CY 3000 or higher, except CY 4930		
IS 3000 or higher, except IS 4900		
One course from Khoury meaningful minors list (see below).		

### Khoury Meaningful Minors

The concept of “Khoury meaningful minors” allows students the chance to personalize a computer science minor to meet individual academic needs and interests. Students may take *one elective* related to computation or information from a pre-approved list of courses offered across the university rather than from within Khoury. This allows students to integrate the minor with a course in their own major or with a course in another area of interest. Students may of course choose to take all electives in the minor within Khoury if they wish.

Code	Title	Hours
<b>Bouvé Health Sciences</b>		
HINF 5101	Introduction to Health Informatics and Health Information Systems	
HINF 5102	Data Management in Healthcare	
HINF 5300	Personal Health Interface Design and Development	
HINF 5301	Evaluating Health Technologies	
<b>Arts, Media and Design</b>		
ARTD 2360	Introduction to Photography	
ARTD 2370	Animation Basics	
ARTD 2380	Video Basics	
ARTG 2260	Programming Basics	
ARTG 2400	Interaction Design Principles	
ARTG 3250	Physical Computing	
ARTG 3451	Information Design 1	
ARTG 3700	Interaction Design 2: Mobile	
ARTG 5100	Information Design Studio 1: Principles	
ARTG 5110	Information Design History	
ARTG 5120	Research Methods for Design	
COMM 2105	Social Networks	
JRNL 3610	Digital Storytelling and Social Media	
MUST 1220	Introduction to Music Technology	

## Engineering

BIOE 2365	Bioengineering Measurement, Experimentation, and Statistics
EECE 2160	Embedded Design: Enabling Robotics
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322
EECE 3324	Computer Architecture and Organization
EECE 5639	Computer Vision
EECE 5640	High-Performance Computing
EECE 5644	Introduction to Machine Learning and Pattern Recognition

## Khoury Computer Sciences

CS 1100	Computer Science and Its Applications
CS 1800	Discrete Structures
IS 1500 or higher, except IS 4900	

## Science

BIOL 2301	Genetics and Molecular Biology
BIOL 3405	Neurobiology
BIOL 5587	Comparative Neurobiology
BINF 6200	Bioinformatics Programming
BINF 6308	Bioinformatics Computational Methods 1
BINF 6309	Bioinformatics Computational Methods 2
CHEM 5638	Molecular Modeling
ENVR 3300	Geographic Information Systems
ENVR 5563	Advanced Spatial Analysis
LING 3450	Syntax
LING 3452	Semantics
MATH 1260	Math Fundamentals for Games
MATH 2331	Linear Algebra
MATH 2341	Differential Equations and Linear Algebra for Engineering
MATH 3530	Numerical Analysis
MATH 4606	Mathematical and Computational Methods for Physics
PHYS 1130	Computing, Data, and Science
PSYC 3452	Sensation and Perception
PSYC 3458	Biological Psychology
PSYC 3464	Psychology of Language
PSYC 3466	Cognition

## Social Science and Humanities

ECON 4653	
ENGL 3340	Technologies of Text
PHIL 1105	Science and Pseudoscience
PHIL 1115	Introduction to Logic
PHIL 1145	Technology and Human Values
PHIL 2001	Ethics and Evolutionary Games
PHIL 4510	Philosophy of Science
PHIL 4515	Advanced Logic
SOCL 2485	Environment, Technology, and Society
SOCL 4528	Computers and Society

## D'Amore-McKim School of Business

ACCT 3403	Advisory Services and Emerging Accounting Systems
ENTR 4501	Integrated Studies in Entrepreneurial Startups
FINA 4608	
MISM 2301	Introduction to Information Systems and Digital Technologies
MKTG 3401	Marketing Research
MKTG 3501	Marketing Analytics
MKTG 4508	Digital Marketing

SCHM 2301	Supply Chain and Operations Management
Statistics Courses	
CRIM 3700	Analyzing and Using Data on Crime and Justice
ECON 2350	Statistics for Economists
ECON 5105	Math and Statistics for Economists
ENVR 2500	Biostatistics
IE 3412	Engineering Probability and Statistics
MATH 2280	Statistics and Software
MATH 3081	Probability and Statistics
MATH 4581	Statistics and Stochastic Processes
MGSC 2301	Business Statistics
PHMD 3450	Research Methodology and Biostatistics
PTHH 2210	Foundations of Biostatistics
POLS 2400	Quantitative Techniques
PSYC 2320	Statistics in Psychological Research

**Credit/GPA Requirement**

20 semester hours required

2.000 GPA required in the minor

## Cybersecurity

Cybersecurity combines essential computer science with conceptual and practical specialization in security to prepare students for hands-on, deeply technical work in the field. The ability to frame problems, select computational models, design program structures, and develop efficient algorithms is as important in computer science as software implementation skill. All cybersecurity students take the standard computer science course sequence, covering content such as basic programming, object-oriented design, computer architecture and operating systems, computer networks and distributed systems, and algorithmic complexity and computability theory. These courses lay the foundation for cybersecurity-specific coursework.

Cybersecurity coursework covers key areas in the field, from a broad overview of the topical space (including threat modeling, symmetric and asymmetric key cryptography, authentication, access control, social engineering, simple exploits, basic systems security, malware, the cybercrime underground, and advanced persistent threat actors) to deep dives into the design of secure operation systems and applications. Fundamental topics include analyzing prevalent classes of attacks against systems; security vulnerabilities and defense techniques; limitation of damage and strategic recovery; design and implementation of distributed authentication protocols; and existing standardized security protocols and legal infrastructure relating to privacy, data ethics, data security, hacking, automation, and intellectual property. In addition, cybersecurity students have access to a wide array of electives, including courses on wireless networking, software vulnerabilities, cybersecurity risk management and assessment, digital forensics, and criminology.

### Programs

#### Bachelor of Science (BS)

- Cybersecurity (p. 715)

## Cybersecurity, BS

The Bachelor of Science in Cybersecurity teaches students the conceptual and practical skills that will enable them to contribute to ensuring the reliability and security of cyberspace. The program will provide students with the fundamental knowledge of computer science that forms the technical foundation of the field, with an essential focus on experiential learning through laboratory exercises in the security-related courses, as well as through the co-op program. The program's holistic view of cybersecurity gives it a strong interdisciplinary focus, teaching students how social behavior, policy, and legal rules can affect cybersecurity and the tools of information technology.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Cybersecurity Major Requirements

Code	Title	Hours
<b>Computer Science Overview</b>		
CS 1200	First Year Seminar	1
CS 1210	Professional Development for Khoury Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 3650	Computer Systems	4
CS 3800	Theory of Computation	4
CS 4700 or CS 4730	Network Fundamentals Distributed Systems	4
<b>Presentation Requirement</b>		
Complete one of the following:		4
COMM 1112	Public Speaking	
COMM 1113	Business and Professional Speaking	
COMM 1210	Persuasion and Rhetoric	
COMM 1511	Communication and Storytelling	
THTR 1125	Improvisation	
THTR 1130	Introduction to Acting	
THTR 1180	The Dynamic On-Screen Presenter	
THTR 2345	Acting for the Camera	
<b>Cybersecurity Required Courses</b>		
CY 2550	Foundations of Cybersecurity	4
CY 3740	Systems Security	4
CY 4740	Network Security	4
CY 4770	Cryptography	4
CY 4930	Cybersecurity Capstone	4
<b>Cybersecurity and Social Issues Elective List</b>		
Complete one of the following:		4

COMM 2551	Free Speech in Cyberspace
CRIM 2340	Corporate Security: Securing the Private Sector
CRIM 4040	Crime Prevention
LPSC 1101	Introduction to Law
LPSC 2301	Introduction to Law, Policy, and Society
LPSC 3303	Topics in Law and Public Policy
POLS 2390	Science, Technology, and Public Policy
POLS 3307	Public Policy and Administration
POLS 3324	Law and Society
POLS 3406	International Law
POLS 3420	U.S. National Security Policy
POLS 3423	Terrorism and Counterterrorism

### Cybersecurity Electives or Cyber Operations Concentration

Students have a choice between completing the BS Cybersecurity with the below Cybersecurity Elective options, or with the Cyber Operations Concentration. The degree automatically defaults to the Cybersecurity Elective options. Students looking to choose the Cyber Operations Concentration option must declare the concentration with their Academic Advisor.

- Cybersecurity Electives (p. 717)
- Cyber Operations Concentration (p. 717)

### Supporting Courses

Code	Title	Hours
<b>Electrical Engineering Required Course</b>		
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	5
<b>Mathematics Courses</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 3081	Probability and Statistics	4

### Writing Requirements

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111	First-Year Writing	4
<b>Advanced Writing in the Disciplines</b>		
ENGW 3302 or ENGW 3315	Advanced Writing in the Technical Professions Interdisciplinary Advanced Writing in the Disciplines	4

### Required General Electives

Code	Title	Hours
	Complete 24 semester hours of general electives.	24

### Khoury College GPA Requirement

Minimum 2.000 GPA required in all CS, CY, DS and IS courses

### Cybersecurity Credit Requirement

Complete 83 semester hours in the major.

### NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

*Integrating Knowledge and Skills Through Experience* is satisfied through co-op.

## Program Requirement

134 semester hours required

### CYBERSECURITY ELECTIVES

Code	Title	Hours
<b>Law Requirement</b>		
CY 4170	The Law, Ethics, and Policy of Data and Digital Technologies	4
or CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	

### Cybersecurity Electives

If courses require prerequisites, those should be taken using general electives.

Complete four courses from the following: 16

COMM 2551	Free Speech in Cyberspace	
CRIM 2340	Corporate Security: Securing the Private Sector	
CRIM 4040	Crime Prevention	
CS 2800	Logic and Computation	
CS 4400	Programming Languages	
CS 4500	Software Development	
or CS 4530	Fundamentals of Software Engineering	
CS 4700	Network Fundamentals	
CS 4710	Mobile and Wireless Systems	
or CS 6710	Wireless Network	
CS 4730	Distributed Systems	
CY 4760	Security of Wireless and Mobile Systems	
CY 5200	Security Risk Management and Assessment	
CY 5210	Information System Forensics	
CY 5770	Software Vulnerabilities and Security	
DS 4300	Large-Scale Information Storage and Retrieval	
DS 4400	Machine Learning and Data Mining 1	
EECE 3324	Computer Architecture and Organization	
EECE 4534 and EECE 4535	Microprocessor-Based Design and Lab for EECE 4534	
IS 4300	Human Computer Interaction	
LPSC 1101	Introduction to Law	
LPSC 2301	Introduction to Law, Policy, and Society	
LPSC 3303	Topics in Law and Public Policy	
MATH 3527	Number Theory 1	
MISM 2301	Introduction to Information Systems and Digital Technologies	
POLS 2390	Science, Technology, and Public Policy	
POLS 3307	Public Policy and Administration	
POLS 3324	Law and Society	
POLS 3406	International Law	
POLS 3420	U.S. National Security Policy	
POLS 3423	Terrorism and Counterterrorism	

### CONCENTRATION IN CYBER OPERATIONS

Code	Title	Hours
<b>Cyber Operations Required Courses</b>		
CS 4710	Mobile and Wireless Systems	4
CY 5210	Information System Forensics	4
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	4

### Electives

Complete two of the following: 8

CS 4500	Software Development	
---------	----------------------	--

or CS 4530	Fundamentals of Software Engineering
CY 5200	Security Risk Management and Assessment
EECE 3324	Computer Architecture and Organization
EECE 4534	Microprocessor-Based Design

## Plan of Study

### Sample Plan of Study

#### FOUR YEARS, TWO CO-OPS IN SUMMER 2/FALL

Year 1									
Fall	Hours	Spring	Hours	Summer 1	Hours	Summer 2	Hours	Hours	
CS 1200		1 CS 2510 and CS 2511		5 CS 3500 and CS 3501		5 General Elective		4

Total Hours: 135

## Data Science

The Bachelor of Science in Data Science studies the collection, manipulation, storage, retrieval, and computational analysis of data in its various forms, including numeric, textual, image, and video data from small to large volumes. The program combines computer science, information science, mathematics, statistics, and probability theory into an integrated curriculum that is designed to prepare students for careers or graduate studies in Big Data analysis, data science, and data analytics. The coursework covers exploratory data analysis, data manipulation in a variety of programming languages, large-scale data storage, predictive analytics, machine learning, data mining, and information visualization and presentation. Data science has emerged as a discipline due to the confluence of two major events:

1. The ability to collect, store, prune, process, and transmit large amounts of data in the cloud
2. The convergence of programming, statistics, artificial intelligence, and visualization as complementary tools for the analysis and understanding of data

### Programs

#### Bachelor of Science (BS)

- Data Science (p. 720)

#### Minor

- Data Science (p. 724)

## Data Science, BS

The Bachelor of Science in Data Science studies the collection, manipulation, storage, retrieval, and computational analysis of data in its various forms, including numeric, textual, image, and video data from small to large volumes.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Data Science Major Requirements

Code	Title	Hours
<b>Computer Science Overview</b>		
CS 1200	First Year Seminar	1
CS 1210	Professional Development for Khoury Co-op	1
<b>Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
<b>Programming Sequence Pathways</b>		
Choose one of the two options.		12
<i>Computer Science Option</i>		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	
<i>Data Science Option</i>		
DS 2000 and DS 2001	Programming with Data and Data Science Programming Practicum	
DS 2500 and DS 2501	Intermediate Programming with Data and Lab for DS 2500	
DS 3500	Advanced Programming with Data	
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3520	Programming in C++	4
<b>Data Science Electives</b>		
Complete three of the following:		12
CS 4100	Artificial Intelligence	
CS 4120	Natural Language Processing	
IS 4200	Information Retrieval	
IS 4300	Human Computer Interaction	
<b>Data Science Required Courses</b>		
DS 3000	Foundations of Data Science	4
DS 4200	Information Presentation and Visualization	4
DS 4300	Large-Scale Information Storage and Retrieval	4
DS 4400	Machine Learning and Data Mining 1	4
DS 4420 or DS 4440	Machine Learning and Data Mining 2 Practical Neural Networks	4
<b>Presentation Requirement</b>		

Choose one:

4

COMM 1112	Public Speaking	
COMM 1113	Business and Professional Speaking	
COMM 1210	Persuasion and Rhetoric	
COMM 1511	Communication and Storytelling	
THTR 1125	Improvisation	
THTR 1130	Introduction to Acting	
THTR 1180	The Dynamic On-Screen Presenter	
THTR 2345	Acting for the Camera	

**Mathematics Foundations**

MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2331	Linear Algebra	4
MATH 3081	Probability and Statistics	4

**Data Science and Ethics**

PHIL 1145	Technology and Human Values	4
-----------	-----------------------------	---

**Khoury Elective Courses**

With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.

Complete 4 credits of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:

4

CS 2500 or higher, except CS 5010	
CY 2000 or higher, except CY 4930	
DS 2500 or higher, except DS 4900	
IS 2000 or higher, except IS 4900	

**Data Science Related Electives in Other Units**

Complete one of the following:

4

ARTG 3451	Information Design 1	
ARTG 5100	Information Design Studio 1: Principles	
ARTG 5110	Information Design History	
ARTG 5120	Research Methods for Design	
ARTG 5330	Visualization Technologies 1: Fundamentals	
ARTG 6100	Information Design Studio 2: Dynamic Mapping and Models	
ARTG 6200	Information Design Studio 3: Synthesis	
BINF 6308	Bioinformatics Computational Methods 1	
BINF 6309	Bioinformatics Computational Methods 2	
ECON 2350	Statistics for Economists	
ECON 2560	Applied Econometrics	
EECE 5639	Computer Vision	
EECE 5642	Data Visualization	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
ENVR 2500	Biostatistics	
GSND 5110	Game Design and Analysis	
GSND 6350	Data-Driven Player Modeling	
HINF 5101	Introduction to Health Informatics and Health Information Systems	
HINF 5102	Data Management in Healthcare	
HINF 5300	Personal Health Interface Design and Development	
HINF 5301	Evaluating Health Technologies	
IE 5640	Data Mining for Engineering Applications	
IS 4800	Empirical Research Methods

**Total Hours: 132**

## Data Science, Minor

The minor in data science studies the collection, manipulation, storage, retrieval, and computational analysis of data in its various forms, including numeric, textual, image, and video data from small to large volumes.

### Minor Requirements

*Note: Khoury minors are only available to non-Khoury majors; students in Khoury-only majors or Khoury combined majors are not eligible for Khoury minors. A student may declare at most one Khoury minor, regardless of how many Khoury minors they qualify for.*

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Courses

Code	Title	Hours
<b>Computer Science Fundamental Courses</b>		
Complete one of the following options:		9-10
<i>Fundamentals of Computer Science Option</i>		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	
<i>Programming with Data Option</i>		
DS 2000 and DS 2001	Programming with Data and Data Science Programming Practicum	
DS 2500 and DS 2501	Intermediate Programming with Data and Lab for DS 2500	
<b>Data Science Required Course</b>		
DS 3000	Foundations of Data Science	4

### Data Science Electives

Code	Title	Hours
Complete two of the following (only one course from the meaningful minor list may contribute toward the minor requirements):		8
CS 3200	Database Design	
DS 2010 to DS 4989		
Meaningful minor list (see below)		

### Khoury Meaningful Minors

The concept of Khoury Meaningful Minors allows students the chance to personalize a computer science minor to meet individual academic needs and interests. Students may take *one elective* related to computation or information from a preapproved list of courses offered across the university rather than from within Khoury. This allows students to integrate the minor with a course in their own major or with a course in another area of interest. Students may of course choose to take all electives in the minor within Khoury if they wish.

Code	Title	Hours
<i>Arts, Media and Design</i>

2.000 GPA required in the minor

## Khoury Combined Majors

Khoury College offers combined majors with over 25 partner disciplines. Combined majors are carefully constructed degrees allowing students to explore multiple academic fields while staying on track for graduation. Each of the combined majors offers the opportunity for intense study in two disciplines with appropriate breadth in the liberal arts. Students take 9 to 13 courses in each subject and at least one integrative course that binds the disciplines together. These programs offer an excellent educational opportunity for the ambitious student.

### Programs

#### Bachelor of Science (BS)

- Computer Science and Behavioral Neuroscience (p. 749)
- Computer Science and Biology (p. 754)
- Computer Science and Business Administration (p. 612)
- Computer Science and Cognitive Psychology (p. 764)
- Computer Science and Communication Studies (p. 363)
- Computer Science and Criminal Justice (p. 774)
- Computer Science and Design (p. 206)
- Computer Science and Economics (p. 784)
- Computer Science and English (p. 789)
- Computer Science and Environmental and Sustainability Sciences (p. 795)
- Computer Science and Game Development (p. 211)
- Computer Science and History (p. 803)
- Computer Science and Journalism (p. 440)
- Computer Science and Linguistics (p. 812)
- Computer Science and Mathematics (p. 816)
- Computer Science and Media Arts (p. 214)
- Computer Science and Music with Concentration in Music Technology (p. 481)
- Computer Science and Philosophy (p. 829)
- Computer Science and Physics (p. 833)
- Computer Science and Political Science (p. 838)
- Computer Science and Politics, Philosophy, and Economics (p. 844)
- Computer Science and Sociology (p. 848)
- Computer Science and Theatre (p. 536)
- Cybersecurity and Business Administration (p. 617)
- Cybersecurity and Criminal Justice (p. 861)
- Cybersecurity and Economics (p. 866)
- Data Science and Behavioral Neuroscience (p. 878)
- Data Science and Biochemistry (p. 870)
- Data Science and Biology (p. 874)
- Data Science and Business Administration (p. 621)
- Data Science and Chemistry (p. 886)
- Data Science and Criminal Justice (p. 890)
- Data Science and Ecology and Evolutionary Biology (p. 894)
- Data Science and Economics (p. 898)
- Data Science and Environmental and Sustainability Sciences (p. 902)
- Data Science and Health Science (p. 906)
- Data Science and International Affairs (p. 910)
- Data Science and Journalism (p. 447)
- Data Science and Linguistics (p. 921)
- Data Science and Mathematics (p. 925)
- Data Science and Philosophy (p. 928)
- Data Science and Physics (p. 931)
- Data Science and Psychology (p. 935)

**Bachelor of Science in Chemical Engineering (BSCHE)**

- Chemical Engineering and Computer Science (p. 728)
- Chemical Engineering and Data Science (p. 733)

**Bachelor of Science in Civil Engineering (BSCE)**

- Civil Engineering and Computer Science (p. 737)

**Bachelor of Science in Computer Engineering (BSCmpE)**

- Computer Engineering and Computer Science (p. 742)

## Chemical Engineering and Computer Science, BSChE

The Bachelor of Science in Chemical Engineering and Computer Science provides expertise in computational modeling and simulation of chemical processes. The curriculum is designed to prepare students to practice in the engineering and control of processes involving chemicals, biotechnology feedstocks, and pharmaceuticals, as well as the fundamentals of program design, software development, and algorithms and data.

Program educational objectives can be found on the department website (<https://che.northeastern.edu/academics/undergraduate-studies/che-accreditation/>).

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Engineering</b>		
CHME 2308	Conservation Principles in Chemical Engineering	4
CHME 2310	Transport Processes 1	4
CHME 2320	Chemical Engineering Thermodynamics 1	4
CHME 3305 and CHME 3306	Chemical Engineering Laboratory and Recitation for CHME 3305	4
CHME 3312	Transport Processes 2	4
CHME 3322	Chemical Engineering Thermodynamics 2	4
CHME 4510	Chemical Engineering Kinetics	4
CHME 4512	Chemical Engineering Process Control	4
CHME 4701	Separations and Process Analysis	4
<b>Chemical Engineering Capstone</b>		
CHME 4703 and CHME 4705	Chemical Process Design Capstone and Recitation for CHME 4703	4
<b>Supplemental Credit</b>		
2 semester hours from the following course count toward the engineering requirement:		2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
3 semester hours from the following course count toward the engineering requirement:		3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

### Computer Science Requirements

Code	Title	Hours
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3200	Database Design	4

CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4

**Khoury Elective Courses**

With advisor approval, a directed study, research, project study, or appropriate graduate-level course may also be taken as a computer science elective.

Complete 8 semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges: 8

CS 2500 or higher, except CS 5010

CY 2000 or higher, except CY 4930

DS 2000 or higher, except DS 4900

IS 2000 or higher, except IS 4900

**Supporting Courses: Mathematics/Science**

Complete all mathematics/science courses with a minimum of 30 semester hours.

Code	Title	Hours
<b>Required Mathematics/Science</b>		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
Complete one of the following:		4-5
BIOL 1111	General Biology 1	
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	
<b>Supplemental Credit</b>		
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	

**Professional Development**

Code	Title	Hours
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1

**Additional Required Courses**

1 semester hour from the following course counts toward the professional development requirement: 1

GE 1501 Cornerstone of Engineering 1 <sup>1</sup>

1 semester hour from the following course counts toward the professional development requirement: 1

GE 1502 Cornerstone of Engineering 2 <sup>1</sup>

**Writing Requirements**

Code	Title	Hours
A grade of C or higher is required in each course:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3307 or ENGW 3315	Advanced Writing in the Technical Professions Advanced Writing in the Sciences Interdisciplinary Advanced Writing in the Disciplines	4

**Integrative Courses**

Code	Title	Hours
This course is already required above and also fulfills the integrative requirement.		
CHME 4512	Chemical Engineering Process Control	4

**Required General Electives**

Code	Title	Hours
Complete 8 semester hours of academic, nonremedial, nonrepetitive courses.		
		8

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

**Major GPA Requirement**

Minimum 2.000 GPA required in all CHME coursework

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses

**Program Requirement**

136 total semester hours required

## Chemical Engineering and Data Science, BSChE

### Overview

The Bachelor of Science in Chemical Engineering and Data Science provides students with the technical and analytical skills to work with large datasets. The curriculum focuses on the application of data science methods to solve problems in the chemical engineering field, including the development of predictive models, optimization of processes, and the design of experiments. Students also have an opportunity to learn data visualization, machine learning, and artificial intelligence techniques.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

All undergraduate students are required to complete the NUpath Requirements (<https://catalog.northeastern.edu/undergraduate/university-academics/nupath/>).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience may fulfill the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Engineering</b>		
CHME 2308	Conservation Principles in Chemical Engineering	4

## Civil Engineering and Computer Science, BSCE

The Bachelor of Science in Civil Engineering and Computer Science provides expertise in computational modeling and simulation of civil and environmental processes and systems. Students will be prepared for practice in the engineering and control of processes and systems vital for the sustainable development and management of civil and environmental infrastructure, as well as the fundamentals of program design, software development, and algorithms and data.

Computational and simulations-based approaches in engineering research and design practices have increased substantially in recent years in response to the rapidly increasing availability of data from remote and in-situ sensors as well as networked systems. Students who graduate with this combined major degree will have the breadth and depth of understanding and abilities to contribute to innovative and sustainable solutions to support global civil and environmental infrastructure demands.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements Interpreting Culture (IC) and Differences and Diversity (DD) are not explicitly satisfied by required engineering courses. Students are responsible for satisfying these requirements with their general elective.

CIVE 2331	Fluid Mechanics and Hydraulics	4
CIVE 2334	Environmental Engineering: Principles, Technology, and Sustainability	4
CIVE 2340 and CIVE 2341	Geotechnical Engineering and Lab for CIVE 2340	5
GE 3300	Energy Systems: Science, Technology, and Sustainability	4
<b>Civil Engineering Project Elective</b>		
Complete one of the following:		4
CIVE 4534 and CIVE 4535	Water Treatment Systems Design and Lab for CIVE 4534	
CIVE 4542	Foundation Engineering and Design	
CIVE 4554	Highway Design	
CIVE 5536	Hydrologic and Hydraulic Design	
<b>Senior Design Elective</b>		
Complete one of the following:		5
CIVE 4765	Senior Design Project—Environmental	
CIVE 4767	Senior Design Project—Structural	
CIVE 4768	Senior Design Project—Transportation	
<b>Supplemental Credit</b>		
1 semester hour from the following course counts toward the engineering requirement:		1
CIVE 3464	Probability and Engineering Economy for Civil Engineering	
2 semester hours from the following course count toward the engineering requirement:		2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	

3 semester hours from the following course count toward the engineering requirement: 3

GE 1502 Cornerstone of Engineering 2 <sup>1</sup>

### Computer Science Requirements

Code	Title	Hours
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
CS 3000 and CS 3001	Algorithms and Data and Recitation for CS 3000	4
CS 3200	Database Design	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4

### Computer Science Elective

Complete 8 semester hours of the following: 8

CS 2500 or higher, except CS 5010

CY 2000 or higher, except CY 4930

DS 2500 or higher, except DS 4900

IS 2000 or higher, except IS 4900

### Supporting Courses: Mathematics/Science

Complete all mathematics/science courses with a minimum of 30 semester hours.

Code	Title	Hours
<b>Required Mathematics/Science</b>		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5

### Science Elective

Complete one of the following science electives: 4

PHYS 1125 Introduction to Network Science: From the Human Cell to Facebook

PHYS 1132 Energy, Environment, and Society

ENVR 2515 Sustainable Development

### Supplemental Credit

3 semester hours from the following course count toward the mathematics/science requirement: 3

CIVE 3464 Probability and Engineering Economy for Civil Engineering

1 semester hour from the following course counts toward the mathematics/science requirement: 1

GE 1501 Cornerstone of Engineering 1 <sup>1</sup>

### Professional Development

Code	Title	Hours
<b>Professional Development</b>		
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1

**Additional Required Courses**

1 semester hour from the following course counts toward the professional development requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

**Writing Requirements**

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

**Required General Electives**

Code	Title	Hours
Complete 4 semester hours of academic, nonremedial, nonrepetitive courses.		4

**Integrative Course**

Code	Title	Hours
Students will complete one of these courses as part of their required courses above.		
CIVE 4765	Senior Design Project—Environmental	
CIVE 4767	Senior Design Project—Structural	
CIVE 4768	Senior Design Project—Transportation	

**Engineering GPA Requirement**

Minimum 2.000 GPA required in CIVE and GE courses

**Khoury GPA Requirement**

Minimum 2.000 GPA required in CS, CY, DS, and IS courses

**Program Requirements**

139 total semester hours required

<sup>1</sup> Students can substitute Engineering Design (GE 1110) and Engineering Problem Solving and Computation (GE 1111) for Cornerstone of Engineering 1 (GE 1501) and Cornerstone of Engineering 2 (GE 1502) in approved situations.

**Plan of Study****Four Years, One Co-op in Spring/Summer 1**

## Computer Engineering and Computer Science, BSCmpE

This intercollege dual major serves students who are interested in both computer hardware and software, combining an accredited Bachelor of Science degree in engineering with the added benefits of depth in software principles found in a Bachelor of Science degree in computer science. This program provides a well-rounded computing education that includes engineering design principles, computational thinking, proper program design, and a solid background in mathematics and science. The degree is fully accredited as a Bachelor of Science in Computer Engineering and adds the computer science depth.

Because of the large body of shared knowledge between computer engineering and computer science, an integrated dual major between these two disciplines is a logical course of study and can be accomplished within a student's usual five-year program (including three co-op placements) without requiring course overloading in any semester. A student graduating from this program will have a solid foundation in both computer hardware and software principles, and should be prepared for a wide range of career paths in the computing field or any related field that relies on the application of engineering or computing principles.

Students interested in this program should contact the Department of Electrical and Computer Engineering or the Department of Computer and Information Science as early as possible, preferably prior to registering for first-year courses.

Visit the department website (<https://ece.northeastern.edu/academics/undergraduate-studies/ece-accreditation/>) for educational objectives.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Courses</b>		
EECE 2140	Computing Fundamentals for Engineers	4
EECE 2150	Circuits and Signals: Biomedical Applications	5
EECE 2160	Embedded Design: Enabling Robotics	4
<b>Computer Engineering Fundamentals</b>		
CS 3000	Algorithms and Data	4
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	5
EECE 2540	Fundamentals of Networks	4
<b>Electrical Engineering Fundamentals</b>		
Complete one of the following:		4
EECE 2412 and EECE 2413	Fundamentals of Electronics and Lab for EECE 2412	
EECE 2520	Fundamentals of Linear Systems	
EECE 2530 and EECE 2531	Fundamentals of Electromagnetics and Lab for EECE 2530	
<b>Computer Engineering Capstone Courses</b>		
EECE 4791	Electrical and Computer Engineering Capstone 1	1
EECE 4792	Electrical and Computer Engineering Capstone 2	4

### EECE Technical Electives

Students can register for EECE 4991 / EECE 4992 / EECE 4993 more than once. For these courses combined, a maximum of 8 semester hours will be allowed to satisfy the requirement of technical electives. An additional 4 semester hours will be allowed as a general elective. At most one of these courses (4 semester hours) can be taken in a semester.

Though students may register for EECE 2750 more than once, only 4 semester hours will be allowed to satisfy the requirements of technical electives. An additional 4 semester hours will be allowed as a general elective.

Complete two of the following:	8
EECE 2412 to EECE 2530	
EECE 2750	Enabling Engineering
EECE 3324 to EECE 4698	
EECE 4991	Research
EECE 4992	Directed Study
EECE 4993	Independent Study
EECE 5115 to EECE 5698	
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage

### Khoury Elective Courses

With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.

Complete 8 semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:

CS 2500 or higher, except CS 5010	
CY 2000 or higher, except CY 4930	
DS 2500 or higher, except DS 4900	
IS 2000 or higher, except IS 4900	

### Supplemental Credit

2 semester hours from the following course count toward the engineering requirement:	2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>
3 semester hours from the following course count toward the engineering requirement:	3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>

## Computer Science Requirements

Code	Title	Hours
<b>Computer Science Introductory Courses</b>		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
CS 2800	Logic and Computation	4
<b>Computer Science Upper-Level Courses</b>		
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 3650	Computer Systems	4
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4

## Supporting Courses: Mathematics/Science

Complete all Mathematics/Science courses with a minimum of 30 semester hours.

Code	Title	Hours
<b>Required Mathematics/Science</b>		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 3081	Probability and Statistics	4

PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	5
<b>Supplemental Credit</b>		
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	

## Professional Development

Code	Title	Hours
<b>Required Professional Development</b>		
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1
<b>Additional Required Courses</b>		
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

## Writing Requirements

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3315	Advanced Writing in the Technical Professions Interdisciplinary Advanced Writing in the Disciplines	4

## Required General Electives

Code	Title	Hours
Complete 8 SH of academic, nonremedial, nonrepetitive courses.		8

## Integrative Courses

Code	Title	Hours
The following courses are already required above and also fulfill the integrative requirement.		
CS 1800	Discrete Structures	
EECE 4791	Electrical and Computer Engineering Capstone 1	
EECE 4792	Electrical and Computer Engineering Capstone 2	
MATH 1341	Calculus 1 for Science and Engineering	
MATH 1342	Calculus 2 for Science and Engineering	
MATH 3081	Probability and Statistics	
PHYS 1151 and PHYS 1152	Physics for Engineering 1 and Lab for PHYS 1151	

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

## Major GPA Requirement

2.000 minimum GPA in EECE courses

2.000 minimum GPA required in all CS, CY, DS, and IS courses

## Program Requirement

140 total semester hours required

- ... Electrical and Computer Engineering Capstone 1 (EECE 4791) in Summer 2 and Electrical and Computer Engineering Capstone 2 (EECE 4792) in Fall.

## Computer Science and Behavioral Neuroscience, BS

The Bachelor of Science in Computer Science and Behavioral Neuroscience underscores how research in neuroscience has become a computational field of study. The combined major is designed for students who are interested in applying mathematical and computational methodologies toward understanding human behavior, artificial intelligence, and the human-machine interface. Courses across multiple science disciplines—including biology, chemistry, and computer science—lay a strong foundation necessary to explore brain mechanisms and how they give rise to behavioral functions and pathological states using computational approaches. Students will have an opportunity to develop skills in software development as they apply algorithms and data structures to brain research and neurotechnology.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Computer Science Requirements

Code	Title	Hours
<b>Overview</b>		
CS 1200	First Year Seminar <sup>1</sup>	1
CS 1210	Professional Development for Khoury Co-op <sup>2</sup>	1
<b>Computer Science Foundations</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 4100	Artificial Intelligence	4
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4
<b>Statistics Foundation</b>		
Complete one of the following. Students who receive transfer credit for the Advanced Placement Statistics exam may complete the 1 SH PSYC 2315 course (requires department permission).		4-5
ENVR 2500 and ENVR 2501	Biostatistics and Lab for ENVR 2500	
PSYC 2320	Statistics in Psychological Research	

<sup>1</sup> Students entering through the behavioral neuroscience program may take Behavioral Neuroscience at Northeastern (BNSC 1000).

<sup>2</sup> Students entering through the behavioral neuroscience program may take Professional Development for Co-op (EESC 2000).

### Writing Requirements

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111 or ENGW 1102	First-Year Writing First-Year Writing for Multilingual Writers	4
<b>Advanced Writing in the Disciplines</b>		
Complete one of the following:		4
ENGW 3302	Advanced Writing in the Technical Professions	

ENGW 3307	Advanced Writing in the Sciences
ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines

### Behavioral Neuroscience Requirements

Code	Title	Hours
<b>COS Foundations</b>		
BIOL 1107 and BIOL 1108	Foundations of Biology and Lab for BIOL 1107	5
BIOL 2299	Inquiries in Biological Sciences	4
BIOL 2301 and BIOL 2302	Genetics and Molecular Biology and Lab for BIOL 2301	5
CHEM 1161 and CHEM 1162 and CHEM 1163	General Chemistry for Science Majors and Lab for CHEM 1161 and Recitation for CHEM 1161	5
CHEM 2311 and CHEM 2312	Organic Chemistry 1 and Lab for CHEM 2311	5
PSYC 1101	Foundations of Psychology	4
<b>Mathematics Foundation</b>		
MATH 1341 or MATH 1251	Calculus 1 for Science and Engineering Calculus and Differential Equations for Biology 1	4
<b>Behavioral Neuroscience Foundations</b>		
BIOL 3405 or BIOL 5587	Neurobiology Comparative Neurobiology	4
PT 5410 and PT 5411 or PSYC 3200	Functional Human Neuroanatomy and Lab for PT 5410 Clinical Neuroanatomy	4-5
<b>Psychology Elective</b>		
Complete one of the following:		4
PSYC 3404	Developmental Psychology	
PSYC 3406	Clinical Psychology and Mental Health	
PSYC 3450	Learning and Motivation	
PSYC 3451	Learning Principles and Behavior Analysis	
PSYC 3452	Sensation and Perception	
PSYC 3464	Psychology of Language	
PSYC 3466	Cognition	
PSYC 4524	Cognitive Development	
<b>Behavioral Neuroscience Core Courses</b>		
Complete two of the following:		8
BIOL 3415	Current Topics in Behavioral Neuroscience	
BIOL 3601	Neural Systems and Behavior	
BIOL 3605	Developmental Neurobiology	
BIOL 4705	Neurobiology of Cognitive Decline	
BIOL 4709	Neurobiology of Learning and Memory	
BIOL 5595	Cell and Molecular Neuroscience	
BIOL 5601	Multidisciplinary Approaches in Motor Control	
PSYC 3506	Neuropsychology of Fear	
PSYC 3508	Behavioral Endocrinology	
PSYC 3510	Brain, Behavior, and Immunity	
PSYC 4510	Psychopharmacology	
PSYC 4512	Neuropsychology	
PSYC 4514	Clinical Neuroscience	
PSYC 4570	Behavioral Genetics	

## Integrative Requirements

Code	Title	Hours
<b>Integrative Courses</b>		
IS 4300 or CS 4120 or CS 4180	Human Computer Interaction Natural Language Processing Reinforcement Learning	4
PSYC 4540 or BINF 6308	Quantitative Topics in Psychology and Behavioral Neuroscience Bioinformatics Computational Methods 1	4
<b>Upper-Division Elective</b>		
Complete four credits from the following list, not taken to fulfill previous requirements:		4
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		
DS 2500 or higher, except DS 4900		
IS 2000 or higher, except IS 4900		
BNSC 4970 or higher		
BIOL 3400 or higher		
BINF 6309	Bioinformatics Computational Methods 2	
PSYC 3200 or higher		

## Supporting Courses

Code	Title	Hours
<b>Computing and Social Issues</b>		
Complete one of the following:		4
AFAM 2600	Issues in Race, Science, and Technology	
CY 4170	The Law, Ethics, and Policy of Data and Digital Technologies	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
ENGL 2150	Literature and Digital Diversity	
HIST 2220	History of Technology	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
PHIL 1145	Technology and Human Values	
SOCL 1280	The Twenty-First-Century Workplace	
SOCL 2485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	

## Required General Electives

Code	Title	Hours
Complete 16 credits of general electives.		16

## Khoury College GPA Requirement

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses

## Computer Science and Behavioral Neuroscience Major Credit Requirement

102 SH required in the major

## NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Understanding Societies and Institutions
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

## Computer Science and Biology, BS

The computer science and biology combined major reflects how research in biology, especially genetics, has become a computational science. The program provides a strong foundation in biology, chemistry, and mathematics, as well as software development and algorithms.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
CS 1200	First Year Seminar <sup>1</sup>	
CS 1210	Professional Development for Khoury Co-op <sup>2</sup>	
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 3800	Theory of Computation (integrative course)	4
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4
<b>Khoury Elective Courses</b>		
With adviser approval, a directed study, research, project study, or appropriate graduate-level course may also be taken as a computer science elective.		
Complete 4 credits of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		4
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		
DS 2500 or higher, except DS 4900		
IS 2000 or higher, except IS 4900		

<sup>1</sup> Students entering through the Department of Biology may take Biology at Northeastern (BIOL 1000).

<sup>2</sup> Students entering through the Department of Biology may take Professional Development for Co-op (EESC 2000).

### Biology Courses

Code	Title	Hours
<b>Foundations of Biology</b>		
BIOL 1107 and BIOL 1108	Foundations of Biology and Lab for BIOL 1107	5
<b>Inquiries</b>		
BIOL 2299	Inquiries in Biological Sciences	4
<b>Molecular Biology</b>		
BIOL 2301 and BIOL 2302	Genetics and Molecular Biology and Lab for BIOL 2301	5

BIOL 3611 and BIOL 3612	Biochemistry and Lab for BIOL 3611	5
<b>Biology Project Lab</b>		
BIOL 2309	Biology Project Lab	4
<b>Chemistry</b>		
CHEM 1161 and CHEM 1162 and CHEM 1163	General Chemistry for Science Majors and Lab for CHEM 1161 and Recitation for CHEM 1161	5
CHEM 2311 and CHEM 2312	Organic Chemistry 1 and Lab for CHEM 2311	5
CHEM 2313 and CHEM 2314	Organic Chemistry 2 and Lab for CHEM 2313	5
<b>Biology Capstone</b>		
Choose one:		4
BIOL 4701	Biology Capstone	
BIOL 4971	Junior/Senior Honors Project 2	
BIOL 4900	Biology Research Capstone	
<b>Intermediate/Advanced Biology Electives</b>		<b>8-10</b>
Complete two biology courses (with corequisite labs if offered). Choose one of these two courses from the following list:		
BIOL 2327	Human Parasitology	
BIOL 3401	Comparative Vertebrate Anatomy	
BIOL 3413	Current Topics in Organismal and Population Biology	
EEMB 2302 and EEMB 2303	Ecology and Lab for EEMB 2302	
EEMB 2400	Introduction to Evolution	
EEMB 2700 and EEMB 2701	Marine Biology and Lab for EEMB 2700	
EEMB 3460	Conservation Biology	
EEMB 3466	Disease Ecology	
Choose the second elective from the following list:		
BIOL 2311 to BIOL 4999		
EEMB 2290 to EEMB 5515		
EEMB 5548 to EEMB 5569		
<b>Biology Integrative Course</b>		
Complete one of the following:		4-5
BINF 6308	Bioinformatics Computational Methods 1	
BIOL 4707	Cell and Molecular Biology	
BIOL 5581	Biological Imaging	
BIOL 5587	Comparative Neurobiology	
BIOL 5591	Advanced Genomics	
<b>Supporting Courses</b>		
<b>Code</b>	<b>Title</b>	<b>Hours</b>
<b>Calculus</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
<b>Probability and Statistics</b>		
ENVR 2500 and ENVR 2501	Biostatistics and Lab for ENVR 2500	5
<b>Computing and Social Issues</b>		
Complete one of the following:		4
AFAM 2600	Issues in Race, Science, and Technology	
CY 4170	The Law, Ethics, and Policy of Data and Digital Technologies	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
ENGL 2150	Literature and Digital Diversity	
HIST 2220	History of Technology	

INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks
IS 1300	Knowledge in a Digital World
or PHIL 1300	Knowledge in a Digital World
PHIL 1145	Technology and Human Values
SOCL 1280	The Twenty-First-Century Workplace
SOCL 2485	Environment, Technology, and Society
SOCL 4528	Computers and Society

**Intermediate or Advanced Science**

Complete one course from the following: 4

BIOL 2327 to BIOL 3999
BIOL 4705 to BIOL 5999
CHEM 2311 to CHEM 5999
EEMB 2290 to EEMB 5999
ENVR 2310 to ENVR 5999
MATH 2280 to MATH 5999
PHYS 2303 to PHYS 5999
PSYC 2290 to PSYC 5999

**Writing Requirements**

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111	First-Year Writing	4
<b>Advanced Writing in the Disciplines</b>		
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3307	Advanced Writing in the Sciences	
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

**Required General Electives**

Code	Title	Hours
Complete 20 credits of general electives		20

**NUpath Requirements Satisfied**

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Exploring Creative Expression and Innovation
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

**Khoury College GPA Requirement**

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses

**Program Requirement**

141 total semester hours required

**Plan of Study****Sample Pattern:****Four Years, Two Co-ops in Summer 2/Fall**

## Computer Science and Business Administration, BS

The computer science and business combined major delivers a technical degree with a strong grounding in business. Students will complete most of the requirements of a business major, including macroeconomics and microeconomics, while also focusing on technical skills like program design, software development, computer organization, systems and networks, theories of computation, principles of languages, and advanced algorithms and data.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or BUSN 1102	First Year Seminar Personal Skill Development for Business	1
CS 1210 or BUSN 1103	Professional Development for Khoury Co-op Professional Development for Business Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4
<b>Computer Science Required Electives</b>		
Complete two of the following:		8
CS 3650	Computer Systems	
CS 4700	Network Fundamentals	
CS 4730	Distributed Systems	
DS 3000	Foundations of Data Science	
DS 4200	Information Presentation and Visualization	
DS 4300	Large-Scale Information Storage and Retrieval	
<b>Khoury Elective</b>		
With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete four credits of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		4
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		
DS 2500 or higher, except DS 4900		
IS 2000 or higher, except IS 4900		

**Business Courses**

Code	Title	Hours
<b>Required Business Courses</b>		
ACCT 1201	Financial Accounting and Reporting	4
ACCT 2301	Managerial Accounting	4
FINA 2201	Financial Management	4
MGSC 2301	Business Statistics	4
MKTG 2201	Introduction to Marketing	4
ORGB 3201	Organizational Behavior	4
STRT 4501	Strategy in Action	4

**Business Concentration**

Complete a four-course business concentration from the following list.

- Accounting (p. 654)
- Accounting and Advisory Services (p. 655)
- Brand Management (p. 656)
- Corporate Innovation (p. 658)
- Entrepreneurial Startups (p. 659)
- Family Business (p. 660)
- Finance (p. 661)
- Fintech (p. 662)
- Healthcare Management and Consulting (p. 664)
- International Business (p. 665) (available only as a second concentration)
- Management (p. 666)
- Marketing (p. 668)
- Marketing Analytics (p. 669)
- Social Innovation and Entrepreneurship (p. 670)
- Supply Chain Management (p. 671)

**Integrative Course**

Code	Title	Hours
<b>Information Resource Management</b>		
MISM 2301	Introduction to Information Systems and Digital Technologies	4

**Supporting Courses**

Code	Title	Hours
<b>Mathematics</b>		
MATH 1341 or MATH 1231	Calculus 1 for Science and Engineering Calculus for Business and Economics	4
<b>Economics</b>		
ECON 1115	Principles of Macroeconomics	4
ECON 1116	Principles of Microeconomics	4
<b>Computing and Social Issues</b>		
Complete one of the following:		4
AFAM 2600	Issues in Race, Science, and Technology	
CY 4170	The Law, Ethics, and Policy of Data and Digital Technologies	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
ENGL 2150	Literature and Digital Diversity	
HIST 2220	History of Technology	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
IS 1300 or PHIL 1300	Knowledge in a Digital World Knowledge in a Digital World	
PHIL 1145	Technology and Human Values	
SOCL 1280	The Twenty-First-Century Workplace	

SOCL 2485	Environment, Technology, and Society
SOCL 4528	Computers and Society

### Computer Science Writing Requirement

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111	First-Year Writing	4
<b>Advanced Writing in the Disciplines</b>		
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	
or ENGW 3304	Advanced Writing in the Business Administration Professions	

### Required General Electives

Code	Title	Hours
Complete 16 credits of general electives.		16

### Business Cooperative Education

Complete one cooperative education experience.

### Khoury College GPA Requirement

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses

### Business GPA Requirement

Minimum 2.000 GPA required in business courses

### NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Understanding Societies and Institutions
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

### Program Requirement

133 total semester hours required

### Plan of Study

## Computer Science and Cognitive Psychology, BS

The computer science and cognitive psychology combined major provides a foundation in general psychology, psychology of language, cognition, and statistics—all supplemented by an experimental laboratory course, seminar course, and psychology electives. Students who choose this program often have a general interest in human psychology or specific interests in artificial intelligence or human-computer interaction.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
CS 1200	First Year Seminar	1
CS 1210	Professional Development for Khoury Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 4100	Artificial Intelligence (Integrative course)	4
CS 4500 or CS 4530	Software Development (Integrative course) Fundamentals of Software Engineering	4
IS 4300	Human Computer Interaction (Integrative course)	4
<b>Khoury Elective Courses</b>		
With adviser approval, a directed study, research, project study, or appropriate graduate-level course may also be taken as a computer science elective.		
Complete twelve credits of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		12
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		
DS 2500 or higher, except DS 4900		
IS 2000 or higher, except IS 4900		

### Psychology Courses

Code	Title	Hours
<b>Required Courses</b>		
PSYC 1101	Foundations of Psychology	4
PSYC 3464	Psychology of Language	4
PSYC 3466	Cognition	4
<b>Statistics</b>		
Complete the following course. Students who receive transfer credit for the Advanced Placement Statistics exam may complete the 1 SH PSYC 2315 course (requires department approval).		4-5
PSYC 2320	Statistics in Psychological Research	
<b>Advanced Psychology</b>		
PSYC 3452	Sensation and Perception	4

or PSYC 3458

Biological Psychology

**Laboratory in Psychology**

Complete one of the following:

4

PSYC 4604	Laboratory in Learning and Motivation
PSYC 4610	Laboratory in Psycholinguistics
PSYC 4612	Laboratory in Cognition
PSYC 4622	Laboratory in Sensation and Perception

**Seminar in Psychology**

Complete one of the following:

4

PSYC 4658	Seminar in Psycholinguistics
PSYC 4660	Seminar in Cognition
PSYC 4668	Seminar in Sensation and Perception
PSYC 4674	Seminar in Cognitive Neuroscience

**Psychology Electives**

Note: Courses satisfying the categories above cannot be reused.

Complete two of the following:

8

PSYC 3402	Social Psychology
PSYC 3404	Developmental Psychology
PSYC 3450	Learning and Motivation
PSYC 3451	Learning Principles and Behavior Analysis
PSYC 3452	Sensation and Perception
PSYC 3458	Biological Psychology
PSYC 4512	Neuropsychology
PSYC 4524	Cognitive Development
PSYC 4610	Laboratory in Psycholinguistics
PSYC 4612	Laboratory in Cognition
PSYC 4622	Laboratory in Sensation and Perception
PSYC 4628	Laboratory in Developmental Psychology
PSYC 4658	Seminar in Psycholinguistics
PSYC 4660	Seminar in Cognition
PSYC 4668	Seminar in Sensation and Perception
PSYC 4674	Seminar in Cognitive Neuroscience
PSYC 4676	Seminar in Developmental Psychology

With prior approval, directed study research and Honors Project courses can also be counted:

PSYC 4970	Junior/Senior Honors Project 1
PSYC 4971	Junior/Senior Honors Project 2
PSYC 4991	Directed Study Research

**Supporting Courses**

Code	Title	Hours
<b>Calculus</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
<b>Computing and Social Issues</b>		
Complete one of the following:		4
AFAM 2600	Issues in Race, Science, and Technology	
CY 4170	The Law, Ethics, and Policy of Data and Digital Technologies	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
ENGL 2150	Literature and Digital Diversity	
HIST 2220	History of Technology	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
IS 1300	Knowledge in a Digital World	
or PHIL 1300	Knowledge in a Digital World	
PHIL 1145	Technology and Human Values	
SOCL 1280	The Twenty-First-Century Workplace	

SOCL 2485	Environment, Technology, and Society
SOCL 4528	Computers and Society

### Computer Science Writing Requirement

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111	First-Year Writing	4
<b>Advanced Writing in the Disciplines</b>		
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3307	Advanced Writing in the Sciences	
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

### Required General Electives

Code	Title	Hours
Complete 32 semester hours of general electives.		32

### Khoury College GPA Requirement

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses

### NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Understanding Societies and Institutions
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

## Computer Science and Communication Studies, BS

The computer science and communication studies combined major integrates practical skills and theory. Students will gain both a strong computer science foundation and a deep understanding of the major conceptual frameworks for human communication—plus how to apply this knowledge to solve problems in today's society.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
CS 1200 or COMM 1000	First Year Seminar Communication Studies at Northeastern	1
CS 1210 or EEAM 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4
CS 4550	Web Development	4
<b>Khoury Elective</b>		
With adviser approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete 8 semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		8
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		
DS 2500 or higher, except DS 4900		
IS 2000 or higher, except IS 4900		

### Communication Studies Courses

Code	Title	Hours
<b>Communication Studies Common Requirements</b>		
COMM 1101	Introduction to Communication Studies	4
COMM 1112 or COMM 2301	Public Speaking Communication Research Methods	4
<b>Foundation Course</b>		
Complete one of the following:		4
COMM 1210	Persuasion and Rhetoric	

## 770 Computer Science and Communication Studies, BS

COMM 1225	Communication Theory
COMM 1231	Principles of Organizational Communication
COMM 1255	Communication in a Digital Age

**Cluster Course**

Complete one of the following: 4

COMM 1131	Sex, Relationships, and Communication
COMM 2303	Global and Intercultural Communication
COMM 2304	Communication and Gender
COMM 2501	Communication Law
COMM 2551	Free Speech in Cyberspace

**Writing-Intensive**

Complete two of the following: 8

COMM 3200	Mobile Communication
COMM 3201	Health Communication
COMM 3230	Interpersonal Communication
COMM 3304	Communication and Inclusion
COMM 3320	Political Communication
COMM 3415	Communication Criticism
COMM 3445	Public Relations Principles
COMM 3500	Environmental Issues, Communication, and the Media
COMM 3501	Free Speech: Law and Practice
COMM 3530	Communication and Sexualities
COMM 3532	Theories of Conflict and Negotiation
COMM 4535	Nonverbal Social Interaction
COMM 4605	Youth and Communication Technology
COMM 4631	Crisis Communication and Image Management

**Communication Studies Electives**Complete three courses in the following range:<sup>1</sup> 12

COMM 1131 to COMM 4996

<sup>1</sup> Junior/Senior Honors Project 1 (COMM 4970) is excluded.**Supporting Courses**

Code	Title	Hours
<b>Mathematics</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
<b>Computing and Social Issues</b>		
Complete one of the following: 4		
AFAM 2600	Issues in Race, Science, and Technology

## Computer Science and Criminal Justice, BS

For students interested in criminal justice in an increasingly digital world, the computer science and criminal justice combined degree offers a strong programming foundation coupled with academic and experiential knowledge of the criminal justice system. Successful students will learn the principles, practices, and responsibilities of criminal justice professionals alongside the computer science skills necessary for practical applications in the field.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or CRIM 1000	First Year Seminar Criminal Justice at Northeastern	1
CS 1210 or EESH 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
IS 2000	Principles of Information Science	4
<b>Khoury Elective Courses</b>		
With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete 16 credits of upper-division CS, CY, DS, or IS courses that are not already required. Choose courses within the following ranges:		16
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		
DS 2500 or higher, except DS 4900		
IS 2000 or higher, except IS 4900		

### Criminal Justice Courses

Code	Title	Hours
<b>Introduction to Crime, Law, and the Justice System</b>		
What do we know about crime and justice? In these three courses, students have an opportunity to develop a foundational understanding of three related phenomena: why crime exists, how our criminal justice system responds to crime, and the constitutional and legal oversight of this process.		
CRIM 1100	Introduction to Criminal Justice	4
CRIM 1110	Criminal Due Process	4
CRIM 1120	Criminology	4

**Current Crime and Justice Issues**

These courses introduce students to topical issues related to crime and justice.

Complete one of the following: 4

CRIM 1300	The Death Penalty
CRIM 1400	Human Trafficking
CRIM 1500	Corruption, Integrity, and Accountability
CRIM 1700	Crime, Media, and Politics

**Crime Problems and Criminal Justice Institutions**

The 2000-level courses in this list ask how does justice work and for whom? These courses introduce students to the systems and institutions tasked with providing justice. Each includes experiential learning components in cooperation with local criminal justice institutions. The 3000-level courses in this list provide students with a deeper look at a range of crime problems.

Complete one of the following: 4

CRIM 2310	Courts: The Third Branch of Government
CRIM 2320	Youth Crime and Justice
CRIM 2330	Punishment in the Age of Mass Incarceration
CRIM 2340	Corporate Security: Securing the Private Sector
CRIM 2350	Policing a Democratic Society
CRIM 2370	Restorative Justice: Transforming the System
CRIM 3010	Criminal Violence
CRIM 3030	Global Criminology
CRIM 3040	Psychology of Crime
CRIM 3070	Corporate and White-Collar Crime

**Systemic Issues**

These courses consider systemic issues facing the criminal justice system.

Complete one of the following: 4

CRIM 3110	Gender, Crime, and Justice
CRIM 3120	Race, Crime, and Justice

**Creating Knowledge about Crime and Justice**

How do we know what we know about crime and justice—and how do we develop new knowledge? These courses cover how to harness data to learn about issues, identify solutions, and advocate for change.

CRIM 3600	Criminal Justice Research Methods	4
CRIM 3700	Analyzing and Using Data on Crime and Justice	4

**Criminal Justice Capstone**

CRIM 4949	Senior Capstone Seminar	4
-----------	-------------------------	---

**Criminal Justice Elective**

These courses round out our knowledge of crime and justice.

Complete one additional criminal justice elective from the 3000, 4000, or 5000 level. 4

**Integrative Course Requirement**

Code	Title	Hours
Complete one of the following: 4		
CRIM 3060	Political Crime and Terrorism	
CRIM 4040	Crime Prevention	

**Supporting Course**

Code	Title	Hours
Complete one of the following: 4		
AFAM 2600	Issues in Race, Science, and Technology	
CY 4170	The Law, Ethics, and Policy of Data and Digital Technologies	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
ENGL 2150	Literature and Digital Diversity	
HIST 2220	History of Technology	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	

IS 1300	Knowledge in a Digital World
or PHIL 1300	Knowledge in a Digital World
PHIL 1145	Technology and Human Values
SOCL 1280	The Twenty-First-Century Workplace
SOCL 2485	Environment, Technology, and Society
SOCL 4528	Computers and Society

### Computer Science English Requirement

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111	First-Year Writing	4
or ENGW 1102	First-Year Writing for Multilingual Writers	
<b>Advanced Writing in the Disciplines</b>		
Complete one of the following:		4
ENGW 3302	Advanced Writing in the Technical Professions	
ENGW 3308	Advanced Writing in the Social Sciences	
ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

### Required General Electives

Code	Title	Hours
Complete 28 credits of general electives.		28

### Khoury College GPA Requirement

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses

### NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Understanding Societies and Institutions
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

### Program Requirement

133 total semester hours required

### Plan of Study

## Computer Science and Design, BS

The combined major in computer science and design integrates fundamental design courses with a strong programming foundation. Students will declare a concentration in interaction design, graphic and information design, or experience design. Students in this major often have an interest in human-centered design methods used in developing digital interfaces and applications.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or ARTF 1000	First Year Seminar Art and Design at Northeastern	1
CS 1210 or EEAM 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4
IS 4300	Human Computer Interaction	4
<b>Computer Science Elective Courses</b>		
With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete 8 semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		8
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		
DS 2500 or higher, except DS 4900		
IS 2000 or higher, except IS 4900		

### Design Requirements

Code	Title	Hours
<b>Art + Design Fundamentals</b>		
ARTF 1122	Color and Composition (with optional ARTF 1123)	4
<b>Art + Design Fundamentals Elective</b>		
Complete one of the following:		4
ARTF 1124 and ARTF 1125	Form and Structure and Form and Structure Tools	

ARTF 2220 and ARTF 2221	Movement and Time and Movement and Time Tools	
ARTF 2223 and ARTF 2224	Experience and Interaction and Experience and Interaction Tools	
<b>Design Required</b>		
ARTG 1001 and ARTG 1002	Design Perspectives: An Introduction to Design in the World and Seminar for Design Perspectives	4
ARTG 1270 and ARTG 1271	Design: Process + Practices and Studio for Design: Process + Practices	4
ARTG 1290 and ARTG 1291	Typographic Systems and Studio for Typographic Systems	4
<b>Design Elective</b>		
Complete any one ARTG course, as long as prerequisites have been met and that is not used to fulfill other requirements of the program. ARTG 2262 and ARTG 2263 are recommended. <sup>1</sup>		4
<b>Art + Design History Elective</b>		
Complete any one ARTH course.		4
<b>Art + Design Elective</b>		
Complete any one ARTD, ARTE, ARTF, ARTG, ARTH, ARTS, or GAME course as long as prerequisites have been met.		4
<b>Degree Capstone Project</b>		
ARTG 4550	Design Degree Project	4

<sup>1</sup> Instead of ARTG 2262 and ARTG 2263, ARTG 5330 is recommended for students considering the Plus One in Information Design and Data Visualization.

## Design Option

Code	Title	Hours
Complete one of the following options:		8
<b>Experience Design Option</b>		
ARTG 3462	Experience Design Principles	
ARTG 3463	Experience Design 2	
<b>Graphic Design Option</b>		
ARTG 2252	Graphic Design Principles	
ARTG 3450	Graphic Design 2	
<b>Information Design Option</b>		
ARTG 2242	Information Design Principles	
ARTG 3444	Topics in Information Design Inquiry <sup>2</sup>	
<b>Interaction Design Option</b>		
ARTG 2400	Interaction Design Principles (with optional ARTG 2401)	
ARTG 3700	Interaction Design 2: Mobile	

<sup>2</sup> Instead of ARTG 3444, ARTG 5100 is recommended for students considering the Plus One in Information Design and Data Visualization.

## Degree-Focused Electives

Code	Title	Hours
Complete two courses from the following lists:		8
<i>Art + Design</i>		
Complete any ARTG course as long as prerequisites have been met. If ARTG 5000 (or any other topics course in the subject listed) is completed more than once, the additional completions may be allowed toward the electives.		
<i>Psychology</i>		
PSYC 1101	Foundations of Psychology	
PSYC 3452	Sensation and Perception	
PSYC 3464	Psychology of Language	
PSYC 3466	Cognition	
<i>Computer Science</i>		
CS 3200	Database Design	

CS 3520	Programming in C++
CS 3540	Game Programming
CS 3650	Computer Systems
CS 3800	Theory of Computation
CS 4100	Artificial Intelligence
CS 4150	Game Artificial Intelligence
CS 4300	Computer Graphics
CS 4400	Programming Languages
CS 4520	Mobile Application Development
CS 4550	Web Development
CS 4700	Network Fundamentals
CS 4730	Distributed Systems
CS 4850	Building Game Engines
CS 4991	Research
CS 4992	Directed Study
CS 4993	Independent Study
DS 3000	Foundations of Data Science
DS 4200	Information Presentation and Visualization
DS 4300	Large-Scale Information Storage and Retrieval
DS 4400	Machine Learning and Data Mining 1
DS 4420	Machine Learning and Data Mining 2
IS 2000	Principles of Information Science

### Integrative Requirement

Code	Title	Hours
The following courses are used in the major but also count as the integrative requirement:		
IS 4300	Human Computer Interaction	
ARTG 4550	Design Degree Project	

### Supporting Course

Code	Title	Hours
<b>Computing and Social Issues</b>		
Complete one of the following:		4
AFAM 2600	Issues in Race, Science, and Technology	
CY 4170	The Law, Ethics, and Policy of Data and Digital Technologies	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
ENGL 2150	Literature and Digital Diversity	
HIST 2220	History of Technology	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
IS 1300	Knowledge in a Digital World	
or PHIL 1300	Knowledge in a Digital World	
PHIL 1145	Technology and Human Values	
SOCL 1280	The Twenty-First-Century Workplace	
SOCL 2485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	

### Computer Science Writing Requirement

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111	First-Year Writing	4
<b>Advanced Writing in the Disciplines</b>		
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3314	Advanced Writing in the Arts, Media, and Design	
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

**Required General Electives**

Code	Title	Hours
Complete 24 semester hours of general electives.		24

**NUpath Requirements Satisfied**

- Engaging with the Natural and Designed World
- Exploring Creative Expression and Innovation
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

**Khoury College GPA Requirement**

Minimum 2.000 GPA required in all CS, CY, DS and IS courses

**Computer Science and Design Major Credit Requirement**

96 SH are required in the major.

**Program Requirement**

130 total semester hours required

**Plan of Study****Sample Plan of Study:****FOUR YEARS, TWO CO-OPS IN SPRING/SUMMER 1**

## Computer Science and Economics, BS

The combined major in computer science and economics integrates fundamental economics courses with a strong programming foundation. Studying both the behavior of individuals and the collective behavior of industries and governments, students will utilize computing skills to address complex issues within the field.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
CS 1200 or ECON 1000	First Year Seminar Economics at Northeastern	1
CS 1210 or EESH 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
CS 2800	Logic and Computation	4
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
IS 2000	Principles of Information Science	4
Choose one of the following:		4
IS 4200 or IS 4300	Information Retrieval Human Computer Interaction	
<b>Khoury Elective</b>		
With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete 8 semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		8
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		
DS 2500 or higher, except DS 4900		
IS 2000 or higher, except IS 4900		

### Economics Requirements

Code	Title	Hours
<b>Required Economics Courses</b>		
ECON 1115	Principles of Macroeconomics	4
ECON 1116	Principles of Microeconomics	4
ECON 2315	Macroeconomic Theory	4
ECON 2316	Microeconomic Theory	4

ECON 2350	Statistics for Economists	4
ECON 2560	Applied Econometrics	4

**Economics Electives**

Complete four ECON elective courses from the following ranges with no more than two at the ECON 1200-1999 range: 16

ECON 1200 to ECON 1999

ECON 2990 to ECON 4689

ECON 4900 to ECON 4996

ECON 5200 to ECON 5999

**Economics Capstone**

ECON 4692	Senior Economics Seminar	4
or ECON 4997	Senior Economics Thesis	

**Integrative Course Requirement**

Code	Title	Hours
------	-------	-------

The following courses are used in other areas of the major:

ECON 2560	Applied Econometrics	4
IS 2000	Principles of Information Science	4

**Supporting Courses**

Code	Title	Hours
------	-------	-------

**Mathematics**

Complete one of the following. It is recommended that MATH 1241 or higher is chosen: 4

MATH 1231	Calculus for Business and Economics	
or MATH 1241	Calculus 1	
or MATH 1245	Calculus with Applications	
or MATH 1251	Calculus and Differential Equations for Biology 1	
or MATH 1340	Intensive Calculus for Engineers	
or MATH 1341	Calculus 1 for Science and Engineering	

**Computing and Social Issues**

Complete one of the following: 4

AFAM 2600	Issues in Race, Science, and Technology	
CY 4170	The Law, Ethics, and Policy of Data and Digital Technologies	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
ENGL 2150	Literature and Digital Diversity	
HIST 2220	History of Technology	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
IS 1300	Knowledge in a Digital World	
or PHIL 1300	Knowledge in a Digital World	
PHIL 1145	Technology and Human Values	
SOCL 1280	The Twenty-First-Century Workplace	
SOCL 2485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	

**English Requirement**

Code	Title	Hours
------	-------	-------

**College Writing**

ENGW 1111	First-Year Writing	4
or ENGW 1102	First-Year Writing for Multilingual Writers	

**Advanced Writing in the Disciplines**

Complete one course from the following: 4

ENGW 3302	Advanced Writing in the Technical Professions	
ENGW 3308	Advanced Writing in the Social Sciences	
ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

**Required General Electives**

Code	Title	Hours
Complete 24 semester hours of general electives.		24

**Khoury College GPA Requirement**

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses

**Economics GPA Requirement**

Grades in the following required Economics courses must average to a minimum of C (2.000):

Code	Title	Hours
ECON 2315	Macroeconomic Theory	
ECON 2316	Microeconomic Theory	
ECON 2350	Statistics for Economists	
ECON 2560	Applied Econometrics	

**NUpath Requirements Satisfied**

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Exploring Creative Expression and Innovation
- Understanding Societies and Institutions
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

**Computer Science and Economics Major Credit Requirement**

Minimum of 100 semester hours is required in the major

**Program Requirement**

133 total semester hours required

## Computer Science and English, BS

The computer science and English combined major focuses on the increasingly interdisciplinary processes of creating, interpreting, and analyzing texts and programs. Students will combine communication and critical judgment, gaining the creativity and adaptability necessary to utilize technology in literary studies, and apply humanities skills to solve programming problems.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
CS 1200 or ENGL 1000	First Year Seminar English at Northeastern	1
CS 1210 or EESH 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
<b>Computing Focus</b>		
Students are required to complete one of the following foci (two courses total):		8
<i>Focus 1: Natural Language Processing</i>		
CS 3800	Theory of Computation	
CS 4120	Natural Language Processing	
<i>Focus 2: Programming Languages</i>		
CS 3800	Theory of Computation	
CS 4400	Programming Languages	
<i>Focus 3: Analytics</i>		
DS 3000	Foundations of Data Science	
DS 4200	Information Presentation and Visualization	
<b>Computer Science/Information Science Elective Course</b>		
Choose one:		4
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	
IS 2000	Principles of Information Science	

### Khoury Elective Courses

With adviser approval, a directed study, project study, or appropriate graduate-level course may also be taken as an upper-division elective.

Complete 4 semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:

4

CS 2500 or higher, except CS 5010

CY 2000 or higher, except CY 4930

DS 2500 or higher, except DS 4900

IS 2000 or higher, except IS 4900

## English Requirements

Code	Title	Hours
<b>Foundational Courses</b>		
ENGL 1400	Introduction to Literary Studies	4
ENGL 1160	Introduction to Rhetoric	4
or ENGL 1410	Introduction to Research on Writing	
ENGL 1700	Global Literatures 1	4
or ENGL 1701	Global Literatures 2	

## English Electives

Two of the courses chosen from the lists below must be at the 3000 or 4000 level.

Code	Title	Hours
<b>Diversity</b>		
Complete one course from the following. You may reuse this course to fulfill an additional English requirement below.		4
ENGL 2150	Literature and Digital Diversity	
ENGL 2296	Early African-American Literature	
ENGL 2450	Postcolonial Literature	
ENGL 2455	American Women Writers	
ENGL 2470	Asian-American Literature	
ENGL 2760	Writing in Global Contexts	
ENGL 3678	Bedrooms and Battlefields: Hebrew Bible and the Origins of Sex, Gender, and Ethnicity	
ENGL 3685	Modern and Contemporary Jewish Literature	
<b>Literary Periods</b>		
<i>Pre-19th Century Literature</i>		
Complete one course from the following:		4
ENGL 1600	Introduction to Shakespeare	
ENGL 2296	Early African-American Literature	
ENGL 3101	Early Literatures	
ENGL 3120	17th- and 18th-Century Literatures	
ENGL 3618	Milton	
ENGL 3678	Bedrooms and Battlefields: Hebrew Bible and the Origins of Sex, Gender, and Ethnicity	
or JWSS 3678	Bedrooms and Battlefields: Hebrew Bible and the Origins of Sex, Gender, and Ethnicity	
<i>19th/20th/21st Century Literature</i>		
Complete one of the following courses:		4
<i>19th Century</i>		
ENGL 2330	The American Renaissance	
ENGL 3140	19th-Century Literatures	
ENGL 3190	Topics in 19th-Century American Literature	
ENGL 3619	Emerson and Thoreau	
ENGL 3720	19th-Century Major Figure	
<i>20th/21st Century</i>		
ENGL 2301	The Graphic Novel	
ENGL 2440	The Modern Bestseller	
ENGL 2600	Irish Literary Culture (Abroad)	
ENGL 3161	20th- and 21st-Century Literatures	
ENGL 3685	Modern and Contemporary Jewish Literature	
or JWSS 3685	Modern and Contemporary Jewish Literature	

ENGL 3730	20th- and 21st-Century Major Figure	
-----------	-------------------------------------	--

**Theories and Methods**

Complete one of the following:		4
--------------------------------	--	---

ENGL 1140	Grammar: The Architecture of English	
ENGL 1160	Introduction to Rhetoric	
ENGL 1410	Introduction to Research on Writing	
ENGL 2150	Literature and Digital Diversity	
ENGL 3325	Rhetoric of Law	
ENGL 3381	The Practice and Theory of Teaching Writing	
ENGL 3400	Opening the Archive	
ENGL 3700	Narrative Medicine	
LING 1150	Introduction to Language and Linguistics	
LING 2350	Linguistic Analysis	
LING 3450	Syntax	
LING 3452	Semantics	
LING 3454	History of English	
LING 3456	Language and Gender	
LING 3458	Topics in Linguistics	

**Comparative Course**

Complete one of the following courses:		4
--	--	---

ENGL 1450	Reading and Writing in the Digital Age	
ENGL 1500	British Literature to 1800	
ENGL 1502	American Literature to 1865	
ENGL 2150	Literature and Digital Diversity	
ENGL 2420	Contemporary Poetry	
ENGL 2430	Contemporary Fiction	
ENGL 2455	American Women Writers	
ENGL 2470	Asian-American Literature	
ENGL 2510	Horror Fiction	
ENGL 2520	Science Fiction	
ENGL 2600	Irish Literary Culture (Abroad)	
ENGL 2620	What Is Nature?	
ENGL 2690	Boston in Literature	
ENGL 3487	Film and Text (Abroad)	

**Writing**

Complete one of the following:		4
--------------------------------	--	---

ENGL 2700	Creative Writing	
ENGL 2710	Style and Editing	
ENGL 2730	Digital Writing	
ENGL 2740	Writing and Community Engagement	
ENGL 2760	Writing in Global Contexts	
ENGL 2770	Writing to Heal	
ENGL 2850	Writing for Social Media: Theory and Practice	
ENGL 3375	Writing Boston	
ENGL 3376	Creative Nonfiction	
ENGL 3377	Poetry Workshop	
ENGL 3378	Fiction Workshop	
ENGL 3380	Writing Seminar	
ENGL 3384	The Writer's Marketplace	

**English Electives**

Complete any two ENGL courses that have not already been used to fulfill another requirement.		8
---	--	---

**Capstone**

Code	Title	Hours
Complete one of the following courses:		
ENGL 4710	Capstone Seminar	4
or ENGL 4720	Capstone Project	

**Integrative Course Requirement**

This course will not be allowed to double-count in the Theories and Methods section above.

Code	Title	Hours
ENGL 3340	Technologies of Text	4
or HIST 1357	History of Information in the United States: Media, Technology, Law	

**Supporting Course**

Code	Title	Hours
Complete one of the following:		
AFAM 2600	Issues in Race, Science, and Technology	4
CY 4170	The Law, Ethics, and Policy of Data and Digital Technologies	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
ENGL 2150	Literature and Digital Diversity	
HIST 2220	History of Technology	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
IS 1300	Knowledge in a Digital World	
or PHIL 1300	Knowledge in a Digital World	
PHIL 1145	Technology and Human Values	
SOCL 1280	The Twenty-First-Century Workplace	
SOCL 2485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	

**Computer Science Writing Requirement**

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111	First-Year Writing	4
or ENGW 1102	First-Year Writing for Multilingual Writers	

**Advanced Writing in the Disciplines**

Complete one course from the following:		
ENGW 3302	Advanced Writing in the Technical Professions	4
ENGW 3309	Advanced Writing in the Humanities	
ENGW 3310	Advanced Writing in Literature	
ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

**Required General Electives**

Code	Title	Hours
Complete 28 semester hours of general electives.		28

**Khoury College GPA Requirement**

Minimum 2.000 GPA required in all CS, CY, DS and IS courses

**NUpath Requirements Satisfied**

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Exploring Creative Expression and Innovation
- Writing in the First Year
- Advanced Writing in the Disciplines

- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

## Computer Science and Environmental and Sustainability Sciences, BS

The computer science and the environmental and sustainability sciences combined major focuses on the major environmental challenges facing our planet and provides broad training to understand how these challenges can be met through advances in computer science and artificial intelligence. Understanding these processes requires both the acquisition and computational analysis of large amounts of data—underscoring the synergistic relationship between computer science and environmental and sustainability sciences.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

## Computer Science and Game Development, BS

The computer science and game development combined major focuses on the specific skills needed to succeed in the highly competitive game industry. Students will engage in building and developing games and playable media experiences while completing courses in computer science and specialized game technology and design. Interdisciplinary courses enable students to develop their creative and entrepreneurial abilities, as well as create a strong portfolio of game pieces.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or ARTF 1000	First Year Seminar Art and Design at Northeastern	1
CS 1210 or EEAM 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 3520	Programming in C++ (Integrative course)	4
CS 3540	Game Programming (Integrative course)	4
CS 3650	Computer Systems	4
CS 4300	Computer Graphics (Integrative course)	4
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4
CS 4700 or CS 4730	Network Fundamentals Distributed Systems	4
CS 4850	Building Game Engines (Integrative course)	4

<sup>1</sup> Indicates courses that must be taken in the semester listed.

## Computer Science and History, BS

The computer science and history combined major offers students the opportunity to gain both historical knowledge and a broad range of related analytical skills in both the humanities and computer science. You'll define a history course cluster according to a thematic principle, with a focus on quantitative analysis in the field, complementing your foundation in programming.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
CS 1200 or HIST 1000	First Year Seminar History at Northeastern	1
CS 1210 or EESH 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
IS 2000	Principles of Information Science	4
<b>Khoury Elective Courses</b>		
With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete 16 semester hours of upper-division CS, CY, DS, or IS courses that are not already required. Choose courses within the following ranges:		16
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		
DS 2500 or higher, except DS 4900		
IS 2000 or higher, except IS 4900		

### History Courses

<b>History Required Courses</b>		
HIST 1200	Historical Research and Writing	1
HIST 1201	First-Year Seminar	4
HIST 2301	The History Seminar	4
HIST 2302	Historical Writing	1
<b>Pre-1800 History Elective</b>		<b>4</b>
Complete one of the following:		
HIST 1100	Law and History	
HIST 1180	African History	

HIST 1185	Introduction to Middle Eastern History
HIST 1218	Pirates, Planters, and Patriots: Making the Americas, 1492–1804
HIST 1252	Japanese Literature and Culture
HIST 1272	Europe in the Middle Ages, 500–1500
HIST 1285	Introduction to Russian Civilization
HIST 1389	History of Espionage 1: Antiquity to World War II
HIST 2330	Colonial and Revolutionary America
HIST 2370	Renaissance to Enlightenment
HIST 2375	The Tudors, the Stuarts, and the Birth of Modern Britain
HIST 2390	Africa and the World in Early Times
HIST 3334	Assassinations in World History

### History Outside the United States and Europe 4

Complete one of the following:

HIST 1150	East Asian Studies
HIST 1180	African History
HIST 1187	Introduction to Latin American History
HIST 1206	Drug Trade and Drug War: History, Security, Culture
HIST 1246	World War II in the Pacific
HIST 1252	Japanese Literature and Culture
HIST 1253	History of Vietnam Wars
HIST 1294	History of the Jews in the Modern World
HIST 1500	Modern Chinese History and Culture
HIST 2025	Latin American History through Film
HIST 2311	Colonialism/Imperialism
HIST 2351	Modern Japan

### History Electives

Complete two HIST courses at any level in any field. 8

### Intermediate/Advanced History Course 4

Complete a minimum of one HIST course numbered 2000 to 2999 (excluding HIST 2301 and HIST 2302).

### Advanced History 4

Complete a minimum of one HIST course numbered 3000 to 4999 (excluding HIST 4701).

### History Capstone Seminar or Senior Project

HIST 4701	Capstone Seminar	4
-----------	------------------	---

### Integrative Course Requirement

Code	Title	Hours
HIST 2211	The World Since 1945	4

### Supporting Courses

Code	Title	Hours
------	-------	-------

#### Research Methods

Complete one of the following: 4

ECON 2350	Statistics for Economists
ENVR 3300	Geographic Information Systems
ENVR 5260	Geographical Information Systems
POLS 2400	Quantitative Techniques
PSYC 2320	Statistics in Psychological Research

#### Computing and Social Issues

Complete one of the following: 4

AFAM 2600	Issues in Race, Science, and Technology
CY 4170	The Law, Ethics, and Policy of Data and Digital Technologies
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights
ENGL 2150	Literature and Digital Diversity
HIST 2220	History of Technology

INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks
IS 1300 or PHIL 1300	Knowledge in a Digital World
PHIL 1145	Technology and Human Values

## Computer Science and Journalism, BS

The computer science and journalism combined major supports students who understand that journalism now takes place in both print and the digital world. Students will learn the principles, practices, and responsibilities of the journalism profession while gaining a deep understanding of the systems and technologies that support digital media.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or JRNL 1000	First Year Seminar Journalism at Northeastern	1
CS 1210 or EEAM 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4
IS 4200 or IS 4300	Information Retrieval Human Computer Interaction	4
<b>Khoury Elective Courses</b>		
With adviser approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete 12 semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		12
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		
DS 2500 or higher, except DS 4900		
IS 2000 or higher, except IS 4900		

### Journalism Major Requirements

Students transferring from outside institutions must complete a minimum of five 4-credit journalism courses at Northeastern, and these must include:

Code	Title	Hours
JRNL 2201	Journalism 2: Intermediate Reporting	
JRNL 2301	Visual Storytelling in Journalism	
JRNL 4650	Ethics and Issues in Journalism	

Code	Title	Hours
<b>Journalism Courses</b>		
A grade of C or higher is required:		
JRNL 1101 and JRNL 1102	Journalism 1: Fundamentals of Reporting and Writing and Journalist's Toolbox	5
JRNL 2201	Journalism 2: Intermediate Reporting	4
JRNL 2301	Visual Storytelling in Journalism	4
JRNL 3610	Digital Storytelling and Social Media	4

**Required Journalism**

JRNL 1150	Understanding Today's News	4
JRNL 2350	The History of Journalism: How the News Became the News	4
JRNL 3550	The First Amendment and the Media	4
JRNL 4650	Ethics and Issues in Journalism	4

**Journalism Electives**

Complete two JRNL courses. 8

Complete one of the following: 4		
AFAM 2600	Issues in Race, Science, and Technology	
CY 4170	The Law, Ethics, and Policy of Data and Digital Technologies	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
ENGL 2150	Literature and Digital Diversity	
HIST 2220	History of Technology	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
IS 1300 or PHIL 1300	Knowledge in a Digital World	
PHIL 1145	Technology and Human Values	
SOCL 1280	The Twenty-First-Century Workplace	
SOCL 2485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	

**Writing Requirement**

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111	First-Year Writing	4

**Advanced Writing in the Disciplines**

This course already fulfills a Journalism requirement above:

JRNL 2301	Visual Storytelling in Journalism	
-----------	-----------------------------------	--

**Required General Electives**

Code	Title	Hours
Complete 28 credits of general electives.		28

**NUpath Requirements Satisfied**

- Engaging with the Natural and Designed World
- Exploring Creative Expression and Innovation
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Understanding Societies and Institutions

- Interpreting Culture
- Engaging Difference and Diversity
- Employing Ethical Reasoning
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

### Khoury College GPA Requirement

Minimum 2.000 GPA required in all CS, CY, DS, IS courses

### Journalism GPA Requirement

Minimum 2.000 GPA required in all JRNL courses

### Program Requirement

134 total semester hours required

## Computer Science and Linguistics, BS

The computer science and linguistics combined major provides students with extensive background in the formal structures of natural (human) languages, as well as methods and applications of linguistic and psycholinguistic analyses of human language data. This is combined with an emphasis in computer science on artificial intelligence and natural language processing techniques. The major provides excellent preparation for work or more advanced degrees focusing on computational linguistics, natural language processing, speech perception, spoken language interfaces, artificial intelligence, and a wide array of related fields.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200	First Year Seminar	1
CS 1210	Professional Development for Khoury Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 3800	Theory of Computation (Integrative course)	4
CS 4100	Artificial Intelligence (Integrative course)	4
CS 4120	Natural Language Processing (Integrative course)	4
CS 4400	Programming Languages (Integrative course)	4
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4
<b>Khoury Elective Courses</b>		
With adviser approval, directed study, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete 4 credits of CS, CY, DS, or IS courses that are not already required. Choose courses within the following range:		4
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		
DS 2500 or higher, except DS 4900		
IS 2000 or higher, except IS 4900		

### Linguistics Requirements

Code	Title	Hours
<b>Linguistics Foundations</b>		
LING 1150	Introduction to Language and Linguistics	4
LING 2350	Linguistic Analysis (Integrative course)	4
LING 3412	Language and Culture	4
<b>Linguistic Structure</b>		

Complete four of the following:		16
LING 3420	Phonetics	
LING 3422	Phonology	
LING 3424	Morphology	
LING 3450	Syntax	
LING 3452	Semantics	
<b>Laboratory/Directed Study</b>		
Complete one of the following:		4
LING 4891	Research Seminar in Linguistics	
LING 4991	Directed Study Research	
PSYC 4610	Laboratory in Psycholinguistics	
<b>Linguistics Seminar</b>		
LING 4654	Seminar in Linguistics	4
or PSYC 4658	Seminar in Psycholinguistics	
<b>Linguistics Electives</b>		
Complete three courses not used to fulfill other degree requirements from the following options.		12
DEAF 2700	ASL Linguistics	
LING 3000 to LING 4999 <sup>1</sup>		

<sup>1</sup> Please visit the Linguistics Courses page (<http://catalog.northeastern.edu/undergraduate/science/linguistics/#coursestext>) within this catalog to review the list of courses in the LING 3000 - LING 4999 range.

## Computer Science and Mathematics, BS

The computer science and mathematics combined major was the first dual major created by the college. The mathematics requirements focus on courses that have computing applications or form the basis for further studies in mathematical theory. The program emphasizes the strong ties between computer science and mathematics that date back to the origins of machine computation in the 1930s and 1940s—and persist to this day.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
CS 1200	First Year Seminar	1
CS 1210	Professional Development for Khoury Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800 (Integrative course)	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
CS 2800	Logic and Computation	4
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 3800	Theory of Computation	4
CS 4300 or CS 4100	Computer Graphics Artificial Intelligence	4
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4

### Khoury Elective Courses

With adviser approval, a directed study, research, project study, or appropriate graduate-level course may also be taken as a computer science elective.

Complete eight semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges: 8

CS 2500 or higher, except CS 5010

CY 2000 or higher, except CY 4930

DS 2500 or higher, except DS 4900

IS 2000 or higher, except IS 4900

### Mathematics Courses

## Computer Science and Media Arts, BS

The computer science and media arts combined major is ideal for creative students who love technology. Students will acquire a solid foundation in both fields through a curriculum that spans photography, animation, video, database design, computer graphics, and human-computer interaction.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or ARTF 1000	First Year Seminar Art and Design at Northeastern	1
CS 1210 or EEAM 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 4300	Computer Graphics	4
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4
IS 4300	Human Computer Interaction	4
<b>Khoury Elective Courses</b>		
With adviser approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete 8 semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		8
CS 2500 or higher, except CS 5010

## Computer Science and Music with Concentration in Music Technology, BS

The computer science and music combined major with concentration in music technology focuses on the creative application of sound and music technologies to a broad range of artistic, social, and industrial purposes. An emphasis is maintained throughout on imaginative exploration, collaboration across disciplines, and real-world experience. It is designed to give students a firm foundation in music and computing for digital audio technologies. This program is recommended for students with a strong background in music prior to entering Northeastern.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or MUSC 1000	First Year Seminar Music at Northeastern	1
CS 1210 or EEAM 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4
IS 4300	Human Computer Interaction (Integrative)	4
<b>Khoury Elective</b>		
With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete 8 semester hours of CS, CY, DS or IS classes that are not already required. Choose courses within the following ranges:		8
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		
DS 2500 or higher, except DS 4900		
IS 2000 or higher, except IS 4900		

### Music Courses

Code	Title	Hours
<b>Music Theory and Composition</b>		
MUSC 1201	Music Theory 1	4
MUSC 1202	Music Theory 2	4
Complete one of the following:		4
MUSC 2111	Algebra and Geometry of Music	

MUSC 3300	Music Perception and Cognition (Music Perception and Cognition)	
MUSC 3541	Music Analysis Seminar	
<b>Music in Context</b>		
Select one of the following for four semester hours:		4
MUSC 1001	Music in Everyday Life	
MUSC 1002 and MUSC 1003	Music in Everyday Life and Lab for MUSC 1002	
<b>Contemporary / Popular Music</b>		
Complete one of the following:		4
MUSC 2101	Black Popular Music	
MUSC 2150	Making a Musical: Analysis, Craft, and Creation	
MUSC 2310	Popular Music Since 1945	
MUSC 2311	Topics in American Music	
MUSC 2317	Punk Rock	
MUSC 2320	40,000 Years of Music Technology	
MUSC 2336	The Festival Experience	
MUSC 2340	Divas, DJs, and Double Standards	
MUSC 2351	Music, Sound, and the Screen	
MUSC 2380	The World of Choral Music	
MUSC 3352	Sounding Human	
MUSC 3353	Music and the Racial Imagination	
MUSC 3354	Sound and the Sacred	
MUSI 3360	Global Music Industries in Context	
MUSI 3401	Hip Hop in the Music Industry	
<b>Music Technology</b>		
MUSC 2350	Acoustics and Psychoacoustics of Music	4
MUST 1220	Introduction to Music Technology	4
MUST 2102	Composing with Digital Technologies	4
MUST 2431	Computer Music Fundamentals	4
<b>Music Industry</b>		
Complete one of the following:		4
MUSI 1230	Introduction to Music Industry	
MUSI 2331	Music Recording 2	
<b>Music Technology Electives</b>		
Complete two of the following:		8
MUSC 4510	Music and the Brain Research	
MUST 3540	Special Topics in Music Technology	
MUST 3601	Digital Audio Signal Processing	
MUST 3602	Electronics for Music	
MUST 3603	Embedded Audio Programming	
MUST 4610	Composition for Electronic Instruments	
<b>Music Technology Capstone</b>		
MUST 4611	Music Technology Capstone/Senior Recital	4
<b>Foundations of Psychology</b>		
<b>Code</b>	<b>Title</b>	<b>Hours</b>
PSYC 1101	Foundations of Psychology	4
<b>Computing and Social Issues</b>		
<b>Code</b>	<b>Title</b>	<b>Hours</b>
Complete one of the following:		4
AFAM 2600	Issues in Race, Science, and Technology	
CY 4170	The Law, Ethics, and Policy of Data and Digital Technologies	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	

ENGL 2150	Literature and Digital Diversity
HIST 2220	History of Technology
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks
IS 1300	Knowledge in a Digital World
or PHIL 1300	Knowledge in a Digital World
PHIL 1145	Technology and Human Values
SOCL 1280	The Twenty-First-Century Workplace
SOCL 2485	Environment, Technology, and Society
SOCL 4528	Computers and Society

### Computer Science Writing Requirement

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111	First-Year Writing	4
<b>Advanced Writing in the Disciplines</b>		
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3314	Advanced Writing in the Arts, Media, and Design	
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

### Required General Electives

Code	Title	Hours
	Complete 20 semester hours of general electives.	20

### NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Exploring Creative Expression and Innovation
- Interpreting Culture
- Conducting Formal and Quantitative Reasoning
- Understanding Societies and Institutions
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

### Khoury College GPA Requirement

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses

### Music Technology Grade Requirement

Students must maintain at least a 2.667 GPA (B- average) in the requirements of the music half of the combined major (MUSC, MUSI, and MUST courses) and also complete all required music courses with grades of at least C. Students who fail to meet the above standards will be placed on departmental probation; those who remain on probation for two consecutive semesters will be dropped from the major.

### Program Requirement

133 total semester hours required

### Plan of Study

## Computer Science and Philosophy, BS

The computer science and philosophy combined major offers an opportunity to obtain a fluency in formal logic, including logical proofs and the ability to represent arguments clearly and evaluate them for cogency. Students will find that logic plays a fundamental role in computer science as they experience an in-depth programming foundation. The philosophy curriculum also focuses on oral and written communication, as well as ethical and social issues related to computing and information technologies.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours

### Philosophy Courses

Code	Title	Hours
<b>Philosophy Required Courses</b>		
PHIL 1115	Introduction to Logic	4
PHIL 1145	Technology and Human Values	4
PHIL 2325 or POLS 2325	Ancient Philosophy and Political Thought Ancient Philosophy and Political Thought	4

or PHIL 2330	Modern Philosophy	
PHIL 4515	Advanced Logic	4
PHIL 5005	Information Ethics	4
or PHIL 5010	AI Ethics	
or PHIL 4050	Values and Sociotechnical Algorithmic Systems	

**Critical Philosophy Elective**

Take one of the following courses not used to fulfill another requirement: 4

AFAM 1101	Introduction to African American and Africana Studies	
PHIL 1104	Goddesses, Witches, Saints, and Sinners: Women and Religion	
PHIL 1271	Sex in Judaism, Christianity, and Islam	
PHIL 2155	Human Rights	
PHIL 2492	Indigenous Philosophy	
PHIL 2619	Race and Religion in Film	
PHIL 3500	Sexuality, Gender, and the Law	
PHIL 3822	Philosophy of Race and Racism	

**Philosophy Electives**

Take three additional PHIL courses not used to fulfill another requirement, at least one of which is 4000 or above. 12

**Integrative Course Requirement**

Code	Title	Hours
These courses will double count in other areas of your major.		
CS 3800	Theory of Computation	
PHIL 4515	Advanced Logic	

**Computer Science English Requirement**

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111	First-Year Writing	4
or ENGW 1102	First-Year Writing for Multilingual Writers	

**Advanced Writing in the Disciplines**

Complete one course from the following: 4		
ENGW 3302	Advanced Writing in the Technical Professions	
ENGW 3309	Advanced Writing in the Humanities	
ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

**Required General Electives**

Code	Title	Hours
Complete 44 semester hours of general electives.		44

**Khoury College GPA Requirement**

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses

**NUpath Requirements Satisfied**

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Writing-Intensive in the Major
- Interpreting Culture
- Understanding Societies and Institutions
- Employing Ethical Reasoning
- Writing in the First Year
- Advanced Writing in the Disciplines
- Students must arrange to take a NUpath capstone using either a course in CS, CY, DS, IS or PHIL, or as a general elective.

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

## Computer Science and Physics, BS

The computer science and physics combined major brings together three disciplines: computer science, physics, and mathematics. The mathematics requirements serve as a foundation for both computer science and physics. From hands-on experience with sophisticated physics instruments, to mathematical theory, to the latest computational innovations, our interdisciplinary approach will prepare students for the myriad challenges in today's rapidly changing world.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
CS 1200	First Year Seminar	1
CS 1210	Professional Development for Khoury Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
CS 2800	Logic and Computation	4
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 3800	Theory of Computation	4
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4

### Physics Courses

Code	Title	Hours
<b>Required Courses</b>		
PHYS 1161 and PHYS 1162	Physics 1 and Lab for PHYS 1161	5
PHYS 1165 and PHYS 1166	Physics 2 and Lab for PHYS 1165	5
<b>Intermediate Physics</b>		
PHYS 2303	Modern Physics	4
PHYS 2371 and PHYS 2372	Electronics and Lab for PHYS 2371 (Integrative course)	4
<b>Advanced Physics</b>		
PHYS 3600	Advanced Physics Laboratory	4
PHYS 3602	Electricity and Magnetism 1	4
PHYS 4305	Thermodynamics and Statistical Mechanics	4

**Capstone and Electives**

Code	Title	Hours
<b>Capstone</b>		
Complete either one computer science capstone or the physics capstone:		4
<i>Computer Science Capstone</i>		
CS 4100	Artificial Intelligence	
CS 4150	Game Artificial Intelligence	
CS 4300	Computer Graphics	
CS 4410	Compilers	
CS 4550	Web Development	
<i>Physics Capstone</i>		
PHYS 5318	Principles of Experimental Physics	
<b>Khoury Elective</b>		
The computer science elective is not required if the student has completed the computer science capstone (above). With adviser approval, a directed study, research, project study, or appropriate graduate-level course may also be taken as a computer science elective.		
Complete 4 semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		4
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		
DS 2500 or higher, except DS 4900		
IS 2000 or higher, except IS 4900		
<b>Physics Elective</b>		
Only one physics elective is required if the student has completed the physics capstone (above).		
Complete two courses in the following range:		8
PHYS 3000 to PHYS 5999		

**Integrative Courses**

Code	Title	Hours
<b>Calculus</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
<b>Additional Mathematics Requirements</b>		
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 3081	Probability and Statistics	4

**Supporting Course**

Code	Title	Hours
Complete one of the following:		4
AFAM 2600	Issues in Race, Science, and Technology	
CY 4170	The Law, Ethics, and Policy of Data and Digital Technologies	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
ENGL 2150	Literature and Digital Diversity	
HIST 2220	History of Technology	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
IS 1300 or PHIL 1300	Knowledge in a Digital World	
PHIL 1145	Technology and Human Values	
SOCL 1280	The Twenty-First-Century Workplace	
SOCL 2485	Environment, Technology, and Society	
SOCL 4528	Computers and Society

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111	First-Year Writing	4
<b>Advanced Writing in the Disciplines</b>		
ENGW 3302 or ENGW 3307 or ENGW 3315	Advanced Writing in the Technical Professions Advanced Writing in the Sciences Interdisciplinary Advanced Writing in the Disciplines	4

## Required General Electives

Code	Title	Hours
Complete 24 semester hours of general electives.		24

## Khoury College GPA Requirement

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses

## NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Exploring Creative Expression and Innovation
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

## Program Requirement

135 total semester hours required

## Plan of Study

### Sample Plan of Study:

#### FOUR YEARS, TWO CO-OPS IN SPRING/SUMMER 1

Year 1								
Fall	Hours	Spring	Hours	Summer 1	Hours	Summer 2	Hours	Hours
CS 1200		1 CS 2510 and CS 2511		5 CS 3500 and CS 3501		5 Elective		4
CS 1800 and CS 1802		5 ENGW 1111		4 MATH 2321		4 Elective		4

		Elective		4				

CS or PHYS Elective <sup>1</sup>	4
<b>0</b>	<b>16</b>

**Total Hours: 136**

<sup>1</sup> Take a CS course if taking PHYS capstone or a PHYS course if taking CS Capstone

- Modern Physics (PHYS 2303) offered every fall, spring, and summer 2
- Electronics (PHYS 2371)/Lab for PHYS 2371 (PHYS 2372) offered every fall
- Advanced Physics Laboratory (PHYS 3600) offered every summer 1 and summer 2
- Classical Dynamics (PHYS 3601) offered spring and fall (even years)
- Electricity and Magnetism 1 (PHYS 3602) offered every fall and spring
- Electricity and Magnetism 2 (PHYS 3603) offered fall (even years) and summer 1 (odd years)
- Quantum Mechanics (PHYS 4115) offered every fall and spring
- Thermodynamics and Statistical Mechanics (PHYS 4305) offered every spring and summer 2 (even years)
- Biological Physics 1 (PHYS 4621) offered spring (odd years) and fall (even years)
- Medical Physics (PHYS 4623) offered summer 1 and fall (even years)
- Medical Physics Seminar 1 (PHYS 4651) offered spring and fall (odd years)
- Medical Physics Seminar 2 (PHYS 4652) offered every spring
- Principles of Experimental Physics (PHYS 5318) offered every spring

## Computer Science and Political Science, BS

The computer science and political science combined major offers both a strong computer science foundation and a deep understanding of global and societal needs. You will become an engaged citizen of the world, participating in interdisciplinary scholarship and translational research to address regional and global issues.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or POLS 1000	First Year Seminar Political Science at Northeastern	1
CS 1210 or EESH 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
IS 2000	Principles of Information Science	4
<b>Khoury Elective Courses</b>		
With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete 12 semester hours of upper-division CS, CY, DS, or IS courses that are not already required. Choose courses within the following ranges:		12
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		
DS 2500 or higher, except DS 4900		
IS 2000 or higher, except IS 4900		

### Political Science Courses

Code	Title	Hours
<b>Political Science Requirements</b>		
POLS 1150	American Government	4
POLS 1155	Comparative Politics	4
POLS 1160	International Relations	4
POLS 2399	Research Methods in Political Science	4
POLS 2400	Quantitative Techniques	4
<b>Political Theory</b>		
Complete one of the following:		4

POLS 2325	Ancient Philosophy and Political Thought	
POLS 2328	Modern Political Thought	
POLS 2330	American Political Thought	
POLS 2332	Contemporary Political Thought	
<b>Political Science Capstone</b>		
POLS 4701	Political Science Senior Capstone	4
<b>Political Science Electives</b>		
Complete four courses in the following range:		16
POLS 2000 to POLS 5999		

### Political Science Concentrations (Optional)

If you are working toward one of the following concentrations, declare it with your advisor so that it may be added to your record.

- American Political Institutions (p. 840)
- Campaigns and Elections (p. 840)
- Comparative Politics (p. 840)
- Identity, Culture, and Politics (p. 841)
- International Relations and Diplomacy (p. 841)
- Law and Legal Studies (p. 841)
- Public Policy (p. 842)
- Security Studies (p. 842)

### Integrative Requirement

Code	Title	Hours
<b>Integrative Requirement</b>		
Complete one of the following:		4
POLS 2390	Science, Technology, and Public Policy	
POLS 3405	International Political Economy	
POLS 3406	International Law	

### Supporting Course

Code	Title	Hours
Complete one of the following:		4
AFAM 2600	Issues in Race, Science, and Technology	
CY 4170	The Law, Ethics, and Policy of Data and Digital Technologies	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
ENGL 2150	Literature and Digital Diversity	
HIST 2220	History of Technology	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
IS 1300	Knowledge in a Digital World	
or PHIL 1300	Knowledge in a Digital World	
PHIL 1145	Technology and Human Values	
SOCL 1280	The Twenty-First-Century Workplace	
SOCL 2485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	

### Computer Science Writing Requirement

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111	First-Year Writing	4
or ENGW 1102	First-Year Writing for Multilingual Writers	
<b>Advanced Writing in the Disciplines</b>		
Complete one of the following:		4
ENGW 3302	Advanced Writing in the Technical Professions	
ENGW 3308	Advanced Writing in the Social Sciences	

ENGW 3311

Advanced Writing for Prelaw

ENGW 3315

Interdisciplinary Advanced Writing in the Disciplines

**Required General Electives**

Code	Title	Hours
Complete 28 semester hours of general electives.		28

**Khoury College GPA Requirement**

A minimum 2.000 GPA is required in all CS, CY, DS, and IS courses.

**Computer Science and Political Science Major Credit Requirement**

100 semester hours required in the major

**NUpath Requirements Satisfied**

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Writing in the First Year
- Writing-Intensive in the Major
- Advanced Writing in the Disciplines
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

**Program Requirement**

133 total semester hours required

**CONCENTRATION IN AMERICAN POLITICAL INSTITUTIONS**

Code	Title	Hours
Complete four of the following:		16
POLS 2350	State and Local Politics	
POLS 3300	The U.S. Congress	
POLS 3302	Judicial Process and Behavior	
POLS 3307	Public Policy and Administration	
POLS 3310	Public Opinion, Voting, and Elections	
POLS 3160	Campaign Strategy	

**CONCENTRATION IN CAMPAIGNS AND ELECTIONS**

Code	Title	Hours
<b>Required Courses</b>		
POLS 3160	Campaign Strategy	4
POLS 3302	Judicial Process and Behavior	4
<b>Campaigns and Elections Electives</b>		
Complete two of the following:		8
POLS 2345	Urban Policies and Politics	
POLS 2350	State and Local Politics	
POLS 3162	Local Campaigns and Elections	
POLS 3310	Public Opinion, Voting, and Elections	
POLS 3320	Politics and Mass Media	

**CONCENTRATION IN COMPARATIVE POLITICS**

Code	Title	Hours
<b>Theoretical Requirement</b>		
Complete two of the following:		8
POLS 2282	The Holocaust and Comparative Genocide	
POLS 2356	Democratic Erosion	

POLS 2359	Immigration Politics	
POLS 2370	Religion and Politics	
POLS 3418	Nationalism	
POLS 3430	Revolution, Civil War, and Insurrection	
POLS 3487	Politics of Developing Nations	

**Regional Requirements**

Complete one of the following: 4

POLS 3435	Politics and Governance of Europe and the European Union	
POLS 3465	Government and Politics in the Middle East	

**Experiential/Practicum Requirement**

Complete one of the following: 4

POLS 4915	Model Arab League	
POLS 4918	Model NATO	
POLS 4937	Dialogue of Civilizations: Government and Politics Abroad	

**CONCENTRATION IN IDENTITY, CULTURE, AND POLITICS**

## Computer Science and Politics, Philosophy, and Economics, BS

Politics, philosophy, and economics bring together three important frameworks from the humanistic social sciences for understanding the world around us. Computer science involves the application of theoretical concepts in the context of software development to the solution of problems that arise in almost every human endeavor, drawing on concepts and methods from mathematics, logic, science, and engineering. This interdisciplinary degree thus provides multiple perspectives and a set of skills that are indispensable in our increasingly interconnected world and essential in addressing the kinds of complex global problems future leaders need to tackle.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or PHIL 1000	First Year Seminar Philosophy at Northeastern	1
CS 1210 or EESH 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4
<b>Khoury Elective</b>		
With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken for upper-division electives.		
Complete 4 semester hours of upper-division CS, CY, DS, or IS classes that are not already required. Choose courses from the following ranges:		4
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		
DS 2500 or higher, except DS 4900		
IS 2000 or higher, except IS 4900		

### Politics, Philosophy, and Economics Courses

Complete at least four courses in each of the following subject areas: ECON, PHIL, and POLS.

Code	Title	Hours
<b>Foundation Course</b>		
PHIL 1160	Introduction to Economic Justice	4
<b>Core Courses</b>		

**Philosophy**

PHIL 2303 or PHIL 3822	Social and Political Philosophy Philosophy of Race and Racism	4
PHIL 3435 or PHIL 2325	Moral Philosophy Ancient Philosophy and Political Thought	4

**Political Science**

POLS 1150 or POLS 1155	American Government Comparative Politics	4
POLS 1160	International Relations	4
POLS 3405	International Political Economy	4

**Economics**

ECON 1115 or ECON 1116	Principles of Macroeconomics Principles of Microeconomics	4
ECON 2315 or ECON 2316	Macroeconomic Theory Microeconomic Theory	4

**Methods Course**

PHIL 3000	Interdisciplinary Methods for Politics, Philosophy, and Economics	4
-----------	---	---

**Capstone**

Complete one of the following: 4

ECON 4692	Senior Economics Seminar	
PHIL 4550	Philosophy of Economics	
PHIL 5001	Global Justice	
PHIL 5002	Ethics and Public Policy	
POLS 4701	Political Science Senior Capstone	
POLS 4703	Senior Thesis	

**PPE Elective**

Complete one course from the following ranges: 4

ECON 1200 to ECON 1999		
ECON 3000 to ECON 4689		
ECON 4900 to ECON 4999		
ECON 5200 to ECON 5999		
PHIL 2000 to PHIL 5999		
POLS 2000 to POLS 5999		

**Integrative Course Requirements**

Code	Title	Hours
IS 4300	Human Computer Interaction	4
PHIL 1115	Introduction to Logic	4
POLS 2390	Science, Technology, and Public Policy	4

**Supporting Courses**

Code	Title	Hours
<b>Statistics and Mathematics</b>		
ECON 2350 or POLS 2400 or MATH 2280	Statistics for Economists Quantitative Techniques Statistics and Software	4
MATH 1231 or MATH 1341	Calculus for Business and Economics Calculus 1 for Science and Engineering	4

**English Requirements**

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111 or ENGW 1102	First-Year Writing First-Year Writing for Multilingual Writers	4

**Advanced Writing in the Disciplines**

Complete one of the following:	4
ENGW 3302	Advanced Writing in the Technical Professions
ENGW 3309	Advanced Writing in the Humanities
ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines

**Required General Electives**

Code	Title	Hours
Complete 20 semester hours of general electives.		20

**Khoury College GPA Requirement**

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses

**NUpath Requirements Satisfied**

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Writing-Intensive in the Major
- Understanding Societies and Institutions
- Employing Ethical Reasoning
- Writing in the First Year
- Advanced Writing in the Disciplines
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

**Program Requirement**

129 total semester hours required

**Plan of Study****Sample Plan of Study: Four Years, Two Co-ops in Summer 2/Fall**

## Computer Science and Sociology, BS

The social aspects to computing continue to grow, primarily with respect to communication and the internet. The computer science and sociology combined major examines this significant impact on society and how people communicate and share culture. Students will have an opportunity to gain a solid programming foundation, as well as the practical and theoretical skills needed to address the complex social and cultural issues in a period of far-reaching social change.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or SOCL 1000	First Year Seminar Sociology at Northeastern	1
CS 1210 or EESH 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
IS 2000	Principles of Information Science	4
<b>Computer Science Writing-Intensive Requirement</b>		
Complete one of the following:		
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4
DS 4200	Information Presentation and Visualization (Take DS 3000 either as a prerequisite of or concurrently with DS 4200.)	4
IS 3500	Information System Design and Development	4
<b>Khoury Elective Courses</b>		
With adviser approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete 12 semester hours of upper-division CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		12
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		
DS 2500 or higher, except DS 4900		
IS 2000 or higher, except IS 4900		

## Sociology Courses

Code	Title	Hours
<b>Sociology Required Courses</b>		
ANTH 1101	Peoples and Cultures	4
ANTH 2305	Global Markets and Local Culture	4
SOCL 1101	Introduction to Sociology	4
SOCL 2320	Statistical Analysis in Sociology	4
SOCL 2321	Research Methods in Sociology	4
SOCL 3300	Social Theory	4
<b>Sociology Electives</b>		
Complete one sociology elective in each of the following ranges:		12
Introductory elective: SOCL 1000 to SOCL 1999		
Intermediate elective: SOCL 2000 to SOCL 3999		
Advanced elective: SOCL 4000 to SOCL 4999		
<b>Sociology Required Capstone</b>		
SOCL 4600	Senior Seminar	4

## Integrative Course Requirement

Code	Title	Hours
Complete one of the following:		4
SOCL 1280	The Twenty-First-Century Workplace	
SOCL 2485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	

## Computer Science Writing Requirement

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111	First-Year Writing	4
or ENGW 1102	First-Year Writing for Multilingual Writers	
<b>Advanced Writing in the Disciplines</b>		
Complete one of the following:		4
ENGW 3302	Advanced Writing in the Technical Professions	
ENGW 3308	Advanced Writing in the Social Sciences	
ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

## Required General Electives

Code	Title	Hours
Complete 32 semester hours of general electives.		32

## Khoury College GPA Requirements

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses

## Sociology GPA Requirements

2.000 average GPA requirement across all sociology classes

## NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Writing-Intensive in the Major
- Writing in the First Year
- Advanced Writing in the Disciplines
- Interpreting Culture
- Understanding Societies and Institutions
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

## Program Requirement

133 total semester hours required

## Computer Science and Theatre, BS

The computer science and theatre combined major is ideal for creative students who love technology as a means to expand what is possible in the performing arts. This major combines a strong foundation in computing with the opportunity to acquire a deep knowledge of theatre through curriculum that spans design, performance, and the production of innovative forms of theatre, including interactive media, computer graphics, human-computer interaction, and more.

