of the department that houses the student's primary program of study and to the Associate Dean for Graduate Education. The Chair shall review the complaint, shall give any employees named in the grievance an opportunity to share relevant information, may gather additional information, and shall send a written response to the student and the Associate Dean for Graduate Education within two weeks.

If the student is not satisfied by the Department Chair's response, the student may submit the complaint to the Associate Dean for Graduate Education within two weeks. The Associate Dean shall review all available information and submit a written response to the student within two weeks.

If the student is not satisfied by the associate dean's decision, the student may submit the complaint to the dean within two weeks. The dean will review all available information and submit a written response to the student within two weeks.

## PhD Student Progress and Review

### Formal Requirements

The formal requirements for the PhD degree include the following milestones:

1. Completing required coursework.
2. Achieving candidacy, as determined by degree program. May be achieved through qualifying examinations, comprehensive examination(s), and/or an oral defense of the dissertation proposal.
3. Identifying a faculty research advisor.
4. Forming a dissertation committee.
5. Writing and completing a successful oral defense of the dissertation proposal before the PhD committee.
6. Completing a successful oral defense of dissertation before the PhD committee.
7. Approval of written dissertation by dissertation committee and Graduate School of Engineering.

### Time Limits

Departments shall define standards for satisfactory performance progress for PhD students that include the following time limits:

#### DIRECT-ENTRY PHD STUDENTS

1. Candidacy must be achieved within three years of entering the PhD program.
2. The degree must be completed within seven years of entering the PhD program.

#### ADVANCED-ENTRY PHD STUDENTS

1. Candidacy must be achieved within three years of entering the PhD program.
2. The degree must be completed within five years of entering the PhD program.

### Performance Progress

Departments shall establish a review process by which the performance progress of every PhD student is evaluated not more than once per semester and at least annually. As part of this review, students should submit information **that must include achievement of milestones** and could include descriptions of their plans, achievements, progress toward goals, transcripts, CV, publications, conferences attended, recognition they have received, and awards. The review process must include feedback from the student's faculty advisor.

If a department finds that a PhD student is not making satisfactory progress, the student shall be placed on performance probation. Members of the department shall work with the student to develop a performance improvement plan that includes specific actions the student should take to return to satisfactory progress. The performance progress of each PhD student on performance probation shall be reviewed by their department no earlier than one semester and no later than one year after being placed on probation. If a student on performance probation is again found to be not making satisfactory progress, the student shall be dismissed from their degree program. If a student on performance probation is found to be making satisfactory progress, the student shall leave performance probation status.

A copy of the performance progress review and performance improvement plan, if applicable, shall be submitted to the student. For all students, the result of the performance progress review shall be submitted to the Graduate School of Engineering. For all students who receive an unsatisfactory review, a summary of the performance progress review and performance improvement plan shall be submitted to the Graduate School of Engineering. Students dismissed from their program will be notified by the Graduate School of Engineering. A student who is dismissed from their program may submit an appeal through the college's graduate appeals process.

For the purposes of determining the timing of performance reviews specified by this policy, the summer 1 and summer 2 semesters shall collectively be considered one semester.

## Program Completion

In order to earn a degree in the graduate program in which a student is enrolled, a student must complete all program and departmental requirements in a satisfactory manner.

A student must attain a cumulative grade-point average of 3.000 or higher in all courses applied toward that degree. A student must also earn a grade of C or higher in all required core courses. Please note that individual programs may have additional requirements.

## Reenrollment Policy for Full-time Students

Students who enroll and complete at least one graduate engineering course can apply to their academic department to take an official leave of absence from the time they complete said course(s) and be automatically readmitted without department review. Automatic readmission applies only to the original program and concentration (if applicable) and only for students who took an official approved leave of absence. Catalog year of entry does not change and students must complete the curriculum requirements outlined in the Northeastern University Graduate Catalog for their original academic year of admission.

If a student without official leave of absence approval does not enroll in classes for two consecutive fall/spring semesters, they will be declared inactive. To return from inactive status, a student must submit an updated application to refresh their student record, and this application will be approved provided the student was in good standing at the time their absence started.

If a student without official leave of absence approval does not enroll in classes for three consecutive fall/spring semesters, or does not indicate their intent in writing to the Graduate School of Engineering by the end of the third consecutive semester, they will be withdrawn from the program. In the case of withdrawal, a student will be required to submit a new admission application for graduate studies without guarantee of readmission. If the student is admitted after being withdrawn, they will be admitted into the current catalog year and must meet the curriculum requirements in the current Graduate Catalog.

In cases where the student has seven or more years of nonenrollment, the graduate advisor in the Graduate School of Engineering shall initiate the process by contacting the graduate studies chair/program director on behalf of the student to confirm the content in the course(s) is still relevant to the current degree program. If the courses are confirmed to still be relevant, the graduate advisor shall submit a Waiver Request form with a copy of the course confirmation, the student's academic transcript, and any additional supporting documents to the graduate studies chair/program director and associate dean for graduate education for review and final approval. If the waiver is approved, the graduate advisor will send the waiver to the Office of the University Registrar for the course(s) to be applied to the student's degree audit.

## Bioengineering

Website (<http://www.bioe.neu.edu>)

### Lee Makowski, PhD

Professor and Chair

206 Interdisciplinary Science and Engineering Complex

617.373.7805

[l.makowski@northeastern.edu](mailto:l.makowski@northeastern.edu)

The Department of Bioengineering is driven by the conviction that the interface of engineering and medicine will be one of the great intellectual adventures of the 21st century. To prepare students for this adventure, the department strives to create an atmosphere of innovation and creativity that fosters excellence in instruction and research and provides a foundation for programs that drive forward the cutting edge of knowledge while establishing translational collaborations with clinical and industrial researchers.

Bioengineering is a relatively new field built on the recognition that engineering of biological systems or systems that interface with living systems requires a multidisciplinary approach that takes into account the mechanical, electrical, chemical, and materials properties of the biological system. Students with backgrounds from biochemistry to computer science and many fields in between are attracted to bioengineering as a field with the potential to make a great impact on human health. The MS and PhD programs are designed to integrate students with very different backgrounds and provide them with the coursework and research experience that will take advantage of their unique backgrounds and, where appropriate, fill in gaps in their backgrounds to help them grow into a more broadly informed student.

Recognizing the breadth of disciplines that contribute to bioengineering projects, the MS program allows students to choose one of four concentrations (biomechanics; biomedical devices and bioimaging; cell and tissue engineering; or systems, synthetic, and computational bioengineering) to develop deep expertise in an area of particular interest and encourages individual research through a one-semester master's project or two-semester master's thesis.

The PhD program spans four core research areas for which the department has particular strengths: biomedical devices and bioimaging; biomechanics, biotransport, and mechanobiology; molecular, cell, and tissue engineering; and systems, synthetic, and computational bioengineering. Coursework is designed to strengthen student backgrounds in those areas most relevant to the interests of each student.

### Mission of the Department

The mission of the Department of Bioengineering is the education of students in the fundamental principles and practice of bioengineering and, through basic and applied research, the creation of new knowledge at the interface of engineering and medicine to support development of new technologies for improvement of human health and healthcare.

### Overview of Programs Offered

The Department of Bioengineering offers a Master of Science and a Doctor of Philosophy in Bioengineering. The MS and PhD degree programs are only offered as full-time programs.

Candidates pursuing an MS or PhD are able to select thesis topics from a diverse range of faculty research. New graduate students may learn about ongoing research topics from individual faculty members, faculty websites, and bioengineering seminars.

### Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

### GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION

Students have the opportunity to pursue the Gordon Engineering Leadership Program (p. 1145) in combination with the MS degree.

## Programs

### Doctor of Philosophy (PhD)

- Bioengineering (p. 349)
- Interdisciplinary Engineering (p. 357)

### Master of Science in Bioengineering (MSBioE)

- Bioengineering (p. 360)

## Bioengineering, PhD

Biology can inspire engineering. Increasingly, discoveries in the life sciences reveal processes, complexity, and control without analogy in the world of traditional engineering. Current methods of producing nanoscale control over molecules cannot reproduce the organization found in even the simplest organisms. Energy capture, robust control, remediation, and self-assembly are all employed by biosystems with efficiency unparalleled by anything in today's laboratories. At the same time, traditional engineering disciplines struggle to find new approaches to the complex challenges of 21st-century technology. The last 50 years of basic life science research have gradually revealed the layers of complexity intrinsic to biological processes, unmasking the fundamental underpinnings on which biological systems are constructed. Bioinspired engineering has the potential to transform the technological landscape of the 21st century. Astonishingly, it represents merely one of the myriad opportunities presented at the interface of biology and engineering.

The field of bioengineering is broad and includes all research at the interface of engineering and biology—this includes bioprocesses, environmental microbiology, biomaterials and tissue engineering, bioelectricity, biomechanics, biomedical and biological imaging, nanotechnology in medicine and the environment, and engineering design for human interfacing. At Northeastern University, bioengineering PhD students have an opportunity to be trained to appreciate advances in bioengineering across a wide range of disciplines while they perform highly focused and cutting-edge bioengineering research with one of our faculty members.

The interdisciplinary PhD in Bioengineering program reflects departmental research strengths in multiple areas. Students accepted to the bioengineering program will undertake a rigorous core curriculum in basic bioengineering science, followed by a flexible selection of electives tailored to their dissertation research.

### Research Areas

There are four key areas of research strength in our department.

#### AREA 1—BIOMEDICAL DEVICES AND BIOIMAGING

The Biomedical Devices and Bioimaging track reflects Northeastern's outstanding research profile in developing transformative and translational instrumentation and algorithms to help understand biological processes and disease. Our department has active federally funded research spanning across a broad spectrum of relevant areas in instrument design, contrast agent development, and advanced computational modeling and reconstruction methods. Example research centers and laboratories include the Institute for Chemical Imaging of Living Systems (<https://coe.northeastern.edu/coe-research/research-centers-institutes/institute-for-chemical-imaging-of-living-systems/>), the Translational Biophotonics Cluster (<https://sites.google.com/view/tbpclosternu/home/>), and the B-SPIRAL signal processing group (<https://web.northeastern.edu/spiral/>).

#### AREA 2—BIOMECHANICS, BIOTRANSPORT, AND MECHANOBIOLOGY

Motion, deformation, and flow of biological systems in response to applied loads elicit biological responses at the molecular and cellular levels that support the physiological function of tissues and organs and drive their adaptation and remodeling. To study these complex interactions, principles of solid, fluid, and transport mechanics must be combined with measures of biological function. The Biomechanics, Biotransport, and Mechanobiology track embraces this approach and leverages the strong expertise of Northeastern faculty attempting to tie applied loads to biological responses at multiple length and time scales.

#### AREA 3—MOLECULAR, CELL, AND TISSUE ENGINEERING

Principles for engineering living cells and tissues are essential to address many of the most significant biomedical challenges facing our society today. These application areas include engineering biomaterials to coax and enable stem cells to form functional tissue or to heal damaged tissue; designing vehicles for delivering genes and therapeutics to reach specific target cells to treat a disease; and uncovering therapeutic strategies to curb pathological cell behaviors and tissue phenotypes. At a more fundamental level, the field is at the nascent stages of understanding how cells make decisions in complex microenvironments and how cells interact with each other and their surrounding environment to organize into complex three-dimensional tissues. Advances will require multiscale experimental, computational, and theoretical approaches spanning molecular-cellular-tissue levels and integration of molecular and physical mechanisms, including the role of mechanical forces.

#### AREA 4—SYSTEMS, SYNTHETIC, AND COMPUTATIONAL BIOENGINEERING

Research groups in systems, synthetic, and computational bioengineering apply engineering principles to model and understand complex biological systems, including differentiation and development, pathogenesis and cancer, and learning and behavior. This involves designing and implementing methods for procuring quantitative and sometimes very large data sets, as well as developing theoretical models and computational tools for interpreting these data. Deciphering the workings of a biological system allows us to identify potential biomarkers and drug targets, to develop protocols for personalized medicine, and more. In addition, we use the design principles of biological systems we discover to engineer and refine new synthetic biological systems for clinical, agricultural, environmental, and energy applications.

### Degree Requirements

Completion of the PhD degree requires students to successfully complete the following requirements:

#### CURRICULUM

The curriculum comprises a strong core of fundamental courses that is coupled with flexible choices of restricted and unrestricted technical electives to provide depth in a particular field of study. The detailed course requirements are outlined below.

For students possessing a baccalaureate in a suitable quantitative or technical field before entering the PhD program, the required course distribution is shown in the table below:

Requirements	Credits
Required core courses	12
Restricted technical electives	8
Unrestricted technical electives	12
Advanced seminar (four semesters)	
Dissertation	
Minimum semester hours required	32

The curriculum for PhD students with “advanced standings,” i.e., students with an MS degree in relevant engineering areas awarded at a qualified institution, will be selected from the available core and elective courses under the guidance of the program director and the student’s primary advisor. Completion of the PhD degree with an advanced standing requires a minimum of 16 semester hours of coursework to be approved by the graduate director and a completed PhD dissertation.

Requirements	Credits
Required core courses	8
Advisor-approved coursework	8
Advanced seminar (four semesters)	
Dissertation	
Minimum semester hours required	16

### QUALIFYING EXAM (WRITTEN AND ORAL)

To qualify to continue in the PhD program, students must pass the bioengineering qualifying examination in the most relevant of the four department research areas. Students will prepare a six-page written document that will be distributed to the committee before the oral examination. Details of the formal qualification exam procedure and timing are available in the Graduate Handbook (<https://bioe.northeastern.edu/community/resources-for-current-students/>). In addition, satisfactory research progress and academic standing are required to pass the exam. The qualifying exam is normally taken in the first semester of the student’s second year.

### QUALIFYING EXAM COMMITTEE

The qualifying examination committee is composed of three members of the Department of Bioengineering faculty. At least two of three committee members will be from the student’s research area. The student’s primary research advisor may not sit on the qualifying exam committee.

### PHD DISSERTATION COMMITTEE

Students normally form their dissertation committee within two years of joining the PhD program. The dissertation committee is composed of a minimum of three members, two of whom must be core faculty from the Department of Bioengineering. The student’s primary advisor will be a member of and chair the dissertation committee. This advisor must be a member of the core bioengineering faculty or a faculty member from another department who has an affiliation with the bioengineering department. Students are required to meet annually with their PhD dissertation committee to ensure satisfactory research progress.

### ANNUAL COMMITTEE MEETINGS AND DISSERTATION PROPOSALS

PhD students must hold their first committee meetings no later than their third year. The first committee meeting requires the student to write a dissertation proposal in the form of an NIH-style R21 proposal research plan that will be distributed to their dissertation committee at least one week prior to the meeting. Thereafter, students are expected to hold annual progress updates with their committee. At the penultimate committee meeting (which must be held at least four months prior to the dissertation defense), the student will prepare and present a final proposal document to the committee. Successful defense of this proposal will allow the student to progress to the PhD dissertation defense.

### PHD DISSERTATION DEFENSE

PhD candidates must satisfactorily complete and defend a dissertation describing original research in bioengineering in an open presentation to the Northeastern bioengineering community, followed by a closed meeting with their dissertation committee in which they are expected to defend their work and answer all relevant questions regarding that work, its significance, and its relationship to ongoing work across the broader research community.

### DISSERTATION COURSE REQUIREMENTS

After achieving PhD candidacy by passing the qualifying exam, the doctoral candidate, in consultation with their research advisor, must register in two consecutive semesters (may include full summer term) for Dissertation Term 1 (BIOE 9990) and Dissertation Term 2 (BIOE 9991). Upon completion of this sequence, the student must then register for Dissertation Continuation (BIOE 9996) every semester (in each fall and spring term and also in the summer term if summer is the student’s last semester) until the dissertation is completed. Students may not register for Dissertation Continuation (BIOE 9996) until they fulfill the two-semester sequence of Dissertation Term 1 (BIOE 9990) and Dissertation Term 2 (BIOE 9991).

PhD students who have completed the majority of their coursework and not yet reached PhD candidacy should register for Exam Preparation—Doctoral (BIOE 8960) in a section for which their research or academic advisor is listed as the instructor in the online registration system.

## Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Milestones

Annual review

Qualifying examination (within two years of entry)

Dissertation committee

Annual committee meetings

Area examination (dissertation prospectus/proposal)

Dissertation defense

### Core Requirements

Code	Title	Hours
<b>Seminar</b>		
BIOE 7390	Seminar (Register and complete two semesters)	0
BIOE 7391	Student Seminar (Register and complete once in second year and once in fourth year)	0

#### Required Core

BIOE 6100	Medical Physiology	4
BIOE 6200	Mathematical Methods in Bioengineering	4
BIOE 7000	Principles of Bioengineering	4

#### Restricted Bioengineering Technical Electives

Complete 8 semester hours from the following:		8
BIOE 5115	Dynamical Systems in Biological Engineering	
BIOE 5235	Biomedical Imaging	
BIOE 5410	Molecular Bioengineering	
BIOE 5411	Applied Molecular Bioengineering	
BIOE 5420	Cellular Engineering	
BIOE 5430	Principles and Applications of Tissue Engineering	
BIOE 5440	The Cell as a Machine	
BIOE 5630	Physiological Fluid Mechanics	
BIOE 5648	Biomedical Optics

## Interdisciplinary Engineering, PhD

130 Snell Engineering Center  
617.373.2711

The College of Engineering offers an interdisciplinary engineering Doctor of Philosophy degree involving substantial work in two or more academic departments or disciplines. This is an individually designed program for the student who wishes to pursue graduate studies in an area that substantially overlaps two or more units. In such cases, that student may design, in consultation with their faculty advisor(s), an interdisciplinary program. The program will correspond in scope and depth to Northeastern University's established degree standards but need not agree exactly with the regulations of individual units. Individually designed interdisciplinary degree programs must be approved by the appropriate graduate office(s).

The interdisciplinary engineering program admits applicants into the PhD program either directly after earning a suitable bachelor's degree (i.e., direct entry) or after earning a suitable master's degree (i.e., advanced entry). Upon acceptance into the program, an applicant is designated as a doctoral student. This designation is changed to doctoral candidate upon successful completion of the doctoral qualifying requirements as well as all the required coursework.

### Program Requirements

In order to pursue an individually designed interdisciplinary engineering graduate program, a student must have been accepted into an approved graduate program that will serve as the administrative home unit for the interdisciplinary engineering program:

- Department of Bioengineering (p. 348)
- Department of Chemical Engineering (p. 364)
- Department of Civil and Environmental Engineering (p. 380)
- Department of Electrical and Computer Engineering (p. 409)
- Department of Mechanical and Industrial Engineering (p. 473)

Students who have been dismissed from any of the COE departments will not be able to enroll into the interdisciplinary engineering PhD program with the department from which they were dismissed as either home or participating department. Successful application for admission to an individually designed interdisciplinary program consists of a written proposal describing the areas of proposed study and research. Part of this proposal will be a list of courses to be taken, a description of the qualifying and comprehensive examination process to be used, a timeline, and any other requirements of the program.

The interdisciplinary engineering PhD requires the commitment by a faculty member at Northeastern to be the advisor of the student and chair of the interdisciplinary committee for the student. This faculty member may or may not be a member of the administrative home unit. The committee must be assembled within the first semester of the program and must include faculty members from all of the participating units. At least two units must be represented on the committee. This committee will be responsible for overseeing the completion of the degree requirements. It will also be responsible for the administrative elements of the program, such as the monitoring of satisfactory progress; the design and grading of the preliminary and comprehensive exams, if applicable; graduation clearance; etc. This interdisciplinary committee is also responsible for an annual review of the progress of the student and for reporting this progress to the administrative home unit on an annual basis.

### Qualifying Examination and Degree Candidacy

Interdisciplinary engineering PhD students must register for and pass the doctoral qualifying examination of their home department. In some cases, if deemed necessary by the interdisciplinary committee, students may be required to take some part of the doctoral qualifying examinations of the other department(s) involved with the student's program of study. To qualify as an interdisciplinary engineering doctoral candidate, students must successfully complete the doctoral qualifying examinations in addition to all their required coursework.

### Dissertation

Students must present their dissertation proposal no more than 12 months after successfully completing their doctoral qualifying examinations. In addition, the presentation of the dissertation proposal and the actual dissertation defense shall be no less than six months apart. Interdisciplinary engineering PhD students must follow the dissertation guidelines of their home department.

### Residency Requirement

After achieving PhD candidacy, students must complete at least two successive semesters of full-time study on campus to establish residency. The total effort for a PhD program involves a minimum of three years of full-time work beyond the bachelor's degree. Students who enter the doctoral program with a Master of Science degree may complete the requirements in less time but should anticipate at least two years of full-time effort.

### Language Requirement

Each doctoral candidate must be proficient in technical writing and oral presentation in the English language. The qualifying examination committee may require additional coursework in the case of any deficiency in these areas.

**Program Requirements****Direct Entry**

Complete all requirements listed below unless otherwise indicated.

## Bioengineering, MSBioE

Bioengineering is engineering in a biological context such as the human body, an ecosystem, or a bioreactor. In every case, the interface between engineered and biological systems places unique constraints on the design and implementation of devices, instruments, or implants. These depend on the properties of the biological system involved and the functionality that is being created.

The interface of engineering and medicine as embodied in bioengineering will be one of the most exciting endeavors and greatest adventures of the 21st century. Job opportunities are expected to expand dramatically with a focus on development of entirely new classes of products, instrumentation, and implants. The impact to human health will be extraordinary.

Bioengineering is intrinsically multidisciplinary and it is essential that students learn the languages used by multidisciplinary teams. To that end, our curriculum is structured around a core of six courses that analyze biological systems from every possible quantitative point of view. On the completion of the core, students choose one of four concentrations, which provides the opportunity to develop a deep level of expertise in a specific area of bioengineering.

Bioengineering students will have unique opportunities in the classroom, research labs, and experiential learning. The projects that they may be able to contribute to include bio-bandages that monitor bacterial growth or that help damaged ligaments heal faster; sheets of cells folded like origami to form a working kidney; and new materials that—like a leaf in the sun—automatically sense and adapt to changes in the environment.

Our graduate program includes four concentrations, including:

- Biomechanics
- Biomedical Devices and Bioimaging
- Cell and Tissue Engineering
- Systems, Synthetic, and Computational Bioengineering

### Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

#### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

##### Master's Degree in Bioengineering with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Bioengineering in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 33-semester-hour degree and certificate will require 17 hours of advisor-approved bioengineering technical courses.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated. *Note:* This major requires a concentration: Biomechanics; Biomedical Devices and Bioimaging; Cell and Tissue Engineering; or Systems, Synthetic, and Computational Bioengineering. Consult your college administrator.

#### Core Requirements

Code	Title	Hours
<b>Seminar</b>		
BIOE 7390	Seminar <sup>1</sup>	0
<b>Required Core</b>

617.373.2209 (fax)

### Mission of the Department

The mission of the Department of Chemical Engineering at Northeastern University is to educate and train students in chemical engineering practice through integrating an inclusive classroom environment with hands-on and cooperative education experiences while solving research problems that impact our world.

Co-op enables students to integrate practical workplace knowledge with classroom learning so the educational experiences are synergistic and deepen the learning process. The chemical engineering community encourages professional development through active participation and leadership in student organizations, professional societies, and departmental activities.

The graduate programs in the Department of Chemical Engineering offer students the opportunity to work on cutting-edge research that tackles pressing challenges facing our society and our planet in areas such as biomedicine, energy, security, and sustainability. Students develop an in-depth understanding of the principles of chemical engineering through core coursework and applied electives, while gaining career experience through laboratory research or co-op. The overarching goal of the rich research and educational experience is to mentor and to equip our students to become future leaders in engineering and science, while simultaneously promoting scholarly achievement for both the faculty and students.

### Academic Programs

The department offers graduate programs in both chemical engineering and pharmaceutical engineering:

- MS in Chemical Engineering
  - MS in Chemical Engineering students can select either a research-based (thesis) or a coursework-based (nonthesis) degree option
- MS in Pharmaceutical Engineering
- PhD in Chemical Engineering
- PhD in Interdisciplinary Engineering

Many graduate-level courses are in the late afternoon or early evening to make them accessible to part-time students with full-time industrial careers. A full-time student may apply for participation in the co-op plan. MS or PhD students pursuing research should first gain the consent of their advisor(s) prior to participating in the co-op plan. Any deviations from the curriculum must be addressed by petition to the graduate committee and will be considered on a case-by-case basis.

Graduate students pursuing a thesis MS or a PhD degree are able to select research topics from a diverse range of faculty interests. The department's research areas include biomolecular and biomedical systems, complex and computational systems, energy and sustainability, engineering education and pedagogy, and materials and nanotechnology. New graduate students can learn about ongoing research from individual faculty members, faculty websites, and graduate student seminars. Graduate student seminars are held on a regular basis and provide an interactive forum for learning and exchanging research ideas.

### Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the your degree. Students should consult their faculty advisor regarding these options (p. 567).

#### GRADUATE CERTIFICATE IN PROCESS SAFETY ENGINEERING

The Process Safety Engineering Graduate Certificate program focuses on the integration of chemical engineering skills with the knowledge of process safety and regulation with specific attention on designing and developing solutions for industrial firms with the goal of creating environments that are safer and in compliance with regulatory rules and regulations.

#### GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION

Students have the opportunity to pursue the Gordon Engineering Leadership Program (p. 1145) in combination with the MS degree.

### Programs

#### Doctor of Philosophy (PhD)

- Chemical Engineering (p. 366)
- Interdisciplinary Engineering (p. 357)

**Master of Science (MS)**

- Pharmaceutical Engineering (p. 374)

**Master of Science in Chemical Engineering (MChE)**

- Chemical Engineering (p. 376)

**Graduate Certificate**

- Process Safety Engineering (p. 379)

## Chemical Engineering, PhD

Each student admitted to the PhD program in chemical engineering will initially be designated a doctoral student. Upon successful completion of the requirements for doctoral candidacy as described below, a student is reclassified as a doctoral candidate. After establishing candidacy, a student must complete a program of academic coursework and a dissertation under the direction of a dissertation advisor. All doctoral candidates must also pass a final oral examination.

### Doctoral Candidacy for Direct Entry

To qualify for doctoral candidacy, the student must demonstrate mastery of four core courses of chemical engineering (thermodynamics or statistical thermodynamics, kinetics, transport, and mathematics). To become a doctoral candidate, students must maintain a grade-point average of 3.250 or above in the four core courses and have no individual grade below a B– in the four core courses.

In addition, each student must complete 4 semester hours of Research (CHME 9984) and demonstrate critical thinking, analysis, and experimental planning skills related to their dissertation research topic through a written candidacy proposal and an oral defense of this proposal. The student must pass, as determined by the student's dissertation committee, this candidacy proposal defense in order to advance to doctoral candidacy. If the student fails, they may resubmit their proposal and retake the defense one time within four months, unless an extension is granted by the primary research advisor and the department graduate committee. The student earns the classification of doctoral candidate upon successful completion of these requirements.

### Doctoral Candidacy for Advanced Entry

To become a doctoral candidate, advanced-entry students who have already completed a graduate degree in chemical engineering or a closely related discipline must petition the graduate committee of the Department of Chemical Engineering and demonstrate that the mastery has been attained through coursework either at Northeastern University or during a previous graduate degree from another institution (typically granted when the student has achieved a grade of at least A– in an equivalent course). The student must demonstrate mastery of the four core areas of chemical engineering (thermodynamics or statistical thermodynamics, kinetics, transport, and mathematics) through course performance.

The graduate committee may require a student to take or retake any or all of the core courses before achieving doctoral candidacy. Incoming advanced-entry students should form a plan of coursework in consultation with the associate chair for graduate studies and have this approved by the graduate committee. For the core courses taken at Northeastern, students should maintain a GPA of 3.250 or above and have no individual grade below a B–.

In addition, each student must complete 4 semester hours of Research (CHME 9984) and demonstrate critical thinking, analysis, and experimental planning skills related to their dissertation research topic through a written candidacy proposal and a defense of this proposal. The student must pass, as determined by the student's dissertation committee, this oral candidacy proposal defense in order to advance to doctoral candidacy. If the student fails, they may resubmit their proposal and retake the defense one time within four months, unless an extension is granted by the primary research advisor and the department graduate committee. The student earns the classification of doctoral candidate upon successful completion of these requirements.

## Course Requirements

### DIRECT ENTRY

A minimum of 32 semester hours of academic coursework, **not including any independent study credits**, beyond the bachelor's degree is required. The 32 semester hours must include at least 24 semester hours of academic coursework (exclusive of thesis or dissertation) taken at Northeastern. All four of the core courses (see table under Program Requirements), the 4 semester hours of research, and the 4 semester hours of professional development courses must be included in the student's academic graduate coursework.

### ADVANCED ENTRY

A **minimum** of 20 semester hours of academic coursework, **not including any independent study credits**, beyond the master's degree is required. At least 16 semester hours of academic coursework (exclusive of thesis or dissertation) must be taken at Northeastern. At least one of the core courses (see table under Program Requirements), 4 semester hours of Research (CHME 9984), and 4 semester hours of professional development courses must be included in the student's academic graduate coursework. At least 8 semester hours of noncore electives must also be included. If the graduate committee requires additional core courses to achieve doctoral candidacy, these are in addition to the 20-semester-hour minimum.

### GENERAL REQUIREMENTS

PhD students who have completed the majority of their coursework and not yet reached PhD candidacy should register for Candidacy Preparation—Doctoral (CHME 8960), in a section for which their research or academic advisor is listed as the instructor in the online registration system.

After obtaining PhD candidacy, students are required to register for Dissertation Term 1 (CHME 9990) and Dissertation Term 2 (CHME 9991) for two consecutive semesters. This is then followed by registration for Dissertation Continuation (CHME 9996) in each semester thereafter until the dissertation has been completed and defended. Note: No course credits are awarded for Dissertation Term 1 (CHME 9990), Dissertation Term 2 (CHME 9991), or Dissertation Continuation (CHME 9996); however, a student is considered full time if registered for these courses.

All students pursuing a doctoral degree must enroll in the department's Seminar (CHME 7390) course for each semester they are working toward their degree.

Students will be advised on their courses for the first semester by the associate chair for graduate studies. After the first semester, students will work with their dissertation adviser to determine appropriate courses and course schedule to meet their educational needs and aspirations. Upon consultation with the dissertation advisor, a student may take up to 44 semester hours of course credit without additional financial penalty. Students and dissertation advisors should keep in mind that the university residency requirement requires two semesters of academic studies after becoming a doctoral candidate.

## Language Requirement

There is no foreign language requirement for the PhD degree. However, each candidate must be proficient in technical writing and oral presentation in the English language. The graduate committee may require additional coursework to improve language proficiency, if necessary.

## Residence Requirement

A student satisfies the residence requirement by completing one academic year of full-time graduate studies during two consecutive academic semesters after qualifying for doctoral candidacy. Additional required coursework (exclusive of seminars) may be completed during this period. Students are required to be continually enrolled while pursuing the completion of the dissertation.

## Dissertation

After a student establishes doctoral candidacy, they must complete a dissertation that embodies the results of extended original research and includes material suitable for publication. The student is responsible for proposing a dissertation committee to be approved by the dissertation advisor at least one month prior to the dissertation defense. The committee must have a minimum of four members, including the primary advisor. At least two committee members must be faculty members in the Department of Chemical Engineering. Additionally, one of the committee members must be external to the Department of Chemical Engineering. Committee membership is not limited to faculty at Northeastern or to engineering faculty. The student is encouraged to consider experts in the dissertation topic and to work with the dissertation advisor to create a meaningful and helpful committee. The dissertation committee will approve the dissertation in its final form. The graduate school requirements for dissertation formatting and electronic submittal instructions can be found on the College of Engineering's webpage (<https://coe.northeastern.edu/academics-experiential-learning/graduate-school-of-engineering/graduate-student-services/dissertation-thesis-instructions/>). Students are responsible for contacting the Graduate School of Engineering for any updates to dissertation requirements and appropriate deadlines.

## Dissertation Defense and Final Oral Examination

This comprehensive examination includes the public dissertation defense as well as a final oral examination to include the subject matter of the doctoral dissertation and significant developments in the field of the dissertation work. The oral presentation will be open to the public, including students, faculty, and the student's committee.

## Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Milestones

Biannual review  
Dissertation committee  
Dissertation proposal  
Dissertation defense

### Core Requirements

A minimum of 32 semester hours of academic coursework is required, plus 2 optional semester hours for cooperative education and mentoring in chemical engineering. Independent study credits do not count toward the 32 required semester hours.

Code	Title	Hours
<b>Core Courses</b>		
A cumulative 3.250 GPA, with no individual class lower than a B–, is required for the following:		
CHME 7320 or ME 6200	Chemical Engineering Mathematics Mathematical Methods for Mechanical Engineers 1	4
CHME 7330	Chemical Engineering Thermodynamics	4
CHME 7340	Chemical Engineering Kinetics	4
CHME 7350	Transport Phenomena	4
<b>Research</b>		
CHME 9984	Research	4
<b>Professional Development</b>		
CHME 7391	Professional Development and Communication in Chemical Engineering 1	1
CHME 7392	Professional Development and Communication in Chemical Engineering 2	1
CHME 7393	Professional Development and Communication in Chemical Engineering 3	1
CHME 7394	Professional Development and Communication in Chemical Engineering 4	1
<b>Seminar</b>		

Complete the following (repeatable) course each semester:

CHME 7390	Seminar
-----------	---------

Recommended but optional:

CHME 7395	Mentoring in Chemical Engineering
ENCP 6100	Introduction to Cooperative Education

Minimum 3.000 GPA overall required

<sup>1</sup> Additional core classes may be required by the chemical engineering graduate committee to achieve PhD candidacy, which would not count toward the 20 SH minimum for the PhD.

## Interdisciplinary Engineering, PhD

130 Snell Engineering Center  
617.373.2711

The College of Engineering offers an interdisciplinary engineering Doctor of Philosophy degree involving substantial work in two or more academic departments or disciplines. This is an individually designed program for the student who wishes to pursue graduate studies in an area that substantially overlaps two or more units. In such cases, that student may design, in consultation with their faculty advisor(s), an interdisciplinary program. The program will correspond in scope and depth to Northeastern University's established degree standards but need not agree exactly with the regulations of individual units. Individually designed interdisciplinary degree programs must be approved by the appropriate graduate office(s).

The interdisciplinary engineering program admits applicants into the PhD program either directly after earning a suitable bachelor's degree (i.e., direct entry) or after earning a suitable master's degree (i.e., advanced entry). Upon acceptance into the program, an applicant is designated as a doctoral student. This designation is changed to doctoral candidate upon successful completion of the doctoral qualifying requirements as well as all the required coursework.

### Program Requirements

In order to pursue an individually designed interdisciplinary engineering graduate program, a student must have been accepted into an approved graduate program that will serve as the administrative home unit for the interdisciplinary engineering program:

- Department of Bioengineering (p. 348)
- Department of Chemical Engineering (p. 364)
- Department of Civil and Environmental Engineering (p. 380)
- Department of Electrical and Computer Engineering (p. 409)
- Department of Mechanical and Industrial Engineering (p. 473)

Students who have been dismissed from any of the COE departments will not be able to enroll into the interdisciplinary engineering PhD program with the department from which they were dismissed as either home or participating department. Successful application for admission to an individually designed interdisciplinary program consists of a written proposal describing the areas of proposed study and research. Part of this proposal will be a list of courses to be taken, a description of the qualifying and comprehensive examination process to be used, a timeline, and any other requirements of the program.

The interdisciplinary engineering PhD requires the commitment by a faculty member at Northeastern to be the advisor of the student and chair of the interdisciplinary committee for the student. This faculty member may or may not be a member of the administrative home unit. The committee must be assembled within the first semester of the program and must include faculty members from all of the participating units. At least two units must be represented on the committee. This committee will be responsible for overseeing the completion of the degree requirements. It will also be responsible for the administrative elements of the program, such as the monitoring of satisfactory progress; the design and grading of the preliminary and comprehensive exams, if applicable; graduation clearance; etc. This interdisciplinary committee is also responsible for an annual review of the progress of the student and for reporting this progress to the administrative home unit on an annual basis.

### Qualifying Examination and Degree Candidacy

Interdisciplinary engineering PhD students must register for and pass the doctoral qualifying examination of their home department. In some cases, if deemed necessary by the interdisciplinary committee, students may be required to take some part of the doctoral qualifying examinations of the other department(s) involved with the student's program of study. To qualify as an interdisciplinary engineering doctoral candidate, students must successfully complete the doctoral qualifying examinations in addition to all their required coursework.

### Dissertation

Students must present their dissertation proposal no more than 12 months after successfully completing their doctoral qualifying examinations. In addition, the presentation of the dissertation proposal and the actual dissertation defense shall be no less than six months apart. Interdisciplinary engineering PhD students must follow the dissertation guidelines of their home department.

### Residency Requirement

After achieving PhD candidacy, students must complete at least two successive semesters of full-time study on campus to establish residency. The total effort for a PhD program involves a minimum of three years of full-time work beyond the bachelor's degree. Students who enter the doctoral program with a Master of Science degree may complete the requirements in less time but should anticipate at least two years of full-time effort.

### Language Requirement

Each doctoral candidate must be proficient in technical writing and oral presentation in the English language. The qualifying examination committee may require additional coursework in the case of any deficiency in these areas.

## Pharmaceutical Engineering, MS

The Master of Science in Pharmaceutical Engineering is offered jointly by Northeastern University's College of Engineering and Bouvé College of Health Sciences. The program prepares students with a fundamental understanding of pharmaceutical sciences and principles of engineering to develop the depth needed for advanced study of pharmaceutical engineering.

This program is generally pursued by students with a Bachelor of Science in Chemical Engineering or closely allied fields in engineering, sciences, or mathematics. The program was designed in collaboration with the Department of Pharmaceutical Sciences to develop the depth needed for advanced study of pharmaceutical engineering. Students wishing to pursue the master's degree with undergraduate educational backgrounds other than engineering are required to demonstrate completion of mathematics coursework through differential equations or the equivalent to be admitted. Students are advised to work closely with their advisors and instructors to determine the electives that would meet their career goals.

### Part-Time Students

Part-time students may progress according to their plans and time constraints but within the seven-year time limit.

Master of Science students wishing to change their status from part time to full time must notify the chemical engineering department and make a formal petition to the Graduate School of Engineering. Refer to the regulations of the Graduate School of Engineering for further information on academic administrative policies.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
CHME 7600	Pharmaceutical Engineering I	4
CHME 7601	Pharmaceutical Engineering II	4
CHME 7602	Pharmaceutical Engineering Laboratory	2
PHSC 5100	Concepts in Pharmaceutical Science	2
PHSC 5102	Concepts in Pharmaceutical Science 2	2
PHSC 7010	Pharmaceutical Sciences Laboratory	4

#### Restricted Elective Courses

Code	Title	Hours
At least 3 semester hours of total elective courses are required from pharmaceutical sciences (PHSC, PMST) and from chemical engineering (CHME). These semester hours could come from any elective group, as appropriate.		

#### Regulatory

Complete 3 semester hours from the following:		3
BIOT 5340	Introduction to Biotherapeutic Approvals	
BIOT 5500	Concepts in Regulatory Science	
BIOT 6320	Quality Management Systems and Validation	
RGA 6000	Introduction to Food and Drug Administration (FDA) Pharmaceutical Regulation	
RGA 6002	Introduction to Regulatory Compliance and Practice	

#### Quality/Statistics

Complete 4 semester hours from the following:		4
CHME 5185	Design of Experiments and Ethical Research (DOEER)	
IE 6200	Engineering Probability and Statistics	
IE 7280	Statistical Methods in Engineering	
IE 7285	Statistical Quality Control	
PHSC 6214	Experimental Design and Biostatistics	

#### Depth Electives

Complete 7 semester hours from the following:		7
BIOT 5330	Drug Safety and Immunogenicity	
BIOT 6300	Pharmaceutical Microbiology	
BIOT 6340	Sterile Manufacturing Operations	
BIOT 7250	Advanced Biotechnology Applications Laboratory	
CHME 5101	Fundamentals of Chemical Engineering Analysis	
CHME 5160	Drug Delivery: Engineering Analysis	

CHME 5179	Complex Fluids and Everyday Materials
CHME 5185	Design of Experiments and Ethical Research (DOEER)
CHME 5631	Biomaterials Principles and Applications
CHME 5632	Advanced Topics in Biomaterials
CHME 5683	Introduction to Polymer Science
CHME 7330	Chemical Engineering Thermodynamics
CHME 7350	Transport Phenomena
PHSC 5300	Pharmaceutical Biochemistry
PHSC 5310	Cellular Physiology
PHSC 5500	Repurposing Drugs for Cancer Immunotherapies
PHSC 5555	Pharmaceutical Toxicology
PHSC 5560	Nanotoxicity
PHSC 5619	Mass Spectrometry in Drug Development
PMST 6250	Advanced Physical Pharmacy
PMST 6252	Pharmacokinetics and Drug Metabolism
PMST 6254	Advanced Drug Delivery Systems

### **Program Credit/GPA Requirements**

32 total semester hours required

Minimum 3.000 GPA required

## Chemical Engineering, MSChE

For program contact information, please visit the College of Engineering website (<https://che.northeastern.edu/academics/graduate-studies/ms-chme/>).

The Master of Science in Chemical Engineering is normally pursued by students with a Bachelor of Science in Chemical Engineering or closely allied fields. Students wishing to pursue the master's degree but with undergraduate educational backgrounds other than chemical engineering may be required to complete supplementary undergraduate coursework. These courses are in addition to the minimum course requirements. Students enrolled in the program are encouraged to seek guidance from their instructors and advisor regarding additional coursework that may supplement the graduate curriculum.

Students originally admitted to the master's degree program who wish to switch to the PhD program must petition the associate chair for graduate studies. If admission is granted, then the student must satisfy all the requirements of the doctoral degree program, including the requirements for doctoral candidacy.

### Course Requirements

A minimum of 32 semester hours of academic work is required to qualify for the Master of Science degree in chemical engineering.

**If pursuing a thesis option**, at least 8 semester hours of thesis credit must be included as part of these 32 semester hours of credits. In addition, each student pursuing a thesis option must enroll in the department's seminar course for each semester they are working toward their degree. The faculty advisor and the student establish the sequence of courses that students take to pursue the Master of Science in Chemical Engineering.

**If pursuing a coursework option**, students must complete a minimum of 32 semester hours of coursework and no enrollment in the seminar course is required. See required core courses and example elective courses for all graduate students (p. 377).

Degree Requirements	Thesis Option	Coursework Option
Required core courses	16 SH	16 SH
Master of Science thesis	8 SH	N/A
Seminar	0 SH	N/A
Elective courses	8 SH	16 SH
<b>Minimum semester hours required</b>	<b>32 SH</b>	<b>32 SH</b>

### Thesis Requirements

Students pursuing a Master of Science in Chemical Engineering with thesis must submit to the Graduate School of Engineering a written thesis that is approved by the thesis committee and department chair. For details, see the graduate school requirements and electronic submittal instructions (<https://coe.northeastern.edu/academics-experiential-learning/graduate-school-of-engineering/graduate-student-services/dissertation-thesis-instructions/>). MS with thesis students must also complete an oral master's thesis defense in order to successfully complete the program. The student will be expected to form a master's thesis committee, composed of a minimum of three members—one who is the advisor, one other faculty member from the chemical engineering department, and one member from outside the department. The oral presentation will be open to the public, including students, faculty, and the candidate's committee.

### Part-time Students

Part-time students may progress according to their plans and time constraints but within the seven-year time limit. A minimum of 32 semester hours of academic coursework is required for part-time students. The thesis and seminar course are not required for part-time students pursuing a master's degree.

Master of Science students wishing to change their status from part-time to full-time must notify the chemical engineering department and make a formal petition to the Graduate School of Engineering. Refer to the regulations of the Graduate School of Engineering for further information on academic administrative policies.

### Departure Prior to Thesis Completion

Occasionally, students must leave the chemical engineering department prior to completion of all degree requirements. In such instances, long time intervals have often elapsed before thesis or manuscript submission. Accordingly, the department has adopted the guideline that a student cannot submit a thesis for credit beyond three years after the student stops actively pursuing the research. Exceptions may be granted upon petition to the departmental graduate committee. Petitions must demonstrate extenuating circumstances and prove that the research is still of value to the profession.

### Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

#### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Chemical Engineering with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Chemical Engineering in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors and 16 semester hours of required chemical engineering coursework.

## ENGINEERING BUSINESS

### Master's Degree in Chemical Engineering with Graduate Certificate in Engineering Business

Students may complete a Master of Science in Chemical Engineering in addition to earning a Graduate Certificate in Engineering Business. Students must apply and be admitted to the Galante Engineering Business Program in order to pursue this option. The program requires the applicant to have earned or be in a program to earn a Bachelor of Science in Engineering from Northeastern University. The integrated 32-semester-hour degree and certificate will require 16 semester hours of the chemical engineering core courses and 16 semester hours from the outlined business-skill curriculum. The coursework, along with participation in cocurricular professional development elements, earn the Graduate Certificate in Engineering Business. (p. 529)

## Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Core Requirements

Code	Title	Hours
CHME 7320 or ME 6200	Chemical Engineering Mathematics Mathematical Methods for Mechanical Engineers 1	4
CHME 7330	Chemical Engineering Thermodynamics	4
CHME 7340	Chemical Engineering Kinetics	4
CHME 7350	Transport Phenomena	4

### Options

Complete one of the following options:

#### COURSEWORK OPTION

Code	Title	Hours
Complete 16 semester hours from the course list below. (p. 377)		16

#### THESIS OPTION

Code	Title	Hours
Thesis Complete the following courses. Please note that students pursuing the thesis option are required to register for CHME 7990 as many times as necessary to complete 8 semester hours and, in addition, must enroll in CHME 7390 for each semester they are working toward their degree.		8
CHME 7390	Seminar	
CHME 7990	Thesis	

#### Electives

Complete 8 semester hours from the course list below. (p. 377)		8
--	--	---

## Course List

Students can take electives outside this list with prior approval from the faculty advisor. Students may complete a maximum of 8 semester hours (thesis option) or 12 semester hours (nonthesis option) of coursework for credit outside the Department of Chemical Engineering under the guidance of their advisor and approval of the chemical engineering graduate program director.

Code	Title	Hours

Minimum 3.000 GPA required

## Process Safety Engineering, Graduate Certificate

The Graduate Certificate in Process Safety Engineering focuses on the integration of chemical engineering skills with the knowledge of process safety and regulation with specific attention on designing and developing solutions for industrial firms with the goal of creating environments that are safer and in compliance with regulatory rules and regulations.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of chemical engineering knowledge and skills to lead efforts within companies to plan and implement process safety designs that assist in meeting the regulatory requirements and confirming code compliance within an industrial firm in order to maintain the safety, health, and welfare of their employees and the public as well as making industrial firms safer and profitable.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
<b>Process Safety</b>		
CHME 5510	Fundamentals in Process Safety Engineering	4
CHME 5520	Process Safety Engineering—Chemical Reactivity, Reliefs, and Hazards Analysis	4
<b>Relief and Scenario Modeling</b>		
CHME 6610	Computational Programs in Process Safety for Relief and Scenario Modeling	4
<b>Special Topics</b>		
CHME 7262	Special Topics in Process Safety	4

#### Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

## Civil and Environmental Engineering

Website (<http://www.civ.neu.edu>)

**Jerome F. Hajjar, PhD, PE**  
CDM Smith Professor and Chair

400 Snell Engineering Center  
617.373.2444  
617.373.4419 (fax)

### Overview

With a strategic focus in urban engineering and through a range of teaching and research strengths, anchored by several multidisciplinary, multi-institutional centers and programs, our academic programs are designed to prepare professionals to address the global, complex, and ever-evolving engineering challenges of our time by building on current department strengths and expanding into vital areas. We give our future master's and PhD graduates the opportunity to make real-world impact on and long-lasting contributions to the well-being and development of society.

### Mission of the Department

Advancing innovative civil and environmental solutions for society and creating globally oriented engineering leaders by integrating experiential education and use-inspired interdisciplinary research.

### Academic Programs

Within our graduate programs, students work alongside world-class faculty on advanced research and courses, developing a solid base for their careers. Three overarching themes are emphasized in our programs: environmental health, civil infrastructure security, and sustainable resource engineering. These themes are aligned with the department's premier strengths in simulation (both computational and experimental), smart sensing, data and network science, and urban informatics and are all reflected in the courses offered in our graduate programs.

#### MASTER OF SCIENCE DEGREE

The department offers five MS degree programs in the following areas: civil engineering (students can choose one out of six concentrations); environmental engineering; engineering and public policy; sustainable building systems; and climate science and engineering (in partnership with the Department of Marine and Environmental Science in the College of Science). Options for a master's thesis or report in place of coursework are available. All civil and environmental engineering master's programs are available on a full-time or part-time basis. For a full list of the department's academic program offerings, please refer to the Programs (p. 380) tab.

#### DOCTOR OF PHILOSOPHY DEGREE

The department offers the following PhD degrees: PhD in Civil and Environmental Engineering and Interdisciplinary PhD. The doctoral program is designed to be flexible with respect to subject area and may be adapted to any subject area in civil and environmental engineering, including interdisciplinary options within the department or across departments or colleges.

The PhD is awarded to students who demonstrate high academic achievement and research competence in the selected field. Students must pursue the PhD program on a basis consistent with the residence requirements for the degree (p. 382).

### Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

#### GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION

Students have the opportunity to pursue the Gordon Engineering Leadership Program (p. 551) in combination with the MS degree.

### Programs

#### Doctor of Philosophy (PhD)

- Civil and Environmental Engineering (p. 382)
- Interdisciplinary Engineering (p. 357)

#### Master of Science (MS)

- Climate Science and Engineering
- Engineering and Public Policy (p. 387)

#### Master of Science in Civil Engineering (MSCivE)

- Civil Engineering with Concentration in Construction Management (p. 393)
- Civil Engineering with Concentration in Data and Systems (p. 390)
- Civil Engineering with Concentration in Geotechnical/Geoenvironmental Engineering (p. 395)

- Civil Engineering with Concentration in Structures (p. 397)
- Civil Engineering with Concentration in Transportation (p. 399)
- Civil Engineering with Concentration in Water, Environmental, and Coastal Systems (p. 401)

**Master of Science in Environmental Engineering (MSEnvE)**

- Environmental Engineering (p. 403)

**Master of Science in Sustainable Building Systems (MSSBS)**

- Sustainable Building Systems (p. 405)

**Graduate Certificate**

- Climate and Engineering (p. 407)
- Sustainability Engineering (p. 408)

## Civil and Environmental Engineering, PhD

The Doctor of Philosophy in Civil and Environmental Engineering offers students an opportunity for in-depth study in a broad range of areas in civil and environmental engineering. Awarding the Doctor of Philosophy degree is based on ability to formulate and execute original research addressing important problems and completion of a rigorous academic program that enhances the student's knowledge in relevant areas. The PhD program has two components:

1. An academic program of graduate-level courses that provides depth in a specific area of Civil and Environmental Engineering (the major field) as well as other coursework that provides additional exposure at an advanced level to one or more disciplines
2. The dissertation, an extended independent research effort on a relevant technical problem resulting in an original contribution to the field

Upon acceptance into the program, an applicant is designated as a doctoral student. This designation is changed to doctoral candidate upon successful completion of the doctoral qualifying examinations (both written and oral area exams) and all the required coursework.

Each student's mastery of subject matter is measured by a qualifying examination covering a subset of topics selected from the major field. A doctoral dissertation committee periodically monitors research progress, and the candidate is required to present and defend his or her research results before the doctoral dissertation committee upon completion of the work.

### Coursework Requirement

The academic program must include at least 20 semester hours (Advanced Standing) or 48 semester hours (Direct Entry) of graduate-level coursework at Northeastern University. A student may count no more than 4 semester hours of independent study (such as special project in civil and environmental engineering) toward the minimum course requirements. For direct entry students, a minimum of 40 semester hours must be related to the major field but may include courses from other departments when appropriate. The civil and environmental engineering (CEE) department encourages flexibility in program definition, especially in areas where complementary courses exist in other departments or where expertise resides outside the department and where the objective is to introduce new technology in civil and environmental engineering practice.

PhD students who have completed the majority of their coursework and not yet reached PhD candidacy should register for Exam Preparation—Doctoral (CIVE 8960), in a section for which their research or academic advisor is listed as the instructor in the online registration system.

Upon successful completion of the qualifying exam and the majority of required coursework, each doctoral candidate must register in two consecutive semesters for Dissertation Term 1 (CIVE 9990) and Dissertation Term 2 (CIVE 9991). Upon completion of this sequence, the candidate must register for Dissertation Continuation (CIVE 9996) in every semester until the dissertation is complete. Students may not register for Continuation until they fulfill the two-semester dissertation sequence.

### Qualifying Examination and Degree Candidacy

The objective of the doctoral qualifying examination is to determine whether the applicant possesses mastery of the fundamentals and ability to apply them to solve unfamiliar problems that require analysis, synthesis, and independent thinking, as well as communication skills to present research ideas and plans, motivate problems, respond to related questions, and defend assumptions and technical approach.

The qualifying exam includes written and oral components. Its content depends upon the educational background and objectives of the student. In general, the written component covers four subject areas selected from the major field and includes engineering and science disciplines, as well as civil and environmental engineering application areas. The oral component measures general comprehension and aptitude for research. If a student fails the exam, he or she may retake it one more time with the permission of the qualifying examination committee.

The qualifying exam is administered within the first 18 months of the PhD program, if the student already holds an MS degree. PhD students who begin the PhD program without a MS degree should take the qualifying exam within the first 30 months of the start of the program.

Under extraordinary circumstances, a student may be granted one additional semester before taking the qualifying exam but only by prior petition to the advisor, concentration representative, and graduate studies committee.

### DISSERTATION

Once degree candidacy is established, a doctoral candidate may proceed with his or her dissertation. The candidate must write a dissertation proposal and name a CEE faculty member as the dissertation advisor. The candidate and the advisor must form a dissertation committee, which should have no fewer than four members, of which at least two are full-time (or affiliated) faculty from the CEE department. The committee will monitor progress and approve the final document.

### DISSERTATION PROPOSAL PRESENTATION

Each student, along with a faculty advisor, must jointly develop a proposal defining the content of the academic program, subject to review by the dissertation committee. Intellectual rigor, connectivity of subject matter, and compatibility with departmental interests are critical issues. The doctoral dissertation committee's approval of the proposal represents a mutual agreement between the student and the committee.

### Comprehensive Examination

The comprehensive exam is a defense of the doctoral research work and an examination on subject matter related to the dissertation area.

Each doctoral candidate must defend his or her dissertation within seven years from the start of the PhD program.

## Annual Report

At the beginning of each calendar year, all CEE doctoral students including interdisciplinary students within CEE, should complete the Annual PhD Student Progress Report, which details academic and research activities and accomplishments over the previous year. These forms will be reviewed by the faculty in each respective concentration to ensure satisfactory progress, with feedback provided to the students as necessary.

## Residence Requirement

After achieving PhD candidacy, students must complete at least two successive semesters of full-time study on campus to establish residence. The total effort for a PhD program involves a minimum of three years of full-time work beyond the bachelor's degree. Students who enter the doctoral program with a Master of Science degree may complete the requirements in less time but should anticipate at least two years of full-time effort.

## Language Requirement

Each doctoral candidate must be proficient in technical writing and oral presentation in the English language. The qualifying examination committee may require additional coursework in the case of any deficiency in these areas.

## Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Milestones

Qualifying examination and comprehensive examination  
Annual review  
Dissertation proposal  
Dissertation committee  
Dissertation defense

### Core Requirements

Complete at least 48 semester hours of approved coursework. Consult your faculty advisor for acceptable courses. Please note that a maximum of 4 semester hours of Independent Study (CIVE 7978) will be accepted toward the 48-semester-hour requirement.

### Dissertation

Code	Title	Hours
Complete the following:		
CIVE 9990	Dissertation Term 1	
CIVE 9991	Dissertation Term 2	

### Program Credit/GPA Requirements

48 total semester hours required  
Minimum 3.000 GPA required

### Advanced Entry Program Requirements

#### Coursework Requirement

The CEE department encourages flexibility in program definition, especially in areas where complementary courses exist in other departments or where expertise resides outside the department and where the objective is to introduce new technology in civil and environmental engineering practice. The academic program must include at least 20 semester hours of graduate-level coursework at Northeastern University. A student may count no more than 4 semester hours of independent study (such as special project in civil engineering) toward the minimum course requirements.

Complete all courses and requirements listed below unless otherwise indicated.

### Milestones

Qualifying examination and comprehensive examination  
Annual review  
Dissertation proposal  
Dissertation committee  
Dissertation defense

### Core Requirements

Complete 20 semester hours of approved coursework. Consult your faculty advisor for acceptable courses. Please note that a maximum of 4 semester hours of Independent Study (CIVE 7978) will be accepted toward the 20-semester-hour requirement.

## Dissertation

Code	Title	Hours
CIVE 9990	Dissertation Term 1	
CIVE 9991	Dissertation Term 2	

## Coursework Requirement

The academic program must include at least 20 semester hours of graduate-level coursework at Northeastern University.

A student may count no more than 4 semester hours of independent study (such as special project in civil engineering) toward the minimum course requirements.

## Program Credit/GPA Requirements

20 total semester hours required

Minimum 3.000 GPA required

## Climate Science and Engineering, MS

### Overview

The Master of Science in Climate Science and Engineering is offered jointly by the College of Engineering and the College of Science. The program provides training in the fundamental scientific processes that underpin the structure and dynamics of the climate, as well as the engineering strategies and technologies required for decarbonization and adaptation to climate change.

Incoming students will typically hold a bachelor's degree in a science, engineering, or related field. The program is designed to prepare students for climate-facing positions in the public or private sectors and can serve as a springboard for students interested in pursuing doctoral-level research. Students must take at least 12 semester hours of College of Science courses and at least 12 semester hours of College of Engineering courses and includes a report, thesis, or coursework option.

Degree Requirements	With Report	With Thesis	Coursework Only
Required core courses	20 SH	20 SH	20 SH
Other electives	8 SH	4 SH	12 SH
Master of Science report/thesis	4 SH	8 SH	
Minimum semester hours required	32 SH	32 SH	32 SH

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated. In order to ensure a balance of training across science and engineering, students must take at least 12 semester hours of College of Science courses (starting with EEMB, ENVR) and at least 12 semester hours of College of Engineering courses (starting with CIVE, EECE, ENSY, MATL, ME, SBSY) from the core requirements and restricted elective course options.

### Core Requirements

Code	Title	Hours
Select from the core requirements listed below; any core course not used to meet this core course requirement can be taken as a restricted elective:		
ENVR 5350	Sustainable Energy and Climate Solutions	20
ENVR 5600	Coastal Processes, Adaptation, and Resilience	
ENVR 5800	Climate Adaptation and Nature-Based Solutions	
CIVE 5150	Climate and Atmospheric Change	
or ENVR 5150	Climate and Atmospheric Change	
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
CIVE 5281	Coastal Dynamics and Design	
CIVE 5363	Climate Science, Engineering Adaptation, and Policy	
CIVE 5365	Climate Technologies for Decarbonization, Mitigation, and Adaptation	
CIVE 5366	Air Quality Engineering and Science	
CIVE 5670	Global Biogeochemistry	
or ENVR 5670	Global Biogeochemistry	
CIVE 7110	Critical Infrastructure Resilience	

### Options

Complete one of the following options:

#### COURSEWORK OPTION

Code	Title	Hours
Complete 12 semester hours from the restricted electives course list below.		12

#### REPORT OPTION

Code	Title	Hours
CIVE 8674	Master's Report	4

## Engineering and Public Policy, MS

For program contact information, please visit the College of Engineering website (<https://cee.northeastern.edu/academics/graduate-studies/ms-cepp/>).

The purpose of this degree is to provide students with a background in engineering with the tools necessary to conduct robust policy analysis. It includes required core courses from the Department of Civil and Environmental Engineering and the School of Public Policy and Urban Affairs, complemented by electives in engineering and public policy, which can be met by two courses and a master's report (recommended), or by one course and a thesis, or by three courses. A minimum of 16 semester hours must be taken in the College of Engineering.

Degree Requirements	With Report	With Thesis	Coursework Only
Required core courses	20 SH	20 SH	20 SH
Other electives	8 SH	4 SH	12 SH
Master of Science report/thesis	4 SH	8 SH	
Minimum semester hours required	32 SH	32 SH	32 SH

### Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

#### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

##### Master's Degree in Engineering and Public Policy with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Engineering and Public Policy in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16 semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require 20 hours of advisor-approved technical courses.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Sustainable Engineering and Systems Modeling Requirements

Code	Title	Hours
Complete 12 semester hours from the following:		12
CIVE 5261	Dynamic Modeling for Environmental Investment and Policymaking	
or PPUA 5261	Dynamic Modeling for Environmental Decision Making	
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
CIVE 5363	Climate Science, Engineering Adaptation, and Policy	
CIVE 6566	Sustainable Urban Transportation: Netherlands	
CIVE 6777	Climate Hazards and Resilient Cities Abroad	
CIVE 6778	Climate Adaptation and Policy Abroad	
CIVE 7100	Time Series and Geospatial Data Sciences	
CIVE 7110	Critical Infrastructure Resilience	
CIVE 7150	Data-Driven Decision Support for Civil and Environmental Engineering	
CIVE 7151	Urban Informatics and Processing	
CIVE 7155	Dynamics and Control of Infrastructure Systems	
CIVE 7272	Air Quality Management	
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
IE 5500	Systems Engineering in Public Programs	
IE 5640	Data Mining for Engineering Applications	
IE 6200	Engineering Probability and Statistics	
IE 7280	Statistical Methods in Engineering	
ME 5645	Environmental Issues in Manufacturing and Product Use	
SBSY 5100	Sustainable Design and Technologies in Construction	
SBSY 5200	Sustainable Engineering Systems for Buildings	

**Public Policy and Analysis Requirements**

## Civil Engineering with Concentration in Data and Systems, MSCivE

This program is designed for students with career goals that require application of data and systems analysis to challenges across any discipline of civil and environmental engineering. The degree requirements include core courses (total of 20 semester hours) in data analysis and computing, systems and sensors, and data and systems topics in civil and environmental engineering, complemented by electives across multiple departments including mathematics, computer science, engineering, economics, and policy.

Degree Requirements	With Report	With Thesis	Coursework Only
Required core courses	20 SH	20 SH	20 SH
Electives	8 SH	4 SH	12 SH
Master of Science report/thesis	4 SH	8 SH	
<b>Minimum semester hours required</b>	<b>32 SH</b>	<b>32 SH</b>	<b>32 SH</b>

### Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

#### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

##### Master's Degree in Civil Engineering with Concentration in Data and Systems with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Civil Engineering with Concentration in Data and Systems in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 20-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require 20 hours of advisor-approved data and systems engineering technical courses.

The Department of Civil and Environmental Engineering encourages students pursuing a GIEL certificate to complete their MS coursework requirements in their first year and their GIEL certificate requirements in their second year. Students who prefer to complete their GIEL certificate requirements in their first year are asked to speak with their MS degree advisor beforehand.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated. At least 20 semester hours (of the 32 semester hours) must be listed as CIVE or SBSY and must form a cohesive advisor-approved program.

#### Core Requirements

Code	Title	Hours
Complete 20 semester hours from the following course lists:		20
<b>Data and Computing</b>		
Complete at least 4 semester hours from the following:		4
CIVE 5280	Remote Sensing of the Environment	
CIVE 7100	Time Series and Geospatial Data Sciences	
or ENVR 6500	Biostatistics	
or IE 6200	Engineering Probability and Statistics	
or IE 7280	Statistical Methods in Engineering	
or INSH 5301	Introduction to Computational Statistics	
or MATH 7343	Applied Statistics	
CIVE 7150	Data-Driven Decision Support for Civil and Environmental Engineering	
CIVE 7151	Urban Informatics and Processing	
or PPUA 5262	Big Data for Cities	
CIVE 7388	Special Topics in Civil Engineering (Random Data and Processing)	
DAMG 6105	Data Science Engineering with Python	
DAMG 6210	Data Management and Database Design	
ENVR 5260	Geographical Information Systems	
IE 5640	Data Mining for Engineering Applications	
or IE 7275	Data Mining in Engineering	
<b>Systems and Sensors</b>		
Complete at least 4 semester hours from the following:		4
CIVE 5261	Dynamic Modeling for Environmental Investment and Policymaking	

CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure
CIVE 5524	Vibration-Based Structural Health Monitoring
CIVE 7388	Special Topics in Civil Engineering (Dynamics and Control of Infrastructure)
EECE 5155	Wireless Sensor Networks and the Internet of Things
IE 5500	Systems Engineering in Public Programs
OR 6205	Deterministic Operations Research
OR 7230	Probabilistic Operation Research
OR 7245	Network Analysis and Advanced Optimization
PHYS 5116	Network Science 1
PPUA 6502	Economic Analysis for Policy and Planning
PPUA 7237	Advanced Spatial Analysis of Urban Systems

### Civil and Environmental Systems

Complete at least 8 semester hours from the following: 8

CIVE 5281	Coastal Dynamics and Design
CIVE 5363	Climate Science, Engineering Adaptation, and Policy
CIVE 5373	Transportation Systems: Analysis and Planning
CIVE 5536	Hydrologic and Hydraulic Design
CIVE 7110	Critical Infrastructure Resilience
CIVE 7252	Water Engineering: Planning, Design, and Management
CIVE 7380	Performance Models and Simulation of Transportation Networks
CIVE 7381	Transportation Demand Forecasting and Model Estimation
CIVE 7385	Public Transportation
IE 7200	Supply Chain Engineering
OR 7310	Logistics, Warehousing, and Scheduling
SBSY 5100	Sustainable Design and Technologies in Construction
SBSY 5200	Sustainable Engineering Systems for Buildings
SBSY 5250	Building Performance Simulation

### Options

Complete one of the following options:

#### COURSEWORK OPTION

Code	Title	Hours
Complete the remaining semester hours from the electives list below.		12

#### REPORT OPTION

Code	Title	Hours
CIVE 8674	Master's Report	4
Complete the remaining semester hours from the electives list below.		8

#### THESIS OPTION

Code	Title	Hours
CIVE 7990	Thesis	8
Complete the remaining semester hours from the electives list below.		4

### Course Lists

Any core course not used to meet the core course requirements can be used as an elective, as can the following electives:

#### ELECTIVES LIST

Code	Title	Hours
CIVE 6566	Sustainable Urban Transportation: Netherlands	
CIVE 7220	Construction Management	
CIVE 7250	Environmental Chemistry	
CIVE 7251	Environmental Biological Processes	
CIVE 7255	Environmental Physical/Chemical Processes	
CIVE 7260	Hydrologic Modeling	
CIVE 7382	Advanced Traffic Control and Simulation	

EECE 5642	Data Visualization
EECE 5644	Introduction to Machine Learning and Pattern Recognition
EECE 7204	Applied Probability and Stochastic Processes
IE 5617	Lean Concepts and Applications
IE 7215	Simulation Analysis
SBSY 5300	Information Systems for Integrated Project Delivery

Minimum 3.000 GPA required

## Civil Engineering with Concentration in Construction Management, MSCivE

This program is intended for students interested in construction management and engineering or a closely related field. It includes required core courses primarily from the Department of Civil and Environmental Engineering (<https://cee.northeastern.edu/academics/graduate-studies/ms-cive/>), complemented by electives in civil and environmental engineering and other departments such as mechanical and industrial engineering and business administration. Based on proven proficiency in given areas, students may waive certain core courses and replace them with alternate elective courses.

Degree Requirements	With Report	With Thesis	Coursework Only
Required core courses	18 SH	18 SH	18 SH
Elective courses	10 SH	6 SH	14 SH
Master of Science report/thesis	4 SH	8 SH	
<b>Minimum semester hours required</b>	<b>32 SH</b>	<b>32 SH</b>	<b>32 SH</b>

### Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

#### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

##### Master's Degree in Civil Engineering with a Concentration in Construction Management with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Civil Engineering with a Concentration in Construction Management in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 34-semester-hour degree and certificate will require fulfillment of the 18-semester-hour construction management core.

The Department of Civil and Environmental Engineering encourages students pursuing a GIEL certificate to complete their MS coursework requirements in their first year and their GIEL certificate requirements in their second year. Students who prefer to complete their GIEL certificate requirements in their first year are asked to speak with their MS degree advisor beforehand.

#### ENGINEERING BUSINESS

##### Master's Degree in Civil Engineering with Concentration in Construction Management with Graduate Certificate in Engineering Business

Students may complete a Master of Science in Civil Engineering with Concentration in Construction Management in addition to earning a Graduate Certificate in Engineering Business. Students must apply and be admitted to the Galante Engineering Business Program in order to pursue this option. The program requires the applicant to have earned or be in a program to earn a Bachelor of Science in Engineering from Northeastern University. The integrated 32-semester-hour degree and certificate will require 16 semester hours of the core courses and 16 semester hours from the outlined business-skill curriculum. The coursework, along with participation in cocurricular professional development elements, earn the Graduate Certificate in Engineering Business.

Engineering Business (p. 529)

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
CIVE 5221	Construction Project Control and Organization	2
CIVE 7220	Construction Management	4
CIVE 7230	Legal Aspects of Civil Engineering	4
EMGT 6305	Financial Management for Engineers	4
IE 6200	Engineering Probability and Statistics	4

#### Options

Complete one of the following options:

## Civil Engineering with Concentration in Geotechnical/Geoenvironmental Engineering, MSCivE

This program includes study in the areas of soil mechanics/foundations and geoenvironmental engineering. It includes studies of soil and related earth materials for problems related to the protection of human health and the environment. Related areas include soil mechanics, fate/transport in subsurfaces, subsurface remediation, and others. The degree requirements include core courses from the Department of Civil and Environmental Engineering (<https://cee.northeastern.edu/academics/graduate-studies/ms-cive/>), complemented by electives in civil and environmental engineering, as well as electives from other departments such as mechanical and industrial engineering.

Degree Requirements	With Report	With Thesis	Coursework Only
Required core courses	8 SH	8 SH	8 SH
Elective courses	20 SH	16 SH	24 SH
Master of Science report/thesis	4 SH	8 SH	
<b>Minimum semester hours required</b>	<b>32 SH</b>	<b>32 SH</b>	<b>32 SH</b>

### Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

#### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

##### Master's Degree in Civil Engineering with a Concentration in Geotechnical/Geoenvironmental Engineering with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Civil Engineering with a Concentration in Geotechnical/Geoenvironmental Engineering in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require fulfillment of the 8-semester-hour core curriculum and 12 semester hours of restricted electives from the geotechnical/geoenvironmental engineering concentration coursework.

The Department of Civil and Environmental Engineering encourages students pursuing a GIEL certificate to complete their MS coursework requirements in their first year and their GIEL certificate requirements in their second year. Students who prefer to complete their GIEL certificate requirements in their first year are asked to speak with their MS degree advisor beforehand. For students pursuing a concentration in geotechnical/geoenvironmental engineering, the two courses required by the concentration are offered in alternate years. To complete this certificate program in two years, one of the courses needs to be taken in the first year and the other in the second year.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

## Civil Engineering with Concentration in Structures, MSCivE

For program contact information, please visit this website (<https://cee.northeastern.edu/academics/graduate-studies/ms-cive/>).

This program is designed for students with career goals in structural engineering and structural design. The program includes courses in structural analysis and design, structural mechanics, dynamics of structures, earthquake engineering, wind engineering, and structural health monitoring. The degree requirements include core courses from the Department of Civil and Environmental Engineering, complemented by electives in civil and environmental engineering, as well as electives from other departments such as mechanical and industrial engineering and mathematics.

Degree Requirements	With Report	With Thesis	Coursework Only
Required core courses	8 SH	8 SH	8 SH

## Civil Engineering with Concentration in Water, Environmental, and Coastal Systems, MSCivE

This program integrates the study of infrastructure; hydrology; hydraulics; engineering for coastal areas; numerical modeling; remote sensing; spatial and temporal data analysis; and physical, chemical, and biological processes that impact the water and air quality to provide students with the knowledge and tools for developing and managing sustainable, resilient water resources and infrastructure. It includes required core courses from the Department of Civil and Environmental Engineering (<https://cee.northeastern.edu/academics/graduate-studies/ms-cive/>), complemented by electives in electrical and computer engineering, mechanical and industrial engineering, and earth and environmental sciences.

Degree Requirements	With Report	With Thesis	Coursework Only
Required core courses	8 SH	8 SH	8 SH
Restricted electives	12 SH	12 SH	12 SH
Other electives	8 SH	4 SH	12 SH
Master of Science report/thesis	4 SH	8 SH	
<b>Minimum semester hours required</b>	<b>32 SH</b>	<b>32 SH</b>	<b>32 SH</b>

### Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

#### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

##### Master's Degree in Civil Engineering with Concentration in Water, Environmental, and Coastal Systems with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Civil Engineering with Concentration in Water, Environmental, and Coastal Systems in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require fulfillment of the 12-semester-hour core curriculum and 8 semester hours of restricted electives from the WECS concentration coursework.

The Department of Civil and Environmental Engineering encourages students pursuing a GIEL certificate to complete their MS coursework requirements in their first year and their GIEL certificate requirements in their second year. Students who prefer to complete their GIEL certificate requirements in their first year are asked to speak with their MS degree advisor beforehand.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
Complete 8 semester hours of the following:		8
CIVE 5281	Coastal Dynamics and Design	
CIVE 7250	Environmental Chemistry	
CIVE 7251	Environmental Biological Processes	
CIVE 7260	Hydrologic Modeling	
CIVE 7281	Coastal and Nearshore Hydrodynamics	

#### Options

Complete one of the following options:

##### COURSEWORK OPTION

Minimum 3.000 GPA required

## Environmental Engineering, MSEnvE

This program integrates the study of physical, chemical, and biological processes and fundamental principles for water and wastewater treatment and disposal, hazardous waste management, surface water and groundwater quality, water resources management, and air quality management. Successful graduates will have the ability to develop and implement technologies for various environmental applications with the goal to improve and protect the environment and human health. It includes required core courses from the Department of Civil and Environmental Engineering (<https://cee.northeastern.edu/academics/graduate-studies/ms-envi/>) (CEE), complemented by electives in civil and environmental engineering, mechanical and industrial engineering, earth and environmental sciences, and mathematics.

Degree Requirements	With Report	With Thesis	Coursework Only
Required core electives	12 SH	12 SH	12 SH
Restricted electives	8 SH	8 SH	12 SH
Other electives	8 SH	4 SH	8 SH
Master of Science report/thesis	4 SH	8 SH	

### Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

#### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

##### Master's Degree in Environmental Engineering with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Environmental Engineering in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16 semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require 20 hours of advisor-approved environmental engineering technical courses.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
Complete three of the following:		12
CIVE 7250	Environmental Chemistry	
CIVE 7251	Environmental Biological Processes	
CIVE 7255	Environmental Physical/Chemical Processes	
CIVE 7272	Air Quality Management	

#### Options

Complete one of the following options:

##### COURSEWORK OPTION

Code	Title	Hours
Complete 12 semester hours from the Restricted Electives List below.		12
Complete 8 semester hours from the Other Electives List below.		8

## Sustainable Building Systems, MSSBS

Website (<https://cee.northeastern.edu/academics/graduate-studies/ms-subs/>)

The sustainable building systems program focuses on the design and operation of buildings to provide a comfortable, healthy, and productive indoor environment with minimal energy and environmental impact. Students have an opportunity to develop leadership and decision-making skills to implement sustainable building practices in either the private or public sectors in the global market.

The graduates of the **Master of Science in Sustainable Building Systems** program should display a high level of engineering knowledge in a broad range of architectural engineering, civil engineering, and construction management while embracing the concepts of engineering sustainability as related to energy and materials usage and the effects on the environment. Graduates will have the base training necessary to lead efforts within companies to plan and implement sustainable practices for the design and operation of buildings, realize energy and materials efficiency improvements, and minimize environmental impact. Upon graduation, students will have a theoretical background to the concepts behind the LEED (Leadership in Energy and Environmental Design) Green Associate examination.

Below is a typical course sequence for graduation in two semesters. The program is flexible to accommodate full-time students—who wish to proceed over a period of two to four semesters—and part-time students—who can complete the program requirements by taking one to two courses per semester, finishing the program in approximately four years.

Degree Requirements	Full-Time Study	Part-Time Study
Core courses	12	12
Restricted electives	8	8
Open electives	12	12

### Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

#### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

##### Master's Degree in Sustainable Building Systems with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Sustainable Building Systems in addition to earning a Graduate Certificate in Engineering Leadership. Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require fulfillment of the 12-semester-hour core curriculum and 8 semester hours of restricted electives from the sustainable building systems coursework.

The Civil and Environmental Engineering Department encourages students pursuing a GIEL certificate to complete their MS coursework requirements in their first year and their GIEL certificate requirements in their second year. Students who prefer to complete their GIEL certificate requirements in their first year are asked to speak with their MS degree advisor beforehand.

Engineering Leadership (p. 551)

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
ARCH 5210 and ARCH 5211	Environmental Systems and Recitation for ARCH 5210	4
SBSY 5100	Sustainable Design and Technologies in Construction	4
SBSY 5200	Sustainable Engineering Systems for Buildings	4
Students must register for this 0 SH course every semester:		
SBSY 5400	Sustainable Building Systems Seminar	

#### Electives

##### RESTRICTED ELECTIVES LIST

Code	Title	Hours
Complete 8 semester hours from the following:		
ARCH 5220	Integrated Building Systems	8
CIVE 5221	Construction Project Control and Organization	
CIVE 5231	Alternative Project Delivery Systems in Construction	

CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure
CIVE 7220 or EMGT 5220	Construction Management Engineering Project Management
CIVE 7230	Legal Aspects of Civil Engineering
EMGT 6305	Financial Management for Engineers
SBSY 5250	Building Performance Simulation
SBSY 5300	Information Systems for Integrated Project Delivery

**OTHER ELECTIVES LIST**

Any restricted elective not used to meet the restricted elective requirement can be taken as another elective.

Code	Title	Hours
Complete 12 semester hours from the following:		12
ACCT 6200	Financial Reporting and Managerial Decision Making 1	
ACCT 6201	Financial Reporting and Managerial Decision Making 2	
CIVE 7151	Urban Informatics and Processing	
CIVE 7350	Behavior of Concrete Structures	
CIVE 7351	Behavior of Steel Structures	
CIVE 7388	Special Topics in Civil Engineering (Dynamics and Control of Infrastructure Systems)	
FINA 6200	Value Creation through Financial Decision Making	
FINA 6216	Valuation and Value Creation	
FINA 6217	Real Estate Finance and Investment	
LPSC 7312	Cities, Sustainability, and Climate Change	
ME 5645	Environmental Issues in Manufacturing and Product Use	

**Program Credit/GPA Requirements**

32 total semester hours required

Minimum 3.000 GPA required

## Climate and Engineering, Graduate Certificate

Climate change is a defining challenge of the 21st century. This three-course certificate in climate and engineering provides students with the foundational knowledge of how climate change will impact engineered systems and approaches for adaptation at multiple scales. Students will also acquire the analytical skills to evaluate technologies and engineering approaches for safety, climate effectiveness, and equality in societal costs and benefits.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
Complete one of the following:		4
CIVE 5363	Climate Science, Engineering Adaptation, and Policy	
CIVE 5699	Special Topics in Civil Engineering (Climate Technologies for Decarbonization, Mitigation, and Adaptation)	

#### Electives

Code	Title	Hours
Complete two of the following:		8
CIVE 5150	Climate and Atmospheric Change	
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
CIVE 5281	Coastal Dynamics and Design	
CIVE 5363	Climate Science, Engineering Adaptation, and Policy	
CIVE 5670	Global Biogeochemistry	
CIVE 5699	Special Topics in Civil Engineering (Intro to Air Quality Engineering Science)	
CIVE 5699	Special Topics in Civil Engineering (Climate Technologies for Decarbonization, Mitigation, and Adaptation)	
CIVE 5984	Research (4 SH, with topic approval of program advisor)	
CIVE 7272	Air Quality Management	
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	

### Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

## Sustainability Engineering, Graduate Certificate

### Overview

Society is facing increasingly complex and multidisciplinary challenges in balancing the relationship between the built environment and the earth system. The four-course certificate in sustainability engineering provides foundational knowledge that facilitates framing challenges and working on multidisciplinary topics to address sustainability challenges, including engineering perspectives, toolsets, and data methods.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Requirements

Code	Title	Hours
Complete one of the following:		4
CIVE 5150	Climate and Atmospheric Change	
CIVE 5250	Organic Pollutants in the Environment	
CIVE 5363	Climate Science, Engineering Adaptation, and Policy	
Complete one of the following:		4
CIVE 5699	Special Topics in Civil Engineering (Intro to Air Quality Engineering Science - 4 semester hours)	
CIVE 7250	Environmental Chemistry	
CIVE 7251	Environmental Biological Processes	
Complete one of the following:		4
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
CIVE 6566	Sustainable Urban Transportation: Netherlands	
SBSY 5100	Sustainable Design and Technologies in Construction	
Complete one of the following:		4
CIVE 5373	Transportation Systems: Analysis and Planning	
CIVE 5984	Research (4 semester hours)	
CIVE 7100	Time Series and Geospatial Data Sciences	
CIVE 7260	Hydrologic Modeling	
CIVE 7388	Special Topics in Civil Engineering (Random Data and Processing)	

### Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

## Electrical and Computer Engineering

Website (<http://www.ece.neu.edu>)

**Srinivas Tadigadapa, PhD**  
Professor and Chair

409 Dana Research Center  
617.373.7529  
617.373.4431 (fax)

The Department of Electrical and Computer Engineering's graduate program is a dynamic and thriving center of world-recognized research in a wide range of areas. The department has strong ties to local industry and the world-famous hospitals and medical centers of Boston and is involved in many joint research projects with them. With five NSF- and DHS-funded research centers and over 20 industrial partners, faculty and students are actively conducting cutting-edge research in areas such as computer vision; pattern recognition and machine learning; brain-computer interface; computer architecture; high-performance computing; embedded systems; hardware and software security; power systems and power electronics; underwater communication networks and signal processing; robotics; information theory; communications, control, and signal processing; Internet of Things; RF, electromagnetics, optics, and magnetic materials; micro/nanomechanical structures and advanced nanomaterials; power-first system/computer architecture; ultralow power biomedical and neural circuits and systems.

ECE's graduate program educates MS and PhD students with deep fundamental and practical knowledge in the various disciplines of electrical and computer engineering by offering a strong curriculum and providing opportunities for research in these disciplines. The department educates the next generation of highly skilled engineers and researchers with necessary skills to address the future needs of academia, industry, government, and humanity.

### Overview of Programs Offered

ECE's graduate program offers a Master of Science in Electrical and Computer Engineering, a Master of Science in Electrical and Computer Engineering Leadership, a Master of Science in Applied Physics and Engineering, a Master of Science in Data Science, a Master of Science in Robotics, a Master of Science in Internet of Things, a Master of Science in Wireless and Network Engineering, a Doctor of Philosophy in Computer Engineering, a Doctor of Philosophy in Cybersecurity, a Doctor of Philosophy in Electrical Engineering, and a Doctor of Philosophy in Interdisciplinary Engineering (housed in the College of Engineering).

### Mission of the Department

The primary educational missions of the electrical and computer engineering department are to educate undergraduate students so they have the opportunity to obtain successful careers in electrical and computer engineering and related disciplines and pursue advanced graduate study in engineering or related disciplines. The mission of the graduate program is to educate graduate students so they have the skills to solve complex engineering problems and can make meaningful contributions to research and industry.

### Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

#### **GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION**

Students have the opportunity to pursue the Master of Science in Electrical and Computer Engineering Leadership (MSECEL) (p. 472) along with the Graduate Certificate in Engineering Leadership.

In addition, students have the opportunity to pursue the Gordon Engineering Leadership Program (p. 1145) in combination with the Master of Science in Electrical and Computer Engineering. This option results in an increase in total hours beyond that required for the master's degree only.

### Programs

#### **Doctor of Philosophy (PhD)**

- Computer Engineering (p. 411)
- Cybersecurity (p. 302)
- Electrical Engineering (p. 419)
- Interdisciplinary Engineering (p. 357)

#### **Master of Science (MS)**

- Applied Physics and Engineering (p. 421)
- Data Science (p. 279)
- Internet of Things (p. 286)
- Robotics (p. 290)
- Wireless and Network Engineering (p. 432)

**Master of Science in Electrical and Computer Engineering (MSECE)**

- Concentration in Communications, Control, and Signal Processing (p. 434)
- Concentration in Computer Networks and Security (p. 444)
- Concentration in Computer Systems and Software (p. 439)
- Concentration in Computer Vision, Machine Learning, and Algorithms (p. 448)
- Concentration in Electromagnetics, Plasma, and Optics (p. 453)
- Concentration in Hardware and Software for Machine Intelligence (p. 458)
- Concentration in Microsystems, Materials, and Devices (p. 463)
- Concentration in Power Systems (p. 467)

**Master of Science in Electrical and Computer Engineering Leadership (MSECEL)**

- Electrical and Computer Engineering Leadership (p. 472)

## Computer Engineering, PhD

The Doctor of Philosophy in Computer Engineering offers students an opportunity for study in a broad range of areas in computer engineering. Details on PhD requirements can be found in the *Graduate Program Guide*. A summary of requirements is given below.

### Qualifying Exam and Degree Candidacy

The PhD qualifying exam is the examination for admissions to the doctoral programs in electrical engineering and in computer engineering. The exam has the dual purposes of serving as an indicator of the student's capability for successful completion of the PhD in electrical engineering or in computer engineering and of serving as a guide to the student's advisor in developing a suitable plan of study, tailored to the individual needs of the student.

A student who has matriculated into the PhD program is considered a predoctoral student, whether they are BS entry or advanced entry. Upon successful completion of the qualifying exam, the student is designated a PhD candidate. A student who fails the qualifying exam will be permitted to retake the exam only one more time.

### Annual Review

PhD students are reviewed annually. Each student is evaluated and receives a grade of satisfactory, needs improvement, or unsatisfactory.

### Residence Requirement

After reaching PhD candidacy, one year of full-time graduate work or two consecutive years of part-time graduate work satisfy the university residence requirement. In the latter case, the student's advisor must approve a detailed schedule in order to ensure that the student devotes at least half of the time to the requirements of the Graduate School of Engineering.

### Dissertation

Within one year of passing the PhD qualifying exam, the PhD candidate must form a dissertation committee. A dissertation committee must have at least three members that hold a PhD or equivalent degree. At least two of the committee members must be tenured or tenure-track Department of Electrical and Computer Engineering faculty, and the committee must include the student's advisor. The chair of the committee must be a tenured or tenure-track faculty member in the ECE department.

The dissertation committee must design an appropriate program of study that prepares the student to be a successful doctoral-level engineer as well as direct the candidate's dissertation research. The dissertation committee will approve the dissertation in final form.

### DISSERTATION AND DISSERTATION CONTINUATION REGISTRATION

Upon successful completion of the PhD qualifying exam and the required coursework, the PhD candidate must register in two consecutive semesters for Dissertation Term 1 (EECE 9990) and Dissertation Term 2 (EECE 9991). Upon completion of this sequence, the student must register for Dissertation Continuation (EECE 9996) in every semester until the dissertation is completed. A student may not register for Continuation until they fulfill the two-semester sequence of Dissertation.

### REGISTRATION REQUIREMENTS FOR PREDOCTORAL AND PHD CANDIDATE GRADUATE ASSISTANTS

The ECE department requires that predoctoral students and PhD candidates who hold research or teaching assistantships be registered full-time. Predoctoral PhD students may register for Research (EECE 9986) (zero credit, full-time equivalent) *if needed* to fulfill the registration requirement.

### PHD PROPOSAL REVIEW

Each PhD candidate must demonstrate, by means of the proposal review, subject matter knowledge satisfactory for the award of the degree.

The proposal review is an oral presentation followed by a question-and-answer session administered by the student's dissertation advisor/committee. The proposal review will be given at the time the student submits their dissertation proposal to the dissertation advisor/committee for approval. As part of this exam, the dissertation advisor/committee will review the student's doctoral program and their performance in graduate courses, as well as examine the student on subject matter related to their graduate coursework and dissertation subject area.

### FINAL DISSERTATION DEFENSE

The final dissertation defense will include the subject matter of the dissertation and significant developments in the field of the dissertation work. Other related fields may be included if recommended by the examining faculty. The dissertation defense must be scheduled at least six months after the PhD proposal review.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Milestones

Annual departmental review (each fall semester after the student has been in the program for at least one year)

Qualifying examination

Dissertation committee

Proposal stage review

Dissertation defense

**Core Requirements**

Code	Title	Hours
Complete 32 semester hours of approved coursework—equivalent of MSEC degree. Then complete 16 semester hours, of which 8 must be graduate-level EECE courses. Consult faculty research advisor for acceptable courses.		48

**Dissertation**

Code	Title	Hours
EECE 9990	Dissertation Term 1	
EECE 9991	Dissertation Term 2	

**Program Credit/GPA Requirements**

48 total semester hours required  
 Minimum 3.000 GPA required

**Advanced Entry Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Milestones**

Annual review (each fall semester after the student has been in the program for at least one year)  
 Qualifying examination  
 Dissertation committee  
 Proposal stage review  
 Dissertation defense

**Core Requirements**

Complete 16 semester hours of approved coursework. At least 8 semester hours must be graduate-level EECE courses. Consult your faculty adviser for acceptable courses.

**Dissertation**

Code	Title	Hours
Complete the following two courses:		
EECE 9990	Dissertation Term 1	
EECE 9991	Dissertation Term 2	

**Program Credit/GPA Requirements**

16 total semester hours required  
 Minimum 3.000 GPA required

## Cybersecurity, PhD

A research-based, interdisciplinary Doctor of Philosophy (PhD) in Cybersecurity combines a strong security technical foundation with a security policy and social sciences perspective. It seeks to prepare graduates to advance the state of the art of security in systems, networks, and the internet in industry, academia, and government. The interdisciplinary nature of the program distinguishes it from traditional doctoral degree programs in computer science, engineering, or social sciences and makes it unique in the Boston area.

Students who choose the PhD in Cybersecurity program have a strong desire to pursue academic research solving critical cybersecurity challenges facing today's society. The PhD program is a natural path for students in the college's Master of Science in Cybersecurity (<http://www.ccs.neu.edu/graduate/degree-programs/m-s-in-information-assurance/>) program who want to pursue research and students with bachelor's degrees and an interest in research-focused careers. Students who pursue careers in advancing the state of the art of cybersecurity have an opportunity to gain:

- A strong technical foundation in cybersecurity and an interdisciplinary perspective based on policy and social science
- A path to a research-focused career coupled with depth in information assurance research at a leading institution, one of the earliest designees by NSA/DHS as a National Center of Academic Excellence in Information Assurance Research, Information Assurance/Cyber Defense, and Cyber Operations
- The opportunity to work with and learn from faculty who are recognized internationally for their expertise and contributions in information assurance from Northeastern University's Khoury College of Computer Sciences, the Department of Electrical and Computer Engineering, and the College of Social Sciences and Humanities
- Access to research projects at Northeastern's research centers focused on security:
  - The Cybersecurity and Privacy Institute (<https://cyber.ccis.northeastern.edu/about/>): The mission of Northeastern's Cybersecurity and Privacy Institute is to safeguard critical technology. Forging partnerships with experts in industry, government, and academia worldwide, the Institute's faculty and students develop, protect, and enhance technologies on which the world relies—from mobile devices and “smart” IoT applications to tomorrow's self-driving cars and delivery drones. Their expertise spans algorithm auditing; cloud security; cryptography; differential privacy; embedded device security; internet-scale security measurements; machine learning; big data; security, malware, and advanced threats; network protocols and security; web and mobile security; and wireless network security.
  - The International Secure Systems Lab (<http://www.iseclab.org/>), affiliated with Northeastern, a collaborative effort of European and U.S. researchers focused on web security, malware, and vulnerability analysis; intrusion detection; and other computer security issues.
  - The ALERT Center (<http://www.northeastern.edu/alert/>), where Northeastern is the lead institution, a multiuniversity Department of Homeland Security Center of Excellence involved in research, education, and technology related to threats from explosives.