It offers both classroom and experiential learning on the creative, social, and technological relationship between theatre and computing.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Computer Science Requirements

Code	Title	Hours

## Cybersecurity and Business Administration, BS

The cybersecurity and business combined major delivers a technical and security-focused degree with a strong grounding in business. Students will complete most of the requirements of a business major, including macroeconomics and microeconomics, while also focusing on the conceptual and practical computer science skills that will enable them to contribute to ensuring the reliability and security of cyberspace.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Cybersecurity Major Requirements

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or BUSN 1102	First Year Seminar Personal Skill Development for Business	1
CS 1210 or BUSN 1103	Professional Development for Khoury Co-op Professional Development for Business Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5

<b>Strategy</b>		
STRT 4501	Strategy in Action	4

## Business Concentration

Complete a four-course business concentration from the following list. (p. )

- Accounting (p. 654)
- Accounting and Advisory Services (p. 655)
- Brand Management (p. 656)
- Corporate Innovation (p. 658)
- Entrepreneurial Startups (p. 659)
- Family Business (p. 660)
- Finance (p. 661)
- Fintech (p. 662)
- Healthcare Management and Consulting (p. 664)
- International Business (p. 665) (available only as a second concentration)

- Management (p. 666)
- Marketing (p. 668)
- Marketing Analytics (p. 669)
- Social Innovation and Entrepreneurship (p. 670)
- Supply Chain Management (p. 671)

## Business Cooperative Education

Complete one cooperative education experience.

## Integrative Requirement

Code	Title	Hours
MISM 2301	Introduction to Information Systems and Digital Technologies	4

## Supporting Courses

Code	Title	Hours
<b>Mathematics Courses</b>		
Complete one of the following:		4
MATH 1341	Calculus 1 for Science and Engineering	
MATH 1231	Calculus for Business and Economics	
<b>Economics</b>		
Complete one of the following:		4
ECON 1115	Principles of Macroeconomics	
ECON 1116	Principles of Microeconomics	

## Writing Requirements

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111 or ENGW 1102	First-Year Writing First-Year Writing for Multilingual Writers	4
<b>Advanced Writing in the Disciplines</b>		
Complete one of the following courses:		4
ENGW 3302 or ENGW 3304 or ENGW 3315	Advanced Writing in the Technical Professions Advanced Writing in the Business Administration Professions Interdisciplinary Advanced Writing in the Disciplines	

## Required General Electives

Code	Title	Hours
Complete 16 semester hours of general electives.		16

## Khoury College GPA Requirement

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses.

## Business GPA Requirement

Minimum 2.000 GPA required in all business courses.

## NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Understanding Societies and Institutions
- Writing in the First Year
- Advanced Writing in the Disciplines

- Writing-Intensive in the Major

- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

## Program Requirement

133 semester hours required

## Plan of Study

### Sample Plan of Study: Four Years, Two Co-ops in Summer 2/Fall

Year 1

## Cybersecurity and Criminal Justice, BS

The cybersecurity and criminal justice combined degree applies a multidisciplinary approach to ensuring the reliability and security of cyberspace. The program will provide students with a strong programming foundation coupled with academic and experiential knowledge of the criminal justice system. Students learn how social behavior, policy, and legal rules can affect cybersecurity and utilize comparative social science to understand, predict, and explain crime.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Cybersecurity Major Requirements

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or CRIM 1000	First Year Seminar Criminal Justice at Northeastern	1
CS 1210 or EESH 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Computer Science Fundamentals Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 3650	Computer Systems	4
CS 4700 or CS 4730	Network Fundamentals Distributed Systems	4
<b>Cybersecurity Required Courses</b>		
CY 2550	Foundations of Cybersecurity	4
CY 3740	Systems Security	4
CY 4740	Network Security	4
<b>Cybersecurity Elective</b>		
Complete one of the following:		
COMM 2551	Free Speech in Cyberspace	4
CS 2800	Logic and Computation	
CS 4400	Programming Languages	
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	
CS 4710 or CS 6710	Mobile and Wireless Systems Wireless Network	
CY 4770	Cryptography	
CY 5010	Foundations of Information Assurance	
CY 5200	Security Risk Management and Assessment	
CY 5210	Information System Forensics	

CY 5770	Software Vulnerabilities and Security
DS 4300	Large-Scale Information Storage and Retrieval
DS 4400	Machine Learning and Data Mining 1
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322
EECE 3324	Computer Architecture and Organization
EECE 4534 and EECE 4535	Microprocessor-Based Design and Lab for EECE 4534
IS 4300	Human Computer Interaction
LPSC 1101	Introduction to Law
LPSC 2301	Introduction to Law, Policy, and Society
LPSC 3303	Topics in Law and Public Policy
MATH 3527	Number Theory 1
MATH 4575	Introduction to Cryptography
PHIL 1145	Technology and Human Values
POLS 2390	Science, Technology, and Public Policy
POLS 3307	Public Policy and Administration
POLS 3324	Law and Society
POLS 3406	International Law
POLS 3420	U.S. National Security Policy
POLS 3423	Terrorism and Counterterrorism

## Supporting Courses

Code	Title	Hours
Complete the following course:		
MATH 1341	Calculus 1 for Science and Engineering	4

## Computer Science Writing Requirement

Code	Title	Hours
<b>College Writing</b>		
Complete one of the following:		
ENGW 1111	First-Year Writing	4
ENGW 1102	First-Year Writing for Multilingual Writers	
<b>Advanced Writing in the Disciplines</b>		
Complete one of the following:		
ENGW 3302	Advanced Writing in the Technical Professions	4
ENGW 3308	Advanced Writing in the Social Sciences	
ENGW 3311	Advanced Writing for Prelaw	
ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

## Criminal Justice Requirements

Code	Title	Hours
<b>Introduction to Crime, Law, and the Justice System</b>		
What do we know about crime and justice? In these three courses, students have an opportunity to develop a foundational understanding of three related phenomena: why crime exists, how our criminal justice system responds to crime, and the constitutional and legal oversight of this process.		
CRIM 1100	Introduction to Criminal Justice	4
CRIM 1110	Criminal Due Process	4
CRIM 1120	Criminology	4
<b>Current Crime and Justice Issues</b>		
These courses introduce students to topical issues related to crime and justice.		
Complete one of the following:		
CRIM 1300	The Death Penalty	4
CRIM 1400	Human Trafficking	
CRIM 1500	Corruption, Integrity, and Accountability	

CRIM 1700	Crime, Media, and Politics	
-----------	----------------------------	--

### Crime Problems and Criminal Justice Institutions

The 2000-level courses in this list ask how does justice work and for whom? These courses introduce students to the systems and institutions tasked with providing justice. Each includes experiential learning components in cooperation with local criminal justice institutions. The 3000-level courses in this list provide students a deeper look at a range of crime problems.

Complete one of the following: 4

CRIM 2310	Courts: The Third Branch of Government	
CRIM 2320	Youth Crime and Justice	
CRIM 2330	Punishment in the Age of Mass Incarceration	
CRIM 2370	Restorative Justice: Transforming the System	
CRIM 3010	Criminal Violence	
CRIM 3030	Global Criminology	
CRIM 3040	Psychology of Crime	
CRIM 3070	Corporate and White-Collar Crime	
CRIM 3540	Addiction and Recovery	

### Creating Knowledge about Crime and Justice

How do we know what we know about crime and justice—and how do we develop new knowledge? Harnessing data to learn about issues, identify solutions, and advocate for change.

CRIM 3600	Criminal Justice Research Methods	4
CRIM 3700	Analyzing and Using Data on Crime and Justice	4

### Systemic Issues

A consideration of systemic issues facing the criminal justice system.

Complete one of the following: 4

CRIM 3110	Gender, Crime, and Justice	
CRIM 3120	Race, Crime, and Justice	

### Criminal Justice Elective

Rounding out knowledge of crime and justice.

Complete one additional criminal justice elective from the 3000, 4000 or 5000-level. 4

### Criminal Justice Capstone

Complete one of the following: 4

CRIM 4949	Senior Capstone Seminar	
CY 4930	Cybersecurity Capstone	

### Criminal Justice Co-op Integration

Code	Title	Hours
------	-------	-------

Co-op students should complete at least one of the following courses. CRIM 3000 is required for the first co-op. CRIM 4000 is required if a second co-op is taken:

CRIM 3000	Co-op Integration Seminar 2	1
CRIM 4000	Co-op Integration Seminar 3	1

### Integrative Requirement

Code	Title	Hours
------	-------	-------

#### Cybersecurity Integrative Course

CY 4170 or CY 5240	The Law, Ethics, and Policy of Data and Digital Technologies Cyberlaw: Privacy, Ethics, and Digital Rights	4
-----------------------	---	---

#### Criminal Justice Integrative Course

Complete one of the following: 4

CRIM 2340	Corporate Security: Securing the Private Sector	
CRIM 2350	Policing a Democratic Society	
CRIM 3060	Political Crime and Terrorism	
CRIM 4040	Crime Prevention	
CRIM 5900	Topics in Criminal Justice and Criminology	

**Required General Electives**

Code	Title	Hours
Complete 24 semester hours of general electives.		24

**Khoury College GPA Requirement**

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses.

**NUpath Requirements Satisfied**

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Understanding Societies and Institutions
- Analyzing and Using Data
- Employing Ethical Reasoning
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

**Program Requirement**

134 total semester hours required.

**Plan of Study****Sample Plan of Study:**

Year 1

## Cybersecurity and Economics, BS

The cybersecurity and economics combined degree applies a multidisciplinary approach integrating fundamental economics courses with a strong programming foundation. Students will study both the behavior of individuals and the collective behavior of industries and governments, utilizing computing skills to ensure the reliability and security of cyberspace.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Cybersecurity Major Requirements

Code	Title	Hours
<b>Computer Science Overview</b>		
CS 1200 or ECON 1000	First Year Seminar Economics at Northeastern	1
CS 1210 or EESH 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1

LPSC 2301	Introduction to Law, Policy, and Society
LPSC 3303	Topics in Law and Public Policy
MATH 3527	Number Theory 1
MATH 4575	Introduction to Cryptography
PHIL 1145	Technology and Human Values
POLS 2390	Science, Technology, and Public Policy
POLS 3307	Public Policy and Administration
POLS 3324	Law and Society
POLS 3406	International Law
POLS 3420	U.S. National Security Policy
POLS 3423	Terrorism and Counterterrorism

### Supporting Course

Code	Title	Hours
Complete one of the following. It is recommended that MATH 1241 or higher is chosen:		
MATH 1231	Calculus for Business and Economics	4
or MATH 1241	Calculus 1	
or MATH 1245	Calculus with Applications	
or MATH 1251	Calculus and Differential Equations for Biology 1	
or MATH 1340	Intensive Calculus for Engineers	
or MATH 1341	Calculus 1 for Science and Engineering	

### Economics Requirements

Code	Title	Hours
<b>Required Courses</b>		
ECON 1115	Principles of Macroeconomics	4
ECON 1116	Principles of Microeconomics	4
ECON 2315	Macroeconomic Theory	4
ECON 2316	Microeconomic Theory	4
ECON 2350	Statistics for Economists	4
<b>Electives</b>		
Complete four ECON electives that are found in the following range with, at most, two at the 1000 level:		16
ECON 1200 to ECON 1999		
ECON 2990 to ECON 4689		
ECON 4900 to ECON 4996		
ECON 5200 to ECON 5999		

### Integrative Requirement

Code	Title	Hours
<b>Capstone</b>		
Complete one of the following:		4
CY 4930	Cybersecurity Capstone	
ECON 4692 or ECON 4997	Senior Economics Seminar Senior Economics Thesis	

**Integrative Requirement**

ECON 2560	Applied Econometrics	4
-----------	----------------------	---

**Writing Requirement**

Code	Title	Hours
------	-------	-------

**College Writing**

Complete one of the following: 4

ENGW 1102	First-Year Writing for Multilingual Writers

## Data Science and Biochemistry, BS

The Data Science and Biochemistry Major combines computer science, biochemistry, biology, information science, mathematics, and statistics into an integrated curriculum. The program engages students in rigorous coursework designed to prepare students to interpret the ever-expanding knowledge base.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Data Science Requirements

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or BIOC 1000 or INSC 1000	First Year Seminar Biochemistry at Northeastern Science at Northeastern	1
CS 1210 or EESC 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Programming Sequence Pathways</b>		
Choose one of the two options:		12
<i>Computer Science Option</i>		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	
<i>Data Science Option</i>		
DS 2000 and DS 2001	Programming with Data and Data Science Programming Practicum	
DS 2500 and DS 2501	Intermediate Programming with Data and Lab for DS 2500	
DS 3500	Advanced Programming with Data	
<b>Computer Science Required Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 3200	Database Design	4
<b>Data Science Foundations</b>		
DS 3000	Foundations of Data Science	4
DS 4200	Information Presentation and Visualization	4
DS 4300	Large-Scale Information Storage and Retrieval	4
DS 4400	Machine Learning and Data Mining 1	4
<b>Khoury Elective</b>		
With adviser approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete four semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		4
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		
DS 2500 or higher, except DS 4900		

IS 2000 or higher, except IS 4900

**Statistics Foundations**

Complete one of the following: 4

ENVR 2500 and ENVR 2501	Biostatistics and Lab for ENVR 2500
MATH 3081	Probability and Statistics

**Computer Science Writing Requirement**

Code	Title	Hours

## Data Science and Biology, BS

The data science and biology major provides a strong foundation in biology, chemistry, and mathematics, as well as software development and algorithms. Students study the collection, manipulation, storage, retrieval, and computational analysis of data in its various forms, including numeric, textual, image, and video data from small to large volumes. Students also explore the organization and processes of life across broad areas of the field, from molecules and cells through organs and organ systems to populations, ecosystems, and evolution.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Data Science Requirements

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or BIOL 1000 or INSC 1000	First Year Seminar Biology at Northeastern Science at Northeastern	1
CS 1210 or EESC 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Programming Sequence Pathways</b>		
Choose one of the two options:		12
<i>Computer Science Option</i>		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	
<i>Data Science Option</i>		
DS 2000 and DS 2001	Programming with Data and Data Science Programming Practicum	
DS 2500 and DS 2501	Intermediate Programming with Data and Lab for DS 2500	
DS 3500	Advanced Programming with Data	
<b>Computer Science Required Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 3200	Database Design	4
<b>Data Science Foundations</b>		
DS 3000	Foundations of Data Science	4
DS 4200	Information Presentation and Visualization	4
DS 4300	Large-Scale Information Storage and Retrieval	4
DS 4400	Machine Learning and Data Mining 1	4
<b>Khoury Elective</b>		
With adviser approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete four semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		4
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		

DS 2500 or higher, except DS 4900

IS 2000 or higher, except IS 4900

## Data Science and Behavioral Neuroscience, BS

The data science and behavioral neuroscience major combines the disciplines of biology, psychology, computer science, and data science into an integrated curriculum. The human brain is a complex information processing system requiring scientists to analyze, integrate, and share large datasets garnered from multiple techniques that image and record the activity of the brain at work. Students investigate the anatomy and physiology of neural circuits that underlie brain mechanisms and pathological states that give rise to behavioral functions. Students have an opportunity to develop skills in large-scale data manipulation and storage, machine learning, data mining, and information visualization necessary to execute big brain-mapping initiatives including human neuroconnectivity maps.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Data Science Requirements

## Data Science and Business Administration, BS

The data science and business combined major integrates a technical degree with the theory and practice of management through active learning, problem-driven research, corporate partnerships, and experiential assignments. Students study the collection, manipulation, storage, retrieval, and computational analysis of data in its various forms, including numeric, textual, image, and video data from small to large volumes. This program reflects the impact of data in modern business practice.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:

ENGW 3302 or ENGW 3304 or ENGW 3315	Advanced Writing in the Technical Professions Advanced Writing in the Business Administration Professions Interdisciplinary Advanced Writing in the Disciplines	4

**Required General Electives**

Code	Title	Hours
Complete 16 semester hours of general electives.		16

**Business Cooperative Education**

Complete one cooperative education experience.

**Khoury College GPA Requirement**

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses

**Business GPA Requirement**

Minimum 2.000 GPA required in business courses

**NUpath Requirements Satisfied**

- Engaging with the Natural and Designed World
- Ethical Reasoning
- Interpreting Culture
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Understanding Societies and Institutions
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

**Program Requirement**

130 total semester hours required

**Plan of Study****Sample Plan of Study: Four Years, Two Co-ops in Summer 2/Fall**

## Data Science and Chemistry, BS

The data science and chemistry major combines chemistry, information science, and mathematics to give students both breadth and depth in chemistry and data science fundamentals. During their course of study, students have an opportunity to develop qualitative and quantitative problem-solving skills as well as effective communication skills. Students will study the collection, manipulation, storage, retrieval, and computational analysis of chemical and other scientific data in its various forms, including numeric, textual, image, and video data from small to large volumes. The program engages students in rigorous coursework designed to prepare students to interpret the ever-expanding knowledge base.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Data Science Requirements

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or CHEM 1000 or INSC 1000	First Year Seminar Chemistry/Chemical Biology at Northeastern Science at Northeastern	1
CS 1210 or EESC 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Programming Sequence Pathways</b>		
Choose one of the two options:		12
<i>Computer Science Option</i>		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	
<i>Data Science Option</i>		
DS 2000 and DS 2001	Programming with Data and Data Science Programming Practicum	
DS 2500 and DS 2501	Intermediate Programming with Data and Lab for DS 2500	
DS 3500	Advanced Programming with Data	
<b>Computer Science Required Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 3200	Database Design	4
<b>Data Science Foundations</b>		
DS 3000	Foundations of Data Science	4
DS 4200	Information Presentation and Visualization	4
DS 4300	Large-Scale Information Storage and Retrieval	4
DS 4400	Machine Learning and Data Mining 1	4
<b>Khoury Elective</b>		
With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete 4 semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		4
CS 2500 or higher, except CS 5010		

CY 2000 or higher, except CY 4930

DS 2500 or higher, except DS 4900

IS 2000 or higher, except IS 4900

**Statistics Foundations**

ENVR 2500 and ENVR 2501	Biostatistics and Lab for ENVR 2500	5
----------------------------	--	---

**Chemistry Requirements**

Code	Title	Hours
------	-------	-------

**General Chemistry**

Choose one of the following paired course options: 10

*Option 1*

CHEM 1211 and CHEM 1212	General Chemistry 1 and Lab for CHEM 1211
----------------------------	--

CHEM 1214 and CHEM 1215	General Chemistry 2 and Lab for CHEM 1214
----------------------------	--

*Option 2*

CHEM 1161 and CHEM 1162 and CHEM 1163	General Chemistry for Science Majors and Lab for CHEM 1161 and Recitation for CHEM 1161
---	---

CHEM 2161 and CHEM 2162 and CHEM 2163	Concepts in Chemistry and Lab for CHEM 2161 and Recitation for CHEM 2161
---	--

**Intermediate-Level Chemistry**

CHEM 2311 and CHEM 2312	Organic Chemistry 1 and Lab for CHEM 2311	5
----------------------------	--	---

CHEM 2313 and CHEM 2314	Organic Chemistry 2 and Lab for CHEM 2313	5
----------------------------	--	---

CHEM 2321 and CHEM 2322 and CHEM 2323	Analytical Chemistry and Lab for CHEM 2321 and Recitation for CHEM 2321	5
---	---	---

**Advanced-Level Chemistry**

Complete one course from the following options: 4

CHEM 3410	Environmental Geochemistry
-----------	----------------------------

CHEM 3501 to CHEM 4628

**Mathematics Foundations**

MATH 1341	Calculus 1 for Science and Engineering	4
-----------	--	---

MATH 1342	Calculus 2 for Science and Engineering	4
-----------	--	---

**Supporting Course**

PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
---	--	---

**Integrative Requirements**

Code	Title	Hours
------	-------	-------

**Integrative Courses**

CHEM 3401 and CHEM 3402	Chemical Thermodynamics and Kinetics and Lab for CHEM 3401	5
----------------------------	---	---

CHEM 4750	Senior Research	4
-----------	-----------------	---

**Writing Requirements**

Code	Title	Hours

## Data Science and Criminal Justice, BS

### Overview

This combined major offers students the opportunity to gain cutting-edge data science skills and expertise in important and urgent social issues: crime, the law, and the criminal justice system. Data science classes allow students to develop skills in the collection, manipulation, storage, retrieval, and computational analysis of data in its various forms, including numeric, textual, image, and video data from small to large volumes. Criminology and criminal justice courses provide a foundation for understanding crime, the law, and our criminal justice system. Together, the combined major is designed to prepare students to apply data science skills to crime and justice topics.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Data Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
CS 1200 or CRIM 1000	First Year Seminar Criminal Justice at Northeastern	1
CS 1210 or EESH 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Programming Sequence Pathways</b>		
Complete one of the following options:		12
<i>Computer Science Option</i>		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	
<i>Data Science Option</i>		
DS 2000 and DS 2001	Programming with Data and Data Science Programming Practicum	
DS 2500 and DS 2501	Intermediate Programming with Data and Lab for DS 2500	
DS 3500	Advanced Programming with Data

DS 3000	Foundations of Data Science	4
DS 4200	Information Presentation and Visualization	4
DS 4300	Large-Scale Information Storage and Retrieval	4
DS 4400	Machine Learning and Data Mining 1	4
<b>Khoury Elective Courses</b>		
With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete 4 credits of upper-division CS, CY, DS, or IS courses that are not already required. Choose courses within the following ranges:		4
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		

DS 2500 or higher, except DS 4900

IS 2000 or higher, except IS 4900

**Criminal Justice Courses**

Code	Title	Hours
<b>Introduction to Crime, Law, and the Justice System</b>		
What do we know about crime and justice? In these three courses, students have an opportunity to develop a foundational understanding of three related phenomena: why crime exists, how our criminal justice system responds to crime, and the constitutional and legal oversight of this process.		
CRIM 1100	Introduction to Criminal Justice	4
CRIM 1110	Criminal Due Process	4
CRIM 1120	Criminology	4
<b>Current Crime and Justice Issues</b>		
These courses introduce students to topical issues related to crime and justice.		
Complete one of the following:		4
CRIM 1300	The Death Penalty	
CRIM 1400	Human Trafficking	
CRIM 1500	Corruption, Integrity, and Accountability	
CRIM 1700	Crime, Media, and Politics	
<b>Crime Problems and Criminal Justice Institutions</b>		
The 2000-level courses in this list ask how does justice work and for whom? These courses introduce students to the systems and institutions tasked with providing justice. Each includes experiential learning components in cooperation with local criminal justice institutions. The 3000-level courses in this list provide students with a deeper look at a range of crime problems.		
Complete one of the following:		4
CRIM 2310	Courts: The Third Branch of Government	
CRIM 2320	Youth Crime and Justice	
CRIM 2330	Punishment in the Age of Mass Incarceration	
CRIM 2340	Corporate Security: Securing the Private Sector	
CRIM 2350	Policing a Democratic Society	
CRIM 2370	Restorative Justice: Transforming the System	
CRIM 3010	Criminal Violence	
CRIM 3030	Global Criminology	
CRIM 3040	Psychology of Crime	
CRIM 3070	Corporate and White-Collar Crime	
<b>Systemic Issues</b>		
These courses consider systemic issues facing the criminal justice system.		
Complete one of the following:		4
CRIM 3110	Gender, Crime, and Justice	
CRIM 3120	Race, Crime, and Justice	
<b>Creating Knowledge About Crime and Justice</b>		
How do we know what we know about crime and justice—and how do we develop new knowledge? This course covers how to harness data to learn about issues, identify solutions, and advocate for change.		
CRIM 3600	Criminal Justice Research Methods	4
<b>Criminal Justice Capstone</b>		
CRIM 4949	Senior Capstone Seminar	4
<b>Criminal Justice Elective</b>		
These courses round out our knowledge of crime and justice.		
Complete two additional criminal justice electives from the 3000, 4000, or 5000 level.		8

**Integrative Course Requirement**

Code	Title	Hours
Complete one of the following:		
CRIM 4040	Crime Prevention	4
CRIM 4800	Crime Mapping	

**Supporting Courses**

Code	Title	Hours
<b>Mathematics Requirement</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
<b>Statistics Foundation</b>		
ECON 2350	Statistics for Economists	4
<b>Computing and Social Issues</b>		
Complete one of the following:		
AFAM 2600	Issues in Race, Science, and Technology	
CY 4170	The Law, Ethics, and Policy of Data and Digital Technologies	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
ENGL 2150	Literature and Digital Diversity	
HIST 2220	History of Technology	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks

## Data Science and Ecology and Evolutionary Biology, BS

The combined major in data science and ecology and evolutionary biology provides a strong foundation in the fundamentals of ecology and evolutionary biology, including focal points in population, community, and ecosystem ecology; evolutionary ecology and biology; conservation biology; population genetics; behavior; and ecological and evolutionary genomics. Data science allows students to study the collection, manipulation, storage, retrieval, and computational analysis of data in its various forms, including numeric, textual, image, and video data from small to large volumes. The interdisciplinary nature of the major fosters critical thinking and creativity in scientific problem solving.

Students majoring in ecology and evolutionary biology and associated combined majors cannot combine majors in biology, marine biology, or environmental and sustainability sciences, nor can they minor in biology, marine science, or environmental and sustainability sciences.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Data Science Coursework

## Data Science and Economics, BS

The combined major in data science and economics integrates fundamental economics courses with a strong programming foundation. Students study the collection, manipulation, storage, retrieval, and computational analysis of data in its various forms, including numeric, textual, image, and video data from small to large volumes. Utilizing these skill sets allows students to address complex issues in the behavior of individuals and the collective behavior of industries and governments.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Data Science Requirements

Code	Title	Hours
<b>Computer Science Overview</b>		
CS 1200 or ECON 1000	First Year Seminar Economics at Northeastern	1
CS 1210 or EESH 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Programming Sequence Pathways</b>		
Complete one of the following options:		12
<i>Computer Science Option</i>		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	
<i>Data Science Option</i>		
DS 2000 and DS 2001	Programming with Data and Data Science Programming Practicum	
DS 2500 and DS 2501	Intermediate Programming with Data and Lab for DS 2500	
DS 3500	Advanced Programming with Data	
<b>Computer Science Required Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 3200	Database Design	4
<b>Data Science Foundations</b>		
DS 3000	Foundations of Data Science	4
DS 4200	Information Presentation and Visualization	4
DS 4300	Large-Scale Information Storage and Retrieval	4
DS 4400	Machine Learning and Data Mining 1	4
<b>Khoury Elective</b>		
With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete 4 semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		4
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		

DS 2500 or higher, except DS 4900

IS 2000 or higher, except IS 4900

**Economics Requirements**

Code	Title	Hours
<b>Required Economics Courses</b>		
ECON 1115	Principles of Macroeconomics	4
ECON 1116	Principles of Microeconomics	4
ECON 2315	Macroeconomic Theory	4
ECON 2316	Microeconomic Theory	4
ECON 2350	Statistics for Economists	4
<b>Economics Electives</b>		
Complete five ECON elective courses that are found in the following ranges, with no more than two in the ECON 1200 to ECON 1999 range:		20
ECON 1200–ECON 1999		
ECON 2990–ECON 4689		
ECON 4900–ECON 4996		
ECON 5200–ECON 5999		
<b>Economics Capstone</b>		
ECON 4692 or ECON 4997	Senior Economics Seminar Senior Economics Thesis	4

**Integrative Course Requirement**

Code	Title	Hours
ECON 2560	Applied Econometrics	4

**Supporting Course Requirements**

Code	Title	Hours
<b>Mathematics</b>		
MATH 1241 or higher is recommended.		
MATH 1231 or MATH 1241 or MATH 1245 or MATH 1251 or MATH 1340 or MATH 1341	Calculus for Business and Economics Calculus 1 Calculus with Applications Calculus and Differential Equations for Biology 1 Intensive Calculus for Engineers Calculus 1 for Science and Engineering	4
<b>Computing and Social Issues</b>		
Complete one of the following:		4
AFAM 2600	Issues in Race, Science, and Technology	
CY 4170	The Law, Ethics, and Policy of Data and Digital Technologies	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
ENGL 2150	Literature and Digital Diversity	
HIST 2220	History of Technology	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
IS 1300 or PHIL 1300	Knowledge in a Digital World Knowledge in a Digital World	
PHIL 1145	Technology and Human Values	
SOCL 1280	The Twenty-First-Century Workplace	
SOCL 2485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	

**English Requirement**

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111	First-Year Writing	4

or ENGW 1102	First-Year Writing for Multilingual Writers	
<b>Advanced Writing in the Disciplines</b>		
Complete one of the following:		4
ENGW 3302	Advanced Writing in the Technical Professions	
ENGW 3308	Advanced Writing in the Social Sciences	
ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

**Required General Electives**

Code	Title	Hours
Complete 24 semester hours of general electives.		24

**Khoury College GPA Requirement**

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses

**Economics GPA Requirement**

Grades in the following four courses must average to a minimum of C (2.000):

Code	Title	Hours
ECON 2315	Macroeconomic Theory	
ECON 2316	Microeconomic Theory	
ECON 2350	Statistics for Economists	
ECON 2560	Applied Econometrics	

**NUpath Requirements Satisfied**

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Exploring Creative Expression and Innovation
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

**Program Requirement**

130 total semester hours required

**Plan of Study**

**Sample Pattern: Four Years, Two Co-ops in Summer 2/Fall**

## Data Science and Environmental and Sustainability Sciences, BS

The data science and environmental and sustainability sciences combined major focuses on major environmental challenges facing our planet and provides broad training to understand how these challenges can be met through advances in data science. Understanding these processes requires acquisition and analysis of large amounts of data—an ideal fit with data science, where students study the collection, manipulation, storage, retrieval, and computational analysis of data in its various forms, including numeric, textual, image, and video data from small to large volumes.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Data Science Courses

Code	Title	Hours

## Data Science and Health Science, BS

The data science and health science combined major offers a solid academic and experiential foundation integrating studies in health administration, computer science, mathematics, and statistics. This program reflects the impact of data in modern healthcare and prepares students for success in careers in health administration, community-based health promotion, public health, and big data analysis.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

## Data Science and International Affairs, BS

### Overview

This combined degree offers both a strong data science foundation and an interdisciplinary understanding of global affairs and international issues. Students study the collection, manipulation, storage, retrieval, and computational analysis of data in its various forms, including numeric, textual, image, and video data from small to large volumes. Utilizing these skill sets allows students to address topics such as interstate relations (conflict, cooperation, hierarchies); civil society, transnational advocacy networks, global social movements; and state-society relations (democracy, authoritarianism, social justice and inequalities, citizenship). Upon graduation, students are equipped with the skills and knowledge needed to work across national cultures in fields that relate to utilizing data to address complex regional and international issues.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Data Science Courses

Code	Title	Hours
<b>Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or INTL 1000	First Year Seminar International Affairs at Northeastern	1
CS 1210	Professional Development for Khoury Co-op	1
<b>Programming Sequence Pathways</b>		
Complete one of the two options:		12
<i>Computer Science Option</i>		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	
<i>Data Science Option</i>		
DS 2000 and DS 2001	Programming with Data and Data Science Programming Practicum	
DS 2500 and DS 2501	Intermediate Programming with Data and Lab for DS 2500	
DS 3500	Advanced Programming with Data	
<b>Computer Science Required Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 3200	Database Design	4
<b>Data Science Foundations</b>		
DS 3000	Foundations of Data Science	4
DS 4200	Information Presentation and Visualization	4
DS 4300	Large-Scale Information Storage and Retrieval	4
DS 4400	Machine Learning and Data Mining 1	4
<b>Khoury Elective</b>		
With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete four semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		4
CS 2500 or higher, except CS 5010		

CY 2000 or higher, except CY 4930

DS 2500 or higher, except DS 4900

IS 2000 or higher, except IS 4900

## International Affairs Requirements

Courses used to fulfill major requirements may not be used to satisfy the global dynamics requirement. See department for additional courses.

Code	Title	Hours
<b>Required Courses</b>		
ANTH 1101	Peoples and Cultures	4
or HIST 2211	The World Since 1945	
or HIST 2311	Colonialism/Imperialism	
INTL 1101	Globalization and International Affairs	4
INTL 2718	Research Methods in International Affairs	4
INTL 3400	International Conflict and Negotiation	4
POLS 1160	International Relations	4

## International Experiential Learning

Complete at least one "international semester" via study abroad, international internship, international co-op, or two short-term programs.

## Global Dynamics Requirement

Code	Title	Hours
Complete two of the following with one course numbered 2000 or above. Courses are divided into thematic groups to aid students in deciding which courses to take and have no bearing on major requirements:		8

Code	Title	Hours
<i>Environment</i>		
ENVR 1110	Global Climate Change	
ENVR 2515	Sustainable Development	
ENVR 3150	Food Security and Sustainability	
INTL 5100	Climate and Development	
INTL 5268	International Environmental Policy	
or PPUA 5268	International Environmental Policy	
SOCL 1246	Environment and Society	
<i>Law, Diplomacy, and Global Governance</i>		
COMM 2303	Global and Intercultural Communication	
INTL 2480	Women and World Politics	
or WMNS 2480	Women and World Politics	
INTL 3520	Global Political Economy	
INTL 5010	International Human Rights Law and Policy	
POLS 1155	Comparative Politics	
POLS 1160	International Relations	
POLS 2370	Religion and Politics	
POLS 3405	International Political Economy	
POLS 3406	International Law	
POLS 4910	Model United Nations	
<i>Human Rights and Social Justice</i>		
HIST 2303	Gender and Reproductive Justice	
HIST 2373	Gender and Sexuality in World History	
INTL 2480	Women and World Politics	
or WMNS 2480	Women and World Politics	
INTL 5010	International Human Rights Law and Policy	
PHIL 5001	Global Justice	
<i>Conflict and Security</i>		
CRIM 3030	Global Criminology	

CRIM 3060	Political Crime and Terrorism
CRIM 5203	Security in the 21st Century
HIST 1206	Drug Trade and Drug War: History, Security, Culture
HIST 1389	History of Espionage 1: Antiquity to World War II
HIST 1390	History of Espionage 2: Cold War Spies
HIST 2217	The Global Far-Right since 1945: Politics, Culture, Violence
HIST 3330	The Global Cold War
HIST 3334	Assassinations in World History
HIST 3335	History of Modern Terrorism
INTL 3430	Revolution, Civil War, and Insurrection
INTL 3450	Security, Culture, Power
JRNL 3300 or INTL 3300	Covering Conflicts: Peace, War, and the Media Covering Conflicts: Peace, War, and the Media
PHIL 5001	Global Justice
POLS 2282	The Holocaust and Comparative Genocide
POLS 3418	Nationalism
POLS 3420	U.S. National Security Policy
POLS 3423	Terrorism and Counterterrorism
POLS 3430 or INTL 3430	Revolution, Civil War, and Insurrection Revolution, Civil War, and Insurrection
POLS 4918	Model NATO
<i>Globalization</i>	
AFAM 2600	Issues in Race, Science, and Technology
ANTH 2305	Global Markets and Local Culture
ANTH 2315	Religion and Modernity
ECON 3290	History of the Global Economy
ECON 3635	International Economics
HIST 1215	Origins of Today: Historical Roots of Contemporary Issues
HIST 2211	The World Since 1945
HIST 2311	Colonialism/Imperialism
INTB 3310	Cultural Aspects of International Business
INTL 2480 or WMNS 2480	Women and World Politics Women and World Politics
INTL 3200	Cities in a Global Context
INTL 3520	Global Political Economy
POLS 1160	International Relations
POLS 2370	Religion and Politics
POLS 3405	International Political Economy
POLS 3406	International Law
<i>Population, Migration, and Diaspora</i>	
AFRS 1270 or PHTH 1270	Introduction to Global Health Introduction to Global Health
AFRS 3424	Epidemiology of Pandemic Diseases and Health Disparities in the African Diaspora
ANTH 1101	Peoples and Cultures
HIST 1218	Pirates, Planters, and Patriots: Making the Americas, 1492–1804
HIST 1219	History of Global Pandemics
INTL 2500	Race and Global Human Mobility
INTL 3200	Cities in a Global Context
INTL 4100	Forced Migration: Refugees, Exiles, and Displaced Persons
PHIL 1111	Introduction to World Religions
PHIL 1271	Sex in Judaism, Christianity, and Islam
<i>Development</i>	
ANTH 2305	Global Markets and Local Culture

ECON 1291	Development Economics
ECON 3404	International Food Policy
ECON 3405	A Critique of Capitalism
ENVR 2515	Sustainable Development
HIST 2011	Capitalism and Business: A Global History
INNO 2206	Global Social Enterprise
INTB 1203	International Business and Global Social Responsibility
or INTB 1209	International Business and Global Social Responsibility
INTL 3150	Global Philanthropy
INTL 3520	Global Political Economy
INTL 5100	Climate and Development
PHTH 5230	Global Health
POLS 3487	Politics of Developing Nations
<i>Communication and Media</i>	
COMM 2303	Global and Intercultural Communication
INTB 3310	Cultural Aspects of International Business
JRNL 3300	Covering Conflicts: Peace, War, and the Media
or INTL 3300	Covering Conflicts: Peace, War, and the Media
JRNL 5360	Global Reporting
MSCR 2325	Global Media

## Regional Analysis Requirement

Code	Title	Hours
Complete two of the following, both of which must be in one region. Select courses taken during a semester study abroad or specific Dialogue of Civilizations courses may count as regional analysis courses pending approval of the international affairs head faculty advisor. See department for additional courses:		8

Code	Title	Hours
<i>Africa</i>		
AFRS 1101	Introduction to African Studies	
AFRS 2307	Africa Today	
AFRS 2900	Swahili, Culture, and Politics in Kenya	
AFRS 3460	Contemporary Government and Politics in Africa	
AFRS 4939	Community Health, Culture, and Development in Kenya	
ANTH 4350	Ethnography of Southeast Asia	
ANTH 4510	Anthropology of Africa	
HIST 1180	African History	
INNO 3308	Business Economic History of South Africa	
INTL 2464	Natural Resources and Sustainable Development	
or AFRS 2464	Natural Resources and Sustainable Development	
<i>Asia</i>		
ANTH 4515	Culture and Politics in Modern India	
ASNS 1150	East Asian Studies	
or HIST 1150	East Asian Studies	
CLTR 1500	Modern Chinese History and Culture	
CLTR 1506	Introduction to Chinese Popular Culture	
CLTR 1700	Introduction to Japanese Pop Culture	
HIST 1246	World War II in the Pacific	
HIST 1252	Japanese Literature and Culture	
HIST 1500	Modern Chinese History and Culture	
HIST 2351	Modern Japan	
PHIL 1275	Hinduism, Buddhism, and Beyond	
PHIL 1290	Chinese Philosophy and Religion	

PHIL 2395	Japanese Buddhism
POLS 3482	East Asian Politics
POLS 3485	China: Governance and Foreign Policy
<i>Europe</i>	
CLTR 1501	Introduction to French Culture
CLTR 1503	Introduction to Italian Culture
CLTR 1504	Cultural History of Spain
HIST 1170	Europe: Empires, Revolutions, Wars, and Their Aftermath
HIST 1272	Europe in the Middle Ages, 500–1500
HIST 1286	History of the Soviet Union
HIST 2370	Renaissance to Enlightenment
HIST 2375	The Tudors, the Stuarts, and the Birth of Modern Britain
INTL 3455	Russian Foreign Policy
or POLS 3455	Russian Foreign Policy
POLS 3435	Politics and Governance of Europe and the European Union
<i>Latin America</i>	
ANTH 4500	Latin American Society and Development
CLTR 1240	Latin American Film
CLTR 1502	Introduction to Arabic Culture
CLTR 1505	Latin American Culture, History, and Politics
CLTR 3715	New Narratives: Latin America after 1989
CLTR 3720	Literature, Arts, and Poverty in Latin America
CLTR 4655	Latin American Literature
ECON 1292	Economic History of the Middle East
HIST 1185	Introduction to Middle Eastern History
HIST 1187	Introduction to Latin American History
HIST 2025	Latin American History through Film
LACS 1220	Latino, Latin American, and Caribbean Studies
<i>Middle East</i>	
INTL 1150	The Mediterranean World: An Overview
INTL 1160	Middle East Studies
INTL 2200	America and the Middle East
INTL 3250	Democracy and Development in North Africa and the Mediterranean
PHIL 1280	Islam: Rituals, Traditions, and Debates
PHIL 1285	Jewish Religion and Culture
POLS 3465	Government and Politics in the Middle East

### International Affairs Elective

Code	Title	Hours
Complete one of the following:		4
Code	Title	Hours
INTL 2480	Women and World Politics	
INTL 2500	Race and Global Human Mobility	
INTL 3150	Global Philanthropy	
INTL 3200	Cities in a Global Context	
INTL 3406	International Law	
INTL 3430	Revolution, Civil War, and Insurrection	
INTL 3450	Security, Culture, Power	
INTL 3520	Global Political Economy	
INTL 4100	Forced Migration: Refugees, Exiles, and Displaced Persons	
INTL 5010	International Human Rights Law and Policy	
INTL 5100	Climate and Development	

## English Requirement

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111	First-Year Writing	4
or ENGW 1102	First-Year Writing for Multilingual Writers	
<b>Advanced Writing in the Disciplines</b>		
Complete one of the following:		4
ENGW 3302	Advanced Writing in the Technical Professions	
ENGW 3308	Advanced Writing in the Social Sciences	
ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

## Supporting Courses

Code	Title	Hours
<b>Mathematics</b>		
ECON 2350	Statistics for Economists	4
MATH 1341	Calculus 1 for Science and Engineering	4

## Integrative Requirements

Code	Title	Hours
<b>Senior Seminar</b>		
Complete with a thesis or project that integrates both international affairs and data science:		
INTL 4700	Senior Capstone Seminar in International Affairs	4
<b>Digital Ethics</b>		
CY 4170	The Law, Ethics, and Policy of Data and Digital Technologies	4

## Required General Electives

Code	Title	Hours
Complete 24 semester hours of general electives.		24

## Khoury College GPA Requirement

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses

## Program Requirement

131 total semester hours required

## Plan of Study

### Sample Plan of Study: Four Years, Two Co-ops in Summer 2/Fall

Year 1							
Fall	Hours	Spring	Hours	Summer 1	Hours	Summer 2	Hours
CS 1200		1 ANTH 1101, HIST 2211, or HIST 2311		4 CS 3200		4 Elective	4

## Data Science and Journalism, BS

The data science and journalism combined major offers students an opportunity to gain the skills to be able to engage in both the print and digital worlds of journalism. Students study the collection, manipulation, storage, retrieval, and computational analysis of data in its various forms, including numeric, textual, image, and video data. Combined with learning the principles, practices, and responsibilities of journalism, students can extract meaning from massive information flows and utilize it in effective investigative reporting.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Data Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
CS 1200 or JRNL 1000	First Year Seminar Journalism at Northeastern	1
CS 1210 or EEAM 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Programming Sequence Pathways</b>		
Choose one of the two options:		12
<i>Computer Science Option</i>		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	
<i>Data Science Option</i>		
DS 2000 and DS 2001	Programming with Data and Data Science Programming Practicum	
DS 2500 and DS 2501	Intermediate Programming with Data and Lab for DS 2500	
DS 3500	Advanced Programming with Data	
<b>Computer Science Required Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 3200	Database Design	4
CY 4170	The Law, Ethics, and Policy of Data and Digital Technologies	4
<b>Data Science Foundations</b>		
DS 3000	Foundations of Data Science	4
DS 4200	Information Presentation and Visualization	4
DS 4300	Large-Scale Information Storage and Retrieval	4
DS 4400	Machine Learning and Data Mining 1	4
DS 4420	Machine Learning and Data Mining 2	4
<b>Khoury Elective Courses</b>		
With adviser approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete 4 semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		4
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		

DS 2500 or higher, except DS 4900

IS 2000 or higher, except IS 4900

## Journalism Major Requirements

Students transferring from outside institutions must complete a minimum of five 4-semester-hour journalism courses at Northeastern, and these must include:

Code	Title	Hours
JRNL 2201	Journalism 2: Intermediate Reporting	
JRNL 2301	Visual Storytelling in Journalism	
JRNL 4650	Ethics and Issues in Journalism	

Code	Title	Hours
------	-------	-------

### Journalism Courses

A grade of C or higher is required:

JRNL 1101 and JRNL 1102	Journalism 1: Fundamentals of Reporting and Writing and Journalist's Toolbox	5
JRNL 2201	Journalism 2: Intermediate Reporting	4
JRNL 2301	Visual Storytelling in Journalism	4
JRNL 3610	Digital Storytelling and Social Media	4

### Required Journalism

JRNL 1150	Understanding Today's News	4
JRNL 3550	The First Amendment and the Media	4
JRNL 4650	Ethics and Issues in Journalism	4

### Journalism Electives

Complete three JRNL courses.		12
------------------------------	--	----

## Supporting Courses

Code	Title	Hours
------	-------	-------

### Mathematics Requirement

MATH 1341	Calculus 1 for Science and Engineering	4
-----------	--	---

### Statistics Foundation

ECON 2350	Statistics for Economists	4
-----------	---------------------------	---

### Computing and Social Issues

Complete one of the following:		4
--------------------------------	--	---

AFAM 2600	Issues in Race, Science, and Technology	
CY 4170	The Law, Ethics, and Policy of Data and Digital Technologies	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
HIST 2220	History of Technology	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
IS 1300 or PHIL 1300	Knowledge in a Digital World	
PHIL 1145	Technology and Human Values	
SOCL 1280	The Twenty-First-Century Workplace	
SOCL 2485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	

## Writing Requirement

Code	Title	Hours
------	-------	-------

### College Writing

ENGW 1111	First-Year Writing	4
-----------	--------------------	---

### Advanced Writing in the Disciplines

This course already fulfills a Journalism requirement above.

JRNL 2301	Visual Storytelling in Journalism	
-----------	-----------------------------------	--

### Integrative Requirement

Code	Title	Hours
Complete one of the following:		
JRNL 3700	Data Storytelling	4
JRNL 5500	Coding for Digital Storytelling	

### Required General Electives

Code	Title	Hours
Complete 20 semester hours of general electives.		20

### NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Exploring Creative Expression and Innovation
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Understanding Societies and Institutions
- Employing Ethical Reasoning
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

### Khoury College GPA Requirement

Minimum 2.000 GPA required in all CS, CY, DS, IS courses

### Journalism GPA Requirement

Minimum 2.000 GPA required in all JRNL courses

### Program Requirement

131 total semester hours required

### Plan of Study

#### Sample Plan of Study

#### Four Years, Two Co-ops in Summer 2/Fall

Year 1								
Fall	Hours	Spring	Hours	Summer 1	Hours	Summer 2	Hours	Hours
CS 1200 or JRNL 1000		1 CS 3200		4 DS 3000		4 Vacation

## Data Science and Linguistics, BS

The data science and linguistics combined major provides students with extensive background in the formal structures of natural (human) languages and in the collection, manipulation, storage, retrieval, and computational analysis of data in its various forms. The program teaches the methods and applications of linguistic and psycholinguistic analyses of human language data combined with skills in big data analysis, data science, and data analytics. The major provides excellent preparation for work or more advanced degrees focusing on computational linguistics, natural language processing, machine learning, and a wide array of related fields.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Data Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or LING 1000	First Year Seminar Linguistics at Northeastern	1
CS 1210 or EESC 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Programming Sequence Pathways</b>		
Choose one of two options:		12
<i>Computer Science Option</i>		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	
<i>Data Science Option</i>		
DS 2000 and DS 2001	Programming with Data and Data Science Programming Practicum	
DS 2500 and DS 2501	Intermediate Programming with Data and Lab for DS 2500	
DS 3500	Advanced Programming with Data	
<b>Computer Science Required Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 3200	Database Design	4
<b>Data Science Foundations</b>		
DS 3000	Foundations of Data Science	4
DS 4200	Information Presentation and Visualization	4
DS 4300	Large-Scale Information Storage and Retrieval	4
DS 4400	Machine Learning and Data Mining 1	4
DS 4420	Machine Learning and Data Mining 2	4
<b>Khoury Elective Course</b>		
With adviser approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete four semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		4
CS 2500 or higher, except CS 5010		

CY 2000 or higher, except CY 4930

DS 2500 or higher, except DS 4900

IS 2000 or higher, except IS 4900

**Linguistics Requirements**

Code	Title	Hours
<b>Linguistics Foundations</b>		
LING 1150	Introduction to Language and Linguistics	4
LING 2350	Linguistic Analysis	4
LING 3412	Language and Culture	4
<b>Linguistic Structure</b>		
Complete four of the following:		16
LING 3420	Phonetics	
LING 3422	Phonology	
LING 3424	Morphology	
LING 3450	Syntax	
LING 3452	Semantics	
<b>Laboratory/Directed Study</b>		
Complete one of the following:		4
LING 4891	Research Seminar in Linguistics	
LING 4991	Directed Study Research	
PSYC 4610	Laboratory in Psycholinguistics	
<b>Seminar Requirement</b>		
LING 4654 or PSYC 4658	Seminar in Linguistics Seminar in Psycholinguistics	4
<b>Linguistics Electives</b>		
Complete three courses not used to fulfill other degree requirements from the following options:		12
DEAF 2700	ASL Linguistics	
LING 3000 to LING 4999 <sup>1</sup>		

<sup>1</sup> Please visit the Linguistics Courses page (<http://catalog.northeastern.edu/undergraduate/science/linguistics/#coursestext>) within this catalog to review the list of courses in the LING 3000 - LING 4999 range.

## Data Science and Mathematics, BS

The data science and mathematics combined major combines computer science, data science, and mathematics into an integrated curriculum. The program provides the rigorous theoretical background necessary for success in the data science field.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Data Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or MATH 1000 or INSC 1000	First Year Seminar Mathematics at Northeastern Science at Northeastern	1

## Data Science and Philosophy, BS

### Overview

The data science and philosophy combined major offers an opportunity to obtain a fluency in formal logic, including logical proofs and the ability to represent arguments clearly and evaluate them for cogency. Students will find that logic plays a fundamental role in computer science as they experience an in-depth programming foundation. Students study the collection, manipulation, storage, retrieval, and computational analysis of data in its various forms, including numeric, textual, image, and video data from small to large volumes. The philosophy curriculum also focuses on oral and written communication, as well as ethical and social issues related to data storage, usage, manipulation, and presentation.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

## Data Science and Physics, BS

The data science and physics combined major brings together computer and data science, physics, and mathematics. The computer science and mathematics requirements serve as a foundation for both data science and physics. From hands-on experience with sophisticated physics instruments, to mathematical theory, to the latest computational innovations, our interdisciplinary approach is designed to prepare students for the myriad challenges in today's rapidly changing world.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

## Data Science and Psychology, BS

The psychology and data science combined major offers an integrative curriculum in the study of mind, brain, and behavior and in the collection, manipulation, storage, retrieval, and computational analysis of data in its various forms, including numeric, textual, image, and video data from small to large volumes. The study of psychology draws upon empirical research with both humans and animals to investigate and seek explanations for the behavior and mental life of individuals and develop assessment tools and treatment options for addressing clinical problems. In this program, students have an opportunity to augment such knowledge with skills in big data analysis, data science, and data analytics.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

<i>Computer Science Option</i>		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	
<i>Data Science Option</i>		
DS 2000 and DS 2001	Programming with Data and Data Science Programming Practicum	
DS 2500 and DS 2501	Intermediate Programming with Data and Lab for DS 2500	
DS 3500	Advanced Programming with Data	
<b>Computer Science Required Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 3200	Database Design	4
<b>Data Science Foundations</b>		
DS 3000	Foundations of Data Science	4
DS 4200	Information Presentation and Visualization	4
DS 4300	Large-Scale Information Storage and Retrieval	4
DS 4400	Machine Learning and Data Mining 1	4
DS 4420	Machine Learning and Data Mining 2	4
<b>Khoury Elective</b>		
With adviser approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete four semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		4

CS 2500 or higher, except CS 5010

CY 2000 or higher, except CY 4930

DS 2500 or higher, except DS 4900

IS 2000 or higher, except IS 4900

**Computer Science Writing Requirements**

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111	First-Year Writing	4
or ENGW 1102	First-Year Writing for Multilingual Writers	
<b>Advanced Writing in the Disciplines</b>		
Complete one of the following:		4
ENGW 3302	Advanced Writing in the Technical Professions	
ENGW 3307	Advanced Writing in the Sciences	
ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

**Psychology Requirements**

Code	Title	Hours
<b>Foundations of Psychology</b>		
PSYC 1101	Foundations of Psychology	4
<b>Statistics in Psychological Research</b>		
PSYC 2320	Statistics in Psychological Research	4
<b>Mathematics Foundations</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
<b>Personality/Social Basis of Behavior</b>		
Complete two of the following:		8
PSYC 3400	Personality	
PSYC 3402	Social Psychology	
PSYC 3404	Developmental Psychology	
PSYC 3406	Clinical Psychology and Mental Health	
<b>Cognitive/Biological Basis of Behavior</b>		
Complete two of the following:		8
PSYC 3450	Learning and Motivation	
or PSYC 3451	Learning Principles and Behavior Analysis	
PSYC 3452	Sensation and Perception	
PSYC 3458	Biological Psychology	
PSYC 3464	Psychology of Language	
PSYC 3466	Cognition	
<b>Psychology Laboratory</b>		
Complete one of the following:		4
PSYC 4600	Laboratory in Research Design	
PSYC 4606	Laboratory in Biological Psychology	
PSYC 4610	Laboratory in Psycholinguistics	
PSYC 4612	Laboratory in Cognition	
PSYC 4614	Laboratory in Social Psychology	
PSYC 4616	Laboratory in Personality	
PSYC 4622	Laboratory in Sensation and Perception	
PSYC 4624	Laboratory in Affective Science	
PSYC 4626	Laboratory in Life-Span Emotional Development	
PSYC 4628	Laboratory in Developmental Psychology	
<b>Psychology Seminar</b>		
Complete one of the following:		4
PSYC 4656	Seminar in Biological Psychology	
PSYC 4658	Seminar in Psycholinguistics	

PSYC 4660	Seminar in Cognition
PSYC 4662	Seminar in Personality
PSYC 4664	Seminar in Social Psychology
PSYC 4666	Seminar in Clinical Psychology
PSYC 4668	Seminar in Sensation and Perception
PSYC 4674	Seminar in Cognitive Neuroscience
PSYC 4676	Seminar in Developmental Psychology

**Psychology Electives**

Complete two of the following: PSYC 2370 to PSYC 5999	8
--	---

**Integrative Requirement**

Code	Title	Hours
<b>Integrative Course</b>		
Complete one of the following:		4
IS 4300	Human Computer Interaction	
PSYC 4540	Quantitative Topics in Psychology and Behavioral Neuroscience	

**Required General Electives**

Code	Title	Hours
Complete 28 semester hours of general electives.		28

**Khoury College GPA Requirement**

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses

**Psychology GPA Requirement**

Minimum 2.000 GPA required in all PSYC courses

**NUpath Requirements Satisfied**

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

**Program Requirement**

130 total semester hours required

**Plan of Study****Sample Plan of Study:****Four Years, Two Co-ops**

## Accelerated Bachelor/Graduate Degree Programs

Khoury College of Computer Sciences offers a number of bachelor's/graduate degree programs that allow students to accelerate the attainment of the graduate degree by applying graduate credits taken as an undergraduate toward both the undergraduate and graduate degrees. Degrees are earned sequentially, with the bachelor's degree attainment followed by coursework to complete the graduate degree. See additional information on accelerated bachelor/graduate degree programs (<https://registrar.northeastern.edu/article/plusone-program-accelerated-bachelorgraduate-degree-programs/>).

## College of Engineering

Website (<http://www.coe.neu.edu>)

**Gregory D. Abowd**, D.Phil., Dean

**Susan Freeman**, PhD, Associate Dean for Undergraduate Education

**Richard Harris**, MS, Associate Dean for Diversity, Equity, and Inclusion

**Candace A. Martel**, MEd, Assistant Dean for Academic Affairs

Undergraduate Academic Advising Office  
147 Snell Engineering Center  
617.373.2154  
[COEAdvising@northeastern.edu](mailto:COEAdvising@northeastern.edu)

The mission of the College of Engineering is to provide a teaching, learning, and research environment that results in the highest-quality education for our students. Consistent with this goal, while providing a practice-oriented, experiential, and interdisciplinary program, the College of Engineering seeks to prepare students to contribute to the accumulation and application of technical knowledge. The college further seeks to help students master the fundamental mathematical and scientific principles underlying a particular branch of engineering; develop and demonstrate competence in analysis and design appropriate to an engineering specialization; reason clearly and communicate effectively; and recognize the need to continue professional development.

Through laboratory exercises, senior design projects, professional association activities, cooperative work assignments, and other experiential opportunities, students put theory into practice and clarify their professional goals.

The college offers a Bachelor of Science degree with specializations in bioengineering, chemical engineering, civil engineering, computer engineering, electrical engineering, environmental engineering, industrial engineering, and mechanical engineering. There are also a number of combined majors offered within the college and between the College of Engineering and other colleges. Combined majors are continually being developed in response to student interest. In addition, students can pursue accelerated master's program offerings.

Students have options available to participate in cooperative education experiences as they pursue completion of Bachelor of Science degree programs. Those seeking an 18-month co-op work experience may wish to enroll in the PlusOne accelerated master's program. Four-year programs are available for all majors and combined majors in the college.

The college encourages students to study the arts, sciences, business, and other areas outside engineering to allow for an increased awareness of the social, economic, political, aesthetic, and philosophical influences that shape the world in which graduates will practice their professions. Students may complete a minor in different areas such as business, computer science, biomedical engineering, math, or music. In many cases, the minor can be completed without course overloads.

The college also offers an array of international educational experiences, including a number of study-abroad options, international co-op experiences, and Dialogue of Civilizations classes (which offer a four- to six-week opportunity to study engineering or a related field in the context of an international experience).

In addition to a full array of university services, specialized advising and other support services (including tutoring) are provided. Students in the University Honors Program may participate in honors sections of a number of courses. Students are encouraged to become involved in a broad range of student organizations offered within the college as an enriching addition to academic studies and co-op experience. There are over 50 student organizations in the College of Engineering that offer a broad array of experiences and opportunities. Students are also encouraged to explore research opportunities and participate in experiences that complement classroom learning.

## Undergraduate Academic Standards

Effective September 6, 2023

### ACADEMIC PROGRESSION STANDARDS

In addition to meeting university progression standards, it is expected that undergraduate engineering students enroll in four (4 credit) courses, with corresponding labs and recitations, and successfully complete at least 12 semester hours each academic semester (fall, spring) with an acceptable grade-point average as noted below.

### CRITERIA FOR ACADEMIC PROBATION

Students will be placed on academic probation effective for the following academic semester for any of the reasons noted below:

- Not earning a semester GPA of at least a 1.800 at the end of an academic semester (fall, spring)
- Not earning at least 12 semester hours at the end of an academic semester (fall, spring)

Upper-level and transfer students:

- Not earning a semester GPA of at least a 1.800 at the end of an academic semester (fall, spring)
- Not earning at least 12 semester hours in an academic semester (fall, spring)
- Not maintaining a cumulative GPA of at least 2.000 at the end of an academic semester (fall, spring)
- Accumulating three or more outstanding course deficiencies (grades of F, I, W, NE, U, or missing grades, excluding 1 semester hours courses, labs, and recitations)

A notation of the academic probation action will appear on the internal record but not on the permanent transcript.

#### **CRITERIA FOR ACADEMIC DISMISSAL**

Students who earn below a 1.000 GPA or earn fewer than 4 semester hours in any academic semester (fall, spring) may be dismissed, regardless of their prior academic status. After two semesters (fall, spring) on academic probation, students may be academically dismissed if they fail to meet academic progression standards.

A notation of the academic dismissal action will appear on the permanent transcript.

#### **PASS/FAIL COURSEWORK**

Students may elect to take courses on a pass/fail basis in accordance with university policy. A maximum of 8 semester hours may be taken pass/fail toward fulfillment of degree requirements in the College of Engineering. A maximum of 4 semester hours of pass/fail coursework is allowed per semester. Only general electives taken outside the College of Engineering may be taken on a pass/fail grading basis.

#### **GRADUATION REQUIREMENTS**

A minimum cumulative GPA requirement of 2.000 in major coursework and a minimum cumulative GPA requirement of 2.000 overall are required for graduation.

The college reserves the right to amend programs, courses, and degree requirements to fulfill its educational responsibility to respond to relevant changes in the field.

Students must complete all of the requirements in the degree program in which they are candidates. Degree requirements are based upon the year of graduation, determined by the date of entry or reentry into the College of Engineering. Degree requirements and the year of graduation for a degree candidate who fails to make normal academic progress will be subject to review and possible change.

#### **PROGRESSION TOWARD FULFILLMENT OF DEGREE REQUIREMENTS**

Students are expected to develop and follow a program of study outlining scheduled coursework to complete degree requirements. If changes to the year of graduation are to be made after completion of the third year of study in the major program curriculum, revised plans should be submitted to an academic advisor for review and approval. Students pursuing a minor course of study should declare their minor no later than the third year.

## General Engineering and First-Year Engineering

General engineering encompasses the common curriculum for several interdisciplinary initiatives and programs for engineering students: the first-year engineering program, the entrepreneurial engineering minor, and some of the college's Dialogues of Civilizations experience courses.

### First-Year Engineering Program

With a distinct focus on first-year engineering education, the first-year engineering program at Northeastern University prepares undergraduate engineers with the fundamental building blocks needed for all College of Engineering majors. Emphasizing hands-on, integrated design, our program leverages a state-of-the-art makerspace to provide our students with an immersive experience into the COE community. Through the lens of the engineering design process, the program weaves engineering ethics and research into designs created with CAD and software development programs used by leading industry engineering firms. Student designs are brought to life through our makerspace's extensive fabrication tools with support from our upperclass engineering student mentors. Dedicated first-year teaching faculty with expertise in engineering pedagogical research and a diverse array of engineering backgrounds focus on creating and evolving teaching practices to ensure that the program scaffolds students in an authentic and fully integrated manner to excel in the rest of their academic scholarship.

### Mission of the Department

The mission for the first-year engineering program is to inspire our students in their pursuit of an engineering education by fostering a diverse and inclusive learning community centered around project-based, experiential learning.

### Program Values

To accomplish our mission, we aim to:

- Provide state-of-the-art engineering education informed by best practices in *industry and pedagogical research*
- Introduce the fundamentals of problem solving while cultivating *systems thinking*
- Present engineering problems with *authentic complexities* that promote value-sensitive design and social and environmental justice
- Facilitate a *hands-on and teamed* learning experience through access of modern design and fabrication tools in our continually evolving makerspace
- Provide our students with the skills needed to function as independent, *lifelong learners*

## Interdisciplinary Minors

- Design and Innovation in Engineering, Minor (p. 944)
- Entrepreneurial Engineering, Minor (p. 945)
- Global Perspectives in Engineering, Minor (p. 946)
- Materials Science and Engineering, Minor (p. 948)
- Sustainable Energy Systems, Minor (p. 950)

## Design and Innovation in Engineering, Minor

The design and innovation in engineering minor is designed for nonengineering undergraduate students who wish to explore and develop working solutions as an engineer to the National Academy of Engineering Grand Challenges (<http://www.engineeringchallenges.org/>) of the 21st century. The course requirements for the minor are designed to expose the student to the engineering elements necessary to solve the important problems facing society today and include value-sensitive design as well as the ethical and professional obligations of an engineer. The elective options offer a high degree of flexibility and exposure to the engineering design process, CAD, programming, micro-controllers-based projects, and mathematical computation. The aforementioned skills will be used for making interactive open-ended projects that address one of the NAE Grand Challenges. This provides more depth within the student's discipline and improves future career opportunities. Students have an opportunity to model and analyze designs, applying many techniques engineers utilize to create and test designs toward implementation. The student, upon successful completion of the minor, will be able to apply value-sensitive design principles to determine a societal need and propose and build or develop a solution. Students apply teamwork, project management, CAD, and algorithmic thinking to the conception of a particular solution and deliver effective team presentations on engineering projects and topics.

### Minor Requirements

*Note:* This minor is for nonengineering majors.

### Required Courses

*Note:* For students who were previously in the College of Engineering, Cornerstone of Engineering 1 (GE 1501) and Cornerstone of Engineering 2 (GE 1502) may be substituted for Engineering Design (GE 1110) and Engineering Problem Solving and Computation (GE 1111).

Code	Title	Hours
GE 1110	Engineering Design	4
GE 1111	Engineering Problem Solving and Computation	4
GE 2500	Design Analysis and Innovation	4

### Elective

Code	Title	Hours
Complete one of the following:		4
ARTG 1250	Design Process Context and Systems	
ARTG 3250	Physical Computing	
ARTG 3462	Experience Design Principles	
EECE 2160	Embedded Design: Enabling Robotics	
GE 2010	Introduction to Customer-Driven Technical Innovation: Silicon Valley	
GE 2030	Introduction to Product Prototyping: Silicon Valley	
GE 3300	Energy Systems: Science, Technology, and Sustainability	
GE 4993	Independent Study	
IE 2310	Introduction to Industrial Engineering	
IE 3412	Engineering Probability and Statistics	
IE 4510	Simulation Modeling and Analysis	
INNO 2301	Innovation!	

### GPA Requirement

Minimum 2.000 GPA required in the minor

### Credit Requirement

16 hours required

## Entrepreneurial Engineering, Minor

The entrepreneurial engineering minor is designed for the technology-minded entrepreneur who seeks to understand disciplinary fundamentals, assess market needs, create technologies, and determine how to manufacture solutions sustainably and economically. The course requirements for the minor are designed to incorporate both engineering elements (product development and prototyping) and creative elements (product design), along with market and societal considerations (customer discovery and needs assessment). The elective option provides an opportunity to specialize in one of three areas: manufacturing, design, or venture creation. Versions of this minor are available for both engineering and nonengineering majors. Sign up for the minor by contacting your academic advisor.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Core Courses

Code	Title	Hours
<b>For Undergraduates in the College of Engineering</b>		
GE 5010	Customer-Driven Technical Innovation for Engineers	4
GE 5020	Engineering Product Design Methodology	4
GE 5030	Iterative Product Prototyping for Engineers	4
GE 5100	Product Development for Engineers	4
<b>For Undergraduates outside the College of Engineering</b>		
GE 1110	Engineering Design	4
Complete three of the following:		
GE 5010	Customer-Driven Technical Innovation for Engineers	4
GE 5020	Engineering Product Design Methodology	4
GE 5030	Iterative Product Prototyping for Engineers	4
GE 5100	Product Development for Engineers	4

### Elective

Code	Title	Hours
Complete one of the following:		
<i>Venture Creation</i>		
ENTR 2303	Marketing Strategies for Startups	
ENTR 3305	Business Model Design and Innovation	
ENTR 3306	Global Entrepreneurship	
ENTR 3330	Design Thinking for Startups	
ENTR 4501	Integrated Studies in Entrepreneurial Startups	
ENTR 4510	Management Consulting Abroad	
<i>Design</i>		
ARTE 3901	Art and Design Special Topics	
ARTF 1122 and ARTF 1123	Color and Composition and Color and Composition Tools	
ARTF 1124 and ARTF 1125	Form and Structure and Form and Structure Tools	
ARTG 1250	Design Process Context and Systems	
ARTG 3462	Experience Design Principles	
ARTG 3463	Experience Design 2	
<i>Manufacturing</i>		
IE 2310	Introduction to Industrial Engineering	
IE 4512	Engineering Economy	
IE 4525	Logistics and Supply Chain Management	
IE 4530	Manufacturing Systems and Techniques	

### GPA Requirement

2.000 GPA required in the minor

## Global Perspectives in Engineering, Minor

### Overview

This interdisciplinary minor explores work in a global context for students interested in learning about international development, gaining cultural competency across borders, or discovering the effects of globalization on business. Coursework and experience will intersect, creating multidimensional students with the cultural competency necessary in this ever-changing world. Due to the rigorous and demanding structure of the engineering curriculum, this minor allows students to take part in opportunities to merge their international passion with their technical skill.

### Program Requirements

#### Required Courses

Code	Title	Hours
GBST 1012	The Global Learning Experience (or equivalent as a N.U.in or pathway student)	1
Complete one of the following pairs:		8
GE 1501 and GE 1502	Cornerstone of Engineering 1 and Cornerstone of Engineering 2	
GE 1110 and GE 1111	Engineering Design and Engineering Problem Solving and Computation	

#### Elective Courses

Code	Title	Hours
Complete 12 semester hours from the following:		12
AFRS 1101	Introduction to African Studies	
AFRS 1270	Introduction to Global Health	
AFRS 2307	Africa Today	
AFRS 2464	Natural Resources and Sustainable Development	
AFRS 3460	Contemporary Government and Politics in Africa	
ANTH 1101	Peoples and Cultures	
ANTH 2305	Global Markets and Local Culture	
ANTH 3200	Cities in Global Context	
ANTH 4500	Latin American Society and Development	
ASNS 1150	East Asian Studies	
CLTR 1120	Introduction to Languages, Literature, and Culture	
CLTR 1500	Modern Chinese History and Culture	
CLTR 1501	Introduction to French Culture	
CLTR 1502	Introduction to Arabic Culture	
CLTR 1505	Latin American Culture, History, and Politics	
CLTR 3418	Nationalism	
ECON 1291	Development Economics	
ECON 1711	Economics of Sustainability	
ECON 3290	History of the Global Economy	
ECON 3404	International Food Policy	
ENVR 1110	Global Climate Change	
ENVR 2515	Sustainable Development	
INNO 2206	Global Social Enterprise	
INTB 1209	International Business and Global Social Responsibility	
INTL 1101	Globalization and International Affairs	
INTL 1160	Middle East Studies	
INTL 3520	Global Political Economy	
PHIL 1106	Ethics and Politics of Work	
PHIL 1111	Introduction to World Religions	
PHIL 1130	Comparative Ethics	
PHIL 2155	Human Rights	
PHIL 5001	Global Justice	
PHTH 1270	Introduction to Global Health	

PHTH 2351	Community and Public Health - Global
POLS 1160	International Relations
POLS 3405	International Political Economy
PSYC 2370	Cross-Cultural Psychology
SCHM 2301	Supply Chain and Operations Management
SCHM 3301	Global Supply Chain Strategy
SCHM 3305	Sourcing, Procurement, and Negotiation
SOCL 1101	Introduction to Sociology

## Global Experience

Code	Title	Hours
Complete one global experience. This can be a Dialogue of Civilizations, Global Scholars, Global Co-op, study abroad, N.U.in, or Global Quest.		
Any class taken during a global experience that is not one of the electives listed above		

## GPA Requirement

Minimum 2.000 GPA required in the minor

## Credit Requirement

21 semester hours required

## Materials Science and Engineering, Minor

The study of materials science and engineering has spurred breakthroughs in applications ranging from artificial limbs and organs, to space travel vehicles, to personal MP3 players. For example, the discovery of buckyballs and carbon nanotubes has led to the development of an unprecedented reduction in size of prototype electronic components and points the way to tomorrow's electronic technologies. Porous nanostructures of biocompatible materials are studied for targeted drug delivery within the body. The integration of polymers and semiconductors is used to create efficient, usable solar cells to reduce our dependence on fossil fuels. There are many more examples of both existing technologies and current research areas involving materials science and engineering that impact everyday life both today and in the future.

The minor in materials science and engineering is open to all students of the College of Engineering whose science and technical interests involve the design, processing, and optimization of engineering materials. Since the materials interests may vary across the engineering disciplines, the minor is composed of an interdisciplinary selection of courses that offer a high degree of flexibility to the student. The fundamental goals of the program are to offer the student a broad interdisciplinary program that includes a basic background in the relevant aspects of materials science and the engineering applications of materials. The objectives are to serve the needs of the chemical, civil, electrical, and mechanical engineering departments in providing a vehicle to expose students to materials science and engineering. Particular focus areas include electronic materials and processing for device applications; strength, wear, and corrosion-resistant coatings; molecular-level design of thin films and nanostructures; polymers and biomedical applications; and steels, concretes, and space-based structures.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

#### Required Course

Code	Title	Hours
ME 2340	Introduction to Material Science	4

#### Electives

Code	Title	Hours
Complete three courses from the following disciplines:		11-13

##### Bioengineering

BIOE 5820	Biomaterials
-----------	--------------

##### Chemical Engineering

CHME 5105	Materials Characterization Techniques
CHME 5160	Drug Delivery: Engineering Analysis
CHME 5631	Biomaterials Principles and Applications
CHME 5632	Advanced Topics in Biomaterials
CHME 5683	Introduction to Polymer Science

##### Civil and Environmental Engineering

CIVE 2260 and CIVE 2261	Materials for the Built Environment and Lab for CIVE 2260
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure

##### Electrical and Computer Engineering

EECE 3392	Electronic Materials
EECE 5606	Micro- and Nanofabrication
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage

##### Materials Engineering

MATL 5380	Particulate Materials Processing
MATL 6250	Soft Matter (With Instructor permission)
MATL 6270	Principles, Devices, and Materials for Energy Storage and Energy Harvesting (With Instructor permission)
MATL 6285	Structure, Properties, and Processing of Polymeric Materials (With Instructor Permission)

##### Mechanical and Industrial Engineering

ME 4630	Ceramic Science and Engineering
ME 4640	Mechanical Behavior and Processing of Materials
ME 5600	Materials Processing and Process Selection
ME 5620	Fundamentals of Advanced Materials

ME 5640 Additive Manufacturing

ME 5645 Environmental Issues in Manufacturing and Product Use

### Chemistry and Chemical Biology

CHEM 3501 Inorganic Chemistry

CHEM 5651 Materials Chemistry of Renewable Energy

Or any advisor-approved course or directed study

### Capstone Design

Code	Title	Hours
Complete one of the following major capstone requirements: <sup>1</sup>		
BIOE 4792	Capstone Design 2	4-5
CHME 4703	Chemical Process Design Capstone	
CIVE 4765	Senior Design Project—Environmental	
CIVE 4767	Senior Design Project—Structural	
CIVE 4768	Senior Design Project—Transportation	
EECE 4792	Electrical and Computer Engineering Capstone 2	
MEIE 4702	Capstone Design 2	

### GPA Requirement

2.000 GPA required in the minor

<sup>1</sup> Students may complete 4 semester hours of elective coursework in place of the capstone design project (if major does not have a capstone design project requirement).

## Sustainable Energy Systems, Minor

The sustainable energy systems minor is an interdisciplinary selection of courses designed to offer flexibility and exposure to the principles and applications of sustainable energy systems that are needed to meet the challenges of the world's growing energy needs. Students have an opportunity to learn technical skills, analysis techniques, design strategies, and principles of economics and energy policy in topic areas including traditional (fossil fuel), alternative, renewable, and sustainable energy sources and energy system applications.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

*Note:* Courses required to fulfill a major requirement may not be used to fulfill minor requirements. However, one engineering course from this minor with course number 4000 to 5999 in the student's major can be used as a technical elective or advanced engineering elective to fulfill the student's major requirements. See curriculum below for details.

### Core Energy Science, Technology Courses

Code	Title	Hours
Complete two of the following:		8
CHME 2320 or ME 2380	Chemical Engineering Thermodynamics 1 Thermodynamics	
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
ENSY 5000	Fundamentals of Energy System Integration	
GE 3300	Energy Systems: Science, Technology, and Sustainability	

### Environmental/Economics/Policy Courses

Code	Title	Hours
Complete one of the following:		4
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
ECON 3423	Environmental Economics	
ECON 3425	Energy Economics	
ENVR 2515	Sustainable Development	
FINA 2720	Sustainability in the Business Environment	
ME 5645	Environmental Issues in Manufacturing and Product Use	

### Electives

Code	Title	Hours
Complete two of the following:		8
CHME 2308	Conservation Principles in Chemical Engineering	
CHME 2320	Chemical Engineering Thermodynamics 1	
CHME 5630	Biochemical Engineering	
CHME 5699	Special Topics in Chemical Engineering	
CIVE 4566	Design for Sustainable Transportation: Netherlands	
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
EECE 5680	Electric Drives	
EECE 5682	Power Systems Analysis 1	
EECE 5688	Analysis of Unbalanced Power Grids	
ENSY 5000	Fundamentals of Energy System Integration	
GE 3300	Energy Systems: Science, Technology, and Sustainability	
IE 4512	Engineering Economy (IE students may not count this course toward a sustainable energy minor if used to fulfill a major requirement.)	
ME 2380	Thermodynamics	
ME 5645	Environmental Issues in Manufacturing and Product Use	
ME 5685	Solar Thermal Engineering	
SBSY 5100	Sustainable Design and Technologies in Construction	
SBSY 5200	Sustainable Engineering Systems for Buildings	

**GPA Requirement**

2.000 GPA required in the minor

Details about double-counting restrictions between this minor and Engineering major requirements are as follows:

- Civil engineering, environmental engineering and environmental engineering/health science students may not count Energy Systems: Science, Technology, and Sustainability (GE 3300) toward the sustainable energy systems minor if this course is used to fulfill major requirements.
- Chemical engineering students and mechanical engineering students may not count Chemical Engineering Thermodynamics 1 (CHME 2320) or Thermodynamics (ME 2380) toward the sustainable energy systems minor since these courses are required in their respective majors.
- Chemical engineering students may not count Conservation Principles in Chemical Engineering (CHME 2308) toward the sustainable energy systems minor since this course is required in their major.
- Industrial engineering students may not count Engineering Economy (IE 4512) toward the sustainable energy systems minor since this course is required in their major.

## Bioengineering

### Lee Makowski, PhD

Professor and Chair

206 Interdisciplinary Science and Engineering Complex  
617.373.7805

The Department of Bioengineering offers students a broad education built on fundamentals in science, mathematics, and engineering, with a focus on the biological applications of engineering. The program is designed to provide a rigorous engineering training along with a comprehensive understanding of the biological constraints intrinsic to designing artificial systems to interface with, augment, replace, repair, or monitor living systems. These constraints depend on the properties of the biological system involved and the functionality that is being created. The living system may be the human body; an ecosystem; or, more broadly, a bioreactor, tissue culture system, or any system with living components. The presence of naturally occurring biological tissue places special constraints on the design and implementation of artificial constructs and their interface to living systems. Bioengineers are engineers with comprehensive understanding of the engineering requirements intrinsic to working within a biological context.

Bioengineering is a relatively new field driven by the recognition that engineering of biological systems or systems that interface with living systems requires a multidisciplinary approach that takes into account the mechanical, electrical, chemical, and materials properties of the biological system. With that in mind, the bioengineering program has been designed to provide a rigorous engineering education that endows a broad understanding of the quantitative analysis of biological systems and a deep expertise in one of four areas of bioengineering. The curriculum is structured around a core of six courses that quantitatively analyze biological systems from multiple points of view. The core provides the fundamentals of quantitative physiology, electrical engineering in the context of excitable tissues; basics of mechanical engineering in the context of the musculoskeletal system; and thermodynamics, heat transfer, and fluids mechanics within the context of physiological systems. On completion of the core, students choose one of four concentrations (biomechanics; biomedical devices and bioimaging; cell and tissue engineering; and systems, synthetic, and computational bioengineering), which provides the opportunity to develop a deep level of expertise in an important area of bioengineering. The curriculum culminates with a two-semester capstone course to provide experience in design and implementation of a novel bioengineering project.

### Mission of the Department

The program is committed to providing a multidisciplinary education, making connections from the classroom and laboratory to research, co-op, and cocurricular experiences. The curriculum provides fundamentals in mathematics, physical sciences, and engineering science; laboratory experiences; as well as an emphasis on the special considerations intrinsic to design within a biological context. Through the university's general educational requirements, students gain awareness of the impact of engineering decisions in a broader societal and ethical context. The department encourages professional development through active participation and leadership in student organizations, societies, and departmental activities. As a result, the bioengineering program is designed to prepare students for success in industrial careers; graduate programs; or professional medical, law, and business schools.

### Other Programmatic Features

By participating in our cooperative education program, our graduates will have an opportunity to explore what career objectives fit their own skills and interests. The goal of this component of our program is to offer students valuable professional experience and contacts that will help get them started in their professional career, as well as to develop career management skills. The co-op program parallels the academic program in level of responsibility and sophistication.

The department also offers significant research opportunities throughout all fields of bioengineering, including participating in research centers based in our department and college, as well as new interdisciplinary graduate and professional master's programs.

The bioengineering curriculum is an innovative plan that is continuously and carefully assessed and evaluated to ensure that graduates of the program are fully prepared for success as professional bioengineers and are prepared for graduate or professional school.

### Programs

#### Bachelor of Science in Bioengineering (BSBioE)

- Bioengineering (p. 953)
- Bioengineering and Biochemistry (p. 961)

#### Bachelor of Science in Chemical Engineering (BSChE)

- Chemical Engineering and Bioengineering (p. 967)

#### Bachelor of Science in Mechanical Engineering (BSME)

- Mechanical Engineering and Bioengineering (p. 971)

### Accelerated Programs

See Accelerated Bachelor/Graduate Degree Programs (p. )

## Bioengineering, BSBioE

Bioengineering is engineering in a biological context such as the human body, an ecosystem, or a bioreactor. In every case, the interface between engineered and biological systems places unique constraints on the design and implementation of devices, instruments, or implants. These depend on the properties of the biological system involved and the functionality that is being created.

The interface of engineering and medicine as embodied in bioengineering will be one of the most exciting endeavors and greatest adventures of the 21st century. Job opportunities are expected to expand dramatically with a focus on development of entirely new classes of products, instrumentation, and implants. The impact to human health will be extraordinary.

Bioengineering is intrinsically multidisciplinary and it is essential that students learn the languages used by multidisciplinary teams. To that end, our curriculum is structured around a core of six courses that analyze biological systems from every possible quantitative point of view. On the completion of the core, students choose one of four concentrations, which provides the opportunity to develop a deep level of expertise in a specific area of bioengineering.

Bioengineering students will have unique opportunities in the classroom, research labs, and experiential learning. The projects that they may be able to contribute to include bio-bandages that monitor bacterial growth or that help damaged ligaments heal faster; sheets of cells folded like origami to form a working kidney; and new materials that—like a leaf in the sun—automatically sense and adapt to changes in the environment.

Our undergraduate program includes four research concentrations, including:

- Biomechanics
- Biomedical Devices and Bioimaging
- Cell and Tissue Engineering
- Systems, Synthetic, and Computational Bioengineering

### Program Educational Objectives

Program educational objectives describe what graduates are expected to attain within a few years after graduation. The program educational objectives of the BS in bioengineering program are to prepare graduates to:

- Be technically proficient, innovative, and rigorous problem solvers who excel in the professional practice of engineering while maintaining a high standard of professional and ethical responsibility.
- Be multifaceted and able to work with and demonstrate leadership in multidisciplinary teams.
- Be able to pursue advanced studies in engineering, medicine, and other fields that leverage their technical and problem-solving skills.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

NUPath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUPath requirements with general elective coursework.

### Engineering

Code	Title	Hours
<b>Required Engineering</b>		
BIOE 2350	Biomechanics	4
BIOE 2355	Quantitative Physiology for Bioengineers	4
BIOE 2365 and BIOE 2366	Bioengineering Measurement, Experimentation, and Statistics and Lab for BIOE 2365	5
BIOE 3210	Bioelectricity	4
BIOE 3310	Transport and Fluids for Bioengineers	4
BIOE 3380	Biomolecular Dynamics and Control	4
<b>Bioengineering Capstone</b>		
BIOE 4790	Capstone Design 1	4

BIOE 4792	Capstone Design 2	4
<b>Supplemental Credit</b>		
2 semester hours from the following course count toward the engineering requirement:		2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
3 semester hours from the following course count toward the engineering requirement:		3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

## Concentration

Complete one concentration:

- Biomechanics (p. 955)
- Biomedical Devices and Bioimaging (p. 955)
- Cell and Tissue Engineering (p. 956)
- Systems, Synthetic, and Computational Bioengineering (p. 956)

## Supporting Courses: Mathematics/Science

Complete all mathematics/science courses with a minimum of 30 semester hours.

Code	Title	Hours
<b>Required Mathematics/Science</b>		
BIOL 1111 and BIOL 1112	General Biology 1 and Lab for BIOL 1111	5
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1171 and PHYS 1172 and PHYS 1173 or PHYS 1151 and PHYS 1152 and PHYS 1153	Physics 1 for Bioscience and Bioengineering and Lab for PHYS 1171 and Interactive Learning Seminar for PHYS 1171 Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
PHYS 1175 and PHYS 1176 and PHYS 1177 or PHYS 1155 and PHYS 1156 and PHYS 1157	Physics 2 for Bioscience and Bioengineering and Lab for PHYS 1175 and Interactive Learning Seminar for PHYS 1175 Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	5
<b>Supplemental Credit</b>		
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	

## Professional Development

Code	Title	Hours
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1
<b>Additional Required Courses</b>		
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

## Writing Requirements

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3315	Advanced Writing in the Technical Professions Interdisciplinary Advanced Writing in the Disciplines	4

## Required General Electives

Code	Title	Hours
Complete 28 SH of academic, nonremedial, nonrepetitive courses.		28

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

## Major GPA Requirement

2.000 minimum GPA required in BIOE coursework

## Program Requirement

135 total semester hours required

### CONCENTRATION IN BIOMECHANICS

Code	Title	Hours
<b>Required Courses</b>		
Complete three of the following:		12
BIOE 5630	Physiological Fluid Mechanics	
BIOE 5640	Computational Biomechanics	
BIOE 5650	Multiscale Biomechanics	
ME 5665	Musculoskeletal Biomechanics	
<b>Elective Courses</b>		
Complete two of the following. Any course on the required course list not used toward the core requirement may also be taken.		8
BIOE 4991	Research	
BIOE 5060	Special Topics in Bioengineering	
BIOE 5115	Dynamical Systems in Biological Engineering	
BIOE 5440	The Cell as a Machine	
BIOE 5820 or CHME 5631	Biomaterials Biomaterials Principles and Applications	
CHME 5105	Materials Characterization Techniques

## Bioengineering and Biochemistry, BSBioE

This combined major from the College of Engineering and College of Science serves students who wish to develop both a scientific and an engineering mindset to solve problems in bioengineering and biochemistry. The program includes fundamentals and electives in the science of biochemistry; a complete and rigorous bioengineering core; and a series of molecular, cellular, and tissue engineering courses that allow for synthesis of the two. The curriculum aligns well with the coursework required to apply to medical school or other clinical graduate programs and aims to provide the knowledge, skills, and perspective to pursue careers in academia or industry.

### Program Educational Objectives

See Accreditation—Department of Bioengineering (<https://bioe.northeastern.edu/academics/undergraduate-studies/bioe-accreditation/>) for program educational objectives.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience may fulfill the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

<b>Supplemental Credit</b>		
2 semester hours from the following course count toward the engineering requirement:		2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
3 semester hours from the following course count toward the engineering requirement:		3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

### Mathematics/Science Requirements

Code	Title	Hours
<b>Required Mathematics/Science</b>		
BIOL 1111 and BIOL 1112	General Biology 1 and Lab for BIOL 1111	5
BIOL 2301 and BIOL 2302	Genetics and Molecular Biology and Lab for BIOL 2301	5

BIOL 3611 and BIOL 3612	Biochemistry and Lab for BIOL 3611	5
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
CHEM 2311 and CHEM 2312	Organic Chemistry 1 and Lab for CHEM 2311	5
CHEM 2313 and CHEM 2314	Organic Chemistry 2 and Lab for CHEM 2313	5
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1171 and PHYS 1172 and PHYS 1173 or PHYS 1151 and PHYS 1152 and PHYS 1153	Physics 1 for Bioscience and Bioengineering and Lab for PHYS 1171 and Interactive Learning Seminar for PHYS 1171 Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
PHYS 1175 and PHYS 1176 and PHYS 1177 or PHYS 1155 and PHYS 1156 and PHYS 1157	Physics 2 for Bioscience and Bioengineering and Lab for PHYS 1175 and Interactive Learning Seminar for PHYS 1175 Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	5

**Advanced Biology Elective**

Complete one course in the following range (the course must be lecture based, or lecture with corequisite lab, and not an independent research course): 3-5

BIOL 2311 to BIOL 5999

**Advanced Chemistry Elective**

Complete one course in the following range (the course must be lecture based, or lecture with corequisite lab, and not an independent research course): 3-5

CHEM 2310 to CHEM 5999

**Supplemental Credit**

1 semester hour from the following course counts toward the mathematics/science requirement: 1

GE 1501 Cornerstone of Engineering 1 <sup>1</sup>

**Professional Development**

Code	Title	Hours
<b>Professional Development</b>		
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1

**Additional Required Courses**

1 semester hour from the following course counts toward the professional development requirement: 1

GE 1501 Cornerstone of Engineering 1 <sup>1</sup>

1 semester hour from the following course counts toward the professional development requirement: 1

GE 1502 Cornerstone of Engineering 2 <sup>1</sup>

**Writing Requirements**

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3307 or ENGW 3315	Advanced Writing in the Technical Professions Advanced Writing in the Sciences Interdisciplinary Advanced Writing in the Disciplines	4

**Required General Electives**

Code	Title	Hours
Complete 12 semester hours of academic, nonremedial, nonrepetitive courses.		12

**Integrative Course**

Code	Title	Hours
This course is already required above and also fulfills the integrative requirement:		
BIOE 4790	Capstone Design 1	4

**Major GPA Requirement**

A 2.000 minimum GPA is required in BIOE coursework.

**Program Requirement**

137 total semester hours required

<sup>1</sup> Students can substitute Engineering Design (GE 1110) and Engineering Problem Solving and Computation (GE 1111) for Cornerstone of Engineering 1 (GE 1501) and Cornerstone of Engineering 2 (GE 1502) in approved situations.

## Chemical Engineering and Bioengineering, BSChE

The Bachelor of Science in Chemical Engineering and Bioengineering provides students with a broad education built on fundamentals in science, mathematics, and engineering, with the breadth of knowledge and problem solving established in chemical engineering applied through a bioengineering focus. Chemical engineering and bioengineering have long been closely related, working to understand human diseases, developing new therapies and drug delivery systems, and producing new medicines through cell culture techniques. This specific combined major allows for chemical engineering expertise in advanced materials and chemical processes, with the additional specialized bioengineering mastery of the biological constraints intrinsic to supporting and designing systems to aid and repair living systems.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Chemical Engineering Requirements

Code	Title	Hours
<b>Required Engineering</b>		
CHME 2308	Conservation Principles in Chemical Engineering	4
CHME 2310	Transport Processes 1	4
CHME 2320	Chemical Engineering Thermodynamics 1	4
CHME 3305 and CHME 3306	Chemical Engineering Laboratory and Recitation for CHME 3305	4
CHME 3312	Transport Processes 2	4
CHME 3322	Chemical Engineering Thermodynamics 2	4
CHME 4510	Chemical Engineering Kinetics	4
CHME 4512	Chemical Engineering Process Control	4
<b>Chemical Engineering Elective</b>		
Choose any 2000-5000 level chemical engineering course to meet this elective requirement. Research for credit may not be considered for this requirement.		4
<b>Supplemental Credit</b>		
2 semester hours from the following course count toward the engineering requirement:		2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
3 semester hours from the following course count toward the engineering requirement:		3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

### Bioengineering Requirements

Code	Title	Hours
<b>Core Bioengineering Courses</b>		
BIOE 2355	Quantitative Physiology for Bioengineers	4
BIOE 3210	Bioelectricity	4
<b>Cell and Tissue Engineering Courses</b>		
BIOE 5410	Molecular Bioengineering	4
BIOE 5420	Cellular Engineering	4
BIOE 5430	Principles and Applications of Tissue Engineering	4
<b>Bioengineering Capstone</b>		

BIOE 4790	Capstone Design 1	4
BIOE 4792	Capstone Design 2	4

### Supporting Courses: Mathematics/Science

Complete all mathematics/science courses with a minimum of 30 semester hours.

Code	Title	Hours
<b>Required Mathematics/Science</b>		
BIOL 1111	General Biology 1	4
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
CHEM 2311 and CHEM 2312	Organic Chemistry 1 and Lab for CHEM 2311	5
CHEM 2313 and CHEM 2314	Organic Chemistry 2 and Lab for CHEM 2313	5
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	5
<b>Supplemental Credit</b>		
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

### Professional Development

Code	Title	Hours
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1
<b>Additional Required Courses</b>		
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

### Writing Requirements

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3307 or ENGW 3315	Advanced Writing in the Technical Professions Advanced Writing in the Sciences Interdisciplinary Advanced Writing in the Disciplines	4

### Required General Electives

Code	Title	Hours
Complete 8 semester hours of academic, nonremedial, nonrepetitive courses.		8

### Integrative Courses

Code	Title	Hours
These courses are already required above and also fulfill the integrative requirement.		
CHME 4315	Chemical Engineering Experimental Design 2	4
CHME 4510	Chemical Engineering Kinetics	4

### Major GPA Requirement

2.000 minimum GPA required in CHME coursework

2.000 minimum GPA required in all BIOE coursework

### Program Requirement

135 total semester hours required

## Mechanical Engineering and Bioengineering, BSME

### Overview

This combined major from the Department of Mechanical and Industrial Engineering and Department of Bioengineering provides a rigorous curriculum for students willing to learn and integrate the foundations of mechanical engineering and bioengineering toward solving multidisciplinary problems arising at the intersection of these two engineering disciplines. The combined major weaves mechanics, materials, and thermofluids courses of mechanical engineering with a set of core and elective bioengineering courses from biomechanics, biostatistics, signals, and systems, to biomaterials, biomedical imaging, and design of biomedical devices and implants.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

NUPath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUPath requirements with general elective coursework.

### Mechanical Engineering Requirements

Code	Title	Hours
<b>Required Mechanical Engineering</b>		
ME 2340 and ME 2341	Introduction to Material Science and Lab for ME 2340	5
ME 2350	Statics	4
ME 2355 and ME 2356	Mechanics of Materials and Lab for ME 2355	5
ME 2380 and ME 2381	Thermodynamics and Recitation for ME 2380	4
ME 3455 and ME 3456	Dynamics and Lab for ME 3455	5
ME 3475 or ME 3480	Fluid Mechanics International Applications of Fluid Mechanics	4
ME 4550	Mechanical Engineering Design	4
ME 4570	Thermal Systems Analysis and Design	4
<b>Senior Capstone Design Project</b>		
MEIE 4701	Capstone Design 1	1
MEIE 4702	Capstone Design 2	5
<b>Supplemental Credit</b>		
2 semester hours from the following course count toward the engineering requirement:		2
GE 1501	Cornerstone of Engineering 1	
3 semester hours from the following course count toward the engineering requirement:		3
GE 1502	Cornerstone of Engineering 2	

### Bioengineering

Code	Title	Hours
<b>Required Bioengineering Courses</b>		
BIOE 2355	Quantitative Physiology for Bioengineers	4
BIOE 2365 and BIOE 2366	Bioengineering Measurement, Experimentation, and Statistics and Lab for BIOE 2365	5
BIOE 3210	Bioelectricity	4
BIOE 3380	Biomolecular Dynamics and Control	4
BIOE 5640	Computational Biomechanics	4

**Bioengineering Electives**

Complete 16 semester hours from the course list below:		16
BIOE 5115	Dynamical Systems in Biological Engineering	
BIOE 5235	Biomedical Imaging	
BIOE 5250	Regulatory and Quality Aspects of Medical Device Design	
BIOE 5410	Molecular Bioengineering	
BIOE 5420	Cellular Engineering	
BIOE 5430	Principles and Applications of Tissue Engineering	
BIOE 5440	The Cell as a Machine	
BIOE 5630	Physiological Fluid Mechanics	
BIOE 5650	Multiscale Biomechanics	
BIOE 5800	Systems, Signals, and Controls for Bioengineers	
BIOE 5810	Design of Biomedical Instrumentation	
BIOE 5820	Biomaterials	
BIOE 5850	Design of Implants	

**Supporting Courses: Mathematics/Science**

Complete all mathematics/science courses with a minimum of 30 semester hours.

Code	Title	Hours
<b>Required Mathematics/Science</b>		
BIOL 1111 and BIOL 1112	General Biology 1 and Lab for BIOL 1111	5
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	5
<b>Supplemental Credit</b>		
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1501	Cornerstone of Engineering 1	

**Professional Development**

Code	Title	Hours
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1
<b>Additional Required Courses</b>		
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1501	Cornerstone of Engineering 1	
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1502	Cornerstone of Engineering 2	

**Writing Requirements**

Code	Title	Hours
A grade of C or higher is required in each course:		
ENGW 1111	First-Year Writing	4

ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

### Required General Electives

<b>Code</b>	<b>Title</b>	<b>Hours</b>
Complete 8 semester hours of academic, nonremedial, nonrepetitive courses.		8

### Integrative Courses

<b>Code</b>	<b>Title</b>	<b>Hours</b>
These courses are already required above and also fulfill the integrative requirement.		
MEIE 4701	Capstone Design 1	
MEIE 4702	Capstone Design 2	

### Major GPA Requirement

2.000 minimum GPA required in ME, IE, and MEIE courses

2.000 minimum GPA required in BIOE courses

### Program Requirement

140 total semester hours required

### Plan of Study

#### Sample Plans of Study

#### FOUR YEARS, ONE CO-OP IN SUMMER 2/FALL

Year 1							
Fall	Hours	Spring	Hours	Summer 1	Hours	Summer 2	Hours

## Chemical Engineering

Website (<http://www.northeastern.edu/che/>)

### Rebecca Kuntz Willits, PhD

Professor and Chair

201 Cullinane  
617.373.2989  
617.373.2209 (fax)

The Department of Chemical Engineering at Northeastern University prepares undergraduate chemical engineers to excel at providing innovative solutions to problems related to environmental and energy systems, advanced and flexible manufacturing, personalized medicine, and novel materials for everyday living. With chemistry integrally involved in global challenges, chemical engineers utilize their undergraduate training to solve these problems in a variety of ways. For example, chemical engineers apply foundations of science, mathematics, and engineering to create new materials needed for life in space, alternative energy sources, and materials to efficiently store energy. In biotechnology, chemical engineers recapitulate and regenerate tissue, develop new therapies and drug delivery systems, and utilize the microbiome to advance medicine and sustainability. Chemical engineers are also involved in protecting our environment by exploring ways to reduce acid rain and smog; to recycle and reduce wastes; to develop new sources of environmentally clean energy; and to design inherently safe, efficient, and “green” processes. Through the design of new materials, products, and processes while reducing costs, increasing production, and improving the quality, sustainability, and safety of new products, chemical engineers impact our daily lives.

### Mission of the Department

The mission of the Department of Chemical Engineering at Northeastern is to educate and train students in chemical engineering practice through integrating an inclusive classroom environment with hands-on and cooperative education experiences while solving research problems that impact our world.

Co-op enables students to integrate practical workplace knowledge with classroom learning so the educational experiences are synergistic and deepen the learning process. The chemical engineering community encourages professional development through active participation and leadership in student organizations, professional societies, and departmental activities.

### Academic Programs

The department offers undergraduate programs in both chemical engineering and several combined majors:

- BS in Chemical Engineering
- BS in Chemical Engineering and Biochemistry
- BS in Chemical Engineering and Bioengineering
- BS in Chemical Engineering and Computer Science
- BS in Chemical Engineering and Data Science
- BS in Chemical Engineering and Environmental Engineering
- BS in Chemical Engineering and Physics

Please see the programs tab for a full list of the department’s academic programs.

By participating in our cooperative education program, our graduates will have an opportunity to explore career objectives that fit their own skills and interests. The goal of this component of our program is to offer students valuable professional experience and contacts to help get them started in their professional career, as well as to develop career management skills. The co-op program parallels the academic program in level of responsibility and sophistication.

The department also offers research opportunities throughout all aspects of chemical engineering, with opportunities for students to participate in academic research as early as their first year. The chemical engineering curriculum is continuously evaluated and improved to ensure that graduates of the program are given every opportunity for future success as professional chemical engineers and are prepared for lifelong learning.

### Programs

#### Bachelor of Science in Chemical Engineering (BSChE)

- Chemical Engineering (p. 978)
- Chemical Engineering and Biochemistry (p. 985)
- Chemical Engineering and Bioengineering (p. 967)
- Chemical Engineering and Computer Science (p. 728)
- Chemical Engineering and Data Science (p. 733)

- Chemical Engineering and Environmental Engineering (p. 1002)
- Chemical Engineering and Physics (p. 1007)

**Minor**

- Biochemical Engineering (p. 1012)

**Accelerated Programs**

See Accelerated Bachelor/Graduate Degree Programs (p.     )

## Chemical Engineering, BSChE

The chemical engineering program offers students a broad education built on fundamentals in science, mathematics, and engineering, which are then applied to contemporary problems using modern tools, such as computational software and computer-aided design. Chemical engineers have traditionally been employed in chemical, petrochemical, agricultural chemical, pulp and paper, plastics, cosmetics, and textiles industries and in consulting and design firms. Today, chemical engineers also play an integral role in bioprocesses and biomedicine, Big Data and artificial intelligence, sustainability and energy, and study of advanced materials, including nanotechnology. For example, chemical engineers are creating new materials needed for space exploration, alternative energy sources, and faster, self-powered computer chips. In biotechnology and biomedicine, chemical engineers are working to understand human diseases, developing new therapies and drug delivery systems, and producing new medicines through cell culture techniques. Chemical engineers employ nanotechnology to revolutionize sensors, security systems, and medical diagnostics and treatments. In addition to creating important products, chemical engineers are also involved in protecting our environment by exploring ways to reduce acid rain and smog; to recycle and reduce wastes; to develop new sources of environmentally clean energy; and to design inherently safe, efficient, and “green” processes. The role of a chemical engineer is to develop new products and to design processes while reducing costs, increasing production, and improving the quality and safety of new products.

The degree also serves as a springboard to advanced study in chemical engineering or postgraduate pathways including law school, business school, or medical/health professions school.

Visit the department website (<https://che.northeastern.edu/academics/undergraduate-studies/che-accreditation/>) for program educational objectives.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
CHME 2308	Conservation Principles in Chemical Engineering	4
CHME 2310	Transport Processes 1	4
CHME 2320	Chemical Engineering Thermodynamics 1	4
CHME 3305 and CHME 3306	Chemical Engineering Laboratory and Recitation for CHME 3305	4
CHME 3312	Transport Processes 2	4
CHME 3322	Chemical Engineering Thermodynamics 2	4
CHME 4510	Chemical Engineering Kinetics	4
CHME 4512	Chemical Engineering Process Control	4
CHME 4701	Separations and Process Analysis	4
Chemical engineering elective <sup>1</sup>		4
<b>Chemical Engineering Capstone</b>		
CHME 4703 and CHME 4705	Chemical Process Design Capstone and Recitation for CHME 4703	4
<b>Advanced Engineering Elective</b>		
Complete one course numbered between 4000 and 5999 in any of the following subject areas: BIOE, CHME, CIVE, EECE, ENGR, IE, ME, and MEIE		4
<b>Supplemental Credit</b>		
2 semester hours from the following course count toward the engineering requirement:		2
GE 1501	Cornerstone of Engineering 1 <sup>2</sup>	

3 semester hours from the following course count toward the engineering requirement: 3

GE 1502	Cornerstone of Engineering 2 <sup>2</sup>
---------	---

<sup>1</sup> Students can take any 2000–5000-level chemical engineering course to meet the elective requirement. Research for credit will not be accepted for this requirement.

<sup>2</sup> Students can substitute Engineering Design (GE 1110) and Engineering Problem Solving and Computation (GE 1111) for Cornerstone of Engineering 1 (GE 1501) and Cornerstone of Engineering 2 (GE 1502) in approved situations.

### Supporting Courses: Mathematics/Science

Complete all mathematics/science courses with a minimum of 30 semester hours.

Code	Title	Hours
<b>Required Mathematics/Science</b>		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
Complete one of the following:		4-5
BIOL 1111	General Biology 1	
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	

### Supplemental Credit

1 semester hour from the following course counts toward the mathematics/science requirement: 1

GE 1501	Cornerstone of Engineering 1 <sup>1</sup>
---------	---

### Supporting Courses: Advanced Science

Code	Title	Hours
Complete one of the following pairs:		5
CHEM 2311 and CHEM 2312	Organic Chemistry 1 and Lab for CHEM 2311	
CHEM 2315 and CHEM 2316	Organic Chemistry 1 for Chemistry Majors and Lab for CHEM 2315	
Complete one of the following pairs:		5
CHEM 2313 and CHEM 2314	Organic Chemistry 2 and Lab for CHEM 2313	
CHEM 2317 and CHEM 2318	Organic Chemistry 2 for Chemistry Majors and Lab for CHEM 2317	
Complete one of the following:		4-6
BIOL 2301	Genetics and Molecular Biology	
BIOL 2327	Human Parasitology	
BIOL 3421 and BIOL 3422	Microbiology and Lab for BIOL 3421	
BIOL 3603	Mammalian Systems Physiology	
BIOL 3611 and BIOL 3612	Biochemistry and Lab for BIOL 3611	
CHEM 2321 and CHEM 2322	Analytical Chemistry and Lab for CHEM 2321	
CHEM 3403 and CHEM 3404	Quantum Chemistry and Spectroscopy and Lab for CHEM 3403	
CHEM 3431 and CHEM 3432	Physical Chemistry and Lab for CHEM 3431	

CHEM 3501 and CHEM 3502 and CHEM 3503	Inorganic Chemistry and Lab for CHEM 3501 and Recitation for CHEM 3501
CHEM 4628 and CHEM 4629	Introduction to Spectroscopy of Organic Compounds and Identification of Organic Compounds
EEMB 2302 and EEMB 2303	Ecology and Lab for EEMB 2302
EEMB 3460	Conservation Biology
PHYS 1211	Computational Problem Solving in Physics
PHYS 2303	Modern Physics
PHYS 2371 and PHYS 2372	Electronics and Lab for PHYS 2371
PHYS 3601	Classical Dynamics
PHYS 3602	Electricity and Magnetism 1

## Professional Development

Code	Title	Hours
<b>Professional Development</b>		
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1

### Additional Required Courses

1 semester hour from the following course counts toward the professional development requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

## Writing Requirements

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3315	Advanced Writing in the Technical Professions Interdisciplinary Advanced Writing in the Disciplines	4

## Required General Electives

Code	Title	Hours
Complete 24 semester hours of academic, nonremedial, nonrepetitive courses.		24

## Major GPA Requirement

A 2.000 minimum GPA is required in CHME coursework.