The benefits of the Boston area:

- World-renowned for academic and research excellence, the Boston area is also home to some of the nation's largest Department of Defense contractors and government and independent labs such as MIT Lincoln Lab, MITRE, and Draper Lab.

### Degree Requirements

The PhD in Cybersecurity degree requires completion of at least 48 semester credit hours beyond a bachelor's degree. Students who enter with an undergraduate degree will typically need four to five years to complete the program, and they will be awarded a master's degree en route to the PhD.

### Doctoral Degree Candidacy

A student is considered a PhD degree candidate after completing the core courses with at least a 3.500 GPA, with no grades lower than a B in the core courses, and either publishing a paper in a strong conference or journal or passing an oral exam that is conducted by a committee of three cybersecurity faculty members and based on paper(s) written by the student.

### RESIDENCY

One year of continuous full-time study is required after admission to the PhD candidacy. During this period, the student will be expected to make substantial progress in preparing for the comprehensive examination.

### TEACHING REQUIREMENT

All cybersecurity PhD students must satisfy the teaching requirement in order to graduate. This requirement is fulfilled when the student works as a teaching assistant or instructor of record for one semester and during this semester:

- Teaches at least three hours of classes
- Prepares at least one assignment or quiz or equivalent

PhD students are expected to satisfy the teaching requirement some time after completing their first year and at least one semester prior to scheduling their PhD defense.

**DISSERTATION ADVISING**

The doctoral dissertation advising team for each student consists of two cybersecurity faculty members, one in a technical area. When appropriate, the second faculty advisor will be from the policy/social science area.

**DISSERTATION COMMITTEE**

With the help of the advisor, a student selects the committee, consisting of at least four members, to be approved by the PhD cybersecurity curriculum committee. The four members must include the advisor, two internal members, and an external member.

**COMPREHENSIVE EXAMINATION**

A PhD student must submit a written dissertation proposal and present it to the dissertation committee. The proposal should identify the research problem, the research plan, and the potential impact of the research on the field. The presentation of the proposal will be made in an open forum, and the student must successfully defend it before the dissertation committee after the public presentation.

**DISSERTATION DEFENSE**

A PhD student must complete and defend a dissertation that involves original research in cybersecurity.

**AWARDING OF MASTER'S DEGREES**

Students who enter the PhD in Cybersecurity program with a bachelor's degree have the option of obtaining a master's degree from one of the departments participating in the program. To do so, they must meet all of the department's degree requirements.

**Program Requirements****Bachelor's Degree Entrance**

Complete all courses and requirements listed below unless otherwise indicated.

**Milestones**

Teaching  
 Qualifying exam and area exam  
 Annual review  
 Dissertation proposal  
 Dissertation committee  
 Dissertation defense

**Core Requirements**

A grade of B or higher is required in each core course. A cumulative 3.500 grade-point average is required for the core requirement.

### Program Credit/GPA Requirements

48 total semester hours required

Minimum 3.000 GPA required

### Advanced Entry Program Requirements

#### Degree Requirements

Incoming PhD in cybersecurity students who have already completed a Master of Science in an adjacent field may petition to the graduate program administration for advanced entry. Advanced entry petitions are reviewed by the program administration on a case-by-case basis. Please note that

advanced entry does not waive by itself any part of the PhD coursework requirements. As a degree conferral requirement, a minimum of 16 semester hours of coursework beyond the 32 semester hours of the master's degree is required of advanced entry PhD students (48 semester hours is required of standard entry PhD students). A grade of B or higher is required in each course. A cumulative 3.500 GPA is required for the core requirement.

### Doctoral Degree Candidacy

Refer to the PhD Cybersecurity overview (p. 302) for admission to candidacy requirements.

### Residency

Refer to the PhD Cybersecurity overview (p. 302) for residency requirements.

## Electrical Engineering, PhD

The PhD program in electrical engineering offers students an opportunity for study in a broad range of areas in electrical engineering. Details on PhD requirements can be found in the *Graduate Program Guide*. A summary of requirements is given below.

### Qualifying Exam and Degree Candidacy

The PhD qualifying exam is the examination for admissions to the doctoral programs in electrical engineering and in computer engineering. The exam has the dual purposes of serving as an indicator of the student's capability for successful completion of the PhD in electrical engineering or in computer engineering and of serving as a guide to the student's advisor in developing a suitable plan of study, tailored to the individual needs of the student.

A student who has matriculated into the PhD program is considered a predoctoral student, whether they are BS entry or advanced entry. Upon successful completion of the qualifying exam, the student is designated a PhD candidate. A student who fails the qualifying exam will be permitted to retake the exam only one more time.

### Annual Review

PhD students are reviewed annually. Each student is evaluated and receives a grade of satisfactory, needs improvement, or unsatisfactory.

### Residence Requirement

After reaching PhD candidacy, one year of full-time graduate work or two consecutive years of part-time graduate work satisfy the university residence requirement. In the latter case, the student's advisor must approve a detailed schedule in order to ensure that the student devotes at least half of the time to the requirements of the Graduate School of Engineering.

### Dissertation

Within one year of passing the PhD qualifying exam, the PhD candidate must form a dissertation committee. A dissertation committee must have at least three members that hold a PhD or equivalent degree. At least two of the committee members must be tenured or tenure-track ECE faculty and the committee must include the student's advisor. The chair of the committee must be a tenured or tenure-track faculty member in the ECE department.

The dissertation committee must design an appropriate program of study that prepares the student to be a successful doctoral-level engineer as well as direct the candidate's dissertation research. The dissertation committee will approve the dissertation in final form.

### DISSERTATION AND DISSERTATION CONTINUATION REGISTRATION

Upon successful completion of the PhD qualifying exam and the required coursework, the PhD candidate must register in two consecutive semesters for Dissertation Term 1 (EECE 9990) and Dissertation Term 2 (EECE 9991). Upon completion of this sequence, the student must register for Dissertation Continuation (EECE 9996) in every semester until the dissertation is completed. A student may not register for Continuation until they fulfill the two-semester sequence of Dissertation.

### REGISTRATION REQUIREMENTS FOR PREDOCTORAL AND PHD CANDIDATE GRADUATE ASSISTANTS

The ECE department requires that predoctoral students and PhD candidates who hold research or teaching assistantships be registered full-time. Predoctoral PhD students may register for Research (EECE 9986) (zero credit, full-time equivalent) if needed to fulfill the registration requirement.

### PHD PROPOSAL REVIEW

Each PhD candidate must demonstrate, by means of the proposal review, subject matter knowledge satisfactory for the award of the degree.

The proposal review is an oral presentation followed by a question-and-answer session administered by the student's dissertation advisor/committee. The proposal review will be given at the time the student submits their dissertation proposal to the dissertation advisor/committee for approval. As part of this exam, the dissertation advisor/committee will review the student's doctoral program and their performance in graduate courses, as well as examine the student on subject matter related to their graduate coursework and dissertation subject area.

### FINAL DISSERTATION DEFENSE

The final dissertation defense will include the subject matter of the dissertation and significant developments in the field of the dissertation work. Other related fields may be included if recommended by the examining faculty. The dissertation defense must be scheduled at least six months after the PhD proposal review.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Milestones

Annual review (each fall semester after the student has been in the program for at least one year)  
Qualifying examination  
Dissertation committee  
Proposal stage review  
Dissertation defense

**Core Requirements**

Code	Title	Hours
Complete 32 semester hours of approved coursework—equivalent of MSEC degree. Then complete 16 semester hours, of which 8 must be graduate-level EECE courses. Consult your faculty research advisor for acceptable courses.		48

**Dissertation**

Code	Title	Hours
EECE 9990	Dissertation Term 1	
EECE 9991	Dissertation Term 2	

**Program Credit/GPA Requirements**

48 total semester hours required  
 Minimum 3.000 GPA required

**Advanced Entry Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Milestones**

Annual review (each fall semester after the student has been in the program for at least one year)  
 Qualifying examination  
 Dissertation committee  
 Proposal stage review  
 Dissertation defense

**Core Requirements**

Complete 16 semester hours of approved coursework. At least 8 semester hours must be graduate-level EECE courses. Consult your faculty adviser for acceptable courses.

**Dissertation**

Code	Title	Hours
Complete the following two courses:		
EECE 9990	Dissertation Term 1	
EECE 9991	Dissertation Term 2	

**Program Credit/GPA Requirements**

16 total semester hours required  
 Minimum 3.000 GPA required

## Applied Physics and Engineering, MS

The combined MS program in applied physics and engineering allows graduate students to receive training in one of three concentrations of the electrical and computer engineering department while also receiving fundamental graduate-level physics training that is relevant to that area.

### Thesis Option

A student may complete an additional 8 semester hours of thesis. Students may register for an additional two semesters of thesis work, Thesis (EECE 7990) (4 semester hours) or Thesis (PHYS 7990) (4 semester hours), depending on the affiliation of the thesis advisor. A thesis committee is composed of an advisor and two faculty members from physics or electrical engineering.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Concentrations

Complete one of the following concentrations:

- Microsystems, Materials, and Devices (p. 421)
- Electromagnetics, Plasma, and Optics (p. 421)
- Analysis, Modeling, and Computation (p. 422)

#### MICROSYSTEMS, MATERIALS, AND DEVICES

Code	Title	Hours
<b>Core Courses</b>		
EECE 7201	Solid State Devices	4
PHYS 7324	Condensed Matter Physics	4
<b>Engineering Coursework</b>		
Complete 12 semester hours from the following:		12
EECE 5606	Micro- and Nanofabrication	
EECE 5680	Electric Drives	
EECE 7204	Applied Probability and Stochastic Processes	
EECE 7240	Analog Integrated Circuit Design	
EECE 7242	Integrated Circuits for Mixed Signals and Data Communication	
EECE 7244	Introduction to Microelectromechanical Systems (MEMS)	
EECE 7245	Microwave Circuit Design for Wireless Communication	
EECE 7353	VLSI Design	
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering	

#### Physics Coursework

Complete 12 semester hours from the following:		12
PHYS 5318	Principles of Experimental Physics	
PHYS 7301	Classical Mechanics/Math Methods	
PHYS 7302	Electromagnetic Theory	
PHYS 7305	Statistical Physics	
PHYS 7315	Quantum Theory 1	
PHYS 7316	Quantum Theory 2	
PHYS 7321	Computational Physics	
PHYS 7734	Topics: Condensed Matter Physics	

#### ELECTROMAGNETICS, PLASMA, AND OPTICS

Code	Title	Hours
<b>Core Courses</b>		
EECE 7203	Complex Variable Theory and Differential Equations	4
PHYS 7302	Electromagnetic Theory	4
<b>Engineering Coursework</b>		
Complete 12 semester hours from the following:		12
EECE 5698	Special Topics in Electrical and Computer Engineering (Subsurface Imaging)	
EECE 7105	Optics for Engineers	
EECE 7202	Electromagnetic Theory 1	

EECE 7245	Microwave Circuit Design for Wireless Communication	
EECE 7270	Electromagnetic Theory 2	
EECE 7271	Computational Methods in Electromagnetics	
EECE 7275	Antennas and Radiation	
EECE 7293	Modern Imaging	

**Physics Coursework**

Complete 12 semester hours from the following: 12

PHYS 5318	Principles of Experimental Physics	
PHYS 7305	Statistical Physics	
PHYS 7315	Quantum Theory 1	
PHYS 7316	Quantum Theory 2	
PHYS 7321	Computational Physics	
PHYS 7324	Condensed Matter Physics	
PHYS 7731	Biological Physics 1	

**ANALYSIS, MODELING, AND COMPUTATION**

Code	Title	Hours
------	-------	-------

**Core Courses**

EECE 7205	Fundamentals of Computer Engineering	4
PHYS 7321	Computational Physics	4

**Engineering Coursework**

Complete 12 semester hours from the following: 12

EECE 5639	Computer Vision	
EECE 5640	High-Performance Computing	
EECE 5642	Data Visualization	
EECE 5643	Simulation and Performance Evaluation	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
EECE 7205	Fundamentals of Computer Engineering	
EECE 7271	Computational Methods in Electromagnetics	
EECE 7352	Computer Architecture	
EECE 7353	VLSI Design	
EECE 7374	Fundamentals of Computer Networks	

**Physics Coursework**

Complete 12 semester hours from the following: 12

PHYS 5116	Network Science 1	
PHYS 5318	Principles of Experimental Physics	
PHYS 7301	Classical Mechanics/Math Methods	
PHYS 7305	Statistical Physics	
PHYS 7335	Dynamical Processes in Complex Networks	

**Thesis Option**

Students may register for an additional two semesters of thesis work, Thesis (EECE 7990) or Thesis (PHYS 7990), depending on the affiliation of the thesis advisor. Thesis credits cannot be substituted for any of the coursework listed above. This option requires a total of 40 semester hours for the master's degree.

**Program Credit/GPA Requirements**

32–40 total semester hours required

Minimum 3.000 GPA required

## Data Science, MS

Khoury College of Computer Sciences and the Department of Electrical and Computer Engineering jointly offer an interdisciplinary Master of Science in Data Science. This program is designed to give students a comprehensive framework for reasoning about data. Students engage in extensive coursework intended to develop depth in data collection, storage, retrieval, manipulation, visualization, modeling, and interpretation. Students are also able to choose elective courses from a variety of offerings in Khoury, the College of Engineering, and throughout the campus to explore areas that generate data or specialized data science applications. Successful program graduates are well positioned to attain data scientist and data engineer positions in a fast-growing field or to progress into doctoral degrees in related disciplines.

During the admissions process, applicants take a pretest to determine if the Master of Science in Data Science or Master of Science in Data Science (p. 281)– (p. )Align (p. 281) fits better with their current skill level. In addition, prospective applicants work with recruitment and enrollment coaching teams to select the appropriate program before applying.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Students should refer to the course numbering table for graduate course leveling (p. 55).

### Core Requirements

A cumulative GPA of 3.000 or higher is required in the following core courses.

Code	Title	Hours
Complete 20 semester hours from the following:		
<b>Data Management and Processing</b>		
DS 5110	Introduction to Data Management and Processing	4
<b>Algorithms</b>		
Complete 4 semester hours from the following:		
CS 5800	Algorithms	4
EECE 7205	Fundamentals of Computer Engineering	
<b>Machine Learning and Data Mining</b>		
DS 5220	Supervised Machine Learning and Learning Theory	4
DS 5230	Unsupervised Machine Learning and Data Mining	4
<b>Presentation and Visualization</b>		
DS 5500	Data Science Capstone	4

### Electives

Code	Title	Hours
Complete 12 semester hours from the following: <sup>1</sup>		
<b>Khoury College of Computer Sciences</b>		
CS 5100	Foundations of Artificial Intelligence	
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5200	Database Management Systems	
CS 5330	Pattern Recognition and Computer Vision	
CS 5340	Computer/Human Interaction	
CS 5610	Web Development	
CS 6120	Natural Language Processing	
CS 6200	Information Retrieval	
CS 6240	Large-Scale Parallel Data Processing	
CS 6350	Empirical Research Methods	
CS 6620	Fundamentals of Cloud Computing	
CS 6650	Building Scalable Distributed Systems	
CS 7140	Advanced Machine Learning	
CS 7150	Deep Learning	
CS 7180	Special Topics in Artificial Intelligence	
CS 7200	Statistical Methods for Computer Science	
CS 7250	Information Visualization: Theory and Applications	
CS 7280	Special Topics in Database Management	

CS 7290	Special Topics in Data Science
DS 7990	Thesis
DS 7995	Project
<b>College of Engineering</b>	
CIVE 7100	Time Series and Geospatial Data Sciences
EECE 5612	Statistical Inference: An Introduction for Engineers and Data Analysts
EECE 5639	Computer Vision
EECE 5640	High-Performance Computing
EECE 5645	Parallel Processing for Data Analytics
EECE 7337	Information Theory
EECE 7370	Advanced Computer Vision
EECE 7397	Advanced Machine Learning
IE 6700	Data Management for Analytics
IE 7280	Statistical Methods in Engineering
<b>College of Social Sciences and Humanities</b>	
ECON 5140	Applied Econometrics
PPUA 5261	Dynamic Modeling for Environmental Decision Making
PPUA 5262	Big Data for Cities
PPUA 5263	Geographic Information Systems for Urban and Regional Policy
PPUA 5266	Urban Theory and Science
PPUA 7237	Advanced Spatial Analysis of Urban Systems
<b>College of Science</b>	
ENVR 5563	Advanced Spatial Analysis
PHYS 5116	Network Science 1
PHYS 7305	Statistical Physics
PHYS 7321	Computational Physics
<b>Bouvé College of Health Sciences</b>	
PHTH 5202	Introduction to Epidemiology
PHTH 5210	Biostatistics in Public Health
PHTH 6224	Social Epidemiology
<b>College of Arts, Media and Design</b>	
GSND 5110	Game Design and Analysis
GSND 6350	Data-Driven Player Modeling

### Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

<sup>1</sup> Students taking electives worth less than 4 semester hours (i.e., Bouvé courses) should enroll for an accompanying data science project course in the same semester to bring the cumulative semester hours to 4. In order to earn this additional credit, students are expected to work with faculty to design an additional project in line with the curricular aims of their chosen elective and the data science core learning outcomes.

## Internet of Things, MS

The Master of Science in Internet of Things is an interdisciplinary program administered by the Institute for the Wireless Internet of Things, the Department of Electrical and Computer Engineering, and the Khoury College of Computer Sciences. This program is aimed at preparing highly qualified researchers and a specialized workforce that will lead the development of a globally interconnected continuum of untethered devices and objects interacting with the physical environment, people, and each other. The program will provide students with the necessary knowledge and skills to understand, design, and implement autonomous wireless networked systems of tomorrow operating in uncertain, challenging, extreme environments, through a combination of coursework, master project research, and/or industry experience.

### Program Requirements

#### Core Requirements

Code	Title	Hours
EECE 5155	Wireless Sensor Networks and the Internet of Things	4
Complete one of the following:		4
EECE 5576	Wireless Communication Systems	
EECE 7364	Mobile and Wireless Networking	
Complete one of the following:		4
CS 5800	Algorithms	
CS 7800	Advanced Algorithms	
EECE 7205	Fundamentals of Computer Engineering	
Complete one of the following:		4
CS 6140	Machine Learning	
EECE 5612	Statistical Inference: An Introduction for Engineers and Data Analysts	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
EECE 5698	Special Topics in Electrical and Computer Engineering	
Complete one of the following:		4
EECE 7244	Introduction to Microelectromechanical Systems (MEMS)	
EECE 7368	High-Level Design of Hardware-Software Systems	
Complete two courses from the following for a total of 4 semester hours:		
EECE 7400	Special Problems in Electrical and Computer Engineering	1
INNO 6230	Platform Innovation	3
or MGMT 6280	Innovation for Next-Generation Products and Systems	
Complete one of the following:		4
CY 5120	Applied Cryptography	
CY 5150	Network Security Practices	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
CY 6740	Network Security	
CY 6760	Wireless and Mobile Systems Security	
EECE 5641	Introduction to Software Security	
EECE 5699	Computer Hardware and System Security	

#### Options

##### COURSEWORK OPTION

## Robotics, MS

For program contact information, please visit this website (<https://coe.northeastern.edu/academic-programs/ms-robo/>).

The multidisciplinary Master of Science program in robotics is offered by the College of Engineering and the Khoury College of Computer Sciences. The program is designed to provide students comprehensive training in algorithms, sensors, control systems, and mechanisms used in robotics.

### Gordon Institute of Engineering Leadership

#### Master's Degree in Robotics with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Robotics in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 40-semester-hour degree and certificate will require 24 semester hours of advisor-approved robotics technical courses.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
<b>Mechanical Engineering</b>		
Complete one of the following:		4
ME 5250	Robot Mechanics and Control	
ME 5659	Control Systems Engineering	
<b>Electrical and Computer Engineering</b>		
Complete one of the following:		4
EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5554	Robotics Sensing and Navigation	
<b>Computer Science</b>		
Complete one of the following:		4
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5335	Robotic Science and Systems	

#### Concentrations

Complete one of the following concentrations:

- Mechanical Engineering (p. 290)
- Electrical and Computer Engineering (p. 291)
- Computer Science (p. 291)

#### MECHANICAL ENGINEERING

Code	Title	Hours
Students in the mechanical engineering concentration follow the College of Engineering co-op policies.		
<b>Required Course</b>		
Complete one additional ME course not used to fulfill the core requirements:		4
ME 5250	Robot Mechanics and Control	
ME 5659	Control Systems Engineering	
<b>Complete one of the following options:</b>		
<i>Coursework Option</i>		
Complete 16 semester hours of courses from the elective course list. (p. 291)		16

## Wireless and Network Engineering, MS

### Overview

The Master of Science in Wireless and Network Engineering is administered by the Institute for the Wireless Internet of Things and the Department of Electrical and Computer Engineering. This program is aimed at preparing highly qualified researchers and a specialized workforce that will lead the future of our hyperconnected society. The program will provide students with the necessary knowledge and skills to understand, design, and implement present and future wireless and wired communication networks through a combination of coursework, master thesis research, and/or industry experience.

### Program Requirements

#### Core Requirements

Code	Title	Hours
Complete two of the following:		8
EECE 5576	Wireless Communication Systems	
EECE 7364	Mobile and Wireless Networking	
EECE 7374	Fundamentals of Computer Networks	

#### Options

##### COURSEWORK OPTION

Code	Title	Hours
Complete 24 semester hours from the course list below. (p. 432)		24

##### THESIS OPTION

Code	Title	Hours

### **Program Credit/GPA Requirements**

32 total semester hours required

Minimum 3.000 GPA required

## Electrical and Computer Engineering with Concentration in Communications, Control, and Signal Processing, MSECE

For program contact information, please visit this website (<https://ece.northeastern.edu/academics/graduate-studies/ms-eece/>).

The master's degree program in electrical and computer engineering offers in-depth coursework within the concentration-choice-related areas. The curriculum is integrated and intensive and is built on state-of-the-art research, taught by faculty who are experts in their areas.

### Excluded Courses for All MSECE Concentrations

Students cannot take excluded courses as part of the MSECE program and may not petition to take these courses, as any petition to take these courses will be automatically rejected. Courses from the following subject areas may not count toward any concentration within the MSECE program: CSYE, ENSY, EMGT, INFO, SBSY, TELE. Select CS courses are also excluded from all MSECE concentrations. Please see the program requirements tab and your college administrator for more information.

### Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

#### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

##### Master's Degree in Electrical and Computer Engineering with a Concentration in Communications, Control, and Signal Processing with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Electrical and Computer Engineering with a Concentration in Communications, Control, and Signal Processing in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 40-semester-hour degree and certificate will require 24 semester hours of advisor-approved communications, control, and signal processing technical courses.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Fundamental Courses

Code	Title	Hours
Complete at least 8 semester hours from the following:		8
EECE 5576	Wireless Communication Systems	
EECE 5666	Digital Signal Processing	
EECE 7200	Linear Systems Analysis	
EECE 7204	Applied Probability and Stochastic Processes	

### Options

Complete one of the following options:

#### COURSEWORK OPTION

Code	Title	Hours
<b>Depth Courses</b>		
Complete 12 semester hours from the depth course list below. Any fundamental course not used to meet the fundamental course requirement can be used toward the depth course requirement. (p. 435)		12
<b>Breadth Courses</b>		
Complete 8 semester hours from the breadth course list below. (p. 435)		8
Note: Depth courses cannot be taken for breadth.		
<b>Elective</b>		
Complete 4 semester hours from either depth or breadth courses.		4

#### THESIS OPTION

Code	Title	Hours
<b>Thesis</b>		
EECE 7990	Thesis	8
<b>Depth Courses</b>		
Complete 4 semester hours from the depth course list below. Any fundamental course not used to meet the fundamental course requirement can be used toward the depth course requirement. (p. 435)		4

**Breadth Courses**

Complete 4 semester hours from the breadth course list below. (p. 435)	4
--	---

Note: Depth courses cannot be taken for breadth.

**Electives**

Complete 8 semester hours from either depth or breadth courses.	8
---	---

**Course Lists**

In the coursework option a maximum of two courses may be taken outside of electrical and computer engineering. Thesis track students can take up to three courses outside of electrical and computer engineering.

**DEPTH COURSES**

Code	Title	Hours
EECE 5115	Dynamical Systems in Biological Engineering

## Electrical and Computer Engineering with Concentration in Computer Systems and Software, MSECE

For program contact information, please visit this website (<https://ece.northeastern.edu/academics/graduate-studies/ms-elee/>).

The master's degree programs in electrical and computer engineering offer in-depth coursework within the concentration-choice-related areas. The curriculum is integrated and intensive and is built on groundbreaking research, taught by faculty who are experts in their areas.

### Excluded Courses for All MSECE Concentrations

Students cannot take excluded courses as part of the MSECE program and may not petition to take these courses, as any petition to take these courses will be automatically rejected. Courses from the following subject areas may not count toward any concentration within the MSECE program: CSYE, ENSY, EMGT, INFO, SBSY, TELE. Select CS courses are also excluded from all MSECE concentrations. Please see the program requirements tab and your college administrator for more information.

### Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

#### Master's Degree in Electrical and Computer Engineering with Concentration in Computer Systems and Software with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science degree in Electrical and Computer Engineering with Concentration in Computer Systems and Software in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 40-semester-hour degree and certificate will require 24 semester hours of advisor-approved computer systems and software technical courses.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Fundamental Courses

Code	Title	Hours
Complete at least 8 semester hours from the following:		8
EECE 5640	High-Performance Computing	
EECE 7205	Fundamentals of Computer Engineering	
EECE 7352	Computer Architecture	
EECE 7376	Operating Systems: Interface and Implementation	

#### Options

Complete one of the following options:

#### COURSEWORK OPTION

Code	Title	Hours
<b>Depth Courses</b>		
Complete 12 semester hours from the depth course list below. Any fundamental course not used to meet the fundamental course requirement can be used toward the depth course requirement. (p. 440)		12
<b>Breadth Courses</b>		
Complete 8 semester hours from the breadth course list below or other EECE courses chosen in consultation with a faculty advisor. (p. 440)		8
Note: Depth courses cannot be taken for breadth.		
<b>Elective</b>		
Complete 4 semester hours from either depth or breadth courses.		4

#### THESIS OPTION

Code	Title	Hours
<b>Thesis</b>		
EECE 7990	Thesis	8
<b>Depth Courses</b>		
Complete 4 semester hours from the depth course list below. Any fundamental course not used to meet the fundamental course requirement can be used toward the depth course requirement. (p. 440)		4

**Breadth Courses**

Complete 4 semester hours from the breadth course list below or other EECE courses chosen in consultation with a faculty advisor. (p. 440) 4

Note: Depth courses cannot be taken for breadth.

**Elective**

Complete 8 semester hours from either depth or breadth courses. 8

**Course Lists**

A maximum of three courses may be taken outside of electrical and computer engineering.

**DEPTH COURSES**

### EXCLUDED COURSES FOR ALL MSECE CONCENTRATIONS

Please see your college administrator for more information.

Code	Title	Hours
Courses from the following subject areas may not count toward any concentration within the MSECE program:		
CSYE, ENSY, EMGT, INFO, SBSY, TELE		
The following CS courses may not count toward any concentration within the MSECE program:		
CS 5010	Programming Design Paradigm	
CS 5330	Pattern Recognition and Computer Vision	
CS 5340	Computer/Human Interaction	
CS 5520	Mobile Application Development	
CS 5610	Web Development	
CS 5700	Fundamentals of Computer Networking	
CS 5800	Algorithms	
CS 6350	Empirical Research Methods	
CS 6710	Wireless Network	

### Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

## Electrical and Computer Engineering with Concentration in Computer Vision, Machine Learning, and Algorithms, MSECE

For program contact information, please visit this website (<https://ece.northeastern.edu/academics/graduate-studies/ms-eece/>).

The master's degree program in electrical and computer engineering offers in-depth coursework within the concentration-choice-related areas. The curriculum is integrated and intensive and is built on state-of-the-art research, taught by faculty who are experts in their areas.

### Excluded Courses for All MSECE Concentrations

Students cannot take excluded courses as part of the MSECE program and may not petition to take these courses, as any petition to take these courses will be automatically rejected. Courses from the following subject areas may not count toward any concentration within the MSECE program: CSYE, ENSY, EMGT, INFO, SBSY, TELE. Select CS courses are also excluded from all MSECE concentrations. Please see the program requirements tab and your college administrator for more information.

### Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

#### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

##### Master's Degree in Electrical and Computer Engineering with Concentration in Computer Vision, Machine Learning, and Algorithms with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Electrical and Computer Engineering with Concentration in Computer Vision, Machine Learning, and Algorithms in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 40-semester-hour degree and certificate will require 24 semester hours of advisor-approved computer vision, machine learning, and algorithms technical courses.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Fundamental Courses

Code	Title	Hours
Complete at least 8 semester hours from the following:		8
EECE 5554	Robotics Sensing and Navigation	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
EECE 7205	Fundamentals of Computer Engineering	
EECE 7352	Computer Architecture	

#### Options

Complete one of the following options:

##### COURSEWORK OPTION

Code	Title	Hours
<b>Depth Courses</b>		
Complete 12 semester hours from the depth course list below. Any fundamental course not used to meet the fundamental course requirement can be used toward the depth course requirement. (p. 449)		12
<b>Breadth Courses</b>		
Complete 8 semester hours from the breadth course list below or other EECE courses chosen in consultation with a faculty advisor. (p. 449)		8
Note: Depth courses cannot be taken for breadth.		
<b>Elective</b>		
Complete 4 semester hours from either depth or breadth courses.		4

##### THESIS OPTION

Code	Title	Hours
<b>Thesis</b>		
EECE 7990	Thesis	8
<b>Depth Courses</b>		
Complete 4 semester hours from the depth course list below. Any fundamental course not used to meet the fundamental course requirement can be used toward the depth course requirement. (p. 449)		4

**Breadth Courses**

Complete 4 semester hours from the breadth course list below or other EECE courses chosen in consultation with a faculty advisor. (p. 449) 4

Note: Depth courses cannot be taken for breadth.

**Elective**

Complete 8 semester hours from either depth or breadth courses. 8

**Course Lists**

A maximum of three courses may be taken outside of electrical and computer engineering.

**DEPTH COURSES**

Code	Title	Hours
CS 5100	Foundations of Artificial Intelligence	
CS 6200	Information Retrieval	
CS 6220	Data Mining Techniques

#### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

##### Master's Degree in Electrical and Computer Engineering with Concentration in Hardware and Software for Machine Intelligence with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Electrical and Computer Engineering with Concentration in Hardware and Software for Machine Intelligence in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 40-semester-hour degree and certificate will require 24 semester hours of advisor-approved hardware and software for machine intelligence technical courses.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Fundamental Courses

Code	Title	Hours
Complete at least 8 semester hours from the following:		8
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
EECE 7205	Fundamentals of Computer Engineering	
EECE 7352	Computer Architecture	
EECE 7353	VLSI Design	

#### Options

Complete one of the following options:

##### COURSEWORK OPTION

Code	Title	Hours
A maximum of three courses may be taken outside of the electrical and computer engineering EECE subject code.		
<b>Depth Courses</b>		
Complete 12 semester hours from the depth course list below. Any fundamental course not used to meet the fundamental course requirement can be used toward the depth course requirement. (p. 459)		12
<b>Breadth Courses</b>		
Complete 8 semester hours from the breadth course list below or other EECE courses chosen in consultation with a faculty advisor. (p. 460)		8
Note: Depth courses cannot be taken for breadth.		
<b>Elective</b>		
Complete 4 semester hours of either depth or breadth courses.		4

##### THESIS OPTION

Code	Title	Hours
A maximum of three courses may be taken outside of electrical and computer engineering.		
<b>Thesis</b>		
EECE 7990	Thesis	8
<b>Depth Courses</b>		
Complete 4 semester hours from the depth course list below. (p. 459)		4

**Breadth Courses**

Complete 4 semester hours from the breadth course list below or other EECE courses chosen in consultation with a faculty advisor. (p. 460) 4

Note: Depth courses cannot be taken for breadth.

**Elective**

Complete 8 additional semester hours from either depth or breadth courses. 8

## Electrical and Computer Engineering with Concentration in Microsystems, Materials, and Devices, MSECE

For program contact information, please visit this website (<https://ece.northeastern.edu/academics/graduate-studies/ms-eeee/>).

The master's degree program in electrical and computer engineering offers in-depth coursework within the concentration-choice-related areas. The curriculum is integrated and intensive and is built on state-of-the-art research, taught by faculty who are experts in their areas.

### Excluded Courses for All MSECE Concentrations

Students cannot take excluded courses as part of the MSECE program and may not petition to take these courses, as any petition to take these courses will be automatically rejected. Courses from the following subject areas may not count toward any concentration within the MSECE program: CSYE, ENSY, EMGT, INFO, SBSY, TELE. Select CS courses are also excluded from all MSECE concentrations. Please see the program requirements tab and your college administrator for more information.

### Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

#### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

##### *Master's Degree in Electrical and Computer Engineering with Concentration in Microsystems, Materials, and Devices with Graduate Certificate in Engineering Leadership*

Students may complete a Master of Science in Electrical and Computer Engineering with Concentration in Microsystems, Materials, and Devices in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 40-semester-hour degree and certificate will require 24 semester hours of advisor-approved microsystems, materials, and devices technical courses.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Fundamental Courses

Code	Title	Hours
Complete at least 8 semester hours from the following:		
EECE 5606	Micro- and Nanofabrication	8
EECE 7201	Solid State Devices	
EECE 7244	Introduction to Microelectromechanical Systems (MEMS)	
EECE 7353	VLSI Design	

#### Options

Complete one of the following options:

##### COURSEWORK OPTION

Code	Title	Hours
<b>Depth Courses</b>		
Complete 12 semester hours from the depth course list below. Any fundamental course not used to meet the fundamental course requirement can be used toward the depth course requirement. (p. 464)		12
<b>Breadth Courses</b>		
Complete 8 semester hours from the breadth course list below. (p. 464)		8
Note: Depth courses cannot be taken for breadth.		
<b>Elective</b>		
Complete 4 additional semester hours from either depth or breadth courses.		4

##### THESIS OPTION

Code	Title	Hours
EECE 7990	Thesis	8
<b>Depth Courses</b>		
Complete 4 semester hours from the depth course list below. Any fundamental course not used to meet the fundamental course requirement can be used toward the depth course requirement. (p. 464)		4
<b>Breadth Courses</b>		
Complete 4 semester hours from the breadth course list below. (p. 464)		4

Note: Depth courses cannot be taken for breadth.

### Elective

Complete 8 additional semester hours from either depth or breadth courses.

8

### Course Lists

In the coursework option, a maximum of two courses may be taken outside of electrical and computer engineering. Thesis track students can take up to three courses outside of electrical and computer engineering.

**EXCLUDED COURSES FOR ALL MSECE CONCENTRATIONS**

Please see your college administrator for more information.

Code	Title	Hours
Courses from the following subject areas may not count toward any concentration within the MSECE program:		
CSYE, ENSY, EMGT, INFO, SBSY, TELE		
The following CS courses may not count toward any concentration within the MSECE program:		
CS 5010	Programming Design Paradigm	
CS 5330	Pattern Recognition and Computer Vision	
CS 5340	Computer/Human Interaction	
CS 5520	Mobile Application Development	
CS 5610	Web Development	
CS 5700	Fundamentals of Computer Networking	
CS 5800	Algorithms	
CS 6350	Empirical Research Methods	
CS 6710	Wireless Network	

**Program Credit/GPA Requirements**

32 total semester hours required

Minimum 3.000 GPA required

## Electrical and Computer Engineering Leadership, MSECCEL

The Gordon Engineering Leadership Program is a transformational, technical, and challenging graduate-level learning experience targeted for engineering professionals.

The Gordon Institute, in collaboration with the College of Engineering, offers the Master of Science in Electrical and Computer Engineering Leadership (MSECCEL) as formal recognition of the combined focus in electrical and computer engineering technical skills and midlevel engineers' leadership acumen and broadened cross-functional capabilities. This program is offered through participation in the Gordon Engineering Leadership Program at Northeastern University and requires an additional application to the Gordon program.

Pursuing the MSECCEL and the graduate certificate allows participants to:

- Enhance technical knowledge in electrical and computer engineering
- Take part in a hands-on curriculum (p. 472) taught by industry-experienced professors
- Work with peers from across engineering fields on leadership skills development
- Receive one-on-one mentoring from industry experts and faculty

The Gordon Engineering Leadership Program anchors around an intense, market-worthy challenge project based on your organization's strategic needs. This is a unique opportunity to apply your classroom experience to a professional setting, potentially further accelerating your career.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
<b>Leadership</b>		
ENLR 5121	Engineering Leadership 1	2
ENLR 5122	Engineering Leadership 2	2
<b>Foundations</b>		
ENLR 5131	Scientific Foundations of Engineering 1	2
ENLR 5132	Scientific Foundations of Engineering 2	2
<b>Project</b>		
ENLR 7440	Engineering Leadership Challenge Project 1	4
ENLR 7442	Engineering Leadership Challenge Project 2	4
<b>Concentration Courses</b>		

Complete 16 semester hours from any of the approved depth/breadth course lists within any of the seven EECE concentrations. Students are encouraged to take at least three courses within the same concentration.

16

Minimum 3.000 GPA required

## Mechanical and Industrial Engineering

Website (<https://mie.northeastern.edu/academics/graduate-studies/>)

### Marilyn L. Minus, PhD

Professor and Chair

334 Snell Engineering Center

617.373.2740

617.373.2921 (fax)

Mechanical engineers design, develop, and support the manufacture of machinery and devices to transmit power or to convert energy from thermal to mechanical form in order to power the modern world and its machines. Traditionally, mechanical engineers have designed and tested devices, such as heating and air-conditioning systems, machine tools, internal combustion engines, and steam power plants. Today, they also play primary roles in the development of new technologies in a variety of fields—energy conversion, solar energy utilization, environmental control, prosthetics, transportation, manufacturing, robotics, and new-materials development.

Industrial engineers design and analyze systems that include people, equipment, and materials and their interactions and performance in the workplace. An industrial engineer collects this information and evaluates alternatives to make decisions that best advance the goals of the enterprise. Industrial engineers work in manufacturing firms, hospitals, banks, public utilities, transportation, government agencies, insurance companies, and construction firms. Among the projects they undertake are design and implementation of a computer-integrated supply chain or manufacturing system, facilities planning for a variety of industries, design of a robotics system in a manufacturing environment, long-range corporate planning, development and implementation of a quality-control system, simulation analyses to improve processes and make operational decisions, design of healthcare operations to enhance patient safety and improve efficiency, productivity, and development of computer systems for information control.

### Mission of the Department

The mission of the Department of Mechanical and Industrial Engineering is to educate persons for professional and technical excellence; to perform research to advance the science and practice of engineering; to engage in service activities that advance the department, the university, and the profession; and to instill in ourselves and our students habits and attitudes that promote ethical behavior, professional responsibility, and careers that advance the well-being of society.

### Academic Programs

The Department of Mechanical and Industrial Engineering offers comprehensive research and educational programs for both Master of Science and Doctor of Philosophy students. Our cutting-edge and vibrant doctoral programs include PhDs in industrial engineering, mechanical engineering, and an interdisciplinary engineering PhD (housed in the College of Engineering). Our MS degree programs are offered in both traditional mechanical and industrial engineering, as well as data analytics engineering, energy systems, engineering management, human factors, operations research, and advanced and intelligent manufacturing. These extensive programs and concentrations allow for the selection of a degree that meets a wide variety of personal and professional goals. Graduate students work with our world-renowned faculty to achieve research experience and their career goals and have opportunities to participate in the graduate cooperative education program.

### Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (<https://www.northeastern.edu/graduate/programs/#/certificate/engineering,leadership/-/-/-/-/>).

#### **GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION**

Students have the opportunity to pursue the Gordon Engineering Leadership Program (<https://www.northeastern.edu/graduate/program/graduate-certificate-in-engineering-leadership-5272/>) in combination with the MS degree.

#### **ENGINEERING BUSINESS**

Students have the opportunity to pursue the Galante Engineering Business Certificate (<https://www.northeastern.edu/graduate/program/galante-engineering-business-certificate-14806/>) in combination with several MS degrees.

### Programs

#### **Doctor of Philosophy (PhD)**

- Industrial Engineering (p. 475)
- Interdisciplinary Engineering (p. 357)
- Mechanical Engineering (p. 478)

#### **Master of Science (MS)**

- Advanced and Intelligent Manufacturing (p. 481)
- Data Analytics Engineering (p. 485)
- Human Factors (p. 490)

### **Master of Science in Industrial Engineering (MSIE)**

- Industrial Engineering (p. 493)

### **Master of Science in Engineering Management (MSEM)**

- Engineering Management (p. 497)

### **Master of Science in Energy Systems (MSEneS)**

- Energy Systems (p. 504)
- Energy Systems—Academic Link Program (p. 507)

### **Master of Science in Mechanical Engineering (MSME)**

- Mechanical Engineering with Concentration in General Mechanical Engineering (p. 509)
- Mechanical Engineering with Concentration in Mechanics and Design (p. 514)
- Mechanical Engineering with Concentration in Materials Science (p. 512)
- Mechanical Engineering with Concentration in Mechatronics (p. 517)
- Mechanical Engineering with Concentration in Thermofluids (p. 520)

### **Master of Science in Operations Research (MSOR)**

- Operations Research (p. 523)

### **Graduate Certificate**

- Data Analytics Engineering (p. 526)
- Energy Systems (p. 527)
- Energy Systems Management (p. 528)
- Engineering Business (p. 529)
- Engineering Economic Decision Making (p. 531)
- Engineering Management (p. 532)
- Lean Six Sigma (p. 533)
- Renewable Energy (p. 534)
- Software Engineering Systems (p. 554)
- Sustainable Energy Systems (p. 535)
- Supply Chain Engineering Management (p. 536)
- Technology Systems Management (p. 537)

## Industrial Engineering, PhD

### Requirements

The PhD is awarded to students who demonstrate high academic achievement and research competence in the fields of mechanical engineering. To earn a PhD, a student must complete an approved, rigorous program of advanced coursework and submit and defend an original dissertation of independent research. The Department of Mechanical and Industrial Engineering expects all successful doctoral candidates to show depth of knowledge and research innovation in their chosen field of specialization.

The MIE department admits applicants to the PhD program either directly after earning a suitable bachelor's degree (i.e., direct entry) or after earning a suitable master's degree (i.e., advanced entry). Upon acceptance into the program, an applicant is designated as a doctoral student. This designation is changed to doctoral candidate upon successful completion of the doctoral qualifying requirements (both written and oral components) as well as all the required coursework.

### Academic and Research Advisors

PhD students must find a research advisor within their first year of study. The research advisor must be a full-time or jointly appointed faculty. If the research advisor is outside the MIE department, a faculty member with 51% or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Students are advised by the faculty advisor of their discipline before they select their research advisor(s). The research advisor and co-advisor (if applicable) must serve on the PhD student's oral examination, dissertation proposal, and dissertation defense committees.

### Change of Research Advisor

Students who wish to change their research advisor need to use the MIE petition form to make that request. The petition form must be signed by the student and by the student's current and future research advisor. The signed petition form should then be submitted to the MIE department for further processing.

### Course Requirements and Plan of Study

Each doctoral student, together with their research advisor, should develop an initial program during the first semester of study. The final program is also subject to the approval of the dissertation committee, who will add the program of study to the student's record upon admission to doctoral candidacy.

#### DIRECT ENTRY

A typical program of study includes at least 40 semester hours of coursework beyond a bachelor's degree. Students who apply to earn a master's degree along the way to a PhD must complete a total of 52 semester hours (32 semester hours to earn a master's degree and an additional 20 semester hours in order to earn a PhD). The 32 semester hours of coursework that apply toward the master's degree may include up to 8 semester hours of thesis or 4 semester hours of project or approved independent study coursework. Students may petition the MIE Graduate Affairs Committee to substitute up to 4 semester hours of Independent Study (IE 7978) as part of their required coursework. An independent study must be approved by the research advisor. When thesis or project is selected, an independent study course cannot be taken.

#### ADVANCED ENTRY

A typical program of study includes at least 20 semester hours of coursework beyond a master's degree. Students may petition the MIE Graduate Affairs Committee to substitute up to 4 semester hours of Independent Study (IE 7978) as part of their required coursework. An independent study must be approved by the research advisor.

#### PHD CANDIDACY

To qualify as a doctoral candidate, a doctoral student must successfully complete the doctoral qualifying requirements as well as all the required coursework.

### Doctoral Qualifying Requirements

**Doctoral qualifying requirements framework:** The goal of the Doctoral Qualifying Examination is to: test a student's knowledge in fundamental topics; to gauge the student's potential to conduct independent research; and to provide opportunities for feedback to the student.

The Doctoral Qualifying Examination will be administered by a committee of at least three members, with a minimum of two who are full-time faculty members in the MIE department. The exam comprises both a written and an oral portion, with specifics determined by the faculty of each concentration. Complete details are provided to students in the PhD Qualifying Requirement Guidelines on the MIE department graduate website (<https://mie.northeastern.edu/academics/graduate-studies/>).

Upon successfully completing both the written and oral components in addition to all the necessary coursework, as specified by the student's concentration, the student will be designated as a PhD candidate.

#### Appeal Procedure

The doctoral qualifying requirements process provides means for reevaluation for students who fail one or more components to appeal the Graduate Affairs Committee decision. All communications related to these should be coordinated through the student's research advisor. Only the student's research advisor may request the MIE Graduate Affairs Committee to reevaluate the student's performance.

## PhD Students Annual Review

All PhD students in the MIE department must complete the PhD Students Annual Review form with their research advisor(s) and submit any supporting documents. Annual reviews will be filed with the MIE Department of Graduate Affairs.

## PhD Students Changing Their Program

PhD students who, for any reason, decide to change their degree program (i.e., from PhD in ME to PhD in IE or vice versa) must satisfy the doctoral qualifying requirements (based on the student's new major research area (i.e., industrial engineering, materials, mechanics, mechatronics, or thermofluids).

## Interdisciplinary PhD Students with MIE as the Home Department

Students pursuing the College of Engineering interdisciplinary PhD program with the MIE department as their home department must satisfy the the MIE doctoral qualifying requirements. Students dismissed from the ME or IE PhD programs in the MIE department cannot enroll in the PhD Interdisciplinary Engineering program with MIE as the primary affiliation.

## Dissertation Proposal Preparation and Presentation Timing

Students must present their dissertation proposal no more than 18 months after successfully completing the oral exam. In addition, the presentation of the dissertation proposal and the actual dissertation defense (see below) shall be no less than 6 months apart. The student's dissertation committee will invite any additional faculty deemed appropriate to that field; this dissertation committee will then conduct the dissertation proposal session. Each student's dissertation committee must be comprised of at least three members, including the research advisor. At least two of those three members must be full-time MIE faculty members. At least three committee members should hold a PhD and at least two shall be Northeastern University faculty. The chair of the dissertation committee shall be a full-time tenured or tenure-track member of the faculty of Northeastern and will hold a PhD or an appropriate terminal degree for the discipline. Exceptions to this policy will be considered and, if appropriate, approved by the provost or their designee.

## Dissertation Course Requirements

Upon successful completion of the doctoral qualifying requirements as well as all the required coursework, the doctoral candidate, in consultation with their research advisor, must register in two consecutive semesters (may include full summer term) for Dissertation Term 1 (IE 9990) and Dissertation Term 2 (IE 9991). Upon completion of this sequence, the student must then register for Dissertation Continuation (IE 9996) in every semester (in each fall and spring term and also in the summer term if summer is the student's last semester) until the dissertation is completed. Students may not register for Dissertation Continuation (IE 9996) until they fulfill the two-semester sequence of Dissertation Term 1 (IE 9990) and Dissertation Term 2 (IE 9991).

PhD students who have completed the majority of their coursework and not yet reached PhD candidacy should register for Candidacy Preparation—Doctoral (IE 8960), in a section for which their research or academic advisor is listed as the instructor in the online registration system.

## Final Oral (Dissertation Defense) Examination

All doctoral candidates must pass a final oral exam. This exam will be scheduled once the dissertation committee agrees that the candidate's research is at a stage where it is appropriate for formal presentation and after completion of all other PhD requirements, including all the coursework approved in the final program of study. The objective of the exam is for the candidate to present and defend the results of the dissertation research and to demonstrate depth of knowledge and significant expertise in the area of that research under questioning from the dissertation committee and other attendees.

The exam shall be publicly advertised **at least one week in advance** and all faculty members may attend and participate. At the conclusion of the presentation and subsequent questions period, the dissertation committee will convene to determine the outcome. The committee may recommend that the candidate be awarded the PhD or may require additional research and/or modifications of the dissertation. In some cases, candidates may be asked to present an additional final oral dissertation defense.

## Residency Requirement

After achieving PhD candidacy, the university residency requirement is satisfied by two semesters of full-time graduate registration or four semesters of part-time graduate registration. Students must be continually enrolled during the pursuit of dissertation.

## Program Requirements

### Bachelor's Degree Entrance

Complete all courses and requirements listed below unless otherwise indicated.

### Milestones

- Doctoral qualifying exams (both written comprehensive and oral area exams)
- Annual review
- Dissertation committee formation
- Dissertation proposal
- Dissertation defense

**Core Requirements**

Code	Title	Hours
------	-------	-------

**Recommended Courses**

Note: Semester hours can be counted toward coursework component with advisor approval.

MEIE 6830	Graduate Traineeship 1, Technical Writing and Communications	
MEIE 6860	Graduate Traineeship 2, Research Ethics and Professional Development	

**Approved Coursework**

Requires 40 semester hours of coursework, including up to 4 semester hours of Independent Study (IE 7978). 40

**Dissertation**

Code	Title	Hours
------	-------	-------

Complete the following (must register in two consecutive semesters, which may include full summer term):

IE 9990	Dissertation Term 1	
IE 9991	Dissertation Term 2	

**Program Credit/GPA Requirements**

40 total semester hours required

Minimum 3.000 GPA required

**Advanced Entry Program Requirements****Master's Degree Entrance**

Complete all courses and requirements listed below unless otherwise indicated.

## Mechanical Engineering, PhD

### Requirements

The PhD is awarded to students who demonstrate high academic achievement and research competence in the fields of mechanical engineering. To earn a PhD, a student must complete an approved, rigorous program of advanced coursework and submit and defend an original dissertation of independent research. The Department of Mechanical and Industrial Engineering expects all successful doctoral candidates to show depth of knowledge and research innovation in their chosen field of specialization.

The MIE department admits applicants into the PhD program either directly after earning a suitable bachelor's degree (i.e., direct entry) or after earning a suitable master's degree (i.e., advanced entry). Upon acceptance into the program, an applicant is designated as a doctoral student. This designation is changed to doctoral candidate upon successful completion of the doctoral qualifying requirements (both written and oral components) as well as all the required coursework.

### Academic and Research Advisors

PhD students must find a research advisor within their first year of study. The research advisor must be a full-time or jointly appointed faculty. If the research advisor is outside the MIE department, a faculty member with 51% or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Students are advised by the faculty advisor of their discipline before they select their research advisor(s). The research advisor and co-advisor (if applicable) must serve on the PhD student's oral examination, dissertation proposal, and dissertation defense committees.

### Change of Research Advisor

Students who wish to change their research advisor need to use the MIE petition form to make that request. The petition form must be signed by the student and by the student's current and future research advisor. The signed petition form should then be submitted to the MIE department for further processing.

### Course Requirements and Plan of Study

Each doctoral student, together with their research advisor, should develop an initial program during the first semester of study. The final program is also subject to the approval of the dissertation committee, who will add the program of study to the student's record upon admission to doctoral candidacy.

#### DIRECT ENTRY

A typical program of study includes at least 40 semester hours of coursework beyond a bachelor's degree. Students who choose to get a master's degree along the way to a PhD must complete a total of 52 semester hours (32 semester hours to earn a master's degree and an additional 20 semester hours in order to earn a PhD). The 32 semester hours of coursework that apply toward the master's degree may include up to 8 semester hours of thesis or 4 semester hours of project or approved independent study coursework. Students may petition the MIE Graduate Affairs Committee to substitute up to 4 semester hours of (ME 7978) as part of their required coursework. An independent study must be approved by the research advisor. When thesis or project is selected, an independent study course cannot be taken.

#### ADVANCED ENTRY

A typical program of study includes at least 20 semester hours of coursework beyond a master's degree. Students may petition the MIE Graduate Affairs Committee to substitute up to 4 semester hours of (ME 7978) as part of their required coursework. An independent study must be approved by the research advisor.

#### PHD CANDIDACY

To qualify as a doctoral candidate, a doctoral student must successfully complete the doctoral qualifying requirements as well as all the required coursework.

### Doctoral Qualifying Requirements

#### DOCTORAL QUALIFYING REQUIREMENTS FRAMEWORK

The goals of the Doctoral Qualifying Examination are to test a student's knowledge in fundamental topics; to gauge the student's potential to conduct independent research; and to provide opportunities for feedback to the student.

The Doctoral Qualifying Examination will be administered by a committee of at least three members, with a minimum of two who are full-time faculty members in the MIE department. The exam comprises both a written and an oral portion, with specifics determined by the faculty of each concentration. Complete details are provided to students in the PhD Qualifying Requirement Guidelines on the MIE department graduate website (<https://mie.northeastern.edu/academics/graduate-studies/>).

Upon successfully completing both the written and oral components in addition to all the necessary coursework, as specified by the student's concentration, the student will be designated as a PhD candidate.

#### APPEAL PROCEDURE

The doctoral qualifying requirements process provides means for reevaluation for students who fail one or more components to appeal the Graduate Affairs Committee decision. All communications related to these should be coordinated through the student's research advisor. Only the student's research advisor may request the MIE Graduate Affairs Committee to reevaluate the student's performance.

## PhD Students Annual Review

All PhD students in the MIE department must complete the PhD Students Annual Review form with their research advisor(s) and submit any supporting documents. Annual reviews will be filed with the MIE Department of Graduate Affairs.

## PhD Students Changing Their Program

PhD students who, for any reason, decide to change their degree program (i.e., from PhD in ME to PhD in IE or vice versa) must satisfy the doctoral qualifying requirements (based on the student's new major research area (i.e., industrial engineering, materials, mechanics, mechatronics, or thermofluids).

## Interdisciplinary PhD Students with MIE as the Home Department

Students pursuing the College of Engineering interdisciplinary PhD program with the MIE department as their home department must satisfy the MIE doctoral qualifying requirements. Students dismissed from the ME or IE PhD programs in the MIE department cannot enroll in the PhD in Interdisciplinary Engineering program with MIE as the primary affiliation.

## Dissertation Proposal Preparation and Presentation Timing

Students must present their dissertation proposal no more than 18 months after successfully completing the oral exam. In addition, the presentation of the dissertation proposal and the actual dissertation defense (see below) shall be no less than 6 months apart. The student's dissertation committee will invite any additional faculty deemed appropriate to that field; this dissertation committee will then conduct the dissertation proposal session. Each student's dissertation committee must be comprised of at least three members, including the research advisor. At least two of those three members must be full-time MIE faculty members. At least three committee members should hold a PhD and at least two shall be Northeastern University faculty. The chair of the dissertation committee shall be a full-time tenured or tenure-track member of the faculty of Northeastern and will hold a PhD or an appropriate terminal degree for the discipline. Exceptions to this policy will be considered and, if appropriate, approved by the provost or their designee.

## Dissertation Course Requirements

Upon successful completion of the doctoral qualifying requirements as well as all the required coursework, the doctoral candidate, in consultation with their research advisor, must register in two consecutive semesters (may include full summer term) for Dissertation Term 1 (ME 9990) and Dissertation Term 2 (ME 9991). Upon completion of this sequence, the student must then register for Dissertation Continuation (ME 9996) in every semester (in each fall and spring term and also in the summer term if summer is the student's last semester) until the dissertation is completed. Students may not register for Dissertation Continuation (ME 9996) until they fulfill the two-semester sequence of Dissertation Term 1 (ME 9990) and Dissertation Term 2 (ME 9991).

PhD students who have completed the majority of their coursework and not yet reached PhD candidacy should register for Candidacy Preparation—Doctoral (ME 8960), in a section for which their research or academic advisor is listed as the instructor in the online registration system.

## Final Oral (Dissertation Defense) Examination

All doctoral candidates must pass a final oral exam. This exam will be scheduled once the dissertation committee agrees that the candidate's research is at a stage where it is appropriate for formal presentation and after completion of all other PhD requirements, including all the coursework approved in the final program of study. The objective of the exam is for the candidate to present and defend the results of the dissertation research and to demonstrate depth of knowledge and significant expertise in the area of that research under questioning from the dissertation committee and other attendees.

The exam shall be publicly advertised **at least one week in advance** and all faculty members may attend and participate. At the conclusion of the presentation and subsequent questions period, the dissertation committee will convene to determine the outcome. The committee may recommend that the candidate be awarded the PhD or may require additional research and/or modifications of the dissertation. In some cases, candidates may be asked to present an additional final oral dissertation defense.

## Residency Requirement

After achieving PhD candidacy, the university residency requirement is satisfied by two semesters of full-time graduate registration or four semesters of part-time graduate registration. Students must be continually enrolled during the pursuit of dissertation.

## Advanced and Intelligent Manufacturing, MS

### Overview

The Department of Mechanical and Industrial Engineering (MIE) offers the Master of Science in Advanced and Intelligent Manufacturing (MS in AIM) to meet the growing demand for engineers, researchers, and scientists trained in advanced manufacturing and Industry 4.0 technologies. This degree program offers students an opportunity to either train for industry jobs with coursework and co-op experience or prepare for a doctoral program through coursework and research experience. MIE department offers both core courses and elective courses required to complete the program. Students can take MS Project or MS Thesis under any MIE faculty. This program is designed for engineering and science students planning to pursue careers in advanced and smart manufacturing. The key sectors that require manufacturing professionals include automotive, aerospace, defense, appliances, computing machines, smartphones, and communication equipment. The MS in AIM program helps students acquire knowledge and skills to:

- Build digital (CAD) models of parts and products to support manual and computer-aided manufacturing
- Design, develop, and analyze traditional and advanced manufacturing processes
- Utilize additive manufacturing to produce complex parts with ease and efficiency
- Select manufacturing processes to fabricate parts and products for quality and cost
- Configure and analyze manufacturing systems for efficiency, responsiveness, and high throughput
- Understand the characteristics and challenges of nanomanufacturing processes
- Leverage Industry 4.0 technologies including internet of things, cloud computing, sensor analytics for advanced manufacturing
- Adopt condition-based maintenance strategies to achieve high resource utilization
- Apply automation, robotics, and artificial intelligence to make manufacturing smart and self-operational
- Use human-machine interaction tools such as augmented reality and virtual reality
- Analyze human performance in sociotechnical systems such as supply chains
- Apply data analytics methods to gain insights from design and manufacturing data

In the context of this program, the traditional manufacturing covers metal removal, forming, casting, and particulate processes. The additive manufacturing covers topics such as 3D-printed parts using different approaches. The nanomanufacturing covers fabrication as well as printing of micro and nano devices and design and creation of multifunctional materials. Intelligent manufacturing focuses on factory automation, prognostics and health management, dynamic scheduling, cloud-enabled manufacturing, and industrial internet of things for manufacturing performance assurance. It also leverages real-time data analytics and control systems, advanced high-fidelity models, networked data, and computation for seamless interoperation of cyber and physical assets in manufacturing facilities.

### General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, statistics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved coursework (exclusive of any preparatory courses) with a minimum grade-point average (GPA) of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: coursework option, project option, and thesis option. Specific degree requirements for each of these tracks can be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

### Specific Degree Requirements

Core courses for the Master of Science in Advanced and Intelligent Manufacturing provide students with a foundation in traditional and advanced materials processing, additive manufacturing, intelligent manufacturing, and digital manufacturing. Students can select electives from a wide range of fields including mechanical engineering, industrial engineering, operations research, and engineering management. Alternatively, students can also take courses outside the MIE department by seeking a prior approval from their faculty advisor or MS thesis advisor. The course curriculum is designed to prepare students for industry jobs as well as for pursuing a doctoral program in manufacturing, mechanical engineering, and industrial engineering.

### Academic and Research Advisors

All nonthesis students are advised by the faculty advisor designated for their respective concentration or program. Students willing to pursue the thesis option must first find a research advisor within their first year of study. The research advisor will guide the students' thesis work, and thesis reader(s) may be assigned at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty in the MIE department. If the research advisor is outside the MIE department, before the thesis option can be approved, a faculty member with 51 percent or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Thesis option students are advised by the faculty advisor of their concentration before they select their research advisor(s). The research advisor and co-advisor must serve as thesis readers.

## Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the coursework requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their coursework needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study (PS) to the department before enrolling in second-semester courses. This form not only helps the students manage their coursework but it also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students pursuing study or research under the guidance of a faculty member can choose project option by taking Master's Project (IE 7945) or Master's Project (ME 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Students pursuing coursework option may petition the MIE Graduate Affairs Committee to substitute Independent Study (IE 7978) or (ME 7978) up to 4 semester hours. An independent study must be approved by the instructor and the academic advisor. The petition must clearly state the instructor; the reason for taking the course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme. Students in other options (i.e., thesis or project) are not eligible to take independent study. When taking thesis or project options, the independent study course cannot be taken.

## Options for MS Students (coursework only, project, or thesis)

Students accepted into any of the MS programs in the MIE department can choose one of the three options: coursework only, project, or thesis. Please see the Program Requirements tab on the top menu of this page for more information. MS students who want to pursue project or thesis options must find, within the first year of their study, a faculty member or a research advisor who will be willing to direct and supervise a mutually agreed research project or MS thesis. Moreover, students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete 8 semester hours of thesis. Students are strongly encouraged to complete their 8 semester hours of Thesis (IE 7990) or Thesis (ME 7990) over two consecutive semesters.

Students who complete the thesis option must make a presentation of their thesis before approval by the department. The MS thesis presentation shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate. If deemed appropriate by the research advisor, other faculty members may be invited to serve as thesis readers to provide technical opinions and judge the quality of the thesis and presentation.

## Change of Program/Concentration

Students enrolled in any of the MIE department programs or concentrations may change their current program or concentration no sooner than the beginning of their second full-time semester of study. In order for the program or concentration change request to be considered by the MIE Graduate Affairs Committee, the student must not be in the first semester of their current program, must have a 3.300 GPA, and have completed at least 8 semester hours of required coursework in their sought program at Northeastern.

## Graduate Certificate Options

Students enrolled in a graduate degree program in the College of Engineering are eligible to pursue an engineering graduate certificate in addition to or in combination with the MS degree. For more information please refer to Graduate Certificate Programs (p. 567).

## Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Core Requirements

Code	Title	Hours
IE 6300	Manufacturing Methods and Processes	4
IE 7270	Intelligent Manufacturing	4
ME 5240	Computer Aided Design and Manufacturing	4
ME 5640	Additive Manufacturing	4

### Restricted Elective Courses

Code	Title	Hours
Complete 4 semester hours from the following:		4
IE 6500	Human Performance	
ME 7374	Special Topics in Mechanical Engineering (Nano and Microscale Manufacturing)	

### Options

Complete one of the following options:

**COURSEWORK OPTION**

Code	Title	Hours
	Complete 12 semester hours from the Elective Course List below.	12

**PROJECT OPTION**

Code	Title	Hours
IE 7945	Master's Project	4
	Complete 8 semester hours from the Elective Course List below.	8

**THESIS OPTION**

Code	Title	Hours
IE 7990	Thesis	8
	Complete 4 semester hours from the Elective Course List below.	4

**Elective Course List**

Code	Title	Hours
<b>Industrial Engineering</b>		
IE 5617	Lean Concepts and Applications	
IE 6200	Engineering Probability and Statistics	
IE 7200	Supply Chain Engineering	
IE 7215	Simulation Analysis	
IE 7270	Intelligent Manufacturing	
IE 7275	Data Mining in Engineering	
IE 7280	Statistical Methods in Engineering	
IE 7285	Statistical Quality Control	
IE 7290	Reliability Analysis and Risk Assessment	
IE 7315	Human Factors Engineering	
IE 7374	Special Topics in Industrial Engineering	
IE 7615	Neural Networks and Deep Learning	
IE 7945	Master's Project	
IE 7978	Independent Study	
IE 7990	Thesis	
IE 7996	Thesis Continuation - Half-Time	
<b>Operations Research</b>		
OR 7230	Probabilistic Operation Research	
OR 7235	Inventory Theory	
OR 7240	Integer and Nonlinear Optimization	
OR 7245	Network Analysis and Advanced Optimization	
OR 7310	Logistics, Warehousing, and Scheduling	
<b>Materials Engineering</b>		
MATL 6270	Principles, Devices, and Materials for Energy Storage and Energy Harvesting	
MATL 6285	Structure, Properties, and Processing of Polymeric Materials	
MATL 7365	Properties and Processing of Electronic Materials	
<b>Mechanical Engineering</b>		
ME 5245	Mechatronic Systems	
ME 5250	Robot Mechanics and Control	
ME 5645	Environmental Issues in Manufacturing and Product Use	
ME 5650	Advanced Mechanics of Materials	
ME 5659	Control Systems Engineering	
ME 7247	Advanced Control Engineering	
<b>Engineering Management</b>		
EMGT 5220	Engineering Project Management	
EMGT 6225	Economic Decision Making	
EMGT 6305	Financial Management for Engineers	

### **Program Credit/GPA Requirements**

32 total semester hours required

Minimum 3.000 GPA required

- <sup>1</sup> A thesis is required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship. The thesis topic should cover one or more of the areas from statistics, mathematics, optimization, data mining, machine learning, database design, big data, visualization tools, or forecasting methods. The thesis should train students for research in data and operations analytics and/or prepare them for a doctoral program.

## Data Analytics Engineering, MS

For program contact information, please visit this website ([https://mie.northeastern.edu/academics/graduate-studies/ms-daae/#\\_ga=28171695117827619191584316293-4047061391578954920](https://mie.northeastern.edu/academics/graduate-studies/ms-daae/#_ga=28171695117827619191584316293-4047061391578954920)).

The Department of Mechanical and Industrial Engineering offers the Master of Science in Data Analytics Engineering to meet the current and projected workforce demands. This degree program offers students an opportunity to train for industry jobs or to acquire rigorous analytical skills and research experience to prepare for a doctoral program in health, security, and sustainability at Northeastern University. While the core courses for this program are offered by the College of Engineering, students can choose elective courses from diverse disciplines spread across various colleges at Northeastern. The MS degree in data analytics engineering is designed to train students with engineering, science, mathematics, and statistics backgrounds as advanced data analytics professionals and researchers who can transform large streams of data into understandable and actionable information for the purpose of making decisions. The key sectors that require analytics professionals include healthcare, smart manufacturing, supply chain and logistics, national security, defense, banking, finance, marketing, human resources, and sports.

The Master of Science in Data Analytics Engineering program helps students acquire knowledge and skills to:

- Discover opportunities to improve products, processes, systems, and enterprises through data analytics
- Apply optimization, statistical, and machine-learning methods to solve complex problems involving large data from multiple sources
- Process and explore data from a variety of sources, including Internet of Things, an integrated network of devices and sensors, customer touch points, processes, social media, and people
- Work with technology teams to design and build large and complex SQL and NoSQL databases
- Use tools and methods for data mining, Big Data processing, and data visualization to generate reports for analysis and decision making
- Create integrated views of data collected from multiple sources of an enterprise
- Understand and explain results of data analytics to decision makers
- Design and develop data analytics projects

This degree program seeks to prepare students for a comprehensive list of tasks including collecting, storing, processing, and analyzing data; reporting descriptive statistics and patterns; performing diagnostic, predictive, and prescriptive analytics; drawing conclusions and insights; making actionable recommendations; and designing and managing data analytics projects.

### General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, statistics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved coursework (exclusive of any preparatory courses) with a minimum grade-point average of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: coursework option, project option, and thesis option. Specific degree requirements for each of these tracks can be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

### Specific Degree Requirements

Core courses for the Master of Science in Data Analytics Engineering provide students with a foundation in algorithms and optimization, statistics, data and knowledge engineering, data mining, and visualization. These courses are designed to provide students with a strong understanding of probability and statistics, statistical learning, optimization methods, data mining, database design, and visualization. Students can select electives from a wide range of fields including business, finance, engineering, healthcare, manufacturing, and urban communities/cities. Elective courses provide students with the knowledge and understanding of descriptive, prescriptive, diagnostic, and predictive analytics as applied to a specific field of interest such as business, healthcare, manufacturing, and urban communities/cities. Alternatively, students can select their electives so that they can prepare for a doctoral program by taking advanced courses in mathematics, statistics, machine learning, natural language processing, and pattern recognition.

### Academic and Research Advisors

All nonthesis students are advised by the faculty advisor designated for their respective concentration or program. Students willing to pursue the thesis option must first find a research advisor within their first year of study. The research advisor will guide the students' thesis work, and thesis reader(s) may be assigned at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty in the MIE department. However, if the research advisor is outside the MIE department, before the thesis option can be approved, a faculty member with 51% or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Thesis option students are advised by the faculty advisor of their concentration before they select their research advisor(s). The research advisor and co-advisor must serve as thesis readers.

### Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the coursework requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their coursework needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study to the department before enrolling in second-semester courses. This form not only helps the students manage their coursework but it also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students pursuing study or research under the guidance of a faculty member can choose the project option by taking Master's Project (IE 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Students pursuing coursework option may petition the MIE Graduate Affairs Committee to substitute up to a 4-semester-hour Independent Study (IE 7978). An independent study must be approved by the instructor and the academic advisor. The petition must clearly state the instructor; the reason for taking the course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme. Students in other options (i.e., thesis or project) are not eligible to take independent study. When taking thesis or project options, the independent study course cannot be taken.

### **Options for MS Students (Coursework Only, Project, or Thesis)**

Students accepted into any of the MS programs in the MIE department can choose one of the three options: coursework only, project, or thesis. Please see the Program Requirements tab on the top menu of this page for more information. MS students who want to pursue project or thesis options must find, within the first year of their study, a faculty member or a research advisor who will be willing to direct and supervise a mutually agreed research project or MS thesis. Moreover, students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete 8 semester hours of thesis. Students are strongly encouraged to complete their 8 semester hours of either Thesis (ME 7990) or Thesis (IE 7990) over two consecutive semesters.

Students who complete the thesis option must make a presentation of their thesis before approval by the department. The MS thesis presentation shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate. If deemed appropriate by the research advisor, other faculty members may be invited to serve as thesis readers to provide technical opinions and judge the quality of the thesis and presentation.

### **Change of Program/Concentration**

Students enrolled in any of the MIE department programs or concentrations may change their current program or concentration no sooner than the beginning of their second full-time semester of study. In order for the program or concentration change request to be considered by the MIE Graduate Affairs Committee, the student must not be in the first semester of their current program, must have a 3.300 GPA, and have completed at least 8 semester hours of required coursework in their sought program at Northeastern.

### **Graduate Certificate Options**

Students enrolled in a graduate degree program in the College of Engineering are eligible to pursue an engineering graduate certificate in addition to or in combination with the MS degree. For more information please refer to Graduate Certificate Programs (p. 567). Please note that students pursuing the Master of Science in Data Analytics Engineering are not eligible for the Graduate Certificate in Data Analytics Engineering.

#### **GORDON INSTITUTE OF ENGINEERING LEADERSHIP**

##### **Master's Degree in Data Analytics Engineering with Graduate Certificate in Engineering Leadership**

Students may complete a Master of Science in Data Analytics Engineering in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32-semester-hour degree and certificate will require 16 semester hours of advisor-approved data analytics technical courses.

#### **ENGINEERING BUSINESS**

##### **Master's Degree in Data Analytics Engineering with Graduate Certificate in Engineering Business**

Students may complete a Master of Science in Data Analytics Engineering in addition to earning a Graduate Certificate in Engineering Business (p. 529). Students must apply and be admitted to the Galante Engineering Business Program in order to pursue this option. The integrated 32-semester-hour degree and certificate will require 16 semester hours of the data analytics engineering core courses and 16 semester hours from the outlined business-skill curriculum. The coursework, along with participation in cocurricular professional development elements, earn the Graduate Certificate in Engineering Business.

---

### **Experiential Option**

The Master of Science in Data Analytics Engineering—One-Year Experiential program is designed to train students with engineering, science, mathematics, and statistics backgrounds as advanced data analytics professionals who can transform large streams of data into understandable and actionable information for the purpose of making decisions. This degree program offers students an opportunity to acquire rigorous data analytical skills through coursework and experiential learning components. Students in the accelerated program gain close connections with industry leaders and earn their degree in one year through a combination of credit-bearing experiential coursework, independent study, industry projects, and co-op.

The one-year program is designed for students and professionals who have the flexibility to engage in full-time study and an intensive three-semester curriculum. The program trains students for data-driven jobs in a wider variety of industries including smart manufacturing, healthcare, banking, finance, retail, and high-tech.

Admissions to the *experiential* option have been suspended.

## Traditional Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Core Requirements

Code	Title	Hours
IE 6400	Foundations for Data Analytics Engineering	4
IE 6600	Computation and Visualization for Analytics	4
IE 6700	Data Management for Analytics	4
or DAMG 6210	Data Management and Database Design	
IE 7275	Data Mining in Engineering	4
OR 6205	Deterministic Operations Research	4
or CS 5800	Algorithms	

### Options

Complete one of the following options:

#### COURSEWORK OPTION

Code	Title	Hours
	Complete 12 semester hours from the elective course list below.	12

#### PROJECT OPTION

Code	Title	Hours
IE 7945	Master's Project	4
	Complete 8 semester hours from the elective course list below.	8

#### THESIS OPTION <sup>1</sup>

Code	Title	Hours
	Complete 8 semester hours of thesis:	
IE 7990	Thesis	8
	Complete 4 semester hours from the elective course list below.	4

### Elective Course List

Any course in the following list will serve as an elective course, provided the course is offered and the student satisfied prerequisites and program requirements. Students can take electives outside this list with a prior approval from the faculty advisor.

Code	Title	Hours
<b>Civil Engineering and Environmental Engineering</b>		
CIVE 7100	Time Series and Geospatial Data Sciences	
<b>Computer Science</b>		
CS 5002	Discrete Structures	
CS 5004	Object-Oriented Design	
CS 5006	Algorithms	
CS 5100	Foundations of Artificial Intelligence	
CS 5150	Game Artificial Intelligence	
CS 5200	Database Management Systems	
CS 5310	Computer Graphics	
CS 5330	Pattern Recognition and Computer Vision	
CS 5335	Robotic Science and Systems	
CS 5800	Algorithms	
CS 6120	Natural Language Processing	
CS 6140	Machine Learning	
CS 6200	Information Retrieval	

#### Data Science

DS 5010	Introduction to Programming for Data Science
DS 5110	Introduction to Data Management and Processing
DS 5220	Supervised Machine Learning and Learning Theory
DS 5230	Unsupervised Machine Learning and Data Mining
<b>Electrical and Computer Engineering</b>	
EECE 5644	Introduction to Machine Learning and Pattern Recognition
EECE 7397	Advanced Machine Learning
<b>Engineering Management</b>	
EMGT 5220	Engineering Project Management
EMGT 6225	Economic Decision Making
EMGT 6305	Financial Management for Engineers
<b>Health Informatics</b>	
HINF 5101	Introduction to Health Informatics and Health Information Systems
HINF 5102	Data Management in Healthcare
HINF 5200	Theoretical Foundations in Personal Health Informatics
HINF 5301	Evaluating Health Technologies
HINF 6202	Business of Healthcare Informatics
HINF 6240	Improving the Patient Experience through Informatics
HINF 6335	Management Issues in Healthcare Information Technology
HINF 6400	Introduction to Health Data Analytics
<b>Industrial Engineering</b>	
IE 5400	Healthcare Systems Modeling and Analysis
IE 6300	Manufacturing Methods and Processes
IE 6500	Human Performance
IE 7200	Supply Chain Engineering
IE 7215	Simulation Analysis
IE 7270	Intelligent Manufacturing
IE 7280	Statistical Methods in Engineering
IE 7285	Statistical Quality Control
IE 7290	Reliability Analysis and Risk Assessment
IE 7295	Applied Reinforcement Learning in Engineering
IE 7300	Statistical Learning for Engineering
IE 7350	Sociotechnical Systems: Computational Models for Design and Policy
IE 7500	Applied Natural Language Processing in Engineering
IE 7615	Neural Networks and Deep Learning
<b>Information Systems</b>

<b>Information Technology</b>	
ITC 6480	Amazon Web Service (AWS) Cloud Architecting
<b>Mathematics</b>	
MATH 5131	Introduction to Mathematical Methods and Modeling
MATH 7234	Optimization and Complexity
MATH 7243	Machine Learning and Statistical Learning Theory 1
MATH 7340	Statistics for Bioinformatics
MATH 7342	Mathematical Statistics
MATH 7343	Applied Statistics
MATH 7344	Regression, ANOVA, and Design
<b>Network Science</b>	
NETS 6116	Network Science 2
NETS 7341	Network Economics
NETS 7350	Bayesian and Network Statistics
<b>Operations Research</b>	
OR 6500	Metaheuristics and Applications
OR 7230	Probabilistic Operation Research

OR 7235	Inventory Theory
OR 7240	Integer and Nonlinear Optimization
OR 7245	Network Analysis and Advanced Optimization
OR 7270	Convex Optimization and Applications
OR 7310	Logistics, Warehousing, and Scheduling

**Physics**

PHYS 5116	Network Science 1
PHYS 7332	Network Science Data 2

**Public Policy and Urban Affairs**

PPUA 5261	Dynamic Modeling for Environmental Decision Making
PPUA 5262	Big Data for Cities
PPUA 5263	Geographic Information Systems for Urban and Regional Policy
PPUA 7237	Advanced Spatial Analysis of Urban Systems

**Program Credit/GPA Requirements**

32 total semester hours required

Minimum 3.000 GPA required

<sup>1</sup> A thesis is required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship. The thesis topic should cover one or more of the areas from statistics, mathematics, optimization, data mining, machine learning, database design, Big Data, visualization tools, or forecasting methods. The thesis should train students for research in data and operations analytics and/or prepare them for a doctoral program.

**Experiential Program Requirements**

Admissions to the Experiential MS Data Analytics Engineering program have been suspended.

Complete all courses and requirements listed below unless otherwise indicated.

**Core Requirements**

Code	Title	Hours
IE 5374	Special Topics in Industrial Engineering	4
IE 6600	Computation and Visualization for Analytics	4
IE 6700	Data Management for Analytics	4
or DAMG 6210	Data Management and Database Design	
IE 7275	Data Mining in Engineering	4
IE 7280	Statistical Methods in Engineering	4
OR 6205	Deterministic Operations Research	4

**Experiential Project Courses**

Code	Title	Hours
Complete the following project courses in consultation with your Academic Advisor. IE 7978 must be taken during the final term.		
IE 7945	Master's Project	4
IE 7978	Independent Study	4

**Co-op Experience**

Code	Title	Hours
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	

**Program Credit/GPA Requirements**

33 total semester hours required

Minimum 3.000 GPA required

## Human Factors, MS

Website (<https://mie.northeastern.edu/academics/graduate-studies/ms-hf/>)

This program addresses the growing need for engineering professionals trained in advanced human factors who can utilize human factors theories, procedures, and empirically derived knowledge into understandable and actionable information for use in the design and evaluation of a wide variety of products and systems. The key sectors demanding human factors professionals include transportation, healthcare, robotics, manufacturing, computer, consumer products, social, and organizational and military issues. The core courses of the Master of Science in Human Factors program are built on the foundations of human factors and ergonomics, probabilities and statistics, etc. Topics from these foundation areas are integrated to create human factors for engineering applications. Students can select their elective or breadth courses from a wide range of fields. The program seeks to prepare students for a comprehensive set of human-factors-related professional positions.

### General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved coursework (exclusive of any preparatory courses) with a minimum grade-point average (GPA) of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: coursework option, project option, and thesis option. Specific degree requirements for each of these tracks can be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

### Academic and Research Advisors

All nonthesis students are advised by the faculty advisor designated for their respective concentration or program. Students willing to pursue the thesis option must first find a research advisor within their first year of study. The research advisor will guide the students' thesis work, and thesis reader(s) may be assigned at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty. If the research advisor is outside the MIE department, before the thesis option can be approved, a faculty member with 51 percent or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Thesis option students are advised by the faculty advisor of their concentration before they select their research advisor(s). The research advisor and co-advisor must serve as thesis readers.

### Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the coursework requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their coursework needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study (PS) to the department before enrolling in second-semester courses. This form not only helps the students manage their coursework but it also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students may also petition to substitute a different course for a core course by demonstrating evidence of their having passed a similar approved IE or OR graduate course. In such situations, the students must first obtain approval from their academic advisor for the course(s) they are planning to substitute.

Students pursuing study or research under the guidance of a faculty member can choose project option by taking Master's Project (IE 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Students pursuing coursework option may petition the MIE Graduate Affairs Committee to substitute up to a 4-semester-hour Independent Study (IE 7978). An independent study must be approved by the academic advisor. The petition must clearly state the instructor; the reason for taking the course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme. Students in other options (i.e., thesis or project) are not eligible to take independent study. When taking thesis or project options, the independent study course cannot be taken.

### Options for MS Students (coursework only, project, or thesis)

Students accepted into any of the MS programs in the MIE department can choose one of the three options: coursework only, project, or thesis. Please see the Program Requirements tab on the top menu of this page for more information. MS students who want to pursue project or thesis options must find, within the first year of their study, a faculty member or a research advisor who will be willing to direct and supervise a mutually agreed research project or MS thesis. Moreover, students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete 8 semester hours of thesis. Students are strongly encouraged to complete their 8 semester hours of Thesis (IE 7990) over two consecutive semesters.

Students who complete the thesis option must make a presentation of their thesis before approval by the department. The MS thesis presentation shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate. If deemed appropriate by

the research advisor, other faculty members may be invited to serve as thesis readers to provide technical opinions and judge the quality of the thesis and presentation.

### Change of Program/Concentration

Students enrolled in any of the MIE department programs or concentrations may change their current program or concentration no sooner than the beginning of their second full-time semester of study. In order for the program or concentration change request to be considered by the MIE Graduate Affairs Committee, the student must not be in the first semester of their current program, must have a 3.300 GPA, and have completed at least 8 semester hours of required coursework in their sought program at Northeastern.

### Graduate Certificate Options

Students enrolled in a graduate degree program in the College of Engineering have the opportunity to pursue an engineering graduate certificate in addition to or in combination with the MS degree. For more information please refer to Graduate Certificate Programs (p. 567).

#### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

##### Master's Degree in Human Factors with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Human Factors in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32-semester-hour degree and certificate will require 16 hours of advisor-approved human factors technical courses.

#### ENGINEERING BUSINESS

##### Master's Degree in Human Factors with Graduate Certificate in Engineering Business

Students may complete a Master of Science in Human Factors in addition to earning a Graduate Certificate in Engineering Business (p. 529). Students must apply and be admitted to the Galante Engineering Business Program (<https://galante.sites.northeastern.edu/>) in order to pursue this option. The integrated 32-semester-hour degree and certificate will require 16 semester hours of the human factors core courses and 16 semester hours from the outlined business-skill curriculum.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
IE 6200	Engineering Probability and Statistics	4
IE 6500	Human Performance	4
IE 7280	Statistical Methods in Engineering	4
IE 7315	Human Factors Engineering	4

#### Options

Complete one of the following options:

##### COURSEWORK OPTION

Code	Title	Hours
	Complete 16 semester hours from the course list below. (p. 491)	16

##### PROJECT OPTION

Code	Title	Hours
IE 7945	Master's Project	4
	Complete 12 semester hours from the course list below. (p. 491)	12

##### THESIS OPTION

Code	Title	Hours
IE 7990	Thesis	8
	Complete 8 semester hours from the course list below. (p. 491)	8

#### Course List

Code	Title	Hours
<b>College of Engineering</b>		
CIVE 7388	Special Topics in Civil Engineering (Urban Informatics and Processing)	
EMGT 5300	Engineering/Organizational Psychology	

EMGT 6305	Financial Management for Engineers
EMGT 6600	Engineering Team Performance
GE 5010	Customer-Driven Technical Innovation for Engineers
GE 5020	Engineering Product Design Methodology
GE 5030	Iterative Product Prototyping for Engineers
GE 5100	Product Development for Engineers

PSYC 5181	Quantitative Methods 2
PSYC 7300	Advanced Quantitative Analysis
PSYC 7301	Research Methodologies Psychology
<b>Bouvé College of Health Sciences</b>	
EXSC 5210	Physical Activity and Exercise: Prescription, Measurement, and Testing
EXSC 5220	Advanced Exercise Physiology
<b>Khoury College of Computer Sciences</b>	
CS 5340	Computer/Human Interaction
CS 6350	Empirical Research Methods
<b>College of Arts, Media and Design</b>	
ARTG 5150	Information Visualization Principles and Practices
ARTG 5310	Visual Cognition
ARTG 5330	Visualization Technologies 1: Fundamentals
ARTG 5600	Experience Design Studio 1: Principles
ARTG 5610	Design Systems
ARTG 5640	Prototyping for Experience Design
<i>Design Research Methods</i>	
ARTG 6310	Design for Behavior and Experience
GSND 6240	Exploratory Concept Design
GSND 6250	Spatial and Temporal Design
GSND 6330	Player Experience
GSND 6340	Biometrics for Design
<b>D'Amore-McKim School of Business</b>	
ENTR 6219	Financing Ventures from Early Stage to Exit

### Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

## Industrial Engineering, MSIE

Website ([https://mie.northeastern.edu/academics/graduate-studies/ms-inde/#\\_ga=210991584517827619191584316293-4047061391578954920](https://mie.northeastern.edu/academics/graduate-studies/ms-inde/#_ga=210991584517827619191584316293-4047061391578954920))

The Department of Mechanical and Industrial Engineering (MIE) offers comprehensive research and educational programs for students pursuing the Master of Science (MS) in Industrial Engineering. Industrial engineering (IE) applies mathematical modeling and analytical tools to make better decisions for designing and managing efficient and effective systems. IE is applied in many areas, including healthcare systems, supply chains, logistics and transportation engineering, manufacturing, sustainability, resilient systems, energy systems, and human-in-the-loop systems. We partner with organizations ranging from startups to well-established corporations, to government and nongovernment organizations. For example, our supply chain resilience research is trying to understand and mitigate persistent drug shortages in the United States. Our research in healthcare systems engineering uses methods from lean six-sigma tools to advanced mathematical models to improve system and product reliability and optimize healthcare process quality, delays, cost, efficiency, and effectiveness—national priorities. Recent healthcare applications include improvements in scheduling, readmissions, cost reductions, cancer care, and health services planning. We use stochastic and simulation modeling to study environmental issues related to green manufacturing, product recovery, and end-of-life management. We use data analytics for designing prognostics and preventive strategies for manufacturing operations. Our research and teaching together are designed to develop IE practitioners who can work, innovate, and excel in a variety of businesses. These extensive programs and course work allow for the selection of a degree that meets a wide variety of personal and professional goals.

### General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved course work (exclusive of any preparatory courses) with a minimum grade-point average (GPA) of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: course work option, project option, and thesis option. Specific degree requirements for each of these tracks can be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

### Academic and Research Advisors

All nonthesis students are advised by the faculty advisor designated for their respective concentration or program. Students willing to pursue the thesis option must first find a research advisor within their first year of study. The research advisor will guide the students' thesis work, and thesis reader(s) may be assigned at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty. If the research advisor is outside the MIE department, before the thesis option can be approved, a faculty member with 51 percent or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Thesis option students are advised by the faculty advisor of their concentration before they select their research advisor(s). The research advisor and co-advisor must serve as thesis readers.

### Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the course work requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their course work needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study (PS) to the department before enrolling in second-semester courses. This form not only helps the students manage their course work but it also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students may also petition to waive a core course by demonstrating evidence of their having passed a similar approved IE or OR graduate course. In such situations, the students must first obtain approval from their academic advisor for the course(s) they are planning to substitute.

Students pursuing study or research under the guidance of a faculty member can choose project option by taking Master's Project (IE 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Students pursuing course work option may petition the MIE Graduate Affairs Committee to substitute up to a 4-semester-hour Independent Study (IE 7978). An independent study must be approved by the academic advisor. The petition must clearly state the instructor; the reason for taking the course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme. Students in other options (i.e., thesis or project) are not eligible to take independent study. When taking thesis or project options, the independent study course cannot be taken.

### Options for MS Students (course work only, project, or thesis)

Students accepted into any of the MS programs in the MIE department can choose one of the three options: course work only, project, or thesis. Please see the Program Requirements tab on the top menu of this page for more information. MS students who want to pursue project or thesis options must find, within the first year of their study, a faculty member or a research advisor who will be willing to direct and supervise a mutually agreed research project or MS thesis. Moreover, students who receive financial support from the university in the form of a research,

teaching, or tuition assistantship must complete 8 semester hours of thesis. Students are strongly encouraged to complete their 8 semester hours of Thesis (IE 7990) over two consecutive semesters.

Students who complete the thesis option must make a presentation of their thesis before approval by the department. The MS thesis presentation shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate. If deemed appropriate by the research advisor, other faculty members may be invited to serve as thesis readers to provide technical opinions and judge the quality of the thesis and presentation.

### Change of Program/Concentration

Students enrolled in any of the MIE department programs or concentrations may change their current program or concentration no sooner than the beginning of their second full-time semester of study. In order for the program or concentration change request to be considered by the MIE Graduate Affairs Committee, the student must not be in the first semester of their current program, must have a 3.3 GPA, and have completed at least 8 semester hours of required course work in their sought program at Northeastern.

### Graduate Certificate Options

Students enrolled in a graduate degree program in the College of Engineering have the opportunity to pursue an engineering graduate certificate in addition to or in combination with the MS degree. For more information please refer to Graduate Certificate Programs (p. 567).

#### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

##### Master's Degree in Industrial Engineering with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Industrial Engineering in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32-semester-hour degree and certificate will require 16 hours of advisor-approved industrial engineering technical courses.

#### ENGINEERING BUSINESS

##### Master's Degree in Industrial Engineering with Graduate Certificate in Engineering Business

Students may complete a Master of Science in Industrial Engineering in addition to earning a Graduate Certificate in Engineering Business. Students must apply and be admitted to the Galante Engineering Business Program in order to pursue this option. The program requires the applicant to have earned or be in a program to earn a Bachelor of Science in Engineering from Northeastern University. The integrated 32-semester-hour degree and certificate will require 16 semester hours of the industrial engineering core courses and 16 semester hours from the outlined business-skill curriculum. The course work, along with participation in cocurricular professional development elements, earn the Graduate Certificate in Engineering Business (p. 529).

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
IE 6200	Engineering Probability and Statistics	4
OR 6205	Deterministic Operations Research	4
Complete 8 semester hours from the following:		8
IE 5400	Healthcare Systems Modeling and Analysis	
IE 7200	Supply Chain Engineering	
IE 7215	Simulation Analysis	
IE 7275	Data Mining in Engineering	
IE 7315	Human Factors Engineering	

#### Options

Complete one of the following options:

##### COURSE WORK OPTION

Code	Title	Hours
Complete 16 semester hours from the course list below.		16

##### PROJECT OPTION

Code	Title	Hours
IE 7945	Master's Project	4
Complete 12 semester hours from the course list below.		12

**THESIS OPTION**

Code	Title	Hours
IE 7990	Thesis (required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship)	8
Complete 8 semester hours from the course list below.		8

Minimum 3.000 GPA required

## Engineering Management, MSEM

The Master of Science in Engineering Management ([https://mie.northeastern.edu/academics/graduate-studies/ms-engm/#\\_ga=28644578417827619191584316293-4047061391578954920](https://mie.northeastern.edu/academics/graduate-studies/ms-engm/#_ga=28644578417827619191584316293-4047061391578954920)) offers graduate students an opportunity to develop both technical expertise and business competence that is in high demand among prospective technology-based employers. Industry leaders are seeking qualified and talented individuals who are not only able to guide research and design teams but also able to direct and supervise development and production processes. The combination of technical proficiency and business skills fostered in the engineering management program is designed to provide a competitive edge for graduates seeking a wide range of positions in technology-based product or service industries, as well as in comparable local, state, and federal agencies and programs.

The program was designed by experienced high-level managers and academic leaders as an option for engineers and scientists to broaden their skill sets to include management tools and techniques that are applicable to technology-based industries. Graduates of the engineering management program work as project managers or leaders of teams in technology-based industries. Upon completion of the program, students find that their acquired skills are applicable to a wide range of industries, primarily those focused upon the development of technical products and the management of technical projects.

Graduates may assist companies in bringing a product from an idea through its development phases to its introduction to the marketplace. They may also be involved in forming and managing teams for assessing cost-effectiveness, formulating strategies to improve production, or analyzing a company's supply chain. Most of these projects cannot be successfully completed without the skills of those possessing a background in management decision-making and engineering expertise; therefore, the engineering management graduate is often a technical liaison to all levels of management. As a result, many of the assignments held by engineering management graduates have actually proven to be a gateway to upper-level management positions.

The current program of study can be taken on a part-time or full-time basis on-ground or online. There are four core courses required of all students, which have been formulated to satisfy the foundation requirements of economic decision making, decision-making mathematics, and project management. In addition to these required courses, the curriculum consists of electives that allow students to choose either a broad-based program of study or one centered on a particular concentration. Some students may elect to refresh or enhance their technical skills in engineering-based subjects such as information systems, computer systems engineering, or graduate courses from the traditional engineering disciplines. Other students may prefer to broaden their knowledge base by selecting coursework in management subjects such as engineering organizational psychology, financial management, logistics and warehousing, supply chain engineering, or lean systems design. Additionally, students may also elect to complete the Gordon Engineering Leadership Program as part of their engineering management degree.

One recent graduate has observed that "Northeastern's MSEM is like an MBA for engineers, with high-quality, dedicated professors who are proficient in their field yet are able to convey information in a way that's easy to understand." This graduate also noted, "My courses in project management have been key to understanding the subtleties that affect Project Managers while technical courses provide a strong background in fundamentals as well as specialty topics. My experience with co-op has been outstanding and has truly helped me further my career."

### General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved coursework (exclusive of any preparatory courses) with a minimum grade-point average of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: coursework option, project option, and thesis option. Specific degree requirements for each of these tracks can be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

### Academic and Research Advisors

All nonthesis students are advised by the faculty advisor designated for their respective concentration or program. Students willing to pursue the thesis option must first find a research advisor within their first year of study. The research advisor will guide the students' thesis work, and thesis reader(s) may be assigned at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty. If the research advisor is outside the MIE department, before the thesis option can be approved, a faculty member with 51% or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Thesis option students are advised by the faculty advisor of their concentration before they select their research advisor(s). The research advisor and co-advisor must serve as thesis readers.

### Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the coursework requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their coursework needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study to the department before enrolling in second-semester courses. This form not only helps the students manage their coursework but it also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students pursuing study or research under the guidance of a faculty member can choose project option by taking Master's Project (EMGT 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Students pursuing coursework option may petition the MIE Graduate Affairs Committee to substitute up to a 4-semester-hour Independent Study (EMGT 7978). An independent study must be approved by the academic advisor. The petition must clearly state the instructor; the reason for taking the course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme. Students in other options (i.e., thesis or project) are not eligible to take independent study. When taking thesis or project options, the independent study course cannot be taken.

### **Options for MS Students (Coursework Only, Project, or Thesis)**

Students accepted into any of the MS programs in the MIE department can choose one of the three options: coursework only, project, or thesis. Please see the Program Requirements tab on the top menu of this page for more information. MS students who want to pursue project or thesis options must find, within the first year of their study, a faculty member or a research advisor who will be willing to direct and supervise a mutually agreed research project or MS thesis. Moreover, students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete 8 semester hours of thesis. Students are strongly encouraged to complete their 8 semester hours of Thesis (EMGT 7990) over two consecutive semesters.

Students who complete the thesis option must make a presentation of their thesis before approval by the department. The MS thesis presentation shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate. If deemed appropriate by the research advisor, other faculty members may be invited to serve as thesis readers to provide technical opinions and judge the quality of the thesis and presentation.

### **Change of Program/Concentration**

Students enrolled in any of the MIE department programs or concentrations may change their current program or concentration no sooner than the beginning of their second full-time semester of study. In order for the program or concentration change request to be considered by the MIE Graduate Affairs Committee, the student must not be in the first semester of their current program, must have a 3.300 GPA, and have completed at least 8 semester hours of required coursework in their sought program at Northeastern.

### **Graduate Certificate Options**

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

#### **GORDON INSTITUTE OF ENGINEERING LEADERSHIP**

##### **Master's Degree in Engineering Management with Graduate Certificate in Engineering Leadership**

Students may complete a Master of Science in Engineering Management in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32-semester-hour degree and certificate will require 16 hours of advisor-approved engineering management technical courses.

#### **ENGINEERING BUSINESS**

##### **Master's Degree in Engineering Management with Graduate Certificate in Engineering Business**

Students may complete a Master of Science in Engineering Management in addition to earning a Graduate Certificate in Engineering Business. Students must apply and be admitted to the Galante Engineering Business Program in order to pursue this option. The program requires the applicant to have earned or be in a program to earn a Bachelor of Science in Engineering from Northeastern University. The integrated 32-semester-hour degree and certificate will require 16 semester hours of the engineering management core courses and 16 semester hours from the outlined business-skill curriculum. The coursework, along with participation in cocurricular professional development elements, earn the Graduate Certificate in Engineering Business (p. 529).

---

### **Experiential Option**

The Master of Science in Engineering Management—One-Year Experiential program provides an accelerated, hands-on curriculum for students that want to develop the technical expertise, leadership insights, and business competence that is in high demand with technology-based employers and related government programs. It can be viewed as a suitable alternative to an MBA for engineers because in addition to providing a strong leadership and management education, it places a stronger focus on quantitative and analytical skills. Students will learn the art and science of planning, organizing, allocating resources, systems thinking, and directing activities with technological components. The interdisciplinary program bridges the gaps between engineering, technology, and business.

Students in the accelerated program gain close connections with industry leaders and earn their degree in one year through a combination of credit-bearing experiential coursework, independent study, industry projects, and co-op.

The one-year program is designed for students and professionals who have the flexibility to engage in full-time study and an intensive three-semester curriculum. **Admissions to the Experiential MSEM Engineering Management program have been suspended.**

**Admissions to the *experiential* option have been suspended.**

## Traditional Program Requirements

### Core Requirements

Complete all courses and requirements listed below unless otherwise indicated. Students may not register for more than 9 semester hours in the fall, spring, and summer terms.

Code	Title	Hours
<b>Required Courses</b>		
EMGT 5220	Engineering Project Management	4
EMGT 6225	Economic Decision Making	4
IE 6200	Engineering Probability and Statistics	4
OR 6205	Deterministic Operations Research	4

### Options

Complete one of the following options:

#### COURSEWORK OPTION

Code	Title	Hours
	Complete 16 semester hours from the course list below. (p. 499)	16

#### PROJECT OPTION

Code	Title	Hours
EMGT 7945	Master's Project	4
	Complete 12 semester hours from the course list below. (p. 499)	12

#### THESIS OPTION

Code	Title	Hours
EMGT 7990	Thesis	8
	Complete 8 semester hours from the course list below. (p. 499)	8

#### ONLINE OPTION

Code	Title	Hours
	Complete 16 semester hours from the course list below. (p. 499)	16
	Courses offered online can be found on the online course list below. (p. 501)

OR 6500	Metaheuristics and Applications
OR 6962	Elective
OR 7230	Probabilistic Operation Research
OR 7240	Integer and Nonlinear Optimization
OR 7245	Network Analysis and Advanced Optimization
OR 7270	Convex Optimization and Applications
OR 7310	Logistics, Warehousing, and Scheduling
OR 7374	Special Topics in Operations Research
TELE 5330	Data Networking

or any EMGT, IE or OR courses

#### Electives Outside the College of Engineering

A maximum of 9 semester hours may be taken from the following toward the elective requirement:

DA 5020	Collecting, Storing, and Retrieving Data
ENTR 6212	Business Planning for New Ventures
ENTR 6218	Business Model Design and Innovation
ENTR 6219	Financing Ventures from Early Stage to Exit
ENTR 6240	Emerging and Disruptive Technologies
ENTR 6241	Entrepreneurial Marketing and Selling
ENTR 6250	Lean Design and Development
ENTR 6300	Managing a Technology-Based Business
ENTR 6340	The Technical Entrepreneur as Leader
INNO 6200	Enterprise Growth and Innovation
SCHM 6211	Logistics and Transportation Management
SCHM 6213	Global Supply Chain Strategy
SCHM 6214	Sourcing and Procurement
SCHM 6215	Supply Chain Analytics
SCHM 6221	Sustainability and Supply Chain Management
SCHM 6223	Managing Healthcare Supply Chain Operations
SCHM 6224	Demand Planning and Forecasting

## Online Course List

Code	Title	Hours
EMGT 5300	Engineering/Organizational Psychology	
EMGT 6305	Financial Management for Engineers	
ENSY 5000	Fundamentals of Energy System Integration	
IE 5640	Data Mining for Engineering Applications	
IE 6300	Manufacturing Methods and Processes	
IE 7200	Supply Chain Engineering	
IE 7215	Simulation Analysis	
IE 7280	Statistical Methods in Engineering	
IE 7285	Statistical Quality Control	
IE 7290	Reliability Analysis and Risk Assessment	
IE 7315	Human Factors Engineering	
INFO 6215	Business Analysis and Information Engineering	
ME 5645	Environmental Issues in Manufacturing and Product Use	
ME 6200	Mathematical Methods for Mechanical Engineers 1	
OR 7230	Probabilistic Operation Research	
OR 7240	Integer and Nonlinear Optimization	
OR 7310	Logistics, Warehousing, and Scheduling	

## Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

## Experiential Program Requirements

Admissions to the Experiential MSEM Engineering Management program have been suspended.

Complete all courses and requirements listed below unless otherwise indicated.

## Core Requirements

Code	Title	Hours
<b>Required Courses</b>		
EMGT 5220	Engineering Project Management	4
EMGT 6225	Economic Decision Making	4
IE 6200	Engineering Probability and Statistics	4
OR 6205	Deterministic Operations Research	4

## Experiential Project Course

Code	Title	Hours
Complete the following project course in consultation with your Academic Advisor. EMGT 7978 must be taken during the final term.		
EMGT 7978	Independent Study	4

## Co-op Experience

Code	Title	Hours
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	

## Electives

Code	Title	Hours
Complete 16 semester hours from the course list below.		
CSYE 7280	User Experience Design and Testing	
EMGT 5300	Engineering/Organizational Psychology	
EMGT 6305	Financial Management for Engineers	
EMGT 7978	Independent Study	
ENSY 5000	Fundamentals of Energy System Integration	

GE 5010	Customer-Driven Technical Innovation for Engineers
GE 5020	Engineering Product Design Methodology
GE 5030	Iterative Product Prototyping for Engineers
GE 5100	Product Development for Engineers
IE 5137	Computational Modeling in Industrial Engineering
IE 5374	Special Topics in Industrial Engineering
IE 5390	Structured Data Analytics for Industrial Engineering
IE 5400	Healthcare Systems Modeling and Analysis
IE 5500	Systems Engineering in Public Programs
IE 5617	Lean Concepts and Applications
IE 5618	Recitation for IE 5617
IE 5640	Data Mining for Engineering Applications
IE 6300	Manufacturing Methods and Processes
IE 6500	Human Performance
IE 6600	Computation and Visualization for Analytics
IE 6962	Elective

Minimum 3.000 GPA required

## Energy Systems, MSEneS

The Master of Science in Energy Systems (<https://mie.northeastern.edu/academics/graduate-studies/ms-enes/>) (MSEneS) integrates engineering, business, and policy into a high-level signature, multidisciplinary graduate program. Energy systems students have an opportunity to learn how to leverage business skills and public policy knowledge to accomplish their engineering goals. This program is ideal for the engineer or technical business major who is interested in pursuing an industrial or public-planning-based career.

The program's mission is to educate students in current and future energy systems technologies, to integrate energy-related technologies with the economics and financial considerations required to implement them, and to develop leadership and decision-making skills to implement energy systems in either the private or public sectors of the global market. The program will expose students to a combination of academic and corporate experience in energy systems.

The program curriculum features a multidisciplinary range of electives from five different academic colleges at Northeastern. The curriculum is flexibly designed with a set of four core courses in engineering knowledge and finance in addition to four electives. The core courses help relate these electives back to energy-related engineering concepts, including power strategies, energy renewal, sustainable energy solutions, energy storage, energy conversion, and energy efficiency. By integrating concepts across these disciplines, our students learn that implementing energy solutions requires an economic solution as well as an engineering one.

Students are exposed to business educators and practicing professionals and have the opportunity to participate in a six-month co-op experience. Practicing professionals with experience in the industry who have successfully implemented energy systems or devices and policies are actively involved in the program as adjunct professors and invited speakers. Through this curriculum and interaction with practitioners, students should be prepared to effectively integrate energy system development over a broad spectrum of technologies with the financial requirements to successfully implement them and to compete in the global energy market.

Successful graduates of the program will be involved in the decision making or policy planning that will deliver minimally polluting, energy-efficient systems to the global market. They will have the base training necessary to lead efforts within companies to plan and implement new energy-generation investments, realize energy-efficiency improvements specifically at the system level, and participate in energy and environmental markets such as cap-and-trade systems.

### General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved course work (exclusive of any preparatory courses) with a minimum grade-point average (GPA) of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: course work option, project option, and thesis option. Specific degree requirements for each of these tracks can be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

### Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the course work requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their course work needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study (PS) to the department before enrolling in second-semester courses. This form not only helps the students manage their course work but it also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students pursuing study or research under the guidance of a faculty member can choose project option by taking Master's Project (ENSY 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Students pursuing course work option may petition the MIE Graduate Affairs Committee to substitute up to a 4-semester-hour Independent Study (ENSY 7978). An independent study must be approved by the instructor and the academic advisor. The petition must clearly state the instructor; the reason for taking the course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme. Students in other options (i.e., thesis or project) are not eligible to take independent study. When taking thesis or project options, the independent study course cannot be taken.

### Change of Program/Concentration

Students enrolled in any of the MIE department programs or concentrations may change their current program or concentration no sooner than the beginning of their second full-time semester of study. In order for the program or concentration change request to be considered by the MIE Graduate Affairs Committee, the student must not be in the first semester of their current program, must have a 3.3 GPA, and have completed at least 8 semester hours of required course work in their sought program at Northeastern.

## Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

#### Master's Degree in Energy Systems with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Energy Systems in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require 20 hours of advisor-approved energy systems technical courses.

## Program Requirements

### Core Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Code	Title	Hours
<b>Required Courses</b>		
EMGT 6225	Economic Decision Making	4
EMGT 6305 or FINA 6309	Financial Management for Engineers Foundations of Accounting and Finance	4
ENSY 5000	Fundamentals of Energy System Integration	4
ME 6200	Mathematical Methods for Mechanical Engineers 1	4

### Restricted Electives

Code	Title	Hours
Complete a minimum of 8 semester hours from the following:		
CHME 5621	Electrochemical Engineering	8
ENSY 5100	Hydropower	
ENSY 5200	Energy Storage Systems	
ENSY 5300	Electrochemical Energy Storage	
ENSY 5400	Power Plant Design and Analysis	
ENSY 5500	Smart Grid	
ENSY 5585	Wind Energy Systems	
MATL 6270	Principles, Devices, and Materials for Energy Storage and Energy Harvesting	
ME 5685	Solar Thermal Engineering	

### Other Electives

Code	Title	Hours
An additional 8 semester hours can either be taken from the list above or from the following list below or by approval of program director:		
CHEM 5614	Electroanalytical Chemistry	8
CHEM 5651	Materials Chemistry of Renewable Energy	
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
EECE 5680	Electric Drives	
EECE 5682	Power Systems Analysis 1	
EECE 5684	Power Electronics	
EMGT 5220	Engineering Project Management	
ENSY 7374	Special Topics in Energy Systems	
ENSY 7945	Master's Project	
ENSY 7978	Independent Study	
ME 5690	Gas Turbine Combustion	
ME 7270	General Thermodynamics	
ME 7300	Combustion and Air Pollution	
ME 7305	Fundamentals of Combustion	
PPUA 5264	Energy Democracy and Climate Resilience: Technology, Policy, and Social Change	

### **Online Course List**

All required courses and many electives are offered as online courses.

### **Program Credit/GPA Requirements**

32 total semester hours required

Minimum 3.000 GPA required

## Energy Systems, MSeNeS—Academic Link Program

For program contact information, please visit the College of Engineering website (<https://mie.northeastern.edu/academics/graduate-studies/mse-nes/>).

Designing and implementing optimal methods to produce and utilize energy is one of the most pressing global issues today. Finding ways to implement these solutions that are sustainable and marketable is key. The energy systems Academic Link (AL) program is meant to provide engineering students who have not had any exposure to thermal sciences with the foundation skills necessary to create and implement energy solutions. Students begin the program by taking two core courses that cover topics across thermal sciences and math along with the general energy systems curriculum.

The AL core courses introduce students to the fundamentals that are necessary to be successful in the energy system program. AL courses are integrated with our multidisciplinary energy system curriculum that integrates engineering, business, and policy. Our curriculum is flexibly designed with a set of core courses in engineering and finance complemented by a range of electives across five different academic colleges. Our core and elective courses are designed to help to prepare students to lead the efforts to implement energy systems solutions that have a long-term positive effect on businesses and communities.

### Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

### Program Requirements

#### General Requirements

A minimum of 40 semester hours must be earned toward completion of the degree. A minimum grade-point average of 3.000 is required over all courses applied toward the degree.

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
Complete 20 semester hours from the following:		20
EMGT 6225	Economic Decision Making	
ENSY 5000	Fundamentals of Energy System Integration	
ENSY 5050	Fundamentals of Thermal Science 1	
ENSY 5060	Fundamentals of Thermal Science 2	
ME 6200	Mathematical Methods for Mechanical Engineers 1	
Complete 4 semester hours from the following:		4
EMGT 6305	Financial Management for Engineers	
FINA 6309	Foundations of Accounting and Finance	

#### Restricted Electives List

Code	Title	Hours
Complete a minimum of 8 semester hours from the following:		8
CHME 5621	Electrochemical Engineering	
ENSY 5100	Hydropower	
ENSY 5200	Energy Storage Systems	
ENSY 5300	Electrochemical Energy Storage	
ENSY 5400	Power Plant Design and Analysis	
ENSY 5500	Smart Grid	
ENSY 5585	Wind Energy Systems	
MATL 6270	Principles, Devices, and Materials for Energy Storage and Energy Harvesting	
ME 5685	Solar Thermal Engineering	

#### Other Electives List

Code	Title	Hours
An additional 8 semester hours can either be taken from the list above or from the list below or by approval of the program director:		8
CHEM 5614	Electroanalytical Chemistry	

CHEM 5651	Materials Chemistry of Renewable Energy
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage
EECE 5680	Electric Drives
EECE 5682	Power Systems Analysis 1
EECE 5684	Power Electronics
EMGT 5220	Engineering Project Management
ENSY 7374	Special Topics in Energy Systems
ENSY 7440	Energy Systems Engineering Leadership Challenge Project 1
ENSY 7442	Energy Systems Engineering Leadership Challenge Project 2
ENSY 7945	Master's Project
ENSY 7978	Independent Study
ME 5690	Gas Turbine Combustion
ME 7270	General Thermodynamics
ME 7300	Combustion and Air Pollution
ME 7305	Fundamentals of Combustion
PPUA 5264	Energy Democracy and Climate Resilience: Technology, Policy, and Social Change
SBSY 5200	Sustainable Engineering Systems for Buildings
or any other ENSY course

## Mechanical Engineering with Concentration in General Mechanical Engineering, MSME

### Overview

While pursuing a Master of Science (MS) in Mechanical Engineering (<https://mie.northeastern.edu/academics/graduate-studies/ms-mece/>), students may choose the general mechanical engineering concentration.

### GENERAL DEGREE REQUIREMENTS

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved coursework (exclusive of any preparatory courses) with a minimum grade-point average (GPA) of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: coursework option, project option, and thesis option. Specific degree requirements for each of these tracks can be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

### ACADEMIC AND RESEARCH ADVISORS

All nonthesis students are advised by the faculty advisor designated for their respective concentration or program. Students willing to pursue the thesis option must first find a research advisor within their first year of study. The research advisor will guide the students' thesis work, and thesis reader(s) may be assigned at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty. If the research advisor is outside the MIE department, before the thesis option can be approved, a faculty member with 51 percent or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Thesis option students are advised by the faculty advisor of their concentration before they select their research advisor(s). The research advisor and co-advisor must serve as thesis readers.

### PLAN OF STUDY AND COURSE SELECTION

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the coursework requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their coursework needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study (PS) to the department before enrolling in second-semester courses. This form not only helps the students manage their coursework but it also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students pursuing study or research under the guidance of a faculty member can choose project option by taking Master's Project (ME 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Students pursuing coursework option may petition the MIE Graduate Affairs Committee to substitute up to a 4-semester-hour (ME 7978). An independent study must be approved by the academic advisor. The petition must clearly state the instructor; the reason for taking the course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme. When taking thesis or project options, the independent study course cannot be taken.

### OPTIONS FOR MS STUDENTS (COURSEWORK ONLY, PROJECT, OR THESIS)

Students accepted into any of the MS programs in the MIE department can choose one of the three options: coursework only, project, or thesis. Please see the Program Requirements tab on the top menu of this page for more information. MS students who want to pursue project or thesis options must find, within the first year of their study, a faculty member or a research advisor who will be willing to direct and supervise a mutually agreed research project or MS thesis. Moreover, students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete 8 semester hours of thesis. Students are strongly encouraged to complete their 8 semester hours of Thesis (ME 7990) over two consecutive semesters.

Students who complete the thesis option must make a presentation of their thesis before approval by the department. The MS thesis presentation shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate. If deemed appropriate by the research advisor, other faculty members may be invited to serve as thesis readers to provide technical opinions and judge the quality of the thesis and presentation.

### CHANGE OF PROGRAM/CONCENTRATION

Students enrolled in any of the MIE department programs or concentrations may change their current program or concentration no sooner than the beginning of their second full-time semester of study. In order for the program or concentration change request to be considered by the MIE Graduate Affairs Committee, the student must not be in the first semester of their current program, must have a 3.300 GPA, and have completed at least 8 semester hours of required coursework in their sought program at Northeastern.

### GRADUATE CERTIFICATE OPTIONS

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

**GORDON INSTITUTE OF ENGINEERING LEADERSHIP****Master's Degree in Mechanical Engineering with Concentration in General Mechanical Engineering with Graduate Certificate in Engineering Leadership**

Students may complete a Master of Science in Mechanical Engineering with Concentration in General Mechanical Engineering in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32-semester-hour degree and certificate will require 16 hours of advisor-approved mechanical engineering technical courses.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Core Requirements**

Code	Title	Hours
<b>Mathematics Competency</b>		
ME 6200	Mathematical Methods for Mechanical Engineers 1	4
<b>Thermofluids Competency</b>		
Complete 4 semester hours from the following:		4
ME 5685	Solar Thermal Engineering	
ME 5690	Gas Turbine Combustion	
ME 5695	Aerodynamics	
ME 7295	Multiscale Flow and Transport Phenomena	
ME 7300	Combustion and Air Pollution	
ME 7305	Fundamentals of Combustion	
ME 7310	Computational Fluid Dynamics with Heat Transfer	
<b>Mechanics/Mechatronics Combined Competency</b>		
Complete 4 semester hours from the following:		4
EECE 5610	Digital Control Systems	
EECE 5666	Digital Signal Processing	
ME 5245	Mechatronic Systems	
ME 5250	Robot Mechanics and Control	
ME 5650	Advanced Mechanics of Materials	
ME 5654	Elasticity and Plasticity	
ME 5655	Dynamics and Mechanical Vibration	
ME 5657	Finite Element Method 1	
ME 5659	Control Systems Engineering	
ME 7238	Finite Element Method 2	
<b>Materials Competency</b>		
Complete 4 semester hours from the following:		4
ME 5600	Materials Processing and Process Selection	
ME 5620	Fundamentals of Advanced Materials	
MATL 5380	Particulate Materials Processing	
MATL 6250	Soft Matter	
MATL 6270	Principles, Devices, and Materials for Energy Storage and Energy Harvesting	
MATL 6285	Structure, Properties, and Processing of Polymeric Materials	
or any MATL courses		

**OPTIONS**

Complete one of the following options:

**COURSEWORK OPTION**

Code	Title	Hours
Complete 16 semester hours in the following subject areas:		16
ME, MATL		

**PROJECT OPTION**

<b>Code</b>	<b>Title</b>	<b>Hours</b>
ME 7945	Master's Project	4
<b>Electives</b>		
Complete 12 semester hours in the following subject areas:		12
ME, MATL		

**THESIS OPTION**

<b>Code</b>	<b>Title</b>	<b>Hours</b>
ME 7990	Thesis (required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship)	8
<b>Electives</b>		
Complete 8 semester hours in the following subject areas:		8
ME, MATL		

**Program Credit/GPA Requirements**

32 total semester hours required

Minimum 3.000 GPA required

## Mechanical Engineering with Concentration in Materials Science, MSME

For program contact information, please visit this website (<https://mie.northeastern.edu/academics/graduate-studies/ms-mece/>).

### Overview

While pursuing a Master of Science (MS) in Mechanical Engineering, students may choose materials science as a concentration. Materials science has been the key enabler in virtually all engineering breakthroughs that have occurred from early metal ages to the present nano age. In step with the scientific development and discovery of materials, members of the mechanical and industrial engineering (MIE) faculty are involved in interdisciplinary research to further materials processing, synthesis, and design. Research areas are aligned with Northeastern University's broad initiatives of sustainability, security, and health, as well as national initiatives in manufacturing and nanotechnology. Investigations in the areas of metals/alloys, polymers, biomaterials (including biomimetics), and composites incorporating nanoscale materials make use of experimental, theoretical, and computational techniques to tailor structure-processing-property relationships in materials for specific applications. Current areas of research include controlling synthesis and assembly processes to produce well-defined atomic structures; defect engineering; manipulating atomic/microstructures and the chemistry of materials to optimize properties for next-generation structural, electronic, and energy applications; solidification and deformation processing, nanomanufacturing; and life-cycle assessments for nanocomposites/materials. Northeastern faculty and students are committed to creative thinking and engineering innovation to propel materials development to the forefront of scientific research.

### GENERAL DEGREE REQUIREMENTS

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved coursework (exclusive of any preparatory courses) with a minimum grade-point average (GPA) of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: coursework option, project option, and thesis option. Specific degree requirements for each of these tracks can be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

### ACADEMIC AND RESEARCH ADVISORS

All nonthesis students are advised by the academic advisor designated for their respective concentration or program. Students willing to pursue the thesis option must first find a research advisor within their first year of study. The research advisor will guide the students' thesis work, and thesis reader(s) may be assigned at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty. If the research advisor is outside the MIE department, before the thesis option can be approved, a faculty member with 51 percent or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Thesis option students are advised by the faculty advisor of their concentration before they select their research advisor(s). The research advisor and co-advisor must serve as thesis readers.

### PLAN OF STUDY AND COURSE SELECTION

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the coursework requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their coursework needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study (PS) to the department before enrolling in second-semester courses. This form not only helps the students manage their coursework but it also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students pursuing study or research under the guidance of a faculty member can choose project option by taking Master's Project (ME 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Students pursuing coursework option may petition the MIE Graduate Affairs Committee to substitute up to a 4-semester-hour (ME 7978). An independent study must be approved by the instructor and the academic advisor. The petition must clearly state the instructor; the reason for taking the course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme. When taking thesis or project options, the independent study course cannot be taken.

### OPTIONS FOR MS STUDENTS (COURSEWORK ONLY, PROJECT, OR THESIS)

Students accepted into any of the MS programs in the MIE department can choose one of the three options: coursework only, project, or thesis. Please see the Program Requirements tab on the top menu of this page for more information. MS students who want to pursue project or thesis options must find, within the first year of their study, a faculty member or a research advisor who will be willing to direct and supervise a mutually agreed research project or MS thesis. Moreover, students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete 8 semester hours of thesis. Students are strongly encouraged to complete their 8 semester hours of Thesis (ME 7990) over two consecutive semesters.

Students who complete the thesis option must make a presentation of their thesis before approval by the department. The MS thesis presentation shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate. If deemed appropriate by

the research advisor, other faculty members may be invited to serve as thesis readers to provide technical opinions and judge the quality of the thesis and presentation.

### CHANGE OF PROGRAM/CONCENTRATION

Students enrolled in any of the MIE department programs or concentrations may change their current program or concentration no sooner than the beginning of their second full-time semester of study. In order for the program or concentration change request to be considered by the MIE Graduate Affairs Committee, the student must not be in the first semester of their current program, must have a 3.300 GPA, and have completed at least 8 semester hours of required coursework in their sought program at Northeastern.

### GRADUATE CERTIFICATE OPTIONS

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

#### Master's Degree in Mechanical Engineering with Concentration in Materials Science with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Mechanical Engineering with Concentration in Materials Science in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32-semester-hour degree and certificate will require 16 hours of advisor-approved materials science technical courses.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
Complete 16 semester hours from the following:		16
MATL 6250	Soft Matter	
MATL 6285	Structure, Properties, and Processing of Polymeric Materials	
MATL 7355	Thermodynamics of Materials	
ME 5600	Materials Processing and Process Selection	
ME 5620	Fundamentals of Advanced Materials	

#### Options

Complete one of the following options:

#### COURSEWORK OPTION

Code	Title	Hours
Electives		
Complete 16 semester hours in the following subject areas:		16
ME, MATL		

#### PROJECT OPTION

Code	Title	Hours
MATL 7945	Master's Project	4
Electives		
Complete 12 semester hours in the following subject areas:		12
ME, MATL		

#### THESIS OPTION

Code	Title	Hours
ME 7990	Thesis <sup>1</sup>	8
Electives		
Complete 8 semester hours in the following subject areas:		8
ME, MATL		

### Program Credit/GPA Requirements

32 total semester hours required

<sup>1</sup> Required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship.

## Mechanical Engineering with Concentration in Mechanics and Design, MSME

### Overview

While pursuing a Master of Science (MS) in Mechanical Engineering with Concentration in Mechanics and Design (<https://mie.northeastern.edu/academics/graduate-studies/ms-mece/>), the students will study the motion, deformation, and failure of solid materials in response to the action of direct forces and external fields. The students will also get a chance to conduct research with faculty and observe how these studies will lead to key engineering innovations and designs. Using complementary analytical, computational, experimental, and design tools, the M&D faculty members conduct research in the design and analysis of engineered functional materials/structures, in mechanics of adhesion and contact, and in biomechanics and mechanobiology. For example, in our biomechanics research, we strive to close the gap between function, form, and disease in the bone by using experimental and computational techniques; also, we explore the mechanics of lipid-based drug delivery vesicles. At the small length scales, we are creating a new understanding of nanomechanics, contact mechanics, tribology, MEMS, and the application of nanomaterials for energy storage systems. Our research and teaching together are designed to prepare students to understand and exploit mechanics to enable their future engineering innovations.

### General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved coursework (exclusive of any preparatory courses) with a minimum grade-point average (GPA) of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: coursework option, project option, and thesis option. Specific degree requirements for each of these tracks can be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

### Academic and Research Advisors

All nonthesis students are advised by the faculty advisor designated for their respective concentration or program. Students willing to pursue the thesis option must first find a research advisor within their first year of study. The research advisor will guide the students' thesis work, and thesis reader(s) may be assigned at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty. If the research advisor is outside the MIE department, before the thesis option can be approved, a faculty member with 51 percent or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Thesis option students are advised by the faculty advisor of their concentration before they select their research advisor(s). The research advisor and co-advisor must serve as thesis readers.

### Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the coursework requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their coursework needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study (PS) to the department before enrolling in second-semester courses. This form not only helps the students manage their coursework but it also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students pursuing study or research under the guidance of a faculty member can choose project option by taking Master's Project (ME 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Students pursuing coursework option may petition the MIE Graduate Affairs Committee to substitute up to a 4-semester-hour (ME 7978). An independent study must be approved by the academic advisor. The petition must clearly state the instructor; the reason for taking the course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme. When taking thesis or project options, the independent study course cannot be taken.

### Options for MS Students (coursework only, project, or thesis)

Students accepted into any of the MS programs in the MIE department can choose one of the three options: coursework only, project, or thesis. Please see the Program Requirements tab on the top menu of this page for more information. MS students who want to pursue project or thesis options must find, within the first year of their study, a faculty member or a research advisor who will be willing to direct and supervise a mutually agreed research project or MS thesis. Moreover, students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete 8 semester hours of thesis. Students are strongly encouraged to complete their 8 semester hours of Thesis (ME 7990) over two consecutive semesters.

Students who complete the thesis option must make a presentation of their thesis before approval by the department. The MS thesis presentation shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate. If deemed appropriate by the research advisor, other faculty members may be invited to serve as thesis readers to provide technical opinions and judge the quality of the thesis and presentation.

## Change of Program/Concentration

Students enrolled in any of the MIE department programs or concentrations may change their current program or concentration no sooner than the beginning of their second full-time semester of study. In order for the program or concentration change request to be considered by the MIE Graduate Affairs Committee, the student must not be in the first semester of their current program, must have a 3.300 GPA, and have completed at least 8 semester hours of required coursework in their sought program at Northeastern.

## Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

#### Master's Degree in Mechanical Engineering with a Concentration in Mechanics and Design with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Mechanical Engineering with a Concentration in Mechanics and Design in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32-semester-hour degree and certificate will require 16 hours of advisor-approved mechanics and design technical courses.

## Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Core Requirements

Code	Title	Hours
<b>Mathematics Competency</b>		
Complete the following course:		
ME 6200	Mathematical Methods for Mechanical Engineers 1	4
<b>Mechanics Competency</b>		
Complete 12 semester hours from the following:		
ME 5650	Advanced Mechanics of Materials	12
ME 5654	Elasticity and Plasticity	
ME 5655	Dynamics and Mechanical Vibration	
ME 5657	Finite Element Method 1	
ME 5659	Control Systems Engineering	

### Options

Complete one of the following options:

#### COURSEWORK OPTION

Code	Title	Hours
Complete 16 semester hours from the course list.		16

#### PROJECT OPTION

Code	Title	Hours
ME 7945	Master's Project	4
Complete 12 semester hours from the course list.		12

#### THESIS OPTION

ME 5658	Continuum Mechanics	
ME 5665	Musculoskeletal Biomechanics	

ME 6260	Introduction to Microelectromechanical Systems (MEMS)
ME 7232	Theory of Plates and Shells
ME 7238	Finite Element Method 2
ME 7374	Special Topics in Mechanical Engineering
Any other ME or MATL course	

### **Program Credit/GPA Requirements**

32 total semester hours required

Minimum 3.000 GPA required

<sup>1</sup> Required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship.

## Mechanical Engineering with Concentration in Mechatronics, MSME

While pursuing a Master of Science (MS) in Mechanical Engineering (<https://mie.northeastern.edu/academics/graduate-studies/ms-mece/>), students may choose mechatronics as a concentration. The term mechatronics is a combination of the words mechanics and electronics. Mechatronics is a multidisciplinary approach to product design and development, merging the principles of electrical, mechanical, computer, material, chemical, and industrial engineering. The mechatronics and systems research cluster in the MIE department is concerned with systems that are typically composed of traditional mechanical and electrical components but are rendered "intelligent" by the incorporation of sensors, actuators, and computer control systems. Our primary focus in mechatronics and systems is on intelligent and integrated systems and machines along with their practical applications ranging from manufacturing systems and robotic platforms to biological systems. Our research and teaching together are designed to prepare students to understand and exploit mechatronics to enable their future engineering innovations.

### General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved coursework (exclusive of any preparatory courses) with a minimum grade-point average (GPA) of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: coursework option, project option, and thesis option. Specific degree requirements for each of these tracks can be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

### Academic and Research Advisors

All non-thesis students are advised by the faculty advisor designated for their respective concentration or program. Students willing to pursue the thesis option must first find a research advisor within their first year of study. The research advisor will guide the students' thesis work, and thesis reader(s) may be assigned at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty. If the research advisor is outside the MIE department, before the thesis option can be approved, a faculty member with 51 percent or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Thesis option students are advised by the faculty advisor of their concentration before they select their research advisor(s). The research advisor and co-advisor must serve as thesis readers.

### Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the coursework requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their coursework needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study (PS) to the department before enrolling in second-semester courses. This form not only helps the students manage their coursework but it also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students pursuing study or research under the guidance of a faculty member can choose project option by taking Master's Project (ME 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Students pursuing coursework option may petition the MIE Graduate Affairs Committee to substitute up to a 4-semester-hour (ME 7978). An independent study must be approved by the academic advisor. The petition must clearly state the instructor; the reason for taking the course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme. When taking thesis or project options, the independent study course cannot be taken.

### Options for MS Students (coursework only, project, or thesis)

Students accepted into any of the MS programs in the MIE department can choose one of the three options: coursework only, project, or thesis. MS students who want to pursue project or thesis options must find, within the first year of their study, a faculty member or a research advisor who will be willing to direct and supervise a mutually agreed research project or MS thesis. Moreover, students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete 8 semester hours of thesis. Students are strongly encouraged to complete their 8 semester hours of Thesis (ME 7990) over two consecutive semesters.

Students who complete the thesis option must make a presentation of their thesis before approval by the department. The MS thesis presentation shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate. If deemed appropriate by the research advisor, other faculty members may be invited to serve as thesis readers to provide technical opinions and judge the quality of the thesis and presentation.

### Change of Program/Concentration

Students enrolled in any of the MIE department programs or concentrations may change their current program or concentration no sooner than the beginning of their second full-time semester of study. In order for the program or concentration change request to be considered by the MIE Graduate

Affairs Committee, the student must not be in the first semester of their current program, must have a 3.300 GPA, and have completed at least 8 semester hours of required course work in their sought program at Northeastern.

## Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

#### *Master's Degree in Mechanical Engineering with a Concentration in Mechatronics with Graduate Certificate in Engineering Leadership*

Students may complete a Master of Science in Mechanical Engineering with a Concentration in Mechatronics in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require 20 hours of advisor-approved mechatronics technical courses.

## Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Core Requirements

Code	Title	Hours
<b>Mathematics Competency</b>		
Complete 4 semester hours from the following:		4
ME 6200 or IE 6200	Mathematical Methods for Mechanical Engineers 1 Engineering Probability and Statistics	
<b>Mechanics Competency</b>		
Complete 4 semester hours from the following:		4
ME 5250	Robot Mechanics and Control	
ME 5650	Advanced Mechanics of Materials	
ME 5655	Dynamics and Mechanical Vibration	
ME 5657	Finite Element Method 1	
<b>Mechatronics Concentration</b>		
ME 5245	Mechatronic Systems	4
ME 5659	Control Systems Engineering <sup>1</sup>	4
<b>Electrical Competency</b>		
Complete 4 semester hours from the following:		4
EECE 5610	Digital Control Systems	
EECE 5666	Digital Signal Processing	
EECE 5680 and EECE 5681	Electric Drives and Lab for EECE 5680	
EECE 5684 and EECE 5685	Power Electronics and Lab for EECE 5684	
ME 6260	Introduction to Microelectromechanical Systems (MEMS)

Or other advisor-approved courses		

**Program Credit/GPA Requirements**

32 total semester hours required

Minimum 3.000 GPA required

- <sup>1</sup> PlusOne students who have already successfully completed ME 4555 may substitute ME 5250 for ME 5659. In such cases a different course must be taken to satisfy the Mechanics competency.
- <sup>2</sup> It is the student's responsibility to identify a project/thesis advisor before registering for this course.
- <sup>3</sup> Required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship.

## Mechanical Engineering with Concentration in Thermofluids, MSME

While pursuing a Master of Science (MS) in Mechanical Engineering (<https://mie.northeastern.edu/academics/graduate-studies/ms-mece/>), students may choose thermofluids as a concentration. Some of the representative research areas under this concentration may include thermodynamics, fluid dynamics, kinetic theory of gases, and thermophoresis of aerosols; microscale heat transfer phenomena and its effects on laser beam propagation; fundamentals of combustion such as burning speed and onset of auto-ignition measurement and flame stability analysis; development of chemistry reduction such as rate-controlled constrained-equilibrium method; formation and control of combustion-generated pollutants and greenhouse gases; chemistry, transport, and abatement of air pollution; alternative energy sources; combustion-based synthesis of materials; fire propagation, containment, and extinction; nonequilibrium thermodynamics; energy and gas turbine cooling technology; turbine blade cooling; and energy-related and calorimeter studies related to pharmaceutical developments. Our research and teaching together seek to prepare students to understand and exploit thermofluids to enable their future engineering innovations.

### General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved course work (exclusive of any preparatory courses) with a minimum grade-point average (GPA) of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: course work option, project option, and thesis option. Specific degree requirements for each of these tracks can be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

### Academic and Research Advisors

All nonthesis students are advised by the faculty advisor designated for their respective concentration or program. Students willing to pursue the thesis option must first find a research advisor within their first year of study. The research advisor will guide the students' thesis work, and thesis reader(s) may be assigned at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty. If the research advisor is outside the MIE department, before the thesis option can be approved, a faculty member with 51 percent or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Thesis option students are advised by the faculty advisor of their concentration before they select their research advisor(s). The research advisor and co-advisor must serve as thesis readers.

### Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the course work requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their course work needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study (PS) to the department before enrolling in second-semester courses. This form not only helps the students manage their course work but it also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students pursuing study or research under the guidance of a faculty member can choose project option by taking Master's Project (ME 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Students pursuing course work option may petition the MIE Graduate Affairs Committee to substitute up to a 4-semester-hour (ME 7978). An independent study must be approved by the academic advisor. The petition must clearly state the instructor; the reason for taking the course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme. When taking thesis or project options, the independent study course cannot be taken.

### Options for MS Students (course work only, project, or thesis)

Students accepted into any of the MS programs in the MIE department can choose one of the three options: course work only, project, or thesis. Please see the Program Requirements tab on the top menu of this page for more information. MS students who want to pursue project or thesis options must find, within the first year of their study, a faculty member or a research advisor who will be willing to direct and supervise a mutually agreed research project or MS thesis. Moreover, students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete 8 semester hours of thesis. Students are strongly encouraged to complete their 8 semester hours of Thesis (ME 7990) over two consecutive semesters.

Students who complete the thesis option must make a presentation of their thesis before approval by the department. The MS thesis presentation shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate. If deemed appropriate by the research advisor, other faculty members may be invited to serve as thesis readers to provide technical opinions and judge the quality of the thesis and presentation.

## Change of Program/Concentration

Students enrolled in any of the MIE department programs or concentrations may change their current program or concentration no sooner than the beginning of their second full-time semester of study. In order for the program or concentration change request to be considered by the MIE Graduate Affairs Committee, the student must not be in the first semester of their current program, must have a 3.3 GPA, and have completed at least 8 semester hours of required course work in their sought program at Northeastern.

## Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

#### Master's Degree in Mechanical Engineering with a Concentration in Thermofluids with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Mechanical Engineering with a Concentration in Thermofluids in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require 20 hours of advisor-approved thermofluids technical courses.

## Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### General Requirements

Code	Title	Hours
<b>Required Core Courses</b>		
ME 6200	Mathematical Methods for Mechanical Engineers 1	4
ME 7270	General Thermodynamics	4
ME 7275	Essentials of Fluid Dynamics	4
ME 7285	Heat Conduction and Thermal Radiation	4
or ME 7290	Convective Heat Transfer	
<b>Thermofluids Concentration Course</b>		
Complete 4 semester hours from the following:		4
ME 5685	Solar Thermal Engineering	
ME 5690	Gas Turbine Combustion	
ME 5695	Aerodynamics	
ME 7295	Multiscale Flow and Transport Phenomena

## Operations Research, MSOR

Website (<https://mie.northeastern.edu/academics/graduate-studies/ms-opre/>)

The Department of Mechanical and Industrial Engineering (MIE) offers comprehensive research and educational programs for students pursuing the Master of Science (MS) in Operations Research (OR). OR deals with the application of scientific method to decision making. Its practitioners develop and solve mathematical and computer models of systems using optimization and statistical methods. OR methodologies are being used to improve efficiency, reduce costs, and increase profitability in all organizations whether in manufacturing, transportation, logistics and supply chains, healthcare, or financial institutions. Upon graduation, students who pursue this program may work in industry or may continue their studies by pursuing the PhD in Industrial Engineering. These extensive programs and coursework allow for the selection of a degree that meets a wide range of personal and professional goals.

### General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved coursework (exclusive of any preparatory courses) with a minimum grade-point average (GPA) of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: coursework option, project option, and thesis option. Specific degree requirements for each of these tracks can be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

### Academic and Research Advisors

All nonthesis students are advised by the faculty advisor designated for their respective concentration or program. Students willing to pursue the thesis option must first find a research advisor within their first year of study. The research advisor will guide the students' thesis work, and thesis reader(s) may be assigned at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty. If the research advisor is outside the MIE department, before the thesis option can be approved, a faculty member with 51 percent or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Thesis option students are advised by the faculty advisor of their concentration before they select their research advisor(s). The research advisor and co-advisor must serve as thesis readers.

### Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the coursework requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their coursework needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study (PS) to the department before enrolling in second-semester courses. This form not only helps the students manage their coursework but it also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students may also petition to waive a core course by demonstrating evidence of their having passed a similar approved IE or OR graduate course. In such situations, the students must first obtain approval from their academic advisor for the course(s) they are planning to substitute.

Students pursuing study or research under the guidance of a faculty member can choose project option by taking Master's Project (OR 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Students pursuing coursework option may petition the MIE Graduate Affairs Committee to substitute up to a 4-semester-hour Independent Study (OR 7978). An independent study must be approved by the academic advisor. The petition must clearly state the instructor; the reason for taking the course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme. Students in other options (i.e., thesis or project) are not eligible to take independent study. When taking thesis or project options, the independent study course cannot be taken.

### Options for MS Students (coursework only, project, or thesis)

Students accepted into any of the MS programs in the MIE department can choose one of the three options: coursework only, project, or thesis. Please see the Program Requirements tab on the top menu of this page for more information. MS students who want to pursue project or thesis options must find, within the first year of their study, a faculty member or a research advisor who will be willing to direct and supervise a mutually agreed research project or MS thesis. Moreover, students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete 8 semester hours of Thesis (ME 7990). Students are strongly encouraged to complete their 8 semester hours of Thesis (ME 7990) over two consecutive semesters.

Students who complete the thesis option must make a presentation of their thesis before approval by the department. The MS thesis presentation shall be publicly advertised at least one week in advance, and all faculty members and students may attend and participate. If deemed appropriate by

the research advisor, other faculty members may be invited to serve as thesis readers to provide technical opinions and judge the quality of the thesis and presentation.

## Change of Program/Concentration

Students enrolled in any of the MIE department programs or concentrations may change their current program or concentration no sooner than the beginning of their second full-time semester of study. In order for the program or concentration change request to be considered by the MIE Graduate Affairs Committee, the student must not be in the first semester of their current program, must have a 3.300 GPA, and have completed at least 8 semester hours of required coursework in their sought program at Northeastern.

## Graduate Certificate Options

Students enrolled in a graduate degree program in the College of Engineering have the opportunity to pursue an engineering graduate certificate in addition to or in combination with the MS degree. For more information please refer to Graduate Certificate Programs (p. 567).

### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

#### *Master's Degree in Operations Research with Graduate Certificate in Engineering Leadership*

Students may complete a Master of Science in Operations Research in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32-semester-hour degree and certificate will require 16 hours of advisor-approved operations research technical courses.

### ENGINEERING BUSINESS

#### *Master's Degree in Operations Research with Graduate Certificate in Engineering Business*

Students may complete a Master of Science in Operations Research in addition to earning a Graduate Certificate in Engineering Business (p. 529). Students must apply and be admitted to the Galante Engineering Business Program in order to pursue this option. The program requires the applicant to have earned or be in a program to earn a Bachelor of Science in Engineering from Northeastern University. The integrated 32-semester-hour degree and certificate will require 16 semester hours of the operations research core courses and 16 semester hours from the outlined business-skill curriculum. The coursework, along with participation in co-curricular professional development elements, earn the Graduate Certificate in Engineering Business.

## Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Core Requirements

Code	Title	Hours
IE 6200 or MATH 7241	Engineering Probability and Statistics Probability 1	4
OR 6205	Deterministic Operations Research	4
OR 7245 or MATH 7234	Network Analysis and Advanced Optimization Optimization and Complexity	4
OR 7230 or MATH 7341	Probabilistic Operation Research Probability 2	4

### Options

Select one of the following options:

#### COURSEWORK OPTION

Code	Title	Hours
	Complete 16 semester hours from the course list below.	16

#### PROJECT OPTION

Code	Title	Hours
OR 7945	Master's Project	4
	Complete 12 semester hours from the course list below.	12

#### THESIS OPTION

Code	Title	Hours
OR 7990	Thesis (required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship)	8
	Complete 8 semester hours from the course list below.	8

**Course List**

<b>Code</b>	<b>Title</b>	<b>Hours</b>
<b>Civil Engineering and Environmental Engineering</b>		
CIVE 7100	Time Series and Geospatial Data Sciences	
<b>Computer Science</b>		
CS 5800	Algorithms	
CS 6140	Machine Learning	
CS 7805	Complexity Theory	
<b>Computer Systems Engineering</b>		
CSYE 7280	User Experience Design and Testing	
<b>Data Science</b>		
DS 5220	Supervised Machine Learning and Learning Theory	
DS 5230	Unsupervised Machine Learning and Data Mining	
<b>General Engineering</b>		
GE 5010	Customer-Driven Technical Innovation for Engineers	
GE 5100	Product Development for Engineers	
<b>Electrical and Computer Engineering</b>		
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
<b>Engineering Management</b>		
EMGT 5220	Engineering Project Management	
EMGT 5300	Engineering/Organizational Psychology	
EMGT 6225	Economic Decision Making	
EMGT 6305	Financial Management for Engineers	
<b>Industrial Engineering</b>		
IE 5374	Special Topics in Industrial Engineering (Data Visualization Engineering)	
IE 5374	Special Topics in Industrial Engineering (Human Performance in Sociotechnical Systems)	
IE 5400	Healthcare Systems Modeling and Analysis	
IE 5500	Systems Engineering in Public Programs	
IE 5617	Lean Concepts and Applications	
IE 6300	Manufacturing Methods and Processes	
IE 7200	Supply Chain Engineering	
IE 7215	Simulation Analysis	
IE 7275	Data Mining in Engineering	
IE 7280	Statistical Methods in Engineering	
IE 7285	Statistical Quality Control	
IE 7290	Reliability Analysis and Risk Assessment	
IE 7315	Human Factors Engineering	
<b>Mathematics</b>		
MATH 7233	Graph Theory	
MATH 7342	Mathematical Statistics	
MATH 7349	Stochastic Calculus and Introduction to No-Arbitrage Finance	
<b>Operations Research</b>		
OR 6500	Metaheuristics and Applications	
OR 7235	Inventory Theory	
OR 7240	Integer and Nonlinear Optimization	
OR 7270	Convex Optimization and Applications	
OR 7310	Logistics, Warehousing, and Scheduling	
Or any other IE, OR, MATH, CS, and graduate engineering courses		

**Program Credit/GPA Requirements**

32 total semester hours required

Minimum 3.000 GPA required

## Data Analytics Engineering, Graduate Certificate

The Data Analytics Engineering Graduate Certificate program focuses on fundamental concepts, tools and techniques to extract information from large data sets in order to support effective decision making. This program is designed to provide opportunities for students to master high-demand data intelligence skills through hands-on experience on data storage, data retrieval, data visualization and prediction.

This four-course graduate certificate enables the students to apply the fundamentals of engineering knowledge and skills to database design, data pre- and post-processing for further analysis, data visualization for impactful infographics, statistical concepts for quantitative analysis and data mining techniques and algorithms for knowledge discovery.

Note: MS in Data Analytics students are not eligible for this graduate certificate.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
<b>Required Courses</b>		
DAMG 6210	Data Management and Database Design	4
IE 6600	Computation and Visualization for Analytics	4
IE 7275	Data Mining in Engineering	4
IE 7280	Statistical Methods in Engineering	4

#### Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

## Energy Systems, Graduate Certificate

The Graduate Certificate in Energy Systems focuses on the combination of analysis and integration of energy systems engineering technology with financial planning and attention to business aspects and effective implementation.

This four-course graduate certificate seeks to offer students opportunities to apply the fundamentals of engineering knowledge and skills to analyze energy systems to propose effective and efficient technology solutions based on data-driven and economic-based decisions.

*Note:* Students enrolled in the master's in energy systems program are not eligible for this graduate certificate.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
EMGT 6225	Economic Decision Making	4
EMGT 6305	Financial Management for Engineers	4
ENSY 5000	Fundamentals of Energy System Integration	4

#### Elective

Code	Title	Hours
Complete one of the following:		4
ENSY 5100	Hydropower	
ENSY 5200	Energy Storage Systems	
ENSY 5300	Electrochemical Energy Storage	
ENSY 5400	Power Plant Design and Analysis	
ENSY 5500	Smart Grid	
ENSY 5585	Wind Energy Systems	
ME 5645	Environmental Issues in Manufacturing and Product Use	
ME 5685	Solar Thermal Engineering	

#### Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

## Energy Systems Management, Graduate Certificate

The Graduate Certificate in Energy Systems Management focuses on the combination of analysis and integration of energy systems engineering technology with a focus on the art and the science of planning, organizing, allocating, directing, and controlling the activities and resources of organizations engaged in engineering activities and technology development.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of engineering knowledge and skills in a management setting to analyze energy systems and to propose effective and efficient technology solutions based on data-driven and economic-based decisions.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
ENSY 5000	Fundamentals of Energy System Integration	4
EMGT 5220	Engineering Project Management	4

#### Electives

Code	Title	Hours
Complete one of the following:		4
EMGT 6225	Economic Decision Making	
EMGT 6305	Financial Management for Engineers	
Complete one of the following:		4
ENSY 5100	Hydropower	
ENSY 5200	Energy Storage Systems	
ENSY 5300	Electrochemical Energy Storage	
ENSY 5400	Power Plant Design and Analysis	
ENSY 5500	Smart Grid	
ENSY 5585	Wind Energy Systems	
ME 5685	Solar Thermal Engineering	

#### Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

## Engineering Business, Graduate Certificate

The Graduate Certificate in Engineering Business is part of the Galante Engineering Business Program. The Galante Engineering Business Program offers a progressive opportunity for engineering students to complement their technical engineering education with business skills. Galante is founded on the values of student engagement and leadership to strengthen interpersonal and professional skills.

The certificate seeks to provide students opportunities to apply the technical aspects of an engineering skill foundation in corporate settings through both academic and programmatic elements. Programmatic elements include workshops, speaker series, site visits, seminars, and other related personal and professional development activities as a connected cohort. These activities equip students to manage projects, lead people, make data-driven and market-based decisions, and advance economically sound initiatives.

The Galante Engineering Business Program can be completed alongside a Master of Science in Engineering Management, Industrial Engineering, Operations Research, Data Analytics Engineering, Civil Engineering with a Concentration in Construction Management, and Chemical Engineering. There are two possible paths to earning the Graduate Certificate in Engineering Business. The first option is to begin an eligible PlusOne program and then apply for the Galante Engineering Business Program. The second option is for those who have completed their BS in engineering in good standing and have been admitted to a master's program listed above. Please note that the BS in engineering needs to be completed at Northeastern.

The Graduate Certificate in Engineering Business involves 15 semester hours from four courses across three categories. These four courses count as the electives required for each of the master's programs above. Students need to ensure that these four courses are cross-listed with the master's program.

Refer to the Galante Engineering Business Program webpage (<http://www.coe.neu.edu/galante/>) for additional details and description.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
Complete four courses from at least three of the following categories. Students can only take one course from outside the College of Engineering.		15

#### Business Innovation Development

ENTR 6212	Business Planning for New Ventures	
ENTR 6218	Business Model Design and Innovation	
GE 5010	Customer-Driven Technical Innovation for Engineers	
GE 5020	Engineering Product Design Methodology	
GE 5030	Iterative Product Prototyping for Engineers	
GE 5100	Product Development for Engineers	

#### Organizational Excellence

EMGT 5300	Engineering/Organizational Psychology	
EMGT 6600	Engineering Team Performance	
IE 5617	Lean Concepts and Applications	
SCHM 6201	Operations and Supply Chain Management	
SCHM 6223	Managing Healthcare Supply Chain Operations	

#### Financial Analysis

ACCT 6200	Financial Reporting and Managerial Decision Making 1	
EMGT 6225	Economic Decision Making	
EMGT 6305	Financial Management for Engineers	
ENTR 6219	Financing Ventures from Early Stage to Exit	

#### Information and Business Analysis

CS 6140	Machine Learning	
CS 6220	Data Mining Techniques	
DA 5030	Introduction to Data Mining/Machine Learning	
DAMG 6210	Data Management and Database Design	
DAMG 7290	Data Warehousing and Business Intelligence	
DS 5110	Introduction to Data Management and Processing	
IE 5640	Data Mining for Engineering Applications	

IE 6600

Computation and Visualization for Analytics

INFO 6215

Business Analysis and Information Engineering

**Program Credit/GPA Requirements**

15 total semester hours required

Minimum 3.000 GPA required

## Engineering Economic Decision Making, Graduate Certificate

The Graduate Certificate in Engineering Economic Decision Making focuses on developing economic decision-making skills in the context of engineering operations and projects with attention to decision-making models, causes of risk and uncertainty, decisions under uncertainty, and ways to change and influence the degree of risk and uncertainty.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of engineering knowledge and skills in a management setting to build decision-making models and to make data-driven, financial-based, and economic-based decisions.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
EMGT 6225	Economic Decision Making	4
EMGT 6305	Financial Management for Engineers	4
IE 6200	Engineering Probability and Statistics	4
OR 6205	Deterministic Operations Research	4

#### Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

## Engineering Management, Graduate Certificate

The Graduate Certificate in Engineering Management focuses on bridging the gaps between the fields of engineering, technology, and business with a focus on the art and the science of planning, organizing, allocating, directing, and controlling the activities and resources of organizations engaged in engineering activities and technology development.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of engineering knowledge and skills in a management setting to build decision-making models and make data-driven and/or economic-based decisions.

Note: Students enrolled in the master's in engineering management program are not eligible for this graduate certificate.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
<b>Required Courses</b>		
EMGT 5220	Engineering Project Management	4
EMGT 6225	Economic Decision Making	4
IE 6200	Engineering Probability and Statistics	4

#### Elective

Code	Title	Hours
Complete one of the following:		
EMGT 5300	Engineering/Organizational Psychology	4
EMGT 6305	Financial Management for Engineers	
OR 6205	Deterministic Operations Research	

### Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

## Lean Six Sigma, Graduate Certificate

The Graduate Certificate in Lean Six Sigma focuses on enhancing engineering knowledge and skills with the fundamentals of lean manufacturing thinking and six sigma concepts to improve business processes through optimizing flow, eliminating waste, and emphasizing quality.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of lean six sigma concepts across an enterprise to contribute to an organization's continuous improvement initiatives by identifying and employing lean and quality tools and techniques, along with utilizing statistical methods to achieve quality control.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Core Requirements

Code	Title	Hours
IE 5617	Lean Concepts and Applications	4
IE 6200	Engineering Probability and Statistics	4
IE 7280	Statistical Methods in Engineering	4
IE 7285	Statistical Quality Control	4

### Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

## Renewable Energy, Graduate Certificate

The Graduate Certificate in Renewable Energy focuses on the combination of analysis and integration of energy systems engineering technology with key renewable engineering technology, including solar and wind generation, with environmental protection and manufacturing considerations.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of engineering knowledge and skills to analyze energy systems with a specific focus on renewable energy technologies along with EPA regulatory structure, including the LEED certification program, as well as industrial ecology, including life-cycle analysis and technical cost modeling.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
ENSY 5000	Fundamentals of Energy System Integration	4
ENSY 5585	Wind Energy Systems	4
ME 5685	Solar Thermal Engineering	4

#### Elective

Code	Title	Hours
Complete one of the following:		
ENSY 5100	Hydropower	4
ENSY 5200	Energy Storage Systems	
ENSY 5300	Electrochemical Energy Storage	
ENSY 5500	Smart Grid	

#### Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

## Sustainable Energy Systems, Graduate Certificate

The Graduate Certificate in Sustainable Energy Systems focuses on the integration of energy systems engineering technology with sustainable building systems, including the design and operation of buildings with minimal energy and environmental impact.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of engineering knowledge and skills to analyze energy systems as they relate to sustainable engineering building design with a focus on renewable energy with LEED certification or with a focus on industrial ecology, including life-cycle analysis and technical cost modeling.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
SBSY 5200	Sustainable Engineering Systems for Buildings	4
ENSY 5000	Fundamentals of Energy System Integration	4

#### Electives

Code	Title	Hours
Complete two of the following:		8
ENSY 5100	Hydropower	
ENSY 5200	Energy Storage Systems	
ENSY 5300	Electrochemical Energy Storage	
ENSY 5585	Wind Energy Systems	
ME 5685	Solar Thermal Engineering	

#### Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

## Supply Chain Engineering Management, Graduate Certificate

The Graduate Certificate in Supply Chain focuses on acquiring and applying the knowledge and skills associated with designing, analyzing, managing, and improving supply chains within technology companies with attention on optimizing parts of a supply chain for effective and efficient functioning.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of engineering knowledge and skills to supply chains using deterministic and probabilistic decision-making models, lean concepts, mass customization principles, and methods of manufacturing including logistics, warehousing, and scheduling.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
IE 5617	Lean Concepts and Applications	4
IE 7200	Supply Chain Engineering	4

#### Electives

Code	Title	Hours
Complete two of the following:		8
EMGT 5300	Engineering/Organizational Psychology	
IE 6200	Engineering Probability and Statistics	
IE 6300	Manufacturing Methods and Processes	
OR 7310	Logistics, Warehousing, and Scheduling	

#### Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

## Technology Systems Management, Graduate Certificate

The Graduate Certificate in Technology Systems Management focuses on bridging the fields of technology, engineering, and business with a focus on the art and the science of managing organizational activities, including project and human resources engaged in engineering and technology development.

This four-course graduate certificate seeks to provide students with opportunities to apply technological knowledge and skills in a management setting to make data-driven, financial-based, and economic-based decisions.

Note: This certificate is for graduate engineering students as well as non-engineers and non-graduate engineering students.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
EMGT 5220	Engineering Project Management	4
EMGT 5300	Engineering/Organizational Psychology	4
EMGT 6225	Economic Decision Making	4
EMGT 6305	Financial Management for Engineers	4

#### Program Credit/GPA Requirements

Minimum 3.000 GPA required

## Multidisciplinary Programs

Website (<http://www.coe.neu.edu/graduate-school/multidisciplinary/>)

Dana Research Center, 5th Floor

617.373.5424

The multidisciplinary graduate engineering Master of Science programs integrate engineering solutions from the fields of technology and business by developing technical and engineering skills through advanced coursework and complex technical projects. Each program focuses on the application of knowledge and skills to business and industrial settings. The software, data, and network systems programs blend academic and corporate experience to enable students to enhance their professional capabilities, thereby facilitating career transformation. Given an applied focus, each program provides learning opportunities to develop the skills needed to create innovative, practical, and effective solutions that can be easily applied to current professional challenges.

The multidisciplinary graduate engineering programs are designed to prepare students for direct entry into the workforce. Students who are seeking preparation for entry into PhD programs should consider specific department MS programs (p. 334) aligned with their research interests.

### Graduate Certificate Options

Students enrolled in a graduate degree program in the College of Engineering have the opportunity to pursue an engineering graduate certificate in addition to or in combination with the MS degree. For more information please refer to Graduate Certificate Programs (p. 567).

#### **GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION**

Students have the opportunity to pursue the Gordon Engineering Leadership Program (p. 1145) in combination with the MS degree.

### Programs

#### **Master of Science in Information Systems (MSIS)**

- Information Systems (p. 539)
- Information Systems—Bridge (p. 541)

#### **Master of Science (MS)**

- Cyber-Physical Systems (p. 542)
- Data Architecture and Management (p. 544)
- Software Engineering Systems (p. 545)
- Telecommunication Networks (p. 547)

### Graduate Certificates

- Blockchain and Smart Contract Engineering (p. 549)
- Broadband Wireless Systems (p. 550)
- Engineering Leadership (p. 551)
- IP Telephony Systems (p. 553)
- Software Engineering Systems (p. 554)

## Information Systems, MSIS

We offer cutting-edge expertise in a variety of courses that combine technological advances and business practices. We stress creative and inventive approaches to problem solving, which necessitates empowering students so that they can take charge of their own software projects to become originally productive. Our information systems program (<https://coe.northeastern.edu/academics-experiential-learning/academic-departments/mgen/ms-insy/>) is as much an art as a science. It bypasses mechanical learning and highlights the value and excitement of engineering thinking that gets things done efficiently as well as imaginatively. We balance theory and practice, on the premise that they are always intertwined and interdependent.

We seek to provide a basic foundation for our students and then seek to push them to new heights to advance their information technology skills in a way that keeps up and, better yet, exceeds the necessarily fast pace of this progressive field. It is not for us just a question of not being left behind; we strive to be at the forefront of software innovation in an effort to transform contemporary society even more radically than technology has already done—to take gigantic strides in business, medicine, education, and security.

The program offers a wide range of courses that reflect current and future industry trends:

- Cryptocurrency and Smart Contract Engineering
- Engineering of Big-Data Systems
- Business Intelligence and Data Analytics
- Cyber-Security Engineering and Development
- Digital Business
- Full-Stack Software Engineering
- User Experience Design
- Data Science and Machine Learning Systems Engineering

### Gordon Institute of Engineering Leadership

#### MASTER'S DEGREE IN INFORMATION SYSTEMS WITH GRADUATE CERTIFICATE IN ENGINEERING LEADERSHIP

Students may complete a master's degree in Information Systems in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32-semester-hour degree and certificate will require 16 hours of advisor-approved information systems technical courses.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

## Information Systems, MSIS–Bridge

The Master of Science in Information Systems–Bridge (<https://coe.northeastern.edu/academics-experiential-learning/academic-departments/mgen/ms-insy-bridge/>) (MSIS-Bridge) addresses the needs of the digital revolution by preparing students with non–STEM, nontechnical bachelor's degrees to become information systems professionals. MSIS-Bridge students are the link between business users and technologists. As industries launch into a digitized future, professionals with a clear understanding of how technology can be used to address significant societal challenges are in demand. The MSIS-Bridge program closes the gaps between business management, software engineering, and information technology to help students solve complex real-world issues in business and society. It also upskills and reskills to help individuals or businesses identify organizational skills gaps and create a tactical training plan to fill them with new skills and knowledge. Through specially created and selected core courses, students gain the engineering foundation needed to excel in the classroom and in the IT sector.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
INFO 5001	Application Modeling and Design	4
INFO 5002	Introduction to Python for Information Systems	4
INFO 5100 and INFO 5101	Application Engineering and Development and Lab for INFO 5100	4

#### Restricted Electives

Minimum 3.000 GPA required

## Cyber-Physical Systems, MS

The Master of Science in Cyber-Physical Systems with a concentration in the Internet of Things (IoT) (<https://coe.northeastern.edu/academics-experiential-learning/academic-departments/mgen/ms-cyps/>) prepares our graduates for a world of connected devices. This innovative multidisciplinary program is designed to meet the demand for a new kind of specialist, one who can engineer and develop new interactive services; acquire, fuse, and process the data collected from sensors, actuators, controllers, and other devices; and develop architectures to interconnect these elements as part of larger, more diverse systems. It is expected that careers in this rapidly evolving area will encompass industry sectors ranging from energy, healthcare, transportation, infrastructure, to manufacturing.

This concentration integrates the study of wireless networking, protocols, sensor networks, security, software development, embedded systems, data analytics, and big data to provide students with the knowledge and tools to develop IoT applications, to analyze and design IoT architectures for different application domains, and to develop data analytic tools to analyze the large amounts of data generated by the massive deployment of IoT devices.

### Degree Requirements

The program requires that a mix of core required courses and elective courses be taken—16 semester hours of core course work and a minimum of 16 semester hours of elective course work. Although there are some dependencies among the core courses, the program may be started in either the fall or spring semester.

Special topics courses, as well as other courses not in the list of electives, may be used as electives with prior approval of the program director. A maximum of two courses from the Khoury College of Computer Sciences may be used as electives. Before taking any course from Khoury, prior approval is required from the program director.

Independent Study (TELE 5978), usually 1 or 2 semester hours, or a Master's Project in Cyber Physical Systems (TELE 7945) must be carried out under the supervision of a professor and must have prior approval of the program director. Proposals for independent study or a master's project need to be submitted at least one month before the start of the semester.

### Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated. Students may not register for more than 9 semester hours in the fall and spring terms and 4 semester hours in each of the three summer terms. Any exceptions must be approved by the program director.

### Core Requirements

Code	Title	Hours
TELE 6510	Fundamentals of the Internet of Things	4
TELE 6530	Connected Devices	4
Choose two of the following three courses:		8
CSYE 6200	Concepts of Object-Oriented Design	
INFO 6105	Data Science Engineering Methods and Tools	
TELE 5330 and TELE 5331	Data Networking and Lab for TELE 5330	

### Electives

Code	Title	Hours
Any core course not used to meet the required core course requirement may be taken as an elective. Otherwise, complete four of the following. A maximum of 8 semester hours of nontechnical electives may be taken. Students may take elective coursework outside these lists only with the prior approval of the program director. A maximum of 9 semester hours may be taken outside of the College of Engineering.		16

#### Technical Electives

CSYE 6205	Concepts of Object-Oriented Design with C++
CSYE 6225	Network Structures and Cloud Computing
CSYE 6230	Operating Systems
CSYE 7215	Foundations of Parallel, Concurrent, and Multithreaded Programming
CSYE 7370	Deep Learning and Reinforcement Learning in Game Engineering
DAMG 6210	Data Management and Database Design
EECE 5644	Introduction to Machine Learning and Pattern Recognition
EECE 5155	Wireless Sensor Networks and the Internet of Things

EECE 7352	Computer Architecture
EECE 7390	Computer Hardware Security
EECE 7397	Advanced Machine Learning
IE 7275	Data Mining in Engineering
INFO 6150	Web Design and User Experience Engineering
INFO 6205	Program Structure and Algorithms
TELE 5360	Internet Protocols and Architecture
TELE 6550	IoT Embedded System Design
TELE 7374	Special Topics in the Internet of Things
<b>Nontechnical Electives</b>	
EMGT 5220	Engineering Project Management
INFO 6660	Business Ethics and Intellectual Property for Engineers

### **Program Credit/GPA Requirements**

32 total semester hours required

Minimum 3.000 GPA required

## Data Architecture and Management, MS

For program contact information, please visit this website (<https://coe.northeastern.edu/academics-experiential-learning/academic-departments/mgen/ms-daam/>).

Many MS programs in the data area deal with data collection and analysis but do not, however, address a crucial activity that data scientists, data analysts, business analysts, and many software engineers need to perform to make that data valuable, namely, data integration. That activity may also be referred to as data preparation, data curation, application integration, and data engineering based on the integration of use cases and integration persona. The Master of Science in Data Architecture and Management focuses on these activities.

Data systems engineering occurs because data is fragmented and usually scattered across many data sources. However, even if all the data one needed were in one place, there is still an intensive need for integration. Information is data in context and the context of data as collected is different than the many ways it needs to be transformed so as to generate useful information.

The data engineering field could be thought of as a superset of business intelligence and data warehousing that brings in more elements from software engineering. This discipline also integrates specialization around the operation of so called Big Data distributed systems, along with concepts around the extended Hadoop ecosystem, stream processing, and in computation at scale.

The Master of Science in Data Architecture and Management offers a multitude of courses in data engineering in addition to supplementary courses that are required to deliver the data results in a meaningful way to management. We plan to cover data management, advanced data management, data warehousing and business intelligence, column databases, data science engineering, and Big Data engineering. On the software engineering side, we offer advanced Big Data programming using the powerful Scala language and a course on advanced data science as well as cloud computing. Multithread concurrent computing is also offered as it is important for synchronizing a huge set of servers working in parallel to do large-scale analytics to make things run faster by hundredfold increases in speed. Due to the high-level mathematical operations required to make these programs run, only software engineers can make the necessary mathematical algorithms execute quickly enough to work in these complicated areas and get the finest results.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
DAMG 6105	Data Science Engineering with Python	4
DAMG 6210	Data Management and Database Design	4
DAMG 7250	Big Data Architecture and Governance	4

### Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

## Software Engineering Systems, MS

Website (<http://www.coe.neu.edu/degrees/ms-cse/>)

The Software Engineering Systems program takes a sociotechnical, engineering approach to software. This engineering foundation is designed to enable students to embrace real-world complexity as a golden opportunity, especially for the more technically advanced student. We are committed to shaping our students to be intuitive problem solvers, experienced engineering architects, and result leaders who will have a great impact at the exciting three-way intersection of computer science, engineering, and ethics.

Our program offers a multitude of courses in big-data engineering and analytics in addition to supplementary courses that are required to deliver the data-analytics results in a meaningful way to management. We cover data management, advanced data management, business intelligence, column databases, data science, and big-data engineering. We offer advanced functional programming using the powerful Scala language and a course on advanced data science as well as cloud computing. Multi-thread concurrent computing is also offered as it is important for synchronizing a huge set of servers working in parallel to do large-scale analytics to make things run faster by a hundredfold increase in speed. Due to the high-level mathematical operations required to run these programs, only software engineers have the capacity to work in such complicated areas. Only they can make the necessary mathematical algorithms execute quickly enough to get the finest results.

Our engineers become fluent in data science for the sake of building the actual system. They study how to write machine-learning algorithms on top of statistical packages.

- Students study the fundamentals of logical computing formulation and program construction as well as the mathematical modeling and analysis of algorithms—an essential aspect of data science analytics.
- Students study clustering techniques, along with topic modeling and classification and logical regression techniques, as well as Bayesian statistics.
- Students study how to configure and operate a Hadoop environment (large clusters of commodity hardware) and in the process how to integrate data from diverse sources, to move and manage data through big-data platforms (in-house or in the cloud). Data ingestion, the filtering and firing of millions of operations to run over large clusters of commodity hardware, is a software-engineering technique that we teach our students how to perform through Scala, multi-threading, Spark programming, and “map-reduce” techniques.
- We show students how to make the business case for analytics projects and how to follow an execution road map that involves understanding the architectures underpinning such gigantic platforms as well as the resourcing and cost issues.

### Graduate Certificate Options

#### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

##### Master's Degree in Software Engineering Systems with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Software Engineering Systems in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32-semester-hour degree and certificate will require 16 hours of advisor-approved software design engineering technical courses.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Minimum 3.000 GPA required

## Telecommunication Networks, MS

For program contact information, please visit this website (<https://coe.northeastern.edu/academics-experiential-learning/academic-departments/mgen/ms-tnet/>).

The Master of Science in Telecommunication Networks is designed for professionals currently in the telecommunications or networking field who either wish to enhance their technical skills and credentials or who wish to make a transition to the business side of telecommunications or networking. We also welcome applications from prospective students with limited industry experience. This program, which may be pursued on a full- or part-time basis, is one of only a very few master's programs in telecommunications and networking in the United States that is truly multidisciplinary, giving students the flexibility to tailor the curriculum to their specific interests, backgrounds, and career goals.

### Degree Requirements

The program requires that a mix of core required courses and elective courses be taken—16 semester hours of core course work and a minimum of 16 semester hours of elective course work. Although there are some dependencies among the core courses, the program may be started in either the fall or spring semester. The four core courses each carry 4 semester hours of credit.

The technical electives include courses on network and communications technology and on the development of software systems and applications. The business electives are focused on engineering management and entrepreneurship. Electives come from approved lists of courses supplied by the colleges of engineering, business, and computer sciences. Students may take elective course work outside these lists only with the prior approval of the program director.

It is expected that students beginning this program will have an adequate background in the following areas: C, C++, or Java programming languages; probability and statistics; and differential and integral calculus.

Special topics courses, as well as other courses from outside the program, may be used as electives with prior approval of the program director.

Independent Study, usually 1 or 2 semester hours, or a Master's Project must be carried out under the supervision of a professor and must have prior approval of the program director. Proposals for Independent Study or a Master's Project need to be submitted at least one month before the start of the semester.

Directed Study, also for 1 or 2 semester hours, is sometimes available for students. For directed study projects, a student follows a prescribed curriculum, usually with some form of an exam at the end of the semester.

### Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 567).

#### GORDON INSTITUTE OF ENGINEERING LEADERSHIP

##### *Master's Degree in Telecommunication Networks with Graduate Certificate in Engineering Leadership*

Students may complete a Master of Science in Telecommunications Networks in addition to earning a Graduate Certificate in Engineering Leadership (p. 551). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32-semester-hour degree and certificate require 12 hours of technical core courses from the telecommunication networks program and 4 hours from the technical course list provided for this program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated. Students may not register for more than 10 semester hours in the fall and spring terms and 4 semester hours in each of the three summer terms. Any exceptions must be approved by the program director.

#### Core Requirements

Code	Title	Hours

## Blockchain and Smart Contract Engineering, Graduate Certificate

The Graduate Certificate in Blockchain and Smart Contract Engineering addresses the rapidly growing and revolutionary field of distributed ledger (blockchain) technology. Companies from different industries are preparing to enhance their business practices through cryptocurrency, decentralized computing, digital security, smart contracts, and more. The certificate program covers blockchain platforms such as Ethereum that bring about transparency and trust to all participants in complex multiparty relationships. The implication is tremendous—from new currency and incentive systems to faster, less expensive, and more efficient transactions of all kinds, from banking to healthcare. Students have an opportunity to learn how blockchain platforms and their underlying trust models will impact the future of legally binding multiparty contracts. In addition, students also have an opportunity to learn how crypto-engineering techniques can be used to create digital trust fabrics that could safely facilitate the movement of any kind of transactions.

## Broadband Wireless Systems, Graduate Certificate

The broadband wireless systems graduate certificate program focuses on the fundamentals of wireless communications, IP networks and protocols, and telecommunications infrastructure as preparation for developing expertise in ongoing developments in mobile networking, broadband wireless communications, and mobile apps.

The four-course graduate certificate requires that two TNET core technical courses be taken along with two other specified courses. With the approval of the certificate director, one of the core courses may be waived with another technical course taken in its place. Mobile Wireless Communications and Networking (TELE 6100) may not be waived under any circumstances.

*Note:* Master of Science in Telecommunication Networks students are eligible for this graduate certificate.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

## Engineering Leadership, Graduate Certificate

The Gordon Engineering Leadership Program is a transformational, technical, and challenging graduate-level learning experience targeted for engineering professionals.

The Gordon Engineering Leadership Program directed by the Gordon Institute of Engineering Leadership offers a graduate certificate that pairs with over 20 master's degrees in the College of Engineering, College of Science, and Khoury College of Computer Sciences. The Gordon Program is a transformational graduate program designed to build a future corps of engineering leadership professionals.

Pursuing the graduate certificate allows participants to:

- Take part in a hands-on curriculum taught by industry-experienced professors
- Work with peers from across engineering fields on leadership skills development
- Receive one-on-one mentoring from industry experts and faculty

The Gordon Engineering Leadership Program anchors around an intense, market-worthy challenge project based on your organization's strategic needs. This is a unique opportunity to apply your classroom experience in a professional setting, potentially further accelerating your career.

### How to Earn a Graduate Certificate in Engineering Leadership

If you already have a Master of Science, then you can complete the one-year program to earn a Graduate Certificate in Engineering Leadership.

If you do not have a Master of Science, then you can still be considered for the Graduate Certificate in Engineering Leadership if you have at least three years of engineering work experience.

Additional information can be found on the Gordon Engineering Leadership Program website. (<http://www.northeastern.edu/gordonleadership/>)

### Beyond a Graduate Certificate

Most candidates pursue the Gordon Engineering Leadership Program as part of a Master of Science degree in the engineering discipline of their choice. Upon completion, they earn both a Master of Science degree and a Graduate Certificate in Engineering Leadership.

---

Students can enroll in the Engineering Leadership Graduate Certificate while pursuing the following degrees:

- MS Advanced and Intelligent Manufacturing (<https://provost.northeastern.edu/gordon/certificate-and-degree-options/college-of-engineering/advanced-and-intelligent-manufacturing/>)
- MS Biotechnology (<http://www.northeastern.edu/gordonleadership/degree/ms-in-biotechnology/>)
- MS Computer Science (<https://provost.northeastern.edu/gordon/certificate-and-degree-options/khoury-college-of-computer-sciences/computer-science/>)
- MS Cybersecurity (<https://provost.northeastern.edu/gordon/certificate-and-degree-options/khoury-college-of-computer-sciences/ms-in-information-assurance-and-cyber-security/>)
- MS Data Analytics Engineering (<https://provost.northeastern.edu/gordon/certificate-and-degree-options/college-of-engineering/ms-in-data-analytics-engineering/>)
- MS Engineering and Public Policy (select concentrations) (<https://provost.northeastern.edu/gordon/certificate-and-degree-options/college-of-engineering/ms-in-engineering-and-public-policy/>)
- MS Human Factors (<https://provost.northeastern.edu/gordon/certificate-and-degree-options/college-of-engineering/human-factors/>)
- MS Robotics (<https://provost.northeastern.edu/gordon/certificate-and-degree-options/college-of-engineering/robotics/>)
- MS Telecommunication Networks (<http://www.northeastern.edu/gordonleadership/degree/ms-in-telecommunication-networks/>)
- MSBioE Bioengineering (<http://www.northeastern.edu/gordonleadership/degree/ms-in-bioengineering/>)
- MSChE Chemical Engineering (<http://www.northeastern.edu/gordonleadership/degree/chemical-engineering/>)
- MSCivE Civil Engineering (select concentrations) (<https://provost.northeastern.edu/gordon/certificate-and-degree-options/college-of-engineering/ms-in-civil-engineering/>)
- MSCSE Software Engineering Systems (<https://provost.northeastern.edu/gordon/certificate-and-degree-options/college-of-engineering/ms-in-computer-systems-engineering/>)

16 total semester hours required

Minimum 3.000 GPA required

## IP Telephony Systems, Graduate Certificate

The Graduate Certificate in IP Telephony Systems focuses on the fundamental knowledge in communications, IP networks and protocols, media transport, and signaling as preparation to developing expertise into ongoing developments in VoIP networks and services, the IP Multimedia Subsystem (IMS), unified communications, and video networks.

The four-course graduate certificate requires that three TNET core technical courses be taken along with a specified fourth course. With the approval of the certificate director, one of the core courses may be waived with another technical course taken in its place. Unified Communications and Collaboration (TELE 6350) may not be waived under any circumstance.

*Note:* Master of Science in Telecommunication Systems Management/Telecommunication Networks students are not eligible for this graduate certificate.

### Program Requirements

#### Core Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Code	Title	Hours
TELE 5330 and TELE 5331	Data Networking and Lab for TELE 5330	4
TELE 5350	Telecom and Network Infrastructure	4
TELE 5360	Internet Protocols and Architecture	4
TELE 6350	Unified Communications and Collaboration	4

#### Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

## Software Engineering Systems, Graduate Certificate

The Graduate Certificate in Software Engineering Systems focuses on the sociotechnical approach to software engineering with attention on using engineering tools and considering real-world complexities to design and construct practical and viable software solutions.

This four-course graduate certificate is designed to provide students with opportunities to apply the fundamentals of engineering knowledge and skills to software development with attention on enterprise design and integration, secure systems design and creation, and data integration and architecture.

*Note:* Master of Science in Software Engineering Systems students are not eligible for this graduate certificate.

## Interdisciplinary Graduate Programs

### Doctor of Philosophy (PhD)

- Cybersecurity (p. 302)
- Interdisciplinary Engineering (p. 357)

### Master of Science (MS)

- Climate Science and Engineering (p. 385)
- Product Development (p. 565)

## Cybersecurity, PhD

A research-based, interdisciplinary Doctor of Philosophy (PhD) in Cybersecurity combines a strong security technical foundation with a security policy and social sciences perspective. It seeks to prepare graduates to advance the state of the art of security in systems, networks, and the internet in industry, academia, and government. The interdisciplinary nature of the program distinguishes it from traditional doctoral degree programs in computer science, engineering, or social sciences and makes it unique in the Boston area.

Students who choose the PhD in Cybersecurity program have a strong desire to pursue academic research solving critical cybersecurity challenges facing today's society. The PhD program is a natural path for students in the college's Master of Science in Cybersecurity (<http://www.ccs.neu.edu/graduate/degree-programs/m-s-in-information-assurance/>) program who want to pursue research and students with bachelor's degrees and an interest in research-focused careers. Students who pursue careers in advancing the state of the art of cybersecurity have an opportunity to gain:

- A strong technical foundation in cybersecurity and an interdisciplinary perspective based on policy and social science
- A path to a research-focused career coupled with depth in information assurance research at a leading institution, one of the earliest designees by NSA/DHS as a National Center of Academic Excellence in Information Assurance Research, Information Assurance/Cyber Defense, and Cyber Operations
- The opportunity to work with and learn from faculty who are recognized internationally for their expertise and contributions in information assurance from Northeastern University's Khoury College of Computer Sciences, the Department of Electrical and Computer Engineering, and the College of Social Sciences and Humanities
- Access to research projects at Northeastern's research centers focused on security:
  - The Cybersecurity and Privacy Institute (<https://cyber.ccis.northeastern.edu/about/>): The mission of Northeastern's Cybersecurity and Privacy Institute is to safeguard critical technology. Forging partnerships with experts in industry, government, and academia worldwide, the Institute's faculty and students develop, protect, and enhance technologies on which the world relies—from mobile devices and “smart” IoT applications to tomorrow's self-driving cars and delivery drones. Their expertise spans algorithm auditing; cloud security; cryptography; differential privacy; embedded device security; internet-scale security measurements; machine learning; big data; security, malware, and advanced threats; network protocols and security; web and mobile security; and wireless network security.
  - The International Secure Systems Lab (<http://www.iseclab.org/>), affiliated with Northeastern, a collaborative effort of European and U.S. researchers focused on web security, malware, and vulnerability analysis; intrusion detection; and other computer security issues.
  - The ALERT Center (<http://www.northeastern.edu/alert/>), where Northeastern is the lead institution, a multiuniversity Department of Homeland Security Center of Excellence involved in research, education, and technology related to threats from explosives.

The benefits of the Boston area:

- World-renowned for academic and research excellence, the Boston area is also home to some of the nation's largest Department of Defense contractors and government and independent labs such as MIT Lincoln Lab, MITRE, and Draper Lab.

### Degree Requirements

The PhD in Cybersecurity degree requires completion of at least 48 semester credit hours beyond a bachelor's degree. Students who enter with an undergraduate degree will typically need four to five years to complete the program, and they will be awarded a master's degree en route to the PhD.

### Doctoral Degree Candidacy

A student is considered a PhD degree candidate after completing the core courses with at least a 3.500 GPA, with no grades lower than a B in the core courses, and either publishing a paper in a strong conference or journal or passing an oral exam that is conducted by a committee of three cybersecurity faculty members and based on paper(s) written by the student.

### RESIDENCY

One year of continuous full-time study is required after admission to the PhD candidacy. During this period, the student will be expected to make substantial progress in preparing for the comprehensive examination.

### TEACHING REQUIREMENT

All cybersecurity PhD students must satisfy the teaching requirement in order to graduate. This requirement is fulfilled when the student works as a teaching assistant or instructor of record for one semester and during this semester:

- Teaches at least three hours of classes
- Prepares at least one assignment or quiz or equivalent

PhD students are expected to satisfy the teaching requirement some time after completing their first year and at least one semester prior to scheduling their PhD defense.

**DISSERTATION ADVISING**

The doctoral dissertation advising team for each student consists of two cybersecurity faculty members, one in a technical area. When appropriate, the second faculty advisor will be from the policy/social science area.

**DISSERTATION COMMITTEE**

With the help of the advisor, a student selects the committee, consisting of at least four members, to be approved by the PhD cybersecurity curriculum committee. The four members must include the advisor, two internal members, and an external member.

**COMPREHENSIVE EXAMINATION**

A PhD student must submit a written dissertation proposal and present it to the dissertation committee. The proposal should identify the research problem, the research plan, and the potential impact of the research on the field. The presentation of the proposal will be made in an open forum, and the student must successfully defend it before the dissertation committee after the public presentation.

**DISSERTATION DEFENSE**

A PhD student must complete and defend a dissertation that involves original research in cybersecurity.

**AWARDING OF MASTER'S DEGREES**

Students who enter the PhD in Cybersecurity program with a bachelor's degree have the option of obtaining a master's degree from one of the departments participating in the program. To do so, they must meet all of the department's degree requirements.

**Program Requirements****Bachelor's Degree Entrance**

Complete all courses and requirements listed below unless otherwise indicated.

**Milestones**

Teaching  
Qualifying exam and area exam  
Annual review  
Dissertation proposal  
Dissertation committee  
Dissertation defense

**Core Requirements**

A grade of B or higher is required in each core course. A cumulative 3.500 grade-point average is required for the core requirement.

### Program Credit/GPA Requirements

48 total semester hours required

Minimum 3.000 GPA required

### Advanced Entry Program Requirements

#### Degree Requirements

Incoming PhD in cybersecurity students who have already completed a Master of Science in an adjacent field may petition to the graduate program administration for advanced entry. Advanced entry petitions are reviewed by the program administration on a case-by-case basis. Please note that

advanced entry does not waive by itself any part of the PhD coursework requirements. As a degree conferral requirement, a minimum of 16 semester hours of coursework beyond the 32 semester hours of the master's degree is required of advanced entry PhD students (48 semester hours is required of standard entry PhD students). A grade of B or higher is required in each course. A cumulative 3.500 GPA is required for the core requirement.

### Doctoral Degree Candidacy

Refer to the PhD Cybersecurity overview (p. 302) for admission to candidacy requirements.

### Residency

Refer to the PhD Cybersecurity overview (p. 302) for residency requirements.

### Teaching Requirement

Refer to the PhD Cybersecurity overview (p. 302) for teaching requirements.

### Dissertation Advising

Refer to the PhD Cybersecurity overview (p. 302) for dissertation advising requirements.

### Dissertation Committee

Refer to the PhD Cybersecurity overview (p. 302) for dissertation committee requirements.

### Comprehensive Examination

Refer to the PhD Cybersecurity overview (p. 302) for comprehensive examination requirements.

### Dissertation Defense

Refer to the PhD Cybersecurity overview (p. 302) for dissertation defense and completion requirements.

Complete all courses and requirements listed below unless otherwise indicated.

### Milestones

Teaching  
 Qualifying exam and area exam  
 Annual review  
 Dissertation proposal  
 Dissertation committee  
 Dissertation defense

### Core Requirement

Students are required to take all core courses unless otherwise determined by the program. Students must maintain a minimum GPA of 3.500 as well as earn a grade of B or better in each core course.

## Interdisciplinary Engineering, PhD

130 Snell Engineering Center  
617.373.2711

The College of Engineering offers an interdisciplinary engineering Doctor of Philosophy degree involving substantial work in two or more academic departments or disciplines. This is an individually designed program for the student who wishes to pursue graduate studies in an area that substantially overlaps two or more units. In such cases, that student may design, in consultation with their faculty advisor(s), an interdisciplinary program. The program will correspond in scope and depth to Northeastern University's established degree standards but need not agree exactly with the regulations of individual units. Individually designed interdisciplinary degree programs must be approved by the appropriate graduate office(s).

The interdisciplinary engineering program admits applicants into the PhD program either directly after earning a suitable bachelor's degree (i.e., direct entry) or after earning a suitable master's degree (i.e., advanced entry). Upon acceptance into the program, an applicant is designated as a doctoral student. This designation is changed to doctoral candidate upon successful completion of the doctoral qualifying requirements as well as all the required coursework.