## Program Requirement

134 total semester hours required

## Chemical Engineering and Biochemistry, BSChE

This intercollege combined major serves students who would like to explore their interest in biochemistry while earning the benefit of a Bachelor of Science degree in chemical engineering. The program combines the fundamentals of biochemistry with the engineering skills necessary for scale-up of biochemical processes. The curriculum is designed to prepare students well to enter the growing biotechnology industry and be able to converse from the chemistry of organisms to the design of vessels for successful synthesis of cells and pharmaceuticals.

Visit the department website (<https://che.northeastern.edu/academics/undergraduate-studies/che-accreditation/>) for program educational objectives.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Engineering</b>		
CHME 2308	Conservation Principles in Chemical Engineering	4
CHME 2310	Transport Processes 1	4
CHME 2320	Chemical Engineering Thermodynamics 1	4
CHME 3305 and CHME 3306	Chemical Engineering Laboratory and Recitation for CHME 3305	4
CHME 3312	Transport Processes 2	4
CHME 3322	Chemical Engineering Thermodynamics 2	4
CHME 4510	Chemical Engineering Kinetics	4
CHME 4512	Chemical Engineering Process Control	4
CHME 4701	Separations and Process Analysis	4
<b>Chemical Engineering Elective</b>		
Complete one CHME course in the 2000-5000 range.		4
<b>Chemical Engineering Capstone</b>		
CHME 4703 and CHME 4705	Chemical Process Design Capstone and Recitation for CHME 4703	4
<b>Supplemental Credit</b>		
2 semester hours from the following course count toward the engineering requirement:		2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
3 semester hours from the following course count toward the engineering requirement:		3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

### Mathematics/Science Requirement

Complete all mathematics/science courses with a minimum of 30 semester hours.

Code	Title	Hours
<b>Required Mathematics/Science</b>		
BIOL 2301 and BIOL 2302	Genetics and Molecular Biology and Lab for BIOL 2301	5
BIOL 3611 and BIOL 3612	Biochemistry and Lab for BIOL 3611	5
BIOL 4707	Cell and Molecular Biology	4

CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5

**Advanced Biology Elective**

Complete one course in the following range (the course must be lecture-based, or lecture with corequisite lab, and not an independent research course): 3-5

BIOL 2311 to BIOL 5999

**Supplemental Credit**

1 semester hour from the following course counts toward the mathematics/science requirement: 1

GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
---------	---	--

**Advanced Science Requirement**

Code	Title	Hours
BIOL 1111	General Biology 1	4
CHEM 2311 and CHEM 2312	Organic Chemistry 1 and Lab for CHEM 2311	5
CHEM 2313 and CHEM 2314	Organic Chemistry 2 and Lab for CHEM 2313	5
CHEM 2321 and CHEM 2322 and CHEM 2323 or CHEM 3331 and CHEM 3332	Analytical Chemistry and Lab for CHEM 2321 and Recitation for CHEM 2321 Bioanalytical Chemistry and Lab for CHEM 3331	5

**Advanced Chemistry Elective**

Complete one course in the following range (the course must be lecture-based, or lecture with corequisite lab, and not an independent research course): 3-5

CHEM 2310 to CHEM 5999

**Professional Development**

Code	Title	Hours
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1

**Additional Required Courses**

1 semester hour from the following course counts toward the professional development requirement: 1

GE 1501	Cornerstone of Engineering 1 <sup>2</sup>	
---------	---	--

1 semester hour from the following course counts toward the professional development requirement: 1

GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	
---------	---	--

**Writing Requirements**

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3307 or ENGW 3315	Advanced Writing in the Technical Professions Advanced Writing in the Sciences Interdisciplinary Advanced Writing in the Disciplines	4

**Required General Electives**

Code	Title	Hours
Complete 8 semester hours of academic, nonremedial, nonrepetitive courses.		8

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

## Major GPA Requirement

2.000 minimum required in CHME coursework

## Program Requirement

135 total semester hours required

## Plan of Study

## Chemical Engineering and Bioengineering, BSChE

The Bachelor of Science in Chemical Engineering and Bioengineering provides students with a broad education built on fundamentals in science, mathematics, and engineering, with the breadth of knowledge and problem solving established in chemical engineering applied through a bioengineering focus. Chemical engineering and bioengineering have long been closely related, working to understand human diseases, developing new therapies and drug delivery systems, and producing new medicines through cell culture techniques. This specific combined major allows for chemical engineering expertise in advanced materials and chemical processes, with the additional specialized bioengineering mastery of the biological constraints intrinsic to supporting and designing systems to aid and repair living systems.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Chemical Engineering Requirements

Code	Title	Hours
<b>Required Engineering</b>		
CHME 2308	Conservation Principles in Chemical Engineering	4
CHME 2310	Transport Processes 1	4
CHME 2320	Chemical Engineering Thermodynamics 1	4
CHME 3305 and CHME 3306	Chemical Engineering Laboratory and Recitation for CHME 3305	4
CHME 3312	Transport Processes 2	4
CHME 3322	Chemical Engineering Thermodynamics 2	4
CHME 4510	Chemical Engineering Kinetics	4
CHME 4512	Chemical Engineering Process Control	4
<b>Chemical Engineering Elective</b>		
Choose any 2000-5000 level chemical engineering course to meet this elective requirement. Research for credit may not be considered for this requirement.		4
<b>Supplemental Credit</b>		
2 semester hours from the following course count toward the engineering requirement:		2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
3 semester hours from the following course count toward the engineering requirement:		3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

### Bioengineering Requirements

Code	Title	Hours
<b>Core Bioengineering Courses</b>		
BIOE 2355	Quantitative Physiology for Bioengineers	4
BIOE 3210	Bioelectricity	4
<b>Cell and Tissue Engineering Courses</b>		
BIOE 5410	Molecular Bioengineering	4
BIOE 5420	Cellular Engineering	4
BIOE 5430	Principles and Applications of Tissue Engineering	4
<b>Bioengineering Capstone</b>		

BIOE 4790	Capstone Design 1	4
BIOE 4792	Capstone Design 2	4

### Supporting Courses: Mathematics/Science

Complete all mathematics/science courses with a minimum of 30 semester hours.

Code	Title	Hours
<b>Required Mathematics/Science</b>		
BIOL 1111	General Biology 1	4
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
CHEM 2311 and CHEM 2312	Organic Chemistry 1 and Lab for CHEM 2311	5
CHEM 2313 and CHEM 2314	Organic Chemistry 2 and Lab for CHEM 2313	5
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	5
<b>Supplemental Credit</b>		
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

### Professional Development

Code	Title	Hours
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1
<b>Additional Required Courses</b>		
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

### Writing Requirements

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3307 or ENGW 3315	Advanced Writing in the Technical Professions Advanced Writing in the Sciences Interdisciplinary Advanced Writing in the Disciplines	4

### Required General Electives

Code	Title	Hours
Complete 8 semester hours of academic, nonremedial, nonrepetitive courses.		8

## Integrative Courses

Code	Title	Hours
These courses are already required above and also fulfill the integrative requirement.		
CHME 4315	Chemical Engineering Experimental Design 2	4
CHME 4510	Chemical Engineering Kinetics	4

## Major GPA Requirement

2.000 minimum GPA required in CHME coursework

2.000 minimum GPA required in all BIOE coursework

## Program Requirement

135 total semester hours required

## Plan of Study

## Chemical Engineering and Computer Science, BSChE

The Bachelor of Science in Chemical Engineering and Computer Science provides expertise in computational modeling and simulation of chemical processes. The curriculum is designed to prepare students to practice in the engineering and control of processes involving chemicals, biotechnology feedstocks, and pharmaceuticals, as well as the fundamentals of program design, software development, and algorithms and data.

Program educational objectives can be found on the department website (<https://che.northeastern.edu/academics/undergraduate-studies/che-accreditation/>).

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Engineering</b>		
CHME 2308	Conservation Principles in Chemical Engineering	4
CHME 2310	Transport Processes 1	4
CHME 2320	Chemical Engineering Thermodynamics 1	4
CHME 3305 and CHME 3306	Chemical Engineering Laboratory and Recitation for CHME 3305	4
CHME 3312	Transport Processes 2	4
CHME 3322	Chemical Engineering Thermodynamics 2	4
CHME 4510	Chemical Engineering Kinetics	4
CHME 4512	Chemical Engineering Process Control	4
CHME 4701	Separations and Process Analysis	4
<b>Chemical Engineering Capstone</b>		
CHME 4703 and CHME 4705	Chemical Process Design Capstone and Recitation for CHME 4703	4
<b>Supplemental Credit</b>		
2 semester hours from the following course count toward the engineering requirement:		2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
3 semester hours from the following course count toward the engineering requirement:		3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

### Computer Science Requirements

Code	Title	Hours
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3200	Database Design	4

CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4

**Khoury Elective Courses**

With advisor approval, a directed study, research, project study, or appropriate graduate-level course may also be taken as a computer science elective.

Complete 8 semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:	8
CS 2500 or higher, except CS 5010	
CY 2000 or higher, except CY 4930	
DS 2000 or higher, except DS 4900	
IS 2000 or higher, except IS 4900	

**Supporting Courses: Mathematics/Science**

Complete all mathematics/science courses with a minimum of 30 semester hours.

Code	Title	Hours
<b>Required Mathematics/Science</b>		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
Complete one of the following:		4-5
BIOL 1111	General Biology 1	
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	
<b>Supplemental Credit</b>		
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	

**Professional Development**

Code	Title	Hours
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1
<b>Additional Required Courses</b>		
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

**Writing Requirements**

Code	Title	Hours
A grade of C or higher is required in each course:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3307 or ENGW 3315	Advanced Writing in the Technical Professions Advanced Writing in the Sciences Interdisciplinary Advanced Writing in the Disciplines	4

**Integrative Courses**

Code	Title	Hours
This course is already required above and also fulfills the integrative requirement.		
CHME 4512	Chemical Engineering Process Control	4

**Required General Electives**

Code	Title	Hours
Complete 8 semester hours of academic, nonremedial, nonrepetitive courses.		
		8

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

**Major GPA Requirement**

Minimum 2.000 GPA required in all CHME coursework

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses

**Program Requirement**

136 total semester hours required

**Plan of Study****Sample Plan of Study****FOUR YEARS, ONE CO-OP IN SUMMER 2/FALL**

## Chemical Engineering and Data Science, BSChE

### Overview

The Bachelor of Science in Chemical Engineering and Data Science provides students with the technical and analytical skills to work with large datasets. The curriculum focuses on the application of data science methods to solve problems in the chemical engineering field, including the development of predictive models, optimization of processes, and the design of experiments. Students also have an opportunity to learn data visualization, machine learning, and artificial intelligence techniques.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

All undergraduate students are required to complete the NUpath Requirements (<https://catalog.northeastern.edu/undergraduate/university-academics/nupath/>).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience may fulfill the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Engineering</b>		
CHME 2308	Conservation Principles in Chemical Engineering	4
CHME 2310	Transport Processes 1	4
CHME 2320	Chemical Engineering Thermodynamics 1	4
CHME 3305 and CHME 3306	Chemical Engineering Laboratory and Recitation for CHME 3305	4
CHME 3312	Transport Processes 2	4
CHME 3322	Chemical Engineering Thermodynamics 2	4
CHME 4510	Chemical Engineering Kinetics	4
CHME 4512	Chemical Engineering Process Control	4
CHME 4701	Separations and Process Analysis	4
<b>Chemical Engineering Capstone</b>		
CHME 4703 and CHME 4705	Chemical Process Design Capstone and Recitation for CHME 4703	4
<b>Supplemental Credit</b>		
2 semester hours from the following count toward the engineering requirement:		2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
3 semester hours from the following count toward the engineering requirement:		3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

### Data Science Courses

Code	Title	Hours
<b>Programming Sequence Pathways</b>		
Complete one of the following two options:		12
<b>Computer Science Option</b>		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	

CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	
<b>Data Science Option</b>		
DS 2000 and DS 2001	Programming with Data and Data Science Programming Practicum	
DS 2500 and DS 2501	Intermediate Programming with Data and Lab for DS 2500	
DS 3500	Advanced Programming with Data	
<b>Computer Science Required Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 3200	Database Design	4
<b>Data Science Foundations</b>		
DS 3000	Foundations of Data Science	4
DS 4200	Information Presentation and Visualization	4
DS 4300	Large-Scale Information Storage and Retrieval	4
DS 4400	Machine Learning and Data Mining 1	4

### Supporting Courses: Mathematics/Science

Complete all mathematics/science courses with a minimum of 30 semester hours.

Code	Title	Hours
<b>Required Mathematics/Science</b>		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 3081 and MATH 3082	Probability and Statistics and Recitation for MATH 3081	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
<b>Supplemental Credit</b>		
1 semester hour from the following counts toward the mathematics/science requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	

### Professional Development

Code	Title	Hours
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1
<b>Additional Required Courses</b>		
1 semester hour from the following counts toward the professional development requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
1 semester hour from the following counts toward the professional development requirement:		1
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

### Writing Requirements

Code	Title	Hours
A grade of C or higher is required in each course:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3307 or ENGW 3315	Advanced Writing in the Technical Professions Advanced Writing in the Sciences Interdisciplinary Advanced Writing in the Disciplines	4

**Integrative Courses**

Code	Title	Hours
This course is already required above and also fulfills the integrative requirement.		
CHME 4512	Chemical Engineering Process Control	

**Required General Electives**

Code	Title	Hours
Complete 8 semester hours of academic, nonremedial courses not used toward other requirements.		
		8

**Major GPA Requirement**

Minimum 2.000 GPA required in CHME courses

Minimum 2.000 GPA required in CS, CY, DS, and IS courses

**Program Requirement**

133 total semester hours required

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and 1502 in approved situations.

**Plan of Study****Four Years, One Co-op in Summer 2/Fall**

## Chemical Engineering and Environmental Engineering, BSChE

The Bachelor of Science in Chemical Engineering and Environmental Engineering provides expertise in addressing a variety of environmental challenges built on fundamentals in engineering, chemical, biological, and ecological principles. The coursework is designed to prepare students to tackle interconnected challenges in water, energy, air quality, and related fields, through chemical engineering skills in the engineering and control of processes involving chemicals that impact our environment, exploring ways to reduce acid rain and smog; to recycle and reduce wastes; to develop new sources of environmentally clean energy; and to design inherently safe, efficient, and “green” processes.

Program Education Objectives can be found at the following websites:

- Accreditation - Department of Chemical Engineering (<https://che.northeastern.edu/academics/undergraduate-studies/che-accreditation/>)
- Accreditation - Department of Civil & Environmental Engineering (<https://cee.northeastern.edu/academics/undergraduate-studies/cee-accreditation/>)

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Chemical Engineering Requirements

Code	Title	Hours
<b>Required Engineering</b>		
CHME 2308	Conservation Principles in Chemical Engineering	4
CHME 2310	Transport Processes 1	4
CHME 2320	Chemical Engineering Thermodynamics 1	4
CHME 3305 and CHME 3306	Chemical Engineering Laboratory and Recitation for CHME 3305	4
CHME 3312	Transport Processes 2	4
CHME 3322	Chemical Engineering Thermodynamics 2	4
CHME 4510	Chemical Engineering Kinetics	4
CHME 4512	Chemical Engineering Process Control	4
CHME 4701	Separations and Process Analysis	4
<b>Supplemental Credit</b>		
2 semester hours from the following course count toward the engineering requirement:		2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
3 semester hours from the following course count toward the engineering requirement:		3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

### Environmental Engineering

Code	Title	Hours
<b>Core Environmental Engineering Courses</b>		
CIVE 2300 and CIVE 2301	Environmental Measurements in Natural and Engineered Systems and Lab for CIVE 2300	4
CIVE 2334	Environmental Engineering: Principles, Technology, and Sustainability	4
CIVE 3430	Engineering Microbiology and Ecology	4
CIVE 3435	Environmental Pollution: Fate and Transport	4

CIVE 3464	Probability and Engineering Economy for Civil Engineering	4
CIVE 4534 and CIVE 4535	Water Treatment Systems Design and Lab for CIVE 4534	4

**Environmental Engineering Elective Courses**

Complete at least three courses from the following list: 12

CIVE 3335	Environmental Engineering Chemistry and Chemical Technologies	
CIVE 4540	Resource Recovery and Waste Treatment Technologies Abroad	
CIVE 4777	Climate Hazards and Resilient Cities Abroad	
CIVE 5261	Dynamic Modeling for Environmental Investment and Policymaking	
CIVE 5271	Solid and Hazardous Waste Management	
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
CIVE 5280	Remote Sensing of the Environment	
CIVE 5281	Coastal Dynamics and Design	
CIVE 5363	Climate Science, Engineering Adaptation, and Policy	
CIVE 5536	Hydrologic and Hydraulic Design	

**Capstone**

Code	Title	Hours
------	-------	-------

Complete at least one of the core Capstone courses from the following list: 4-5

CHME 4703 and CHME 4705	Chemical Process Design Capstone and Recitation for CHME 4703	
CIVE 4765	Senior Design Project—Environmental	

**Supporting Courses: Mathematics/Science**

Complete all mathematics/science courses with a minimum of 30 semester hours.

Code	Title	Hours
------	-------	-------

**Required Mathematics/Science**

CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5

**Science Elective (Earth)**

Complete one of the following: 4-5

ENVR 1200	Dynamic Earth	
ENVR 2200	Earth's Changing Cycles	
ENVR 3125	Global Oceanic Change	
ENVR 3200	Water Resources	
ENVR 3600	Oceanography	
ENVR 5201	Geologic Field Seminar	

**Supplemental Credit**

1 semester hour from the following course counts toward the mathematics/science requirement: 1

GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
---------	---	--

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

**Professional Development**

Code	Title	Hours
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1

**Additional Required Courses**

1 semester hour from the following course counts toward the professional development requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

**Writing Requirements**

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3307	Advanced Writing in the Sciences	
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

**Required General Electives**

Code	Title	Hours
Complete 8 semester hours of academic, nonremedial, nonrepetitive courses.		8

**Integrative Course**

Code	Title	Hours
This course is already required above and also fulfills the integrative requirement:		
CHME 2310	Transport Processes 1	4

**Major GPA Requirement**

2.000 minimum GPA required in CHME coursework

2.000 minimum GPA required in all CIVE coursework

**Program Requirement**

132 total semester hours required

## Chemical Engineering and Physics, BSChE

This intercollege combined major serves students who would like to explore their interest in physics while earning the benefit of a Bachelor of Science degree in chemical engineering. Upon completion, the successful student will understand the fundamental physics behind many chemical-based processes, resulting in the ability to design and practice in the field of engineering that deals with the movement of mass, heat transfer, and reactions involved in the processing of various materials.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Engineering</b>		
CHME 2308	Conservation Principles in Chemical Engineering	4

Total Hours: 135

**Notes**

Physics courses are offered on the following schedule:

- Modern Physics (PHYS 2303) offered every fall, spring and summer 2.
- Electronics (PHYS 2371)/Lab for PHYS 2371 (PHYS 2372) offered every fall.
- Advanced Physics Laboratory (PHYS 3600) offered every summer 1 and summer 2.
- Classical Dynamics (PHYS 3601) is offered fall and spring semesters of even years only. Please meet with your academic advisor to discuss scheduling options for Year 4 of odd years.
- Electricity and Magnetism 1 (PHYS 3602) offered every fall and spring.
- Electricity and Magnetism 2 (PHYS 3603) offered fall (even years) and summer 1 (odd years).
- Quantum Mechanics (PHYS 4115) offered every fall and spring.
- Thermodynamics and Statistical Mechanics (PHYS 4305) offered every spring and summer 2 (even years).
- Biological Physics 1 (PHYS 4621) offered spring (odd years) and fall (even years).
- Medical Physics (PHYS 4623) offered summer 1 and fall (even years).

- Medical Physics Seminar 1 (PHYS 4651) offered spring and fall (odd years).
- Medical Physics Seminar 2 (PHYS 4652) offered every spring.
- Principles of Experimental Physics (PHYS 5318) offered every spring.

## Biochemical Engineering, Minor

This minor exposes the student to the fundamentals of chemical engineering. Focus is on the major conservation principles such as the conservation of mass and the conservation of energy, followed by how chemical reactions and processing are governed by these principles.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

*Note:* Courses taken pass/fail cannot be used to fulfill minor requirements.

### Required Chemical Engineering Courses

Code	Title	Hours
CHME 2308	Conservation Principles in Chemical Engineering	4
CHME 2310	Transport Processes 1	4
CHME 3312	Transport Processes 2	4
CHME 5630	Biochemical Engineering	4

### Capstone

Code	Title	Hours
CHME 4703	Chemical Process Design Capstone	4

### Supporting Courses: Math and Science

Code	Title	Hours
MATH 1241 or MATH 1341	Calculus 1 Calculus 1 for Science and Engineering	4
MATH 1242 or MATH 1342	Calculus 2 Calculus 2 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
BIOL 2301	Genetics and Molecular Biology	4
BIOL 3611 and BIOL 3612	Biochemistry and Lab for BIOL 3611	5
CHEM 2311 and CHEM 2312 and CHEM 2319	Organic Chemistry 1 and Lab for CHEM 2311 and Recitation for CHEM 2311	5
CHEM 2313 and CHEM 2314 and CHEM 2320	Organic Chemistry 2 and Lab for CHEM 2313 and Recitation for CHEM 2313	5
Complete one of the following:		5
BIOL 1107 and BIOL 1108	Foundations of Biology and Lab for BIOL 1107	
BIOL 1111 and BIOL 1112	General Biology 1 and Lab for BIOL 1111	
BIOL 1115 and BIOL 1116	General Biology 1 for Engineers and Lab for BIOL 1115	

### GPA Requirement

2.000 GPA required in the minor

### Overview

As a leader in research and education, the Department of Civil and Environmental Engineering at Northeastern University prepares undergraduate engineers to excel in their chosen careers, including engineering practice, academia, infrastructure management, land-use planning and development, urban and regional planning, public sector leadership, and many others.

Our students have an opportunity to obtain a broad knowledge base in science, engineering, and general studies that allows them flexibility in career development and graduate education. At the same time, our graduates should be responsible and scientifically educated citizens, prepared to contribute personally as well as professionally to an educated, democratic society. Our academic programs provide future professionals with the core skills necessary to practice civil and environmental engineering and to work with other engineers in an interdisciplinary environment.

Experience tells us that civil and environmental engineering graduates will enter almost every field imaginable. The knowledge and skills acquired—understanding science, critical thinking, effective communication, and understanding the social context, among them—form an excellent foundation for a host of careers, as well as for a fulfilling life outside the world of work.

### Mission of the Department

Advancing innovative civil and environmental solutions for society and creating globally oriented engineering leaders by integrating experiential education and use-inspired interdisciplinary research.

### Academic Programs

With a strategic focus in urban engineering, and through a range of teaching and research strengths, anchored by several multidisciplinary, multi-institutional centers and programs, our academic programs are designed to prepare future engineers to address the global, complex, and ever-evolving engineering challenges of our time by building on current department strengths and expanding into vital areas.

Three overarching themes are emphasized in our programs: environmental health, civil infrastructure security, and sustainable resource engineering. These themes are aligned with the department's premier strengths in simulation (both computational and experimental), smart sensing, data and network science, and urban informatics and are incorporated in the undergraduate programs we offer.

Successful graduates in civil engineering and environmental engineering will have the ability to create, invent, and lead a new generation of professionals and will be able to address key challenges to protect the natural environment and to design and create the built environment for community living, industry, and society development.

Our programs have been designed with a set of electives that permit students to explore or acquire further depth in other fields of interest. Students can use these electives to earn a minor in environmental chemistry, architectural engineering, business, architectural history, music, computer science, or any number of other fields. In the civil engineering field, our programs encompass several disciplines, including transportation planning and engineering; structural engineering; geotechnical engineering; environmental, water resources, and coastal engineering; and construction management. In the environmental engineering field, our programs include developing sustainable resource engineering solutions to environmental health needs with an understanding of institutional and legal frameworks, all related to interconnected challenges in water, energy, air pollution, and waste management, to protect and provide a better quality of life to the human race. For a full list of the department's academic program offerings, please refer to the programs tab.

### Other Programmatic Features

By participating in our cooperative education program, our graduates will have an opportunity to explore what career objectives fit their own skills and interests. The goal of this component of our program is to offer students valuable professional experience and contacts that will help get them started in their professional career, as well as to develop career management skills. The co-op program parallels the academic program in level of responsibility and sophistication.

The department also offers significant research opportunities throughout all fields of civil and environmental engineering, including participating in research centers based in our department and college, as well as new interdisciplinary graduate and professional master's programs.

## **Programs**

### **Bachelor of Science in Civil Engineering (BSCE)**

- Civil Engineering (p. 1015)
- Civil Engineering and Architectural Studies (p. 149)
- Civil Engineering and Computer Science (p. 737)

### **Bachelor of Science in Chemical Engineering (BSChE)**

- Chemical Engineering and Environmental Engineering (p. 1002)

### **Bachelor of Science in Environmental Engineering (BSEnvE)**

- Environmental Engineering (p. 1038)
- Environmental Engineering and Health Science (p. 1044)
- Environmental Engineering and Landscape Architecture (p. 158)

## **Minor**

- Architectural Engineering (p. 1054)
- Civil Engineering (p. 1056)
- Environmental Chemistry (p. 1058)
- Environmental Engineering (p. 1060)

## **Accelerated Programs**

See Accelerated Bachelor/Graduate Degree Programs (p. )

## Civil Engineering, BSCE

Civil engineers play a vital role in human progress and well-being worldwide. Conceptualizing, innovating, designing, and building sustainable infrastructure and environments is fundamental in helping society progress. Modern challenges, including engineering a resilient and sustainable urban infrastructure; establishing clean water and a clean environment; and advancing technologies in computing, sensing, and human health, are all part of the development of society.

Civil engineers design and construct buildings, bridges, tunnels, dams, and river systems. They also plan, design, construct, and manage highways, railroads, canals, and airports; regulate rivers and control floods; and design and build systems for water distribution and environmental protection.

With a broad range of applications, our civil engineering students have the opportunity to explore a range of disciplinary and interdisciplinary tracks, including environmental and water systems, structural engineering, transportation engineering, geotechnical and geoenvironmental engineering, construction management, civil infrastructure security, environmental health, and sustainable resource engineering.

Our BS program in Civil Engineering is ABET accredited. Program educational outcomes can be found at the department's website (<https://cee.northeastern.edu/academics/undergraduate-studies/cee-accreditation/>).

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

## Civil Engineering and Architectural Studies, BSCE

Civil engineering and architecture are two important disciplines that deal with the process of creating the built environment to satisfy societal needs. Both professions have critical functions that are essential in the development of society in terms of planning cities and designing more resilient infrastructure and rely on one another to accomplish it. The combination of these two professions creates great synergy as architects focus more on the functional and human aspects of development, while civil engineers concentrate on the structural elements of the design, ensuring durable structures that perform under normal and extreme loads.

Students successfully completing the program receive a rigorous engineering training education, enabling a high level of engineering knowledge as well as exposure to a broad range of architectural topics and design experiences.

Students also have the opportunity to undertake a co-op experience consistent with the policies and opportunities offered within the College of Engineering.

Our BS program in Civil Engineering and Architectural Studies is ABET accredited. Visit the Department of Civil and Environmental Engineering website (<https://cee.northeastern.edu/academics/undergraduate-studies/cee-accreditation/>) for program education outcomes.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Engineering</b>		
CIVE 2221 and CIVE 2222	Statics and Solid Mechanics and Recitation for CIVE 2221	4
CIVE 2260 and CIVE 2261	Materials for the Built Environment and Lab for CIVE 2260	5
CIVE 2320 and CIVE 2321	Structural Analysis and Recitation for CIVE 2320	4
CIVE 2324	Concrete Structure Design	4
CIVE 2331	Fluid Mechanics and Hydraulics	4
CIVE 2334	Environmental Engineering: Principles, Technology, and Sustainability	4
CIVE 2340 and CIVE 2341	Geotechnical Engineering and Lab for CIVE 2340	5
GE 3300	Energy Systems: Science, Technology, and Sustainability	4
<b>Civil Engineering Project Elective</b>		
Complete one of the following:		4
CIVE 4534 and CIVE 4535	Water Treatment Systems Design and Lab for CIVE 4534	
CIVE 4542	Foundation Engineering and Design	
CIVE 4554	Highway Design	
CIVE 5536	Hydrologic and Hydraulic Design	
<b>Senior Design Project</b>		
CIVE 4767	Senior Design Project—Structural	5
<b>Civil Engineering Technical Electives</b>		
Complete one of the following:		4
CIVE 3425	Steel Structure Design	
CIVE 5522	Structural Systems Modeling	

**Supplemental Credit**

1 semester hour from the following course counts toward the engineering requirement:	1
CIVE 3464 Probability and Engineering Economy for Civil Engineering	
2 semester hours from the following course count toward the engineering requirement:	2
GE 1501 Cornerstone of Engineering 1 <sup>1</sup>	
3 semester hours from the following course count toward the engineering requirement:	3
GE 1502 Cornerstone of Engineering 2 <sup>1</sup>	

**Architectural Studies Requirements**

Code	Title	Hours

ENVR 3200	Water Resources
ENVR 3600	Oceanography
ENVR 5201	Geologic Field Seminar
ENVR 5350	Sustainable Energy and Climate Solutions
PHYS 1111	Introduction to Astronomy
PHYS 1125	Introduction to Network Science: From the Human Cell to Facebook
PHYS 1132	Energy, Environment, and Society
PHYS 1155 and PHYS 1156	Physics for Engineering 2 and Lab for PHYS 1155
PHYS 4623	Medical Physics

**Supplemental Credit**

3 semester hours from the following course count toward the mathematics/science requirement:	3
CIVE 3464	Probability and Engineering Economy for Civil Engineering
1 semester hour from the following course counts toward the mathematics/science requirement:	1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>

**Professional Development**

Code	Title	Hours
<b>Professional Development</b>		
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1

**Additional Required Courses**

1 semester hour from the following course counts toward the professional development requirement:	1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>
1 semester hour from the following course counts toward the professional development requirement:	1
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>

**Writing Requirements**

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3315	Advanced Writing in the Technical Professions Interdisciplinary Advanced Writing in the Disciplines	4

**Integrative Courses**

Code	Title	Hours
This course is already required above and also fulfills the integrative requirement.		
CIVE 4767	Senior Design Project—Structural	

<sup>1</sup> Students can substitute Engineering Design (GE 1110) and Engineering Problem Solving and Computation (GE 1111) for Cornerstone of Engineering 1 (GE 1501) and Cornerstone of Engineering 2 (GE 1502) in approved situations.

## Engineering GPA Requirement

Minimum 2.000 GPA required in CIVE coursework.

## Architecture GPA Requirement

Minimum 2.000 GPA required in all Architecture courses

## Program Requirements

141 total semester hours required

Note:

1. Students who wish to be considered for the two-year Master of Architecture Program at Northeastern **should** take Advanced Architectural Communication (ARCH 3450) as an elective and **should not** take Option Studio (ARCH 5115) or Integrated Building Systems (ARCH 5220) as architectural electives.
2. Students who wish to be considered for the two-year Master of Architecture Program at Northeastern must have satisfied the Structural Systems (ARCH 5230) requirement. This requirement is achieved in this combined major by taking the following three courses, as follows:
  - Statics and Solid Mechanics (CIVE 2221), including Recitation for CIVE 2221 (CIVE 2222)
  - Structural Analysis (CIVE 2320), including Recitation for CIVE 2320 (CIVE 2321)
  - And at least one design course from the following:
    - Concrete Structure Design (CIVE 2324)
    - Steel Structure Design (CIVE 3425)

## Civil Engineering and Computer Science, BSCE

The Bachelor of Science in Civil Engineering and Computer Science provides expertise in computational modeling and simulation of civil and environmental processes and systems. Students will be prepared for practice in the engineering and control of processes and systems vital for the sustainable development and management of civil and environmental infrastructure, as well as the fundamentals of program design, software development, and algorithms and data.

Computational and simulations-based approaches in engineering research and design practices have increased substantially in recent years in response to the rapidly increasing availability of data from remote and in-situ sensors as well as networked systems. Students who graduate with this combined major degree will have the breadth and depth of understanding and abilities to contribute to innovative and sustainable solutions to support global civil and environmental infrastructure demands.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements Interpreting Culture (IC) and Differences and Diversity (DD) are not explicitly satisfied by required engineering courses. Students are responsible for satisfying these requirements with their general elective.

### Engineering Requirements

Code	Title	Hours
<b>Required Engineering</b>		
CIVE 2221 and CIVE 2222	Statics and Solid Mechanics and Recitation for CIVE 2221	4
CIVE 2260 and CIVE 2261	Materials for the Built Environment and Lab for CIVE 2260	5
CIVE 2320 and CIVE 2321	Structural Analysis and Recitation for CIVE 2320	4
CIVE 2324	Concrete Structure Design	4
CIVE 2331	Fluid Mechanics and Hydraulics	4
CIVE 2334	Environmental Engineering: Principles, Technology, and Sustainability	4
CIVE 2340 and CIVE 2341	Geotechnical Engineering and Lab for CIVE 2340	5
GE 3300	Energy Systems: Science, Technology, and Sustainability	4
<b>Civil Engineering Project Elective</b>		
Complete one of the following:		4
CIVE 4534 and CIVE 4535	Water Treatment Systems Design and Lab for CIVE 4534	
CIVE 4542	Foundation Engineering and Design	
CIVE 4554	Highway Design	
CIVE 5536	Hydrologic and Hydraulic Design	
<b>Senior Design Elective</b>		
Complete one of the following:		5
CIVE 4765	Senior Design Project—Environmental	
CIVE 4767	Senior Design Project—Structural	
CIVE 4768	Senior Design Project—Transportation	
<b>Supplemental Credit</b>		
1 semester hour from the following course counts toward the engineering requirement:		1
CIVE 3464	Probability and Engineering Economy for Civil Engineering	
2 semester hours from the following course count toward the engineering requirement:		2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	

3 semester hours from the following course count toward the engineering requirement: 3

GE 1502 Cornerstone of Engineering 2 <sup>1</sup>

### Computer Science Requirements

Code	Title	Hours
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
CS 3000 and CS 3001	Algorithms and Data and Recitation for CS 3000	4
CS 3200	Database Design	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4

### Computer Science Elective

Complete 8 semester hours of the following: 8

CS 2500 or higher, except CS 5010

CY 2000 or higher, except CY 4930

DS 2500 or higher, except DS 4900

IS 2000 or higher, except IS 4900

### Supporting Courses: Mathematics/Science

Complete all mathematics/science courses with a minimum of 30 semester hours.

Code	Title	Hours
<b>Required Mathematics/Science</b>		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5

### Science Elective

Complete one of the following science electives: 4

PHYS 1125 Introduction to Network Science: From the Human Cell to Facebook

PHYS 1132 Energy, Environment, and Society

ENVR 2515 Sustainable Development

### Supplemental Credit

3 semester hours from the following course count toward the mathematics/science requirement: 3

CIVE 3464 Probability and Engineering Economy for Civil Engineering

1 semester hour from the following course counts toward the mathematics/science requirement: 1

GE 1501 Cornerstone of Engineering 1 <sup>1</sup>

### Professional Development

Code	Title	Hours
<b>Professional Development</b>		
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1

**Additional Required Courses**

1 semester hour from the following course counts toward the professional development requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

**Writing Requirements**

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3315	Advanced Writing in the Technical Professions Interdisciplinary Advanced Writing in the Disciplines	4

**Required General Electives**

Code	Title	Hours
Complete 4 semester hours of academic, nonremedial, nonrepetitive courses.		4

**Integrative Course**

Code	Title	Hours
Students will complete one of these courses as part of their required courses above.		
CIVE 4765	Senior Design Project—Environmental	
CIVE 4767	Senior Design Project—Structural	
CIVE 4768	Senior Design Project—Transportation	

**Engineering GPA Requirement**

Minimum 2.000 GPA required in CIVE and GE courses

**Khoury GPA Requirement**

Minimum 2.000 GPA required in CS, CY, DS, and IS courses

**Program Requirements**

139 total semester hours required

<sup>1</sup> Students can substitute Engineering Design (GE 1110) and Engineering Problem Solving and Computation (GE 1111) for Cornerstone of Engineering 1 (GE 1501) and Cornerstone of Engineering 2 (GE 1502) in approved situations.

## Chemical Engineering and Environmental Engineering, BSChE

The Bachelor of Science in Chemical Engineering and Environmental Engineering provides expertise in addressing a variety of environmental challenges built on fundamentals in engineering, chemical, biological, and ecological principles. The coursework is designed to prepare students to tackle interconnected challenges in water, energy, air quality, and related fields, through chemical engineering skills in the engineering and control of processes involving chemicals that impact our environment, exploring ways to reduce acid rain and smog; to recycle and reduce wastes; to develop new sources of environmentally clean energy; and to design inherently safe, efficient, and “green” processes.

Program Education Objectives can be found at the following websites:

- Accreditation - Department of Chemical Engineering (<https://che.northeastern.edu/academics/undergraduate-studies/che-accreditation/>)
- Accreditation - Department of Civil & Environmental Engineering (<https://cee.northeastern.edu/academics/undergraduate-studies/cee-accreditation/>)

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Chemical Engineering Requirements

Code	Title	Hours
<b>Required Engineering</b>		
CHME 2308	Conservation Principles in Chemical Engineering	4
CHME 2310	Transport Processes 1	4
CHME 2320	Chemical Engineering Thermodynamics 1	4
CHME 3305 and CHME 3306	Chemical Engineering Laboratory and Recitation for CHME 3305	4
CHME 3312	Transport Processes 2	4
CHME 3322	Chemical Engineering Thermodynamics 2	4
CHME 4510	Chemical Engineering Kinetics	4
CHME 4512	Chemical Engineering Process Control	4
CHME 4701	Separations and Process Analysis	4
<b>Supplemental Credit</b>		
2 semester hours from the following course count toward the engineering requirement:		2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
3 semester hours from the following course count toward the engineering requirement:		3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

### Environmental Engineering

Code	Title	Hours
<b>Core Environmental Engineering Courses</b>		
CIVE 2300 and CIVE 2301	Environmental Measurements in Natural and Engineered Systems and Lab for CIVE 2300	4
CIVE 2334	Environmental Engineering: Principles, Technology, and Sustainability	4
CIVE 3430	Engineering Microbiology and Ecology	4
CIVE 3435	Environmental Pollution: Fate and Transport	4

CIVE 3464	Probability and Engineering Economy for Civil Engineering	4
CIVE 4534 and CIVE 4535	Water Treatment Systems Design and Lab for CIVE 4534	4

**Environmental Engineering Elective Courses**

Complete at least three courses from the following list: 12

CIVE 3335	Environmental Engineering Chemistry and Chemical Technologies	
CIVE 4540	Resource Recovery and Waste Treatment Technologies Abroad	
CIVE 4777	Climate Hazards and Resilient Cities Abroad	
CIVE 5261	Dynamic Modeling for Environmental Investment and Policymaking	
CIVE 5271	Solid and Hazardous Waste Management	
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
CIVE 5280	Remote Sensing of the Environment	
CIVE 5281	Coastal Dynamics and Design	
CIVE 5363	Climate Science, Engineering Adaptation, and Policy	
CIVE 5536	Hydrologic and Hydraulic Design	

**Capstone**

Code	Title	Hours
------	-------	-------

Complete at least one of the core Capstone courses from the following list: 4-5

CHME 4703 and CHME 4705	Chemical Process Design Capstone and Recitation for CHME 4703	
CIVE 4765	Senior Design Project—Environmental	

**Supporting Courses: Mathematics/Science**

Complete all mathematics/science courses with a minimum of 30 semester hours.

Code	Title	Hours
------	-------	-------

**Required Mathematics/Science**

CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5

**Science Elective (Earth)**

Complete one of the following: 4-5

ENVR 1200	Dynamic Earth	
ENVR 2200	Earth's Changing Cycles	
ENVR 3125	Global Oceanic Change	
ENVR 3200	Water Resources	
ENVR 3600	Oceanography	
ENVR 5201	Geologic Field Seminar	

**Supplemental Credit**

1 semester hour from the following course counts toward the mathematics/science requirement: 1

GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
---------	---	--

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

**Professional Development**

Code	Title	Hours
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1

**Additional Required Courses**

1 semester hour from the following course counts toward the professional development requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

**Writing Requirements**

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3307	Advanced Writing in the Sciences	
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

**Required General Electives**

Code	Title	Hours
Complete 8 semester hours of academic, nonremedial, nonrepetitive courses.		8

**Integrative Course**

Code	Title	Hours
This course is already required above and also fulfills the integrative requirement:		
CHME 2310	Transport Processes 1	4

**Major GPA Requirement**

2.000 minimum GPA required in CHME coursework

2.000 minimum GPA required in all CIVE coursework

**Program Requirement**

132 total semester hours required

**Plan of Study****Sample Plans of Study****FOUR YEARS, ONE CO-OP IN SUMMER 2/FALL**

## Environmental Engineering, BSEnE

Throughout the world, environmental engineers play a key role in defining the future of sustainable cities and communities. Creating innovations and designing systems that ensure clean and healthy environments are some of the greatest collective challenges of our time. Revolutionary strategies and designs are needed to create symbiosis between our natural and manmade environments.

Using new and advanced technologies, environmental engineers must address the world's growing challenges, including engineering sustainable strategies coupled with the development of devices and tools to better predict and address environmental needs to provide clean environments and planning green infrastructure in conjunction with the natural environment for a changing planet.

With a solid foundation in engineering, chemical, biological, and ecological principles, Northeastern's environmental engineering students learn how to tackle interconnected challenges as they relate to water, energy, air quality, and related fields. Understanding these complex interactions, particularly as they impact our built and natural environments, is embodied in our program through a holistic educational approach.

Our BS Environmental Engineering program is ABET accredited. Visit the department website (<https://cee.northeastern.edu/academics/undergraduate-studies/cee-accreditation/>) for program objectives.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Engineering</b>		
CIVE 2221 and CIVE 2222	Statics and Solid Mechanics and Recitation for CIVE 2221	4
CIVE 2300 and CIVE 2301	Environmental Measurements in Natural and Engineered Systems and Lab for CIVE 2300	4
CIVE 2331	Fluid Mechanics and Hydraulics	4
CIVE 2334	Environmental Engineering: Principles, Technology, and Sustainability	4
CIVE 3435	Environmental Pollution: Fate and Transport	4
CIVE 4534 and CIVE 4535	Water Treatment Systems Design and Lab for CIVE 4534	4
CIVE 4765	Senior Design Project—Environmental	5
GE 3300	Energy Systems: Science, Technology, and Sustainability	4
<b>Environmental Engineering Technical Electives</b>		
Complete 15-17 semester hours from the following:		15-17
CIVE 2260 and CIVE 2261	Materials for the Built Environment and Lab for CIVE 2260	
CIVE 2340 and CIVE 2341	Geotechnical Engineering and Lab for CIVE 2340	
CIVE 3335	Environmental Engineering Chemistry and Chemical Technologies	
CIVE 4540	Resource Recovery and Waste Treatment Technologies Abroad	
CIVE 4566	Design for Sustainable Transportation: Netherlands	
CIVE 4575	Construction Management	
CIVE 4777	Climate Hazards and Resilient Cities Abroad	
CIVE 5150	Climate and Atmospheric Change	
CIVE 5250	Organic Pollutants in the Environment	
CIVE 5260	Environmental Fluid Mechanics	

CIVE 5261	Dynamic Modeling for Environmental Investment and Policymaking
CIVE 5271	Solid and Hazardous Waste Management
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure
CIVE 5280	Remote Sensing of the Environment
CIVE 5281	Coastal Dynamics and Design
CIVE 5363	Climate Science, Engineering Adaptation, and Policy
CIVE 5366	Air Quality Engineering and Science
CIVE 5536	Hydrologic and Hydraulic Design
CIVE 5670	Global Biogeochemistry

**Supplemental Credit**

1 semester hour from the following course counts toward the engineering requirement:	1
CIVE 3464	Probability and Engineering Economy for Civil Engineering
3 semester hours from the following course count toward the engineering requirement:	3
CIVE 3430	Engineering Microbiology and Ecology
2 semester hours from the following course count toward the engineering requirement:	2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>
3 semester hours from the following course count toward the engineering requirement:	3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>

**Supporting Courses: Mathematics/Science**

Complete all Mathematics/Science courses with a minimum of 30 semester hours.

Code	Title	Hours
<b>Required Mathematics/Science</b>		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
<b>Science Elective (Earth)</b>		
Complete one of the following:		4-5
ENVR 1120	Oceans and Coasts	
ENVR 1200	Dynamic Earth	
ENVR 2200	Earth's Changing Cycles	
ENVR 3125	Global Oceanic Change	
ENVR 3200	Water Resources	
ENVR 3600	Oceanography	
ENVR 5201	Geologic Field Seminar	

**Supplemental Credit**

3 semester hours from the following course count toward the mathematics/science requirement:	3
CIVE 3464	Probability and Engineering Economy for Civil Engineering
1 semester hour from the following course counts toward the mathematics/science requirement:	1
CIVE 3430	Engineering Microbiology and Ecology
1 semester hour from the following course counts toward the mathematics/science requirement:	1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>

**Professional Development**

Code	Title	Hours
<b>Professional Development</b>		
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1

ENCP 3000	Professional Issues in Engineering	1
-----------	------------------------------------	---

**Additional Required Courses**

1 semester hour from the following course counts toward the professional development requirement:	1
---	---

GE 1501	Cornerstone of Engineering 1 <sup>1</sup>
---------	---

1 semester hour from the following course counts toward the professional development requirement:	1
---	---

GE 1502	Cornerstone of Engineering 2 <sup>1</sup>
---------	---

**Writing Requirements**

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3315	Advanced Writing in the Technical Professions Interdisciplinary Advanced Writing in the Disciplines	4

**Required General Electives**

Code	Title	Hours
Complete 28 SH of academic, nonremedial, nonrepetitive courses.		28

**Major GPA Requirement**

2.000 minimum GPA required in CIVE coursework

**Program Requirement**

132 total semester hours required

<sup>1</sup> Students can substitute Engineering Design (GE 1110) and Engineering Problem Solving and Computation (GE 1111) for Cornerstone of Engineering 1 (GE 1501) and Cornerstone of Engineering 2 (GE 1502) in approved situations.

## Environmental Engineering and Health Science, BSEnE

This intercollege combined major is designed for students who would like to explore their interest in the health sciences while earning the benefit of a Bachelor of Science degree in environmental engineering. The combined major reflects the respective departmental thrusts in environmental health and sustainable resource engineering to create awareness about the complex relationship between the environment and human health, prepare professionals in this growing area capable of providing engineering solutions to current and emerging topics related to environmental engineering and health sciences, and maintain healthy environmental systems by applying and developing techniques to reduce exposure to health hazards. This program combines the content of two majors to allow students to learn the breadth and depth of the convergence between public health and environmental engineering.

Our BS Environmental Engineering and Health Sciences program is ABET accredited. Visit the department website (<https://cee.northeastern.edu/academics/undergraduate-studies/cee-accreditation/>) for program objectives.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

NUPath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUPath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Engineering</b>		
CIVE 2221 and CIVE 2222	Statics and Solid Mechanics and Recitation for CIVE 2221	4
CIVE 2300 and CIVE 2301	Environmental Measurements in Natural and Engineered Systems and Lab for CIVE 2300	4
CIVE 2331	Fluid Mechanics and Hydraulics	4
CIVE 2334	Environmental Engineering: Principles, Technology, and Sustainability	4
CIVE 3435	Environmental Pollution: Fate and Transport	4
CIVE 4534 and CIVE 4535	Water Treatment Systems Design and Lab for CIVE 4534	4
CIVE 4765	Senior Design Project—Environmental	5
GE 3300	Energy Systems: Science, Technology, and Sustainability	4
<b>Technical Electives</b>		
Complete 8-9 semester hours from the following: 8-9		
CIVE 2260 and CIVE 2261	Materials for the Built Environment and Lab for CIVE 2260	
CIVE 2340 and CIVE 2341	Geotechnical Engineering and Lab for CIVE 2340	
CIVE 3335	Environmental Engineering Chemistry and Chemical Technologies	
CIVE 4540	Resource Recovery and Waste Treatment Technologies Abroad	
CIVE 4566	Design for Sustainable Transportation: Netherlands	
CIVE 4777	Climate Hazards and Resilient Cities Abroad	
CIVE 5150	Climate and Atmospheric Change	
CIVE 5250	Organic Pollutants in the Environment	
CIVE 5255	Tools and Techniques of Environmental Health	
CIVE 5260	Environmental Fluid Mechanics	
CIVE 5261	Dynamic Modeling for Environmental Investment and Policymaking	
CIVE 5271	Solid and Hazardous Waste Management	

CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure
CIVE 5280	Remote Sensing of the Environment
CIVE 5281	Coastal Dynamics and Design
CIVE 5363	Climate Science, Engineering Adaptation, and Policy
CIVE 5366	Air Quality Engineering and Science
CIVE 5536	Hydrologic and Hydraulic Design
CIVE 5670	Global Biogeochemistry

**Supplemental Credit**

1 semester hour from the following course counts toward the engineering requirement:	1
CIVE 3464	Probability and Engineering Economy for Civil Engineering
3 semester hours from the following course count toward the engineering requirement:	3
CIVE 3430	Engineering Microbiology and Ecology
2 semester hours from the following course count toward the engineering requirement:	2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>
3 semester hours from the following course count toward the engineering requirement:	3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>

**Health Sciences Major Requirements**

Code	Title	Hours
PHTH 1260 or PHTH 1261	The American Healthcare System Comparative Healthcare Systems	4
PHTH 2210 and PHTH 2211	Foundations of Biostatistics and Recitation for PHTH 2210	4
PHTH 2350 or PHTH 2351	Community and Public Health Community and Public Health - Global	4
PHTH 2414	Environmental Health	4
PHTH 2515	Healthcare Policy and Administration	4
PHTH 4120	Global Perspectives on Discrimination and Health	4
PHTH 4202	Principles of Epidemiology in Medicine and Public Health	4
PHTH 4540	Health Education and Program Planning	4
PHTH 5214 or CIVE 5255	Environmental Health Tools and Techniques of Environmental Health	3-4

**Supporting Courses: Mathematics/Science**

Complete all Mathematics/Science courses with a minimum of 30 semester hours.<sup>2</sup>

Code	Title	Hours
<b>Required Mathematics/Science</b>		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
<b>Science Elective (Earth)</b>		
Complete one of the following:		4-5
ENVR 1120	Oceans and Coasts	
ENVR 1200	Dynamic Earth	
ENVR 2200	Earth's Changing Cycles	
ENVR 3125	Global Oceanic Change	
ENVR 3200	Water Resources	
ENVR 3600	Oceanography	

ENVR 5201	Geologic Field Seminar	
<b>Supplemental Credit</b>		
3 semester hours from the following course count toward the mathematics/science requirement:		3
CIVE 3464	Probability and Engineering Economy for Civil Engineering	
1 semester hour from the following course counts toward the mathematics/science requirement:		1
CIVE 3430	Engineering Microbiology and Ecology	
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	

### Professional Development

Code	Title	Hours
<b>Professional Development</b>		
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1

### Additional Required Courses

1 semester hour from the following course counts toward the professional development requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

### Writing Requirements

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3315	Advanced Writing in the Technical Professions Interdisciplinary Advanced Writing in the Disciplines	4

### Integrative Course

Code	Title	Hours
This course is already required above and also fulfills the integrative requirement.		
CIVE 4765	Senior Design Project—Environmental	

Engineering GPA Requirement

**A minimum 2.000 GPA is required in CIVE coursework**

### Health Sciences Major Requirement

**A minimum grade of C or higher is required for all HLTH and PHTH courses**

### Program Requirement

**132 total semester hours required**

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

<sup>2</sup> Mathematics/Science Requirement: CHEM 1151, MATH 1341, and PHYS 1151 require a grade of C- or higher.

## Environmental Engineering and Landscape Architecture, BSEnVE

Environmental engineering and landscape architecture are two important disciplines that deal with the complex interaction between the natural and the built environment. Both professions have critical functions that are essential in the development of society in terms of planning and designing more sustainable cities. The combination of these two professions creates great synergy and seeks to expose engineering students to the conceptual and practical content of landscape planning. Successful graduates from this degree are prepared to imagine and create projects that can be translated into reality providing solutions to address the world's growing challenges by designing clean and sustainable environments and green infrastructure.

Students completing the combined major Bachelor of Science in Environmental Engineering and Landscape Architecture receive a rigorous engineering training education, enabling a high level of engineering knowledge as well as exposure to a broad range of landscape architectural topics and design experiences.

Students will also have the opportunity to undertake a co-op experience consistent with the policies and opportunities offered within the College of Engineering.

Visit the department website (<https://cee.northeastern.edu/academics/undergraduate-studies/cee-accreditation/>) for program outcomes.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Engineering</b>		
CIVE 2221 and CIVE 2222	Statics and Solid Mechanics and Recitation for CIVE 2221	4
CIVE 2300 and CIVE 2301	Environmental Measurements in Natural and Engineered Systems and Lab for CIVE 2300	4
CIVE 2331	Fluid Mechanics and Hydraulics	4
CIVE 2334	Environmental Engineering: Principles, Technology, and Sustainability	4
CIVE 3435	Environmental Pollution: Fate and Transport	4
CIVE 4534 and CIVE 4535	Water Treatment Systems Design and Lab for CIVE 4534	4
GE 3300	Energy Systems: Science, Technology, and Sustainability	4
<b>Senior Design Project</b>		
CIVE 4765	Senior Design Project—Environmental	5
<b>Environmental Engineering Technical Elective<sup>1</sup></b>		
Complete 7-9 semester hours from the following:		7-9
CIVE 2260 and CIVE 2261	Materials for the Built Environment and Lab for CIVE 2260	
CIVE 2340 and CIVE 2341	Geotechnical Engineering and Lab for CIVE 2340	
CIVE 3335	Environmental Engineering Chemistry and Chemical Technologies	
CIVE 4540	Resource Recovery and Waste Treatment Technologies Abroad	
CIVE 4566	Design for Sustainable Transportation: Netherlands	
CIVE 4575	Construction Management	
CIVE 4777	Climate Hazards and Resilient Cities Abroad	
CIVE 5150	Climate and Atmospheric Change	

1050 Environmental Engineering and Landscape Architecture, BSEnVE

CIVE 5250	Organic Pollutants in the Environment
CIVE 5260	Environmental Fluid Mechanics
CIVE 5261	Dynamic Modeling for Environmental Investment and Policymaking
CIVE 5271	Solid and Hazardous Waste Management
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure
CIVE 5280	Remote Sensing of the Environment
CIVE 5281	Coastal Dynamics and Design
CIVE 5363	Climate Science, Engineering Adaptation, and Policy
CIVE 5366	Air Quality Engineering and Science
CIVE 5536	Hydrologic and Hydraulic Design
CIVE 5670	Global Biogeochemistry

**Supplemental Credit**

1 semester hour from the following course counts toward the engineering requirement:	1
CIVE 3464	Probability and Engineering Economy for Civil Engineering
3 semester hours from the following course count toward the engineering requirement:	3
CIVE 3430	Engineering Microbiology and Ecology
2 semester hours from the following course count toward the engineering requirement:	2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>
3 semester hours from the following course count toward the engineering requirement:	3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>

**Landscape Architecture Requirements**

Code	Title	Hours
ARCH 1110	Fundamental Architectural Representation	4
ARCH 1120	Fundamental Architectural Design	6
ARCH 1310 and ARCH 1311	Buildings and Cities, A Global History and Recitation for ARCH 1310	4
ARCH 2340 and ARCH 2341	Modern Architecture and Recitation for ARCH 2340	4
LARC 2230	Introduction to Sustainable Site Planning and Design	4
LARC 2240	Sustainable Site Construction and Detailing	4
LARC 2430	Plants, People, and Landscape Change	4
LARC 2440	Planting Design	4
LARC 5420 or LARC 2340	Professional Practice in Landscape Architecture Cities, Landscape, and Contemporary Culture	4

**Supporting Courses: Mathematics/Science**

Complete all Mathematics/Science courses with a minimum of 30 semester hours.

Code	Title	Hours
<b>Required Mathematics/Science</b>		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
Complete one of the following:		5
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	
PHYS 1161 and PHYS 1162 and PHYS 1163	Physics 1 and Lab for PHYS 1161 and Recitation for PHYS 1161	

**Science Elective (Earth)**

Complete one of the following:

ENVR 1120	Oceans and Coasts
ENVR 1200	Dynamic Earth
ENVR 2200	Earth's Changing Cycles
ENVR 3125	Global Oceanic Change
ENVR 3200	Water Resources
ENVR 3600	Oceanography
ENVR 5201	Geologic Field Seminar

**Supplemental Credit**

3 semester hours from the following course count toward the mathematics/science requirement:	3
CIVE 3464	Probability and Engineering Economy for Civil Engineering
1 semester hour from the following course counts toward the mathematics/science requirement:	1
CIVE 3430	Engineering Microbiology and Ecology
1 semester hour from the following course counts toward the mathematics/science requirement:	1
GE 1501	Cornerstone of Engineering 1 <sup>2</sup>

**Professional Development**

Code	Title	Hours
<b>Professional Development</b>		
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1

**Additional Required Courses**

1 semester hour from the following course counts toward the professional development requirement:	1
GE 1501	Cornerstone of Engineering 1 <sup>2</sup>
1 semester hour from the following course counts toward the professional development requirement:	1
GE 1502	Cornerstone of Engineering 2 <sup>2</sup>

**Writing Requirements**

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3315	Advanced Writing in the Technical Professions Interdisciplinary Advanced Writing in the Disciplines	4

**Integrative Courses**

Code	Title	Hours
This course is already required above and also fulfills the integrative requirement.		
CIVE 4765	Senior Design Project—Environmental	

**Engineering GPA Requirement**

Minimum 2.000 GPA required in all CIVE coursework

**Landscape Architecture GPA Requirement**

Minimum 2.500 GPA required in all major courses

**Program Requirement**

134 total semester hours required

<sup>1</sup> Students can substitute one Environmental Tech. Elective for Sustainable Urban Site Design (LARC 2130) in approved situations.

<sup>2</sup> Students can substitute Engineering Design (GE 1110) and Engineering Problem Solving and Computation (GE 1111) for Cornerstone of Engineering 1 (GE 1501) and Cornerstone of Engineering 2 (GE 1502) in approved situations.

## Architectural Engineering, Minor

Architectural engineering is a field of engineering that encompasses elements of civil engineering, mechanical engineering, architecture, and related fields to plan, design, and create buildings within the urban environment. It includes the architectural and structural design, mechanical systems design, computational controls and sensing, and sustainable engineering strategies.

The Department of Civil and Environmental Engineering recognizes the importance of interdisciplinary work and of exposing students to the great richness in a classroom of diverse students from multiple majors bringing their own perspectives. The prospect of engineering students in architecture classes and vice versa stands to benefit all the students, whether or not they are enrolled in the minor.

The minor in architectural engineering opens opportunities for students across the university who are interested in a unique and multidisciplinary approach to the built environment. For engineering students, this minor offers an opportunity to work in the built environment and to better understand architecture, while for architecture students this is an opportunity to acquire the technical knowledge of a course of study in an engineering minor.

A total of 20 semester hours (SH) are required to complete this minor. Students will be required to complete 8 SH of required courses and 12 SH of approved elective courses from several colleges and departments at the university. Students interested in this minor must contact the civil engineering academic advisor in order to declare the minor.

This minor in architectural engineering is designed for any major and is open to any undergraduate student at the university.

Students may double count no more than two courses with any major or graduate degree requirement, other than general electives.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs and recitations courses where specified.

### Required Courses

Code	Title	Hours
CIVE 2221 and CIVE 2222	Statics and Solid Mechanics and Recitation for CIVE 2221	4
ARCH 3210 and ARCH 3211	Environmental Systems and Recitation for ARCH 3210	4

### Electives

#### ARCHITECTURE ELECTIVES

Code	Title	Hours
Complete one of the following:		
ARCH 2240	Architectonic Systems	4
ARCH 2330 and ARCH 2331	Architecture and the City in the Nineteenth Century and Recitation for ARCH 2330	
ARCH 2340 and ARCH 2341	Modern Architecture and Recitation for ARCH 2340	
ARCH 5220	Integrated Building Systems	
LARC 2230	Introduction to Sustainable Site Planning and Design	
LARC 2240	Sustainable Site Construction and Detailing	

#### ENGINEERING ELECTIVES

Code	Title	Hours
Complete one or two of the following:		
CIVE 2320 and CIVE 2321	Structural Analysis and Recitation for CIVE 2320	8
CIVE 2324	Concrete Structure Design	
CIVE 3425	Steel Structure Design	
CIVE 5281	Coastal Dynamics and Design	
CIVE 5363	Climate Science, Engineering Adaptation, and Policy	
CIVE 5520	Structural Systems	
CIVE 5522	Structural Systems Modeling	
CIVE 5699	Special Topics in Civil Engineering (Vibration-based Structural Health Monitoring)	
SBSY 5100	Sustainable Design and Technologies in Construction	
SBSY 5200	Sustainable Engineering Systems for Buildings	
SBSY 5250	Building Performance Simulation	

SBSY 5300	Information Systems for Integrated Project Delivery
-----------	---

If only one course was taken above, complete one course from the following:

GE 3300	Energy Systems: Science, Technology, and Sustainability
---------	---

CIVE 2340 and CIVE 2341	Geotechnical Engineering and Lab for CIVE 2340
----------------------------	---

CIVE 4542	Foundation Engineering and Design
-----------	-----------------------------------

CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure
-----------	--

### **GPA Requirement**

2.000 GPA required in the minor

## Civil Engineering, Minor

The minor in civil engineering opens opportunities for students across the university who are interested in gaining knowledge in urban engineering through the core disciplines within the Department of Civil and Environmental Engineering.

A total of 16 semester hours are required to complete this minor. Students interested in this minor must contact the civil and environmental engineering academic advisor in order to declare the minor. This minor is not open to civil engineering or environmental engineering majors.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs and recitations courses where specified.

### Required Courses

Code	Title	Hours
Choose four courses from the following list:		16
CIVE 2221	Statics and Solid Mechanics	
CIVE 2260 and CIVE 2261	Materials for the Built Environment and Lab for CIVE 2260	
CIVE 2320	Structural Analysis	
CIVE 2324	Concrete Structure Design	
CIVE 2331	Fluid Mechanics and Hydraulics	
CIVE 2334	Environmental Engineering: Principles, Technology, and Sustainability	
CIVE 2335	Environmental Engineering Chemistry	
CIVE 2340 and CIVE 2341	Geotechnical Engineering and Lab for CIVE 2340	
CIVE 3425	Steel Structure Design	
CIVE 3430	Engineering Microbiology and Ecology	
CIVE 3435	Environmental Pollution: Fate and Transport	
CIVE 3464	Probability and Engineering Economy for Civil Engineering	
CIVE 4534	Water Treatment Systems Design	
CIVE 4540	Resource Recovery and Waste Treatment Technologies Abroad	
CIVE 4542	Foundation Engineering and Design	
CIVE 4554	Highway Design	
CIVE 4566	Design for Sustainable Transportation: Netherlands	
CIVE 4575	Construction Management	
CIVE 4777	Climate Hazards and Resilient Cities Abroad	
CIVE 4780	Timber and Masonry Structures: Technology and Design Abroad	
CIVE 5271	Solid and Hazardous Waste Management	
CIVE 5221 and CIVE 5231	Construction Project Control and Organization and Alternative Project Delivery Systems in Construction	
CIVE 5260	Environmental Fluid Mechanics	
CIVE 5261	Dynamic Modeling for Environmental Investment and Policymaking	
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
CIVE 5280	Remote Sensing of the Environment	
CIVE 5281	Coastal Dynamics and Design	
CIVE 5300 and CIVE 5301	Environmental Sampling and Analysis and Lab for CIVE 5300	
CIVE 5363	Climate Science, Engineering Adaptation, and Policy	
CIVE 5373	Transportation Systems: Analysis and Planning	
CIVE 5376	Traffic Engineering and Sustainable Urban Street Design	
CIVE 5520	Structural Systems	
CIVE 5522	Structural Systems Modeling	
CIVE 5536	Hydrologic and Hydraulic Design	
CIVE 5699	Special Topics in Civil Engineering (Vibration-based Structural Health Monitoring)	
SBSY 5100	Sustainable Design and Technologies in Construction	
SBSY 5200	Sustainable Engineering Systems for Buildings	

SBSY 5250

Building Performance Simulation

SBSY 5300

Information Systems for Integrated Project Delivery

**GPA Requirement**

2.000 GPA required in the minor

## Environmental Chemistry, Minor

The minor in environmental chemistry offers an opportunity for students of any background interested in environmental sciences to better understand the chemistry of the environment. Students completing the minor in environmental chemistry have an opportunity to learn about the chemical processes of natural systems and environmental pollutants, while earning a credential that highlights their interest and expertise. This can be a useful course of study whether their primary degree and career will be in one of the traditional chemical, environmental, or engineering programs, or another allied field. No more than two courses (totaling 8 SH to 10 SH) may double count with any major degree requirements.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

*Note:* No more than two courses (totaling 8 SH to 10 SH) may double count with any major degree requirements.

### Required Courses

Code	Title	Hours
<b>Environmental Chemistry Core</b>		
Complete one of the following:		4
CIVE 2335	Environmental Engineering Chemistry	
ENVR 3410	Environmental Geochemistry	
<b>Chemistry Core</b>		
Complete one of the following:		5
CHEM 2321 and CHEM 2322 and CHEM 2323	Analytical Chemistry and Lab for CHEM 2321 and Recitation for CHEM 2321	
CHEM 3331 and CHEM 3332	Bioanalytical Chemistry and Lab for CHEM 3331	
<b>Research Experience</b>		
Complete one of the following:		4
CHEM 4750	Senior Research	
CHEM 4901	Undergraduate Research	
CHEM 4992	Directed Study	
CIVE 4991	Research	
CIVE 4992	Directed Study	
ENVR 4900 or ENVR 4997	Earth and Environmental Science Capstone Senior Thesis	
ENVR 4992	Directed Study	

### Electives

Code	Title	Hours
Complete two of the following:		8-9
CIVE 2335	Environmental Engineering Chemistry (If not used to satisfy Environmental Chemistry Core)	
CIVE 3435	Environmental Pollution: Fate and Transport	
CIVE 5300 and CIVE 5301	Environmental Sampling and Analysis and Lab for CIVE 5300	
ENVR 3125	Global Oceanic Change	
ENVR 3410	Environmental Geochemistry (If not used to satisfy Environmental Chemistry Core)	
ENVR 4500 and ENVR 4501	Applied Hydrogeology and Lab for ENVR 4500	
ENVR 4504	Environmental Pollution	
ENVR 4505	Wetlands	
ENVR 5190	Soil Science	

### GPA Requirement

Minimum 2.000 GPA required in all major courses

**Credit Requirement**

Minimum of 21 hours required

## Environmental Engineering, Minor

### Overview

The minor in environmental engineering opens opportunities for students across the university who are interested in gaining knowledge in issues related to the environment and associated engineering solutions as presented through courses from the Department of Civil and Environmental Engineering.

A total of 16 semester hours is required to complete this minor. Students interested in this minor must contact the civil and environmental engineering academic advisor in order to declare the minor. This minor is open to engineering and nonengineering students, except for civil engineering or environmental engineering majors.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs and recitations courses where specified.

### Required Course

Code	Title	Hours
CIVE 2334	Environmental Engineering: Principles, Technology, and Sustainability	4

### Electives

Code	Title	Hours
Complete 12 semester hours from the following:		12
CIVE 2300 and CIVE 2301	Environmental Measurements in Natural and Engineered Systems and Lab for CIVE 2300	
CIVE 2331	Fluid Mechanics and Hydraulics	
CIVE 2335	Environmental Engineering Chemistry	
CIVE 3430	Engineering Microbiology and Ecology	
CIVE 3435	Environmental Pollution: Fate and Transport	
CIVE 4534 and CIVE 4535	Water Treatment Systems Design and Lab for CIVE 4534	
CIVE 4540	Resource Recovery and Waste Treatment Technologies Abroad	
CIVE 4777	Climate Hazards and Resilient Cities Abroad	
CIVE 5150	Climate and Atmospheric Change	
CIVE 5250	Organic Pollutants in the Environment	
CIVE 5260	Environmental Fluid Mechanics	
CIVE 5261	Dynamic Modeling for Environmental Investment and Policymaking	
CIVE 5271	Solid and Hazardous Waste Management	
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
CIVE 5280	Remote Sensing of the Environment	
CIVE 5281	Coastal Dynamics and Design	
CIVE 5363	Climate Science, Engineering Adaptation, and Policy	
CIVE 5366	Air Quality Engineering and Science	
CIVE 5536	Hydrologic and Hydraulic Design	
GE 3300	Energy Systems: Science, Technology, and Sustainability	

### GPA Requirement

2.000 GPA required in CIVE and GE courses

617.373.7529

617.373.4431 (fax)

Electrical and computer engineering is a discipline that prepares graduates to solve problems across a diverse array of industries. Coursework is drawn from a curriculum that includes cutting-edge ECE technologies: embedded systems and Internet of Things, robotics and cyber-human systems, networking (mobile/wireless as well as the internet of the future), and Big Data analytics and machine learning. Northeastern University's historical strengths in ECE include communications and digital signal processing, power and control systems, power electronics, RF/microwave magnetic materials, device technologies, computer engineering, networking, and robotics. The Department of Electrical and Computer Engineering is deeply committed to training and educating the next generation of electrical and computer engineers through Northeastern's experiential learning model and comprehensive pedagogy. BS, MS, and PhD degrees are offered in both electrical and computer engineering.

### Overview of Programs Offered

Please see the programs tab (p. 1061) for a list of the department's academic programs.

Successful engineers need to organize and adapt information to solve problems. They also must work effectively in teams and communicate well. Therefore, the goal of the electrical engineering and computer engineering programs is to help students develop these skills and provide the appropriate technical background for a successful career.

The curricula are continuously assessed to ensure that graduates can achieve these goals and go on to succeed as professional electrical or computer engineers. The Bachelor of Science programs allow students sufficient flexibility within the standard eight academic semesters to earn a minor in nearly any department in the university. Typical minors might include physics, math, computer science, or business, but students might also organize their course of study to earn a minor in economics, English, or music.

The academic program is supported by extensive laboratory facilities for study and experimentation in computing, circuit analysis, electronics, digital systems, microwaves, control systems, semiconductor processing, very large-scale integration (VLSI) design, and digital signal processing. Students have access to state-of-the-art computing facilities, including numerous Linux and Windows-based workstations. Several introductory electrical and computer engineering courses meet in integrated lab-classrooms where students and professors, assisted by undergraduate and graduate teaching assistants, work together on both theoretical and practical aspects of a wide range of signal processing and computing systems.

### Mission of the Department

The primary educational missions of the Department of Electrical and Computer Engineering are to educate undergraduate students so they have the opportunity to obtain successful careers in electrical and computer engineering and related disciplines and pursue advanced study, such as graduate study in engineering or related disciplines, and to educate graduate students so they can make meaningful contributions to the research and industrial communities.

### Other Programmatic Features

More than 90% of department undergraduates take advantage of the cooperative education program. During the cooperative education phase of the program, the students' responsibilities grow as they gain theoretical and technical knowledge through applicable work experience. A second-year student might begin cooperative education experience in engineering from various entry points and progress by the senior year to a position with responsibilities similar to those of entry to midlevel engineers.

The department also offers significant research opportunities throughout all fields of electrical and computer engineering, including participating in research centers based in our department and college.

A senior-year design course caps the education by drawing on everything learned previously. Teams of students propose, design, and build a functioning electrical or computer engineering system—just as they might in actual practice.

### Programs

#### Bachelor of Science in Computer Engineering (BSCmpE)

- Computer Engineering (p. 1063)
- Computer Engineering and Computer Science (p. 742)
- Computer Engineering and Physics (p. 1069)

### **Bachelor of Science in Electrical Engineering (BSEE)**

- Electrical Engineering (p. 1082)
- Electrical Engineering and Music with Concentration in Music Technology (p. 485)
- Electrical Engineering and Physics (p. 1088)

### **Combined Major (BSEE or BSCmpE)**

- Electrical and Computer Engineering (p. 1099)

### **Minors**

- Biomedical Engineering (p. 1104)
- Computational Data Analytics (p. 1107)
- Computer Engineering (p. 1106)
- Electrical Engineering (p. 1108)
- Robotics (p. 1109)

### **Accelerated Programs**

See Accelerated Bachelor/Graduate Degree Programs (p. )

## Computer Engineering, BSCmpE

The use of computer technology is exploding, driven by applications in wireless communications, multimedia, portable devices, and internet computing. At the core of these technological advances are computer engineers who research, design, and develop hardware and software. With a degree in computer engineering you might develop a full-featured multimedia phone, design the next-generation microprocessor, program computer-guided cameras to inspect nanomanufacturing facilities, or start your own software company.

The computer engineering major acquires a strong foundation in engineering principles and the physical sciences in addition to a powerful mix of theory and practice in hardware and software design. The core of the computer engineering curriculum comprises courses in computer organization and architecture, computer networks, computer-aided design, programming languages, optimization theory, and software design.

The BSCmpE degree requires a sequence of core courses, technical electives, general electives, and electives in the arts and humanities and social sciences.

Visit the department website (<https://ece.northeastern.edu/academics/undergraduate-studies/ece-accreditation/>) for program educational objectives.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Courses</b>		
EECE 2140	Computing Fundamentals for Engineers	4
EECE 2150	Circuits and Signals: Biomedical Applications	5
EECE 2160	Embedded Design: Enabling Robotics	4
<b>Computer Engineering Fundamentals</b>		
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	5
EECE 2540	Fundamentals of Networks	4
EECE 2560	Fundamentals of Engineering Algorithms	4
<b>Electrical Engineering Fundamentals</b>		
If more than one electrical engineering fundamentals course is taken, it can count as a technical elective.		
Complete one of the following:		4-5
EECE 2412 and EECE 2413	Fundamentals of Electronics and Lab for EECE 2412	
EECE 2520	Fundamentals of Linear Systems	
EECE 2530 and EECE 2531	Fundamentals of Electromagnetics and Lab for EECE 2530	
<b>Computer Engineering Capstone Courses</b>		
EECE 4791	Electrical and Computer Engineering Capstone 1	1
EECE 4792	Electrical and Computer Engineering Capstone 2	4

### EECE Technical Electives

Students can register for EECE 4991/EECE 4992/EECE 4993 more than once. For these courses combined, a maximum of 8 semester hours will be allowed to satisfy the requirement of technical electives. An additional 4 semester hours will be allowed as a general elective. At most, one of these courses (4 semester hours) can be taken in a semester.

Though students may register for EECE 2750 more than once, only 4 semester hours will be allowed to satisfy the requirements of technical electives. An additional 4 semester hours will be allowed as a general elective.

Complete four of the following:

EECE 2412 to EECE 2530	
EECE 2750	Enabling Engineering
EECE 3324 to EECE 4698	
EECE 4991	Research
EECE 4992	Directed Study
EECE 4993	Independent Study
EECE 5115 to EECE 5698	

Two CS/CY/IS courses from the following approved list may be taken toward the EECE technical elective requirement:

CS 3200	Database Design
CS 3500	Object-Oriented Design
CS 3540 to CS 3800	
CS 4100 to CS 4770	
CS 4850	Building Game Engines
CS 5100	Foundations of Artificial Intelligence
CS 5200	Database Management Systems
CS 5310	Computer Graphics
CS 5400	Principles of Programming Language
CS 5500	Foundations of Software Engineering
CS 5520	Mobile Application Development
CS 5600	Computer Systems
CS 5610	Web Development
CS 5700	Fundamentals of Computer Networking
CY 2550	Foundations of Cybersecurity
IS 4200 to IS 4700	

#### Supplemental Credit

2 semester hours from the following course count toward the engineering requirement:	2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>
3 semester hours from the following course count toward the engineering requirement:	3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>

### Supporting Courses: Mathematics/Science Requirement

Complete all mathematics/science courses with a minimum of 30 semester hours.

Code	Title	Hours
<b>Required Mathematics/Science</b>		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 3081	Probability and Statistics	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	5
<b>Supplemental Credit</b>		
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	

## Professional Development

Code	Title	Hours
<b>Required Professional Development</b>		
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1
<b>Additional Required Courses</b>		
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

## Writing Requirements

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

## Required General Electives

Code	Title	Hours
Complete 28 semester hours of academic, nonremedial, nonrepetitive courses.		28

## Major GPA Requirement

2.000 minimum GPA required in EECE courses

## Program Requirement

133 total semester hours required

<sup>1</sup> Students can substitute Engineering Design (GE 1110) and Engineering Problem Solving and Computation (GE 1111) for Cornerstone of Engineering 1 (GE 1501) and Cornerstone of Engineering 2 (GE 1502) in approved situations.

## Plan of Study

<sup>1</sup> Computing Fundamentals for Engineers (EECE 2140) can be taken in year 1 spring instead of a general elective by students who are interested in the course in preparation for co-ops involving programming and computing hardware.

<sup>2</sup> The capstone design courses are taken as follows: Electrical and Computer Engineering Capstone 1 (EECE 4791) in Summer 1 and Electrical and Computer Engineering Capstone 2 (EECE 4792) in Spring or Electrical and Computer Engineering Capstone 1 (EECE 4791) in Summer 2 and Electrical and Computer Engineering Capstone 2 (EECE 4792) in Fall.

## Computer Engineering and Physics, BSCmpE

This intercollege combined major serves students who would like to explore their interest in physics while earning the benefit of an accredited Bachelor of Science in Computer Engineering degree. The combined major integrates study within the College of Engineering's Department of Electrical and Computer Engineering with study within the College of Science's Department of Physics.

Because of the large body of shared knowledge between computer engineering and physics, an integrated combined major between these two disciplines is a logical course of study and can be accomplished within either a four-year plan of study or a five-year plan of study (including three co-op placements in the latter), without requiring course overloads in any semester. A student graduating from this program will have studied both physics fundamentals and computer systems.

Students interested in this program should contact the Department of Electrical and Computer Engineering or the Department of Physics as early as possible, preferably prior to registering for first-year courses.

Visit the department website (<https://ece.northeastern.edu/academics/undergraduate-studies/ece-accreditation/>) for program objectives.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Courses</b>		
EECE 2140	Computing Fundamentals for Engineers	4
EECE 2150	Circuits and Signals: Biomedical Applications	5
EECE 2160	Embedded Design: Enabling Robotics	4
<b>Computer Engineering Fundamentals</b>		
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	5
EECE 2540	Fundamentals of Networks	4
EECE 2560	Fundamentals of Engineering Algorithms	4
<b>Electrical Engineering Fundamentals</b>		
If more than one electrical engineering fundamentals course is taken, it can count as a technical elective.		
Complete one of the following:		4
EECE 2412 and EECE 2413	Fundamentals of Electronics and Lab for EECE 2412	
EECE 2520	Fundamentals of Linear Systems	
EECE 2530 and EECE 2531	Fundamentals of Electromagnetics and Lab for EECE 2530	
<b>Computer Engineering Capstone Courses</b>		
EECE 4791	Electrical and Computer Engineering Capstone 1	1
EECE 4792	Electrical and Computer Engineering Capstone 2	4

### Technical Electives

Students can register for EECE 4991/EECE 4992/EECE 4993 more than once. For these courses combined, a maximum of 8 semester hours will be allowed to satisfy the requirement of technical electives. An additional 4 semester hours will be allowed as a general elective. At most, one of these courses (4 semester hours) can be taken in a semester.

Though students may register for EECE 2750 more than once, only 4 semester hours will be allowed to satisfy the requirements of technical electives. An additional 4 semester hours will be allowed as a general elective.

Complete two of the following:

1070 Computer Engineering and Physics, BSCmpE

EECE 2412 to EECE 2530	
EECE 2750	Enabling Engineering
EECE 3324 to EECE 4698	
EECE 4991	Research
EECE 4992	Directed Study
EECE 4993	Independent Study
EECE 5115 to EECE 5698	

One CS/CY/IS course from the following approved list may be taken toward the EECE technical elective requirement:

CS 3200	Database Design
CS 3500	Object-Oriented Design
CS 3540 to CS 3800	
CS 4100 to CS 4770	
CS 4850	Building Game Engines
CS 5100	Foundations of Artificial Intelligence
CS 5200	Database Management Systems
CS 5310	Computer Graphics
CS 5400	Principles of Programming Language
CS 5500	Foundations of Software Engineering
CS 5520	Mobile Application Development
CS 5600	Computer Systems
CS 5610	Web Development
CS 5700	Fundamentals of Computer Networking
CY 2550	Foundations of Cybersecurity
IS 4200 to IS 4700	

**Supplemental Credit**

2 semester hours from the following course count toward the engineering requirement:	2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>
3 semester hours from the following course count toward the engineering requirement:	3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>

**Mathematics/Science**

Code	Title	Hours
<b>Required Mathematics/Science</b>		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5

Complete one of the following:		5
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	

PHYS 1165 and PHYS 1166 and PHYS 1167	Physics 2 and Lab for PHYS 1165 and Recitation for PHYS 1165	
PHYS 2303	Modern Physics	4
PHYS 3600	Advanced Physics Laboratory	4
PHYS 3602	Electricity and Magnetism 1	4
PHYS 4115	Quantum Mechanics	4
PHYS 4305	Thermodynamics and Statistical Mechanics	4
<b>Advanced Physics Elective</b>		
Complete one of the following:		4
MATH 4606	Mathematical and Computational Methods for Physics	
PHYS 3600 to PHYS 7999		
<b>Supplemental Credit</b>		
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	

## Professional Development

Code	Title	Hours
<b>Required Professional Development</b>		
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1
GE 1000	First-Year Seminar	1
<b>Additional Required Courses</b>		
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

## Writing Requirements

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3315	Advanced Writing in the Technical Professions Interdisciplinary Advanced Writing in the Disciplines	4

## Required General Electives

Code	Title	Hours
Complete 8 semester hours of academic, nonremedial, nonrepetitive courses.		8

## Integrative Requirement

Code	Title	Hours
This course is already required above and also fulfills the integrative requirement:		
EECE 4791	Electrical and Computer Engineering Capstone 1	1

## Major GPA Requirement

A 2.000 minimum GPA is required in EECE courses.

## Program Requirement

133 total semester hours required

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

**Plan of Study****Sample Plans of Study****FOUR YEARS, ONE CO-OP IN SPRING/SUMMER 1**

- <sup>2</sup> The capstone design courses are taken as follows:
- Electrical and Computer Engineering Capstone 1 (EECE 4791) in summer 1 and Electrical and Computer Engineering Capstone 2 (EECE 4792) in spring OR
  - Electrical and Computer Engineering Capstone 1 (EECE 4791) in summer 2 and Electrical and Computer Engineering Capstone 2 (EECE 4792) in fall

Physics courses are offered on the following schedule:

- PHYS 2303 offered every fall, spring, and summer 2
- PHYS 2371/2372 offered every fall
- PHYS 3600 offered every summer 1 and summer 2
- PHYS 3601 offered spring and fall (even years)
- PHYS 3602 offered every fall and spring
- PHYS 3603 offered fall (even years) and summer 1 (odd years)
- PHYS 4115 offered every fall and spring
- PHYS 4305 offered spring and summer 2 (even years)

1074 Computer Engineering and Physics, BSCmpE

- PHYS 4621 offered spring (odd years) and fall (even years)
- PHYS 4623 offered summer 1 and fall (even years)
- PHYS 4651 offered spring and fall (odd years)
- PHYS 4652 offered every spring
- PHYS 5318 offered every spring

## Computer Engineering and Computer Science, BSCmpE

This intercollege dual major serves students who are interested in both computer hardware and software, combining an accredited Bachelor of Science degree in engineering with the added benefits of depth in software principles found in a Bachelor of Science degree in computer science. This program provides a well-rounded computing education that includes engineering design principles, computational thinking, proper program design, and a solid background in mathematics and science. The degree is fully accredited as a Bachelor of Science in Computer Engineering and adds the computer science depth.

Because of the large body of shared knowledge between computer engineering and computer science, an integrated dual major between these two disciplines is a logical course of study and can be accomplished within a student's usual five-year program (including three co-op placements) without requiring course overloading in any semester. A student graduating from this program will have a solid foundation in both computer hardware and software principles, and should be prepared for a wide range of career paths in the computing field or any related field that relies on the application of engineering or computing principles.

Students interested in this program should contact the Department of Electrical and Computer Engineering or the Department of Computer and Information Science as early as possible, preferably prior to registering for first-year courses.

Visit the department website (<https://ece.northeastern.edu/academics/undergraduate-studies/ece-accreditation/>) for educational objectives.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Courses</b>		
EECE 2140	Computing Fundamentals for Engineers	4
EECE 2150	Circuits and Signals: Biomedical Applications	5
EECE 2160	Embedded Design: Enabling Robotics	4
<b>Computer Engineering Fundamentals</b>		
CS 3000	Algorithms and Data	4
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	5
EECE 2540	Fundamentals of Networks	4
<b>Electrical Engineering Fundamentals</b>		
Complete one of the following:		4
EECE 2412 and EECE 2413	Fundamentals of Electronics and Lab for EECE 2412	
EECE 2520	Fundamentals of Linear Systems	
EECE 2530 and EECE 2531	Fundamentals of Electromagnetics and Lab for EECE 2530	
<b>Computer Engineering Capstone Courses</b>		
EECE 4791	Electrical and Computer Engineering Capstone 1	1
EECE 4792	Electrical and Computer Engineering Capstone 2	4

### EECE Technical Electives

Students can register for EECE 4991 / EECE 4992 / EECE 4993 more than once. For these courses combined, a maximum of 8 semester hours will be allowed to satisfy the requirement of technical electives. An additional 4 semester hours will be allowed as a general elective. At most one of these courses (4 semester hours) can be taken in a semester.

Though students may register for EECE 2750 more than once, only 4 semester hours will be allowed to satisfy the requirements of technical electives. An additional 4 semester hours will be allowed as a general elective.

Complete two of the following:	8
EECE 2412 to EECE 2530	
EECE 2750	Enabling Engineering
EECE 3324 to EECE 4698	
EECE 4991	Research
EECE 4992	Directed Study
EECE 4993	Independent Study
EECE 5115 to EECE 5698	
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage

#### Khoury Elective Courses

With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.

Complete 8 semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges: 8

CS 2500 or higher, except CS 5010	
CY 2000 or higher, except CY 4930	
DS 2500 or higher, except DS 4900	
IS 2000 or higher, except IS 4900	

#### Supplemental Credit

2 semester hours from the following course count toward the engineering requirement:	2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>
3 semester hours from the following course count toward the engineering requirement:	3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>

### Computer Science Requirements

Code	Title	Hours
<b>Computer Science Introductory Courses</b>		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
CS 2800	Logic and Computation	4
<b>Computer Science Upper-Level Courses</b>		
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 3650	Computer Systems	4
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4

### Supporting Courses: Mathematics/Science

Complete all Mathematics/Science courses with a minimum of 30 semester hours.

Code	Title	Hours
<b>Required Mathematics/Science</b>		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 3081	Probability and Statistics	4

PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	5
<b>Supplemental Credit</b>		
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	

## Professional Development

Code	Title	Hours
<b>Required Professional Development</b>		
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1
<b>Additional Required Courses</b>		
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

## Writing Requirements

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3315	Advanced Writing in the Technical Professions Interdisciplinary Advanced Writing in the Disciplines	4

## Required General Electives

Code	Title	Hours
Complete 8 SH of academic, nonremedial, nonrepetitive courses.		8

## Integrative Courses

Code	Title	Hours
The following courses are already required above and also fulfill the integrative requirement.		
CS 1800	Discrete Structures	
EECE 4791	Electrical and Computer Engineering Capstone 1	
EECE 4792	Electrical and Computer Engineering Capstone 2	
MATH 1341	Calculus 1 for Science and Engineering	
MATH 1342	Calculus 2 for Science and Engineering	
MATH 3081	Probability and Statistics	
PHYS 1151 and PHYS 1152	Physics for Engineering 1 and Lab for PHYS 1151	

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

## Major GPA Requirement

2.000 minimum GPA in EECE courses

2.000 minimum GPA required in all CS, CY, DS, and IS courses

## Program Requirement

140 total semester hours required

<sup>2</sup> The capstone design courses are taken as follows:

- Electrical and Computer Engineering Capstone 1 (EECE 4791) in Summer 1 and Electrical and Computer Engineering Capstone 2 (EECE 4792) in Spring, or...
- ... Electrical and Computer Engineering Capstone 1 (EECE 4791) in Summer 2 and Electrical and Computer Engineering Capstone 2 (EECE 4792) in Fall.

## Electrical Engineering, BSEE

The components of the Information Age—global communication systems; computers and computer chips, and the software that runs them; as well as pacemakers, magnetic resonance imaging, and interplanetary space missions—are possible because of the efforts of electrical engineers. Today, electrical engineers are developing concepts and working to translate these ideas into the next generation of products, from computers and safe, energy-efficient vehicles, to radar that can detect unexploded land mines from the air, to microrobots that diagnose disease from inside the body.

Many electrical engineers work in the traditional areas of communications, computation, and control and components required to realize such systems. They are involved in design and product development, testing and quality control, sales and marketing, and manufacturing. Others use their problem-solving skills in diverse areas such as bioengineering, healthcare, electronic music, meteorology, and experimental psychology. Some graduates draw on their electrical engineering backgrounds to launch successful careers as physicians, financial analysts, attorneys, and entrepreneurs.

The BSEE degree requires a sequence of core courses and advanced study in one or more technical elective areas: electronic circuits and devices; signals and systems; fields, waves, and optics; power engineering; or computer engineering. General electives and electives in the arts and humanities and social sciences are also required.

Visit the department website (<https://ece.northeastern.edu/academics/undergraduate-studies/ece-accreditation/>) for educational program objectives.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Courses</b>		
EECE 2140	Computing Fundamentals for Engineers	4
EECE 2150	Circuits and Signals: Biomedical Applications	5
EECE 2160	Embedded Design: Enabling Robotics	4
<b>Electrical Engineering Fundamentals</b>		
EECE 2412 and EECE 2413	Fundamentals of Electronics and Lab for EECE 2412	5
EECE 2520	Fundamentals of Linear Systems	4
EECE 2530 and EECE 2531	Fundamentals of Electromagnetics and Lab for EECE 2530	5
<b>Computer Engineering Fundamentals</b>		
If more than one computer engineering fundamentals course is taken, it can count as a technical elective.		
Complete one of the following:		4-5
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	
EECE 2540	Fundamentals of Networks	
EECE 2560	Fundamentals of Engineering Algorithms	
<b>Electrical Engineering Capstone Courses</b>		
EECE 4791	Electrical and Computer Engineering Capstone 1	1
EECE 4792	Electrical and Computer Engineering Capstone 2	4

### Electrical Engineering Technical Electives

Students can register for EECE 4991/EECE 4992/EECE 4993 more than once. For these courses combined, a maximum of 8 semester hours will be allowed to satisfy the requirement of technical electives. An additional 4 semester hours will be allowed as a general elective. At most one of these courses (4 semester hours) can be taken in a semester.

Though students may register for EECE 2750 more than once, only 4 semester hours will be allowed to satisfy the requirements of technical electives. An additional 4 semester hours will be allowed as a general elective.

Complete four of the following: 16

EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	
EECE 2540 to EECE 2750		
EECE 3324 to EECE 3410		
EECE 4512 to EECE 4698		
EECE 4991	Research	
EECE 4992	Directed Study	
EECE 4993	Independent Study	
EECE 5115 to EECE 5698		
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	

#### Supplemental Credit

2 semester hours from the following course count toward the engineering requirement: 2

EECE 3468 Noise and Stochastic Processes

2 semester hours from the following course count toward the engineering requirement: 2

GE 1501 Cornerstone of Engineering 1 <sup>1</sup>

3 semester hours from the following course count toward the engineering requirement: 3

GE 1502 Cornerstone of Engineering 2 <sup>1</sup>

### Supporting Courses: Mathematics/Science

Complete all Mathematics/Science courses with a minimum of 30 semester hours.

Code	Title	Hours
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	5

#### Supplemental Credit

2 semester hours from the following course count toward the mathematics/science requirement: 2

EECE 3468 Noise and Stochastic Processes

1 semester hour from the following course counts toward the mathematics/science requirement: 1

GE 1501 Cornerstone of Engineering 1 <sup>1</sup>

### Professional Development

Code	Title	Hours
<b>Professional Development</b>		
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1

#### Additional Required Courses

1 semester hour from the following course counts toward the professional development requirement: 1

GE 1501 Cornerstone of Engineering 1 <sup>1</sup>

1 semester hour from the following course counts toward the professional development requirement: 1

GE 1502 Cornerstone of Engineering 2 <sup>1</sup>

**Writing Requirements**

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3315	Advanced Writing in the Technical Professions Interdisciplinary Advanced Writing in the Disciplines	4

**Required General Electives**

Code	Title	Hours
Complete 28 semester hours of academic, nonremedial, nonrepetitive courses.		28

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

**Major GPA Requirement**

Minimum 2.000 GPA required in EECE courses

**Program Requirement**

133 total semester hours required

<sup>2</sup> Computing Fundamentals for Engineers (EECE 2140) can be taken in Year 1 Spring instead of a General Elective by students who are interested in the course in preparation for co-ops involving programming and computing hardware.

<sup>3</sup> The capstone design courses are taken as follows:

- Electrical and Computer Engineering Capstone 1 (EECE 4791) in Summer 1 and Electrical and Computer Engineering Capstone 2 (EECE 4792) in Spring, or...
- ... Electrical and Computer Engineering Capstone 1 (EECE 4791) in Summer 2 and Electrical and Computer Engineering Capstone 2 (EECE 4792) in Fall.

## Electrical Engineering and Physics, BSEE

This intercollege combined major serves students who would like to explore their interest in physics while earning the benefit of an accredited Bachelor of Science degree in engineering. The major combines a major in physics from the Department of Physics in the College of Science with the Bachelor of Science in Electrical Engineering degree from the Department of Electrical and Computer Engineering.

Because of the large body of shared knowledge between electrical engineering and physics, a combined major between these two disciplines is a logical course of study and can be accomplished within a student's usual five-year program (including three co-op placements) without requiring course overloading in any semester. A student graduating from this program will have studied both the physical fundamentals and the applications of electronic devices and systems. The program is a particularly appropriate course of study for students who wish to pursue a career in solid-state devices, microelectromechanical systems, or nanotechnology.

Students interested in this program should contact the Department of Electrical and Computer Engineering or the Department of Physics as early as possible, preferably prior to registering for freshman courses.

Visit the department website (<https://ece.northeastern.edu/academics/undergraduate-studies/ece-accreditation/>) for educational program objectives.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Courses</b>		
EECE 2140	Computing Fundamentals for Engineers	4
EECE 2150	Circuits and Signals: Biomedical Applications	5
EECE 2160	Embedded Design: Enabling Robotics	4
<b>Electrical Engineering Fundamentals</b>		
EECE 2412 and EECE 2413	Fundamentals of Electronics and Lab for EECE 2412	5
EECE 2520	Fundamentals of Linear Systems	4
EECE 2530 and EECE 2531	Fundamentals of Electromagnetics and Lab for EECE 2530	5
<b>Computer Engineering Fundamentals</b>		
If more than one computer engineering fundamentals course is taken, it can count as a technical elective.		
Complete one of the following:		4-5
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	
EECE 2540	Fundamentals of Networks	
EECE 2560	Fundamentals of Engineering Algorithms	
<b>Electrical Engineering Capstone Courses</b>		
EECE 4791	Electrical and Computer Engineering Capstone 1	1
EECE 4792	Electrical and Computer Engineering Capstone 2	4

### EECE Technical Electives

Students can register for EECE 4991/EECE 4992/EECE 4993 more than once. For these courses combined, a maximum of 8 semester hours will be allowed to satisfy the requirement of technical electives. An additional 4 semester hours will be allowed as a general elective. At most, one of these courses (4 semester hours) can be taken in a semester.

Though students may register for EECE 2750 more than once, only 4 semester hours will be allowed to satisfy the requirements of technical electives. An additional 4 semester hours will be allowed as a general elective.

Complete two of the following:

8-9

EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322
EECE 2540 to EECE 2750	
EECE 3324 to EECE 3410	
EECE 4512 to EECE 4698	
EECE 4991	Research
EECE 4992	Directed Study
EECE 4993	Independent Study
EECE 5115 to EECE 5698	
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage

**Supplemental Credit**

2 semester hours from the following course count toward the engineering requirement:	2
EECE 3468	Noise and Stochastic Processes
2 semester hours from the following course count toward the engineering requirement:	2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>
3 semester hours from the following course count toward the engineering requirement:	3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>

**Mathematics/Science**

<sup>2</sup> Note:

The capstone design courses are taken as follows:

- Electrical and Computer Engineering Capstone 1 (EECE 4791) in Summer 1 and Electrical and Computer Engineering Capstone 2 (EECE 4792) in Spring, or...
- ... Electrical and Computer Engineering Capstone 1 (EECE 4791) in Summer 2 and Electrical and Computer Engineering Capstone 2 (EECE 4792) in Fall

Physics courses are offered on the following schedule:

- PHYS 2303 offered every fall, spring, and summer 2
- PHYS 2371/2372 offered every fall
- PHYS 3600 offered every summer 1 and summer 2
- PHYS 3601 offered spring and fall (even years)
- PHYS 3602 offered every fall and spring
- PHYS 3603 offered fall (even years) and summer 1 (odd years)
- PHYS 4115 offered every fall and spring
- PHYS 4305 offered every spring and summer 2 (even years)
- PHYS 4621 offered spring (odd years) and fall (even years)
- PHYS 4623 offered summer 1 and fall (even years)
- PHYS 4651 offered spring and fall (odd years)
- PHYS 4652 offered every spring
- PHYS 5318 offered every spring

## Electrical Engineering and Music with concentration in Music Technology, BSEE

This intercollege combined major is designed for students who would like to explore their interest in music technology while earning the benefit of a Bachelor of Science degree in electrical engineering. The music industry relies heavily on electronic technology in the production (e.g., studio and recording technology); performance (e.g., musical instruments, stage technology); and distribution (e.g., audio file formats, encoding) of music. The program is designed to give students a firm foundation in digital and analog audio electronics and to learn the breadth and depth of the convergence between electrical engineering and music technology.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements Societies and Institutions (SI) and Differences and Diversity (DD) are not explicitly satisfied by required engineering courses. Students are responsible for satisfying these requirements with general electives.

### Engineering Requirements

Code	Title	Hours
<b>Required Courses</b>		
EECE 2140	Computing Fundamentals for Engineers	4
EECE 2150	Circuits and Signals: Biomedical Applications	5
EECE 2160	Embedded Design: Enabling Robotics	4
<b>Electrical Engineering Fundamentals</b>		
EECE 2412 and EECE 2413	Fundamentals of Electronics and Lab for EECE 2412	5
EECE 2520	Fundamentals of Linear Systems	4
EECE 2530 and EECE 2531	Fundamentals of Electromagnetics and Lab for EECE 2530	5
<b>Computer Engineering Fundamentals</b>		
Complete one of the following. If more than one computer engineering fundamentals course is taken, it may count as a technical elective:		4-5
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	
EECE 2540	Fundamentals of Networks	
EECE 2560	Fundamentals of Engineering Algorithms	
<b>Electrical Engineering Capstone Courses</b>		
EECE 4791	Electrical and Computer Engineering Capstone 1	1
EECE 4792	Electrical and Computer Engineering Capstone 2	4
<b>Technical Electives</b>		
Students can register for EECE 4991 / EECE 4992 / EECE 4993 more than once. For these courses combined, a maximum of 8 semester hours will be allowed to satisfy the requirement of technical electives. An additional 4 semester hours will be allowed as a general elective. At most one of these courses (4 semester hours) can be taken in a semester.		
Though students may register for EECE 2750 more than once, only 4 semester hours will be allowed to satisfy the requirements of technical electives. An additional 4 semester hours will be allowed as a general elective.		
Complete two of the following. If EECE 5697 is taken, students are required to complete a music elective.		8
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	
EECE 2540	Fundamentals of Networks	
EECE 2750	Enabling Engineering	
EECE 3324	Computer Architecture and Organization	
EECE 3410	Electronic Design	
EECE 4512	Healthcare Technologies: Sensors, Systems, and Analysis	
EECE 4991	Research	

1094 Electrical Engineering and Music with concentration in Music Technology, BSEE

EECE 4992	Directed Study	
EECE 4993	Independent Study	
EECE 5115 to EECE 5698		
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
<b>Supplemental Credit</b>		
2 semester hours from the following course count toward the engineering requirement:		2
EECE 3468	Noise and Stochastic Processes	
2 semester hours from the following course count toward the engineering requirement:		2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
3 semester hours from the following course count toward the engineering requirement:		3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

**Music Requirements**

Code	Title	Hours
<b>Music Theory</b>		
Complete one of the following pairs:		8
MUSC 1119 and MUSC 1201	Fundamentals of Western Music Theory and Music Theory 1	
MUSC 1201 and MUSC 1202	Music Theory 1 and Music Theory 2	
MUSC 1202 and MUSC 3541	Music Theory 2 and Music Analysis Seminar	
<b>Required Context Course</b>		
Select one of the following:		4
MUSC 1001	Music in Everyday Life	
MUSC 1002 and MUSC 1003	Music in Everyday Life and Lab for MUSC 1002	
<b>Music in Context</b>		
Complete one of the following:		4
INAM 6360	Ethnographic Methods and the Arts	
MUSC 2101	Black Popular Music	
MUSC 2105	Songs That Made History	
MUSC 2150	Making a Musical: Analysis, Craft, and Creation	
MUSC 2310	Popular Music Since 1945	
MUSC 2311	Topics in American Music	
MUSC 2312	Topics in Western Art Music	
MUSC 2313	Topics in Global Music Cultures	
MUSC 2317	Punk Rock	
MUSC 2320	40,000 Years of Music Technology	
MUSC 2331	Topics in Musical Communities	
MUSC 2336	The Festival Experience	
MUSC 2340	Divas, DJs, and Double Standards	
MUSC 2351	Music, Sound, and the Screen	
MUSC 2380	The World of Choral Music	
MUSC 3352	Sounding Human	
MUSC 3353	Music and the Racial Imagination	
MUSC 3354	Sound and the Sacred	
MUSC 3360	Ethnography and the Arts	
MUSI 3351	Music and Social Justice	
MUSI 3360	Global Music Industries in Context	
MUSI 3401	Hip Hop in the Music Industry	
<b>Acoustics or Music Elective</b>		
Complete one of the following. If EECE 5697 is taken, students are required to complete a music elective.		4
MUSC 2350	Acoustics and Psychoacoustics of Music	

MUSC 2000 to MUSC 5999

**Music Technology**

MUST 1220	Introduction to Music Technology	4
MUST 2431	Computer Music Fundamentals	4

**Music Technology Electives**

Complete two of the following. Other appropriate MUST courses will be considered by petition to fulfill this category. 8

MUSC 4510	Music and the Brain Research	
MUST 3540	Special Topics in Music Technology	
MUST 3601	Digital Audio Signal Processing	
MUST 3602	Electronics for Music	
MUST 3603	Embedded Audio Programming	
MUST 4610	Composition for Electronic Instruments	

**Supporting Courses: Mathematics/Science**

Complete all mathematics/science courses with a minimum of 30 semester hours.

Code	Title	Hours
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	5
2 semester hours from the following course count toward this requirement:		2
EECE 3468	Noise and Stochastic Processes	

**Supplemental Credit**

1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	

**Professional Development**

Code	Title	Hours
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1

**Additional Required Courses**

1 semester hour from the following course counts toward the professional development requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

**Writing Requirements**

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3315	Advanced Writing in the Technical Professions Interdisciplinary Advanced Writing in the Disciplines	4

**Required General Electives**

Code	Title	Hours
	Complete 4 semester hours of academic, nonremedial, nonrepetitive courses.	4

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

**Major GPA Requirement**

Minimum 2.000 GPA required in EECE courses

**Music Grade Requirement**

Students must maintain at least a 2.667 GPA (B– average) in the requirements of the music half of the combined major and also complete all required music courses with grades of at least C. Students who fail to meet the above standards will be placed on departmental probation; those who remain on probation for two consecutive semesters will be dropped from the major.

**Program Requirement**

137 total semester hours required

**Plan of Study****Sample Plan of Study****FOUR YEARS, ONE CO-OP IN SUMMER 2/FALL**

Notes:

The capstone design courses are taken as follows:

1098 Electrical Engineering and Music with concentration in Music Technology, BSEE

- Electrical and Computer Engineering Capstone 1 (EECE 4791) in Summer 1 and Electrical and Computer Engineering Capstone 2 (EECE 4792) in Spring
- ... Or...
- Electrical and Computer Engineering Capstone 1 (EECE 4791) in Summer 2 and Electrical and Computer Engineering Capstone 2 (EECE 4792) in Fall.

## Electrical and Computer Engineering, BSEE or BSCmpE

Students may choose to major in both electrical and computer engineering by following the combined major program leading to a Bachelor of Science in Electrical Engineering or Bachelor of Science in Computer Engineering. Students take the required courses for both majors along with technical electives distributed among the areas of computer engineering; fields, waves, and optics; signals and systems; power engineering; and electronic circuits and devices. Additional NUpath requirements must be fulfilled using general electives.

Visit the department website (<https://ece.northeastern.edu/academics/undergraduate-studies/ece-accreditation/>) for educational program objectives.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Courses</b>		
EECE 2140	Computing Fundamentals for Engineers	4
EECE 2150	Circuits and Signals: Biomedical Applications	5
EECE 2160	Embedded Design: Enabling Robotics	4
<b>Electrical Engineering Fundamentals</b>		
EECE 2412 and EECE 2413	Fundamentals of Electronics and Lab for EECE 2412	5
EECE 2520	Fundamentals of Linear Systems	4
EECE 2530 and EECE 2531	Fundamentals of Electromagnetics and Lab for EECE 2530	5
<b>Computer Engineering Fundamentals</b>		
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	5
EECE 2540	Fundamentals of Networks	4
EECE 2560	Fundamentals of Engineering Algorithms	4
<b>Electrical and Computer Engineering Capstone Courses</b>		
EECE 4791	Electrical and Computer Engineering Capstone 1	1
EECE 4792	Electrical and Computer Engineering Capstone 2	4
<b>EECE Technical Electives</b>		
Students can register for EECE 4991 / EECE 4992 / EECE 4993 more than once. For these courses combined, a maximum of 8 semester hours will be allowed to satisfy the requirement of technical electives. An additional 4 semester hours will be allowed as a general elective. At most one of these courses (4 semester hours) can be taken in a semester.		
Though students may register for EECE 2750 more than once, only 4 semester hours will be allowed to satisfy the requirements of technical electives. An additional 4 semester hours will be allowed as a general elective.		
Complete four of the following:		16
EECE 2750	Enabling Engineering	
EECE 3324 to EECE 3410		
EECE 4512 to EECE 4698		
EECE 4991	Research	
EECE 4992	Directed Study	
EECE 4993	Independent Study	
EECE 5115 to EECE 5698		

1100 Electrical and Computer Engineering, BSEE or BSCmpE

EECE 5670 Sustainable Energy: Materials, Conversion, Storage, and Usage

Two CS/CY/IS courses from the following approved list may be taken toward the EECE technical elective requirement:

CS 3200	Database Design
CS 3500	Object-Oriented Design
CS 3540 to CS 3800	
CS 4100 to CS 4770	
CS 4850	Building Game Engines
CY 2550	Foundations of Cybersecurity
IS 4200 to IS 4700	

**Supplemental Credit**

2 semester hours from the following course count toward the engineering requirement:	2
EECE 3468	Noise and Stochastic Processes
2 semester hours from the following course count toward the engineering requirement:	2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>
3 semester hours from the following course count toward the engineering requirement:	3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>

**Supporting Courses: Mathematics/Science**

Complete all mathematics/science courses with a minimum of 30 semester hours.

Code	Title	Hours
<b>Required Mathematics/Science</b>		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	5
<b>Supplemental Credit</b>		
2 semester hours from the following course count toward the mathematics/science requirement:	2	
EECE 3468	Noise and Stochastic Processes	
1 semester hour from the following course counts toward the mathematics/science requirement:	1	
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	

**Professional Development**

Code	Title	Hours
<b>Required Professional Development</b>		
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1
<b>Additional Required Courses</b>		
1 semester hour from the following course counts toward the professional development requirement:	1	
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
1 semester hour from the following course counts toward the professional development requirement:	1	
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

## Writing Requirements

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3315	Advanced Writing in the Technical Professions Interdisciplinary Advanced Writing in the Disciplines	4

## Required General Electives

Code	Title	Hours
Complete 16 semester hours of academic, nonremedial, nonrepetitive courses.		16

## Major GPA Requirement

A 2.000 minimum GPA is required in EECE coursework.

## Program Requirement

135 total semester hours required

<sup>1</sup> Students can substitute Engineering Design (GE 1110) and Engineering Problem Solving and Computation (GE 1111) for Cornerstone of Engineering 1 (GE 1501) and Cornerstone of Engineering 2 (GE 1502) in approved situations.

<sup>2</sup> Computing Fundamentals for Engineers (EECE 2140) can be taken in year 1 spring instead of a general elective by students who are interested in the course in preparation for co-ops involving programming and computing hardware.

<sup>3</sup> The capstone design courses are taken as follows: Electrical and Computer Engineering Capstone 1 (EECE 4791) in summer 1 and Electrical and Computer Engineering Capstone 2 (EECE 4792) in spring **or** Electrical and Computer Engineering Capstone 1 (EECE 4791) in summer 2 and Electrical and Computer Engineering Capstone 2 (EECE 4792) in fall.

## Biomedical Engineering, Minor

Medical imaging and biomedical electronics are important areas of biomedical engineering that are within the province of electrical engineering. The minor in biomedical engineering is open to all students in the university with the prerequisite calculus and physics background. The minor is particularly designed for majors in electrical or computer engineering, biology, health science fields, or other engineering departments who would like a background in relevant aspects of biology and electrical engineering, with the opportunity to complete an interdisciplinary biomedical engineering capstone design project. Coursework in anatomy and physiology and other health science topics is combined with technical engineering courses related to biomedical imaging and instrumentation.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Students need to complete the program requirements with at least three courses that are not part of their major required coursework.

### Required Biology

Code	Title	Hours
BIOL 1115 and BIOL 1116	General Biology 1 for Engineers and Lab for BIOL 1115	5
BIOL 2217 and BIOL 2218	Integrated Anatomy and Physiology 1 and Lab for BIOL 2217	5

### Required Engineering

The course you select may also count toward your major.

Code	Title	Hours
Complete one of the following:		4
EECE 4512	Healthcare Technologies: Sensors, Systems, and Analysis	
EECE 4993	Independent Study (must have a biomedical-engineering focus)	
EECE 5698	Special Topics in Electrical and Computer Engineering	

### Required Capstone Design Courses

Complete the following two courses on a biologically oriented project:

Code	Title	Hours
EECE 4790	Electrical and Computer Engineering Capstone 1	4
EECE 4792	Electrical and Computer Engineering Capstone 2	4

### Elective Courses

One course must be outside your home department. Neither course can be used toward your major.

Code	Title	Hours
Complete two of the following:		8-10
<b>Biology</b>		
BIOL 1113 and BIOL 1114	General Biology 2 and Lab for BIOL 1113	
BIOL 2219 and BIOL 2220	Integrated Anatomy and Physiology 2 and Lab for BIOL 2219	
BIOL 2299	Inquiries in Biological Sciences	
BIOL 2301 and BIOL 2302	Genetics and Molecular Biology and Lab for BIOL 2301	
BIOL 3405	Neurobiology	
BIOL 5581	Biological Imaging	
<b>Chemical Engineering</b>		
CHME 5630	Biochemical Engineering	
CHME 5699	Special Topics in Chemical Engineering	
<b>Civil/Industrial Engineering</b>		
CIVE 7251	Environmental Biological Processes	
<b>Electrical/Computer Engineering</b>		

EECE 4512	Healthcare Technologies: Sensors, Systems, and Analysis
EECE 4993	Independent Study
EECE 5698	Special Topics in Electrical and Computer Engineering
<b>Mechanical/Industrial Engineering</b>	
IE 4522	Human-Machine Systems
ME 5665	Musculoskeletal Biomechanics
<b>Physics</b>	
PHYS 4621	Biological Physics 1
PHYS 4623	Medical Physics
PHYS 4651	Medical Physics Seminar 1
PHYS 4652	Medical Physics Seminar 2
<b>Psychology</b>	
PSYC 3452	Sensation and Perception
PSYC 3458	Biological Psychology

**GPA Requirement**

2.000 GPA required in the minor

## Computer Engineering, Minor

A minor in computer engineering is particularly designed for the student who would like a coherent background in the theory and laboratory practice of computer engineering. This minor is not open to students in the Department of Electrical and Computer Engineering.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

This minor is not open to students in the Department of Electrical and Computer Engineering.

Complete a total of four courses for the minor.

Students need to complete the program requirements with at least three courses that are not part of their major required coursework.

### Required Core Courses

Code	Title	Hours
EECE 2140	Computing Fundamentals for Engineers	4
EECE 2160	Embedded Design: Enabling Robotics	4

### Required Fundamental Courses

Code	Title	Hours
Complete one of the following:		4-5
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	
EECE 2540	Fundamentals of Networks	
EECE 2560	Fundamentals of Engineering Algorithms	

### Computer Engineering Technical Elective

Fundamentals not taken to satisfy the above requirement may be used as a technical elective.

Code	Title	Hours
Complete one of the following:		4-5
EECE 4993	Independent Study	
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
EECE 2322 to EECE2750		
EECE3324 to EECE 4698		
EECE 5576 to EECE 5698		

### GPA Requirement

2.000 GPA required in the minor

## Computational Data Analytics, Minor

This minor, offered by the Department of Electrical and Computer Engineering in the College of Engineering, seeks to provide a coherent technical foundation in the fundamentals and application of data analytics. The minor addresses the growing demand in industry to be able to apply background in probability/statistics, calculus, engineering problem solving, computing, and analytical principles/tools to identify patterns and trends, find clusters and outliers, and characterize/summarize the mountain of data being generated in our world. This program leverages faculty expertise in electrical and computer engineering and includes courses from across the College of Engineering, College of Science, and the Khoury College of Computer Sciences

Students need to complete the program requirements with at least three courses that are not part of their major required course work.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

*Note:* Students need to complete the program requirements with at least three courses that are not part of their major required coursework.

### Required Courses

Code	Title	Hours
EECE 5642	Data Visualization	4
EECE 5644	Introduction to Machine Learning and Pattern Recognition	4
Complete one of the following:		4
CS 2510	Fundamentals of Computer Science 2	
EECE 2140	Computing Fundamentals for Engineers	

### Probability and Statistics

Code	Title	Hours
Complete one of the following:		4
BIOE 2365	Bioengineering Measurement, Experimentation, and Statistics	
CIVE 3464	Probability and Engineering Economy for Civil Engineering	
EECE 3468	Noise and Stochastic Processes	
IE 3412	Engineering Probability and Statistics	
MATH 2280	Statistics and Software	
MATH 3081	Probability and Statistics	

### Elective

Code	Title	Hours
Complete one of the following:		4
CS 3000	Algorithms and Data	
CS 3200	Database Design	
CS 5200	Database Management Systems	
EECE 2520	Fundamentals of Linear Systems	
EECE 2560	Fundamentals of Engineering Algorithms	
EECE 4694	Numerical Methods and Computer Applications	
EECE 5639	Computer Vision	
IE 4515	Operations Research	
IE 5640	Data Mining for Engineering Applications	
IS 4200	Information Retrieval	
MATH 4525	Applied Analysis	

### GPA Requirement

2.000 GPA required in the minor

## Electrical Engineering, Minor

A minor in electrical engineering is particularly designed for majors in math, science, computer science, or other engineering departments who would like a coherent background in the theory and laboratory practice of electrical engineering. This minor is not open to students in the Department of Electrical and Computer Engineering.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

This minor is not open to students in the Department of Electrical and Computer Engineering because of overlap with the majors.

Complete a total of four courses for the minor.

Students need to complete the program requirements with at least three courses that are not part of their major required coursework.

### Required Core Course

Code	Title	Hours
Complete one of the following:		5
EECE 2150	Circuits and Signals: Biomedical Applications	
EECE 2210 and EECE 2211	Electrical Engineering and Lab for EECE 2210	

### Fundamental Core Courses

Code	Title	Hours
Complete two of the following:		9-10
EECE 2412 and EECE 2413	Fundamentals of Electronics and Lab for EECE 2412	
EECE 2520	Fundamentals of Linear Systems	
EECE 2530 and EECE 2531	Fundamentals of Electromagnetics and Lab for EECE 2530	

### Electrical Engineering Technical Electives

Code	Title	Hours
Fundamentals not taken to satisfy the above requirement may be used as a technical elective.		
Complete one of the following:		4
EECE 2322 to EECE 2750		
EECE 3324 to EECE 4698		
EECE 4993	Independent Study	
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
EECE 5576 to EECE 5698		

### GPA Requirement

2.000 GPA required in the minor

## Robotics, Minor

The minor in robotics is open to all students in the university. The minor is designed for the student who would like a coherent background in the theory and practice of robotics.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Students need to complete the program requirements with at least three courses that are not part of their major required coursework.

### Required Courses

Code	Title	Hours
ME 3460	Robot Dynamics and Control	4
Complete one of the following:		4
EECE 2140	Computing Fundamentals for Engineers	
EECE 2160	Embedded Design: Enabling Robotics	
EECE 2210 and EECE 2211	Electrical Engineering and Lab for EECE 2210	

### Electives

Code	Title	Hours
Complete three of the following:		12
CS 4100	Artificial Intelligence	
CS 4610	Robotic Science and Systems	
EECE 4630	Robotics	
EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5554	Robotics Sensing and Navigation	
EECE 5639	Computer Vision	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
EECE 5580	Classical Control Systems	
IE 4522	Human-Machine Systems	
ME 5245	Mechatronic Systems	
ME 5250	Robot Mechanics and Control	

### GPA Requirement

2.000 GPA required in the minor

## Mechanical and Industrial Engineering

Website (<http://www.mie.neu.edu>)

### Marilyn L. Minus, PhD

Professor and Chair

334 Snell Engineering Center

617.373.2740

617.373.2921 (fax)

The Department of Mechanical and Industrial Engineering offers comprehensive undergraduate programs in both mechanical engineering and industrial engineering, equipping students with the fundamentals in science, mathematics, and engineering. The programs are optimally blended with theory, computation, and laboratory-level practice, as well as with real-world experience through cooperative education programs aligned with Northeastern University's mission in experiential learning. Graduates are positioned to excel in careers in broad areas of engineering as well as in academia.

### Mission of the Department

The mission of the Department of Mechanical and Industrial Engineering is to educate students for professional and technical excellence; to perform research to advance the science and practice of engineering; to engage in service activities that advance the department, the university, and the profession; and to instill in ourselves and our students habits and attitudes that promote ethical behavior, professional responsibility, and careers that advance the well-being of society.

### Mechanical Engineering

Mechanical engineers design, develop, and support the manufacture of machinery and devices to transmit power or to convert energy from thermal to mechanical form in order to power the modern world and its machines. Traditionally, mechanical engineers have designed and tested devices, such as heating and air-conditioning systems, machine tools, internal-combustion engines, and steam power plants. Today they also play primary roles in the development of new technologies in a variety of fields—energy conversion, solar energy utilization, environmental control, robotics, prosthetics, transportation, manufacturing, and new-materials development.

Mechanical engineers use computers to formulate preliminary and final designs of systems or devices, to perform calculations that predict the behavior of the design, and to collect and analyze performance data from system testing or operation. Mechanical engineering has been heavily influenced by recent advances in computer hardware and software.

The curriculum in mechanical engineering focuses on four areas: applied mechanics, thermofluids engineering, materials science, and mechatronics. Applied mechanics is the study of the motion and deformation of structural elements acted on by forces in devices that range from rotating industrial dynamos to dentists' drills. Thermofluids engineering deals with the motion of fluids and the transfer of energy, as in the cooling of electronic components or the design of gas turbine engines. Materials science is concerned with the relationship between the structure and properties of materials and with the control of structure, through processing, to achieve desired properties. Practical applications are in the development of composite materials, metallurgical process industries, and advanced functional materials. Mechatronics is critical to any engineered system in which sensors and actuators of several types communicate and function in order to impart desired behavior from these systems.

Courses in each area form the foundation for advanced analytical and creative design courses that culminate in a two-semester capstone design project. Faculty encourage students throughout the curriculum to use computer-aided design tools and high-performance computer workstations.

### Industrial Engineering

Industrial engineers design and analyze systems that include people, equipment, products, programs, and materials and their interactions and performance in the workplace and beyond. An industrial engineer collects this information and uses data to evaluate alternatives to make decisions that best advance the goals of the enterprise, system, or interaction. Industrial engineers work in manufacturing firms, hospitals, banks, public utilities, transportation, government agencies, product R&D, insurance companies, community partnerships, consulting and financial firms, construction companies, and virtual enterprises, to name a few. Among the projects they undertake are: design and implementation of a computer-integrated supply chain or manufacturing system, facilities planning for a variety of industries, design of a robotics system in a manufacturing or automated environment, long-range corporate planning, development and implementation of a quality-control system, simulation analyses to improve processes and make operational decisions, system audits for safety and performance, design of healthcare operations to enhance patient well-being and to improve efficiency and productivity, and development of computer-based systems for information and operational control.

The program in industrial engineering offers students a base of traditional engineering courses, such as work design, probability, statistics, and engineering economy, while emphasizing such contemporary areas as simulation modeling, engineering database systems, quality assurance, logistics and supply chain management, operations research, facilities planning, advanced manufacturing technologies/Industry 4.0, and human-machine systems. Students integrate the knowledge acquired in these courses in a two-semester capstone design experience. In capstone, students further expand their knowledge base beyond the major to complete an advanced open-ended project.

## Other Programmatic Features

More than 90% of the department's undergraduate students take advantage of the cooperative education program. Cooperative education assignments increase in responsibility and technical challenge as students progress through the program. Entry-level co-op positions in mechanical engineering may be in manufacturing; quality assurance and testing; or involve 3D CAD modeling, robotics, and biomedical devices; while more advanced-level positions will allow students to gain experience in the design process, including advanced 3D modeling, design for manufacturability, prototyping, and systems engineering. Students in the industrial engineering discipline may utilize co-op to concentrate on one industry segment and build an increasingly technical skill set with each experience or explore the breadth of career opportunities over the course of several co-op rotations such as healthcare process improvement, supply chain logistics, business and data analytics, consulting and/or finance, manufacturing operations, product design, and more.

The department also offers significant research opportunities throughout all fields of mechanical and industrial engineering, including participating in research centers based in our department and college.

Our students have an opportunity to obtain a broad knowledge base in science, engineering, and general studies that allows them flexibility in career development and graduate education. At the same time, our graduates should be responsible and scientifically educated citizens, prepared to contribute personally as well as professionally to an educated, democratic society.

## Industrial Engineering, BSIE

Industrial engineering involves the design and analysis of systems that include people, equipment, and materials and their interactions and performance in the workplace. An industrial engineer collects this information and evaluates alternatives to make decisions that best advance the goals of the enterprise.

The program in industrial engineering offers students a base of traditional engineering courses, such as work design, human-machine systems, probability, statistics, and engineering economy, while emphasizing such contemporary areas as simulation modeling, engineering database systems, quality assurance, logistics and supply chain management, operations research, and facilities planning. Students integrate the knowledge acquired in these courses in a two-semester capstone design project.

Industrial engineers work in manufacturing firms, hospitals, banks, public utilities, transportation, government agencies, insurance companies, and construction firms. Among the projects they undertake are design and implementation of a computer-integrated supply chain or manufacturing system; facilities planning for a variety of industries; design of a robotics system in a manufacturing environment; long-range corporate planning; development and implementation of a quality-control system; simulation analyses to improve processes and make operational decisions; design of healthcare operations to enhance patient safety; and improve efficiency, productivity, and development of computer systems for information control.

More than 90% of department undergraduate students take advantage of the cooperative education program. Cooperative education assignments generally increase in level of responsibility as students gain theoretical and technical knowledge through their academic work. A sophomore might begin as a computer/data analyst evaluating the performance of a manufacturing system and progress to designing manufacturing engineering workstations by the senior year.

Visit the department website (<https://mie.northeastern.edu/academics/undergraduate-studies/mie-accreditation/>) for program educational objectives.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Engineering</b>		
IE 2310 and IE 2311	Introduction to Industrial Engineering and Recitation for IE 2310	4

## Mechanical Engineering, BSME

Industrial engineering involves the design and analysis of systems that include people, equipment, and materials and their interactions and performance in the workplace. An industrial engineer collects this information and evaluates alternatives to make decisions that best advance the goals of the enterprise.

The program in industrial engineering offers students a base of traditional engineering courses, such as work design, human-machine systems, probability, statistics, and engineering economy, while emphasizing such contemporary areas as simulation modeling, engineering database systems, quality assurance, logistics and supply chain management, operations research, and facilities planning. Students integrate the knowledge acquired in these courses in a two-semester capstone design project.

Industrial engineers work in manufacturing firms, hospitals, banks, public utilities, transportation, government agencies, insurance companies, and construction firms. Among the projects they undertake are design and implementation of a computer-integrated supply chain or manufacturing system; facilities planning for a variety of industries; design of a robotics system in a manufacturing environment; long-range corporate planning; development and implementation of a quality-control system; simulation analyses to improve processes and make operational decisions; design of healthcare operations to enhance patient safety; and improvements in efficiency, productivity, and development of computer systems for information control.

More than 90% of department undergraduate students take advantage of the cooperative education program. Cooperative education assignments generally increase in level of responsibility as students gain theoretical and technical knowledge through their academic work. A sophomore might begin as a computer/data analyst evaluating the performance of a manufacturing system and progress to designing manufacturing engineering workstations by the senior year.

Visit the department website (<https://mie.northeastern.edu/academics/undergraduate-studies/mie-accreditation/>) for program educational objectives.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Engineering</b>		
EECE 2210 and EECE 2211	Electrical Engineering and Lab for EECE 2210	5
ME 2340 and ME 2341	Introduction to Material Science and Lab for ME 2340	5
ME 2350	Statics	4
ME 2355 and ME 2356	Mechanics of Materials and Lab for ME 2355	5
ME 2380 and ME 2381	Thermodynamics and Recitation for ME 2380	4
ME 3455 and ME 3456	Dynamics and Lab for ME 3455	5
ME 3475 or ME 3480	Fluid Mechanics International Applications of Fluid Mechanics	4
ME 4505 and ME 4506	Measurement and Analysis with Thermal Science Application and Lab for ME 4505	5
ME 4508 or ME 4565	Mechanical Engineering Computation and Design Introduction to Computational Fluid Dynamics	4

ME 4550	Mechanical Engineering Design	4
ME 4555	System Analysis and Control	4
ME 4570	Thermal Systems Analysis and Design	4
<b>Mechanical Engineering Capstone</b>		
MEIE 4701	Capstone Design 1	1
MEIE 4702	Capstone Design 2	5
<b>Mechanical and Industrial Engineering Technical Elective</b>		
Complete one technical elective in one of the following subject areas: EMGT, ENGR, ENSY, IE, ME, or MEIE		4
<b>Supplemental Credit</b>		
2 semester hours from the following course counts toward the engineering requirement:		2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
3 semester hours from the following course counts toward the engineering requirement:		3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

### Supporting Courses: Mathematics/Science

Complete all mathematics/science courses with a minimum of 30 semester hours.

Code	Title	Hours
<b>Required Mathematics/Science</b>		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	5
<b>Science/Math Elective</b>		
Complete one of the following:		4-5
BIOL 1111 and BIOL 1112	General Biology 1 and Lab for BIOL 1111	
BIOL 2217 and BIOL 2218	Integrated Anatomy and Physiology 1 and Lab for BIOL 2217	
CHEM 2311 and CHEM 2312 and CHEM 2319	Organic Chemistry 1 and Lab for CHEM 2311 and Recitation for CHEM 2311	
MATH 3081	Probability and Statistics	
PHYS 2303	Modern Physics	
PHYS 3601	Classical Dynamics	
PHYS 3602	Electricity and Magnetism 1	
<b>Supplemental Credit</b>		
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	

### Professional Development

Code	Title	Hours
<b>Required Professional Development</b>		
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1
<b>Additional Required Courses</b>		

1 semester hour from the following course counts toward the professional development requirement: 1

GE 1501 Cornerstone of Engineering 1 <sup>1</sup>

1 semester hour from the following course counts toward the professional development requirement: 1

GE 1502 Cornerstone of Engineering 2 <sup>1</sup>

## Writing Requirements

Code	Title	Hours
A grade of C or higher is required in each course:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3315	Advanced Writing in the Technical Professions Interdisciplinary Advanced Writing in the Disciplines	4

## Required General Electives

Code	Title	Hours
Complete 24 SH of academic, nonremedial, nonrepetitive courses.		24

## Program Requirement

140 total semester hours required

Major GPA Requirement

2.000 minimum GPA required in ME/MEIE/EECE/ENCP coursework

<sup>1</sup> Students can substitute Engineering Design (GE 1110) and Engineering Problem Solving and Computation (GE 1111) for Cornerstone of Engineering 1 (GE 1501) and Cornerstone of Engineering 2 (GE 1502) in approved situations.

## Mechanical Engineering and Bioengineering, BSME

### Overview

This combined major from the Department of Mechanical and Industrial Engineering and Department of Bioengineering provides a rigorous curriculum for students willing to learn and integrate the foundations of mechanical engineering and bioengineering toward solving multidisciplinary problems arising at the intersection of these two engineering disciplines. The combined major weaves mechanics, materials, and thermofluids courses of mechanical engineering with a set of core and elective bioengineering courses from biomechanics, biostatistics, signals, and systems, to biomaterials, biomedical imaging, and design of biomedical devices and implants.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

NUPath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUPath requirements with general elective coursework.

### Mechanical Engineering Requirements

Code	Title	Hours
<b>Required Mechanical Engineering</b>		
ME 2340 and ME 2341	Introduction to Material Science and Lab for ME 2340	5
ME 2350	Statics	4
ME 2355 and ME 2356	Mechanics of Materials and Lab for ME 2355	5
ME 2380 and ME 2381	Thermodynamics and Recitation for ME 2380	4
ME 3455 and ME 3456	Dynamics and Lab for ME 3455	5
ME 3475 or ME 3480	Fluid Mechanics International Applications of Fluid Mechanics	4
ME 4550	Mechanical Engineering Design	4
ME 4570	Thermal Systems Analysis and Design	4
<b>Senior Capstone Design Project</b>		
MEIE 4701	Capstone Design 1	1
MEIE 4702	Capstone Design 2	5
<b>Supplemental Credit</b>		
2 semester hours from the following course count toward the engineering requirement:		2
GE 1501	Cornerstone of Engineering 1	
3 semester hours from the following course count toward the engineering requirement:		3
GE 1502	Cornerstone of Engineering 2	

### Bioengineering

Code	Title	Hours
<b>Required Bioengineering Courses</b>		
BIOE 2355	Quantitative Physiology for Bioengineers	4
BIOE 2365 and BIOE 2366	Bioengineering Measurement, Experimentation, and Statistics and Lab for BIOE 2365	5
BIOE 3210	Bioelectricity	4
BIOE 3380	Biomolecular Dynamics and Control	4
BIOE 5640	Computational Biomechanics	4

**Bioengineering Electives**

Complete 16 semester hours from the course list below:		16
BIOE 5115	Dynamical Systems in Biological Engineering	
BIOE 5235	Biomedical Imaging	
BIOE 5250	Regulatory and Quality Aspects of Medical Device Design	
BIOE 5410	Molecular Bioengineering	
BIOE 5420	Cellular Engineering	
BIOE 5430	Principles and Applications of Tissue Engineering	
BIOE 5440	The Cell as a Machine	
BIOE 5630	Physiological Fluid Mechanics	
BIOE 5650	Multiscale Biomechanics	
BIOE 5800	Systems, Signals, and Controls for Bioengineers	
BIOE 5810	Design of Biomedical Instrumentation	
BIOE 5820	Biomaterials	
BIOE 5850	Design of Implants	

**Supporting Courses: Mathematics/Science**

Complete all mathematics/science courses with a minimum of 30 semester hours.

Code	Title	Hours
<b>Required Mathematics/Science</b>		
BIOL 1111 and BIOL 1112	General Biology 1 and Lab for BIOL 1111	5
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	5
<b>Supplemental Credit</b>		
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1501	Cornerstone of Engineering 1	

**Professional Development**

Code	Title	Hours
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1
<b>Additional Required Courses</b>		
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1501	Cornerstone of Engineering 1	
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1502	Cornerstone of Engineering 2	

**Writing Requirements**

Code	Title	Hours
A grade of C or higher is required in each course:		
ENGW 1111	First-Year Writing	4

ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

### Required General Electives

Code	Title	Hours
Complete 8 semester hours of academic, nonremedial, nonrepetitive courses.		8

### Integrative Courses

Code	Title	Hours
These courses are already required above and also fulfill the integrative requirement.		
MEIE 4701	Capstone Design 1	
MEIE 4702	Capstone Design 2	

### Major GPA Requirement

2.000 minimum GPA required in ME, IE, and MEIE courses

2.000 minimum GPA required in BIOE courses

### Program Requirement

140 total semester hours required

### Plan of Study

**Total Hours: 140**

## Mechanical Engineering and Design, BSME

The combined major in mechanical engineering and design is designed to educate students in topics of both disciplines and the interface between them. Mechanical engineering involves the design, development, and manufacture of machinery and devices to transmit power or to convert energy from thermal to mechanical form in order to power the modern world and its machines. Its current practice has been heavily influenced by recent advances in computer hardware and software. Today, engineers also play a primary role in the development of new technologies in a variety of fields—energy conversion, solar energy utilization, environmental control, prosthetics, transportation, manufacturing, and new-materials development. Design is the discipline that shapes human experiences in specific situations to improve quality. Designers pose important questions about—and provide significant answers to—how we live. Designers are needed when we don't know what is needed as well as when we think we do. Students in this program will combine the disciplines in order to address complex problems with human-centered solutions.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience may fulfill the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Engineering</b>		
ME 2340 and ME 2341	Introduction to Material Science and Lab for ME 2340	5
ME 2350	Statics	4
ME 2355 and ME 2356	Mechanics of Materials and Lab for ME 2355	5
ME 2380 and ME 2381	Thermodynamics and Recitation for ME 2380	4
ME 3455 and ME 3456	Dynamics and Lab for ME 3455	5
ME 3475 or ME 3480	Fluid Mechanics International Applications of Fluid Mechanics	4
ME 4505 and ME 4506	Measurement and Analysis with Thermal Science Application and Lab for ME 4505	5
<b>Senior Capstone Design Project</b>		
MEIE 4701	Capstone Design 1	1
MEIE 4702	Capstone Design 2	5
<b>Technical Electives</b>		
Complete two of the following (at least one must be ME 4550 or ME 4570):		8
ME 4508 or ME 4565	Mechanical Engineering Computation and Design Introduction to Computational Fluid Dynamics	
ME 4550	Mechanical Engineering Design	
ME 4555	System Analysis and Control	
ME 4570	Thermal Systems Analysis and Design	
<b>Supplemental Credit</b>		
2 semester hours from the following course count toward the engineering requirement:		2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
3 semester hours from the following course count toward the engineering requirement:		3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

**Design Requirements**

Code	Title	Hours
<b>Art and Design Fundamentals</b>		
ARTF 1122	Color and Composition (with optional ARTF 1123)	4
<b>Art and Design Fundamentals Elective</b>		
Complete one of the following:		5
ARTF 1124 and ARTF 1125	Form and Structure and Form and Structure Tools	
ARTF 2220 and ARTF 2221	Movement and Time and Movement and Time Tools	
ARTF 2223 and ARTF 2224	Experience and Interaction and Experience and Interaction Tools	
<b>Design Requirements</b>		
ARTG 1001 and ARTG 1002	Design Perspectives: An Introduction to Design in the World and Seminar for Design Perspectives	4
ARTG 1270 and ARTG 1271	Design: Process + Practices and Studio for Design: Process + Practices	4
ARTG 1290 and ARTG 1291	Typographic Systems and Studio for Typographic Systems	4
ARTG 2262 and ARTG 2263	Prototyping with Code and Lab for ARTG 2262 (or ARTG Design elective)	4
<b>Art and Design History Elective</b>		
Complete any one ARTH course.		4
<b>Art and Design Elective</b>		
Complete any one ARTD, ARTE, ARTF, ARTG, ARTH, ARTS, or GAME course as long as prerequisites have been met.		4

**Design Options**

Code	Title	Hours
Complete one of the following options:		8
<b>Experience Design Option</b>		
ARTG 3462	Experience Design Principles	
ARTG 3463	Experience Design 2	
<b>Graphic Design Option</b>		
ARTG 2252	Graphic Design Principles	
ARTG 3450	Graphic Design 2	
<b>Information Design Option</b>		
ARTG 2252	Graphic Design Principles	
ARTG 3444	Topics in Information Design Inquiry	
<b>Interaction Design Option</b>		
ARTG 2400 and ARTG 2401	Interaction Design Principles and Interaction Design Principles Tools	
ARTG 3700	Interaction Design 2: Mobile	

**Supporting Courses: Mathematics/Science**

Complete all mathematics/science courses with a minimum of 30 semester hours.

Code	Title	Hours
<b>Required Mathematics/Science</b>		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4

PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	5

**Supplemental Credit**

1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	

**Professional Development**

Code	Title	Hours
<b>Professional Development</b>		
GE 1000 or ARTF 1000	First-Year Seminar Art and Design at Northeastern	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1

**Additional Required Courses**

1 semester hour from the following course counts toward the professional development requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

**Writing Requirements**

Code	Title	Hours
A grade of C or higher is required in each course:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3315	Advanced Writing in the Technical Professions Interdisciplinary Advanced Writing in the Disciplines	4

**Required General Electives**

Code	Title	Hours
Complete 4 semester hours of academic, nonremedial, nonrepetitive courses. Recommend selecting a course to fulfill NUpath DD.		4

**Integrative Courses**

Code	Title	Hours
This course is already required above and also fulfills the integrative requirement:		
MEIE 4702	Capstone Design 2	

**Major GPA Requirement**

2.000 minimum GPA required in IE, ME, and MEIE courses

**Program Requirement**

141 total semester hours required

<sup>1</sup> Students can substitute Engineering Design (GE 1110) and Engineering Problem Solving and Computation (GE 1111) for Cornerstone of Engineering 1 (GE 1501) and Cornerstone of Engineering 2 (GE 1502) in approved situations.

## Mechanical Engineering and History, BSME

The combined mechanical engineering and history major is designed to help students develop skills across different intellectual domains. A solid grounding in history helps students better understand the political, cultural, and economic context in which technologies are developed and deployed. Indeed, history offers a myriad of case studies that highlight both the transformative potential and the unintended consequences of new technologies and technological processes. By studying different phases of the past and different societies in the past, students will gain a broad perspective that gives them the range and flexibility required in many work situations. History also provides a terrain for moral contemplation. Greater sensitivity to historical context also helps students see beyond commonly accepted narratives valorizing individual entrepreneurs and appreciate the different ways in which innovation, disruption, official support, and even contingency give rise to new technologies. Finally, by writing effective papers and engaging in productive discussions at the heart of history courses, students also cultivate skills in critical analysis and persuasive communication that could be employed in any future careers.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirement Interpreting Culture (IC) is not explicitly satisfied by required courses. Students are responsible for satisfying this requirement with electives.

### Engineering Requirements

Code	Title	Hours
<b>Required Engineering</b>		
ME 2340 and ME 2341	Introduction to Material Science and Lab for ME 2340	5
ME 2350	Statics	4
ME 2355 and ME 2356	Mechanics of Materials and Lab for ME 2355	5
ME 2380 and ME 2381	Thermodynamics and Recitation for ME 2380	4
ME 3455 and ME 3456	Dynamics and Lab for ME 3455	5
ME 3475 or ME 3480	Fluid Mechanics International Applications of Fluid Mechanics	4
ME 4505 and ME 4506	Measurement and Analysis with Thermal Science Application and Lab for ME 4505	5
<b>Senior Capstone Design Project</b>		
MEIE 4701	Capstone Design 1	1
MEIE 4702	Capstone Design 2	5
<b>Technical Electives</b>		
Complete two of the following:		8
ME 4508	Mechanical Engineering Computation and Design	
ME 4550	Mechanical Engineering Design	
ME 4555	System Analysis and Control	
ME 4570	Thermal Systems Analysis and Design	
<b>Supplemental Credit</b>		
2 semester hours from the following course count toward the engineering requirement:		2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
3 semester hours from the following course count toward the engineering requirement:		3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

## History Requirements

Code	Title	Hours
HIST 1200	Historical Research and Writing	1
HIST 1201	First-Year Seminar	4
HIST 2220	History of Technology	4
<b>Research Methods</b>		
HIST 2301	The History Seminar	4
HIST 2302	Historical Writing	1
<b>Introductory History</b>		
Complete one course from HIST 1001 to HIST 1999 (excluding HIST 1200 and HIST 1201).		4
<b>History Elective</b>		
Complete two HIST courses at any level in any field.		8
<b>Pre-1800 History Elective</b>		
Complete one of the following:		4
HIST 1100	Law and History	
HIST 1180	African History	
HIST 1185	Introduction to Middle Eastern History	
HIST 1187	Introduction to Latin American History	
HIST 1218	Pirates, Planters, and Patriots: Making the Americas, 1492–1804	
HIST 1252	Japanese Literature and Culture	
HIST 1272	Europe in the Middle Ages, 500–1500	
HIST 1285	Introduction to Russian Civilization	
HIST 1389	History of Espionage 1: Antiquity to World War II	
HIST 2000	Native American Resistance: Past and Present	
HIST 2311	Colonialism/Imperialism	
HIST 2330	Colonial and Revolutionary America	
HIST 2370	Renaissance to Enlightenment	
HIST 2375	The Tudors, the Stuarts, and the Birth of Modern Britain	
HIST 2390	Africa and the World in Early Times	
HIST 3334	Assassinations in World History	
<b>Intermediate History</b>		
Complete minimum of one HIST course numbered 2000 to 2999 (Excluding HIST 2301 and HIST 2302).		4
<b>Advanced History</b>		
Complete minimum one HIST course numbered 3000 to 4999 (Excluding HIST 4701).		4

## Supporting Courses: Mathematics/Science

Complete all mathematics/science courses with a minimum of 30 semester hours.

Code	Title	Hours
<b>Required Mathematics/Science</b>		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	5

### Supplemental Credit

1 semester hour from the following course counts toward the mathematics/science requirement: 1

GE 1501 Cornerstone of Engineering 1 <sup>1</sup>

## Professional Development

Code	Title	Hours
<b>Professional Development</b>		
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1

### Additional Required Courses

1 semester hour from the following course counts toward the professional development requirement: 1

GE 1501 Cornerstone of Engineering 1 <sup>1</sup>

1 semester hour from the following course counts toward the professional development requirement: 1

GE 1502 Cornerstone of Engineering 2 <sup>1</sup>

## Writing Requirements

Code	Title	Hours
A grade of C or higher is required in each course:		
ENGW 1111	First-Year Writing	4
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

## Integrative Courses

Code	Title	Hours
This course is already required above and also fulfills the integrative requirement.		
HIST 2220	History of Technology	

## Required General Elective

Code	Title	Hours
Complete 4 semester hours of academic, nonremedial, nonrepetitive courses.		4

## Major GPA Requirement

Minimum 2.000 GPA required in ME courses

Minimum 2.000 GPA required in all HIST courses

## Program Requirement

141 total semester hours required

<sup>1</sup> Students can substitute Engineering Design (GE 1110) and Engineering Problem Solving and Computation (GE 1111) for Cornerstone of Engineering 1 (GE 1501) and Cornerstone of Engineering 2 (GE 1502) in approved situations.

## Plan of Study

### Sample Plans of Study

#### Four Years, One Co-op in Spring/Summer 1

Year 1								
Fall	Hours	Spring	Hours	Summer 1	Hours	Summer 2	Hours	Hours
CHEM 1151 (ND)		4 GE 1502 (ER)		4 Vacation		0 Vacation		0

**Total Hours: 141**

## Mechanical Engineering and Physics, BSME

This undergraduate program takes advantage of the physical similarities between mechanical engineering and physics, providing students with the opportunity to pursue studies that explore both topics. The program culminates with mechanical engineering capstone design.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirement

Code	Title	Hours
<b>Required Engineering</b>		
ME 2340 and ME 2341	Introduction to Material Science and Lab for ME 2340	5
ME 2350	Statics	4
ME 2355 and ME 2356	Mechanics of Materials and Lab for ME 2355	5
ME 2380 and ME 2381	Thermodynamics and Recitation for ME 2380	4
ME 3455 and ME 3456	Dynamics and Lab for ME 3455	5
ME 3475 or ME 3480	Fluid Mechanics International Applications of Fluid Mechanics	4
ME 4505 and ME 4506	Measurement and Analysis with Thermal Science Application and Lab for ME 4505	5
ME 4508 or ME 4565	Mechanical Engineering Computation and Design Introduction to Computational Fluid Dynamics	4
ME 4550	Mechanical Engineering Design	4
ME 4555	System Analysis and Control	4
ME 4570	Thermal Systems Analysis and Design	4
<b>Mechanical Engineering Capstone</b>		
MEIE 4701	Capstone Design 1	1
MEIE 4702	Capstone Design 2	5
<b>Supplemental Credit</b>		
2 semester hours from the following course counts toward the engineering requirement:		2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
3 semester hours from the following course counts toward the engineering requirement:		3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

### Mathematics/Science Requirement

Code	Title	Hours
<b>Required Mathematics/Science</b>		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4

MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1161 and PHYS 1162 and PHYS 1163	Physics 1 and Lab for PHYS 1161 and Recitation for PHYS 1161	5
PHYS 1165 and PHYS 1166 and PHYS 1167	Physics 2 and Lab for PHYS 1165 and Recitation for PHYS 1165	5
PHYS 2303	Modern Physics	4
PHYS 2371 and PHYS 2372	Electronics and Lab for PHYS 2371	4
PHYS 3600	Advanced Physics Laboratory	4
PHYS 3601	Classical Dynamics	4
PHYS 3602	Electricity and Magnetism 1	4
PHYS 5318	Principles of Experimental Physics	4

**Advanced Physics Elective**

Complete one 4-semester-hour course from the following: 4

PHYS 4606	Mathematical and Computational Methods for Physics	
PHYS 4621	Biological Physics 1	
PHYS 4623	Medical Physics	
PHYS 4651	Medical Physics Seminar 1	
PHYS 4652	Medical Physics Seminar 2	
PHYS 5113	Particle Physics	
PHYS 5116	Network Science 1	
PHYS 5117	Advanced Astrophysics Topics	
PHYS 5118	General Relativity and Cosmology	
PHYS 5125	Advanced Quantum Mechanics	
PHYS 5260	Introduction to Nanoscience and Nanotechnology	

**Supplemental Credit**

1 semester hour from the following course counts toward the mathematics/science requirement: 1

GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
---------	---	--

**Professional Development**

Code	Title	Hours
<b>Professional Development</b>		
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1

**Additional Required Courses**

1 semester hour from the following course counts toward the professional development requirement: 1

GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
---------	---	--

1 semester hour from the following course counts toward the professional development requirement: 1

GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	
---------	---	--

**Writing Requirements**

Code	Title	Hours
<b>Writing</b>		
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3315	Advanced Writing in the Technical Professions Interdisciplinary Advanced Writing in the Disciplines	4

**Required General Electives**

Code	Title	Hours
Complete 8 semester hours of academic, nonremedial, nonrepetitive courses.		8

## Integrative Requirement

Code	Title	Hours
This course is already required above and also fulfills the integrative requirement.		
PHYS 5318	Principles of Experimental Physics	

## Major GPA Requirement

2.000 minimum GPA required in IE, ME, and MEIE courses

## Program Requirement

139 total semester hours required

<sup>1</sup> Students may substitute Engineering Design (GE 1110) and Engineering Problem Solving and Computation (GE 1111) for Cornerstone of Engineering 1 (GE 1501) and Cornerstone of Engineering 2 (GE 1502) in approved situations.

		General elective	4
	<b>0</b>		<b>17</b>

Total Hours: 139

**Notes:**

Physics courses are offered on the following schedule:

- Modern Physics (PHYS 2303) offered every fall, spring, and summer 2.
- Electronics (PHYS 2371) and Lab for PHYS 2371 (PHYS 2372) offered every fall.
- Advanced Physics Laboratory (PHYS 3600) offered every summer 1 and summer 2.
- Classical Dynamics (PHYS 3601) is offered fall and spring semesters of even years only. Please meet with your COS academic advisor to discuss scheduling options for year 4 of odd years.
- Electricity and Magnetism 1 (PHYS 3602) offered every fall and spring.
- Electricity and Magnetism 2 (PHYS 3603) offered fall (even years) and summer 1 (odd years).
- Quantum Mechanics (PHYS 4115) offered every fall and spring.
- Thermodynamics and Statistical Mechanics (PHYS 4305) offered every spring and summer 2 (even years).
- Biological Physics 1 (PHYS 4621) offered spring (odd years) and fall (even years).
- Medical Physics (PHYS 4623) offered summer 1 and fall (even years).
- Medical Physics Seminar 1 (PHYS 4651) offered spring and fall (odd years).
- Medical Physics Seminar 2 (PHYS 4652) offered every spring.
- Principles of Experimental Physics (PHYS 5318) offered every spring.

## Aerospace, Minor

This aerospace minor provides an opportunity for students to gain fundamental knowledge in science and technology of navigation in the air. These fundamentals are covered by a total of five courses, with courses on flight and propulsion, as well as in mechanics/structures, thermofluids, and guidance and navigation.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Courses

Code	Title	Hours
<b>Core Courses</b>		
ME 3465	Introduction to Flight	4
ME 3470	Aeronautical Propulsion	4
<b>Guidance and Navigation Course</b>		
ME 5554	Robotics Sensing and Navigation	4
<b>Structures Course</b>		
Complete one of the following:		4
ME 4520	Mechanical Vibration	
ME 5655	Dynamics and Mechanical Vibration	
<b>Combustion and Aerodynamics Course</b>		
Complete one of the following:		4
ME 4565	Introduction to Computational Fluid Dynamics	
ME 5690	Gas Turbine Combustion	
ME 5695	Aerodynamics	

### GPA Requirement

Minimum 2.000 GPA required in the minor

### Credit Requirement

20 semester hours required

## Biomechanical Engineering, Minor

This minor provides an opportunity for students to explore the interaction between mechanical engineering and health. Recommended for students interested in aspects of engineering related to human kinematics, including biomedical devices, joint injury, prosthetic development, human-machine systems, and/or prosthetics.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

#### Required Biology

Code	Title	Hours
<b>Biology 1</b>		
BIOL 1111 and BIOL 1112	General Biology 1 and Lab for BIOL 1111	5
<b>Anatomy and Physiology</b>		
BIOL 2217 and BIOL 2218	Integrated Anatomy and Physiology 1 and Lab for BIOL 2217	5

#### Required Mechanical Engineering

Code	Title	Hours
ME 5665	Musculoskeletal Biomechanics	4
MEIE 4701	Capstone Design 1	1
MEIE 4702	Capstone Design 2	5

### Technical Elective

Additional electives may be approved by your academic advisor.

Code	Title	Hours
Complete one of the following:		4-5
IE 4520	Stochastic Modeling	
IE 4522 and IE 4523	Human-Machine Systems and Lab for IE 4522	
ME 4640	Mechanical Behavior and Processing of Materials	
ME 5650	Advanced Mechanics of Materials	
ME 5655	Dynamics and Mechanical Vibration	
PHYS 4621	Biological Physics 1	

### GPA Requirement

2.000 GPA required in the minor

## Healthcare System Operations, Minor

The objective of the minor in healthcare system operations is to prepare students to apply industrial and systems engineering methods in healthcare applications. Distinct from other service industries, healthcare systems are characterized by extensive complexities driven by communication between and interdependencies among multiple actors, and the need to simultaneously address multiple competing objectives pertaining to economic, quality-driven, individual-driven, and population-driven goals. This minor will benefit students by highlighting the unique features of this industry and methods for addressing its unique challenges to engineer improvements to the design, operation, and management of healthcare systems.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Courses

At most, one course from the minor may be counted toward major requirements.

Code	Title	Hours
<b>Required Courses</b>		
IE 5617	Lean Concepts and Applications	4
IE 5400 or IE 3500	Healthcare Systems Modeling and Analysis Introduction to Healthcare Systems Engineering	4
PHTH 1260	The American Healthcare System	4
<b>Electives</b>		
Complete one of the following:		4
IE 5374	Special Topics in Industrial Engineering (System Dynamics in Healthcare)	
IE 5500	Systems Engineering in Public Programs	
IE 5640	Data Mining for Engineering Applications	
NRSG 5121	Epidemiology and Population Health	
PHTH 4511	Healthcare Management	
PHTH 5226	Strategic Management and Leadership in Healthcare	
PHTH 5232	Evaluating Healthcare Quality	
SCHM 3315	Managing Healthcare Operations and Supply Chain	

### GPA Requirement

2.000 GPA required in the minor

## Industrial Engineering, Minor

This minor provides an opportunity for students to explore core aspects of industrial engineering, including mathematical foundations, along with a technical focus into one of the many industrial engineering subdisciplines. This minor is not open to students majoring in Industrial Engineering.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Courses

Code	Title	Hours
IE 2310	Introduction to Industrial Engineering	4
IE 4515	Operations Research	4
IE 3412	Engineering Probability and Statistics (or equivalent)	4

### Technical Elective

Consult mechanical and industrial engineering academic advisor for additional electives.

Code	Title	Hours
Complete one of the following:		4
IE 3425	Engineering Database Systems	
IE 4510	Simulation Modeling and Analysis	
IE 4512	Engineering Economy	
IE 4516	Quality Assurance	
IE 4520	Stochastic Modeling	
IE 4522 and IE 4523	Human-Machine Systems and Lab for IE 4522	
IE 4525	Logistics and Supply Chain Management	
IE 4530	Manufacturing Systems and Techniques	

### GPA Requirement

2.000 GPA required in the minor

## Mechanical Engineering, Minor

This minor provides an opportunity for students to explore core aspects of mechanical engineering, including mechanical and thermofluid foundations, along with a technical focus into one of the mechanical engineering disciplines (mechanics, thermofluids, materials, and/or controls). This minor is not open to students majoring in Mechanical Engineering.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Courses

Code	Title	Hours
ME 2350	Statics	4
ME 2380	Thermodynamics	4

### Mechanical Engineering Technical Electives

Code	Title	Hours
Complete two of the following:		8
ME 2340	Introduction to Material Science	
ME 2355	Mechanics of Materials	
ME 3455	Dynamics	
ME 3475	Fluid Mechanics	
or ME 3480	International Applications of Fluid Mechanics	
ME 4508	Mechanical Engineering Computation and Design	
or ME 4565	Introduction to Computational Fluid Dynamics	
ME 4550	Mechanical Engineering Design	
ME 4555	System Analysis and Control	
ME 4570	Thermal Systems Analysis and Design	

### GPA Requirement

2.000 GPA required in the minor

## Robotics, Minor

The minor in robotics is open to all students in the university. The minor is designed for the student who would like a coherent background in the theory and practice of robotics.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Students need to complete the program requirements with at least three courses that are not part of their major required coursework.

### Required Courses

Code	Title	Hours
ME 3460	Robot Dynamics and Control	4
Complete one of the following:		4
EECE 2140	Computing Fundamentals for Engineers	
EECE 2160	Embedded Design: Enabling Robotics	
EECE 2210 and EECE 2211	Electrical Engineering and Lab for EECE 2210	

### Electives

Code	Title	Hours
Complete three of the following:		12
CS 4100	Artificial Intelligence	
CS 4610	Robotic Science and Systems	
EECE 4630	Robotics	
EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5554	Robotics Sensing and Navigation	
EECE 5639	Computer Vision	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
EECE 5580	Classical Control Systems	
IE 4522	Human-Machine Systems	
ME 5245	Mechatronic Systems	
ME 5250	Robot Mechanics and Control	

### GPA Requirement

2.000 GPA required in the minor

## Accelerated Bachelor/Graduate Degree Programs

The College of Engineering offers a number of bachelor's/graduate degree programs that allow students to accelerate the attainment of the graduate degree by applying graduate credits taken as an undergraduate toward both the undergraduate and graduate degrees. Degrees are earned sequentially, with the bachelor's degree attainment followed by coursework to complete the graduate degree. See additional information on accelerated bachelor/graduate degree programs (<https://registrar.northeastern.edu/article/plusone-program-accelerated-bachelorgraduate-degree-programs/>).

## Bouvé College of Health Sciences

Website (<https://bouve.northeastern.edu/>)

**Carmen C. Sceppa, MD, PhD, FGSA**, Dean

**Jennifer Kirwin, PharmD, BCPS, FNAP**, Associate Dean for Academic Affairs  
Clinical Professor—Department of Pharmacy and Health Systems Sciences, School of Pharmacy

Bouvé College of Health Sciences Office of the Dean  
Behrakis Health Sciences Center  
617.373.3323  
[Bouve\\_College\\_of\\_Health\\_Sciences@northeastern.edu](mailto:Bouve_College_of_Health_Sciences@northeastern.edu)

Office of Student Services  
Behrakis Health Sciences Center  
617.373.3320  
617.373.8994 (fax)  
[bouvestudentservices@northeastern.edu](mailto:bouvestudentservices@northeastern.edu)

The Bouvé College of Health Sciences strongly supports the mission of Northeastern University as a practice-oriented, student-centered, experiential research institution. The college is committed to the goals of the university, which include excellence in education, research, scholarship, clinical practice, experiential learning, access to educational opportunities, and a strong professional orientation.

Bouvé offers students an education in health, health profession fields, and public health that features a curriculum of highly relevant, closely integrated, basic and applied courses in the physical, biological, behavioral, social, environmental, and health systems sciences. Students engage in interprofessional patient care, interdisciplinary translational research, and experiential learning opportunities through the university's signature cooperative education program, as well as through service-learning, research, and global experiences.

Bouvé leverages interdisciplinary and interprofessional collaboration to tackle the world's most pressing health challenges. The college seeks to prepare students to become clinicians, researchers, and leaders in healthcare and in the promotion of health of individuals and populations.

Students are provided a broad range of services and programs to ensure their academic success and enhance their overall educational experience at Northeastern University, from their first year through graduation. Faculty are deeply committed to student success, as students interact with world-class healthcare and educational institutions nationally and globally, to advance health for all.

### Academic Requirements

Students are responsible for following the program requirements for their respective major, pattern of attendance, and graduation year. Students are responsible for monitoring their own progress through the curriculum by registering for the courses stipulated by their curriculum plan, abiding by course prerequisites, regularly checking their degree audits, and knowing the consequences for unsatisfactory academic progress. Any exceptions to a student's curriculum plan will be determined by protocols established by the program, after consultation with the student's academic advisor.

The minimum passing grade for a course within a curriculum is stipulated in the program requirements published in this catalog. The minimum passing grade required for certain NUpath writing-intensive courses is established by the university and can be viewed here (p. 118). For a course where the minimum passing grade is not established in the program requirements published in this catalog, the university's minimum passing grade for the course will be accepted.

### ACADEMIC PROGRESSION WITHIN BOUVÉ

- First-year students must complete the minimum semester hours outlined by the university Academic Progression Standards (p. 88) and meet all major/program prerequisite course requirements to progress to sophomore status.
- Students who incur an incomplete grade in a prerequisite course may not progress into the subsequent courses(s). Any exceptions will be determined by protocols established by the program, after consultation with the student's academic advisor. See Clearing an Academic Deficiency (p. 62) and Requesting and Clearing an Incomplete Grade (p. 75) in this catalog for more detail.
- Please see each major/program's requirements page in this catalog for progression requirements specific to that program.

### GRADE-POINT AVERAGE

Bouvé College does not permit the use of a hand-calculated GPA under any circumstances. All GPA calculations will be performed by the university's standard process.

### ACADEMIC DISMISSAL FROM MAJOR

Students in the Bouvé College of Health Sciences will be dismissed from their major/program effective the following academic semester for failure to earn the minimum required grade in the same course twice. Additional grounds for academic dismissal specific to each major can be found on the program requirements page of the major in this catalog.

*Note:* Students dismissed from their major/program but who are otherwise in good standing with the university are allowed to remain at Northeastern University for up to two semesters as a provisional Bouvé student, by the end of which, the student is expected to move into a new major. If not moved into a new major by the end of two semesters, the student will be blocked from further registration.

### ACADEMIC DISMISSAL FROM THE UNIVERSITY

When a Bouvé College of Health Sciences student is dismissed from the university, they are not permitted to remain registered for courses in the immediate next academic term. If the university dismissal is successfully appealed, a student may register for classes in the following academic term.

### UNDERGRADUATE STUDENT ACADEMIC PETITIONS

Students must submit petitions to relevant offices on campus to request any of the following:

- A leave of absence ([https://registrar.northeastern.edu/article/leaves-of-absence/#\\_ga=23198246213602604761646661280-14098481791605034500](https://registrar.northeastern.edu/article/leaves-of-absence/#_ga=23198246213602604761646661280-14098481791605034500)).
- A waiver of policy (see department-specific web forms (<https://bouve.northeastern.edu/student-services/webforms/>)).
- A change in major (see Bouvé Change of Major form (<https://forms.office.com/Pages/ResponsePage.aspx?id=gcLuqKOqrk2sm5o5i5IV53Z7F2qgmd5CtIWtwVVJ6U1UNzFFUTE4NzlaUjBHNUVCMU5ZQzNOUDVETCQIQCN0PWcu>)).
- A declaration of a Bouvé minor (see Bouvé Minors Request form (<https://forms.office.com/Pages/ResponsePage.aspx?id=gcLuqKOqrk2sm5o5i5IV53cVYcVHFMBAtH5dQoBPBm9UMjNCMIhWVVJWN0JETIhDUjVLOEhEWIdKWi4u>)).
- A Late Course Registration (<https://registrar.northeastern.edu/article/late-course-registration/>).
- A directed study request (see Individual Instruction Registration (<https://registrar.northeastern.edu/article/individual-instruction-registration/>)).
- A request to take two courses while on co-op (see Petition Registration form (<https://registrar.northeastern.edu/wp-content/uploads/sites/9/form-pet-reg-14.pdf>)). Please note: Taking one course while on co-op does not require this form. Taking any course(s) while on co-op requires "I Am Here" participation.
- Preapproval for a course to be taken for transfer credit (requires petition process with academic advisor).
- A different course of action regarding their academic standing, progression, probation, or dismissal. This is also known as an Academic Appeal, see below. This requires a formal petition to the unit's academic standing committee, see department-specific web forms (<https://bouve.northeastern.edu/student-services/webforms/>).

### ACADEMIC PROBATION PROCEDURE

Academic standing is determined at the conclusion of every term, and students on academic probation are notified via email.

Students on probation are required to meet with their advisor before the end of week 2 of their probationary semester to complete an Academic Probation Contract (<https://bouve.northeastern.edu/student-services/webforms/>).

Once the contract is completed and signed, students are required to submit it to both their program and their Student Services designee, no later than the end of week 3 of the probationary term. Failure to submit an Academic Probation Contract in a timely manner may result in dismissal from the college.

The program will review the student's contract and provide any additional feedback or recommendations for the student and return a signed copy to the student.

Advisors will meet with students on academic probation throughout the semester to benchmark progress and assess compliance with the contract during weeks 4, 10, and 12.

A review of the student's progress will occur at the end of the term.

- If a student returns to good standing, they will no longer be on academic probation.
- If a student does not return to good academic standing, their compliance with their contract will be reviewed:
  - If a student was compliant with the contract, they will be required to submit a second Academic Probation Contract to the unit.
  - If a student did not comply with the contract, they may be dismissed from Bouvé with an option to appeal.

### UNDERGRADUATE STUDENT ACADEMIC APPEALS

Students who believe that they were erroneously, capriciously, or otherwise unfairly treated in an academic or cooperative education decision may petition to appeal the decision. Details about the process for undergraduate students may be found in *Appeals Policies and Procedures* in the university Undergraduate Student Handbook (<http://www.northeastern.edu/osccr/code-of-student-conduct/>) supplemented by the college-specific policies and procedures below.

**Step 1.** For appeals concerning a course grade, students should discuss their concerns with the course instructor or unit head offering the course as outlined in the Undergraduate Student Handbook (<http://www.northeastern.edu/osccr/code-of-student-conduct/>). If the concern remains unresolved after these conversations, the student should prepare an appeal to the college level, see Step 5, below.

For all other academic appeals, including decisions concerning academic standing or progression or co-op, students should discuss their concerns with the academic advisor and prepare an appeal statement for submission to the unit level as shown in the step below. Bouvé undecided students should begin at Step 4, below. For appeals concerning a professionalism determination (when applicable to a student's program/major), the student should discuss their concerns with the program director.

The Disability Resource Center (<http://www.northeastern.edu/drc/>) provides an appeal process for students with disabilities who believe their accommodation requests were unduly denied. Appeals arising from allegations of discrimination or harassment on the basis of a protected category should be referred to the Office for University Equity and Compliance (<https://www.northeastern.edu/ouec/>). For appeals concerning student conduct, including academic integrity, please refer to the process outlined in the Code of Student Conduct.

**Step 2.** If the concern remains unresolved after informal discussions or if the concern pertains to an academic determination as outlined above, the student should prepare and submit an appeal statement. Students are encouraged to work with their advisor to complete the necessary forms.

**Step 3: BCHS Unit-Level Appeal** When appealing a decision to the unit level, students should submit a request to appeal and submit the appeal statement within 30 working days of the day when the student learns of the academic determination in question. The unit-level Academic Standing Committee must provide the student with a written report of the finding(s) and decision within 10 business days according to their established procedures.

**Step 4: Department Chair- or School Dean-Level Appeal** If the student believes they have been erroneously, capriciously, or otherwise unfairly treated with the unit-level committee's decision, they may pursue a secondary appeal to the next level as specified below:

School of Clinical and Rehabilitation Sciences: department chair of the unit offering the course or program

School of Community Health and Behavioral Sciences: department chair of the unit offering the course or program

School of Nursing: school dean

School of Pharmacy: school dean

Bouvé Undecided: BCHS associate dean of academic affairs

The student must request the appeal by contacting the specified office in writing via email within 10 business days of receiving the report from the previous step. After consideration, the department chair or school dean, or their representative, shall provide the student and involved faculty member with a written report of their finding(s) and decision within 10 business days of receiving the appeal request.

**Step 5. College-Level Appeal** If the student is not satisfied with the disposition of the matter at the previous step, they may proceed with the appeal through the BCHS Academic Affairs Committee. The BCHS AAC hears cases that have been unsatisfactorily resolved at the prior school and unit levels for "students who believe that they have been erroneously, capriciously, or otherwise unfairly treated" or may directly hear appeals concerning course grades or when a unit does not have a unit-level committee.

The student must request an appeal hearing in writing (via email) within 10 business days of receiving the report from the previous step or the grade in question. After consideration, the college dean or their representative, shall provide the student and involved faculty member with a written report of their finding(s) and decision within 10 business days of receiving the appeal request.

Processes for College-Level Appeals to the BCHS AAC:

- Students wishing to bring an appeal before the college AAC should first consult with their appointed academic advisor, or when the appeal involves the academic advisor, with the assistant dean of student services.
- The chair of the college AAC will convene the college appeals panel from among the regular members of the BCHS AAC. The appeals panel will include three voting members of the BCHS AAC that appropriately represent the breadth and depth of programs within the college. At minimum, two schools will be represented on the panel and at least one member who teaches within a similar degree-level program. Members of the panel shall have no known conflicts of interest with the student. The assistant dean of student services and the chair of the AAC will attend the appeal panel hearing as nonvoting members.
- A chair for the college appeal panel shall be selected from among the panel members and is responsible for producing a formal recommendation of the committee for communication to the college dean.
- The chair of the AAC will be responsible for scheduling the meeting, notifying the student and other participants in a timely manner so they may attend, and keeping and archiving records of the proceedings according to committee procedures.
- The chair of the college appeal panel will notify the college dean of the findings and recommended decision. The college dean will have the final decision.
- The college dean will notify the student and other relevant parties of the decision in writing no later than 10 business days after the decision.

**Step 6. University-Level Appeal** If the student is not satisfied with the college's disposition of the matter, or if the appeal is not resolved within 30 working days (six calendar weeks) after having been submitted to the college in the previous step, they may appeal the matter to the university level. The student shall submit a request in writing, within 10 working days (two calendar weeks) of the finding of the college in the previous step, to the vice provost for undergraduate programs and policies that the university convene an academic appeals resolution committee to review the issue. See the Undergraduate Student Handbook (<http://www.northeastern.edu/osccr/code-of-student-conduct/>) for more information.

### **OTHER POLICIES AND PROCEDURES**

In addition to policies and procedures referenced here, the following policies and procedures published in Bouvé's graduate catalog also apply to Bouvé's undergraduate students:

- Health Certification (<http://catalog.northeastern.edu/graduate/health-sciences/academic-policies-procedures/health-certification/>)
- Requirements for Clinical, Internships, and Practicum Courses (<http://catalog.northeastern.edu/graduate/health-sciences/academic-policies-procedures/practicum-internship-policies/>)
- Background Checks (<http://catalog.northeastern.edu/graduate/health-sciences/academic-policies-procedures/background-checks/>)
- Liability Insurance (<http://catalog.northeastern.edu/graduate/health-sciences/academic-policies-procedures/liability-insurance/>)

## Interdisciplinary Programs

### Combined Majors

- Business Administration and Public Health, BS (p. 607)
- Communication Studies and Speech-Language Pathology and Audiology, BS (p. 368)
- Data Science and Health Science, BS (p. 906)
- Environmental Engineering and Health Science, BSEnvE (p. 1044)
- Health Humanities and Health Science, BS (p. 1175)
- Health Science and Business Administration, BS (p. 632)
- Health Science and Communication Studies, BS (p. 371)
- Health Science and Psychology, BS (p. 1187)
- Health Science and Sociology, BS (p. 1192)
- Linguistics and Speech-Language Pathology and Audiology, BS (p. 1196) (<http://catalog.northeastern.edu/undergraduate/science/linguistics/linguistics-speech-language-pathology-bs/>)
- Health Humanities and Public Health, BA (p. 1199)
- Public Health and Communication Studies, BA (p. 316)
- Public Health and Cultural Anthropology, BA (p. 1209)
- Public Health and Journalism, BA (p. 429)
- Public Health and Sociology, BA (p. 1218)

### Minors

- Communication Sciences and Disorders (p. 1223)
- Early Intervention (p. 1224)
- Exercise Science (p. 1225)
- Global Health (p. 1326)
- Health Psychology (p. 1226)
- Health Sciences Entrepreneurship (p. 1227)
- Health, Humanities, and Society (p. 1228)
- Healthcare System Operations (p. 1148)
- Human Movement Science (p. 1251)
- Mindfulness Studies (p. 1231)
- Nutrition (p. 1232)
- Pharmaceutical Sciences (p. 1233)
- Public Health (p. 1234)
- Speech-Language Pathology and Audiology (p. 1236)
- Wellness Studies (p. 1237)

## Business Administration and Public Health, BS

### Overview

The combined Bachelor of Science in Business Administration and Public Health offers students an opportunity to study a curriculum that is synergistic with the growing field of healthcare and public health. This academic combination provides students with the knowledge and expertise needed to enter a multitude of careers upon graduation. The degree allows students the unique opportunity to better understand the business side of the healthcare industry and public health administration and prepares them to be leaders.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Business Administration Requirements

Code	Title	Hours
<b>Required Courses</b>		
ACCT 1201	Financial Accounting and Reporting	4
ACCT 2301	Managerial Accounting	4
INTB 1203	International Business and Global Social Responsibility	4
ORGB 3201	Organizational Behavior	4
<b>Business Electives</b>		
Complete two of the following:		8
FINA 2201	Financial Management	
INNO 2301	Innovation!	
MISM 2301	Introduction to Information Systems and Digital Technologies	
MKTG 2201	Introduction to Marketing	
SCHM 2301	Supply Chain and Operations Management	
<b>Supporting Courses for Business</b>		
ECON 1116 and ECON 1126	Principles of Microeconomics and Recitation for ECON 1116	4
MATH 1231	Calculus for Business and Economics	4

### Business Concentration

Complete one of the following concentrations. Requirements for the concentrations are listed below.

- Accounting (p. 654)
- Accounting and Advisory Services (p. 655)
- Brand Management (p. 656)
- Business Analytics (p. 657)
- Corporate Innovation (p. 658)
- Entrepreneurial Startups (p. 659)
- Family Business (p. 660)
- Finance (p. 661)
- Fintech (p. 662)
- Healthcare Management and Consulting (p. 664)
- International Business (p. 665)(available only as a second concentration)
- Management (p. 666)
- Management Information Systems (p. 667)
- Marketing (p. 668)
- Marketing Analytics (p. 669)

- Social Innovation and Entrepreneurship (p. 670)
- Supply Chain Management (p. 671)

## Public Health Requirements

Code	Title	Hours
<b>Public Health Core Courses</b>		
PHTH 1260 or PHTH 1261	The American Healthcare System Comparative Healthcare Systems	4
PHTH 2300 or PHTH 2301	Communication Skills for the Health Professions Communication Skills for the Health Professions—Global	4
PHTH 2350 or PHTH 2351	Community and Public Health Community and Public Health - Global	4
PHTH 2515	Healthcare Policy and Administration	4
PHTH 4120	Global Perspectives on Discrimination and Health	4
PHTH 4202	Principles of Epidemiology in Medicine and Public Health	4
PHTH 4540	Health Education and Program Planning	4
<b>Science Core Courses</b>		
PSYC 1101	Foundations of Psychology	4
<i>Biology</i>		
Complete one of the following options:		8-10
Option 1		
BIOL 1141	Microbes and Society	
BIOL 1147	The Human Organism	
Option 2		
BIOL 1111 and BIOL 1112	General Biology 1 and Lab for BIOL 1111	
BIOL 1113 and BIOL 1114	General Biology 2 and Lab for BIOL 1113	
<b>Social Science Course</b>		
Complete one of the following courses:		3-4
<i>Society and Behavior</i>		
COMM 3201	Health Communication	
ECON 3420	Urban Economic Issues	
HLTH 5280	The (in)Visibility of (dis)Ability in Society	
PHTH 5222	Health Advocacy	
PSYC 3402	Social Psychology	
PSYC 3404	Developmental Psychology	
PSYC 3450	Learning and Motivation	
<i>Globalization and Global Health</i>		
ECON 3404	International Food Policy	
PHTH 5230	Global Health	
<i>Environmental Health and Climate Change</i>		
ECON 3423	Environmental Economics	
PHTH 5214	Environmental Health	
<i>Law, Policy, and Human Rights</i>		
ECON 3424	Law and Economics	
PHTH 4515	Critical Issues in Health and Public-Health Policy	
<i>Healthcare Administration and Management</i>		
ECON 3413	Health Economics and Healthcare Policy	
PHTH 5232	Evaluating Healthcare Quality	
PHTH 5234	Economic Perspectives on Health Policy	

**Supporting Courses**

Code	Title	Hours
<b>Introduction to College</b>		
Complete one of the following:		1
BUSN 1102	Personal Skill Development for Business	
HSCI 1000	College: An Introduction	
<b>Statistics</b>		
Complete one of the following:		4
MGSC 2301	Business Statistics	
PHTH 2210 and PHTH 2211	Foundations of Biostatistics and Recitation for PHTH 2210	
<b>Professional Development</b>		
Complete one of the following:		1
BUSN 1103	Professional Development for Business Co-op	
HSCI 2000	Professional Development for Bouvé Co-op	
<b>Writing Requirements</b>		
ENGW 1111	First-Year Writing	4
Complete one of the following:		4
ENGW 3304	Advanced Writing in the Business Administration Professions	
ENGW 3306	Advanced Writing in the Health Professions	
ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	
<b>Capstone Course</b>		
Complete one of the following options:		4
<i>DMSB Students</i>		
STRT 4501	Strategy in Action	
<i>Bouvé Students</i>		
HSCI 4700	Health Science Capstone Introduction	
HSCI 4720 or HSCI 4730 or HSCI 4740	Health Science Capstone—Service Health Science Capstone—Research Health Science Capstone Seminar	

**Integrative Requirement**

Code	Title	Hours
Complete one of the following:		4
MGMT 3340	Healthcare Management, Innovation, and Design	
PHTH 4511	Healthcare Management	

**Business GPA Requirement**

A minimum 2.000 GPA is required in all business courses.

**Business Cooperative Education Requirement**

Complete one six-month co-op experience.

**Public Health Major Requirement**

A grade of C or higher is required for all BIOL, HSCI, and PHTH courses.

**Program Requirement**

128 total semester hours required

## Communication Studies and Speech-Language Pathology and Audiology, BS

The combined Bachelor of Science in Communication Studies and Speech-Language Pathology and Audiology offers an interdisciplinary approach to human communication and its disorders. Coursework focuses on the scientific and theoretical frameworks of speech, language, and hearing. Students will also be introduced to the fundamentals of communication theory, and they have an opportunity to acquire the practical skills necessary to thrive in a complex and changing society. The curriculum is enhanced by experiential learning opportunities in a clinical setting that prepare the students for a variety of professional careers.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### First-Year Seminar

Code	Title	Hours
COMM 1000 or SLPA 1000	Communication Studies at Northeastern College: An Introduction	1

### Communication Studies Requirements

Code	Title	Hours
------	-------	-------

No more than two grades below a C in communication studies courses may be used to fulfill degree requirements.

#### Communication Studies Common Requirements

COMM 1101	Introduction to Communication Studies	4
COMM 1112 or COMM 2301	Public Speaking Communication Research Methods	4

#### Foundation Course

Complete one of the following: 4

COMM 1210	Persuasion and Rhetoric	
COMM 1225	Communication Theory	
COMM 1231	Principles of Organizational Communication	
COMM 1255	Communication in a Digital Age	

#### Cluster Course

Complete one of the following: 4

COMM 1131	Sex, Relationships, and Communication	
COMM 2303	Global and Intercultural Communication	
COMM 2304	Communication and Gender	
COMM 2501	Communication Law	
COMM 2551	Free Speech in Cyberspace	

#### Writing-Intensive Courses

Complete two of the following (COMM 3201 is strongly recommended): 8

COMM 3200	Mobile Communication	
COMM 3201	Health Communication	
COMM 3230	Interpersonal Communication	
COMM 3304	Communication and Inclusion	
COMM 3320	Political Communication	
COMM 3415	Communication Criticism	
COMM 3445	Public Relations Principles	
COMM 3500	Environmental Issues, Communication, and the Media	
COMM 3501	Free Speech: Law and Practice	
COMM 3530	Communication and Sexualities	
COMM 3532	Theories of Conflict and Negotiation	

COMM 4535	Nonverbal Social Interaction	
COMM 4605	Youth and Communication Technology	
COMM 4631	Crisis Communication and Image Management	
<b>Communication Studies Electives</b>		
Complete three COMM courses.		12

## Speech-Language Pathology and Audiology Requirements

Code	Title	Hours
All courses in these sections must be completed with a C or better.		
<b>SLPA Requirements</b>		
SLPA 1101	Introduction to Communication Disorders	4
SLPA 1102	Language Development	4
SLPA 1103	Anatomy and Physiology of Speech and Hearing Mechanism	4
SLPA 1200	Phonetics	4
SLPA 1203	Introduction to Audiology	4
SLPA 1205	Speech and Hearing Science	4
SLPA 2000	Introduction to Co-op	1
or EEAM 2000	Professional Development for Co-op	
SLPA 4500	Language Disorders across the Life Span	4
SLPA 4651	Speech Disorders across the Life Span	4
SLPA 5107	Clinical Procedures	4
SLPA 6219	Aural Rehabilitation	3

## Supporting Courses

Code	Title	Hours
BIOL 2217 and BIOL 2218	Integrated Anatomy and Physiology 1 and Lab for BIOL 2217	5
BIOL 2219 and BIOL 2220	Integrated Anatomy and Physiology 2 and Lab for BIOL 2219	5
ENGW 1111	First-Year Writing	4
HLTH 2100	Interprofessional Ethics for Individual and Population Health	4
PHTH 2210	Foundations of Biostatistics	4
PHTH 2300	Communication Skills for the Health Professions	4
PHYS 1145 and PHYS 1146	Physics for Life Sciences 1 and Lab for PHYS 1145	5
PSYC 1101	Foundations of Psychology	4

## Integrative Course

Code	Title	Hours
Note: The selected integrative course counts toward the COMM writing-intensive (COMM 3201) or COMM elective (COMM 4102) as appropriate.		
COMM 3201 or COMM 4102	Health Communication (WI) Health Communication Campaigns	

## Communication Studies Grade Requirement

No more than two grades below a C in communication studies courses may be used to satisfy degree requirements.

## Program Requirements

132 total semester hours required

## Plan of Study

### Sample 4 Years, 2 Co-ops

Year 1							
Fall	Hours	Spring	Hours	Summer 1	Hours	Summer 2	Hours
BIOL 2217 and BIOL 2218		5 BIOL 2219 and BIOL 2220		5 COMM 1112		4 Communication studies elective	4

COMM 1000 or SLPA 1000	1	SLPA 1101	4	Communication studies elective	4	General elective	4	4

SLPA 1203	4							
Communication studies cluster course	4							
	<b>18</b>		<b>0</b>			<b>0</b>		<b>0</b>

Year 3								
Fall	Hours	Spring	Hours	Summer 1	Hours	Summer 2	Hours	Hours
COMM 3409 or ENGW 3306	4	PHTH 2210		4	Vacation or optional co-op #2	0	Vacation or optional co-op #2	0
HLTH 2100 or PHIL 1165	4	SLPA 1102	4					
PHTH 2300	4	SLPA 1200	4					
Communication studies elective	4	Communication studies writing-intensive	4					
	<b>16</b>		<b>16</b>			<b>0</b>		<b>0</b>

Year 4								
Fall	Hours	Spring	Hours	Summer 1	Hours	Summer 2	Hours	Hours
SLPA 5107	4	COMM 3201	4					
SLPA 5110	4	SLPA 4651	4					
General elective	4	SLPA 6219	3					
General elective	4	General elective	4					
	<b>16</b>		<b>15</b>					

**Total Hours: 132**

A general elective or a COMM elective (e.g., Principles of Argumentation (COMM 1120)) can be taken to fulfill the NUpath Formal/Quantitative Reasoning (FQ) requirement.

## Data Science and Health Science, BS

The data science and health science combined major offers a solid academic and experiential foundation integrating studies in health administration, computer science, mathematics, and statistics. This program reflects the impact of data in modern healthcare and prepares students for success in careers in health administration, community-based health promotion, public health, and big data analysis.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Data Science Requirements

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or HSCI 1000	First Year Seminar College: An Introduction	1
CS 1210 or HSCI 2000	Professional Development for Khoury Co-op Professional Development for Bouvé Co-op	1
<b>Programming Sequence Pathways</b>		
Choose one of the two options:		12
<i>Computer Science Option</i>

DS 4420	Machine Learning and Data Mining 2	4
---------	------------------------------------	---

**Required General Electives**

Code	Title	Hours
Complete 16 semester hours general electives.		16

**Khoury College GPA Requirement**

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses

**Health Sciences Major Requirement**

A grade of C or higher is required for all BIOL, CHEM, HLTH, HSCI, MATH, and PHTH courses.

**NUpath Requirements Satisfied**

- Engaging with the Natural and Designed World
- Exploring Creative Expression and Innovation
- Interpreting Culture
- Conducting Formal and Quantitative Reasoning
- Understanding Societies and Institutions
- Analyzing and Using Data
- Engaging Differences and Diversity
- Employing Ethical Reasoning
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

**Program Requirement**

133 semester hours required

**Plan of Study****Four Years, One Co-op Sample Plan of Study**

## Environmental Engineering and Health Science, BSEnE

This intercollege combined major is designed for students who would like to explore their interest in the health sciences while earning the benefit of a Bachelor of Science degree in environmental engineering. The combined major reflects the respective departmental thrusts in environmental health and sustainable resource engineering to create awareness about the complex relationship between the environment and human health, prepare professionals in this growing area capable of providing engineering solutions to current and emerging topics related to environmental engineering and health sciences, and maintain healthy environmental systems by applying and developing techniques to reduce exposure to health hazards. This program combines the content of two majors to allow students to learn the breadth and depth of the convergence between public health and environmental engineering.

Our BS Environmental Engineering and Health Sciences program is ABET accredited. Visit the department website (<https://cee.northeastern.edu/academics/undergraduate-studies/cee-accreditation/>) for program objectives.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

NUPath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUPath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Engineering</b>		
CIVE 2221 and CIVE 2222	Statics and Solid Mechanics and Recitation for CIVE 2221	4
CIVE 2300 and CIVE 2301	Environmental Measurements in Natural and Engineered Systems and Lab for CIVE 2300	4
CIVE 2331	Fluid Mechanics and Hydraulics	4
CIVE 2334	Environmental Engineering: Principles, Technology, and Sustainability	4
CIVE 3435	Environmental Pollution: Fate and Transport	4
CIVE 4534 and CIVE 4535	Water Treatment Systems Design and Lab for CIVE 4534	4
CIVE 4765	Senior Design Project—Environmental	5
GE 3300	Energy Systems: Science, Technology, and Sustainability	4
<b>Technical Electives</b>		
Complete 8-9 semester hours from the following:		8-9
CIVE 2260 and CIVE 2261	Materials for the Built Environment and Lab for CIVE 2260	
CIVE 2340 and CIVE 2341	Geotechnical Engineering and Lab for CIVE 2340	
CIVE 3335	Environmental Engineering Chemistry and Chemical Technologies	
CIVE 4540	Resource Recovery and Waste Treatment Technologies Abroad	
CIVE 4566	Design for Sustainable Transportation: Netherlands	
CIVE 4777	Climate Hazards and Resilient Cities Abroad	
CIVE 5150	Climate and Atmospheric Change	
CIVE 5250	Organic Pollutants in the Environment	
CIVE 5255	Tools and Techniques of Environmental Health	
CIVE 5260	Environmental Fluid Mechanics	
CIVE 5261	Dynamic Modeling for Environmental Investment and Policymaking	
CIVE 5271	Solid and Hazardous Waste Management	

CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure
CIVE 5280	Remote Sensing of the Environment
CIVE 5281	Coastal Dynamics and Design
CIVE 5363	Climate Science, Engineering Adaptation, and Policy
CIVE 5366	Air Quality Engineering and Science
CIVE 5536	Hydrologic and Hydraulic Design
CIVE 5670	Global Biogeochemistry

**Supplemental Credit**

1 semester hour from the following course counts toward the engineering requirement:	1
CIVE 3464	Probability and Engineering Economy for Civil Engineering
3 semester hours from the following course count toward the engineering requirement:	3
CIVE 3430	Engineering Microbiology and Ecology
2 semester hours from the following course count toward the engineering requirement:	2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>
3 semester hours from the following course count toward the engineering requirement:	3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>

**Health Sciences Major Requirements**

Code	Title	Hours
PHTH 1260	The American Healthcare System	4
or PHTH 1261	Comparative Healthcare Systems	
PHTH 2210 and PHTH 2211	Foundations of Biostatistics and Recitation for PHTH 2210	4
PHTH 2350	Community and Public Health	4
or PHTH 2351	Community and Public Health - Global	
PHTH 2414	Environmental Health	4
PHTH 2515	Healthcare Policy and Administration	4
PHTH 4120	Global Perspectives on Discrimination and Health	4
PHTH 4202	Principles of Epidemiology in Medicine and Public Health	4
PHTH 4540	Health Education and Program Planning	4
PHTH 5214	Environmental Health	3-4
or CIVE 5255	Tools and Techniques of Environmental Health	

**Supporting Courses: Mathematics/Science**

Complete all Mathematics/Science courses with a minimum of 30 semester hours.<sup>2</sup>

Code	Title	Hours
<b>Required Mathematics/Science</b>		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
<b>Science Elective (Earth)</b>		
Complete one of the following:		4-5
ENVR 1120	Oceans and Coasts	
ENVR 1200	Dynamic Earth	
ENVR 2200	Earth's Changing Cycles	
ENVR 3125	Global Oceanic Change	
ENVR 3200	Water Resources	
ENVR 3600	Oceanography	

ENVR 5201	Geologic Field Seminar	
<b>Supplemental Credit</b>		
3 semester hours from the following course count toward the mathematics/science requirement:		3
CIVE 3464	Probability and Engineering Economy for Civil Engineering	
1 semester hour from the following course counts toward the mathematics/science requirement:		1
CIVE 3430	Engineering Microbiology and Ecology	
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	

### Professional Development

Code	Title	Hours
<b>Professional Development</b>		
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1

### Additional Required Courses

1 semester hour from the following course counts toward the professional development requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

### Writing Requirements

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3315	Advanced Writing in the Technical Professions Interdisciplinary Advanced Writing in the Disciplines	4

### Integrative Course

Code	Title	Hours
This course is already required above and also fulfills the integrative requirement.		
CIVE 4765	Senior Design Project—Environmental	

Engineering GPA Requirement

**A minimum 2.000 GPA is required in CIVE coursework**

### Health Sciences Major Requirement

**A minimum grade of C or higher is required for all HLTH and PHTH courses**

### Program Requirement

**132 total semester hours required**

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

<sup>2</sup> Mathematics/Science Requirement: CHEM 1151, MATH 1341, and PHYS 1151 require a grade of C- or higher.

## Health Humanities and Health Science, BS

### Overview

The combined Bachelor of Science in Health Humanities and Health Science is designed for students who would like to learn how to think about health using humanities, social sciences, and science skills. The humanities train students to navigate the complexities of interpersonal interaction and their ethical implications, to relate the micro to the macro and texts to contexts, to historicize encounters, to communicate accurately and effectively across a variety of media, and to engage in creative analytical thinking about healthcare. The landscape of healthcare is quickly changing, and this training is designed to equip students both for the diverse forms of healthcare professions that exist today and for the varieties of professions in the future. This combined major will appeal to students who want to pursue graduate study and research in public health, medicine, and other clinical professions.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Health Humanities Requirements

Code	Title	Hours
<b>Required Courses</b>		
INSH 1300	Introduction to Health and Humanities	4
INSH 2300	Culture, Technology, and the Future of Health	4
<b>Core Humanities Electives</b>		
Complete two of the following not used to satisfy another requirement:		8-9
AFAM 1101	Introduction to African American and Africana Studies	
ASNS 2245	Introduction to Asian American Studies	
ENGL 1400	Introduction to Literary Studies	
HIST 1200 and HIST 1201	Historical Research and Writing and First-Year Seminar	
PHIL 1101	Introduction to Philosophy	
PHIL 1110	Introduction to Religious Studies	
WMNS 1103	Introduction to Women's, Gender, and Sexuality Studies	
WMNS 1105	Introduction to Trans Studies	
<b>Core Health Humanities Electives</b>		
Complete three of the following not used to satisfy another requirement:		12
ENGL 2770	Writing to Heal	
ENGL 3700	Narrative Medicine	
HIST 1219	History of Global Pandemics	
HIST 2233	The History of Medicine in North America	
PHIL 1145	Technology and Human Values	
PHIL 1165	Moral and Social Problems in Healthcare	
WMNS 1225 or AFAM 1225 or HIST 1225	Gender, Race, and Medicine Gender, Race, and Medicine Gender, Race, and Medicine	
<b>Core Digital Health Humanities Electives</b>		
Complete two of the following not used to satisfy another requirement:		8
ARCH 5312	Mapping and Building Health	
ENGL 3460	The Archives of Public Health	
HIST 3344	The History of Western Public Health	

**Health Science Requirements**

## Health Science and Business Administration, BS

The combined major in health science and business administration provides students at Northeastern University with an opportunity to study a curriculum that is synergetic with the growing field of healthcare. This academic combination offers students the knowledge and expertise needed to enter a multitude of careers upon graduation. The degree allows students the unique opportunity to better understand the business side of the healthcare industry. The field is compatible with all the undergraduate concentrations in the School of Business and prepares students to enter the workforce after graduation.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Health Science Requirements

Code	Title	Hours
<b>Public Health Core</b>

## Health Science and Communication Studies, BS

The combined Bachelor of Science degree program in health science and communication studies offers an interdisciplinary approach to public health communication. Students combine courses from health sciences and communication studies to learn about health and illness and the important role of communication in shaping the public's understanding of health issues. The interdisciplinary curriculum is enhanced by experiential learning opportunities and is designed to prepare students for challenging careers that involve crafting messages about health, developing strategies for promoting healthcare services, and specific applications such as disease awareness and prevention.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Communication Studies Major Requirements

COMM 1101	Introduction to Communication Studies	4
COMM 1112	Public Speaking	4
or COMM 2301	Communication Research Methods	
Code	Title	Hours
Foundation Course		
Complete one of the following:		4
COMM 1210	Persuasion and Rhetoric	
COMM 1225	Communication Theory	
COMM 1231	Principles of Organizational Communication	
COMM 1255	Communication in a Digital Age	
Cluster Course		
Complete one of the following:		4
COMM 1131	Sex, Relationships, and Communication	
COMM 2303	Global and Intercultural Communication	
COMM 2304	Communication and Gender	
COMM 2501	Communication Law	
COMM 2551	Free Speech in Cyberspace	
Writing-Intensive		
Complete two of the following:		8
COMM 3200	Mobile Communication	
COMM 3201	Health Communication	
COMM 3230	Interpersonal Communication	
COMM 3304	Communication and Inclusion	
COMM 3320	Political Communication	
COMM 3415	Communication Criticism	
COMM 3445	Public Relations Principles	
COMM 3500	Environmental Issues, Communication, and the Media	
COMM 3501	Free Speech: Law and Practice	
COMM 3530	Communication and Sexualities	
COMM 3532	Theories of Conflict and Negotiation	
COMM 4535	Nonverbal Social Interaction	
COMM 4605	Youth and Communication Technology	
COMM 4631	Crisis Communication and Image Management	

**Communication Studies Electives**

Complete three additional communication studies courses.	12
--	----

**Health Science Requirements**

Code	Title	Hours
<b>Public Health Core</b>		
PHTH 1260 or PHTH 1261	The American Healthcare System Comparative Healthcare Systems	4
PHTH 2210 and PHTH 2211	Foundations of Biostatistics and Recitation for PHTH 2210	4
PHTH 2300 or PHTH 2301	Communication Skills for the Health Professions Communication Skills for the Health Professions—Global	4

<b>Life Sciences</b>		
BIOL 1111 and BIOL 1112	General Biology 1 and Lab for BIOL 1111	5
BIOL 1113 and BIOL 1114	General Biology 2 and Lab for BIOL 1113	5
CHEM 1161 and CHEM 1162 and CHEM 1163	General Chemistry for Science Majors and Lab for CHEM 1161 and Recitation for CHEM 1161	5
MATH 1241	Calculus 1	4
PSYC 1101	Foundations of Psychology	4

**Other Requirements**

Code	Title	Hours
<b>Intro to College</b>		
HSCI 1000 or COMM 1000	College: An Introduction Communication Studies at Northeastern	1
<b>Professional Development</b>		
HSCI 2000 or EEAM 2000	Professional Development for Bouvé Co-op Professional Development for Co-op	1
<b>Writing</b>		
ENGW 1111	First-Year Writing	4
ENGW 3306	Advanced Writing in the Health Professions (or other Advanced Writing course)	4
<b>Electives</b>		
Complete 28 semester hours of electives.		28

**Integrative Course**

Code	Title	Hours
<b>Capstone</b>		
Complete one of the following courses:		4
COMM 4102	Health Communication Campaigns	
HSCI 4720	Health Science Capstone—Service	
HSCI 4730	Health Science Capstone—Research	

**Health Sciences Major Requirement**

A grade of C or higher is required for all BIOL, CHEM, HLTH, HSCI, MATH, and PHTH courses.

## Communication Studies Major Requirement

No more than two grades below a C in communication studies courses may be used to fulfill degree requirements.

### Program Requirement

133 total semester hours required

### Plan of Study

## Health Science and Psychology, BS

The combined Bachelor of Science degree program in health science and psychology is designed to provide an interdisciplinary approach to public health and psychology. Through interdisciplinary explorations, students have the opportunity to develop knowledge in health promotion and illness prevention by way of understanding people's behaviors, perceptions, and emotions within the contexts of relationships and culture. This highly flexible curriculum is enhanced by experiential learning opportunities and prepares students to practice in interdisciplinary settings and be successful in sustaining and promoting health across populations.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Health Science Requirements

Code	Title	Hours
<b>Public Health Core</b>		
PHTH 1260 or PHTH 1261	The American Healthcare System Comparative Healthcare Systems	4
PHTH 2300 or PHTH 2301	Communication Skills for the Health Professions Communication Skills for the Health Professions—Global	4
PHTH 2350 or PHTH 2351	Community and Public Health Community and Public Health - Global	4
PHTH 2515	Healthcare Policy and Administration	4
PHTH 4120	Global Perspectives on Discrimination and Health	4
PHTH 4540	Health Education and Program Planning	4
<b>Supporting Courses for Health Science</b>		
BIOL 1111 and BIOL 1112	General Biology 1 and Lab for BIOL 1111	5
BIOL 1113 and BIOL 1114	General Biology 2 and Lab for BIOL 1113	5
CHEM 1161 and CHEM 1162 and CHEM 1163	General Chemistry for Science Majors and Lab for CHEM 1161 and Recitation for CHEM 1161	5

### Psychology Requirements

Code	Title	Hours
<b>Required Courses</b>		
PSYC 1101	Foundations of Psychology	4
PSYC 3458	Biological Psychology	4
<b>Statistics</b>		
Complete the following course. Students who receive transfer credit for the Advanced Placement Statistics exam may complete the 1 SH PSYC 2315 course (requires department permission).		4-5
PSYC 2320	Statistics in Psychological Research	
<b>Personal/Social Bases of Behavior (Area A)</b>		
Complete two of the following:		8
PSYC 3400	Personality	
PSYC 3402	Social Psychology	
PSYC 3404	Developmental Psychology	
PSYC 3406	Clinical Psychology and Mental Health	
<b>Biological/Cognitive Bases of Behavior (Area B)</b>		
Complete one of the following:		4
PSYC 3450	Learning and Motivation	

PSYC 3452	Sensation and Perception	
PSYC 3464	Psychology of Language	
PSYC 3466	Cognition	

**Psychology Electives**

Complete 12 semester hours from the following subject area: 12  
PSYC

**Psychology Lab**

Complete one of the following: 4

PSYC 4600	Laboratory in Research Design	
PSYC 4604	Laboratory in Learning and Motivation	
PSYC 4606	Laboratory in Biological Psychology	
PSYC 4610	Laboratory in Psycholinguistics	
PSYC 4612	Laboratory in Cognition	
PSYC 4614	Laboratory in Social Psychology	
PSYC 4616	Laboratory in Personality	
PSYC 4622	Laboratory in Sensation and Perception	
PSYC 4624	Laboratory in Affective Science	
PSYC 4626	Laboratory in Life-Span Emotional Development	
PSYC 4628	Laboratory in Developmental Psychology	

**Psychology Seminar**

Complete one of the following: 4

PSYC 4656	Seminar in Biological Psychology	
PSYC 4658	Seminar in Psycholinguistics	
PSYC 4660	Seminar in Cognition	
PSYC 4662	Seminar in Personality	
PSYC 4664	Seminar in Social Psychology	
PSYC 4666	Seminar in Clinical Psychology	
PSYC 4668	Seminar in Sensation and Perception	
PSYC 4674	Seminar in Cognitive Neuroscience	
PSYC 4676	Seminar in Developmental Psychology	

**Supporting Courses**

Code	Title	Hours
<b>Introduction to College</b>		
Complete one of the following		1
HSCI 1000	College: An Introduction	
INSC 1000	Science at Northeastern	
PSYC 1000	Psychology at Northeastern	
<b>First-Year Writing</b>		
ENGW 1111	First-Year Writing	4
<b>Co-op Preparation</b>		
Complete one of the following:		1
EESC 2000	Professional Development for Co-op	
HSCI 2000	Professional Development for Bouvé Co-op	
<b>Math</b>		
MATH 1241	Calculus 1	4
<b>Advanced Writing in the Discipline</b>		
ENGW 3306	Advanced Writing in the Health Professions	4
<b>Ethical Reasoning</b>		
PHIL 1165	Moral and Social Problems in Healthcare	4
<b>Open Electives</b>		
Complete 28 semester hours of general electives.		28

## Integrative Requirement

Code	Title	Hours
PSYC 3510	Brain, Behavior, and Immunity	4
or PSYC 4514	Clinical Neuroscience	
or CAEP 2012	Health Psychology: An Introduction	

## Health Sciences Major Requirement

A grade of C or higher is required for all BIOL, CHEM, HLTH, HSCI, MATH, and PPTH courses.

## Psychology GPA Requirement

A grade of C or higher is required for all PSYC courses.

## Program Requirement

133 total semester hours required

## Plan of Study

## Health Science and Sociology, BS

The combined Bachelor of Science in Health Science and Sociology integrates social scientific perspectives to the study of health, illness, and healthcare. Students explore basic sociological concepts relevant for the study of health and healthcare, such as social construction and medicalization. Students explore why, for instance, despite having the most expensive healthcare system, the United States ranks comparatively low in life expectancy and health and well-being outcomes. Provides students with an opportunity to explore the ways that societal factors such as race, class, and gender interplay with health, healthcare, and health disparities.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Health Science Requirements

Code	Title	Hours
<b>Public Health Core</b>		
PHTH 1260 or PHTH 1261	The American Healthcare System Comparative Healthcare Systems	4

## Linguistics and Speech-Language Pathology and Audiology, BS

### Overview

The combined major in linguistics and speech-language pathology and audiology provides students with an extensive background in the formal structures of human language; the methods and applications of linguistic analyses of language data; the biology, neurology, and physics of the human vocal tract; and the nature of both normal and disordered human speech communication and language development. Students have an opportunity to develop critical thinking, information literacy, and strong oral and written communication skills. While on co-op, students gain clinical experience, including preprofessional training appropriate to pursue a graduate degree in SLPA, related clinical healthcare domains, or education.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Linguistics Requirements

Code	Title	Hours
<b>Linguistics Foundations</b>		
LING 1150	Introduction to Language and Linguistics	4
LING 2350	Linguistic Analysis	4
LING 3412	Language and Culture	4
<b>Linguistic Structure</b>		
LING 3420	Phonetics (Integrative course)	4
Complete three of the following:		12
LING 3422	Phonology	
LING 3424	Morphology	
LING 3450	Syntax	
LING 3452	Semantics	
<b>Linguistics Electives</b>		
Complete three courses not used to fulfill other degree requirements from the following:		12
DEAF 2700	ASL Linguistics	
LING 3000–LING 4999 <sup>1</sup>		

<sup>1</sup> Please visit the Linguistics Courses page (<http://catalog.northeastern.edu/course-descriptions/ling/>) within this catalog to review the list of courses in the LING 3000 - LING 4999 range.

### Speech-Language Pathology and Audiology Requirements

## Health Humanities and Public Health, BA

### Overview

The combined Bachelor of Arts in Health Humanities and Public Health is designed for students who would like to learn how to think about health using humanities, social sciences, and science skills with a focus on public health. The humanities train students to navigate the complexities of interpersonal interaction and their ethical implications, to relate the micro to the macro and texts to contexts, to historicize encounters, to communicate accurately and effectively across a variety of media, and to engage in creative analytical thinking about healthcare. The landscape of public health is quickly changing, and this training is designed to equip students both for the diverse forms of healthcare professions that exist today and for the varieties of professions in the future. This combined major will appeal to students who want to pursue graduate study and research in public health and health humanities.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### BA Language Requirements

All BA students are required to complete the BA degree language requirements, for a total of 12 semester hours of language study or demonstrated equivalent proficiency, as described in Additional Requirements for BA students (p. 119). Successful demonstration of proficiency does not reduce total minimum semester hours of study required to earn the BA degree.

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Health Humanities Requirements

Code	Title	Hours
<b>Required Courses</b>		
INSH 1300	Introduction to Health and Humanities	4
INSH 2300	Culture, Technology, and the Future of Health	4
<b>Core Humanities Electives</b>		
Complete two of the following not used to satisfy another requirement:		8-9
AFAM 1101	Introduction to African American and Africana Studies	
ASNS 2245	Introduction to Asian American Studies	
ENGL 1400	Introduction to Literary Studies	
HIST 1200 and HIST 1201	Historical Research and Writing and First-Year Seminar	
PHIL 1101	Introduction to Philosophy	
PHIL 1110	Introduction to Religious Studies	
WMNS 1103	Introduction to Women's, Gender, and Sexuality Studies	
WMNS 1105	Introduction to Trans Studies	
<b>Core Health Humanities Electives</b>		
Complete three of the following not used to satisfy another requirement:		12
ENGL 2770	Writing to Heal	
ENGL 3700	Narrative Medicine	
HIST 1219	History of Global Pandemics	
HIST 2233	The History of Medicine in North America	
PHIL 1145	Technology and Human Values	
PHIL 1165	Moral and Social Problems in Healthcare	
WMNS 1225 or AFAM 1225 or HIST 1225	Gender, Race, and Medicine Gender, Race, and Medicine Gender, Race, and Medicine	
<b>Core Digital Health Humanities Electives</b>		
Complete two of the following not used to satisfy another requirement:		8
ARCH 5312	Mapping and Building Health	

ENGL 3460	The Archives of Public Health
HIST 3344	The History of Western Public Health

## Public Health and Communication Studies, BA

### Overview

The combined Bachelor of Arts in Public Health and Communication Studies offers an interdisciplinary approach to public health communication. Students combine courses from public health, social sciences, and communication studies to study the important role of communication in shaping the public's understanding of health issues. The interdisciplinary curriculum is enhanced by experiential learning opportunities and is designed to prepare students for challenging careers that involve crafting messages about health, developing strategies for promoting access to healthcare services, and specific applications such as disease awareness and prevention.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### BA Language Requirements

All BA students are required to complete the BA degree language requirements, for a total of 12 semester hours of language study or demonstrated equivalent proficiency, as described in Additional Requirements for BA students (p. 119). Successful demonstration of proficiency does not reduce total minimum semester hours of study required to earn the BA degree.

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Public Health Requirements

#### PUBLIC HEALTH CORE COURSES

## Public Health and Cultural Anthropology, BA

### Overview

The combined Bachelor of Arts in Public Health and Cultural Anthropology integrates concepts and theories from cultural anthropology with public health concepts to approach complex health inequities. Students have an opportunity to gain foundational anthropological knowledge and skills and apply theory to public health approaches for addressing poor health outcomes. Students explore how culture and social structures affect health promotion strategies and outcomes. This combined major will appeal to students who want to pursue graduate study and research in anthropology, public health, public policy and administration, and education.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### BA Language Requirements

All BA students are required to complete the BA degree language requirements, for a total of 12 semester hours of language study or demonstrated equivalent proficiency, as described in Additional Requirements for BA students (p. 119). Successful demonstration of proficiency does not reduce total minimum semester hours of study required to earn the BA degree.

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Public Health Requirements

#### PUBLIC HEALTH CORE COURSES

Code	Title	Hours
PHTH 1260 or PHTH 1261	The American Healthcare System Comparative Healthcare Systems	4
PHTH 2210 and PHTH 2211	Foundations of Biostatistics and Recitation for PHTH 2210	4
PHTH 2300 or PHTH 2301	Communication Skills for the Health Professions Communication Skills for the Health Professions—Global	4
PHTH 2350 or PHTH 2351	Community and Public Health Community and Public Health - Global	4
PHTH 2515	Healthcare Policy and Administration	4
PHTH 4120	Global Perspectives on Discrimination and Health	4
PHTH 4202	Principles of Epidemiology in Medicine and Public Health	4
PHTH 4540	Health Education and Program Planning	4

#### SCIENCE CORE COURSES

Code	Title	Hours
PSYC 1101	Foundations of Psychology	4

#### Biology

Complete one of the following options: 8-10

##### Option 1

BIOL 1141	Microbes and Society
BIOL 1147	The Human Organism

##### Option 2

BIOL 1111 and BIOL 1112	General Biology 1 and Lab for BIOL 1111
BIOL 1113 and BIOL 1114	General Biology 2 and Lab for BIOL 1113

#### SOCIAL SCIENCE REQUIREMENTS

Code	Title	Hours
------	-------	-------

#### Introductory Course

Complete one of the following: 4

COMM 1225	Communication Theory
ECON 1115 and ECON 1125	Principles of Macroeconomics and Recitation for ECON 1115
ECON 1116 and ECON 1126	Principles of Microeconomics and Recitation for ECON 1116
ENGL 1300	Introduction to Health and Humanities
HUSV 1101	Social Change and Human Services
INTL 1101	Globalization and International Affairs
PHIL 1101	Introduction to Philosophy
POLS 1160	International Relations

**Upper-Level Course**

Complete one course (total) from any of the following groups: 3-4

*Society and Behavior*

COMM 3201	Health Communication
COMM 4102	Health Communication Campaigns
CRIM 3040	Psychology of Crime
ECON 3420	Urban Economic Issues
HLTH 5280	The (in)Visibility of (dis)Ability in Society
PHTH 5222	Health Advocacy
PSYC 3402	Social Psychology
PSYC 3404	Developmental Psychology
PSYC 3450	Learning and Motivation

*Globalization and Global Health*

AFRS 3424	Epidemiology of Pandemic Diseases and Health Disparities in the African Diaspora
ECON 3404	International Food Policy
INTL 3200 or INTL 3201	Cities in a Global Context Cities in a Global Context (Abroad)
INTL 3400	International Conflict and Negotiation
PHTH 5230	Global Health
POLS 3487	Politics of Developing Nations

*Environmental Health and Climate Change*

ECON 3423	Environmental Economics
COMM 3500	Environmental Issues, Communication, and the Media
INTL/PPUA 5100	Climate and Development
PHTH 5214	Environmental Health
PPUA 5238	Climate Change and Global Urbanization

*Law, Policy, and Human Rights*

ECON 3424	Law and Economics
PHIL 5001	Global Justice
PHIL 5002	Ethics and Public Policy
POLS 3307	Public Policy and Administration
POLS 3900	Social Policy
PHTH 4515	Critical Issues in Health and Public-Health Policy

*Healthcare Administration and Management*

ECON 3413	Health Economics and Healthcare Policy
MGMT 3340	Healthcare Management, Innovation, and Design
ORGB 3201	Organizational Behavior
PHTH 4511	Healthcare Management
PHTH 5232	Evaluating Healthcare Quality
PHTH 5234	Economic Perspectives on Health Policy

## Cultural Anthropology Requirements

### REQUIRED CULTURAL ANTHROPOLOGY COURSES

Code	Title	Hours
ANTH 1101	Peoples and Cultures	4
ANTH 2305	Global Markets and Local Culture	4
ANTH 3410	Ethnographic Field Experience	4
ANTH 3421	Foundations of Anthropological Theory	4

### AREA COURSES

Code	Title	Hours
Complete two of the following:		8
ANTH 4350	Ethnography of Southeast Asia	
ANTH 4500	Latin American Society and Development	
ANTH 4505	Native North Americans	
ANTH 4510	Anthropology of Africa	
ANTH 4515	Culture and Politics in Modern India	

### CULTURAL ANTHROPOLOGY ELECTIVES

Code	Title	Hours
Complete three additional courses with the ANTH subject code.		12

## Supporting Course Requirements

Code	Title	Hours
<b>Introduction to College</b>		
Complete one of the following:		1
HSCI 1000	College: An Introduction	
ANTH 1000	Anthropology at Northeastern	
<b>Co-op Preparation</b>		
Based on home college:		1
HSCI 2000	Professional Development for Bouvé Co-op	
EESH 2000	Professional Development for Co-op	
<b>Writing Courses</b>		
ENGW 1111	First-Year Writing	4
<i>Advanced Writing in the Disciplines</i>		
Complete one of the following:		4
ENGW 3306	Advanced Writing in the Health Professions	
ENGW 3308	Advanced Writing in the Social Sciences	
<b>Capstone</b>		
Complete one of the following options:		4
<i>Health Science Capstone</i>		
Complete the following prerequisite:		
HSCI 4700	Health Science Capstone Introduction	
Complete one of the following:		
HSCI 4720	Health Science Capstone—Service	
or HSCI 4730	Health Science Capstone—Research	
or HSCI 4740	Health Science Capstone Seminar	
<i>Anthropology Senior Seminar</i>		
ANTH 4600	Senior Seminar	

## Integrative Course

Code	Title	Hours
ANTH 3441	Medical Anthropology	4

**General Electives**

Code	Title	Hours
Complete 12 semester hours of general electives.		12

**Public Health Major Requirement**

A grade of C or higher is required for all BIOL, HSCI, and PTHH courses.

**Public Health and Cultural Anthropology Major Credit Requirement**

Minimum of 95 semester hours required

**Program Requirement**

130 total semester hours required

## Public Health and Journalism, BA

### Overview

The combined major in public health and journalism addresses the vital interest in society for the ability to communicate scientific understanding to the broad public. This combined major provides a valuable and unique set of competencies, ranging from the statistical analysis and epidemiological best practices gained from the courses in the public health program to the cutting-edge communication skills taught within the university's School of Journalism. The combined major highlights the important role both journalism and public health will surely play in a complex and rapidly changing future.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### BA Language Requirements

All BA students are required to complete the BA degree language requirements, for a total of 12 semester hours of language study or demonstrated equivalent proficiency, as described in Additional Requirements for BA students (p. 119). Successful demonstration of proficiency does not reduce total minimum semester hours of study required to earn the BA degree.

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Public Health Requirements

Code	Title	Hours
<b>Required Sociology Courses</b>		
ANTH 2305	Global Markets and Local Culture	4
SOCL 1101	Introduction to Sociology	4

SOCL 3300	Social Theory	4
<b>Electives</b>		
Complete two electives with courses beyond those taken in the requirements above.		8
SOCL 1102 to SOCL 2999		
Complete four additional SOCL courses in the following range:		16
SOCL 3000 to SOCL 5999		

### Supporting Course Requirements

Code	Title	Hours
<b>Introduction to College</b>		
Complete one of the following:		1
HSCI 1000	College: An Introduction	
SOCL 1000	Sociology at Northeastern	
<b>Co-op Preparation</b>		
Complete one of the following:		1
EESH 2000	Professional Development for Co-op	
HSCI 2000	Professional Development for Bouvé Co-op	
<b>Writing Courses</b>		
<i>First-Year Writing</i>		
ENGW 1111	First-Year Writing	4
<i>Advanced Writing in the Disciplines</i>		
Complete one of the following:		4
ENGW 3306	Advanced Writing in the Health Professions	
ENGW 3308	Advanced Writing in the Social Sciences	
<b>Statistics and Research Methods</b>		
Complete one of the following:		8
PHTH 2210 and PHTH 2211 and PHTH 4202	Foundations of Biostatistics and Recitation for PHTH 2210 and Principles of Epidemiology in Medicine and Public Health	
SOCL 2320 and SOCL 2321	Statistical Analysis in Sociology and Research Methods in Sociology	
<b>Capstone</b>		
Complete one of the following options:		4
<i>Health Science Capstone</i>		
Complete the following prerequisite:		
HSCI 4700	Health Science Capstone Introduction	
And complete one of the following:		
HSCI 4720 or HSCI 4730 or HSCI 4740	Health Science Capstone—Service Health Science Capstone—Research Health Science Capstone Seminar	
<i>Sociology Senior Seminar</i>		
SOCL 4600	Senior Seminar	

### Integrative Requirement

Code	Title	Hours
SOCL 3441	Sociology of Health and Illness	4

### General Electives

Code	Title	Hours
Complete 12 semester hours of general electives.		12

### Public Health Major Requirement

A grade of C or higher is required for all BIOL, HSCI, and PHTH courses.