### Program Requirements

In order to pursue an individually designed interdisciplinary engineering graduate program, a student must have been accepted into an approved graduate program that will serve as the administrative home unit for the interdisciplinary engineering program:

- Department of Bioengineering (p. 348)
- Department of Chemical Engineering (p. 364)
- Department of Civil and Environmental Engineering (p. 380)
- Department of Electrical and Computer Engineering (p. 409)
- Department of Mechanical and Industrial Engineering (p. 473)

Students who have been dismissed from any of the COE departments will not be able to enroll into the interdisciplinary engineering PhD program with the department from which they were dismissed as either home or participating department. Successful application for admission to an individually designed interdisciplinary program consists of a written proposal describing the areas of proposed study and research. Part of this proposal will be a list of courses to be taken, a description of the qualifying and comprehensive examination process to be used, a timeline, and any other requirements of the program.

The interdisciplinary engineering PhD requires the commitment by a faculty member at Northeastern to be the advisor of the student and chair of the interdisciplinary committee for the student. This faculty member may or may not be a member of the administrative home unit. The committee must be assembled within the first semester of the program and must include faculty members from all of the participating units. At least two units must be represented on the committee. This committee will be responsible for overseeing the completion of the degree requirements. It will also be responsible for the administrative elements of the program, such as the monitoring of satisfactory progress; the design and grading of the preliminary and comprehensive exams, if applicable; graduation clearance; etc. This interdisciplinary committee is also responsible for an annual review of the progress of the student and for reporting this progress to the administrative home unit on an annual basis.

### Qualifying Examination and Degree Candidacy

Interdisciplinary engineering PhD students must register for and pass the doctoral qualifying examination of their home department. In some cases, if deemed necessary by the interdisciplinary committee, students may be required to take some part of the doctoral qualifying examinations of the other department(s) involved with the student's program of study. To qualify as an interdisciplinary engineering doctoral candidate, students must successfully complete the doctoral qualifying examinations in addition to all their required coursework.

### Dissertation

Students must present their dissertation proposal no more than 12 months after successfully completing their doctoral qualifying examinations. In addition, the presentation of the dissertation proposal and the actual dissertation defense shall be no less than six months apart. Interdisciplinary engineering PhD students must follow the dissertation guidelines of their home department.

### Residency Requirement

After achieving PhD candidacy, students must complete at least two successive semesters of full-time study on campus to establish residency. The total effort for a PhD program involves a minimum of three years of full-time work beyond the bachelor's degree. Students who enter the doctoral program with a Master of Science degree may complete the requirements in less time but should anticipate at least two years of full-time effort.

### Language Requirement

Each doctoral candidate must be proficient in technical writing and oral presentation in the English language. The qualifying examination committee may require additional coursework in the case of any deficiency in these areas.

## Program Requirements

### Direct Entry

Complete all requirements listed below unless otherwise indicated.

### Milestones

Doctoral qualifying exams (both written comprehensive and oral area exams)

Annual review

## Product Development, MS

Product development is in demand across many technology industries and is widely thought to be the engine of innovation. The Sherman Center for Entrepreneurial Engineering Education is uniquely positioned to offer students a combination of product process and technical skills. The mission of the center is to enable interdisciplinary student entrepreneurship in the broadest sense by providing education about tools, concepts, and resources to foster creativity and the ability to develop commercially viable ideas.

Products ranging from smart devices, to the Internet of Things, to software as a service all require people with product development skills. These positions guide product innovation and lead in crafting products for users. A look at any careers page for any technology firm currently hiring shows many positions open for individuals that have a mix of technical and product development knowledge.

The Master of Science in Product Development program contains a core of courses that span the product development cycle and then allows students to customize the rest of their degree to fit their chosen industry or path. The core courses cover topics such as customer acquisition, technical market analysis, product life cycle, intellectual property, prototyping, iterative development, product design, user testing, and manufacturing.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
GE 5010	Customer-Driven Technical Innovation for Engineers	4
GE 5020	Engineering Product Design Methodology	4
GE 5030	Iterative Product Prototyping for Engineers	4
GE 5100	Product Development for Engineers	4

#### Options

Complete one of the following options:

##### COURSEWORK OPTION

## Graduate Certificate Programs

The College of Engineering offers numerous graduate engineering certificates for professionals at every career stage. These certificates may be completed as stand-alone credentials or in combination with a graduate degree. They typically consist of 16 to 20 semester hours and allow the learner to quickly gain a credential to advance their skills and knowledge, meet an emerging career market need, or add to their professional preparation. In many cases, graduate coursework completed as part of a certificate program may be applied toward a graduate degree in the College of Engineering. Whether you are a working professional seeking new career opportunities, or a full-time graduate student looking to enhance your credentials, our broad and continuously expanding range of certificates are ready to help move your preparation forward.

### Programs

The College of Engineering offers numerous graduate certificates that may be completed alone or in combination with an MS degree. Please see for Certificate Policies and Procedures (<https://coe.northeastern.edu/wp-content/uploads/pdfs/coe/gse/policies/CertPolicy.pdf>) for detailed information regarding College of Engineering graduate certificates.

### Chemical Engineering

- Process Safety Engineering (p. 379)

### Civil and Environmental Engineering

- Climate and Engineering (p. 407)
- Sustainability Engineering (p. 408)

### Mechanical and Industrial Engineering

- Data Analytics Engineering (p. 526)
- Energy Systems (p. 527)
- Energy Systems Management (p. 528)
- Renewable Energy (p. 534)
- Sustainable Energy Systems (p. 535)

### Engineering Business

- Engineering Business (p. 529)

### Engineering Management

- Engineering Economic Decision Making (p. 531)
- Engineering Management (p. 532)
- Lean Six Sigma (p. 533)
- Supply Chain Engineering Management (p. 536)
- Technology Systems Management (p. 537)

### Gordon Institute of Engineering Leadership

- Engineering Leadership (p. 551)

### Multidisciplinary

## Bouvé College of Health Sciences

Website (<https://bouve.northeastern.edu/>)

**Carmen C. Sceppa, MD, PhD, FGSA**, Dean

**Jennifer Kirwin, PharmD, BCPS, FNAP**, Associate Dean for Academic Affairs  
Clinical Professor—Department of Pharmacy and Health Systems Sciences, School of Pharmacy

215 Behrakis Health Sciences Center  
617.373.3323  
[Bouve\\_College\\_of\\_Health\\_Sciences@northeastern.edu](mailto:Bouve_College_of_Health_Sciences@northeastern.edu)

The Bouvé College of Health Sciences strongly supports the mission of Northeastern University as a practice-oriented, student-centered, experiential research institution. The college is committed to the goals of the university, which include excellence in education, research, scholarship, clinical practice, experiential learning, access to educational opportunities, and a strong professional orientation.

Bouvé offers students an education in health, health profession fields, and public health that features a curriculum of highly relevant, closely integrated, basic and applied courses in the physical, biological, behavioral, social, environmental, and health systems sciences. Students engage in interprofessional patient care, interdisciplinary translational research, and experiential learning opportunities through service-learning, research, and global experiences.

Bouvé leverages interdisciplinary and interprofessional collaboration to tackle the world's most pressing health challenges. The college seeks to prepare students to become clinicians, researchers, and leaders in healthcare and in the promotion of health of individuals and populations.

Students are provided a broad range of services and programs to ensure their academic success and professional development. Faculty are deeply committed to student success, as students interact with world-class healthcare and educational institutions nationally and globally, to advance health for all.

## Academic Policies and Procedures

### I. General Information and Overview

- Academic and Professional Conduct
- Scientific or Research Misconduct
- Accommodations for Students with Disabilities

### II. Experiential Education

- Background Checks
- Health Requirements (p. 571)
- Liability Insurance
- Experiential PhD Opportunities (<https://phd.northeastern.edu/experientialphd/>)
- Requirements for Clinical, Internships, and Practicum Courses

### III. Financial Awards

- Financial Awards
- PhD Funding

### IV. Advising

- Academic Advising and Student Advisement Responsibilities

### V. Courses and Grades

- Grading Policies (see Academic Progression)
- Course Substitution
- Transfer of Credit

### VI. Program Status and Progression

- Academic Affairs Appeals Process
- Academic Dismissal
- Academic Probation Policy
- Academic Progression
- Academic Standing (p. 584)
- Graduation Policies
- Leave of Absence (see Academic Progression)
- Program Extension Procedures (p. 583) (see Academic Progression)
- Conditional Acceptances (see Academic Progression)
- Withdrawal Procedures (p. 583) (see Academic Progression)

### VII. Current Student Resources

- BCHS Student Forms
- BCHS Student Handbooks (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Handbooks.aspx>)

## Background Checks

Clinical education sites require background checks and/or drug screenings for employees, as well as for students who come to their facilities. All Northeastern University students will need to have background checks/drug screenings completed if their assigned clinical placement requires it. The college contracts with third-party vendors (such as Universal Background Screening, American DataBank, etc.) to perform these checks and screenings. These companies charge fees to conduct background checks/screenings, depending on the type of background check/screening needed. Students are responsible for any fees charged by companies conducting background checks/screenings.

All background check information is confidential. Results are posted to the company website in a secure, protected environment. A student may view their results online using a password. A student will be contacted by their program director, chair, or assistant dean if there is a question about the results. Neither a student nor the company is required to reveal the actual results of the background check to the clinical site. However, a student may be unable to be placed at that clinical site based on the site's requirements.

If an assigned clinical site requires a student to have a background check/screening, the on-campus clinical coordinator/clinical placement office will post the requirements and provide instructions and a deadline for completing the check. To ensure adequate processing time prior to the start of the clinical experience, it is crucial that the check be completed in advance of the deadline given. Failure to complete the check in a timely manner could jeopardize progression in the academic program.

***These policies and/or procedures apply to Bouvé's undergraduate and graduate students.***

## Health Requirements

Students must comply with any university-wide health requirements (<http://catalog.northeastern.edu/undergraduate/information-entering-students/health-requirements-uhcs/>).

As a condition of matriculation at Northeastern University, all students are required to submit the completed University Health Report form. Consult the UHCS website (<https://www.northeastern.edu/uhcs/forms/university-health-report/>) for instructions and deadlines to submit the University Health Report form. UHCS may block the registration of those students who do not file the required form(s).

### Clinical Clearance

Based on clinical education site requirements and associated clinical affiliation agreements, some programs in the Bouvé College of Health Sciences will require additional medical documentation and health certification. Additional requirements may include, but are not limited to, exam or statement of good health prior to registration, annual proof of physical examination, and/or proof of additional immunities. This "clinical clearance" may be required by some programs prior to engaging in clinical, internship, or fieldwork. Students should review the UHCS website (<https://www.northeastern.edu/uhcs/forms/clinical-clearance/>) for general information about clinical clearance as well as consult their major/program handbook and/or consult their program's director or clinical placement coordinator for more information.

*These policies and/or procedures apply to Bouvé's undergraduate and graduate students.*

## Liability Insurance

Students on clinicals, clinical practicum, or clinical internships, under a clinical agreement with the university, are covered by Northeastern University's liability insurance program for claims arising out of the student performing assigned duties in the scope of their studies. Students should consult their clinical placement office, program director, and program policies for more information about liability insurance. If students have questions about their placement and the insurance provided, they may contact Risk Services ([http://www.northeastern.edu/risk\\_services/](http://www.northeastern.edu/risk_services/)).

## Requirements for Clinical, Internships, and Practicum Courses

- Some Bouvé programs require courses with clinical, internship, or fieldwork components. Such components are offered at affiliated hospitals, clinics, schools, medical facilities, or other institutions and involve contractual agreements with these institutions or sites.
- Some Bouvé programs have cooperative education requirements. Students secure co-ops through a job search process and are employees of an institution while on co-op. Co-op students are subject to the policies, procedures, and requirements of their employers.
- The university is affiliated with numerous clinical sites across the country and around the world. Depending on the program, students may be required to travel outside of Massachusetts to complete clinical courses. Students are responsible for any costs associated with transportation and/or housing.
- Evaluation for clinical courses will be based on established guidelines and policies that students will receive prior to and/or during the clinical component. Periodic performance evaluations will take place during the course of the academic term. See specific program clinical policies and procedures, handbooks, or course syllabi for details.
- In order to enroll students in university-sponsored accidental injury insurance, elements of students' demographic information (including date of birth, address, and phone number) will be communicated via a university-contracted third-party clinical database to Risk Services and to the company providing the coverage. In addition, programs may use elements of a student's demographic information in the process of site onboarding. Students may refer to the university privacy policy (<https://www.northeastern.edu/privacy-information/>) and contact their program director or clinical placement office for more details.

### Student Conduct

- Students assigned to an institution or site for instruction are expected to adhere to the rules and regulations of that institution. Failure to adhere to these rules may result in dismissal from that institution or site.
- Students should be aware that, while participating in any form of clinical practice, they continue to be under the jurisdiction of the university. Any breaches of conduct committed by a student in a clinical setting that would be a violation of the university Code of Student Conduct (<http://www.northeastern.edu/osccr/code-of-student-conduct/>) or relevant unit-specific Professional Code of Conduct shall also be considered a cause for disciplinary action against the student.
- All students are required by federal and state law to respect the confidentiality of the patients' and/or students' records under the Health Insurance Portability and Accountability Act and/or Family Educational Rights and Privacy Act, respectively, to which they may be privy. This includes, but is not limited to, patient/student identity and identifiers, diagnostic tests performed, medical history, special needs, and medications prescribed. For more information, students should contact their on-campus clinical education coordinator and/or clinical education site coordinator.

### Health Clearance, Background Check, and Training Requirements

- Evidence of health clearance is required for experiential courses (including clinicals, internships, and practicums) in their field of study. All students, regardless of age, must have a current physical exam, tuberculin test, and documentation of immunity on file at University Health and Counseling Services (<https://www.northeastern.edu/uhrs/>) and provide such documentation to their on-campus clinical coordinator/clinical placement office as requested.
- Students must meet the health clearance requirements of their academic program and any site-specific requirements prior to entering the clinical setting. This means that students must make arrangements for their physical exams and immunizations months before they are scheduled for a clinical course or rotation. Students who do not present the appropriate health certification will be prohibited from attending a clinical course or rotation until satisfactory evidence is provided. Students who do not meet site-specific requirements may not be able to pass a clinical course and risk their ability to complete the degree program.
- Some programs use clinical clearance software packages (such as Exxat, Complio, or CastleBranch) to ensure compliance with health clearance requirements. In these cases, students are responsible for software account fees. Fees will be paid by the student directly to the software company.
- More specific guidelines are available from UHCS in 135 Forsyth, online at UHCS (<https://www.northeastern.edu/uhrs/forms/clinical-clearance/>), or from the individual program's clinical placement office. Guidelines are updated periodically, and students must meet the most current guidelines or they will not be allowed into a clinical area.
- School of Nursing students must provide evidence of health documentation utilizing an immunization tracker in order to ensure that documents are updated on a yearly basis. All fees required for the immunization tracking will be paid by the student directly to the tracking service.
- In preparation for clinical education experiences, all students will complete on-site training in universal precautions and safe practices offered by the Office of Academic and Research Safety (<https://oars.northeastern.edu/>) or training vetted and approved by the Office of Environmental Health and Safety and offered by their program. Students must also complete an annual online refresher course in blood-borne pathogens exposure.
- Students may be required to complete background checks/drug screening prior to engaging in clinical, internship, or fieldwork courses as outlined in this catalog (p. 570).

### POLICIES FOR INTERNATIONAL STUDENTS

- Students in F-1 visa status must consult with the university's Office of Global Services (<https://international.northeastern.edu/ogs/>) before enrolling in clinical, internship, practicum, off-campus directed study, or capstone courses in order to discuss proper documentation for these

curriculum requirements (see also F-1 Curricular Practical Training (<https://international.northeastern.edu/ogs/employment/curricular-practical-training-cpt-f1/>)).

- Graduate international nursing students must have a current U.S. nursing license.

### Academic, Professional, or Research Misconduct

The healthcare professions represented by the programs in Bouvé College require more of their members than simple mastery of technical knowledge and skills. Equally important is the ability to earn the respect and confidence of those who seek medical care. The nearly universal existence of codes of conduct and standards of professional ethics and behavior in these disciplines is evidence that certain types of conduct are expected in order to promote this respect and confidence. Fundamental to most of these codes is an understanding that healthcare professions require individuals who conduct their activities in a manner that reflects a total concern for the well-being of the patient. Violations of ethical conduct may be grounds for dismissal from the program. Students are expected to learn and practice the conduct that is appropriate to their professions and promotes the physical and mental well-being of the patient.

Bouvé students are expected to adhere to the highest academic and professional standards. The university Code of Student Conduct (<http://www.northeastern.edu/osccr/code-of-student-conduct/>) sets forth the university's expectations of behavior that promotes the safety and welfare of the Northeastern University community. The university Code of Student Conduct defines various aspects of academic misconduct, such as cheating and plagiarism. Lack of knowledge of these definitions does not negate the student's responsibility for upholding them. Academic misconduct is regarded as a serious violation of ethical standards and may result in the student's immediate dismissal from the program.

Failure to meet these standards, including misconduct in academic, professional, or research activities, will result in disciplinary action. Such actions may include a lowered or failing grade in the course, probation, suspension, or immediate dismissal from the program. **Students found responsible for academic, professional, or research misconduct will have a letter placed in their permanent file stating the pertinent findings of their case.** No student may withdraw from a course in which they have been notified that they will fail for a specific finding of academic dishonesty.

In addition to maintaining complete honesty in all academic work, students admitted to clinical or professional programs in the Bouvé College of Health Sciences are expected to familiarize themselves with the code of ethical conduct of the professional discipline they are entering and to agree to uphold these principles.

Similarly, students who participate in research programs are expected to familiarize themselves with the code of ethics in research. Such a code is outlined in Guidelines for the Conduct of (<https://oir.nih.gov/sourcebook/ethical-conduct/research-ethics/nih-guidelines/>) *Research*. Ethical codes of conduct for researchers are also presented in the National Academy of Sciences' (<https://www.nap.edu/catalog/12192/on-being-a-scientist-a-guide-to-responsible-conduct-in/>) *On Being a Scientist, A Guide to Responsible Conduct in Research* (<https://www.nap.edu/catalog/12192/on-being-a-scientist-a-guide-to-responsible-conduct-in/>). Violations of research ethics can include, but are not limited to, falsification or fabrication of data, plagiarism, malicious allegations of misconduct in science, covering up or failing to report misconduct, obstructing due process in investigations of misconduct, and reprisals against those revealing misconduct.

See also the *Scientific or Research Misconduct* section of the Academic Appeals Policies and Procedures (p. 70) page in this catalog.

***These policies and/or procedures apply to Bouvé's undergraduate and graduate students, unless specifically indicated otherwise in this section of the catalog.***

## Financial Awards

Northeastern University and the Bouvé College of Health Sciences offer a variety of financial awards to graduate students. For further information about awards, please refer to the Financial Aid Assistance (p. 36) section of this catalog and the Student Financial Services (<https://studentfinance.northeastern.edu/applying-for-aid/graduate/>) website.

If a student is offered other grant aid from the university, they will only receive the scholarship of higher value.

## Advising

The unit director or another faculty member will be appointed by the program director to serve as the student's academic advisor throughout their course of study at the Bouvé graduate school.

The advisor will assist the student in understanding program requirements and in defining career goals and objectives of graduate work. The advisor will also monitor the student's progress toward successful completion of the degree.

### **Student Advisement Responsibilities**

Students share responsibility with their advisor for successful matriculation and progression in their graduate program. In many programs, students are required to make appointments for academic advisement at least twice a year and must regularly update their curriculum plan with their advisor. The curriculum plan is kept on file in the respective program's office. Both student and advisor retain a copy of the curriculum plan. Students must contact their academic advisor prior to making changes to their curriculum plan and must seek assistance regarding academic issues in a timely manner.

## Course Substitution

A student must obtain approval from the student's academic advisor and the Bouvé Office of Student Services to substitute a graduate course completed for a prior degree for the student's program requirement. The student must provide official transcripts of completed coursework, accompanied by the respective course syllabi, to the advisor in order to verify its equivalency to the proposed course substitution. The student then must submit the signed Course Substitution (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Forms.aspx>) form and the official transcript to the Bouvé Office of Student Services. If the Course Substitution (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Forms.aspx>) form is approved, the student must still complete a course of equivalent number of credits as a replacement for the substituted course to fulfill the program's academic requirements. The course must be listed in this catalog as either a core or elective course for the program.

## Transfer of Credit

For general regulations concerning transfer credit in Northeastern's graduate degree programs, please visit Regulations and Requirements for All Degree Programs (p. 91).

Students who wish to take a course for transfer at another institution while enrolled at Bouvé should first receive preapproval from their academic advisor and the Bouvé Office of Student Services. The Graduate Petition to Transfer Credit form can be found at the Office of the University Registrar (<https://registrar.northeastern.edu/article/transfer-credit/>).

A Bouvé student may not complete coursework at another institution during the last term of the student's program intending to transfer back to Northeastern to complete the student's program.

## Academic Affairs Appeals Process

### Purpose of the Bouvé College Academic Affairs Committee

- The college Academic Affairs Committee acts on matters relating to the academic and professional standing of all Bouvé students in the college who have already appeared before the unit's Academic Standing Committee and school dean, department chair, or designee.
- Issues pertaining to academic and co-op status and professional behaviors violations, including but not limited to warning, probation, permission to resume studies, changes in requirements, and repeating courses, fall within the jurisdiction of the AAC. The AAC also considers student appeals relative to academic or cooperative education judgments by faculty, coordinators, or others acting on behalf of the university, when such appeals arise from a violation, misinterpretation, or inequitable application of the academic provisions outlined in the University Catalog, Cooperative Education Handbook, or student handbooks.
- Appeals arising from allegations of discrimination or harassment on the basis of a protected category should be referred to the Office for University Equity and Compliance (<https://www.northeastern.edu/ouec/>). The Disability Resource Center (<http://www.northeastern.edu/drc/>) provides an appeal process for students with disabilities who believe their accommodation requests were unduly denied. If other allegations remain at the conclusion of those inquiries, then the student may refer them to the dean for review by the AAC of the college.

### Graduate Student Academic Appeals Procedures

The university policy on graduate student appeals of academic standing or other academic decisions may be found in the graduate sections of this catalog. Academic, professional, scientific, and research misconduct is addressed in the Academic Appeals Policies and Procedures (p. 70) page as well as on the Requirements for Clinical, Internships, and Practicum Courses page in this catalog.

#### LEVELS OF THE APPEAL PROCESS

Please see the Academic Appeals Policies and Pro (<http://catalog.northeastern.edu/graduate/academic-policies-procedures/appeals/>) cedures (<http://catalog.northeastern.edu/graduate/academic-policies-procedures/appeals/>) page in the graduate catalog for the process steps involved in graduate student appeals.

#### **Step 1:**

Discuss concerns with instructor and/or administrator.

#### **Step 2:**

If the concern remains unresolved after discussions in step 1, prepare and submit an appeal statement. Students are encouraged to contact their academic advisor for guidance.

#### **Step 3A: BCHS Unit-Level Appeal**

The first step in an appeal in the Bouvé College of Health Sciences is to the unit-level Academic Standing Committee of the unit offering the course. Such appeals should be submitted within 28 calendar days of the day when the student learns of the academic determination. The unit's ASC must provide the student and involved faculty member with a written report of the finding(s) and decision within 10 business days.

#### **Step 3B: Department Chair- or School Dean-Level Appeal**

If the student believes they have been erroneously, capriciously, or otherwise unfairly treated with the unit-level committee's decision, they may pursue a secondary appeal to the next level as specified below:

School of Clinical and Rehabilitation Sciences: department chair of the unit offering the course or program

School of Community Health and Behavioral Sciences: department chair of the unit offering the course or program

School of Nursing: school dean

School of Pharmacy: school dean

The student must request the appeal by contacting the specified office in writing via email within 10 business days of receiving the report from the previous step. After consideration, the department chair or school dean, or their representative, shall provide the student and involved faculty member with a written report of their finding(s) and decision within 10 business days of receiving the appeal request.

#### **Step 3C: College-Level Appeal**

If the student is not satisfied with the disposition of the matter at the previous step, they may proceed with the appeal through the BCHS AAC. The BCHS AAC hears cases that have been unsatisfactorily resolved at the prior school and unit levels for "students who believe that they have been erroneously, capriciously, or otherwise unfairly treated" or may directly hear appeals concerning final course grades or when a unit does not have a unit-level committee.

The student must request an appeal hearing in writing (via email) within 10 business days of receiving the report from the previous step. After consideration, the college dean or their representative shall provide the student and involved faculty member with a written report of their finding(s) and decision within 10 business days of receiving the appeal request.

***Processes for College-Level Appeals to the BCHS AAC***

- Students wishing to bring an appeal before the college AAC should first consult with their appointed academic advisor, or when the appeal involves the academic advisor, with the assistant dean of student services.
- The chair of the college AAC will convene the college appeals panel from among the regular members of the BCHS AAC. The appeals panel will include three voting members of the BCHS AAC that appropriately represent the breadth and depth of programs within the college. At minimum, two schools will be represented on the panel and at least one member who teaches within a similar degree-level program. Members of the panel shall have no known conflicts of interest with the student. The assistant dean of student services and the chair of the AAC will attend the appeal panel hearing as nonvoting members.
- The chair for the appeal panel shall be selected from among the panel members and is responsible for producing a formal recommendation of the committee for communication to the college dean.
- The chair of the AAC will be responsible for scheduling the meeting, notifying the student and other participants in a timely manner so they may attend, and keeping and archiving records of the proceedings according to committee procedures.
- The chair of the appeal panel will notify the college dean of the findings and recommended decision. The college dean will have the final decision.
- The college dean will notify the student and other relevant parties of the decision in writing no later than 10 business days after the decision.

***Step 4: University Level***

If the student is not satisfied with the college's disposition of the matter or if the appeal is not resolved within the timeline outlined in the Academic Appeals Policies and Procedures, the student may appeal to the university level, as outlined in this catalog.

## Academic Dismissal

A student may be dismissed from a graduate program when they have failed to maintain academic requirements or have violated a policy that specifies immediate dismissal. All students shall have an opportunity to correct academic deficiencies during an appropriate probationary period before dismissal is instituted, except when the policy specifies "immediate dismissal."

Students may be subject to dismissal from a program under the following conditions. (*Note:* Additional requirements that are not included in this list, but are specific to the student's major, may also apply.)

- The student exhibits unethical behavior or misconduct in their academic program, practicum, internship, or research.
- The faculty instructor and/or the clinical supervisor determines that the student has demonstrated unsafe or inappropriate behavior in a clinical setting.
- The student does not register for at least one class for two consecutive semesters and does not have an approved leave of absence.
- The student has a cumulative grade-point average below 3.000 at the end of the probationary period specified by the action plan.
- The student does not demonstrate satisfactory performance in achieving the objectives of a clinical course.
- The student fails to meet all the requirements of the program within the specified time limit mandated by the program and has not been approved for a formal extension.
- The student in a PhD program fails to successfully complete the PhD qualifying/comprehensive exams as stipulated by the program.
- The student fails to progress satisfactorily in research or fails to identify a committee for their thesis or dissertation within the time specified by the policies of the specific program.
- The student has failed to file an action plan within one month of notification of probation.
- The student has failed to meet the requirements of the action plan, including requirements that are specific to the student's major.
- The student has failed three courses or has failed the same course twice.

### Dismissal Procedures

Dismissal of a student from a program is initiated by the program director once the basis for the dismissal is provided to and reviewed by the Bouvé Office of Student Services. The program director will then notify the student of the dismissal. Students may then appeal the dismissal via the Bouvé College Academic Affairs Appeals Process (p. 579). *Note:* Students dismissed from their major/program but who are otherwise in good standing with the university are allowed to remain at Northeastern University for up to two semesters as a provisional Bouvé student, by the end of which, the student is expected to move into a new major. If not moved into a new major by the end of two semesters, the student will be blocked from further registration.

When a student is dismissed from the university, they are not permitted to remain registered for courses in the immediate next academic term. If the university dismissal is successfully appealed, a student may register for classes in the following academic term.

## Academic Probation Policy

Academic probation is a period of time when a student must address and remediate academic deficiencies.

A Bouvé graduate student may repeat a course only once to achieve a passing grade and may repeat only two courses during the entire program of study. A student may be on probation for only two semesters, or until the course is offered again, unless the advisor approves an action plan that specifies a longer (but definite) period. A student may only be placed on probation twice during enrollment in Bouvé and must correct all deficiencies, as specified, in each respective action plan during the applicable probationary period. Failure to remediate the deficiency within the agreed time may result in dismissal from the program. During the period of probation, the student must earn a GPA of 3.000 or better each semester, or the student is subject to dismissal from Bouvé. Note that individual graduate programs may have additional requirements that must be included in the probation action plan.

A student will be removed from academic probation after the student has attained a cumulative GPA of 3.000, earned a passing grade in a repeated course, and/or demonstrated satisfactory performance in a clinical course.

### Academic Probation Procedure

Academic standing is determined at the conclusion of every term and students on academic probation are notified via email. Students on probation are required to meet with their advisor before the end of week two of their probationary semester to complete an Academic Probation Contract (<https://bouve.northeastern.edu/student-services/webforms/>). Once the contract is completed and signed, students are required to submit it to both their program and their Student Services designee, no later than the end of week three of the probationary term. Failure to submit an Academic Probation Contract in a timely manner may result in dismissal from the college.

The program will review the student's contract and provide any additional feedback or recommendations for the student and return a signed copy to the student. Advisors or a Student Services representative will meet with students on academic probation throughout the semester to benchmark progress and assess compliance with the contract during weeks four, 10, and 12.

A review of the student's progress will occur at the end of the term.

- If a student returns to good standing, they will no longer be on academic probation.
- If a student does not return to good academic standing, their compliance with their contract will be reviewed:
  1. If a student was compliant with the contract, they will be required to submit a second Academic Probation Contract to the unit.
  2. If a student did not comply with the contract, they may be dismissed from Bouvé with an option to appeal.

## Academic Progression

### Program Status and Progression

All degree requirements must be completed within seven years of matriculation, although individual academic programs may require completion in a shorter time frame. Each student is responsible for reviewing the requirements for the student's particular program. A student's failure or inability to register does not extend the amount of time allowed to complete the program. Students should be registered by the first week of each semester (fall, spring, and, where indicated, summer). Course credits earned in programs of graduate study are valid for a maximum of seven years. A student may request an extension of these time frames from the program director and the Bouvé associate dean for academic affairs.

After reaching candidacy, students must register for Dissertation for a minimum of two semesters. Continuation status enrollment is for students who are postcandidacy, have completed all coursework and their residency requirement, and are actively engaged in completing a dissertation.

In order to progress in clinical courses that are sequenced, a student must receive a passing grade in all prior courses in the sequence. In the event that a student fails a clinical course that is not part of a sequence, progression is at the discretion of the student's academic advisor and/or the program director. When a student fails a clinical course that is part of a sequence of courses, the course instructor must notify the Bouvé Office of Student Services. Course material related to the student's failure (e.g., examination reports, clinical reports) must be made available to the student for review.

### ANNUAL REVIEW FOR PHD STUDENTS

The academic progress of each PhD student will be evaluated through an annual review. A copy of each review shall be submitted to the student and the Graduate Office. If the annual academic review reports that a student is not making sufficient academic progress due to research performance, the PhD student will be placed on academic probation. After two consecutive semesters on academic probation, the student may be dismissed from the program.

### CONDITIONAL ACCEPTANCES

A student who is accepted *conditionally* to a graduate program at Bouvé College of Health Sciences must meet the conditions set in the acceptance letter *before* the student matriculates into the program and prove that they have fulfilled the stated condition(s). Examples of conditions include receipt of official verification of previous degree completion, completion of missing prerequisite courses, receipt of a missing recommendation, receipt of standardized test scores, and translation of international documents.

Students who fail to meet the conditions of their acceptance may be subject to dismissal from the program.

### PROGRAM EXTENSION PROCEDURES

Students may seek an extension to complete their program of study only under documented extenuating circumstances. The student must complete the Graduate Program Status Change (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Forms.aspx>) form and an action plan to complete the degree requirements. The form and the proposed action plan must be submitted to the program director and to the Bouvé Office of Student Services for approval. After the form is reviewed, a program extension may be granted.

### LEAVE OF ABSENCE

Students planning on taking a leave of absence should first meet with their academic advisor to discuss their intention to submit a request for a leave of absence one month prior to the start of the semester during which they plan to take the leave. After meeting with their academic advisor, the student should then submit the leave of absence petition through the Student Hub. Students returning from a leave of absence should notify the Bouvé Office of Student Services of their intent to return at least one month prior to the start of the semester. Students with an approved leave of absence who do not return at the end of the leave of absence period will be withdrawn by the university. Please refer to the Leaves of Absence and University Withdrawal (p. 57) in this catalog for more information and policies on leaves of absence. Individual programs may have additional procedures related to leaves of absence. Consult the program's overview and requirements page in this catalog in addition to the information above.

### WITHDRAWAL PROCEDURES

Students can withdraw from the university only through the Student Hub. *Students are responsible for dropping any courses in which they are currently registered and should have an exit interview with their financial aid advisor.* Faculty members are not responsible to notify the university of a student's withdrawal. For more information on withdrawal procedures, please refer to the Graduate Academic Policies and Procedures (<http://catalog.northeastern.edu/graduate/academic-policies-procedures/policies/>) page. For information concerning refund policies, please refer to the Student Financial Services website (<http://www.northeastern.edu/financialaid/policies/>).

### GRADING POLICIES

Requirements for fulfillment of a degree in the Bouvé College of Health Sciences graduate school vary by program. Students must consult their individual academic program's requirements page in this catalog, as well as program directors (*if applicable*), for specific credit and noncredit requirements necessary to earn a specific degree. See also Graduate Academic Policies and Procedures (<http://catalog.northeastern.edu/graduate/academic-policies-procedures/policies/>) for more information.

## Academic Standing

Academic standing in Bouvé is determined by the student's cumulative grade-point average and performance in academic and clinical courses that are required by the student's program. All Bouvé students are expected to maintain a cumulative GPA of 3.000 each semester to remain in good academic standing and to progress toward graduation. Students who do not maintain a cumulative GPA of 3.000 each semester will be placed on academic probation (p. 582).

Each program has its own minimum grade requirements. Please review the program's requirements page in this catalog for details.

### Academic Standing Petitions

Students must submit petitions to their program's academic standing committee, graduate committee, or program director (as applicable) to request:

- A leave of absence (<https://registrar.northeastern.edu/article/leaves-of-absence/>)
- A waiver of policy
- A change in probationary status (see webform here (<https://bouve.northeastern.edu/student-services/webforms/>))
- A change in program (see Graduate Program Status Change form (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Forms.aspx>))
- A change of status in program (e.g., full-time to part-time or vice versa; see Graduate Program Status Change form (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Forms.aspx>))
- A different course of action regarding their academic standing, progression, probation, or dismissal (see webform here (<https://bouve.northeastern.edu/student-services/webforms/>))
- An extension of degree completion time (see Graduate Program Status Change form (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Forms.aspx>))
- A transfer or waiver of credits or preapproval for course to be taken for transfer (see Graduate Petition to Transfer Credit (<https://registrar.northeastern.edu/article/transfer-credit/>))
- Directed study (see Individual Instruction Registration (<https://registrar.northeastern.edu/article/individual-instruction-registration/>))

The petition must include all relevant information. Students may be required to provide extra documentation such as official transcripts and/or course descriptions. A copy of this action is filed in the student's permanent record in the Bouvé College of Health Sciences Office of Student Services.

## Graduation Policies

### Eligibility to Graduate

Students are eligible for graduation under the following conditions:

- The student is in good academic standing with a cumulative grade-point average of 3.000 or above.
- The student has earned at least the minimum number of credits required to complete the student's program of study.
- The student has fulfilled other program requirements and any outstanding issues.

### Apply to Graduate

Students must apply to graduate through the Student Hub, review their degree audit for accuracy, and may choose to meet with their academic advisor for academic clearance.

### Issuance of Diplomas and Certificates

Diplomas and certificates are issued three times a year (December, May, and August), but there is only a spring Commencement ceremony. Please visit the Commencement Office website (<https://www.northeastern.edu/commencement/>) to confirm eligibility to participate in the spring Commencement ceremony.

### Completing a Thesis for a Master's Program

Students completing a thesis as part of the program's academic requirements are required to complete the following **at least five business days before the final grade submission deadline for the academic term**:

- Upon successful defense of the thesis, the student must have the Thesis Approval (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Forms.aspx>) form signed by the members of the thesis committee.
- The student must submit an electronic copy of the thesis to ProQuest, following the directions outlined at the University Library (<https://library.northeastern.edu/archives/archives-special-collections/use-our-collections/theses-dissertations/>) website.
- The student must have the Thesis Approval (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Forms.aspx>) form approved by a representative from the Bouvé Office of Student Services.

### PhD Program Completion

PhD degree completion has additional requirements.

- The PhD hooding and degree conferral ceremony is only held during the spring semester. PhD students may not be hooded until they have successfully defended their dissertations and completed all academic requirements.
- Students completing a dissertation must complete the following **at least five business days before the final grade submission deadline for the academic term**:
  - Upon successful defense of the dissertation, the student must have the Dissertation Approval (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Forms.aspx>) form signed by the dissertation committee members.
  - The student must submit an electronic copy of the dissertation to ProQuest, following the directions outlined in the University Library (<http://library.northeastern.edu/get-help/theses-dissertations/submit-your-thesis-or-dissertation/>) website.
  - The student must complete an exit survey, at which time the Dissertation Approval (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Forms.aspx>) form will be approved.
  - Students must submit a copy of the Survey of Earned Doctorates Certification of Completion (<https://sed-ncses.org/login.aspx>) to the Bouvé Office of Student Services before graduation. Instructions for submission of the survey will be sent to the student prior to the end of the student's last term.

## Interdisciplinary Programs

### Doctor of Medical Science (DMSc)

- Healthcare Leadership (p. 587)

### Doctor of Philosophy (PhD)

- Network Science (p. 273)
- Personal Health Informatics (p. 314)

### Master of Science (MS)

- Health Informatics (p. 314)
- Pharmaceutical Engineering (p. 374)
- Real-World Evidence in Healthcare and Life Sciences (p. 599)

### Dual Degree

- Health Informatics, MS/Physician Assistant Studies, MS (<http://catalog.northeastern.edu/graduate/health-sciences/medical-sciences/physician-assistant-studies-ms-health-informatics-ms/>)
- Law, JD/Public Health, MPH (p. 602)
- Pharmacy, PharmD (p. 603)—Direct Entry/Public Health, MPH (p. 603)
- Physician Assistant Studies, MS/Public Health, MPH (<http://catalog.northeastern.edu/graduate/health-sciences/medical-sciences/physician-assistant-studies-ms-public-health-mph/>)
- Public Health, MPH/Health Informatics, MS (p. 605)

### Graduate Certificate

- Early Intervention (p. 606)
- Health Informatics Management and Exchange (p. 607)
- Health Informatics Privacy and Security (p. 607)
- Health Informatics Software Engineering (p. 607)
- Patient Safety (p. 607)

## Healthcare Leadership, DMSc

Northeastern University's Doctor of Medical Science (DMSc) is an interdisciplinary degree designed for medical professionals to advance their education and expand their career opportunities in the areas of healthcare leadership, administration, informatics, law, safety, and advocacy. Students from diverse healthcare backgrounds share the common goal of developing facility with healthcare systems and becoming leaders within the greater healthcare community.

In addition to taking core courses in healthcare leadership, administration, and research methods, students will have the opportunity to obtain additional education in one of several areas of specialization. These concentrations are designed to empower graduates from diverse backgrounds with the technical and analytical expertise that is both relevant and in high demand in today's healthcare environment. Students will have the opportunity to collaborate with faculty not only from the Department of Medical Sciences but also with world-renowned faculty from a variety of interdisciplinary fields within Northeastern University and the greater Boston community. This collaboration will allow students to access expertise and knowledge across disciplines that will culminate in the creation of an original thesis study.

Admission to the program requires a master's degree in a healthcare-related field or a bachelor's degree plus at least three years of full-time clinical experience.

This degree will take between 12 and 18 months to complete and can be fully completed online.

Please visit Bouvé College Learning Outcomes for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

A grade of B- or higher is required in each course.

Code	Title	Hours
<b>Healthcare Leadership</b>		
MSCI 6001	Principles of Healthcare Advocacy	3
MSCI 6002	Workforce Metrics: Measuring, Comparing, and Privileging the Interprofessional Healthcare Team	3
MSCI 6003	Healthcare Leadership Seminar	3
PHTH 6204	Society, Behavior, and Health	3
<b>Research</b>		
HLTH 5410	Introduction to Statistics in Health and Behavioral Science	3
MSCI 6900	Research Methods and Design	3
MSCI 7990	Thesis	3
MSCI 7996	Thesis Continuation - Half-Time	0

#### Concentrations

Completing a concentration is required to complete this program. A minimum of 12 semester hours is required.

- Business Management (p. 588)
- Health Informatics (p. 588)
- Health Informatics Research (p. 588)
- Health Law (p. 588)
- Interdisciplinary Healthcare Leadership (p. 588)
- Patient Safety (p. 589)
- Pharmacy and Health Systems Science (p. 589)
- Public Health (p. 589)

#### Program Credit/GPA Requirements

Minimum of 33 total semester hours required

Minimum 3.000 GPA required

**CONCENTRATION IN BUSINESS MANAGEMENT**

Code	Title	Hours
Complete a minimum of 12 semester hours from the following:		12
ENTR 6212	Business Planning for New Ventures	
INNO 6200	Enterprise Growth and Innovation	
MGMT 6225	Sustainability and Leadership	
MGMT 6226	Sustainability and the Business Environment	
STRT 6200	Strategic Decision Making in a Changing Environment	

**CONCENTRATION IN HEALTH INFORMATICS**

Code	Title	Hours
<b>Concentration Required</b>		
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
HINF 6220	Database Design, Access, Modeling, and Security	3
HINF 6400	Introduction to Health Data Analytics	3
<b>Selective</b>		
Complete 3 semester hours from the following:		3
HINF 5407	Business Application of Decision Support in Healthcare	
HINF 6205	Creation and Application of Medical Knowledge	

**CONCENTRATION IN HEALTH INFORMATICS RESEARCH**

Code	Title	Hours
<b>Concentration Required</b>		
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
HINF 6220	Database Design, Access, Modeling, and Security	3
HINF 6400	Introduction to Health Data Analytics	3
<b>Selective</b>		
Complete 4 semester hours from the following:		4
CS 6350	Empirical Research Methods	
HINF 5300	Personal Health Interface Design and Development	

**CONCENTRATION IN HEALTH LAW**

Code	Title	Hours
<b>Concentration Required</b>		
LW 6102	Introduction to Legal Studies 2	3
<b>Selective</b>		
LW 6102 is a prerequisite for the LW courses listed below. Complete 9 semester hours from the following:		9
LW 6110	Law of Information and Records	
LW 6150	Law and Organizational Management	
LW 6180	Health Law Survey	
LW 6181	Healthcare Regulation and Compliance	
LW 6182	Patient Records, Privacy, and Security	

**CONCENTRATION IN INTERDISCIPLINARY HEALTHCARE LEADERSHIP**

Code	Title	Hours
Complete a minimum of 12 semester hours from the following:		12
<b>Business Management for Healthcare</b>		
ENTR 6212	Business Planning for New Ventures	
INNO 6200	Enterprise Growth and Innovation	
MGMT 6225	Sustainability and Leadership	
MGMT 6226	Sustainability and the Business Environment	
STRT 6200	Strategic Decision Making in a Changing Environment

PHTH 5212	Public Health Administration and Policy	3
PHTH 6200	Principles and History of Urban Health	3
PHTH 6208	Urban Community Health Assessment	3

## Network Science, PhD

Website (<http://www.networkscienceinstitute.org>)

The PhD program in network science aims to enhance our understanding of networks arising from the interplay of human behavior, sociotechnical infrastructures, information diffusion, and biological agents. This is an intrinsically multidisciplinary activity, with members of the network science community representing a wide range of fields including computer science, information science, complexity, physics, sociology, communication, organizational behavior, political science, and epidemiology. This is an interdisciplinary doctoral program focused on training students in network science across several colleges—including the College of Social Sciences and Humanities, the College of Science, the Khoury College of Computer Sciences, and Bouvé College of Health Sciences—with several research areas, including computational sciences, information sciences, health and life sciences, social sciences, and theoretical physics. See other collaborating colleges' catalog sections for possible elective courses.

Coursework is dependent on a student's area of research and subject to prior approval by their faculty advisor. Required coursework includes 20 semester hours of core courses in network science, plus an additional 20 semester hours of courses relevant to the students' area of research. A minimum of 40 credit hours of coursework is required, though the graduate program committee may recommend additional coursework based on student research interests.

Satisfactory progress in the program will be ongoing and formally evaluated at the end of both the first and second years of the program. Students are expected to maintain a cumulative GPA of 3.000 or better in all coursework. Students are not allowed to retake courses. A student who does not maintain the 3.000 GPA, or is not making satisfactory progress on their dissertation research, may be recommended for termination by the graduate program committee.

Each student will have one primary research advisor from the network science doctoral program faculty.

Students will be expected to select their research advisor by the end of the spring semester of their second year in the program.

The dissertation committee consists of at least four members: the dissertation advisor, one additional network science doctoral program faculty member, one member expert in the specific topic of research (can be from outside the university), and one additional tenured/tenure-track faculty member from the concentration department/conferring college. The dissertation advisor must be a full-time tenured or tenure-track member of the Northeastern University faculty. Students may repeat the comprehensive examination once if they are unsuccessful.

### Degree Candidacy

A student is considered a PhD candidate upon completion of all required coursework with a minimum cumulative GPA of 3.000, satisfactory completion of the qualification exam, and satisfactory completion of the comprehensive exam.

### Qualifying Examination

The qualification exam will be an oral examination of the material during the students' coursework. The exam will be an hour in length and consist of questions selected by network science faculty who comprise the qualifying examination and dissertation committee. Students will receive 50 to 80 potential questions, which they must be prepared to answer, one month before the exam. The exam will consist of a subset of these questions. The qualifying exam will be offered twice annually, in the fall and spring terms. All students are required to initially sit for the exam in the fall, typically in their third year of the PhD program. Students who do not pass the qualifying exam on their first attempt are expected to retake the exam in the spring term. Students may sit for the qualifying exam no more than twice.

Students who fail to complete the qualifying examination but who have completed all the PhD program's required coursework with a cumulative GPA of 3.000 or better will be awarded a terminal Master of Science in Network Science degree. Note that no students will be admitted directly into the network science program for receipt of a master's degree.

### Comprehensive Examination

Students must submit a written dissertation proposal to the dissertation committee. The proposal (with the aid and approval of their dissertation advisor) will outline a plan to carry out new and original research. The proposal should identify relevant literature, the research problem, the research plan, and the potential impact on the field. An oral presentation of the proposal will be made in an open forum before a public audience and the dissertation committee, followed by questions from noncommittee members. The written proposal must be given to committee members at least two weeks prior to the oral presentation. After the presentation, the student will meet with the dissertation committee to address any concerns raised in either the written proposal or the presentation. The comprehensive exam must precede the final dissertation defense by at least one year.

### Dissertation Defense

A PhD student must complete and defend a dissertation that involves original research in network science. The dissertation defense must adhere to Northeastern academic policies.

---

*Students who do not qualify for the doctoral degree, but who have completed required coursework with a cumulative GPA of 3.000 or better, may be eligible to receive a terminal Master of Science in Network Science (<http://catalog.northeastern.edu/graduate/social-sciences-humanities/interdisciplinary/network-science-ms/>). Note that no students will be admitted directly into the network science program to pursue a master's degree.*

## Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Milestones

Annual review  
 Qualifying exam  
 Dissertation committee  
 Dissertation proposal  
 PhD candidacy  
 Dissertation defense

### Core Requirements

Code	Title	Hours
PHYS 5116	Network Science 1	4
NETS 6116	Network Science 2	4
PHYS 7332 or NETS 7332	Network Science Data 2 Machine Learning with Graphs	4
PHYS 7335	Dynamical Processes in Complex Networks	4
POLS 7334	Social Networks (NETS )	4

### Specializations

Choose one of the following specializations or 20 semester hours of elective coursework from the electives course list:

- Computer Science (p. )
- Epidemiology (p. 274)
- Math (p. 274)
- Physics/Theory (p. 274)
- Social Science (p. )
- Coursework (p. )

#### COMPUTER SCIENCE

Code	Title	Hours
CS 5800	Algorithms	4
CS 6140 or CS 6220	Machine Learning Data Mining Techniques	4

Complete 12 semester hours of elective courses from the electives list below. Students who wish to take courses outside of the electives list below must do so in consultation with their advisor.

12

#### EPIDEMIOLOGY

Code	Title	Hours
PHTH 5202	Introduction to Epidemiology	3
PHTH 6202	Intermediate Epidemiology	3

Complete 14 semester hours of elective courses from the electives list below. Students who wish to take courses outside of the electives list below must do so in consultation with their advisor.

14

#### MATH

Code	Title	Hours
CS 5800	Algorithms	4
MATH 7233	Graph Theory	4

Complete 12 semester hours of elective courses from the electives list below. Students who wish to take courses outside of the electives list below must do so in consultation with their advisor.

12

#### PHYSICS/THEORY

Code	Title	Hours
MATH 7233	Graph Theory	4
PHYS 7321	Computational Physics	4

Complete 12 semester hours of elective courses from the electives list below. Students who wish to take courses outside of the electives list below must do so in consultation with their advisor.

12

**SOCIAL SCIENCE**

Code	Title	Hours
NETS 7350	Bayesian and Network Statistics	4
NETS 7360	Research Design for Social Networks	4
Complete 12 semester hours of elective courses from the electives list below. Students who wish to take courses outside of the electives list below must do so in consultation with their advisor.		12

**COURSEWORK**

Code	Title	Hours
Complete 20 semester hours of elective courses from the electives list below. Students who wish to take courses outside of the electives list below must do so in consultation with their advisor.		20

**ELECTIVES LIST**

Common electives include the following:

Code	Title	Hours
CS 5800	Algorithms	
CS 6120	Natural Language Processing	
CS 6140	Machine Learning	
CS 6220	Data Mining Techniques	
CS 7180	Special Topics in Artificial Intelligence	
CS 7260	Visualization for Network Science	
CS 7295	Special Topics in Data Visualization	
MATH 7233	Graph Theory	
MATH 7243	Machine Learning and Statistical Learning Theory 1	
NETS 7341	Network Economics	
NETS 7350	Bayesian and Network Statistics	
NETS 7976	Directed Study	
NETS 7983	Topics	
PHYS 7305	Statistical Physics	
PHYS 7321	Computational Physics	

**Dissertation**

Code	Title	Hours
<i>Dissertation</i>		
NETS 9990	Dissertation Term 1	
NETS 9991	Dissertation Term 2	
<i>Dissertation Continuation</i>		
Following completion of NETS 9990 and 9991, registration in the following class is required each semester until the dissertation is completed:		
NETS 9996	Dissertation Continuation	

**Program Credit/GPA Requirements**

## Health Informatics, MS

Northeastern University's interdisciplinary Master of Science in Health Informatics was the first MS in the field and is now one of the few that is fully interdisciplinary between health science and computer science.

The program seeks to prepare students to address the combined clinical, technical, and business needs of health-related professionals. Students may opt to select a concentration to deepen their knowledge in a particular area. Successful students graduate with the knowledge of how technology, people, health, and the healthcare system interrelate; the ability to use technology and information management to improve healthcare delivery and outcomes; and the skills to communicate effectively among healthcare practitioners, administrators, information technology professionals, and patients.

Please visit Bouvé College Learning Outcomes (<http://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

A grade of B– or higher is required in each course.

### Core Requirements

Code	Title	Hours
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
HINF 5105	The American Healthcare System	3

### Program Options

Choose one of the following options:

- Health Informatics (Without Concentration) (p. 314)
- Health Informatics with Health Informatics Analytics Concentration (p. 315)
- Health Informatics with Personal Health Informatics Concentration (p. 316)

### Program Credit/GPA Requirements

Minimum 33 total semester hours required

Minimum 3.000 GPA required

### HEALTH INFORMATICS (WITHOUT CONCENTRATION)

Code	Title	Hours
<b>Required Coursework in Addition to Core Requirements</b>		
<b>Business Management</b>		
Complete two of the following:		6
HINF 5407	Business Application of Decision Support in Healthcare	
HINF 6201	Organizational Behavior, Work Flow Design, and Change Management	
HINF 6202	Business of Healthcare Informatics	
HINF 6215	Project Management	
or EMGT 5220	Engineering Project Management	
HINF 6335	Management Issues in Healthcare Information Technology	
HINF 6240	Improving the Patient Experience through Informatics	
PHTH 5226	Strategic Management and Leadership in Healthcare	
<b>Health Informatics</b>		
Complete two of the following:		6
HINF 5102	Data Management in Healthcare	
HINF 5110	Global Health Information Management	
HINF 5200	Theoretical Foundations in Personal Health Informatics	
HINF 5300	Personal Health Interface Design and Development	
HINF 5301	Evaluating Health Technologies	
HINF 6205	Creation and Application of Medical Knowledge	
HINF 6350	Public Health Surveillance and Informatics	
HINF 6404	Patient Engagement Informatics and Analytics	

HINF 6405	Quantifying the Value of Informatics	
PHTH 5232	Evaluating Healthcare Quality	
<b>Technical</b>		
Complete two of the following:		6
HINF 6220	Database Design, Access, Modeling, and Security	
HINF 6355	Interoperability Key Standards in Health Informatics	
HINF 6400	Introduction to Health Data Analytics	
PHTH 5202	Introduction to Epidemiology	
PHTH 5210	Biostatistics in Public Health	
PHTH 6210	Applied Regression Analysis	
PHTH 6400	Principles of Population Health 1	
PHTH 6440	Advanced Methods in Biostatistics	
One course from the following may count toward the technical core requirement:		
DA 5020	Collecting, Storing, and Retrieving Data	
DA 5030	Introduction to Data Mining/Machine Learning	
INSH 5301	Introduction to Computational Statistics	
INSH 5302	Information Design and Visual Analytics	
<b>Capstone</b>		
HINF 7701	Health Informatics Capstone Project	3
<b>Electives</b>		
Complete two of the following:		6
DA 5020	Collecting, Storing, and Retrieving Data	
DA 5030	Introduction to Data Mining/Machine Learning	
HINF 6345	Design for Usability in Healthcare	
INSH 5301	Introduction to Computational Statistics	
INSH 5302	Information Design and Visual Analytics	
<b>HEALTH INFORMATICS ANALYTICS CONCENTRATION</b>		
<b>Code</b>	<b>Title</b>	<b>Hours</b>
<b>Required Coursework in Addition to Core Requirements</b>		
<i>Business Management</i>		
Complete two of the following:		6
HINF 6201	Organizational Behavior, Work Flow Design, and Change Management	
HINF 6202	Business of Healthcare Informatics	
HINF 6215 or EMGT 5220	Project Management Engineering Project Management	
HINF 6335	Management Issues in Healthcare Information Technology	
HINF 6240	Improving the Patient Experience through Informatics	
PHTH 5226	Strategic Management and Leadership in Healthcare	
<i>Health Informatics</i>		
Complete two of the following:		6
HINF 5102	Data Management in Healthcare	
HINF 5110	Global Health Information Management	
HINF 5200	Theoretical Foundations in Personal Health Informatics	
HINF 5300	Personal Health Interface Design and Development	
HINF 5301	Evaluating Health Technologies	
HINF 6205	Creation and Application of Medical Knowledge	
HINF 6350	Public Health Surveillance and Informatics	
HINF 6404	Patient Engagement Informatics and Analytics	
HINF 6405	Quantifying the Value of Informatics	
PHTH 5232	Evaluating Healthcare Quality	
<i>Technical</i>		
IE 6200	Engineering Probability and Statistics	4
OR 6205	Deterministic Operations Research	4

**Capstone**

HINF 7701	Health Informatics Capstone Project	3
-----------	-------------------------------------	---

**Elective**

Complete one of the following: 4

IE 5137	Computational Modeling in Industrial Engineering	
IE 5390	Structured Data Analytics for Industrial Engineering	
IE 5400	Healthcare Systems Modeling and Analysis	
IE 5640	Data Mining for Engineering Applications	
IE 6600	Computation and Visualization for Analytics	
IE 6700	Data Management for Analytics	
IE 7275	Data Mining in Engineering	

**PERSONAL HEALTH INFORMATICS CONCENTRATION**

Code	Title	Hours
<b>Required Coursework in Addition to Core Requirements</b>		
<i>Health Informatics</i>		
HINF 6205	Creation and Application of Medical Knowledge	3
<i>Technical</i>		
CS 5340	Computer/Human Interaction	4
Complete one of the following. Students must petition to take electives outside the approved list. 4		
CS 5010	Programming Design Paradigm	
CS 5520	Mobile Application Development	
CS 5610	Web Development	
CS 6200	Information Retrieval	
Complete one of the following: 3		
HINF 6220	Database Design, Access, Modeling, and Security	
HINF 6355	Interoperability Key Standards in Health Informatics	
<i>Theory and Evaluation</i>		
PHTH 5210	Biostatistics in Public Health <sup>1</sup>	3
Complete one of the following: 4		
CS 6350	Empirical Research Methods (On campus only)	
HINF 5200	Theoretical Foundations in Personal Health Informatics	
<b>Culminating Experience</b>		
Complete one of the two options below. 6		
<i>Thesis Option</i>		
Students must enroll in HINF 7990 for two semesters for a total of 6 semester hours with director approval only and under supervision of Personal Health Informatics faculty.		
HINF 7990	Thesis	
<i>Capstone Option</i>		
HINF 7701	Health Informatics Capstone Project	
Complete any course for a minimum of 3 semester from the Health Informatics (without concentration) curriculum, that has not been used in previous requirements.		

<sup>1</sup> Student may petition director to take a more advanced stats course, such as Applied Regression Analysis (PHTH 6210).

## Pharmaceutical Engineering, MS

The Master of Science in Pharmaceutical Engineering is offered jointly by Northeastern University's College of Engineering and Bouvé College of Health Sciences. The program prepares students with a fundamental understanding of pharmaceutical sciences and principles of engineering to develop the depth needed for advanced study of pharmaceutical engineering.

This program is generally pursued by students with a Bachelor of Science in Chemical Engineering or closely allied fields in engineering, sciences, or mathematics. The program was designed in collaboration with the Department of Pharmaceutical Sciences to develop the depth needed for advanced study of pharmaceutical engineering. Students wishing to pursue the master's degree with undergraduate educational backgrounds other than engineering are required to demonstrate completion of mathematics coursework through differential equations or the equivalent to be admitted. Students are advised to work closely with their advisors and instructors to determine the electives that would meet their career goals.

### Part-Time Students

Part-time students may progress according to their plans and time constraints but within the seven-year time limit.

Master of Science students wishing to change their status from part time to full time must notify the chemical engineering department and make a formal petition to the Graduate School of Engineering. Refer to the regulations of the Graduate School of Engineering for further information on academic administrative policies.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
CHME 7600	Pharmaceutical Engineering I	4
CHME 7601	Pharmaceutical Engineering II	4
CHME 7602	Pharmaceutical Engineering Laboratory	2
PHSC 5100	Concepts in Pharmaceutical Science	2
PHSC 5102	Concepts in Pharmaceutical Science 2	2
PHSC 7010	Pharmaceutical Sciences Laboratory	4

#### Restricted Elective Courses

Code	Title	Hours
At least 3 semester hours of total elective courses are required from pharmaceutical sciences (PHSC, PMST) and from chemical engineering (CHME). These semester hours could come from any elective group, as appropriate.		

#### Regulatory

Complete 3 semester hours from the following:		3
BIOT 5340	Introduction to Biotherapeutic Approvals	
BIOT 5500	Concepts in Regulatory Science	
BIOT 6320	Quality Management Systems and Validation	
RGA 6000	Introduction to Food and Drug Administration (FDA) Pharmaceutical Regulation	
RGA 6002	Introduction to Regulatory Compliance and Practice	

#### Quality/Statistics

Complete 4 semester hours from the following:		4
CHME 5185	Design of Experiments and Ethical Research (DOEER)	
IE 6200	Engineering Probability and Statistics	
IE 7280	Statistical Methods in Engineering	
IE 7285	Statistical Quality Control	
PHSC 6214	Experimental Design and Biostatistics	

#### Depth Electives

Complete 7 semester hours from the following:		7
BIOT 5330	Drug Safety and Immunogenicity	
BIOT 6300	Pharmaceutical Microbiology	
BIOT 6340	Sterile Manufacturing Operations	
BIOT 7250	Advanced Biotechnology Applications Laboratory	
CHME 5101	Fundamentals of Chemical Engineering Analysis	
CHME 5160	Drug Delivery: Engineering Analysis	

CHME 5179	Complex Fluids and Everyday Materials
CHME 5185	Design of Experiments and Ethical Research (DOEER)
CHME 5631	Biomaterials Principles and Applications
CHME 5632	Advanced Topics in Biomaterials
CHME 5683	Introduction to Polymer Science
CHME 7330	Chemical Engineering Thermodynamics
CHME 7350	Transport Phenomena
PHSC 5300	Pharmaceutical Biochemistry
PHSC 5310	Cellular Physiology
PHSC 5500	Repurposing Drugs for Cancer Immunotherapies
PHSC 5555	Pharmaceutical Toxicology
PHSC 5560	Nanotoxicity
PHSC 5619	Mass Spectrometry in Drug Development
PMST 6250	Advanced Physical Pharmacy
PMST 6252	Pharmacokinetics and Drug Metabolism
PMST 6254	Advanced Drug Delivery Systems

**Program Credit/GPA Requirements**

32 total semester hours required

Minimum 3.000 GPA required

## Real-World Evidence in Healthcare and Life Sciences, MS

### Overview

The Master of Science in Real-World Evidence (RWE) is an interdisciplinary, flexible, and contemporary degree that focuses on best practices for the appropriate acquisition and analysis of observational health data. Housed in the Department of Health Sciences and the Roux Institute, learners explore how observational research produces a comprehensive understanding of disease, including experience with appropriate methods and software to conduct this research.

RWE is the clinical evidence regarding the usage and potential benefits, or risks, of a medical product derived from analysis of real-world data (RWD). RWE can be generated by different study designs or analyses, including but not limited to randomized trials, pragmatic trials, and observational studies. RWD are the data relating to patient health status and/or the delivery of healthcare routinely collected from a variety of sources, for example, electronic health records, claims, and billing activities.

RWD and RWE are playing an increasing role in healthcare decisions. The FDA uses RWD and RWE to monitor postmarket safety and to make regulatory decisions. The healthcare community uses these data to support coverage decisions and to develop guidelines and decision support tools for clinical practice. Medical product developers use RWD and RWE to support clinical trial designs and observational studies to generate innovative, new treatment approaches.

This program is based on open, reproducible science—including the use of common data models and open-source analytics software to codify these practices into consistent, transparent, reproducible solutions—and applies these tools and practices to answer clinical questions by generating evidence to guide healthcare policy and improve patient outcomes.

The program seeks to educate two key professionals: analysts and researchers.

An analyst is a technician (e.g., solution architect, epidemiologist, data scientist, etc.) who is engaging in RWE studies by utilizing statistical tools and epidemiologic methods to operationalize and analyze RWD. Technicians may be carrying out activities on behalf of an institution or may be working as individuals interested in the technology that RWD offers. They may be involved in any stage of the RWD/RWE continuum (extract-transform-load [ETL]/data quality processes, tool enablement and self-service analytics, visualization, communication) and are often interested in extending these resources to serve additional use cases or new functionality.

A researcher is one who originates from any number of backgrounds (statistics, clinical training, public health, biological sciences, data science, etc.) who engages in the RWD community for the sake of designing and conducting a research study. Researchers want to know how to run their own observational research studies. In their day, researchers were often responsible for translating the science into better decisions and better care.

The intent of this program is to curate interdisciplinary expertise to support the evidence-generation process in the pharmacoepidemiology research community. The curriculum aims to ensure that learners can obtain in-demand skills that are immediately deployable in roles at pharmaceutical companies, regulatory authorities, health systems, technology companies, and consulting groups specializing in life sciences and healthcare.

Please visit Bouvé College Learning Outcomes for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

A grade of B– or higher is required in each course.

Code	Title	Hours
HSCI 5130	Introduction to Real-World Evidence	2
HSCI 5140	Foundations of Data Models	2
HSCI 5150	Methods for Observational Research 1	3
HSCI 5151	Methods for Observational Research 2	3
HSCI 5160	Standardization of Real-World Data	2
HSCI 5170	Data Model Transformation	2
PHSC 5212	Research Skills and Ethics	2
<b>Capstone Requirement</b>		
HSCI 6980	Real-World Evidence Capstone	3

#### Selectives

Code	Title	Hours
Complete a minimum of 6 semester hours from the following:		
HSCI 5180	Phenotyping	6-12
HSCI 5190	Cohort Building	

HSCI 6110	Advanced Population Characterization
HSCI 6120	Advanced Population Estimation
HSCI 6130	Advanced Patient Prediction

### Electives

Code	Title	Hours
Complete up to 6 semester hours from the following (electives are selected in consultation with the program director):		6
HINF 5300	Personal Health Interface Design and Development	
HINF 6205	Creation and Application of Medical Knowledge	
HINF 6220	Database Design, Access, Modeling, and Security	
HINF 6355	Interoperability Key Standards in Health Informatics	

### Program Credit/GPA Requirements

31 total semester hours required

Minimum 3.000 GPA required

## Health Informatics, MS / Physician Assistant, MS

The Northeastern University health informatics and physician assistant dual degree program allows qualified and interested students to achieve their goal of obtaining a more robust understanding of healthcare technology while also completing robust clinical training in the physician assistant program. This prepares a select group of exceptionally qualified clinicians to become leaders in healthcare technology application and development and fosters interdisciplinary collaboration in order to address problems in the healthcare and health information environments both locally and across the globe. The dual degree program is designed to provide students a greater understanding of technological issues in clinical practice, quantitative methods, and the use of scientific evidence and cutting-edge technology to optimize clinical workflows and improve patient outcomes.

This dual degree takes 34 months to complete (as opposed to 48 months, if each degree were pursued separately), and a total number of 8 semester hours are shared between both degrees.

## Law, JD / Public Health, MPH

Northeastern University's School of Law and Bouvé College of Health Sciences offer a JD/MPH dual degree. Given the worldwide trend toward urbanization, the Master of Public Health (MPH) recognizes the growing need for professionals trained to respond to unique public health challenges and opportunities facing urban populations. The MPH program brings together interdisciplinary faculty (from the School of Law, D'Amore-McKim School of Business, College of Social Sciences and Humanities, Khoury College of Computer Sciences, and the Bouvé College of Health Sciences) with expertise in collaborating with diverse urban populations to offer students an opportunity to obtain practice-based knowledge, skills, and experience needed to address public health problems.

Up to 9 credit hours of coursework in the JD program may count toward the MPH, while up to 12 credit hours of coursework in the MPH program may count toward the JD. See the JD/MPH program page (<https://law.northeastern.edu/academics/programs/jd/dual-degrees/public-health-bouve/>) for more information.

All JD students, including FlexJD students, are ordinarily eligible to apply into dual degree pathways.

## Pharmacy, PharmD—Direct Entry / Public Health, MPH

The School of Pharmacy and Pharmaceutical Sciences and the Department of Health Sciences offer a combined Doctor of Pharmacy (PharmD) and Master of Public Health (MPH) program.

The combined PharmD/MPH program recognizes and reinforces the importance of public health in pharmacy practice. Central to addressing public health concerns, and in particular those associated with racial and ethnic health disparities, the program is committed to building a strong, diverse, and activist public health workforce. The goal of the program is to graduate professionals who are well educated in the complex issues associated with disparate health status and healthcare access. The combined PharmD/MPH program allows qualified and interested students an opportunity to achieve their goal of obtaining a more robust understanding of public health through an MPH degree while also completing their PharmD.

Refer to the School of Pharmacy and Pharmaceutical Sciences PharmD—Direct Entry (p. 720) and Department of Health Sciences Master of Public Health (p. 650) pages of this catalog for program requirements and technical standards. Students must adhere to all PharmD and MPH program standards, policies, and requirements as listed in the catalog, unless otherwise specified.

The Northeastern University Master of Public Health Program is accredited by the Council of Education for Public Health. CEPH is an independent agency recognized by the U.S. Department of Education to accredit schools of public health and public health programs outside of schools of public health.

## Physician Assistant, MS / Public Health, MPH

The Northeastern University physician assistant program and Department of Health Sciences offer a dual degree program: Master of Science in Physician Assistant/Master of Public Health. The dual MS and MPH degree program allows qualified and interested students an opportunity to achieve their goal of obtaining a more robust understanding of public health through an MPH degree, while also completing their Master of Science degree in the PA program.

The Northeastern Master of Public Health program is accredited by the Council on Education for Public Health (<https://ceph.org/>). CEPH is an independent agency recognized by the U.S. Department of Education to accredit schools of public health and public health programs outside of schools of public health. The MPH program has a strong commitment to providing a flexible course of study for working professionals. This flexibility allows for easy incorporation into a dual degree program.

The dual degree program is designed to help diversify the public health workforce and improve graduates' ability to approach clinical situations with cultural sensitivity and awareness. Graduates of the program benefit from having a greater understanding of public health issues in clinical practice, including the racial and ethnic health disparities prevalent in the U.S. healthcare system, as well as a strong grounding in epidemiology, quantitative and qualitative research methods, and the use of scientific evidence, skills critical to many fields of healthcare practice.

This dual degree takes less than three years to complete (as opposed to four years, if each degree were pursued separately), and a total of 12 semester hours are shared between both degrees.

For more information, including the application and admissions process, please visit the dual degree program website (<https://bouve.northeastern.edu/health-sciences/programs/pa-mph/>).

## Public Health, MPH / Health Informatics, MS

Website (<https://bouve.northeastern.edu/health-sciences/programs/ms-hinf-mph/>)

The Master of Public Health and Master of Science in Health Informatics dual degree allows qualified and interested students to prepare to lead healthcare at the nexus between public health and health informatics. Graduates of this program will be well-educated in the complex issues associated with improvements in information technology, as well as changes to the public health and healthcare delivery systems. Recognizing the increasing overlap between health informatics and public health, this program incorporates course work from both the MPH and MSHI curricula for both degrees, reducing tuition costs and saving one year of study compared to obtaining both degrees individually.

The Northeastern University Master of Public Health program is accredited by the Council on Education for Public Health (CEPH). CEPH is an independent agency recognized by the U.S. Department of Education to accredit schools of public health and public health programs outside of schools of public health.

Up to 15 credits of coursework in the dual-degree program can be counted toward both the MPH and MS degrees.

## Early Intervention, Graduate Certificate

Northeastern University's Certificate Program in Early Intervention is an interdisciplinary, preservice training program that is designed to fulfill requirements for certification as an early intervention specialist, at the advanced provisional level, as set forth by the Massachusetts Department of Public Health (DPH).

The interdisciplinary nature of the program is facilitated by the interaction of graduate students from several disciplines (including school psychology, counseling psychology, and speech-language pathology); undergraduate students from majors such as speech-language pathology and audiology and psychology; and working professionals in the field. Personnel working in the field may use their work sites for field training.

The program is delivered in a hybrid format. Classes meet on campus one day each month, and additional course content is delivered online.

This graduate certificate program can be completed by non-degree-seeking students or integrated with master's or clinical doctoral degree programs. Application of course work from certain degree programs will be approved to apply to requirements of this graduate certificate; students are encouraged to speak with their academic advisors early in their programs to explore these options.

The goals for the early intervention certificate program are:

- To prepare personnel to provide services to infants and toddlers with disabilities and their families, from linguistically and culturally diverse backgrounds in urban environments
- To prepare personnel who have attained all competencies relative to early intervention, specified by the Massachusetts DPH, and that are consistent with best practice and research
- To prepare personnel in an interdisciplinary manner, drawing from Northeastern University's multidisciplinary resources
- To prepare personnel to function effectively across teams (individualized family service plan teams, community teams, interagency teams) and to understand the roles of their interdisciplinary teammates

Upon graduation, students are eligible for employment in an early intervention service delivery setting.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

A grade of B or higher is required in all courses.

Code	Title	Hours
<b>Required Core</b>		
CAEP 5150	Early Intervention: Family Systems	3
CAEP 5151	Early Intervention: Infant and Toddler Development, Risk, and Disability	3
SLPA 5152	Early Intervention: Planning and Evaluating Services	3
CAEP 5153	Early Intervention: Assessment and Intervention	3
<b>Practicum</b>		
SLPA 5154	Early Intervention Practicum 1	2
SLPA 5155	Early Intervention Practicum 2	2

#### Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

## Patient Safety, Graduate Certificate

### Overview

The Graduate Certificate in Patient Safety informs and empowers the next generations of innovative patient safety experts by providing the knowledge and practical skills to promote a culture of safety and design safer systems of care. Future leaders incorporate clinician wellness strategies in care delivery models that are accountable, honest, and transparent. The purpose of this certificate is to support healthcare clinicians and leaders in advancing patient safety and the safety of healthcare providers by expanding their fundamental skills and knowledge in patient safety science principles, workforce wellness, and quality improvement strategies.

This is a four-course, interdisciplinary graduate certificate, tailored to accommodate a busy healthcare professional's schedule. Courses are delivered in an online format, structured to enhance the curriculum with peer-to-peer discussions and experience developing tools, protocols, and process improvement strategies.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Required Courses

A grade of B or higher is required in each course.

Code	Title	Hours
HLTH 5600	Introduction to Patient Safety	3
HLTH 5610	Patient Safety Science	3
HLTH 5620	Leadership, Patient Safety, and Clinical Wellness	3
HLTH 5630	Quality Improvement in Patient Safety	3

### Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.00 GPA required

---

The School of Clinical and Rehabilitation Sciences within the Bouvé College of Health Sciences at Northeastern University brings together the clinical fields of physical therapy (<https://bouve.northeastern.edu/physical-therapy/>), speech-language pathology and audiology (<https://bouve.northeastern.edu/csd/>), medical sciences, and physician assistant studies (<https://bouve.northeastern.edu/physician-assistant/>). Students and fellows in the school are prepared for clinical and research excellence, training with interdisciplinary experts in habilitation and rehabilitation sciences, epidemiology, neuroscience, engineering, physiology, exercise science, clinical medicine, design, diagnostic and therapeutic imaging, and communication. Working at the intersection of rehabilitation, clinical practice, data, and engineering, students and fellows engage in transformative research and experiential learning that is designed to prepare them to improve the quality of life and self-care for patients and communities, while promoting and developing innovative approaches to the future of healthcare.

## **Communication Sciences and Disorders**

Our mission is to advance the science of human communication and its disorders, understand the science of human communication untethered from traditional limitations of the field, and make a direct impact on the world through targeted learning experiences and research opportunities, while creating an inclusive community. Our faculty are researchers, practicing clinicians, and scientists who bring real-world experience into the classroom to facilitate bench-to-bedside application. They develop, use, and address technology that improves communication and health beyond traditional boundaries.

The Department of Communication Sciences and Disorders offers a five-year PlusOne advanced degree pathway (BS-MS in Speech-Language Pathology) and a two-year Master of Science in Speech-Language Pathology degree. Our goal is to educate students to the highest levels of professionalism, consistent with the American Speech-Language-Hearing Association and the Council on Academic Accreditation, Northeastern University accreditation standards, and Massachusetts licensure requirements. We provide an interprofessional and practice-oriented

education in our urban university environment, which affords students clinical experiences with clients, patients, and families from a diverse population base. Students are prepared with academic coursework informed by the most current scientific knowledge and evidence-based clinical practice.

### **Master of Science (MS)**

- Speech-Language Pathology (p. 611)

### **Medical Sciences**

The mission of the Department of Medical Sciences is to educate and inspire diverse and interdisciplinary professionals to be leaders and innovators in medical science. We offer an interdisciplinary doctoral degree in healthcare leadership, a Master of Science in Physician Assistant Studies, two interdisciplinary dual master's degree programs, and a graduate certificate in extreme medicine.

Our flagship program in PA studies was established in 1971 and has a long-standing history of, and expertise in, the education and training of PAs. The PA program is located in close proximity to Boston's major academic medical centers and was the first generalist PA training program in the nation to offer a master's degree in 1985. This rigorous, highly integrated curriculum offers our students the opportunity to obtain broad generalist training that is designed to prepare them for successful employment in all fields of clinical practice.

The Doctor of Medical Science (DMSc) in Healthcare Leadership is an interdisciplinary online degree for healthcare professionals from diverse backgrounds to advance their education and expand their career opportunities in the areas of healthcare leadership, entrepreneurship, medical education, and community engagement and advocacy.

The Graduate Certificate in Extreme Medicine is an online interprofessional program offered in collaboration with World Extreme Medicine. The program is designed to prepare healthcare professionals to provide medical services in austere conditions. The core didactic courses provide foundational instruction in human factors, crisis resource management, efficiency of highly skilled teams, and theory and ethics of care in humanitarian crises.

Our faculty members are practicing clinicians, researchers, and healthcare leaders who bring real-world experience to the classroom. Northeastern University's graduates are in high demand and are employed in positions across the United States and internationally. In addition to clinical practice, our graduates are employed in research, administration, education, and leadership.

### **Doctor of Medical Science (DMSc)**

- Healthcare Leadership (p. 587)

### **Master of Science (MS)**

- Physician Assistant (p. 616)

### **Dual Degree**

- Health Informatics, MS / Physician Assistant, MS (p. 601)
- Physician Assistant, MS / Public Health, MPH (p. 604)

### **Graduate Certificate**

- Extreme Medicine (p. 631)

### **Physical Therapy, Movement, and Rehabilitation Sciences**

The mission of the Department of Physical Therapy, Movement, and Rehabilitation Sciences is to impact the health and well-being of the global community by developing leaders in our fields through interprofessional experiential education, translational research, and excellence in clinical practice. This aligns well with the mission and academic plans of Bouvé College of Health Sciences and Northeastern University. That is, the programs within the department enhance and extend students' learning through experiential education, interdisciplinary collaborations, interprofessional education, and research opportunities, making an impact across our global campus and beyond. Our faculty members are leaders in education, research, and practice. Students have the opportunity to work with faculty to conduct ongoing research in one of the many diverse Department of Physical Therapy, Movement, and Rehabilitation Sciences' research groups and laboratories, including Neuromotor Systems Laboratory, Laboratory for Locomotion Research, ReGame-XR Laboratory, Movement Neuroscience Laboratory, Musculoskeletal Epidemiology and Biomechanics Laboratory, Neurophysiology Laboratory, Occupational Biomechanics and Ergonomics Laboratory, Teaching and Learning with Innovation Laboratory, the Programmable and Reconfigurable Soft Engineered Systems Lab, and the Center for Cognitive and Brain Health.

Our flagship program is the Doctor of Physical Therapy. It is one of the oldest programs within Bouvé with the first graduates in 1915. The 37-month program provides comprehensive and rigorous graduate-level courses with a unique and valuable cooperative education experience, a six-month paid work opportunity in a physical therapy setting. In addition, concentrations are available in sports performance and pediatric physical therapy.

The PhD in Human Movement and Rehabilitation Sciences prepares its graduates to conduct independent (original) basic, translational, and applied research to restore and maximize human functional capacity and well-being across the life span. The interdisciplinary program and its faculty emphasize core competencies in motor control and motor learning, movement measurement and analysis, knowledge translation theory, and the use of traditional and emerging technologies.

The new Master of Science in Human Movement and Rehabilitation Sciences at Northeastern University prepares students through revolutionary breakthroughs about how our bodies can work better. This 12-month program focuses on innovative rehabilitation solutions through enhanced research and education on topics including, but not limited to, biomechanics, musculoskeletal disorders, control of movement, motor learning, health and well-being through movement and design, human-cybernetic system interactions, and neurorehabilitation of movement and function. We offer this master's as a PlusOne option with several other Northeastern departments, especially within the College of Engineering.

The Department of Physical Therapy, Movement, and Rehabilitation Sciences has partnered with Massachusetts General Hospital Sports Physical Therapy to offer a 13-month full-time clinical residency program for physical therapists interested in pursuing a career in sports physical therapy. This program advances the knowledge and clinical competency of sports physical therapists, as well as to foster a culture of continued learning and scientific inquiry while demonstrating a commitment to patients, students, and athletes at all levels.

### **Doctor of Philosophy (PhD)**

- Human Movement and Rehabilitation Sciences (p. 620)

### **Doctor of Physical Therapy (DPT)**

- Doctor of Physical Therapy—Postbaccalaureate Entry (p. 623)
- Transitional Doctor of Physical Therapy—Direct Entry (p. 814) (with the College of Professional Studies)

### **Master of Science (MS)**

- Human Movement and Rehabilitation Sciences (p. 629)

## Speech-Language Pathology, MS

Adhering to the highest professional standards, the speech-language pathology graduate program seeks to prepare future speech-language pathologists for the rigors of clinical practice in educational and healthcare settings. Graduates of the program will influence society in profound ways—for example, enabling children with autism to communicate effectively, relieving adolescents' fears of speaking dysfluently in the classroom, and helping stroke survivors resume activities in which they had previously participated. The comprehensive program of study emphasizes teamwork and interdisciplinary approaches to complex service delivery issues. SLP graduate students acquire the knowledge and skills needed for a lifetime of professional achievement and social contribution.

### Prerequisite or Equivalent Courses

To ensure that all students have the foundation necessary to be successful in this program, each incoming student, regardless of their background, must have completed coursework with content equivalent in the following courses with a minimum grade of C.

Code	Title	Hours
SLPA 1102	Language Development	
SLPA 1103	Anatomy and Physiology of Speech and Hearing Mechanism	
SLPA 1200	Phonetics	
SLPA 1203	Introduction to Audiology	
SLPA 1205	Speech and Hearing Science	

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

A grade of B or higher is required in each course.

Code	Title	Hours
<b>Disorders</b>		
SLPA 5201	Diagnostic Testing in Speech-Language Pathology	2
SLPA 6219	Aural Rehabilitation (or elective) <sup>1</sup>	3
SLPA 6303	Stuttering	3
SLPA 6304	Augmentative and Alternative Communication	3
SLPA 6305	Articulation and Phonology	3
SLPA 6307	Voice Disorders	3
SLPA 6308	Dysphagia	3
SLPA 6313	Counseling in Speech-Language Pathology	2
SLPA 6321	Motor Speech Disorders	3
SLPA 6339	Language Literacy in Practice	1
SLPA 6340	Language Disorders in Children 1	3
SLPA 6341	Language Disorders in Children 2	3
SLPA 6342	Speech-Language Disorders In Adults 1	3
SLPA 6343	Speech-Language Disorders in Adults 2	3
<b>Science</b>		
SLPA 5109	Neurology of Communication	3
SLPA 6300	Speech Science	2
<b>Research</b>		
SLPA 6211	Research and Evidence-Based Practice	3
SLPA 6420	Practical Statistics for Speech-Language Pathology and Audiology	3
<b>Diversity, Equity, and Inclusion</b>		
SLPA 6329	Diversity, Equity, and Inclusion in Speech-Language Pathology	2
<b>Practicum</b>		
SLPA 6415	Speech-Language Pathology Advanced Clinical Practicum 1	3
SLPA 6416	Speech-Language Pathology Advanced Clinical Practicum 2	2

612 Speech-Language Pathology, MS

SLPA 6417	Speech-Language Pathology Advanced Clinical Practicum 3	2
SLPA 6418	Speech-Language Pathology Advanced Clinical Practicum 4	2

<sup>1</sup> Students with previous coursework in aural rehabilitation may replace SLPA 6219 with 3 semester hours from the elective course list.

## Electives

Code	Title	Hours
Students with previous aural rehabilitation coursework may complete 3 semester hours from the elective course list or select other course options in consultation with a faculty advisor.		
SLPA 6310	Speech-Language Pathology in Medical Settings	
SLPA 6320	Autism	
SLPA 6325	Accent Modification for Speech-Language Pathology	
SLPA 6332	Seminar in Communication Disorders	

## Program Credit/GPA Requirements

60 total semester hours required

Minimum 3.000 GPA required

## Healthcare Leadership, DMSc

Northeastern University's Doctor of Medical Science (DMSc) is an interdisciplinary degree designed for medical professionals to advance their education and expand their career opportunities in the areas of healthcare leadership, administration, informatics, law, safety, and advocacy. Students from diverse healthcare backgrounds share the common goal of developing facility with healthcare systems and becoming leaders within the greater healthcare community.

In addition to taking core courses in healthcare leadership, administration, and research methods, students will have the opportunity to obtain additional education in one of several areas of specialization. These concentrations are designed to empower graduates from diverse backgrounds with the technical and analytical expertise that is both relevant and in high demand in today's healthcare environment. Students will have the opportunity to collaborate with faculty not only from the Department of Medical Sciences but also with world-renowned faculty from a variety of interdisciplinary fields within Northeastern University and the greater Boston community. This collaboration will allow students to access expertise and knowledge across disciplines that will culminate in the creation of an original thesis study.

Admission to the program requires a master's degree in a healthcare-related field or a bachelor's degree plus at least three years of full-time clinical experience.

This degree will take between 12 and 18 months to complete and can be fully completed online.

Please visit Bouvé College Learning Outcomes for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

A grade of B- or higher is required in each course.

Code	Title	Hours
<b>Healthcare Leadership</b>		
MSCI 6001	Principles of Healthcare Advocacy	3
MSCI 6002	Workforce Metrics: Measuring, Comparing, and Privileging the Interprofessional Healthcare Team	3
MSCI 6003	Healthcare Leadership Seminar	3
PHTH 6204	Society, Behavior, and Health	3
<b>Research</b>		
HLTH 5410	Introduction to Statistics in Health and Behavioral Science	3
MSCI 6900	Research Methods and Design	3
MSCI 7990	Thesis	3
MSCI 7996	Thesis Continuation - Half-Time	0

#### Concentrations

Completing a concentration is required to complete this program. A minimum of 12 semester hours is required.

- Business Management (p. 588)
- Health Informatics (p. 588)
- Health Informatics Research (p. 588)
- Health Law (p. 588)
- Interdisciplinary Healthcare Leadership (p. 588)
- Patient Safety (p. 589)
- Pharmacy and Health Systems Science (p. 589)
- Public Health (p. 589)

#### Program Credit/GPA Requirements

Minimum of 33 total semester hours required

Minimum 3.000 GPA required

**CONCENTRATION IN BUSINESS MANAGEMENT**

Code	Title	Hours
Complete a minimum of 12 semester hours from the following:		12
ENTR 6212	Business Planning for New Ventures	
INNO 6200	Enterprise Growth and Innovation	
MGMT 6225	Sustainability and Leadership	
MGMT 6226	Sustainability and the Business Environment	
STRT 6200	Strategic Decision Making in a Changing Environment	

**CONCENTRATION IN HEALTH INFORMATICS**

Code	Title	Hours
<b>Concentration Required</b>		
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
HINF 6220	Database Design, Access, Modeling, and Security	3
HINF 6400	Introduction to Health Data Analytics	3
<b>Selective</b>		
Complete 3 semester hours from the following:		3
HINF 5407	Business Application of Decision Support in Healthcare	
HINF 6205	Creation and Application of Medical Knowledge	

**CONCENTRATION IN HEALTH INFORMATICS RESEARCH**

Code	Title	Hours
<b>Concentration Required</b>		
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
HINF 6220	Database Design, Access, Modeling, and Security	3
HINF 6400	Introduction to Health Data Analytics	3
<b>Selective</b>		
Complete 4 semester hours from the following:		4
CS 6350	Empirical Research Methods	
HINF 5300	Personal Health Interface Design and Development	

**CONCENTRATION IN HEALTH LAW**

Code	Title	Hours
<b>Concentration Required</b>		
LW 6102	Introduction to Legal Studies 2	3
<b>Selective</b>		
LW 6102 is a prerequisite for the LW courses listed below. Complete 9 semester hours from the following:		9
LW 6110	Law of Information and Records	
LW 6150	Law and Organizational Management	
LW 6180	Health Law Survey	
LW 6181	Healthcare Regulation and Compliance	
LW 6182	Patient Records, Privacy, and Security	

**CONCENTRATION IN INTERDISCIPLINARY HEALTHCARE LEADERSHIP**

Code	Title	Hours
Complete a minimum of 12 semester hours from the following:		12
<b>Business Management for Healthcare</b>		
ENTR 6212	Business Planning for New Ventures	
INNO 6200	Enterprise Growth and Innovation	
MGMT 6225	Sustainability and Leadership	
MGMT 6226	Sustainability and the Business Environment	
STRT 6200	Strategic Decision Making in a Changing Environment	
<b>Health Informatics</b>		
CS 6350	Empirical Research Methods	
HINF 5101	Introduction to Health Informatics and Health Information Systems	

HINF 5200	Theoretical Foundations in Personal Health Informatics
HINF 5300	Personal Health Interface Design and Development
HINF 5407	Business Application of Decision Support in Healthcare
HINF 6205	Creation and Application of Medical Knowledge
HINF 6220	Database Design, Access, Modeling, and Security
HINF 6400	Introduction to Health Data Analytics

**Health Law**

HRM 6030	The Employment Contract
LW 6102	Introduction to Legal Studies 2

LW 6102 is a prerequisite for the following LW courses:

LW 6110	Law of Information and Records
LW 6150	Law and Organizational Management
LW 6180	Health Law Survey
LW 6181	Healthcare Regulation and Compliance
LW 6182	Patient Records, Privacy, and Security

**Pharmacy and Health Systems Science**

PHMD 5223	Evidence-Based Medicine
PHMD 5575	Pharmaceutical Industry

**Public Health**

PHTH 5120	Race, Ethnicity, and Health in the United States
PHTH 5212	Public Health Administration and Policy
PHTH 6200	Principles and History of Urban Health
PHTH 6208	Urban Community Health Assessment

**CONCENTRATION IN PATIENT SAFETY**

Code	Title	Hours
<b>Concentration Required</b>		
HLTH 5600	Introduction to Patient Safety	3
HLTH 5610	Patient Safety Science	3
HLTH 5620	Leadership, Patient Safety, and Clinical Wellness	3
HLTH 5630	Quality Improvement in Patient Safety	3

**CONCENTRATION IN PHARMACY AND HEALTH SYSTEMS SCIENCE**

Code	Title	Hours
PHMD 5223	Evidence-Based Medicine	2
PHMD 5250	Pharmacy Care Management	4
PHMD 5270	Economic Evaluation of Pharmaceuticals and Pharmacy Practice	2
PHMD 5560	Applied Drug Information	2
PHMD 5575	Pharmaceutical Industry	2

**CONCENTRATION IN PUBLIC HEALTH**

Code	Title	Hours
<b>Concentration Required</b>		
PHTH 5120	Race, Ethnicity, and Health in the United States	3
PHTH 5212	Public Health Administration and Policy	3
PHTH 6200	Principles and History of Urban Health	3
PHTH 6208	Urban Community Health Assessment	3

## Physician Assistant, MS

Physician assistants are healthcare providers who practice medicine with physician supervision. They are highly sought after members of the healthcare team who provide diagnostic and therapeutic patient care. The physician assistant studies program is a full-time, two-year graduate program that provides an opportunity to earn a Master of Science degree.

Please visit Bouvé College Learning Outcomes for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

A grade of C or higher is required in each course.

### Program Credit/GPA Requirements

103 total semester hours required

Minimum 3.000 GPA required

## Health Informatics, MS / Physician Assistant, MS

The Northeastern University health informatics and physician assistant dual degree program allows qualified and interested students to achieve their goal of obtaining a more robust understanding of healthcare technology while also completing robust clinical training in the physician assistant program. This prepares a select group of exceptionally qualified clinicians to become leaders in healthcare technology application and development and fosters interdisciplinary collaboration in order to address problems in the healthcare and health information environments both locally and across the globe. The dual degree program is designed to provide students a greater understanding of technological issues in clinical practice, quantitative methods, and the use of scientific evidence and cutting-edge technology to optimize clinical workflows and improve patient outcomes.