## Public Health and Sociology Major Credit Requirement

Minimum of 87 semester hours required

### Program Requirement

130 total semester hours required

### Plan of Study

## Communication Sciences and Disorders, Minor

The communication sciences and disorders minor consists of one required foundation course taken prior to any core or elective courses, then two core courses and one elective from either the remaining core courses in the list or from a specified set of elective courses that are taught by units other than the CSD department. Students may consult with an advisor in the CSD department concerning the current listing of eligible elective courses for the CSD minor. Students who may be interested in pursuing a graduate degree in speech-language pathology are encouraged to explore the Minor in Speech-Language Pathology and Audiology (p. 1236), which is a track that, if supplemented with certain elective choices within their major, would meet all admissions requirements for our department's own MS Speech-Language Pathology (<http://catalog.northeastern.edu/graduate/health-sciences/clinical-rehabilitation-sciences/speech-language-pathology-ms/>) program.

**Note:** This minor is not open to students majoring in the Bachelor of Science in Speech-Language Pathology and Audiology, those pursuing a combined major with SLPA, or those pursuing a minor in Speech-Language Pathology and Audiology.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

#### Foundation Course

Code	Title	Hours
Complete one of the following:		4
SLPA 1101	Introduction to Communication Disorders	
SLPA 1555	Communication Disorders in Movies	

#### Communication Sciences and Disorders Core

Code	Title	Hours
Complete two of the following:		8
SLPA 1102	Language Development	
SLPA 1103	Anatomy and Physiology of Speech and Hearing Mechanism	
SLPA 1200	Phonetics	
SLPA 1203	Introduction to Audiology	
SLPA 1205	Speech and Hearing Science	
SLPA 4500	Language Disorders across the Life Span	
SLPA 4651	Speech Disorders across the Life Span	

#### Electives

Code	Title	Hours
Complete one of the following:		4
AMSL 1101	Elementary ASL 1	
CAEP 3480	Counseling Theories and Practice	
COMM 1112	Public Speaking	
COMM 2534	Group Communication	
COMM 3201	Health Communication	
COMM 3230	Interpersonal Communication	
HLTH 2100	Interprofessional Ethics for Individual and Population Health	
HLTH 5280	The (in)Visibility of (dis)Ability in Society (@ 4 SH)	
PHTH 1260	The American Healthcare System	
PHTH 2300	Communication Skills for the Health Professions	
PSYC 3450	Learning and Motivation	
PSYC 3451	Learning Principles and Behavior Analysis	

#### Minor Credit Requirement

Minimum of 16 semester hours required in the minor

#### GPA Requirement

2.000 GPA required in the minor

## Early Intervention, Minor

### Overview

The interdisciplinary minor in early intervention (EI) is designed for students who enjoy working with very young children and their families. Through coursework and practicum experiences, students are prepared to work with infants and toddlers with known disabilities, or those who are at risk for developmental delay, and their families.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Courses

Code	Title	Hours
CAEP 5150	Early Intervention: Family Systems	3
CAEP 5151	Early Intervention: Infant and Toddler Development, Risk, and Disability	3
CAEP 5153	Early Intervention: Assessment and Intervention	3
SLPA 5152	Early Intervention: Planning and Evaluating Services	3
SLPA 5154	Early Intervention Practicum 1	2
SLPA 5155	Early Intervention Practicum 2	2

### GPA Requirement

2.000 GPA required in the minor

## Exercise Science, Minor

The minor in exercise science is for undergraduate students from any discipline wishing to expand their understanding in this area. Exercise science is a discipline that examines the short- and long-term responses to exercise and benefits of exercise training for healthy persons, as well as persons with chronic diseases such as heart disease, pulmonary diseases, diabetes, and obesity. Through this minor, undergraduate students have an opportunity to broaden their understanding of exercise and physical activity in health promotion, disease prevention, and interventions. Students who elect a minor in exercise science may then apply to the Master of Science in Exercise Science upon graduation.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Exercise Science Requirements

A minimum grade of C is required in all courses taken toward the minor.

### Required Courses

Code	Title	Hours
BIOL 2217 and BIOL 2218	Integrated Anatomy and Physiology 1 and Lab for BIOL 2217	5
BIOL 2219 and BIOL 2220	Integrated Anatomy and Physiology 2 and Lab for BIOL 2219	5
EXSC 4500 and EXSC 4501	Exercise Physiology 1 and Lab for EXSC 4500	5
EXSC 5200	Cardiopulmonary Physiology	3
EXSC 5220	Advanced Exercise Physiology	3

### GPA Requirement

2.000 GPA required in the minor

## Health Psychology, Minor

The objective of the minor in health psychology is to provide students with knowledge regarding the relationship between psychological and behavioral processes and health and illness. Distinct from other specialty areas in psychology, health psychology focuses on how biology, psychology, behavior, and social factors influence health and illness.

This minor seeks to benefit students by highlighting the unique features of this specialty area and help students understand how to apply this knowledge to the provision of health services and various career paths relevant to health psychology, should they choose to pursue careers in professional psychology focused on the promotion of health. The minor in health psychology is designed for undergraduate students from a variety of disciplines within Bouvé and across the university who wish to expand and to apply their understanding in key concepts of behavioral science and how they inform and intersect with public health, prevention science, clinical applications, and interdisciplinary and interprofessional care.

The minor is comprised of five courses. It requires two foundational courses, one that provides an introduction to the role of psychology in health, illness, and healthcare—Health Psychology: An Introduction (CAEP 2012)—and one that focuses on the application of principles of behavior analysis to address common health problems, such as obesity, addiction, and adherence to medical procedures—Behavioral Assessment and Treatment of Health Problems in the 21st Century (CAEP 2101).

These courses instruct students on basic, foundational principles of mental/behavioral health and the role of psychology in overall health and well-being in applied settings. Students may choose three other electives based on their specific interests.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Courses

Code	Title	Hours
CAEP 2012	Health Psychology: An Introduction	4
CAEP 2101	Behavioral Assessment and Treatment of Health Problems in the 21st Century	4

### Elective Courses

Code	Title	Hours
Complete any three of the following:		12
CAEP 2105	College Student Mental Health	
CAEP 3899	Relationships in College	
CAEP 5150	Early Intervention: Family Systems	
CAEP 5151	Early Intervention: Infant and Toddler Development, Risk, and Disability	
HLTH 5002	Mindfulness: Theory and Practice	
HUSV 2800	Sexual Orientation and Gender Expression	
HUSV 3520	Child Intervention and Treatment	
PSYC 1101	Foundations of Psychology	
PSYC 3404	Developmental Psychology	

### GPA Requirement

2.000 GPA required in the minor

## Health Sciences Entrepreneurship, Minor

The health sciences entrepreneurship minor is for undergraduate students from any major, in any college at the university, who have an interest in developing skills in the creation and management of health sciences companies. The minor builds on currently offered courses within and outside of Bouvé College of Health Sciences. This minor allows students to apply the entrepreneurial mindset to develop marketable and applicable skills conversant in the unique regulatory, reimbursement, and promotion of products and services in the health sciences. Providing opportunities to develop these skills will benefit students pursuing positions within healthcare organizations and medical technology businesses, as well as students wishing to be entrepreneurs or innovators in the companies that employ them.

### Minor Requirements

The minor consists of three required courses and one elective course. Up to *two courses* from other major and minor requirements may apply to this minor.

### Required Courses

Code	Title	Hours
PHMD 2100	Entrepreneurship in Health Sciences	4
PHMD 2350 or PHTH 1260 or PHTH 1261	Healthcare Systems The American Healthcare System Comparative Healthcare Systems	3-4
PHMD 2550	Innovation, Entrepreneurship, and Drug and Medical Device Development	4

### Elective Courses

Code	Title	Hours
Complete one of the following:		
ENTR 2303	Marketing Strategies for Startups	3-4
ENTR 3305	Business Model Design and Innovation	
ENTR 3330	Design Thinking for Startups	
ENTR 4505	Entrepreneurial Venture Growth Strategies	
INNO 2206	Global Social Enterprise	
INNO 2301	Innovation!	
INNO 2304	Industry Disruption and Corporate Transformation	
MKTG 2201	Introduction to Marketing	
PHTH 2350	Community and Public Health	
PHTH 2351	Community and Public Health - Global	
PHTH 2515	Healthcare Policy and Administration	
PHTH 4515	Critical Issues in Health and Public-Health Policy	
PHTH 5234	Economic Perspectives on Health Policy	

### GPA Requirement

Students are required to have an overall grade-point average of 2.000 or higher.

### Credit Requirement

15 semester hours required

## Health, Humanities, and Society, Minor

The health, humanities, and society minor is designed for students who would like to learn how to think capaciously and creatively about health using the rigorous, precise, and flexible skills trained by the social sciences and the humanities. The social sciences teach students to think about the social, economic, and political factors that structure health conditions and outcomes in particular societies, while the humanities train students to navigate the complexities of interpersonal interaction and their ethical implications, to relate the micro to the macro and texts to contexts, to historicize encounters, to communicate accurately and effectively across a variety of media, and to engage in creative analytical thinking about healthcare. The landscape of healthcare is quickly changing, and this training will equip students well not only for the diverse forms of health work that exist today, but for as yet unimaginable varieties of health-related work in the future.

This minor is structured around the particular competencies that the social sciences and humanities train. Those competencies are narrative and historical perspective, critical attention and observation, ethics and judgment, performance and creativity, and social and structural proficiency. Rather than adopting the more traditional approach of connecting particular skills to particular disciplines (say, narrative to literature and observation to art history), this minor builds from discipline-specific health knowledge while training students to think across disciplines. Thus, it will not be unusual for students to find a single course addressing multiple competencies or to take courses in different disciplines that address the same competency from distinct but complementary perspectives.

This minor is housed in the Humanities Center of the College of Social Sciences and Humanities in partnership with the Bouvé College of Health Sciences.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Courses

No more than two courses, in addition to the introductory course, may be taken under the 2000 level.

Code	Title	Hours
<b>Introductory Course</b>		
INSH 1300	Introduction to Health and Humanities	4
<b>Humanities Requirement</b>		
Complete two of the following:		8
ENGL 2770	Writing to Heal	
ENGL 3140	19th-Century Literatures	
ENGL 3700	Narrative Medicine	
ENGL 4710	Capstone Seminar	
PHIL 1165	Moral and Social Problems in Healthcare	
PHIL 1271	Sex in Judaism, Christianity, and Islam	
WMNS 1225	Gender, Race, and Medicine	
<b>Social Sciences Requirement</b>		
Complete two of the following:		8
AFRS 3424	Epidemiology of Pandemic Diseases and Health Disparities in the African Diaspora	
AFRS 4939	Community Health, Culture, and Development in Kenya	
ANTH 4580	Special Topics in Anthropology	
ECON 1230	Healthcare and Medical Economics	
HLTH 5280	The (in)Visibility of (dis)Ability in Society	
PHTH 1270	Introduction to Global Health	
PHTH 2300	Communication Skills for the Health Professions	
or PHTH 2301	Communication Skills for the Health Professions—Global	
PHTH 4120	Global Perspectives on Discrimination and Health	
PHTH 5202	Introduction to Epidemiology	
PHTH 5234	Economic Perspectives on Health Policy	
SOCL 1295	Drugs and Society	
SOCL 2303	Gender and Reproductive Justice	
SOCL 3441	Sociology of Health and Illness	

**Total Hours**

**20**

**GPA Requirement**

2.000 GPA required in the minor

## Healthcare System Operations, Minor

The objective of the minor in healthcare system operations is to prepare students to apply industrial and systems engineering methods in healthcare applications. Distinct from other service industries, healthcare systems are characterized by extensive complexities driven by communication between and interdependencies among multiple actors, and the need to simultaneously address multiple competing objectives pertaining to economic, quality-driven, individual-driven, and population-driven goals. This minor will benefit students by highlighting the unique features of this industry and methods for addressing its unique challenges to engineer improvements to the design, operation, and management of healthcare systems.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Courses

At most, one course from the minor may be counted toward major requirements.

Code	Title	Hours
<b>Required Courses</b>		
IE 5617	Lean Concepts and Applications	4
IE 5400 or IE 3500	Healthcare Systems Modeling and Analysis Introduction to Healthcare Systems Engineering	4
PHTH 1260	The American Healthcare System	4
<b>Electives</b>		
Complete one of the following:		4
IE 5374	Special Topics in Industrial Engineering (System Dynamics in Healthcare)	
IE 5500	Systems Engineering in Public Programs	
IE 5640	Data Mining for Engineering Applications	
NRSG 5121	Epidemiology and Population Health	
PHTH 4511	Healthcare Management	
PHTH 5226	Strategic Management and Leadership in Healthcare	
PHTH 5232	Evaluating Healthcare Quality	
SCHM 3315	Managing Healthcare Operations and Supply Chain	

### GPA Requirement

2.000 GPA required in the minor

## Mindfulness Studies, Minor

The minor in mindfulness studies is open to all majors at the university. The term “mindfulness” refers to maintaining an awareness of the present moment without judgment. Modern-day mindfulness has roots in Eastern spiritual traditions including Buddhism and Hinduism; after arriving in the West, mindfulness practice became a mostly secular practice used by many to promote health and wellbeing. The minor in mindfulness studies is designed for students who seek to enrich their understanding of mindfulness practice, including its benefits and potential applications. Pursuing a minor in mindfulness studies will complement students’ knowledge in the related fields of psychology, health sciences, philosophy, and religious studies. However, developing a mindfulness practice and an understanding of the potential benefits and applications of mindfulness may help enrich the lives of students in any major. Whether students are interested in health, education, or business, by pursuing the minor in mindfulness studies they have an opportunity to learn how to develop a mindfulness practice and explore how to apply mindfulness to their career.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Courses

Code	Title	Hours
CAEP 1280	Introduction to Mindfulness	4
PHIL 1133	Selling Spirituality	4
PHIL 1275 or PHIL 2395	Hinduism, Buddhism, and Beyond Japanese Buddhism	4

### Electives

Code	Title	Hours
Complete one of the following:		
CAEP 1290	Personal Behavior Change	4
CAEP 2280	The Yoga Tradition in Nepal: Philosophy, Methods, and Practice	4
CAEP 2290	The Yoga Tradition: Philosophy, Methods, and Practice	4
CAEP 3899	Relationships in College	4
HLTH 5002	Mindfulness: Theory and Practice	3
HUSV 2340	Mindfulness in Mental Health	4
PHIL 1130	Comparative Ethics	4
PHIL 1290	Chinese Philosophy and Religion	4

### GPA and Grade Requirement

Minimum 2.000 GPA required in the minor. All coursework must be completed with a minimum grade of C.

### Credit Requirement

15 hours required

## Nutrition, Minor

The minor in nutrition is designed for undergraduate students from a variety of disciplines across the university who wish to expand and apply their understanding in key concepts of nutrition and how they intersect with public health, clinical applications, food policy, behavioral counseling, or health communication.

The minor is comprised of five courses. It requires a foundational course in Human Nutrition (HSCI 1105) that instructs students in the basic principles of human nutrition. Students expand foundational concepts in additional required courses to apply knowledge of nutrition in clinical settings and to public health initiatives. Following the initial core courses, students complete two elective courses, at least one at 3000 level or higher, developing deeper knowledge and specific professional skills.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Courses

Code	Title	Hours
HSCI 1105	Human Nutrition	4
HSCI 2350	Advanced Nutrition in Health and Disease	4
HSCI 2500	Public Health Nutrition in the Community	4

### Supporting Courses

Code	Title	Hours
Complete two of the following. At least one elective must be at the 3000 level or above:		
BIOL 3611 or PHSC 2320	Biochemistry	7-8
CAEP 2012	Health Psychology: An Introduction	
CAEP 3480	Counseling Theories and Practice	
COMM 3201 or PHTH 2300 or PHTH 2301	Health Communication	
	Communication Skills for the Health Professions	
	Communication Skills for the Health Professions—Global	
ECON 3404	International Food Policy	
EXSC 1120	Introduction to Exercise, Fitness, and Health	
HSCI 1106	Contemporary Issues in Nutrition	
PHSC 4340	Pharmacology for the Health Professions	
PHSC 4502	Pharmacology/Medicinal Chemistry 2	
PPUA 5270	Food Systems and Public Policy	

### GPA Requirement

2.000 GPA required in the minor

## Pharmaceutical Sciences, Minor

The minor in pharmaceutical sciences is open to all majors at the university with the exception of Bouvé PharmD and BS Pharmaceutical Sciences students. The minor is designed for undergraduate students from a variety of disciplines who wish to explore key aspects of the pharmaceutical sciences, including pharmacology, medicinal chemistry, and pharmaceuticals. It is comprised of three required courses and one elective for a minimum of 15 hours. Students who believe that additional exposure to these topics will integrate effectively with their major (particularly students in biology and chemistry majors, as well as those in chemical and bioengineering programs and health sciences) are encouraged to pursue this minor.

### Minor Requirements

Successful completion of the minor requires that all coursework be completed with a minimum grade of D and courses may not be taken as pass/fail. The minor consists of three required courses and one elective course. Up to *two courses* from other major and minor requirements may apply to this minor.

### Required Courses

Code	Title	Hours
PHSC 3411	Pharmaceutics 1	4
PHSC 3801	Principles of Pharmacology and Medicinal Chemistry 1	4
PHSC 3802	Principles of Pharmacology and Medicinal Chemistry 2	4

### Elective Courses

Code	Title	Hours
Complete one of the following:		3-4
PHSC 2301 and PHSC 2302	Human Physiology 1 and Human Anatomy Lab	
PHSC 2303 and PHSC 2304	Human Physiology 2 and Human Physiology Lab	
PHSC 2330	Immunology	
PHSC 3412	Pharmaceutics 2	
PHSC 3430	Pharmacokinetics and Biopharmaceutics	
PHSC 5400	Principles of Drug Design	
CHEM 5676	Bioorganic Chemistry	

### GPA Requirement

Minimum 2.000 GPA required in the minor

### Credit Requirement

15 hours required

## Public Health, Minor

The minor in public health is designed for undergraduate students from a variety of disciplines who wish to explore key components of public health including the basic components of the U.S. healthcare system, core values and concepts of public health, public health analytic methods, and the social determinants of health. The minor is comprised of five courses for a minimum of 18 semester hours. The four required courses focus on the key components of public health and the remaining course is an elective from the provided list. Through the elective course, students can explore policy, healthcare management and delivery, research methods, health communication, nutrition and exercise, health disparities, and environmental health.

### Minor Requirements

*Note:* This minor is not open to students majoring in the Bachelor of Science in Health Science or Bachelor of Arts in Public Health or those pursuing a combined major with those majors.

Complete all courses listed below unless otherwise indicated.

### Required Courses

Code	Title	Hours
PHTH 1260 or PHTH 1261	The American Healthcare System Comparative Healthcare Systems	4
PHTH 2350 or PHTH 2351 or NRSR 4604	Community and Public Health Community and Public Health - Global Public Health Community Nursing	3-4
PHTH 4202	Principles of Epidemiology in Medicine and Public Health	4
Complete one of the following (PHTH 2210 is recommended):		3-4
ECON 2350	Statistics for Economists	
ENVR 2500	Biostatistics	
MATH 2280	Statistics and Software	
MATH 3081	Probability and Statistics	
MGSC 2301	Business Statistics	
NRSR 5120	Statistics for Health Science	
PHMD 3450	Research Methodology and Biostatistics	
PHTH 2210	Foundations of Biostatistics	
POLS 2400	Quantitative Techniques	
PSYC 2320	Statistics in Psychological Research	

### Elective

PHTH 3250	Fundamentals of Qualitative Research	

**GPA Requirement**

2.000 GPA required in the minor

## Speech-Language Pathology and Audiology, Minor

The clinical SLPA minor seeks to prepare students for admission into a graduate program in speech-language pathology or audiology. In particular, students in this minor are on a track that, if supplemented with certain elective choices within their major, would meet all admissions requirements for our department's own MS Speech-Language Pathology (<http://catalog.northeastern.edu/graduate/health-sciences/clinical-rehabilitation-sciences/speech-language-pathology-ms/>) program.

The clinical SLPA minor consists of five department-specific SLPA core courses.

Students pursuing this minor are advised to consult early and regularly with their academic advisors in order to ensure a timely completion of the combination of their major and the clinical SLPA minor requirements.

Students pursuing this minor who wish to go to graduate school at institutions other than Northeastern are advised to carefully check admissions requirements for those programs.

**Note:** This minor is not open to students majoring in the Bachelor of Science in Speech-Language Pathology and Audiology, those pursuing a combined major with Speech-Language Pathology and Audiology, or those pursuing a minor in Communication Sciences and Disorders.

### Minor Requirements

Complete all courses listed below unless otherwise indicated.

#### Speech-Language Pathology and Audiology Core

Code	Title	Hours
SLPA 1102	Language Development	4
SLPA 1103	Anatomy and Physiology of Speech and Hearing Mechanism	4
SLPA 1200	Phonetics	4
SLPA 1203	Introduction to Audiology	4
SLPA 1205	Speech and Hearing Science	4

### GPA Requirement

2.000 GPA required in the minor

## Wellness Studies, Minor

The wellness studies minor provides a holistic approach to the study of the human wellness experience. Offering interdisciplinary enrollment, this minor includes foundational wellness courses, as well as a range of interdisciplinary electives that embrace evidence-based science and education vis-à-vis selected domains of wellness. A cross-cultural, life span approach to individual and population wellness and well-being is offered as an experiential learning initiative.

As Northeastern University guides students in the ways of self-managing (life-long learning), an understanding of the nature and practices of wellness may inform deliberative decision-making processes that lead to the attainment of wellness-informed lifestyle choices. Over time, these choices may inform the design and crafting of a life well lived.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Courses

Code	Title	Hours
NRSG 1205	Wellness	4
or NRSG 1206	Wellness Abroad	
NRSG 5000	Advanced Perspectives in Wellness	4

### Electives

Code	Title	Hours
Complete two of the following:		
COMM 2135	Sex and Interpersonal Communication	
COMM 2555	Games for Change	
COMM 3230	Interpersonal Communication	
ENGL 2770	Writing to Heal	
EXSC 1120	Introduction to Exercise, Fitness, and Health	
HLTH 2302	Alternative Medicine	
HLTH 5002	Mindfulness: Theory and Practice	
HSCI 1105	Human Nutrition	
HSCI 2350	Advanced Nutrition in Health and Disease	
SOCL 1246	Environment and Society	
WMNS 2800	Sexual Orientation and Gender Expression	

### GPA Requirement

Minimum 2.000 GPA required in all minor courses

### Credit Requirement

A minimum of 15 hours is required.

---

The School of Clinical and Rehabilitation Sciences within the Bouvé College of Health Sciences at Northeastern University brings together the clinical fields of physical therapy (<https://bouve.northeastern.edu/physical-therapy/>), speech-language pathology and audiology (<https://bouve.northeastern.edu/csd/>), and physician assistant studies (<https://bouve.northeastern.edu/physician-assistant/>).#Students and fellows in the school are prepared for clinical and research excellence, training with interdisciplinary experts in habilitation and rehabilitation sciences, epidemiology, neuroscience, engineering, physiology, exercise science, clinical medicine, design, diagnostic and therapeutic imaging, and communication. Working at the intersection of rehabilitation, clinical practice, data, and engineering, students and fellows engage in transformative research and experiential learning that prepares them to improve the quality of life and self-care for patients and communities, while promoting and developing innovative approaches to the future of healthcare.

### Communication Sciences and Disorders

The Department of Communication Sciences and Disorders offers a four-year undergraduate major (Bachelor of Science in Speech-Language Pathology and Audiology), two combined majors, and two undergraduate minors. Additionally, CSD offers a five-year PlusOne bachelor's/master's program that allows students to accelerate the attainment of the graduate degree. See additional information on accelerated bachelor/graduate degree programs. (<https://registrar.northeastern.edu/article/plusone-program-accelerated-bachelorgraduate-degree-programs/>)

Speech-language pathologists and audiologists are involved with the evaluation, treatment, counseling, and research of human communication and its disorders. They provide clinical services to a full range of individuals with communication delays/differences/disorders, from infants through geriatrics. Speech-language pathologists treat developmental language and articulation disorders/delays; voice and resonance problems; stuttering; dysarthria and apraxia; pediatric and adult swallowing disorders; and language and cognitive impairments due to stroke, head injury, and progressive neurological disease. Audiologists specialize in the prevention, identification, assessment, and rehabilitation of hearing disorders for individuals with congenital and acquired hearing impairments. Both speech-language pathologists and audiologists require graduate education to practice as certified and licensed clinicians.

### BS in Speech-Language Pathology and Audiology

The degree program for the Bachelor of Science in Speech-Language Pathology and Audiology includes an experiential learning component, a broad-based academic core, and the scientific and clinical courses necessary for understanding normal and disordered communication. The degree offers preprofessional training for individuals who want to pursue graduate education. Alternatively, graduates may pursue certification and be hired as speech-language pathology or audiology assistants in a variety of clinical settings, or they may pursue other career paths in areas such as healthcare/administration, education, public health, human services, or media/public relations.

The SLPA curriculum is designed to facilitate critical thinking, information literacy, as well as oral and written communication skills. In addition to courses in the basic communication sciences, coursework in education, allied health, ethics, multicultural/diversity issues, and psychology is required. The curriculum provides a solid foundation in SLPA, and it is sufficiently flexible to provide students with the opportunity to minor in an area of related interest.

## BS Combined Majors

Two combined majors are available for students to pursue: the Bachelor of Science in Communication Studies and Speech-Language Pathology and Audiology and the Bachelor of Science in Linguistics and Speech-Language Pathology and Audiology.

The combined Bachelor of Science in Communication Studies and Speech-Language Pathology and Audiology offers an interdisciplinary approach to human communication and its disorders. Coursework focuses on the scientific and theoretical frameworks of speech, language, and hearing. Students are introduced to the fundamentals of communication theory, and they have an opportunity to acquire the practical skills necessary to thrive in a complex, dynamic society. The curriculum is enhanced by experiential learning opportunities that prepare students for a variety of professional careers.

The combined Bachelor of Science in Linguistics and Speech-Language Pathology and Audiology provides students with extensive background in the formal structures of human language; the methods and applications of linguistic analyses of language data; the biology, neurology, and physics of the human vocal tract; and the nature of both normal and disordered human speech communication and language development.

Students have an opportunity to develop critical thinking, information literacy, as well as strong oral and written communication skills. The curriculum is enhanced by experiential learning opportunities that prepare students to pursue graduate degrees in speech-language pathology or audiology as well as careers in other related healthcare domains or education.

## Minors

Two flexible minors are available for students to pursue. These minors allow students from various fields of study to enhance their academics with general courses related to the field of communication sciences, as well as specific courses covering topics such as audiology or speech-language disorders across the life span. Advisors assist students with accommodating their interests within their established major curriculum plans.

*Note:* The minors are not open to students majoring in the Bachelor of Science in Speech-Language Pathology and Audiology or those pursuing a combined major with this major. In addition, students are only eligible to declare one minor within the department (i.e., either the CSD or SLPA clinical minor).

### COMMUNICATION SCIENCES AND DISORDERS MINOR

The Minor in Communication Sciences and Disorders includes courses that offer exposure to a variety of aspects of the field. While this minor does not, by itself, fully prepare students for admission to graduate programs in speech-language pathology or audiology, it facilitates progress toward these graduate programs, in addition to others in fields such as applied psychology, linguistics, neuroscience, and education. Coursework is designed to help students understand the scope of practice in both fields and develop basic competencies.

The CSD minor consists of four courses, which includes a required foundation course taken prior to any CSD core or elective courses, followed by two CSD core courses and one elective course. Students may consult with an advisor in the CSD department concerning the current listing of eligible elective courses for this minor.

### SPEECH-LANGUAGE PATHOLOGY AND AUDIOLOGY MINOR

The Minor in Speech-Language Pathology and Audiology seeks to prepare students for admission into graduate programs in speech-language pathology or audiology. Students in this minor are on a track that would meet course prerequisites requirements for admission to our department's own Master of Science in Speech-Language Pathology (<http://catalog.northeastern.edu/graduate/health-sciences/clinical-rehabilitation-sciences/speech-language-pathology-ms/>) program.

The SLPA minor consists of one required foundation course taken prior to five department-specific SLPA core courses. Students pursuing this minor are advised to consult early and regularly with their academic advisors in order to ensure a timely completion of the combination of their major(s) and the SLPA minor requirements. Students pursuing this minor who plan to apply to graduate school at institutions other than Northeastern University are advised to carefully check admissions requirements for those programs.

## Bachelor of Science (BS)

- Speech-Language Pathology and Audiology
- Communication Studies and Speech-Language Pathology and Audiology (p. 368)
- Linguistics and Speech-Language Pathology and Audiology (p. 1196)

## Minors

- Communication Sciences and Disorders (p. 1223)
- Speech-Language Pathology and Audiology (p. 1236)

## Physical Therapy, Movement, and Rehabilitation Sciences

The mission of the Department of Physical Therapy, Movement, and Rehabilitation Sciences is to impact the health and well-being of the global community by developing leaders in our fields through interprofessional experiential education, translational research, and excellence in clinical

practice. The programs within the department enhance and extend students' learning through experiential education, interdisciplinary collaborations, interprofessional education, and research opportunities, making impact across our global campus and beyond. Our faculty members are leaders in education, research, and practice. Students work with faculty to conduct ongoing research in one of the many diverse Department of Physical Therapy, Movement, and Rehabilitation Sciences' research groups and laboratories, including Neuromotor Systems Laboratory, Laboratory for Locomotion Research, ReGame-XR Laboratory, Movement Neuroscience Laboratory, Musculoskeletal Epidemiology and Biomechanics Laboratory, Neurophysiology Laboratory, Occupational Biomechanics and Ergonomics Laboratory, Teaching and Learning with Innovation Laboratory, the Programmable and Reconfigurable Soft Engineered Systems Lab, and the Center for Cognitive and Brain Health.

At the undergraduate level, the department's faculty work with students from across the university to optimize their bachelor's degree experience in preparation for our graduate doctoral program in physical therapy. Students may enter a range of degree programs at Northeastern included in the health sciences department within Bouvé and programs in the College of Science and the College of Engineering. A guaranteed priority admission pathway (<https://forms.office.com/Pages/ResponsePage.aspx?id=gcLuqK0qrk2sm5o5i5I5V56qaoIN-LopKpL0qV01nZHxUMUtHWIQzT1BHTDBCOTNFTDQySFo2TIFaNS4u>) exists for those students who have met the prerequisite criteria.

The department offers a Minor in Human Movement Sciences. The minor enhances multiple degree programs at Northeastern with fundamental concepts in human movement and rehabilitation sciences—including anatomy and physiology, human kinesiology, and motor control—as well as sports medicine, functional neuroanatomy, and exercise physiology.

### **Minor**

- Human Movement Science (p. 1251)

## Speech-Language Pathology and Audiology, BS

The Bachelor of Science degree program in speech-language pathology and audiology includes an experiential learning component, a broad-based academic core, and the scientific and clinical course work necessary for understanding normal and disordered communication. The degree offers preprofessional training for individuals who want to pursue graduate education in speech-language pathology and audiology. Alternatively, graduates may be hired as speech-language pathology assistants in a variety of clinical settings or they may pursue other career paths in healthcare and education.

The speech-language pathology and audiology curriculum is designed to facilitate critical thinking, information literacy, and oral and written communication skills. In addition to courses in the basic communication sciences, courses in education, allied health, computer literacy, ethics, multicultural/diversity issues, and psychology are required. The curriculum provides a solid foundation in speech-language pathology and audiology and basic sciences, and it is sufficiently flexible to provide students with the opportunity to minor in an area of related interest.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/bchs/about/learning-outcomes/>) for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

## Communication Studies and Speech-Language Pathology and Audiology, BS

The combined Bachelor of Science in Communication Studies and Speech-Language Pathology and Audiology offers an interdisciplinary approach to human communication and its disorders. Coursework focuses on the scientific and theoretical frameworks of speech, language, and hearing. Students will also be introduced to the fundamentals of communication theory, and they have an opportunity to acquire the practical skills necessary to thrive in a complex and changing society. The curriculum is enhanced by experiential learning opportunities in a clinical setting that prepare the students for a variety of professional careers.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### First-Year Seminar

Code	Title	Hours
COMM 1000 or SLPA 1000	Communication Studies at Northeastern College: An Introduction	1

### Communication Studies Requirements

A general elective or a COMM elective (e.g., Principles of Argumentation (COMM 1120)) can be taken to fulfill the NUpath Formal/Quantitative Reasoning (FQ) requirement.

## Linguistics and Speech-Language Pathology and Audiology, BS

### Overview

The combined major in linguistics and speech-language pathology and audiology provides students with an extensive background in the formal structures of human language; the methods and applications of linguistic analyses of language data; the biology, neurology, and physics of the human vocal tract; and the nature of both normal and disordered human speech communication and language development. Students have an opportunity to develop critical thinking, information literacy, and strong oral and written communication skills. While on co-op, students gain clinical experience, including preprofessional training appropriate to pursue a graduate degree in SLPA, related clinical healthcare domains, or education.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Linguistics Requirements

Code	Title	Hours
<b>Linguistics Foundations</b>		
LING 1150	Introduction to Language and Linguistics	4
LING 2350	Linguistic Analysis	4
LING 3412	Language and Culture	4
<b>Linguistic Structure</b>		
LING 3420	Phonetics (Integrative course)	4
Complete three of the following:		12
LING 3422	Phonology	
LING 3424	Morphology	
LING 3450	Syntax	
LING 3452	Semantics	
<b>Linguistics Electives</b>		
Complete three courses not used to fulfill other degree requirements from the following:		12
DEAF 2700	ASL Linguistics	
LING 3000–LING 4999 <sup>1</sup>		

<sup>1</sup> Please visit the Linguistics Courses page (<http://catalog.northeastern.edu/course-descriptions/ling/>) within this catalog to review the list of courses in the LING 3000 - LING 4999 range.

## Communication Sciences and Disorders, Minor

The communication sciences and disorders minor consists of one required foundation course taken prior to any core or elective courses, then two core courses and one elective from either the remaining core courses in the list or from a specified set of elective courses that are taught by units other than the CSD department. Students may consult with an advisor in the CSD department concerning the current listing of eligible elective courses for the CSD minor. Students who may be interested in pursuing a graduate degree in speech-language pathology are encouraged to explore the Minor in Speech-Language Pathology and Audiology (p. 1236), which is a track that, if supplemented with certain elective choices within their major, would meet all admissions requirements for our department's own MS Speech-Language Pathology (<http://catalog.northeastern.edu/graduate/health-sciences/clinical-rehabilitation-sciences/speech-language-pathology-ms/>) program.

**Note:** This minor is not open to students majoring in the Bachelor of Science in Speech-Language Pathology and Audiology, those pursuing a combined major with SLPA, or those pursuing a minor in Speech-Language Pathology and Audiology.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

#### Foundation Course

Code	Title	Hours
Complete one of the following:		4
SLPA 1101	Introduction to Communication Disorders	
SLPA 1555	Communication Disorders in Movies	

#### Communication Sciences and Disorders Core

Code	Title	Hours
Complete two of the following:		8
SLPA 1102	Language Development	
SLPA 1103	Anatomy and Physiology of Speech and Hearing Mechanism	
SLPA 1200	Phonetics	
SLPA 1203	Introduction to Audiology	
SLPA 1205	Speech and Hearing Science	
SLPA 4500	Language Disorders across the Life Span	
SLPA 4651	Speech Disorders across the Life Span	

#### Electives

Code	Title	Hours
Complete one of the following:		4
AMSL 1101	Elementary ASL 1	
CAEP 3480	Counseling Theories and Practice	
COMM 1112	Public Speaking	
COMM 2534	Group Communication	
COMM 3201	Health Communication	
COMM 3230	Interpersonal Communication	
HLTH 2100	Interprofessional Ethics for Individual and Population Health	
HLTH 5280	The (in)Visibility of (dis)Ability in Society (@ 4 SH)	
PHTH 1260	The American Healthcare System	
PHTH 2300	Communication Skills for the Health Professions	
PSYC 3450	Learning and Motivation	
PSYC 3451	Learning Principles and Behavior Analysis	

#### Minor Credit Requirement

Minimum of 16 semester hours required in the minor

#### GPA Requirement

2.000 GPA required in the minor

## Human Movement Science, Minor

The Minor in Human Movement Science is open to all majors at the university with the exception of Bouvé Doctor of Physical Therapy students. The minor is designed for students who seek to complement their current studies with a more detailed understanding of the interplay of human anatomy and kinetic forces of movement specific to their chosen career path. It includes three required courses and one elective course with offerings that can be tailored to a student's interest in ergonomics, sport, kinetic movement, or deeper human anatomy knowledge through cadaveric education. Pursuing a Minor in Human Movement Science complements students' knowledge in their related fields of science, engineering, and entrepreneurship to provide a baseline understanding of human anatomy, functional demands, and movement analysis as they relate to activities of daily living. To be admitted to the Minor in Human Movement Science, students must be in good academic standing (minimum 2.000 GPA overall).

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Courses

Code	Title	Hours
PT 3400	Human Kinesiology	4
PT 3500	Motor Control of Human Movement	4
Complete one of the following:		4-5
BIOL 1111	General Biology 1	
BIOL 1113	General Biology 2	
BIOL 2217 and BIOL 2218	Integrated Anatomy and Physiology 1 and Lab for BIOL 2217	

### Elective

Code	Title	Hours
Complete one of the following:		4-5
BIOL 2219 and BIOL 2220	Integrated Anatomy and Physiology 2 and Lab for BIOL 2219	
BIOL 5601	Multidisciplinary Approaches in Motor Control	
EXSC 4500	Exercise Physiology 1	
PT 1880	Introduction to Sports Medicine	
PT 3300 and PT 3301	Human Gross Anatomy and Lab for PT 3300	
PT 5410 and PT 5411	Functional Human Neuroanatomy and Lab for PT 5410	

### GPA Requirement

Courses may not be taken pass/fail. A 2.000 GPA in the minor is required.

### Credit Requirement

A minimum of 16 semester hours is required.

## Speech-Language Pathology and Audiology, Minor

The clinical SLPA minor seeks to prepare students for admission into a graduate program in speech-language pathology or audiology. In particular, students in this minor are on a track that, if supplemented with certain elective choices within their major, would meet all admissions requirements for our department's own MS Speech-Language Pathology (<http://catalog.northeastern.edu/graduate/health-sciences/clinical-rehabilitation-sciences/speech-language-pathology-ms/>) program.

The clinical SLPA minor consists of five department-specific SLPA core courses.

Students pursuing this minor are advised to consult early and regularly with their academic advisors in order to ensure a timely completion of the combination of their major and the clinical SLPA minor requirements.

Students pursuing this minor who wish to go to graduate school at institutions other than Northeastern are advised to carefully check admissions requirements for those programs.

**Note:** This minor is not open to students majoring in the Bachelor of Science in Speech-Language Pathology and Audiology, those pursuing a combined major with Speech-Language Pathology and Audiology, or those pursuing a minor in Communication Sciences and Disorders.

### Minor Requirements

Complete all courses listed below unless otherwise indicated.

#### Speech-Language Pathology and Audiology Core

Code	Title	Hours
SLPA 1102	Language Development	4
SLPA 1103	Anatomy and Physiology of Speech and Hearing Mechanism	4
SLPA 1200	Phonetics	4
SLPA 1203	Introduction to Audiology	4
SLPA 1205	Speech and Hearing Science	4

### GPA Requirement

2.000 GPA required in the minor

The School of Community Health and Behavioral Sciences offers students interdisciplinary education and research excellence, drawing on novel health technologies and data literacy to address society's most pressing public health issues.

Students in the school are prepared to be the next generation of innovators and thought leaders in the health professions and public health, empowered to effect real change by leveraging new and emerging technologies and data.

The school is designed to improve individuals, communities, and society through three pillars of excellence:

- Health technologies
- Public mental health
- Social and environmental determinants of health to achieve social justice

## Department of Applied Psychology

The Department of Applied Psychology offers an undergraduate minor in health psychology that is designed for students from a variety of disciplines within Bouvé and across the university who wish to expand and to apply their understanding in key concepts of behavioral science and how they inform and intersect with public health, prevention science, clinical applications, and interdisciplinary and interprofessional care. The department also offers an undergraduate minor in mindfulness studies— which is designed for students who seek to enrich their understanding of mindfulness practice, including its benefits and potential applications—and a minor in early intervention—which is designed for students who enjoy working with very young children and their families. In addition to these minors, the department offers three PlusOne programs to accelerate the advancement of undergraduate students to a master's degree in applied behavior analysis, applied psychology, and school psychology.

## Minors

- Early Intervention (p. 1224)
- Health Psychology (p. 1226)
- Mindfulness Studies (p. 1231)

## Department of Health Sciences

The Department of Health Sciences in the Bouvé College of Health Sciences at Northeastern University provides a unique, transdisciplinary setting that incorporates instruction, research, and practice and seeks to prepare students for a wide range of career paths. The department offers two bachelor's degrees—a Bachelor of Science in Health Science and a Bachelor of Arts in Public Health—and options for combined majors with the D'Amore-McKim School of Business; the College of Arts, Media and Design; the College of Social Sciences and Humanities; the College of Science; the College of Engineering; and the Khoury College of Computer Sciences. In addition, the department offers minors in exercise science, public health, global health, and nutrition. We also offer several graduate degrees: Master of Public Health, Master of Science in Exercise Science, and a combined master's in the two fields. We have exciting new programs that will begin enrolling in fall 2023: a one-year accelerated, experiential Master of Public Health and a new Master of Science in Real-World Evidence in collaboration with the OHDSI Center at Northeastern's Roux Institute. We also collaborate with the Khoury College of Computer Sciences to offer a Master of Science in Health Informatics, as well as combined graduate degrees with the School of Pharmacy, the Physician Assistant Program, and the School of Law. At the doctoral level, we offer a PhD in Population Health and, in cooperation with Khoury, a PhD in Personal Health Informatics.

Our diverse faculty has expertise in the fields of population health; health disparities; nutrition; social epidemiology; exercise science; medical sociology; public policy; personal health technologies; neurodevelopmental disorders; environmental, occupational, and mental health, including addictive behaviors and responses to traumatic events; among many more. Students have the opportunity to work side by side with faculty in conducting cutting-edge research in these fields.

In line with Northeastern's commitment to interdisciplinary research and urban engagement, we teach and work closely with many other schools, centers, and departments in the university, including the Institute for Health Equity and Social Justice Research, the Center for Community Health Education Research and Service, the Social Science Environmental Health Research Institute, and the Center for Health Policy and Healthcare Research, as well as community agencies and neighborhood health centers in the local Boston area and beyond.

## Public Health, BA

The public health major offers students a strong foundation and experiential education in the core components of public health, such as the social determinants of health, biostatistics and research methods, health communication and health education, and program planning. The public health core is supported with social science and the biology of health and disease to provide breadth and depth for students to discover their passion and desired discipline. The major positions students well with a broad range of knowledge and skills to pursue graduate studies and professions such as:

- Community health
- Epidemiology
- Health administration
- Health communication and education
- Law
- Public policy
- Social work

### Academic Policies and Procedures

Please visit Bouvé College of Health Sciences Undergraduate page (p. 1153) for academic policies and procedures, including Academic Appeals. (<http://catalog.northeastern.edu/graduate/health-sciences/academic-policies-procedures/appeals-process/>)

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### BA Language Requirements

All BA students are required to complete the BA degree language requirements, for a total of 12 semester hours of language study or demonstrated equivalent proficiency, as described in Additional Requirements for BA students (p. 119). Successful demonstration of proficiency does not reduce total minimum semester hours of study required to earn the BA degree.

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Public Health Core

## Health Science, BS

The health science major offers students a solid academic and experiential foundation that positions them well to pursue graduate and professional school training in the following programs:

- Medicine
- Dentistry
- Veterinary medicine
- Public health
- Physician assistant studies
- Nurse practitioner
- Pharmacy
- Physical therapy
- Social work
- Speech-language pathology

In addition to the required courses for the Bachelor of Science in Health Science, students who are interested in clinical graduate school programs can utilize available elective slots to complete prerequisite courses. The Northeastern PreMed and PreHealth Advising Program (<https://undergraduate.northeastern.edu/prehealth/academics-2/coursework/>) provides individualized advising resources to Northeastern undergraduate students and alumni considering careers in the areas of allopathic medicine (MD), osteopathic medicine (DO), dentistry, optometry, physician assistant, podiatric medicine, or veterinary medicine. Please visit the BS Health Science webpage (<https://bouve.northeastern.edu/health-sciences/programs/bs/>) to learn more about premed and prehealth pathways.

The health science major is also designed for students who are seeking a strong foundation for a career in health administration and in community-based health promotion and public health.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Public Health Core

Code	Title	Hours

BIOL 1113 and BIOL 1114	General Biology 2 and Lab for BIOL 1113	5
CHEM 1161 and CHEM 1162 and CHEM 1163	General Chemistry for Science Majors and Lab for CHEM 1161 and Recitation for CHEM 1161	5
MATH 1241	Calculus 1	4
PSYC 1101	Foundations of Psychology	4

## Selectives

Code	Title	Hours
Complete at least three courses from the groups listed below with at least two in one category. At least one of the courses must be at the 2000 level or higher. Students may complete additional courses to fulfill a minor, such as global health, nutrition, and exercise science.		9-13

### Society and Health

ANTH 3441	Medical Anthropology
CRIM 3040	Psychology of Crime
HLTH 5280	The (in)Visibility of (dis)Ability in Society
INSH 1300	Introduction to Health and Humanities
PHTH 1270	Introduction to Global Health
or AFRS 1270	Introduction to Global Health
PHTH 2414	Environmental Health
PHTH 2616	Rural Health: An Interdisciplinary Seminar
PHTH 5214	Environmental Health
PHTH 5222	Health Advocacy
PHTH 5230	Global Health
PHTH 5234	Economic Perspectives on Health Policy
SOCL 1245	Sociology of Poverty
SOCL 1246	Environment and Society
SOCL 1260	Sociology of Gender
SOCL 1295	Drugs and Society
SOCL 2225	Sociology of Disability
SOCL 2303	Gender and Reproductive Justice
SOCL 2485	Environment, Technology, and Society
SOCL 3441	Sociology of Health and Illness
SOCL 4522	Environmental Justice
WMNS 1225	Gender, Race, and Medicine

### Policy and Administration

ECON 1230	Healthcare and Medical Economics
ECON 3404	International Food Policy
HUSV 2800	Sexual Orientation and Gender Expression
HUSV 3900	Social Policy
INNO 2206	Global Social Enterprise
LPSC 2301	Introduction to Law, Policy, and Society
MGMT 3340	Healthcare Management, Innovation, and Design
ORGB 3201	Organizational Behavior
PHTH 4511	Healthcare Management
PHTH 4515	Critical Issues in Health and Public-Health Policy
PHTH 5232	Evaluating Healthcare Quality
PHTH 5234	Economic Perspectives on Health Policy
POLS 2395	Environmental Politics and Policy
POLS 3309	Lesbian, Gay, Bisexual, and Transgender Issues in Public Policy
SOCL 2205	Law and Social Justice
SOCL 3241	Violence and Society

### Nutrition and Wellness

CAEP 1280	Introduction to Mindfulness
-----------	-----------------------------

CAEP 1290	Personal Behavior Change
CAEP 2012	Health Psychology: An Introduction
CAEP 2101	Behavioral Assessment and Treatment of Health Problems in the 21st Century
COMM 2555	Games for Change
COMM 3201	Health Communication
EXSC 1120	Introduction to Exercise, Fitness, and Health
EXSC 4500 and EXSC 4501	Exercise Physiology 1 and Lab for EXSC 4500
EXSC 5200	Cardiopulmonary Physiology
EXSC 5220	Advanced Exercise Physiology
HSCI 1105	Human Nutrition
HSCI 1106	Contemporary Issues in Nutrition
HSCI 2350	Advanced Nutrition in Health and Disease
HSCI 2500	Public Health Nutrition in the Community
PSYC 1250	Drugs and Behavior

**Digital Health**

CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500
DS 2000 and DS 2001	Programming with Data and Data Science Programming Practicum
DS 4200	Information Presentation and Visualization
HINF 5101	Introduction to Health Informatics and Health Information Systems
HINF 5200	Theoretical Foundations in Personal Health Informatics
HINF 5300	Personal Health Interface Design and Development
IS 2000	Principles of Information Science
IS 4800	Empirical Research Methods

**Health Data Science**

ANTH 3410	Ethnographic Field Experience
INSH 5304	Social Network Analysis
PHTH 3250	Fundamentals of Qualitative Research
PHTH 5202	Introduction to Epidemiology
POLS 2399	Research Methods in Political Science

**Capstone Requirement**

Code	Title	Hours
Complete one of the following options:		4-8

**Health Science Capstone**

HSCI 4700	Health Science Capstone Introduction
And complete one of these options:	
HSCI 4720	Health Science Capstone—Service
HSCI 4730	Health Science Capstone—Research
HSCI 4740	Health Science Capstone Seminar

**Honors Project (must meet GPA requirement)**

HSCI 4970 will count as 4 semester hours toward general electives.

HSCI 4970 and HSCI 4971	Junior/Senior Honors Project 1 and Junior/Senior Honors Project 2
----------------------------	--

**Other Major Requirements**

Code	Title	Hours
HSCI 1000	College: An Introduction	1
HSCI 2000	Professional Development for Bouvé Co-op	1
ENGW 1111	First-Year Writing	4
ENGW 3306	Advanced Writing in the Health Professions	4
PHIL 1165	Moral and Social Problems in Healthcare	4

## Electives

Code	Title	Hours
Complete a minimum of 41 semester hours of general electives. Total elective semester hours required to meet degree completion requirement will depend on student's choice of selectives above.		41

## Health Sciences Major Requirement

A grade of C or higher is required for all BIOL, CHEM, HLTH, HSCI, MATH, and PTHH courses.

## Academic Policies and Procedures

Please visit Bouvé College of Health Sciences Undergraduate page (p. 1153) for academic policies and procedures, including Academic Appeals (p. 84).

## Program Requirement

132 total semester hours required

## Plan of Study

### Sample Plan of Study: Four Years, Two Co-ops in Summer2/Fall

Year 1							
Fall	Hours	Spring	Hours	Summer 1	Hours	Summer 2	Hours

Capstone course	4							
	<b>16</b>		<b>16</b>					

**Total Hours: 133**

<sup>1</sup> Credit count of selective/elective is dependent on credit count of selective/elective in same term to avoid unintended credit overload.

## Business Administration and Public Health, BS

### Overview

The combined Bachelor of Science in Business Administration and Public Health offers students an opportunity to study a curriculum that is synergistic with the growing field of healthcare and public health. This academic combination provides students with the knowledge and expertise needed to enter a multitude of careers upon graduation. The degree allows students the unique opportunity to better understand the business side of the healthcare industry and public health administration and prepares them to be leaders.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Business Administration Requirements

Code	Title	Hours
<b>Required Courses</b>		
ACCT 1201	Financial Accounting and Reporting	4
ACCT 2301	Managerial Accounting	4
INTB 1203	International Business and Global Social Responsibility	4
ORGB 3201	Organizational Behavior	4
<b>Business Electives</b>		
Complete two of the following:		8
FINA 2201	Financial Management	
INNO 2301	Innovation!	
MISM 2301	Introduction to Information Systems and Digital Technologies	
MKTG 2201	Introduction to Marketing	
SCHM 2301	Supply Chain and Operations Management	
<b>Supporting Courses for Business</b>		
ECON 1116 and ECON 1126	Principles of Microeconomics and Recitation for ECON 1116	4
MATH 1231	Calculus for Business and Economics	4

### Business Concentration

Complete one of the following concentrations. Requirements for the concentrations are listed below.

- Accounting (p. 654)
- Accounting and Advisory Services (p. 655)
- Brand Management (p. 656)
- Business Analytics (p. 657)
- Corporate Innovation (p. 658)
- Entrepreneurial Startups (p. 659)
- Family Business (p. 660)
- Finance (p. 661)
- Fintech (p. 662)
- Healthcare Management and Consulting (p. 664)
- International Business (p. 665)(available only as a second concentration)
- Management (p. 666)
- Management Information Systems (p. 667)
- Marketing (p. 668)
- Marketing Analytics (p. 669)

- Social Innovation and Entrepreneurship (p. 670)
- Supply Chain Management (p. 671)

## Public Health Requirements

Code	Title	Hours
<b>Public Health Core Courses</b>		
PHTH 1260 or PHTH 1261	The American Healthcare System Comparative Healthcare Systems	4
PHTH 2300 or PHTH 2301	Communication Skills for the Health Professions Communication Skills for the Health Professions—Global	4
PHTH 2350 or PHTH 2351	Community and Public Health Community and Public Health - Global	4
PHTH 2515	Healthcare Policy and Administration	4
PHTH 4120	Global Perspectives on Discrimination and Health	4
PHTH 4202	Principles of Epidemiology in Medicine and Public Health	4
PHTH 4540	Health Education and Program Planning	4
<b>Science Core Courses</b>		
PSYC 1101	Foundations of Psychology	4
<i>Biology</i>		
Complete one of the following options:		8-10
Option 1		
BIOL 1141	Microbes and Society	
BIOL 1147	The Human Organism	
Option 2		
BIOL 1111 and BIOL 1112	General Biology 1 and Lab for BIOL 1111	
BIOL 1113 and BIOL 1114	General Biology 2 and Lab for BIOL 1113	
<b>Social Science Course</b>		
Complete one of the following courses:		3-4
<i>Society and Behavior</i>		
COMM 3201	Health Communication	
ECON 3420	Urban Economic Issues	
HLTH 5280	The (in)Visibility of (dis)Ability in Society	
PHTH 5222	Health Advocacy	
PSYC 3402	Social Psychology	
PSYC 3404	Developmental Psychology	
PSYC 3450	Learning and Motivation	
<i>Globalization and Global Health</i>		
ECON 3404	International Food Policy	
PHTH 5230	Global Health	
<i>Environmental Health and Climate Change</i>		
ECON 3423	Environmental Economics	
PHTH 5214	Environmental Health	
<i>Law, Policy, and Human Rights</i>		
ECON 3424	Law and Economics	
PHTH 4515	Critical Issues in Health and Public-Health Policy	
<i>Healthcare Administration and Management</i>		
ECON 3413	Health Economics and Healthcare Policy	
PHTH 5232	Evaluating Healthcare Quality	
PHTH 5234	Economic Perspectives on Health Policy	

## Supporting Courses

Code	Title	Hours
<b>Introduction to College</b>		
Complete one of the following:		1
BUSN 1102	Personal Skill Development for Business	
HSCI 1000	College: An Introduction	
<b>Statistics</b>		
Complete one of the following:		4
MGSC 2301	Business Statistics	
PHTH 2210 and PHTH 2211	Foundations of Biostatistics and Recitation for PHTH 2210	
<b>Professional Development</b>		
Complete one of the following:		1
BUSN 1103	Professional Development for Business Co-op	
HSCI 2000	Professional Development for Bouvé Co-op	
<b>Writing Requirements</b>		
ENGW 1111	First-Year Writing	4
Complete one of the following:		4
ENGW 3304	Advanced Writing in the Business Administration Professions	
ENGW 3306	Advanced Writing in the Health Professions	
ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	
<b>Capstone Course</b>		
Complete one of the following options:		4
<i>DMSB Students</i>		
STRT 4501	Strategy in Action	
<i>Bouvé Students</i>		
HSCI 4700	Health Science Capstone Introduction	
HSCI 4720 or HSCI 4730 or HSCI 4740	Health Science Capstone—Service Health Science Capstone—Research Health Science Capstone Seminar	

## Integrative Requirement

Code	Title	Hours
Complete one of the following:		4
MGMT 3340	Healthcare Management, Innovation, and Design	
PHTH 4511	Healthcare Management	

## Business GPA Requirement

A minimum 2.000 GPA is required in all business courses.

## Business Cooperative Education Requirement

Complete one six-month co-op experience.

## Public Health Major Requirement

A grade of C or higher is required for all BIOL, HSCI, and PHTH courses.

## Program Requirement

128 total semester hours required

## Plan of Study

## Data Science and Health Science, BS

The data science and health science combined major offers a solid academic and experiential foundation integrating studies in health administration, computer science, mathematics, and statistics. This program reflects the impact of data in modern healthcare and prepares students for success in careers in health administration, community-based health promotion, public health, and big data analysis.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Data Science Requirements

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or HSCI 1000	First Year Seminar College: An Introduction	1

## Environmental Engineering and Health Science, BSEnE

This intercollege combined major is designed for students who would like to explore their interest in the health sciences while earning the benefit of a Bachelor of Science degree in environmental engineering. The combined major reflects the respective departmental thrusts in environmental health and sustainable resource engineering to create awareness about the complex relationship between the environment and human health, prepare professionals in this growing area capable of providing engineering solutions to current and emerging topics related to environmental engineering and health sciences, and maintain healthy environmental systems by applying and developing techniques to reduce exposure to health hazards. This program combines the content of two majors to allow students to learn the breadth and depth of the convergence between public health and environmental engineering.

Our BS Environmental Engineering and Health Sciences program is ABET accredited. Visit the department website (<https://cee.northeastern.edu/academics/undergraduate-studies/cee-accreditation/>) for program objectives.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

NUPath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUPath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Engineering</b>		
CIVE 2221 and CIVE 2222	Statics and Solid Mechanics and Recitation for CIVE 2221	4
CIVE 2300 and CIVE 2301	Environmental Measurements in Natural and Engineered Systems and Lab for CIVE 2300	4
CIVE 2331	Fluid Mechanics and Hydraulics	4
CIVE 2334	Environmental Engineering: Principles, Technology, and Sustainability	4
CIVE 3435	Environmental Pollution: Fate and Transport	4
CIVE 4534 and CIVE 4535	Water Treatment Systems Design and Lab for CIVE 4534	4
CIVE 4765	Senior Design Project—Environmental	5
GE 3300	Energy Systems: Science, Technology, and Sustainability	4
<b>Technical Electives</b>		
Complete 8-9 semester hours from the following: 8-9		
CIVE 2260 and CIVE 2261	Materials for the Built Environment and Lab for CIVE 2260	
CIVE 2340 and CIVE 2341	Geotechnical Engineering and Lab for CIVE 2340	
CIVE 3335	Environmental Engineering Chemistry and Chemical Technologies	
CIVE 4540	Resource Recovery and Waste Treatment Technologies Abroad	
CIVE 4566	Design for Sustainable Transportation: Netherlands	
CIVE 4777	Climate Hazards and Resilient Cities Abroad	
CIVE 5150	Climate and Atmospheric Change	
CIVE 5250	Organic Pollutants in the Environment	
CIVE 5255	Tools and Techniques of Environmental Health	
CIVE 5260	Environmental Fluid Mechanics	
CIVE 5261	Dynamic Modeling for Environmental Investment and Policymaking	
CIVE 5271	Solid and Hazardous Waste Management	

CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure
CIVE 5280	Remote Sensing of the Environment
CIVE 5281	Coastal Dynamics and Design
CIVE 5363	Climate Science, Engineering Adaptation, and Policy
CIVE 5366	Air Quality Engineering and Science
CIVE 5536	Hydrologic and Hydraulic Design
CIVE 5670	Global Biogeochemistry

**Supplemental Credit**

1 semester hour from the following course counts toward the engineering requirement:	1
CIVE 3464	Probability and Engineering Economy for Civil Engineering
3 semester hours from the following course count toward the engineering requirement:	3
CIVE 3430	Engineering Microbiology and Ecology
2 semester hours from the following course count toward the engineering requirement:	2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>
3 semester hours from the following course count toward the engineering requirement:	3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>

**Health Sciences Major Requirements**

Code	Title	Hours
PHTH 1260 or PHTH 1261	The American Healthcare System Comparative Healthcare Systems	4
PHTH 2210 and PHTH 2211	Foundations of Biostatistics and Recitation for PHTH 2210	4
PHTH 2350 or PHTH 2351	Community and Public Health Community and Public Health - Global	4
PHTH 2414	Environmental Health	4
PHTH 2515	Healthcare Policy and Administration	4
PHTH 4120	Global Perspectives on Discrimination and Health	4
PHTH 4202	Principles of Epidemiology in Medicine and Public Health	4
PHTH 4540	Health Education and Program Planning	4
PHTH 5214 or CIVE 5255	Environmental Health Tools and Techniques of Environmental Health	3-4

**Supporting Courses: Mathematics/Science**

Complete all Mathematics/Science courses with a minimum of 30 semester hours.<sup>2</sup>

Code	Title	Hours
<b>Required Mathematics/Science</b>		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
<b>Science Elective (Earth)</b>		
Complete one of the following:		4-5
ENVR 1120	Oceans and Coasts	
ENVR 1200	Dynamic Earth	
ENVR 2200	Earth's Changing Cycles	
ENVR 3125	Global Oceanic Change	
ENVR 3200	Water Resources	
ENVR 3600	Oceanography	

ENVR 5201	Geologic Field Seminar	
<b>Supplemental Credit</b>		
3 semester hours from the following course count toward the mathematics/science requirement:		3
CIVE 3464	Probability and Engineering Economy for Civil Engineering	
1 semester hour from the following course counts toward the mathematics/science requirement:		1
CIVE 3430	Engineering Microbiology and Ecology	
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	

### Professional Development

Code	Title	Hours
<b>Professional Development</b>		
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1

### Additional Required Courses

1 semester hour from the following course counts toward the professional development requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

### Writing Requirements

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3315	Advanced Writing in the Technical Professions Interdisciplinary Advanced Writing in the Disciplines	4

### Integrative Course

Code	Title	Hours
This course is already required above and also fulfills the integrative requirement.		
CIVE 4765	Senior Design Project—Environmental	

Engineering GPA Requirement

**A minimum 2.000 GPA is required in CIVE coursework**

### Health Sciences Major Requirement

**A minimum grade of C or higher is required for all HLTH and PHTH courses**

### Program Requirement

**132 total semester hours required**

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

<sup>2</sup> Mathematics/Science Requirement: CHEM 1151, MATH 1341, and PHYS 1151 require a grade of C- or higher.

## Health Humanities and Health Science, BS

### Overview

The combined Bachelor of Science in Health Humanities and Health Science is designed for students who would like to learn how to think about health using humanities, social sciences, and science skills. The humanities train students to navigate the complexities of interpersonal interaction and their ethical implications, to relate the micro to the macro and texts to contexts, to historicize encounters, to communicate accurately and effectively across a variety of media, and to engage in creative analytical thinking about healthcare. The landscape of healthcare is quickly changing, and this training is designed to equip students both for the diverse forms of healthcare professions that exist today and for the varieties of professions in the future. This combined major will appeal to students who want to pursue graduate study and research in public health, medicine, and other clinical professions.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Health Humanities Requirements

Code	Title	Hours
<b>Required Courses</b>		
INSH 1300	Introduction to Health and Humanities	4
INSH 2300	Culture, Technology, and the Future of Health	4
<b>Core Humanities Electives</b>		
Complete two of the following not used to satisfy another requirement:		8-9
AFAM 1101	Introduction to African American and Africana Studies	
ASNS 2245	Introduction to Asian American Studies	
ENGL 1400	Introduction to Literary Studies	
HIST 1200 and HIST 1201	Historical Research and Writing and First-Year Seminar	
PHIL 1101	Introduction to Philosophy	
PHIL 1110	Introduction to Religious Studies	
WMNS 1103	Introduction to Women's, Gender, and Sexuality Studies	
WMNS 1105	Introduction to Trans Studies	
<b>Core Health Humanities Electives</b>		
Complete three of the following not used to satisfy another requirement:		12
ENGL 2770	Writing to Heal	
ENGL 3700	Narrative Medicine	
HIST 1219	History of Global Pandemics	
HIST 2233	The History of Medicine in North America	
PHIL 1145	Technology and Human Values	
PHIL 1165	Moral and Social Problems in Healthcare	
WMNS 1225 or AFAM 1225 or HIST 1225	Gender, Race, and Medicine Gender, Race, and Medicine Gender, Race, and Medicine	
<b>Core Digital Health Humanities Electives</b>		
Complete two of the following not used to satisfy another requirement:		8
ARCH 5312	Mapping and Building Health	
ENGL 3460	The Archives of Public Health	
HIST 3344	The History of Western Public Health	

**Health Science Requirements**

<b>Code</b>	<b>Title</b>	<b>Hours</b>
<b>Public Health Core</b>		
PHTH 1261 or PHTH 1260	Comparative Healthcare Systems The American Healthcare System	4
PHTH 2210 and PHTH 2211	Foundations of Biostatistics and Recitation for PHTH 2210	4

## Health Science and Business Administration, BS

The combined major in health science and business administration provides students at Northeastern University with an opportunity to study a curriculum that is synergetic with the growing field of healthcare. This academic combination offers students the knowledge and expertise needed to enter a multitude of careers upon graduation. The degree allows students the unique opportunity to better understand the business side of the healthcare industry. The field is compatible with all the undergraduate concentrations in the School of Business and prepares students to enter the workforce after graduation.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Health Science Requirements

Code	Title	Hours
<b>Public Health Core</b>		
PHTH 1260 or PHTH 1261	The American Healthcare System Comparative Healthcare Systems	4
PHTH 2300 or PHTH 2301	Communication Skills for the Health Professions Communication Skills for the Health Professions—Global	4
PHTH 2350 or PHTH 2351	Community and Public Health Community and Public Health - Global	4
PHTH 2515	Healthcare Policy and Administration	4
PHTH 4120	Global Perspectives on Discrimination and Health	4
PHTH 4540	Health Education and Program Planning	4
PHTH 4202	Principles of Epidemiology in Medicine and Public Health	4
<b>Life Sciences Core</b>		
BIOL 1111 and BIOL 1112	General Biology 1 and Lab for BIOL 1111	5
BIOL 1113 and BIOL 1114	General Biology 2 and Lab for BIOL 1113	5
CHEM 1161 and CHEM 1162 and CHEM 1163	General Chemistry for Science Majors and Lab for CHEM 1161 and Recitation for CHEM 1161	5
PSYC 1101	Foundations of Psychology	4

### Business Administration Requirements

Code	Title	Hours
<b>Required Courses</b>		
ACCT 1201	Financial Accounting and Reporting	4
ACCT 2301	Managerial Accounting	4
FINA 2201	Financial Management	4
INTB 1203	International Business and Global Social Responsibility	4
<b>Business Electives</b>		
Complete two of the following:		8
MISM 2301	Introduction to Information Systems and Digital Technologies	
MKTG 2201	Introduction to Marketing	
ORGB 3201	Organizational Behavior	
SCHM 2301	Supply Chain and Operations Management	

### Supporting Course for Business

Complete one of the following:

4

ECON 1115	Principles of Macroeconomics
or ECON 1116	Principles of Microeconomics

### Business Concentration

Complete one of the following concentrations:

- Accounting (p. 654)
- Accounting and Advisory Services (p. 655)
- Brand Management (p. 656)
- Business Analytics (p. 657)
- Corporate Innovation (p. 658)
- Entrepreneurial Startups (p. 659)
- Family Business (p. 660)
- Finance (p. 661)
- Fintech (p. 662)
- Healthcare Management and Consulting (p. 664)
- International Business (p. 665) (available only as a second concentration)
- Management (p. 666)
- Management Information Systems (p. 667)
- Marketing (p. 668)
- Marketing Analytics (p. 669)
- Social Innovation and Entrepreneurship (p. 670)
- Supply Chain Management (p. 671)

### Supporting Courses

Code	Title	Hours
<b>Introduction to College</b>		
HSCI 1000 or BUSN 1102	College: An Introduction Personal Skill Development for Business	1
<b>Calculus</b>		
MATH 1231 or MATH 1241	Calculus for Business and Economics Calculus 1	4
<b>Statistics</b>		
PHTH 2210 and PHTH 2211 or MGSC 2301	Foundations of Biostatistics and Recitation for PHTH 2210 Business Statistics	4
<b>Co-op Preparation</b>		
Complete one of the following:		1
BUSN 1103	Professional Development for Business Co-op	
HSCI 2000	Professional Development for Bouvé Co-op	
<b>Writing</b>		
ENGW 1111	First-Year Writing	4
ENGW 3306 or ENGW 3304	Advanced Writing in the Health Professions Advanced Writing in the Business Administration Professions	4
<b>Capstone</b>		
Complete one of the following:		4
HSCI 4720	Health Science Capstone—Service (Prerequisite course HSCI 4700)

## Health Science and Communication Studies, BS

The combined Bachelor of Science degree program in health science and communication studies offers an interdisciplinary approach to public health communication. Students combine courses from health sciences and communication studies to learn about health and illness and the important role of communication in shaping the public's understanding of health issues. The interdisciplinary curriculum is enhanced by experiential learning opportunities and is designed to prepare students for challenging careers that involve crafting messages about health, developing strategies for promoting healthcare services, and specific applications such as disease awareness and prevention.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Communication Studies Major Requirements

Code	Title	Hours
COMM 1101	Introduction to Communication Studies	4
COMM 1112	Public Speaking	4
or COMM 2301	Communication Research Methods	
Code	Title	Hours
Foundation Course		
Complete one of the following:		4
COMM 1210	Persuasion and Rhetoric	
COMM 1225	Communication Theory	
COMM 1231	Principles of Organizational Communication	
COMM 1255	Communication in a Digital Age	
Cluster Course		
Complete one of the following:		4
COMM 1131	Sex, Relationships, and Communication	
COMM 2303	Global and Intercultural Communication	
COMM 2304	Communication and Gender	
COMM 2501	Communication Law	
COMM 2551	Free Speech in Cyberspace	
Writing-Intensive		
Complete two of the following:		8
COMM 3200	Mobile Communication	
COMM 3201	Health Communication	
COMM 3230	Interpersonal Communication	
COMM 3304	Communication and Inclusion	
COMM 3320	Political Communication	
COMM 3415	Communication Criticism	
COMM 3445	Public Relations Principles	
COMM 3500	Environmental Issues, Communication, and the Media	
COMM 3501	Free Speech: Law and Practice	
COMM 3530	Communication and Sexualities	
COMM 3532	Theories of Conflict and Negotiation	
COMM 4535	Nonverbal Social Interaction	
COMM 4605	Youth and Communication Technology	
COMM 4631	Crisis Communication and Image Management	

**Communication Studies Electives**

Complete three additional communication studies courses.	12

## Health Science and Psychology, BS

The combined Bachelor of Science degree program in health science and psychology is designed to provide an interdisciplinary approach to public health and psychology. Through interdisciplinary explorations, students have the opportunity to develop knowledge in health promotion and illness prevention by way of understanding people's behaviors, perceptions, and emotions within the contexts of relationships and culture. This highly flexible curriculum is enhanced by experiential learning opportunities and prepares students to practice in interdisciplinary settings and be successful in sustaining and promoting health across populations.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

## Health Science and Sociology, BS

The combined Bachelor of Science in Health Science and Sociology integrates social scientific perspectives to the study of health, illness, and healthcare. Students explore basic sociological concepts relevant for the study of health and healthcare, such as social construction and medicalization. Students explore why, for instance, despite having the most expensive healthcare system, the United States ranks comparatively low in life expectancy and health and well-being outcomes. Provides students with an opportunity to explore the ways that societal factors such as race, class, and gender interplay with health, healthcare, and health disparities.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

## Health Humanities and Public Health, BA

### Overview

The combined Bachelor of Arts in Health Humanities and Public Health is designed for students who would like to learn how to think about health using humanities, social sciences, and science skills with a focus on public health. The humanities train students to navigate the complexities of interpersonal interaction and their ethical implications, to relate the micro to the macro and texts to contexts, to historicize encounters, to communicate accurately and effectively across a variety of media, and to engage in creative analytical thinking about healthcare. The landscape of public health is quickly changing, and this training is designed to equip students both for the diverse forms of healthcare professions that exist today and for the varieties of professions in the future. This combined major will appeal to students who want to pursue graduate study and research in public health and health humanities.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### BA Language Requirements

All BA students are required to complete the BA degree language requirements, for a total of 12 semester hours of language study or demonstrated equivalent proficiency, as described in Additional Requirements for BA students (p. 119). Successful demonstration of proficiency does not reduce total minimum semester hours of study required to earn the BA degree.

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Health Humanities Requirements

Code	Title	Hours
<b>Required Courses</b>		
INSH 1300	Introduction to Health and Humanities	4
INSH 2300	Culture, Technology, and the Future of Health	4
<b>Core Humanities Electives</b>		
Complete two of the following not used to satisfy another requirement:		8-9
AFAM 1101	Introduction to African American and Africana Studies	
ASNS 2245	Introduction to Asian American Studies	
ENGL 1400	Introduction to Literary Studies	
HIST 1200 and HIST 1201	Historical Research and Writing and First-Year Seminar	
PHIL 1101	Introduction to Philosophy	
PHIL 1110	Introduction to Religious Studies	
WMNS 1103	Introduction to Women's, Gender, and Sexuality Studies	
WMNS 1105	Introduction to Trans Studies	
<b>Core Health Humanities Electives</b>		
Complete three of the following not used to satisfy another requirement:		12
ENGL 2770	Writing to Heal	
ENGL 3700	Narrative Medicine	
HIST 1219	History of Global Pandemics	
HIST 2233	The History of Medicine in North America	
PHIL 1145	Technology and Human Values	
PHIL 1165	Moral and Social Problems in Healthcare	
WMNS 1225 or AFAM 1225 or HIST 1225	Gender, Race, and Medicine Gender, Race, and Medicine Gender, Race, and Medicine	
<b>Core Digital Health Humanities Electives</b>		
Complete two of the following not used to satisfy another requirement:		8
ARCH 5312	Mapping and Building Health	

ENGL 3460	The Archives of Public Health
HIST 3344	The History of Western Public Health

## Public Health Requirements

Code	Title	Hours
<b>Public Health Core Courses</b>		
PHTH 1260 or PHTH 1261	The American Healthcare System Comparative Healthcare Systems	4
PHTH 2210 and PHTH 2211	Foundations of Biostatistics and Recitation for PHTH 2210	4

PHTH 2350 or PHTH 2351	Community and Public Health Community and Public Health - Global	4
PHTH 2515	Healthcare Policy and Administration	4
PHTH 4120	Global Perspectives on Discrimination and Health	4
PHTH 4202	Principles of Epidemiology in Medicine and Public Health	4
PHTH 4540	Health Education and Program Planning	4
<b>Science Core Courses</b>		
PSYC 1101	Foundations of Psychology	4
<i>Biology</i>		8-10
Option 1		
BIOL 1141	Microbes and Society	
BIOL 1147	The Human Organism	
Option 2		
BIOL 1111 and BIOL 1112	General Biology 1 and Lab for BIOL 1111	
BIOL 1113 and BIOL 1114	General Biology 2 and Lab for BIOL 1113	
<b>Social Science Selectives</b>		7-8
Complete one introductory course from the following:		
ANTH 1101	Peoples and Cultures	
COMM 1225	Communication Theory	
ECON 1115 and ECON 1125	Principles of Macroeconomics and Recitation for ECON 1115	
ECON 1116 and ECON 1126	Principles of Microeconomics and Recitation for ECON 1116	
HUSV 1101	Social Change and Human Services	
INTL 1101	Globalization and International Affairs	
POLS 1160	International Relations	
SOCL 1101	Introduction to Sociology	
Complete one upper-level course from the following (categories provided for reference):		
<i>Society and Behavior</i>		
ANTH 3441	Medical Anthropology	
COMM 3201	Health Communication	
COMM 4102	Health Communication Campaigns	
CRIM 3040	Psychology of Crime	
ECON 3420	Urban Economic Issues	
HLTH 5280	The (in)Visibility of (dis)Ability in Society	
PHTH 5222	Health Advocacy	
PSYC 3402	Social Psychology	
PSYC 3404	Developmental Psychology	
PSYC 3450	Learning and Motivation	
SOCL 3241	Violence and Society	
SOCL 3441	Sociology of Health and Illness	

SOCL 4520	Race, Class, and Gender
<i>Globalization and Global Health</i>	
AFRS 3424	Epidemiology of Pandemic Diseases and Health Disparities in the African Diaspora
ECON 3404	International Food Policy
INTL 3200	Cities in a Global Context
or INTL 3201	Cities in a Global Context (Abroad)
INTL 3400	International Conflict and Negotiation
PHTH 5230	Global Health
POLS 3487	Politics of Developing Nations
<i>Environmental Health and Climate Change</i>	
ECON 3423	Environmental Economics
COMM 3500	Environmental Issues, Communication, and the Media
INTL 5100	Climate and Development
or PPUA 5100	Climate and Development
PHTH 5214	Environmental Health
PPUA 5238	Climate Change and Global Urbanization
<i>Law, Policy, and Human Rights</i>	
ECON 3424	Law and Economics
PHIL 5001	Global Justice
PHIL 5002	Ethics and Public Policy
POLS 3307	Public Policy and Administration
POLS 3900	Social Policy
PHTH 4515	Critical Issues in Health and Public-Health Policy
<i>Healthcare Administration and Management</i>	
ECON 3413	Health Economics and Healthcare Policy
ORGB 3201	Organizational Behavior
PHTH 4511	Healthcare Management
PHTH 5232	Evaluating Healthcare Quality
PHTH 5234	Economic Perspectives on Health Policy

## Other Requirements

Code	Title	Hours
<b>Introduction to College</b>		
HSCI 1000	College: An Introduction	1
or HIST 1000	History at Northeastern	
or ENGL 1000	English at Northeastern	
or PHIL 1000	Philosophy at Northeastern	
<b>Professional Development</b>		
HSCI 2000	Professional Development for Bouvé Co-op	1
or EESH 2000	Professional Development for Co-op	
<b>Writing</b>		
ENGW 1111	First-Year Writing	4
<i>Advanced Writing Course</i>		
Courses listed below are preferred but other advanced writing courses will be accepted:		
ENGW 3306	Advanced Writing in the Health Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	
or ENGW 3308	Advanced Writing in the Social Sciences	
or ENGW 3309	Advanced Writing in the Humanities	
<b>Capstone</b>		
HSCI 4700	Health Science Capstone Introduction	0
Complete one of the following:		
HSCI 4720	Health Science Capstone—Service	4

HSCI 4730	Health Science Capstone—Research
-----------	----------------------------------

HSCI 4740	Health Science Capstone Seminar
-----------	---------------------------------

## Public Health Major Requirement

A grade of C or higher is required for all BIOL, HSCI, and PPTH courses.

## Program Requirement

130 total semester hours required

## Public Health and Communication Studies, BA

### Overview

The combined Bachelor of Arts in Public Health and Communication Studies offers an interdisciplinary approach to public health communication. Students combine courses from public health, social sciences, and communication studies to study the important role of communication in shaping the public's understanding of health issues. The interdisciplinary curriculum is enhanced by experiential learning opportunities and is designed to prepare students for challenging careers that involve crafting messages about health, developing strategies for promoting access to healthcare services, and specific applications such as disease awareness and prevention.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### BA Language Requirements

All BA students are required to complete the BA degree language requirements, for a total of 12 semester hours of language study or demonstrated equivalent proficiency, as described in Additional Requirements for BA students (p. 119). Successful demonstration of proficiency does not reduce total minimum semester hours of study required to earn the BA degree.

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Public Health Requirements

#### PUBLIC HEALTH CORE COURSES

Code	Title	Hours
PHTH 1260 or PHTH 1261	The American Healthcare System Comparative Healthcare Systems	4
PHTH 2210 and PHTH 2211	Foundations of Biostatistics and Recitation for PHTH 2210	4

## Public Health and Cultural Anthropology, BA

### Overview

The combined Bachelor of Arts in Public Health and Cultural Anthropology integrates concepts and theories from cultural anthropology with public health concepts to approach complex health inequities. Students have an opportunity to gain foundational anthropological knowledge and skills and apply theory to public health approaches for addressing poor health outcomes. Students explore how culture and social structures affect health promotion strategies and outcomes. This combined major will appeal to students who want to pursue graduate study and research in anthropology, public health, public policy and administration, and education.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### BA Language Requirements

All BA students are required to complete the BA degree language requirements, for a total of 12 semester hours of language study or demonstrated equivalent proficiency, as described in Additional Requirements for BA students (p. 119). Successful demonstration of proficiency does not reduce total minimum semester hours of study required to earn the BA degree.

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Public Health Requirements

#### PUBLIC HEALTH CORE COURSES

Code	Title	Hours
PHTH 1260 or PHTH 1261	The American Healthcare System Comparative Healthcare Systems	4
PHTH 2210 and PHTH 2211	Foundations of Biostatistics and Recitation for PHTH 2210	4
PHTH 2300 or PHTH 2301	Communication Skills for the Health Professions Communication Skills for the Health Professions—Global	4
PHTH 2350 or PHTH 2351	Community and Public Health Community and Public Health - Global	4
PHTH 2515	Healthcare Policy and Administration	4
PHTH 4120	Global Perspectives on Discrimination and Health	4
PHTH 4202	Principles of Epidemiology in Medicine and Public Health	4
PHTH 4540	Health Education and Program Planning	4

#### SCIENCE CORE COURSES

Code	Title	Hours
PSYC 1101	Foundations of Psychology	4

#### Biology

Complete one of the following options: 8-10

##### Option 1

BIOL 1141	Microbes and Society
BIOL 1147	The Human Organism

##### Option 2

BIOL 1111 and BIOL 1112	General Biology 1 and Lab for BIOL 1111
BIOL 1113 and BIOL 1114	General Biology 2 and Lab for BIOL 1113

#### SOCIAL SCIENCE REQUIREMENTS

Code	Title	Hours
Introductory Course		
Complete one of the following:		4

COMM 1225	Communication Theory
ECON 1115 and ECON 1125	Principles of Macroeconomics and Recitation for ECON 1115
ECON 1116 and ECON 1126	Principles of Microeconomics and Recitation for ECON 1116
ENGL 1300	Introduction to Health and Humanities
HUSV 1101	Social Change and Human Services
INTL 1101	Globalization and International Affairs
PHIL 1101	Introduction to Philosophy
POLS 1160	International Relations

**Upper-Level Course**

Complete one course (total) from any of the following groups: 3-4

*Society and Behavior*

COMM 3201	Health Communication
COMM 4102	Health Communication Campaigns
CRIM 3040	Psychology of Crime
ECON 3420	Urban Economic Issues
HLTH 5280	The (in)Visibility of (dis)Ability in Society
PHTH 5222	Health Advocacy
PSYC 3402	Social Psychology
PSYC 3404	Developmental Psychology
PSYC 3450	Learning and Motivation

*Globalization and Global Health*

AFRS 3424	Epidemiology of Pandemic Diseases and Health Disparities in the African Diaspora
ECON 3404	International Food Policy
INTL 3200 or INTL 3201	Cities in a Global Context Cities in a Global Context (Abroad)
INTL 3400	International Conflict and Negotiation
PHTH 5230	Global Health
POLS 3487	Politics of Developing Nations

*Environmental Health and Climate Change*

ECON 3423	Environmental Economics
COMM 3500	Environmental Issues, Communication, and the Media
INTL/PPUA 5100	Climate and Development
PHTH 5214	Environmental Health
PPUA 5238	Climate Change and Global Urbanization

*Law, Policy, and Human Rights*

ECON 3424	Law and Economics
PHIL 5001	Global Justice
PHIL 5002	Ethics and Public Policy
POLS 3307	Public Policy and Administration
POLS 3900	Social Policy
PHTH 4515	Critical Issues in Health and Public-Health Policy

*Healthcare Administration and Management*

ECON 3413	Health Economics and Healthcare Policy
MGMT 3340	Healthcare Management, Innovation, and Design
ORGB 3201	Organizational Behavior
PHTH 4511	Healthcare Management
PHTH 5232	Evaluating Healthcare Quality
PHTH 5234	Economic Perspectives on Health Policy

**Cultural Anthropology Requirements****REQUIRED CULTURAL ANTHROPOLOGY COURSES**

Code	Title	Hours
ANTH 1101	Peoples and Cultures	4
ANTH 2305	Global Markets and Local Culture	4
ANTH 3410	Ethnographic Field Experience	4
ANTH 3421	Foundations of Anthropological Theory	4

**AREA COURSES**

Code	Title	Hours
Complete two of the following:		8
ANTH 4350	Ethnography of Southeast Asia	
ANTH 4500	Latin American Society and Development	
ANTH 4505	Native North Americans	
ANTH 4510	Anthropology of Africa	
ANTH 4515	Culture and Politics in Modern India	

**CULTURAL ANTHROPOLOGY ELECTIVES**

Code	Title	Hours
Complete three additional courses with the ANTH subject code.		12

**Supporting Course Requirements**

Code	Title	Hours
<b>Introduction to College</b>		
Complete one of the following:		1
HSCI 1000	College: An Introduction	
ANTH 1000	Anthropology at Northeastern	
<b>Co-op Preparation</b>		
Based on home college:		1
HSCI 2000	Professional Development for Bouvé Co-op	
EESH 2000	Professional Development for Co-op	
<b>Writing Courses</b>		
ENGW 1111	First-Year Writing	4
<i>Advanced Writing in the Disciplines</i>		
Complete one of the following:		4
ENGW 3306	Advanced Writing in the Health Professions	
ENGW 3308	Advanced Writing in the Social Sciences	
<b>Capstone</b>		
Complete one of the following options:		4
<i>Health Science Capstone</i>		
Complete the following prerequisite:		
HSCI 4700	Health Science Capstone Introduction	
Complete one of the following:		
HSCI 4720	Health Science Capstone—Service	
or HSCI 4730	Health Science Capstone—Research	
or HSCI 4740	Health Science Capstone Seminar	
<i>Anthropology Senior Seminar</i>		
ANTH 4600	Senior Seminar	

**Integrative Course**

Code	Title	Hours
ANTH 3441	Medical Anthropology	4

**General Electives**

Code	Title	Hours
Complete 12 semester hours of general electives.		12

**Public Health Major Requirement**

A grade of C or higher is required for all BIOL, HSCI, and PHTH courses.

**Public Health and Cultural Anthropology Major Credit Requirement**

Minimum of 95 semester hours required

**Program Requirement**

130 total semester hours required

## Public Health and Journalism, BA

### Overview

The combined major in public health and journalism addresses the vital interest in society for the ability to communicate scientific understanding to the broad public. This combined major provides a valuable and unique set of competencies, ranging from the statistical analysis and epidemiological best practices gained from the courses in the public health program to the cutting-edge communication skills taught within the university's School of Journalism. The combined major highlights the important role both journalism and public health will surely play in a complex and rapidly changing future.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### BA Language Requirements

All BA students are required to complete the BA degree language requirements, for a total of 12 semester hours of language study or demonstrated equivalent proficiency, as described in Additional Requirements for BA students (p. 119). Successful demonstration of proficiency does not reduce total minimum semester hours of study required to earn the BA degree.

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

**Sociology Requirements**

Code	Title	Hours
<b>Required Sociology Courses</b>		
ANTH 2305	Global Markets and Local Culture	4
SOCL 1101	Introduction to Sociology	4

SOCL 3300	Social Theory	4
<b>Electives</b>		
Complete two electives with courses beyond those taken in the requirements above.		8
SOCL 1102 to SOCL 2999		
Complete four additional SOCL courses in the following range:		16
SOCL 3000 to SOCL 5999		

## Supporting Course Requirements

Code	Title	Hours
<b>Introduction to College</b>		
Complete one of the following:		1
HSCI 1000	College: An Introduction	
SOCL 1000	Sociology at Northeastern	
<b>Co-op Preparation</b>		
Complete one of the following:		1
EESH 2000	Professional Development for Co-op	
HSCI 2000	Professional Development for Bouvé Co-op	
<b>Writing Courses</b>		
<i>First-Year Writing</i>		
ENGW 1111	First-Year Writing	4
<i>Advanced Writing in the Disciplines</i>		
Complete one of the following:		4
ENGW 3306	Advanced Writing in the Health Professions	
ENGW 3308	Advanced Writing in the Social Sciences	
<b>Statistics and Research Methods</b>		
Complete one of the following:		8
PHTH 2210 and PHTH 2211 and PHTH 4202	Foundations of Biostatistics and Recitation for PHTH 2210 and Principles of Epidemiology in Medicine and Public Health	
SOCL 2320 and SOCL 2321	Statistical Analysis in Sociology and Research Methods in Sociology	
<b>Capstone</b>		
Complete one of the following options:		4
<i>Health Science Capstone</i>		
Complete the following prerequisite:		
HSCI 4700	Health Science Capstone Introduction	
And complete one of the following:		
HSCI 4720 or HSCI 4730 or HSCI 4740	Health Science Capstone—Service Health Science Capstone—Research Health Science Capstone Seminar	
<i>Sociology Senior Seminar</i>		
SOCL 4600	Senior Seminar	

## Integrative Requirement

Code	Title	Hours
SOCL 3441	Sociology of Health and Illness	4

## General Electives

Code	Title	Hours
Complete 12 semester hours of general electives.		12

## Public Health Major Requirement

A grade of C or higher is required for all BIOL, HSCI, and PHTH courses.

**Public Health and Sociology Major Credit Requirement**

Minimum of 87 semester hours required

**Program Requirement**

130 total semester hours required

## Early Intervention, Minor

### Overview

The interdisciplinary minor in early intervention (EI) is designed for students who enjoy working with very young children and their families. Through coursework and practicum experiences, students are prepared to work with infants and toddlers with known disabilities, or those who are at risk for developmental delay, and their families.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Courses

Code	Title	Hours
CAEP 5150	Early Intervention: Family Systems	3
CAEP 5151	Early Intervention: Infant and Toddler Development, Risk, and Disability	3
CAEP 5153	Early Intervention: Assessment and Intervention	3
SLPA 5152	Early Intervention: Planning and Evaluating Services	3
SLPA 5154	Early Intervention Practicum 1	2
SLPA 5155	Early Intervention Practicum 2	2

### GPA Requirement

2.000 GPA required in the minor

## Exercise Science, Minor

The minor in exercise science is for undergraduate students from any discipline wishing to expand their understanding in this area. Exercise science is a discipline that examines the short- and long-term responses to exercise and benefits of exercise training for healthy persons, as well as persons with chronic diseases such as heart disease, pulmonary diseases, diabetes, and obesity. Through this minor, undergraduate students have an opportunity to broaden their understanding of exercise and physical activity in health promotion, disease prevention, and interventions. Students who elect a minor in exercise science may then apply to the Master of Science in Exercise Science upon graduation.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Exercise Science Requirements

A minimum grade of C is required in all courses taken toward the minor.

### Required Courses

Code	Title	Hours
BIOL 2217 and BIOL 2218	Integrated Anatomy and Physiology 1 and Lab for BIOL 2217	5
BIOL 2219 and BIOL 2220	Integrated Anatomy and Physiology 2 and Lab for BIOL 2219	5
EXSC 4500 and EXSC 4501	Exercise Physiology 1 and Lab for EXSC 4500	5
EXSC 5200	Cardiopulmonary Physiology	3
EXSC 5220	Advanced Exercise Physiology	3

### GPA Requirement

2.000 GPA required in the minor

## Global Health, Minor

The area of global health has become a critical field of study across and within diverse disciplines, because of the cross-border and cross-national implications of health-related risks for national security, commerce, transportation, and healthcare delivery itself. In collaboration with the College of Social Sciences and Humanities, the minor in global health is designed to provide undergraduate students an opportunity to explore and discuss the implications with an interdisciplinary lens. The minor is comprised of five courses: one foundation and one core course, three electives, and a global health experience to be approved by the global health minor advisor.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

#### Required Foundation Course

Code	Title	Hours
AFRS 1270	Introduction to Global Health	4
or PHTH 1270	Introduction to Global Health	

#### Core Course

Code	Title	Hours
Complete one of the following. If additional courses are taken, they may be used as electives.		3-4
AFRS 3424	Epidemiology of Pandemic Diseases and Health Disparities in the African Diaspora	
PHTH 4120	Global Perspectives on Discrimination and Health	
PHTH 5230	Global Health	

#### Elective Courses

Code	Title	Hours
Complete three courses from the following areas. Only two courses from any one area may count toward the minor electives. No more than two required courses in the student's major may count toward the minor electives. At least one of the minor electives must be at the 3000-level or above.		9-12

##### Area 1: Community and Public Health

AFRS 4939	Community Health, Culture, and Development in Kenya (Dialogue of Civilizations only)	
CAEP 2050	Health Systems, Services, and Education in Ghana (Dialogue of Civilizations only)	
ENVR 1110	Global Climate Change	
PHTH 1261	Comparative Healthcare Systems (Dialogue of Civilizations only)	
PHTH 2301	Communication Skills for the Health Professions—Global (Dialogue of Civilizations only)	
PHTH 2350 or PHTH 2351 or NRSR 4604	Community and Public Health Community and Public Health - Global Public Health Community Nursing	
PHTH 4202	Principles of Epidemiology in Medicine and Public Health	
PHTH 4540	Health Education and Program Planning	

##### Area 2: Biology of Health and Disease

BIOL 1141	Microbes and Society	
BIOL 1143	Biology and Society	
BIOL 2327	Human Parasitology	
EEMB 3466	Disease Ecology	

##### Area 3: Society and Cultural Health / Area Studies

AFRS 2900	Swahili, Culture, and Politics in Kenya (Dialogue of Civilizations only)	
ANTH 4350	Ethnography of Southeast Asia	
ANTH 4510	Anthropology of Africa	
ANTH 4515	Culture and Politics in Modern India	
ECON 1230	Healthcare and Medical Economics	
HIST 2233	The History of Medicine in North America	
LACS 1220	Latino, Latin American, and Caribbean Studies	

PHIL 1165	Moral and Social Problems in Healthcare
WMNS 3100	Gender, Social Justice, and Transnational Activism
or POLS 3100	Gender, Social Justice, and Transnational Activism
or ANTH 3100	Gender, Social Justice, and Transnational Activism
<b>Area 4: Globalization and Development</b>	
CRIM 1400	Human Trafficking
ECON 1291	Development Economics
ECON 3404	International Food Policy
ECON 3413	Health Economics and Healthcare Policy
ECON 3416	Behavioral Economics
ECON 5292	Gender and Development Economics
HLTH 2100	Interprofessional Ethics for Individual and Population Health
INTL 1101	Globalization and International Affairs
POLS 1160	International Relations

### Global Health Experience

Complete a global health experience that has been approved by the global health minor advisor.

### Recommended

Competency in another language other than English is recommended.

### Completion of the Minor

All coursework must be completed at a minimum grade of B and courses may not be taken Pass/Fail.

Complete a minimum of 16 semester hours.

3.000 GPA required in the minor.

## Health Psychology, Minor

The objective of the minor in health psychology is to provide students with knowledge regarding the relationship between psychological and behavioral processes and health and illness. Distinct from other specialty areas in psychology, health psychology focuses on how biology, psychology, behavior, and social factors influence health and illness.

This minor seeks to benefit students by highlighting the unique features of this specialty area and help students understand how to apply this knowledge to the provision of health services and various career paths relevant to health psychology, should they choose to pursue careers in professional psychology focused on the promotion of health. The minor in health psychology is designed for undergraduate students from a variety of disciplines within Bouvé and across the university who wish to expand and to apply their understanding in key concepts of behavioral science and how they inform and intersect with public health, prevention science, clinical applications, and interdisciplinary and interprofessional care.

The minor is comprised of five courses. It requires two foundational courses, one that provides an introduction to the role of psychology in health, illness, and healthcare—Health Psychology: An Introduction (CAEP 2012)—and one that focuses on the application of principles of behavior analysis to address common health problems, such as obesity, addiction, and adherence to medical procedures—Behavioral Assessment and Treatment of Health Problems in the 21st Century (CAEP 2101).

These courses instruct students on basic, foundational principles of mental/behavioral health and the role of psychology in overall health and well-being in applied settings. Students may choose three other electives based on their specific interests.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Courses

Code	Title	Hours
CAEP 2012	Health Psychology: An Introduction	4
CAEP 2101	Behavioral Assessment and Treatment of Health Problems in the 21st Century	4

### Elective Courses

Code	Title	Hours
Complete any three of the following:		12
CAEP 2105	College Student Mental Health	
CAEP 3899	Relationships in College	
CAEP 5150	Early Intervention: Family Systems	
CAEP 5151	Early Intervention: Infant and Toddler Development, Risk, and Disability	
HLTH 5002	Mindfulness: Theory and Practice	
HUSV 2800	Sexual Orientation and Gender Expression	
HUSV 3520	Child Intervention and Treatment	
PSYC 1101	Foundations of Psychology	
PSYC 3404	Developmental Psychology	

### GPA Requirement

2.000 GPA required in the minor

## Health, Humanities, and Society, Minor

The health, humanities, and society minor is designed for students who would like to learn how to think capaciously and creatively about health using the rigorous, precise, and flexible skills trained by the social sciences and the humanities. The social sciences teach students to think about the social, economic, and political factors that structure health conditions and outcomes in particular societies, while the humanities train students to navigate the complexities of interpersonal interaction and their ethical implications, to relate the micro to the macro and texts to contexts, to historicize encounters, to communicate accurately and effectively across a variety of media, and to engage in creative analytical thinking about healthcare. The landscape of healthcare is quickly changing, and this training will equip students well not only for the diverse forms of health work that exist today, but for as yet unimaginable varieties of health-related work in the future.

This minor is structured around the particular competencies that the social sciences and humanities train. Those competencies are narrative and historical perspective, critical attention and observation, ethics and judgment, performance and creativity, and social and structural proficiency. Rather than adopting the more traditional approach of connecting particular skills to particular disciplines (say, narrative to literature and observation to art history), this minor builds from discipline-specific health knowledge while training students to think across disciplines. Thus, it will not be unusual for students to find a single course addressing multiple competencies or to take courses in different disciplines that address the same competency from distinct but complementary perspectives.

This minor is housed in the Humanities Center of the College of Social Sciences and Humanities in partnership with the Bouvé College of Health Sciences.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Courses

No more than two courses, in addition to the introductory course, may be taken under the 2000 level.

Code	Title	Hours
<b>Introductory Course</b>		
INSH 1300	Introduction to Health and Humanities	4
<b>Humanities Requirement</b>		
Complete two of the following:		8
ENGL 2770	Writing to Heal	
ENGL 3140	19th-Century Literatures	
ENGL 3700	Narrative Medicine	
ENGL 4710	Capstone Seminar	
PHIL 1165	Moral and Social Problems in Healthcare	
PHIL 1271	Sex in Judaism, Christianity, and Islam	
WMNS 1225	Gender, Race, and Medicine	
<b>Social Sciences Requirement</b>		
Complete two of the following:		8
AFRS 3424	Epidemiology of Pandemic Diseases and Health Disparities in the African Diaspora	
AFRS 4939	Community Health, Culture, and Development in Kenya	
ANTH 4580	Special Topics in Anthropology	
ECON 1230	Healthcare and Medical Economics	
HLTH 5280	The (in)Visibility of (dis)Ability in Society	
PHTH 1270	Introduction to Global Health	
PHTH 2300	Communication Skills for the Health Professions	
or PHTH 2301	Communication Skills for the Health Professions—Global	
PHTH 4120	Global Perspectives on Discrimination and Health	
PHTH 5202	Introduction to Epidemiology	
PHTH 5234	Economic Perspectives on Health Policy	
SOCL 1295	Drugs and Society	
SOCL 2303	Gender and Reproductive Justice	
SOCL 3441	Sociology of Health and Illness	

**Total Hours**

**20**

1330 Health, Humanities, and Society, Minor

**GPA Requirement**

2.000 GPA required in the minor

## Healthcare System Operations, Minor

The objective of the minor in healthcare system operations is to prepare students to apply industrial and systems engineering methods in healthcare applications. Distinct from other service industries, healthcare systems are characterized by extensive complexities driven by communication between and interdependencies among multiple actors, and the need to simultaneously address multiple competing objectives pertaining to economic, quality-driven, individual-driven, and population-driven goals. This minor will benefit students by highlighting the unique features of this industry and methods for addressing its unique challenges to engineer improvements to the design, operation, and management of healthcare systems.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Courses

At most, one course from the minor may be counted toward major requirements.

Code	Title	Hours
<b>Required Courses</b>		
IE 5617	Lean Concepts and Applications	4
IE 5400	Healthcare Systems Modeling and Analysis	4
or IE 3500	Introduction to Healthcare Systems Engineering	
PHTH 1260	The American Healthcare System	4
<b>Electives</b>		
Complete one of the following:		4
IE 5374	Special Topics in Industrial Engineering (System Dynamics in Healthcare)	
IE 5500	Systems Engineering in Public Programs	
IE 5640	Data Mining for Engineering Applications	
NRSG 5121	Epidemiology and Population Health	
PHTH 4511	Healthcare Management	
PHTH 5226	Strategic Management and Leadership in Healthcare	
PHTH 5232	Evaluating Healthcare Quality	
SCHM 3315	Managing Healthcare Operations and Supply Chain	

### GPA Requirement

2.000 GPA required in the minor

## Mindfulness Studies, Minor

The minor in mindfulness studies is open to all majors at the university. The term “mindfulness” refers to maintaining an awareness of the present moment without judgment. Modern-day mindfulness has roots in Eastern spiritual traditions including Buddhism and Hinduism; after arriving in the West, mindfulness practice became a mostly secular practice used by many to promote health and wellbeing. The minor in mindfulness studies is designed for students who seek to enrich their understanding of mindfulness practice, including its benefits and potential applications. Pursuing a minor in mindfulness studies will complement students’ knowledge in the related fields of psychology, health sciences, philosophy, and religious studies. However, developing a mindfulness practice and an understanding of the potential benefits and applications of mindfulness may help enrich the lives of students in any major. Whether students are interested in health, education, or business, by pursuing the minor in mindfulness studies they have an opportunity to learn how to develop a mindfulness practice and explore how to apply mindfulness to their career.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Courses

Code	Title	Hours
CAEP 1280	Introduction to Mindfulness	4
PHIL 1133	Selling Spirituality	4
PHIL 1275 or PHIL 2395	Hinduism, Buddhism, and Beyond Japanese Buddhism	4

### Electives

Code	Title	Hours
Complete one of the following:		
CAEP 1290	Personal Behavior Change	4
CAEP 2280	The Yoga Tradition in Nepal: Philosophy, Methods, and Practice	4
CAEP 2290	The Yoga Tradition: Philosophy, Methods, and Practice	4
CAEP 3899	Relationships in College	4
HLTH 5002	Mindfulness: Theory and Practice	3
HUSV 2340	Mindfulness in Mental Health	4
PHIL 1130	Comparative Ethics	4
PHIL 1290	Chinese Philosophy and Religion	4

### GPA and Grade Requirement

Minimum 2.000 GPA required in the minor. All coursework must be completed with a minimum grade of C.

### Credit Requirement

15 hours required

## Nutrition, Minor

The minor in nutrition is designed for undergraduate students from a variety of disciplines across the university who wish to expand and apply their understanding in key concepts of nutrition and how they intersect with public health, clinical applications, food policy, behavioral counseling, or health communication.

The minor is comprised of five courses. It requires a foundational course in Human Nutrition (HSCI 1105) that instructs students in the basic principles of human nutrition. Students expand foundational concepts in additional required courses to apply knowledge of nutrition in clinical settings and to public health initiatives. Following the initial core courses, students complete two elective courses, at least one at 3000 level or higher, developing deeper knowledge and specific professional skills.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Courses

Code	Title	Hours
HSCI 1105	Human Nutrition	4
HSCI 2350	Advanced Nutrition in Health and Disease	4
HSCI 2500	Public Health Nutrition in the Community	4

### Supporting Courses

Code	Title	Hours
Complete two of the following. At least one elective must be at the 3000 level or above: 7-8		
BIOL 3611 or PHSC 2320	Biochemistry	
CAEP 2012	Health Psychology: An Introduction	
CAEP 3480	Counseling Theories and Practice	
COMM 3201 or PHTH 2300 or PHTH 2301	Health Communication	
	Communication Skills for the Health Professions	
	Communication Skills for the Health Professions—Global	
ECON 3404	International Food Policy	
EXSC 1120	Introduction to Exercise, Fitness, and Health	
HSCI 1106	Contemporary Issues in Nutrition	
PHSC 4340	Pharmacology for the Health Professions	
PHSC 4502	Pharmacology/Medicinal Chemistry 2	
PPUA 5270	Food Systems and Public Policy	

### GPA Requirement

2.000 GPA required in the minor

## Public Health, Minor

The minor in public health is designed for undergraduate students from a variety of disciplines who wish to explore key components of public health including the basic components of the U.S. healthcare system, core values and concepts of public health, public health analytic methods, and the social determinants of health. The minor is comprised of five courses for a minimum of 18 semester hours. The four required courses focus on the key components of public health and the remaining course is an elective from the provided list. Through the elective course, students can explore policy, healthcare management and delivery, research methods, health communication, nutrition and exercise, health disparities, and environmental health.

### Minor Requirements

*Note:* This minor is not open to students majoring in the Bachelor of Science in Health Science or Bachelor of Arts in Public Health or those pursuing a combined major with those majors.

Complete all courses listed below unless otherwise indicated.

### Required Courses

Code	Title	Hours
PHTH 1260 or PHTH 1261	The American Healthcare System Comparative Healthcare Systems	4
PHTH 2350 or PHTH 2351 or NRSRG 4604	Community and Public Health Community and Public Health - Global Public Health Community Nursing	3-4
PHTH 4202	Principles of Epidemiology in Medicine and Public Health	4
Complete one of the following (PHTH 2210 is recommended):		3-4
ECON 2350	Statistics for Economists	
ENVR 2500	Biostatistics	
MATH 2280	Statistics and Software	
MATH 3081	Probability and Statistics	
MGSC 2301	Business Statistics	
NRSRG 5120	Statistics for Health Science	
PHMD 3450	Research Methodology and Biostatistics	
PHTH 2210	Foundations of Biostatistics	
POLS 2400	Quantitative Techniques	
PSYC 2320	Statistics in Psychological Research	

### Elective

Code	Title	Hours
<b>Complete one course from the options below. Categories are provided to assist with selection.</b>		<b>4</b>
<i>Nutrition and Wellness</i>		
EXSC 1120	Introduction to Exercise, Fitness, and Health	
HSCI 1105 or HSCI 1106	Human Nutrition Contemporary Issues in Nutrition

## School of Nursing

Website (<http://www.northeastern.edu/bouve/nursing/>)

### **Amanda Choflet, DNP, RN, NEA-BC**

Interim Dean, School of Nursing  
Assistant Dean of Graduate Programs and Associate Clinical Professor

### **Kristen Mathieu Gonzalez, DNP, RN, MSN/Ed**

Assistant Dean of Undergraduate Programs and Assistant Clinical Professor

#### *Office of the Dean*

617.373.3649  
617.373.8675 (fax)

#### *Undergraduate Program Office*

617.373.2480

The School of Nursing offers a traditional BS, an accelerated BS, and a direct entry (BSN) to master's (MSN) for second-degree students in nursing designed to prepare students to become professional nurses by providing them with the knowledge, skills, and professional values needed for successful practice in a variety of healthcare settings. The school aims to provide all students—including those with diverse backgrounds and changing career goals—with a broad-based education that will foster ongoing personal and professional growth.

The mission of the Northeastern University School of Nursing is to educate students to provide evidence-based, culturally and linguistically competent, ethical healthcare that is high quality, safe, and accessible to diverse local, national, and global communities. Our programs seek to prepare students to become leaders as nurse clinicians, educators, scholars, and researchers.

Nursing is both a science-based profession and a caring art. The curriculum draws on basic and behavioral sciences, the arts and humanities, and the art and science of nursing to help students understand the complexities of health and illness across the life span.

## Clinical Settings

Clinical settings require student criminal background checks. Additionally, international students require curricular practical training clearance to meet federal requirements for all clinical and co-op experiences. Please see Requirements for Clinical, Internships, and Practicum Courses (<http://catalog.northeastern.edu/graduate/health-sciences/academic-policies-procedures/practicum-internship-policies/>) and Background Checks (<http://catalog.northeastern.edu/graduate/health-sciences/academic-policies-procedures/background-checks/>) in this catalog for further details.

## ACCREDITATION

The baccalaureate degree program in nursing at Northeastern University is accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791, and is approved by the Board of Registration in Nursing of the Commonwealth of Massachusetts and the state of North Carolina. Accreditation and approval indicate that the program meets educational standards for faculty, curriculum design, student quality, and overall university support.

## Programs

### **Bachelor of Science in Nursing (BSN)**

- Nursing (p. 1337)
- Nursing—Accelerated Program for Second-Degree Students (p. 1345)
- Nursing—Transfer Track (p. 1350)

### **Minor**

- Wellness Studies (p. 1237)

## Nursing, BSN

The goal of the School of Nursing is to prepare students to think critically and to practice nursing competently and compassionately in rapidly changing practice environments. All efforts are designed to build nursing knowledge; enhance nursing practice and patient safety; foster professional integrity; and ultimately improve the health outcomes of patients, families, and communities across the continuum of care. This approach requires knowledge, skills, and attitudes that demonstrate leadership, quality care, critical thinking and clinical reasoning, cultural and linguistic competence, interprofessional collaboration, evidence-based practice, and integration of informatics and technology.

The clinical program takes place in the community where people live, as well as in hospitals, rehabilitation centers, and long-term-care facilities. The curriculum is capped by courses that enable students to put leadership and management skills into action and to synthesize the complete role of the professional nurse in a clinical practicum.

In addition to completing academic coursework, students must meet the cooperative education requirement as specified by their plan of study, which gives them the opportunity to integrate the theory and practice of nursing in selected settings. Numerous community and institutional healthcare agencies in Greater Boston and across the country offer students an opportunity to gain experience in providing nursing care to a variety of patients and families and to understand that nurses have major roles in wellness and health promotion, acute care, and long-term care. Students in the program are strongly encouraged to participate in research activity and in global educational opportunities that can all be a part of the program.

The baccalaureate degree program in nursing at Northeastern University is accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791, and is also approved by the Board of Registration in Nursing of the Commonwealth of Massachusetts. Accreditation and approval indicate that the program meets educational standards for faculty, curriculum design, student quality, and overall university support.

The school subscribes to the standards established by the American Association of Colleges of Nursing (AACN), of which it is a member.

### Academic Standards for Nursing Majors

#### ACADEMIC DISMISSAL FROM MAJOR

Students in the Bouvé College of Health Sciences will be dismissed from their major effective the following academic semester for any of the reasons noted below:

- Students who do not meet the required minimum grade in two professional courses, including labs and clinical, will be dismissed from the program. Only one professional course can be remediated.
- Remediation of a failed professional course is a requirement for progression in the program.
- Students who do not meet the minimum grade requirement within two attempts of the course will be dismissed from the program.

*Note:* Students dismissed from their major but who are otherwise in good standing with the university are allowed to remain at Northeastern for up to two semesters as a provisional Bouvé student, by the end of which the student is expected to move into a new major.

#### ACADEMIC APPEALS

Students who believe that they were erroneously, capriciously, or otherwise unfairly treated in an academic or cooperative education decision may petition to appeal the decision. Additional details about the process may be found in the Bouvé College of Health Sciences Academic Affairs Appeals Process (<http://catalog.northeastern.edu/graduate/health-sciences/academic-policies-procedures/appeals-process/>) and in *Appeals Policies and Procedures* in the university Undergraduate Student Handbook (<http://www.northeastern.edu/osccr/code-of-student-conduct/>).

### Program Policies and Standards

Students are expected to adhere to the policies and standards of their program major as stated in the Undergraduate Student Handbook (<http://www.northeastern.edu/osccr/code-of-student-conduct/>) to progress through their curriculum as planned. Students seeking any exceptions to the program policies and standards specified for their program major will be brought before the School of Nursing Academic Standing Committee to present their petitions.

#### BACHELOR OF SCIENCE IN NURSING PROGRAM REQUIREMENTS

The nursing program includes several options for a student's plan of attendance, as specified below:

For those students entering Northeastern as first-year (freshman) students (including N.U.in) and current Northeastern students entering the BSN via the change-of-major process:

- A four-year plan with two, six-month co-ops:

At least one of the two co-op experiences must involve working with registered nurses providing direct patient care.

Students must complete all co-op experiences planned in their academic program with a grade of S for each co-op experience.

**Current Northeastern students** entering the BSN via the change-of-major process should follow the requirements found at the Bouvé College of Health Sciences Office of Student Services under Change of Major (<https://bouve.northeastern.edu/student-services/undergraduate-change-of-major/>).

All students, regardless of entry point, must successfully complete 133 semester hours of academic credit to graduate in compliance with university and nursing curriculum requirements and in their expected year of graduation.

- Degree requirements must be completed within eight years from the date of matriculation.
- Students are required to attend all scheduled nursing classes, clinical experiences, and clinical labs on campus and in clinical agencies. If the student fails to meet attendance requirements, the student will fail the associated class, clinical, and/or lab.

Transfer students who do not already have a bachelor's degree from institutions outside Northeastern may choose to apply to the Nursing, BSN–Transfer Track (p. 1350), a 16-month transfer track hybrid program, where approved by state governance. All plans are not offered at all campuses.

### CLINICAL REQUIREMENTS

Clinical settings require criminal background checks. Additionally, international students require curricular practical training clearance to meet federal requirements for all clinical and co-op experiences.

All students must receive a health clearance from University Health and Counseling Services. Health clearance is based on specific documentation of immunity from infectious disease and a physical examination (this may be done by the student's own healthcare provider). In addition, nursing students need a clinical clearance in order to participate in clinical courses. Clinical clearance, managed by the School of Nursing's Clinical Placement Office, includes verification of certification of *Healthcare Provider* cardiopulmonary resuscitation; recent negative tuberculosis screening (PPD); positive titers for MMR, varicella, and hepatitis B; vaccines including TDAP and influenza; and additional health screenings as may be required by the program. It is the responsibility of the student to stay current and to provide documentation required for clinical clearance throughout the entire nursing program.

Six weeks prior to the start of a clinical course, students must show:

- Evidence of immunizations and health clearance by UHCS.
- Documentation of *Healthcare Provider* CPR certification.
- Completion of a Criminal Offender Record Information background check to be eligible for clinical placement.
- Students will not be allowed to start the clinical course, and may be dropped from the clinical course, if these processes are not satisfactorily completed.

Students should refer to clinical course requirements, health clearance requirements for clinical rotations, and the professional conduct statement here (<http://catalog.northeastern.edu/graduate/health-sciences/academic-policies-procedures/practicum-internship-policies/>) for additional details.

### CLINICAL WARNING

A nursing student may be placed on clinical warning, or fail the clinical course, at any time during the semester for the following reasons:

- Failing to meet the clinical objectives at a satisfactory level.
- Failing to demonstrate safe practice. Students may be removed from the clinical area, before completion of the clinical rotation, if the instructor determines that the student is unsafe. This will result in the student failing the clinical course.
- Failing to meet the attendance requirement.

### Conditions

- Students on clinical warning must develop an academic plan with the clinical instructor to address clinical performance.
- Students will be expected to improve clinical performance by adhering to the plan.
- Failure to adhere to the terms of the plan will result in the student failing the course and being placed on academic probation. All conditions of academic probation will then apply.

### Notification

- The clinical instructor will issue the student a Clinical Warning via the university's academic progress reporting tool.
- The student and the instructor should then develop a plan together to address the deficiency.
- Copies of the warning will be forwarded to the program director and/or the assistant dean for undergraduate programs if needed.
- This is an administrative warning and will not be posted on the transcript.
- Satisfactory completion of the clinical experience component of the course will result in removal of the warning from the student's file.

### BLOOD-BORNE PATHOGEN EXPOSURE AND INJURY

Any student who sustains any kind of injury and/or exposure related to blood-borne, respiratory, or other pathogens or hazardous materials while on a clinical rotation should seek immediate treatment. They must also immediately follow the procedures listed below:

### Procedures

- Students must follow the affiliate site's protocol for exposure reporting, testing, counseling, and follow-up.
- Students can present their Clinical Accident Insurance identification card (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/General%20Resources/Forms/AllItems.aspx?id=%2Fsites%2FBouveCurrentStudentResources%2FGeneral%20Resources%2FAccident%20Insurance%2FNortheastern%20University%20Insurance%20Card%2Epdf&parent=%2Fsites%2FBouveCurrentStudentResources%2FGeneral%20Resources%2FAccident%20Insurance>) to arrange billing at the site or a suitable nearby hospital or urgent care clinic. If students do not know a local provider, they can call the resource number on their identification card for aid in finding a local provider. Students should also present their personal health insurance information.
- Within 24 hours of the accident, students must also inform their program's director of clinical education (or unit designee responsible for clinical placements) of the accident and submit, in writing, a description of the incident and injury or exposure using the BCHS Accident Report form, linked here (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Clinical-Accident-Report-Form.aspx>). *If a student is incapacitated and unable to file their own report within the 24-hour time frame, a Northeastern faculty or staff person familiar with the incident may file on their behalf. The student should file their own report as soon as possible thereafter.*
- Submission of the Accident Report form linked above will automatically notify:
  - The program's director of clinical education or Clinical Placement Office (or unit designee responsible for clinical placements)
  - The program director (if applicable)
  - Assistant dean of clinical education in the BCHS Dean's Office
  - Risk Services ([risk@northeastern.edu](mailto:risk@northeastern.edu)) ([risk@northeastern.edu](mailto:risk@northeastern.edu))
  - If exposure involved, Office of Environmental Health and Safety—Biosafety
- If for any reason a student is not able to receive immediate medical treatment, there is the resource of postexposure counseling through the university's partner, OEHN (Occupational & Environmental Health Network). They can be reached at 1-866-360-8100. OEHN is open 24 hours a day, 7 days a week, 365 days a year. OEHN will collect appropriate information and engage the doctor on call who can help to direct appropriate care depending on exposure and circumstances.

### Technical Standards for Admission, Academic Progression, and Graduation

The primary mission of the School of Nursing is to educate our students to provide evidence-based, culturally and linguistically competent, ethical healthcare that is high quality, safe, and accessible to diverse local, national, and global communities. Our programs are designed to prepare students to become leaders as nurse clinicians, educators, scholars, and researchers. The School of Nursing is also committed to achieving the goals of the university to become an outstanding national research, practice-oriented, student-centered, urban institution.

The goal of the School of Nursing is to prepare students to think critically and to practice nursing competently and compassionately in rapidly changing practice environments. All efforts are designed to build nursing knowledge, enhance nursing practice and patient safety, foster professional integrity, and ultimately improve the health outcomes of patients, families, and communities across the continuum of care.

In addition to classroom learning, students' clinical education experiences occur in settings, like hospitals, in which patient safety is the priority. For this reason, students who, upon enrollment in any of the nursing programs, seek accommodations from the Disability Resource Center at Northeastern must also request an assessment of accommodations that would be needed for clinical education.

Certain functional abilities are essential for the delivery of safe, effective nursing care during clinical education activities. Therefore, the School of Nursing has determined that certain technical standards are requisite for admission, progression, and graduation from the nursing programs. An individual must be able to independently, with or without reasonable accommodation, meet the following technical standards:

1. General abilities
2. Observational ability
3. Communication ability
4. Motor ability
5. Intellectual, conceptual, and quantitative abilities
6. Behavioral and social attributes
7. Ability to manage stressful situations

Individuals unable to meet these technical standards, with or without reasonable accommodation, will not be able to complete the program.

#### GENERAL ABILITIES

The student is expected to possess functional use of the senses of vision, touch, hearing, and smell so that data received by the senses may be integrated, analyzed, and synthesized in a consistent and accurate manner. A student must be able to respond promptly to urgent situations that may occur during clinical training activities and must not hinder the ability of other members of the healthcare team to provide prompt treatment and care to patients.

#### OBSERVATIONAL ABILITY

The student must have sufficient capacity to make accurate visual observations and interpret them in the context of laboratory studies, medication administration, and patient care activities. In addition, the student must be able to document these observations and maintain accurate records.

**COMMUNICATION ABILITY**

The student must communicate both verbally and nonverbally in order to elicit information and to convey that information to others. Each student must have the ability to read and write accurately and comprehensively in English. The student must be able to thoroughly comprehend and fluently speak the English language so as to facilitate communication with patients, families, professionals in healthcare settings, instructors, and other students. The student must also be able to present information in a professional, logical manner and to provide counseling and instruction in order to effectively care for patients and their families.

**MOTOR ABILITY**

The student must be able to perform gross and fine motor movements with sufficient coordination needed to perform complete physical examinations utilizing the techniques of inspection, palpation, percussion, auscultation, and other diagnostic maneuvers. A student must develop the skills needed to perform or assist with procedures, treatments, administration of medication, and the management and operation of diagnostic and therapeutic medical equipment. The student must possess the physical and mental stamina to meet the demands associated with extended periods of sitting, standing, moving, and physical exertion required for satisfactory and safe performance in the clinical and classroom settings.

**INTELLECTUAL, CONCEPTUAL, AND QUANTITATIVE ABILITIES**

The student must be able to develop and refine critical thinking skills that are essential to nursing practice. Critical thinking involves the abilities to measure, calculate, reason, analyze, and synthesize objective and subjective data and to make decisions, often in a time-urgent environment, that reflect consistent and thoughtful deliberation and sound clinical judgment.

**BEHAVIORAL AND SOCIAL ATTRIBUTES**

Compassion, integrity, motivation, effective interpersonal skills, and concern for others are personal attributes required of those in the nursing programs. The student must be able to work under supervision of a clinical instructor or preceptor; this is essential to ensure patient safety. The student must exercise good judgment and promptly complete all responsibilities in the classroom and clinical settings. The ability to establish culturally competent relationships with individuals, families, and groups and to respond effectively to patients who have different intellectual capacities is critical to nursing practice.

**ABILITY TO MANAGE STRESSFUL SITUATIONS**

The student must be able to adapt to and function effectively in stressful situations in both the classroom and clinical settings, including emergency situations. These stressors include personal, patient care/family, faculty/peer, and/or program-related issues.

**Disability and Special Needs**

Students with special needs are encouraged to contact the Disability Resource Center (<https://drc.sites.northeastern.edu/>) to register and request services. Students must notify the instructor at the beginning of the semester if they plan to use DRC services throughout the course. The staff in that office is available for assistance.

**State Board Nursing Examination**

In Massachusetts, and several other states, the registering board requires that graduates taking the National Council Licensing Examination (NCLEX-RN) meet standards of "good moral character" (GMC). Students may review the GMC requirement specified at Massachusetts General Laws Chapter 112, sections 74, 74A, and 76; Licensure Policy No. 00-01 under "Rules & Regulations" on the Massachusetts BORN website.

Please visit Bouvé College of Health Sciences Program Learning Outcomes for the specific student learning outcomes for this program.

**Program Requirements**

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

**Universitywide Requirements**

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

**NUpath Requirements**

All undergraduate students are required to complete the NUpath Requirements (p. 111).

Professional courses with a prefix HLTH, HSCI, and NRSRG and professional prerequisite courses with a prefix BIOL, CHEM, MATH, and PSYC require a minimum passing grade of C.

**Nursing Major Requirements**

Code	Title	Hours
NRSRG 2150 or HLTH 2100 or PHIL 1165	Ethical Healthcare: Genetics and Genomics Interprofessional Ethics for Individual and Population Health Moral and Social Problems in Healthcare	4

## Supporting Courses

Code	Title	Hours
<b>CORE TERM 1</b>		
NRSG 1000	College: An Introduction	1
BIOL 2217 and BIOL 2218	Integrated Anatomy and Physiology 1 and Lab for BIOL 2217	5
Complete one of the following two lecture/lab pairs:		
CHEM 1101 and CHEM 1102	General Chemistry for Health Sciences and Lab for CHEM 1101	5
CHEM 1161 and CHEM 1162	General Chemistry for Science Majors and Lab for CHEM 1161	5
HSCI 1105	Human Nutrition	4
Complete one of the following:		
MATH 1215	Mathematical Thinking	4
MATH 1241	Calculus 1	
MATH 1242	Calculus 2	
MATH 1251	Calculus and Differential Equations for Biology 1	
MATH 1252	Calculus and Differential Equations for Biology 2	
MATH 1341	Calculus 1 for Science and Engineering	
<b>CORE TERM 2</b>		
BIOL 2219 and BIOL 2220	Integrated Anatomy and Physiology 2 and Lab for BIOL 2219	5
PSYC 1101	Foundations of Psychology	4
BIOL 2221 and BIOL 2222	Foundations of Microbiology and Lab for BIOL 2221	5
ENGW 1111	First-Year Writing	4
<i>The university requires a minimum grade of C for ENGW 1111.</i>		
<b>CLINICAL TERM 2</b>		
NRSG 2000	Professional Development for Co-op	1
SOCL 1101	Introduction to Sociology	4
<b>CLINICAL TERM 3</b>		
PSYC 3404	Developmental Psychology	4
<b>CLINICAL TERM 4</b>		

**CLINICAL TERM 5**

ENGW 3306	Advanced Writing in the Health Professions	4
-----------	--	---

*The university requires a minimum grade of C for ENGW 3306.*

**Electives**

Code	Title	Hours
Complete four courses (for at least 15 credits) outside the School of Nursing or NRSNG courses not used to fulfill requirements above.		15

**NUPATH REQUIREMENTS SATISFIED**

- Analyzing/Using Data (AD)
- Capstone Experience (CE)
- Engaging Differences/Diversity (DD)
- Exploring Creative Expression and Innovation (EI)
- Ethical Reasoning (ER)
- Conducting Formal/Quantitative Reasoning (FQ)
- Interpreting Culture (IC)
- Natural/Designed World (ND)
- Society/Institutions (SI)
- Writing-Intensive in the Major (WI)
- Advanced Writing in the Disciplines (WD)

Integrating Knowledge and Skills Through Experience (EX) is satisfied through co-op.

Students are responsible for using the general electives in this program to complete NUPATH requirements not satisfied by required courses in this program.

**Academic Standards for Nursing Majors**

Minimum passing grade standards exist for both professional courses, which are required courses taught within the major/college, and professional prerequisite courses and are outlined before the nursing requirements above.

Courses in the above-listed professional or professional prerequisite subjects that are taken as electives are exempt from the C or better rule, and the university's minimum satisfactory grade will be accepted.

For all other courses, the university's minimum passing grade for the course will be accepted.

**PROGRESSION WITHIN NURSING**

- First-year students must complete at least 27 semester hours and meet all major prerequisite course requirements to progress to sophomore status. First-year students who earn fewer than the semester hours stipulated by the curriculum plan for their major must make up the difference prior to graduation.
- To progress into the subsequent year of professional courses, students must have completed all professional prerequisites with the required minimum passing grade as noted in the program requirements.
- Students must successfully complete all courses, as stipulated by their approved curriculum plan, with a grade of C or better in order to progress into the next professional course.
- Students who either fail or withdraw from a professional course will need to successfully remediate that course before continuing in their approved curriculum plan.
- Students who incur an incomplete grade in a prerequisite course must obtain approval from their academic advisor, upon consultation with the department faculty and, when appropriate, the School of Nursing Academic Standing Committee, prior to progression into the subsequent course(s).
- Students may not change their graduation date more than twice.

**Program Requirements**

133 total semester hours required

## Nursing, BSN—Accelerated Program for Second-Degree Students

The Accelerated Bachelor of Science in Nursing ([https://absn.northeastern.edu/accelerated-bsn/?utm\\_source=catalog.northeastern.edu&utm\\_medium=absn-copy&utm\\_campaign=main\\_site](https://absn.northeastern.edu/accelerated-bsn/?utm_source=catalog.northeastern.edu&utm_medium=absn-copy&utm_campaign=main_site)) hybrid program, which comprises 16 months of full-time study, combines online didactic coursework and hands-on learning involving both clinical placements and experience in the skills laboratory. Eligibility for the ABSN program requires completion of a prior bachelor's degree in another field. The ABSN program offers students an opportunity to work closely with nursing faculty to master the core skills necessary to excel in their nursing career. The program also seeks to prepare students to successfully take and pass the National Council Licensure Examination for Registered Nurses and earn an RN license.

The ABSN curriculum includes 67 credits of undergraduate courses with online learning modules incorporating lectures and learning activities. The majority of these credits are completed online through an e-learning platform that allows students to listen to lectures, submit assignments, complete interactive learning modules, and engage in discussion with faculty and classmates.

The Bouvé College of Health Sciences School of Nursing has an extensive network of clinical affiliations at health centers, major teaching hospitals, and community hospitals that allow students to engage in clinical experiences covering a wide range of nursing specialties that include adult health, maternal-newborn, pediatrics, behavioral and mental health, acute care, and public health.

The baccalaureate degree program in nursing at Northeastern University is accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791, and is also approved by the Board of Registration in Nursing of the Commonwealth of Massachusetts and by the North Carolina Board of Nursing. Accreditation and approval indicate that the program meets educational standards for faculty, curriculum design, student quality, and overall university support.

The school subscribes to the standards established by the American Association of Colleges of Nursing, of which it is a member.

### Academic Standards for Nursing Majors

#### ACADEMIC DISMISSAL FROM MAJOR

Students in the Bouvé College of Health Sciences will be dismissed from their major effective the following academic semester for any of the reasons noted below:

- Students who do not meet the required minimum grade in two professional courses, including labs and clinical, will be dismissed from the program. Only one professional course can be remediated.
- Remediation of a failed professional course is a requirement for progression in the program.
- Students who do not meet the minimum grade requirement within two attempts of the course will be dismissed from the program.

#### ACADEMIC APPEALS

Students who believe that they were erroneously, capriciously, or otherwise unfairly treated in an academic or cooperative education decision may petition to appeal the decision. Additional details about the process may be found in the Bouvé College of Health Sciences Academic Affairs Appeals Process (<http://catalog.northeastern.edu/graduate/health-sciences/academic-policies-procedures/appeals-process/>) and in *Appeals Policies and Procedures* in the university Undergraduate Student Handbook (<http://www.northeastern.edu/osccr/code-of-student-conduct/>).

### Program Policies and Standards

Students are expected to adhere to the policies and standards of their program major to progress through their curriculum as planned. Students seeking any exceptions to the program policies and standards specified for their program major will be brought before the School of Nursing Academic Standing Committee to present their petitions.

Students are required to attend all scheduled nursing classes, clinical experiences, and clinical labs on campus and in clinical agencies. If the student fails to meet attendance requirements, the student will fail the associated class, clinical, and/or lab.

Students enrolled in the clinical courses will need access to a car to travel to assigned agencies. Students are responsible for their own transportation costs.

#### CLINICAL REQUIREMENTS

Clinical settings require criminal background checks. Additionally, international students require curricular practical training clearance to meet federal requirements for all clinical and co-op experiences.

All students must receive a health clearance from University Health and Counseling Services. Health clearance is based on specific documentation of immunity from infectious disease and a physical examination (this may be done by the student's own healthcare provider). In addition, nursing students need a clinical clearance in order to participate in clinical courses. Clinical clearance, managed by the School of Nursing's Clinical Placement Office, includes verification of certification of Healthcare Provider cardiopulmonary resuscitation; recent negative tuberculosis screening (PPD); positive titers for MMR, varicella, and hepatitis B; vaccines including TDAP and influenza; and additional health screenings as may be required by the program. It is the responsibility of the student to stay current and to provide documentation required for clinical clearance throughout the entire nursing program.

Beginning six weeks prior to the start of a clinical course, students must show:

- Evidence of immunizations and health clearance by UHCS.
- Documentation of Healthcare Provider CPR certification.
- Completion of a Criminal Offender Record Information background check to be eligible for clinical placement.
- Students will not be allowed to start the clinical course, and may be dropped from the clinical course, if these processes are not satisfactorily completed.

Students should refer to Clinical Course Requirements, Health Clearance Requirements for Clinical Rotations, and the Professional Conduct statement here (<http://catalog.northeastern.edu/graduate/health-sciences/academic-policies-procedures/practicum-internship-policies/>) for additional details.

### **CLINICAL WARNING**

A nursing student may be placed on clinical warning, or fail the clinical course, at any time during the semester for the following reasons:

- Failing to meet the clinical objectives at a satisfactory level.
- Failing to demonstrate safe practice. Students may be removed from the clinical area, before completion of the clinical rotation, if the instructor determines that the student is unsafe. This will result in the student failing the clinical course.
- Failing to meet the attendance requirement.

#### **Conditions**

- Students on clinical warning must develop an academic plan with the clinical instructor to address clinical performance.
- Students will be expected to improve clinical performance by adhering to the plan.
- Failure to adhere to the terms of the plan will result in the student failing the course and being placed on academic probation. All conditions of academic probation will then apply.

#### **Notification**

- The clinical instructor will issue the student a clinical warning via the university's academic progress reporting tool.
- The student and the instructor should then develop a plan together to address the deficiency.
- Copies of the warning will be forwarded to the program director and/or the assistant dean for undergraduate programs if needed.
- This is an administrative warning and will not be posted on the transcript.
- Satisfactory completion of the clinical experience component of the course will result in removal of the warning from the student's file.

### **BLOOD-BORNE PATHOGEN EXPOSURE AND INJURY**

Any student who sustains any kind of injury and/or exposure to blood-borne, respiratory, or other pathogens or hazardous materials while on a clinical rotation should seek immediate treatment. They must also immediately follow the procedures listed below:

#### **Procedures**

- Students must follow the affiliate site's protocol for exposure reporting, testing, counseling, and follow-up.
- Students can present their Clinical Accident Insurance identification card (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/General%20Resources/Forms/AllItems.aspx?id=%2Fsites%2FBouveCurrentStudentResources%2FGeneral%20Resources%2FAccident%20Insurance%2FNortheastern%20University%20Insurance%20Card%2Epdf&parent=%2Fsites%2FBouveCurrentStudentResources%2FGeneral%20Resources%2FAccident%20Insurance>) to arrange billing at the site or a suitable nearby hospital or urgent care clinic. If students do not know a local provider, they can call the resource number on their identification card for aid in finding a local provider. Students should also present their personal health insurance information.
- Within 24 hours of the accident, students must also inform their program's director of clinical education (or unit designee responsible for clinical placements) of the accident and submit, in writing, a description of the incident and injury or exposure using the BCHS Accident Report form (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Clinical-Accident-Report-Form.aspx>). *If a student is incapacitated and unable to file their own report within the 24-hour time frame, a Northeastern University faculty or staff person familiar with the incident may file on their behalf. The student should file their own report as soon as possible thereafter.*
- Submission of the Accident Report form linked above will automatically notify:
  - The program's Director of Clinical Education or Clinical Placement Office (or unit designee responsible for clinical placements)
  - The program director (if applicable)
  - Assistant Dean of Clinical Education in the BCHS Dean's Office
  - Risk Services ([risk@northeastern.edu](mailto:risk@northeastern.edu)) ([risk@northeastern.edu](mailto:risk@northeastern.edu))
  - If exposure involved, Office of Environmental Health and Safety—Biosafety
- If for any reason a student is not able to receive immediate medical treatment, there is the resource of postexposure counseling through the university's partner, OEHN (Occupational & Environmental Health Network). They can be reached at 1-866-360-8100. OEHN is open 24 hours a day, 7 days a week, 365 days a year. OEHN will collect appropriate information and engage the doctor on call who can help to direct appropriate care depending on exposure and circumstances.

## Technical Standards for Admission, Academic Progression, and Graduation

The primary mission of the School of Nursing is to educate our students to provide evidence-based, culturally and linguistically competent, ethical healthcare that is high quality, safe, and accessible to diverse local, national, and global communities. Our programs are designed to prepare students to become leaders as nurse clinicians, educators, scholars, and researchers. The School of Nursing is also committed to achieving the goals of the university to become an outstanding national research, practice-oriented, student-centered, urban institution.

The goal of the School of Nursing is to prepare students to think critically and to practice nursing competently and compassionately in rapidly changing practice environments. All efforts are designed to build nursing knowledge, enhance nursing practice and patient safety, foster professional integrity, and ultimately improve the health outcomes of patients, families, and communities across the continuum of care.

In addition to classroom learning, students' clinical education experiences occur in settings, like hospitals, in which patient safety is the priority. For this reason, students who, upon enrollment in any of the nursing programs, seek accommodations from the Disability Resource Center at Northeastern must also request an assessment of accommodations that would be needed for clinical education.

Certain functional abilities are essential for the delivery of safe, effective nursing care during clinical education activities. Therefore, the School of Nursing has determined that certain technical standards are requisite for admission, progression, and graduation from the nursing programs. An individual must be able to independently, with or without reasonable accommodation, meet the following technical standards:

1. General abilities (p. 1347)
2. Observational ability (p. 1347)
3. Communication ability (p. 1347)
4. Motor ability (p. 1347)
5. Intellectual, conceptual, and quantitative abilities (p. 1347)
6. Behavioral and social attributes (p. 1347)
7. Ability to manage stressful situations (p. 1348)

Individuals unable to meet these technical standards, with or without reasonable accommodation, will not be able to complete the program.

### GENERAL ABILITIES

The student is expected to possess functional use of the senses of vision, touch, hearing, and smell so that data received by the senses may be integrated, analyzed, and synthesized in a consistent and accurate manner. A student must be able to respond promptly to urgent situations that may occur during clinical training activities and must not hinder the ability of other members of the healthcare team to provide prompt treatment and care to patients.

### OBSERVATIONAL ABILITY

The student must have sufficient capacity to make accurate visual observations and interpret them in the context of laboratory studies, medication administration, and patient care activities. In addition, the student must be able to document these observations and maintain accurate records.

### COMMUNICATION ABILITY

The student must communicate both verbally and nonverbally in order to elicit information and to convey that information to others. Each student must have the ability to read and write accurately and comprehensively in English. The student must be able to thoroughly comprehend and fluently speak the English language so as to facilitate communication with patients, families, professionals in healthcare settings, instructors, and other students. The student must also be able to present information in a professional, logical manner and to provide counseling and instruction in order to effectively care for patients and their families.

### MOTOR ABILITY

The student must be able to perform gross and fine motor movements with sufficient coordination needed to perform complete physical examinations utilizing the techniques of inspection, palpation, percussion, auscultation, and other diagnostic maneuvers. A student must develop the skills needed to perform or assist with procedures, treatments, administration of medication, and the management and operation of diagnostic and therapeutic medical equipment. The student must possess the physical and mental stamina to meet the demands associated with extended periods of sitting, standing, moving, and physical exertion required for satisfactory and safe performance in the clinical and classroom settings.

### INTELLECTUAL, CONCEPTUAL, AND QUANTITATIVE ABILITIES

The student must be able to develop and refine critical thinking skills that are essential to nursing practice. Critical thinking involves the abilities to measure, calculate, reason, analyze, and synthesize objective and subjective data, and to make decisions, often in a time-urgent environment, that reflect consistent and thoughtful deliberation and sound clinical judgment.

### BEHAVIORAL AND SOCIAL ATTRIBUTES

Compassion, integrity, motivation, effective interpersonal skills, and concern for others are personal attributes required of those in the nursing programs. The student must be able to work under supervision of a clinical instructor or preceptor; this is essential to ensure patient safety. The student must exercise good judgment and promptly complete all responsibilities in the classroom and clinical settings. The ability to establish culturally competent relationships with individuals, families, and groups, and to respond effectively to patients who have different intellectual capacities, is critical to nursing practice.

**ABILITY TO MANAGE STRESSFUL SITUATIONS**

The student must be able to adapt to and function effectively in stressful situations in both the classroom and clinical settings, including emergency situations. These stressors include personal, patient care/family, faculty/peer, and/or program-related issues.

**DISABILITY AND SPECIAL NEEDS**

Students with special needs are encouraged to contact the Disability Resource Center (<https://drc.sites.northeastern.edu/>) to register and request services. Students must notify the instructor at the beginning of the semester if they plan to use DRC services throughout the course. The staff in that office is available for assistance.

**State Board Nursing Examination**

In Massachusetts, and several other states, the registering board requires that graduates taking the National Council Licensing Examination meet standards of “good moral character.” Students may review the GMC requirement specified at Massachusetts General Laws Chapter 112, sections 74, 74A, and 76; Licensure Policy No. 00-01 under “Rules & Regulations” on the Massachusetts Board of Registration in Nursing website (<https://www.mass.gov/orgs/board-of-registration-in-nursing/>).

Please visit Bouvé College of Health Sciences Program Learning Outcomes for the specific student learning outcomes for this program.

**Program Requirements**

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, clinicals, or courses where specified beyond specific college and major requirements to satisfy graduation credit requirements.

Students must successfully complete all courses with a grade of C or better.

Code	Title	Hours
<b>SEMESTER 1</b>		
NRSNG 2001	Foundations of Professional Nursing Practice	2
NRSNG 2220 and NRSNG 2221	Health Assessment and Fundamental Nursing Skills and Lab for NRSNG 2220	4
NRSNG 2350	Integrated Pathophysiology and Pharmaceutical Interventions for Nursing Practice	6
NRSNG 3302 and NRSNG 3303	Nursing with Women and Families and Clinical for NRSNG 3302	5
<b>SEMESTER 2</b>		
NRSNG 2210	Influences on Health and Illness: A Nursing Perspective	3
NRSNG 3320 and NRSNG 3321	Nursing Care of Adults 1 and Clinical for NRSNG 3320	6
NRSNG 3323 and NRSNG 3324	Advanced Assessment and Interventions and Lab for NRSNG 3323	2
NRSNG 3400 and NRSNG 3401	Nursing and the Promotion of Mental Health and Clinical for NRSNG 3400	5
<b>SEMESTER 3</b>		
NRSNG 3420 and NRSNG 3421	Nursing Care of Adults 2 and Clinical for NRSNG 3420	6
NRSNG 4502 and NRSNG 4503	Nursing Care of the Child and Clinical for NRSNG 4502	6
NRSNG 5220	Introduction to Research Methods and Application for Healthcare	4
<b>SEMESTER 4</b>		
NRSNG 2150	Ethical Healthcare: Genetics and Genomics	4
NRSNG 4604 and NRSNG 4605	Public Health Community Nursing and Clinical for NRSNG 4604	5
NRSNG 4610	Managing and Leading in Healthcare	4
NRSNG 4995 and NRSNG 4996	Comprehensive Nursing Practicum and Clinical for NRSNG 4995	5

**Progression within Nursing**

- Students who either fail or withdraw from a professional course (any course with a prefix of NRSNG, HLTH) in nursing will need to successfully remediate that course before continuing in their approved curriculum plan.
- Students who incur an incomplete grade in a prerequisite course must obtain approval from their academic advisor, upon consultation with the department faculty and, when appropriate, the School of Nursing Academic Standing Committee, prior to progression into the subsequent course(s).

- Students may not change their graduation date more than twice.

### **Program Requirement**

67 total semester hours required

## Nursing, BSN—Transfer Track

The transfer track Bachelor of Science in Nursing hybrid program is designed for students who do not already have a bachelor's degree. The program is open to transfer students only and requires students to complete specified prerequisite courses prior to matriculation. Students who have fulfilled the transfer prerequisite courses fulfill remaining requirements through online didactic coursework and hands-on learning involving both clinical placements and experience in the skills laboratory over a 16-month period. The program offers students an opportunity to work closely with nursing faculty to master the core skills necessary to excel in their nursing career. The program also seeks to prepare students to successfully take and pass the National Council Licensure Examination for Registered Nurses (NCLEX-RN) and earn an RN license.

The curriculum includes undergraduate courses with online learning modules incorporating lectures and learning activities. The majority of these are completed online through an e-learning platform that allows students to listen to lectures, submit assignments, complete interactive learning modules, and engage in discussion with faculty and classmates. Labs are offered at Northeastern University network locations where the program is approved (not approved in all locations) and clinical placements are offered at affiliate sites.

The goal of the School of Nursing is to prepare students to think critically and to practice nursing competently and compassionately in rapidly changing practice environments. All efforts are designed to build nursing knowledge; enhance nursing practice and patient safety; foster professional integrity; and ultimately improve the health outcomes of patients, families, and communities across the continuum of care. This approach requires knowledge, skills, and attitudes that demonstrate leadership, quality care, critical thinking and clinical reasoning, cultural and linguistic competence, interprofessional collaboration, evidence-based practice, and integration of informatics and technology.

The clinical program takes place in the community where people live, as well as in hospitals, rehabilitation centers, and long-term-care facilities. The curriculum is capped by courses that enable students to put leadership and management skills into action and to synthesize the complete role of the professional nurse in a clinical practicum.

The baccalaureate degree program in nursing at Northeastern is accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791, and is also approved by the Board of Registration in Nursing of the Commonwealth of Massachusetts and by the North Carolina Board of Nursing. Accreditation and approval indicate that the program meets educational standards for faculty, curriculum design, student quality, and overall university support.

The school subscribes to the standards established by the American Association of Colleges of Nursing, of which it is a member.

### Academic Standards for Nursing Majors

#### ACADEMIC DISMISSAL FROM MAJOR

Students in the Bouvé College of Health Sciences will be dismissed from their major effective the following academic semester for any of the reasons noted below:

- Students who do not meet the required minimum grade in two professional courses, including labs and clinical, will be dismissed from the program. Only one professional course can be remediated.
- Remediation of a failed professional course is a requirement for progression in the program.
- Students who do not meet the minimum grade requirement within two attempts of the course will be dismissed from the program.

#### Academic Appeals

Students who believe that they were erroneously, capriciously, or otherwise unfairly treated in an academic or cooperative education decision may petition to appeal the decision. Additional details about the process may be found in the Bouvé College of Health Sciences Academic Affairs Appeals Procedures (<http://catalog.northeastern.edu/graduate/health-sciences/academic-policies-procedures/appeals-process/>) and in *Appeals Policies and Procedures* in the university Undergraduate Student Handbook (<http://www.northeastern.edu/osccr/code-of-student-conduct/>).

### Program Policies and Standards

Students are expected to adhere to the policies and standards of their program major as stated in the Undergraduate Student Handbook (<http://www.northeastern.edu/osccr/code-of-student-conduct/>) to progress through their curriculum as planned. Students seeking any exceptions to the program policies and standards specified for their program major will be brought before the School of Nursing Academic Standing Committee to present their petitions.

#### BACHELOR OF SCIENCE IN NURSING PROGRAM REQUIREMENTS

- Degree requirements must be completed within eight years from the date of matriculation.
- Students are required to attend all scheduled nursing classes, clinical experiences, and clinical labs on campus and in clinical agencies. If the student fails to meet attendance requirements, the student will fail the associated class, clinical, and/or lab.

#### CLINICAL REQUIREMENTS

Clinical settings require criminal background checks. Additionally, international students require curricular practical training clearance to meet federal requirements for all clinical and co-op experiences.

All students must receive a health clearance from University Health and Counseling Services. Health clearance is based on specific documentation of immunity from infectious disease and a physical examination (this may be done by the student's own healthcare provider). In addition, nursing students need a clinical clearance in order to participate in clinical courses. Clinical clearance, managed by the School of Nursing's Clinical Placement

Office, includes verification of certification of *Healthcare Provider* cardiopulmonary resuscitation; recent negative tuberculosis screening (PPD); positive titers for MMR, varicella, and hepatitis B; vaccines including TDAP and influenza; and additional health screenings as may be required by the program. It is the responsibility of the student to stay current and to provide documentation required for clinical clearance throughout the entire nursing program.

Six weeks prior to the start of a clinical course, students must show:

- Evidence of immunizations and health clearance by UHCS.
- Documentation of *Healthcare Provider* CPR certification.
- Completion of a Criminal Offender Record Information background check to be eligible for clinical placement.
- Students will not be allowed to start the clinical course, and may be dropped from the clinical course, if these processes are not satisfactorily completed.

Students should refer to clinical course requirements, health clearance requirements for clinical rotations, and the professional conduct statement here (<https://catalog.northeastern.edu/graduate/health-sciences/academic-policies-procedures/practicum-internship-policies/>) for additional details.

### CLINICAL WARNING

A nursing student may be placed on clinical warning, or fail the clinical course, at any time during the semester for the following reasons:

- Failing to meet the clinical objectives at a satisfactory level.
- Failing to demonstrate safe practice. Students may be removed from the clinical area, before completion of the clinical rotation, if the instructor determines that the student is unsafe. This will result in the student failing the clinical course.
- Failing to meet the attendance requirement.

### Conditions

- Students on clinical warning must develop an academic plan with the clinical instructor to address clinical performance.
- Students will be expected to improve clinical performance by adhering to the plan.
- Failure to adhere to the terms of the plan will result in the student failing the course and being placed on academic probation. All conditions of academic probation will then apply.

### Notification

- The clinical instructor will issue the student a Clinical Warning via the university's academic progress reporting tool.
- The student and the instructor should then develop a plan together to address the deficiency.
- Copies of the warning will be forwarded to the program director and/or the assistant dean for undergraduate programs if needed.
- This is an administrative warning and will not be posted on the transcript.
- Satisfactory completion of the clinical experience component of the course will result in removal of the warning from the student's file.

### BLOOD-BORNE PATHOGEN EXPOSURE AND INJURY

Any student who sustains any kind of injury and/or exposure related to blood-borne, respiratory, or other pathogens or hazardous materials while on a clinical rotation should seek immediate treatment. They must also immediately follow the procedures listed below:

### Procedures

- Students must follow the affiliate site's protocol for exposure reporting, testing, counseling, and follow-up.
- Students can present their Clinical Accident Insurance identification card (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/General%20Resources/Forms/AllItems.aspx?id=%2Fsites%2FBouveCurrentStudentResources%2FGeneral%20Resources%2FAccident%20Insurance%2FNortheastern%20University%20Insurance%20Card%2Epdf&parent=%2Fsites%2FBouveCurrentStudentResources%2FGeneral%20Resources%2FAccident%20Insurance>) to arrange billing at the site or a suitable nearby hospital or urgent care clinic. If students do not know a local provider, they can call the resource number on their identification card for aid in finding a local provider. Students should also present their personal health insurance information.
- Within 24 hours of the accident, students must also inform their program's director of clinical education (or unit designee responsible for clinical placements) of the accident and submit, in writing, a description of the incident and injury or exposure using the BCHS Accident Report form, linked here (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Clinical-Accident-Report-Form.aspx>). *If a student is incapacitated and unable to file their own report within the 24-hour time frame, a Northeastern faculty or staff person familiar with the incident may file on their behalf. The student should file their own report as soon as possible thereafter.*
- Submission of the Accident Report form linked above will automatically notify:
  - The program's director of clinical education or Clinical Placement Office (or unit designee responsible for clinical placements)
  - The program director (if applicable)
  - Assistant dean of clinical education in the BCHS Dean's Office
  - Risk Services ([risk@northeastern.edu](mailto:risk@northeastern.edu)) ([risk@northeastern.edu](mailto:risk@northeastern.edu))
  - If exposure involved, Office of Environmental Health and Safety—Biosafety
- If for any reason a student is not able to receive immediate medical treatment, there is the resource of postexposure counseling through the university's partner, OEHN (Occupational & Environmental Health Network). They can be reached at 1-866-360-8100. OEHN is open 24 hours a

day, 7 days a week, 365 days a year. OEHN will collect appropriate information and engage the doctor on call who can help to direct appropriate care depending on exposure and circumstances.

### **TECHNICAL STANDARDS FOR ADMISSION, ACADEMIC PROGRESSION, AND GRADUATION**

The primary mission of the School of Nursing is to educate our students to provide evidence-based, culturally and linguistically competent, ethical healthcare that is high quality, safe, and accessible to diverse local, national, and global communities. Our programs are designed to prepare students to become leaders as nurse clinicians, educators, scholars, and researchers. The School of Nursing is also committed to achieving the goals of the university to become an outstanding national research, practice-oriented, student-centered, urban institution.

The goal of the School of Nursing is to prepare students to think critically and to practice nursing competently and compassionately in rapidly changing practice environments. All efforts are designed to build nursing knowledge, enhance nursing practice and patient safety, foster professional integrity, and ultimately improve the health outcomes of patients, families, and communities across the continuum of care.

In addition to classroom learning, students' clinical education experiences occur in settings, like hospitals, in which patient safety is the priority. For this reason, students who, upon enrollment in any of the nursing programs, seek accommodations from the Disability Resource Center at Northeastern must also request an assessment of accommodations that would be needed for clinical education.

Certain functional abilities are essential for the delivery of safe, effective nursing care during clinical education activities. Therefore, the School of Nursing has determined that certain technical standards are requisite for admission, progression, and graduation from the nursing programs. An individual must be able to independently, with or without reasonable accommodation, meet the following technical standards:

1. General abilities
2. Observational ability
3. Communication ability
4. Motor ability
5. Intellectual, conceptual, and quantitative abilities
6. Behavioral and social attributes
7. Ability to manage stressful situations

Individuals unable to meet these technical standards, with or without reasonable accommodation, will not be able to complete the program.

#### **GENERAL ABILITIES**

The student is expected to possess functional use of the senses of vision, touch, hearing, and smell so that data received by the senses may be integrated, analyzed, and synthesized in a consistent and accurate manner. A student must be able to respond promptly to urgent situations that may occur during clinical training activities and must not hinder the ability of other members of the healthcare team to provide prompt treatment and care to patients.

#### **OBSERVATIONAL ABILITY**

The student must have sufficient capacity to make accurate visual observations and interpret them in the context of laboratory studies, medication administration, and patient care activities. In addition, the student must be able to document these observations and maintain accurate records.

#### **COMMUNICATION ABILITY**

The student must communicate both verbally and nonverbally in order to elicit information and to convey that information to others. Each student must have the ability to read and write accurately and comprehensively in English. The student must be able to thoroughly comprehend and fluently speak the English language so as to facilitate communication with patients, families, professionals in healthcare settings, instructors, and other students. The student must also be able to present information in a professional, logical manner and to provide counseling and instruction in order to effectively care for patients and their families.

#### **MOTOR ABILITY**

The student must be able to perform gross and fine motor movements with sufficient coordination needed to perform complete physical examinations utilizing the techniques of inspection, palpation, percussion, auscultation, and other diagnostic maneuvers. A student must develop the skills needed to perform or assist with procedures, treatments, administration of medication, and the management and operation of diagnostic and therapeutic medical equipment. The student must possess the physical and mental stamina to meet the demands associated with extended periods of sitting, standing, moving, and physical exertion required for satisfactory and safe performance in the clinical and classroom settings.

#### **INTELLECTUAL, CONCEPTUAL, AND QUANTITATIVE ABILITIES**

The student must be able to develop and refine critical thinking skills that are essential to nursing practice. Critical thinking involves the abilities to measure, calculate, reason, analyze, and synthesize objective and subjective data and to make decisions, often in a time-urgent environment, that reflect consistent and thoughtful deliberation and sound clinical judgment.

#### **BEHAVIORAL AND SOCIAL ATTRIBUTES**

Compassion, integrity, motivation, effective interpersonal skills, and concern for others are personal attributes required of those in the nursing programs. The student must be able to work under supervision of a clinical instructor or preceptor; this is essential to ensure patient safety. The student must exercise good judgment and promptly complete all responsibilities in the classroom and clinical settings. The ability to establish

culturally competent relationships with individuals, families, and groups and to respond effectively to patients who have different intellectual capacities is critical to nursing practice.

### ABILITY TO MANAGE STRESSFUL SITUATIONS

The student must be able to adapt to and function effectively in stressful situations in both the classroom and clinical settings, including emergency situations. These stressors include personal, patient care/family, faculty/peer, and/or program-related issues.

### DISABILITY AND SPECIAL NEEDS

Students with special needs are encouraged to contact the Disability Resource Center (<https://drc.sites.northeastern.edu/>) to register and request services. Students must notify the instructor at the beginning of the semester if they plan to use DRC services throughout the course. The staff in that office is available for assistance.

## State Board Nursing Examination

In Massachusetts, and several other states, the registering board requires that graduates taking the National Council Licensing Examination (NCLEX-RN) meet standards of "good moral character." Students may review the GMC requirement specified at Massachusetts General Laws Chapter 112, sections 74, 74A, and 76; Licensure Policy No. 00-01 under "Rules & Regulations" on the Massachusetts BORN website.

Please visit Bouvé College of Health Sciences Program Learning Outcomes for the specific student learning outcomes for this program.

## Program Requirements

Professional courses with a prefix NRSRG require a minimum passing grade of C.

## Nursing Major Requirements

Code	Title	Hours

PSYC 3404	Developmental Psychology	4
SOCL 1101	Introduction to Sociology	4

**Electives**

Code	Title	Hours
<b>Courses Met by Transfer Prerequisites</b>		
Complete at least 15 credits outside the School of Nursing or NRSB courses not used to fulfill requirements above.		15

**Academic Standards for Nursing Majors**

Minimum passing grade standards exist for both professional courses, which are required courses taught within the major/college, and professional prerequisite courses and are outlined before the nursing requirements above.

Courses in the above-listed professional or professional prerequisite subjects that are taken as electives are exempt from the C or better rule, and the university's minimum satisfactory grade will be accepted.

For all other courses, the university's minimum passing grade for the course will be accepted.

**PROGRESSION WITHIN NURSING**

- To progress into the subsequent year of professional courses, students must have completed all professional prerequisites with the required minimum passing grade as noted in the program requirements.
- Students must successfully complete all courses, as stipulated by their approved curriculum plan, with a grade of C or better in order to progress into the next professional course.
- Students who either fail or withdraw from a professional course will need to successfully remediate that course before continuing in their approved curriculum plan.
- Students who incur an incomplete grade in a prerequisite course must obtain approval from their academic advisor, upon consultation with the department faculty and, when appropriate, the School of Nursing Academic Standing Committee, prior to progression into the subsequent course(s).
- Students may not change their graduation date more than twice.

**Program Requirements**

131 total semester hours and 2.000 GPA required

**Plan of Study**

**Sample Plan of Study**

## Wellness Studies, Minor

The wellness studies minor provides a holistic approach to the study of the human wellness experience. Offering interdisciplinary enrollment, this minor includes foundational wellness courses, as well as a range of interdisciplinary electives that embrace evidence-based science and education vis-à-vis selected domains of wellness. A cross-cultural, life span approach to individual and population wellness and well-being is offered as an experiential learning initiative.

As Northeastern University guides students in the ways of self-managing (life-long learning), an understanding of the nature and practices of wellness may inform deliberative decision-making processes that lead to the attainment of wellness-informed lifestyle choices. Over time, these choices may inform the design and crafting of a life well lived.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Courses

Code	Title	Hours
NRSG 1205	Wellness	4
or NRSG 1206	Wellness Abroad	
NRSG 5000	Advanced Perspectives in Wellness	4

### Electives

Code	Title	Hours
Complete two of the following:		
COMM 2135	Sex and Interpersonal Communication	
COMM 2555	Games for Change	
COMM 3230	Interpersonal Communication	
ENGL 2770	Writing to Heal	
EXSC 1120	Introduction to Exercise, Fitness, and Health	
HLTH 2302	Alternative Medicine	
HLTH 5002	Mindfulness: Theory and Practice	
HSCI 1105	Human Nutrition	
HSCI 2350	Advanced Nutrition in Health and Disease	
SOCL 1246	Environment and Society	
WMNS 2800	Sexual Orientation and Gender Expression	

### GPA Requirement

Minimum 2.000 GPA required in all minor courses

### Credit Requirement

A minimum of 15 hours is required.

## School of Pharmacy and Pharmaceutical Sciences

Website (<http://www.northeastern.edu/bouve/pharmacy/>)

**Tatiana K. Bronich, PhD**

Dean

140 The Fenway  
617.373.3069  
617.373.7655 (fax)

SOPPS@northeastern.edu (schoolofpharmacy@northeastern.edu)

The School of Pharmacy and Pharmaceutical Sciences provides transformative learning and research experiences in a collaborative and diverse environment to develop leaders who positively impact the health and well-being across the life span of those we serve. SOPPS will be the model for excellence and innovation in pharmacy and pharmaceutical sciences education that is grounded in experiential learning and enhances the health of communities through research and practice.

SOPPS offers two programs for undergraduate students: the pharmacy program, leading to the Doctor of Pharmacy degree, and the Bachelor of Science in Pharmaceutical Sciences program. These programs allow students interested in pharmacy practice or the pharmaceutical sciences to choose the pathway most suited to their professional goals. The Doctor of Pharmacy degree is the entry-level professional degree earned by pharmacists. The Bachelor of Science in Pharmaceutical Sciences degree is designed for students interested in research in the area of drug design and delivery, pharmacology, pharmaceuticals, or interdisciplinary research collaborations for careers in the pharmaceutical industry. The bachelor's degree does not qualify a graduate for the pharmacist licensure exam.

### Programs

#### Bachelor of Science (BS)

- Pharmaceutical Sciences (p. 1366)

#### Doctor of Pharmacy (PharmD)

- Pharmacy (p. 1358)

### Minor

- Health Sciences Entrepreneurship (p. 1227)
- Pharmaceutical Sciences (p. 1233)

### Accelerated Programs

See Accelerated Bachelor/Graduate Degree Programs (p. 1372)

## Pharmacy, PharmD

To earn the Doctor of Pharmacy degree (PharmD), students must complete two years of preprofessional studies and four years of professional courses at Northeastern University.

Year 1: Preprofessional Studies (PP1)

Year 2: Preprofessional Studies (PP2)

Year 3: Professional Year 1 (P1)

Year 4: Professional Year 2 (P2)

Year 5: Professional Year 3 (P3)

*(Student earns the Bachelor of Science in Pharmacy Studies degree and moves to the graduate level for completion of PharmD studies.)*

Year 6: Professional Year 4 (P4)

The PharmD fully integrates campus-based learning with experiential learning, including the university's signature cooperative education program, to provide students with the knowledge, skills, and abilities necessary to succeed in the pharmacy profession. Our students promote and ensure the safe and effective use of drugs and provide medication therapy management services. In addition to preparing and dispensing prescribed medications, our students provide information to patients about medications and their uses; advise physicians, other prescribers, and healthcare practitioners on medication selection, dosages, interactions, and adverse effects; and monitor patient responses to drug therapy.

Our students are well equipped to provide patient care services in a variety of settings. Most of our graduates work in community pharmacies or in healthcare facilities such as hospitals and ambulatory clinics. Additional practice opportunities exist in health maintenance organizations, private practice groups, long-term-care facilities, home healthcare, the Public Health Service, the armed services, and law enforcement and regulatory agencies such as the Federal Drug Administration or Drug Enforcement Administration. Graduates may also find employment in drug development, marketing and research within the pharmaceutical industry, colleges of pharmacy, and professional association management. In addition, many of our graduates go on to pharmacy practice residencies, fellowships, and leading graduate programs.

Doctor of Pharmacy students are admitted with the expectation that by working with faculty, staff, and each other, they will develop the knowledge, skills, and attitudes necessary for academic and professional success. Students follow academic progression plans for their respective years of graduation. Any deviation from the prescribed curriculum will require faculty/staff permission and an approved plan of study from the School of Pharmacy and Pharmaceutical Sciences Academic Standing Committee.

The curriculum includes both Introductory Pharmacy Practice Experiences (IPPEs, fulfilled by cooperative education) and Advanced Pharmacy Practice Experiences (APPEs). These pharmacy practice experiences (PPEs) are provided primarily under the direct supervision of qualified pharmacist preceptors and occasionally with other qualified healthcare professionals. The school is affiliated with many world-class practice sites throughout the United States, providing students with access to experienced clinicians and scholars. Although every effort is made to accommodate individual circumstances and requests, students should be prepared to travel outside the Boston area to complete some of their PPEs. Availability of a car may be required, as some sites are not accessible by public transportation. All expenses associated with PPEs, including travel and housing, are the responsibility of the student.

IPPEs are competitive placements that are based on job availability in a geographic region. The placements are facilitated by School of Pharmacy and Pharmaceutical Sciences cooperative education coordinators. Students are required to earn satisfactory (S) grades in one IPPE in a community setting and in one IPPE in an institutional/hospital practice setting.

APPE placements are provided based on site/preceptor availability and the final approval of the School of Pharmacy and Pharmaceutical Sciences Office of Experiential Education. Students may be able to petition the OEE for special-arrangement APPEs; however, availability for such requests is limited.

To be eligible for a Doctor of Pharmacy degree, a student must successfully complete all courses in the curriculum including the IPPEs (co-op) and APPEs; meet the academic progression standards of the program; meet the technical standards of the program; and satisfy all other requirements as stated. The pharmacy program is fully accredited by the Accreditation Council for Pharmacy Education (<https://www.acpe-accredit.org/>) and adheres to the standards established by ACPE.

Pharmacy graduates must meet specific requirements to qualify for professional licensure in the state where they plan to practice as a registered pharmacist. These requirements include graduating from an accredited school of pharmacy, passing national and state board examinations, and completing internship hours. The internship is a period of practical experience conducted under the supervision of a registered pharmacist. Massachusetts requires 1,500 internship hours, all of which are satisfied through completion of IPPEs (co-op) and APPEs.

Professional and/or legal exigencies arise from time to time, which may necessitate changes in a pharmacy course, progression, and/or graduation requirements. Students should review their status with academic advisors on a timely basis and refer to current publications for updated information.

## Program Progression

A minimum grade of C is required in major prerequisite courses (those identified with the subject codes BIOL, CHEM, MATH). To progress into the subsequent year of professional courses, students must have completed all professional prerequisites with the required minimum passing grade, have satisfactorily completed all academic courses in the preprofessional phase of the curriculum, have a preferred overall GPA of 3.000 or higher, and a preferred science prerequisite GPA of 3.000 or higher. The science GPA is comprised of all courses with prefixes BIOL, CHEM and MATH. In addition, to progress into the first professional year of the PharmD program (P1), students must demonstrate good verbal and written communication skills, understanding of the pharmacy profession, and commitment to patient care through an interview process based on criteria set by the School of Pharmacy and Pharmaceutical Sciences.

All students entering P1 in fall 2022 and beyond are required to complete the PharmCAS application. The PharmCAS application process is considered a formality in the progression process and will not jeopardize the student's preferred or guaranteed enrollment status.

To progress into the subsequent semester of professional courses (P1–P4), students must receive a grade of C or better in all PHMD and PHSC courses, as well as in any course completed to fulfill the professional elective requirement.

Pharmacy (PharmD-UG) students must maintain an overall GPA of 3.000 or higher during the professional years (P1–P4) of the Doctor of Pharmacy program.

## Requirements for the PharmD Pharmacy PPEs

Requirements for the successful completion of the PharmD PPEs include:

1. Evidence of health clearance from University Health and Counseling Services before placements at any PPE site.
2. Satisfactory completion of any additional site-specific requirements including, but not limited to, criminal record information (CORI), urine drug screens, and verification of immunization status. All fees associated with these requirements are the responsibility of the student. Please see below for management of positive urine drug screens.
3. Adherence to the school's code of professional conduct and the university's code of conduct policies while off-campus.
4. Maintenance of an active pharmacy intern license in every state where the student completes an experience.
5. Compliance with site-specific requirements (via site descriptions) and completion of site requests within specified deadlines. Students who fail to complete these requirements as directed will likely incur grade penalties and may experience a delay of graduation or dismissal from the pharmacy program.

## Management of Positive Urine Drug Screens

If the student learns the urine drug screen (test #1) is positive, the student will notify the OEE ([pharmacyoe@northeastern.edu](mailto:pharmacyoe@northeastern.edu)) and immediately complete a second urine screen (test #2). A professional concern form will be completed based on test #1 results and reported to the University's Office of Student Conduct and Conflict Resolution via the Incident Report form (IRF).

- If urine screen test #2 is negative (-), the student will be allowed to continue the PPEs. However, the student will be asked to complete a random urine screen (test #3) at a time determined by the OEE. If urine screen test #3 is positive (+), the student will be administratively removed from the active PPEs and graduation may be delayed. A second professional concern form and OSCCR IRF will be completed, based on test #3 results. The return to PPEs will occur once a repeat urine test is negative. That repeat negative test will be followed up by a random urine screen at a time determined by the OEE.
- If urine screen test #2 is positive (+), the student will be administratively removed from the PPEs and graduation may be delayed. The return to PPEs will occur once a repeat urine screen is negative. That negative screen will be followed up by a random urine screen at a time determined by the OEE. A second professional concern form will be completed based on a positive test #3 result.

## Program Policies

Students are expected to adhere to the policies and standards of their program major, as stated, to progress through their curriculum as planned. Students seeking any exceptions to the program policies and standards specified for their program major must present a petition before the School of Pharmacy and Pharmaceutical Sciences Academic Standing Committee.

Given programmatic requirements, coupled with concerns over the loss of therapeutic knowledge, requests for a General Leave of Absence (p. 71), other than Medical or Emergency Leave of Absence:

- Must comply with all stated Northeastern general policies, regardless of the academic year.
- May be made at any time period during the P1 or P2 years.
- During the P3 academic year, any request for a general leave must be made no later than February 1 of the given academic year. Requests after this date will not be permitted.
- During the P4 academic year, requests for a general leave cannot be made at any time.

## SOPPS Professional Code of Conduct

All SOPPS students (i.e., preprofessional PharmD, Pharmaceutical Sciences, BS, P1–P4 PharmD, MS, PhD) are expected to adhere to the SOPPS–Professional Code of Conduct.

## Technical Standards for the Doctor of Pharmacy Program

The PharmD program at Northeastern is a rigorous and challenging academic program that requires students to possess specific characteristics and abilities within the cognitive, affective, and psychomotor domains, referred to here as technical standards. To successfully progress in and ultimately complete the didactic, laboratory, and experiential components of the PharmD program, students must meet the standards described below.

### INTELLECTUAL ABILITIES

Students must have well-developed problem-solving and critical-thinking skills. Cognitive function must be appropriate to integrate, evaluate, and apply information gained through measurement, analysis, calculation, and reasoning. Students must have the capacity to learn efficiently in classroom, laboratory, small group and experiential settings, and through independent study. Students are required to demonstrate the ability to integrate course content knowledge with clinical practice applications to optimize medication therapy management.

### COMMUNICATION SKILLS

Students must be able to communicate effectively with colleagues, professors, patients, families, and healthcare providers. This includes efficiently comprehending, speaking, reading, and writing in English. Students must be able to process and use appropriate nonverbal cues and be proficient in the use of electronic communication media.

### BEHAVIORAL AND SOCIAL ATTRIBUTES

Students must demonstrate professionalism, maturity, integrity, honesty, compassion, and respect when relating to others. Students must have sufficient mental and emotional health to complete work and responsibilities using good judgment. Students must be able to tolerate and adapt to stressful workloads and situations and modify behavior based on constructive criticism. Students must be able to function in accordance with the legal, ethical, and professional standards of practice.

### OBSERVATION AND MOTOR SKILLS

Students must have functional use of visual, auditory, and tactile senses. Students must be able to observe and perform experiments, physical assessments, patient interviews, and medication order processing. Students must be able to distinguish physical characteristics of medications by inspection. Students must have coordination of gross and fine muscular movements sufficient to perform pharmacy-related tasks including compounding and dispensing medications, administering medications, and using computers and other technology necessary for learning and professional practice.

## Academic Dismissal from Major

PharmD students in the Bouvé College of Health Sciences will be dismissed from their major effective the following academic semester for any of the reasons noted below:

- Failure to earn a grade of C or better in three professional courses, regardless of remediation. Within the PharmD program, each specific professional course (with separate registration number) will be counted as a separate failure even if content is related.
- Failure to earn the minimum required grade in the same course twice.
- Failure to maintain a GPA of 3.000 after two semesters of probation.
- The expected graduation date may not change more than twice.

The PharmD program monitors and promotes the development of professional behaviors in its students to ensure appropriate professionalism in the classroom, local and global communities, and clinical settings. Breach of adherence to these standards may result in dismissal from the program.

## Academic Appeals

Students who believe that they were erroneously, capriciously, or otherwise unfairly treated in an academic or cooperative education decision may petition to appeal the decision. Refer to the Bouvé College of Health Sciences Academic Affairs Appeals Process and the Northeastern University Appeals Policies and Procedures.

## Progression to the 4th Professional Year (P4) of the PharmD Program

Students enrolled in the PharmD program will be awarded a Bachelor of Science in Pharmacy Studies after successful completion of all didactic and laboratory courses in years 1-5 of the pharmacy curriculum. To earn the PharmD degree, students must complete an additional 36 semester hours of APPEs with an overall GPA of 3.000 or higher. The PharmD degree is required to pursue licensure or registration as a pharmacist; graduates with the Bachelor of Science in Pharmacy Studies degree only are not eligible for pharmacist licensure.

## Program Student Learning Outcomes

Please visit Bouvé College Learning Outcomes for the specific student learning outcomes for this program.

## Undergraduate Phase

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

## Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

## NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

Complete all courses listed below unless otherwise indicated. Also, complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

Some NUpath requirements are not explicitly satisfied by required courses. Students are responsible for satisfying these requirements with an elective.

Students who incur an incomplete grade in a prerequisite course may not progress into the subsequent courses(s). Any exceptions will be determined by protocols established by the program, after consultation with the student's academic advisor.

Code	Title	Hours
<b>Progression Requirement: The student should maintain a preferred overall GPA of 3.000 or higher and a preferred a science prerequisite GPA of 3.000 or higher through the end of semester 5 to progress to semester 6 (professional year 1) of this program.</b>

## Supporting Courses

Code	Title	Hours
<b>YEAR 1</b>		
BIOL 1111 and BIOL 1112	General Biology 1 and Lab for BIOL 1111	5
CHEM 1161 and CHEM 1162 and CHEM 1163	General Chemistry for Science Majors and Lab for CHEM 1161 and Recitation for CHEM 1161	5
ENGW 1111	First-Year Writing	4
<i>The university requires a minimum grade of C for First-Year Writing (ENGW 1111). The university's minimum passing grade for the course will be accepted for all other courses.</i>		
BIOL 1113 and BIOL 1114	General Biology 2 and Lab for BIOL 1113	5
MATH 1245	Calculus with Applications	4
CHEM 2311 and CHEM 2312 and CHEM 2319	Organic Chemistry 1 and Lab for CHEM 2311 and Recitation for CHEM 2311	5
<b>YEAR 2</b>		
CHEM 2313 and CHEM 2314 and CHEM 2320	Organic Chemistry 2 and Lab for CHEM 2313 and Recitation for CHEM 2313	5
ENGW 3306	Advanced Writing in the Health Professions	4
<i>The university requires a minimum grade of C for Advanced Writing in the Health Professions (ENGW 3306). The university's minimum passing grade for the course will be accepted for all other courses.</i>		

## Program Requirement

If the Bachelor of Science in Pharmacy Studies degree is the terminal degree (i.e., the student does not plan to continue on to the fourth professional year), an overall grade-point average of 2.000 or greater is considered acceptable. Students who earn the Bachelor of Science in Pharmacy Studies as the terminal degree are not eligible for pharmacist licensure.

A minimum grade of C is required in major prerequisite courses (those identified with the subject code: BIOL, CHEM, MATH). To progress into the subsequent year of professional courses, students must have completed all professional prerequisites with the required minimum passing grade, have satisfactorily completed all academic courses in the preprofessional phase of the curriculum, have an overall preferred GPA of 3.000 or higher, and a science prerequisite preferred GPA of 3.000 or higher. The science GPA is comprised of all courses with prefix BIOL, CHEM, MATH. In addition, to progress into the first professional year of the PharmD program (P1), students must demonstrate good verbal and written communication skills, understanding of the pharmacy profession, and commitment to patient care through an interview process based on criteria set by the School of Pharmacy and Pharmaceutical Sciences.

To progress into the subsequent semester of professional courses, students must receive a grade of C or better in all PHMD and PHSC courses, as well as in any course completed to fulfill the professional elective requirement.

All students entering P1 in fall 2022 and beyond are required to complete the PharmCAS application. The PharmCAS application process is considered a formality in the progression process and will not jeopardize the student's preferred or guaranteed enrollment status.

152 total semester hours required

## Graduate Phase

Complete all courses and requirements listed below unless otherwise indicated.

**Core Requirements**

## Pharmaceutical Sciences, BS

The Bachelor of Science in Pharmaceutical Sciences is geared toward highly motivated students who are strongly focused on careers in a number of competitive areas:

- Research: biomedical/pharmaceutical research, biomedicine, and/or the pharmaceutical/biotech industries
- Healthcare: curriculum provides opportunities to meet the core requirements requested by medical, veterinary and dental schools, while providing an immersive background in research and the pharmaceutical sciences

The educational approach is an innovative paradigm that immerses students into undergraduate research at the earliest possible time and promotes graduate-style mentorship and experiential learning in the context of an intensive curriculum with specialized educational opportunities. Pharmaceutical sciences are by nature highly interdisciplinary: pharmacology; physiology; structural biology; medicinal chemistry; pharmaceutics and the allied fields of toxicology, chemical biology, and nanomedicine; and a spectrum of emerging health science disciplines that span classical life sciences, engineering, and biotechnology. All students take courses in basic chemistry, basic biology, organic chemistry, physiology, pharmacology, medicinal chemistry, and pharmaceutical sciences. Students can then further specialize their program of study with elective courses in interest areas aligned with their developing career trajectories.

Graduates of the Bachelor of Science in Pharmaceutical Sciences program will have a solid foundation in the science of drug discovery, delivery, evaluation, and development, as well as specialized training at the undergraduate level in research labs.

The program prepares students to pursue graduate studies, enroll in professional programs such as medical, veterinary or dental school, or enter the biopharmaceutical industry. The BS degree requires a minimum of four years of study and at least one co-op experience. Graduates are positioned to pursue MS and PhD programs in the biomedical sciences, medical schools, and other health professional degree programs.

### Bachelor of Science in Pharmaceutical Sciences—Progression Standards

The Bachelor of Science in Pharmaceutical Sciences requires students to satisfy a set of academic standards that include maintaining an overall GPA of 3.000 or better. A grade of C is the minimal passing grade for any of the required courses in the major.

Bachelor of Science Students in this program are expected to maintain a cumulative GPA of 3.000 each semester to remain in good academic standing and to progress towards graduation. If a student's cumulative GPA falls below the required 3.000, a student may be on probation for only two semesters, or until the course is offered again, unless the advisor approves an action plan that specifies a longer (but definite) period. A student may only be placed on probation twice during enrollment in the program and must correct all deficiencies, as specified, in each respective action plan during the applicable probationary period. Failure to remediate the deficiency within the agreed time may result in dismissal from the program.

The program also requires students to seek out and establish, with program support, research opportunities with a faculty-level mentor. It is advised that students get involved in laboratory research during their first year in the program. Each student must secure a laboratory research opportunity by the fall semester of the second year and complete a course to develop lab based research skills.

### Securing a Laboratory Research Experience

The Bachelor of Science in Pharmaceutical Sciences requires students to earn a minimum of 12 credits for laboratory research through participation in Lab Research Rotation (PHSC 2100) and the writing and completion of an undergraduate thesis, comprised of Senior Thesis (PHSC 4997) and Senior Thesis Continuation (PHSC 4998). Each student must take the initiative to seek out opportunities for undergraduate laboratory research either on campus, off campus at a neighboring university, or in an industry setting accessible to the student, under the direction of a faculty-level mentor. Students are assisted with securing laboratory research experiences through participation in Introduction to Health Science Research (PHSC 2650) and, as needed, through work with a faculty advisor within the Bachelor of Science Pharmaceutical Sciences program. A variety of university resources are also available to assist students in finding opportunities, including the Bouvé College Office of Research, the Northeastern University Office of Undergraduate Research and Fellowships, the Northeastern University Integrated Initiative for Global Health, and various other departmental and college resources across Northeastern University.

### Change of Major

Students are eligible to transfer into the program at any point prior to the third year of the program. Students must have an overall GPA of 3.000 or better.

### Academic Appeals

Students who believe that they were erroneously, capriciously, or otherwise unfairly treated in an academic or cooperative education decision may petition to appeal the decision. Refer to the Bouvé College of Health Sciences Academic Affairs Appeals Process and the Northeastern University Appeals Policies and Procedures.

### Program Learning Outcomes

Please visit Bouvé College Program Learning Outcomes (<https://bouve.northeastern.edu/bchs/about/learning-outcomes/>) for the specific student learning outcomes for this program.

## Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

## Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

## NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

<sup>1</sup> *Students following PreMed or PreHealth course plans (<https://undergraduate.northeastern.edu/prehealth/academics/coursework/>) should use electives within this program to complete PreMed or PreHealth courses that are not listed above.*

## Health Sciences Entrepreneurship, Minor

The health sciences entrepreneurship minor is for undergraduate students from any major, in any college at the university, who have an interest in developing skills in the creation and management of health sciences companies. The minor builds on currently offered courses within and outside of Bouvé College of Health Sciences. This minor allows students to apply the entrepreneurial mindset to develop marketable and applicable skills conversant in the unique regulatory, reimbursement, and promotion of products and services in the health sciences. Providing opportunities to develop these skills will benefit students pursuing positions within healthcare organizations and medical technology businesses, as well as students wishing to be entrepreneurs or innovators in the companies that employ them.

### Minor Requirements

The minor consists of three required courses and one elective course. Up to *two courses* from other major and minor requirements may apply to this minor.

### Required Courses

Code	Title	Hours
PHMD 2100	Entrepreneurship in Health Sciences	4
PHMD 2350 or PHTH 1260 or PHTH 1261	Healthcare Systems The American Healthcare System Comparative Healthcare Systems	3-4
PHMD 2550	Innovation, Entrepreneurship, and Drug and Medical Device Development	4

### Elective Courses

Code	Title	Hours
Complete one of the following:		
ENTR 2303	Marketing Strategies for Startups	3-4
ENTR 3305	Business Model Design and Innovation	
ENTR 3330	Design Thinking for Startups	
ENTR 4505	Entrepreneurial Venture Growth Strategies	
INNO 2206	Global Social Enterprise	
INNO 2301	Innovation!	
INNO 2304	Industry Disruption and Corporate Transformation	
MKTG 2201	Introduction to Marketing	
PHTH 2350	Community and Public Health	
PHTH 2351	Community and Public Health - Global	
PHTH 2515	Healthcare Policy and Administration	
PHTH 4515	Critical Issues in Health and Public-Health Policy	
PHTH 5234	Economic Perspectives on Health Policy	

### GPA Requirement

Students are required to have an overall grade-point average of 2.000 or higher.

### Credit Requirement

15 semester hours required

## Pharmaceutical Sciences, Minor

The minor in pharmaceutical sciences is open to all majors at the university with the exception of Bouvé PharmD and BS Pharmaceutical Sciences students. The minor is designed for undergraduate students from a variety of disciplines who wish to explore key aspects of the pharmaceutical sciences, including pharmacology, medicinal chemistry, and pharmaceuticals. It is comprised of three required courses and one elective for a minimum of 15 hours. Students who believe that additional exposure to these topics will integrate effectively with their major (particularly students in biology and chemistry majors, as well as those in chemical and bioengineering programs and health sciences) are encouraged to pursue this minor.

### Minor Requirements

Successful completion of the minor requires that all coursework be completed with a minimum grade of D and courses may not be taken as pass/fail. The minor consists of three required courses and one elective course. Up to *two courses* from other major and minor requirements may apply to this minor.

### Required Courses

Code	Title	Hours
PHSC 3411	Pharmaceutics 1	4
PHSC 3801	Principles of Pharmacology and Medicinal Chemistry 1	4
PHSC 3802	Principles of Pharmacology and Medicinal Chemistry 2	4

### Elective Courses

Code	Title	Hours
Complete one of the following:		3-4
PHSC 2301 and PHSC 2302	Human Physiology 1 and Human Anatomy Lab	
PHSC 2303 and PHSC 2304	Human Physiology 2 and Human Physiology Lab	
PHSC 2330	Immunology	
PHSC 3412	Pharmaceutics 2	
PHSC 3430	Pharmacokinetics and Biopharmaceutics	
PHSC 5400	Principles of Drug Design	
CHEM 5676	Bioorganic Chemistry	

### GPA Requirement

Minimum 2.000 GPA required in the minor

### Credit Requirement

15 hours required

## Accelerated Bachelor/Graduate Degree Programs

Bouvé College of Health Science offers a number of bachelor's/graduate degree programs that allow students to accelerate the attainment of the graduate degree by applying graduate credits taken as an undergraduate toward both the undergraduate and graduate degrees. Degrees are earned sequentially, with the bachelor's degree attainment followed by coursework to complete the graduate degree. See additional information on accelerated bachelor/graduate degree programs (<https://registrar.northeastern.edu/article/plusone-program-accelerated-bachelorgraduate-degree-programs/>).

## College of Science

Website (<http://www.northeastern.edu/cos/>)

**Hazel Sive, PhD**, Dean

**Brent D. Nelson, PhD**, Senior Associate Dean, Undergraduate Affairs

**Rachelle Reisberg**, Assistant Dean, Undergraduate Curriculum and Students

Student Services Office

617.373.4475

[COSSAdvising@northeastern.edu](mailto:COSSAdvising@northeastern.edu)

The College of Science offers instructional programs that are at the forefront of discovery, invention, and innovation in the physical sciences, life sciences, linguistics, and mathematics. Our programs are designed to give students a deep understanding and hands-on experience in traditional and emerging interdisciplinary fields such as chemical biology, cognition and neuroscience, marine science, biochemistry, nanoscience, and network science.

The college places a strong emphasis on the experiential learning model and seeks to provide students with a wide array of opportunities to explore innovative, interdisciplinary collaborations through cooperative educational work assignments, service-learning, undergraduate research, internships, study-abroad programs, and active participation in our award-winning student chapters of professional associations. The college seeks to provide students with the best possible foundation for achieving their goals, whether they seek to attend graduate school, professional school, or immediately pursue a career upon graduation.

The college offers Bachelor of Arts, Bachelor of Science, and Bachelor of Science/Master of Science (PlusOne programs) degrees in a number of majors and emphasizes the value of a solid general education through NUpath. Students may choose a four- or five-year experiential learning plan in most programs. Either plan offers co-op opportunities, often in an area related to the student's chosen academic area.

### PlusOne Programs

Many programs and departments offer academically strong students the option of obtaining their BS and MS degree in five years.

### College Requirements

All students in the College of Science must successfully complete the university requirements of NUpath (p. 111). In addition, students pursuing a Bachelor of Arts degree must fulfill the BA requirements (p. 119).

### Academic Advising

The College of Science has an academic advising system that consists of professional advisors and faculty advisors located in the college's department and program offices. Detailed advising information is available on the college website (<http://www.northeastern.edu/cos/>). PreMed and PreHealth Advising (p. 121), as well as Pre-Law (p. 120) (<http://www.northeastern.edu/prelaw/>) Advising (p. 120), are also available.

### Graduation Clearance Process

Students in the College of Science are required to meet with an academic advisor in the College of Science to determine their remaining graduation requirements. This should be completed in the junior year to ensure ample time to complete any outstanding requirements.

### Academic Progression Standards

In addition to meeting university progression standards, it is expected that full-time science students enroll in four (3- or 4-credit) courses with appropriate labs and recitations and successfully complete at least 12 semester hours each academic semester with an acceptable grade-point average as noted below. Any exceptions to the course load requirement must be approved in writing by the student's academic advisor prior to the start of each semester. Pass/fail courses are restricted to electives outside of the major, minor, and NUpath requirements.

### Graduation Requirements

A minimum cumulative GPA requirement of 2.000 in major courses and a minimum cumulative GPA requirement of 2.000 overall are required for graduation. *Note:* The university requires a minimum grade of C for First-Year Writing and Advanced Writing requirements.

### Criteria for Academic Probation

Full-time students in the College of Science will be placed on academic probation effective for the following academic semester for any of the reasons noted below. A notation of the academic probation action will appear on the internal record but not on the permanent transcript.

**FIRST-YEAR STUDENTS:**

- Not maintaining a semester GPA of at least a 1.800 at the end of each full-term semester (fall, spring) of the first-year curriculum
- Not earning at least 12 semester hours at the end of each fall and spring semester of the first-year curriculum

**UPPERCLASS AND TRANSFER STUDENTS:**

- Not earning at least 12 semester hours in the academic full-term semester (fall, spring) just completed
- Not maintaining an overall cumulative GPA of at least 2.000 at the end of each full-term academic semester (fall, spring)

**Academic Dismissal from Major**

Students can be dismissed from their major for not maintaining a GPA of at least a 2.000 in the major at the end of the second academic full-term semester of the curriculum and at the end of each full-term academic semester (fall, spring) thereafter. Students may also be dismissed from the major for accumulating three total outstanding course deficiencies (grades of F, I, W, NE, U, or missing grades) without successfully completing the course(s) in a later semester. Students may be dismissed by failure to follow a program of study approved by the student's academic advisor. Students dismissed from their major, but otherwise eligible to remain an active student within the university, are allowed to continue within the College of Science as a transitional student for up to two semesters. If the student does not find a new major after two transitional semesters, they may be dismissed from the college.

**Academic Dismissal from University**

Students who remain on probation after two full-term academic semesters may be dismissed from the university. This action may appear on the transcript at the end of the second probationary semester. In addition, students who have below a 1.000 GPA or fewer than 4 earned semester hours in any semester or cumulatively may be dismissed at the discretion of their college. Students may appeal this decision to the Academic Standing Committee. International students must consult with an advisor in the Office of Global Services (<http://www.northeastern.edu/ogs/>) to discuss the impact of an academic dismissal as it relates to nonimmigrant visa status.

## Biology

Website (<https://cos.northeastern.edu/biology/>)

### Jonathan Tilly, PhD

Chair and University Distinguished Professor

206F Mugar Life Sciences Building

617.373.2260

Advising website (<http://www.tinyurl.com/bioadv/>)

The Department of Biology offers two majors, the BS in Biology and the BS in Cell and Molecular Biology. Both majors lay the groundwork for strong scientific training with basic coursework in mathematics, chemistry, and physics, relevant to biology. In the biology major, students explore the organization and processes of life, from molecules and cells through organs and organ systems to populations, ecosystems, and evolution. The BS degree in cell and molecular biology offers a more focused program of study emphasizing processes operating at the cellular and molecular levels of biological systems. In both majors, students can select advanced electives to specialize in a subdiscipline of biology such as developmental biology, stem cell biology, microbiology, or physiology.

Our programs provide a wide range of relevant co-op opportunities in the renowned Boston-area biotechnology industry, hospitals, and research institutions, as well as across the country and at international sites.

There are a number of interdisciplinary opportunities involving biology. These include programs in behavioral neuroscience and in biochemistry, as well as combined majors between biology and computer science, data science, mathematics, or political science. Due to curricular overlap, combinations of any two of these programs or of any one of these programs with ecology and evolutionary biology, marine biology, or bioengineering are not offered.

Several accelerated bachelor/graduate degree programs are available: BS in Biology/MS in Bioinformatics, BS in Biology/MS in Biotechnology, BS in Computer Science and Biology/MS in Bioinformatics, BS in Data Science and Biology/MS in Bioinformatics, BS in Cell and Molecular Biology/MS in Bioinformatics, BS in Cell and Molecular Biology/MS in Biotechnology, and BS in Biology/PhD in Biology.

Our degree programs are designed to prepare students to enter the job market directly or to go on to graduate, medical, veterinary, dental, law, or business school. Our graduates are qualified for a wide array of career paths in industrial and clinical research in any of the life sciences, in teaching at all levels, in state or federal government agencies, and in medicine and other healthcare-related professions. Premedical, pre-dental, and other preprofessional students are urged to consult with the prehealth advising program early in their careers at Northeastern University.

## Programs

### Bachelor of Science (BS)

- Biology (p. 1376)
- Cell and Molecular Biology (p. 1383)
- Biology and Mathematics (p. 1394)
- Biology and Political Science (p. 1398)
- Computer Science and Biology (p. 754)
- Data Science and Biology (p. 874)

### Minors

- Biology (p. 1415)
- Cell and Molecular Biology (p. 1413)

### Accelerated Programs

See Accelerated Bachelor/Graduate Degree Programs (p. )

## Biology, BS

The BS Biology curriculum lays the groundwork for strong scientific training with basic course work in mathematics, chemistry, and physics, relevant to biology. Students explore the organization and processes of life across broad areas of the field, from molecules and cells through organs and organ systems to populations, ecosystems, and evolution. Students can select advanced electives to specialize in a subdiscipline of biology such as developmental biology, stem cell biology, microbiology, or physiology.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Biology Major Requirements

Code	Title	Hours
<b>Introduction to College</b>		
BIOL 1000 or INSC 1000	Biology at Northeastern Science at Northeastern	1
<b>Experiential Learning Introduction</b>		
EESC 2000	Professional Development for Co-op	1
<b>Required Biology</b>		
<i>Foundations</i>		
BIOL 1107 and BIOL 1108	Foundations of Biology and Lab for BIOL 1107	5
<i>Inquiries</i>		
BIOL 2299	Inquiries in Biological Sciences	4
<i>Genetics</i>		
BIOL 2301 and BIOL 2302	Genetics and Molecular Biology and Lab for BIOL 2301	5
<i>Project Lab</i>		
BIOL 2309	Biology Project Lab	4
<i>Biochemistry</i>		
BIOL 3611 and BIOL 3612	Biochemistry and Lab for BIOL 3611	5

### Biology Capstone

Code	Title	Hours
Please complete one of the following options to fulfill the capstone requirement:		1-4
BIOL 4701	Biology Capstone	
BIOL 4971	Junior/Senior Honors Project 2	
BIOL 4900	Biology Research Capstone ( concurrent with BIOL 4991 or BIOL 4994)	

### Biology Major Electives

Code	Title	Hours
<b>Organismal and Evolutionary Biology</b>		
Complete one of the following:		4-5
BIOL 2327	Human Parasitology	
BIOL 3401	Comparative Vertebrate Anatomy	
BIOL 3413	Current Topics in Organismal and Population Biology	
EEMB 2302 and EEMB 2303	Ecology and Lab for EEMB 2302	
EEMB 2400	Introduction to Evolution	

EEMB 2700 and EEMB 2701	Marine Biology and Lab for EEMB 2700
EEMB 3460	Conservation Biology
EEMB 3466	Disease Ecology
EEMB 3600	Animal Behavior

**Intermediate and Advanced Biology**

Complete three additional 4- or 5-semester-hour courses from the following: 12-15

BIOL 2321 to BIOL 3999	
BIOL 4705	Neurobiology of Cognitive Decline
BIOL 4707	Cell and Molecular Biology
BIOL 5000 to BIOL 5999	
EEMB 2290 to EEMB 5515	
EEMB 5520 to EEMB 5535	
EEMB 5548 to EEMB 5569	

One of the three intermediate/advanced electives can be a research course:

BIOL 4970	Junior/Senior Honors Project 1
BIOL 4971	Junior/Senior Honors Project 2
BIOL 4991	Research
BIOL 4994	Internship

**Supporting Courses**

Code	Title	Hours
<b>Mathematics</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
<b>Statistics</b>		
ENVR 2500 and ENVR 2501	Biostatistics and Lab for ENVR 2500	5
<b>Chemistry</b>		
<i>General Chemistry</i>		
CHEM 1161 and CHEM 1162 and CHEM 1163	General Chemistry for Science Majors and Lab for CHEM 1161 and Recitation for CHEM 1161	5
<i>Organic Chemistry</i>		
CHEM 2311 and CHEM 2312	Organic Chemistry 1 and Lab for CHEM 2311	5
CHEM 2313 and CHEM 2314	Organic Chemistry 2 and Lab for CHEM 2313	5
<b>Physics</b>		
<i>Physics 1</i>		
Complete one of the following lecture/lab pairs. PHYS 1145/PHYS 1146 is recommended:		5
PHYS 1145 and PHYS 1146	Physics for Life Sciences 1 and Lab for PHYS 1145	
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	
PHYS 1161 and PHYS 1162	Physics 1 and Lab for PHYS 1161	
<i>Physics 2</i>		
Complete one of the following lecture/lab pairs. PHYS 1147/PHYS 1148 is recommended:		5
PHYS 1147 and PHYS 1148	Physics for Life Sciences 2 and Lab for PHYS 1147	
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	
PHYS 1165 and PHYS 1166	Physics 2 and Lab for PHYS 1165	

**Intermediate or Advanced Science**

Complete one course from the following: 4

BIOL 2301 to BIOL 5999

CHEM 2311 to CHEM 5999

EEMB 2290 to EEMB 5999

ENVR 2310 to ENVR 5999

MATH 2280 to MATH 5999

PHYS 2303 to PHYS 5999

PSYC 2290 to PSYC 5999

**Biology Major Credit/GPA Requirement**

Complete 78 semester hours in the major with a cumulative GPA of 2.000.

Due to overlap in course content, double majoring in biology and cell and molecular biology, biology and biochemistry, biology and behavioral neuroscience, or biology and marine biology is not permitted.

**Program Requirement**

136 total semester hours required

**Plan of Study**

Please note that these are sample plans of study. While the requirements are the same for all students, individual schedules may vary.

## Cell and Molecular Biology, BS

The BS Cell and Molecular Biology curriculum lays the groundwork for strong scientific training with basic course work in mathematics, chemistry, and physics, relevant to biology. Students pursue a focused program of study emphasizing processes operating at the cellular and molecular levels of biological systems, including specialty courses in molecular cell biology and advanced genomics. Students choose from a range of advanced electives that delve deeply into molecular aspects of biology.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Cell and Molecular Biology Major Requirements

Code	Title	Hours
<b>Introduction to College</b>		
<b>Introduction to Experiential Learning</b>		
BIOL 1000 or INSC 1000	Biology at Northeastern Science at Northeastern	1
EESC 2000	Professional Development for Co-op	1
<b>Required Biology</b>		
<i>Foundations</i>		
BIOL 1107 and BIOL 1108	Foundations of Biology and Lab for BIOL 1107	5
<i>Genetics</i>		
BIOL 2301 and BIOL 2302	Genetics and Molecular Biology and Lab for BIOL 2301	5
<i>Project Lab</i>		
BIOL 2309	Biology Project Lab	4
<i>Inquiries</i>		
BIOL 2299	Inquiries in Biological Sciences	4
<i>Biochemistry</i>		
BIOL 3611 and BIOL 3612	Biochemistry and Lab for BIOL 3611	5
<i>Molecular Biology</i>		
BIOL 4707	Cell and Molecular Biology	4
BIOL 5591	Advanced Genomics	4
<b>Intermediate/Advanced Cell and Molecular Biology Electives</b>		
Complete two of the following:		8-9
BIOL 2329	Bioethics	
BIOL 3411	Current Topics in Cell and Molecular Biology	
BIOL 3421 and BIOL 3422	Microbiology and Lab for BIOL 3421	
BIOL 3601	Neural Systems and Behavior	
BIOL 3603	Mammalian Systems Physiology	
BIOL 3605	Developmental Neurobiology	
BIOL 5541	Endocrinology	
BIOL 5543	Stem Cells and Regeneration	
BIOL 5549	Inventions in Microbial Biotechnology	
BIOL 5573	Medical Microbiology	
BIOL 5581	Biological Imaging	
BIOL 5583	Immunology	

BIOL 5585	Evolution
BIOL 5587	Comparative Neurobiology
BIOL 5593	Cell and Molecular Biology of Aging
BIOL 5597	Immunotherapies of Cancer and Infectious Disease
EEMB 3001	Genetics and Evolution in Action
<i>Research</i>	
One of the two Intermediate/Advanced Electives can be a research course:	
BIOL 4970	Junior/Senior Honors Project 1
BIOL 4971	Junior/Senior Honors Project 2
BIOL 4991	Research
BIOL 4994	Internship

## Biology Capstone

Code	Title	Hours
Please complete one of the following options to fulfill the capstone requirement:		1-4
BIOL 4701	Biology Capstone	
BIOL 4900	Biology Research Capstone (concurrent with BIOL 4991 or BIOL 4994, which may be used toward Intermediate/Advanced Cell and Molecular Biology Electives)	
BIOL 4971	Junior/Senior Honors Project 2	

## Supporting Courses

Code	Title	Hours
<b>Mathematics</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
<b>Statistics</b>		
ENVR 2500 and ENVR 2501	Biostatistics and Lab for ENVR 2500	5
<b>Chemistry</b>		
<i>General Chemistry</i>		
CHEM 1161 and CHEM 1162 and CHEM 1163	General Chemistry for Science Majors and Lab for CHEM 1161 and Recitation for CHEM 1161	5
<i>Organic Chemistry</i>		
CHEM 2311 and CHEM 2312	Organic Chemistry 1 and Lab for CHEM 2311	5
CHEM 2313 and CHEM 2314	Organic Chemistry 2 and Lab for CHEM 2313	5
<b>Physics</b>		
<i>Physics 1</i>		
Complete one of the following lecture/lab pairs. PHYS 1145/PHYS 1146 is recommended:		5
PHYS 1145 and PHYS 1146	Physics for Life Sciences 1 and Lab for PHYS 1145	
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	
PHYS 1161 and PHYS 1162	Physics 1 and Lab for PHYS 1161	
<i>Physics 2</i>		
Complete one of the following lecture/lab pairs. PHYS 1147/PHYS 1148 is recommended:		5
PHYS 1147 and PHYS 1148	Physics for Life Sciences 2 and Lab for PHYS 1147	
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	
PHYS 1165 and PHYS 1166	Physics 2 and Lab for PHYS 1165	

**Intermediate or Advanced Science**

Complete one course from the following:

4-5

BIOL 2301 to BIOL 5999

CHEM 2311 to CHEM 5999

EEMB 2290 to EEMB 5999

ENVR 2310 to ENVR 5999

MATH 2280 to MATH 5999

PHYS 2303 to PHYS 5999

PSYC 2290 to PSYC 5999

**Cell and Molecular Biology Major Credit/GPA Requirement**

Complete 79 semester hours in the major with a cumulative GPA of 2.000.

Due to overlap in course content, double majoring in cell and molecular biology and biology, biochemistry, marine biology or behavioral neuroscience is not permitted.

**Program Requirement**

136 total semester hours required

**Plan of Study**

Please note that these are sample plans of study. While the requirements are the same for all students, individual schedules may vary.

## Biology and English, BS

In the combined biology and English degree, science courses lay the groundwork for strong basic training in mathematics, chemistry, and physics that are relevant to biology. In biology courses, students broadly explore the organization and processes of life—from molecules and cells through organs and organ systems to populations, ecosystems, and evolution. In English courses, students study the diverse historical, cultural, and aesthetic contexts of English, American, and other Anglophone literatures; analyze writing practices and related media; and practice a variety of approaches to the study of language, rhetoric, writing, and literature. The fields of biology and English are bridged with course work in different forms of science writing, as well as psychology and sociology courses exploring the acquisition of language and reading; the sociology of health and illness; and the environment, technology, and society.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

Complete one of the following lecture/lab pairs. PHYS 1147/PHYS 1148 is recommended:		5
PHYS 1147 and PHYS 1148	Physics for Life Sciences 2 and Lab for PHYS 1147	
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	
PHYS 1165 and PHYS 1166	Physics 2 and Lab for PHYS 1165	

## English Requirements

Code	Title	Hours
<b>Foundational Courses</b>		
ENGL 1400	Introduction to Literary Studies	4
ENGL 1160 or ENGL 1410	Introduction to Rhetoric Introduction to Research on Writing	4
ENGL 1700 or ENGL 1701	Global Literatures 1 Global Literatures 2	4

## English Electives

Two of the courses chosen from the lists below must be at the 3000 or 4000 level.

Code	Title	Hours
<b>Diversity</b>		
Complete one course from the following. You may reuse this course to fulfill an additional English requirement below.		4
ENGL 2150	Literature and Digital Diversity	
ENGL 2296	Early African-American Literature	
ENGL 2450	Postcolonial Literature	
ENGL 2455	American Women Writers	
ENGL 2470	Asian-American Literature	
ENGL 2760	Writing in Global Contexts	
ENGL 3678	Bedrooms and Battlefields: Hebrew Bible and the Origins of Sex, Gender, and Ethnicity	
ENGL 3685	Modern and Contemporary Jewish Literature	
<b>Literary Periods</b>		
<i>Pre-19th Century Literature</i>		
Complete one course from the following:		4
ENGL 1600	Introduction to Shakespeare	
ENGL 2296	Early African-American Literature	
ENGL 3101	Early Literatures	
ENGL 3120	17th- and 18th-Century Literatures	
ENGL 3618	Milton	
ENGL 3678	Bedrooms and Battlefields: Hebrew Bible and the Origins of Sex, Gender, and Ethnicity	
or JWSS 3678	Bedrooms and Battlefields: Hebrew Bible and the Origins of Sex, Gender, and Ethnicity	
<i>19th/20th/21st Century Literature</i>		
Complete one of the following courses:		4
<i>19th Century</i>		
ENGL 2330	The American Renaissance	
ENGL 3140	19th-Century Literatures	
ENGL 3190	Topics in 19th-Century American Literature	
ENGL 3619	Emerson and Thoreau	
ENGL 3720	19th-Century Major Figure	
<i>20th/21st Century</i>		
ENGL 2301	The Graphic Novel	
ENGL 2440	The Modern Bestseller	
ENGL 2600	Irish Literary Culture (Abroad)	
ENGL 3161	20th- and 21st-Century Literatures	
ENGL 3685	Modern and Contemporary Jewish Literature	
or JWSS 3685	Modern and Contemporary Jewish Literature	
ENGL 3730	20th- and 21st-Century Major Figure	
<b>Theories and Methods</b>		
Complete one of the following:		4
ENGL 1140	Grammar: The Architecture of English	
ENGL 1160	Introduction to Rhetoric	
ENGL 1410	Introduction to Research on Writing	
ENGL 2150	Literature and Digital Diversity	
ENGL 3325	Rhetoric of Law	
ENGL 3381	The Practice and Theory of Teaching Writing	
ENGL 3400	Opening the Archive	
ENGL 3700	Narrative Medicine	
LING 1150	Introduction to Language and Linguistics	
LING 2350	Linguistic Analysis	
LING 3450	Syntax	
LING 3452	Semantics	
LING 3454	History of English	

LING 3456	Language and Gender	
LING 3458	Topics in Linguistics	

**Comparative Course**

Complete one of the following courses: 4

ENGL 1450	Reading and Writing in the Digital Age	
ENGL 1500	British Literature to 1800	
ENGL 1502	American Literature to 1865	
ENGL 2150	Literature and Digital Diversity	
ENGL 2420	Contemporary Poetry	
ENGL 2430	Contemporary Fiction	
ENGL 2455	American Women Writers	
ENGL 2470	Asian-American Literature	
ENGL 2510	Horror Fiction	
ENGL 2520	Science Fiction	
ENGL 2600	Irish Literary Culture (Abroad)	
ENGL 2620	What Is Nature?	
ENGL 2690	Boston in Literature	
ENGL 3487	Film and Text (Abroad)	

**Writing**

Complete one of the following: 4

ENGL 2700	Creative Writing	
ENGL 2710	Style and Editing	
ENGL 2730	Digital Writing	
ENGL 2740	Writing and Community Engagement	
ENGL 2760	Writing in Global Contexts	
ENGL 2770	Writing to Heal	
ENGL 2850	Writing for Social Media: Theory and Practice	
ENGL 3375	Writing Boston	
ENGL 3376	Creative Nonfiction	
ENGL 3377	Poetry Workshop	
ENGL 3378	Fiction Workshop	
ENGL 3380	Writing Seminar	
ENGL 3384	The Writer's Marketplace	

**English Electives**

Complete any two ENGL courses that have not already been used to fulfill another requirement. 8

**Integrative Courses**

Code	Title	Hours
------	-------	-------

**Integrative English Course**

Complete one of the following: 4

ENGL 2620	What Is Nature?	
ENGL 2650	Science Writing: Origins, Ethics, and Emerging Genres	
ENGL 2770	Writing to Heal	
ENGL 3340	Technologies of Text	

**Integrative General Biological Sciences Course**

Complete the following: 4

PSYC 3464	Psychology of Language	
-----------	------------------------	--

**Capstone Requirement**

Complete one of the following capstone options:

Code	Title	Hours
------	-------	-------

**Biology Capstone**

Complete one of the options to fulfill the capstone requirement in biology: 1-4

BIOL 4701	Biology Capstone	
-----------	------------------	--

BIOL 4900	Biology Research Capstone (concurrent with BIOL 4991 or BIOL 4994, which may be used toward Intermediate/Advanced Biology)	
BIOL 4971	Junior/Senior Honors Project 2	
<b>English Capstone</b>		
ENGL 4710 or ENGL 4720	Capstone Seminar Capstone Project	4

## Biology and Mathematics, BS

In the BS combined biology and mathematics degree program, science courses lay the groundwork for strong basic training in mathematics, chemistry, and physics that are relevant to biology. In biology courses, students broadly explore the organization and processes of life—from molecules and cells through organs and organ systems to populations, ecosystems, and evolution. In mathematics courses, students pursue mathematical reasoning, differential equations, and linear algebra, as well as statistics and probability. The fields of biology and mathematics are integrated in a range of course offerings including bioinformatics, applied statistics, advanced genomics, and biological imaging.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Biology Requirements

Code	Title	Hours
<b>Introduction to College</b>		
BIOL 1000 or MATH 1000	Biology at Northeastern Mathematics at Northeastern	1
<b>Biology</b>		
<i>Foundations</i>		
BIOL 1107 and BIOL 1108	Foundations of Biology and Lab for BIOL 1107	5
<i>Inquiries</i>		
BIOL 2299	Inquiries in Biological Sciences	4
<i>Genetics</i>		
BIOL 2301 and BIOL 2302	Genetics and Molecular Biology and Lab for BIOL 2301	5
<i>Project Lab</i>		
BIOL 2309	Biology Project Lab	4
<b>Chemistry</b>		
<i>General Chemistry</i>		
CHEM 1161 and CHEM 1162 and CHEM 1163	General Chemistry for Science Majors and Lab for CHEM 1161 and Recitation for CHEM 1161	5
<i>Organic Chemistry</i>		
CHEM 2311 and CHEM 2312	Organic Chemistry 1 and Lab for CHEM 2311	5
CHEM 2313 and CHEM 2314	Organic Chemistry 2 and Lab for CHEM 2313	5
<b>Biochemistry</b>		
BIOL 3611 and BIOL 3612	Biochemistry and Lab for BIOL 3611	5
<b>Intermediate/Advanced Biology</b>		
Complete one of the following:		4-5
BIOL 2327 to BIOL 3999		
BIOL 4705 to BIOL 5999		
<b>Organismal and Evolutionary Biology Elective</b>		
Complete one of the following:		4-5
BIOL 2327	Human Parasitology	
BIOL 3401	Comparative Vertebrate Anatomy	
BIOL 3413	Current Topics in Organismal and Population Biology	

EEMB 2302 and EEMB 2303	Ecology and Lab for EEMB 2302
EEMB 2400	Introduction to Evolution
EEMB 2700 and EEMB 2701	Marine Biology and Lab for EEMB 2700
EEMB 3460	Conservation Biology
EEMB 3466	Disease Ecology
EEMB 3600	Animal Behavior

## Mathematics Requirements

Code	Title	Hours
<b>Calculus 1</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
<b>Calculus 2 and Calculus 3</b>		
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
<b>Physics</b>		
PHYS 1161 and PHYS 1162	Physics 1 and Lab for PHYS 1161	5
<b>Required Mathematics Courses</b>		
MATH 1365	Introduction to Mathematical Reasoning	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 3081	Probability and Statistics	4
<b>Mathematics Electives</b>		
Complete three of the following:		12
MATH 2331	Linear Algebra	
MATH 3001 to MATH 4899		

## Additional Requirements

Code	Title	Hours
<b>Experiential Learning Introduction</b>		
EESC 2000	Professional Development for Co-op	1
MATH 3000	Co-op and Experiential Learning Reflection Seminar 1	1
<b>Capstone</b>		
Complete one of the following to fulfill capstone requirement:		1-4
BIOL 4701	Biology Capstone	
BIOL 4900	Biology Research Capstone (concurrent with BIOL 4991 or BIOL 4994, which may be used toward Intermediate/Advanced Biology)	
BIOL 4971	Junior/Senior Honors Project 2	
MATH 4020	Research Capstone	
MATH 4025	Applied Mathematics Capstone	
MATH 5131	Introduction to Mathematical Methods and Modeling	
<b>Biology/Mathematics Integrative Courses</b>		
Complete two of the following:		8-10
BINF 6308	Bioinformatics Computational Methods 1	
BINF 6309	Bioinformatics Computational Methods 2	
BIOL 3405	Neurobiology	
BIOL 5581	Biological Imaging	
BIOL 5591	Advanced Genomics	
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	
MATH 4581	Statistics and Stochastic Processes	
MATH 7343	Applied Statistics	

**Writing Requirement**

ENGW 3307	Advanced Writing in the Sciences	4
-----------	----------------------------------	---

**Biology and Mathematics Combined-Major Credit/GPA Requirements**

Complete 93 semester hours in the major with a cumulative GPA of 2.000.

**Program Requirements**

## Biology and Political Science, BS

In the BS biology and political science program, science courses lay the groundwork for strong basic training in mathematics, chemistry, and physics that are relevant to biology. In biology courses, students broadly explore the organization and processes of life—from molecules and cells through organs and organ systems to populations, ecosystems, and evolution. In political science courses, students pursue core concepts of American government, comparative politics, international relations and political thought. Coursework in quantitative techniques is also required. Students choose from a range of advanced subject electives. An appreciation of the intersection of biology and political science is provided through advanced courses in science, technology and public policy, and in environmental politics and policy.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Biology Requirements

Code	Title	Hours
<b>Introduction to College</b>		
BIOL 1000 or POLS 1000	Biology at Northeastern Political Science at Northeastern	1

Code	Title	Hours
------	-------	-------

**Core Courses in Political Science**

POLS 1150	American Government	4
POLS 1155	Comparative Politics	4
POLS 1160	International Relations	4

**Statistics**

Complete one of the following:		4-5
POLS 2400	Quantitative Techniques	
ENVR 2500 and ENVR 2501	Biostatistics and Lab for ENVR 2500	

**Political Thought**

Complete one of the following:		4
POLS 2325	Ancient Philosophy and Political Thought	
POLS 2328	Modern Political Thought	
POLS 2330	American Political Thought	
POLS 2332	Contemporary Political Thought	

**Political Science Electives**

Complete five POLS courses 2000 and above.		20
--	--	----

**Political Science Concentration (Optional)**

If you are working toward one of the following concentrations, declare it with your advisor so that it may be added to your record.

- American Political Institutions (p. 1400)
- Campaigns and Elections (p. 1400)
- Comparative Politics (p. 1400)
- Identity, Culture, and Politics (p. 1401)
- International Relations and Diplomacy (p. 1401)
- Law and Legal Studies (p. 1401)
- Public Policy (p. 1401)
- Security Studies (p. 1402)

**Integrative Requirement and Capstone**

*Note:* Science, Technology, and Public Policy (POLS 2390) and Environmental Politics and Policy (POLS 2395) cannot be used both as an integrative course and as an elective above.

Code	Title	Hours
<b>Integrative Requirement</b>		
POLS 2390 or POLS 2395	Science, Technology, and Public Policy Environmental Politics and Policy	4

**Capstone**

Complete one of the following to fulfill capstone requirement:		1-4
BIOL 4701	Biology Capstone	
BIOL 4900	Biology Research Capstone (concurrent with BIOL 4991 or 4994, which may be used toward Intermediate/Advanced Biology)	
BIOL 4971	Junior/Senior Honors Project 2	
POLS 4701	Political Science Senior Capstone	

## Program Requirement

136 total semester hours required

### CONCENTRATION IN AMERICAN POLITICAL INSTITUTIONS

Code	Title	Hours
Complete four of the following:		
POLS 2350	State and Local Politics	16
POLS 3300	The U.S. Congress	
POLS 3302	Judicial Process and Behavior

## Computer Science and Biology, BS

The computer science and biology combined major reflects how research in biology, especially genetics, has become a computational science. The program provides a strong foundation in biology, chemistry, and mathematics, as well as software development and algorithms.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
CS 1200	First Year Seminar <sup>1</sup>	
CS 1210	Professional Development for Khoury Co-op <sup>2</sup>	
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 3800	Theory of Computation (integrative course)	4
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4
<b>Khoury Elective Courses</b>		
With adviser approval, a directed study, research, project study, or appropriate graduate-level course may also be taken as a computer science elective.		
Complete 4 credits of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		4
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		
DS 2500 or higher, except DS 4900		
IS 2000 or higher, except IS 4900		

<sup>1</sup> Students entering through the Department of Biology may take Biology at Northeastern (BIOL 1000).

<sup>2</sup> Students entering through the Department of Biology may take Professional Development for Co-op (EESC 2000).