This dual degree takes 34 months to complete (as opposed to 48 months, if each degree were pursued separately), and a total number of 8 semester hours are shared between both degrees.

## Physician Assistant, MS / Public Health, MPH

The Northeastern University physician assistant program and Department of Health Sciences offer a dual degree program: Master of Science in Physician Assistant/Master of Public Health. The dual MS and MPH degree program allows qualified and interested students an opportunity to achieve their goal of obtaining a more robust understanding of public health through an MPH degree, while also completing their Master of Science degree in the PA program.

The Northeastern Master of Public Health program is accredited by the Council on Education for Public Health (<https://ceph.org/>). CEPH is an independent agency recognized by the U.S. Department of Education to accredit schools of public health and public health programs outside of schools of public health. The MPH program has a strong commitment to providing a flexible course of study for working professionals. This flexibility allows for easy incorporation into a dual degree program.

The dual degree program is designed to help diversify the public health workforce and improve graduates' ability to approach clinical situations with cultural sensitivity and awareness. Graduates of the program benefit from having a greater understanding of public health issues in clinical practice, including the racial and ethnic health disparities prevalent in the U.S. healthcare system, as well as a strong grounding in epidemiology, quantitative and qualitative research methods, and the use of scientific evidence, skills critical to many fields of healthcare practice.

This dual degree takes less than three years to complete (as opposed to four years, if each degree were pursued separately), and a total of 12 semester hours are shared between both degrees.

For more information, including the application and admissions process, please visit the dual degree program website (<https://bouve.northeastern.edu/health-sciences/programs/pa-mph/>).

## Human Movement and Rehabilitation Sciences, PhD

The Department of Physical Therapy, Movement, and Rehabilitation Sciences offers a PhD program in human movement and rehabilitation sciences. The PhD program seeks to prepare graduates to conduct independent (original) basic, translational, and applied research with the goal of creating new knowledge about neuromotor mechanisms and methods of restoring and maximizing human functional capacity and well-being across the life span. The program emphasizes core competencies in motor control and motor learning, movement measurement and analysis, knowledge translation theory, and the use of traditional and emerging technologies. The program is based on the integration of core skills and concepts across the multiple disciplines that are associated with human movement and rehabilitation sciences, coupled with the acquisition of research methodology, analyses, and skills, as well as specialization within specific areas of human movement and rehabilitation research.

The program showcases the unique faculty and research laboratories in human movement and rehabilitation sciences, as well as highly ranked programs in Bouvé College of Health Sciences, the College of Science, and the College of Engineering. Northeastern is dedicated to advancing the field of human movement and rehabilitation sciences and translating research from bench to clinic. Students benefit from our new research laboratories utilizing state-of-the-art movement and rehabilitation methods including virtual reality, ultrasound, neuroscience, neurophysiology, robotics, and movement measurement technologies.

### Advanced Entry

Based on a student's background in their preceding master's or clinical doctorate degree, core coursework and total hours for the advanced entry program may vary. The graduate program director will consider all the program requirements and applicants' previous experience when advising students on a plan of study. All students, whether entering from traditional or advanced PhD pathways, will complete the milestones as documented in the curriculum.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

### Program Requirements Milestones

All students, whether entering from traditional or advanced PhD pathways, will complete the following milestones:

- Annual review
- Qualifying exam
- Dissertation committee
- Dissertation proposal
- Dissertation defense

### Core Requirements

Code	Title	Hours
<b>Seminar</b>		
Students must enroll in the following course every semester until start of the dissertation phase of the program (the course is repeatable two times for 1 semester hour and four times for 0 semester hours):		2
PT 7030	Interdisciplinary Seminar in Rehabilitation Science	
<b>Rehabilitation Science and Human Movement</b>		
PT 7001	Core Concepts in Rehabilitation Science and Research	3
PT 7005	Experimental Design and Applied Statistics	4
PT 7020	Technologies in Movement and Rehabilitation Science	4

### Electives

Code	Title	Hours
Complete 19 semester hours from the list below chosen in consultation with a faculty advisor.		19
Some courses may require prerequisite coursework.		
BIOE 5235	Biomedical Imaging	
BIOE 5800	Systems, Signals, and Controls for Bioengineers	
BIOE 5810	Design of Biomedical Instrumentation	
BIOL 5601	Multidisciplinary Approaches in Motor Control	
CAEP 6326	Behavioral Concepts and Principles	
EXSC 5210	Physical Activity and Exercise: Prescription, Measurement, and Testing	
HLTH 5450	Healthcare Research	
IE 5630	Biosensor and Human Behavior Measurement	
IE 6500	Human Performance	

IE 7315	Human Factors Engineering
ME 5250	Robot Mechanics and Control
ME 5659	Control Systems Engineering
ME 5665	Musculoskeletal Biomechanics
ME 7247	Advanced Control Engineering
PHTH 5202	Introduction to Epidemiology
PHTH 5210	Biostatistics in Public Health
PHTH 6202	Intermediate Epidemiology
PHTH 6210	Applied Regression Analysis
PHTH 6440	Advanced Methods in Biostatistics
PT 5133	Kinesiology
PT 5138	Neuroscience
PT 5150	Motor Control, Development, and Learning
PT 5209	Neurological Rehabilitation 1
PT 5321	Applications of Biomechanics in Human Function and Movement
PT 6221	Neurological Rehabilitation 2
PT 7010	Measurement and Analysis of Human Movement and Bioinstrumentation

## Dissertation

Code	Title	Hours
PT 9990	Dissertation Term 1	
PT 9991	Dissertation Term 2	

## Program Credit/GPA Requirements

## Physical Therapy, DPT—Postbaccalaureate Entry

**Pamela Donlan, PT, DPT, EdD, CLT-LANA**

Associate Clinical Professor and Interim DPT Program Director

### Department of Physical Therapy, Movement, and Rehabilitation Sciences

301 Robinson Hall

Northeastern University

360 Huntington Avenue

Boston, MA 02115

Tel: 617.373.3508

physicaltherapy@northeastern.edu

Our Postbaccalaureate Doctor of Physical Therapy (DPT) (<http://www.northeastern.edu/bouve/pt/programs/pbdpt.html>) program is designed for individuals who hold a minimum of a baccalaureate degree in any major other than physical therapy and have satisfied the prerequisite requirements. Over the course of three years, this rigorous curriculum provides didactic and experiential learning experiences, the cornerstone of our program. These experiences include cooperative education, simulated patient interactions, interprofessional education, human cadaver lab, engagement with consumer clients, service-learning, clinical research, and integrated and full-time clinical education experiences.

The DPT program recognizes that becoming a physical therapist is a developmental process that allows students the opportunity to take risks, reflect, learn from mistakes, and continue to grow to promote lifelong learning. We are committed to a process of actively engaged learning that occurs in the classroom, the research laboratory, the community, and clinical settings regionally and internationally. We strive to provide challenging and leading-edge academic content in an environment supportive of professional development. Our educational philosophy is based upon a strong foundation of biological, psychological, social, and clinical sciences; experiential learning; evidence-based practice; cultural agility and humanistic values; and ethical and professional expectations. This is supported by a commitment of promoting and improving the health of clients and society locally, nationally, and globally. Academic content is student-centered and delivered using both traditional and innovative teaching methods including, but not limited to, lectures, small group projects and discussions, multimedia presentations, expert panel discussions, human cadaver lab, problem-based approaches, case studies, faculty-led research, patient simulation, interprofessional education opportunities, virtual and online learning activities, and self-reflection. Experiential learning, a cornerstone of our curriculum, is embedded in academic course requirements including clinical education, cooperative education, service-learning, and capstone research projects. These experiences are intentional and align with the Bouvé College and Northeastern University.

We offer a direct guaranteed acceptance\* for Northeastern undergraduate students interested in continuing their studies in the DPT program. Undergraduate students interested in this pathway can work with their academic advisor to complete the required prerequisite coursework (<https://bouve.northeastern.edu/physical-therapy/programs/pbdpt/>). Students may also be able to participate in physical-therapy-related experiential **cooperative education** to gain experience prior to enrolling. Northeastern graduates are eligible for the Double Husky Scholarship when enrolling in the DPT program, which offers a 25% tuition discount.

Please visit our website (<https://bouve.northeastern.edu/physical-therapy/programs/pbdpt/>) to learn more or email [PB\\_DPT\\_INQUIRIES@northeastern.edu](mailto:PB_DPT_INQUIRIES@northeastern.edu) for more information.

\*For guaranteed acceptance, students must maintain a 3.200 cumulative and prerequisite science GPA; complete the required prerequisite coursework (<https://bouve.northeastern.edu/physical-therapy/programs/pbdpt/>); and submit a resumé, transcript, letter of reference, and personal statement.

The DPT program offers two concentrations with application process.

- A pediatric physical therapy concentration designed to enhance the entry-level physical therapy graduate's ability to engage in interprofessional, family centered services with children from infancy through young adulthood in a variety of settings.
- A sports performance concentration designed to prepare the physical therapist student to confidently pursue a sports physical therapy position working with athletes of all ages in a variety of settings. Students take additional coursework, focused on research and clinical rotations that expand upon the entry-level physical therapy curriculum.
- Both concentrations are beneficial for students who may wish to pursue clinical residency programs in the area of sports or pediatric physical therapy including the Massachusetts General Hospital/Northeastern University Sports Physical Therapy Residency Program.

## Emphasis on Experiential Learning

### COOPERATIVE EDUCATION

Our DPT program provides students with six months of full-time experiential learning in addition to the required clinical education experiences necessary for licensure. Through cooperative education, the hallmark of Northeastern, students are able to integrate semesters of academic study with semesters of cooperative education experiences in hospitals and clinics throughout the country. Students may be employed as physical therapy co-ops or perform other health-related duties.

As a part of cooperative education experiences, students will be completing an Integrated Clinical Experience (ICE) during Co-op Work Experience (PT 6964). This experience will provide clinical experience integrated within the didactic portion of the DPT curriculum. Students will observe and/or participate in patient interview, examination, evaluation, intervention, communication, and documentation skills previously learned in the classroom and cooperative educational experiences. Students will have the opportunity to increase their exposure and familiarity in a clinical setting and develop

emerging competency in physical therapy skills. Students will demonstrate personal and professional growth and be able to identify learning needs for success on their future first full-time clinical experience.

### **CLINICAL EDUCATION**

The curriculum also includes three rotations for a total of 36 weeks of full-time clinical education under the direct supervision of a licensed physical therapist. We are affiliated with world-class medical centers and clinical sites throughout the United States, providing students with access to master clinicians and clinical scholars. Every effort is made to accommodate individual circumstances, but students should be prepared to travel out of state for two of the three clinical placements. Availability of a car may be required, as most sites are not accessible by public transportation. All expenses associated with clinical education, including travel and housing, are the responsibility of the student.

### **GLOBAL OUTREACH**

Students may participate in short cultural immersion experiences abroad whereby they engage in community service projects under the direction of a physical therapy faculty member or on physical therapy academic exchanges with partner academic institutions.

### **SERVICE-LEARNING**

During the curriculum, students participate in service-learning opportunities in the local community in which they learn and apply skills and knowledge related to program objectives. These opportunities start during the first academic year and continue throughout the program in a variety of settings.

### **STUDENT RESEARCH**

The Department of Physical Therapy, Movement, and Rehabilitation Sciences' research mission is to build the evidence for best practices to maintain and improve the health and well-being of local, national, and global community members. Students have the opportunity to work with faculty to conduct ongoing research in world-renowned medical centers and in one of the eight Department of Physical Therapy, Movement, and Rehabilitation Sciences' labs and centers, including Neuromotor Systems Lab, Laboratory for Locomotion Research, Movement Neuroscience Laboratory, Musculoskeletal Epidemiology and Biomechanics Laboratory, Occupational Biomechanics and Ergonomics Laboratory, Teaching and Learning Innovation Lab, Neuroscience Wet Lab, and the Center for Cognitive and Brain Health Program.

## **Progression in the DPT Program**

To progress in the program, students must maintain acceptable standards of academic performance as stated in the program requirements section, including successful completion of all didactic, integrated clinical education cooperative education and full-time clinical education experiences. Students must demonstrate appropriate skills and professional behaviors to progress in the program. Students must develop appropriate motor skills, professional behaviors, and emotional maturity as outlined in the essential functions. The program in physical therapy is accredited by the Commission on Accreditation in Physical Therapy Education of the American Physical Therapy Association.

Graduates of the DPT program are eligible to sit for the National Physical Therapy Examination in pursuit of licensure.

### **PROFESSIONAL BEHAVIORS REQUIREMENT**

In order to promote professionalism in the classroom, local and global communities, and clinical settings, the physical therapy program requires the demonstration of professional behaviors in accordance with the professional behaviors policy. The purpose of professional behaviors procedures is to help remediate students who have been identified as having professional behavior issues in an academic, cooperative, or clinical education setting. Professional standards are outlined in the student manual and may include but are not limited to the APTA Code of Ethics for the Physical Therapist ([https://www.apta.org/uploadedFiles/APTAorg/About\\_Us/Policies/Ethics/CodeofEthics.pdf](https://www.apta.org/uploadedFiles/APTAorg/About_Us/Policies/Ethics/CodeofEthics.pdf)) and/or the APTA Guide for Professional Conduct ([http://www.apta.org/uploadedFiles/APTAorg/Practice\\_and\\_Patient\\_Care/Ethics/GuideforProfessionalConduct.pdf](http://www.apta.org/uploadedFiles/APTAorg/Practice_and_Patient_Care/Ethics/GuideforProfessionalConduct.pdf)).

Any faculty member who has a concern about a student's professional behavior will arrange to meet with the student to discuss the issue. If the faculty member has met with the student and there is satisfactory resolution of the unprofessional conduct, only a form for tracking purposes is needed.

The tracking form shall be kept on record in order to track these students while they are in the program. A request for committee reviews as indicated on the tracking form must occur under the following conditions:

- a. A faculty member has attempted to correct the behavior and it has not been corrected after meeting with the student and taking initial steps to improve the identified professional behavior issues.
- b. The incident is egregious.
- c. A second breach of professional standards has occurred.

### **Full Professional Behaviors Violation Review Process**

- a. The chairperson of the PTMRS Academic Affairs Committee will send a letter to students about whom concerns have been raised and instruct each student to complete a Self-Assessment of Professional Behaviors. A meeting date will be set to discuss the concern. If the committee finds there is sufficient evidence to support a violation of the professional standards previously defined, one will be noted in the student's record.
- b. The AAC will develop an appropriate remediation plan in collaboration with the student and appropriate faculty.
- c. Depending on the situation, students may have the opportunity to improve professional behaviors.
- d. Any of the following may result in a dismissal from the program:

- i. A third breach of professional standards
- ii. A second offense of the same professional standard
- iii. An egregious breach of a professional standard as outlined in the student manual and/or behaviors that may include but are not limited to violation of the APTA Code of Ethics for the Physical Therapist and/or the APTA Guide for Professional Conduct

If a student believes they have been erroneously, capriciously, or otherwise unfairly treated in the process or decision, they may appeal decisions made by the PTMRS AAC to the chair of PTMRS.

If the student has been suspected of cheating or in any way violating the Academic Code of Conduct, the student will be referred to the AAC as well as Office of Student Conduct and Conflict Resolution. Any concern regarding the student's professional behavior will be brought to the attention of the faculty as appropriate.

## Doctor of Physical Therapy Program Goals

### STUDENT:

1. Demonstrate effective written, verbal, technological, and nonverbal communication skills in all professional settings.
2. Demonstrate leadership and advocacy skills.
3. Demonstrate professional and social responsibility by participating in local, national, and/or global initiatives.

### GRADUATE:

1. Be clinically competent and culturally sensitive doctors of physical therapy who, guided by the APTA Core Values, excel in patient/client management.
2. Exhibit professionalism, commitment to lifelong learning, and use of evidence-based practice.

Please visit Bouvé College Learning Outcomes (<http://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

## Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Core Requirements

A grade of C or higher is required in all courses.

Code	Title	Hours
<b>Foundations</b>		
PT 6330 and PT 6331	Functional Anatomy 1 and Lab for PT 6330	3
PT 6340 and PT 6341	Functional Anatomy 2 and Lab for PT 6340	5
PT 5101 and PT 5102	Foundations of Physical Therapy and Lab for PT 5101	4
PT 6350 and PT 6351	Foundations of PT Examination and Therapeutic Activities and Lab for PT 6350	5
<b>Core</b>		
PT 5160	Psychosocial Aspects of Healthcare	3
PT 6243	Health Education, Promotion, and Wellness	3
PT 6245	Seminar for PT 6243	1
PT 5140	Pathology	4
PT 5500	Pharmacology for Physical Therapy	2
PT 5503 and PT 5504	Cardiovascular and Pulmonary Management and Lab for PT 5503	5
PT 5515 and PT 5516	Integumentary Systems and Lab for PT 5515	3
PT 5138 and PT 5139	Neuroscience and Lab for PT 5138	5
PT 5150 and PT 5151	Motor Control, Development, and Learning and Lab for PT 5150	5
PT 5209 and PT 5210	Neurological Rehabilitation 1 and Lab for PT 5209	5
PT 6221 and PT 6222	Neurological Rehabilitation 2 and Lab for PT 6221	5

PT 6550	Pediatric Aspects of Life Span Management	3
PT 6555	Geriatric Aspects of Life Span Management	2
PT 6305 and PT 6306	Musculoskeletal Management I and Lab for PT 6305	5
PT 6405 and PT 6406	Musculoskeletal Management II and Lab for PT 6405	5
PT 6505 and PT 6506	Musculoskeletal Management 3 and Lab for PT 6505	4
PT 6600	Special Topics	2
PT 6520 and PT 6521	Prosthetic Management and Lab for PT 6520	2
PT 6251	Diagnostic Imaging	3
PT 6420	PT Administration and Management within the U.S. Healthcare System	4
PT 5226	Physical Therapy Professional Seminar 2	2
PT 5540	Clinical Integration 1: Evidence and Practice	2
PT 6250	Clinical Integration 2: Evidence and Practice	2
<b>Clinical</b>		
PT 6441	Clinical Education 1	6
PT 6442	Clinical Education 2	6
PT 6450	Clinical Education 3	8
<b>Research</b>		
PT 6510	Evidence-Based Practice and Research Design	3
PT 6511	Research Methods and Statistics in PT	2
PT 6512	DPT Capstone 1	1
PT 6513	DPT Capstone 2	2
<b>Co-op</b>		
PT 5111	Professional Development for Bouvé Graduate Co-op	1
PT 6964	Co-op Work Experience (taken two semesters)	0

### Optional Concentration

- Pediatric Physical Therapy (p. 626)
- Sports Performance (p. 626)

### Program Credit/GPA Requirements

123 total semester hours required (138–143 semester hours with optional concentration)

Minimum 3.000 GPA required

### Concentration in Pediatric Physical Therapy

Code	Title	Hours
<b>Required</b>		
CAEP 5150	Early Intervention: Family Systems	3
CAEP 5151	Early Intervention: Infant and Toddler Development, Risk, and Disability	3
PT 6512	DPT Capstone 1 <sup>1</sup>	1
PT 6513	DPT Capstone 2 <sup>1</sup>	2
PT 6550	Pediatric Aspects of Life Span Management	3
Complete one of the following:		6-8
PT 6442	Clinical Education 2	
PT 6450	Clinical Education 3	

### Concentration in Sports Performance

Code	Title	Hours
<b>Required</b>		
PT 5165	Sports Medicine: Managing the Injured Athlete	4
PT 6237	Advanced Special Topics in Physical Therapy <sup>2</sup>	2
PT 6512	DPT Capstone 1	1

PT 6513	DPT Capstone 2	2
Complete one of the following:		6-8
PT 6442	Clinical Education 2	
PT 6450	Clinical Education 3	

- <sup>1</sup> Pediatric physical therapy concentration students will be assigned a faculty with expertise in pediatric physical therapy. Pediatric-focused PT project proposals will be reviewed and approved by the director of the pediatric physical therapy concentration in line with current course requirements.
- <sup>2</sup> Sports performance concentration students will be assigned a faculty project in sports, orthopedic, and/or anatomy. PT project proposals will be reviewed and approved by the director of the sports performance concentration in line with current course requirements.

## Academic Progression Policies

### ACADEMIC STANDING

Students must maintain an overall grade-point average of #3.000 #or higher and successfully complete all professional courses (including cooperative education, integrated clinical education, and full time clinical education experiences) with a grade of C or better (or Satisfactory for experiential education experiences) to progress into the subsequent semester of professional courses.

### PROBATION IN THE PROFESSIONAL PHASE

Students in the professional phase of the program who fail any professional course or whose overall GPA drops below a 3.000 must request to the department's Academic Affairs Committee to be granted a semester of academic probation to remediate the deficiency by the semester deadline set by the PTMRS Academic Standing Committee in order to remain in the Doctor of Physical Therapy program. Failure to request probation in a timely manner will result in a student being dismissed from the program.

A DPT student may only be placed on academic probation for one semester at a time or until the failed course is offered again. A DPT student may only be placed on academic probation a maximum of twice during the entire professional phase of the program.

During probation, students must correct all deficiencies as specified in their respective signed probation plan during the applicable probationary period. Failure to remediate the deficiencies within the agreed-upon time will result in dismissal from the program. During the period of probation, the student must earn a semester GPA of 3.000 or better, or the student will be dismissed from the DPT program. Once the student has successfully completed their probation action plan, they should work with their academic advisor to be removed from probation.

The chair of the department's Academic Affairs Committee may grant a DPT student's request for probation without a formal meeting under the following circumstances:

- The student has not already reached their maximum two semesters of probation.
- The student is in good professional standing with the Professional Behaviors Committee in accordance with the professional behaviors policy.

### PROFESSIONAL BEHAVIORS REQUIREMENT

See Progression in the DPT Program located in the overview text.

### *Academic Dismissal from Major*

Students in the DPT program will be dismissed from their major effective the following academic semester for any of the reasons noted below:

- Failure to earn a grade of C or better in a total of three professional courses, regardless of remediation. Within the physical therapy program, each specific professional course (with separate registration number) will be counted as a separate failure even if content is related.
- Failure to remediate a prior deficiency outlined within the probation contract within the agreed-upon time frame.
- Failure to earn the minimum required grade in the same course twice.
- Failure to maintain an overall GPA of 3.000 or higher during the professional phase of the DPT program. Students will be dismissed if they are not eligible for a probationary status.
- Physical therapy students will be permitted only two changes in year of DPT graduation. Any additional changes to year of graduation will result in the student being dismissed from the program.
- Students who do not adhere to the professional standards of the program are violating academic policy and will be dismissed if any of the following occurs:
  - A third breach of professional standards
  - A second offense of the same professional standard
  - Any egregious breach of a professional standard as outlined in the student manual and/or behaviors that may include but are not limited to violation of the APTA Code of Ethics for the Physical Therapist and/or the APTA Guide for Professional Conduct

### *Appeal of Academic Standing*

Students may request, through their academic advisor, to appeal to the chair of the department's Academic Standing Committee to meet with the committee for an exception to the Academic Progression and Probation Policy for DPT program for extenuating or capricious circumstances as provided in the student's respective handbook.

**Essential Functions for Physical Therapy Students**

The DPT program at Northeastern University is a challenging and intense program, which places specific demands on a student enrolled in the program. The academic rigor of the program closely corresponds to intellectual and physical demands that a graduate will encounter as a practicing physical therapist. Northeastern's DPT program is designed to prepare students to enter the physical therapy profession as a generalist with the skills, knowledge, and ability to successfully perform all the required functions of an entry-level physical therapist. Essential functions are the aptitudes and abilities required of physical therapist students to successfully complete the curriculum of the DPT program and to perform the clinical skills of a physical therapist consistent with patient/client management as detailed in the Guide to Physical Therapy Practice.

The purpose of this document is to delineate the essential functions that are fundamental to the DPT program. Upon admission, students must be able to perform each of the essential functions outlined below during classroom, laboratory, and experiential education learning activities (including, but not limited to, participation in one-on-one interactions, small group discussion and presentation, large group lectures, service-learning, and patient encounters) in both academic, community, and clinical settings.

Students are also required to demonstrate good judgment, responsibility, integrity, sensitivity, and compassion, while simultaneously being able to accurately synthesize and apply knowledge in a timely and safe manner.

Students are required to perform the following essential functions of the DPT program:

**Communication Functions**

1. Read, understand, and communicate information in written and spoken formats using the English language.
2. Interpret and respond to the verbal, nonverbal, and written communications of others in an appropriate, professional manner.

**Affective Functions**

1. Establish, value, and continue to develop professional, respectful, empathetic relationships with individuals from all lifestyles, cultures, ages, socioeconomic backgrounds, and abilities.
2. Develop, value, and maintain effective working relationships with faculty, students, professional colleagues, peers, patients/clients, families, and the general public.
3. Meet externally imposed deadlines and time requirements.
4. React effectively in challenging situations with use of appropriate resources.
5. Demonstrate an ability to function effectively in complex, highly stimulating environments.
6. Demonstrate responsibility for self-directed assessment, reflection, and professional growth.
7. Demonstrate core values of honesty, integrity, and accountability for the consequences of one's own actions.
8. Demonstrate ethical behavior, proper judgement, and decision-making skills.

**Cognitive Functions**

1. Demonstrate self-management skills including planning, organizing, time management, and adhering to legal/regulatory requirements.
2. Use a variety of sources, including reading material, lecture, discussion, observation, and physical examinations to:
  - a. Recall, interpret, extrapolate, and apply information
  - b. Measure, analyze, synthesize, and evaluate information
  - c. Gather and prioritize information needed to solve a problem
3. Respond appropriately to emerging problems and potentially hazardous situations by making timely judgments to react effectively and seek assistance when necessary.
4. Accept and apply constructive feedback.

**Psychomotor Functions**

1. Possess physical strength, stamina, balance, movement, hand-eye coordination, and dexterity required to perform patient care tasks in a manner that does not compromise the safety of self or others.
2. Perform intermittent physical activity of the whole body throughout an 8- to 12-hour period.
3. Engage in complex, coordinated movements needed during a variety of activities including skills lab practice, manual techniques, patient examination, intervention, and guarding.
4. Utilize auditory, visual, and tactile senses to receive information from written, spoken, and nonverbal communication mechanisms; observation of human structures; postures and movements; and equipment and or technology.
5. Quickly and appropriately react to sudden or unexpected events or movements of others.

For further information and clarification please refer to the Post Baccalaureate Doctor of Physical Therapy (PBDPT) Student Handbook (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Handbooks.aspx>) and Clinical Education Student Manual (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Handbooks.aspx>).

## Human Movement and Rehabilitation Sciences, MS

A strong global need exists for interdisciplinary, innovative, and translational research and practice directed toward improving quality of life and participation of all people in our communities. To meet this need, we offer a novel Master of Science in Human Movement and Rehabilitation Sciences.

Human movement and rehabilitation sciences encompasses a broad range of topics including sports performance, functional assessments, occupational biomechanics and ergonomics, motor control and learning, neuroscience, musculoskeletal disorders, orthopedics, aging, assistive technology, injury prevention and rehabilitation, communication sciences, speech, and early development.

The objective of this program is to prepare graduates to assist in advancing basic, translational, and applied research, as well as practice in human movement and rehabilitation sciences. The program is based on the integration of core skills and concepts across the multiple disciplines that are associated with human movement and rehabilitation sciences, coupled with the acquisition of skills and tools, and specialization within specific areas and tracks.

The Master of Science in Human Movement and Rehabilitation Sciences program is housed in the Department of Physical Therapy, Movement, and Rehabilitation Sciences, offering excellent collaborative teaching and research programs across the departments and school of the Bouvé College of Health Sciences, the Khoury College of Computer Sciences, the College of Engineering, and the College of Science. The 12-month program requires 32 semester hours of required and elective courses, including 4 semester hours devoted to the capstone project.

Please visit Bouvé College Learning Outcomes (<http://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
<b>Seminar</b>		
Students must enroll for two semesters for a total of 2 semester hours:		2
PT 7030	Interdisciplinary Seminar in Rehabilitation Science	
<b>Rehabilitation Science and Human Movement</b>		
PT 5321	Applications of Biomechanics in Human Function and Movement	4
PT 6230	Capstone Project: Human Movement and Rehabilitation Sciences	4
PT 7001	Core Concepts in Rehabilitation Science and Research	3
PT 7005	Experimental Design and Applied Statistics	4
PT 7020	Technologies in Movement and Rehabilitation Science	4

#### Electives

Code	Title	Hours
Complete 11 semester hours from the list below. Students must petition to take electives outside the approved list.		11
Some courses may require prerequisite coursework.		
BIOE 5235	Biomedical Imaging	
BIOE 5800	Systems, Signals, and Controls for Bioengineers	
BIOE 5810	Design of Biomedical Instrumentation	
BIOL 5601	Multidisciplinary Approaches in Motor Control	
CAEP 6326	Behavioral Concepts and Principles	
EXSC 5210	Physical Activity and Exercise: Prescription, Measurement, and Testing	
EXSC 5230	Physical Activity and Exercise: Effects on Musculoskeletal Health and Disease	
HLTH 5410	Introduction to Statistics in Health and Behavioral Science	
HLTH 5450	Healthcare Research	
IE 5630	Biosensor and Human Behavior Measurement	
IE 6500	Human Performance	
IE 7315	Human Factors Engineering	
ME 5250	Robot Mechanics and Control	
ME 5659	Control Systems Engineering	
ME 5665	Musculoskeletal Biomechanics	
ME 7247	Advanced Control Engineering	
PHTH 5202	Introduction to Epidemiology	
PHTH 6202	Intermediate Epidemiology	

PHTH 6210	Applied Regression Analysis
PHTH 6440	Advanced Methods in Biostatistics
PT 5133	Kinesiology
PT 5138	Neuroscience
PT 5150	Motor Control, Development, and Learning
PT 5209	Neurological Rehabilitation 1

## Extreme Medicine, Graduate Certificate

### Overview

The Graduate Certificate in Extreme Medicine is an online interprofessional program designed to prepare healthcare professionals to provide medical services in austere conditions. The core didactic courses provide foundational instruction in human factors, crisis resource management, efficiency of highly skilled teams, and theory and ethics of care in humanitarian crises.

In addition to the certificate courses, students may take one or more optional on-ground experiential practicum courses offered in an executive format. Experiential courses enable students to complete intensive, hands-on training and apply the principles covered in the didactic courses. This program is offered in collaboration with World Extreme Medicine (WEM (<https://worldextrememedicine.com/>)).

Please visit Bouvé College Learning Outcomes for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Core Requirements

A grade of B– or higher is required in each of the following:

Code	Title	Hours
MSCI 5001	Human Factors and Situational Awareness	3
MSCI 5002	Crisis Resource Management and Case Studies	3
MSCI 5003	Humanitarian Aid Practice and Principles	3
MSCI 5004	Humanitarian and Disaster Response Ethics	3

### Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

### Optional Courses

After completion of the above courses, students are eligible to register for any of the following using Bouvé College's Special Student (<https://registrar.northeastern.edu/article/non-matriculated-registration/>) registration process:

Code	Title	Hours
MSCI 5005	Care During Conflict	3
MSCI 5401	Human Factors and Situational Awareness Practicum <sup>1</sup>	2
MSCI 5402	Expedition and Cold Weather Medicine Practicum <sup>1</sup>	2
MSCI 5403	Expedition and Wilderness Medicine Practicum <sup>1</sup>	2
MSCI 5404	Tactical Medicine Practicum <sup>1</sup>	2
MSCI 5405	Humanitarian Medicine Practicum <sup>1</sup>	2

<sup>1</sup> *Please note:* Optional experiential courses may be restricted to licensed or credentialed professionals or to students in the last two years of study in a medical or allied health professional program. Additional fees may apply to experiential courses.

The School of Community Health and Behavioral Sciences offers students interdisciplinary education and research excellence—drawing on novel health technologies and data literacy to address society's most pressing public health issues.

Students in the school are prepared to be the next generation of innovators and thought leaders in the health professions and public health. They will have an opportunity to be empowered to affect real change by leveraging new and emerging technologies and data.

The school is designed to improve individuals, communities, and society through three pillars of excellence:

- Health technologies
- Public mental health
- Social and environmental determinants of health to achieve social justice

### **Department of Applied Psychology**

Graduate programs in the Department of Applied Psychology (including two doctoral programs accredited by the American Psychological Association) reflect Northeastern University's tradition of practice-oriented education with an ecological and multicultural focus. Faculty and students come from diverse ethnic and cultural backgrounds, providing an enriching learning experience. The department is a scientist-practitioner-based unit that generates new psychological knowledge through research, and the translation of research, to applications that promote mental and physical health across the life span.

The Bouvé College of Health Sciences emphasizes experiential and field-based learning, interdisciplinary and global knowledge, and integration of science and practice. The Department of Applied Psychology seeks to prepare students to become mental and behavioral health professionals in a variety of educational, government, community, organizational, and private settings. Our doctoral programs provide excellent educational opportunities for those interested in professional psychology with specialized training for future careers in academic or practice positions as licensed psychologists. Our students have an opportunity to acquire knowledge and competency needed for a lifetime of personal fulfillment and professional achievement.

### **Doctor of Philosophy (PhD)**

- Counseling Psychology (p. 634)
- School Psychology (p. 636)

### **Certificate of Advanced Graduate Studies (CAGS)**

- Applied Educational Psychology (p. 641)
- Applied Psychology (p. 642)

### **Master of Science in Counseling Psychology (MSCP)**

- Counseling Psychology (p. 643)

## Graduate Certificate

- Early Intervention (p. 606)

## Department of Health Sciences

The Department of Health Sciences in the Bouvé College of Health Sciences at Northeastern University provides a unique, transdisciplinary setting that incorporates academics, research, and practice and seeks to prepare students for a wide range of career paths. We offer a bachelor's degree in health sciences and options for combined majors with the D'Amore-McKim School of Business, the College of Social Sciences and Humanities, the College of Science, the College of Engineering, and the Khoury College of Computer Sciences, in addition to minors in exercise science, public health, global health, and nutrition. We offer several graduate degrees: Master of Public Health, Master of Science in Exercise Science, and a combined master's in the two fields. We have exciting new programs that will begin enrolling in Fall 2023: a one-year accelerated, experiential Master of Public Health and a new Master of Science in Real-World Evidence in collaboration with the OHDSI Center at Northeastern's Roux Institute. We also collaborate with Khoury to offer a Master of Science in Health Informatics, as well as combined graduate degrees with the School of Pharmacy, the Physician Assistant Program, and the School of Law. At the doctoral level, we offer a PhD program in population health and, in cooperation with Khoury, a PhD degree in personal health informatics.

Our diverse faculty has expertise in the fields of population health; health disparities; biostatistics; epidemiology; exercise science; medical sociology; public policy; personal health technologies; neurodevelopmental disorders; and nutrition, environmental, occupational, and mental health, including addictive behaviors and responses to traumatic events. Students have the opportunity to work side-by-side with faculty in conducting cutting-edge research in these fields.

In line with Northeastern's commitment to interdisciplinary research and urban engagement, we teach and work closely with many other schools, centers, and institutes in the university, including the Institute for Health Equity and Social Justice Research; the Center for Community Health Education, Research and Service; the Social Science Environmental Health Research Institute; and the Center for Health Policy and Healthcare Research; as well as community agencies and neighborhood health centers in the local Boston area and beyond.

## Doctor of Philosophy (PhD)

- Personal Health Informatics (p. 314)
- Population Health (p. 646)

## Master of Public Health (MPH)

- Public Health (p. 650)
- Public Health—Accelerated (p. 652)

## Master of Science (MS)

- Exercise Science, MS—Online (p. 654)
- Health Informatics (p. 314)
- Real-World Evidence in Healthcare and Life Sciences (p. 599)

## Dual Degree

- Law, JD / Public Health, MPH (p. 602)
- Pharmacy, PharmD (p. 603)—Direct Entry / Public Health, MPH
- Physician Assistant Studies, MS / Public Health, MPH (p. 604)
- Public Health, MPH / Health Informatics, MS (p. 605)

## Graduate Certificates

- Health Informatics Management and Exchange (p. 665)
- Health Informatics Privacy and Security (p. 666)
- Health Informatics Software Engineering (p. 667)

## Counseling Psychology, PhD

The Doctor of Philosophy in Counseling Psychology program is accredited by the American Psychological Association (APA). It is designed to train the next generation of mental health professionals. The program offers doctoral education and training in psychology and seeks to prepare students for entry-level practice in counseling psychology. Doctoral-level counseling psychologists conduct research, teach at the university level, supervise students and professionals, consult with community agencies, and provide clinical services to people across the developmental life span. Counseling psychologists also enhance the science of health promotion and health psychology and emphasize community-based interventions. It is the mission of the PhD in Counseling Psychology program to train multiculturally competent counseling psychologists who are clinically adept in multiple settings with a variety of psychological and health-related issues and who are able to conceptualize, conduct, and evaluate research across biological, cultural, and relational systems in numerous social contexts, such as families, schools, neighborhoods, and communities.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/bchs/about/learning-outcomes/>) for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Milestones

Annual review

Four qualifying examinations completed in the first three years—research, ethics, assessment, and intervention

Research team during the first year (two consecutive semesters)

Dissertation committee

Dissertation proposal

Dissertation defense

### Core Requirements

A grade of B or higher is required in all coursework.

Code	Title	Hours
<b>Basic</b>		
CAEP 6390	History and Systems of Psychology	3
CAEP 6394	Advanced Multicultural Psychology	3
CAEP 7750	Biological Bases of Behavior	3
CAEP 7755	Cognitive and Affective Bases of Behavior	3
CAEP 7756	Social Psychology in an Organizational and Ecological Context	3
<b>Fieldwork</b>		
Complete 8 semester hours from the following:		8
CAEP 7741	Advanced Fieldwork 1	
CAEP 7742	Advanced Fieldwork 2	
CAEP 7743	Advanced Fieldwork 3	
CAEP 7744	Advanced Fieldwork 4

CAEP 6350	Introduction to Cognitive Assessment	3
CAEP 6352	Personality Assessment	3
CAEP 6360	Consultation and Program Evaluation	3
CAEP 7710	Advanced Clinical Assessment	3
CAEP 7720	Advanced Clinical Interventions	3
CAEP 7758	Doctoral Seminar in Contemporary Theories of Psychotherapy	3
<b>Elective</b>		
Three semester hours can be chosen from any graduate level CAEP course or combination of graduate level CAEP courses outside of the PhD in Counseling Psychology program of study. Other electives may be chosen upon approval of the program director and faculty adviser.		3
<b>Professional</b>		
Complete 6 semester hours from the following:		6
CAEP 7701	Doctoral Seminar in Counseling Psychology (Repeatable 3 times for 1 credit and 3 times for 0 credits)	
CAEP 7732	Legal and Ethical Issues in Community and Educational Settings	
<b>Research</b>		

CAEP 7711	Measurement: Advanced Psychometric Principles	3
CAEP 7712	Intermediate Statistical Data Analysis Techniques	3
CAEP 7716	Advanced Research and Data Analyses 2	3

**Internship**

Complete 3 semester hours. Prior to beginning internship consult with director, DCT, and/or the Doctoral Internship Seminar instructor. 3

CAEP 7798	Doctoral Internship	
-----------	---------------------	--

**Dissertation**

Code	Title	Hours
CAEP 9990	Dissertation Term 1	
CAEP 9991	Dissertation Term 2	

**Program Credit/GPA Requirements**

62 total semester hours required  
 Minimum 3.000 GPA required

## School Psychology, PhD

Northeastern University's Doctor of Philosophy in School Psychology program is accredited by the American Psychological Association and the National Association of School Psychologists. The program is designed to prepare the next generation of leaders in school psychology. The ecological perspective and scientist-practitioner training model provide the foundation for the program's educational goals. Students have an opportunity to learn how to conduct research, to use research to inform practice, and to contribute to the scientific foundation of professional practice.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Milestones

Comprehensive examination  
Annual review  
Mentored research project  
Dissertation committee  
Dissertation proposal  
Dissertation defense

#### Core Requirements

A grade of B or higher is required in all coursework.

Code	Title	Hours
<b>Professional</b>

Minimum 3.000 GPA required

## School Psychology, CAGS

Northeastern University's Certificate of Advanced Graduate Study in School Psychology is approved by the National Association of School Psychologists and the Massachusetts Department of Elementary and Secondary Education. The overarching purpose of the program is to develop highly competent school psychologists. Some students also choose to concentrate in applied behavior analysis or concurrently enroll in the Graduate Certificate in Early Intervention (p. 606). The option to concurrently enroll in early intervention training is designed to prepare school psychologists to work with infants and toddlers and their families in community and related agencies, on interdisciplinary teams, and on the transition to school. The applied behavior analysis concentration is designed to prepare school psychologists to address the learning and behavioral needs of children and adolescents with challenging behaviors in school, home, and community settings, including children with autism spectrum disorders.

Please see also the Master of Science in Applied Educational Psychology (p. 641) program.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

A grade of B or higher is required in all coursework.

Code	Title	Hours
<b>Clinical/Applied</b>		
CAEP 6345	Promoting Youth Academic Success in Schools	3
CAEP 6347	Behavior Management	3
CAEP 6353	Curriculum-Based Assessment and Data-Based Decision Making	3
CAEP 6354	Social, Emotional, and Behavioral Assessment	3
CAEP 6401	Counseling Children and Adolescents in Schools	3
CAEP 6402	Promoting Social, Emotional, and Behavioral Success in Schools	3
Elective course (with faculty advisement) <sup>1</sup>		3
<b>Practicum</b>		<b>4</b>
CAEP 8415	Practicum in School Psychology 1	2
CAEP 8416	Practicum in School Psychology 2	2
CAEP 6999	Practicum Continuation	0
<b>Internship</b>		
Complete 6 semester hours from the following:		6
CAEP 8501	Internship in School Psychology 1	
CAEP 8502	Internship in School Psychology 2	

<sup>1</sup> Courses taken to fulfill the optional concentration may be used to fulfill the elective requirement.

### Optional Concentration

#### APPLIED BEHAVIOR ANALYSIS

Code	Title	Hours
CAEP 6326	Behavioral Concepts and Principles	3
CAEP 6327	Behavior Assessment	3
CAEP 6329	Service Administration	3
CAEP 6336	Systematic Inquiry 1	3

#### Optional Intensive Practicum

An intensive practicum is optional in this concentration. Consult your faculty advisor.

CAEP 8417	Intensive Practicum in Applied Behavior Analysis 1	2
CAEP 8418	Intensive Practicum in Applied Behavior Analysis 2	2
CAEP 8419	Intensive Practicum in Applied Behavior Analysis 3	2
CAEP 8421	Intensive Practicum in Applied Behavior Analysis 4	2

### Program Credit/GPA Requirements

31 total semester hours required

Minimum 3.000 GPA required

## Applied Behavior Analysis, MS

The Master of Science in Applied Behavior Analysis (ABA) program is designed to prepare graduates to assume supervisory behavior analyst roles in schools and service agencies and to serve as independent consultants. The Association for Behavior Analysis International has verified the following course meets the coursework requirements for eligibility to take the Board Certified Behavior Analyst® or Board Certified Assistant Behavior Analyst® examination. Applicants will need to meet additional requirements before they can be deemed eligible to take the examination. While retaining a practitioner focus, this program examines topics such as conditioned reinforcement, motivational influences on behavior, and errorless teaching procedures. Courses explore the principles and procedures of applied behavior analysis in-depth and address its philosophical underpinnings. With this background, successful graduates are prepared to address the most complex behavior problems and learning challenges. Students complete 7 core courses, plus an additional 3 courses that extend the student's familiarity with clinical procedures and with the research supporting their use. Students may elect to complete their supervised fieldwork hours by taking Intensive Practicum in Applied Behavior Analysis 1–4 (Intensive Practicum in Applied Behavior Analysis 1 (CAEP 8417); Intensive Practicum in Applied Behavior Analysis 2 (CAEP 8418); Intensive Practicum in Applied Behavior Analysis 3 (CAEP 8419); Intensive Practicum in Applied Behavior Analysis 4 (CAEP 8421), in addition to the 10 required courses.

Courses are delivered in an online format. Students attend lectures virtually and view supplementary material on their own schedules, taking advantage of technological advances that promote student learning and increase student-to-instructor and student-to-student communication.

Students take one or two courses each academic term, and courses are offered during the fall, spring, and summer full semesters. Behavioral Concepts and Principles (CAEP 6326) and Service Administration (CAEP 6329) serve as prerequisite courses to the remaining courses in the program.

### Professional Portfolio

The capstone for the program is the professional portfolio. This portfolio, which is compiled electronically, documents the student's acquisition of critical behavioral procedures. This portfolio documents the student's behavioral competency in critical clinical skills. These skills, each of which is associated with a specific project, include:

- Preference and reinforce assessment
- Functional assessment of problem behavior
- Task analysis
- Discrete trial
- Stimulus equivalence
- Conditioned reinforcement
- Literature review

Each semester, students complete assignments associated with the above clinical skills, and each assignment culminates in professional documents to be included in the student's professional portfolio. A faculty member reviews and signs each assignment in the professional portfolio. The faculty member's signature indicates that the student has achieved the faculty-established standards for the project. Graduates are encouraged to use their professional portfolio when applying for employment.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

## Applied Educational Psychology, MS

Within Northeastern University's MS in Applied Educational Psychology, students enroll in foundational courses in learning, human development, assessment, and diversity. Students also begin their practicum sequence with the pre-practicum, the purpose of which is to provide students with observational experiences and an early opportunity to learn about the school ecology. Following completion of the MS in Applied Educational Psychology, students in good academic standing will enter the CAGS in School Psychology program. Both the MS and CAGS are necessary to obtain licensure as a school psychologist.

Students who are interested in concurrently pursuing early intervention qualification should consider the Early Intervention Graduate Certificate (p. 606) . Please see also the CAGS School Psychology (p. 638) program.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

A grade of B or higher is required in all coursework.

Code	Title	Hours
<b>Clinical/Applied</b>		
CAEP 6201	Introduction to Assessment	3

CAEP 6206	Learning Principles	3
CAEP 6218	Infant, Child, and Adolescent Development	3
CAEP 6247	Child and Adolescent Psychopathology	3
CAEP 6328	Single-Case Research Design	3
CAEP 6360	Consultation and Program Evaluation	3
CAEP 6365	Seminar in School Psychology	3

### Program Credit/GPA Requirements

31 total semester hours required

Minimum 3.000 GPA required

## Applied Psychology, MS

The Master of Science in Applied Psychology program at Northeastern is committed to providing evidence-based knowledge in counseling psychology to students who seek entry into a PhD in Counseling Psychology program and to graduates of baccalaureate degrees in human services, psychology, and health sciences who desire quality training in applied psychology. The program is 30 semester hours and is intended to be completed in two semesters. It does not meet licensing regulations for mental health counselors in the Commonwealth of Massachusetts.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Core Requirements

A grade of B or higher is required in each course.

Code	Title	Hours
CAEP 5877	Research Methods in Applied Psychology	3
CAEP 6203	Understanding Culture and Diversity	3
CAEP 6260	Community Counseling Psychology	3
CAEP 6282	Ethics and Professional Development	3
HLTH 5410	Introduction to Statistics in Health and Behavioral Science	3

### Concentrations

Complete one of the following:

- Child, Adolescent, and Family Psychology (p. 642)
- Prevention Science (p. 642)

### Program Credit/GPA Requirements

30 total semester hours required

Minimum 3.000 GPA required

### CHILD, ADOLESCENT, AND FAMILY PSYCHOLOGY

Code	Title	Hours
Complete five of the following:		15
CAEP 5150	Early Intervention: Family Systems	
CAEP 5878	Pediatric Psychology	
CAEP 5879	Trauma and Mental Health	
CAEP 6218	Infant, Child, and Adolescent Development	
CAEP 6222	Human Sexuality	
CAEP 6247	Child and Adolescent Psychopathology	

### PREVENTION SCIENCE

Code	Title	Hours
CAEP 5876	Mental Health Education and Program Planning	3
CAEP 6220	Development Across the Life Span	3
CAEP 6242	Psychopathology: Diagnosis and Treatment Planning	3
CAEP 6360	Consultation and Program Evaluation	3
PHTH 6204	Society, Behavior, and Health	3

## Counseling Psychology, MSCP

The Master of Science in Counseling Psychology program at Northeastern University is committed to the development of competent Licensed Mental Health Counselors (LMHC) through the disciplinary studies and contemporary professional practice of counseling psychology. The program complies with licensing regulations for mental health counselors in the Commonwealth of Massachusetts and is unique in its offer of a choice of specific specializations to gain additional depth in selected areas within the general Master of Science program.

Please visit Bouvé College Learning Outcomes for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

The MSCP program requires a grade of B or better in all courses. Practicum and internship courses require a grade of Satisfactory (S). Grades of B– and lower or Unsatisfactory (U) are inconsistent with this policy. If received, students will be required to pay for the course again, repeat the course, and earn a grade of B or better or a grade of Satisfactory (S) in clinical practice courses.

### Core Requirements

Code	Title	Hours
<b>Seminar</b>		
CAEP 6380	Seminar in Feminist Psychology	3
<b>Required Core</b>		
CAEP 6200	Introduction to Counseling: Theory and Process in an Ecological Context	3
CAEP 6201	Introduction to Assessment	3
CAEP 6203	Understanding Culture and Diversity	3
CAEP 6220	Development Across the Life Span	3
CAEP 6235	Vocational, Education, and Career Development	3
CAEP 6242	Psychopathology: Diagnosis and Treatment Planning	3
CAEP 6250	Individual Interventions	3
CAEP 6260	Community Counseling Psychology	3
CAEP 6282	Ethics and Professional Development	3
CAEP 6287	Group Counseling	3
CAEP 6375	Substance Use and Treatment	3
CAEP 6399	Clinical Skills in Counseling Psychology	3
<b>Research</b>		
CAEP 6202	Research, Evaluation, and Data Analysis	3
<b>Practicum</b>		
CAEP 8401	Practicum in Counseling Psychology <sup>1</sup>	3
<b>Internship</b>		
CAEP 8510	Internship in Counseling Psychology 1	3
CAEP 8511	Internship in Counseling Psychology 2	3

<sup>1</sup> If a student enrolls in Practicum in Counseling Psychology (CAEP 8401) two times, the student may only choose 6 semester hours for electives. In rare cases where the student has chosen a *concentration and enrolls in CAEP 8401 two times*, the successful completion of Practicum in Counseling Psychology (CAEP 8401) for the second time takes priority. The student then must either forgo the concentration to complete the program with 60 semester hours or may choose to enroll in an additional course to complete the program plus concentration for a total of 63 semester hours.

### Concentration or Electives

In addition to the core requirements, students may choose to complete either a concentration or electives.

- Child and Adolescent Counseling Concentration (p. 644)
- Early Intervention Concentration (p. 644)
- Research in Counseling Psychology Concentration (p. 644)
- Electives Option (p. 644)

### Program Credit/GPA Requirements

60–63 total semester hours required

Minimum 3.000 GPA required

### CHILD AND ADOLESCENT COUNSELING CONCENTRATION

Code	Title	Hours
CAEP 6247	Child and Adolescent Psychopathology	3
CAEP 6401	Counseling Children and Adolescents in Schools	3
Complete one of the following:		3
CAEP 6218	Infant, Child, and Adolescent Development	
CAEP 6402	Promoting Social, Emotional, and Behavioral Success in Schools	

### EARLY INTERVENTION CONCENTRATION

Students who would like to earn a certification in early intervention must complete two semesters of internship at an early intervention site.

Code	Title	Hours
Complete 9 semester hours from the following:		9
CAEP 5150	Early Intervention: Family Systems	
CAEP 5151	Early Intervention: Infant and Toddler Development, Risk, and Disability	
CAEP 5153	Early Intervention: Assessment and Intervention	
CAEP 6218	Infant, Child, and Adolescent Development	
SLPA 5152	Early Intervention: Planning and Evaluating Services	

### RESEARCH IN COUNSELING PSYCHOLOGY CONCENTRATION

Code	Title	Hours
Complete 9 semester hours from the following:		9
CAEP 6328	Single-Case Research Design	
CAEP 7711	Measurement: Advanced Psychometric Principles	
CAEP 7712	Intermediate Statistical Data Analysis Techniques	
CAEP 7716	Advanced Research and Data Analyses 2	
CAEP 7771	Research Team Experience	
HLTH 5410	Introduction to Statistics in Health and Behavioral Science	
PHTH 6320	Qualitative Methods in Health and Illness	

### ELECTIVES OPTION

When students are required to complete Practicum in Counseling Psychology (CAEP 8401) two times, students may only choose 6 semester hours as electives. Electives not on this list may be chosen with faculty advisor approval.

Code	Title	Hours
Complete 9 semester hours from the following:		9
CAEP 6218	Infant, Child, and Adolescent Development	
CAEP 6222	Human Sexuality	
CAEP 6247	Child and Adolescent Psychopathology	
CAEP 6283	Brief Therapies	
CAEP 6286	Family Counseling Interventions	
CAEP 6390	History and Systems of Psychology	
CAEP 6394	Advanced Multicultural Psychology	
CAEP 7720	Advanced Clinical Interventions	
CAEP 7758	Doctoral Seminar in Contemporary Theories of Psychotherapy	
PHTH 6320	Qualitative Methods in Health and Illness	

## Early Intervention, Graduate Certificate

Northeastern University's Certificate Program in Early Intervention is an interdisciplinary, preservice training program that is designed to fulfill requirements for certification as an early intervention specialist, at the advanced provisional level, as set forth by the Massachusetts Department of Public Health (DPH).

The interdisciplinary nature of the program is facilitated by the interaction of graduate students from several disciplines (including school psychology, counseling psychology, and speech-language pathology); undergraduate students from majors such as speech-language pathology and audiology and psychology; and working professionals in the field. Personnel working in the field may use their work sites for field training.

The program is delivered in a hybrid format. Classes meet on campus one day each month, and additional course content is delivered online.

This graduate certificate program can be completed by non-degree-seeking students or integrated with master's or clinical doctoral degree programs. Application of course work from certain degree programs will be approved to apply to requirements of this graduate certificate; students are encouraged to speak with their academic advisors early in their programs to explore these options.

The goals for the early intervention certificate program are:

- To prepare personnel to provide services to infants and toddlers with disabilities and their families, from linguistically and culturally diverse backgrounds in urban environments
- To prepare personnel who have attained all competencies relative to early intervention, specified by the Massachusetts DPH, and that are consistent with best practice and research
- To prepare personnel in an interdisciplinary manner, drawing from Northeastern University's multidisciplinary resources
- To prepare personnel to function effectively across teams (individualized family service plan teams, community teams, interagency teams) and to understand the roles of their interdisciplinary teammates

Upon graduation, students are eligible for employment in an early intervention service delivery setting.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

A grade of B or higher is required in all courses.

Code	Title	Hours
<b>Required Core</b>		
CAEP 5150	Early Intervention: Family Systems	3
CAEP 5151	Early Intervention: Infant and Toddler Development, Risk, and Disability	3
SLPA 5152	Early Intervention: Planning and Evaluating Services	3
CAEP 5153	Early Intervention: Assessment and Intervention	3
<b>Practicum</b>		
SLPA 5154	Early Intervention Practicum 1	2
SLPA 5155	Early Intervention Practicum 2	2

#### Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

## Population Health, PhD

This program seeks to train students to become public health researchers and leaders through simultaneous examination of multiple determinations of health, including social, environmental, nutritional, and behavioral risk factors. Our students investigate the underlying causes of adverse health, including disease, disparities, and disability, through training in core population health disciplines—biostatistics, epidemiology, and health services—together with individual-specific and specialized training in topics related to student research. Importantly, our students are mentored by Northeastern's distinguished faculty, who individually and together conduct innovative, solution-focused research in critical population health topics.

Our population health doctoral students have an opportunity to learn to conduct research that addresses five key health determinants:

1. Social and community contexts
2. Environment and neighborhoods
3. Health and healthcare delivery
4. Education
5. Economic stability

Our diverse faculty has expertise in numerous population health disciplines, including health services research, health disparities, environmental and social epidemiology, biostatistics, exercise science, medical sociology, public policy, personal health technologies, and mental health. Students have the opportunity to work side by side with faculty in conducting cutting-edge, transdisciplinary research in these fields.

### Course Requirements

All population health PhD candidates must earn at least 33 semester hours by completing core research courses, selecting a concentration and taking courses for that concentration, and taking additional electives and directed study courses as needed and in consultation with their faculty advisors. They must complete a dissertation in order to earn their degree. Eight core courses (22–23 semester hours) must be taken by all students, in addition to a mandatory, non-credit-bearing seminar speaker series. All students must fulfill the requirements of their specific population health option: social and environmental determinants of health or health services and policy. There may be some flexibility in course selection based on a student's relevant experience and dissertation topic. Students must consult with their advisor before selecting elective courses (9–10 semester hours). Electives should be used to either help the student develop skills needed for research or to help the student develop new research ideas.

### ADVANCED ENTRY

This program is strictly for students who already have a master's degree in public health or a closely related area and have full-time employment at a company or agency who has entered into an agreement with Northeastern to be the student's sponsor. Completion of the PhD program requires 21–23 semester hours, including a yearlong research methods seminar and other advanced research courses. All students must fulfill the course requirements of their specific population health option: social and environmental determinants of health (9 semester hours) or health services and policy (7 semester hours). There may be some flexibility in course selection based on a student's relevant experience and dissertation topic. Students must consult with their advisor before selecting elective courses. Electives can be used to either help the student develop skills needed for research or to help the student develop new research ideas but are not required.

Please visit Bouvé College Learning Outcomes for the specific student learning outcomes for this program.

---

*Students who do not qualify for the doctoral degree, but who have completed required coursework with a cumulative GPA of 3.000 or better, may be eligible to receive a terminal MS Population Health (<http://catalog.northeastern.edu/graduate/health-sciences/community-health-behavioral-sciences/population-health-ms/>) degree. Note that no students will be admitted directly into the Population Health program to pursue a master's degree.*

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Milestones

Qualifying examination  
 Annual review  
 Dissertation committee  
 Dissertation proposal  
 Oral defense of dissertation proposal  
 Candidacy status  
 Dissertation defense

## Public Health, MPH

Through innovation in experiential education, research, and service, the Master of Public Health at Northeastern University (<https://bouve.northeastern.edu/health-sciences/programs/master-public-health/>) trains diverse and skilled professionals who promote and protect the health of all communities. This program is accredited by the Council on Education for Public Health (<https://ceph.org/>). CEPH is an independent agency recognized by the U.S. Department of Education to accredit schools of public health and public health programs outside of schools of public health.

### MPH—Traditional

In order to help prepare the next generation of public health leaders and professionals, the MPH offers our diverse graduate students an opportunity to:

- Participate in learning options that meet the needs of the working professional:
  - On-ground, Boston courses are offered in the evening (most classes meet once a week from 5:00 p.m. to 7:30 p.m.)
  - Enroll as either a full-time or part-time student
  - Complete your degree online, on-ground, or in hybrid format (combination of both)
  - MPH students on the Charlotte campus participate in residency courses to fulfill experiential and core coursework
- Take 9 semester hours of *concentration* coursework in emerging, relevant areas in the field, including public mental health and public health technologies, or choose electives from a wide range of topics, including cross-departmental offerings from Northeastern's other colleges (law, business, social sciences, and more)
- Enjoy a supportive learning environment that includes outstanding student mentoring

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

### Traditional Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

A grade of B– or higher is required in each required course.

Code	Title	Hours
<b>Public Health Core</b>		
PHTH 5202	Introduction to Epidemiology	3
PHTH 5210	Biostatistics in Public Health	3
PHTH 5212	Public Health Administration and Policy	3
PHTH 5214	Environmental Health	3
PHTH 5540	Health Education and Program Planning	3
PHTH 6204	Society, Behavior, and Health	3
<b>Social Determinants of Health Core</b>		
PHTH 5120	Race, Ethnicity, and Health in the United States	3
PHTH 6200	Principles and History of Urban Health	3
PHTH 6208	Urban Community Health Assessment	3
<b>Experiential Core</b>		
PHTH 6966	Practicum	3
PHTH 6910	Public Health Capstone	3

### Concentration or Electives Option

A concentration is not required. Students may complete electives (from the elective list below) in lieu of a concentration for a total of 9 semester hours.

- Public Health Technologies Concentration (p. 651)
- Public Mental Health Concentration (p. 651)
- Electives Option (p. 651)

### Program Credit/GPA Requirements

42 total semester hours required

Minimum 3.000 GPA required

**PUBLIC HEALTH TECHNOLOGIES CONCENTRATION**

<b>Code</b>	<b>Title</b>	<b>Hours</b>
HINF 5102	Data Management in Healthcare	3
HINF 6400	Introduction to Health Data Analytics	3
PHTH 6130	Public Health Technologies: Ethics and Equity	3

**PUBLIC MENTAL HEALTH CONCENTRATION**

<b>Code</b>	<b>Title</b>	<b>Hours</b>
CAEP 6100	Prevention and Intervention: Evidence-Based Practices	3
CAEP 6110	Etiology-Psychopathology Across the Life Span	3
CAEP 6220	Development Across the Life Span	3

**ELECTIVES OPTION**

<b>Code</b>	<b>Title</b>	<b>Hours</b>
Complete 9 semester hours from the following (in consultation with your faculty advisor, you may complete electives from another discipline):		9

PHTH 5222	Health Advocacy
PHTH 5226	Strategic Management and Leadership in Healthcare
PHTH 5230	Global Health
PHTH 5232	Evaluating Healthcare Quality
PHTH 5234	Economic Perspectives on Health Policy
PHTH 5300	Project Management in Public Health
PHTH 5310	Budget Principles in Public Health
PHTH 5320	Grant Writing in Public Health
PHTH 5330	Using Publicly Available Data in Public Health
PHTH 5340	Writing for Peer-Reviewed Journals in Public Health
PHTH 5350	Using SAS in Public Health Research
PHTH 5540	Health Education and Program Planning
PHTH 6202	Intermediate Epidemiology
PHTH 6210	Applied Regression Analysis
PHTH 6224	Social Epidemiology
PHTH 6320	Qualitative Methods in Health and Illness
PHTH 6400	Principles of Population Health 1
PHTH 6410	Principles of Population Health 2
PHTH 6440	Advanced Methods in Biostatistics
PHTH 6800	Causal Inference in Public Health Research
PPUA 6509	Techniques of Program Evaluation

## Public Health, MPH—Accelerated

Through innovation in experiential education, research, and service, the Master of Public Health at Northeastern University (<https://bouve.northeastern.edu/health-sciences/programs/master-public-health/>) trains diverse and skilled professionals who promote and protect the health of all communities. This program is accredited by the Council on Education for Public Health (<https://ceph.org/>). CEPH is an independent agency recognized by the U.S. Department of Education to accredit schools of public health and public health programs outside of schools of public health.

### MPH—One-Year Accelerated

The one-year accelerated MPH pathway allows students to complete all degree components in 12 months with an emphasis on public health practice and industry partnerships. This is a full-time, asynchronous online program for midcareer professionals that offers an opportunity to:

- Take 9 semester hours of *elective* coursework from a wide range of practical, public health topics including cross-departmental offerings
- Fulfill experiential coursework through industry partnerships and faculty networking
- Enjoy a supportive learning environment that includes outstanding student mentoring

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

A grade of B– or higher is required in each required course.

Code	Title	Hours
<b>Required Core</b>		
PHTH 5202	Introduction to Epidemiology	3
PHTH 5210	Biostatistics in Public Health	3
PHTH 5212	Public Health Administration and Policy	3
PHTH 5214	Environmental Health	3
PHTH 5540	Health Education and Program Planning	3
PHTH 6204	Society, Behavior, and Health	3

## Exercise Science, MS—Online

The Department of Health Sciences offers a Master of Science in Exercise Science with two concentrations: clinical exercise physiology and physical activity and public health.

The curriculum is offered in a low-residency format with fully online courses and a four-day on-campus component for hands-on learning and training to prepare students for experiential education in the field through internship or practicum. An alternative option can be offered to students who are unable to attend the on-campus component in exceptional situations.

The exercise science core curriculum integrates key competencies for a degree in exercise science recommended by the American College of Sports Medicine, including a knowledge of exercise physiology and the assessment and development of physical activity and exercise programs for the general and clinical populations. Physical inactivity is a major public health problem and a significant risk factor for many chronic diseases, including heart disease, stroke, hypertension, metabolic syndrome, obesity, type 2 diabetes, and some types of cancer.

The clinical exercise physiology concentration provides students with the foundation and hands-on skills for patient assessment and exercise testing. It covers the principles for exercise training and patient education for behavior change. Students choosing this concentration will be given the opportunity to evaluate and develop exercise prescription for individuals and groups. The competencies offered through the clinical exercise physiology concentration are covered under the domains of clinical exercise physiologist requirements provided by ACSM.

The physical activity and public health concentration provides students with the foundation to plan, develop, implement, and evaluate primary prevention programs using exercise and physical activity in diverse populations and community settings. It also provides the foundation to understand how these programs are administered and the approaches to translate evidence-based programs in primary prevention to practice and policy.

Graduate students seeking this degree are members of the Bouvé College of Health Sciences—a leading national model for education and research in the health, psychosocial, and biomedical sciences, which supports the university's mission of educating students for a life of fulfillment and accomplishment and creating and translating knowledge to meet global and societal needs through interdisciplinary research, urban engagement, experiential learning, and the integration of classroom learning with real-world experience. Faculty in the department are exploring a range of research topics, including acute/chronic effects of exercise, community-based exercise and nutrition interventions, nutrition epidemiology, health disparities, urban public health, and the application of technology for measuring and motivating behavior change.

Two unique features of the program are:

- The program offers two concentrations of study based on student interest: clinical exercise physiology and physical activity and public health. Students take three courses in their selected concentration to enhance their specific domain knowledge. The concentrations are designed to offer students the skills and knowledge to pursue career opportunities in a variety of settings including federal/private/nonprofit institutions and clinical settings.
- The curriculum provides students the option of pursuing experiential learning opportunities through internship or practicum in the field. Experiential education is a key component of the program because application of classroom knowledge provides valuable preparation for a career in exercise science.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

## Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Core Requirements

A grade of B or higher is required in all coursework.

Code	Title	Hours
<b>Exercise Science</b>		
EXSC 5200	Cardiopulmonary Physiology	3
EXSC 5210	Physical Activity and Exercise: Prescription, Measurement, and Testing <sup>1</sup>	3
EXSC 5220	Advanced Exercise Physiology	3
EXSC 6202	Electrocardiography, Clinical Assessment, and Prescription	3
<b>Research</b>		
EXSC 6400	Applied Research Methods	3
PHTH 5202	Introduction to Epidemiology	3
PHTH 5210 or HLTH 5410	Biostatistics in Public Health Introduction to Statistics in Health and Behavioral Science	3

## Concentrations

Choose one concentration and complete all courses and requirements unless otherwise indicated.

- Clinical Exercise Physiology (p. 655)
- Physical Activity and Public Health (p. 655)

## Program Credit/GPA Requirement

30 total semester hours required

Minimum 3.000 GPA required

PHTH 6208	Urban Community Health Assessment	3
Complete 3 semester hours from the following:		3
EXSC 6966	Practicum <sup>2</sup>	
PHTH 5000 or higher		

<sup>1</sup> Includes a required four-day on-campus experience.

<sup>2</sup> with advisor approval an alternate 3 semester hours of graduate coursework may be substituted

## Health Informatics, MS

Northeastern University's interdisciplinary Master of Science in Health Informatics was the first MS in the field and is now one of the few that is fully interdisciplinary between health science and computer science.

The program seeks to prepare students to address the combined clinical, technical, and business needs of health-related professionals. Students may opt to select a concentration to deepen their knowledge in a particular area. Successful students graduate with the knowledge of how technology, people, health, and the healthcare system interrelate; the ability to use technology and information management to improve healthcare delivery and outcomes; and the skills to communicate effectively among healthcare practitioners, administrators, information technology professionals, and patients.

Please visit Bouvé College Learning Outcomes (<http://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

A grade of B– or higher is required in each course.

### Core Requirements

Code	Title	Hours
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
HINF 5105	The American Healthcare System	3

### Program Options

Choose one of the following options:

- Health Informatics (Without Concentration) (p. 314)
- Health Informatics with Health Informatics Analytics Concentration (p. 315)
- Health Informatics with Personal Health Informatics Concentration (p. 316)

### Program Credit/GPA Requirements

Minimum 33 total semester hours required

Minimum 3.000 GPA required

### HEALTH INFORMATICS (WITHOUT CONCENTRATION)

Code	Title	Hours
<b>Required Coursework in Addition to Core Requirements</b>		
<b>Business Management</b>

Code	Title	Hours
<b>Required Coursework in Addition to Core Requirements</b>		
<i>Health Informatics</i>		
HINF 6205	Creation and Application of Medical Knowledge	3
<i>Technical</i>		
CS 5340	Computer/Human Interaction	4
Complete one of the following. Students must petition to take electives outside the approved list.		4
CS 5010	Programming Design Paradigm	
CS 5520	Mobile Application Development	
CS 5610	Web Development	
CS 6200	Information Retrieval	
Complete one of the following:		3
HINF 6220	Database Design, Access, Modeling, and Security	
HINF 6355	Interoperability Key Standards in Health Informatics	
<i>Theory and Evaluation</i>		
PHTH 5210	Biostatistics in Public Health <sup>1</sup>	3
Complete one of the following:		4
CS 6350	Empirical Research Methods (On campus only)	
HINF 5200	Theoretical Foundations in Personal Health Informatics	
<b>Culminating Experience</b>		
Complete one of the two options below.		6
<i>Thesis Option</i>		
Students must enroll in HINF 7990 for two semesters for a total of 6 semester hours with director approval only and under supervision of Personal Health Informatics faculty.		
HINF 7990	Thesis	
<i>Capstone Option</i>		
HINF 7701	Health Informatics Capstone Project	
Complete any course for a minimum of 3 semester from the Health Informatics (without concentration) curriculum, that has not been used in previous requirements.		

<sup>1</sup> Student may petition director to take a more advanced stats course, such as Applied Regression Analysis (PHTH 6210).

## Real-World Evidence in Healthcare and Life Sciences, MS

### Overview

The Master of Science in Real-World Evidence (RWE) is an interdisciplinary, flexible, and contemporary degree that focuses on best practices for the appropriate acquisition and analysis of observational health data. Housed in the Department of Health Sciences and the Roux Institute, learners explore how observational research produces a comprehensive understanding of disease, including experience with appropriate methods and software to conduct this research.

RWE is the clinical evidence regarding the usage and potential benefits, or risks, of a medical product derived from analysis of real-world data (RWD). RWE can be generated by different study designs or analyses, including but not limited to randomized trials, pragmatic trials, and observational studies. RWD are the data relating to patient health status and/or the delivery of healthcare routinely collected from a variety of sources, for example, electronic health records, claims, and billing activities.

RWD and RWE are playing an increasing role in healthcare decisions. The FDA uses RWD and RWE to monitor postmarket safety and to make regulatory decisions. The healthcare community uses these data to support coverage decisions and to develop guidelines and decision support tools for clinical practice. Medical product developers use RWD and RWE to support clinical trial designs and observational studies to generate innovative, new treatment approaches.

This program is based on open, reproducible science—including the use of common data models and open-source analytics software to codify these practices into consistent, transparent, reproducible solutions—and applies these tools and practices to answer clinical questions by generating evidence to guide healthcare policy and improve patient outcomes.

The program seeks to educate two key professionals: analysts and researchers.

An analyst is a technician (e.g., solution architect, epidemiologist, data scientist, etc.) who is engaging in RWE studies by utilizing statistical tools and epidemiologic methods to operationalize and analyze RWD. Technicians may be carrying out activities on behalf of an institution or may be working as individuals interested in the technology that RWD offers. They may be involved in any stage of the RWD/RWE continuum (extract-transform-load [ETL]/data quality processes, tool enablement and self-service analytics, visualization, communication) and are often interested in extending these resources to serve additional use cases or new functionality.

A researcher is one who originates from any number of backgrounds (statistics, clinical training, public health, biological sciences, data science, etc.) who engages in the RWD community for the sake of designing and conducting a research study. Researchers want to know how to run their own observational research studies. In their day, researchers were often responsible for translating the science into better decisions and better care.

The intent of this program is to curate interdisciplinary expertise to support the evidence-generation process in the pharmacoepidemiology research community. The curriculum aims to ensure that learners can obtain in-demand skills that are immediately deployable in roles at pharmaceutical companies, regulatory authorities, health systems, technology companies, and consulting groups specializing in life sciences and healthcare.

Please visit Bouvé College Learning Outcomes for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

A grade of B– or higher is required in each course.

Code	Title	Hours
HSCI 5130	Introduction to Real-World Evidence	2
HSCI 5140	Foundations of Data Models	2
HSCI 5150	Methods for Observational Research 1	3
HSCI 5151	Methods for Observational Research 2	3
HSCI 5160	Standardization of Real-World Data	2
HSCI 5170	Data Model Transformation	2
PHSC 5212	Research Skills and Ethics	2
<b>Capstone Requirement</b>		
HSCI 6980	Real-World Evidence Capstone	3

#### Selectives

Code	Title	Hours
Complete a minimum of 6 semester hours from the following:		
HSCI 5180	Phenotyping	6-12
HSCI 5190	Cohort Building	

HSCI 6110	Advanced Population Characterization
HSCI 6120	Advanced Population Estimation
HSCI 6130	Advanced Patient Prediction

## Electives

Code	Title	Hours
Complete up to 6 semester hours from the following (electives are selected in consultation with the program director):		6
HINF 5300	Personal Health Interface Design and Development	
HINF 6205	Creation and Application of Medical Knowledge	
HINF 6220	Database Design, Access, Modeling, and Security	
HINF 6355	Interoperability Key Standards in Health Informatics	

## Program Credit/GPA Requirements

31 total semester hours required

Minimum 3.000 GPA required

## Law, JD / Public Health, MPH

Northeastern University's School of Law and Bouvé College of Health Sciences offer a JD/MPH dual degree. Given the worldwide trend toward urbanization, the Master of Public Health (MPH) recognizes the growing need for professionals trained to respond to unique public health challenges and opportunities facing urban populations. The MPH program brings together interdisciplinary faculty (from the School of Law, D'Amore-McKim School of Business, College of Social Sciences and Humanities, Khoury College of Computer Sciences, and the Bouvé College of Health Sciences) with expertise in collaborating with diverse urban populations to offer students an opportunity to obtain practice-based knowledge, skills, and experience needed to address public health problems.

Up to 9 credit hours of coursework in the JD program may count toward the MPH, while up to 12 credit hours of coursework in the MPH program may count toward the JD. See the JD/MPH program page (<https://law.northeastern.edu/academics/programs/jd/dual-degrees/public-health-bouve/>) for more information.

All JD students, including FlexJD students, are ordinarily eligible to apply into dual degree pathways.

## Pharmacy, PharmD—Direct Entry / Public Health, MPH

The School of Pharmacy and Pharmaceutical Sciences and the Department of Health Sciences offer a combined Doctor of Pharmacy (PharmD) and Master of Public Health (MPH) program.

The combined PharmD/MPH program recognizes and reinforces the importance of public health in pharmacy practice. Central to addressing public health concerns, and in particular those associated with racial and ethnic health disparities, the program is committed to building a strong, diverse, and activist public health workforce. The goal of the program is to graduate professionals who are well educated in the complex issues associated with disparate health status and healthcare access. The combined PharmD/MPH program allows qualified and interested students an opportunity to achieve their goal of obtaining a more robust understanding of public health through an MPH degree while also completing their PharmD.

Refer to the School of Pharmacy and Pharmaceutical Sciences PharmD—Direct Entry (p. 720) and Department of Health Sciences Master of Public Health (p. 650) pages of this catalog for program requirements and technical standards. Students must adhere to all PharmD and MPH program standards, policies, and requirements as listed in the catalog, unless otherwise specified.

The Northeastern University Master of Public Health Program is accredited by the Council of Education for Public Health. CEPH is an independent agency recognized by the U.S. Department of Education to accredit schools of public health and public health programs outside of schools of public health.

## Physician Assistant, MS / Public Health, MPH

The Northeastern University physician assistant program and Department of Health Sciences offer a dual degree program: Master of Science in Physician Assistant/Master of Public Health. The dual MS and MPH degree program allows qualified and interested students an opportunity to achieve their goal of obtaining a more robust understanding of public health through an MPH degree, while also completing their Master of Science degree in the PA program.

The Northeastern Master of Public Health program is accredited by the Council on Education for Public Health (<https://ceph.org/>). CEPH is an independent agency recognized by the U.S. Department of Education to accredit schools of public health and public health programs outside of schools of public health. The MPH program has a strong commitment to providing a flexible course of study for working professionals. This flexibility allows for easy incorporation into a dual degree program.

The dual degree program is designed to help diversify the public health workforce and improve graduates' ability to approach clinical situations with cultural sensitivity and awareness. Graduates of the program benefit from having a greater understanding of public health issues in clinical practice, including the racial and ethnic health disparities prevalent in the U.S. healthcare system, as well as a strong grounding in epidemiology, quantitative and qualitative research methods, and the use of scientific evidence, skills critical to many fields of healthcare practice.

This dual degree takes less than three years to complete (as opposed to four years, if each degree were pursued separately), and a total of 12 semester hours are shared between both degrees.

For more information, including the application and admissions process, please visit the dual degree program website (<https://bouve.northeastern.edu/health-sciences/programs/pa-mph/>).

## Public Health, MPH / Health Informatics, MS

Website (<https://bouve.northeastern.edu/health-sciences/programs/ms-hinf-mph/>)

The Master of Public Health and Master of Science in Health Informatics dual degree allows qualified and interested students to prepare to lead healthcare at the nexus between public health and health informatics. Graduates of this program will be well-educated in the complex issues associated with improvements in information technology, as well as changes to the public health and healthcare delivery systems. Recognizing the increasing overlap between health informatics and public health, this program incorporates course work from both the MPH and MSHI curricula for both degrees, reducing tuition costs and saving one year of study compared to obtaining both degrees individually.

The Northeastern University Master of Public Health program is accredited by the Council on Education for Public Health (CEPH). CEPH is an independent agency recognized by the U.S. Department of Education to accredit schools of public health and public health programs outside of schools of public health.

Up to 15 credits of coursework in the dual-degree program can be counted toward both the MPH and MS degrees.

## Health Informatics Management and Exchange, Graduate Certificate

### Overview

The certificate program in health informatics management and exchange offers you the opportunity to obtain the knowledge needed to support the collection, management, retrieval, and exchange of electronic health data. It is designed to prepare you for a position as a specialist in data management, interoperability standards, and health database design.

- Eight-month program
- Five courses, 15 semester hours

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Core Requirements

A grade of B– or higher is required in all course work.

Code	Title	Hours
<b>Required Core</b>		
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
HINF 5102	Data Management in Healthcare	3
<b>Management and Exchange</b>		
HINF 6205	Creation and Application of Medical Knowledge	3
HINF 6220	Database Design, Access, Modeling, and Security	3
HINF 6355	Interoperability Key Standards in Health Informatics	3

### Program Credit/GPA Requirements

15 total semester hours required

Minimum 3.000 GPA required

## Health Informatics Privacy and Security, Graduate Certificate

### Overview

The certificate program in health informatics privacy and security combines knowledge of health informatics with a strong foundation in important information security issues. Northeastern's status as a National Security Agency Center of Excellence for Information Security Education and Research ensures the program is both relevant and of high academic quality.

- Eight-month program
- Five courses, 18 semester hours

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

A grade of B– or higher is required in all course work.

Code	Title	Hours
<b>Required Core</b>		
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
HINF 5102	Data Management in Healthcare	3
<b>Privacy and Security</b>		
CY 5130	Computer System Security	4
CY 5150	Network Security Practices	4
CY 5200	Security Risk Management and Assessment	4

#### Program Credit/GPA Requirements

18 total semester hours required

Minimum 3.000 GPA required

## Health Informatics Software Engineering, Graduate Certificate

### Overview

This certificate program offers software engineers the background in health informatics (as well as interchange and interoperability standards) needed to better understand the context in which they work and perform effectively in a health-related organization. Program design is flexible to allow completion on a rapid schedule or a slower pace that is more compatible with full-time workers.

- Eight-month program
- Five courses, 15 semester hours

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Core Requirements

A grade of B– or higher is required in all course work.

Code	Title	Hours
<b>Required Core</b>		
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
HINF 5102	Data Management in Healthcare	3
<b>Management and Exchange</b>		
HINF 6205	Creation and Application of Medical Knowledge	3
HINF 6345	Design for Usability in Healthcare	3
HINF 6355	Interoperability Key Standards in Health Informatics	3

### Program Credit/GPA Requirements

15 total semester hours required

Minimum 3.000 GPA required

## School of Nursing

Website (<https://bouve.northeastern.edu/nursing/>)

### Amanda Choflet, DNP, RN, NEA-BC

Interim Dean, School of Nursing  
Assistant Dean of Graduate Programs and Associate Clinical Professor

617.373.3521  
617.373.2985 (fax)

This is an exciting time in healthcare, and nursing plays a pivotal role in the transformation of our healthcare system. Northeastern University School of Nursing offers multiple options for graduate study, including master's, Doctor of Nursing Practice, and PhD degree programs, as well as Certificate of Advanced Graduate Study programs, that are designed to prepare outstanding clinicians, leaders, scholars, educators, and policymakers. These programs leverage the school's renowned faculty, as well as exceptional clinical practicum sites. Our reputation is why our graduates are sought by top employers. Practicing advanced practice nurses may easily change their specialty area by enrolling in one of our CAGS programs in adult primary or acute, pediatric primary and acute, or mental health.

The DNP program is a practice-oriented degree designed to prepare advanced nurses at the highest level of scholarly practice. Keeping pace with the demands of today's changing healthcare environment requires clinical experts who have the knowledge and skills to be effective change agents. Graduates of our post-master's DNP program assume clinical and leadership positions as advanced nurses in a variety of roles, including clinical experts, nurse executives, community leaders, and professional organization leaders.

The PhD program in nursing prepares research scientists, educators, and leaders who seek to improve health and healthcare across the life span with an emphasis on urban, vulnerable, and underserved populations. Graduates are expected to lead research initiatives that advance nursing science through knowledge development and interdisciplinary scholarly inquiry.

Further information about the degrees and specializations can be found at each program's page of this catalog.

## Programs

### Doctor of Philosophy (PhD)

- Nursing (p. 669)

### Doctor of Nursing Practice (DNP)

- Nurse Anesthesia (p. 672)
- Nursing—Post-Master's (p. 674)

### Certificate of Advanced Graduate Study (CAGS)

- Nursing with Concentration in Adult-Gerontology Nurse Practitioner, Acute Care (p. 675)
- Nursing with Concentration in Adult-Gerontology Nurse Practitioner, Primary Care (p. 676)
- Nursing with Concentration in Neonatal Nurse Practitioner (p. 678)
- Nursing with Concentration in Pediatric Nurse Practitioner, Acute Care (p. 679)
- Nursing with Concentration in Pediatric Nurse Practitioner, Acute and Primary Care (p. 680)
- Nursing with Concentration in Pediatric Nurse Practitioner, Primary Care (p. 681)
- Nursing with Concentration in Psychiatric-Mental Health Nurse Practitioner (p. 677)

### Master of Science (MS)

- Nursing (p. 682)
- Nursing—Direct Entry (p. 686)

### Graduate Certificate

- Patient Safety (p. 607)
- Pediatric Nurse Practitioner, Acute Care (p. 692)

## Nursing, PhD

### Overview

#### Research

The PhD in Nursing program is designed to prepare nurse researchers to advance the science of nursing by developing expertise in both leadership and innovation. Graduates are expected to lead multidisciplinary research initiatives that advance nursing and healthcare through knowledge development and interdisciplinary scholarly inquiry. Students will work with nursing faculty whose research addresses innovative questions that seek to advance knowledge for improvement of care. Students will have opportunities to collaborate with faculty across the broader Northeastern University community, in addition to Boston-area research and healthcare institutions. This collaboration allows students to work across disciplines and to access populations and research sites essential to the success of their original dissertation study.

Advanced entry into the PhD in Nursing program requires a master's degree in nursing.

Visit the Northeastern University Faculty Research site (<http://www.northeastern.edu/research/faculty-research/>) for more information.

Please visit Bouvé College Learning Outcomes for the specific student learning outcomes for this program.

*Students who do not qualify for the doctoral degree, but who have completed required coursework with a cumulative GPA of 3.000 or better, may be eligible to receive a terminal MS (<http://catalog.northeastern.edu/graduate/health-sciences/nursing/applied-nursing-research-ms/>) Applied Nursing Research degree. Note that no students will be admitted directly into the Applied Nursing Research program to pursue a master's degree.*

### Program Requirements

#### Bachelor's Degree Entrance

A bachelor's degree in nursing is preferred. Complete all courses and requirements listed below unless otherwise indicated.

#### Milestones

Annual review of progress  
Comprehensive examination  
Candidacy status  
Dissertation committee  
Dissertation proposal  
Dissertation defense

#### Core Requirements

A grade of B or higher is required in all coursework.

Code	Title	Hours
<b>Required Core</b>		
NRSR 7104	Foundations in Nursing Research	3
NRSR 7700	The Science of Nursing	3
NRSR 7705	Theoretical and Conceptual Foundations in Nursing Science	3
NRSR 7715	Measurement in Clinical Research	3
NRSR 7750	Healthcare of Urban Populations	3

- <sup>1</sup> Cognates are graduate-level courses that are taken outside of nursing and should provide depth and breadth to the student's area of interest.

## Nurse Anesthesia, DNP

The Doctor of Nursing Practice in Nurse Anesthesia is a practice-oriented degree designed to prepare nurse anesthetists at the highest level of clinical scholarly practice. Keeping pace with the demands of today's changing healthcare environment requires clinical experts who have the knowledge and skills to be effective change agents. The program prepares graduates to question practice, search for and critically appraise the best evidence to guide practice, and implement and evaluate the application of best evidence in practice.

A successful graduate from the program will gain the requisite skill set and leadership expertise to be a critical member of the healthcare team and provide anesthetics to patients throughout the life cycle in diverse settings such as small local hospitals, regional centers, and rural or urban settings for all types of surgery or procedures.

### Transfer Policy

Northeastern University regulations for transfer credit are published in this catalog (<https://catalog.northeastern.edu/graduate/general-admission-transfer-credit/regulations-degree-programs/>). The transfer policy specific to this doctoral program is defined as a maximum of 9 semester hours or 12 quarter hours of credit earned at another institution may be accepted toward the degree being pursued at Northeastern, provided the credits:

1. Consist of work taken at the graduate level for graduate credit
2. Carry grades of 3.000 or better
3. Have been earned at an accredited institution
4. Have not been used toward any baccalaureate or advanced degree or certificate at another institution
5. Transfer credits must be approved by the program administrator and course faculty

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

A grade of B or higher is required in all coursework.

## Nursing, DNP—Post-Master's

The Doctor of Nursing Practice (DNP) is a practice-oriented degree designed to prepare advanced nurses at the highest level of scholarly practice. Keeping pace with the demands of today's changing healthcare environment requires clinical experts who have the knowledge and skills to be effective change agents. Graduates of our post-master's DNP program assume clinical and leadership positions as advanced nurses in a variety of roles including clinical experts, nurse executives, community leaders, and professional organization leaders.

The Northeastern University post-master's DNP program includes advanced course work in leadership, practice inquiry, population health, informatics, and health policy. Our goal is to prepare the next generation of nurse leaders with a greater breadth of expertise so they can collaborate more effectively with interprofessional partners and provide leadership to enhance quality and safety. The DNP program curriculum is delivered online in an executive model hybrid format, with the on-ground meetings at the Boston campus.

If you are a registered nurse with at least two years of active advanced nursing experience, you may enter the DNP program after completing a master's degree in nursing or, in some cases, a related health field. A DNP Scholarly Project and 1,000 scholarly practice hours are required for program completion. A gap analysis upon admission will determine how many, if any, practice hours from a previously completed Master of Science in Nursing practicum qualify toward this practice hour requirement. An ePortfolio is used to document all scholarly practice hours and DNP program achievements.

### Program Requirements

## Nursing—Adult-Gerontology Nurse Practitioner, Acute Care, CAGS

The adult-gerontology acute-care nurse practitioner program is designed to prepare nurses for advanced-practice roles as clinical experts, managers, educators, and consultants. The program offers advanced study with a major focus on clinical experience. Nurses who possess a Master of Science are eligible for the Certificate of Advanced Graduate Study (CAGS) in this specialization.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/bchs/about/learning-outcomes/>) for the specific student learning outcomes for this program.

## Nursing—Adult-Gerontology Nurse Practitioner, Primary Care, CAGS

The Certificate of Advanced Graduate Study (CAGS) with a concentration in Primary Care Adult-Gerontology Nurse Practitioner offers nurse practitioners (NPs) with certification in a different specialty the opportunity to prepare for practice providing high-quality adult primary care services as an adult-gerontology NP. Adult-gerontology NPs provide services to individuals across most of the life span in clinics, private practices, home care, long-term care, and day programs. Upon completion of the primary care program, graduates are eligible to sit for the adult-gerontology certification exam.

### Prerequisite Courses

To ensure that all students have the foundation necessary to be successful in this program, each incoming student, regardless of the student's background, must have completed coursework in the following areas with a minimum grade of B.

Code	Title	Hours
NRSG 5117	Advanced Pharmacology	2
NRSG 5126	Pathophysiology for Advanced Practice	3
NRSG 6115	Health Assessment	3

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/bchs/about/learning-outcomes/>) for the specific student learning outcomes for this program.

### Program Requirements

#### Core Requirements

Students should refer to the Program Overview page for required program prerequisites.

A grade of B or higher is required in each course.

Code	Title	Hours
<b>Required Courses</b>		
NRSG 6222	Pharmacology of Adults and Older Adults	2
NRSG 6249	Health Promotion of Adult/Older Adult	3
NRSG 6253	Primary Care of Adult/Older Adult Health Problems	3
NRSG 6254	Primary Care of Adult/Older Adult Complex Patients	3
NRSG 6449	Health Promotion of Adult/Older Adult Practicum	1
NRSG 6450	Adult/Older Adult Practicum 1	5
NRSG 6451	Adult/Older Adult Practicum 2	5
Elective		2

#### Program Credit/GPA Requirements

24 total semester hours required

Minimum 3.000 GPA required

## Nursing—Psychiatric-Mental Health Nurse Practitioner, CAGS

The School of Nursing offers specialized and flexible program options in psychiatric mental health nursing for nurse practitioners (NPs) with certification in another specialty. Classes are offered during the late afternoon and early evening hours to accommodate the multiple responsibilities of adult learners. This is a 24-semester-hour program of study. Upon completion of the psychiatric mental health advanced practice Certificate of Advanced Graduate Study (CAGS) program, graduates are eligible to sit for available national certification exams in their area of practice.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/bchs/about/learning-outcomes/>) for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Core Requirements

A grade of B or higher is required in each course.

Code	Title	Hours
<b>Required Core</b>		
NRSG 6281	Dimensions of Clinical Practice	3
NRSG 6282	Clinical Psychopharmacology	3
NRSG 6283	Psychobiological Bases of Mental Disorders	3
NRSG 6286	Contemporary Psychotherapies—Theory and Practice	3
<b>Practicum</b>		
NRSG 6480	Psychiatric Practicum across the Life Span 1	5
NRSG 6481	Psychiatric Practicum across the Life Span 2	5

### Program Credit/GPA Requirements

24 total semester hours required

Minimum 3.000 GPA required

## Nursing—Neonatal Nurse Practitioner, CAGS

The School of Nursing offers a certificate of advanced study for experienced nurses who have a master's degree in nursing and want to specialize in neonatal critical care. Applicants are required to have at least two years of level-3 or greater of neonatal intensive care unit experience before entering the program; most applicants have greater relevant experience. One year of full-time study offers the student an opportunity to increase skills and experience and enables the student to sit for the neonatal nurse practitioner certification exam offered by the National Certification Corporation for the obstetric, gynecologic, and neonatal nursing specialties.