### Biology Courses

Code	Title	Hours
<b>Foundations of Biology</b>		
BIOL 1107 and BIOL 1108	Foundations of Biology and Lab for BIOL 1107	5
<b>Inquiries</b>		
BIOL 2299	Inquiries in Biological Sciences	4
<b>Molecular Biology</b>		
BIOL 2301 and BIOL 2302	Genetics and Molecular Biology and Lab for BIOL 2301	5

BIOL 3611 and BIOL 3612	Biochemistry and Lab for BIOL 3611	5
<b>Biology Project Lab</b>		
BIOL 2309	Biology Project Lab	4
<b>Chemistry</b>		
CHEM 1161 and CHEM 1162 and CHEM 1163	General Chemistry for Science Majors and Lab for CHEM 1161 and Recitation for CHEM 1161	5
CHEM 2311 and CHEM 2312	Organic Chemistry 1 and Lab for CHEM 2311	5
CHEM 2313 and CHEM 2314	Organic Chemistry 2 and Lab for CHEM 2313	5
<b>Biology Capstone</b>		
Choose one:		4
BIOL 4701	Biology Capstone	
BIOL 4971	Junior/Senior Honors Project 2	
BIOL 4900	Biology Research Capstone	
<b>Intermediate/Advanced Biology Electives</b>		<b>8-10</b>
Complete two biology courses (with corequisite labs if offered). Choose one of these two courses from the following list:		
BIOL 2327	Human Parasitology	
BIOL 3401	Comparative Vertebrate Anatomy	
BIOL 3413	Current Topics in Organismal and Population Biology	
EEMB 2302 and EEMB 2303	Ecology and Lab for EEMB 2302	
EEMB 2400	Introduction to Evolution	
EEMB 2700 and EEMB 2701	Marine Biology and Lab for EEMB 2700	
EEMB 3460	Conservation Biology	
EEMB 3466	Disease Ecology	
Choose the second elective from the following list:		
BIOL 2311 to BIOL 4999		
EEMB 2290 to EEMB 5515		
EEMB 5548 to EEMB 5569		
<b>Biology Integrative Course</b>		
Complete one of the following:		4-5
BINF 6308	Bioinformatics Computational Methods 1	
BIOL 4707	Cell and Molecular Biology	
BIOL 5581	Biological Imaging	
BIOL 5587	Comparative Neurobiology	
BIOL 5591	Advanced Genomics	
<b>Supporting Courses</b>		
<b>Code</b>	<b>Title</b>	<b>Hours</b>
<b>Calculus</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
<b>Probability and Statistics</b>		
ENVR 2500 and ENVR 2501	Biostatistics and Lab for ENVR 2500	5
<b>Computing and Social Issues</b>		
Complete one of the following:		4
AFAM 2600	Issues in Race, Science, and Technology	
CY 4170	The Law, Ethics, and Policy of Data and Digital Technologies	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
ENGL 2150	Literature and Digital Diversity	
HIST 2220	History of Technology	

INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks
IS 1300	Knowledge in a Digital World
or PHIL 1300	Knowledge in a Digital World
PHIL 1145	Technology and Human Values
SOCL 1280	The Twenty-First-Century Workplace
SOCL 2485	Environment, Technology, and Society
SOCL 4528	Computers and Society

**Intermediate or Advanced Science**

Complete one course from the following: 4

BIOL 2327 to BIOL 3999
BIOL 4705 to BIOL 5999
CHEM 2311 to CHEM 5999
EEMB 2290 to EEMB 5999
ENVR 2310 to ENVR 5999
MATH 2280 to MATH 5999
PHYS 2303 to PHYS 5999
PSYC 2290 to PSYC 5999

**Writing Requirements**

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111	First-Year Writing	4
<b>Advanced Writing in the Disciplines</b>		
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3307	Advanced Writing in the Sciences	
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

**Required General Electives**

Code	Title	Hours
Complete 20 credits of general electives		20

**NUpath Requirements Satisfied**

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Exploring Creative Expression and Innovation
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

**Khoury College GPA Requirement**

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses

**Program Requirement**

141 total semester hours required

## Data Science and Biology, BS

The data science and biology major provides a strong foundation in biology, chemistry, and mathematics, as well as software development and algorithms. Students study the collection, manipulation, storage, retrieval, and computational analysis of data in its various forms, including numeric, textual, image, and video data from small to large volumes. Students also explore the organization and processes of life across broad areas of the field, from molecules and cells through organs and organ systems to populations, ecosystems, and evolution.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Data Science Requirements

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or BIOL 1000 or INSC 1000	First Year Seminar Biology at Northeastern Science at Northeastern	1
CS 1210 or EESC 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Programming Sequence Pathways</b>		
Choose one of the two options:		12
<i>Computer Science Option</i>		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510

## Cell and Molecular Biology, Minor

The Department of Biology offers a minor in cell and molecular biology, which involves taking five biology courses, two of which must have a corequisite lab. The minor provides students with a foundation in biology and an emphasis in cell and molecular biology.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Restrictions

This minor is not available for students who major in biology, biochemistry, behavioral neuroscience, cell and molecular biology, marine biology, ecology and evolutionary biology, or any combined major that involves those listed above.

### Required Biology Courses

Complete five biology courses for a total of at least 22 semester hours. At least two of the five courses must contain a lab corequisite.

Code	Title	Hours
Complete one introductory biology sequence:		9-10
<i>Foundations of Biology</i>		
BIOL 1107 and BIOL 1108	Foundations of Biology and Lab for BIOL 1107	
BIOL 2299	Inquiries in Biological Sciences	
<i>General Biology</i>		
BIOL 1111 and BIOL 1112	General Biology 1 and Lab for BIOL 1111	
BIOL 1113 and BIOL 1114	General Biology 2 and Lab for BIOL 1113	
<i>General Biology (for Engineers)</i>		
BIOL 1115 and BIOL 1116	General Biology 1 for Engineers and Lab for BIOL 1115	
BIOL 1113 and BIOL 1114	General Biology 2 and Lab for BIOL 1113	
Complete the following required courses:		
BIOL 2301 and BIOL 2302	Genetics and Molecular Biology and Lab for BIOL 2301	5
BIOL 4707 or BIOL 5591	Cell and Molecular Biology Advanced Genomics	4

### INTERMEDIATE/ADVANCED ELECTIVES

Code	Title	Hours
Complete at least one of the following course options:		4-5
BIOL 3405	Neurobiology	
BIOL 3411	Current Topics in Cell and Molecular Biology	
BIOL 3421 and BIOL 3422	Microbiology and Lab for BIOL 3421	
BIOL 3601	Neural Systems and Behavior	
BIOL 3605	Developmental Neurobiology	
BIOL 3611 and BIOL 3612	Biochemistry and Lab for BIOL 3611	
BIOL 4705 to BIOL 4709		
BIOL 5301 to BIOL 5306		
BIOL 5499 to BIOL 5583		
BIOL 5587 to BIOL 5597		
EEMB 3001	Genetics and Evolution in Action	

### CREDIT/GPA REQUIREMENT

Complete 22 semester hours

1414 Cell and Molecular Biology, Minor

2.000 GPA required in the minor

## Biology, Minor

The Department of Biology offers a minor in biology, which involves taking five biology courses, two of which must have a corequisite lab. The minor provides students with a foundation in the five core concepts of biology: evolution, energy transformations, biological structure from the molecular to the ecosystem scale, information flow, and systems biology.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Restrictions

This minor is not available for students who major in biology, biochemistry, behavioral neuroscience, cell and molecular biology, marine biology, ecology and evolutionary biology, or any combined major that involves those subjects listed above.

### Required Biology Courses

Complete five biology courses for a total of at least 22 semester hours. Two of the five courses must contain a lab corequisite.

Code	Title	Hours
Complete one introductory biology sequence.		9-10

2.000 GPA required in the minor

## Chemistry and Chemical Biology

Website (<https://cos.northeastern.edu/chemistry-chemical-biology/>)

### Penny Beuning, PhD

Professor and Chair

617.373.2822

The Department of Chemistry and Chemical Biology provides education in basic chemistry and modern chemistry-related disciplines. The department offers an American Chemical Society–certified program leading to a Bachelor of Science in Chemistry and also offers a Bachelor of Science in Biochemistry jointly with the Department of Biology. The department offers two combined majors. In conjunction with the Department of Marine and Environmental Sciences, the department offers a combined Bachelor of Science in Environmental and Sustainability Sciences and Chemistry. Along with Khoury College of Computer Sciences, the department also offers a Bachelor of Science in Data Science and Chemistry. The overall objective of the Bachelor of Science in Chemistry major program is to provide the fundamental scientific background and laboratory training for students as they prepare for chemically related careers or advanced study in fields including the traditional chemical specialties, as well as biochemistry, materials science, forensic science, medicine, education, law, and other endeavors that draw upon an understanding of the chemical basis of the world around us.

Key general objectives are the development of qualitative and quantitative problem-solving skills and effective communication skills. Specific learning objectives for the chemistry major include developing conceptual understanding and problem-solving abilities in the fundamental chemical subfields of analytical chemistry, biochemistry, inorganic chemistry, organic chemistry, and physical chemistry; gaining a foundation of physics and mathematics and integrating these areas with chemical principles; performing quantitative measurements and analyzing the resulting data; synthesizing and characterizing compounds; learning proper laboratory practices, including safety; developing proficiency with modern instruments and computers for data acquisition and analysis; and making meaning of research results and learning the relevance of chemistry to biology, pharmacology, medicine, manufactured and natural materials, and the environment.

Most of our chemistry majors participate in the cooperative education program and thereby gain invaluable professional experience to augment their classroom and laboratory work. Not only does this experience add immensely to the overall education received, it also has the potential to provide contacts and references for later employment or graduate school admissions. Chemistry majors also undertake a research project for at least one semester under the supervision of a faculty member. The availability of elective courses in the program will allow a student to take more advanced courses or additional research in the department or to add courses from other programs, such as engineering, in the case of an interest in materials chemistry. Qualified students may also participate in a BS/MS program.

## Programs

### Bachelor of Science (BS)

- Chemistry (p. 1418)
- Data Science and Chemistry (p. 886)
- Environmental and Sustainability Sciences and Chemistry (p. 1427)

### Minor

- Chemistry (p. 1431)
- Environmental Chemistry (p. 1058)

### Accelerated Programs

See Accelerated Bachelor/Graduate Degree Programs (p. )

## Chemistry, BS

The Bachelor of Science in Chemistry is designed to give students both breadth and depth in chemistry fundamentals. During their course of study, students have an opportunity to develop qualitative and quantitative problem-solving skills as well as effective communication skills. The overall objective of the program is to provide scientific background and laboratory experience for students as they prepare for chemically related careers or advanced study in fields that include both the traditional chemical specialties and other endeavors that draw upon an understanding of the chemical basis of the world around us such as biochemistry, materials science, forensic science, medicine, education, or law.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Chemistry Major Requirements

Code	Title	Hours
<b>Introduction to College</b>		
CHEM 1000 or INSC 1000	Chemistry/Chemical Biology at Northeastern Science at Northeastern	1
<b>Experiential Learning Introduction</b>		
EESC 2000	Professional Development for Co-op	1
<b>General Chemistry</b>		
CHEM 1161 and CHEM 1162 and CHEM 1163	General Chemistry for Science Majors and Lab for CHEM 1161 and Recitation for CHEM 1161	5
CHEM 2161 and CHEM 2162 and CHEM 2163	Concepts in Chemistry and Lab for CHEM 2161 and Recitation for CHEM 2161	5
<b>Organic Chemistry</b>		
CHEM 2315 and CHEM 2316 and CHEM 2324	Organic Chemistry 1 for Chemistry Majors and Lab for CHEM 2315 and Recitation for CHEM 2315	6
CHEM 2317 and CHEM 2318 and CHEM 2325	Organic Chemistry 2 for Chemistry Majors and Lab for CHEM 2317 and Recitation for CHEM 2317	6
<b>Analytical Chemistry</b>		
CHEM 2321 and CHEM 2322 and CHEM 2323	Analytical Chemistry and Lab for CHEM 2321 and Recitation for CHEM 2321	5
<b>Biochemistry</b>		
CHEM 5621 and CHEM 5622	Principles of Chemical Biology for Chemists and Lab for CHEM 5621	4
<b>Inorganic Chemistry</b>		
Complete one of the following courses:		
CHEM 3501 and CHEM 3502 and CHEM 3503	Inorganic Chemistry and Lab for CHEM 3501 and Recitation for CHEM 3501	5
CHEM 3505 and CHEM 3506 and CHEM 3507	Introduction to Bioinorganic Chemistry and Lab for CHEM 3505 and Recitation for CHEM 3505	
<b>Senior Research/Capstone</b>		
CHEM 4750	Senior Research	4

## Supporting Courses

Code	Title	Hours
<b>Mathematics</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
<b>Physics</b>		
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	5

## Concentrations

Students may add an optional concentration. Students working toward a concentration must declare it with their advisor for it to be added to their academic record.

Note: Opting to take a concentration may require additional coursework to be completed beyond the total program hours.

- No Concentration (p. 1419)
- Concentration in Chemical Biology (p. 1419)
- Concentration in Materials Chemistry (p. 1420)

### NO CONCENTRATION

Code	Title	Hours
<b>Physical Chemistry</b>		
CHEM 3401 and CHEM 3402	Chemical Thermodynamics and Kinetics and Lab for CHEM 3401	5
CHEM 3403 and CHEM 3404	Quantum Chemistry and Spectroscopy and Lab for CHEM 3403	5
<b>Advanced Chemistry</b>		
Choose two of the following:		8-12
CHEM 3331 and CHEM 3332	Bioanalytical Chemistry and Lab for CHEM 3331	
CHEM 4456 and CHEM 4457	Organic Chemistry 3: Organic Chemistry of Drug Design and Development and Lab for CHEM 4456	
CHEM 4628 and CHEM 4629	Introduction to Spectroscopy of Organic Compounds and Identification of Organic Compounds	
CHEM 5620	Protein Chemistry	

### CONCENTRATION IN CHEMICAL BIOLOGY

Code	Title	Hours
<b>Physical Chemistry</b>		
CHEM 3431 and CHEM 3432	Physical Chemistry and Lab for CHEM 3431	5
<b>Advanced Chemistry</b>		
CHEM 4456 and CHEM 4457	Organic Chemistry 3: Organic Chemistry of Drug Design and Development and Lab for CHEM 4456	6
Choose one of the following:		3
CHEM 5550	Introduction to Glycobiology and Glycoprotein Analysis	
CHEM 5620	Protein Chemistry	
CHEM 5625	Chemistry and Design of Protein Pharmaceuticals	
CHEM 5630	Nucleic Acid Chemistry	
<b>Additional Supporting Courses</b>		
BIOL 1111 and BIOL 1112	General Biology 1 and Lab for BIOL 1111	5

## Data Science and Chemistry, BS

The data science and chemistry major combines chemistry, information science, and mathematics to give students both breadth and depth in chemistry and data science fundamentals. During their course of study, students have an opportunity to develop qualitative and quantitative problem-solving skills as well as effective communication skills. Students will study the collection, manipulation, storage, retrieval, and computational analysis of chemical and other scientific data in its various forms, including numeric, textual, image, and video data from small to large volumes. The program engages students in rigorous coursework designed to prepare students to interpret the ever-expanding knowledge base.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Data Science Requirements

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or CHEM 1000 or INSC 1000	First Year Seminar Chemistry/Chemical Biology at Northeastern Science at Northeastern	1
CS 1210 or EESC 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Programming Sequence Pathways</b>		
Choose one of the two options:		12
<i>Computer Science Option</i>		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	
<i>Data Science Option</i>		
DS 2000 and DS 2001	Programming with Data and Data Science Programming Practicum	
DS 2500 and DS 2501	Intermediate Programming with Data and Lab for DS 2500	
DS 3500	Advanced Programming with Data	
<b>Computer Science Required Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 3200	Database Design	4

## Environmental and Sustainability Sciences and Chemistry, BS

The Departments of Marine and Environmental Sciences and Chemistry provide education in basic environmental and sustainability sciences and chemistry-related disciplines. The overall objective of this combined major is to provide the fundamental scientific background and practical training for students as they prepare for environmental and chemically related careers or advanced study in fields including the traditional specialties such as toxicology, pollution, bioremediation, environmental protection, education, law, and other endeavors that may draw upon an understanding of the chemical basis of the environment and the changes that will likely result from global environmental change.

Key general objectives are the development of qualitative and quantitative problem-solving skills and effective communication skills. This combined major includes the development of conceptual understanding and problem-solving abilities in the fundamental dynamics between the environment and its chemistry, be it analytical chemistry, biochemistry, inorganic chemistry, organic chemistry, and physical chemistry. Students will have the opportunity to perform quantitative measurements; learn proper laboratory practices, including safety; develop proficiency with modern instruments and computers for data acquisition and analysis; and learn the relevance of chemistry within the context of the abiotic and biotic environments.

Students also have the opportunity to participate in the cooperative education program and thereby gain invaluable professional experience to augment their classroom and laboratory work. Not only does that experience add immensely to the overall education received, it also has the potential to provide contacts and references for later employment or graduate school admissions. Students in this major may also undertake research projects for at least one semester under the supervision of a faculty member. Sufficient electives are available in the program either to take more advanced courses or research within the department or to add courses in an area of special interest.

There are a number of interdisciplinary opportunities involving ESS. Due to curricular overlap, combinations of any ESS major, including combined majors, cannot occur with majors or minors in ecology and evolutionary biology or environmental studies or with the minor in geoscience. ESS and chemistry combined majors are also restricted from a minor in environmental chemistry.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

## Chemistry, Minor

The minor in chemistry is designed for the student who would like a sound foundation in the theory and laboratory practice of chemistry. It requires six courses in chemistry with their prerequisites and corequisites.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Due to curricular overlap, the chemistry minor is not available to biochemistry majors.

### Required Courses

Students must take either General Chemistry 1 (CHEM 1211) and General Chemistry 2 (CHEM 1214) or General Chemistry for Science Majors (CHEM 1161).

*Note:* Engineering students may take General Chemistry for Engineers (CHEM 1151) in place of General Chemistry 1 (CHEM 1211) and General Chemistry 2 (CHEM 1214) or General Chemistry for Science Majors (CHEM 1161).

Excluded: Undergraduate Research (CHEM 4901) Junior/Senior Honors Project 1 (CHEM 4970), Junior/Senior Honors Project 2 (CHEM 4971) or other research courses from approved electives.

Code	Title	Hours
<b>General Chemistry</b>		
Choose one option.		4-10
<i>General Chemistry</i>		
CHEM 1211 and CHEM 1212	General Chemistry 1 and Lab for CHEM 1211	
CHEM 1214 and CHEM 1215	General Chemistry 2 and Lab for CHEM 1214	
<i>Chemistry for Science Majors</i>		
CHEM 1161 and CHEM 1162	General Chemistry for Science Majors and Lab for CHEM 1161	
<i>Chemistry for Engineers</i>		
CHEM 1151	General Chemistry for Engineers	
or other Chemistry and Chemical Biology approved course		
<b>Organic Chemistry</b>		
CHEM 2311 and CHEM 2312	Organic Chemistry 1 and Lab for CHEM 2311	5

<b>Analytical Chemistry</b>		
CHEM 2321 and CHEM 2322	Analytical Chemistry and Lab for CHEM 2321 (Analytical Chemistry)	5
<b>Physical Chemistry</b>		
CHEM 3431 and CHEM 3432	Physical Chemistry and Lab for CHEM 3431	5
<i>Engineering students may substitute the following course:</i>		
CHME 2320	Chemical Engineering Thermodynamics 1	
<b>Advanced Lab</b>		
Complete one of the following:		5
CHEM 3403 and CHEM 3404	Quantum Chemistry and Spectroscopy and Lab for CHEM 3403	
CHEM 4456 and CHEM 4457	Organic Chemistry 3: Organic Chemistry of Drug Design and Development and Lab for CHEM 4456	

### GPA Requirement

2.000 GPA required in the minor

## Environmental Chemistry, Minor

The minor in environmental chemistry offers an opportunity for students of any background interested in environmental sciences to better understand the chemistry of the environment. Students completing the minor in environmental chemistry have an opportunity to learn about the chemical processes of natural systems and environmental pollutants, while earning a credential that highlights their interest and expertise. This can be a useful course of study whether their primary degree and career will be in one of the traditional chemical, environmental, or engineering programs, or another allied field. No more than two courses (totaling 8 SH to 10 SH) may double count with any major degree requirements.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

*Note:* No more than two courses (totaling 8 SH to 10 SH) may double count with any major degree requirements.

### Required Courses

Code	Title	Hours
<b>Environmental Chemistry Core</b>		
Complete one of the following:		4
CIVE 2335	Environmental Engineering Chemistry	
ENVR 3410	Environmental Geochemistry	
<b>Chemistry Core</b>		
Complete one of the following:		5
CHEM 2321 and CHEM 2322 and CHEM 2323	Analytical Chemistry and Lab for CHEM 2321 and Recitation for CHEM 2321	
CHEM 3331 and CHEM 3332	Bioanalytical Chemistry and Lab for CHEM 3331	
<b>Research Experience</b>		
Complete one of the following:		4
CHEM 4750	Senior Research	
CHEM 4901	Undergraduate Research	
CHEM 4992	Directed Study	
CIVE 4991	Research	
CIVE 4992	Directed Study	
ENVR 4900 or ENVR 4997	Earth and Environmental Science Capstone Senior Thesis	
ENVR 4992	Directed Study	

### Electives

Code	Title	Hours
Complete two of the following:		8-9
CIVE 2335	Environmental Engineering Chemistry (If not used to satisfy Environmental Chemistry Core)	
CIVE 3435	Environmental Pollution: Fate and Transport	
CIVE 5300 and CIVE 5301	Environmental Sampling and Analysis and Lab for CIVE 5300	
ENVR 3125	Global Oceanic Change	
ENVR 3410	Environmental Geochemistry (If not used to satisfy Environmental Chemistry Core)	
ENVR 4500 and ENVR 4501	Applied Hydrogeology and Lab for ENVR 4500	
ENVR 4504	Environmental Pollution	
ENVR 4505	Wetlands	
ENVR 5190	Soil Science	

### GPA Requirement

Minimum 2.000 GPA required in all major courses

**Credit Requirement**

Minimum of 21 hours required

## Marine and Environmental Sciences

617.373.3176

617.373.4378 (fax)

The academic programs of the Department of Marine and Environmental Sciences provide students a deep, multidisciplinary understanding of the chemical, physical, geological, socio-ecological, and biological processes that shape Earth's myriad ecosystems. This fundamental understanding, coupled with a focus on the many environmental challenges facing our planet, seeks to yield knowledge and solutions that promote sustainability. Our graduates leave Northeastern University prepared to address diverse issues including collapsing fisheries, the impacts of climate change (e.g., sea level rise), coastal erosion, and pollution. To address and solve today's complex environmental problems, environmental professionals are expected to work effectively as part of a multidisciplinary team containing natural and social scientists, engineers, and policymakers. Hence, our undergraduate program emphasizes experiential education in addition to traditional classroom learning. This approach better prepares students to engage in collaborative work and enhances their employment opportunities after Northeastern.

Our Bachelor of Science in Environmental and Sustainability Science degree is designed for students seeking a comprehensive understanding of the scientific implications of environmental problems and the multidisciplinary solutions that environmental scientists can produce to solve them. All students take foundational courses in Earth science, ecology, and sustainability. They then choose from one of four concentrations for deeper learning. For students interested in understanding how physical and geochemical processes shape existing and emerging environmental threats, they can pursue the Earth, Oceans, and Environmental Change concentration. Students interested in how ecological and evolutionary processes influence our ability to conserve, restore, and manage ecosystems can elect our Conservation, Restoration, and Management concentration. Our concentration in Sustainable Planning and Development is designed for students who want to examine how science informs the nexus of food, water, and energy to promote greater sustainability. Lastly, students interested in leveraging a strong scientific foundation to study coupled human and natural systems that are most threatened by environmental change can focus on our concentration in Environment and Society.

Students interested in merging a scientific foundation in environmental problem solving with skills from sociology, business, public health, law, and the arts might be interested in our Bachelor of Arts in Environmental Studies program. This major provides students a core foundation in both the scientific and human dimensions of environmental problem solving. Students then choose from one of five concentrations developed in connection with other colleges. These concentrations include Environmental and Human Health; Environmental Ethics and Social Justice; Environmental Law, Governance, and Management; Communication and Visualization of Environmental Problems and Solutions; and The Green Economy: Business, Entrepreneurship, and Environmental Sustainability.

Our Bachelor of Science in Marine Biology degree is designed to provide a strong foundation in marine biology and related disciplines. This major is strongly influenced by the Three Seas Marine Biology program that is largely based at Northeastern's Marine Science Center in Nahant, but many courses satisfying this major are also offered on the main campus in Boston. Students in this major study all aspects of marine systems from marine spatial planning to oceanography. For those students seeking a broader foundation that is not solely focused on marine systems, we also offer a Bachelor of Science in Ecology and Evolutionary Biology. Students majoring in EEB develop a strong theoretical foundation in ecology and evolution while also building practical skills in data science, genomics, and other areas at the cutting edge of science. Our core curriculum for both marine biology and EEB satisfy the vast majority of requirements for prehealth fields, including veterinary sciences and medical fields.

We offer a number of combined majors in both the BA track and the BS track.

Fieldwork is a critical component of training in our programs, and many of our courses use field sites throughout New England to explore environmental processes or problems in their more complex and natural state. In addition to sponsoring local trips, our students also participate in longer field excursions to places like Iceland, Antarctica, the Florida Keys, Israel, Romania, and Greece, among others. Students also have the option to complete undergraduate research experiences with a faculty member. Undergraduate research projects can involve fieldwork and/or lab work guided by faculty mentors, and many projects evolve into senior and honors theses.

Our graduates work across a wide range of disciplines. Student training in the foundations of each major, coupled with extensive training in data science and scientific communication, allows our students to succeed in a range of positions from hydrology to public policy to oceanography. We have graduates working as environmental lawyers; lobbyists; consultants; planners; data analysts; educators; soil, air, and water quality technicians; veterinarians; foresters; geneticists; bioinformaticians; research divers; aquaculturists; and many more fascinating fields.

### **Three Seas Program**

Three Seas is an accelerated, research-focused, graduate-level program that allows advanced undergraduate and beginning graduate students in marine biology and related areas to spend a year of field study in three distinct marine environments. As a prime example of Northeastern's innovative teaching initiative, Three Seas emphasizes experiential learning by providing students with hands-on research experience to develop the critical skills needed to succeed in a career in science.

For more information, visit the Three Seas Program website (<https://cos.northeastern.edu/marine-environmental-sciences/three-seas/>).

## Marine Science Center Summer Internship Program

This program provides a monthly stipend during the summer to students while they participate in intensive research with faculty members based at the Marine Science Center. Although students conduct independent research at the MSC laboratory primarily in the summer, these experiences can also extend throughout the year.

## Academic Progression Standards

Same as college standards.

## Programs

### Core Majors

- Ecology and Evolutionary Biology (p. 1436) (BS)
- Environmental and Sustainability Sciences (p. 1440) (BS)
- Environmental Studies (p. 1447) (BA)
- Marine Biology (p. 1452) (BS)

### Combined Majors

- Computer Science and Environmental and Sustainability Sciences (p. 795) (BS)
- Data Science and Ecology and Evolutionary Biology (p. 894) (BS)
- Data Science and Environmental and Sustainability Sciences (p. 902) (BS)
- Environmental and Sustainability Sciences and Chemistry (p. 1427) (BS)
- Environmental and Sustainability Sciences and Economics (p. 1474) (BS)
- Environmental and Sustainability Sciences and Journalism (p. 1478) (BS)
- Environmental and Sustainability Sciences and Landscape Architecture (p. 155) (BS)
- Environmental Studies and History (p. 1484) (BA)
- Environmental Studies and International Affairs (p. 1487) (BA)
- Environmental Studies and Philosophy (p. 1494) (BA)
- Environmental Studies and Political Science (p. 1497) (BA)
- Sociology and Environmental Studies (p. 1502) (BA)

### Minors

- Ecology and Evolutionary Biology (p. 1505)
- Environmental and Sustainability Sciences (p. 1506)
- Environmental Studies (p. 1507)
- Geosciences (p. 1508)
- Marine Sciences (p. 1509)

## Ecology and Evolutionary Biology, BS

The Bachelor of Science in Ecology and Evolutionary Biology degree is designed to provide a strong foundation in the fundamentals of ecology and evolutionary biology, including focal points in population, community, and ecosystem ecology; evolutionary ecology and biology; conservation biology; population genetics; behavior; and ecological and evolutionary genomics. Our major provides unique experiential learning opportunities for students interested in the fundamentals of evolution; the ecology of terrestrial, marine, and freshwater systems; and the application of both of these in the pursuit of the conservation and restoration of natural systems. Further, students in our major have the opportunity to focus on cutting-edge techniques in the use of molecular tools to answer fundamental questions in ecology and evolution. The interdisciplinary nature of our major fosters critical thinking and creativity in scientific problem solving while instilling skills that will result in scientifically literate global citizens. The curriculum for this major also satisfies premed and prevet requirements. Courses offered by this major fulfill several core competencies required by Northeastern University: Engaging with the Natural and Designed World, Exploring Created Expression and Innovation, Conducting Formal and Quantitative Reasoning, Analyzing and Using Data, Employing Ethical Reasoning, writing-intensive courses, and capstone.

Fieldwork is a valued component of training in our programs, and several of our courses use field sites, resources, and facilities of the Marine Science Center and throughout the greater Boston area. Students interested in having a foundational education in ecology and evolutionary biology, and also participating in the Northeastern Three Seas Program, will be able to meet the requirements for both programs. All students will also have the option to complete undergraduate research experiences with faculty members in the Department of Marine and Environmental Sciences and can take advantage of our faculty networks of scientists and practitioners for additional co-op and research opportunities.

Students graduating with an EEB major will be prepared for success in pursuing graduate degrees; for working in multiple areas of science and technology, including data science and biotech sectors; and for positions with consulting companies, nonprofits, and government agencies.

**Ecology and evolutionary biology majors and associated combined majors cannot be combined with majors in biology, marine biology, or environmental and sustainability sciences, nor can those students minor in biology, marine science, or environmental and sustainability sciences.**

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

Due to overlap in course content, double majoring in ecology and evolutionary biology and marine biology is not permitted.

## Environmental and Sustainability Sciences, BS

Our Bachelor of Science in Environmental and Sustainability Sciences is designed to provide students comprehensive and transdisciplinary skills needed to tackle the pressing environmental problems we face. Our core curriculum is grounded in a solid foundation in Earth systems, ecology, sustainable development, and required skills courses in data management and geographic information systems. Students then diverge into one of four concentrations. For students interested in the interface of social and ecological systems and who want to view environmental problem solving through a social science lens, we have a concentration in environment and society. For students interested in the nexus of food, water, and energy, our concentration in sustainable development and planning might be most appropriate. Is the conservation of organisms and their ecosystems the area you are most interested in? Our concentration in conservation, restoration, and management may be the best choice. Lastly, for students interested in understanding environmental problem solving from an Earth systems perspective, courses in our Earth, oceans, and environmental change concentration will satisfy your curiosity. In the final semester, our students build teams that bring the skills developed across the varied concentrations back together to learn from each other and to work with our partners to solve specific environmental challenges presented by our stakeholders. Combined, this degree seeks to prepare students to work across a wide array of disciplines to help solve the environmental challenges of the future.

There are a number of interdisciplinary opportunities involving Environmental and Sustainability Sciences. Due to curricular overlap, combinations of any Environmental and Sustainability Sciences major, including combined majors, cannot occur with majors or minors in Ecology and Evolutionary Biology or Environmental Studies, or with the minor in Geoscience.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Environmental and Sustainability Sciences Major Requirements

ENVR 4000	Science Communication and Professional Development	4
ENVR 4050 or ENVR 4971 or ENVR 4997	Solving Emerging Environmental Challenges through Capstone Junior/Senior Honors Project 2 Senior Thesis	4
<b>Mathematics Requirements</b>		
ENVR 2500 and ENVR 2501 or ECON 2350 or POLS 2400 or SOCL 2321	Biostatistics and Lab for ENVR 2500 Statistics for Economists Quantitative Techniques Research Methods in Sociology	4
MATH 1241	Calculus 1	4

or MATH 1251	Calculus and Differential Equations for Biology 1
or MATH 1341	Calculus 1 for Science and Engineering

## Environmental and Sustainability Sciences Concentrations

Complete one of the following concentrations:

- Concentration in Conservation, Restoration, and Management (p. 1441)
- Concentration in Earth, Oceans, and Environmental Change (p. 1441)
- Concentration in Environment and Society (p. 1443)
- Concentration in Sustainable Planning and Development (p. 1443)

## Environmental and Sustainability Sciences Major Credit Requirement

Complete 81 semester hours in the major.

## Program Requirement

136 total semester hours required

## Concentrations

### CONCENTRATION IN CONSERVATION, RESTORATION, AND MANAGEMENT

Code	Title	Hours
<b>Required Conservation, Restoration, and Management Courses</b>		
EEMB 2400	Introduction to Evolution	4
EEMB 3455	Ecosystems Ecology	4
or CIVE 3430	Engineering Microbiology and Ecology	
EEMB 3460	Conservation Biology	4
EEMB 4001	Landscape and Restoration Ecology	4
ENVR 5220	Ecosystem-Based Management	4
<b>Conservation, Restoration, and Management Electives</b>		
Complete five of the following:		20-25
EEMB 3465	Ecological and Conservation Genomics	
EEMB 3466	Disease Ecology	
EEMB 3475	Wildlife Ecology	
EEMB 3700	Desert Ecology	
EEMB 4000 and ENVR 3151	Applied Conservation Biology and Food Sustainability in the Mediterranean - Abroad (course is pending)	
ENVR 3150	Food Security and Sustainability	
ENVR 3200	Water Resources	
ENVR 3701	Energy in the Desert Ecosystem	
ENVR 3800 and ENVR 3801	Plants and Society and Lab for ENVR 3800	
ENVR 4500 and ENVR 4501	Applied Hydrogeology and Lab for ENVR 4500	
ENVR 4505	Wetlands	
ENVR 5190	Soil Science	
ENVR 5350	Sustainable Energy and Climate Solutions	
ENVR 5450	Applied Social-Ecological Systems Modeling	
ENVR 5563	Advanced Spatial Analysis	
ENVR 5700	Streams and Watershed Ecology	
ENVR 5750	Urban Ecology	

### CONCENTRATION IN EARTH, OCEANS, AND ENVIRONMENTAL CHANGE

Code	Title	Hours
<b>Earth Systems</b>		
Complete one of the following:		4-5
ENVR 1200 and ENVR 1201	Dynamic Earth and Lab for ENVR 1200	

ENVR 2200	Earth's Changing Cycles	
<b>Earth Materials and Landforms</b>		
Complete one of the following:		5
ENVR 2310 and ENVR 2311	Earth Materials and Lab for ENVR 2310	
ENVR 2340 and ENVR 2341	Earth Landforms and Processes and Lab for ENVR 2340	
<b>Freshwater</b>		
Complete one of the following:		4-5
ENVR 3200	Water Resources	
ENVR 4500 and ENVR 4501	Applied Hydrogeology and Lab for ENVR 4500	
ENVR 4505	Wetlands	
ENVR 5700	Streams and Watershed Ecology	
<b>Oceans</b>		
Complete one of the following:		4
ENVR 3125	Global Oceanic Change	
ENVR 3600	Oceanography	
<b>Environmental Change</b>		
Complete one of the following:		4
ENVR 3125	Global Oceanic Change	
ENVR 5150	Climate and Atmospheric Change	
<b>Chemistry</b>		
Complete one of the following:		5
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	
CHEM 1161 and CHEM 1162 and CHEM 1163	General Chemistry for Science Majors and Lab for CHEM 1161 and Recitation for CHEM 1161	
CHEM 1211 and CHEM 1212 and CHEM 1213	General Chemistry 1 and Lab for CHEM 1211 and Recitation for CHEM 1211	
<b>Physics</b>		
Complete one of the following:		5
PHYS 1145 and PHYS 1146	Physics for Life Sciences 1 and Lab for PHYS 1145	
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	
PHYS 1161 and PHYS 1162 and PHYS 1163	Physics 1 and Lab for PHYS 1161 and Recitation for PHYS 1161	
<b>Earth, Oceans, and Environmental Change Electives</b>		
Complete three of the following:		12-15
CIVE 5280	Remote Sensing of the Environment	
ENVR 2310 and ENVR 2311	Earth Materials and Lab for ENVR 2310	
ENVR 2340 and ENVR 2341	Earth Landforms and Processes and Lab for ENVR 2340	
ENVR 3125	Global Oceanic Change	
ENVR 3200	Water Resources	
ENVR 3418	Geophysics	
ENVR 3435	Environmental Pollution: Fate and Transport	
ENVR 3600	Oceanography	
ENVR 4500 and ENVR 4501	Applied Hydrogeology and Lab for ENVR 4500	

ENVR 4504	Environmental Pollution
ENVR 4505	Wetlands
ENVR 5190	Soil Science
ENVR 5201 and ENVR 5202	Geologic Field Seminar and Environmental Science Field Seminar Abroad
ENVR 5240 and ENVR 5241	Sedimentary Basin Analysis and Lab for ENVR 5240
ENVR 5242 and ENVR 5243	Ancient Marine Life and Lab for ENVR 5242
ENVR 5670	Global Biogeochemistry
ENVR 5700	Streams and Watershed Ecology

### CONCENTRATION IN ENVIRONMENT AND SOCIETY

Code	Title	Hours
<b>Required Environment and Society Courses</b>		
ENVR 3540	Environmental Psychology	4
ENVR 3850 and ENVR 3851 or ENVR 3800 and ENVR 3801	Sustainable Agriculture and Lab for ENVR 3850 Plants and Society and Lab for ENVR 3800	5
PPUA 5260	Ecological Economics	4
SOCL 1246	Environment and Society	4
SOCL 2485 or POLS 2395	Environment, Technology, and Society Environmental Politics and Policy	4
<b>Environment and Society Electives</b>		
Complete five of the following:		20-24
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
EEMB 3460	Conservation Biology	
EEMB 4000 and ENVR 3151	Applied Conservation Biology and Food Sustainability in the Mediterranean - Abroad	
ENVR 3150	Food Security and Sustainability	
ENVR 3201	Coastal Sustainability: Ecology and Coupled Human-Natural Systems in Southeast Asia	
ENVR 3202	Coastal Sustainability: The Blue Economy of the Gulf of Maine	
ENVR 3800 and ENVR 3801	Plants and Society and Lab for ENVR 3800	
ENVR 5210	Environmental Planning	
ENVR 5350	Sustainable Energy and Climate Solutions	
ENVR 5600	Coastal Processes, Adaptation, and Resilience	
ENVR 5750	Urban Ecology	
INTL 2464	Natural Resources and Sustainable Development	
INTL 5100	Climate and Development	
PPUA 5264	Energy Democracy and Climate Resilience: Technology, Policy, and Social Change	
PPUA 5268	International Environmental Policy	

### CONCENTRATION IN SUSTAINABLE PLANNING AND DEVELOPMENT

Code	Title	Hours
<b>Required Sustainable Planning and Development Courses</b>		
ENVR 3150	Food Security and Sustainability	4
ENVR 3200	Water Resources	4
ENVR 5210	Environmental Planning	4
ENVR 5350 or ENVR 5800	Sustainable Energy and Climate Solutions Climate Adaptation and Nature-Based Solutions	4
PPUA 5268	International Environmental Policy	4
<b>Sustainable Planning and Development Electives</b>		
Complete five of the following:		20-28

CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure
EEMB 3460	Conservation Biology
EEMB 4000 and ENVR 3151	Applied Conservation Biology and Food Sustainability in the Mediterranean - Abroad (course is pending)
EEMB 4001	Landscape and Restoration Ecology
ENVR 3201	Coastal Sustainability: Ecology and Coupled Human-Natural Systems in Southeast Asia
ENVR 3701	Energy in the Desert Ecosystem
ENVR 3800 and ENVR 3801	Plants and Society and Lab for ENVR 3800
ENVR 4500 and ENVR 4501	Applied Hydrogeology and Lab for ENVR 4500
ENVR 4505	Wetlands
ENVR 5190	Soil Science
ENVR 5220	Ecosystem-Based Management
ENVR 5350	Sustainable Energy and Climate Solutions
ENVR 5450	Applied Social-Ecological Systems Modeling
ENVR 5563	Advanced Spatial Analysis
ENVR 5800	Climate Adaptation and Nature-Based Solutions
INTL 2464	Natural Resources and Sustainable Development
PPUA 5260	Ecological Economics

## Plan of Study

### Four Years, One Co-op in Spring/Summer 1

#### Year 1

Fall	Hours	Spring	Hours	Summer 1	Hours	Summer 2	Hours
ENGW 1111		4 EEMB 2302 and EEMB 2303		5 Vacation		Elective	4

## Environmental Studies, BA

The Bachelor of Arts in Environmental Studies degree is designed to provide students with a critical foundation in both the scientific and human foundation of environmental systems. It also prioritizes mastery of skills that will position students for future success as environmental professionals. In their first two years, all environmental studies majors complete introductory courses in critical scientific disciplines—including focusing on food, water, and climate resources—and in essential human dimensions—including sustainable development, environmental health, and environmental justice. Lastly, all students take required skill-building courses that are designed to promote success with desired co-op and career opportunities. Students then opt for one of five concentrations that build their training in courses from across the university. These concentrations are specifically designed to cover the breadth of areas where people and the environment intersect, including courses that draw on Northeastern's expertise in public health, environmental justice, environmental law, visualization and storytelling of environmental issues, and the green economy. Students interested in viewing environmental problems specifically through quantitative social and natural science lenses should consider the BS Environmental and Sustainability Sciences (p. 1440) program.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### BA Language Requirements

All BA students are required to complete the BA degree language requirements, for a total of 12 semester hours of language study or demonstrated equivalent proficiency, as described in Additional Requirements for BA students (p. 119). Successful demonstration of proficiency does not reduce total minimum semester hours of study required to earn the BA degree.

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Environmental Studies Major Requirements

Code	Title	Hours
<b>College</b>		
ENVR 1000 or INSC 1000	Marine and Environmental Sciences at Northeastern Science at Northeastern	1
<b>Core Courses</b>		
<i>Introductory Courses</i>		
ENVR 1101	Environmental Science	4
Complete one of the following:		4
ANTH 1101	Peoples and Cultures	
ENVR 2401	Food Justice and Community Development	
PHIL 1180	Environmental Ethics	
SOCL 1246	Environment and Society	
<i>Scientific Foundations of Environmental Systems</i>		
ENVR 1110	Global Climate Change	4
ENVR 3150	Food Security and Sustainability	4
ENVR 3200	Water Resources	4
<i>Human Dimensions of Environmental Systems</i>		
ENVR 2515	Sustainable Development	4
ENVR 3540 or PHTH 2414	Environmental Psychology Environmental Health	4
SOCL 4522	Environmental Justice	4
<b>Skills</b>		
ENVR 3300 and ENVR 3301	Geographic Information Systems and Lab for ENVR 3300	5
ENVR 4000	Science Communication and Professional Development	4
<b>Research Methods</b>		
Complete one of the following:		4-5
ANTH 3410	Ethnographic Field Experience	

ECON 2350	Statistics for Economists
ENVR 2500 and ENVR 2501	Biostatistics and Lab for ENVR 2500
POLS 2400	Quantitative Techniques
SOCL 2321	Research Methods in Sociology

**Capstone**

Complete one of the following:	4
ENVR 4050	Solving Emerging Environmental Challenges through Capstone
ENVR 4970 or ENVR 4971	Junior/Senior Honors Project 1 Junior/Senior Honors Project 2
ENVR 4997	Senior Thesis

**Concentrations**

Complete one of the following concentrations:

- Environmental and Human Health (p. 1448)
- Environmental Ethics and Social Justice (p. 1448)
- Environmental Law, Governance, and Management (p. 1449)
- Communication and Visualization: Environmental Problems and Solutions (p. 1449)
- The Green Economy: Business, Entrepreneurship, and Environmental Sustainability (p. 1450)

**Environmental Studies Major Credit Requirement**

Complete 80 semester hours in the major.

**Program Requirement**

128 total semester hours required

**CONCENTRATION IN ENVIRONMENTAL AND HUMAN HEALTH**

Code	Title	Hours
<b>Required Courses</b>		
EEMB 2302 and EEMB 2303	Ecology and Lab for EEMB 2302	5
EEMB 3466	Disease Ecology	4
PHTH 1270	Introduction to Global Health	4
PHTH 4202	Principles of Epidemiology in Medicine and Public Health	4
<b>Electives</b>		
Complete four of the following:		16
COMM 3500	Environmental Issues, Communication, and the Media	
EEMB 3460	Conservation Biology	
ENVR 4505	Wetlands	
ENVR 5450	Applied Social-Ecological Systems Modeling	
ENVR 5750	Urban Ecology	
INTL 5100	Climate and Development	
PHTH 4120 or PHTH 5120	Global Perspectives on Discrimination and Health Race, Ethnicity, and Health in the United States	
PHTH 5214	Environmental Health	
POLS 2395	Environmental Politics and Policy	
SOCL 2485	Environment, Technology, and Society	

**CONCENTRATION IN ENVIRONMENTAL ETHICS AND SOCIAL JUSTICE**

Code	Title	Hours
<b>Required Courses</b>		
COMM 3500	Environmental Issues, Communication, and the Media	4
PHIL 1180	Environmental Ethics	4
POLS 2395	Environmental Politics and Policy	4
SOCL 2485	Environment, Technology, and Society	4

**Electives**

Complete four of the following:		16
BUSN 3110	The Consulting Environment	
COMM 3532	Theories of Conflict and Negotiation	
EEMB 4000	Applied Conservation Biology	
ENVR 3151	Food Sustainability in the Mediterranean - Abroad	
ENVR 4504	Environmental Pollution	
ENVR 5350	Sustainable Energy and Climate Solutions	
ENVR 5450	Applied Social-Ecological Systems Modeling	
ENVR 5800	Climate Adaptation and Nature-Based Solutions	
HUSV 3570	The Nonprofit Sector, Philanthropy, and Social Change	
INTL 5100	Climate and Development	
PHIL 2001	Ethics and Evolutionary Games	
PPUA 5268	International Environmental Policy	
PPUA 5270	Food Systems and Public Policy	
PPUA 5390	Special Topics in Public Policy and Urban Affairs	

**CONCENTRATION IN ENVIRONMENTAL LAW, GOVERNANCE, AND MANAGEMENT**

Code	Title	Hours
<b>Required Courses</b>		
LPSC 1101	Introduction to Law	4
LPSC 2301	Introduction to Law, Policy, and Society	4
Complete one of the following:		4
POLS 2395	Environmental Politics and Policy	
PPUA 5268	International Environmental Policy	
Complete one of the following:		4
ENVR 5210	Environmental Planning	
ENVR 5220	Ecosystem-Based Management	

**Electives**

Complete four of the following:		16
EEMB 3460	Conservation Biology	
EEMB 3475	Wildlife Ecology	
EEMB 4000	Applied Conservation Biology	
ENVR 3151	Food Sustainability in the Mediterranean - Abroad	
ENVR 4505	Wetlands	
ENVR 5210	Environmental Planning	
ENVR 5220	Ecosystem-Based Management	
ENVR 5450	Applied Social-Ecological Systems Modeling	
ENVR 5700	Streams and Watershed Ecology	
LPSC 3303	Topics in Law and Public Policy	
POLS 2395	Environmental Politics and Policy	
POLS 3307	Public Policy and Administration	
PPUA 5268	International Environmental Policy	

**CONCENTRATION IN COMMUNICATION AND VISUALIZATION: ENVIRONMENTAL PROBLEMS AND SOLUTIONS**

Code	Title	Hours
<b>Required Courses</b>		
ARTG 5110	Information Design History	4
COMM 3500	Environmental Issues, Communication, and the Media	4
Complete one of the following:		4
JRNL 3650	Science Writing	
JRNL 3700	Data Storytelling	
Complete one of the following:		4
ARTG 6330	Information Design Mapping Strategies	
CIVE 5280	Remote Sensing of the Environment	

ENVR 5563	Advanced Spatial Analysis
-----------	---------------------------

**Electives**

Complete four of the following: 16

ARTG 3451	Information Design 1
ARTG 5130	Visual Communication for Information Design
CIVE 5280	Remote Sensing of the Environment
COMM 2555	Games for Change
COMM 3532	Theories of Conflict and Negotiation
ENVR 3201	Coastal Sustainability: Ecology and Coupled Human-Natural Systems in Southeast Asia
ENVR 3202	Coastal Sustainability: The Blue Economy of the Gulf of Maine
ENVR 5450	Applied Social-Ecological Systems Modeling
ENVR 5563	Advanced Spatial Analysis
ENVR 5750	Urban Ecology
GAME 2755	Games and Social Justice
JRNL 3650	Science Writing
JRNL 3700	Data Storytelling

**CONCENTRATION IN THE GREEN ECONOMY: BUSINESS, ENTREPRENEURSHIP, AND ENVIRONMENTAL SUSTAINABILITY**

Code	Title	Hours
------	-------	-------

**Required Courses**

BUSN 1101	Introduction to Business	4
FINA 2720	Sustainability in the Business Environment	4

Complete one of the following: 4

ENVR 5210	Environmental Planning
ENVR 5220	Ecosystem-Based Management

Complete one of the following: 4

BUSN 3110	The Consulting Environment
INNO 2206	Global Social Enterprise
INNO 3520	Impact Investing and Social Finance

**Electives**

Complete four of the following: 16

BUSN 3110	The Consulting Environment
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure
ECON 3423	Environmental Economics
ENVR 3201	Coastal Sustainability: Ecology and Coupled Human-Natural Systems in Southeast Asia
ENVR 3202	Coastal Sustainability: The Blue Economy of the Gulf of Maine
ENVR 3701	Energy in the Desert Ecosystem
ENVR 5210	Environmental Planning
ENVR 5220	Ecosystem-Based Management
ENVR 5350	Sustainable Energy and Climate Solutions
ENVR 5800	Climate Adaptation and Nature-Based Solutions
HUSV 3570	The Nonprofit Sector, Philanthropy, and Social Change
ME 5645	Environmental Issues in Manufacturing and Product Use
MGMT 3530	Project Management
MKTG 2301	Marketing and Society

## Marine Biology, BS

Our Bachelor of Science in Marine Biology aims to provide students with a solid foundation in marine biology, with flexibility to explore ocean and coastal processes, marine biogeochemistry, the ecology and evolution of marine organisms, and the ocean's role and responses in global change. Core, skills-based courses are designed to prepare students for in-depth examination of the contemporary issues facing marine organisms and ecosystems, while helping to develop resumés that are strengthened by experiential learning. This major also provides options for students following a prevet or premed track.

Faculty teaching the courses are experts who are dedicated to marine research and experiential learning, providing students the opportunities to learn new, valuable skills and to expand their professional science network. Students may actively participate in field and lab work, internships at Northeastern University's Marine Science Center in Nahant, MA, study abroad through Dialogue of Civilizations programs or the long-standing Three Seas Program (see below). Additional opportunities exist for students in this strong, interdisciplinary program that prepares students for direct entry into the job market or a competitive graduate program.

**Students majoring in Marine Biology cannot be combined with majors in Biology, Ecology and Evolutionary Biology, or Environmental and Sustainability Sciences, nor can they minor in Biology, Ecology and Evolutionary Biology, or Environmental and Sustainability Sciences.**

### Three Seas Program

The Three Seas Program delivers a unique combination of inquiry-based, global study, fieldwork, and research across three distinct locations: the Gulf of Maine, tropical coastal Panama, and the Pacific Northwest. This optional, two-semester program is designed to teach students to plan and execute marine field research to enhance their future opportunities, whether in top doctoral programs or careers with government agencies or private consulting firms. Students finish the program as active scientists who are certified in scientific diving, have an expanded skill set, and have a robust professional network.

For more information, please see the Three Seas Program website (<https://cos.northeastern.edu/marine-environmental-sciences/three-seas/>).

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Marine Biology Major Requirements

EEMB 1105 and EEMB 1106	Foundations in Ecological and Evolutionary Genomics and Lab for EEMB 1105	5
<b>Genetics</b>		
BIOL 2301 and BIOL 2302	Genetics and Molecular Biology and Lab for BIOL 2301	5
<b>Ecology</b>		
EEMB 2302 and EEMB 2303	Ecology and Lab for EEMB 2302	5
<b>Evolution</b>		
EEMB 2400	Introduction to Evolution	4
<b>Marine Biology</b>		
EEMB 2700 and EEMB 2701	Marine Biology and Lab for EEMB 2700	5
<b>Conservation</b>		
EEMB 3460	Conservation Biology	4
<b>Scientific Communication</b>		

ENVR 4000	Science Communication and Professional Development	4
<b>Capstone</b>		
Complete one of the following:		1-4
BIOL 4701	Biology Capstone	
ENVR 4900	Earth and Environmental Science Capstone	
ENVR 4997	Senior Thesis	

### Marine Biology Options

Complete one of the following options:

- Requirements for Students (p. 1454)Not Participating in Three Seas (p. 1454)
- Requirements for Students (p. 1454)Participating in Three Seas (p. 1454)

### Supporting Courses for Marine Biology

Code	Title	Hours
<b>Mathematics</b>		
MATH 1251	Calculus and Differential Equations for Biology 1	4
or MATH 1241	Calculus 1	
or MATH 1341	Calculus 1 for Science and Engineering	
<b>Introduction to Data</b>		
ENVR 1500 and ENVR 1501	Introduction to Environmental, Social, and Biological Data and Lab for ENVR 1500	5
<b>Biostatistics</b>		
ENVR 2500 and ENVR 2501	Biostatistics and Lab for ENVR 2500	5
<b>Chemistry</b>		
CHEM 1161 and CHEM 1162 and CHEM 1163	General Chemistry for Science Majors and Lab for CHEM 1161 and Recitation for CHEM 1161	5
CHEM 2311 and CHEM 2312 or ENVR 3410 or ENVR 4504	Organic Chemistry 1 and Lab for CHEM 2311 Environmental Geochemistry Environmental Pollution	4
<b>Physics</b>		
Complete a lecture/lab set for Physics 1:		5
<i>Physics 1</i>		
PHYS 1145 and PHYS 1146	Physics for Life Sciences 1 and Lab for PHYS 1145 (recommended)	
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	
PHYS 1161 and PHYS 1162 and PHYS 1163	Physics 1 and Lab for PHYS 1161 and Recitation for PHYS 1161	
PHYS 1171 and PHYS 1172 and PHYS 1173	Physics 1 for Bioscience and Bioengineering and Lab for PHYS 1171 and Interactive Learning Seminar for PHYS 1171	

### Marine Biology Major Credit/GPA Requirements

Complete 89 semester hours in the major with a cumulative GPA of 2.000.

### Program Requirement

137 total semester hours required

**REQUIREMENTS FOR STUDENTS NOT PARTICIPATING IN THREE SEAS**

<b>Code</b>	<b>Title</b>	<b>Hours</b>
ENVR 3125 or ENVR 3600	Global Oceanic Change Oceanography	4
Complete five of the following:		20-24
BIOL 5587	Comparative Neurobiology	
EEMB 2290	Ecology and Evolution of Behavior	
EEMB 3001	Genetics and Evolution in Action	
EEMB 3450	Physiological Adaptations to the Environment	
EEMB 3455	Ecosystems Ecology	
EEMB 3465	Ecological and Conservation Genomics	
EEMB 3466	Disease Ecology	
EEMB 3600	Animal Behavior	
EEMB 5130	Population Dynamics	
ENVR 3125	Global Oceanic Change (If not used to fulfill another requirement of this program)	
ENVR 3201	Coastal Sustainability: Ecology and Coupled Human-Natural Systems in Southeast Asia	
ENVR 3202	Coastal Sustainability: The Blue Economy of the Gulf of Maine	
ENVR 3300 and ENVR 3301	Geographic Information Systems and Lab for ENVR 3300	
ENVR 4504	Environmental Pollution	
ENVR 4505	Wetlands	
ENVR 5220	Ecosystem-Based Management	
EEMB 5542	Marine Spatial Planning	
Elective courses available at Nahant campus:		
EEMB 5510	New England Marine Biomes	
EEMB 5522	Experimental Design Marine Ecology	
EEMB 5525	Advanced Field Methods in Marine Ecology	
EEMB 5546	Sustainability of the Land-Sea Interface	

**THREE SEAS STUDENTS**

<b>Code</b>	<b>Title</b>	<b>Hours</b>
Three Seas courses at Nahant/Northeastern campus:		
EEMB 5510	New England Marine Biomes	4
EEMB 5522 or EEMB 5525	Experimental Design Marine Ecology Advanced Field Methods in Marine Ecology	3-4
EEMB 5542	Marine Spatial Planning	4
EEMB 5546	Sustainability of the Land-Sea Interface	3
EEMB 5589	Diving Research Methods	2
Three Seas courses (abroad):		
EEMB 5504 and EEMB 5505	Biology of Corals and Lab for EEMB 5504	3
EEMB 5506 and EEMB 5507	Biology and Ecology of Fishes and Lab for EEMB 5506	3
EEMB 5508	Marine Birds and Mammals	3
EEMB 5518 and EEMB 5519	Ocean and Coastal Processes and Lab for EEMB 5518	3
EEMB 5520	Tropical Marine Ecology	2
EEMB 5538	Conservation and Restoration of Marine Systems	3
Select one of the following:		3
EEMB 5533 and EEMB 5535	Marine Invertebrate Zoology and Botany and Lab for EEMB 5533	
EEMB 5540 and EEMB 5541	Changing Global Oceans and Lab for EEMB 5540

## Computer Science and Environmental and Sustainability Sciences, BS

The computer science and the environmental and sustainability sciences combined major focuses on the major environmental challenges facing our planet and provides broad training to understand how these challenges can be met through advances in computer science and artificial intelligence. Understanding these processes requires both the acquisition and computational analysis of large amounts of data—underscoring the synergistic relationship between computer science and environmental and sustainability sciences.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
CS 1200	First Year Seminar	1
CS 1210	Professional Development for Khoury Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000 and CS 3001	Algorithms and Data and Recitation for CS 3000	4
CS 3200	Database Design	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 3800	Theory of Computation	4
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4
<b>Khoury Elective Courses</b>		
With advisor approval, a directed study, research, project study, or appropriate graduate-level course may also be taken as a computer science elective.		
Complete 4 credits of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		4
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		
DS 2500 or higher, except DS 4900		
IS 2000 or higher, except IS 4900		

### Environmental and Sustainability Sciences Courses

Code	Title	Hours
<b>Environmental and Sustainability Sciences Required Courses</b>		
EEMB 2302 and EEMB 2303	Ecology and Lab for EEMB 2302	5
ENVR 1200 and ENVR 1201 or ENVR 2200	Dynamic Earth and Lab for ENVR 1200 Earth's Changing Cycles	4-5
ENVR 1400 and ENVR 1401	Foundations in Environmental and Sustainability Sciences and Lab for ENVR 1400	5

ENVR 2515	Sustainable Development	4
<b>Skills</b>		
Complete one of the following:		4-5
ENVR 3300 and ENVR 3301	Geographic Information Systems and Lab for ENVR 3300	
ENVR 5260	Geographical Information Systems	
<b>Earth Oceans and Environmental Change</b>		
Complete one of the following:		4-5
ENVR 2310 and ENVR 2311	Earth Materials and Lab for ENVR 2310	
ENVR 3125	Global Oceanic Change	
ENVR 3600	Oceanography	
ENVR 4500 and ENVR 4501	Applied Hydrogeology and Lab for ENVR 4500	
ENVR 5150	Climate and Atmospheric Change	
ENVR 5600	Coastal Processes, Adaptation, and Resilience	
ENVR 5670	Global Biogeochemistry	
<b>Conservation, Restoration, and Management</b>		
Complete one of the following:		4
EEMB 2400	Introduction to Evolution	
EEMB 3460	Conservation Biology	
EEMB 3465	Ecological and Conservation Genomics	
EEMB 4001	Landscape and Restoration Ecology	
ENVR 4505	Wetlands	
ENVR 5700	Streams and Watershed Ecology	
ENVR 5750	Urban Ecology	
<b>Sustainable Planning and Development</b>		
Complete one of the following:		4
ENVR 3150	Food Security and Sustainability	
ENVR 3200	Water Resources	
ENVR 5210	Environmental Planning	
ENVR 5350	Sustainable Energy and Climate Solutions	
ENVR 5600	Coastal Processes, Adaptation, and Resilience	
ENVR 5750	Urban Ecology	
ENVR 5800	Climate Adaptation and Nature-Based Solutions	
<b>Environment and Society</b>		
Complete one of the following:		4
ENVR 5750	Urban Ecology	
ENVR 5800	Climate Adaptation and Nature-Based Solutions	
POLS 2395	Environmental Politics and Policy	
PPUA 5260	Ecological Economics	
PPUA 5268	International Environmental Policy	
SOCL 2485	Environment, Technology, and Society	

## Supporting Courses

Code	Title	Hours
<b>Calculus</b>		
MATH 1251 or MATH 1341	Calculus and Differential Equations for Biology 1 Calculus 1 for Science and Engineering	4
MATH 1252 or MATH 1342	Calculus and Differential Equations for Biology 2 Calculus 2 for Science and Engineering	4
MATH 3081	Probability and Statistics	4
<b>Chemistry</b>		

CHEM 1211 and CHEM 1212 and CHEM 1213	General Chemistry 1 and Lab for CHEM 1211 and Recitation for CHEM 1211	5
CHEM 1214 and CHEM 1215 and CHEM 1216	General Chemistry 2 and Lab for CHEM 1214 and Recitation for CHEM 1214	5

**Computing and Social Issues**

Complete one of the following:		4
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
ENGL 2150	Literature and Digital Diversity	
HIST 2220	History of Technology	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
IS 1300 or PHIL 1300	Knowledge in a Digital World Knowledge in a Digital World	
PHIL 1145	Technology and Human Values	
SOCL 1280	The Twenty-First-Century Workplace	
SOCL 4528	Computers and Society	

**Computer Science English Requirement**

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111 or ENGW 1102	First-Year Writing First-Year Writing for Multilingual Writers	4

**Advanced Writing in the Disciplines**

Complete one of the following:		4
ENGW 3302	Advanced Writing in the Technical Professions	
ENGW 3307	Advanced Writing in the Sciences	
ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

**Integrative Requirement**

Code	Title	Hours
Complete one of the following:		4
ENVR 4050	Solving Emerging Environmental Challenges through Capstone	
ENVR 4971	Junior/Senior Honors Project 2	
ENVR 4997	Senior Thesis	
CS 4991	Research	

**Required General Electives**

Code	Title	Hours
Complete 20 credits of general electives.		20

**Khoury College GPA Requirement**

Minimum 2.000 GPA required in all CS, DS, CY, and IS courses

**NUpath Requirements Satisfied**

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

### Program Requirement

## Data Science and Ecology and Evolutionary Biology, BS

The combined major in data science and ecology and evolutionary biology provides a strong foundation in the fundamentals of ecology and evolutionary biology, including focal points in population, community, and ecosystem ecology; evolutionary ecology and biology; conservation biology; population genetics; behavior; and ecological and evolutionary genomics. Data science allows students to study the collection, manipulation, storage, retrieval, and computational analysis of data in its various forms, including numeric, textual, image, and video data from small to large volumes. The interdisciplinary nature of the major fosters critical thinking and creativity in scientific problem solving.

Students majoring in ecology and evolutionary biology and associated combined majors cannot combine majors in biology, marine biology, or environmental and sustainability sciences, nor can they minor in biology, marine science, or environmental and sustainability sciences.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Data Science Coursework

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or ENVR 1000 or INSC 1000	First Year Seminar Marine and Environmental Sciences at Northeastern Science at Northeastern	1
CS 1210 or EESC 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Programming Sequence Pathways</b>		
Complete one of the two options.		12
<i>Computer Science Option</i>		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	
<i>Data Science Option</i>		
DS 2000 and DS 2001	Programming with Data and Data Science Programming Practicum	
DS 2500 and DS 2501	Intermediate Programming with Data and Lab for DS 2500	
DS 3500	Advanced Programming with Data	
<b>Computer Science Required Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 3200	Database Design	4
<b>Data Science Foundations</b>		
DS 3000	Foundations of Data Science	4
DS 4200	Information Presentation and Visualization	4
DS 4300	Large-Scale Information Storage and Retrieval	4
DS 4400	Machine Learning and Data Mining 1	4
<b>Khoury Elective Courses</b>		
With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		

Complete 4 semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:

4

CS 2500 or higher, except CS 5010

CY 2000 or higher, except CY 4930

DS 2500 or higher, except DS 4900

IS 2000 or higher, except IS 4900

## Ecology and Evolutionary Biology Coursework

Code	Title	Hours
<b>Ecology and Evolutionary Biology</b>		
EEMB 1101 and EEMB 1102	Foundations in Ecology and Evolutionary Biology and Lab for EEMB 1101	5

## Data Science and Environmental and Sustainability Sciences, BS

The data science and environmental and sustainability sciences combined major focuses on major environmental challenges facing our planet and provides broad training to understand how these challenges can be met through advances in data science. Understanding these processes requires acquisition and analysis of large amounts of data—an ideal fit with data science, where students study the collection, manipulation, storage, retrieval, and computational analysis of data in its various forms, including numeric, textual, image, and video data from small to large volumes.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Data Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
CS 1200 or ENVR 1000 or INSC 1000	First Year Seminar Marine and Environmental Sciences at Northeastern Science at Northeastern	1
CS 1210 or EESC 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Programming Sequence Pathways</b>		
Choose one of the two options:		12
<i>Computer Science Option</i>		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	
CS 3500	Object-Oriented Design	
<i>Data Science Option</i>		
DS 2000 and DS 2001	Programming with Data and Data Science Programming Practicum	
DS 2500 and DS 2501	Intermediate Programming with Data and Lab for DS 2500	
DS 3500	Advanced Programming with Data	
<b>Computer Science Required Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 3200	Database Design	4
<b>Data Science Foundations</b>		
DS 3000	Foundations of Data Science	4
DS 4200	Information Presentation and Visualization	4
DS 4300	Large-Scale Information Storage and Retrieval	4
DS 4400	Machine Learning and Data Mining 1	4
DS 4420	Machine Learning and Data Mining 2	4
<b>Khoury Elective Courses</b>		
With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete 4 credits of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		4
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		

DS 2500 or higher, except DS 4900

IS 2000 or higher, except IS 4900

**Environmental Science and Sustainability Courses**

Code	Title	Hours
<b>Environmental and Sustainability Sciences Major Requirements</b>

## Environmental and Sustainability Sciences and Chemistry, BS

The Departments of Marine and Environmental Sciences and Chemistry provide education in basic environmental and sustainability sciences and chemistry-related disciplines. The overall objective of this combined major is to provide the fundamental scientific background and practical training for students as they prepare for environmental and chemically related careers or advanced study in fields including the traditional specialties such as toxicology, pollution, bioremediation, environmental protection, education, law, and other endeavors that may draw upon an understanding of the chemical basis of the environment and the changes that will likely result from global environmental change.

Key general objectives are the development of qualitative and quantitative problem-solving skills and effective communication skills. This combined major includes the development of conceptual understanding and problem-solving abilities in the fundamental dynamics between the environment and its chemistry, be it analytical chemistry, biochemistry, inorganic chemistry, organic chemistry, and physical chemistry. Students will have the opportunity to perform quantitative measurements; learn proper laboratory practices, including safety; develop proficiency with modern instruments and computers for data acquisition and analysis; and learn the relevance of chemistry within the context of the abiotic and biotic environments.

Students also have the opportunity to participate in the cooperative education program and thereby gain invaluable professional experience to augment their classroom and laboratory work. Not only does that experience add immensely to the overall education received, it also has the potential to provide contacts and references for later employment or graduate school admissions. Students in this major may also undertake research projects for at least one semester under the supervision of a faculty member. Sufficient electives are available in the program either to take more advanced courses or research within the department or to add courses in an area of special interest.

There are a number of interdisciplinary opportunities involving ESS. Due to curricular overlap, combinations of any ESS major, including combined majors, cannot occur with majors or minors in ecology and evolutionary biology or environmental studies or with the minor in geoscience. ESS and chemistry combined majors are also restricted from a minor in environmental chemistry.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

## Environmental and Sustainability Sciences and Economics, BS

Through this combined major, students develop an awareness of the intrinsic connection between the environment and economics and understand how long-run economic growth is crucially dependent on policies that account for the sustainability and well-being of the environment and that are grounded on environmental science.

There are a number of interdisciplinary opportunities involving environmental and sustainability sciences. Due to curricular overlap, combinations of any environmental and sustainability sciences major, including combined majors, cannot occur with majors or minors in ecology and evolutionary biology or environmental studies or with the minor in geoscience.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Environmental and Sustainability Sciences Requirements

Code	Title	Hours
<b>Core Courses</b>		
ENVR 1400 and ENVR 1401	Foundations in Environmental and Sustainability Sciences and Lab for ENVR 1400	5
ENVR 1200 and ENVR 1201 or ENVR 2200	Dynamic Earth and Lab for ENVR 1200 Earth's Changing Cycles	4-5
EEMB 2302 and EEMB 2303	Ecology and Lab for EEMB 2302	5
ENVR 2515	Sustainable Development	4
Complete one of the following skills courses:		4-5
ENVR 3300 and ENVR 3301	Geographic Information Systems and Lab for ENVR 3300	
ENVR 5260	Geographical Information Systems	
Complete four courses from these lists:		16
<i>Earth Oceans and Environmental Change</i>		
ENVR 2310 and ENVR 2311	Earth Materials and Lab for ENVR 2310	
ENVR 3125	Global Oceanic Change	
ENVR 3600	Oceanography	
ENVR 4500 and ENVR 4501	Applied Hydrogeology and Lab for ENVR 4500	
ENVR 5600	Coastal Processes, Adaptation, and Resilience	
ENVR 5670	Global Biogeochemistry	
<i>Conservation, Restoration, and Management</i>		
EEMB 2400	Introduction to Evolution	
EEMB 3460	Conservation Biology	
EEMB 3465	Ecological and Conservation Genomics	
EEMB 4001	Landscape and Restoration Ecology	
ENVR 4505	Wetlands	
ENVR 5700	Streams and Watershed Ecology

## Environmental and Sustainability Sciences and Journalism, BS

### Overview

The climate crisis and other staggering environmental challenges render it essential that we train a new generation of journalists with a strong scientific foundation in environmental science. Clearheaded and scientifically grounded reporting on environmental issues will be essential for tackling these and other future challenges. This combined major is designed to provide training that merges the basic and applied science underlying environmental change with the best principles and journalistic practices to enable students to pursue careers across a wide range of science communication fields.

Due to curricular overlap, students enrolled in this program cannot declare a double major with or declare a minor in ecology and evolutionary biology, environmental studies, or geoscience.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Restrictions

Due to curricular overlap, students enrolled in this program cannot declare a double major with or declare a minor in ecology and evolutionary biology, environmental studies, or geoscience.

### Environmental and Sustainability Sciences Requirements

Code	Title	Hours
<b>Core Courses</b>		
ENVR 1400 and ENVR 1401	Foundations in Environmental and Sustainability Sciences and Lab for ENVR 1400	5
ENVR 2200 or ENVR 1200	Earth's Changing Cycles Dynamic Earth	4
EEMB 2302 and EEMB 2303	Ecology and Lab for EEMB 2302	5
ENVR 2515	Sustainable Development	4
Complete one of the following:		5
ENVR 3300 and ENVR 3301	Geographic Information Systems and Lab for ENVR 3300	
ENVR 1500 and ENVR 1501	Introduction to Environmental, Social, and Biological Data and Lab for ENVR 1500	
Complete four courses from the following lists:		16
<i>Earth Oceans and Environmental Change</i>		
ENVR 2310 and ENVR 2311	Earth Materials and Lab for ENVR 2310	
ENVR 3125	Global Oceanic Change	
ENVR 3600	Oceanography	
ENVR 5150	Climate and Atmospheric Change	
<i>Conservation, Restoration, and Management</i>		
EEMB 2400	Introduction to Evolution	
EEMB 3460	Conservation Biology

## Environmental and Sustainability Sciences and Landscape Architecture, BS

The Department of Marine and Environmental Sciences and the program in landscape architecture provide an education in basic environmental and sustainability sciences and landscape-architecture-related disciplines. This combined major provides students the opportunity to obtain the fundamental scientific background and practical training to tackle environmental and landscape-related issues. The program seeks to prepare students for advanced studies or careers in fields of urban planning, urban design, sustainable development, environmental consulting, and/or other fields focusing on the interactions among landscapes, the built environment, human societies, and overall climate impacts.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Environmental and Sustainability Sciences Requirements

Code	Title	Hours
<b>Environmental and Sustainability Sciences Required Courses</b>		
<i>Core Courses</i>		
EEMB 2302 and EEMB 2303	Ecology and Lab for EEMB 2302	5
ENVR 1200 and ENVR 1201 or ENVR 2200	Dynamic Earth and Lab for ENVR 1200 Earth's Changing Cycles	4
ENVR 1400 and ENVR 1401	Foundations in Environmental and Sustainability Sciences and Lab for ENVR 1400	5
ENVR 2515	Sustainable Development	4
Complete one course from each category:		
<i>Skills</i>		4-5
ENVR 1500 and ENVR 1501	Introduction to Environmental, Social, and Biological Data and Lab for ENVR 1500	
ENVR 3300 and ENVR 3301	Geographic Information Systems and Lab for ENVR 3300	
<i>Earth, Oceans, and Environmental Change</i>		4-5

## Environmental Studies and History, BA

Through this combined major, successful undergraduates will develop an awareness of the scientific, cultural, and political aspects of the world's environmental problems through historical perspectives and backgrounds. Due to overlap in course content, students majoring in environmental studies or any environmental studies combined majors may not complete a minor in environmental and sustainability sciences.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### BA Language Requirements

All BA students are required to complete the BA degree language requirements, for a total of 12 semester hours of language study or demonstrated equivalent proficiency, as described in Additional Requirements for BA students (p. 119). Successful demonstration of proficiency does not reduce total minimum semester hours of study required to earn the BA degree.

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Environmental Studies Requirements

Code	Title	Hours
<b>Introductory Courses</b>		
Complete one of the following:		4-5
ENVR 1101	Environmental Science	
ENVR 1200 and ENVR 1201	Dynamic Earth and Lab for ENVR 1200	
ENVR 1400 and ENVR 1401	Foundations in Environmental and Sustainability Sciences and Lab for ENVR 1400	
Complete one of the following:		4
ANTH 1101	Peoples and Cultures	
ENVR 2401	Food Justice and Community Development	
PHIL 1180	Environmental Ethics	
SOCL 1246	Environment and Society	
<b>Scientific Foundations of Environmental Systems</b>		
Complete one of the following:		4
ENVR 1110	Global Climate Change	
ENVR 3150	Food Security and Sustainability	
ENVR 3200	Water Resources	
<b>Human Foundations of Environmental Systems</b>		
Complete one of the following:		4
ENVR 2515	Sustainable Development	
PHTH 2414	Environmental Health	
SOCL 4522	Environmental Justice	
<b>Skills Course</b>		
ENVR 3300 and ENVR 3301	Geographic Information Systems and Lab for ENVR 3300	5
<b>Electives</b>		
Complete four of the following, three of which must be at the 3000 level or higher:		16
ARTG 5110	Information Design History	
BUSN 3110	The Consulting Environment	
CIVE 5280	Remote Sensing of the Environment	
COMM 3500	Environmental Issues, Communication, and the Media	
EEMB 3466	Disease Ecology	
ENVR 5350	Sustainable Energy and Climate Solutions	
ENVR 5563	Advanced Spatial Analysis	

ENVR 5750	Urban Ecology
ENVR 5800	Climate Adaptation and Nature-Based Solutions
FINA 2720	Sustainability in the Business Environment
JRNL 3650	Science Writing
LPSC 2301	Introduction to Law, Policy, and Society
PHIL 1180	Environmental Ethics
PHTH 1270	Introduction to Global Health
PHTH 4202	Principles of Epidemiology in Medicine and Public Health

## History Requirements

Code	Title	Hours
<b>History Requirements</b>		
HIST 1130	Introduction to the History of the United States	4
HIST 1170	Europe: Empires, Revolutions, Wars, and Their Aftermath	4
HIST 1201	First-Year Seminar	4
HIST 1215	Origins of Today: Historical Roots of Contemporary Issues	4
<b>History Seminar</b>		
HIST 2301 and HIST 2302	The History Seminar and Historical Writing	5
<b>History/Geographic-Area Electives</b>		
Complete two of the following:		8
ASNS 1150	East Asian Studies	
HIST 1180	African History	
HIST 1185	Introduction to Middle Eastern History	
<b>History-Area Electives</b>		
Complete four HIST courses, approved by a faculty advisor, focused on an idea or geographic area. A minimum of one course must be numbered 2000 to 2999 (Excluding HIST 2301 and HIST 2032). A minimum of one course must be numbered 3000 to 4999 (Excluding HIST 4701).		16

## Integrative Courses

Code	Title	Hours
Complete two of the following (may not overlap with courses used as electives):		8
EEMB 4000	Applied Conservation Biology	
ENVR 3151	Food Sustainability in the Mediterranean - Abroad	
ENVR 4504	Environmental Pollution	
ENVR 5210	Environmental Planning	
JRNL 3700	Data Storytelling	

## Experiential Learning and Capstone

Code	Title	Hours
<b>Experiential Learning</b>		
Complete an approved activity from either department, combined with reflection in capstone.		
<b>Capstone Course</b>		
Complete one of the following:		1-4
ENVR 4900	Earth and Environmental Science Capstone	
ENVR 4970	Junior/Senior Honors Project 1	
ENVR 4997	Senior Thesis	
HIST 4701	Capstone Seminar	

## Combined-Major Credit Requirement

Complete 91 semester hours in the major.

### International Affairs Requirements

Courses used to fulfill major requirements may not be used to satisfy the global dynamics requirement. See department for additional courses.

Code	Title	Hours
<b>Required Courses</b>		
INTL 1101	Globalization and International Affairs	4
INTL 3400	International Conflict and Negotiation	4
POLS 1160	International Relations	4

### International Experiential Learning

Complete at least one "international semester" via study abroad, international internship, international co-op, or two short-term programs.

### International Affairs Elective

Code	Title	Hours
Complete one of the following courses:		
<b>Code</b>		
INTL 2480	Women and World Politics	
INTL 2500	Race and Global Human Mobility	
INTL 3150	Global Philanthropy	
INTL 3200	Cities in a Global Context	
INTL 3406	International Law	
INTL 3430	Revolution, Civil War, and Insurrection	
INTL 3450	Security, Culture, Power	
INTL 3520	Global Political Economy	
INTL 4100	Forced Migration: Refugees, Exiles, and Displaced Persons	
INTL 5010	International Human Rights Law and Policy	
INTL 5100	Climate and Development	

### Global Dynamics Requirement

Code	Title	Hours
Complete two of the following courses. Courses are divided into thematic groups to aid students in deciding which courses to take and have no bearing on major requirements.		8

Code	Title	Hours
<i>Environment</i>		
ENVR 1110	Global Climate Change	
ENVR 2515	Sustainable Development	
ENVR 3150	Food Security and Sustainability	

INTL 5100	Climate and Development

## Environmental Studies and Philosophy, BA

Through this combined major, successful undergraduates will develop an awareness of the scientific, cultural, and political aspects of the world's environmental problems while considering the philosophical, moral, and ethical impacts that such decisions have on human-environment interactions. Due to overlap in course content, students majoring in Environmental Studies or any Environmental Studies combined majors may not complete a minor in Environmental and Sustainability Sciences.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### BA Language Requirements

All BA students are required to complete the BA degree language requirements, for a total of 12 semester hours of language study or demonstrated equivalent proficiency, as described in Additional Requirements for BA students (p. 119). Successful demonstration of proficiency does not reduce total minimum semester hours of study required to earn the BA degree.

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Environmental Studies Requirements

Code	Title	Hours
<b>Introductory Courses</b>		
<i>Science</i>		
Choose one introductory science course:		4-5
ENVR 1101	Environmental Science	
ENVR 1200 and ENVR 1201	Dynamic Earth and Lab for ENVR 1200	
ENVR 1400 and ENVR 1401	Foundations in Environmental and Sustainability Sciences and Lab for ENVR 1400	
<i>Social Science</i>		
Choose one introductory social science course:		4
ANTH 1101	Peoples and Cultures	
ENVR 2401	Food Justice and Community Development	
PHIL 1180	Environmental Ethics	
SOCL 1246	Environment and Society	
<b>Scientific Foundations of Environmental Systems</b>		
Complete one of the following:		4
ENVR 1110	Global Climate Change	
ENVR 3150	Food Security and Sustainability	
ENVR 3200	Water Resources	
<b>Human Foundations of Environmental Systems</b>		
Complete one of the following:		4
ENVR 2515	Sustainable Development	
PHTH 2414	Environmental Health	
SOCL 4522	Environmental Justice	
<b>Skills Course</b>		
ENVR 3300 and ENVR 3301	Geographic Information Systems and Lab for ENVR 3300	5
<b>Electives</b>		
Complete four of the following, three of which must be at the 3000 level or higher:		16
ARTG 5110	Information Design History	
BUSN 3110	The Consulting Environment	
CIVE 5280	Remote Sensing of the Environment	
COMM 3500	Environmental Issues, Communication, and the Media	

EEMB 3466	Disease Ecology
EEMB 3700	Desert Ecology
ENVR 3201	Coastal Sustainability: Ecology and Coupled Human-Natural Systems in Southeast Asia
ENVR 3202	Coastal Sustainability: The Blue Economy of the Gulf of Maine
ENVR 3701	Energy in the Desert Ecosystem
ENVR 4504	Environmental Pollution
ENVR 5210	Environmental Planning
ENVR 5350	Sustainable Energy and Climate Solutions
ENVR 5563	Advanced Spatial Analysis
ENVR 5750	Urban Ecology
ENVR 5800	Climate Adaptation and Nature-Based Solutions
FINA 2720	Sustainability in the Business Environment
JRNL 3650	Science Writing

<sup>1</sup> Earth and Environmental Science Capstone (ENVR 4900) is also an option to fulfill the capstone requirement of this program. Students who complete 1 SH Earth and Environmental Science Capstone (ENVR 4900) must still complete a minimum of 128 SH to meet degree requirements.

## Sociology and Environmental Studies, BA

This combined major will lead to undergraduates that have a broad awareness of the sociological and scientific foundations of environmental problem solving. They will have the opportunity to develop concrete skills in GIS and scientific communication that will facilitate student success. Due to overlap in course content, students majoring in environmental studies or any environmental studies combined majors may not complete a minor in environmental and sustainability sciences.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### BA Language Requirements

All BA students are required to complete the BA degree language requirements, for a total of 12 semester hours of language study or demonstrated equivalent proficiency, as described in Additional Requirements for BA students (p. 119). Successful demonstration of proficiency does not reduce total minimum semester hours of study required to earn the BA degree.

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Sociology Requirements

Code	Title	Hours
<b>Required Sociology Courses</b>		
ANTH 2305	Global Markets and Local Culture	4
SOCL 1101	Introduction to Sociology	4
SOCL 2321	Research Methods in Sociology	4
or INSH 3101	Research Methods in the Social Sciences	
SOCL 2485	Environment, Technology, and Society	4
SOCL 3300	Social Theory	4
<b>Statistics</b>		
Complete one of the following:		4-5
ENVR 2500 and ENVR 2501	Biostatistics and Lab for ENVR 2500 (Adding in co-requirement lab portion)	
SOCL 2320	Statistical Analysis in Sociology	
<b>Capstone</b>		
Complete one of the following:		4
ENVR 4900	Earth and Environmental Science Capstone	
ENVS 4997	Senior Thesis	
SOCL 4600	Senior Seminar	
<b>Sociology Elective A</b>		4
Please note that SOCL 2485 may not be used to fulfill this requirement as it is required in the major. Complete one course in the following range:		
SOCL 1000 to SOCL 2999		
<b>Sociology Elective B</b>		8
Complete two additional sociology courses in the following range:		
SOCL 3000 to SOCL 5999		

### Environmental Studies Requirements

Code	Title	Hours
<b>Introductory Courses</b>		
Complete one introductory science course:		4-5
ENVR 1101	Environmental Science	
ENVR 1200 and ENVR 1201	Dynamic Earth and Lab for ENVR 1200	

ENVR 1400 and ENVR 1401	Foundations in Environmental and Sustainability Sciences and Lab for ENVR 1400	
Complete one introductory social science course:		4
ANTH 1101	Peoples and Cultures	
HUSV 2401	Food Justice and Community Development	
PHIL 1180	Environmental Ethics	
SOCL 1246	Environment and Society	
<b>Skills Course</b>		
ENVR 3300 and ENVR 3301	Geographic Information Systems and Lab for ENVR 3300	5
<b>Electives</b>		
Complete four of the following, three of which must be at the 3000 level or above:		16
ARTG 5110	Information Design History	
BUSN 1101	Introduction to Business	
BUSN 3110	The Consulting Environment	
CIVE 5280	Remote Sensing of the Environment	
COMM 3500	Environmental Issues, Communication, and the Media	
EEMB 3466	Disease Ecology	
ENVR 3201	Coastal Sustainability: Ecology and Coupled Human-Natural Systems in Southeast Asia	
ENVR 3202	Coastal Sustainability: The Blue Economy of the Gulf of Maine	
ENVR 3701	Energy in the Desert Ecosystem	
ENVR 4504	Environmental Pollution	
ENVR 5350	Sustainable Energy and Climate Solutions	
ENVR 5563	Advanced Spatial Analysis	
ENVR 5700	Streams and Watershed Ecology	
ENVR 5800	Climate Adaptation and Nature-Based Solutions (Course is pending)	
FINA 2720	Sustainability in the Business Environment	
INNO 3520	Impact Investing and Social Finance	
JRNL 3650	Science Writing	
PHIL 1180	Environmental Ethics	
PHTH 4202	Principles of Epidemiology in Medicine and Public Health	
PPUA 5268	International Environmental Policy	

### Integrative Requirements

Code	Title	Hours
ENVR 5450	Applied Social-Ecological Systems Modeling	4
SOCL 4522	Environmental Justice	4

### Sociology Major Grade Requirement

2.000 GPA required for major courses

### Sociology and Environmental Studies Combined Major Credit Requirement

Complete 75 semester hours in the major.

### Program Requirements

128 total semester hours required

### Plan of Study

## Ecology and Evolutionary Biology, Minor

The ecology and evolutionary biology minor is designed to provide students a foundation in the principles of ecology and evolutionary biology, as well as to provide concrete skills that will help students achieve their career goals.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Restrictions

Minor not available for students who major in ecology and evolutionary biology, marine biology, biology, or cell and molecular biology, and all combined majors with these programs.

### Required Courses

Code	Title	Hours
EEMB 1101 and EEMB 1102	Foundations in Ecology and Evolutionary Biology and Lab for EEMB 1101	5
EEMB 1105 and EEMB 1106	Foundations in Ecological and Evolutionary Genomics and Lab for EEMB 1105	5

### Elective Courses

Code	Title	Hours
Complete four courses from the lists below. At least one course needs to come from each list:		16-20

#### Evolution of Organisms

BIOL 2327	Human Parasitology
EEMB 2290	Ecology and Evolution of Behavior
EEMB 2400	Introduction to Evolution
EEMB 2700 and EEMB 2701	Marine Biology and Lab for EEMB 2700
EEMB 3465	Ecological and Conservation Genomics

#### Ecology and Conservation Biology

EEMB 2302 and EEMB 2303	Ecology and Lab for EEMB 2302
EEMB 3460	Conservation Biology
EEMB 3475	Wildlife Ecology
EEMB 4001	Landscape and Restoration Ecology

#### Analytical Skills

EEMB 3465	Ecological and Conservation Genomics
EEMB 5130	Population Dynamics
ENVR 1500 and ENVR 1501	Introduction to Environmental, Social, and Biological Data and Lab for ENVR 1500
ENVR 2500 and ENVR 2501	Biostatistics and Lab for ENVR 2500
ENVR 3300 and ENVR 3301	Geographic Information Systems and Lab for ENVR 3300

### GPA Requirement

2.000 GPA required in the minor

## Environmental and Sustainability Sciences, Minor

The environmental and sustainability sciences minor provides undergraduates with a strong foundation in a variety of scientific, technical, institutional, economic, behavioral, and conservation-oriented solutions to environmental problems caused by either natural phenomena and/or human activity.

There are a number of interdisciplinary opportunities involving environmental and sustainability sciences. Due to curricular overlap, combinations of any environmental and sustainability sciences major, including combined majors, cannot occur with majors or minors in ecology and evolutionary biology, environmental studies, or with the minor in geoscience.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Coursework

Code	Title	Hours
<b>Foundational Classes</b>		
Complete two of the following:		8-9
ENVR 1200 and ENVR 1201 or ENVR 2200	Dynamic Earth and Lab for ENVR 1200 Earth's Changing Cycles	
ENVR 1400 and ENVR 1401	Foundations in Environmental and Sustainability Sciences and Lab for ENVR 1400	
EEMB 2302 and EEMB 2303	Ecology and Lab for EEMB 2302	
ENVR 2515	Sustainable Development	
<b>Advanced Coursework</b>		
Complete four courses from this list (at least three courses need to be at the 3000 level or above):		16-19
EEMB 1450	Introduction to Marine Biology	
EEMB 2302 and EEMB 2303	Ecology and Lab for EEMB 2302	
EEMB 2400	Introduction to Evolution	
EEMB 3460	Conservation Biology	
EEMB 3465	Ecological and Conservation Genomics	
EEMB 4001	Landscape and Restoration Ecology	
ENVR 1110	Global Climate Change	
ENVR 1200 and ENVR 1201	Dynamic Earth and Lab for ENVR 1200	
ENVR 2200	Earth's Changing Cycles	
ENVR 2310 and ENVR 2311	Earth Materials and Lab for ENVR 2310	
ENVR 3125	Global Oceanic Change	
ENVR 3150	Food Security and Sustainability	
ENVR 3151	Food Sustainability in the Mediterranean - Abroad	
ENVR 3200	Water Resources	
ENVR 3600	Oceanography	
ENVR 5210	Environmental Planning	
ENVR 5350	Sustainable Energy and Climate Solutions	
POLS 2395	Environmental Politics and Policy	
PPUA 5260	Ecological Economics	
PPUA 5268	International Environmental Policy	
SOCL 2485	Environment, Technology, and Society	

### GPA Requirement

2.000 GPA required in the minor

## Environmental Studies, Minor

Students pursuing a minor in environmental studies will complete a blend of courses that bridge the scientific foundations and human dimensions of environmental systems. Students will also take a skills course that is designed to improve their marketability in environmental fields. A successful student will broaden their understanding of the science and policy of the Earth's environmental challenges through this program, which complements any undergraduate major.

The goals of the environmental studies minor are threefold:

- To help undergraduates develop an awareness of the scientific, cultural, and political aspects of the world's environmental problems
- To better prepare students for careers in the expanding field of environmental professions
- To prepare students for further study at the graduate or professional school level

### Minor Requirements

Complete all courses listed below unless otherwise indicated.

#### Introductory Courses

Code	Title	Hours
ENVR 1101 or ENVR 1200 or ENVR 1400	Environmental Science Dynamic Earth Foundations in Environmental and Sustainability Sciences	4
SOCL 1246 or ANTH 1101 or PHIL 1180 or HUSV 2401	Environment and Society Peoples and Cultures Environmental Ethics Food Justice and Community Development	4

#### Scientific Foundations of Environmental Systems

Code	Title	Hours
Complete one of the following:		4-5
ENVR 1110	Global Climate Change	
ENVR 3150	Food Security and Sustainability	
ENVR 3200	Water Resources	

#### Human Dimensions of Environmental Systems

Code	Title	Hours
Complete one of the following:		4
ENVR 2515	Sustainable Development	
PHTH 2414	Environmental Health	
SOCL 4522	Environmental Justice	

#### Skills Courses

Code	Title	Hours
Complete one of the following:		4-5
ANTH 3410	Ethnographic Field Experience	
ECON 2350	Statistics for Economists	
ENVR 2500 and ENVR 2501	Biostatistics and Lab for ENVR 2500	
ENVR 3300 and ENVR 3301	Geographic Information Systems and Lab for ENVR 3300	
POLS 2395	Environmental Politics and Policy	
SOCL 2321	Research Methods in Sociology	

#### GPA Requirement

2.000 GPA required in the minor

## Geosciences, Minor

The geosciences minor is designed to provide students with a comprehensive understanding of the breadth of topics in the geosciences. Core foundational classes in Earth science are followed by student-directed electives across a range of course options.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Courses

Code	Title	Hours
ENVR 1200 and ENVR 1201	Dynamic Earth and Lab for ENVR 1200	5
ENVR 2200	Earth's Changing Cycles	4
Complete one of the following:		5
ENVR 2310 and ENVR 2311	Earth Materials and Lab for ENVR 2310	
ENVR 2340 and ENVR 2341	Earth Landforms and Processes and Lab for ENVR 2340	

### Geology Elective

Code	Title	Hours
Complete three of the following:		12-14
ENVR 2340 and ENVR 2341	Earth Landforms and Processes and Lab for ENVR 2340	
ENVR 3125	Global Oceanic Change	
ENVR 3200	Water Resources	
ENVR 3300 and ENVR 3301	Geographic Information Systems and Lab for ENVR 3300	
ENVR 3410	Environmental Geochemistry	
ENVR 3600	Oceanography	
ENVR 5150	Climate and Atmospheric Change	
ENVR 5190	Soil Science	
ENVR 5202	Environmental Science Field Seminar Abroad	
ENVR 5210	Environmental Planning	
ENVR 5350	Sustainable Energy and Climate Solutions	

### GPA Requirement

2.000 GPA required in the minor

## Marine Sciences, Minor

The marine science minor is designed to provide Northeastern undergraduates with a strong foundation in the marine sciences, while offering the opportunity to obtain concrete skills that will enhance employability. Our minor curriculum also offers the flexibility to take classes in the area of greatest interest to the student and provides hands-on training in foundation marine science courses.

### Minor Requirements

#### Required Courses

Code	Title	Hours
EEMB 1101 and EEMB 1102	Foundations in Ecology and Evolutionary Biology and Lab for EEMB 1101	5
ENVR 3600 or ENVR 3125	Oceanography Global Oceanic Change	4

#### Skills Course

Code	Title	Hours
Complete one of the following:		4-5
ENVR 1500 and ENVR 1501	Introduction to Environmental, Social, and Biological Data and Lab for ENVR 1500	
ENVR 2500 and ENVR 2501	Biostatistics and Lab for ENVR 2500	
ENVR 3300 and ENVR 3301	Geographic Information Systems and Lab for ENVR 3300	

#### Elective Courses

Code	Title	Hours
Complete three of the following:		11-15
EEMB 2700 and EEMB 2701	Marine Biology and Lab for EEMB 2700	
ENVR 3125	Global Oceanic Change	
ENVR 3201	Coastal Sustainability: Ecology and Coupled Human-Natural Systems in Southeast Asia	
ENVR 3202	Coastal Sustainability: The Blue Economy of the Gulf of Maine	
EEMB 3450	Physiological Adaptations to the Environment	
ENVR 3600	Oceanography	
Courses offered in Nahant, MA:		
EEMB 5510	New England Marine Biomes	
EEMB 5522	Experimental Design Marine Ecology	
EEMB 5542	Marine Spatial Planning	
EEMB 5546	Sustainability of the Land-Sea Interface	

#### GPA Requirement

2.000 GPA required in the minor

## Mathematics

Website (<https://cos.northeastern.edu/mathematics/>)

**Egon Schulte, PhD**  
Professor and Chair

617.373.2450  
617.373.5658 (fax)

Mathematics is of ever-increasing importance to our society and everyday life. It has long been the language of science and technology and provides a rich source of methods for analyzing and solving problems encountered in the physical world. Today, mathematics is essential in virtually all fields of human endeavor, including business, the arts, and the social sciences.

The Bachelor of Arts degree requires at least 11 mathematics courses and two physics courses, in addition to the study of a foreign language; this program is appropriate for students who wish a broader liberal arts education. The Bachelor of Science degree requires at least 14 mathematics courses and two physics courses but no foreign language study; it is more specialized, and it is recommended for those strongly interested in mathematics and science. The department also offers a minor degree in mathematics.

The major programs provide flexibility with elective courses. Students may take advantage of a range of interdisciplinary programs and may join a major in mathematics with one in such fields as computer science, physics, and biology.

Exceptional students are accepted into the Honors Program and have the option to enroll in honors sections of several of their mathematics courses. All math majors may benefit from co-op opportunities in the scientific and business communities in Boston and elsewhere.

Many of the mathematics courses that we offer use computers for visualization, modeling, and numerical approximation.

Students planning to teach secondary school mathematics must major in mathematics and take a specific minor in education, which includes coursework and student teaching.

Mathematical training may lead to opportunities in applied research (natural sciences, engineering, economics, management, computer science) as well as in mathematical research, teaching, or industry.

### Programs

#### Bachelor of Arts (BA)

- Mathematics (p. 1511)

#### Bachelor of Science (BS)

- Mathematics (p. 1515)
- Biology and Mathematics (p. 1394)
- Computer Science and Mathematics (p. 816)
- Data Science and Mathematics (p. 925)
- Economics and Mathematics (p. 1529)
- Graphic and Information Design and Mathematics (p. 236)
- Mathematics and Business Administration (p. 641)
- Mathematics and Philosophy (p. 1538)
- Mathematics and Physics (p. 1541)
- Mathematics and Political Science (p. 1544)
- Mathematics and Psychology (p. 1548)
- Mathematics and Sociology (p. 1551)

#### Minor

- Mathematics (p. 1553)

#### Accelerated Programs

See Accelerated Bachelor/Graduate Degree Programs (p. )

## Mathematics, BA

The Bachelor of Arts degree requires at least 11 mathematics courses and two physics courses, in addition to the study of a foreign language. This program is appropriate for students who wish a broader liberal arts education.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### BA Language Requirements

All BA students are required to complete the BA degree language requirements, for a total of 12 semester hours of language study or demonstrated equivalent proficiency, as described in Additional Requirements for BA students (p. 119). Successful demonstration of proficiency does not reduce total minimum semester hours of study required to earn the BA degree.

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Mathematics Major Grade Requirement

A grade of C or higher is required in all mathematics courses numbered 3000 and below and in MATH 4000.

### Mathematics Major Requirements

Code	Title	Hours
<b>Problem Solving</b>		
MATH 1365	Introduction to Mathematical Reasoning	4
<b>History of Mathematics</b>		
MATH 2201	History of Mathematics	4
<b>Calculus</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
<b>Intermediate and Advanced Mathematics</b>		
MATH 2331	Linear Algebra	4
MATH 3150	Real Analysis	4

## Mathematics, BS

The Bachelor of Science degree requires 14 mathematics courses and 2 physics courses. It is the degree most commonly pursued by math majors and is the one recommended for those strongly interested in mathematics and science.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Mathematics Major Grade Requirement

A grade of C or higher is required in all mathematics courses numbered 3000 and below and in MATH 4000.

### Mathematics Major Requirements

Code	Title	Hours
<b>Problem Solving</b>		
MATH 1365	Introduction to Mathematical Reasoning	4
<b>Calculus</b>		
A grade of C or higher is required:		
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
<b>Intermediate and Advanced Mathematics</b>		
MATH 2331	Linear Algebra	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 3081	Probability and Statistics	4
MATH 3150	Real Analysis	4
MATH 3175	Group Theory	4
<b>Co-op Reflections</b>		
MATH 3000	Co-op and Experiential Learning Reflection Seminar 1	1
<b>Mathematics Electives</b>		
Complete four courses in the following range:		16
MATH 3101 to MATH 4899		
<b>Required Physics</b>		
<i>Physics 1</i>		
Complete one of the following:		5
PHYS 1161 and PHYS 1162	Physics 1 and Lab for PHYS 1161	
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	
<i>Physics 2</i>		
Complete one of the following:		5
PHYS 1165 and PHYS 1166	Physics 2 and Lab for PHYS 1165	
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	
<b>Capstone</b>		
Complete one of the following:		4
MATH 4025	Applied Mathematics Capstone	

MATH 5131

Introduction to Mathematical Methods and Modeling

MATH 4020

Research Capstone

**Mathematics Major Credit Requirement**

Complete 66 semester hours in the major.

**Upper-Division Electives***Note:* Courses used as upper-division electives do not count toward the major or NU path.

Code	Title	Hours
Complete three general electives numbered 3000 or above.		12

**Program Requirement**

128 total semester hours required

## Biology and Mathematics, BS

In the BS combined biology and mathematics degree program, science courses lay the groundwork for strong basic training in mathematics, chemistry, and physics that are relevant to biology. In biology courses, students broadly explore the organization and processes of life—from molecules and cells through organs and organ systems to populations, ecosystems, and evolution. In mathematics courses, students pursue mathematical reasoning, differential equations, and linear algebra, as well as statistics and probability. The fields of biology and mathematics are integrated in a range of course offerings including bioinformatics, applied statistics, advanced genomics, and biological imaging.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Biology Requirements

Code	Title	Hours
<b>Introduction to College</b>		
BIOL 1000 or MATH 1000	Biology at Northeastern Mathematics at Northeastern	1
<b>Biology</b>		
<i>Foundations</i>		
BIOL 1107 and BIOL 1108	Foundations of Biology and Lab for BIOL 1107	5
<i>Inquiries</i>		
BIOL 2299	Inquiries in Biological Sciences	4
<i>Genetics</i>		
BIOL 2301 and BIOL 2302	Genetics and Molecular Biology and Lab for BIOL 2301	5
<i>Project Lab</i>		
BIOL 2309	Biology Project Lab	4
<b>Chemistry</b>		
<i>General Chemistry</i>		
CHEM 1161 and CHEM 1162 and CHEM 1163	General Chemistry for Science Majors and Lab for CHEM 1161 and Recitation for CHEM 1161	5
<i>Organic Chemistry</i>		
CHEM 2311 and CHEM 2312	Organic Chemistry 1 and Lab for CHEM 2311	5
CHEM 2313 and CHEM 2314	Organic Chemistry 2 and Lab for CHEM 2313	5
<b>Biochemistry</b>		
BIOL 3611 and BIOL 3612	Biochemistry and Lab for BIOL 3611	5
<b>Intermediate/Advanced Biology</b>		
Complete one of the following:		4-5
BIOL 2327 to BIOL 3999 BIOL 4705 to BIOL 5999		
<b>Organismal and Evolutionary Biology Elective</b>		
Complete one of the following:		4-5
BIOL 2327	Human Parasitology	
BIOL 3401	Comparative Vertebrate Anatomy	
BIOL 3413	Current Topics in Organismal and Population Biology	

EEMB 2302 and EEMB 2303	Ecology and Lab for EEMB 2302
EEMB 2400	Introduction to Evolution
EEMB 2700 and EEMB 2701	Marine Biology and Lab for EEMB 2700
EEMB 3460	Conservation Biology
EEMB 3466	Disease Ecology
EEMB 3600	Animal Behavior

## Mathematics Requirements

Code	Title	Hours
<b>Calculus 1</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
<b>Calculus 2 and Calculus 3</b>		
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
<b>Physics</b>		
PHYS 1161 and PHYS 1162	Physics 1 and Lab for PHYS 1161	5
<b>Required Mathematics Courses</b>		
MATH 1365	Introduction to Mathematical Reasoning	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 3081	Probability and Statistics	4
<b>Mathematics Electives</b>		
Complete three of the following:		12
MATH 2331	Linear Algebra	
MATH 3001 to MATH 4899		

## Additional Requirements

Code	Title	Hours
<b>Experiential Learning Introduction</b>		
EESC 2000	Professional Development for Co-op	1
MATH 3000	Co-op and Experiential Learning Reflection Seminar 1	1
<b>Capstone</b>		
Complete one of the following to fulfill capstone requirement:		1-4
BIOL 4701	Biology Capstone	
BIOL 4900	Biology Research Capstone (concurrent with BIOL 4991 or BIOL 4994, which may be used toward Intermediate/Advanced Biology)	
BIOL 4971	Junior/Senior Honors Project 2	
MATH 4020	Research Capstone	
MATH 4025	Applied Mathematics Capstone	
MATH 5131	Introduction to Mathematical Methods and Modeling	
<b>Biology/Mathematics Integrative Courses</b>		
Complete two of the following:		8-10
BINF 6308	Bioinformatics Computational Methods 1	
BINF 6309	Bioinformatics Computational Methods 2	
BIOL 3405	Neurobiology	
BIOL 5581	Biological Imaging	
BIOL 5591	Advanced Genomics	
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	
MATH 4581	Statistics and Stochastic Processes	
MATH 7343	Applied Statistics	

**Writing Requirement**

ENGW 3307	Advanced Writing in the Sciences	4
-----------	----------------------------------	---

**Biology and Mathematics Combined-Major Credit/GPA Requirements**

Complete 93 semester hours in the major with a cumulative GPA of 2.000.

## Computer Science and Mathematics, BS

The computer science and mathematics combined major was the first dual major created by the college. The mathematics requirements focus on courses that have computing applications or form the basis for further studies in mathematical theory. The program emphasizes the strong ties between computer science and mathematics that date back to the origins of machine computation in the 1930s and 1940s—and persist to this day.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
CS 1200	First Year Seminar	1
CS 1210	Professional Development for Khoury Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800 (Integrative course)	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
CS 2800	Logic and Computation	4
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 3800	Theory of Computation	4
CS 4300 or CS 4100	Computer Graphics Artificial Intelligence	4
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4

### Khoury Elective Courses

With adviser approval, a directed study, research, project study, or appropriate graduate-level course may also be taken as a computer science elective.

Complete eight semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:

CS 2500 or higher, except CS 5010

CY 2000 or higher, except CY 4930

DS 2500 or higher, except DS 4900

IS 2000 or higher, except IS 4900

### Mathematics Courses

Code	Title	Hours
<b>Calculus Courses</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
<b>Mathematics Courses</b>		
MATH 2331	Linear Algebra	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4

MATH 3081	Probability and Statistics	4
MATH 3175	Group Theory	4
MATH 3527	Number Theory 1	4

**Mathematics Electives**

Complete three courses in the following range: MATH 3001 to MATH 4999 but not MATH 4000	12
--	----

**Supporting Course**

Code	Title	Hours
Complete one of the following:		4
AFAM 2600	Issues in Race, Science, and Technology	
CY 4170	The Law, Ethics, and Policy of Data and Digital Technologies	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
ENGL 2150	Literature and Digital Diversity	
HIST 2220	History of Technology	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
IS 1300 or PHIL 1300	Knowledge in a Digital World	
PHIL 1145	Technology and Human Values	
SOCL 1280	The Twenty-First-Century Workplace	
SOCL 2485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	

**Computer Science Writing Requirement**

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111	First-Year Writing	4
<b>Advanced Writing in the Disciplines</b>		
ENGW 3302 or ENGW 3307 or ENGW 3315	Advanced Writing in the Technical Professions Advanced Writing in the Sciences Interdisciplinary Advanced Writing in the Disciplines	4

**Required General Electives**

Code	Title	Hours
Complete 28 semester hours of general electives.		28

**Khoury College GPA Requirement**

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses

**NUpath Requirements Satisfied**

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

**Program Requirement**

132 total semester hours required

## Data Science and Mathematics, BS

The data science and mathematics combined major combines computer science, data science, and mathematics into an integrated curriculum. The program provides the rigorous theoretical background necessary for success in the data science field.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Data Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or MATH 1000 or INSC 1000	First Year Seminar Mathematics at Northeastern Science at Northeastern	1
CS 1210 or EESC 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Programming Sequence Pathways</b>		
Complete one of two options:		12
<i>Computer Science Option</i>		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	
CS 3500	Object-Oriented Design	
<i>Data Science Option</i>		
DS 2000 and DS 2001	Programming with Data and Data Science Programming Practicum	
DS 2500 and DS 2501	Intermediate Programming with Data and Lab for DS 2500	
DS 3500	Advanced Programming with Data	
<b>Computer Science Required Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 3200	Database Design	4
<b>Data Science Foundations</b>		
DS 3000	Foundations of Data Science	4
DS 4200	Information Presentation and Visualization	4
DS 4300	Large-Scale Information Storage and Retrieval	4
<b>Khoury Elective Courses</b>		
With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete 8 semester hours of CS,CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		8
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		
DS 2500 or higher, except DS 4900		
IS 2000 or higher, except IS 4900		

## Mathematics Courses

Code	Title	Hours
<b>Problem-Solving Requirement</b>		
MATH 1365	Introduction to Mathematical Reasoning	4
<b>Calculus Requirements</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
<b>Intermediate and Advanced Math Requirements</b>		
MATH 2331	Linear Algebra	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 3081	Probability and Statistics	4
MATH 3175	Group Theory	4
MATH 3527	Number Theory 1	4
<b>Mathematics Elective Requirements</b>		
Complete four courses in the following range:		16
MATH 3001 to MATH 4999 but not MATH 4000		

## Integrative Requirements

Code	Title	Hours
<b>Integrative Courses</b>		
DS 4400	Machine Learning and Data Mining 1	4
DS 4420	Machine Learning and Data Mining 2	4

## Computer Science Writing Requirements

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111	First-Year Writing	4
<b>Advanced Writing in the Disciplines</b>		
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3307	Advanced Writing in the Sciences	
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

## Required General Electives

Code	Title	Hours
Complete 20 semester hours of general electives.		20

## Khoury College GPA Requirement

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses

## NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

## Program Requirement

130 total semester hours required

**Plan of Study****Sample Plan of Study:****Four Years, Two Co-ops in Summer 2/Fall**

## Economics and Mathematics, BS

Given the mathematical and graphical models used extensively in economics, economics and mathematics are natural partners. Our combined major with mathematics is designed for students who want to further develop their mathematics skills to enhance their understanding and interest in economics. This combined major is strongly recommended for students with an interest in pursuing graduate studies in economics.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPATH Requirements

All undergraduate students are required to complete the NUPATH Requirements (p. 111).