### Prerequisite or Equivalent Courses

To ensure that all students have the foundation necessary to be successful in this program, each incoming student, regardless of the student's background, must have completed coursework with content equivalent to the following courses with a minimum grade of B.

Code	Title	Hours
NRSR 5117	Advanced Pharmacology	
NRSR 5126	Pathophysiology for Advanced Practice	

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/bchs/about/learning-outcomes/>) for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

A grade of B or higher is required in all coursework.

Code	Title	Hours
<b>Clinical</b>		
NRSR 6116	Advanced Health Assessment of the Neonate and Infant	3
NRSR 6230	Nursing Management: Critically Ill Neonatal 1	3
NRSR 6231	Nursing Management: Critically Ill Neonatal 2	3
NRSR 6232	Neonatal Pharmacology	2
<b>Practicum</b>		
NRSR 6430	Neonatal Clinical Practicum 1	4
NRSR 6431	Neonatal Clinical Practicum 2	4
NRSR 6432	Neonatal Clinical Practicum 3	2

Minimum 3.000 GPA required

## Nursing, MS

Northeastern University's School of Nursing offers seven nurse practitioner concentrations leading to a Master of Science in Nursing. The program provides a solid foundation in research, epidemiology, health assessment, advanced pharmacology and pathophysiology, and healthcare systems with on-ground or online didactic coursework and on-ground skills and clinical experiences. The program has a strong clinical focus with high-quality clinical rotations as top priority. Students graduate prepared to practice as novice advanced-practice providers and work across a variety of healthcare settings. Graduates become nurse clinicians, educators, scholars, researchers, and lifelong learners. Upon completion of the program, graduates are eligible to sit for all national certification exams in their specialty area.

### Adult-Gerontology Acute-Care Nurse Practitioner Concentration

The adult-gerontology acute-care concentration seeks to prepare nurses for advanced-practice roles as clinical experts, educators, and consultants. The concentration provides advanced study with a major focus on clinical experience and prepares graduates to care for patients across the continuum of care, including tertiary care, rehabilitation, and home care.

### Adult-Gerontology Primary Care Nurse Practitioner Concentration

With a focus on health equity, the adult-gerontology primary care concentration prepares nurses to provide high-quality, ethical, and inclusive primary care to individuals 13 years and older. Graduates care for patients in a wide variety of settings.

### Family Nurse Primary Care Practitioner Concentration

The primary goal of the FNP concentration is to educate FNPs who are capable of providing evidence-based, culturally and linguistically competent, ethical primary healthcare to individuals and families in a variety of healthcare settings. The FNP concentration is offered in a hybrid format with the majority of the classes delivered online, coupled with live presentation sessions. Students are required to be on the Boston campus twice per semester. Upon completion, graduates are eligible to sit for all national certification exams in their area of practice.

### Neonatal Nurse Practitioner Concentration

Neonatal critical care is a growing field, and Bouvé is at the forefront of providing experienced nurses with the knowledge, competence, and skill to be in demand across the country. We require applicants to have at least two years of level-3 neonatal intensive care unit experience before entering our program, and most applicants have more years of NICU experience. A registered nurse working in the NICU setting already has a significant base of nursing knowledge. The NNP concentration focuses on advanced nursing knowledge and clinical practice. Our graduates are prepared to make independent decisions in level-2 and level-3 NICUs, drawing on their experience and diagnostic abilities to affect lives every day.

### Pediatric Nurse Practitioner Concentrations

These concentrations are designed to prepare nurses with the specialized skills needed to care for at-risk children living in urban settings, across the continuum of care. For nearly two decades, our PNP concentration prepared primary care PNPs to provide community-based, culturally sensitive primary care. More recently, building on the School of Nursing's foundation in evidence-based, interdisciplinary, urban healthcare, the PNP curriculum was expanded to offer a concentration in acute care. Northeastern offers the only graduate nursing program in New England to prepare acute-care PNPs.

The School of Nursing offers two concentrations for the PNP student. The primary care concentration prepares students for the role of PNP focusing on well-child care and prevention and management of common acute and chronic illnesses. The acute- and primary care dual concentration prepares students for the primary care role, as well as the acute-care role. Pediatric acute-care nurse practitioners are prepared to care for patients with acute, complex, critical, and chronic illness in a variety of settings.

### Psychiatric-Mental Health Concentration

The curriculum of the psychiatric-mental health concentration has a life span focus, with core course content covering all ages. The concentration emphasizes a biopsychosocial framework to develop the understanding of human development, etiology of psychiatric disorders, and treatment modalities geared toward working with individuals across the life span and their families. The course of study emphasizes diagnostic decision making; psychotherapeutic interventions, including individual, family, and group therapies; and psychopharmacology across the life span.

## Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Core Requirements

A grade of B or higher is required in each course.

Code	Title	Hours
<b>Professional</b>		
NRSG 5118	Healthcare System and Professional Role Development	3
NRSG 5121	Epidemiology and Population Health	3
<b>Clinical</b>		
NRSG 5117	Advanced Pharmacology	2
NRSG 5126	Pathophysiology for Advanced Practice	3

NRSNG 7105	Translating Research Evidence into Practice	3
NRSNG 7110	Evidence-Based Practice Research Application	2

## Concentrations and Program Credit Requirements

A concentration is required to complete this program.

- Adult-Gerontology Nurse Practitioner, Acute Care (p. 683)
- Adult-Gerontology Nurse Practitioner, Primary Care (p. 683)
- Family Nurse Practitioner, Primary Care (p. 684)
- Neonatal Nurse Practitioner (p. 684)
- Pediatric Nurse Practitioner, Acute and Primary Care (p. 684)
- Pediatric Nurse Practitioner, Primary Care (p. 685)
- Psychiatric-Mental Health Nurse Practitioner (p. 685)

## Nursing, MS—Direct Entry

### Part I: Prelicensure

The direct-entry nursing student enters the accelerated master's program as a graduate student. The first 16 months (four semesters) of the program consist of intensive, sequential classes and clinical with combined undergraduate- and graduate-level courses. Students are then prepared to take the National Council Licensure Exam (NCLEX-RN) upon completion of 64 program semester hours to earn an RN license. Students earn a Bachelor of Science in Nursing (BSN) after this part of the program. Financial aid will be granted on an undergraduate basis during the prelicensure phase of the program.

### Academic Standards for Nursing Majors

#### ACADEMIC DISMISSAL FROM MAJOR

Students in the Bouvé College of Health Sciences will be dismissed from their major effective the following academic semester for any of the reasons noted below:

- Students who do not meet the required minimum grade in two professional courses, including labs and clinical, will be dismissed from the program. Only one professional course can be remediated.
- Remediation of a failed professional course is a requirement for progression in the program.
- Students who do not meet the minimum grade requirement within two attempts of the course will be dismissed from the program.

#### ACADEMIC APPEALS

Students who believe that they were erroneously, capriciously, or otherwise unfairly treated in an academic or cooperative education decision may petition to appeal the decision. Refer to the Bouvé College of Health Sciences Academic Affairs Appeals Process and the Northeastern University Academic Appeals Policies and Procedures.

### Program Policies and Standards

Students are expected to adhere to the policies and standards of their program major to progress through their curriculum as planned. Students seeking any exceptions to the program policies and standards specified for their program major will present their petitions before the School of Nursing Academic Standing Committee.

Students are required to attend all scheduled nursing classes, clinical experiences, and clinical labs on campus and in clinical agencies. If the student fails to meet attendance requirements, the student will fail the associated class, clinical, and/or lab.

#### CLINICAL REQUIREMENTS

Clinical settings require a criminal background check.

All students must receive a health clearance from University Health and Counseling Services. Health clearance is based on specific documentation of immunity from infectious disease and a physical examination. (This may be done by the student's own healthcare provider.) In addition, nursing students need a clinical clearance in order to participate in clinical courses. Clinical clearance, managed by the School of Nursing's Clinical Placement Office, includes verification of certification in cardiopulmonary resuscitation; recent negative tuberculosis screening (PPD); positive titers for MMR, varicella, and hepatitis B; vaccines including TDAP and influenza; and additional health screenings as may be required by the program. It is the responsibility of the student to stay current and to provide documentation required for clinical clearance throughout the entire nursing program.

Six weeks prior to the start of a clinical course, students must show the following to be eligible for clinical placement:

- Evidence of immunizations and health clearance by UHCS
- Documentation of CPR certification
- Completion of a Criminal Offender Record Information background check

*Students will not be allowed to start the clinical course, and may be dropped from the clinical course, if these processes are not satisfactorily completed.*

Students should refer to Requirements for Clinical, Internships, and Practicum Courses (p. 573) in this catalog (applicable to both undergraduate students and graduate students at the college) for additional details.

#### Clinical Warning

A nursing student may be placed on clinical warning, or fail the clinical course, at any time during the semester for the following reasons:

- Failing to meet the clinical objectives at a satisfactory level.
- Failing to demonstrate safe practice. Students may be removed from the clinical area, before completion of the clinical rotation, if the instructor determines that the student is unsafe. This will result in the student failing the clinical course.
- Failing to meet the attendance requirement.

**Conditions**

- Students on clinical warning must develop an academic plan with the clinical instructor to address clinical performance.
- Students will be expected to improve clinical performance by adhering to the plan.
- Failure to adhere to the terms of the plan will result in the student failing the course and being placed on academic probation. All conditions of academic probation will then apply.

**Notification**

- The clinical instructor will issue the student a clinical warning via the Faculty and Advisor Communication Tool identifying the problem.
- The student and the instructor should then develop a plan together to address the deficiency.
- Copies of the warning will be forwarded to the program director and/or the assistant dean for undergraduate programs if needed.
- This is an administrative warning and will not be posted on the transcript.
- Satisfactory completion of the clinical experience component of the course will result in removal of the warning from the student's file.

**BLOODBORNE PATHOGEN EXPOSURE AND INJURY**

Any student who sustains any kind of injury and/or exposure related to blood-borne, respiratory, or other pathogens or hazardous materials while on a clinical rotation should seek immediate treatment. They must also immediately follow the procedures listed below:

**Procedures**

- Students must follow the affiliate site's protocol for exposure reporting, testing, counseling, and follow-up.
- Students can present their Clinical Accident Insurance identification card (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/General%20Resources/Forms/AllItems.aspx?id=%2Fsites%2FBouveCurrentStudentResources%2FGeneral%20Resources%2FAccident%20Insurance%2FNortheastern%20University%20Insurance%20Card%2Epdf&parent=%2Fsites%2FBouveCurrentStudentResources%2FGeneral%20Resources%2FAccident%20Insurance>) to arrange billing at the site or a suitable nearby hospital or urgent care clinic. If students do not know a local provider, they can call the resource number on their identification card for aid in finding a local provider. Students should also present their personal health insurance information.
- Within 24 hours of the accident, students must also inform their program's director of clinical education (or unit designee responsible for clinical placements) of the accident and submit, in writing, a description of the incident and injury or exposure using the BCHS Accident Report form, linked here (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Clinical-Accident-Report-Form.aspx>). *If a student is incapacitated and unable to file their own report within the 24-hour time frame, a Northeastern faculty or staff person familiar with the incident may file on their behalf. The student should file their own report as soon as possible thereafter.*
- Submission of the Accident Report form linked above will automatically notify:
  - The program's director of clinical education or Clinical Placement Office (or unit designee responsible for clinical placements)
  - The program director (if applicable)
  - Assistant dean of clinical education in the BCHS Dean's Office
  - Risk Services ([risk@northeastern.edu](mailto:risk@northeastern.edu)) ([risk@northeastern.edu](mailto:risk@northeastern.edu))
  - If exposure involved, Office of Environmental Health and Safety—Biosafety
- If for any reason a student is not able to receive immediate medical treatment, there is the resource of postexposure counseling through the university's partner, OEHN (Occupational & Environmental Health Network). They can be reached at 1-866-360-8100. OEHN is open 24 hours a day, 7 days a week, 365 days a year. OEHN will collect appropriate information and engage the doctor on call who can help to direct appropriate care depending on exposure and circumstances.

**Technical Standards for Admission, Academic Progression, and Graduation**

The primary mission of the School of Nursing is to educate our students to provide evidence-based, culturally and linguistically competent, ethical healthcare that is high quality, safe, and accessible to diverse local, national, and global communities. Our programs are designed to prepare students to become leaders as nurse clinicians, educators, scholars, and researchers. The School of Nursing is also committed to achieving the goals of the university to become an outstanding national research, practice-oriented, student-centered, urban institution.

The goal of the School of Nursing is to prepare students to think critically and to practice nursing competently and compassionately in rapidly changing practice environments. All efforts are designed to build nursing knowledge; enhance nursing practice and patient safety; foster professional integrity; and ultimately improve the health outcomes of patients, families, and communities across the continuum of care.

In addition to classroom learning, students' clinical education experiences occur in settings, like hospitals, in which patient safety is the priority. For this reason, students who, upon enrollment in any of the nursing programs, seek accommodations from the Disability Resource Center at Northeastern must also request an assessment of accommodations that would be needed for clinical education.

Certain functional abilities are essential for the delivery of safe, effective nursing care during clinical education activities. Therefore, the School of Nursing has determined that certain technical standards are requisite for admission, progression, and graduation from the nursing programs. An individual must be able to independently, with or without reasonable accommodation, meet the following technical standards:

1. General abilities (p. 688)
2. Observational ability (p. 688)
3. Communication ability (p. 688)

4. Motor ability (p. 688)
5. Intellectual, conceptual, and quantitative abilities (p. 688)
6. Essential behavioral and social attributes (p. 688)
7. Ability to manage stressful situations (p. 688)

Individuals unable to meet these technical standards, with or without reasonable accommodation, will not be able to complete the program.

### **GENERAL ABILITIES**

The student is expected to possess functional use of the senses of vision, touch, hearing, and smell so that data received by the senses may be integrated, analyzed, and synthesized in a consistent and accurate manner. A student must be able to respond promptly to urgent situations that may occur during clinical training activities and must not hinder the ability of other members of the healthcare team to provide prompt treatment and care to patients.

### **OBSERVATIONAL ABILITY**

The student must have sufficient capacity to make accurate visual observations and interpret them in the context of laboratory studies, medication administration, and patient care activities. In addition, the student must be able to document these observations and maintain accurate records.

### **COMMUNICATION ABILITY**

The student must communicate both verbally and nonverbally in order to elicit information and to convey that information to others. Each student must have the ability to read and write accurately and comprehensively in English. The student must be able to thoroughly comprehend and fluently speak the English language so as to facilitate communication with patients, families, professionals in healthcare settings, instructors, and other students. The student must also be able to present information in a professional, logical manner and to provide counseling and instruction in order to effectively care for patients and their families.

### **MOTOR ABILITY**

The student must be able to perform gross and fine motor movements with sufficient coordination needed to perform complete physical examinations utilizing the techniques of inspection, palpation, percussion, auscultation, and other diagnostic maneuvers. A student must develop the skills needed to perform or assist with procedures, treatments, administration of medication, and the management and operation of diagnostic and therapeutic medical equipment. The student must possess the physical and mental stamina to meet the demands associated with extended periods of sitting, standing, moving, and physical exertion required for satisfactory and safe performance in the clinical and classroom settings.

### **INTELLECTUAL, CONCEPTUAL, AND QUANTITATIVE ABILITIES**

The student must be able to develop and refine critical thinking skills that are essential to nursing practice. Critical thinking involves the abilities to measure, calculate, reason, analyze, and synthesize objective and subjective data and to make decisions, often in a time-urgent environment, that reflect consistent and thoughtful deliberation and sound clinical judgment.

### **ESSENTIAL BEHAVIORAL AND SOCIAL ATTRIBUTES**

Compassion, integrity, motivation, effective interpersonal skills, and concern for others are personal attributes required of those in the nursing programs. The student must be able to work under supervision of a clinical instructor or preceptor; this is essential to ensure patient safety. The student must exercise good judgment and promptly complete all responsibilities in the classroom and clinical settings. The ability to establish culturally competent relationships with individuals, families, and groups and to respond effectively to patients who have different intellectual capacities is critical to nursing practice.

### **ABILITY TO MANAGE STRESSFUL SITUATIONS**

The student must be able to adapt to and function effectively in stressful situations in both the classroom and clinical settings, including emergency situations. These stressors include personal, patient care/family, faculty/peer, and/or program-related issues.

## **Disability and Special Needs**

Students with special needs are encouraged to contact the DRC (<https://drc.sites.northeastern.edu/>) to register and request services. Students must notify the instructor at the beginning of the semester if they plan to use DRC services throughout the course. The staff in that office is available for assistance.

## **State Board Nursing Examination**

In Massachusetts, and several other states, the registering board requires that graduates taking the National Council Licensing Examination (NCLEX-RN) meet standards of “good moral character.” Students may review the GMC requirement specified at Massachusetts General Laws Chapter 112, sections 74, 74A, and 76; Licensure Policy No. 00-01 under “Rules & Regulations” on the Massachusetts BORN website.

## **RN Work Experience**

Once a student graduates with a BSN, they are required to participate in an online professional seminar for two semesters prior to progressing into their master’s coursework. In addition, students seek full-time RN experience, which is also required for progression into the master’s clinical practicums in their concentration. One to two years of RN work experience is required, depending on the concentration. Students may begin the master’s core courses during the required one to two years of RN experience, with approval from the specialty concentration director. Finding RN employment is the responsibility of the student, as it is professional nursing experience. Northeastern will help support the student in preparation for the job search. The student may take no more than 12 months’ leave of absence between the prelicensure and MS phases of the Direct Entry program. Please see MS Nursing (p. 682) for more information about the master’s phase of the Direct Entry program.

## Part II: Return to Master's Specialty Tracks

In the master's program, students are required to take professional, research, and clinical core courses, as well as clinical courses specific to their concentration. Full- or part-time academic study is available to students. Most students return to the master's segment of the program taking coursework as a part-time student while continuing to work and increasing the amount of professional RN experience accrued. Completion of the master's degree can take four to six semesters, depending on the student's program plan and concentration. Upon completion of the requirements for their concentration, the student receives a Master of Science degree and is eligible to take the national certification exam in their area of advanced nursing practice. Financial aid is awarded on a graduate basis during this portion of the program.

Please visit Bouvé College of Health Sciences Program Learning Outcomes for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Core Requirements

A grade of B or better in the BSN clinical courses is highly recommended for progression into the MSN portion of the program. Progression is at the graduate specialty director's discretion.

Students must successfully complete all courses with a grade of C or better except where otherwise indicated.

Code	Title	Hours
<b>Semester 1</b>		
NRSG 2220 and NRSG 2221	Health Assessment and Fundamental Nursing Skills and Lab for NRSG 2220	4
NRSG 3302 and NRSG 3303	Nursing with Women and Families and Clinical for NRSG 3302	5
<i>A grade of B or higher is required in NRSG 5117.</i>		
NRSG 5117	Advanced Pharmacology	2
<i>A grade of B or higher is required in NRSG 5126.</i>		
NRSG 5126	Pathophysiology for Advanced Practice	3
<b>Semester 2</b>		
NRSG 2210	Influences on Health and Illness: A Nursing Perspective	3
NRSG 3323 and NRSG 3324	Advanced Assessment and Interventions and Lab for NRSG 3323	2
NRSG 3320 and NRSG 3321	Nursing Care of Adults 1 and Clinical for NRSG 3320	6
NRSG 3400 and NRSG 3401	Nursing and the Promotion of Mental Health and Clinical for NRSG 3400	5
<b>Semester 3</b>		
NRSG 3420 and NRSG 3421	Nursing Care of Adults 2 and Clinical for NRSG 3420	6
NRSG 4502 and NRSG 4503	Nursing Care of the Child and Clinical for NRSG 4502	6
NRSG 5220	Introduction to Research Methods and Application for Healthcare	4
<b>Semester 4</b>		
NRSG 2150	Ethical Healthcare: Genetics and Genomics	4
NRSG 4604 and NRSG 4605	Public Health Community Nursing and Clinical for NRSG 4604	5
NRSG 4610	Managing and Leading in Healthcare	4
NRSG 4995 and NRSG 4996	Comprehensive Nursing Practicum and Clinical for NRSG 4995	5

### Academic Progression Standards for Nursing Majors

- Students who either fail or withdraw from a professional course will need to successfully remediate that course before continuing in their approved curriculum plan.
- Students who incur an incomplete grade in a prerequisite course must obtain approval from their academic advisor, upon consultation with the department faculty and, when appropriate, the School of Nursing Academic Standing Committee, prior to progression into the subsequent course(s).
- Students may not change their graduation date more than twice.

**Program Credit / GPA Requirements**

64 total semester hours required

Minimum 3.000 GPA required

## Patient Safety, Graduate Certificate

### Overview

The Graduate Certificate in Patient Safety informs and empowers the next generations of innovative patient safety experts by providing the knowledge and practical skills to promote a culture of safety and design safer systems of care. Future leaders incorporate clinician wellness strategies in care delivery models that are accountable, honest, and transparent. The purpose of this certificate is to support healthcare clinicians and leaders in advancing patient safety and the safety of healthcare providers by expanding their fundamental skills and knowledge in patient safety science principles, workforce wellness, and quality improvement strategies.

This is a four-course, interdisciplinary graduate certificate, tailored to accommodate a busy healthcare professional's schedule. Courses are delivered in an online format, structured to enhance the curriculum with peer-to-peer discussions and experience developing tools, protocols, and process improvement strategies.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Required Courses

A grade of B or higher is required in each course.

Code	Title	Hours
HLTH 5600	Introduction to Patient Safety	3
HLTH 5610	Patient Safety Science	3
HLTH 5620	Leadership, Patient Safety, and Clinical Wellness	3
HLTH 5630	Quality Improvement in Patient Safety	3

### Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.00 GPA required

## Pediatric Nurse Practitioner, Acute Care, Graduate Certificate

The post-master's acute-care PNP 16-credit graduate certificate for PNPs or FNPs certified in primary care seeking pediatric specialization in acute care is open to PNPs or FNPs certified in primary care with a master's or doctoral degree from an accredited institution. Graduates are eligible to sit for the acute-care PNP certification board exam.

### Prerequisite Requirements

To ensure that all students have the foundation necessary to participate in this program, successful completion of the following courses or their equivalent within the past five years is required. Alternatively, active PNP/FNP experience with primary care PNP competencies (one-year minimum full-time pediatric experience) is required.

A grade of B or higher is required in each course.

Code	Title	Hours
NRS 5117	Advanced Pharmacology	
NRS 5126	Pathophysiology for Advanced Practice	
NRS 6115	Health Assessment	
NRS 6262	Pediatric Pharmacology	
NRS 6265	Care of Child/Adolescent Health Problems	
NRS 6275	Health Promotion and Preventative Care in Pediatrics in the Context of Community Health	

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Core Requirements

A grade of B or higher is required in each course.

Code	Title	Hours
NRS 6116	Advanced Health Assessment of the Neonate and Infant	3
NRS 6267	Care of the Critically Ill Child	3
NRS 6461	Child/Adolescent Health Problems Practicum <sup>1</sup>	5
NRS 6463	Care of the Critically Ill Child Practicum <sup>1</sup>	5

<sup>1</sup> Direct clinical hours included

### Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

## School of Pharmacy and Pharmaceutical Sciences

Website (<http://www.northeastern.edu/bouve/pharmacy/>)

**Tatiana K. Bronich, PhD**

Dean

140 The Fenway  
617.373.3069  
617.373.7655 (fax)

SOPPS@northeastern.edu

The School of Pharmacy and Pharmaceutical Sciences provides transformative learning and research experiences in a collaborative and diverse environment to develop leaders who positively impact pharmacy-related education, research, and service, including the health and well-being across the life span of those we serve.

SOPPS will be the model for excellence and innovation in pharmacy and pharmaceutical sciences education that is grounded in experiential learning and enhances the health of communities through research and practice.

### Programs

#### Doctor of Philosophy (PhD)

- Biomedical Science (p. 694)
- Medicinal Chemistry and Drug Discovery (p. 701)
- Pharmaceutics and Drug Delivery (p. 707)
- Pharmacology (p. 713)

#### Doctor of Pharmacy (PharmD)

- Doctor of Pharmacy (p. 719)
- Doctor of Pharmacy—Direct Entry (p. 720)

#### Master of Science (MS)

- Biomedical Science (p. 726)
- Medicinal Chemistry and Drug Discovery (p. 729)
- Pharmaceutical Engineering (p. 374)
- Pharmaceutics and Drug Delivery (p. 734)
- Pharmacology (p. 738)

#### Dual Degree

- Pharmacy, PharmD—Direct Entry / Public Health, MPH (p. 603)

## Biomedical Science, PhD

The Department of Pharmaceutical Sciences offers a PhD program in biomedical science that focuses on the cross-disciplinary integration of human (patho)biology with drug action, invention, and clinical utility. The biomedical sciences curriculum involves coursework and original research in areas including drug design and profiling, toxicology, and pharmaceutical biochemistry/cell biology aimed at increasing our understanding of how unsolved medical needs may be addressed by novel therapeutic approaches. The biomedical science program is appropriate for those entering the field as well as persons currently employed as research technicians, clinical laboratory workers, and science teachers/administrators. The flexibility of the biomedical science program and its interdisciplinary nature can enhance job performance in a present position and invite new employment opportunities.

### Journal Club Participation

The Department of Pharmaceutical Sciences sponsors weekly journal clubs, Pharmaceutical Science Seminar (PHSC 6300), at which students present and evaluate current scientific literature in their fields of study. Students must attend one of these journal clubs (Pharmaceutics & Drug Delivery Journal Club, Pharmacology Journal Club, or Medicinal Chemistry & Drug Discovery Journal Club), chosen in consultation with their advisors.

Attendance at one of these journal clubs is required each and every academic semester, as an integral part of the PhD curriculum, with the exception of the last year (year four) in the program. All PhD students must participate full-time in journal club for course credit, Pharmaceutical Science Seminar (PHSC 6300), for six semesters. Failure to attend journal club regularly may result in sanctions such as probation or dismissal from the PhD program. Any student who does not comply with these (or any other) conditions required in the PhD program faces potential dismissal.

### Colloquium Attendance

All PhD students, regardless of program, are required to attend the weekly Pharmaceutical Science Colloquium series. Announcements of times and locations will be distributed weekly to students by email to their university email addresses. Attendance is recorded by sign-up sheet. One excused absence is permitted per semester. Failure to attend colloquia may result in sanctions such as probation or dismissal from the PhD program.

### Internship Requirements and Regulations for Department of Pharmaceutical Sciences

Internships provide an experiential component of the graduate curriculum that fosters professional development through work in the pharmaceutical and biotechnology industries.

After PhD candidates have completed their dissertation research and are working on their dissertations, they are able, with the express permission of their PhD advisor, to participate in an internship if they choose. They are never allowed to intern while they are serving as teaching assistants.

1. Students are responsible for finding their own internship and must be honest and accurate representing their experiences on their resumés. Students are responsible for tracking this experience on their resumés as there will be no detailed record on students' transcripts of these opportunities.
2. In order to be eligible for internship, students must take Professional Development for Pharmaceutical Sciences (PHSC 5305) a semester before internship.
3. Students must not accept more than one position. They must honor the first offer accepted. Any student not adhering to this requirement will not be allowed to participate.
4. International students must register for Pharmaceutical Science Internship (PHSC 6401) and follow instructions to receive Curricular Practical Training authorization from the Office of Global Services (<https://international.northeastern.edu/ogs/>) every semester they work. This applies to part-time jobs and volunteer opportunities. International students cannot engage in full-time CPT authorization totaling more than 52 weeks. Doing so will eliminate the possibility of engaging in the postgraduation benefit of Post-Completion Optional Practical Training.
5. In order to receive a grade for the course, students must write at least two learning goals within the first two weeks of the internship and a one- to two-page paper describing what they learned, mid- and end of semester. Supervisors for internships will reply to a questionnaire about students' performance.
6. Taking internship must not extend international students' visas.
7. There are no vacations on co-op/internships. Companies' sick time policies may vary. Students should check with their employers. For all other matters, please see the University-wide Academic Policies and Procedures (p. 44) and/or Bouvé College of Health Sciences Academic Policies and Procedures (p. 569).

### Milestones

#### QUALIFYING EXAMINATION

The PhD qualifying examination is required for students in all four programs under the auspices of the Department of Pharmaceutical Sciences: pharmacology, medicinal chemistry and drug discovery, biomedical sciences, and pharmaceutics and drug delivery. Students from each of the four programs will take the exams within the same time frame (below), regardless of specialty-area program focus.

Doctoral students should have selected a dissertation advisor by the end of their first year in the program and are expected to have begun research and demonstrated initial proficiency in the laboratory before taking the PhD qualifying examination.

The PhD qualifying examination tests the candidates' knowledge and skills in core courses and program content areas. The overall PhD qualifying examination consists of two written exams and one oral exam. The qualifying examination is taken as a course, Doctoral Training and Research

(PHSC 8940), no later than during the fall semester of the student's second year, after having successfully completed all the core courses of their respective programs.

At least two departmental faculty will contribute questions for the written exams, and no one faculty member will write more than the equivalent of one entire exam. All students qualified to sit for the exams are expected to take them at the times announced.

The format for the written exams may vary (e.g., faculty may ask a series of comprehensive essay questions or provide research publications(s) from the biomedical literature and ask questions based upon the publications' content). The first exam is given in the first week of fall semester, with the written portion of the second exam (i.e., the F31 written document) to be submitted to the student's exam committee by end of October with the oral presentation to be completed by mid-November and graded by the providers of the question(s).

- **Written exam 1** reflects students' knowledge of their specialty-area program material and of overall pharmaceutical sciences. This exam is given on the same day in two parts. Part 1 is focused on each student's specialty-area program focus. Part 2 will test students' overall knowledge in another program focus covered by the pharmaceutical sciences curriculum.
  - For example, if the student is in the pharmaceuticals and drug delivery PhD program, part 1 will be about pharmaceuticals and drug delivery, and part 2 can focus either on pharmacology or medicinal chemistry and drug discovery.
- **Written exam 2** requires that students write an NIH F31 grant proposal and have the proposal signed off as passing by their examination committee after an oral defense.

A score of at least 70% is required to pass the first written exam (two parts). Students must pass all written portions of the PhD qualifying examination prior to the oral defense of the F31 proposal. Students who fail one written exam will have one opportunity to retake and pass that examination. A student who fails the first exam twice will be required to withdraw from the PhD program.

During the oral exam, students defend their NIH F31 grant proposal before an examination committee of, minimally, four faculty members: the dissertation advisor, at least two other Department of Pharmaceutical Sciences faculty members, and at least one member from outside the department. This committee is convened only for the oral exam and does not need to be the same committee as the student's dissertation committee.

Members of the oral examination committee are selected by the student, after consultation with the dissertation advisor and/or the director of graduate studies. The oral exam is graded on a pass/fail basis. Students who fail the oral exam on the first attempt may retake the exam within a time period designated by the examination committee not to exceed two months from the first oral exam. Those who fail twice will be dismissed from the program.

### DOCTORAL CANDIDACY STATUS

Doctoral students who have completed satisfactorily and thereby earned the credits for all required core courses (including those for their specialized area) and who have passed the written and oral qualifying examinations shall be admitted to candidacy status for the PhD degree.

### DOCTORAL DISSERTATION COMMITTEE

Doctoral students must complete a dissertation that embodies the results of extended research and makes an original contribution to their field. This work should give evidence of candidates' abilities to conduct independent investigation and interpret the results of their research in a professional manner. The doctoral dissertation advisor serves as chairperson of the Doctoral Dissertation Committee, which consists of no fewer than five members. Selection of an advisor is by mutual consent of the student and a member of the faculty, with approval by the director of graduate studies in the Department of Pharmaceutical Sciences. At least two members of the Doctoral Dissertation Committee must be faculty members in the Department of Pharmaceutical Sciences. At least one member is to be selected from outside the department. Committee members are chosen for their expertise in students' research areas.

### DISSERTATION PROPOSAL DEFENSE

Within a year after successful completion of the PhD qualifying examination, but no later than the beginning of the fall semester of the third year, students must prepare and defend a written proposal detailing their planned dissertation project. Failure to do so will be regarded as a failure to progress in the PhD program and will result in a warning from the director of graduate studies of the Department of Pharmaceutical Sciences.

Students who do not correct this deficiency within one semester will be placed on academic probation. Students on academic probation must complete the dissertation proposal defense and return to nonprobationary status within one semester or be dismissed from the PhD program.

The dissertation proposal should be no more than 50 double-spaced pages (12-point font minimum and one-half-inch margins on all sides). This page limit excludes references but includes figures, figure legends, and tables. Aside from these exceptions, the proposal should otherwise conform to the format and structure of an NIH grant proposal with four main sections: specific aims, background and significance, preliminary studies, and experimental design and methods. The Department of Pharmaceutical Sciences *Dissertation Proposal* document provides detailed instructions on the preparation of a dissertation proposal. Associated required forms may be found on the SOPPS Student Portal Canvas site.

The dissertation proposal must be defended orally before the student's dissertation committee and signed by all dissertation committee members in *approval of the student's planned dissertation research*. Upon dissertation approval, the copies of the signed proposal approval cover sheet (<https://bouve.northeastern.edu/pdf/dissertation-proposal-approval-form.pdf>) must be submitted to the department's director of graduate studies and to the Bouvé College of Health Sciences Graduate Office.

### BIANNUAL REVIEW

Dissertation committees meet routinely at six-month intervals, but no less than once a year, to evaluate students' research progress and to be presented with written and oral progress reports on the direction and status of the research. Progress reports should be written in a brief format,

identical to that described for the formal dissertation (see instructions listed on the SOPPS Student Portal Canvas site). Unsatisfactory productivity provides the basis for a warning by the dissertation committee and/or the Graduate Committee. Two such warnings will result in a student's dismissal from the program.

### **Registration for Dissertation**

Advisor consent and completion of all coursework (with the exception of the colloquium course) must be documented before students register for the first dissertation course. Students must register for Dissertation Term 1 (PHSC 9990) and Dissertation Term 2 (PHSC 9991). Students must register for Dissertation Continuation (PHSC 9996) each semester thereafter until the dissertation has been successfully defended. The department strongly encourages PhD students to complete the program within five years after acceptance, i.e., by three years after establishing degree candidacy. According to university policy, no PhD students may remain in the program for more than seven years.

### **Publications and Presentations**

Prior to completion of PhD training, candidates must present their research either as a poster or podium presentation at a regional or national scientific conference. Also prior to completion, the student must have submitted (preferably, published) at least one manuscript in a peer-reviewed journal that reflects original findings and laboratory work from the candidate's dissertation research.

### **PhD Dissertation Preparation**

Detailed guidelines for the format and content of the written dissertation are given in Instructions for Preparation of the Dissertation found on the SOPPS Student Portal Canvas site. The completed dissertation document should be reviewed first by the dissertation advisor. Feedback from the advisor should be incorporated into the dissertation draft before its distribution to the dissertation committee. The completed dissertation should be delivered to all dissertation committee members no later than two weeks before the scheduled oral defense.

### **PHARMACEUTICAL SCIENCES COLLOQUIUM**

All PhD candidates nearing completion of their research are required to present their dissertation findings at the department's Pharmaceutical Sciences Colloquium. These presentations should be scheduled at least six months before anticipated completion of the dissertation. In turn, the dissertation should be completed no later than one year after the colloquium presentation. Students must register for Pharmaceutical Science Colloquium (PHSC 6810) during the semester that the colloquium presentation is to be given.

### **ORAL DISSERTATION DEFENSE**

The oral dissertation defense takes place after students complete their PhD dissertation research and all other requirements for the PhD degree. The oral defense deals with the subject matter of the dissertation, significant developments in the field, and students' background knowledge in their field of concentration.

The dissertation committee conducts the final defense. The committee may recommend that the student clarify, amplify, or rewrite portions of the dissertation *before the final defense is scheduled*. Once the committee concurs that that written dissertation document is acceptable, a date is chosen for the final oral examination.

At least two weeks prior to the defense, students should inform the director of graduate studies in the Department of Pharmaceutical Sciences of the date of defense, so that advance announcement may be distributed. The final defense is open to anyone who wishes to attend and typically lasts at least two hours. After presentation of the work by the student in a seminar format, and responses to audience and committee questions, the committee meets first with the student for any follow-up discussion and then in executive session to decide whether the student has defended the dissertation successfully.

The committee's decision is then announced to the student. If the committee's vote is favorable, the student incorporates committee suggestions and corrections, if applicable, and the dissertation is signed and passed on to the department's director of graduate studies. Requests for a second defense are highly irregular but may be permitted in the event that the previous oral defense was judged by the committee to be highly promising but inadequate in one critical aspect.

### **Deadline**

The final dissertation must be written, defended, and approved at least two weeks before the university commencement deadline. Students must submit signed copies of their dissertations to the website designated by the university and must abide by any embargo sanctioned by the student's principal dissertation advisor and/or dissertation committee. The students should apply for graduation before the final dissertation defense, on the assumption that the dissertation will be approved. If the dissertation committee decides that more time is required to complete the dissertation beyond the commencement date, then the application for graduation can be withdrawn and a new one submitted pending final dissertation approval.

### **SOPPS PROFESSIONAL CODE OF CONDUCT**

All SOPPS students (BSPS, Preprofessional, MS, and PhD) are expected to adhere to the Code of Conduct (<https://bouve.northeastern.edu/assets/uploads/sites/5/2021/10/northeastern-school-of-pharmacy-code-of-professional-conduct-2021.pdf>).

Please visit Bouvé College of Health Sciences Program Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

## **Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

## **Milestones**

Qualifying examination

Doctoral candidacy status  
 Doctoral dissertation committee  
 Dissertation proposal  
 Biannual review  
 Pharmaceutical Sciences Colloquium  
 Oral dissertation defense

## Core Requirements

A grade of C– or higher is required in each course.

Code	Title	Hours
<b>Seminar</b>		
Complete the following repeatable course for six semesters:		6
PHSC 6300	Pharmaceutical Science Seminar	
<b>Required Core</b>		
Complete the following:		
PHSC 5100	Concepts in Pharmaceutical Science	2
PHSC 5102	Concepts in Pharmaceutical Science 2	2
PHSC 5212	Research Skills and Ethics	2
PHSC 5305	Professional Development for Pharmaceutical Sciences	1
PHSC 6213	Ethical Problems in Health Sciences Research	2
PHSC 6214	Experimental Design and Biostatistics	2

## Electives

Code	Title	Hours
Students must complete one course from each of the following specialization areas for a total of three courses:		8-10
<b>Pharmaceutics &amp; Drug Delivery</b>		
Complete one of the following:		
PMST 6250	Advanced Physical Pharmacy	
PMST 6252	Pharmacokinetics and Drug Metabolism	
PMST 6254	Advanced Drug Delivery Systems	
<b>Pharmacology</b>		
Complete one of the following:		
PMCL 6250	Ion Channel Physiology and Pharmacology	
PMCL 6252	Small-Molecule Target and Ligand Pharmacology	
<b>Medicinal Chemistry &amp; Drug Discovery</b>		
Complete one of the following:		
CHEM 5626	Organic Synthesis 1	
CHEM 5628	Principles of Spectroscopy of Organic Compounds	
PHSC 5450	Contemporary Approaches to Drug Design

<sup>1</sup> Doctoral Proposal (PHSC 9681 (<https://catalog.northeastern.edu/search/?P=PHSC%209681>)) may be taken in spring of the first year but must be taken before fall of the second year.

<sup>2</sup> Pharmaceutical Science Colloquium (PHSC 6810 (<https://catalog.northeastern.edu/search/?P=PHSC%206810>)) must be taken six months before the dissertation defense.

## Advanced Entry Program Requirements

Advanced entry into the PhD program in biomedical science requires a master's degree in pharmaceutical sciences or a related area and focuses on various advanced research courses, and successful defense of the dissertation. . An applicant's transcripts are required to be reviewed by the admissions committee to ensure they are eligible to be in the advanced entry program.

Complete all courses and requirements listed below unless otherwise indicated.

## Medicinal Chemistry and Drug Discovery, PhD

The PhD Program in Medicinal Chemistry and Drug Discovery educates and trains students in the design and synthesis of novel, biologically active compounds and in delineating their mechanisms of action using biochemical, biophysical, and pharmacological approaches. Research specializations are available in synthetic, biochemical/pharmacological, and biophysical aspects of medicinal chemistry. Doctoral research in these specializations will relate to faculty areas of research, which currently include substance use disorders and addiction; neuropathic pain; obesity and metabolic disorders; neuropsychiatric disorders (psychoses, ADHD, depression, anxiety, eating disorders); and neurodegenerative diseases.

### Journal Club Participation

The Department of Pharmaceutical Sciences sponsors weekly journal clubs, Pharmaceutical Science Seminar (PHSC 6300), at which students present and evaluate current scientific literature in their fields of study. Students must attend one of these journal clubs (Pharmaceutics & Drug Delivery Journal Club, Pharmacology Journal Club, or Medicinal Chemistry & Drug Discovery Journal Club), chosen in consultation with their advisors.

Attendance at one of these journal clubs is required each and every academic semester, as an integral part of the PhD curriculum, with the exception of the last year (year four) in the program. All PhD students must participate full-time in journal club for course credit, Pharmaceutical Science Seminar (PHSC 6300), for six semesters. Failure to attend journal club regularly may result in sanctions such as probation or dismissal from the PhD program. Any student who does not comply with these (or any other) conditions required in the PhD program faces potential dismissal.

### Colloquium Attendance

All PhD students, regardless of program, are required to attend the weekly Pharmaceutical Science Colloquium series. Announcements of times and locations will be distributed weekly to students by email to their university email addresses. Attendance is recorded by sign-up sheet. One excused absence is permitted per semester. Failure to attend colloquia may result in sanctions such as probation or dismissal from the PhD program.

### Internship Requirements and Regulations for Department of Pharmaceutical Sciences

Internships provide an experiential component of the graduate curriculum that fosters professional development through work in the pharmaceutical and biotechnology industries.

After PhD candidates have completed their dissertation research and are working on their dissertations, they are able, with the express permission of their PhD advisor, to participate in an internship if they choose. They are never allowed to intern while they are serving as teaching assistants.

1. Students are responsible for finding their own internship and must be honest and accurate representing their experiences on their resumés. Students are responsible for tracking this experience on their resumés as there will be no detailed record on students' transcripts of these opportunities.
2. In order to be eligible for internship, students must take Professional Development for Pharmaceutical Sciences (PHSC 5305) a semester before internship.
3. Students must not accept more than one position. They must honor the first offer accepted. Any student not adhering to this requirement will not be allowed to participate.
4. International students must register for Pharmaceutical Science Internship (PHSC 6401) and follow instructions to receive Curricular Practical Training authorization from the Office of Global Services (<https://international.northeastern.edu/ogs/>) every semester they work. This applies to part-time jobs and volunteer opportunities. International students cannot engage in full-time CPT authorization totaling more than 52 weeks. Doing so will eliminate the possibility of engaging in the postgraduation benefit of Post-Completion Optional Practical Training.
5. In order to receive a grade for the course, students must write at least two learning goals within the first two weeks of the internship and a one- to two-page paper describing what they learned, mid- and end of semester. Supervisors for internships will reply to a questionnaire about students' performance.
6. Taking internship must not extend international students' visas.
7. There are no vacations on co-op/internships. Companies' sick time policies may vary. Students should check with their employers. For all other matters, please see the University-wide Academic Policies and Procedures (p. 44) and/or Bouvé College of Health Sciences Academic Policies and Procedures (p. 569).

### Milestones

#### QUALIFYING EXAMINATION

The PhD qualifying examination is required for students in all four programs under the auspices of the Department of Pharmaceutical Sciences: pharmacology, medicinal chemistry and drug discovery, biomedical sciences, and pharmaceutics and drug delivery. Students from each of the four programs will take the exams within the same time frame (below), regardless of specialty-area program focus.

Doctoral students should have selected a dissertation advisor by the end of their first year in the program and are expected to have begun research and demonstrated initial proficiency in the laboratory before taking the PhD qualifying examination.

The PhD qualifying examination tests the candidates' knowledge and skills in core courses and program content areas. The overall PhD qualifying examination consists of two written exams and one oral exam. The qualifying examination is taken as a course, Doctoral Training and Research (PHSC 8940), no later than during the fall semester of the student's second year, after having successfully completed all the core courses of their respective programs.

At least two departmental faculty will contribute questions for the written exams, and no one faculty member will write more than the equivalent of one entire exam. All students qualified to sit for the exams are expected to take them at the times announced.

The format for the written exams may vary (e.g., faculty may ask a series of comprehensive essay questions or provide research publications(s) from the biomedical literature and ask questions based upon the publications' content). The first exam is given in the first week of fall semester, with the written portion of the second exam (i.e., the F31 written document) to be submitted to the student's exam committee by end of October with the oral presentation to be completed by mid-November and graded by the providers of the question(s).

- **Written exam 1** reflects students' knowledge of their specialty-area program material and of overall pharmaceutical sciences. This exam is given on the same day in two parts. Part 1 is focused on each student's specialty-area program focus. Part 2 will test students' overall knowledge in another program focus covered by the pharmaceutical sciences curriculum.
  - For example, if the student is in the pharmaceuticals and drug delivery PhD program, part 1 will be about pharmaceuticals and drug delivery, and part 2 can focus either on pharmacology or medicinal chemistry and drug discovery.
- **Written exam 2** requires that students write an NIH F31 grant proposal and have the proposal signed off as passing by their examination committee after an oral defense.

A score of at least 70% is required to pass the first written exam (two parts). Students must pass all written portions of the PhD qualifying examination prior to the oral defense of the F31 proposal. Students who fail one written exam will have one opportunity to retake and pass that examination. A student who fails the first exam twice will be required to withdraw from the PhD program.

During the oral exam, students defend their NIH F31 grant proposal before an examination committee of, minimally, four faculty members: the dissertation advisor, at least two other Department of Pharmaceutical Sciences faculty members, and at least one member from outside the department. This committee is convened only for the oral exam and does not need to be the same committee as the student's dissertation committee.

Members of the oral examination committee are selected by the student, after consultation with the dissertation advisor and/or the director of graduate studies. The oral exam is graded on a pass/fail basis. Students who fail the oral exam on the first attempt may retake the exam within a time period designated by the examination committee not to exceed two months from the first oral exam. Those who fail twice will be dismissed from the program.

### DOCTORAL CANDIDACY STATUS

Doctoral students who have completed satisfactorily and thereby earned the credits for all required core courses (including those for their specialized area) and who have passed the written and oral qualifying examinations shall be admitted to candidacy status for the PhD degree.

### DOCTORAL DISSERTATION COMMITTEE

Doctoral students must complete a dissertation that embodies the results of extended research and makes an original contribution to their field. This work should give evidence of candidates' abilities to conduct independent investigation and interpret the results of their research in a professional manner. The doctoral dissertation advisor serves as chairperson of the Doctoral Dissertation Committee, which consists of no fewer than five members. Selection of an advisor is by mutual consent of the student and a member of the faculty, with approval by the director of graduate studies in the Department of Pharmaceutical Sciences. At least two members of the Doctoral Dissertation Committee must be faculty members in the Department of Pharmaceutical Sciences. At least one member is to be selected from outside the department. Committee members are chosen for their expertise in students' research areas.

### DISSERTATION PROPOSAL DEFENSE

Within a year after successful completion of the PhD qualifying examination, but no later than the beginning of the fall semester of the third year, students must prepare and defend a written proposal detailing their planned dissertation project. Failure to do so will be regarded as a failure to progress in the PhD program and will result in a warning from the director of graduate studies of the Department of Pharmaceutical Sciences.

Students who do not correct this deficiency within one semester will be placed on academic probation. Students on academic probation must complete the dissertation proposal defense and return to nonprobationary status within one semester or be dismissed from the PhD program.

The dissertation proposal should be no more than 50 double-spaced pages (12-point font minimum and one-half-inch margins on all sides). This page limit excludes references but includes figures, figure legends, and tables. Aside from these exceptions, the proposal should otherwise conform to the format and structure of an NIH grant proposal with four main sections: specific aims, background and significance, preliminary studies, and experimental design and methods. The Department of Pharmaceutical Sciences *Dissertation Proposal* document provides detailed instructions on the preparation of a dissertation proposal. Associated required forms may be found on the SOPPS Student Portal Canvas site.

The dissertation proposal must be defended orally before the student's dissertation committee and signed by all dissertation committee members in *approval of the student's planned dissertation research*. Upon dissertation approval, the copies of the signed proposal approval cover sheet (<https://bouve.northeastern.edu/pdf/dissertation-proposal-approval-form.pdf>) must be submitted to the department's director of graduate studies and to the Bouvé College of Health Sciences Graduate Office.

### BIANNUAL REVIEW

Dissertation committees meet routinely at six-month intervals, but no less than once a year, to evaluate students' research progress and to be presented with written and oral progress reports on the direction and status of the research. Progress reports should be written in a brief format, identical to that described for the formal dissertation (see instructions listed on the SOPPS Student Portal Canvas site). Unsatisfactory productivity

provides the basis for a warning by the dissertation committee and/or the Graduate Committee. Two such warnings will result in a student's dismissal from the program.

### **Registration for Dissertation**

Advisor consent and completion of all coursework (with the exception of the colloquium course) must be documented before students register for the first dissertation course. Students must register for Dissertation Term 1 (PHSC 9990) and Dissertation Term 2 (PHSC 9991). Students must register for Dissertation Continuation (PHSC 9996) each semester thereafter until the dissertation has been successfully defended. The department strongly encourages PhD students to complete the program within five years after acceptance, i.e., by three years after establishing degree candidacy. According to university policy, no PhD students may remain in the program for more than seven years.

### **Publications and Presentations**

Prior to completion of PhD training, candidates must present their research either as a poster or podium presentation at a regional or national scientific conference. Also prior to completion, the student must have submitted (preferably, published) at least one manuscript in a peer-reviewed journal that reflects original findings and laboratory work from the candidate's dissertation research.

### **PhD Dissertation Preparation**

Detailed guidelines for the format and content of the written dissertation are given in Instructions for Preparation of the Dissertation found on the SOPPS Student Portal Canvas site. The completed dissertation document should be reviewed first by the dissertation advisor. Feedback from the advisor should be incorporated into the dissertation draft before its distribution to the dissertation committee. The completed dissertation should be delivered to all dissertation committee members no later than two weeks before the scheduled oral defense.

### **PHARMACEUTICAL SCIENCES COLLOQUIUM**

All PhD candidates nearing completion of their research are required to present their dissertation findings at the department's Pharmaceutical Sciences Colloquium. These presentations should be scheduled at least six months before anticipated completion of the dissertation. In turn, the dissertation should be completed no later than one year after the colloquium presentation. Students must register for Pharmaceutical Science Colloquium (PHSC 6810) during the semester that the colloquium presentation is to be given.

### **ORAL DISSERTATION DEFENSE**

The oral dissertation defense takes place after students complete their PhD dissertation research and all other requirements for the PhD degree. The oral defense deals with the subject matter of the dissertation, significant developments in the field, and students' background knowledge in their field of concentration.

The dissertation committee conducts the final defense. The committee may recommend that the student clarify, amplify, or rewrite portions of the dissertation *before the final defense is scheduled*. Once the committee concurs that that written dissertation document is acceptable, a date is chosen for the final oral examination.

At least two weeks prior to the defense, students should inform the director of graduate studies in the Department of Pharmaceutical Sciences of the date of defense, so that advance announcement may be distributed. The final defense is open to anyone who wishes to attend and typically lasts at least two hours. After presentation of the work by the student in a seminar format, and responses to audience and committee questions, the committee meets first with the student for any follow-up discussion and then in executive session to decide whether the student has defended the dissertation successfully.

The committee's decision is then announced to the student. If the committee's vote is favorable, the student incorporates committee suggestions and corrections, if applicable, and the dissertation is signed and passed on to the department's director of graduate studies. Requests for a second defense are highly irregular but may be permitted in the event that the previous oral defense was judged by the committee to be highly promising but inadequate in one critical aspect.

### **Deadline**

The final dissertation must be written, defended, and approved at least two weeks before the university commencement deadline. Students must submit signed copies of their dissertations to the website designated by the university and must abide by any embargo sanctioned by the student's principal dissertation advisor and/or dissertation committee. The students should apply for graduation before the final dissertation defense, on the assumption that the dissertation will be approved. If the dissertation committee decides that more time is required to complete the dissertation beyond the commencement date, then the application for graduation can be withdrawn and a new one submitted pending final dissertation approval.

### **SOPPS PROFESSIONAL CODE OF CONDUCT**

All SOPPS students (BSPS, Preprofessional, MS, and PhD) are expected to adhere to the Code of Conduct (<https://bouve.northeastern.edu/assets/uploads/sites/5/2021/10/northeastern-school-of-pharmacy-code-of-professional-conduct-2021.pdf>).

Please visit Bouvé College of Health Sciences Program Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

## Pharmaceutics and Drug Delivery, PhD

Students studying pharmaceutics and drug delivery will be thoroughly exposed to the fundamentals of physical pharmacy and pharmaceutics and trained in several specialized areas including:

- Novel drug delivery systems
- Nanomedical technologies
- Biopharmaceutics and pharmacokinetics

With exposure to these facets of the pharmaceutical sciences, successful graduates are poised to understand and assimilate the field of modern pharmaceutics. A PhD degree in pharmaceutics is a research degree. While coursework plays an important role, students become active participants in the science of pharmaceutics in the laboratory. Faculty research in pharmaceutical sciences covers a broad range of scientific interests, including pharmacokinetic toxicodynamics of anticancer agents; use of novel biomaterials and synthetic polymeric systems in designing small-molecule drug delivery systems for small molecules, proteins, and nucleic acids; passive and active targeting of therapeutic agents for cancer and cardiovascular diseases; novel delivery systems for immunostimulating purposes; and mathematical modeling of endogenous compounds.

### Journal Club Participation

The Department of Pharmaceutical Sciences sponsors weekly journal clubs, Pharmaceutical Science Seminar (PHSC 6300), at which students present and evaluate current scientific literature in their fields of study. Students must attend one of these journal clubs (Pharmaceutics & Drug Delivery Journal Club, Pharmacology Journal Club, or Medicinal Chemistry & Drug Discovery Journal Club), chosen in consultation with their advisors.

Attendance at one of these journal clubs is required each and every academic semester, as an integral part of the PhD curriculum, with the exception of the last year (year four) in the program. All PhD students must participate full-time in journal club for course credit, Pharmaceutical Science Seminar (PHSC 6300), for six semesters. Failure to attend journal club regularly may result in sanctions such as probation or dismissal from the PhD program. Any student who does not comply with these (or any other) conditions required in the PhD program faces potential dismissal.

### Colloquium Attendance

All PhD students, regardless of program, are required to attend the weekly Pharmaceutical Science Colloquium series. Announcements of times and locations will be distributed weekly to students by email to their university email addresses. Attendance is recorded by sign-up sheet. One excused absence is permitted per semester. Failure to attend colloquia may result in sanctions such as probation or dismissal from the PhD program.

### Internship Requirements and Regulations for Department of Pharmaceutical Sciences

Internships provide an experiential component of the graduate curriculum that fosters professional development through work in the pharmaceutical and biotechnology industries.

After PhD candidates have completed their dissertation research and are working on their dissertations, they are able, with the express permission of their PhD advisor, to participate in an internship if they choose. They are never allowed to intern while they are serving as teaching assistants.

1. Students are responsible for finding their own internship and must be honest and accurate representing their experiences on their resumés. Students are responsible for tracking this experience on their resumés as there will be no detailed record on students' transcripts of these opportunities.
2. In order to be eligible for internship, students must take Professional Development for Pharmaceutical Sciences (PHSC 5305) a semester before internship.
3. Students must not accept more than one position. They must honor the first offer accepted. Any student not adhering to this requirement will not be allowed to participate.
4. International students must register for Pharmaceutical Science Internship (PHSC 6401) and follow instructions to receive Curricular Practical Training authorization from the Office of Global Services (<https://international.northeastern.edu/ogs/>) every semester they work. This applies to part-time jobs and volunteer opportunities. International students cannot engage in full-time CPT authorization totaling more than 52 weeks. Doing so will eliminate the possibility of engaging in the postgraduation benefit of Post-Completion Optional Practical Training.
5. In order to receive a grade for the course, students must write at least two learning goals within the first two weeks of the internship and a one- to two-page paper describing what they learned, mid- and end of semester. Supervisors for internships will reply to a questionnaire about students' performance.
6. Taking internship must not extend international students' visas.
7. There are no vacations on co-op/internships. Companies' sick time policies may vary. Students should check with their employers. For all other matters, please see the University-wide Academic Policies and Procedures (p. 44) and/or Bouvé College of Health Sciences Academic Policies and Procedures (p. 569).

### Milestones

#### QUALIFYING EXAMINATION

The PhD qualifying examination is required for students in all four programs under the auspices of the Department of Pharmaceutical Sciences: pharmacology, medicinal chemistry and drug discovery, biomedical sciences, and pharmaceutics and drug delivery. Students from each of the four programs will take the exams within the same time frame (below), regardless of specialty-area program focus.

Doctoral students should have selected a dissertation advisor by the end of their first year in the program and are expected to have begun research and demonstrated initial proficiency in the laboratory before taking the PhD qualifying examination.

The PhD qualifying examination tests the candidates' knowledge and skills in core courses and program content areas. The overall PhD qualifying examination consists of two written exams and one oral exam. The qualifying examination is taken as a course, Doctoral Training and Research (PHSC 8940), no later than during the fall semester of the student's second year, after having successfully completed all the core courses of their respective programs.

At least two departmental faculty will contribute questions for the written exams, and no one faculty member will write more than the equivalent of one entire exam. All students qualified to sit for the exams are expected to take them at the times announced.

The format for the written exams may vary (e.g., faculty may ask a series of comprehensive essay questions or provide research publications(s) from the biomedical literature and ask questions based upon the publications' content). The first exam is given in the first week of fall semester, with the written portion of the second exam (i.e., the F31 written document) to be submitted to the student's exam committee by end of October with the oral presentation to be completed by mid-November and graded by the providers of the question(s).

- **Written exam 1** reflects students' knowledge of their specialty-area program material and of overall pharmaceutical sciences. This exam is given on the same day in two parts. Part 1 is focused on each student's specialty-area program focus. Part 2 will test students' overall knowledge in another program focus covered by the pharmaceutical sciences curriculum.
  - For example, if the student is in the pharmaceuticals and drug delivery PhD program, part 1 will be about pharmaceuticals and drug delivery, and part 2 can focus either on pharmacology or medicinal chemistry and drug discovery.
- **Written exam 2** requires that students write an NIH F31 grant proposal and have the proposal signed off as passing by their examination committee after an oral defense.

A score of at least 70% is required to pass the first written exam (two parts). Students must pass all written portions of the PhD qualifying examination prior to the oral defense of the F31 proposal. Students who fail one written exam will have one opportunity to retake and pass that examination. A student who fails the first exam twice will be required to withdraw from the PhD program.

During the oral exam, students defend their NIH F31 grant proposal before an examination committee of, minimally, four faculty members: the dissertation advisor, at least two other Department of Pharmaceutical Sciences faculty members, and at least one member from outside the department. This committee is convened only for the oral exam and does not need to be the same committee as the student's dissertation committee.

Members of the oral examination committee are selected by the student, after consultation with the dissertation advisor and/or the director of graduate studies. The oral exam is graded on a pass/fail basis. Students who fail the oral exam on the first attempt may retake the exam within a time period designated by the examination committee not to exceed two months from the first oral exam. Those who fail twice will be dismissed from the program.

### DOCTORAL CANDIDACY STATUS

Doctoral students who have completed satisfactorily and thereby earned the credits for all required core courses (including those for their specialized area) and who have passed the written and oral qualifying examinations shall be admitted to candidacy status for the PhD degree.

### DOCTORAL DISSERTATION COMMITTEE

Doctoral students must complete a dissertation that embodies the results of extended research and makes an original contribution to their field. This work should give evidence of candidates' abilities to conduct independent investigation and interpret the results of their research in a professional manner. The doctoral dissertation advisor serves as chairperson of the Doctoral Dissertation Committee, which consists of no fewer than five members. Selection of an advisor is by mutual consent of the student and a member of the faculty, with approval by the director of graduate studies in the Department of Pharmaceutical Sciences. At least two members of the Doctoral Dissertation Committee must be faculty members in the Department of Pharmaceutical Sciences. At least one member is to be selected from outside the department. Committee members are chosen for their expertise in students' research areas.

### DISSERTATION PROPOSAL DEFENSE

Within a year after successful completion of the PhD qualifying examination, but no later than the beginning of the fall semester of the third year, students must prepare and defend a written proposal detailing their planned dissertation project. Failure to do so will be regarded as a failure to progress in the PhD program and will result in a warning from the director of graduate studies of the Department of Pharmaceutical Sciences.

Students who do not correct this deficiency within one semester will be placed on academic probation. Students on academic probation must complete the dissertation proposal defense and return to nonprobationary status within one semester or be dismissed from the PhD program.

The dissertation proposal should be no more than 50 double-spaced pages (12-point font minimum and one-half-inch margins on all sides). This page limit excludes references but includes figures, figure legends, and tables. Aside from these exceptions, the proposal should otherwise conform to the format and structure of an NIH grant proposal with four main sections: specific aims, background and significance, preliminary studies, and experimental design and methods. The Department of Pharmaceutical Sciences *Dissertation Proposal* document provides detailed instructions on the preparation of a dissertation proposal. Associated required forms may be found on the SOPPS Student Portal Canvas site.

The dissertation proposal must be defended orally before the student's dissertation committee and signed by all dissertation committee members in *approval of the student's planned dissertation research*. Upon dissertation approval, the copies of the signed proposal approval cover sheet (<https://>

bouve.northeastern.edu/pdf/dissertation-proposal-approval-form.pdf) must be submitted to the department's director of graduate studies and to the Bouvé College of Health Sciences Graduate Office.

### **BIANNUAL REVIEW**

Dissertation committees meet routinely at six-month intervals, but no less than once a year, to evaluate students' research progress and to be presented with written and oral progress reports on the direction and status of the research. Progress reports should be written in a brief format, identical to that described for the formal dissertation (see instructions listed on the SOPPS Student Portal Canvas site). Unsatisfactory productivity provides the basis for a warning by the dissertation committee and/or the Graduate Committee. Two such warnings will result in a student's dismissal from the program.

### **Registration for Dissertation**

Advisor consent and completion of all coursework (with the exception of the colloquium course) must be documented before students register for the first dissertation course. Students must register for Dissertation Term 1 (PHSC 9990) and Dissertation Term 2 (PHSC 9991). Students must register for Dissertation Continuation (PHSC 9996) each semester thereafter until the dissertation has been successfully defended. The department strongly encourages PhD students to complete the program within five years after acceptance, i.e., by three years after establishing degree candidacy. According to university policy, no PhD students may remain in the program for more than seven years.

### **Publications and Presentations**

Prior to completion of PhD training, candidates must present their research either as a poster or podium presentation at a regional or national scientific conference. Also prior to completion, the student must have submitted (preferably, published) at least one manuscript in a peer-reviewed journal that reflects original findings and laboratory work from the candidate's dissertation research.

### **PhD Dissertation Preparation**

Detailed guidelines for the format and content of the written dissertation are given in Instructions for Preparation of the Dissertation found on the SOPPS Student Portal Canvas site. The completed dissertation document should be reviewed first by the dissertation advisor. Feedback from the advisor should be incorporated into the dissertation draft before its distribution to the dissertation committee. The completed dissertation should be delivered to all dissertation committee members no later than two weeks before the scheduled oral defense.

### **PHARMACEUTICAL SCIENCES COLLOQUIUM**

All PhD candidates nearing completion of their research are required to present their dissertation findings at the department's Pharmaceutical Sciences Colloquium. These presentations should be scheduled at least six months before anticipated completion of the dissertation. In turn, the dissertation should be completed no later than one year after the colloquium presentation. Students must register for Pharmaceutical Science Colloquium (PHSC 6810) during the semester that the colloquium presentation is to be given.

### **ORAL DISSERTATION DEFENSE**

The oral dissertation defense takes place after students complete their PhD dissertation research and all other requirements for the PhD degree. The oral defense deals with the subject matter of the dissertation, significant developments in the field, and students' background knowledge in their field of concentration.

The dissertation committee conducts the final defense. The committee may recommend that the student clarify, amplify, or rewrite portions of the dissertation *before the final defense is scheduled*. Once the committee concurs that that written dissertation document is acceptable, a date is chosen for the final oral examination.

At least two weeks prior to the defense, students should inform the director of graduate studies in the Department of Pharmaceutical Sciences of the date of defense, so that advance announcement may be distributed. The final defense is open to anyone who wishes to attend and typically lasts at least two hours. After presentation of the work by the student in a seminar format, and responses to audience and committee questions, the committee meets first with the student for any follow-up discussion and then in executive session to decide whether the student has defended the dissertation successfully.

The committee's decision is then announced to the student. If the committee's vote is favorable, the student incorporates committee suggestions and corrections, if applicable, and the dissertation is signed and passed on to the department's director of graduate studies. Requests for a second defense are highly irregular but may be permitted in the event that the previous oral defense was judged by the committee to be highly promising but inadequate in one critical aspect.

### **Deadline**

The final dissertation must be written, defended, and approved at least two weeks before the university commencement deadline. Students must submit signed copies of their dissertations to the website designated by the university and must abide by any embargo sanctioned by the student's principal dissertation advisor and/or dissertation committee. The students should apply for graduation before the final dissertation defense, on the assumption that the dissertation will be approved. If the dissertation committee decides that more time is required to complete the dissertation beyond the commencement date, then the application for graduation can be withdrawn and a new one submitted pending final dissertation approval.

### **SOPPS PROFESSIONAL CODE OF CONDUCT**

All SOPPS students (BSPS, Preprofessional, MS, and PhD) are expected to adhere to the Code of Conduct (<https://bouve.northeastern.edu/assets/uploads/sites/5/2021/10/northeastern-school-of-pharmacy-code-of-professional-conduct-2021.pdf>).

Please visit Bouvé College of Health Sciences Program Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Milestones**

Qualifying examination  
 Doctoral candidacy status  
 Doctoral dissertation committee  
 Dissertation proposal  
 Biannual review

PHSC 5305 <sup>4</sup>		1 PHSC 6213 <sup>4</sup>		2	
			2	2	0

**Total Hours: 31**

- <sup>1</sup> Scientific Writing: Thesis Proposal (PHSC 7020) must be taken the summer before the qualifying exams.
- <sup>2</sup> Doctoral Proposal (PHSC 9681) should be taken in summer of second year but no later than fall of third year.
- <sup>3</sup> Pharmaceutical Science Colloquium (PHSC 6810) must be taken six months before dissertation defense.
- <sup>4</sup> Professional Development for Pharmaceutical Sciences (PHSC 5305) and Ethical Problems in Health Sciences Research (PHSC 6213) are suggested to be taken in the fourth year but can be taken at any point before graduation.

### Advanced Entry Program Requirements

Advanced entry into the Pharmaceutics and Drug Delivery PhD program requires a master's degree in pharmaceutical sciences or related area and focuses on various advanced research courses. An applicant's transcripts are required to be reviewed by the admissions committee to ensure they are eligible to be in the advanced entry program.

Complete all courses and requirements listed below unless otherwise indicated.

### Milestones

- Annual review
- Qualifying examination
- Dissertation committee
- Dissertation proposal
- Dissertation defense

### Core Requirements

A grade of C- or higher is required in each course.

**Total Hours: 10**

<sup>1</sup> Doctoral Proposal (PHSC 9681 (<https://catalog.northeastern.edu/search/?P=PHSC%209681>)) may be taken in spring of first year but must be taken before fall of second year.

<sup>2</sup> Pharmaceutical Science Colloquium (PHSC 6810 (<https://catalog.northeastern.edu/search/?P=PHSC%206810>)) must be taken six months before dissertation defense.

## Pharmacology, PhD

The pharmacology PhD enables students to specialize in the study of the actions of drugs and their effects in living systems. In addition to the opportunity for developing a sound knowledge base through coursework and seminars, the program is designed to strengthen students' ability to understand and evaluate critically current pharmacology literature, informing the students' independent laboratory research that advances our understanding of drugs, their actions, and their pharmacotherapeutic applications. Recent graduates with a pharmacology PhD have found employment in academic and industrial research positions.

### Journal Club Participation

The Department of Pharmaceutical Sciences sponsors weekly journal clubs, Pharmaceutical Science Seminar (PHSC 6300), at which students present and evaluate current scientific literature in their fields of study. Students must attend one of these journal clubs (Pharmaceutics & Drug Delivery Journal Club, Pharmacology Journal Club, or Medicinal Chemistry & Drug Discovery Journal Club), chosen in consultation with their advisors.

Attendance at one of these journal clubs is required each and every academic semester, as an integral part of the PhD curriculum, with the exception of the last year (year four) in the program. All PhD students must participate full-time in journal club for course credit, Pharmaceutical Science Seminar (PHSC 6300), for six semesters. Failure to attend journal club regularly may result in sanctions such as probation or dismissal from the PhD program. Any student who does not comply with these (or any other) conditions required in the PhD program faces potential dismissal.

### Colloquium Attendance

All PhD students, regardless of program, are required to attend the weekly Pharmaceutical Science Colloquium series. Announcements of times and locations will be distributed weekly to students by email to their university email addresses. Attendance is recorded by sign-up sheet. One excused absence is permitted per semester. Failure to attend colloquia may result in sanctions such as probation or dismissal from the PhD program.

### Internship Requirements and Regulations for Department of Pharmaceutical Sciences

Internships provide an experiential component of the graduate curriculum that fosters professional development through work in the pharmaceutical and biotechnology industries.

After PhD candidates have completed their dissertation research and are working on their dissertations, they are able, with the express permission of their PhD advisor, to participate in an internship if they choose. They are never allowed to intern while they are serving as teaching assistants.

1. Students are responsible for finding their own internship and must be honest and accurate representing their experiences on their resumés. Students are responsible for tracking this experience on their resumés as there will be no detailed record on students' transcripts of these opportunities.
2. In order to be eligible for internship, students must take Professional Development for Pharmaceutical Sciences (PHSC 5305) a semester before internship.
3. Students must not accept more than one position. They must honor the first offer accepted. Any student not adhering to this requirement will not be allowed to participate.
4. International students must register for Pharmaceutical Science Internship (PHSC 6401) and follow instructions to receive Curricular Practical Training authorization from the Office of Global Services (<https://international.northeastern.edu/ogs/>) every semester they work. This applies to part-time jobs and volunteer opportunities. International students cannot engage in full-time CPT authorization totaling more than 52 weeks. Doing so will eliminate the possibility of engaging in the postgraduation benefit of Post-Completion Optional Practical Training.
5. In order to receive a grade for the course, students must write at least two learning goals within the first two weeks of the internship and a one- to two-page paper describing what they learned, mid- and end of semester. Supervisors for internships will reply to a questionnaire about students' performance.
6. Taking internship must not extend international students' visas.
7. There are no vacations on co-op/internships. Companies' sick time policies may vary. Students should check with their employers. For all other matters, please see the University-wide Academic Policies and Procedures (p. 44) and/or Bouvé College of Health Sciences Academic Policies and Procedures (p. 569).

### Milestones

#### QUALIFYING EXAMINATION

The PhD qualifying examination is required for students in all four programs under the auspices of the Department of Pharmaceutical Sciences: pharmacology, medicinal chemistry and drug discovery, biomedical sciences, and pharmaceutics and drug delivery. Students from each of the four programs will take the exams within the same time frame (below), regardless of specialty-area program focus.

Doctoral students should have selected a dissertation advisor by the end of their first year in the program and are expected to have begun research and demonstrated initial proficiency in the laboratory before taking the PhD qualifying examination.

The PhD qualifying examination tests the candidates' knowledge and skills in core courses and program content areas. The overall PhD qualifying examination consists of two written exams and one oral exam. The qualifying examination is taken as a course, Doctoral Training and Research (PHSC 8940), no later than during the fall semester of the student's second year, after having successfully completed all the core courses of their respective programs.

At least two departmental faculty will contribute questions for the written exams, and no one faculty member will write more than the equivalent of one entire exam. All students qualified to sit for the exams are expected to take them at the times announced.

The format for the written exams may vary (e.g., faculty may ask a series of comprehensive essay questions or provide research publications(s) from the biomedical literature and ask questions based upon the publications' content). The first exam is given in the first week of fall semester, with the written portion of the second exam (i.e., the F31 written document) to be submitted to the student's exam committee by end of October with the oral presentation to be completed by mid-November and graded by the providers of the question(s).

- **Written exam 1** reflects students' knowledge of their specialty-area program material and of overall pharmaceutical sciences. This exam is given on the same day in two parts. Part 1 is focused on each student's specialty-area program focus. Part 2 will test students' overall knowledge in another program focus covered by the pharmaceutical sciences curriculum.
  - For example, if the student is in the pharmaceuticals and drug delivery PhD program, part 1 will be about pharmaceuticals and drug delivery, and part 2 can focus either on pharmacology or medicinal chemistry and drug discovery.
- **Written exam 2** requires that students write an NIH F31 grant proposal and have the proposal signed off as passing by their examination committee after an oral defense.

A score of at least 70% is required to pass the first written exam (two parts). Students must pass all written portions of the PhD qualifying examination prior to the oral defense of the F31 proposal. Students who fail one written exam will have one opportunity to retake and pass that examination. A student who fails the first exam twice will be required to withdraw from the PhD program.

During the oral exam, students defend their NIH F31 grant proposal before an examination committee of, minimally, four faculty members: the dissertation advisor, at least two other Department of Pharmaceutical Sciences faculty members, and at least one member from outside the department. This committee is convened only for the oral exam and does not need to be the same committee as the student's dissertation committee.

Members of the oral examination committee are selected by the student, after consultation with the dissertation advisor and/or the director of graduate studies. The oral exam is graded on a pass/fail basis. Students who fail the oral exam on the first attempt may retake the exam within a time period designated by the examination committee not to exceed two months from the first oral exam. Those who fail twice will be dismissed from the program.

### DOCTORAL CANDIDACY STATUS

Doctoral students who have completed satisfactorily and thereby earned the credits for all required core courses (including those for their specialized area) and who have passed the written and oral qualifying examinations shall be admitted to candidacy status for the PhD degree.

### DOCTORAL DISSERTATION COMMITTEE

Doctoral students must complete a dissertation that embodies the results of extended research and makes an original contribution to their field. This work should give evidence of candidates' abilities to conduct independent investigation and interpret the results of their research in a professional manner. The doctoral dissertation advisor serves as chairperson of the Doctoral Dissertation Committee, which consists of no fewer than five members. Selection of an advisor is by mutual consent of the student and a member of the faculty, with approval by the director of graduate studies in the Department of Pharmaceutical Sciences. At least two members of the Doctoral Dissertation Committee must be faculty members in the Department of Pharmaceutical Sciences. At least one member is to be selected from outside the department. Committee members are chosen for their expertise in students' research areas.

### DISSERTATION PROPOSAL DEFENSE

Within a year after successful completion of the PhD qualifying examination, but no later than the beginning of the fall semester of the third year, students must prepare and defend a written proposal detailing their planned dissertation project. Failure to do so will be regarded as a failure to progress in the PhD program and will result in a warning from the director of graduate studies of the Department of Pharmaceutical Sciences.

Students who do not correct this deficiency within one semester will be placed on academic probation. Students on academic probation must complete the dissertation proposal defense and return to nonprobationary status within one semester or be dismissed from the PhD program.

The dissertation proposal should be no more than 50 double-spaced pages (12-point font minimum and one-half-inch margins on all sides). This page limit excludes references but includes figures, figure legends, and tables. Aside from these exceptions, the proposal should otherwise conform to the format and structure of an NIH grant proposal with four main sections: specific aims, background and significance, preliminary studies, and experimental design and methods. The Department of Pharmaceutical Sciences *Dissertation Proposal* document provides detailed instructions on the preparation of a dissertation proposal. Associated required forms may be found on the SOPPS Student Portal Canvas site.

The dissertation proposal must be defended orally before the student's dissertation committee and signed by all dissertation committee members in *approval of the student's planned dissertation research*. Upon dissertation approval, the copies of the signed proposal approval cover sheet (<https://bouve.northeastern.edu/pdf/dissertation-proposal-approval-form.pdf>) must be submitted to the department's director of graduate studies and to the Bouvé College of Health Sciences Graduate Office.

### BIANNUAL REVIEW

Dissertation committees meet routinely at six-month intervals, but no less than once a year, to evaluate students' research progress and to be presented with written and oral progress reports on the direction and status of the research. Progress reports should be written in a brief format, identical to that described for the formal dissertation (see instructions listed on the SOPPS Student Portal Canvas site). Unsatisfactory productivity

provides the basis for a warning by the dissertation committee and/or the Graduate Committee. Two such warnings will result in a student's dismissal from the program.

### **Registration for Dissertation**

Advisor consent and completion of all coursework (with the exception of the colloquium course) must be documented before students register for the first dissertation course. Students must register for Dissertation Term 1 (PHSC 9990) and Dissertation Term 2 (PHSC 9991). Students must register for Dissertation Continuation (PHSC 9996) each semester thereafter until the dissertation has been successfully defended. The department strongly encourages PhD students to complete the program within five years after acceptance, i.e., by three years after establishing degree candidacy. According to university policy, no PhD students may remain in the program for more than seven years.

### **Publications and Presentations**

Prior to completion of PhD training, candidates must present their research either as a poster or podium presentation at a regional or national scientific conference. Also prior to completion, the student must have submitted (preferably, published) at least one manuscript in a peer-reviewed journal that reflects original findings and laboratory work from the candidate's dissertation research.

### **PhD Dissertation Preparation**

Detailed guidelines for the format and content of the written dissertation are given in Instructions for Preparation of the Dissertation found on the SOPPS Student Portal Canvas site. The completed dissertation document should be reviewed first by the dissertation advisor. Feedback from the advisor should be incorporated into the dissertation draft before its distribution to the dissertation committee. The completed dissertation should be delivered to all dissertation committee members no later than two weeks before the scheduled oral defense.

### **PHARMACEUTICAL SCIENCES COLLOQUIUM**

All PhD candidates nearing completion of their research are required to present their dissertation findings at the department's Pharmaceutical Sciences Colloquium. These presentations should be scheduled at least six months before anticipated completion of the dissertation. In turn, the dissertation should be completed no later than one year after the colloquium presentation. Students must register for Pharmaceutical Science Colloquium (PHSC 6810) during the semester that the colloquium presentation is to be given.

### **ORAL DISSERTATION DEFENSE**

The oral dissertation defense takes place after students complete their PhD dissertation research and all other requirements for the PhD degree. The oral defense deals with the subject matter of the dissertation, significant developments in the field, and students' background knowledge in their field of concentration.

The dissertation committee conducts the final defense. The committee may recommend that the student clarify, amplify, or rewrite portions of the dissertation *before the final defense is scheduled*. Once the committee concurs that that written dissertation document is acceptable, a date is chosen for the final oral examination.

At least two weeks prior to the defense, students should inform the director of graduate studies in the Department of Pharmaceutical Sciences of the date of defense, so that advance announcement may be distributed. The final defense is open to anyone who wishes to attend and typically lasts at least two hours. After presentation of the work by the student in a seminar format, and responses to audience and committee questions, the committee meets first with the student for any follow-up discussion and then in executive session to decide whether the student has defended the dissertation successfully.

The committee's decision is then announced to the student. If the committee's vote is favorable, the student incorporates committee suggestions and corrections, if applicable, and the dissertation is signed and passed on to the department's director of graduate studies. Requests for a second defense are highly irregular but may be permitted in the event that the previous oral defense was judged by the committee to be highly promising but inadequate in one critical aspect.

### **Deadline**

The final dissertation must be written, defended, and approved at least two weeks before the university commencement deadline. Students must submit signed copies of their dissertations to the website designated by the university and must abide by any embargo sanctioned by the student's principal dissertation advisor and/or dissertation committee. The students should apply for graduation before the final dissertation defense, on the assumption that the dissertation will be approved. If the dissertation committee decides that more time is required to complete the dissertation beyond the commencement date, then the application for graduation can be withdrawn and a new one submitted pending final dissertation approval.

### **SOPPS PROFESSIONAL CODE OF CONDUCT**

All SOPPS students (BSPS, Preprofessional, MS, and PhD) are expected to adhere to the Code of Conduct (<https://bouve.northeastern.edu/assets/uploads/sites/5/2021/10/northeastern-school-of-pharmacy-code-of-professional-conduct-2021.pdf>).

Please visit Bouvé College of Health Sciences Program Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

**Total Hours: 30**

- <sup>1</sup> Scientific Writing: Thesis Proposal (PHSC 7020) must be taken the summer before the qualifying exams.  
<sup>2</sup> Doctoral Proposal (PHSC 9681) should be taken in summer of second year, but no later than fall of third year.  
<sup>3</sup> Pharmaceutical Science Colloquium (PHSC 6810) must be taken six months before dissertation defense.  
<sup>4</sup> PHSC 5305 & PHSC 6213 are suggested to be taken in the fourth year, but can be taken at any point before graduation.

## Sample Plan - Advanced Entry

**Total Hours: 10**

- <sup>1</sup> Doctoral Proposal (PHSC 9681 (<https://catalog.northeastern.edu/search/?P=PHSC%209681>)) may be taken in spring of first year but must be taken before fall of second year.  
<sup>2</sup> Pharmaceutical Science Colloquium (PHSC 6810 (<https://catalog.northeastern.edu/search/?P=PHSC%206810>)) must be taken six months before dissertation defense.

## Advanced Entry Program Requirements

Advanced entry into the PhD in Pharmacology requires a master's degree in pharmaceutical sciences or a related area and focuses on various advanced research courses and successful defense of the dissertation. An applicant's transcripts are required to be reviewed by the admissions committee to ensure they are eligible to be in the advanced entry program.

Complete all courses and requirements listed below unless otherwise indicated.

### Milestones

Annual review  
 Qualifying examination  
 Dissertation committee  
 Dissertation proposal

Dissertation defense

**Core Requirements**

A grade of C- or higher is required in each course.

Code	Title	Hours
<b>Required</b>		
PHSC 6213	Ethical Problems in Health Sciences Research	2
<b>Seminar</b>		
Complete the following repeatable course four times:		4
PHSC 6300	Pharmaceutical Science Seminar	
<b>Colloquium</b>		
PHSC 6810	Pharmaceutical Science Colloquium	1

**Research & Dissertation**

## Pharmacy, PharmD

Program requirements that follow relate to the final year of the six-year Doctor of Pharmacy (PharmD) program only. For information regarding years one through five of this program, please see the *Undergraduate Catalog* Doctor of Pharmacy (Pharmacy, PharmD) webpage.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Core Requirements

Code	Title	Hours
Complete 36 semester hours in the following range:		36
PHMD 6440 to PHMD 6474		

### Program Credit/GPA Requirements

36 total semester hours required

Minimum 3.000 GPA required

## Pharmacy, PharmD—Direct Entry

The School of Pharmacy and Pharmaceutical Sciences offers the Doctor of Pharmacy degree (PharmD). The direct-entry admission pathway for this program requires that students complete a BS or BA from an accredited institution with a preferred prerequisite grade-point average of 3.000. Only grades of C (2.000) or higher are acceptable to fulfill a prerequisite course. The following prerequisite courses and credits are required:

Requirements	Credits
Chemistry 1 and 2 (1 lab)	7
General biology 1 and 2 (1 lab)	7
Calculus	3
Organic chemistry 1 and 2 (w/labs)	8
Biochemistry	3
Human physiology 1 and 2	8
Physics	3
Arts/humanities/social studies	4

Direct entry into the first professional year of the PharmD program offers students a four-year graduate course of study that fully integrates campus-based learning with experiential learning, including the university's signature cooperative education program, to provide students with the knowledge, skills, and abilities necessary to succeed in the pharmacy profession. Our students promote and ensure the safe and effective use of drugs and provide medication therapy management services. In addition to preparing and dispensing prescribed medications, our students provide information to patients about medications and their uses; advise physicians, other prescribers, and other healthcare practitioners on medication selection, dosages, interactions, and adverse effects; and monitor patient responses to drug therapy.

Our students are well equipped to provide patient care services in a variety of settings. Most of our graduates work in community pharmacies or in healthcare facilities such as hospitals and ambulatory clinics. Additional practice opportunities exist in health maintenance organizations, private practice groups, long-term-care facilities, home healthcare, the Public Health Service, the armed services, and law enforcement and regulatory agencies such as the Federal Drug Administration or Drug Enforcement Administration. Graduates may also find employment in drug development, marketing and research within the pharmaceutical industry, colleges of pharmacy, and professional association management. In addition, many of our graduates go on to pharmacy practice residencies, fellowships, and leading graduate programs.

PharmD students are admitted with the expectation that by working with faculty, staff, and each other, they will develop the knowledge, skills, and attitudes necessary for academic and professional success. Students follow academic progression plans for their respective years of graduation. Any deviation from the prescribed curriculum will require faculty/staff permission and an approved plan of study from the SOPPS Academic Standing Committee.

The curriculum includes both Introductory Pharmacy Practice Experiences (fulfilled with co-op) and Advanced Pharmacy Practice Experiences. These pharmacy practice experiences are provided primarily under the direct supervision of qualified pharmacist preceptors and occasionally with other qualified healthcare professionals. The school is affiliated with many world-class practice sites throughout the United States, providing students with access to experienced clinicians and scholars. Although every effort is made to accommodate individual circumstances and requests, students should be prepared to travel outside the Boston area to complete some of their pharmacy practice experiences. Availability of a car may be required, as some sites are not accessible by public transportation. All expenses associated with pharmacy practice experiences, including travel and housing, are the responsibility of the student.

IPPEs are competitive placements that are based on job availability in a geographic region. The placements are facilitated by SOPPS cooperative education coordinators. Students are required to earn satisfactory (S) grades on one IPPE in a community setting and on one IPPE in an institutional/hospital practice setting.

APPE placements are provided based on site/preceptor availability and the final approval of the SOPPS Office of Experiential and Continuing Profession Education. Students may be able to petition the OECPE for out-of-system APPEs; however, availability for such requests is limited.

To be eligible for a PharmD, a student must successfully complete all courses in the curriculum, including the IPPEs/co-op and APPEs; meet the academic progression standards of the program; meet the technical standards of the program; and satisfy all other requirements as stated. The pharmacy program is fully accredited by the Accreditation Council for Pharmacy Education (<https://www.acpe-accredit.org/>) and adheres to the standards established by ACPE.

Pharmacy graduates must meet specific requirements to qualify for professional licensure in the state where they plan to practice as a registered pharmacist. These requirements include graduating from an accredited school of pharmacy, passing national and state board examinations, and completing internship hours. The internship is a period of practical experience conducted under the supervision of a registered pharmacist. Massachusetts requires 1,500 internship hours, all of which are satisfied through completion of IPPEs (co-op) and APPEs.

Professional and/or legal exigencies arise from time to time, which may necessitate changes in a pharmacy course, progression, and/or graduation requirements. Students should review their status with academic advisors on a timely basis and refer to current publications for updated information.

## Requirements for the PharmD Pharmacy Practice Experiences

Requirements for the successful completion of the PharmD PPEs include:

1. Evidence of health clearance from University Health and Counseling Services before placements at any PPE site.
2. Satisfactory completion of any additional site-specific requirements including, but not limited to, criminal record information (CORI), urine drug screens, and verification of immunization status. All fees associated with these requirements are the responsibility of the student.

### Management of Positive Urine Drug Screens

If the student learns the urine drug screen (test #1) is positive, the student will notify the OEE ([pharmacyoe@northeastern.edu](mailto:pharmacyoe@northeastern.edu)) and immediately complete a second urine screen (test #2). A professional concern form will be completed based on test #1 results.

If urine screen test #2 is negative (-), the student will be allowed to continue the PPEs. However, the student will be asked to complete a random urine screen (test #3) at a time determined by the OEE. If this urine screen (test #3) is positive (+), the student will be administratively removed from the active PPEs and graduation may be delayed. A second professional concern form will be completed, based on test #3 results. The return to PPEs will occur once a repeat urine test is negative. That repeat negative test will be followed up by a random urine screen at a time determined by the OEE.

If the urine screen (test #2) is positive (+), the student will be administratively removed from the PPEs and graduation may be delayed. The return to PPEs will occur once a repeat urine screen is negative. That negative screen will be followed up by a random urine screen at a time determined by the OEE. A second professional concern form will be completed based on a positive test #3 result.

3. Adherence to the school's code of professional conduct and university's code of conduct policies while off-campus.
4. Maintenance of an active pharmacy intern license in every state where the student completes an experience.
5. Compliance with site-specific requirements (via site descriptions) and completion of site requests within specified deadlines. Students who fail to complete these requirements as directed will likely incur grade penalties and may experience a delay of graduation or dismissal from the pharmacy program.

### **PROGRAM POLICIES**

Students are expected to adhere to the policies and standards of their program major as stated to progress through their curriculum as planned. Students seeking any exceptions to the program policies and standards specified for their program major must present a petition before the SOPPS Academic Standing Committee.

Given programmatic requirements, coupled with concerns over the loss of therapeutic knowledge, requests for a General Leave of Absence (<http://catalog.northeastern.edu/graduate/academic-policies-procedures/policies/>), other than Medical or Emergency Leave of Absence:

- Must comply with all stated Northeastern general policies, regardless of the academic year.
- May be made at any time period during the P1 or P2 years.
- During the P3 academic year, any request for a general leave must be made no later than February 1 of the given academic year. Requests after this date will not be permitted.
- During the P4 academic year, requests for a general leave cannot be made at any time.

SOPPS—Professional Code of Conduct (<https://bouve.northeastern.edu/assets/uploads/sites/5/2021/10/northeastern-school-of-pharmacy-code-of-professional-conduct-2021.pdf>)

Preprofessional and professional-year students are expected to adhere to the Code of Professional Conduct. (<https://bouve.northeastern.edu/assets/uploads/sites/5/2014/08/sop-code-professional-conduct.pdf>)

Students are eligible to begin APPEs following successful completion of all didactic coursework. Completing didactic coursework during P4 year is prohibited.

### **TECHNICAL STANDARDS FOR THE DOCTOR OF PHARMACY PROGRAM**

The PharmD program at Northeastern is a rigorous and challenging academic program that requires students to possess specific characteristics and abilities within the cognitive, affective, and psychomotor domains, referred to here as technical standards. To successfully progress in and ultimately complete the didactic, laboratory, and experiential components of the PharmD program, students must meet the standards described below.

#### ***Intellectual Abilities***

Students must have well-developed problem-solving and critical-thinking skills. Cognitive function must be appropriate to integrate, evaluate, and apply information gained through measurement, analysis, calculation, and reasoning. Students must have the capacity to learn efficiently in classroom, laboratory, small group and experiential settings, and through independent study. Students are required to demonstrate the ability to integrate course content knowledge with clinical practice applications to optimize medication therapy management.

**Communication Skills**

Students must be able to communicate effectively with colleagues, professors, patients, families, and healthcare providers. This includes efficiently comprehending, speaking, reading, and writing in English. Students must be able to process and use appropriate nonverbal cues and be proficient in the use of electronic communication media.

**Behavioral and Social Attributes**

Students must demonstrate professionalism, maturity, integrity, honesty, compassion, and respect when relating to others. Students must have sufficient mental and emotional health to complete work and responsibilities using good judgment. Students must be able to tolerate and adapt to stressful workloads and situations and modify behavior based on constructive criticism. Students must be able to function in accordance with the legal, ethical, and professional standards of practice.

**Observation and Motor Skills**

Students must have functional use of visual, auditory, and tactile senses. Students must be able to observe and perform experiments, physical assessments, patient interviews, and medication order processing. Students must be able to distinguish physical characteristics of medications by inspection. Students must have coordination of gross and fine muscular movements sufficient to perform pharmacy-related tasks including compounding and dispensing medications, administering medications, and using computers and other technology necessary for learning and professional practice.

**ACADEMIC DISMISSAL FROM MAJOR**

PharmD students in the Bouvé College of Health Sciences will be dismissed from their major effective the following academic semester for any of the reasons noted below:

- Failure to earn a grade of C or better in three professional courses, regardless of remediation. Within the PharmD program, each specific professional course (with separate registration number) will be counted as a separate failure even if content is related.
- Failure to earn the minimum required grade in the same course twice.
- Failure to maintain a GPA of 3.000 after one semester of probation.
- The expected graduation date may not change more than twice.

The PharmD program monitors and promotes the development of professional behaviors in its students in order to ensure appropriate professionalism in the classroom, local and global communities, and clinical settings. Breach of adherence to these standards may result in dismissal from the program.

**ACADEMIC APPEALS**

Students who believe that they were erroneously, capriciously, or otherwise unfairly treated in an academic or cooperative education decision may petition to appeal the decision. Refer to the Bouvé College of Health Sciences Academic Affairs Appeals Process (p. 579) and the Northeastern University Academic Appeals Policies and Procedures (<http://catalog.northeastern.edu/undergraduate/academic-policies-procedures/academic-appeals-policies-procedures/>).

**PROGRAM STUDENT LEARNING OUTCOMES**

Please visit Bouvé College Program Learning Outcomes (<https://bouve.northeastern.edu/bchs/about/learning-outcomes/>) for the specific student learning outcomes for this program.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Pharmacy Major (PharmD) Grade and Progression Requirement**

To progress into the subsequent semester of professional courses, students must receive a grade of C or better in all PHMD and PHSC courses, as well as in any course completed to fulfill the professional elective requirement.

For pharmacy students, an unsatisfactory grade (U) in a co-op will be counted as a professional course deficiency.

Students who incur an incomplete grade in a prerequisite course may not progress into the subsequent courses(s). Any exceptions will be determined by protocols established by the program, after consultation with the student's academic advisor.

## Biomedical Science, MS

The science and research surrounding human health and disease are becoming more interdisciplinary. In response to this trend, the biomedical science MS program allows students to focus on areas across the biomedical sciences to gain training in human (patho)physiology and the application of existing and potential therapeutic approaches to treat disease. The Master of Science in Biomedical Science curriculum is particularly appropriate both for those entering as well as those currently employed in the field, including research technicians, clinical laboratory workers, science teachers, and science administrators. For those currently employed, the program can enhance performance in a present position or open new employment opportunities. Graduates of the program will be well prepared to enter related PhD programs at the university.

### Curriculum Requirements

All MS programs in the Department of Pharmaceutical Sciences require a set of core courses taken by every MS student, regardless of program. In addition, students in each program are required to take a defined set of discipline-specific courses and several general electives. The number of specialized and elective courses differs somewhat among programs. The MS degree may be completed on either a full-time or part-time basis and may include an optional research thesis. International students are required to attend the program on a full-time basis.

### Internship Requirements and Regulations for Department of Pharmaceutical Sciences

Internships provide an experiential component of the graduate curriculum that fosters professional development through work in industry and hospitals.

1. In order to participate in an internship, students must complete two semesters with a grade-point average of 3.200 or better; be in good academic and professional standing (i.e., have no Professionalism Concern forms (<https://bouve.northeastern.edu/assets/uploads/sites/5/2015/03/professionalism-concern-form.pdf>) filed); and have no instances of academic dishonesty or blocks on enrollment.
2. In order to be eligible for internship, students must take the Professional Development for Pharmaceutical Sciences (PHSC 5305) course in either the fall or spring semester of their first year.
3. Students are in school full-time in addition to working on their internships.
4. There are no vacations on co-op/internships. Companies' sick time policies may vary. Students should check with their employers.
5. Students are responsible for finding their own internship and must be honest and accurate representing their experiences on their resumé. Prior to looking for an internship, students must have their faculty advisor approve their resumé and ascertain to the best of their ability that the skills and training of students are as presented.
6. Students must not accept more than one position. They must honor the first offer accepted.
7. In order to receive a grade for the course, students must write at least two learning goals and a paper describing what they learned, mid- and end of semester. Supervisors for internships will reply to a questionnaire about students' performance.
8. International students must register for Pharmaceutical Science Internship (PHSC 6401) and follow instructions to receive Curricular Practical Training authorization from the Office of Global Services every semester they work. This applies to part-time jobs and volunteer opportunities. International students cannot engage in full-time CPT authorization totaling more than 52 weeks. Doing so will eliminate the possibility of engaging in the postgraduation benefit of Post-Completion Optional Practical Training.
9. Students receive 1 academic credit per semester for Pharmaceutical Science Internship (PHSC 6401). If students want to do an internship for a fourth semester they may do so, but students will only receive a maximum of 3 credits for Pharmaceutical Science Internship (PHSC 6401). The 4th credit for Pharmaceutical Science Internship (PHSC 6401) will not be added to the student's degree.
10. Taking internship must not extend international students' visas.

### General Policies Common to all MS Programs in the Department of Pharmaceutical Sciences

#### GRADING POLICY

Students are expected to maintain a GPA of 3.000 (B) or higher in all coursework. Students whose cumulative GPA falls below 3.000 will receive written notification from the Bouvé Office of Graduate Student Services that they have been placed on academic probation. A student must clear the deficiency and return to nonprobationary status within one semester, unless the course that must be retaken is not offered during the probationary semester. In such a case, the course to be retaken must be completed during the next semester that it is offered, and the GPA must be restored to at least 3.000. Failure to remediate the deficiencies and return to nonprobationary status within the established time limit will result in dismissal from the MS program. Refer to the Bouvé College of Health Sciences policy on Academic Dismissal (p. 581) and Academic Probation Policy (p. 582) for full details.

#### PROGRESSION REQUIREMENT

Bouvé College of Health Sciences policy specifies that students register for coursework or continuation credit each semester of the academic year (fall and spring semesters) after they are matriculated as full- or part-time students. Moreover, international students are required to maintain full-time student status during each academic term; consult the Office of Global Services (<https://international.northeastern.edu/ogs/>) for specific requirements. Domestic students who are not able to register for courses during a particular semester must petition the director of graduate studies in the department for exemption in writing and state the reasons for the exemption and their plan for resuming their studies. Approval of the petition will preserve student status in the MS program.

All MS students are expected to complete the degree requirements within two years if enrolled on a full-time basis, or within three to five years if enrolled on a part-time basis. If progress toward the degree is slowed or interrupted for personal reasons, the student so affected must petition the School of Pharmacy and Pharmaceutical Sciences Academic Standing Committee for an extension, detailing the anticipated time to completion. If

an extension is approved, the student will be directed to meet with the graduate program director to devise a formal plan to achieve completion of the degree.

Course credits earned in the Bouvé College of Health Sciences Graduate School or accepted for transfer from another institution and not applied to obtain a previous degree are valid for a maximum of seven years. Refer to the Bouvé College of Health Sciences Academic Progression policies and procedures (p. 583) for details.

### **ACADEMIC HONESTY AND RESEARCH INTEGRITY**

The Department of Pharmaceutical Sciences has a zero-tolerance policy regarding academic dishonesty and violations of research integrity. It is each student's responsibility to understand and adhere to the School of Pharmacy and Pharmaceutical Sciences Code of Professional Conduct (<https://bouve.northeastern.edu/assets/uploads/sites/5/2021/10/northeastern-school-of-pharmacy-code-of-professional-conduct-2021.pdf>) and to Northeastern University's Academic Integrity Policy (<http://www.northeastern.edu/osccr/academic-integrity-policy/>). Definitions of plagiarism, cheating, fabrication, falsification, unauthorized collaboration, and actions that facilitate academic or research dishonesty can be found on the Office of Student Conduct and Conflict Resolution website (<http://www.northeastern.edu/osccr/>). The lack of knowledge of these definitions does not excuse the student's responsibility for upholding them. Offenses of academic honesty and research integrity are egregious violations of ethical standards and may result in disciplinary actions, including the student's immediate dismissal from the graduate program.

### **SCHOOL OF PHARMACY AND PHARMACEUTICAL SCIENCES PROFESSIONAL CODE OF CONDUCT**

All SOPPS students (BS Pharmaceutical Sciences, Preprofessional, MS, and PhD) are expected to adhere to the SOPPS Code of Professional Conduct.

### **MASTER OF SCIENCE THESIS OPTION**

Students who undertake a thesis are expected to report the results of extended research in a written thesis document and make an original contribution to their field. This work should give evidence of the students' abilities to conduct independent research and interpret their research results in an acceptable manner. Arrangements are made by students interested in the thesis option with individual laboratory directors as to the availability of MS-student research positions and the specific research focus.

#### ***Thesis Registration***

Students may receive a maximum of 4 semester hours of credit for MS thesis research. Students should register for Thesis (PHSC 6990), twice for 2 SH each during the fall and spring semesters of their second full year of study, or after completing 15 credits of study. If completion of the thesis requires additional time, students should register for Thesis Continuation (PHSC 6996)(0 SH).

#### ***Thesis Committee***

Each student's thesis committee should be composed of at least three members: two from the sponsoring program and one from outside the student's program. The outside member may be a Northeastern faculty member. The director of graduate studies for the pharmaceutical sciences department may appoint additional members, as considered necessary for student development. The student's major advisor, in whose laboratory the research is being conducted, will serve as committee chairperson. The student, after consulting with the committee chair, is responsible for calling all thesis committee meetings.

#### ***Thesis Proposal***

The thesis proposal should be no more than 50 double-spaced pages (12-point font minimum and one-half-inch margins on all sides). This page limit excludes references but includes figures, figure legends, and tables. Aside from these exceptions, the proposal should conform to the format and structure of an NIH grant proposal with four sections: specific aims, background and significance, preliminary studies, and experimental design and methods. See the Department of Pharmaceutical Sciences "Thesis Proposal" document for detailed instructions on the preparation of a thesis proposal and the required forms located in the School of Pharmacy and Pharmaceutical Sciences Student Portal on Canvas in the module section.

The thesis proposal must be defended orally before the thesis committee and signed by all thesis committee members before the student undertakes the planned research. The signed cover page of the proposal should be submitted to the director of graduate studies, pharmaceutical sciences department, and to the Bouvé College of Health Sciences Graduate Office.

#### ***Thesis Final Defense***

The final defense is taken after the student completes the thesis research and all other requirements for the MS degree. The defense deals with the subject matter of the thesis, significant developments in the field, and student's background knowledge in their field of specialization. The thesis committee conducts the final defense.

At least two weeks prior to the expected date of the oral defense, the written thesis must be circulated to the student's thesis committee. After initial committee evaluation, recommendation may be made that the student clarify or rewrite portions of the thesis before scheduling the final defense. After the thesis committee concurs that the thesis is acceptable, a date is chosen for the final oral examination. At least two weeks prior to the defense, the student should inform the director of graduate studies in the pharmaceutical sciences department so that an announcement can be distributed to faculty and students. The final defense is open to anyone who wishes to attend and typically lasts at least two hours. After presentation of the work by the student, and responses to audience and committee questions, the student's committee meets in executive session to decide whether the student has successfully defended the thesis. The committee's decision is then announced to the student. If the committee's vote is favorable, the student incorporates committee suggestions and the thesis is signed off and passed on to the director of graduate studies in the department. Requests for a second defense are unusual but may be permitted if the original oral defense was judged significantly inadequate.

**Thesis Deadline**

The thesis should be written, defended, and signed at least two weeks before the university commencement deadline. Students must submit signed copies of the thesis to the online site designated by the university.

Please visit Bouvé College of Health Sciences Program Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Core Requirements**

A grade of C– or higher is required in each course.

Code	Title	Hours
<b>Required Core</b>		
PHSC 5100	Concepts in Pharmaceutical Science	2
PHSC 5102	Concepts in Pharmaceutical Science 2	2
PHSC 5212	Research Skills and Ethics	2
or PHSC 6213	Ethical Problems in Health Sciences Research	
PHSC 5300	Pharmaceutical Biochemistry <sup>1</sup>	2 or 4
or PHSC 7010	Pharmaceutical Sciences Laboratory	
PHSC 5310	Cellular Physiology	2
PHSC 6214	Experimental Design and Biostatistics	2
PHSC 6216	Human Physiology and Pathophysiology	2

**Electives**

Code	Title	Hours
Complete 17–19 semester hours in the following subject areas: <sup>1</sup>		17-19
PHSC, PMCL, PMST, BIOL, CHEM, NNMD, BIOT		

**Thesis Option**

Thesis credits may count toward the required elective hours.

Code	Title	Hours
Complete the following (repeatable) course twice:		4
PHSC 6990	Thesis	2
The following course may be taken if additional time is needed to complete the thesis:		
PHSC 6996	Thesis Continuation	

<sup>1</sup> Students who opt to complete 4-credit Pharmaceutical Sciences Laboratory (PHSC 7010) in the core requirements may complete the degree with 17 elective credits; all other students must complete 19 elective credits.

**Program Credit/GPA Requirements**

33 total semester hours required

Minimum 3.000 GPA required

## Medicinal Chemistry and Drug Discovery, MS

The Medicinal Chemistry & Drug Discovery MS program integrates aspects of contemporary medicinal chemistry and pharmacology, emphasizing topics most relevant to therapeutics design, discovery, and action. The core curriculum focuses on a combination of synthetic organic chemistry, bioorganic chemistry, analytical chemistry, and pharmacology courses. Specialized, in-depth electives are offered in these areas. The program is designed to develop students' knowledge of medicinal chemistry through design, synthesis, and pharmacological profiling of novel pharmacotherapeutics as applied to helping solve unmet medical needs. For this purpose, many program graduates have established research careers in the pharmaceutical/biotech industry. Undergraduate prerequisites are general chemistry, organic chemistry, and biochemistry or cell/molecular biology.

### Curriculum Requirements

All MS programs in the Department of Pharmaceutical Sciences require a set of core courses taken by every MS student, regardless of program. In addition, students in each program are required to take a defined set of discipline-specific courses and several general electives. The number of specialized and elective courses differs somewhat among programs. The MS degree may be completed on either a full-time or part-time basis and may include an optional research thesis. International students are required to attend the program on a full-time basis.

### Internship Requirements and Regulations for Department of Pharmaceutical Sciences

Internships provide an experiential component of the graduate curriculum that fosters professional development through work in industry and hospitals.

1. In order to participate in an internship, students must complete two semesters with a grade-point average of 3.200 or better; be in good academic and professional standing (i.e., have no Professionalism Concern forms (<https://bouve.northeastern.edu/assets/uploads/sites/5/2015/03/professionalism-concern-form.pdf>) filed); and have no instances of academic dishonesty or blocks on enrollment.
2. In order to be eligible for internship, students must take the Professional Development for Pharmaceutical Sciences (PHSC 5305) course in either the fall or spring semester of their first year.
3. Students are in school full-time in addition to working on their internships.
4. There are no vacations on co-op/internships. Companies' sick time policies may vary. Students should check with their employers.
5. Students are responsible for finding their own internship and must be honest and accurate representing their experiences on their resumé. Prior to looking for an internship, students must have their faculty advisor approve their resumé and ascertain to the best of their ability that the skills and training of students are as presented.
6. Students must not accept more than one position. They must honor the first offer accepted.
7. In order to receive a grade for the course, students must write at least two learning goals and a paper describing what they learned, mid- and end of semester. Supervisors for internships will reply to a questionnaire about students' performance.
8. International students must register for Pharmaceutical Science Internship (PHSC 6401) and follow instructions to receive Curricular Practical Training authorization from the Office of Global Services every semester they work. This applies to part-time jobs and volunteer opportunities. International students cannot engage in full-time CPT authorization totaling more than 52 weeks. Doing so will eliminate the possibility of engaging in the postgraduation benefit of Post-Completion Optional Practical Training.
9. Students receive 1 academic credit per semester for Pharmaceutical Science Internship (PHSC 6401). If students want to do an internship for a fourth semester they may do so, but students will only receive a maximum of 3 credits for Pharmaceutical Science Internship (PHSC 6401). The 4th credit for Pharmaceutical Science Internship (PHSC 6401) will not be added to the student's degree.
10. Taking internship must not extend international students' visas.

### General Policies Common to all MS Programs in the Department of Pharmaceutical Sciences

#### GRADING POLICY

Students are expected to maintain a GPA of 3.000 (B) or higher in all coursework. Students whose cumulative GPA falls below 3.000 will receive written notification from the Bouvé Office of Graduate Student Services that they have been placed on academic probation. A student must clear the deficiency and return to nonprobationary status within one semester, unless the course that must be retaken is not offered during the probationary semester. In such a case, the course to be retaken must be completed during the next semester that it is offered, and the GPA must be restored to at least 3.000. Failure to remediate the deficiencies and return to nonprobationary status within the established time limit will result in dismissal from the MS program. Refer to the Bouvé College of Health Sciences policy on Academic Dismissal (p. 581) and Academic Probation Policy (p. 582) for full details.

#### PROGRESSION REQUIREMENT

Bouvé College of Health Sciences policy specifies that students register for coursework or continuation credit each semester of the academic year (fall and spring semesters) after they are matriculated as full- or part-time students. Moreover, international students are required to maintain full-time student status during each academic term; consult the Office of Global Services (<https://international.northeastern.edu/ogs/>) for specific requirements. Domestic students who are not able to register for courses during a particular semester must petition the director of graduate studies in the department for exemption in writing and state the reasons for the exemption and their plan for resuming their studies. Approval of the petition will preserve student status in the MS program.

All MS students are expected to complete the degree requirements within two years if enrolled on a full-time basis, or within three to five years if enrolled on a part-time basis. If progress toward the degree is slowed or interrupted for personal reasons, the student so affected must petition the

School of Pharmacy and Pharmaceutical Sciences Academic Standing Committee for an extension, detailing the anticipated time to completion. If an extension is approved, the student will be directed to meet with the graduate program director to devise a formal plan to achieve completion of the degree.

Course credits earned in the Bouvé College of Health Sciences Graduate School or accepted for transfer from another institution and not applied to obtain a previous degree are valid for a maximum of seven years. Refer to the Bouvé College of Health Sciences Academic Progression policies and procedures (p. 583) for details.

### **ACADEMIC HONESTY AND RESEARCH INTEGRITY**

The Department of Pharmaceutical Sciences has a zero-tolerance policy regarding academic dishonesty and violations of research integrity. It is each student's responsibility to understand and adhere to the School of Pharmacy and Pharmaceutical Sciences Code of Professional Conduct (<https://bouve.northeastern.edu/assets/uploads/sites/5/2021/10/northeastern-school-of-pharmacy-code-of-professional-conduct-2021.pdf>) and to Northeastern University's Academic Integrity Policy (<http://www.northeastern.edu/osccr/academic-integrity-policy/>). Definitions of plagiarism, cheating, fabrication, falsification, unauthorized collaboration, and actions that facilitate academic or research dishonesty can be found on the Office of Student Conduct and Conflict Resolution website (<http://www.northeastern.edu/osccr/>). The lack of knowledge of these definitions does not excuse the student's responsibility for upholding them. Offenses of academic honesty and research integrity are egregious violations of ethical standards and may result in disciplinary actions, including the student's immediate dismissal from the graduate program.

### **SCHOOL OF PHARMACY AND PHARMACEUTICAL SCIENCES PROFESSIONAL CODE OF CONDUCT**

All SOPPS students (BS Pharmaceutical Sciences, Preprofessional, MS, and PhD) are expected to adhere to the SOPPS Code of Professional Conduct.

### **MASTER OF SCIENCE THESIS OPTION**

Students who undertake a thesis are expected to report the results of extended research in a written thesis document and make an original contribution to their field. This work should give evidence of the students' abilities to conduct independent research and interpret their research results in an acceptable manner. Arrangements are made by students interested in the thesis option with individual laboratory directors as to the availability of MS-student research positions and the specific research focus.

#### ***Thesis Registration***

Students may receive a maximum of 4 semester hours of credit for MS thesis research. Students should register for Thesis (PHSC 6990), twice for 2 SH each during the fall and spring semesters of their second full year of study, or after completing 15 credits of study. If completion of the thesis requires additional time, students should register for Thesis Continuation (PHSC 6996)(0 SH).

#### ***Thesis Committee***

Each student's thesis committee should be composed of at least three members: two from the sponsoring program and one from outside the student's program. The outside member may be a Northeastern faculty member. The director of graduate studies for the pharmaceutical sciences department may appoint additional members, as considered necessary for student development. The student's major advisor, in whose laboratory the research is being conducted, will serve as committee chairperson. The student, after consulting with the committee chair, is responsible for calling all thesis committee meetings.

#### ***Thesis Proposal***

The thesis proposal should be no more than 50 double-spaced pages (12-point font minimum and one-half-inch margins on all sides). This page limit excludes references but includes figures, figure legends, and tables. Aside from these exceptions, the proposal should conform to the format and structure of an NIH grant proposal with four sections: specific aims, background and significance, preliminary studies, and experimental design and methods. See the Department of Pharmaceutical Sciences "Thesis Proposal" document for detailed instructions on the preparation of a thesis proposal and the required forms located in the School of Pharmacy and Pharmaceutical Sciences Student Portal on Canvas in the module section.

The thesis proposal must be defended orally before the thesis committee and signed by all thesis committee members before the student undertakes the planned research. The signed cover page of the proposal should be submitted to the director of graduate studies, pharmaceutical sciences department, and to the Bouvé College of Health Sciences Graduate Office.

#### ***Thesis Final Defense***

The final defense is taken after the student completes the thesis research and all other requirements for the MS degree. The defense deals with the subject matter of the thesis, significant developments in the field, and student's background knowledge in their field of specialization. The thesis committee conducts the final defense.

At least two weeks prior to the expected date of the oral defense, the written thesis must be circulated to the student's thesis committee. After initial committee evaluation, recommendation may be made that the student clarify or rewrite portions of the thesis before scheduling the final defense. After the thesis committee concurs that the thesis is acceptable, a date is chosen for the final oral examination. At least two weeks prior to the defense, the student should inform the director of graduate studies in the pharmaceutical sciences department so that an announcement can be distributed to faculty and students. The final defense is open to anyone who wishes to attend and typically lasts at least two hours. After presentation of the work by the student, and responses to audience and committee questions, the student's committee meets in executive session to decide whether the student has successfully defended the thesis. The committee's decision is then announced to the student. If the committee's vote is favorable, the student incorporates committee suggestions and the thesis is signed off and passed on to the director of graduate studies in the department. Requests for a second defense are unusual but may be permitted if the original oral defense was judged significantly inadequate.

**Thesis Deadline**

The thesis should be written, defended, and signed at least two weeks before the university commencement deadline. Students must submit signed copies of the thesis to the online site designated by the university.

Please visit Bouvé College of Health Sciences Program Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Core Requirements**

A grade of C- or higher is required in each course.

Code	Title	Hours
<b>Required Core</b>		
PHSC 5100	Concepts in Pharmaceutical Science	2
PHSC 5102	Concepts in Pharmaceutical Science 2	2
PHSC 5212	Research Skills and Ethics	2
or PHSC 6213	Ethical Problems in Health Sciences Research	
<b>Medicinal Chemistry &amp; Drug Discovery</b>		
CHEM 5626	Organic Synthesis 1	3
CHEM 5628	Principles of Spectroscopy of Organic Compounds	3
CHEM 5672	Organic Synthesis 2	3
CHEM 5676	Bioorganic Chemistry	3
PHSC 5400	Principles of Drug Design	3
PHSC 6222	The Chemistry and Biology of Drugs of Abuse	2
PHSC 6224	Behavioral Pharmacology and Drug Discovery	2
PHSC 6290	Biophysical Methods in Drug Discovery	2

**Electives**

Code	Title	Hours
Complete 6 semester hours in the following subject areas:		6
BIOL, BIOT, CHEM, NNMD, PHSC, PMCL, PMST		

**Thesis Option**

Thesis credits may count toward the required elective hours.

Code	Title	Hours
Thesis research should be taken twice.		4
PHSC 6990	Thesis	2
Thesis continuation may be taken if additional time is needed to complete the thesis.		
PHSC 6996	Thesis Continuation

33 total semester hours required

Minimum 3.000 GPA required

## Pharmaceutical Engineering, MS

The Master of Science in Pharmaceutical Engineering is offered jointly by Northeastern University's College of Engineering and Bouvé College of Health Sciences. The program prepares students with a fundamental understanding of pharmaceutical sciences and principles of engineering to develop the depth needed for advanced study of pharmaceutical engineering.

This program is generally pursued by students with a Bachelor of Science in Chemical Engineering or closely allied fields in engineering, sciences, or mathematics. The program was designed in collaboration with the Department of Pharmaceutical Sciences to develop the depth needed for advanced study of pharmaceutical engineering. Students wishing to pursue the master's degree with undergraduate educational backgrounds other than engineering are required to demonstrate completion of mathematics coursework through differential equations or the equivalent to be admitted. Students are advised to work closely with their advisors and instructors to determine the electives that would meet their career goals.

### Part-Time Students

Part-time students may progress according to their plans and time constraints but within the seven-year time limit.

Master of Science students wishing to change their status from part time to full time must notify the chemical engineering department and make a formal petition to the Graduate School of Engineering. Refer to the regulations of the Graduate School of Engineering for further information on academic administrative policies.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
CHME 7600	Pharmaceutical Engineering I	4
CHME 7601	Pharmaceutical Engineering II	4
CHME 7602	Pharmaceutical Engineering Laboratory	2
PHSC 5100	Concepts in Pharmaceutical Science	2
PHSC 5102	Concepts in Pharmaceutical Science 2	2
PHSC 7010	Pharmaceutical Sciences Laboratory	4

#### Restricted Elective Courses

Code	Title	Hours
At least 3 semester hours of total elective courses are required from pharmaceutical sciences (PHSC, PMST) and from chemical engineering (CHME). These semester hours could come from any elective group, as appropriate.		

#### Regulatory

Complete 3 semester hours from the following:		3
BIOT 5340	Introduction to Biotherapeutic Approvals	
BIOT 5500	Concepts in Regulatory Science	
BIOT 6320	Quality Management Systems and Validation	
RGA 6000	Introduction to Food and Drug Administration (FDA) Pharmaceutical Regulation	
RGA 6002	Introduction to Regulatory Compliance and Practice	

#### Quality/Statistics

Complete 4 semester hours from the following:		4
CHME 5185	Design of Experiments and Ethical Research (DOEER)	
IE 6200	Engineering Probability and Statistics	
IE 7280	Statistical Methods in Engineering	
IE 7285	Statistical Quality Control	
PHSC 6214	Experimental Design and Biostatistics	

#### Depth Electives

Complete 7 semester hours from the following:		7
BIOT 5330	Drug Safety and Immunogenicity	
BIOT 6300	Pharmaceutical Microbiology	
BIOT 6340	Sterile Manufacturing Operations	
BIOT 7250	Advanced Biotechnology Applications Laboratory	
CHME 5101	Fundamentals of Chemical Engineering Analysis	
CHME 5160	Drug Delivery: Engineering Analysis	

CHME 5179	Complex Fluids and Everyday Materials
CHME 5185	Design of Experiments and Ethical Research (DOEER)
CHME 5631	Biomaterials Principles and Applications
CHME 5632	Advanced Topics in Biomaterials
CHME 5683	Introduction to Polymer Science
CHME 7330	Chemical Engineering Thermodynamics
CHME 7350	Transport Phenomena
PHSC 5300	Pharmaceutical Biochemistry
PHSC 5310	Cellular Physiology
PHSC 5500	Repurposing Drugs for Cancer Immunotherapies
PHSC 5555	Pharmaceutical Toxicology
PHSC 5560	Nanotoxicity
PHSC 5619	Mass Spectrometry in Drug Development
PMST 6250	Advanced Physical Pharmacy
PMST 6252	Pharmacokinetics and Drug Metabolism
PMST 6254	Advanced Drug Delivery Systems

### **Program Credit/GPA Requirements**

32 total semester hours required

Minimum 3.000 GPA required

## Pharmaceutics and Drug Delivery, MS

Just as cars are useless without roads, drugs are useless without effective delivery systems. This is especially important in contemporary pharmaceutical research, as new chemical entities may be either too hydrophobic (e.g., many anticancer drugs) or hydrophilic and highly labile (e.g., nucleic acids). The Bouvé College of Health Sciences School of Pharmacy Pharmaceutics and Drug Delivery students and faculty are developing the routes for bringing small-molecule drugs and biological therapies directly to target cells responsible for major diseases.

Our comprehensive Pharmaceutics and Drug Delivery MS program includes faculty members in pharmaceutics and drug development specializing in the use and delivery of therapeutics. The program faculty seeks to improve the understanding and description of how chemical and physical properties of drugs and dosage forms affect drug performance in healthy and diseased systems. Graduate students may choose from programs concentrating in:

- Novel drug delivery systems
- Biopharmaceutics and pharmacokinetics
- Physical pharmacy and polymeric dosage form development
- Drug metabolism

With a strong focus on nanotechnology-based advanced delivery systems that address contemporary therapeutic needs, the pharmaceutical sciences program also gives students opportunities to study with some of the world's top pharmaceutics researchers. Students in the Pharmaceutics and Drug Delivery MS program have the option of performing industrial internships (typically during the summer) in some of the most prestigious pharmaceutical and biotechnology companies in the Boston area.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

### Curriculum Requirements

All MS programs in the Department of Pharmaceutical Sciences require a set of core courses taken by every MS student, regardless of program. In addition, students in each program are required to take a defined set of discipline-specific courses and several general electives. The number of specialized and elective courses differs somewhat among programs. The MS degree may be completed on either a full-time or part-time basis and may include an optional research thesis. International students are required to attend the program on a full-time basis.

### Internship Requirements and Regulations for Department of Pharmaceutical Sciences

Internships provide an experiential component of the graduate curriculum that fosters professional development through work in industry and hospitals.

1. In order to participate in an internship, students must complete two semesters with a grade-point average of 3.200 or better; be in good academic and professional standing (i.e., have no Professionalism Concern forms (<https://bouve.northeastern.edu/assets/uploads/sites/5/2015/03/professionalism-concern-form.pdf>) filed); and have no instances of academic dishonesty or blocks on enrollment.
2. In order to be eligible for internship, students must take the Professional Development for Pharmaceutical Sciences (PHSC 5305) course in either the fall or spring semester of their first year.
3. Students are in school full-time in addition to working on their internships.
4. There are no vacations on co-op/internships. Companies' sick time policies may vary. Students should check with their employers.
5. Students are responsible for finding their own internship and must be honest and accurate representing their experiences on their resumés. Prior to looking for an internship, students must have their faculty advisor approve their resumé and ascertain to the best of their ability that the skills and training of students are as presented.
6. Students must not accept more than one position. They must honor the first offer accepted.
7. In order to receive a grade for the course, students must write at least two learning goals and a paper describing what they learned, mid- and end of semester. Supervisors for internships will reply to a questionnaire about students' performance.
8. International students must register for Pharmaceutical Science Internship (PHSC 6401) and follow instructions to receive Curricular Practical Training authorization from the Office of Global Services every semester they work. This applies to part-time jobs and volunteer opportunities. International students cannot engage in full-time CPT authorization totaling more than 52 weeks. Doing so will eliminate the possibility of engaging in the postgraduation benefit of Post-Completion Optional Practical Training.
9. Students receive 1 academic credit per semester for Pharmaceutical Science Internship (PHSC 6401). If students want to do an internship for a fourth semester they may do so, but students will only receive a maximum of 3 credits for Pharmaceutical Science Internship (PHSC 6401). The 4th credit for Pharmaceutical Science Internship (PHSC 6401) will not be added to the student's degree.
10. Taking internship must not extend international students' visas.

### General Policies Common to all MS Programs in the Department of Pharmaceutical Sciences

#### GRADING POLICY

Students are expected to maintain a GPA of 3.000 (B) or higher in all coursework. Students whose cumulative GPA falls below 3.000 will receive written notification from the Bouvé Office of Graduate Student Services that they have been placed on academic probation. A student must clear the deficiency and return to nonprobationary status within one semester, unless the course that must be retaken is not offered during the probationary

semester. In such a case, the course to be retaken must be completed during the next semester that it is offered, and the GPA must be restored to at least 3.000. Failure to remediate the deficiencies and return to nonprobationary status within the established time limit will result in dismissal from the MS program. Refer to the Bouvé College of Health Sciences policy on Academic Dismissal (p. 581) and Academic Probation Policy (p. 582) for full details.

### **PROGRESSION REQUIREMENT**

Bouvé College of Health Sciences policy specifies that students register for coursework or continuation credit each semester of the academic year (fall and spring semesters) after they are matriculated as full- or part-time students. Moreover, international students are required to maintain full-time student status during each academic term; consult the Office of Global Services (<https://international.northeastern.edu/ogs/>) for specific requirements. Domestic students who are not able to register for courses during a particular semester must petition the director of graduate studies in the department for exemption in writing and state the reasons for the exemption and their plan for resuming their studies. Approval of the petition will preserve student status in the MS program.

All MS students are expected to complete the degree requirements within two years if enrolled on a full-time basis, or within three to five years if enrolled on a part-time basis. If progress toward the degree is slowed or interrupted for personal reasons, the student so affected must petition the School of Pharmacy and Pharmaceutical Sciences Academic Standing Committee for an extension, detailing the anticipated time to completion. If an extension is approved, the student will be directed to meet with the graduate program director to devise a formal plan to achieve completion of the degree.

Course credits earned in the Bouvé College of Health Sciences Graduate School or accepted for transfer from another institution and not applied to obtain a previous degree are valid for a maximum of seven years. Refer to the Bouvé College of Health Sciences Academic Progression policies and procedures (p. 583) for details.

### **ACADEMIC HONESTY AND RESEARCH INTEGRITY**

The Department of Pharmaceutical Sciences has a zero-tolerance policy regarding academic dishonesty and violations of research integrity. It is each student's responsibility to understand and adhere to the School of Pharmacy and Pharmaceutical Sciences Code of Professional Conduct (<https://bouve.northeastern.edu/assets/uploads/sites/5/2021/10/northeastern-school-of-pharmacy-code-of-professional-conduct-2021.pdf>) and to Northeastern University's Academic Integrity Policy (<http://www.northeastern.edu/osccr/academic-integrity-policy/>). Definitions of plagiarism, cheating, fabrication, falsification, unauthorized collaboration, and actions that facilitate academic or research dishonesty can be found on the Office of Student Conduct and Conflict Resolution website (<http://www.northeastern.edu/osccr/>). The lack of knowledge of these definitions does not excuse the student's responsibility for upholding them. Offenses of academic honesty and research integrity are egregious violations of ethical standards and may result in disciplinary actions, including the student's immediate dismissal from the graduate program.

### **SCHOOL OF PHARMACY AND PHARMACEUTICAL SCIENCES PROFESSIONAL CODE OF CONDUCT**

All SOPPS students (BS Pharmaceutical Sciences, Preprofessional, MS, and PhD) are expected to adhere to the SOPPS Code of Professional Conduct.

### **MASTER OF SCIENCE THESIS OPTION**

Students who undertake a thesis are expected to report the results of extended research in a written thesis document and make an original contribution to their field. This work should give evidence of the students' abilities to conduct independent research and interpret their research results in an acceptable manner. Arrangements are made by students interested in the thesis option with individual laboratory directors as to the availability of MS-student research positions and the specific research focus.

#### ***Thesis Registration***

Students may receive a maximum of 4 semester hours of credit for MS thesis research. Students should register for Thesis (PHSC 6990), twice for 2 SH each during the fall and spring semesters of their second full year of study, or after completing 15 credits of study. If completion of the thesis requires additional time, students should register for Thesis Continuation (PHSC 6996)(0 SH).

#### ***Thesis Committee***

Each student's thesis committee should be composed of at least three members: two from the sponsoring program and one from outside the student's program. The outside member may be a Northeastern faculty member. The director of graduate studies for the pharmaceutical sciences department may appoint additional members, as considered necessary for student development. The student's major advisor, in whose laboratory the research is being conducted, will serve as committee chairperson. The student, after consulting with the committee chair, is responsible for calling all thesis committee meetings.

#### ***Thesis Proposal***

The thesis proposal should be no more than 50 double-spaced pages (12-point font minimum and one-half-inch margins on all sides). This page limit excludes references but includes figures, figure legends, and tables. Aside from these exceptions, the proposal should conform to the format and structure of an NIH grant proposal with four sections: specific aims, background and significance, preliminary studies, and experimental design and methods. See the Department of Pharmaceutical Sciences "Thesis Proposal" document for detailed instructions on the preparation of a thesis proposal and the required forms located in the School of Pharmacy and Pharmaceutical Sciences Student Portal on Canvas in the module section.

The thesis proposal must be defended orally before the thesis committee and signed by all thesis committee members before the student undertakes the planned research. The signed cover page of the proposal should be submitted to the director of graduate studies, pharmaceutical sciences department, and to the Bouvé College of Health Sciences Graduate Office.

**Thesis Final Defense**

The final defense is taken after the student completes the thesis research and all other requirements for the MS degree. The defense deals with the subject matter of the thesis, significant developments in the field, and student's background knowledge in their field of specialization. The thesis committee conducts the final defense.

At least two weeks prior to the expected date of the oral defense, the written thesis must be circulated to the student's thesis committee. After initial committee evaluation, recommendation may be made that the student clarify or rewrite portions of the thesis before scheduling the final defense. After the thesis committee concurs that the thesis is acceptable, a date is chosen for the final oral examination. At least two weeks prior to the defense, the student should inform the director of graduate studies in the pharmaceutical sciences department so that an announcement can be distributed to faculty and students. The final defense is open to anyone who wishes to attend and typically lasts at least two hours. After presentation of the work by the student, and responses to audience and committee questions, the student's committee meets in executive session to decide whether the student has successfully defended the thesis. The committee's decision is then announced to the student. If the committee's vote is favorable, the student incorporates committee suggestions and the thesis is signed off and passed on to the director of graduate studies in the department. Requests for a second defense are unusual but may be permitted if the original oral defense was judged significantly inadequate.

**Thesis Deadline**

The thesis should be written, defended, and signed at least two weeks before the university commencement deadline. Students must submit signed copies of the thesis to the online site designated by the university.

Please visit Bouvé College of Health Sciences Program Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Core Requirements**

A grade of C– or higher is required in each course.

Code	Title	Hours
<b>Required Core</b>		
Complete the following courses:		
PHSC 5100	Concepts in Pharmaceutical Science	2
PHSC 5102	Concepts in Pharmaceutical Science 2	2
PHSC 5212	Research Skills and Ethics	2
or PHSC 6213	Ethical Problems in Health Sciences Research	
PHSC 5300	Pharmaceutical Biochemistry <sup>1</sup>	2 or 4
or PHSC 7010	Pharmaceutical Sciences Laboratory	
PHSC 5310	Cellular Physiology <sup>1</sup>	2 or 4
or PHSC 7010	Pharmaceutical Sciences Laboratory	
PHSC 6214	Experimental Design and Biostatistics	2
PHSC 6216	Human Physiology and Pathophysiology	2
<b>Pharmaceutics and Drug Delivery</b>		
PMST 6250	Advanced Physical Pharmacy	2
PMST 6252	Pharmacokinetics and Drug Metabolism	3
PMST 6254	Advanced Drug Delivery Systems	3

**Electives**

Code	Title	Hours
Complete 9–11 semester hours from the following subject areas: <sup>1</sup>		9-11
BIOL, BIOT, CHEM, NNMD, PHSC, PMCL, PMST		

**Thesis Option**

Thesis credits may count toward the required elective hours.

Code	Title	Hours
Thesis research should be taken twice.		4
PHSC 6990	Thesis	2
Thesis continuation may be taken if additional time is needed to complete the thesis.		
PHSC 6996	Thesis Continuation	

<sup>1</sup> Students who opt to complete 4-credit Pharmaceutical Sciences Laboratory (PHSC 7010) in the core requirements may complete the degree with 9 elective credits; all other students must complete 11 elective credits.

**Program Credit/GPA Requirements**

33 total semester hours required

Minimum 3.000 GPA required

## Pharmacology, MS

Graduate education in pharmacology embodies the principles and mechanisms of drug action in biological systems. Through coursework, seminars, and conferences, students in the pharmacology MS program gain exposure to both classical and recent approaches that have led to the development of current theories of drug action and therapeutic application. Pharmacology should not be confused with pharmacy programs or training, which lead to professional licensure as a pharmacist and involve medication management.

### Curriculum Requirements

All MS programs in the Department of Pharmaceutical Sciences require a set of core courses taken by every MS student, regardless of program. In addition, students in each program are required to take a defined set of discipline-specific courses and several general electives. The number of specialized and elective courses differs somewhat among programs. The MS degree may be completed on either a full-time or part-time basis and may include an optional research thesis. International students are required to attend the program on a full-time basis.

### Internship Requirements and Regulations for Department of Pharmaceutical Sciences

Internships provide an experiential component of the graduate curriculum that fosters professional development through work in industry and hospitals.

1. In order to participate in an internship, students must complete two semesters with a grade-point average of 3.200 or better; be in good academic and professional standing (i.e., have no Professionalism Concern forms (<https://bouve.northeastern.edu/assets/uploads/sites/5/2015/03/professionalism-concern-form.pdf>) filed); and have no instances of academic dishonesty or blocks on enrollment.
2. In order to be eligible for internship, students must take the Professional Development for Pharmaceutical Sciences (PHSC 5305) course in either the fall or spring semester of their first year.
3. Students are in school full-time in addition to working on their internships.
4. There are no vacations on co-op/internships. Companies' sick time policies may vary. Students should check with their employers.
5. Students are responsible for finding their own internship and must be honest and accurate representing their experiences on their resumé. Prior to looking for an internship, students must have their faculty advisor approve their resumé and ascertain to the best of their ability that the skills and training of students are as presented.
6. Students must not accept more than one position. They must honor the first offer accepted.
7. In order to receive a grade for the course, students must write at least two learning goals and a paper describing what they learned, mid- and end of semester. Supervisors for internships will reply to a questionnaire about students' performance.
8. International students must register for Pharmaceutical Science Internship (PHSC 6401) and follow instructions to receive Curricular Practical Training authorization from the Office of Global Services every semester they work. This applies to part-time jobs and volunteer opportunities. International students cannot engage in full-time CPT authorization totaling more than 52 weeks. Doing so will eliminate the possibility of engaging in the postgraduation benefit of Post-Completion Optional Practical Training.
9. Students receive 1 academic credit per semester for Pharmaceutical Science Internship (PHSC 6401). If students want to do an internship for a fourth semester they may do so, but students will only receive a maximum of 3 credits for Pharmaceutical Science Internship (PHSC 6401). The 4th credit for Pharmaceutical Science Internship (PHSC 6401) will not be added to the student's degree.
10. Taking internship must not extend international students' visas.

### General Policies Common to all MS Programs in the Department of Pharmaceutical Sciences

#### GRADING POLICY

Students are expected to maintain a GPA of 3.000 (B) or higher in all coursework. Students whose cumulative GPA falls below 3.000 will receive written notification from the Bouvé Office of Graduate Student Services that they have been placed on academic probation. A student must clear the deficiency and return to nonprobationary status within one semester, unless the course that must be retaken is not offered during the probationary semester. In such a case, the course to be retaken must be completed during the next semester that it is offered, and the GPA must be restored to at least 3.000. Failure to remediate the deficiencies and return to nonprobationary status within the established time limit will result in dismissal from the MS program. Refer to the Bouvé College of Health Sciences policy on Academic Dismissal (p. 581) and Academic Probation Policy (p. 582) for full details.

#### PROGRESSION REQUIREMENT

Bouvé College of Health Sciences policy specifies that students register for coursework or continuation credit each semester of the academic year (fall and spring semesters) after they are matriculated as full- or part-time students. Moreover, international students are required to maintain full-time student status during each academic term; consult the Office of Global Services (<https://international.northeastern.edu/ogs/>) for specific requirements. Domestic students who are not able to register for courses during a particular semester must petition the director of graduate studies in the department for exemption in writing and state the reasons for the exemption and their plan for resuming their studies. Approval of the petition will preserve student status in the MS program.

All MS students are expected to complete the degree requirements within two years if enrolled on a full-time basis, or within three to five years if enrolled on a part-time basis. If progress toward the degree is slowed or interrupted for personal reasons, the student so affected must petition the School of Pharmacy and Pharmaceutical Sciences Academic Standing Committee for an extension, detailing the anticipated time to completion. If

an extension is approved, the student will be directed to meet with the graduate program director to devise a formal plan to achieve completion of the degree.

Course credits earned in the Bouvé College of Health Sciences Graduate School or accepted for transfer from another institution and not applied to obtain a previous degree are valid for a maximum of seven years. Refer to the Bouvé College of Health Sciences Academic Progression policies and procedures (p. 583) for details.

### **ACADEMIC HONESTY AND RESEARCH INTEGRITY**

The Department of Pharmaceutical Sciences has a zero-tolerance policy regarding academic dishonesty and violations of research integrity. It is each student's responsibility to understand and adhere to the School of Pharmacy and Pharmaceutical Sciences Code of Professional Conduct (<https://bouve.northeastern.edu/assets/uploads/sites/5/2021/10/northeastern-school-of-pharmacy-code-of-professional-conduct-2021.pdf>) and to Northeastern University's Academic Integrity Policy (<http://www.northeastern.edu/osccr/academic-integrity-policy/>). Definitions of plagiarism, cheating, fabrication, falsification, unauthorized collaboration, and actions that facilitate academic or research dishonesty can be found on the Office of Student Conduct and Conflict Resolution website (<http://www.northeastern.edu/osccr/>). The lack of knowledge of these definitions does not excuse the student's responsibility for upholding them. Offenses of academic honesty and research integrity are egregious violations of ethical standards and may result in disciplinary actions, including the student's immediate dismissal from the graduate program.

### **SCHOOL OF PHARMACY AND PHARMACEUTICAL SCIENCES PROFESSIONAL CODE OF CONDUCT**

All SOPPS students (BS Pharmaceutical Sciences, Preprofessional, MS, and PhD) are expected to adhere to the SOPPS Code of Professional Conduct.

### **MASTER OF SCIENCE THESIS OPTION**

Students who undertake a thesis are expected to report the results of extended research in a written thesis document and make an original contribution to their field. This work should give evidence of the students' abilities to conduct independent research and interpret their research results in an acceptable manner. Arrangements are made by students interested in the thesis option with individual laboratory directors as to the availability of MS-student research positions and the specific research focus.

#### ***Thesis Registration***

Students may receive a maximum of 4 semester hours of credit for MS thesis research. Students should register for Thesis (PHSC 6990), twice for 2 SH each during the fall and spring semesters of their second full year of study, or after completing 15 credits of study. If completion of the thesis requires additional time, students should register for Thesis Continuation (PHSC 6996)(0 SH).

#### ***Thesis Committee***

Each student's thesis committee should be composed of at least three members: two from the sponsoring program and one from outside the student's program. The outside member may be a Northeastern faculty member. The director of graduate studies for the pharmaceutical sciences department may appoint additional members, as considered necessary for student development. The student's major advisor, in whose laboratory the research is being conducted, will serve as committee chairperson. The student, after consulting with the committee chair, is responsible for calling all thesis committee meetings.

#### ***Thesis Proposal***

The thesis proposal should be no more than 50 double-spaced pages (12-point font minimum and one-half-inch margins on all sides). This page limit excludes references but includes figures, figure legends, and tables. Aside from these exceptions, the proposal should conform to the format and structure of an NIH grant proposal with four sections: specific aims, background and significance, preliminary studies, and experimental design and methods. See the Department of Pharmaceutical Sciences "Thesis Proposal" document for detailed instructions on the preparation of a thesis proposal and the required forms located in the School of Pharmacy and Pharmaceutical Sciences Student Portal on Canvas in the module section.

The thesis proposal must be defended orally before the thesis committee and signed by all thesis committee members before the student undertakes the planned research. The signed cover page of the proposal should be submitted to the director of graduate studies, pharmaceutical sciences department, and to the Bouvé College of Health Sciences Graduate Office.

#### ***Thesis Final Defense***

The final defense is taken after the student completes the thesis research and all other requirements for the MS degree. The defense deals with the subject matter of the thesis, significant developments in the field, and student's background knowledge in their field of specialization. The thesis committee conducts the final defense.

At least two weeks prior to the expected date of the oral defense, the written thesis must be circulated to the student's thesis committee. After initial committee evaluation, recommendation may be made that the student clarify or rewrite portions of the thesis before scheduling the final defense. After the thesis committee concurs that the thesis is acceptable, a date is chosen for the final oral examination. At least two weeks prior to the defense, the student should inform the director of graduate studies in the pharmaceutical sciences department so that an announcement can be distributed to faculty and students. The final defense is open to anyone who wishes to attend and typically lasts at least two hours. After presentation of the work by the student, and responses to audience and committee questions, the student's committee meets in executive session to decide whether the student has successfully defended the thesis. The committee's decision is then announced to the student. If the committee's vote is favorable, the student incorporates committee suggestions and the thesis is signed off and passed on to the director of graduate studies in the department. Requests for a second defense are unusual but may be permitted if the original oral defense was judged significantly inadequate.

**Thesis Deadline**

The thesis should be written, defended, and signed at least two weeks before the university commencement deadline. Students must submit signed copies of the thesis to the online site designated by the university.

Please visit Bouvé College of Health Sciences Program Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Core Requirements**

A grade of C– or higher is required in each course.

Code	Title	Hours
<b>Required Core</b>		
Complete the following courses:		
PHSC 5100	Concepts in Pharmaceutical Science	2
PHSC 5102	Concepts in Pharmaceutical Science 2	2
PHSC 5212	Research Skills and Ethics	2
or PHSC 6213	Ethical Problems in Health Sciences Research	
PHSC 5300	Pharmaceutical Biochemistry <sup>3</sup>	2 or 4
or PHSC 7010	Pharmaceutical Sciences Laboratory	
PHSC 5310	Cellular Physiology	2 or 4
or PHSC 7010	Pharmaceutical Sciences Laboratory	
PHSC 6214	Experimental Design and Biostatistics	2
PHSC 6216	Human Physiology and Pathophysiology	2
<b>Pharmacology</b>		
PMCL 6260	Pharmacology 1 <sup>1</sup>	2
PMCL 6261	Pharmacology 2 <sup>2</sup>	2
PMCL 6262	Receptor Pharmacology <sup>1</sup>	2

**Electives**

Code	Title	Hours
Complete 11–13 semester hours from the following subject areas: <sup>3</sup>		11-13
BIOL, BIOT, CHEM, NNMD, PHSC, PMCL, PMST		

**Thesis Option**

This thesis credits may count toward the required elective hours.

Code	Title	Hours
Thesis research should be taken twice.		4
PHSC 6990	Thesis	2
Thesis continuation may be taken if additional time is needed to complete the thesis.		
PHSC 6996	Thesis Continuation	

<sup>1</sup> Pharmacology 1 (PMCL 6260) and Receptor Pharmacology (PMCL 6262) are only offered in even-numbered years in the spring semester (example: Spring 2020).

<sup>2</sup> Pharmacology 2 (PMCL 6261) is only offered in odd-numbered years in the spring semester (example: Spring 2021). Pharmacology 1 does not have to be taken before Pharmacology 2.

<sup>3</sup> Students who opt to complete 4-credit Pharmaceutical Sciences Laboratory (PHSC 7010) in the core requirements may complete the degree with 11 elective credits; all other students must complete 13 elective credits.

**Program Credit/GPA Requirements**

33 total semester hours required

Minimum 3.000 GPA required

## Pharmacy, PharmD—Direct Entry / Public Health, MPH

The School of Pharmacy and Pharmaceutical Sciences and the Department of Health Sciences offer a combined Doctor of Pharmacy (PharmD) and Master of Public Health (MPH) program.

The combined PharmD/MPH program recognizes and reinforces the importance of public health in pharmacy practice. Central to addressing public health concerns, and in particular those associated with racial and ethnic health disparities, the program is committed to building a strong, diverse, and activist public health workforce. The goal of the program is to graduate professionals who are well educated in the complex issues associated with disparate health status and healthcare access. The combined PharmD/MPH program allows qualified and interested students an opportunity to achieve their goal of obtaining a more robust understanding of public health through an MPH degree while also completing their PharmD.

Refer to the School of Pharmacy and Pharmaceutical Sciences PharmD—Direct Entry (p. 720) and Department of Health Sciences Master of Public Health (p. 650) pages of this catalog for program requirements and technical standards. Students must adhere to all PharmD and MPH program standards, policies, and requirements as listed in the catalog, unless otherwise specified.

The Northeastern University Master of Public Health Program is accredited by the Council of Education for Public Health. CEPH is an independent agency recognized by the U.S. Department of Education to accredit schools of public health and public health programs outside of schools of public health.

## School of Law

**James R. Hackney, JD**, Dean

**Rashmi Dyal-Chand, JD**, Associate Dean for Academic Affairs

**Julian M. Fray, JD, LLM**, Associate Dean for Digital Strategy

**Greg Houghton**, Associate Dean for Administration and Finance

**Hemanth Gundavaram, JD**, Associate Dean for Experiential Education

**Sarah Rethage, JD**, Associate Dean of Strategic Initiatives and Enrollment

**Lua Yuille, JD**, Associate Dean for Research and Interdisciplinary Education

Northeastern University School of Law (<https://www.northeastern.edu/law/>)

416 Huntington Avenue

Boston, MA 02115

617.373.5149

Today's legal environment demands that attorneys be nimble, entrepreneurial, and savvy; in all of these regards, graduates of the Northeastern University School of Law excel. Our curriculum, taught by nationally recognized faculty, provides students with a superior understanding of how the law applies in real settings, a strong ethical framework, and the experience to strategically pursue their professional objectives. Our co-op program sets us apart from all other law schools—our JD students complete many hours of work in law offices, judges' chambers, corporations, nonprofit organizations, and government. As a result of their co-op experiences, Northeastern JD students are not just sitting in classes hearing about the rapid changes in the legal world—they live them.

Our community also provides a refreshing refutation of the law school stereotype as a place of ruthless competition and blind ambition. Instead, we cultivate an atmosphere that is collaborative, collegial, and supportive. Our students' eagerness to work in teams, help one another, and share their experiences reflects that ethos. Our faculty and staff are exceptionally supportive of students—not only because our small community encourages extensive student-faculty interaction but also because they share their students' passion for justice.

In addition to offering both full-time and part-time JD programs, the School of Law offers on-campus and online LLM programs for lawyers, a Master of Legal Studies program for nonlawyers, and a number of other programs. Our suite of LLM opportunities is offered for both those who hold a U.S. law degree and those who hold a first professional law degree from a law school outside of the United States.

### Programs

#### Juris Doctor (JD)

- Law (p. 746)

#### Master of Laws (LLM)

- Law (p. 749)
- Law (p. 751)—Experiential
- Law—Online

#### Master of Legal Studies (MLS)

- Legal Studies—Online (p. 755)

#### Master of Science (MS)

- Media Advocacy (p. 143)

#### Graduate Certificates

- Business Law (p. 759)
- Healthcare Compliance (p. 760)
- Health Law (p. 761)
- Human Resources Law (p. 764)
- Intellectual Property Law (p. 766)
- United States Law (p. 772)

#### **FOR JD STUDENTS ONLY:**

- Health Law and Policy (p. 762)
- Human Rights Law (p. 765)
- Legal Design (p. 767)
- Poverty Law and Economic Justice (p. 769)

- Privacy Law (p. 771)
- Women, Gender, Sexuality, and the Law (p. 773)

### **Dual Degrees**

- Law, JD / Accounting and Business Administration, MSAMBA (p. 232)
- Law, JD / Business Administration, MBA—Full-Time (p. 233)
- Law, JD / Criminology and Justice Policy, PhD (p. 778)
- Law, JD / Criminology and Criminal Justice, MS (p. 779)
- Law, JD / Public Health, MPH (p. 602)
- Law, JD / Public Policy, MPP (p. 781)
- Law, LLM / Business Administration, MBA—Full-Time (p. 234)

## Academic Policies and Procedures

Below, you will find select policies pertaining to the Juris Doctor program. For a comprehensive document with all policies and procedures, see the JD Student Handbook (<https://www.northeastern.edu/lawstudentaffairs/student-handbooks/>).

- Grades (p. 745)

## Grades

### Grades

Students will receive credit for courses in which they receive a grade of "High Honors," "Honors," "Pass," or "Marginal Pass," but not for courses in which they receive a grade of "Fail." If any class is designated as offered on a pass/fail basis, students will receive credit for a passing grade but not for a grade of "Fail."

### Incomplete Grades

The School of Law follows university policy on incomplete grades (p. 61).

## Law, JD

### Overview

Students at Northeastern University School of Law gain unparalleled networking opportunities from the moment they walk in the door. While many law schools talk about offering work experience, Northeastern Law has been the nation's leader in experiential legal education for five decades. Northeastern launched its Cooperative Legal Education Program in 1968 and today offers the largest and most extensive hands-on professional program in the country. Students devote several of their upper-level terms to working full-time as legal professionals. Through the co-op program, students have the opportunity to experience various fields of law in multiple practice settings.

Northeastern Law students gain real work experience and networking opportunities that far exceed the offerings of other law schools. With more than 1,500 employers in more than 40 states and a number of countries around the world, Northeastern students create professional networks in legal offices ranging from large firms in Boston to government agencies in Washington, D.C., to human rights organizations in Geneva. Through these connections and with access to the more than 8,000 alumni, Northeastern Law students graduate with not only a resumé packed full of experience but also a network that is unrivaled.

The School of Law offers a curriculum that provides students the tools they will need to pursue a successful legal career. In their first year, JD students complete required coursework. In their second and third years, they explore areas of interest by completing multiple full-time co-ops and taking courses that provide insight into many areas of the law.

### Interdisciplinary Graduate Certificates

The School of Law offers JD students the option to pursue one of the following interdisciplinary graduate certificates:

- Health Law and Policy (p. 762)
- Human Rights Law (p. 765)
- Legal Design (p. 767)
- Poverty Law and Economic Justice (p. 769)
- Privacy Law (p. 771)
- Women, Gender, Sexuality, and the Law (p. 773)

### Dual Degrees

The School of Law offers multiple dual degrees (p. 775).

*For a more comprehensive description of policies, procedures, and requirements pertaining to the JD program, please refer to the School of Law's website (<https://www.northeastern.edu/lawstudentaffairs/>).*

### Full-Time Option

Complete all courses and requirements described below.

### Milestones

Code	Title	Hours
<b>Public Interest Requirement <sup>1</sup></b>		
<b>Upper-Level Rigorous Writing Requirement <sup>2</sup></b>		
<b>Experiential Education Requirement <sup>2</sup></b>		
<b>Co-op Requirement: Co-ops corresponding to three terms <sup>3</sup></b>		

Note: All courses used to satisfy JD requirements must be completed with a passing grade. Students must satisfactorily complete all JD requirements, including the public interest requirement, the upper-level rigorous writing requirement, the experiential education requirement, and the co-op requirement.

### First-Year Course Requirements

Code	Title	Hours
<b>Fall Term</b>		
LAW 6100	Civil Procedure	5
LAW 6105	Property	4
LAW 6106	Torts	4
LAW 6160	Legal Skills in Social Context	2
LAW 6165	LSSC: Legal Research and Writing Component	2
<b>Spring Term</b>		
LAW 6101	Constitutional Law	4
LAW 6102	Contracts	5

LAW 6103	Criminal Justice	4
LAW 6160	Legal Skills in Social Context	2
LAW 6165	LSSC: Legal Research and Writing Component	2

### Upper-Level Course Requirements

Code	Title	Hours
<b>Professional Responsibility</b>		
LAW 7443	Professional Responsibility	3
<b>Electives</b>		
Complete 46 credits of elective coursework.		46

Rules and policies applicable to elective coursework are described in the School of Law Student Information Handbook.

### Program Credit Requirement

83 total credits required.

- <sup>1</sup> Information about the public interest requirement is provided in the Student Information Handbook.
- <sup>2</sup> The same course cannot be used to satisfy both the rigorous writing and experiential education requirements.
- <sup>3</sup> Transfer students should consult the Student Information Handbook for applicable requirements. All students with questions about satisfying co-op requirements should consult the Center for Co-op and Career Development.

### Part-Time Option

Complete all courses and requirements described below.

### Milestones

Code	Title	Hours
<b>Public Interest Requirement</b> <sup>1</sup>		
<b>Upper-Level Rigorous Writing Requirement</b> <sup>2</sup>		
<b>Experiential Education Requirement</b> <sup>2</sup>		
<b>Two practical experiences during separate terms when the student is not registered for coursework other than the practical experience(s), including at least one co-op in the form of a field placement with a related seminar; and 1,000 hours of relevant work experience.</b> <sup>3</sup>		

Note: All courses used to satisfy JD requirements must be completed with a passing grade. Students must satisfactorily complete all JD requirements, including the public interest requirement, the upper-level rigorous writing requirement, the experiential education requirement, and the co-op, field placement, practical experience, and relevant work experience requirement.

### First-Year Course Requirements

Code	Title	Hours
Students will take the following courses during their first four semesters:		
LAW 6100	Civil Procedure	5
LAW 6101	Constitutional Law	4
LAW 6102	Contracts	5
LAW 6103	Criminal Justice	4
LAW 6105	Property	4
LAW 6106	Torts	4
LAW 6160	Legal Skills in Social Context	2
LAW 6165	LSSC: Legal Research and Writing Component	2
LAW 6160	Legal Skills in Social Context	2
LAW 6165	LSSC: Legal Research and Writing Component	2

### Upper-Level Course Requirements

Code	Title	Hours
<b>Field Placement</b>		
LAW 7945	Field Placement Seminar	1
or LAW 7947	Public Interest Field Placement Seminar	
LAW 7946	Field Placement	7

or LAW 7948

Public Interest Field Placement

**Professional Responsibility**

LAW 7443

Professional Responsibility

3

**Electives**

Complete 38 credits of LAW courses not already taken to fulfill another requirement.

38

Rules and policies applicable to upper-level courses are described in the School of Law Student Information Handbook.

**Program Credit Requirement**

83 total credit hours required.

- <sup>1</sup> Information about the public interest requirement is provided in the Student Information Handbook.
- <sup>2</sup> The same course cannot be used to satisfy both the rigorous writing and experiential education requirements.
- <sup>3</sup> Transfer students should consult the Student Information Handbook for applicable requirements. All students with questions about the nature of these requirements should consult the Student Information Handbook and the Center for Co-op and Career Development.

## Law, LLM

### LLM Program Requirements

The LLM program offers a rigorous curriculum that will provide you with a comprehensive foundation in legal theory and practice as well as the freedom to explore and refine your career interests. LLM students may choose the general program, which offers maximum flexibility to let you take the courses you want and need — to qualify for a US bar exam or to do whatever you choose as a lawyer who wants to make a difference — or one of our concentrations, which provide a competitive advantage in specific fields of interest.

Complete all courses and requirements listed below unless otherwise indicated.

### Foundational Courses

These foundational courses are required for any student who obtained their first law degree outside the United States:

Code	Title	Hours
LAW 6301	Introduction to American Law and Legal Institutions	2
LAW 6302	Introduction to Legal Research and Writing for LLM Students	2

### Electives

Code	Title	Hours
	Students must take at least 20 credits of LAW electives if they took the foundational courses; they must take at least 24 credits of LAW electives if not required to take foundational courses. Courses taken to fulfill concentration requirements count toward the elective requirement.	20 or 24

### Concentration Options

Students may choose to pursue a concentration by completing the listed requirements. Courses taken to fulfill concentration requirements count toward the elective requirement for the LLM degree.

- Health Policy and Law (p. 749)
- Human Rights and Economic Development (p. 749)
- Intellectual Property and Innovation (p. 750)
- International Business Law (p. 750)

### Health Policy and Law

Code	Title	Hours
<b>Core Course</b>		
Complete the following course:		
LAW 7335	Health Law	3
<b>Relevant Elective Courses</b>		
Complete at least two of the following:		
LAW 7494	Bioethics and the Law	6-7
LAW 7512	Problems in Public Health Law	
LAW 7527	Public Health Legal Clinic	
LAW 7588	Reproductive and Sexual Rights and Health	
LAW 7606	Drug Law and Policy	
LAW 7619	Healthcare Fraud and Abuse Law	
LAW 7681	Law and Biotechnology	
LAW 7685	Human Rights, IP, and Access to Medicines	

Students must also complete a paper related to health law. To fulfill this requirement, a paper must satisfy the criteria of the JD rigorous writing requirement.

### Human Rights and Economic Development

Code	Title	Hours
<b>Core Courses</b>		
Complete one of the following courses:		
LAW 7338	International Law	3
LAW 7491	International Human Rights and the Global Economy	
LAW 7525	Law and Economic Development	

LAW 7651	Human Rights in the United States
LAW 7666	Human Rights, the Environment, Development and Community Resilience
LAW 7685	Human Rights, IP, and Access to Medicines

**Relevant Elective Courses**

Complete at least two additional courses from the core course list or the following list: 5-16

LAW 7336	Immigration Law
LAW 7358	Social Welfare Law
LAW 7550	Refugee and Asylum Law
LAW 7559	International Trade
LAW 7569	International and Foreign Legal Research
LAW 7588	Reproductive and Sexual Rights and Health
LAW 7597	Civil Rights and Restorative Justice Clinic
LAW 7610	Community Business Law Clinic
LAW 7657	Immigrant Justice Clinic

Students must also complete a paper related to human rights and/or economic development. To fulfill this requirement, a paper must satisfy the criteria of the JD rigorous writing requirement.

**Intellectual Property and Innovation**

Code	Title	Hours
------	-------	-------

**Core Courses**

Choose 2 courses from the following list: 6-7

LAW 7369	Intellectual Property
LAW 7501	Patent Law
LAW 7590	Copyright Law
LAW 7638	Trademark Law

**Relevant Elective Courses**

Complete at least two additional courses from the core course list or the following list: 6-11

LAW 7303	Antitrust
LAW 7417	Entertainment Law
LAW 7633	Intellectual Property Law Clinic
LAW 7640	Information Security Law
LAW 7685	Human Rights, IP, and Access to Medicines

Students must also complete a clinic or paper related to Intellectual Property and Innovation. To fulfill this requirement, a paper must satisfy the criteria of the JD rigorous writing requirement. A clinic that counts toward the four-course requirement may not be used to also satisfy this requirement.

**International Business Law**

Code	Title	Hours
------	-------	-------

**Core Courses**

Complete one course from the following list: 3

LAW 7525	Law and Economic Development
LAW 7559	International Trade
LAW 7603	International Business Transactions

**Relevant Elective Courses**

Complete at least two additional courses from the core course list or the following list: 4-7

LAW 7323	Corporations
LAW 7336	Immigration Law
LAW 7338	International Law
LAW 7491	International Human Rights and the Global Economy
LAW 7554	International Investment Arbitration and Litigation Practice
LAW 7569	International and Foreign Legal Research

Students must also complete a paper related to international business law. To fulfill this requirement, a paper must satisfy the criteria of the JD rigorous writing requirement.

## Program Credit Requirement

24 total hours required.

For additional information regarding the LLM program and its requirements, please see the LLM Student Information Handbook.

## LLM Experiential Program Requirements

The Experiential LLM program offers a rigorous curriculum that is designed to provide you with a comprehensive foundation in legal theory and practice as well as the freedom to explore and refine your career interests. Experiential LLM students may choose the general program, which offers maximum flexibility to let you take the courses you want and need—to qualify for a U.S. bar exam or to do whatever you choose as a lawyer who wants to make a difference—or one of our concentrations, which provide a competitive advantage in specific fields of interest. Students in the full-time Experiential LLM program deepen their knowledge and expand their expertise by taking a full-time co-op or equivalent experiential alternative during one quarter.

Complete all courses and requirements listed below unless otherwise indicated.

## Foundational Courses

These foundational courses are required for any student who obtained their first law degree outside the United States:

Code	Title	Hours
LAW 6301	Introduction to American Law and Legal Institutions	2
LAW 6302	Introduction to Legal Research and Writing for LLM Students	2
LAW 6315	Legal Research and Writing for LLM Students: Preparing for Co-op	2

## Electives

Code	Title	Hours
Students must take at least 18 credits of LAW electives if they took the foundational courses; they must take at least 24 credits of LAW electives if not required to take foundational courses. Courses taken to fulfill concentration requirements count toward the elective requirement.		18-24

## Concentration Options

Students may choose to pursue a concentration by completing the listed requirements. Courses taken to fulfill concentration requirements count toward the elective requirement for the LLM degree.

- Health Policy and Law (p. 751)
- Human Rights and Economic Development (p. 751)
- Intellectual Property and Innovation (p. 752)
- International Business Law (p. 752)

## Health Policy and Law

Code	Title	Hours
<b>Core Course</b>		
LAW 7335	Health Law	3
<b>Relevant Elective Courses</b>		
Complete at least two of the following:		6-7
LAW 7494	Bioethics and the Law	
LAW 7512	Problems in Public Health Law	
LAW 7527	Public Health Legal Clinic	
LAW 7588	Reproductive and Sexual Rights and Health	
LAW 7606	Drug Law and Policy	
LAW 7619	Healthcare Fraud and Abuse Law	
LAW 7681	Law and Biotechnology	
LAW 7685	Human Rights, IP, and Access to Medicines	

Students must also complete a paper related to health law. To fulfill this requirement, a paper must satisfy the criteria of the JD rigorous writing requirement.

## Human Rights and Economic Development

Code	Title	Hours
<b>Core Courses</b>		
Complete one of the following:		3

LAW 7338	International Law
LAW 7491	International Human Rights and the Global Economy
LAW 7525	Law and Economic Development
LAW 7651	Human Rights in the United States
LAW 7666	Human Rights, the Environment, Development and Community Resilience
LAW 7685	Human Rights, IP, and Access to Medicines

**Relevant Elective Courses**

Complete at least two additional courses from the core course list or from the following: 5-16

LAW 7336	Immigration Law
LAW 7358	Social Welfare Law
LAW 7550	Refugee and Asylum Law
LAW 7559	International Trade
LAW 7569	International and Foreign Legal Research
LAW 7588	Reproductive and Sexual Rights and Health
LAW 7597	Civil Rights and Restorative Justice Clinic
LAW 7610	Community Business Law Clinic
LAW 7657	Immigrant Justice Clinic

Students must also complete a co-op or paper related to human rights and/or economic development. To fulfill this requirement, a paper must satisfy the criteria of the JD rigorous writing requirement.

**Intellectual Property and Innovation**

Code	Title	Hours
<b>Core Courses</b>		
Complete two of the following:		6-7
LAW 7369	Intellectual Property	
LAW 7501	Patent Law	
LAW 7590	Copyright Law	
LAW 7638	Trademark Law	

**Relevant Elective Courses**

Complete at least two additional courses from the core course list or from the following: 6-11

LAW 7303	Antitrust
LAW 7417	Entertainment Law
LAW 7633	Intellectual Property Law Clinic
LAW 7640	Information Security Law
LAW 7685	Human Rights, IP, and Access to Medicines

Students must also complete a co-op, clinic, or paper related to intellectual property and innovation. To fulfill this requirement, a paper must satisfy the criteria of the JD rigorous writing requirement. A clinic that counts toward the four-course requirement may not be used to also satisfy this requirement.

**International Business Law**

Code	Title	Hours
<b>Core Courses</b>		
Complete one of the following:		3
LAW 7525	Law and Economic Development	
LAW 7559	International Trade	
LAW 7603	International Business Transactions	

**Relevant Elective Courses**

Complete at least two additional courses from the core course list or from the following: 4-7

LAW 7323	Corporations
LAW 7336	Immigration Law
LAW 7338	International Law
LAW 7491	International Human Rights and the Global Economy

LAW 7554	International Investment Arbitration and Litigation Practice
LAW 7569	International and Foreign Legal Research

Students must also complete a co-op or paper related to international business law. To fulfill this requirement, a paper must satisfy the criteria of the JD rigorous writing requirement.

### **Experiential Requirement**

Students must take one full-time co-op or equivalent experiential alternative of at least 12 weeks (or an equivalent period over multiple terms, for part-time students).

### **Program Credit Requirement**

24 total hours required.

For additional information regarding the Experiential LLM program and its requirements, please see the LLM Student Information Handbook.

## Law, LLM—Online

The online LLM program offers students an opportunity to receive specialized legal training beyond the training they have already received in a JD program or an equivalent law degree program outside the United States. The elective courses in the program will provide insight into legal issues in areas such as intellectual property, privacy, and business. Students interested in taking a bar exam will be able to strengthen their foundational knowledge of U.S. law by taking courses with content tested on bar examinations. The asynchronous online format affords flexibility with respect to the times and location at which students complete their work.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Foundational Course

This foundational course is required for any student who obtained their first law degree outside the United States.

Code	Title	Hours
LAW 6400	Introduction to U.S. Law and Legal System	3

#### Electives

Code	Title	Hours
	Students must take at least 21 credits of LAW electives if they took the foundational course; they must take at least 24 credits of LAW electives if not required to take the foundational course.	21-24

#### Program Credit

24 total hours required.

## Legal Studies, MLS—Online

The Master of Legal Studies program is designed for professionals who want a deeper understanding of law and legal concepts. Such professionals may be found in nonprofit organizations, foundations, financial services firms, pharmaceutical companies, insurance firms, compliance departments, or a host of other commercial and noncommercial settings. Examples of the professionals who would be interested in this degree are human resource professionals, claims representatives for insurance companies, professionals in healthcare organizations, bank loan officers, real estate brokers, risk managers, government affairs officers, management consultants advising organizations, development officers working on planned giving, and software entrepreneurs. They desire to know more about the law and to be able to deal more effectively with the lawyers with whom they interact during their professional lives. The degree includes concentrations in human resources law, business law, intellectual property law, health law, and public law and policy.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Foundation Courses

Code	Title	Hours
LS 6101	Introduction to Legal Studies 1: Law and Legal Reasoning	3
LS 6102	Introduction to Legal Studies 2	3

#### Core Courses

Code	Title	Hours
Complete at least four of the following:		12-18
LS 6110	Law of Information and Records	
LS 6120	Law and Strategy	
LS 6130	Negotiation and Advocacy	
LS 6140	Data Regulation and Compliance	
LS 6150	Law and Organizational Management	
LS 6155	Legal Foundations of Public Policy	

#### Electives

Code	Title	Hours
Students who do not take a concentration must take 6–12 semester hours from this list to complete the degree:		6-12
LS 6160	Regulation and Global Business Strategies	
LS 6170	Financial Transactions	
LS 6180	Health Law Survey	
LS 6181	Healthcare Regulation and Compliance	
LS 6182	Patient Records, Privacy, and Security	
LS 6210	Special Topics in Employee Rights and Employer Obligations	
LS 6211	Antidiscrimination Law	
LS 6212	Wages and Benefits	
LS 6230	Intellectual Property Survey	
LS 6231	Identifying and Securing Intellectual Property Rights	
LS 6232	Intellectual Property and Media	
LS 6235	Current Issues in Law and Public Policy	

#### Concentration Options

Students may choose to complete one of the concentrations described below. Students who pursue a concentration must take the two required foundation courses, at least four core courses, the courses listed in the concentration, and at least one additional course from the list of electives.

##### CONCENTRATION IN BUSINESS LAW

Code	Title	Hours
LS 6160	Regulation and Global Business Strategies	3
LS 6170	Financial Transactions	3
LS 6230	Intellectual Property Survey	3
or LS 6210	Special Topics in Employee Rights and Employer Obligations	

**CONCENTRATION IN HEALTH LAW**

<b>Code</b>	<b>Title</b>	<b>Hours</b>
LS 6180	Health Law Survey	3
LS 6181	Healthcare Regulation and Compliance	3
LS 6182	Patient Records, Privacy, and Security	3

**CONCENTRATION IN HUMAN RESOURCES LAW**

<b>Code</b>	<b>Title</b>	<b>Hours</b>
LS 6210	Special Topics in Employee Rights and Employer Obligations	3
LS 6211	Antidiscrimination Law	3
LS 6212	Wages and Benefits	3

**CONCENTRATION IN INTELLECTUAL PROPERTY LAW**

<b>Code</b>	<b>Title</b>	<b>Hours</b>

**Program Credit/GPA Requirements**

30 total semester hours required

Minimum 3.000 GPA required

**Media Advocacy, MS**

The Master of Science in Media Advocacy places particular focus on developing direct and indirect advocacy skills: that is, to influence government decision makers directly and to change minds indirectly through shifting public opinion. The program uniquely combines grounding in governmental structures and the legal system with sophisticated training in the latest communication techniques including social media, web communications, and videography, as well as data analytics and data-driven storytelling. Successful graduates will be empowered to promote the public agenda of employers ranging from mission-driven organizations, such as the ACLU or the Sierra Club, to industry leaders, such as hospitals and technology companies, to lobbying and strategic communications groups and political consulting firms.

**Program Requirements**

**Core Requirements**

Code	Title	Hours
JRNL 5400	Media and Advocacy in Theory and Practice	4
JRNL 5480	Research for Media Strategy	4

## Graduate Certificates

- Business Law (p. 759)
- Healthcare Compliance (p. 760)
- Health Law (p. 761)
- Human Resources Law (p. 764)
- Intellectual Property Law (p. 766)
- United States Law (p. 772)

The School of Law also offers the following interdisciplinary certificates (<https://law.northeastern.edu/academics/programs/jd/jdx-certificates/>) to students enrolled in its JD program:

- Health Law and Policy (p. 762)
- Human Rights Law (p. 765)
- Legal Design (p. 767)
- Poverty Law and Economic Justice (p. 769)
- Privacy Law (p. 771)
- Women, Gender, Sexuality, and the Law (p. 773)

## Business Law, Graduate Certificate

The Graduate Certificate in Business Law is designed to provide professionals in large and small enterprises with an ability to recognize, navigate, and leverage the laws that regulate business organizations and transactions.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Requirements

Code	Title	Hours
Students enrolled in Northeastern University colleges other than the School of Law should contact a School of Law advisor at lawstudentaffairs@northeastern.edu for guidance on registering for courses from the School of Law.		
LS 6102 or LW 6102	Introduction to Legal Studies 2 Introduction to Legal Studies 2	3
LS 6160 or LW 6160	Regulation and Global Business Strategies Regulation and Global Business Strategies	3
LS 6170 or LW 6170	Financial Transactions Financial Transactions	3
Complete one of the following:		3
LS 6210 or LW 6210	Special Topics in Employee Rights and Employer Obligations Special Topics in Employee Rights and Employer Obligations	
LS 6230 or LW 6230	Intellectual Property Survey Intellectual Property Survey	

### Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

## Healthcare Compliance, Graduate Certificate

The Graduate Certificate in Healthcare Compliance is designed to give law students, MBA students, and working professionals tools they need to successfully navigate the world of healthcare compliance. This 15-credit, one-year program jointly offered by the School of Law and the D'Amore-McKim School of Business gives students the opportunity to learn about the laws that govern the healthcare system while developing the business knowledge and skills critical to healthcare compliance.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Requirements

### Program Credit/GPA Requirements

15 total semester hours required

Minimum 3.000 GPA required

## Health Law, Graduate Certificate

Healthcare is a complex legal arena, as it encompasses several key stakeholders, from providers to patients to insurers. The Graduate Certificate in Health Law can help individuals recognize and navigate the varying legal needs in this space; an introductory course is paired with three courses tailored to the health industry.

The program helps to prepare graduates with the knowledge and skills to:

- Summarize and apply the appropriate statutes and regulations to concrete situations
- Examine legal regulations governing the provision and financing of healthcare services
- Gain an in-depth overview of health and compliance programs and the code of conduct for particular fields

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Requirements

Code	Title	Hours
Students enrolled in Northeastern University colleges other than the School of Law should contact a School of Law advisor at <a href="mailto:lawstudentaffairs@northeastern.edu">lawstudentaffairs@northeastern.edu</a> for guidance on registering for courses from the School of Law.		
LS 6102 or LW 6102	Introduction to Legal Studies 2	3
LS 6180 or LW 6180	Health Law Survey	3
LS 6181 or LW 6181	Healthcare Regulation and Compliance	3
LS 6182 or LW 6182	Patient Records, Privacy, and Security	3

#### Program Credit/GPA Requirements

12 total credits required

Minimum 3.000 GPA required

## Health Law and Policy, Graduate Certificate

The Graduate Certificate in Health Law and Policy, open to all JD students, gives students the opportunity to deepen their knowledge and develop their expertise in the field of health law and policy.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Required Law Courses

Code	Title	Hours
LAW 7335	Health Law	3

Code	Title	Hours
In addition, complete one of the following:		3-8

LAW 7410	Domestic Violence Clinic
LAW 7469	Disability Law
LAW 7494	Bioethics and the Law
LAW 7512	Problems in Public Health Law
LAW 7527	Public Health Legal Clinic
LAW 7536	Employment Law - Safety and Health
LAW 7588	Reproductive and Sexual Rights and Health

PHTH 6204	Society, Behavior, and Health
PHTH 6208	Urban Community Health Assessment
PHTH 6224	Social Epidemiology
PPUA 5240	Health Policy and Politics
SOCL 7267	Environment, Health, and Society
SOCL 7287	Social Movements in Health
STRT 6220	Strategic Management for Healthcare Organizations

#### Additional Requirements

**Co-op Requirement:** Students must complete at least one co-op related to the certificate topic.

**Writing Requirement:** Students must complete a piece of substantial writing that meets the requirements of the JD upper-level rigorous writing requirement and that has a clear connection to the certificate topic.

For additional information on requirements associated with this certificate, please consult the JD program's Student Information Handbook.

### **Program Credit/GPA Requirements**

12 total semester hours required, including at least 6 semester hours of LAW courses and at least 6 semester hours of non-LAW courses.

Students must receive a passing grade in all courses and satisfactorily complete all other requirements.

## Human Resources Law, Graduate Certificate

The workplace has drastically changed in the past decade and keeps on evolving. This leads to many new human resources legal and regulation challenges. The Graduate Certificate in Human Resources Law is designed to provide professionals who work in human resources with the skills needed to recognize and navigate the many legal issues that arise within this heavily regulated field.

The program helps to prepare graduates with the knowledge and skills to:

- Summarize and apply the appropriate statutes and regulations to concrete situations
- Examine laws and regulations governing the management of people resources
- Gain an in-depth overview of human resources compliance programs and policies
- Leverage specialized knowledge in human resources law and regulations to achieve personal and institutional goals

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Requirements

Code	Title	Hours
Students enrolled in Northeastern University colleges other than the School of Law should contact a School of Law advisor at <a href="mailto:lawstudentaffairs@northeastern.edu">lawstudentaffairs@northeastern.edu</a> for guidance on registering for courses from the School of Law.		
LS 6102 or LW 6102	Introduction to Legal Studies 2	3

PPUA 5268	International Environmental Policy	
SOCL 7221	Globalization, Development, and Social Justice	
SOCL 7287	Social Movements in Health	

### Additional Requirements

**Co-op Requirement:** Students must complete at least one co-op related to the certificate topic. Consult an advisor about the applicability of the JD co-op.

**Writing Requirement:** Students must complete a piece of substantial writing that meets the requirements of the JD upper-level rigorous writing requirement and that has a clear connection to the certificate topic.

For additional information on requirements associated with this certificate, please consult the JD program's *Student Information Handbook*.

### Program Credit/GPA Requirements

12 total semester hours required, including at least 6 credits of LAW courses and at least 6 credits of non-LAW courses.

Students must receive a passing grade in all courses and satisfactorily complete all other requirements.

## Intellectual Property Law, Graduate Certificate

The Graduate Certificate in Intellectual Property Law is designed to provide professionals who work in intellectual property, technology transfer, licensing, or related areas, as well as inventors and entrepreneurs, with the skills they need to recognize and protect intellectual property rights.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Requirements

Code	Title	Hours
Students enrolled in Northeastern University colleges other than the School of Law should contact a School of Law advisor at lawstudentaffairs@northeastern.edu for guidance on registering for courses from the School of Law.		
LS 6102 or LW 6102	Introduction to Legal Studies 2 Introduction to Legal Studies 2	3
LS 6230 or LW 6230	Intellectual Property Survey Intellectual Property Survey	3
LS 6231 or LW 6231	Identifying and Securing Intellectual Property Rights Identifying and Securing Intellectual Property Rights	3
LS 6232 or LW 6232	Intellectual Property and Media Intellectual Property and Media	3

### Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

## Legal Design, Graduate Certificate

The Graduate Certificate in Legal Design, open to JD students, gives students the opportunity to deepen their knowledge and develop their expertise in the field of legal design.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Required LAW Courses

Requires 6 semester hours of LAW courses.

Code	Title	Hours
Complete one of the following:		
LAW 7635	Laboratory Seminar in Applied and Critical Legal Design	3-4
LAW 7662	Master Class in Legal Design	

Code	Title	Hours
Complete one of the following:		
LAW 7369	Intellectual Property	2-4
LAW 7501	Patent Law	
LAW 7614	Law Practice Management: Access to Justice	
LAW 7620	Human Behavior, Legal Doctrine, and Policy Design	
LAW 7624	Advanced Legal and Interdisciplinary Research	
LAW 7669	Law and Technology	

### Required Non-LAW Courses

Requires 6 semester hours of non-LAW courses.

Code	Title	Hours
Complete at least two courses totaling at least 6 semester hours from the following:		
ARTG 5110	Information Design History	6-8
ARTG 5150	Information Visualization Principles and Practices	
ARTG 5310	Visual Cognition	
ARTG 5600	Experience Design Studio 1: Principles	
ARTG 5610	Design Systems	
ARTG 5640	Prototyping for Experience Design	
ARTG 6310	Design for Behavior and Experience	
ARTG 6600	Experience Design Studio 2: Group and Interpersonal	
COMM 6304	Communication and Inclusion	
GSND 5110	Game Design and Analysis	
GSND 6320	Psychology of Play	
GSND 6340	Biometrics for Design	
INAM 6100	Critical Foundations of Creative Practice	
JRNL 5500	Coding for Digital Storytelling	
JRNL 6341	Telling Your Story with Data	
THTR 6100	Advanced Creative Storytelling for Social Engagement	

### Additional Requirements

**Co-op Requirement:** Students must complete at least one co-op related to the certificate topic.

**Writing Requirement:** Students must complete a piece of substantial writing that meets the requirements of the JD upper-level rigorous writing requirement and has a clear connection to the certificate topic or significantly advances a legal innovation project using legal design methods.

For additional information on requirements associated with this certificate, please consult the JD program's *Student Information Handbook*.

### Program Credit/GPA Requirements

12 total semester hours required, including at least 6 semester hours of LAW courses and at least 6 semester hours of non-LAW courses.

Students must receive a passing grade in all courses and satisfactorily complete all other requirements.

## Poverty Law and Economic Justice, Graduate Certificate

The Graduate Certificate in Poverty Law and Economic Justice, open to all JD students, gives students the opportunity to deepen their knowledge and develop their expertise in the field of poverty law and economic justice.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Required Law Courses

Code	Title	Hours
Complete one of the following:		
LAW 7358	Social Welfare Law	3-8
LAW 7362	Poverty Law and Practice Clinic	
LAW 7525	Law and Economic Development	
LAW 7561	Private Litigation in the Public Interest	
LAW 7664	Law and Inequality	
LAW 7665	Housing Law	
LAW 7684	Anatomy of Autonomy	

Code	Title	Hours
In addition, complete one of the following:		
LAW 7333	Family Law	3-8
LAW 7335	Health Law	
LAW 7336	Immigration Law	
LAW 7350	Negotiation	
LAW 7358	Social Welfare Law	
LAW 7362	Poverty Law and Practice Clinic	
LAW 7410	Domestic Violence Clinic	
LAW 7428	State Local Government	
LAW 7448	Employment Discrimination	
LAW 7463	Nonprofit Organizations	
LAW 7469	Disability Law	
LAW 7488	Sexuality, Gender, and the Law	
LAW 7491	International Human Rights and the Global Economy	
LAW 7512	Problems in Public Health Law	
LAW 7525	Law and Economic Development	
LAW 7527	Public Health Legal Clinic	
LAW 7530	Education Law	
LAW 7535	Legal Interviewing and Counseling	
LAW 7540	Employment Law—Compensation, Benefits, and Retirement	
LAW 7550	Refugee and Asylum Law	
LAW 7561	Private Litigation in the Public Interest	
LAW 7582	Elder Law	
LAW 7588	Reproductive and Sexual Rights and Health	
LAW 7597	Civil Rights and Restorative Justice Clinic	
LAW 7606	Drug Law and Policy	
LAW 7607	Consumer Law	
LAW 7608	American Legal Thought: Traditional and Critical	
LAW 7610	Community Business Law Clinic	
LAW 7657	Immigrant Justice Clinic	
LAW 7664	Law and Inequality	
LAW 7665	Housing Law	
LAW 7679	Race and the Law	

LAW 7684	Anatomy of Autonomy
LAW 7685	Human Rights, IP, and Access to Medicines

### Required Non-Law Courses

Code	Title	Hours
Complete one of the following:		4
PPUA 5245	Education Policy in the United States	
PPUA 5270	Food Systems and Public Policy	
PPUA 6506	Techniques of Policy Analysis	
PPUA 6551	Nonprofit Organizations and Social Change	
PPUA 6552	The Nonprofit Sector in Civil Society and Public Affairs	
SOCL 7221	Globalization, Development, and Social Justice	
SOCL 7227	Race and Ethnic Relations	
SOCL 7263	Social Psychology of Stratification	
SOCL 7287	Social Movements in Health	

Code	Title	Hours
In addition, complete one of the following:		4
LPSC 5201	Law and the City	
LPSC 7311	Strategizing Public Policy	
LPSC 7312	Cities, Sustainability, and Climate Change	
PPUA 5245	Education Policy in the United States	
PPUA 5270	Food Systems and Public Policy	
PPUA 6201	The 21st-Century City: Urban Opportunities and Challenges in a Global Context	
PPUA 6502	Economic Analysis for Policy and Planning	
PPUA 6506	Techniques of Policy Analysis	
PPUA 6509	Techniques of Program Evaluation	
PPUA 6551	Nonprofit Organizations and Social Change	
PPUA 6552	The Nonprofit Sector in Civil Society and Public Affairs	
SOCL 7221	Globalization, Development, and Social Justice	
SOCL 7227	Race and Ethnic Relations	
SOCL 7263	Social Psychology of Stratification	
SOCL 7287	Social Movements in Health	

### Additional Requirements

**Co-op Requirement:** Students must complete at least one co-op related to the certificate topic.

**Writing Requirement:** Students must complete a piece of substantial writing that meets the requirements of the JD upper-level rigorous writing requirement and that has a clear connection to the certificate topic.

For additional information on requirements associated with this certificate, please consult the JD program's *Student Information Handbook*.

### Program Credit/GPA Requirements

12 total credits required, including at least 6 credits of LAW courses and at least 6 credits of non-LAW courses.

Students must receive a passing grade in all courses and satisfactorily complete all other requirements.

## Privacy Law, Graduate Certificate

The Graduate Certificate in Privacy Law, open to all JD students, gives students the opportunity to deepen their knowledge and develop their expertise in the field of privacy law.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Required LAW Courses

Code	Title	Hours
Complete at least two courses totaling at least 6 semester hours from the following:		6
LAW 7640	Information Security Law	
LAW 7672	Data Privacy Compliance in the 21st Century	
LAW 7675	Information Privacy Law	

#### Required Non-LAW Courses

Code	Title	Hours
Complete at least two courses totaling at least 6 semester hours from the following list:		6
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
CY 6240	Special Topics in Privacy Law	
HINF 5101	Introduction to Health Informatics and Health Information Systems	
HINF 5102	Data Management in Healthcare	
HINF 5300	Personal Health Interface Design and Development	
JRNL 6202	Perspective on Journalism Ethics	
MKTG 6210	Marketing Research	
MKTG 6222	Digital Marketing	
MKTG 6226	Consumer Behavior	
PHIL 5005	Information Ethics	
PHIL 5010	AI Ethics	
POLS 7334	Social Networks	
POLS 7341	Security and Resilience Policy	
POLS 7441	Cyberconflict	
PPUA 5262	Big Data for Cities	

### Additional Requirements

**Co-op Requirement:** Students must complete at least one co-op related to the certificate topic.

**Writing Requirement:** Students must complete a piece of substantial writing that meets the requirements of the JD upper-level rigorous writing requirement and that has a clear connection to the certificate topic.

For additional information on requirements associated with this certificate, please consult the JD program's Student Information Handbook.

### Program Credit/GPA Requirements

12 total semester hours required, including at least 6 semester hours of LAW courses and at least 6 semester hours of non-LAW courses.

Students must receive a passing grade in all courses and satisfactorily complete all other requirements.

## United States Law, Graduate Certificate

The Graduate Certificate in United States Law offers an introduction to U.S. law for students who have completed their law degree in countries other than the United States. The asynchronous, online format provides flexibility for students seeking to expand their knowledge of law.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Foundational Course

Code	Title	Hours
LAW 6400	Introduction to U.S. Law and Legal System	3

#### Electives

Code	Title	Hours
Complete at least 10 credits of electives from the following:		10
LAW 6401	Contracts	
LAW 6402	Torts	
LAW 6403	Constitutional Law	
LAW 6404	Civil Procedure	
LAW 6405	California Professional Responsibility	
LAW 7000	Copyright	
LAW 7001	Corporate Finance	
LAW 7002	Intellectual Property	
LAW 7004	Trademark	
LAW 7005	Mergers and Acquisitions	
LAW 7006	Secured Transactions	
LAW 7007	Securities Regulation	
LAW 7009	Intellectual Property and Technology Law	
LAW 7010	Insurance Law	
LAW 7011	Personal Income Tax	
LAW 7012	Introduction to Business Organizations	
LAW 7672	Data Privacy Compliance in the 21st Century	

#### Program Credit

13 total hours required

## Women, Gender, Sexuality, and the Law, Graduate Certificate

The Graduate Certificate in Women, Gender, Sexuality, and the Law, open to all JD students, gives students the opportunity to deepen their knowledge and develop their expertise in the area of women, gender, sexuality, and the law.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Required Law Courses

Code	Title	Hours
Take at least two courses totaling at least 6 semester hours from the following list:		6
LAW 7410	Domestic Violence Clinic	
LAW 7488	Sexuality, Gender, and the Law	
LAW 7588	Reproductive and Sexual Rights and Health	
LAW 7651	Human Rights in the United States	
LAW 7679	Race and the Law	

#### Required Non-Law Courses

Code	Title	Hours
Take at least two courses totaling at least 6 semester hours from the following list:		6
ECON 5292	Gender and Development Economics	
SOCL 7273	Gender and Social Policy	
SOCL 7287	Social Movements in Health	
WMNS 5240	Feminist Resistance	
WMNS 6100	Theorizing Gender and Sexuality	
WMNS 7100	Queer Theory: Sexualities, Genders, Politics	
WMNS 7615	Feminist Inquiry	

### Additional Requirements

**Co-op Requirement:** Students must complete at least one co-op related to the certificate topic.

**Writing Requirement:** Students must complete a piece of substantial writing that meets the requirements of the JD upper-level rigorous writing requirement and that has a clear connection to the certificate topic.

For additional information on requirements associated with this certificate, please consult the JD program's Student Information Handbook.

### Program Credit/GPA Requirements

12 total credit hours required, including at least 6 credit hours of LAW courses and at least 6 credit hours of non-LAW courses.

Students must receive a passing grade in all courses and satisfactorily complete all other requirements.

## Accelerated Degrees

The School of Law offers a PlusJD pathway that allows students to accelerate the attainment of the JD degree by applying School of Law coursework completed as an undergraduate toward both the undergraduate and JD degrees. In most circumstances, all undergraduate degree requirements must be completed before the student begins their first-year JD coursework. Degrees are earned sequentially, with the bachelor's degree attainment followed by coursework to complete the JD. Interested students should consult their advisor during their freshman or sophomore years. See the PlusJD program (<https://law.northeastern.edu/admissions/jd/application-process/plusjd/>) for additional information.

## Dual Degrees

- Law, JD / Accounting and Business Administration, MSAMBA (p. 232)
- Law, JD / Business Administration, MBA—Full-Time (p. 233)
- Law, JD / Criminology and Justice Policy, PhD (p. 778)
- Law, JD / Criminology and Criminal Justice, MS (p. 779)
- Law, JD / Public Health, MPH (p. 602)
- Law, JD / Public Policy, MPP (p. 781)
- Law, LLM / Business Administration, MBA—Full-Time (p. 234)

## Law, JD / Accounting and Business Administration, MSAMBA

The Northeastern University School of Law and the D'Amore-McKim School of Business offer a combined degree that results in a Juris Doctor and Master of Science in Accounting and Business Administration. Students without a previous accounting background study how to operate effectively in specialized fields such as taxation law, corporate finance, or mergers and acquisitions. Students have an opportunity to gain advanced legal expertise alongside future-forward accounting and business knowledge.

Our combined degree program is a full-time, four-year course of study. Students usually complete two years of the law curriculum, followed by 15 months of the combined accounting and business administration curriculum, before returning to finish their studies at the School of Law.

Students gain valuable work experience in law and public accounting before they graduate. They can make a real impact during two co-ops in legal departments, law firms, government agencies, judges' chambers, or other legal settings. Students also experience working as an accounting associate during the busy tax season through a corporate residency at Big 4 or other globally known accounting firms.

Students concurrently pursue the two degrees and may count 12 semester hours of nonlaw coursework from the accounting and business administration curriculum toward the law curriculum. The corporate residency at an accounting firm may fulfill the requirement for the third co-op required for the law curriculum. Students are encouraged to consult their law advisor to select accounting and business classes that satisfy JD requirements.

## Law, JD / Business Administration, MBA—Full-Time

The JD/MBA dual degree is offered through a partnership between Northeastern University School of Law and the D'Amore-McKim School of Business to position students to operate in increasingly interdependent legal and business spheres. As new technology disrupts industries and data availability and sophisticated use shifts the business landscape, our JD/MBA (<https://damore-mckim.northeastern.edu/programs/jd-mba/>) students prepare to guide corporate-level strategy and become the leaders businesses need.

Our JD/MBA program is a full-time, four-year course of study that includes three semester-long co-op work experiences arranged through Northeastern Law. Students complete three years of law school, taking a break after either year one or two to complete a year of business courses.

Students specialize their program by selecting two in-demand business concentrations from the D'Amore-McKim School of Business. Or, they may add expertise in another professional area by selecting an interdisciplinary MBA x concentration in a highly relevant field offered through partnerships with other Northeastern colleges.

Students concurrently pursue the two degrees and may count 9 semester hours of nonlaw coursework from the JD curriculum toward the interdisciplinary and elective requirements of the MBA degree and up to 12 semester hours from the MBA curriculum toward the JD degree. Students should work with their MBA advisor to select JD courses that will fulfill MBA requirements and with their law advisor to choose MBA courses that will satisfy JD requirements.

## Law, JD / Criminology and Justice Policy, PhD

The JD/PhD program will expand the knowledge base and career options of students. The disciplines of criminology and justice policy and law share common interests in identifying opportunities to create conditions for justice, equality, and societal well-being. The dual degree will provide students with a comprehensive interdisciplinary understanding of what influences criminal justice problems and the sociopolitical, legal, and economic context in which they are found. Solving problems requires interdisciplinary knowledge and an analytical and practical skill set that includes interprofessional problem solving.

Up to 16 credits of coursework in the dual-degree program can be counted toward both the JD degree and the PhD degree. Of these 16 credits, no more than 12 credits of non-law courses can count toward the JD degree.

Students will take law courses during semesters spent in the law school. Students will take criminology courses during semesters spent in SCCJ. Please consult the School of Law (<https://www.northeastern.edu/law/>) for more information about JD requirements. Additionally, please consult SCCJ (<https://cssh.northeastern.edu/sccj/>) for more information about PhD requirements.

All JD students, including FlexJD students, are ordinarily eligible to apply into dual degree pathways.

## Law, JD / Criminology and Criminal Justice, MS

The JD/MS program will expand the knowledge base and career options of students. The disciplines of criminal justice and law share common interests in identifying opportunities to create the conditions for justice, social equality, and societal well-being. The dual degree is designed to provide students with a comprehensive interdisciplinary understanding of what influences criminal justice problems and the social, political, legal, economic context in which they are found. Solving these problems requires interdisciplinary knowledge and an analytical and practical skill set that includes interprofessional problem solving.

Up to 16 credits of coursework in the dual-degree program can be counted toward both the JD degree and the MS degree. Of these 16 credits, no more than 12 credits of non-law courses can count toward the JD degree.

Students will take law courses during semesters spent in the School of Law. Students will take criminology courses during semesters spent in the School of Criminology and Criminal Justice. Please consult the School of Law for more information about JD requirements. Additionally, please consult SCCJ for more information about MS requirements.

All JD students, including FlexJD students, are ordinarily eligible to apply into dual degree pathways.

## Law, JD / Public Health, MPH

Northeastern University's School of Law and Bouvé College of Health Sciences offer a JD/MPH dual degree. Given the worldwide trend toward urbanization, the Master of Public Health (MPH) recognizes the growing need for professionals trained to respond to unique public health challenges and opportunities facing urban populations. The MPH program brings together interdisciplinary faculty (from the School of Law, D'Amore-McKim School of Business, College of Social Sciences and Humanities, Khoury College of Computer Sciences, and the Bouvé College of Health Sciences) with expertise in collaborating with diverse urban populations to offer students an opportunity to obtain practice-based knowledge, skills, and experience needed to address public health problems.

Up to 9 credit hours of coursework in the JD program may count toward the MPH, while up to 12 credit hours of coursework in the MPH program may count toward the JD. See the JD/MPH program page (<https://law.northeastern.edu/academics/programs/jd/dual-degrees/public-health-bouve/>) for more information.

All JD students, including FlexJD students, are ordinarily eligible to apply into dual degree pathways.

## Law, JD / Public Policy, MPP

The JD/Master of Public Policy (MPP) is designed to equip graduates with a unique blend of skills for navigating a complex and rapidly changing policy landscape. The program builds on students' legal training with a compelling blend of skills in applied public policy analysis, policy design, and strategic policy formation. Students also gain career-relevant experience through internships, small group capstone projects, and other interactions with professionals in the field. All are part of a learning process designed to enable the Northeastern law and public policy graduates to navigate, and to redefine, diverse policy areas.

Ideally, students would apply to Northeastern's JD and MPP programs simultaneously. Those who apply and are admitted to both programs take MPP classes after completing their first year in the School of Law. Applicants may also be considered after they have enrolled in the JD program; interested JD students should consult the School of Law's Office of Academic and Student Affairs and the School of Public Policy and Urban Affairs graduate program director for more information.

Students enrolled in this dual-degree program will be able to count 8 JD credit hours toward their MPP degree and 12 MPP credit hours toward their JD degree. Students should consult advisors in each program if they have questions about which courses may be shared between degrees.

All JD students, including FlexJD students, are ordinarily eligible to apply into dual degree pathways.

## Law, LLM / Business Administration, MBA—Full-Time

### Law, LLM / MBA

The LLM/MBA dual degree is offered through a partnership between Northeastern University School of Law and the D'Amore-McKim School of Business to position students to harness legal and business skills to serve their clients' needs. In the LLM/MBA (<https://damore-mckim.northeastern.edu/programs/llm-mba/>) program, students prepare to assume leadership positions where they'll navigate complex legal issues, answer their clients' calls for legal expertise, and engage as partners to develop new models for businesses, nonprofit organizations, and governments worldwide.

The LLM/MBA program is a full-time, 20-month course of study. Students start taking classes in business school, take law courses next, and finish with business courses.

Students specialize their program by selecting two in-demand business concentrations from the D'Amore-McKim School of Business. Or, they could add expertise in another professional area by choosing an interdisciplinary MBA x concentration in a highly relevant field offered through partnerships with other Northeastern colleges.

Students concurrently pursue the two degrees and may be able to count up to 12 semester hours of coursework toward both degrees. Students should consult their MBA and LLM program advisors for more information.

### Law, LLM—Experiential / MBA

The LLM/MBA dual degree is offered through a partnership between Northeastern Law and the D'Amore-McKim School of Business to position students to harness business and legal skills to serve their clients' needs. In the LLM/MBA (<https://damore-mckim.northeastern.edu/programs/llm-mba/>) program, students prepare to assume leadership positions where they'll navigate complex legal issues, answer their clients' calls for legal expertise, and engage as partners to develop new models for businesses, nonprofit organizations, and governments worldwide.

The LLM/MBA program is a full-time, two-year course of study that includes a semester-long co-op work experience arranged through Northeastern Law. During the course of their studies, students take classes in business school and the School of Law and complete a law co-op.

Students specialize their degree by selecting two in-demand business concentrations from the D'Amore-McKim School of Business. Or, they could add expertise in another professional area by selecting an interdisciplinary MBA x concentration in a highly relevant field offered through partnerships with other Northeastern colleges.

Students will concurrently pursue the two degrees and may be able to count up to 12 semester hours of coursework toward both degrees. Students should consult their MBA and LLM program advisors for more information.

## Academic Progression Standards

### Academic Progress/Standing

To be in good standing, a graduate student must continuously maintain a minimum cumulative grade-point average of 3.000 on a 4.000 scale and must also make continuous satisfactory academic progress. To make SAP, a student must earn at least 66% of their cumulative attempted credits. Nonmatriculated students are required to be in good academic standing to be allowed to register for any subsequent classes.

Students are responsible for reviewing their grades and academic standing at the end of each term through the Student Hub. If there are any discrepancies, students should immediately contact the instructor(s) directly. Students who want to appeal a grade have 30 calendar days from the date the grade is posted to do so.

### Academic Probation and Dismissal

Notation of academic probation appears on a student's internal record but not on their permanent transcript.

With exception as specified by the program, a graduate (nondoctoral) student is placed on academic probation if their cumulative GPA is below 3.000 and/or if they do not earn at least 66% of their cumulative attempted credits. The student is strongly encouraged to consult with their academic and career advisor to develop an individualized success plan to improve their academic standing. Otherwise, a registration hold may be placed on the student's account.

A student whose cumulative GPA remains below 3.000, and/or does not earn at least 66% of their cumulative attempted credits in the term of enrollment subsequent to the one after they were placed on academic probation, will be academically dismissed. A student who has been academically dismissed from the college is automatically dismissed from their program of study.

### Dismissal Notification

A student will be notified about their dismissal within one week following the end of the term and has the right to appeal the dismissal decision to the college's Academic Standing Committee if they can provide documented evidence supporting an appeal. The notification of dismissal will include the appeal deadline.

Students appealing a dismissal decision may not be eligible to enroll in classes the term following their dismissal to allow time for the appeal process.

Students are responsible for reviewing their grades and academic standing at the end of each term through the Student Hub.

## Academic Resources

### Interactive Academic Integrity Checklist

The Citation and Academic Integrity Checklist ([https://www.northeastern.edu/oeprd/demo/CPS\\_AIRS/Citation%20and%20Academic%20Integrity%20Checklist/story\\_html5.html](https://www.northeastern.edu/oeprd/demo/CPS_AIRS/Citation%20and%20Academic%20Integrity%20Checklist/story_html5.html)) is a tool students can use before they turn in every assignment to ensure that they have not accidentally committed any of the most common violations of the Academic Integrity Policy. Additionally, the IAIC contains links to examples of APA- and MLA-style formatting.

### Global Student Success

10 Belvedere  
617.373.2455  
gss@northeastern.edu

Website (<https://international.northeastern.edu/gss/>)

Global Student Success is committed to supporting the success of international students at Northeastern University through cross-cultural, linguistic, and academic support services. We also partner with faculty, staff, and administrators to integrate global dimensions and cross-cultural understanding into the Northeastern experience.

### International Tutoring Center

Basement of Snell Library  
617.373.2455  
gss@northeastern.edu (gss@northeastern.edu)

Website (<https://international.northeastern.edu/gss/>)

Tutors provide high-quality ESL writing instruction and tutoring for international students who need assistance with papers, assignments, TOEFL writing, and research projects. Students can meet one-on-one with an ESL tutor for 50-minute appointments. This is a free service for Northeastern University international students.

### Online Writing Lab

Website (<https://cps.northeastern.edu/academics/online-writing-center/>)

To provide students with guided writing support, the College of Professional Studies created the Online Writing Lab (<https://cps.northeastern.edu/academics/online-writing-center/>) as laboratory courses and attached them to six undergraduate courses and one graduate course. Students submit all of their essays to their writing specialists in the labs and then receive sophisticated revision and editing strategies to help them improve their essays before submission for a final grade. Students obtain strategies to help them focus, develop, edit, and refine their writing.

### Tutoring Services

Website (<https://cps.northeastern.edu/academic-resources/tutoring-services/>)

Tutoring can benefit skilled professionals and beginning students alike. Whether you're struggling with organic chemistry, working on a long paper, or putting the finishing touches on a presentation, Northeastern University offers many opportunities for you to enhance your academic work and professional skills through free one-on-one academic support on and off campus.

## Active-Duty Military Personnel

As a member of the Service Member Opportunity Colleges, the College of Professional Studies' academic residency requirement is different for active-duty service members. Active-duty service members are required to complete 30% of the graduate certificate/degree program at the College of Professional Studies.

## Attendance Verification

### "I Am Here" Process

After course registration, students are required to verify their intent to enroll in College of Professional Studies class(es) through the Student Hub (<https://me.northeastern.edu>) during the first week of each class start. This verification process is called "I Am Here." Students who fail to complete this process on time will be dropped from the class(es), which may impact their financial aid or international student visa eligibility.

Students are responsible for ensuring completion of the IAH process, which requires that they do not log out of the system early. Students who do not receive a "Successful Completion" message have not reached the end of the procedure and must start again. Sometimes it may take 24 hours before students can restart the procedure.

A student who registers for a course and completes the IAH process but does not officially drop the course by the deadline, regardless of their level of participation or attendance/nonattendance, is responsible for paying 100% of the tuition charges and applicable fees and the final earned grade. A student in this situation may earn an F grade that will be part of their permanent academic record.

Students registering for the first time after the start of classes will have access to complete IAH the following day.

Students who experience difficulty with the process or have questions should email the Office of the University Registrar at [registrar@northeastern.edu](mailto:registrar@northeastern.edu).

## Completing Degree Requirements

### Graduate and Doctoral Degree Programs

To earn a graduate or doctoral degree, students must complete all courses as prescribed in the curriculum; the required number of credits as per the curriculum; applicable thesis or dissertation; the residency requirement; and maintain a minimum cumulative grade-point average of 3.000 or as outlined by the specific program.

### Graduate Certificate Programs

To earn a graduate certificate, students must complete all courses as prescribed in the curriculum; the required number of credits as per the curriculum; the residency requirement; and maintain a minimum cumulative GPA of 3.000 or as outlined by the specific program.

### Time Limit on Courses

Graduate course credits earned in the academic program or accepted by transfer are valid for a maximum of seven years.

### Time Limit on Program Completion

- Graduate certificate students have up to three full years from the time of the first term of enrollment to complete the program.
- Master's degree students have up to seven full years from the time of the first term of enrollment to complete the program.
- Doctoral degree students, with the exception of the Transitional Doctor of Physical Therapy, have up to seven full years from the time of the first term of enrollment to complete the program.
- Transitional Doctor of Physical Therapy students have up to four full years from the time of the first term of enrollment to complete the program.

*Note:* The College of Professional Studies makes adjustments to its academic program offerings and curricula to stay current and to be able to offer students the most relevant courses and knowledge in the field. Examples of such changes include adding new programs, adding/adjusting course requirements, adding/adjusting courses, and adding/adjusting curriculum requirements.

When there is a change to a curriculum or program requirement, students already matriculated and actively enrolled in the program may continue to follow the program requirements at the time of matriculation or to follow the new curriculum/program requirements, unless it is otherwise specified by the academic program at the time of the announcement of said changes.

## Degrees, Majors, and Concentrations

### **Change of Major/Program of Study**

A graduate (nondoctoral) student matriculated in a certificate/degree program who would like to enroll in a different graduate program, after consulting with their academic advisor, must apply to the intended program by submitting the Change of Major form.

Previously awarded transfer credit awards are subject to change as a result of a program change. Students on financial aid or an international student visa are responsible for understanding the impact that results from a program change.

Doctoral students must consult with their program director or designee.

### **Concentrations**

Only university-approved concentrations are noted on a student's official academic record. If a student pursues a customized specialization, no concentration will be noted on their official academic transcript. Students who wish to pursue a customized specialization must consult with their academic advisor and seek approval from the academic program.

## Full-Time Status

A graduate (nondoctoral) student is considered a full-time student if they are enrolled in 9 quarter hours of graduate credit for the quarter. An exception is made for students matriculated in master's degree programs that only require 4 credit courses, in which case full-time student status is attained with enrollment in 8 quarter hours of graduate credit for the quarter.

A doctoral student's full-time status is determined by the structure of the program.

Note that full-time status may be defined differently for federal loan purposes. International students have other considerations/requirements to maintain their visa eligibility.

## Course Load

Federal financial aid recipients must be enrolled in and successfully complete a minimum number of credits each term to maintain eligibility. For more information, contact your financial aid counselor.

## Course Overload

A maximum course load (different from full-time status) for a graduate (nondoctoral) student is 16 credits taken across a 12-week term, with no more than 8 credits per 6-week session.

To be eligible for a course overload (greater than 16 credits per 12-week term or greater than 8 credits per 6-week session), a graduate (nondoctoral) student must:

- Have a record of successful study with 12 or more credits a term at Northeastern University
- Have a minimum cumulative grade-point average of 3.500
- Provide a rationale to support the request

Students need to complete the appropriate form and return it to their career and academic advisor. Course overload is approved per term.

Each doctoral program has its own enrollment and course load requirements. Doctoral students who wish to seek a course overload must consult with the program director or designee.

## International Student Enrollment Requirements

### IMPORTANCE OF MAINTAINING F-1 STATUS

International students studying at Northeastern are responsible for maintaining compliance with U.S. federal regulations. Failure to maintain full-time enrollment, in accordance with these regulations, can result in consequences. Regular consultation with college academic advisors, as well as Office of Global Services international student advisors, is required before taking any action that may impact immigration status and educational endeavors in the United States.

### ACHIEVING FULL-TIME ENROLLMENT STATUS

Full-time enrollment status must be maintained by F-1 students throughout the academic year. To achieve full-time status, graduate students must be enrolled in 8–9 credits throughout each academic term. Students can consult with their college academic advisor prior to each term to develop a course schedule to maintain full-time status. F-1 students are expected to study on-ground and cannot enroll in an online course without first speaking to a college academic advisor to confirm eligibility. If approved, F-1 students who need to withdraw/drop from a course must withdraw/drop from the additional online course first and not from any of the on-ground core courses in order to maintain full-time status.

### COLLEGE OF PROFESSIONAL STUDIES ACADEMIC TERM

In CPS, each academic term in fall, winter, and spring is defined as a quarter term consisting of 12 weeks. Some courses are scheduled for the entire 12 weeks, while others are scheduled for either the first 6 weeks or the last 6 weeks (parts of a term). A full summer term consists of 8 weeks. Some courses are scheduled for the entire 8 weeks of a term, while others are scheduled for parts of a term.

### FINAL TERM

F-1 students are required to maintain full-time enrollment status, except in the final academic term of degree completion. If the course requirements for degree completion are less than 8–9 credits, they must be completed on-ground throughout the entire final term.

### ELIGIBILITY FOR SUMMER TERM OFF

All students, regardless of the term in which they begin studies, (e.g., CPS winter or spring quarter terms) are eligible to take the summer term off as their standard vacation term, as long as they confirm enrollment in the following fall term and they are not starting or ending their program of study in that same summer term.

## Directed Study

Directed studies are offered when a course is required for a student's program of study but said course is not available in a given academic term and there is immediacy for a student to complete said course. Academic deans/directors will make the decision if there is a compelling need to run a course as a directed study.

## **Independent Study**

Independent study is an opportunity for a degree student to work independently under the supervision of an instructor to undertake special research, literature review, or experimental study projects in areas related to their program of study that they cannot accomplish as part of a standard course in the curriculum. A degree student may take up to two independent studies. The work to be done for an independent study is usually crafted by the student, with faculty input. Independent studies are entirely optional and not needed to graduate. A completed Request for Independent Study form, signed by both the student and the faculty member, must be submitted to the academic program for review and approval.

## Global Partnership Programs

Students enrolled in a College of Professional Studies' global partnership or a combined major program are required to abide by the policies and procedures of both institutions or as specified in their program.

Combined major candidates must apply to graduate at each institution by following each institution's policies and procedures.

## Graduate Campus

Students enrolled in a Northeastern University graduate (regional) campus are also required to abide by the policies and procedures specific to that campus.

## Graduation Requirements

### Graduation Procedures

Only students who complete the graduation application process by specified deadlines will be considered for graduation and included in the graduation ceremony program. All qualified students must submit a graduation application in order to receive their diploma, regardless of whether they plan to attend the graduation ceremony.

Note important definitions: “Degree conferral date” and “graduation ceremony date” do not mean the same thing. Degree conferral date refers to the date of the university’s official recognition of degree completion. For the purposes of the graduation application, that is accessed via the Student Hub. The “expected graduation date” (EGD) is the same as the degree conferral date. Northeastern University confers degrees four times each academic year: winter, spring, summer, and fall. The graduation ceremony date is the date that the college hosts the annual graduation ceremony.

Doctoral candidates must be mindful of additional deadlines to complete their dissertation/thesis in time to be eligible for degree conferral and participation in a doctoral hooding and a graduation ceremony.

Each fall, the Office of the University Registrar sends an email notification to students who may be eligible to graduate that academic year about applying to graduate. This email notification informs and instructs students to complete the “Apply to Graduate” process, accessed via the Student Hub. Students are prompted to verify and provide critical information, e.g., spelling of the student’s name on the diploma, intent to participate in the graduation ceremony, and mailing address.

An accurate EGD is required to gain access to the graduation application. The EGD is also used by clearinghouses to determine loan deferment schedules. If your EGD is not correct, contact your designated learner services specialist.

### Diploma

The following rules apply to the diploma.

- Information that will be printed on diplomas:
  - The major will be printed on diplomas for nonspecified degrees only (Master of Science, Master of Arts, Master of Professional Studies, Certificate of Advanced Graduate Study, Doctor of Philosophy).
- Changes made to a student’s name after the diploma has been printed may be subject to a \$50 fee and take more than one month to reprint.
- Changes made to a student’s degree information and name submitted after the program deadline will not be noted in the graduation ceremony program. If a diploma was previously printed, it will need to be reprinted and can take more than one month.

## Master's Degree Admission Requirements

Note that all master's degrees offered through the College of Professional Studies have the following admission requirements:

- Online application
- Statement of purpose (500–1,000 words)
- Professional resumé
- Official undergraduate transcript(s) noting conferral of a bachelor's degree
- Two letters of recommendation
- English-language proficiency proof (for non-native English-language speakers)
- TOEFL, IELTS, or TOEIC scores

Some programs have additional requirements.

The college reserves the right to rescind an offer of acceptance if the student is no longer considered in good academic or disciplinary standing between the time of acceptance and matriculation.

### **New Student Orientation (On-Ground and Online)**

New students taking courses on-ground receive an invitation to the on-ground orientation. The purpose of New Student Orientation is to provide information and tools for each student's success from the point of program entry to degree completion. All new students are expected to attend the on-ground orientation. If students cannot attend the on-ground orientation, they should thoroughly review the New Admitted Students (<http://www.orientation.cps.northeastern.edu>) site.

## Personal Professional Enrichment (PPE)

Students interested in taking graduate-level (nondoctoral) courses for personal or professional enrichment need to complete an online application (<http://www.cps.neu.edu/admissions/graduate/>) as PPE students. Once approved, students will be able to register through the Student Hub (<https://me.northeastern.edu>).

- Students on PPE status are expected to satisfy applicable course prerequisites before enrolling in a course.
- Students taking courses while on PPE status may elect to apply to a graduate certificate or degree program by completing the formal application process (<http://www.cps.neu.edu/admissions/graduate/>). Up to two qualifying courses (or 8 credits) completed while on PPE status may be applied to the intended program of study. To be eligible, the minimum earned grade for the course(s) must be B.
- Students taking courses under PPE status are not eligible for financial aid.

PPE status is not an option for students seeking an F-1 visa.

## Readmission to Program

A new admission application is required of students whose studies are interrupted voluntarily for more than three years.

Students are expected to meet the requirements of the program curriculum current at the time of the approved readmission. If the program into which the student is seeking readmission is no longer offered, the student may apply to another program and must meet the admissions requirements for that program. Contact the Office of Admissions (<http://www.cps.neu.edu/admissions/>) for assistance and to complete the admission application.

If readmitted, transfer credits that a student was previously awarded will be reevaluated following the transfer credit award rules current at the time of readmission. It is at the discretion of the academic program to determine applicability of courses previously completed.

## Reentry to Program

Application for reentry into any academic program is required of students whose studies are interrupted voluntarily for a period of one to three years. Students who are dismissed academically must wait at least one academic term before applying for reinstatement.

Students are expected to meet the requirements of the program curriculum current at the time of the approved reentry. If a student does not enroll in the term in which they were approved for reentry, they must follow the curriculum requirements for the term in which they resume coursework with approval. If a student waits for more than one year to resume their studies after being approved for reentry, they will have to apply for reentry again.

If the program into which the student is seeking reentry is no longer offered, the student may choose to enroll in another program if they meet the admissions requirements for that program. Contact the Office of Academic Advising (<https://cps.northeastern.edu/academic-resources/advising/>) for assistance and to complete the appropriate form.

## Registration and Taking Courses

### Course Registration

For course registration information, visit the College of Professional Studies webpage (<http://www.cps.neu.edu/class-registration/>).

Course registration procedures are as follows:

- Newly accepted and returning students add or drop courses through the Student Hub any time during the registration period.
- Certificate- and degree-seeking students whose studies have been interrupted voluntarily for one to three years or more need to first apply for reentry through the Office of Academic Advising before registering for course(s).
- Global program students should consult with their program to determine if they need to register on their own or if the program will register them.

All students need to be mindful of the college's course add/drop policies and deadlines to register as early as possible with the intent to secure a spot in the preferred course and to avoid being charged in full for missing the course drop/withdrawal deadline.

### Auditing a Course

Graduate (nondoctoral) students are permitted to audit graduate (nondoctoral) courses, but they must complete the usual registration process and pay regular tuition fees. There is no reduction in fees for auditing.

An auditor may participate in class discussions, complete papers and projects, and take tests and examinations for informal evaluation. Regardless of the amount or quality of work completed, however, no academic credit will be granted at any time for audited courses. In addition, audited courses may not be used in the determination of enrollment status for financial aid purposes and do not count toward program completion.

The student's decision to audit a course must be communicated in writing to the Office of the University Registrar before the fourth class meeting for 12-week courses. For 4-, 6-, and 8-week courses, requests must be received by the second class meeting. No exception to this procedure may be approved without the authorization of the college's academic standing committee.

If approved, the student should inform the instructor of their status as auditor of the course.

### Course Selection and Planning

Students should refer to their degree audits for program curriculum information, to select courses, and to monitor their progress toward degree completion. Students should access their degree audits through the Student Hub or request an audit from their academic advisor. Degree audits are unofficial records of academic progress. Students are encouraged to consult with their academic advisor about their academic planning.

### Course Prerequisites

Course prerequisites are courses that are required to have been completed prior to enrolling in another course. Before registering for a course through the Student Hub, students, regardless of matriculation status, should consult the academic catalog to determine whether they have satisfied the course prerequisites.

### Course Corequisites

Course corequisites are courses that are required to be taken concurrently. Before registering for a course through the Student Hub, students, regardless of matriculation status, should read the course description to determine if there is a corequisite requirement and register for both courses.

### Retaking a Course

If a student wishes to improve their cumulative grade-point average by retaking a course, they may do so. Only the grade earned in the last attempt is used to compute the GPA while all grades remain part of the student's permanent academic record. A student is required to pay the normal tuition charges for all retaken courses. A student may not retake more than two nonrepeatable courses or 8 quarter hours of credit, whichever is greater, to satisfy the requirements of the degree.

Financial aid recipients must be mindful that retaking a course could impact their aid eligibility. Students with questions about this possible impact should contact their financial aid counselor.

### Course Waiver

A course waiver may be awarded to a student who has completed the equivalent course at an accredited institution other than the College of Professional Studies in the past five years. The waiver will exempt the student from completing the required course. The student will complete another course, as approved by the program, to satisfy the number of credits required for the program.

Doctoral students must consult with their academic program to determine if course waivers are permitted.

### Duration of Courses

Each full fall, winter, and spring term runs for 12 weeks. Each full summer term runs for 8 weeks.

Course durations are as follows:

- During the fall, winter, and spring terms, courses are scheduled for either 6 or 12 weeks.
- During the summer term, courses are scheduled for 4, 6, or 8 weeks.

### **Course Add/Drop Policy**

Refer to the academic calendar (<http://www.northeastern.edu/registrar/calendars.html>) for specific dates. Students should consult with their academic advisor before adding or dropping classes.

Students may add a 4-week or 6-week course within the first week of the course. For 8- and 12-week courses, students may add a course within the first 2 weeks of the course. Students who add a class during the add/drop period are responsible for all assignments missed prior to enrolling. Enrolled students are responsible to attend classes during the add/drop period, and absences will be held accountable to the instructor's attendance policy.

Students who drop a course before the add/drop deadline will not be charged for the course and will not have a W (withdrawal) on their transcript. Thereafter, students are responsible for 100% of the tuition charges and applicable fees and the earned grade will be on the students' permanent academic record. All such dates are specified in the academic calendar.

Students must add/drop courses using the Student Hub.

A reduction in a student's course load could affect a student's international student visa status or financial aid eligibility.

Students who experience difficulty adding or dropping a course should promptly email ([registrar@northeastern.edu](mailto:registrar@northeastern.edu)) the Office of the University Registrar. If it is determined that there is an issue with the student's Student Hub account or access, they need to contact the Service Desk at 617.373.4357 (HELP); [help@northeastern.edu](mailto:help@northeastern.edu).

Students with holds (e.g., financial, judicial) may have restricted access to add, drop, or withdraw from a course. In such instances, students are responsible for resolving the hold immediately and to meet the established course registration deadlines.

### **Course Withdrawal Policy**

Refer to the academic calendar (<http://www.northeastern.edu/registrar/calendars.html>) for specific dates. All students are encouraged to consult with their academic advisor prior to withdrawing from a course.

Students who withdraw from a course after the add/drop deadline and before the last day to withdraw will receive a W grade and will be responsible for 100% of the tuition charges and applicable fees. The W grade does not affect the calculation of the GPA but it does impact a student's academic progression, which may result in the student being placed on academic probation or dismissal.

Students must withdraw from courses using the Student Hub.

A reduction in a student's course load could affect a student's international student visa status or financial aid eligibility.

Students who experience difficulty withdrawing from a course should promptly contact the Service Desk at 617.373.4357 (HELP); [help@northeastern.edu](mailto:help@northeastern.edu).

Students who fail to withdraw from a course by the deadline, regardless of their level of class participation or attendance, are financially and academically responsible. A student's lack of participation/attendance will likely result in a final grade of F.

Withdrawals may impact a student's time to degree completion.

## Reinstatement after Academic Dismissal

A student who is academically dismissed from the College of Professional Studies is not eligible to register again for courses at CPS until they are approved for reinstatement. A student may apply for reinstatement after a minimum of one academic term if they can provide documented evidence supporting the application (e.g., completed two graduate courses with a grade of B or higher at another accredited college or relevant professional development opportunities during the one-term absence). The application must be made in writing by submitting the appropriate form and providing supporting documentation to the Office of Academic Advising (<https://cps.northeastern.edu/academic-resources/advising/>).

If reinstatement to the college is approved, a student is expected to meet the most current program admissions and curriculum requirements.

A student approved for reinstatement but who does not meet the admissions requirements for the intended program of study, or if the intended program of study is no longer available, may apply to another program.

Students reinstated must achieve good academic standing in the first term of reinstatement.

## Seeking More than One Certificate or Degree

A graduate (nondoctoral) student can be enrolled in only one graduate program at a time.

Graduate (nondoctoral) students seeking more than one certificate or degree after having completed a program should note that graduate credits earned toward:

1. A degree at any institution may not be used to satisfy the requirements of another graduate program.
2. A degree earned at the College of Professional Studies may be used to satisfy the requirements of a graduate certificate with a cap of 50% of the required credits of a graduate certificate, if the contents are determined to be applicable per the program director and if the credits were earned within seven years of pursuit of the certificate.
  - a. If the same course is required in the degree and certificate programs and the student has exceeded the maximum number of credits that can be applied in the certificate program, they may request a course substitution to be permitted to take another course instead of repeating the course.
3. With specified exception, a certificate earned at the College of Professional Studies may be used to satisfy the requirements of a graduate degree, if the contents are determined to be applicable per the program director and if the credits were earned within seven years of pursuit of the degree.
4. A certificate earned at the College of Professional Studies may be used to satisfy the requirements of a second certificate with a cap of one course of no more than 4 credits, if the contents are determined to be applicable per the program director and if the credits were earned within seven years of pursuit of the certificate.
  - a. If the same course is required in both certificate programs and the student has exceeded the maximum number of credits that can be applied in the second certificate program, the student will request a course waiver to be permitted to take another course instead of repeating the course. See Course Waiver (p. 801) section.
5. A certificate earned at another accredited institution may be accepted as transfer credits to satisfy the requirements of a graduate degree with a cap of four 3-credit courses or three 4-credit courses (no more than 12 credits), if the contents are determined to be applicable per the program director and if the credits were earned within seven years of pursuit of the degree.

A graduate (nondoctoral) degree student who wishes to pursue a graduate certificate concurrently may seek admission in the certificate program by the end of their first term of matriculation in the degree program. Courses that satisfy requirements for both the degree and certificate will count for each.

- When the certificate is identical to a concentration in a degree program, only the certificate credential will be earned. The student's transcript will not indicate completion of a concentration.

## Special Student Status

Graduate applicants to the College of Professional Studies may be eligible to take up to 16 graduate (nondoctoral) quarter hours toward their program while completing the formal application process by seeking special student status (<http://www.cps.neu.edu/admissions/graduate/special-students.php>).

- Students taking courses under special student status are expected to satisfy applicable course prerequisites before enrolling in a course.
- Students taking courses under special student status are not eligible for financial aid.
- Special student status does not guarantee acceptance.
- The maximum number of courses students may take under special student status is two. After completing two courses, students will be blocked from further course registration until they have been officially accepted into a program.

The following programs are not available for special student status: Master of Arts in Teaching (MAT); Master of Education, Special Education Concentration; Master of Science in Applied Nutrition; Doctor of Education; Doctor of Law and Policy.

Special student status is not an option for students seeking an F-1 visa.

## Student Evaluation of Courses

Students play a critical role in the university's commitment to quality teaching and academic excellence when they participate in the evaluation of courses, an online survey students complete anonymously. Students are expected to participate in the course evaluation process with constructive feedback that is relevant to teaching and course content.

Students may access the course evaluation summary results from previous terms via the Student Hub (<https://me.northeastern.edu/>). Courses with three or fewer students enrolled are not surveyed.

## Transfer Credit Policies

All graduate transfer credit awards are made on a case-by-case basis. Transfer credit awards are made for eligible courses successfully completed at regionally and programmatically accredited institutions. The Council for Higher Education Accreditation provides information about the organizations responsible for these two forms of accreditation. Official transcripts from all institutions should be sent directly to the College of Professional Studies Office of Admissions at the time of application.

Students seeking transfer credits earned at institutions outside the United States should submit an official English evaluation completed by an approved credential evaluator. Course descriptions and/or syllabi also should be translated into English and submitted to the College of Professional Studies Office of Admissions.

A maximum of 12 quarter hours or four 3-credit courses or three 4-credit courses obtained at another institution may be accepted as transfer toward the degree, provided the credits consist of work taken at the graduate level for graduate credit, carry minimum grades of B (or 3.000 on a 4.000 scale), have been earned at an accredited institution or equivalent, and have not been used toward any baccalaureate or advanced degree or certificate of advanced graduate study at another institution.

Transfer credits must be no more than five academic years old at the time the student is admitted to graduate study. Courses older than five years will be accepted only in rare circumstances.

### Prior Learning Assessment

Students may be eligible for PLA credit if they have accrued a foundation of knowledge and skills equivalent to the content of courses offered by the College of Professional Studies.

Awarded credits are incorporated into a student's degree plan as transfer credits and are subject to the university's residency requirement. PLA credit is limited to a maximum of 12 quarter hours for graduate students. Acceptable credits for PLA review are credits from certificates, training, and a portfolio review of prior work experience. As part of consideration for PLA credits, faculty will evaluate and map learning outcomes and achievement in alignment with NECHE accreditation requirements.

Potential PLA credits should be considered and discussed as part of a student's transfer credits at the time of enrollment. Interested students should contact their academic advisor for more information.

### Graduate Certificate Transfer Credit Policies

- A maximum of 4 quarter hours of transfer credit

### Master's Degree Transfer Credit Policies

- A maximum of 12 quarter hours of transfer credit

### Doctoral Degree Transfer Credit Policies

- A maximum of 9 quarter hours of transfer credit for Doctor of Education students
- A maximum of 8 quarter hours of transfer credit for Transitional Doctor of Physical Therapy students
- No transfer credit is awarded for students in the Doctor of Law and Policy program

## Doctoral Degree Programs

Designed to provide you with the skills and knowledge needed to succeed, Northeastern University's College of Professional Studies doctoral programs are guided by industry-leading faculty and built on a foundation of experience in policy, research, and administration. Reach the top of your field with coursework and research projects that are relevant to today's professional on a schedule that fits your lifestyle.

### Programs

#### Doctor of Education (EdD)

- Education (p. 809)

#### Doctor of Law and Policy (DLP)

- Law and Policy (p. 813)

#### Transitional Doctor of Physical Therapy (DPT)

- Transitional Doctor of Physical Therapy (p. 814)

## Education, EdD

The Doctor of Education (EdD) empowers students to bring about solutions to complex problems of practice in their local context, while leveraging a global network to magnify students' boundless experiential learning to build a more socially just world. The Dissertation in Practice, the culminating component of the degree, is designed to prepare leaders who can construct and apply knowledge to transform their organizations and communities through laboratories of practice where students implement change and then measure and analyze the impact to improve their professional practice. This knowledge is the start of students' potential for meaningful change work. Students magnify their ability to generate socially just change by leveraging Northeastern University's global network of students, alumni, employers, and entrepreneurs.

### Admission Requirements

Note that all Doctor of Education degrees offered through the College of Professional Studies have the following admission requirements:

- Online application
- Academic transcripts (undergraduate **and** graduate)
- Admissions statement (1,000–1,200 words)
- Minimum of three years of professional work experience in a related field
- Professional resumé
- Faculty recommendation
- Two professional recommendations
- English-language proficiency proof (for non-native English-language speakers)

### HIGHER EDUCATION ADMINISTRATION CONCENTRATION

The Higher Education Administration concentration provides an opportunity for experienced higher education professionals to examine new and deepen previous understanding of practices within all sectors of postsecondary education. Sectors examined include community colleges, four-year colleges, for-profit institutions, and research universities. The increased globalization of higher education is addressed throughout the program. The concentration courses allow experienced higher education professionals to advance their professional practice by developing and deepening their understanding of the roles of colleges and universities in our society. Specifically, this concentration provides the opportunity to:

1. Be well-grounded in areas essential to understanding and articulating the educational roles of colleges and universities that include:
  - Cultural, ethical, and societal issues that affect higher education
  - History of higher education worldwide
  - Organization, governance, leadership, and administrative theories and practices
  - Higher education finance, law, and planning
2. Develop skills and knowledge for establishing and sustaining initiatives in higher education.
3. Address the challenge of ensuring educational equity through an evaluation of the roles, functions, and interrelationships among a college's or university's major constituents, including students, faculty, staff, and alumni.
4. Conduct research at the worksite that contributes to the resolution of an urgent and complex problem of practice.

### INNOVATIVE TEACHING AND LEARNING

The Innovative Teaching and Learning concentration focuses on transforming education through innovation, justice, and policy by providing engaging opportunities for current and aspiring teaching and learning specialists working in a variety of educational spaces. In a global, ever-changing educational environment, cultivating strong teaching and learning specialists is critical to building strong, safe, and equitable learning spaces. The concentration focuses on teaching and learning both inside and outside the bounds of P–20 schools. Through a focus on developing and leading innovative curriculum and professional development, the coursework and programmatic experiences are experiential—offers opportunity for learning and growth in connection with partners in the field; modular—develops specialized professional knowledges; and justice-oriented—enables an understanding of change processes that deconstruct systemic injustice at all educational levels. Specifically, the Innovative Teaching and Learning concentration provides the opportunity to:

- Develop the ability to improve teaching and learning through innovation
- Design classroom, curriculum, and professional development that lead to greater achievement and equity
- Design systems to address race, class, and gender inequities in education
- Leverage partnerships with business and community to expand networks and experiences

### INTEGRATIVE STUDIES CONCENTRATION

The Integrative Studies Concentration provides an opportunity for students to design a program of study that includes the program-required foundation and research courses, concentration courses from any EdD concentration, and electives from the Doctor of Education or Doctor of Law and Policy programs.

### TRANSFORMATIVE SCHOOL LEADERSHIP

The Transformative School Leadership concentration provides innovative opportunities for experienced education professionals who are current and aspiring leaders of early childhood centers, public or private schools, or school districts. In a global, ever-changing educational environment, cultivating strong educational leaders is critical to building strong, safe, and equitable learning spaces. In preparing to meet complex and nuanced

educational challenges, school leaders need to be knowledgeable and innovative, capable of facilitating the generation and advancement of new ideas and strategic initiatives, and equipped to shape the needs of education in K–12, higher education, organizational contexts, and beyond. Through deeper engagement with these components, the Transformative School Leadership concentration prepares students to lead and transform educational spaces P–12. The coursework and programmatic experiences are experiential—offers opportunity for learning and growth in connection with partners in the field; modular—develops specialized professional knowledges; and justice-oriented—enables an understanding of change processes that deconstruct systemic injustice at all educational levels. Specifically, this concentration provides the opportunity to:

- Develop the ability to shape a vision of academic success for all students
- Develop leadership capacity in others
- Manage people, data, and processes to develop innovative skills and knowledge
- Design systems to address race, class, and gender inequities in education
- Leverage partnerships with business and community to expand networks and experiences

### WORKPLACE LEARNING

The Workplace Learning concentration embraces the value of equity through instruction grounded in the concept of enabling people of all backgrounds, networking across the globe, to achieve their potential and the belief that social issues matter in workplace learning and development. This doctoral concentration in Workplace Learning helps learning professionals gain a deeper understanding of, recognize, and influence real-life social inequalities marginalized populations face in the workplace. The concentration courses allow experienced learning professionals to advance their professional practice by developing and deepening their understanding of workplace learning, organizational dynamics, learning strategy, and ethics. Specifically, this concentration provides the opportunity to:

- Articulate the issues facing workplace learning
- Develop skills and knowledge for establishing and sustaining initiatives and partnerships in workplace learning
- Conduct research in the workplace that contributes to the resolution of an urgent and complex problem of practice

---

*Students who do not qualify for the doctoral degree, but who have completed required coursework with a cumulative GPA of 3.000 or better, may be eligible to receive a terminal CAGS Education Leadership Management (<http://catalog.northeastern.edu/graduate/professional-studies/doctoral-degree-programs/education-leadership-management-cags/#text>). Note that no students will be admitted directly into the CAGS Education Leadership Management (<http://catalog.northeastern.edu/graduate/professional-studies/doctoral-degree-programs/education-leadership-management-cags/#text>) program.*

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

*Note:* A minimum of 51 quarter hours must be taken at the College of Professional Studies.

### Required Foundation Courses

Code	Title	Hours
EDU 7207	Foundations of Doctoral Studies	3
EDU 7218	Leadership for Social Justice	3
EDU 7219	Foundations of Collaboration, Leadership, and Change	3

### Required Research Courses

Code	Title	Hours
EDU 7225	Fundamentals of Research	3
EDU 7226	Research Design	3
EDU 7294	Advanced Research Design 1	3
EDU 7295	Dissertation in Practice Seminar	3
EDU 7310	Advanced Research Design 2	3

### Concentrations

Complete one of the following concentrations:

- Higher Education Administration
- Innovative Teaching and Learning
- Integrative Studies
- Transformative School Leadership (p. 812)
- Workplace Learning (p. 812)

**Dissertation in Practice**

Code	Title	Hours
EDU 8750	Proposal, Action Step, and Evaluation	6
EDU 8760	Action Research Results and Dissemination	6

**Residency Requirement:** Each student is required to attend two residency events. Dates and other event information are released annually. Seattle and Charlotte students will satisfy residency requirements through regional campus hybrid coursework.

**Elective List**

Complete four courses from the EDU 7000 level. Below is a list of courses regularly offered as electives within the Doctor of Education program.

Code	Title	Hours
EDU 7227	The Power of Experiential Learning	
EDU 7228	Bringing Experiential Learning, Assessment, and Reflection to Life	
EDU 7229	The Experiential Learning Leader	
EDU 7230	Current and Emerging Practice in STEM Education	
EDU 7245	Urban Education	
EDU 7251	Student Engagement in Higher Education	
EDU 7256	Financial Decision Making in Higher Education	
EDU 7260	Comparative International/Global Higher Education	
EDU 7261	International Student Markets	
EDU 7266	Contemporary Issues in Community Colleges	
EDU 7274	Doctoral Seminar in Organizational Leadership and Communication	
EDU 7314	Collaboration and Networks in Educational Leadership	
EDU 7317	Collaboration and Networks in Teaching and Learning	
EDU 7510	Data-Driven Decision Making	
EDU 7511	Digital Workplace Learning	

Doctor of Education Advanced Graduate Credit (<https://cps.northeastern.edu/admissions-aid/graduate-admissions/graduate-transfer-credit/doctor-of-education-advanced-graduate-credit/>)

**Program Credit/GPA Requirements**

EDU 7502	The Dynamics of Workplace Learning	3
EDU 7503	Leading the Learning Strategy	3
EDU 7504	Diversity, Equity, and Inclusion in Workplace Learning	3

## Law and Policy, DLP

Public servants, executives, and managers operate in an increasingly complex global environment. A doctoral education seeks to provide the policy, analytic, and research skills necessary to advance one's career.

Developed jointly by the College of Professional Studies and Northeastern's Public Policy program, the Doctor of Law and Policy program (DLP) is designed for experienced professionals who are interested in the origins, development, implementation, and analysis of legal and public policy decisions in government and related institutions. The program prepares students to advance their careers within a variety of fields while focusing their thesis research on a precise law and policy topic.

Students undertake the DLP in order to understand the ways in which public and related institutions formulate and execute policy. Students have the opportunity to develop the ability to interpret and assess the research of others, to acquire skills as researchers, and to communicate their knowledge to a wide range of audiences. Those who successfully complete the degree are equipped to bring their skills and knowledge to senior policy and management positions in government, nonprofit agencies, research organizations, consulting firms, and corporations.

The DLP program is structured so course work and the doctoral thesis can be completed in two years. Classes meet one weekend per month in Boston, and the learning continues online throughout the rest of the month.

Northeastern University also offers a traditional PhD in Public Policy. To learn more, visit the Public Policy program website (<https://cssh.northeastern.edu/policyschool/program/phd-in-public-policy/>).

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Required Courses

Code	Title	Hours
LWP 6118	Historical Foundations of American Law	3
LWP 6119	Current Law and Policy Debates: Our Nation's Capital and Beyond	3
LWP 6120	Law and Legal Reasoning 1	3
LWP 6401	Law and Policy Concepts 1: The Policymaking Process	3
LWP 6424	Research Methods	3
LWP 6121	Law and Legal Reasoning 2	3

LWP 6503	Doctoral Research Design 4	6

### Program Credit/GPA Requirements

69 total quarter hours required

Minimum 3.000 GPA required

## Transitional Doctor of Physical Therapy, DPT

Designed for practicing physical therapists, the Transitional Doctor of Physical Therapy (tDPT) is an innovative, 100 percent online program. Integrating art and science, as well as professional and experiential learning, this curriculum provides the necessary coursework to earn a terminal doctoral degree in physical therapy. Students who have earned a bachelor's degree in physical therapy will enter the program as Direct Entry students and will be required to take a core of six courses plus two electives (33 quarter hours). Students who have previously earned a master's degree in physical therapy will be required to take five core courses and one elective (24 quarter hours). All students will culminate their tDPT curriculum with the capstone course, Comprehensive Case Analysis (PTH 6900). Students have an opportunity to prepare a comprehensive and publishable case report or other scholarly work in partial fulfillment of the requirement for a tDPT degree.

Upon entrance to the Transitional Doctor of Physical Therapy program, students will select either the educational or clinical track to follow. Selecting the educational track will enable the student to focus their coursework within the educational realm. Selecting the clinical track will allow the student to focus on current clinical practice in their elective(s) as well as completing a capstone project within their clinical domain.

One of the two elective requirements may be waived in certain circumstances, i.e., if the physical therapist holds an ABPTS or similar certifications. In certain circumstances, other elective options may be considered with program director approval. Students work with their advisor and the program director for their individual course plan of study.

### Direct Entry Program Requirements (BS)

*Note:* 33 quarter hours are required for students entering with a Bachelor of Science in Physical Therapy.

#### Required Courses

Code	Title	Hours
PTH 6110	Diagnostic Imaging	4
PTH 6101	Medical Screening and Nutrition for Physical Therapists	5
PTH 6130	Pharmacology	3
PTH 6140	Motor Control	4
PTH 6200	Research Methods and Statistical Analysis	5
PTH 6900	Comprehensive Case Analysis	4

Upon entrance to the Transitional Doctor of Physical Therapy program, students will select either the educational or clinical track.

#### Educational Track

Code	Title	Hours
PTH 6430	Educational Strategies for Effective Healthcare Delivery	4
PTH 6235	Administrative and Management Keys for Contemporary Physical Therapist Practice	4

#### Clinical Track

Code	Title	Hours
Complete two of the following:		8
PTH 6480	Evidence-Based Exercise for the Older Adult	
PTH 6490	Pediatric Physical Therapy: Emerging Topics and Evidence-Based Practice	
PTH 6563	Evidence-Based Examination and Outcomes for Lumbar Spine and Sacroiliac Joint	
PTH 6564	Evidence-Based Examination and Outcomes for Lower Extremity: Hip, Knee, Foot, and Ankle	

### Program Credit/GPA Requirements

33 total quarter hours required  
Minimum 3.000 GPA required

### Advanced Entry Program Requirements (MS)

*Note:* 24 quarter hours are required for students entering with a Master of Science in Physical Therapy.

## Master's Degree Programs

Our master's degree programs are grounded in theory and applied in practice, representing today's in-demand fields like education, technology, project management, and regulatory affairs. Gain the knowledge and credentials that employers seek with courses designed to accommodate your life. Programs are led by industry professionals and are offered both full- or part-time online, on campus, or in a hybrid format.

### Programs

#### Master of Arts (MA)

- Security and Intelligence Studies (p. 817)

#### Master of Arts in Teaching (MAT)

- Teaching, Elementary Licensure (p. 819)
- Teaching, Secondary Licensure (p. 821)

#### Master of Education (MEd)

- Education (p. 824)
- Higher Education Administration (p. 826)

#### Master of Professional Studies (MPS)

- Analytics (p. 827)
- Applied Logistics (p. 829)
- Applied Machine Intelligence (p. 831)
- Digital Media (p. 833)
- Digital Media—Connect (p. 836)
- Geospatial Services (p. 839)
- Informatics (p. 841)
- Insurance Analytics and Management (p. 844)
- Learning Experience Design and Technology (p. 846)

#### Master of Science (MS)

- Applied Nutrition (p. 848)
- Commerce and Economic Development (p. 851)
- Corporate and Organizational Communication (p. 853)
- Global Studies and International Relations (p. 861)
- Human Resources Management (p. 857)
- Nonprofit Management (p. 864)
- Organizational Leadership (p. 868)
- Project Management (p. 871)
- Regulatory Affairs (p. 874)

#### Master of Sports Leadership (MSLD)

- Sports Leadership (p. 877)

## Security and Intelligence Studies, MA

The Master of Arts in Security and Intelligence Studies aims to prepare professionals working in the security industry, and other related industries, for success as leaders in the field of security in an ever-changing, challenging global environment. This program will serve the mounting need for talent in the security field in both the government and private sectors.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Required Courses

Code	Title	Hours
CJS 6125	National Security—Law and Policy	3
HLS 6000	Introduction to Homeland Security	3
HLS 6010	Contemporary Threats to Homeland Security	3
SIA 6040	The Intelligence Community and Interagency Collaboration	3
SIA 6140	Civil Liberties and Security	3
SIA 6980	Capstone	3

### Concentrations

The remaining required quarter hours for the program may be completed by a combination of completing a concentration and additional electives or selecting any courses listed in the electives list.

- Corporate Security Management (p. 817)
- Homeland Security and Emergency Management (p. 817)
- Strategic Intelligence and Analysis (p. 817)

### Electives

Code	Title	Hours
Complete courses in the following subjects areas at the 5000 level or above to reach 45 quarter hours: CJS, GST, HLS, LDR, PJM, SIS.		

### Program Credit/GPA Requirements

45 total quarter hours required  
Minimum 3.000 GPA required

#### CORPORATE SECURITY MANAGEMENT

Code	Title	Hours
CJS 6430	Risk Management	3
HLS 6080	Continuity of Operations and Planning	3
HLS 6150	Essentials of Emergency Management	3
SIA 6150	Corporate Security and Investigations	3

Code	Title	Hours
SIA 6010	Intelligence Operations Management	3
SIA 6020	Globalization and Intelligence Issues	3
SIA 6030	Intelligence Analysis and Policy Relationship	3

SIA 6050	All-Source Intelligence	4
SIA 6170	Counterintelligence	3

## Elementary Education, MAT

Designed for Massachusetts-based aspiring teachers and career changers, the Master of Arts in Teaching in Elementary Education (MAT)<sup>1</sup> offers an appreciation for and an understanding of the diverse educational needs, social concerns, and cultural values of today's elementary and secondary schools. This graduate degree in teaching seeks to enhance your foundational skills, broaden your perspectives, and strengthen your ability to inspire and educate. The master's degree, which includes a full term of student teaching and prepracticum experiential fieldwork, seeks to produce graduates well positioned to make a meaningful impact in their school, in their community, and in the lives of their students.

The Elementary MAT+ provides qualifying students with the opportunity to complete a Master of Arts in Teaching (MAT) with further study in a selected area of expertise. Currently, students can take additional coursework to earn either endorsement for an additional license in special education (Teacher of Students of Moderate Disabilities, PreK–8) or endorsement for an additional license in ESL (Teacher of English as a Second Language, PreK–6) to the Massachusetts Department of Elementary and Secondary Education. Teacher candidates may also plan a program of study that allows for triple licensure in consultation with the program director.

A formal application for approval or placement of field-based experiences for prepracticum and practicum requirements must be filed with the Office of Licensure and Field Experience before a student may enroll in a course requiring fieldwork. Deadline for fall placements and approvals must be completed by April 1st (of the previous spring quarter), October 1st for winter placements and approvals, and February 1st for spring placements and approvals.

<sup>1</sup> The MAT Elementary (grades 1–6) has been approved at the initial licensure level by the Massachusetts Department of Elementary and Secondary Education.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Required Courses

Code	Title	Hours
EDU 6051	Introduction to Social Justice in Educational Settings	4
EDU 6086	Foundations of Literacy Development and Instruction	4
EDU 6101	Critical Issues in Education: Past and Present	2
EDU 6102	Reflection, Community Engagement, and Agency in Education	2
EDU 6104	Child and Adolescent Development, Learning, and Teaching	4
EDU 6107	Inclusion, Equity, and Diversity <sup>1</sup>	4
EDU 6154	Inquiry in the Sciences and Humanities	4
EDU 6155	Inquiry in Mathematics <sup>2</sup>	4
EDU 6183	Collaborative Strategies for Effective Classroom Management	3
Complete one of the following:		
<i>For students pursuing emergency elementary teaching licenses or ESL+ licensure in Massachusetts</i>		
EDU 6513	Sheltered English Immersion in the General Classroom	4
<i>For students not pursuing emergency elementary licenses and ESL+ licensure in Massachusetts</i>		
EDU 6185	English-Language Learners in the General Education Classroom	4
EDU 6426	Developmental Language, Literacy, and Writing: Assessment and Instruction	4
EDU 6866	Teaching Practicum and Seminar	6

<sup>1</sup> For students who do not pass their Gateway Performance Task I in this course, complete EDU 6995 to meet programmatic and endorsement requirements.

<sup>2</sup> For students who do not pass their Gateway Performance Task II in this course, complete EDU 6995 to meet programmatic and endorsement requirements.

### Program Credit/GPA Requirements

45 total quarter hours required (additional hours may be required for endorsement for Massachusetts licensure)

Minimum 3.000 GPA required

#### ELEMENTARY MAT+ SPECIAL EDUCATION

The special education course requirements are:

Code	Title	Hours
EDU 6425	Special Education: Role of Special Educators in an Inclusive School <sup>1</sup>	4
EDU 6429	Variations in Child and Adolescent Development	4

EDU 6528	Adaptive Learning/Behavior Management Strategies: Consultation and Collaboration	4
EDU 6569	Differentiated Instruction and Assessment in Mathematics	4
EDU 6874	Practicum, Portfolio, and Panel Review	4

<sup>1</sup> For students who do not pass their Gateway Performance Task I in this course, complete EDU 6995 to meet programmatic and endorsement requirements.

### **MAT+ IN ENGLISH AS A SECOND LANGUAGE (ESL)**

This Commonwealth of Massachusetts-approved MAT+ program consists of five courses, some of which may be taken as electives in the MAT program.

The English as a Second Language course requirements are:

<b>Code</b>	<b>Title</b>	<b>Hours</b>
EDU 6300	Introduction to Language and Linguistics	4
EDU 6310	Literacy Development and the Academic Domains <sup>1</sup>	4
EDU 6429	Variations in Child and Adolescent Development	4
EDU 6517	Foundations of Teaching English as a Second Language: Research and Practice <sup>2</sup>	4
EDU 6874	Practicum, Portfolio, and Panel Review	4

<sup>1</sup> For students who do not pass their Gateway Performance Task I in this course, complete EDU 6995 to meet programmatic and endorsement requirements.

<sup>2</sup> For students who do not pass their Gateway Performance Task II in this course, complete EDU 6995 to meet programmatic and endorsement requirements.

## Secondary Education, MAT

Designed for Massachusetts-based aspiring teachers and career changers, the Master of Arts in Secondary Education (MAT)<sup>1</sup> offers an appreciation for and an understanding of the diverse educational needs, social concerns, and cultural values of today's secondary schools.

This MAT in Secondary Education seeks to enhance your foundational skills, broaden your perspectives, and strengthen your ability to inspire and educate. This master's degree, which includes a full term of student teaching, seeks to produce graduates well positioned to make a meaningful impact in their school, in their community, and in the lives of their students.

- Gain political, social, and historical perspectives on education
- Explore the richly complex environments of schools and communities
- Develop a working understanding of teaching and learning in diverse settings
- Investigate how humans learn, acquire knowledge, and make sense of their experiences
- Examine theories of teaching and explore how best to teach for understanding and learning achievement
- Research methods and materials, pedagogies, and assessment strategies that foster integrated learning

Options for endorsement to licensure include history, 5–12; biology, 8–12; social science, 5–12; English, 5–12; mathematics, 8–12; chemistry, 8–12; earth and space science, 8–12; political science/political philosophy, 8–12; or physics, 8–12. Determination of program of study to be made by faculty review at time of admission.

The MAT+ offers qualifying students the opportunity to complete a MAT with further study in a selected area of expertise. Currently, students can take additional coursework to earn either endorsement for an additional license in special education (Teacher of Students of Moderate Disabilities, 5–12) or an endorsement for an additional license in ESL (Teacher of English as a Second Language, 5–12) to the Massachusetts Department of Elementary and Secondary Education.

A formal application for approval or placement of field-based experiences for prepracticum and practicum requirements must be filed with the Office of Licensure and Field Placement before a student may enroll in a course requiring fieldwork. Deadline for fall placements and approvals must be completed by April 1 (of the previous spring quarter), October 1 for winter placements and approvals, and February 1 for spring placements and approvals.

<sup>1</sup> The Master of Arts in Teaching Secondary Education (grades 5–12 or 8–12 dependent on content area) has been approved at the initial licensure level by the Massachusetts Department of Elementary and Secondary Education.

<sup>2</sup> For students who do not pass or complete their Gateway Performance Task I in this course, complete Project (EDU 6995) to meet programmatic and endorsement requirements.

<sup>3</sup> For students who do not pass or complete their Gateway Performance Task II in this course, complete Project (EDU 6995) to meet programmatic and endorsement requirements.

## Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Required Courses

Code	Title	Hours
EDU 6051	Introduction to Social Justice in Educational Settings	4
EDU 6064	Curriculum and Assessment	4
EDU 6101	Critical Issues in Education: Past and Present	2

<sup>1</sup> For students who do not pass their Gateway Performance Task I in this course, complete EDU 6995 to meet programmatic and endorsement requirements.

<sup>2</sup> For students who do not pass their Gateway Performance Task II in this course, complete EDU 6995 to meet programmatic and endorsement requirements.

## Education, MEd

### Learning and Instruction Concentration

The learning and instruction concentration in the MEd program is designed for teachers and leaders in K–12-focused schools and community organizations that want to lead change and expand equity in their classrooms, schools, or educational communities. Graduate students examine the impact of local, national, and global changes on educational policy and practice. They deepen their ability to effectively engage diverse students in meaningful learning through coursework focused on curriculum and assessment, teaching and learning, and experiential education.

Students pursuing Massachusetts ESL, pre-K–12, initial licensure: This program meets Massachusetts Department of Elementary and Secondary Education standards and competencies for licensure as an English as a Second Language Teacher, pre-K–6 and 5–12.

### Special Education Concentration

Demand for graduate-level-prepared special education practitioners is on the rise, driven by heightened degree requirements and a shortage of licensed, qualified teachers. In response, the College of Professional Studies is pleased to offer the Master of Education with Concentration in Special Education. Designed for educators who are licensed in Massachusetts at the initial or professional level in another discipline, this innovative master's degree program seeks to prepare you to meet the special needs of students across a variety of school environments.

This program meets Massachusetts Department of Elementary and Secondary Education standards and competencies for licensure as a Teacher of Students with Moderate Disabilities, pre-K–8 and 5–12.

In this advanced program, you have an opportunity to explore specific topics on modifying curriculum, designing curriculum-based assessments, managing severe behaviors, developing individualized education programs, leveraging community resources, and improving literacy. As a result, you have an opportunity to enhance your ability to meet the needs of a diverse student population and to achieve the competencies required for this specialized license.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Required Courses

Code	Title	Hours
EDU 6050	Education as an Advanced Field of Study	5
EDU 6051	Introduction to Social Justice in Educational Settings	4

#### Concentration

Complete one of the following concentrations. Students must successfully complete all licensure courses with a grade of B or better in order to progress into their next licensure course.

- Learning and Instruction
- Special Education

### Program Credit/GPA Requirements

45 total quarter hours required (additional hours may be required for endorsement for Massachusetts licensure)

Minimum 3.000 GPA required

#### CONCENTRATION IN LEARNING AND INSTRUCTION

Code	Title	Hours
<b>Required Courses</b>		
EDU 6319	How People Learn	4
EDU 6336	Data Literacy for Data-Driven Decision Making	4
EDU 6410	Instructional Leadership <sup>5</sup>	4
EDU 6415	Law, Policy, and the Ecosystem of Education	4
<b>Capstone</b>		
EDU 6225 or EDU 6874	Capstone (to be taken last) <sup>1</sup> Practicum, Portfolio, and Panel Review	4
<b>Electives</b>		
Complete 16 quarter hours at the EDU 6000 level. Below is a list of elective options.		16
<i>Experiential Teaching and Learning Electives</i>		
EDU 6001	Experiential Learning Theory and Practice	
EDU 6002	Culturally Responsive Experiential Teaching and Learning	

EDU 6003	Applied Research in Experiential Teaching and Learning
EDU 6004	Leading Experiential Teaching and Learning
<i>Learning Experience Design Technology Electives</i>	
EDU 6331	E-Learning Design as a Collaborative Profession
EDU 6332	Open Learning
EDU 6333	Social Media and Beyond
<i>Generalist Electives</i>	
EDU 6182	Educational Statistics
EDU 6227	The New Supervisor
EDU 6228	Supervising Through Change
EDU 6229	Challenges in Supervision
EDU 6231	Crisis Management
EDU 6329	Connecting Theory and Practice
EDU 6340	Learning Analytics Concepts and Theories
EDU 6558	Issues in Education
<i>ESL Massachusetts Licensure Pathway</i>	
EDU 6300	Introduction to Language and Linguistics
EDU 6310	Literacy Development and the Academic Domains <sup>2</sup>
EDU 6426	Developmental Language, Literacy, and Writing: Assessment and Instruction
EDU 6513	Sheltered English Immersion in the General Classroom <sup>4</sup>
or EDU 6185	English-Language Learners in the General Education Classroom
EDU 6517	Foundations of Teaching English as a Second Language: Research and Practice <sup>3</sup>

<sup>1</sup> Complete EDU 6874 Practicum, Portfolio, and Panel Review instead of EDU 6225 Capstone, if pursuing Massachusetts ESL Licensure Pathway courses.

<sup>2</sup> For students who do not pass or complete their Gateway Performance Task I in EDU 6310 Literacy Development and the Academic Domains, complete EDU 6995 Project to meet programmatic and licensure requirements.

<sup>3</sup> For students who do not pass or complete their Gateway II assessment in EDU 6517 Foundations of Teaching English as a Second Language: Research and Practice, or early fieldwork, complete EDU 6995 Project to meet programmatic and licensure requirements.

<sup>4</sup> EDU 6513: For students pursuing emergency secondary teaching licenses or ESL+ licensure in Massachusetts.

<sup>5</sup> Required for nonlicensure and licensure programs of study except ESL Massachusetts Licensure Pathway. ESL Massachusetts Licensure Pathway students may substitute EDU 6410 Instructional Leadership with the completion of all ESL Massachusetts Licensure Pathway courses.

## CONCENTRATION IN SPECIAL EDUCATION

Code	Title	Hours
<b>Required Courses</b>		
EDU 6425	Special Education: Role of Special Educators in an Inclusive School <sup>1</sup>	4
EDU 6426	Developmental Language, Literacy, and Writing: Assessment and Instruction	4
EDU 6438	Teachers as Curriculum Leaders	4
EDU 6528	Adaptive Learning/Behavior Management Strategies: Consultation and Collaboration	4
EDU 6569	Differentiated Instruction and Assessment in Mathematics <sup>2</sup>	4
EDU 6874	Practicum, Portfolio, and Panel Review	4
<b>Electives</b>		
Complete 12 quarter hours at the EDU 6000 level.		12

<sup>1</sup> For students who do not pass their Gateway Performance Task I in this course, complete EDU 6995 to meet programmatic and endorsement requirements.

<sup>2</sup> For students who do not pass their Gateway Performance Task II in this course, complete EDU 6995 to meet programmatic and endorsement requirements.

## Higher Education Administration, MEd

Institutions of higher education around the world are facing considerable pressures that range from changing demographics to financial strain amid disruptions unimaginable 20 years ago. Administrators must develop foundational skills to create conditions that allow their students and institutions to thrive in a constantly changing world. The Master of Education in Higher Education Administration prepares practitioners for the unique and difficult challenges facing the next generation of higher education professionals. This program allows students the flexibility to build upon their skills in a customized manner with a focus on practical skills and course designs firmly grounded in experiential learning.

The Master of Education in Higher Education Administration degree program seeks to prepare student with the knowledge to understand the structure, governance, and operation of various higher education organizations. Within the context of classes, students have an opportunity to develop solutions to real world problems. This innovative master's degree program explores complex industry issues such as student demographics, financial concerns, legal and policy requirements, technology, and competitive forces.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### General Requirements

Code	Title	Hours
EDU 6051	Introduction to Social Justice in Educational Settings	4
EDU 6204	The Foundations of Higher Education	5

#### Required Courses

Code	Title	Hours
EDU 6205	The Demographics of the New College Student	4
EDU 6217	The History of Colleges and Universities	4
EDU 6218	Money Matters: Financial Management in Higher Education	4
EDU 6219	Higher Education Law and Policy	4
EDU 6234	Program Evaluation, Assessment, and Accreditation in Higher Education	4

#### Capstone

Code	Title	Hours
EDU 6222	Contemporary Issues Capstone	4

#### Electives

Code	Title	Hours
Complete 12 quarter hours at the EDU 6000 level or choose from the following courses:		12
CMN 6065	Implementation and Management of Social Media Channels and Online Communities	
EDU 6002	Culturally Responsive Experiential Teaching and Learning	
EDU 6202	Faculty, Curriculum, and Academic Community	
EDU 6216	The College Student Experience	
EDU 6224	Strategic Leadership in Enrollment Management	
EDU 6227	The New Supervisor	
EDU 6228	Supervising Through Change	
EDU 6229	Challenges in Supervision	
EDU 6231	Crisis Management	
EDU 6319	How People Learn	
EDU 6329	Connecting Theory and Practice	
LDR 6100	Developing Your Leadership Capability	

#### Program Credit/GPA Requirements

45 total quarter hours required  
Minimum 3.000 GPA required

## Analytics, MPS

With the proliferation of data across all sectors of the global economy, there is an immediate need for individuals to be knowledgeable in how to harness this data for continuous analysis and study. This spectrum spans from commercial to nonprofit, from higher education to government, and is constantly expanding with new sectors as data mining becomes the standard for knowledge gathering in the digital age.

The Master of Professional Studies in Analytics helps to meet the demand from employers with a graduate program that provides students with an end-to-end analytics education through a core curriculum with integrated experiential learning opportunities. The program is designed to prepare students with a deep understanding of the mechanics of working with data (i.e., its collection, modeling, and structuring), along with the capacity to identify and communicate data-driven insights that ultimately influence decisions.

Not only will students graduate with a portfolio of work samples that demonstrate their range and depth of skill, they will be part of a larger network of analytics professionals who will serve them now and in the future.

- Build portfolios of real-world projects demonstrating competency with key technologies, visualization and communication techniques, and the ability to translate information into recommended actions.
- Gain a core analytical skill set upon which to layer more specialized technical skill sets or industry-specific applications.
- Develop a relationship to industry leaders and peers so that you may leverage your Northeastern education long after your formal education ends.
- Choose from a host of flexible programming options—all of which share an industry-defined core curriculum and a required, credit-bearing experiential requirement.
- Anticipate and contribute to the future direction of data analytics.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Required Courses

Code	Title	Hours
ALY 6000	Introduction to Analytics	3
ALY 6010	Probability Theory and Introductory Statistics	3
ALY 6015	Intermediate Analytics	3
ALY 6050	Introduction to Enterprise Analytics	3
ALY 6070	Communication and Visualization for Data Analytics	3
ITC 6000	Database Management Systems	3

Note: ITC 6000 is for students without prior educational or professional experience with data and database structures. Students who do not complete ITC 6000 must complete a third elective course to reach 45 quarter hours.

#### Experiential Learning Course

Code	Title	Hours
ALY 6080	Integrated Experiential Learning	3

#### Experiential Capstone Course

Code	Title	Hours
ALY 6980	Capstone	3

The remaining quarter hours of the program may be completed by a combination of completing a concentration and additional electives or selecting any courses listed in the concentrations and elective list.

#### Concentrations

- Applied Machine Intelligence (p. 828)
- Evidence-Based Management (p. 828)
- Statistical Modeling (p. 828)

#### Electives

Code	Title	Hours
ALY 6020	Predictive Analytics	
ALY 6030	Data Warehousing and SQL	
ALY 6060	Decision Support and Business Intelligence	
ALY 6110	Data Management and Big Data	
ALY 6120	Leadership in Analytics	

ALY 6130	Risk Management for Analytics
ALY 6140	Python and Analytics Systems Technology
ALY 6150	Healthcare/Pharmaceutical Data and Applications
ALY 6160	Business Intelligence in Healthcare/Pharmaceutical
ALY 6983	Topics
CED 6230	Quantitative Methods
CMN 6005	Foundations of Professional Communication
COP 6940	Personal and Career Development
EAI 6000	Fundamentals of Artificial Intelligence
EAI 6010	Applications of Artificial Intelligence
EAI 6020	AI System Technologies
EAI 6400	Data Governance and Responsible AI
EDU 6184	Interdisciplinary Foundations
GIS 5201	Advanced Spatial Analysis
ITC 6020	Information Systems Design and Development
ITC 6045	Information Technology Policy, Ethics, and Social Responsibility
ITC 6310	Information Security Governance
LDR 6110	Leading Teams Strategically in a Global Environment
LDR 6135	Ethical Leadership
PJM 6015	Project Risk Management
PJM 6125	Project Evaluation and Assessment
PJM 6180	Project Stakeholder Management

### Program Credit/GPA Requirements

45 total quarter hours required

Minimum 3.000 GPA required

---

#### APPLIED MACHINE INTELLIGENCE

Code	Title	Hours
ALY 6040	Data Mining Applications	3

ALY 6140	Python and Analytics Systems Technology	3

## Applied Logistics, MPS

The Master of Professional Studies in Applied Logistics is built to prepare students to be agile in the changing warehousing and distribution industry.

As a central pillar of the program, students will study how to handle challenges that arise quickly and develop leadership and project management skills to help communicate to customers, avoid reactionary responses, work collaboratively to find a solution, and to effectively communicate across the supply chain and with customers. By integrating systems thinking with training in the technical applications in logistics, students will gain well-rounded experience that allows them to understand and adapt to strategic imperatives while also being able to execute in detail. The program aims to develop proficiency in descriptive analytics and the use of real-time data to optimize routing among distribution centers and fulfill orders in response to changing customer profiles, shifting product sales, disruptions in the supplier network, and customer demand for packaging changes.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Courses

Code	Title	Hours
APL 6000	Foundations of Applied Logistics Execution	3
APL 6010	Warehouse Management	3
APL 6020	Freight Management	3
APL 6030	ERP Systems for Inventory Management	3

#### Capstone

Code	Title	Hours
APL 6980	Applied Logistics Capstone	3

The remaining quarter hours may be completed by a combination of completing a concentration and electives or selecting any courses listed in the concentrations and elective lists.

#### Concentrations

- Analytics (p. 829)
- Applied Machine Intelligence (p. 830)
- Leadership (p. 830)
- Project Management (p. 830)

#### Electives

Code	Title	Hours
APL 6050	Supplier Management	
APL 6100	Advanced Technology in Logistics and Distribution	
CMN 6040	Consumer Behaviors in the Online Environment	
CMN 6060	Negotiation, Mediation, and Facilitation	
INT 6943	Integrative Experiential Learning	
EAI 6020	AI System Technologies	
LDR 6110	Leading Teams Strategically in a Global Environment	
PJM 5900	Foundations of Project Management	
PJM 6185	Managing Innovation Projects	
PJM 6210	Communication Skills for Project Managers	
SMT 6060	Decision Support and Sales Analytics	

### Program Credit/GPA Requirements

##### ANALYTICS CONCENTRATION

Code	Title	Hours
<b>Required Courses</b>		
ALY 6000	Introduction to Analytics	3
ALY 6010	Probability Theory and Introductory Statistics	3
ALY 6015	Intermediate Analytics	3

ALY 6070	Communication and Visualization for Data Analytics	3
Complete one of the following:		3
ALY 6020	Predictive Analytics	
ALY 6030	Data Warehousing and SQL	
ALY 6040	Data Mining Applications	
ALY 6110	Data Management and Big Data	

**APPLIED MACHINE INTELLIGENCE CONCENTRATION**

Code	Title	Hours
EAI 6000	Fundamentals of Artificial Intelligence	3
EAI 6010	Applications of Artificial Intelligence	3
EAI 6020	AI System Technologies	3
ALY 6040	Data Mining Applications	3
ALY 6110	Data Management and Big Data	3

**LEADERSHIP CONCENTRATION**

Code	Title	Hours
<b>Required Courses</b>		
LDR 6100	Developing Your Leadership Capability	3
LDR 6110	Leading Teams Strategically in a Global Environment	3
LDR 6120	Developing Organizational Success through Leadership Development	3
LDR 6150	Innovation and Organizational Transformation	3
<b>Elective</b>		
Complete one of the following:		3
LDR 6135	Ethical Leadership	
LDR 6140	Leadership Strategy, Design, and Practice	

**PROJECT MANAGEMENT CONCENTRATION**

Code	Title	Hours
<b>Required Courses</b>		
PJM 5900	Foundations of Project Management <sup>1</sup>	4
PJM 6005	Project Scope Management	3
PJM 6015	Project Risk Management	3
PJM 6025	Project Scheduling and Cost Planning	3
<b>Elective</b>		
Complete 3-6 quarter hours from the following:		3-6
INT 6940	Experiential Learning Projects for Professionals	
INT 6943	Integrative Experiential Learning	
PJM 6075	Project Finance	
PJM 6125	Project Evaluation and Assessment	
PJM 6140	Managing Troubled Projects	
PJM 6145	Global Project Management	
PJM 6175	Project Resource Management	
PJM 6180	Project Stakeholder Management	
PJM 6205	Leading and Managing Technical Projects	
PJM 6210	Communication Skills for Project Managers	
PJM 6215	Leading Remote Project Teams	
PJM 6710	Introduction to Program and Portfolio Management	
PJM 6983	Topics	

<sup>1</sup> Foundations of Project Management (PJM 5900) is for students with fewer than three years of experience directing or leading project tasks. Students who do not complete PJM 5900 may substitute any project management electives to satisfy the required program hours.

## Applied Machine Intelligence, MPS

Humankind is on the threshold of a new era—an age of artificial intelligence (AI) as revolutionary in its global impact as the Industrial Revolution. With the proliferation of machine learning and AI across all sectors of the global society, and fields such as financial services, healthcare, and robotics, GEOINT and cybersecurity are already changing as intelligent computers take on once-indispensably human tasks. There is an immediate need for individuals to be knowledgeable in how to manage, analyze, communicate, visualize, and lead in the area of AI by being data, technology, and human literate. The experiential AI curricula includes an introductory core, as well as an advanced core with an end-to-end AI education in the areas of finance, HR, business ventures, and healthcare/pharmaceuticals. The goal is to proactively and thoughtfully prepare students for the evolving technology and the challenges it presents. The curricula framework adopts a multidisciplinary approach to problem solving by combining computer science and analytical skills with functional government and industry expertise, creativity, and leadership with program offerings on-ground and online.

The degree program is distinguished from others by:

- Focusing on the specific but widespread field of AI that exists within a variety of industries and applications
- Northeastern faculty experts, who have extensive and proven experience in computer science, analytics, geospatial science, information technology, etc.
- Courses that focus on providing critical skills in data management, data analysis, data visualization, problem solving, and advanced analytical tools, creating AI-driven decision making in fields like healthcare/pharmaceuticals, finance, HR, and business ventures

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Core Requirements

Code	Title	Hours
ALY 6110	Data Management and Big Data	3
EAI 6000	Fundamentals of Artificial Intelligence	3
EAI 6010	Applications of Artificial Intelligence	3
EAI 6020	AI System Technologies	3
EAI 6400	Data Governance and Responsible AI	3

#### Experiential Network and Capstone

Code	Title	Hours
EAI 6980	Integrated Experiential Capstone	3

Choose one of the following:

ALY 6080	Integrated Experiential Learning	
INT 6940	Experiential Learning Projects for Professionals	

The remaining quarter hours may be completed by a combination of completing a concentration and additional electives or selecting any courses listed in the concentrations and elective list.

#### Concentrations

- AI for Business Ventures (p. 832)
- AI for Finance (p. 832)
- AI for Healthcare (p. 832)
- AI for Human Resources (p. 832)

#### Electives

Code	Title	Hours
ALY 6140	Python and Analytics Systems Technology	
CMN 6000	Introduction to Organizational Communication	
CED 6050	Commerce and Economic Development	
EAI 6080	Advanced Analytical Utilization	
EDU 6184	Interdisciplinary Foundations	
GIS 5201	Advanced Spatial Analysis	
GIS 6360	Spatial Databases	
LDR 6135	Ethical Leadership	
PJM 6005	Project Scope Management	

PJM 6015	Project Risk Management
PJM 6205	Leading and Managing Technical Projects

HRM 6025	Workforce Analytics	3

## Digital Media, MPS

Students in the Master of Professional Studies in Digital Media will build their skills and expertise while gaining experience using a variety of industry-standard and cutting-edge technologies and tools. Our curriculum is organized around three types of experiences: core courses, concentration electives, and a capstone that can be completed as an individual thesis or a team project.

Our core courses in media creation, interactive design, usability, design thinking, and narrative structure provide a baseline for producing content-rich experiences. A series of electives are offered in seven distinctive areas: 3D animation, game design, digital video, social media, digital media management, or one of two tracks in interactive design: visual design or usability and production. In the capstone experience, you'll work with the guidance of faculty to channel your passion into a project that provides tangible evidence of your abilities.

Whether you are a full- or part-time student, our cohort structure allows you to build meaningful working relationships with students from around the globe. Team-based assignments strengthen your project management and leadership skills and allow you to take part in the design and development of more complex media projects than you could by working alone. The team efforts will also prepare you for your future as a professional in digital media's collaboration-oriented culture.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Required Core Courses

Code	Title	Hours
DGM 6122	Foundations of Digital Storytelling	4
DGM 6145	Information Technology and Creative Practice	4
DGM 6521	Web Creation for Content Management Systems	2
Complete one of the following:		4
DGM 6140	Sound Design	
DGM 6168	Usability and Human Interaction	
Complete one of the following options:		8
Thesis Option		
DGM 6890	Thesis Proposal Development	
DGM 7990	Thesis (at 6 QH)	
Capstone Option		
DGM 7980	Capstone	
Choose one technical course from the workshops list below.		

#### Concentrations

The remaining quarter hours may be completed by selecting a combination of a concentration and additional electives/workshops or selecting any courses in the concentrations and elective lists. You must complete any prerequisites associated with DGM courses unless granted a waiver under special circumstances.

- 3D Animation (p. 834)
- Digital Media Management (p. )
- Digital Video (p. )
- Game Design (p. )
- Interactive Design (p. )
- Social Media (p. )

#### Electives

Code	Title	Hours
Complete one of the following:		3-4
ALY 6110	Data Management and Big Data	
DGM 6125	Time-Based Media	
DGM 6322	Advanced Digital Storytelling	
DGM 6550	Search Engine Optimization: Strategy and Implementation	
EDU 6184	Interdisciplinary Foundations	
ITC 6410	Fundamentals of Human Behaviors for Interactive Systems	

## Workshops

Optional digital media workshops are designed to provide valuable technical skills and tools for students in all graduate degree programs.

Code	Title	Hours
Students may complete one of the following:		
DGM 6506	Introduction to Digital Video	
DGM 6515	Introduction to After Effects	
DGM 6516	Virtual and Augmented Reality (VR/AR)	
DGM 6892	Capstone Project Preparation	
TCC 6410	Online Documentation	
TCC 6630	Introduction to XML	

## Program Credit/GPA Requirements

45 total quarter hours required

Minimum 3.000 GPA required

### 3D ANIMATION

Code	Title	Hours
DGM 6450	Animation Basics	4
DGM 6510	3D Modeling	4
DGM 6530	Character Animation	4
DGM 6535	Rigging Principles and Techniques	4
DGM 6540	Compositing	4

### DIGITAL MEDIA MANAGEMENT

Code	Title	Hours
DGM 6230	Digital Media Entrepreneurship	4
DGM 6279	Project Management for Digital Media	4
DGM 6280	Managing for Digital Media	4
DGM 6285	Interactive Marketing Fundamentals	4
DGM 6290	Social Media and Brand Strategy Implementation	4

### DIGITAL VIDEO

Code	Title	Hours
DGM 6520	Lighting for the Camera	4
DGM 6435	Digital Video Production	4
DGM 6440	Editing in the Digital Studio	4
DGM 6540	Compositing	4
DGM 6545	Documentary and Nonfiction Production	4

### GAME DESIGN

Code	Title	Hours
DGM 6308	Intermediate Programming for Digital Media	4
DGM 6400	Game Design Fundamentals	4
DGM 6403	Game Engine Fundamentals	4
DGM 6405	Game Development	4
DGM 6410	Game Design Technology Lab	4

### INTERACTIVE DESIGN

Code	Title	Hours
Interactive Design		
DGM 6461	Interactive Information Design 1	4
Complete four courses from one of the following tracks:		
Design Track		
DGM 6217	Typography for Interactivity	
DGM 6317	Screen-Based Publication Design	
DGM 6463	Interactive Information Design 2	

DGM 6471	Designing Infographics
Usability and Development Track	
DGM 6268	Usable Design for Mobile Digital Media
DGM 6308	Intermediate Programming for Digital Media
DGM 6451	Web Development
DGM 6525	Research Methods for Global User Experiences
TCC 6110	Information Architecture
TCC 6710	Content Strategy

**SOCIAL MEDIA**

<b>Code</b>	<b>Title</b>	<b>Hours</b>
Complete the following:		19-21
Required		
DGM 6285	Interactive Marketing Fundamentals	4
Electives		
Complete 15–17 quarter hours from the following:		
CMN 6040	Consumer Behaviors in the Online Environment	
CMN 6045	Leveraging Digital Technologies: Strategy, Assessment, and Governance	
CMN 6065	Implementation and Management of Social Media Channels and Online Communities	
CMN 6075	Digital Marketing Analytics	
DGM 6290	Social Media and Brand Strategy Implementation	
DGM 6525	Research Methods for Global User Experiences	
DGM 6550	Search Engine Optimization: Strategy and Implementation	

## Digital Media, MPS—Connect

The Master of Professional Studies in Digital Media Connect program is designed for students without prior experience in core technical and/or creative concepts. This program requires an additional 12 quarter hours of credit, with courses providing intensive, hands-on guidance into the essential knowledge required for the Master of Professional Studies Digital Media curriculum.

For students considering a career change into digital media, this coursework helps you connect your current background to a new digital media track. Courses focus on visual communications, programming foundations, and web creation. Once the fundamental courses are completed, students move into the more advanced Master of Professional Studies in Digital Media course requirements.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Foundation Courses

Code	Title	Hours
DGM 6105	Visual Communications Foundation	4
DGM 6108	Programming Foundations for Digital Media	4
DGM 6109	Lab for DGM 6108	2
DGM 6501	Web Creation Boot Camp	2

#### Required Core Courses

Code	Title	Hours
DGM 6122	Foundations of Digital Storytelling	4
DGM 6145	Information Technology and Creative Practice	4
DGM 6521	Web Creation for Content Management Systems	2
Complete one of the following:		4
DGM 6140	Sound Design	
DGM 6168	Usability and Human Interaction	
Complete one of the following options:		8
<b>Thesis Option</b>		
DGM 6890	Thesis Proposal Development	
DGM 7990	Thesis (at 6 QH)	
<b>Capstone Option</b>		
DGM 7980	Capstone	

Complete one technical course from the workshops list below.

#### Concentrations

The remaining quarter hours may be completed by selecting a combination of a concentration and additional electives/workshops or selecting any courses in the concentrations and elective lists. You must complete any prerequisites associated with DGM courses unless granted a waiver under special circumstances.

- 3D Animation (p. 837)
- Digital Media Management (p. )
- Digital Video (p. )
- Game Design (p. )
- Interactive Design (p. )
- Social Media (p. )

#### Elective

Code	Title	Hours
Complete one of the following:		3-4
ALY 6110	Data Management and Big Data	
DGM 6125	Time-Based Media	
DGM 6322	Advanced Digital Storytelling	
DGM 6550	Search Engine Optimization: Strategy and Implementation	

EDU 6184	Interdisciplinary Foundations
ITC 6410	Fundamentals of Human Behaviors for Interactive Systems

## Workshops

Digital media workshops are designed to provide valuable technical skills and tools for students in all graduate degree programs.

Code	Title	Hours
DGM 6506	Introduction to Digital Video	
DGM 6515	Introduction to After Effects	
DGM 6516	Virtual and Augmented Reality (VR/AR)	
DGM 6892	Capstone Project Preparation	
TCC 6410	Online Documentation	
TCC 6630	Introduction to XML	

## Program Credit/GPA Requirements

56 total quarter hours required

Minimum 3.000 GPA required

### 3D ANIMATION