### Economics Requirements

Code	Title	Hours
<b>Introduction to College</b>		
ECON 1000 or MATH 1000	Economics at Northeastern Mathematics at Northeastern	1
<b>Required Economics</b>		
ECON 1115	Principles of Macroeconomics	4
ECON 1116	Principles of Microeconomics	4
ECON 2315	Macroeconomic Theory	4
ECON 2316	Microeconomic Theory	4
ECON 2560	Applied Econometrics	4
<b>Economics Electives</b>		
Complete 4 economics electives found in the following ranges, with no more than two in the ECON 1200 to ECON 1999 range:		16
ECON 1200 to ECON 1999		
ECON 2990 to ECON 4689		
ECON 4900 to ECON 4996		
ECON 5200 to ECON 5999		

### Mathematics Requirements

Code	Title	Hours
<b>Required Mathematics</b>		
MATH 1365	Introduction to Mathematical Reasoning	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 2331	Linear Algebra	4
MATH 3081	Probability and Statistics	4
<b>Mathematics Electives</b>		
Complete two courses in the following range:		8
MATH 3001 to MATH 4999		
The following courses are recommended:		
MATH 3150	Real Analysis	
MATH 4581	Statistics and Stochastic Processes	

### Breadth Course

Code	Title	Hours
<b>Computer Science</b>		
Choose one of the following:		4-5

1530 Economics and Mathematics, BS

CS 1100 and CS 1101	Computer Science and Its Applications and Lab for CS 1100 *
DS 2000 and DS 2001	Programming with Data and Data Science Programming Practicum
MISM 2510	Fundamentals of Information Analytics

\* Selecting this 5 SH option will add one additional semester hour to your degree program.

**Integrative Requirements**

Code	Title	Hours
<b>Advanced Writing in the Disciplines</b>		
ENGW 3308	Advanced Writing in the Social Sciences	4
<b>Integrative Course</b>		
Complete one of the following:		4
ECON 4692 or ECON 4997	Senior Economics Seminar Senior Economics Thesis	
MATH 4025	Applied Mathematics Capstone	
MATH 5131	Introduction to Mathematical Methods and Modeling	

**Combined Major GPA/Credit Requirement**

Code	Title	Hours
Grades in the following 4 courses must average to a minimum of C (2.000):		
ECON 2315	Macroeconomic Theory	
ECON 2316	Microeconomic Theory	
ECON 2560	Applied Econometrics	
MATH 3081	Probability and Statistics	

A cumulative GPA of 2.000 is required in all math courses.

A grade of C or higher is required in all math courses numbered MATH 2999 or below; grades below C will not count toward the degree.

**Economics and Mathematics Major Credit Requirement**

Complete 76 semester hours in the major.

**Program Requirement**

128 total semester hours required.

**Plan of Study**

**Sample Plan of Study: Four Years, Two Co-ops in Summer 2/Fall**

## Graphic and Information Design and Mathematics, BS

The Department of Mathematics and the Department of Art + Design offer a combined major in mathematics and graphic and information design. Students interested in the combined major integrate the study of mathematical reasoning including methods for analyzing and solving problems encountered in the physical world with the design of message and meaning, integrating text and image to visualize concepts and data to enhance human understanding of complex and vital knowledge.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements Creative Expression/Innovation (EI), Interpreting Culture (IC), Formal and Quantitative Reasoning (FQ), Analyzing and Using Data (AD), and Societies and Institutions (SI) are met through the major course requirements.

NUpath requirements Natural and Designed World (ND), Difference and Diversity (DD), and Ethical Reasoning (ER) must be met through electives.

### Graphic and Information Design Requirements

Code	Title	Hours
<b>Art and Design at Northeastern</b>		
ARTF 1000 or MATH 1000	Art and Design at Northeastern Mathematics at Northeastern	1
<b>Art and Design Fundamentals</b>		
Complete one course in the following range. ARTF 1143 is recommended. ARTF 1141 to ARTF 1149		4
ARTF 1122	Color and Composition (with optional ARTF 1123)	4
<b>Art and Design History</b>		
ARTH 2210	Modern Art and Design History	4
ARTH 2215	History of Graphic Design	4
<b>Design</b>		
ARTG 1250	Design Process Context and Systems	4
ARTG 2250	Typography 1 (with optional ARTG 2251)	4
ARTG 2252	Graphic Design Principles	4
ARTG 3350	Typography 2	4
ARTG 3451	Information Design 1	4
<b>Degree Project</b>		
ARTG 4550	Design Degree Project	4
<b>Art and Design Elective</b>		
Complete one of the following:		4
ARTD 2360	Introduction to Photography (with optional ARTD 2361)	
ARTD 2380	Video Basics (with optional ARTD 2381)	
ARTG 2260	Programming Basics	
ARTF 1120	Observational Drawing	
ARTF 1121	Conceptual Drawing	
ARTF 1124 and ARTF 1125	Form and Structure and Form and Structure Tools	
ARTF 2223	Experience and Interaction (with optional ARTF 2224 )	
ARTG 2400	Interaction Design Principles (with optional ARTG 2401 )	
ARTG 3450	Graphic Design 2	
ARTG 3460	Identity and Brand Design	
ARTG 4554	Typography 3

## Mathematics and Business Administration, BS

In the BS Mathematics and Business Administration program, business and mathematics courses lay the groundwork for strong basic training in finance.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Mathematics Requirements

Code	Title	Hours
<b>Required Courses</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 1365	Introduction to Mathematical Reasoning	4
MATH 3081	Probability and Statistics	4
<b>Calculus and Linear Algebra (Required) and Differential Equations (Recommended)</b>		
Complete either Option 1 or Option 2 below:		8
<i>Option 1 (Recommended)</i>		
MATH 2321	Calculus 3 for Science and Engineering	
MATH 2341	Differential Equations and Linear Algebra for Engineering	
<i>Option 2</i>		
MATH 2321	Calculus 3 for Science and Engineering	
MATH 2331	Linear Algebra	
<b>Mathematics Electives</b>		
Complete three courses in the range MATH 3001 to MATH 5999. The following courses are recommended:		12
MATH 4681	Probability and Risks	
MATH 4682	Theory of Interest and Basics of Life Insurance 1	
MATH 4581	Statistics and Stochastic Processes	

### Business Requirements

Code	Title	Hours
<b>Accounting</b>		
ACCT 1201	Financial Accounting and Reporting	4
ACCT 2301	Managerial Accounting	4
<b>Finance</b>		
FINA 2201	Financial Management	4
<b>Marketing</b>		
MKTG 2201	Introduction to Marketing	4
<b>Organizational Behavior</b>		
ORGB 3201	Organizational Behavior	4
<b>International Business/Social Responsibility</b>		
INTB 1203	International Business and Global Social Responsibility	4
<b>Strategy in Action</b>		
STRT 4501	Strategy in Action	4

### Integrative Course

Code	Title	Hours
MATH 4581	Statistics and Stochastic Processes	4

## Business Concentration

Complete one of the following business concentrations. One concentration is required. A second concentration is optional.

- Accounting (p. 654)
- Accounting and Advisory Services (p. 655)
- Brand Management (p. 656)
- Business Analytics (p. 657)
- Corporate Innovation (p. 658)
- Entrepreneurial Startups (p. 659)
- Family Business (p. 660)
- Finance (p. 661)
- Fintech (p. 662)
- Healthcare Management and Consulting (p. 664)
- International Business (p. 665) (only available as a second concentration)
- Management (p. 666)
- Management Information Systems (p. 667)
- Marketing (p. 668)
- Marketing Analytics (p. 669)
- Social Innovation and Entrepreneurship (p. 670)
- Supply Chain Management (p. 671)

## Supplemental Courses

Code	Title	Hours
<b>Economics</b>		
ECON 1115	Principles of Macroeconomics	4
ECON 1116	Principles of Microeconomics	4
<b>Co-op Preparation</b>		
BUSN 1103 or EESC 2000	Professional Development for Business Co-op Professional Development for Co-op	1

## Business Cooperative Education

Complete one cooperative education experience.

## Mathematics GPA Requirement

Minimum 2.000 GPA required in all mathematics courses

## Business GPA Requirement

Minimum 2.000 GPA required in business courses

## Program Requirement

128 total semester hours required

## Plan of Study

### Sample Plan of Study: Four Years, Two Co-ops

## Mathematics and Philosophy, BS

### Overview

The mathematics and philosophy combined major integrates the tools, concepts, and skills of mathematics and philosophy. This major explores the philosophical foundations of mathematics, including questions about the nature of mathematical knowledge and the status of the axioms of mathematics and probability theory, while also applying key tools from mathematics to philosophical problems such as those that arise in evolutionary game theory, philosophy of economics, and philosophy of science.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Mathematics Requirements

Code	Title	Hours
<b>Required Courses</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 1365	Introduction to Mathematical Reasoning	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2331	Linear Algebra	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 3081	Probability and Statistics	4
<b>Mathematics Electives</b>		
Complete two courses in the following range: MATH 3001 to MATH 4999		8

### Philosophy Requirements

Code	Title	Hours
<b>Required Courses</b>		
PHIL 1115	Introduction to Logic	4
PHIL 2325	Ancient Philosophy and Political Thought	4
PHIL 2330	Modern Philosophy	4
Complete one of the following:		4
PHIL 2001	Ethics and Evolutionary Games	
PHIL 3050	Information and Uncertainty	
<b>Philosophy Advanced Electives</b>		
Complete one of the following:		4
PHIL 3360	Scientific Approaches to Philosophy	
PHIL 4500	Theory of Knowledge	
PHIL 4510	Philosophy of Science	
PHIL 4535	Philosophy of Mind	
PHIL 4550	Philosophy of Economics	
PHIL 4555	Philosophy of Biology	
<b>Open Electives</b>		
Complete three additional PHIL courses.		12

### Integrative Requirement

Code	Title	Hours
PHIL 4515	Advanced Logic	4

## Capstone

Code	Title	Hours
Complete one of the following not used to satisfy another requirement:		4
MATH 4020	Research Capstone	
MATH 4025	Applied Mathematics Capstone	
MATH 5131	Introduction to Mathematical Methods and Modeling	
PHIL 4500	Theory of Knowledge	
PHIL 4510	Philosophy of Science	
PHIL 4535	Philosophy of Mind	
PHIL 4550	Philosophy of Economics	
PHIL 4555	Philosophy of Biology	
PHIL 4901	Topics in Philosophy Seminar	

## Mathematics and Philosophy Combined Major Credit Requirement

Students must maintain a minimum GPA of 2.000 in their mathematics and philosophy courses.

68 semester hours required

## Program Requirement

128 semester hours required

## Plan of Study

## Mathematics and Physics, BS

Mathematics and physics have been linked since antiquity. By combining physics and mathematics you can take closely related courses in each discipline, such as statistical mechanics and stochastic processes, mechanics and dynamical systems, thermodynamics and Fourier Series, and quantum mechanics and partial differential equations. The two departments jointly offer a course in mathematical methods in physics.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Mathematics Requirements

Code	Title	Hours
<b>Calculus</b>		
A grade of C or higher is required:		
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
<b>Intermediate and Advanced Math</b>		
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 2331	Linear Algebra	4
MATH 3081	Probability and Statistics	4
MATH 3150	Real Analysis	4
MATH 3175	Group Theory	4
<b>Co-op Reflections</b>		
MATH 3000	Co-op and Experiential Learning Reflection Seminar 1	1
<b>Mathematics Elective</b>		
Complete one course in the following range:		4
MATH 3101 to MATH 4899		

### Physics Requirements

Code	Title	Hours
<b>Physics 1</b>		
Complete one of the following:		5
PHYS 1161 and PHYS 1162	Physics 1 and Lab for PHYS 1161	
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	
<b>Physics 2</b>		
Complete one of the following:		5
PHYS 1165 and PHYS 1166	Physics 2 and Lab for PHYS 1165	
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	
<b>Intermediate Physics</b>		
PHYS 2303	Modern Physics	4
PHYS 2371 and PHYS 2372	Electronics and Lab for PHYS 2371	4
<b>Advanced Physics</b>		
PHYS 3600	Advanced Physics Laboratory	4

PHYS 3602	Electricity and Magnetism 1	4
PHYS 4305	Thermodynamics and Statistical Mechanics	4
<b>Elective Courses</b>		
Complete two courses in the following range:		8
PHYS 3000 to PHYS 7999		

### Integrative Courses

Code	Title	Hours
PHYS 3601	Classical Dynamics	4
MATH 4545 or MATH 4525	Fourier Series and PDEs Applied Analysis	4

### Combined Major Credit Requirement

Complete 83 semester hours in the major.

### Program Requirement

128 total semester hours required

### Plan of Study

#### Notes on Physics courses in Plans of Study

Some required physics courses are offered in both fall and spring semesters, while other required courses are offered less frequently. Therefore, the suggested plan of study will vary from student to student, depending on the year of entry for that student.

Please contact your academic adviser for additional information and plans of study.

### Five Years, Three Co-ops in Summer 2/Fall

Year 1								
Fall	Hours	Spring	Hours	Summer 1	Hours	Summer 2	Hours	Hours

## Mathematics and Political Science, BS

The Mathematics and Political Science combined major provides training to prepare students to use quantitative training and methods to understand political trends and events.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Mathematics Requirements

Code	Title	Hours
<b>Problem Solving</b>		
MATH 1365	Introduction to Mathematical Reasoning	4
<b>Calculus</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
<b>Intermediate and Advanced Mathematics</b>		
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 2331	Linear Algebra	4
MATH 3081	Probability and Statistics	4
<b>Math Electives</b>		
Complete two courses in the following range that are not required in the requirements above: MATH 3001 to MATH 5999		8

### Political Science Requirements

Code	Title	Hours
<b>Political Science Required Courses</b>		
POLS 1150	American Government	4
POLS 1155	Comparative Politics	4
POLS 1160	International Relations	4
POLS 2399	Research Methods in Political Science	4
POLS 2400	Quantitative Techniques	4
<b>Political Thought</b>		
Complete one of the following:		4
POLS 2325	Ancient Philosophy and Political Thought	
POLS 2328	Modern Political Thought	
POLS 2330	American Political Thought	
POLS 2332	Contemporary Political Thought	
<b>Political Science Electives</b>		
Complete three POLS courses numbered 2000 and above.		12

### Political Science Concentrations (Optional)

If you are working toward one of the following concentrations, declare it with your advisor so that it may be added to your record. Requirements for the concentrations are listed below.

- American Political Institutions (p. 1545)
- Campaigns and Elections (p. 1545)
- Comparative Politics (p. 1545)
- Identity, Culture, and Politics (p. 1546)
- International Relations and Diplomacy (p. 1546)

- Law and Legal Studies (p. 1546)
- Public Policy (p. 1546)
- Security Studies (p. 1547)

### Integrative Requirement

Code	Title	Hours
POLS 2390	Science, Technology, and Public Policy	4

### Mathematics and Political Science Combined-Major Credit Requirement

Complete 68 semester hours in the major.

### Program Requirement

128 total semester hours required

### Optional Political Science Concentrations

#### CONCENTRATION IN AMERICAN POLITICAL INSTITUTIONS

Code	Title	Hours
Complete four of the following:		16
POLS 2350	State and Local Politics	
POLS 3300	The U.S. Congress	
POLS 3302	Judicial Process and Behavior	
POLS 3307	Public Policy and Administration	
POLS 3310	Public Opinion, Voting, and Elections	
POLS 3160	Campaign Strategy	

#### CONCENTRATION IN CAMPAIGNS AND ELECTIONS

Code	Title	Hours
<b>Required Courses</b>		
POLS 3160	Campaign Strategy	4
POLS 3302	Judicial Process and Behavior	4
<b>Campaigns and Elections Electives</b>		
Complete two of the following:		8
POLS 2345	Urban Policies and Politics	
POLS 2350	State and Local Politics	
POLS 3162	Local Campaigns and Elections	
POLS 3310	Public Opinion, Voting, and Elections	
POLS 3320	Politics and Mass Media	

#### CONCENTRATION IN COMPARATIVE POLITICS

Code	Title	Hours
<b>Theoretical Requirement</b>		
Complete two of the following:		8
POLS 2282	The Holocaust and Comparative Genocide	
POLS 2356	Democratic Erosion	
POLS 2359	Immigration Politics	
POLS 2370	Religion and Politics	
POLS 3418	Nationalism	
POLS 3430	Revolution, Civil War, and Insurrection	
POLS 3487	Politics of Developing Nations	

#### Regional Requirements

Complete one of the following:		4
POLS 3435	Politics and Governance of Europe and the European Union	
POLS 3465	Government and Politics in the Middle East	

#### Experiential/Practicum Requirement

Complete one of the following: 4

POLS 4915	Model Arab League
POLS 4918	Model NATO
POLS 4937	Dialogue of Civilizations: Government and Politics Abroad

### CONCENTRATION IN IDENTITY, CULTURE, AND POLITICS

**Code** **Title** **Hours**

#### Core Course

POLS 3418	Nationalism	4
-----------	-------------	---

#### Electives

Complete three of the following: 12

POLS 2359	Immigration Politics
POLS 2368	Music and Politics in America and Abroad
POLS 2370	Religion and Politics
POLS 3309	Lesbian, Gay, Bisexual, and Transgender Issues in Public Policy
POLS 3324	Law and Society

### CONCENTRATION IN INTERNATIONAL RELATIONS AND DIPLOMACY

**Code** **Title** **Hours**

#### Experiential/Practicum Requirement

Complete one of the following: 4

POLS 4910	Model United Nations
POLS 4915	Model Arab League
POLS 4938	Dialogue of Civilizations: International Politics Abroad

#### Core Courses

Complete three of the following: 12

POLS 3405	International Political Economy
POLS 3406	International Law
POLS 3435	Politics and Governance of Europe and the European Union
POLS 5408	International Security

### CONCENTRATION IN LAW AND LEGAL STUDIES

**Code** **Title** **Hours**

Complete four of the following: 16

POLS 2330	American Political Thought
POLS 3300	The U.S. Congress
POLS 3302	Judicial Process and Behavior
POLS 3323	Race, Inequality, and the Law
or AFAM 3323	Race, Inequality, and the Law
POLS 3324	Law and Society
POLS 3406	International Law
POLS 3409	Global Governance
POLS 4500	U.S. Constitutional Law
POLS 4505	U.S. Civil Liberties

### CONCENTRATION IN PUBLIC POLICY

**Code** **Title** **Hours**

#### Core Requirement

POLS 3307	Public Policy and Administration	4
-----------	----------------------------------	---

#### Electives

Complete three of the following: 12

POLS 2340	Business and Government
POLS 2345	Urban Policies and Politics
POLS 2350	State and Local Politics
POLS 2357	Growth and Decline of Cities and Suburbs

POLS 2390	Science, Technology, and Public Policy
POLS 2395	Environmental Politics and Policy
POLS 3425	U.S. Foreign Policy

**CONCENTRATION IN SECURITY STUDIES**

Code	Title	Hours
Complete four of the following:		
POLS 3420	U.S. National Security Policy	4
POLS 3423	Terrorism and Counterterrorism	4
POLS 3425	U.S. Foreign Policy	4
POLS 3430	Revolution, Civil War, and Insurrection	4
POLS 3487	Politics of Developing Nations	4
POLS 5408	International Security	4

## Mathematics and Psychology, BS

In the mathematics and psychology combined-major BS program, psychology and mathematics courses help lay the groundwork for strong basic training that seeks to prepare the student toward developing psychological models using mathematics.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Mathematics Requirements

Code	Title	Hours
<b>Problem Solving</b>		
MATH 1365	Introduction to Mathematical Reasoning	4
<b>Calculus</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
<b>Intermediate and Advanced Mathematics</b>		
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 2331	Linear Algebra	4
MATH 3081	Probability and Statistics	4
<b>Math Electives</b>		
Complete two courses in the following range that are not required in the requirements above: MATH 3001 to MATH 5999		8

### Psychology Requirements

Code	Title	Hours
<b>Introductory Course</b>		
PSYC 1101	Foundations of Psychology	4
<b>Statistics</b>		
Complete the following course. Students who receive transfer credit for the Advanced Placement Statistics exam may complete the 1 SH PSYC 2315 course (requires department permission).		4-5
PSYC 2320	Statistics in Psychological Research	
<b>Area A (Personality/Social Basis of Behavior)</b>		
Complete two of the following:		8
PSYC 3400	Personality	
PSYC 3402	Social Psychology	
PSYC 3404	Developmental Psychology	
PSYC 3406	Clinical Psychology and Mental Health	
<b>Area B (Biological/Cognitive Basis of Behavior)</b>		
Complete two of the following:		8
PSYC 3450	Learning and Motivation	
PSYC 3452	Sensation and Perception	
PSYC 3458	Biological Psychology	
PSYC 3464	Psychology of Language	
PSYC 3466	Cognition	
<b>Psychology Laboratory</b>		
Complete one of the following:		4
PSYC 4600	Laboratory in Research Design	
PSYC 4606	Laboratory in Biological Psychology	

PSYC 4610	Laboratory in Psycholinguistics
PSYC 4612	Laboratory in Cognition
PSYC 4614	Laboratory in Social Psychology
PSYC 4616	Laboratory in Personality
PSYC 4622	Laboratory in Sensation and Perception
PSYC 4624	Laboratory in Affective Science
PSYC 4626	Laboratory in Life-Span Emotional Development
PSYC 4628	Laboratory in Developmental Psychology

**Psychology Capstone Requirement**

Complete one of the following: 4

PSYC 4656	Seminar in Biological Psychology
PSYC 4658	Seminar in Psycholinguistics
PSYC 4660	Seminar in Cognition
PSYC 4662	Seminar in Personality
PSYC 4664	Seminar in Social Psychology
PSYC 4666	Seminar in Clinical Psychology
PSYC 4668	Seminar in Sensation and Perception
PSYC 4674	Seminar in Cognitive Neuroscience
PSYC 4676	Seminar in Developmental Psychology

**Psychology Elective**

Any PSYC course in the 3000 range and up 4

**Integrative Requirement**

Code	Title	Hours
PSYC 4540	Quantitative Topics in Psychology and Behavioral Neuroscience	4

**Mathematics and Psychology Major Credit Requirement**

Complete 76 semester hours in the major.

**Program Requirement**

128 total semester hours required

## Mathematics and Sociology, BS

In the mathematics and sociology combined-major BS program, sociology and mathematics courses help lay the groundwork for strong basic training that seeks to prepare students for developing sociological models using mathematics.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Mathematics Requirements

Code	Title	Hours
<b>Problem Solving</b>		
MATH 1365	Introduction to Mathematical Reasoning	4
<b>Calculus</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
<b>Intermediate and Advanced Mathematics</b>		
MATH 2331	Linear Algebra	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 3081	Probability and Statistics	4
<b>Math Electives</b>		
Complete two courses in the following range that are not required in the requirements above:		8
MATH 3001 to MATH 5999		

### Sociology Requirements

Code	Title	Hours
<b>Sociology Required Courses</b>		
ANTH 1101	Peoples and Cultures	4
ANTH 2305	Global Markets and Local Culture	4
SOCL 2320	Statistical Analysis in Sociology	4
SOCL 2321	Research Methods in Sociology	4
SOCL 3300	Social Theory	4
<b>Sociology Electives</b>		
Complete one course from each course range:		
<i>Introductory Elective</i>		4
SOCL 1101 to SOCL 1999		
<i>Intermediate Elective</i>		4
SOCL 2000 to SOCL 3999		
<i>Advanced Elective</i>		4
SOCL 4000 to SOCL 4999		
<b>Capstone Requirement</b>

## Mathematics, Minor

A math minor can be combined with any other major at Northeastern and can be obtained by completing six math courses: two calculus courses, two intermediate courses, and two upper-level courses.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Courses

Code	Title	Hours
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4

Biology majors may substitute the following two courses:

MATH 1251	Calculus and Differential Equations for Biology 1	
MATH 1252	Calculus and Differential Equations for Biology 2	

### Intermediate-Level Courses

Code	Title	Hours
Complete two of the following:		8
MATH 2321	Calculus 3 for Science and Engineering	
MATH 2341	Differential Equations and Linear Algebra for Engineering	
MATH 2331	Linear Algebra	

### Mathematics Electives

Code	Title	Hours
Complete two courses in the following range:		8
MATH 3001 to MATH 4699 <sup>1</sup>		

<sup>1</sup> MATH 4000 is excluded.

### GPA Requirement

2.000 GPA required in the minor

## Physics

Website (<http://www.northeastern.edu/cos/physics/>)

### Mark C. Williams, PhD

Professor and Chair

110 Dana Research Center

617.373.2902

617.373.2943 (fax)

physics@northeastern.edu

Physics examines the fundamental principles that govern natural phenomena, ranging in scale from collisions of subatomic particles; through the behavior of solids, liquids, and biomolecules; to exploding stars and colliding galaxies.

The program aims to help students experience the intellectual stimulation of studying physics and the excitement of frontline research, understand the basic principles and techniques of physics-related careers, and prepare for graduate study in physics or related fields.

## Programs

The department offers several degree programs:

- BS in physics, applied physics, or biomedical physics
- BS in applied physics/MS in electrical engineering
- MS and PhD in physics

Four levels of courses are offered:

- Descriptive courses for nonscience majors with limited mathematical background
- General survey courses for students in scientific and engineering fields
- Advanced courses primarily intended for physics, biomedical physics, and applied physics majors
- Highly advanced courses primarily intended for prospective graduate students

A BS, MS, or PhD degree in physics offers many career opportunities in industrial, government, and academic high-technology laboratories as scientists or engineers.

### COMBINED MAJORS

Students also have the opportunity to combine physics with another discipline through a combined major. Current combined majors with physics include mathematics, computer science, music with concentration in music technology, philosophy, chemical engineering, computer engineering, electrical engineering, and mechanical engineering.

## Research Opportunities for Undergraduates

Students are encouraged to participate in the excitement of cutting-edge research in particle physics, biophysics, and nanotechnology with world-renowned faculty.

## Programs

### Bachelor of Science (BS)

- Physics (p. 1556)
- Applied Physics (p. 1560)
- Biomedical Physics (p. 1564)
- Computer Science and Physics (p. 833)
- Data Science and Physics (p. 931)
- Mathematics and Physics (p. 1541)
- Physics and Music with Concentration in Music Technology (p. 498)
- Physics and Philosophy (p. 1585)

### Bachelor of Science in Chemical Engineering (BChE)

- Chemical Engineering and Physics (p. 1007)

### Bachelor of Science in Computer Engineering (BSCmpE)

- Computer Engineering and Physics (p. 1069)

**Bachelor of Science in Electrical Engineering (BSEE)**

- Electrical Engineering and Physics (p. 1088)

**Bachelor of Science in Mechanical Engineering (BSME)**

- Mechanical Engineering and Physics (p. 1141)

**Minor**

- Astrophysics (p. 1610)
- Physics (p. 1611)

**Accelerated Programs**

See Accelerated Bachelor/Graduate Degree Programs (p. )

## Physics, BS

The physics program provides a strong foundation in classical and modern physics, including studies of the various physical phenomena such as electromagnetism, dynamics, building blocks of matter, energy, and radiation.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Physics Major Requirements

Code	Title	Hours
<b>Introductory Physics</b>		
<i>Physics 1</i>		
Complete one of the following:		5
PHYS 1161 and PHYS 1162	Physics 1 and Lab for PHYS 1161	
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	
<i>Physics 2</i>		
Complete one of the following:		5
PHYS 1165 and PHYS 1166	Physics 2 and Lab for PHYS 1165	
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	
<b>Intermediate Physics</b>		
PHYS 2303	Modern Physics	4
PHYS 2371 and PHYS 2372	Electronics and Lab for PHYS 2371	4
<b>Advanced Physics</b>		
PHYS 3600	Advanced Physics Laboratory	4
PHYS 3601	Classical Dynamics	4
PHYS 3602	Electricity and Magnetism 1	4
PHYS 3603	Electricity and Magnetism 2	4
PHYS 4115	Quantum Mechanics	4
PHYS 4305	Thermodynamics and Statistical Mechanics	4
<b>Elective Course</b>		
Complete one of the following:		4
MATH 4606 PHYS 3500 to PHYS 7999	Mathematical and Computational Methods for Physics	
<b>Experiential Learning</b>		
Complete one course in experiential learning. See department for approved courses. Note: The experiential learning requirement is waived following a student presentation connected with a co-op and/or research experience. The requirement is often fulfilled by a talk at a Society of Physics Students meeting but can be fulfilled by an adequately documented presentation at a professional meeting or at an appropriate campus event. Contact your faculty advisor for additional information.		
<b>Senior Capstone</b>		
PHYS 5318	Principles of Experimental Physics	4

## Supporting Courses

Code	Title	Hours
<b>Mathematics</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 2331	Linear Algebra	4
MATH 3081	Probability and Statistics	4
<b>Computational Methods</b>		
PHYS 1211	Computational Problem Solving in Physics	4
or PHYS 1130	Computing, Data, and Science	
or GE 1111	Engineering Problem Solving and Computation	
<b>Chemistry</b>		
CHEM 1211 and CHEM 1212	General Chemistry 1 and Lab for CHEM 1211	5
<b>Technical Electives</b>		
Complete 8 semester hours from the following:		8
MATH 2280	Statistics and Software	
MATH 2321 to MATH 5999		
PHYS 2303 to PHYS 7999		
CHEM 2311 to CHEM 5999		
BIOL 2301 to BIOL 5999		
ENVR 2300 to ENVR 5999		
CS 2990 to CS 4900		
CHME 2001 to CHME 4699		
CIVE 2001 to CIVE 4699		
EECE 2001 to EECE 5999		
ME 2001 to ME 4699		
IE 2001 to IE 4699		

## Physics Major Credit Requirement

Complete 91 semester hours in the major.

### Astrophysics Concentration (Optional)

Students working toward this concentration must declare it with their advisor for it to be added to their academic record.

*Note:* Opting to take this concentration may require additional coursework to be completed beyond the total program hours.

Code	Title	Hours
<b>Astrophysics Core</b>		
PHYS 1111	Introduction to Astronomy	4
<i>The following courses may be counted toward major electives, if they are listed as applicable options in the approved curriculum:</i>		
PHYS 3111	Astrophysical Processes: Decoding the Universe	4
PHYS 4111	Multimessenger Astrophysics	4
PHYS 5117	Advanced Astrophysics Topics	4
or PHYS 5118	General Relativity and Cosmology	

## Program Requirement

133 total semester hours required

## Plan of Study

### Note on Physics Plans of Study

Some required physics courses are offered in both fall and spring semesters, while other required courses are offered less frequently. Therefore, the suggested plan of study will vary from student to student, **depending on the year of entry for that student**. See *course offering schedule at the end of the plan of study*.

Please contact your academic advisor for additional information and plans of study.

- PHYS 4651 offered spring and fall (odd years)
- PHYS 4652 offered every spring
- PHYS 5318 offered every spring
- PHYS 5318 offered every spring

## Applied Physics, BS

The applied physics BS degree is a flexible, interdisciplinary-oriented program designed to provide students with a solid background in basic physics, in conjunction with the opportunity to sample courses from a wide range of disciplines, including engineering, biology, chemistry, math, environmental studies, and computer science. This program seeks to enable students to prepare for a variety of careers in, for example, nanotechnology, a medical field, environmental research, or even finance.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Applied Physics Major Requirements

Code	Title	Hours
<b>Introductory Physics</b>		
<i>Physics 1</i>		
Complete one of the following:		5
PHYS 1161 and PHYS 1162	Physics 1 and Lab for PHYS 1161

## Biomedical Physics, BS

The biomedical physics program seeks to understand the role of physical processes occurring on molecular, cellular, or macroscopic scales; in vital biological functions, ranging from the interaction of chemicals with DNA, to the extraction of oxygen from red blood cells, to the generation of complex electrical signals in the brain and nervous system; and physical principles of medical devices. The biomedical physics program also offers a premed (prehealth) specialized track.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Biomedical Physics Major Requirements

PHYS 2371/2372 offered every fall

PHYS 3600 offered every summer 1 & summer 2

PHYS 3601 offered spring & fall (even years)

PHYS 3602 offered every fall & spring

PHYS 3603 offered fall (even years) & summer 1 (odd years)

PHYS 5115 offered every fall & spring

PHYS 5318 offered every spring

PHYS 4621 offered fall (even years) & spring (odd years)

PHYS 4623 offered fall & summer 1 (even years)

PHYS 4651 offered fall & spring (odd years)

PHYS 4652 offered every spring

## Mathematics and Physics, BS

Mathematics and physics have been linked since antiquity. By combining physics and mathematics you can take closely related courses in each discipline, such as statistical mechanics and stochastic processes, mechanics and dynamical systems, thermodynamics and Fourier Series, and quantum mechanics and partial differential equations. The two departments jointly offer a course in mathematical methods in physics.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Mathematics Requirements

Code	Title	Hours
<b>Calculus</b>		
A grade of C or higher is required:		
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
<b>Intermediate and Advanced Math</b>		
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 2331	Linear Algebra	4
MATH 3081	Probability and Statistics	4
MATH 3150	Real Analysis	4
MATH 3175	Group Theory	4
<b>Co-op Reflections</b>		
MATH 3000	Co-op and Experiential Learning Reflection Seminar 1	1
<b>Mathematics Elective</b>		
Complete one course in the following range:		4
MATH 3101 to MATH 4899		

### Physics Requirements

Code	Title	Hours
<b>Physics 1</b>		
Complete one of the following:		5
PHYS 1161 and PHYS 1162	Physics 1 and Lab for PHYS 1161	
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	
<b>Physics 2</b>		
Complete one of the following:		5
PHYS 1165 and PHYS 1166	Physics 2 and Lab for PHYS 1165	
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	
<b>Intermediate Physics</b>		
PHYS 2303	Modern Physics	4
PHYS 2371 and PHYS 2372	Electronics and Lab for PHYS 2371	4
<b>Advanced Physics</b>		
PHYS 3600	Advanced Physics Laboratory	4

PHYS 3602	Electricity and Magnetism 1	4
PHYS 4305	Thermodynamics and Statistical Mechanics	4
<b>Elective Courses</b>		
Complete two courses in the following range:		8
PHYS 3000 to PHYS 7999		

### Integrative Courses

Code	Title	Hours
PHYS 3601	Classical Dynamics	4
MATH 4545 or MATH 4525	Fourier Series and PDEs Applied Analysis	4

### Combined Major Credit Requirement

Complete 83 semester hours in the major.

### Program Requirement

128 total semester hours required

### Plan of Study

#### Notes on Physics courses in Plans of Study

Some required physics courses are offered in both fall and spring semesters, while other required courses are offered less frequently. Therefore, the suggested plan of study will vary from student to student, depending on the year of entry for that student.

Please contact your academic adviser for additional information and plans of study.

### Five Years, Three Co-ops in Summer 2/Fall

Year 1								
Fall	Hours	Spring	Hours	Summer 1	Hours	Summer 2	Hours	Hours

## Computer Science and Physics, BS

The computer science and physics combined major brings together three disciplines: computer science, physics, and mathematics. The mathematics requirements serve as a foundation for both computer science and physics. From hands-on experience with sophisticated physics instruments, to mathematical theory, to the latest computational innovations, our interdisciplinary approach will prepare students for the myriad challenges in today's rapidly changing world.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
CS 1200	First Year Seminar	1
CS 1210	Professional Development for Khoury Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
CS 2800	Logic and Computation	4
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 3800	Theory of Computation	4
CS 4500 or CS 4530	Software Development Fundamentals of Software Engineering	4

### Physics Courses

Code	Title	Hours
<b>Required Courses</b>		
PHYS 1161 and PHYS 1162	Physics 1 and Lab for PHYS 1161	5
PHYS 1165 and PHYS 1166	Physics 2 and Lab for PHYS 1165	5
<b>Intermediate Physics</b>		
PHYS 2303	Modern Physics	4
PHYS 2371 and PHYS 2372	Electronics and Lab for PHYS 2371 (Integrative course)	4
<b>Advanced Physics</b>		
PHYS 3600	Advanced Physics Laboratory	4
PHYS 3602	Electricity and Magnetism 1	4
PHYS 4305	Thermodynamics and Statistical Mechanics	4

**Capstone and Electives**

Code	Title	Hours
<b>Capstone</b>		
Complete either one computer science capstone or the physics capstone:		4
<i>Computer Science Capstone</i>		
CS 4100	Artificial Intelligence	
CS 4150	Game Artificial Intelligence	
CS 4300	Computer Graphics	
CS 4410	Compilers	
CS 4550	Web Development	
<i>Physics Capstone</i>		
PHYS 5318	Principles of Experimental Physics	
<b>Khoury Elective</b>		
The computer science elective is not required if the student has completed the computer science capstone (above). With adviser approval, a directed study, research, project study, or appropriate graduate-level course may also be taken as a computer science elective.		
Complete 4 semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		4
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		
DS 2500 or higher, except DS 4900		
IS 2000 or higher, except IS 4900		
<b>Physics Elective</b>		
Only one physics elective is required if the student has completed the physics capstone (above).		
Complete two courses in the following range:		8
PHYS 3000 to PHYS 5999		

**Integrative Courses**

Code	Title	Hours
<b>Calculus</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
<b>Additional Mathematics Requirements</b>		
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 3081	Probability and Statistics	4

**Supporting Course**

Code	Title	Hours
Complete one of the following:		4
AFAM 2600	Issues in Race, Science, and Technology	
CY 4170	The Law, Ethics, and Policy of Data and Digital Technologies	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
ENGL 2150	Literature and Digital Diversity	
HIST 2220	History of Technology	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
IS 1300 or PHIL 1300	Knowledge in a Digital World	
PHIL 1145	Technology and Human Values	
SOCL 1280	The Twenty-First-Century Workplace	
SOCL 2485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	

## Computer Science Writing Requirement

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111	First-Year Writing	4
<b>Advanced Writing in the Disciplines</b>		
ENGW 3302 or ENGW 3307 or ENGW 3315	Advanced Writing in the Technical Professions Advanced Writing in the Sciences Interdisciplinary Advanced Writing in the Disciplines	4

## Required General Electives

Code	Title	Hours
Complete 24 semester hours of general electives.		24

## Khoury College GPA Requirement

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses

## NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Exploring Creative Expression and Innovation
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

## Program Requirement

135 total semester hours required

## Plan of Study

## Physics and Music with Concentration in Music Technology, BS

The combined major in physics and music provides a strong foundation in classical and modern physics, along with the physics of acoustic and digital audio-related phenomena, and studies of the various physical phenomena including electromagnetism, dynamics, building blocks of matter, energy, and radiation. It also provides students with a solid background in the interdisciplinary application of creative audio technologies to a broad range of outcomes, including analog/digital systems, hardware and software design, musical instrument design, audio synthesis and signal processing, human-computer interaction, and innovative artistic applications of music technology. The combined major allows students to learn how physical principles influence sound production and propagation.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Physics Major Requirements

Code	Title	Hours

MUSC 3300	Music Perception and Cognition	4
MUSC 3541	Music Analysis Seminar	4
MUST 2102	Composing with Digital Technologies	4

**Music in Context**

Complete one of the following:		4
MUSC 1001	Music in Everyday Life	
MUSC 1002 and MUSC 1003	Music in Everyday Life and Lab for MUSC 1002	

**Contemporary/Popular Music**

Complete one of the following:		4
MUSC 2101	Black Popular Music	
MUSC 2150	Making a Musical: Analysis, Craft, and Creation	
MUSC 2310	Popular Music Since 1945	
MUSC 2311	Topics in American Music	
MUSC 2317	Punk Rock	
MUSC 2320	40,000 Years of Music Technology	
MUSC 2336	The Festival Experience	
MUSC 2340	Divas, DJs, and Double Standards	
MUSC 2351	Music, Sound, and the Screen	
MUSC 2380	The World of Choral Music	
MUSC 3352	Sounding Human	
MUSC 3353	Music and the Racial Imagination	
MUSC 3354	Sound and the Sacred	
MUSI 3360	Global Music Industries in Context	
MUSI 3401	Hip Hop in the Music Industry	

**Music Technology**

MUSC 2350	Acoustics and Psychoacoustics of Music	4
MUST 1220	Introduction to Music Technology	4
MUST 2431	Computer Music Fundamentals	4

**Music Technology Electives**

Complete two of the following:		8
MUSC 4510	Music and the Brain Research	
MUST 3540	Special Topics in Music Technology	
MUST 3601	Digital Audio Signal Processing	
MUST 3602	Electronics for Music	
MUST 3603	Embedded Audio Programming	
MUST 4610	Composition for Electronic Instruments	

**Music Technology Capstone**

MUST 4611	Music Technology Capstone/Senior Recital	4
-----------	--	---

**Physics/Music Integrative Requirement**

Code	Title	Hours
<b>Integrative Course Requirement</b>		
MUSC 2350	Acoustics and Psychoacoustics of Music	4

**Physics and Music Combined Major Credit Requirement**

Complete a minimum of 98 semester hours in the major.

**Music Technology Major Grade Requirement**

Students must maintain at least a 2.667 GPA (B– average) in the requirements of the music half of the combined major and also complete all required music courses with grades of at least C. Students who fail to meet the above standards will be placed on departmental probation; those who remain on probation for two consecutive semesters will be dropped from the major.

**Program Requirement**

131 total semester hours required

**Plan of Study****Note on Physics Courses in Plans of Study**

Some required physics courses are offered in both fall and spring semesters, while other required courses are offered less frequently. Therefore, the suggested plan of study will vary from student to student, **depending on the year of entry for that student.**

See course offering schedule at the end of the plans of study.

Please contact your academic advisor for additional information and plans of study.

#### Offerings Schedule (Subject to Changes)

- PHYS 2303 offered every fall, spring, and summer 2
- PHYS 2371/2372 offered every fall
- PHYS 3600 offered every summer 1 and summer 2 (**take in year 2 or 3, whichever is even**)
- PHYS 3601 offered spring and fall (even years)
- PHYS 3602 offered every fall and spring
- PHYS 3603 offered fall (even years) and summer 1 (odd years)
- PHYS 4115 offered every fall and spring

1584      Physics and Music with Concentration in Music Technology, BS

- PHYS 4305 offered every spring and summer 2 (**take in year 2 or 3, whichever is even**)
- PHYS 4621 offered spring (odd years) and fall (even years)
- PHYS 4623 offered summer 1 and fall (even years)
- PHYS 4651 offered spring and fall (odd years)
- PHYS 4652 offered every spring
- PHYS 5318 offered every spring

## Physics and Philosophy, BS

The combined major in physics and philosophy provides a strong foundation in classical and modern physics, including studies of the various physical phenomena including electromagnetism, dynamics, building blocks of matter, energy, and radiation. It also provides students with an understanding of the methods and traditions of philosophical thought, as well as with opportunities to critically and collaboratively reflect on the nature of the world and the human situation in it. Students will be able to describe the method by which physical “law” is made manifest in the sciences, how this knowledge compares with other epistemological models studied in other contexts, and philosophical views on the status and source of physical “law.”

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Physics Major Requirements

Code	Title	Hours
<b>Introductory Physics</b>		
<i>Physics 1</i>		
Complete one of the following:		5
PHYS 1161 and PHYS 1162	Physics 1 and Lab for PHYS 1161	
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	
<i>Physics 2</i>		
Complete one of the following:		5
PHYS 1165 and PHYS 1166	Physics 2 and Lab for PHYS 1165	
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	
<b>Intermediate Physics</b>		
PHYS 2303	Modern Physics	4
PHYS 2371 and PHYS 2372	Electronics and Lab for PHYS 2371	4
<b>Advanced Physics</b>		
PHYS 3600	Advanced Physics Laboratory	4
PHYS 3602	Electricity and Magnetism 1	4
PHYS 4115	Quantum Mechanics	4
PHYS 4305	Thermodynamics and Statistical Mechanics	4
<b>Physics Elective</b>		
Complete one of the following:		4
MATH 4606	Mathematical and Computational Methods for Physics	
PHYS 4621	Biological Physics 1	
PHYS 4623	Medical Physics	
PHYS 4651	Medical Physics Seminar 1	
PHYS 4652	Medical Physics Seminar 2	
PHYS 5113	Particle Physics	
PHYS 5116	Network Science 1	
PHYS 5260	Introduction to Nanoscience and Nanotechnology	

**Philosophy Major Requirements**

Code	Title	Hours
<b>Philosophy Required Courses</b>		
PHIL 1115	Introduction to Logic	4
PHIL 2325 or POLS 2325	Ancient Philosophy and Political Thought	4
PHIL 2330	Modern Philosophy	4
PHIL 4500 or PHIL 3050	Theory of Knowledge Information and Uncertainty	4
<b>Advanced Philosophy Electives</b>		
Complete three PHIL courses with a designation of 3000 or above not used to satisfy another requirement, and at least one at 4000 or 5000 level.		12
<b>Critical Philosophy Elective</b>		
Take one of the following courses not used to fulfill another requirements:		4
AFAM 1101	Introduction to African American and Africana Studies	
PHIL 1104	Goddesses, Witches, Saints, and Sinners: Women and Religion	
PHIL 1271	Sex in Judaism, Christianity, and Islam	
PHIL 2155	Human Rights	
PHIL 2492	Indigenous Philosophy	
PHIL 2619	Race and Religion in Film	
PHIL 3500	Sexuality, Gender, and the Law	
PHIL 3822	Philosophy of Race and Racism	
<b>Philosophy Electives</b>		<b>8</b>
Complete two additional PHIL courses not used to satisfy other requirements.		8

**Physics/Philosophy Integrative Requirements**

Code	Title	Hours
<b>Integrative Course Requirements</b>		
PHIL 4510 or PHIL 3360	Philosophy of Science Scientific Approaches to Philosophy	4
PHYS 3601	Classical Dynamics	4

**Breadth Courses**

Code	Title	Hours
<b>Mathematics</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4

**Physics and Philosophy Major Credit Requirement**

Complete 98 semester hours in the major.

**Program Requirement**

132 total semester hours required

**Plan of Study****Notes on Physics Plans of Study**

Some required physics courses are offered in both fall and spring semesters, while other required courses are offered less frequently. Therefore, the suggested plan of study will vary from student to student, depending on the year of entry for that student.

*See course offering schedule at the end of the plans of study.*

Please contact your academic advisor for additional information and plans of study.

### OFFERING SCHEDULE (SUBJECT TO CHANGES)

- Modern Physics (PHYS 2303) offered every fall, spring, and summer 2
- Electronics (PHYS 2371)/Lab for PHYS 2371 (PHYS 2372) offered every fall
- Advanced Physics Laboratory (PHYS 3600) offered every summer 1 and summer 2
- Classical Dynamics (PHYS 3601) offered spring and fall (even years)
- Electricity and Magnetism 1 (PHYS 3602) offered every fall and spring
- Electricity and Magnetism 2 (PHYS 3603) offered fall (even years) and summer 1 (odd years)
- Quantum Mechanics (PHYS 4115) offered every fall and spring
- Thermodynamics and Statistical Mechanics (PHYS 4305) offered every spring and summer 2 (even years)
- Biological Physics 1 (PHYS 4621) offered spring (odd years) and fall (even years)
- Medical Physics (PHYS 4623) offered summer 1 and fall (even years)
- Medical Physics Seminar 1 (PHYS 4651) offered spring and fall (odd years)
- Medical Physics Seminar 2 (PHYS 4652) offered every spring
- Principles of Experimental Physics (PHYS 5318) offered every spring

## Chemical Engineering and Physics, BSChE

This intercollege combined major serves students who would like to explore their interest in physics while earning the benefit of a Bachelor of Science degree in chemical engineering. Upon completion, the successful student will understand the fundamental physics behind many chemical-based processes, resulting in the ability to design and practice in the field of engineering that deals with the movement of mass, heat transfer, and reactions involved in the processing of various materials.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Engineering</b>		
CHME 2308	Conservation Principles in Chemical Engineering	4
CHME 2310	Transport Processes 1	4

### Notes

Physics courses are offered on the following schedule:

- Modern Physics (PHYS 2303) offered every fall, spring and summer 2.
- Electronics (PHYS 2371)/Lab for PHYS 2371 (PHYS 2372) offered every fall.
- Advanced Physics Laboratory (PHYS 3600) offered every summer 1 and summer 2.
- Classical Dynamics (PHYS 3601) is offered fall and spring semesters of even years only. Please meet with your academic advisor to discuss scheduling options for Year 4 of odd years.
- Electricity and Magnetism 1 (PHYS 3602) offered every fall and spring.
- Electricity and Magnetism 2 (PHYS 3603) offered fall (even years) and summer 1 (odd years).
- Quantum Mechanics (PHYS 4115) offered every fall and spring.
- Thermodynamics and Statistical Mechanics (PHYS 4305) offered every spring and summer 2 (even years).
- Biological Physics 1 (PHYS 4621) offered spring (odd years) and fall (even years).
- Medical Physics (PHYS 4623) offered summer 1 and fall (even years).

- Medical Physics Seminar 1 (PHYS 4651) offered spring and fall (odd years).
- Medical Physics Seminar 2 (PHYS 4652) offered every spring.
- Principles of Experimental Physics (PHYS 5318) offered every spring.

## Computer Engineering and Physics, BSCmpE

This intercollege combined major serves students who would like to explore their interest in physics while earning the benefit of an accredited Bachelor of Science in Computer Engineering degree. The combined major integrates study within the College of Engineering's Department of Electrical and Computer Engineering with study within the College of Science's Department of Physics.

Because of the large body of shared knowledge between computer engineering and physics, an integrated combined major between these two disciplines is a logical course of study and can be accomplished within either a four-year plan of study or a five-year plan of study (including three co-op placements in the latter), without requiring course overloads in any semester. A student graduating from this program will have studied both physics fundamentals and computer systems.

Students interested in this program should contact the Department of Electrical and Computer Engineering or the Department of Physics as early as possible, preferably prior to registering for first-year courses.

Visit the department website (<https://ece.northeastern.edu/academics/undergraduate-studies/ece-accreditation/>) for program objectives.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Courses</b>		
EECE 2140	Computing Fundamentals for Engineers	4
EECE 2150	Circuits and Signals: Biomedical Applications	5
EECE 2160	Embedded Design: Enabling Robotics	4
<b>Computer Engineering Fundamentals</b>		
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	5
EECE 2540	Fundamentals of Networks	4
EECE 2560	Fundamentals of Engineering Algorithms	4
<b>Electrical Engineering Fundamentals</b>		
If more than one electrical engineering fundamentals course is taken, it can count as a technical elective.		
Complete one of the following:		4
EECE 2412 and EECE 2413	Fundamentals of Electronics and Lab for EECE 2412	
EECE 2520	Fundamentals of Linear Systems	
EECE 2530 and EECE 2531	Fundamentals of Electromagnetics and Lab for EECE 2530	
<b>Computer Engineering Capstone Courses</b>		
EECE 4791	Electrical and Computer Engineering Capstone 1	1
EECE 4792	Electrical and Computer Engineering Capstone 2	4

### Technical Electives

Students can register for EECE 4991/EECE 4992/EECE 4993 more than once. For these courses combined, a maximum of 8 semester hours will be allowed to satisfy the requirement of technical electives. An additional 4 semester hours will be allowed as a general elective. At most, one of these courses (4 semester hours) can be taken in a semester.

Though students may register for EECE 2750 more than once, only 4 semester hours will be allowed to satisfy the requirements of technical electives. An additional 4 semester hours will be allowed as a general elective.

Complete two of the following:

EECE 2412 to EECE 2530	
EECE 2750	Enabling Engineering
EECE 3324 to EECE 4698	
EECE 4991	Research
EECE 4992	Directed Study
EECE 4993	Independent Study
EECE 5115 to EECE 5698	

One CS/CY/IS course from the following approved list may be taken toward the EECE technical elective requirement:

CS 3200	Database Design
CS 3500	Object-Oriented Design
CS 3540 to CS 3800	
CS 4100 to CS 4770	
CS 4850	Building Game Engines
CS 5100	Foundations of Artificial Intelligence
CS 5200	Database Management Systems
CS 5310	Computer Graphics
CS 5400	Principles of Programming Language
CS 5500	Foundations of Software Engineering
CS 5520	Mobile Application Development
CS 5600	Computer Systems
CS 5610	Web Development
CS 5700	Fundamentals of Computer Networking
CY 2550	Foundations of Cybersecurity
IS 4200 to IS 4700	

#### Supplemental Credit

2 semester hours from the following course count toward the engineering requirement:	2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>
3 semester hours from the following course count toward the engineering requirement:	3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>

#### Mathematics/Science

Code	Title	Hours
<b>Required Mathematics/Science</b>		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 3081	Probability and Statistics	4
Complete one of the following:		5
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	
PHYS 1161 and PHYS 1162 and PHYS 1163	Physics 1 and Lab for PHYS 1161 and Recitation for PHYS 1161	
Complete one of the following:		5
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	

PHYS 1165 and PHYS 1166 and PHYS 1167	Physics 2 and Lab for PHYS 1165 and Recitation for PHYS 1165	
PHYS 2303	Modern Physics	4
PHYS 3600	Advanced Physics Laboratory	4
PHYS 3602	Electricity and Magnetism 1	4
PHYS 4115	Quantum Mechanics	4
PHYS 4305	Thermodynamics and Statistical Mechanics	4
<b>Advanced Physics Elective</b>		
Complete one of the following:		4
MATH 4606	Mathematical and Computational Methods for Physics	
PHYS 3600 to PHYS 7999		
<b>Supplemental Credit</b>		
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	

## Professional Development

Code	Title	Hours
<b>Required Professional Development</b>		
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1
GE 1000	First-Year Seminar	1
<b>Additional Required Courses</b>		
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
1 semester hour from the following course counts toward the professional development requirement:		1
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

## Writing Requirements

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3315	Advanced Writing in the Technical Professions Interdisciplinary Advanced Writing in the Disciplines	4

## Required General Electives

Code	Title	Hours
Complete 8 semester hours of academic, nonremedial, nonrepetitive courses.		8

## Integrative Requirement

Code	Title	Hours
This course is already required above and also fulfills the integrative requirement:		
EECE 4791	Electrical and Computer Engineering Capstone 1	1

## Major GPA Requirement

A 2.000 minimum GPA is required in EECE courses.

## Program Requirement

133 total semester hours required

<sup>1</sup> Students can substitute GE 1110 and GE 1111 for GE 1501 and GE 1502 in approved situations.

<sup>2</sup> The capstone design courses are taken as follows:

- Electrical and Computer Engineering Capstone 1 (EECE 4791) in summer 1 and Electrical and Computer Engineering Capstone 2 (EECE 4792) in spring OR
- Electrical and Computer Engineering Capstone 1 (EECE 4791) in summer 2 and Electrical and Computer Engineering Capstone 2 (EECE 4792) in fall

Physics courses are offered on the following schedule:

- PHYS 2303 offered every fall, spring, and summer 2
- PHYS 2371/2372 offered every fall
- PHYS 3600 offered every summer 1 and summer 2
- PHYS 3601 offered spring and fall (even years)
- PHYS 3602 offered every fall and spring
- PHYS 3603 offered fall (even years) and summer 1 (odd years)
- PHYS 4115 offered every fall and spring
- PHYS 4305 offered spring and summer 2 (even years)

- PHYS 4621 offered spring (odd years) and fall (even years)
- PHYS 4623 offered summer 1 and fall (even years)
- PHYS 4651 offered spring and fall (odd years)
- PHYS 4652 offered every spring
- PHYS 5318 offered every spring

## Electrical Engineering and Physics, BSEE

This intercollege combined major serves students who would like to explore their interest in physics while earning the benefit of an accredited Bachelor of Science degree in engineering. The major combines a major in physics from the Department of Physics in the College of Science with the Bachelor of Science in Electrical Engineering degree from the Department of Electrical and Computer Engineering.

Because of the large body of shared knowledge between electrical engineering and physics, a combined major between these two disciplines is a logical course of study and can be accomplished within a student's usual five-year program (including three co-op placements) without requiring course overloading in any semester. A student graduating from this program will have studied both the physical fundamentals and the applications of electronic devices and systems. The program is a particularly appropriate course of study for students who wish to pursue a career in solid-state devices, microelectromechanical systems, or nanotechnology.

Students interested in this program should contact the Department of Electrical and Computer Engineering or the Department of Physics as early as possible, preferably prior to registering for freshman courses.

Visit the department website (<https://ece.northeastern.edu/academics/undergraduate-studies/ece-accreditation/>) for educational program objectives.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirements

Code	Title	Hours
<b>Required Courses</b>		
EECE 2140	Computing Fundamentals for Engineers	4
EECE 2150	Circuits and Signals: Biomedical Applications	5
EECE 2160	Embedded Design: Enabling Robotics	4
<b>Electrical Engineering Fundamentals</b>		
EECE 2412 and EECE 2413	Fundamentals of Electronics and Lab for EECE 2412	5
EECE 2520	Fundamentals of Linear Systems	4
EECE 2530 and EECE 2531	Fundamentals of Electromagnetics and Lab for EECE 2530	5
<b>Computer Engineering Fundamentals</b>		
If more than one computer engineering fundamentals course is taken, it can count as a technical elective.		
Complete one of the following:		4-5
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	
EECE 2540	Fundamentals of Networks	
EECE 2560	Fundamentals of Engineering Algorithms	
<b>Electrical Engineering Capstone Courses</b>		
EECE 4791	Electrical and Computer Engineering Capstone 1	1
EECE 4792	Electrical and Computer Engineering Capstone 2	4

### EECE Technical Electives

Students can register for EECE 4991/EECE 4992/EECE 4993 more than once. For these courses combined, a maximum of 8 semester hours will be allowed to satisfy the requirement of technical electives. An additional 4 semester hours will be allowed as a general elective. At most, one of these courses (4 semester hours) can be taken in a semester.

Though students may register for EECE 2750 more than once, only 4 semester hours will be allowed to satisfy the requirements of technical electives. An additional 4 semester hours will be allowed as a general elective.

Complete two of the following:

8-9

EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322
EECE 2540 to EECE 2750	
EECE 3324 to EECE 3410	
EECE 4512 to EECE 4698	
EECE 4991	Research
EECE 4992	Directed Study
EECE 4993	Independent Study
EECE 5115 to EECE 5698	
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage

**Supplemental Credit**

2 semester hours from the following course count toward the engineering requirement:	2
EECE 3468	Noise and Stochastic Processes
2 semester hours from the following course count toward the engineering requirement:	2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>
3 semester hours from the following course count toward the engineering requirement:	3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>

<sup>2</sup> Note:

The capstone design courses are taken as follows:

- Electrical and Computer Engineering Capstone 1 (EECE 4791) in Summer 1 and Electrical and Computer Engineering Capstone 2 (EECE 4792) in Spring, or...
- ... Electrical and Computer Engineering Capstone 1 (EECE 4791) in Summer 2 and Electrical and Computer Engineering Capstone 2 (EECE 4792) in Fall

Physics courses are offered on the following schedule:

- PHYS 2303 offered every fall, spring, and summer 2
- PHYS 2371/2372 offered every fall
- PHYS 3600 offered every summer 1 and summer 2
- PHYS 3601 offered spring and fall (even years)
- PHYS 3602 offered every fall and spring
- PHYS 3603 offered fall (even years) and summer 1 (odd years)
- PHYS 4115 offered every fall and spring
- PHYS 4305 offered every spring and summer 2 (even years)
- PHYS 4621 offered spring (odd years) and fall (even years)
- PHYS 4623 offered summer 1 and fall (even years)
- PHYS 4651 offered spring and fall (odd years)
- PHYS 4652 offered every spring
- PHYS 5318 offered every spring

## Mechanical Engineering and Physics, BSME

This undergraduate program takes advantage of the physical similarities between mechanical engineering and physics, providing students with the opportunity to pursue studies that explore both topics. The program culminates with mechanical engineering capstone design.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements: Interpreting Culture (IC), Understanding Societies and Institutions (SI), Engaging Differences and Diversity (DD), and Integrating Knowledge and Skills Through Experience (EX) are not explicitly satisfied by required engineering coursework. Successful completion of a cooperative education experience fulfills the EX requirement. Students are responsible for satisfying unfulfilled NUpath requirements with general elective coursework.

### Engineering Requirement

Code	Title	Hours
<b>Required Engineering</b>		
ME 2340 and ME 2341	Introduction to Material Science and Lab for ME 2340	5
ME 2350	Statics	4
ME 2355 and ME 2356	Mechanics of Materials and Lab for ME 2355	5
ME 2380 and ME 2381	Thermodynamics and Recitation for ME 2380	4
ME 3455 and ME 3456	Dynamics and Lab for ME 3455	5
ME 3475 or ME 3480	Fluid Mechanics International Applications of Fluid Mechanics	4
ME 4505 and ME 4506	Measurement and Analysis with Thermal Science Application and Lab for ME 4505	5
ME 4508 or ME 4565	Mechanical Engineering Computation and Design Introduction to Computational Fluid Dynamics	4
ME 4550	Mechanical Engineering Design	4
ME 4555	System Analysis and Control	4
ME 4570	Thermal Systems Analysis and Design	4
<b>Mechanical Engineering Capstone</b>		
MEIE 4701	Capstone Design 1	1
MEIE 4702	Capstone Design 2	5
<b>Supplemental Credit</b>		
2 semester hours from the following course counts toward the engineering requirement:		2
GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
3 semester hours from the following course counts toward the engineering requirement:		3
GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	

### Mathematics/Science Requirement

Code	Title	Hours
<b>Required Mathematics/Science</b>		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4

MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1161 and PHYS 1162 and PHYS 1163	Physics 1 and Lab for PHYS 1161 and Recitation for PHYS 1161	5
PHYS 1165 and PHYS 1166 and PHYS 1167	Physics 2 and Lab for PHYS 1165 and Recitation for PHYS 1165	5
PHYS 2303	Modern Physics	4
PHYS 2371 and PHYS 2372	Electronics and Lab for PHYS 2371	4
PHYS 3600	Advanced Physics Laboratory	4
PHYS 3601	Classical Dynamics	4
PHYS 3602	Electricity and Magnetism 1	4
PHYS 5318	Principles of Experimental Physics	4

**Advanced Physics Elective**

Complete one 4-semester-hour course from the following: 4

PHYS 4606	Mathematical and Computational Methods for Physics	
PHYS 4621	Biological Physics 1	
PHYS 4623	Medical Physics	
PHYS 4651	Medical Physics Seminar 1	
PHYS 4652	Medical Physics Seminar 2	
PHYS 5113	Particle Physics	
PHYS 5116	Network Science 1	
PHYS 5117	Advanced Astrophysics Topics	
PHYS 5118	General Relativity and Cosmology	
PHYS 5125	Advanced Quantum Mechanics	
PHYS 5260	Introduction to Nanoscience and Nanotechnology	

**Supplemental Credit**

1 semester hour from the following course counts toward the mathematics/science requirement: 1

GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
---------	---	--

**Professional Development**

Code	Title	Hours
<b>Professional Development</b>		
GE 1000	First-Year Seminar	1
ENCP 2000	Introduction to Engineering Co-op Education	1
ENCP 3000	Professional Issues in Engineering	1

**Additional Required Courses**

1 semester hour from the following course counts toward the professional development requirement: 1

GE 1501	Cornerstone of Engineering 1 <sup>1</sup>	
---------	---	--

1 semester hour from the following course counts toward the professional development requirement: 1

GE 1502	Cornerstone of Engineering 2 <sup>1</sup>	
---------	---	--

**Writing Requirements**

Code	Title	Hours
<b>Writing</b>		
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302 or ENGW 3315	Advanced Writing in the Technical Professions Interdisciplinary Advanced Writing in the Disciplines	4

**Required General Electives**

Code	Title	Hours
Complete 8 semester hours of academic, nonremedial, nonrepetitive courses.		8

**Integrative Requirement**

Code	Title	Hours
This course is already required above and also fulfills the integrative requirement.		
PHYS 5318	Principles of Experimental Physics	

**Major GPA Requirement**

2.000 minimum GPA required in IE, ME, and MEIE courses

**Program Requirement**

139 total semester hours required

<sup>1</sup> Students may substitute Engineering Design (GE 1110) and Engineering Problem Solving and Computation (GE 1111) for Cornerstone of Engineering 1 (GE 1501) and Cornerstone of Engineering 2 (GE 1502) in approved situations.

Total Hours: 139

**Notes:**

Physics courses are offered on the following schedule:

- Modern Physics (PHYS 2303) offered every fall, spring, and summer 2.
- Electronics (PHYS 2371) and Lab for PHYS 2371 (PHYS 2372) offered every fall.
- Advanced Physics Laboratory (PHYS 3600) offered every summer 1 and summer 2.
- Classical Dynamics (PHYS 3601) is offered fall and spring semesters of even years only. Please meet with your COS academic advisor to discuss scheduling options for year 4 of odd years.
- Electricity and Magnetism 1 (PHYS 3602) offered every fall and spring.
- Electricity and Magnetism 2 (PHYS 3603) offered fall (even years) and summer 1 (odd years).
- Quantum Mechanics (PHYS 4115) offered every fall and spring.
- Thermodynamics and Statistical Mechanics (PHYS 4305) offered every spring and summer 2 (even years).
- Biological Physics 1 (PHYS 4621) offered spring (odd years) and fall (even years).
- Medical Physics (PHYS 4623) offered summer 1 and fall (even years).
- Medical Physics Seminar 1 (PHYS 4651) offered spring and fall (odd years).
- Medical Physics Seminar 2 (PHYS 4652) offered every spring.
- Principles of Experimental Physics (PHYS 5318) offered every spring.

## Astrophysics, Minor

The minor in astrophysics provides a foundation in classical and modern astrophysics at an undergraduate curriculum level and helps students explore some of the most groundbreaking recent discoveries that shape our current understanding of the universe.

### Restrictions

Due to considerable overlap of course requirements, this minor is not available for students pursuing the BS degree in physics, applied physics, or biomedical physics.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Introductory Courses

Code	Title	Hours
PHYS 1111	Introduction to Astronomy	4
Complete one of the following sequences:		10

#### Physics 1 and 2

PHYS 1161 and PHYS 1162	Physics 1 and Lab for PHYS 1161	
PHYS 1165 and PHYS 1166	Physics 2 and Lab for PHYS 1165	

#### Physics for Engineering 1 and 2

PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	

### Intermediate Courses

Code	Title	Hours
PHYS 2303	Modern Physics	4
PHYS 3111	Astrophysical Processes: Decoding the Universe (in governance)	4

### Advanced Course

Code	Title	Hours
PHYS 4111	Multimessenger Astrophysics (in governance)	4

### GPA Requirement

2.000 GPA required in the minor

## Physics, Minor

The physics minor provides a foundation in classical and modern physics and allows students to explore more advanced topics in physics through elective choices.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Courses

Code	Title	Hours
Complete one of the following sequences:		10
<b>Physics 1 and 2</b>		
PHYS 1161 and PHYS 1162	Physics 1 and Lab for PHYS 1161	
PHYS 1165 and PHYS 1166	Physics 2 and Lab for PHYS 1165	
<b>Physics for Engineering 1 and 2</b>		
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	

### Modern Physics

Code	Title	Hours
PHYS 2303	Modern Physics	4

### Elective Courses

Code	Title	Hours
Complete two of the following:		8
MATH 4606	Mathematical and Computational Methods for Physics	
PHYS 2300 to PHYS 5999		

### GPA Requirement

2.000 GPA required in the minor

## Psychology

Website (<http://www.northeastern.edu/psychology/>)

### Peter Bex, PhD

Professor and Chair

617.373.3076

617.373.8714 (fax)

Studies in modern psychology focus on mind, brain, and behavior. Based on empirical research with both humans and animals, psychologists investigate and seek explanations for the behavior and mental life of individuals, develop assessment tools and treatment options for addressing clinical problems, and test applications of psychology in a broad range of contexts.

The psychology curriculum explores such topics as how brain function determines behavior; how we see, hear, and learn; what constitutes personality; the nature of language and cognitive processing; how emotions affect behavior; how individuals work in groups; the efficacy of a range of therapeutic techniques; and how principles of psychology apply to educational, medical, and other settings. Through laboratory practice and experimentation, individual research projects, and small-group seminars, the program provides the opportunity for critical evaluation and in-depth exploration across the diverse topic areas that constitute modern psychology.

Students are eligible for directed study courses, which are individualized research experiences under the supervision of a faculty member. The department also offers honors sections of various courses. Co-op placements are varied and include both community (often mental health) and laboratory settings, depending on a student's interests.

A solid scientific background in psychology helps prepare students for academic careers in teaching and research, as well as professional careers in business, public and social services, education, mental health, law, and medicine. It also provides a strong foundation for graduate study in all areas of psychology, including clinical programs and programs in experimental and applied psychology.

*Note:* A double major in psychology and behavioral neuroscience is not offered due to the similarity in the course curricula of these majors.

## Programs

### Bachelor of Science (BS)

- Psychology (p. 1613)
- American Sign Language and Psychology (p. 1621)
- Business Administration and Psychology (p. 603)
- Computer Science and Cognitive Psychology (p. 764)
- Criminal Justice and Psychology (p. 1633)
- Data Science and Psychology (p. 935)
- Economics and Psychology (p. 1640)
- Health Science and Psychology (p. 1187)
- Human Services and Psychology (p. 1648)
- Linguistics and Psychology (p. 1651)
- Mathematics and Psychology (p. 1548)
- Psychology and Music (p. 503)
- Psychology and Theatre (p. 1662)

### Minor

- Psychology (p. 1666)

## Psychology, BS

The Bachelor of Science degree program in psychology is designed to provide a research-based undergraduate education for students with a broad range of interests in basic and applied psychology. Psychology majors engage in academic course work and other experiences that span the breadth of psychology, as well as in-depth explorations that meet their own specific interests. Students have an opportunity to take fundamental and advanced courses spanning biological psychology, cognition, social psychology, personality psychology, sensation and perception, clinical psychology, applied psychology, learning and motivation, developmental psychology, and other subfields of psychology. By its very nature, psychology is a wide-ranging, cross-cutting field of study, and we encourage and offer interdisciplinary explorations via a highly flexible interdisciplinary cluster of courses that counts toward the BS curriculum, strong ties to other departments and programs, and experiential education to enhance the learning process, including conducting research in faculty laboratories and participation in Northeastern's co-op program.

### Academic Progression Standards

Please see the university's progression standards (p. 88).

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPATH Requirements

All undergraduate students are required to complete the NUPATH Requirements (p. 111).

### Psychology Major Requirements

Code	Title	Hours
<b>Introductory Course</b>		
PSYC 1101	Foundations of Psychology	4
<b>Personal/Social Bases of Behavior (Area A)</b>		
Complete two of the following:		8
PSYC 3400	Personality	
PSYC 3402	Social Psychology	
PSYC 3404	Developmental Psychology	
PSYC 3406	Clinical Psychology and Mental Health	
<b>Biological/Cognitive Bases of Behavior (Area B)</b>		
Complete two of the following:		8
PSYC 3450	Learning and Motivation	
or PSYC 3451	Learning Principles and Behavior Analysis	
PSYC 3452	Sensation and Perception	
PSYC 3458	Biological Psychology	
PSYC 3464	Psychology of Language	
PSYC 3466	Cognition	
<b>Statistics</b>		
Complete the following course. Students who receive transfer credit for the Advanced Placement Statistics exam may complete the 1 SH PSYC 2315 course (requires department permission).		4-5
PSYC 2320	Statistics in Psychological Research	
<b>Psychology Seminar</b>		
Complete one of the following:		4
PSYC 4656	Seminar in Biological Psychology	
PSYC 4658	Seminar in Psycholinguistics	
PSYC 4660	Seminar in Cognition	
PSYC 4662	Seminar in Personality	
PSYC 4664	Seminar in Social Psychology	
PSYC 4666	Seminar in Clinical Psychology	
PSYC 4668	Seminar in Sensation and Perception	
PSYC 4674	Seminar in Cognitive Neuroscience	
PSYC 4676	Seminar in Developmental Psychology	

PSYC 4678	Seminar in Social and Affective Neuroscience	
<b>Lab Requirement</b>		
Complete two psychology lab courses OR one psychology lab course and one psychology directed study research or honors thesis:		8
<i>Lab</i>		
PSYC 4600	Laboratory in Research Design	
PSYC 4604	Laboratory in Learning and Motivation	
PSYC 4606	Laboratory in Biological Psychology	
PSYC 4610	Laboratory in Psycholinguistics	
PSYC 4612	Laboratory in Cognition	
PSYC 4614	Laboratory in Social Psychology	
PSYC 4616	Laboratory in Personality	
PSYC 4622	Laboratory in Sensation and Perception	
PSYC 4624	Laboratory in Affective Science	
PSYC 4626	Laboratory in Life-Span Emotional Development	
PSYC 4628	Laboratory in Developmental Psychology	
<i>Directed Study Research or Honors Thesis</i>		
PSYC 4991 or PSYC 4971	Directed Study Research Junior/Senior Honors Project 2	

## Psychology Required Electives

Code	Title	Hours
Complete five PSYC courses.		20

## Supporting Courses

### INTERDISCIPLINARY CLUSTER

Code	Title	Hours
Complete three of the following courses. Choose from one group only. Students may petition to create their own interdisciplinary cluster.		11-15

#### Educational Psychology

EDUC 1111	Education in the Community	
EDUC 5503	Culture, Equity, Power, and Influence	
EDUC 5504	Child and Adolescent Development, Learning, and Teaching	
EDUC 5570	Inclusion, Equity, and Diversity	

#### Society and Psychology

ANTH 1101	Peoples and Cultures	
ANTH 2302	Gender and Sexuality: A Cross-Cultural Perspective	
ANTH 2315	Religion and Modernity	
LING 3412	Language and Culture	
SOCL 1255	Sociology of the Family	
SOCL 1260	Sociology of Gender	
SOCL 1295	Drugs and Society	

#### Forensic Psychology

CRIM 1120	Criminology	
CRIM 3110	Gender, Crime, and Justice	
CRIM 3120	Race, Crime, and Justice	

#### Cross-Cultural Psychology

ANTH 1101	Peoples and Cultures	
LING 3412	Language and Culture	
LING 3442	Sociolinguistics	

#### Expressive Therapy

ARTF 1121	Conceptual Drawing	
MUSC 1118	Music Therapy 1	
THTR 1130	Introduction to Acting	

#### Counseling and Applied Psychology

CAEP 3480	Counseling Theories and Practice
CAEP 3485	Mental Health and Counseling

## Mathematics Requirement

Code	Title	Hours
Complete one of the following courses:		
CS 1800	Discrete Structures	4
MATH 1213	Interactive Mathematics	
MATH 1215	Mathematical Thinking	
MATH 1231	Calculus for Business and Economics	
MATH 1241	Calculus 1	
MATH 1242	Calculus 2	
MATH 1251	Calculus and Differential Equations for Biology 1	
MATH 1252	Calculus and Differential Equations for Biology 2	
MATH 1340	Intensive Calculus for Engineers	
MATH 1341	Calculus 1 for Science and Engineering	
MATH 1342	Calculus 2 for Science and Engineering	

## BS in Psychology Major Credit Requirements

Complete 68 semester hours in the major. A maximum of 34 semester hours of transfer credit is allowed in the major. *Note:* Up to 12 semester hours of psychology-related electives will count toward the major *only after* the "Interdisciplinary Cluster" section has been completed.

## Program Requirement

128 total semester hours required

## Plan of Study

## American Sign Language and Psychology, BS

American Sign Language (ASL) is estimated to be the third most used language in the United States and its visibility in society is on the rise in recent years. There are roughly 500,000 to 2,000,000 Deaf, DeafBlind, or hard of hearing people in the United States who use ASL as their primary language, and a large number of non-Deaf signers use or learn ASL as a second language. A disproportionate percentage of Deaf people experience socioeconomic disadvantage due to their dual status as members of both a cultural linguistic minority group and a disability group. As a result, there is a broad societal misunderstanding of Deaf, signing people's minority language and culture—their lived experience—which creates barriers to educational and economic opportunity. While state and federal legislation enables improved civic engagement by Deaf, hard of hearing, and DeafBlind individuals, there is continued need to elevate quality of life, equity, and the rich contributions of the diverse members of the American Deaf communities.

The program offers a wide array of courses as well as volunteer, co-op, and research opportunities to learn from Deaf people's lived experiences through community and industry connections.

This combined major educates students in cognitive psychology, psycholinguistics, and the structures of human languages in general and ASL in particular. The curriculum is designed to assist students in acquiring competence in ASL, develop an understanding of the diverse American Deaf communities and Deaf culture, better understand cognitive efforts of interpreters' language transfer, as well as gain insights into various features of spoken language and experience firsthand the principles underlying the spatial organization of discourse required by signed languages. This knowledge and the psychology background from the major provide a foundation for more advanced studies of ASL and interpreting or psychology and Deaf people.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### American Sign Language Requirements

## Business Administration and Psychology, BS

This combined major educates students in business and psychology and the interface between the two disciplines. The scope and sequence of psychology courses provide students with a foundation in the interdisciplinary science of psychology, including statistics and research, social psychology, developmental psychology, cognition, and personality. Business courses provide a foundation in accounting, innovation, marketing, management, and organizational behavior, with the opportunity to concentrate in a specific area of business. Students completing this program should be able to understand the relationships between these fields that pertain to explaining and addressing human behavior and business practices.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Business Requirements

Code	Title	Hours
<b>Required Courses</b>		
ACCT 1201	Financial Accounting and Reporting	4
ACCT 2301	Managerial Accounting	4

## Computer Science and Cognitive Psychology, BS

The computer science and cognitive psychology combined major provides a foundation in general psychology, psychology of language, cognition, and statistics—all supplemented by an experimental laboratory course, seminar course, and psychology electives. Students who choose this program often have a general interest in human psychology or specific interests in artificial intelligence or human-computer interaction.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Computer Science Courses

Code	Title	Hours
<b>Computer Science Overview</b>		
CS 1200	First Year Seminar	1
CS 1210	Professional Development for Khoury Co-op	1
<b>Computer Science Fundamental Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
<b>Computer Science Required Courses</b>		
CS 3000	Algorithms and Data	4
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	5
CS 4100	Artificial Intelligence (Integrative course)	4
CS 4500 or CS 4530	Software Development (Integrative course) Fundamentals of Software Engineering	4
IS 4300	Human Computer Interaction (Integrative course)	4
<b>Khoury Elective Courses</b>		
With adviser approval, a directed study, research, project study, or appropriate graduate-level course may also be taken as a computer science elective.		
Complete twelve credits of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		12
CS 2500 or higher, except CS 5010		
CY 2000 or higher, except CY 4930		
DS 2500 or higher, except DS 4900		
IS 2000 or higher, except IS 4900		

### Psychology Courses

Code	Title	Hours
<b>Required Courses</b>		
PSYC 1101	Foundations of Psychology	4
PSYC 3464	Psychology of Language	4
PSYC 3466	Cognition	4
<b>Statistics</b>		
Complete the following course. Students who receive transfer credit for the Advanced Placement Statistics exam may complete the 1 SH PSYC 2315 course (requires department approval).		4-5
PSYC 2320	Statistics in Psychological Research	
<b>Advanced Psychology</b>		
PSYC 3452	Sensation and Perception	4

or PSYC 3458

Biological Psychology

**Laboratory in Psychology**

Complete one of the following:

4

PSYC 4604	Laboratory in Learning and Motivation
PSYC 4610	Laboratory in Psycholinguistics
PSYC 4612	Laboratory in Cognition
PSYC 4622	Laboratory in Sensation and Perception

**Seminar in Psychology**

Complete one of the following:

4

PSYC 4658	Seminar in Psycholinguistics
PSYC 4660	Seminar in Cognition
PSYC 4668	Seminar in Sensation and Perception
PSYC 4674	Seminar in Cognitive Neuroscience

**Psychology Electives**

Note: Courses satisfying the categories above cannot be reused.

Complete two of the following:

8

PSYC 3402	Social Psychology
PSYC 3404	Developmental Psychology
PSYC 3450	Learning and Motivation
PSYC 3451	Learning Principles and Behavior Analysis
PSYC 3452	Sensation and Perception
PSYC 3458	Biological Psychology
PSYC 4512	Neuropsychology
PSYC 4524	Cognitive Development
PSYC 4610	Laboratory in Psycholinguistics
PSYC 4612	Laboratory in Cognition
PSYC 4622	Laboratory in Sensation and Perception
PSYC 4628	Laboratory in Developmental Psychology
PSYC 4658	Seminar in Psycholinguistics
PSYC 4660	Seminar in Cognition
PSYC 4668	Seminar in Sensation and Perception
PSYC 4674	Seminar in Cognitive Neuroscience
PSYC 4676	Seminar in Developmental Psychology

With prior approval, directed study research and Honors Project courses can also be counted:

PSYC 4970	Junior/Senior Honors Project 1
PSYC 4971	Junior/Senior Honors Project 2
PSYC 4991	Directed Study Research

**Supporting Courses**

Code	Title	Hours
<b>Calculus</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
<b>Computing and Social Issues</b>		
Complete one of the following:		4
AFAM 2600	Issues in Race, Science, and Technology	
CY 4170	The Law, Ethics, and Policy of Data and Digital Technologies	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
ENGL 2150	Literature and Digital Diversity	
HIST 2220	History of Technology	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
IS 1300	Knowledge in a Digital World	
or PHIL 1300	Knowledge in a Digital World	
PHIL 1145	Technology and Human Values	
SOCL 1280	The Twenty-First-Century Workplace	

SOCL 2485	Environment, Technology, and Society
SOCL 4528	Computers and Society

### Computer Science Writing Requirement

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111	First-Year Writing	4
<b>Advanced Writing in the Disciplines</b>		
ENGW 3302 or ENGW 3307 or ENGW 3315	Advanced Writing in the Technical Professions Advanced Writing in the Sciences Interdisciplinary Advanced Writing in the Disciplines	4

### Required General Electives

Code	Title	Hours
Complete 32 semester hours of general electives.		32

### Khoury College GPA Requirement

Minimum 2.000 GPA required in all CS, CY, DS, and IS courses

### NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Understanding Societies and Institutions
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

### Program Requirement

133 total semester hours required

### Plan of Study

## Criminal Justice and Psychology, BS

This combined major educates students in criminal justice and psychology and the interface between the two disciplines. The scope and sequence of psychology courses provide students with a foundation in the interdisciplinary science of psychology, including the biological and psychosocial bases of behavior, learning, personality, and cognition. Criminal justice courses provide a foundation for understanding individual and systemic aspects of criminology and criminal justice. Students completing this program should be able to understand the relationships between the fields, as they relate to understanding and addressing criminal behavior.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Criminal Justice Requirements

Code	Title	Hours
<b>Introduction to Crime, Law, and the Justice System</b>		
What do we know about crime and justice? In these three courses, students have an opportunity to develop a foundational understanding of three related phenomena: why crime exists, how our criminal justice system responds to crime, and the constitutional and legal oversight of this process.		
CRIM 1100	Introduction to Criminal Justice	4
CRIM 1110	Criminal Due Process	4
CRIM 1120	Criminology	4
CRIM 3600	Criminal Justice Research Methods	4
<b>Current Crime and Justice Issues</b>		
These courses introduce students to topical issues related to crime and justice.		
Complete one of the following:		4
CRIM 1300	The Death Penalty	
CRIM 1400	Human Trafficking	
CRIM 1500	Corruption, Integrity, and Accountability	
CRIM 1700	Crime, Media, and Politics	
<b>Understanding and Experiencing Criminal Justice Institutions and Systems</b>		
How does justice work and for whom? These courses introduce students to the systems and institutions tasked with providing justice. Each includes experiential learning components in cooperation with local criminal justice institutions.		
Complete one of the following:		4
CRIM 2310	Courts: The Third Branch of Government	
CRIM 2320	Youth Crime and Justice	
CRIM 2330	Punishment in the Age of Mass Incarceration	
CRIM 2340	Corporate Security: Securing the Private Sector	
CRIM 2350	Policing a Democratic Society	
CRIM 2370	Restorative Justice: Transforming the System	
<b>Crime Problems</b>		
The following courses offer students a deeper look at a range of crime problems.		
Complete one of the following:		4
CRIM 3030	Global Criminology	
CRIM 3060	Political Crime and Terrorism	
CRIM 3070	Corporate and White-Collar Crime	
<b>Systemic Issues</b>		
A consideration of systemic issues facing the criminal justice system.		
Complete one of the following:		4
CRIM 3110	Gender, Crime, and Justice	
CRIM 3120	Race, Crime, and Justice	

**Digital Skills**

Successful students develop digital skills and master digital tools useful for careers related to crime and justice. Students choose one of two courses (each has a required lab). The computer science course introduces students to spreadsheets and databases. The data science course introduces students to programming with data.

Complete one of the following (and the appropriate lab): 4-5

CS 1100 and CS 1101	Computer Science and Its Applications and Lab for CS 1100
DS 2000 and DS 2001	Programming with Data and Data Science Programming Practicum (Social Science Practicum section)

**Criminal Justice Electives**

Rounding out knowledge of crime and justice.

Complete two additional criminal justice electives from the 3000, 4000 or 5000-level. 8

**Psychology Requirements**

Code	Title	Hours
<b>Introductory Course</b>		
PSYC 1101	Foundations of Psychology	4
<b>Mathematics</b>		
Choose one of the following:		4
MATH 1215	Mathematical Thinking	
MATH 1231	Calculus for Business and Economics	
MATH 1241	Calculus 1	
<b>Statistics</b>		
Complete the following. Students who receive transfer credit for the Advanced Placement Statistics exam may complete the 1 SH PSYC 2315 course (requires department permission).		4-5
PSYC 2320	Statistics in Psychological Research	
<b>Personality/Social Bases of Behavior</b>		
Complete two of the following:		8
PSYC 3400	Personality	
PSYC 3402	Social Psychology	
PSYC 3404	Developmental Psychology	
PSYC 3406	Clinical Psychology and Mental Health	
<b>Biological/Cognitive Bases of Behavior</b>		
Complete two of the following:		8
PSYC 3450 or PSYC 3451	Learning and Motivation Learning Principles and Behavior Analysis	
PSYC 3452	Sensation and Perception	
PSYC 3458	Biological Psychology	
PSYC 3464	Psychology of Language	
PSYC 3466	Cognition	
<b>Research Experience</b>		
Complete one of the following:		4
PSYC 4600	Laboratory in Research Design	
PSYC 4606	Laboratory in Biological Psychology	
PSYC 4610	Laboratory in Psycholinguistics	
PSYC 4612	Laboratory in Cognition	
PSYC 4614	Laboratory in Social Psychology	
PSYC 4616	Laboratory in Personality	
PSYC 4622	Laboratory in Sensation and Perception	
PSYC 4624	Laboratory in Affective Science	
PSYC 4626	Laboratory in Life-Span Emotional Development	
<b>Psychology Seminar</b>		
Complete one of the following:		4
PSYC 4656	Seminar in Biological Psychology	
PSYC 4658	Seminar in Psycholinguistics	

PSYC 4660	Seminar in Cognition
PSYC 4662	Seminar in Personality
PSYC 4664	Seminar in Social Psychology
PSYC 4666	Seminar in Clinical Psychology
PSYC 4668	Seminar in Sensation and Perception
PSYC 4674	Seminar in Cognitive Neuroscience
PSYC 4676	Seminar in Developmental Psychology

**Electives**

Complete two PSYC courses. 8

**Integrative Requirement**

## Data Science and Psychology, BS

The psychology and data science combined major offers an integrative curriculum in the study of mind, brain, and behavior and in the collection, manipulation, storage, retrieval, and computational analysis of data in its various forms, including numeric, textual, image, and video data from small to large volumes. The study of psychology draws upon empirical research with both humans and animals to investigate and seek explanations for the behavior and mental life of individuals and develop assessment tools and treatment options for addressing clinical problems. In this program, students have an opportunity to augment such knowledge with skills in big data analysis, data science, and data analytics.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Data Science Requirements

Code	Title	Hours
<b>Computer Science Overview</b>		
Must be taken in alignment with your home college:		
CS 1200 or INSC 1000 or PSYC 1000	First Year Seminar Science at Northeastern Psychology at Northeastern	1
CS 1210 or EESC 2000	Professional Development for Khoury Co-op Professional Development for Co-op	1
<b>Programming Sequence Pathways</b>		
Choose one of two options:		12
<i>Computer Science Option</i>		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	
CS 3500 and CS 3501	Object-Oriented Design and Lab for CS 3500	
<i>Data Science Option</i>		
DS 2000 and DS 2001	Programming with Data and Data Science Programming Practicum	
DS 2500 and DS 2501	Intermediate Programming with Data and Lab for DS 2500	
DS 3500	Advanced Programming with Data	
<b>Computer Science Required Courses</b>		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 3200	Database Design	4
<b>Data Science Foundations</b>		
DS 3000	Foundations of Data Science	4
DS 4200	Information Presentation and Visualization	4
DS 4300	Large-Scale Information Storage and Retrieval	4
DS 4400	Machine Learning and Data Mining 1	4
DS 4420	Machine Learning and Data Mining 2	4
<b>Khoury Elective</b>		
With adviser approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete four semester hours of CS, CY, DS, or IS classes that are not already required. Choose courses within the following ranges:		4

CS 2500 or higher, except CS 5010

CY 2000 or higher, except CY 4930

DS 2500 or higher, except DS 4900

IS 2000 or higher, except IS 4900

## Computer Science Writing Requirements

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111	First-Year Writing	4
or ENGW 1102	First-Year Writing for Multilingual Writers	
<b>Advanced Writing in the Disciplines</b>		
Complete one of the following:		4
ENGW 3302	Advanced Writing in the Technical Professions	
ENGW 3307	Advanced Writing in the Sciences	
ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines

## Economics and Psychology, BS

This combined major educates students in economics and psychology and the interface between the two disciplines. Economics courses provide a foundation in macroeconomics, microeconomics, and applied econometrics. The scope and sequence of psychology courses provide students with a foundation in the interdisciplinary science of psychology, including such topics as cognition, decision making, learning, and motivation. Students completing this program of study should be able to understand how the two fields jointly contribute to explaining the complexity of human behavior in an economic context.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Economics Requirements

Code	Title	Hours
<b>Required Courses</b>		
ECON 1115	Principles of Macroeconomics	4
ECON 1116	Principles of Microeconomics	4
ECON 2315	Macroeconomic Theory	4
ECON 2316	Microeconomic Theory	4
ECON 2560	Applied Econometrics	4
ECON 4692	Senior Economics Seminar	4
or ECON 4997	Senior Economics Thesis	4

### Economics Electives

Complete four ECON courses from the following ranges with no more than two at the ECON 1200–1999 range. The course used to satisfy the integrative course requirement may not be used as an economics elective:

ECON 1200–ECON 1999

ECON 2990–ECON 4689

ECON 4900–ECON 4996

ECON 5200–ECON 5999

### Psychology Requirements

Code	Title	Hours
<b>Required Courses</b>		
PSYC 1101	Foundations of Psychology	4
PSYC 3402	Social Psychology	4
PSYC 3450	Learning and Motivation	4
PSYC 3466	Cognition	4

### Statistics

Complete the following. Students who receive transfer credit for the Advanced Placement Statistics exam may complete the 1 SH PSYC 2315 course (requires department permission):

PSYC 2320 Statistics in Psychological Research

### Required Lab

Complete one of the following:

PSYC 4600 Laboratory in Research Design

PSYC 4606 Laboratory in Biological Psychology

PSYC 4610 Laboratory in Psycholinguistics

PSYC 4612 Laboratory in Cognition

PSYC 4614 Laboratory in Social Psychology

PSYC 4616 Laboratory in Personality

PSYC 4622 Laboratory in Sensation and Perception

PSYC 4624	Laboratory in Affective Science	
PSYC 4626	Laboratory in Life-Span Emotional Development	
PSYC 4628	Laboratory in Developmental Psychology	

**Required Seminar**

Complete one of the following: 4

PSYC 4656	Seminar in Biological Psychology	
PSYC 4658	Seminar in Psycholinguistics	
PSYC 4660	Seminar in Cognition	
PSYC 4662	Seminar in Personality	
PSYC 4664	Seminar in Social Psychology	
PSYC 4666	Seminar in Clinical Psychology	
PSYC 4668	Seminar in Sensation and Perception	
PSYC 4674	Seminar in Cognitive Neuroscience	
PSYC 4676	Seminar in Developmental Psychology	

**Psychology Electives**

Complete three PSYC courses not used to fulfill requirements above. 12

**Other Requirements Outside Major**

Code	Title	Hours
PSYC 1000 or ECON 1000	Psychology at Northeastern Economics at Northeastern	1
EESC 2000 or EESH 2000	Professional Development for Co-op Professional Development for Co-op	1
ENGW 1111	First-Year Writing	4
COOP 3945	Co-op Work Experience	0

**Calculus**

Complete one of the following. It is recommended that MATH 1241 or higher is chosen: 4

MATH 1231 or MATH 1241 or MATH 1245 or MATH 1251 or MATH 1340 or MATH 1341	Calculus for Business and Economics Calculus 1 Calculus with Applications Calculus and Differential Equations for Biology 1 Intensive Calculus for Engineers Calculus 1 for Science and Engineering	
---	--	--

**Computer Science**

Complete one of the following: 4-5

CS 1100 and CS 1101	Computer Science and Its Applications and Lab for CS 1100	
DS 2000 and DS 2001	Programming with Data and Data Science Programming Practicum	
MISM 2510	Fundamentals of Information Analytics	

**Integrative Course**

Code	Title	Hours
ECON 4681 or ECON 3416	Information Economics and Game Theory Behavioral Economics	4

**NUPath Not Fulfilled by Major**

Code	Title	Hours
NUPath EI—Expression and Innovation		4
NUPath IC—Interpreting Culture		4
NUPath DD—Difference and Diversity		4
NUPath ER— Ethical Reasoning		4
NUPath WD—Advanced Writing in the Discipline		4

**Open Electives**

Code	Title	Hours
	Complete three open electives.	12

**Combined Major Credit/ GPA Requirement**

Complete 84 semester hours in the major.

Grades in the following required courses must average to a minimum of C (2.000):

Code	Title	Hours
ECON 2315	Macroeconomic Theory	
ECON 2316	Microeconomic Theory	
ECON 2560	Applied Econometrics	
PSYC 2320	Statistics in Psychological Research	

**Program Requirement**

128 total semester hours required

**Plan of Study****Sample Plan of Study: Four Years, Two Co-ops**

Year 1

## Health Science and Psychology, BS

The combined Bachelor of Science degree program in health science and psychology is designed to provide an interdisciplinary approach to public health and psychology. Through interdisciplinary explorations, students have the opportunity to develop knowledge in health promotion and illness prevention by way of understanding people's behaviors, perceptions, and emotions within the contexts of relationships and culture. This highly flexible curriculum is enhanced by experiential learning opportunities and prepares students to practice in interdisciplinary settings and be successful in sustaining and promoting health across populations.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Health Science Requirements

Code	Title	Hours
<b>Public Health Core</b>		
PHTH 1260 or PHTH 1261	The American Healthcare System Comparative Healthcare Systems	4
PHTH 2300 or PHTH 2301	Communication Skills for the Health Professions Communication Skills for the Health Professions—Global	4
PHTH 2350 or PHTH 2351	Community and Public Health Community and Public Health - Global	4
PHTH 2515	Healthcare Policy and Administration	4
PHTH 4120	Global Perspectives on Discrimination and Health	4
PHTH 4540	Health Education and Program Planning	4
<b>Supporting Courses for Health Science</b>		
BIOL 1111 and BIOL 1112	General Biology 1 and Lab for BIOL 1111	5
BIOL 1113 and BIOL 1114	General Biology 2 and Lab for BIOL 1113	5
CHEM 1161 and CHEM 1162 and CHEM 1163	General Chemistry for Science Majors and Lab for CHEM 1161 and Recitation for CHEM 1161	5

### Psychology Requirements

## Human Services and Psychology, BS

### Overview

Students pursuing a combined degree in human services and psychology integrate the theoretical frameworks and skills relevant to both of these areas of study. This degree curriculum focuses on clinical and policy interventions that promote wellness on the individual and community levels. Situated in a social justice framework, this curriculum emphasizes how structural forces impact psychological and social well-being, barriers to treatment, and inequities in mental health outcomes. Through courses, service-learning, co-op, and research experience, students synthesize theoretical knowledge with practical skills used when working with individuals across the life span and in multiple settings.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Overview and Co-op Courses

Code	Title	Hours
<b>Overview</b>		
HUSV 1000 or PSYC 1000	Human Services at Northeastern Psychology at Northeastern	1
<b>Professional Development for Co-op</b>		
EESH 2000 or EESC 2000	Professional Development for Co-op Professional Development for Co-op	1

### Human Services Requirements

Code	Title	Hours
<b>Human Services Required Courses</b>

## Linguistics and Psychology, BS

### Overview

This combined major is designed to educate students in psychology, linguistics, and the interface between the two disciplines, which are core areas within the field of cognitive science. Students study the formal structures of human language; sociocultural aspects of language use; and the cognitive aspects of language representations, language acquisition, and language processing. Students receive interdisciplinary training in the methods of experimental psychology, psycholinguistics, and linguistic analysis.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Linguistics Requirements

Code	Title	Hours
<b>Linguistics Foundations</b>		
LING 1150	Introduction to Language and Linguistics	4
LING 2350	Linguistic Analysis	4
LING 3412	Language and Culture	4
<b>Linguistic Structure</b>		
Complete three of the following:		12
LING 3420	Phonetics	
LING 3422	Phonology	
LING 3424	Morphology	
LING 3450	Syntax	
LING 3452	Semantics	
<b>Linguistics Electives</b>		
Complete three courses not used to fulfill other degree requirements from the following:		12
DEAF 2700	ASL Linguistics	
LING 3000–LING 4999		

<sup>1</sup> Please visit the Linguistics Courses page (<http://catalog.northeastern.edu/undergraduate/science/linguistics/#coursestext>) within this catalog to review the list of courses in the LING 3000–LING 4999 range.

### Psychology Requirements

Code	Title	Hours
<b>Introductory and Intermediate Psychology</b>		
PSYC 1101	Foundations of Psychology	4
<b>Statistics</b>		
Complete the following course. Students who receive transfer credit for the Advanced Placement Statistics exam may complete the 1 SH PSYC 2315 course (requires department permission).		4-5
PSYC 2320	Statistics in Psychological Research	
<b>Advanced Psychology</b>		
PSYC 3402	Social Psychology	4
PSYC 3466	Cognition	4
<b>Psychology Lab</b>		
Complete one of the laboratory courses or, with prior approval, a directed study or honors project on a topic related to psycholinguistics or cognition:		4
PSYC 4610	Laboratory in Psycholinguistics	
PSYC 4612	Laboratory in Cognition	
PSYC 4970	Junior/Senior Honors Project 1	

PSYC 4971	Junior/Senior Honors Project 2	
PSYC 4991	Directed Study Research	

**Psychology Seminar**

Complete one of the following: 4

PSYC 4658	Seminar in Psycholinguistics	
PSYC 4660	Seminar in Cognition	
PSYC 4674	Seminar in Cognitive Neuroscience	

**Psychology Electives**

A directed study on a topic related to psycholinguistics or cognition may be taken with prior approval.

Complete two of the following (not counted elsewhere): 8

PSYC 3404	Developmental Psychology	
PSYC 3450	Learning and Motivation	
PSYC 3452	Sensation and Perception	
PSYC 3458	Biological Psychology	
PSYC 4522	Psychology of Reading	
PSYC 4524	Cognitive Development	
PSYC 4610	Laboratory in Psycholinguistics	
PSYC 4612	Laboratory in Cognition	
PSYC 4628	Laboratory in Developmental Psychology	
PSYC 4658	Seminar in Psycholinguistics	
PSYC 4660	Seminar in Cognition	
PSYC 4674	Seminar in Cognitive Neuroscience	
PSYC 4676	Seminar in Developmental Psychology	
PSYC 4991	Directed Study Research	

**Integrative Requirements**

Code	Title	Hours
PSYC 3464	Psychology of Language	4

**Experiential Learning**

Complete one of the following options. Courses used to satisfy this requirement will also typically simultaneously satisfy a requirement above. 0-8

Study Abroad (not a Dialogue)		
International Co-op		
LING 4891	Research Seminar in Linguistics	
LING 4970 and LING 4971	Junior/Senior Honors Project 1 and Junior/Senior Honors Project 2	
LING 4991	Directed Study Research	
PSYC 4970 and PSYC 4971	Junior/Senior Honors Project 1 and Junior/Senior Honors Project 2	
PSYC 4991	Directed Study Research	

**Supporting Courses**

Code	Title	Hours
------	-------	-------

**Language Requirement**

Complete two courses in the same language with a grade of C or higher. Proficiency at elementary level 2 or higher is required. 8

**Mathematics Requirement**

Complete one of the following: 4

CS 1800	Discrete Structures	
MATH 1213	Interactive Mathematics	
MATH 1215	Mathematical Thinking	
MATH 1231	Calculus for Business and Economics

## Mathematics and Psychology, BS

In the mathematics and psychology combined-major BS program, psychology and mathematics courses help lay the groundwork for strong basic training that seeks to prepare the student toward developing psychological models using mathematics.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 111).

### Mathematics Requirements

Code	Title	Hours
<b>Problem Solving</b>		
MATH 1365	Introduction to Mathematical Reasoning	4
<b>Calculus</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
<b>Intermediate and Advanced Mathematics</b>		
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 2331	Linear Algebra	4
MATH 3081	Probability and Statistics	4
<b>Math Electives</b>		
Complete two courses in the following range that are not required in the requirements above:		8
MATH 3001 to MATH 5999		

### Psychology Requirements

Code	Title	Hours
<b>Introductory Course</b>		
PSYC 1101	Foundations of Psychology	4
<b>Statistics</b>		
Complete the following course. Students who receive transfer credit for the Advanced Placement Statistics exam may complete the 1 SH PSYC 2315 course (requires department permission).		4-5
PSYC 2320	Statistics in Psychological Research	
<b>Area A (Personality/Social Basis of Behavior)</b>		
Complete two of the following:		8
PSYC 3400	Personality	
PSYC 3402	Social Psychology	
PSYC 3404	Developmental Psychology	
PSYC 3406	Clinical Psychology and Mental Health	
<b>Area B (Biological/Cognitive Basis of Behavior)</b>		
Complete two of the following:		8
PSYC 3450	Learning and Motivation	
PSYC 3452	Sensation and Perception	
PSYC 3458	Biological Psychology	
PSYC 3464	Psychology of Language	
PSYC 3466	Cognition	
<b>Psychology Laboratory</b>		
Complete one of the following:		4
PSYC 4600	Laboratory in Research Design	
PSYC 4606	Laboratory in Biological Psychology	

1656 Mathematics and Psychology, BS

PSYC 4610	Laboratory in Psycholinguistics
PSYC 4612	Laboratory in Cognition
PSYC 4614	Laboratory in Social Psychology
PSYC 4616	Laboratory in Personality
PSYC 4622	Laboratory in Sensation and Perception
PSYC 4624	Laboratory in Affective Science
PSYC 4626	Laboratory in Life-Span Emotional Development
PSYC 4628	Laboratory in Developmental Psychology

**Psychology Capstone Requirement**

Complete one of the following: 4

PSYC 4656	Seminar in Biological Psychology
PSYC 4658	Seminar in Psycholinguistics
PSYC 4660	Seminar in Cognition
PSYC 4662	Seminar in Personality
PSYC 4664	Seminar in Social Psychology
PSYC 4666	Seminar in Clinical Psychology
PSYC 4668	Seminar in Sensation and Perception
PSYC 4674	Seminar in Cognitive Neuroscience
PSYC 4676	Seminar in Developmental Psychology

**Psychology Elective**

Any PSYC course in the 3000 range and up 4

**Integrative Requirement**

Code	Title	Hours
PSYC 4540	Quantitative Topics in Psychology and Behavioral Neuroscience	4

**Mathematics and Psychology Major Credit Requirement**

Complete 76 semester hours in the major.

**Program Requirement**

## Psychology and Music, BS

This combined major educates students in psychology and music and the interface between the two disciplines. The scope and sequence of psychology courses provide students with a foundation in the interdisciplinary science of psychology, including such topics as cognition, psycholinguistics, perception, and the biological basis of behavior. Music courses provide a foundation in music theory, creative music in context, contemporary/ethnomusicology, music perception and cognition, and the psychoacoustics of music. Students completing this program of study should be able to understand how the two fields jointly contribute to explaining human behavior in the domain of music.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements Difference and Diversity (DD), Ethical Reasoning (ER), and Advanced Writing in the Disciplines (WD) are not explicitly satisfied by the required courses. Difference and Diversity (DD) and Ethical Reasoning (ER) can be met through Music in Context. Students are responsible for satisfying any of these requirements not met within the major.

### Psychology Requirements

Code	Title	Hours
<b>Required Courses</b>		
PSYC 1101	Foundations of Psychology	4
PSYC 3452	Sensation and Perception	4
PSYC 3458	Biological Psychology	4
PSYC 3464	Psychology of Language	4
PSYC 3466	Cognition	4
<b>Statistics</b>		
Complete the following course. Students who receive transfer credit for the Advanced Placement Statistics exam may complete the 1 SH PSYC 2315 course (requires department permission):		4-5
PSYC 2320	Statistics in Psychological Research	
<b>Required Lab</b>		
Complete one of the following:		4
PSYC 4600	Laboratory in Research Design	
PSYC 4606	Laboratory in Biological Psychology	
PSYC 4610	Laboratory in Psycholinguistics	
PSYC 4612	Laboratory in Cognition	
PSYC 4614	Laboratory in Social Psychology	
PSYC 4616	Laboratory in Personality	
PSYC 4622	Laboratory in Sensation and Perception	
PSYC 4624	Laboratory in Affective Science	
PSYC 4626	Laboratory in Life-Span Emotional Development	
PSYC 4628	Laboratory in Developmental Psychology	
<b>Required Seminar</b>		
Complete one of the following:		4
PSYC 4656	Seminar in Biological Psychology	
PSYC 4658	Seminar in Psycholinguistics	
PSYC 4660	Seminar in Cognition	
PSYC 4662	Seminar in Personality	
PSYC 4664	Seminar in Social Psychology	
PSYC 4666	Seminar in Clinical Psychology	
PSYC 4668	Seminar in Sensation and Perception	
PSYC 4674	Seminar in Cognitive Neuroscience	
PSYC 4676	Seminar in Developmental Psychology	

**Psychology Electives**

Complete two PSYC courses not used to fulfill requirements above.	8
---	---

**Music Theory Requirements**

Code	Title	Hours
<b>Required Courses</b>		
MUSC 1201	Music Theory 1	4
MUSC 1202	Music Theory 2	4

**Music in Context**

Code	Title	Hours
Select one of the following:		
MUSC 1001	Music in Everyday Life	4
MUSC 1002 and MUSC 1003	Music in Everyday Life and Lab for MUSC 1002	

**Creative Category**

Complete one of the following 4-semester-hour courses, or choose four 1-semester-hour ensembles and/or lessons from the list:	4
---	---

*Coursework Option*

MUSC 2150	Making a Musical: Analysis, Craft, and Creation <sup>1</sup>	
MUSC 2208	Jazz Improvisation	
MUSC 2209	Conducting	
MUSC 2210	Introduction to Songwriting	
MUSI 2232	Music Recording 1	
MUST 1220	Introduction to Music Technology	
MUST 1301	Introduction to Composition	
MUST 2320	Sound Design	

*Ensembles and Lessons Option*

MUSC 1901	Music Lessons 1	
MUSC 1902	Music Lessons 2	
MUSC 1904	Chorus	
MUSC 1905	Concert Band	
MUSC 1906	Orchestra	
MUSC 1907	Wind Ensemble	
MUSC 1911	Jazz Ensemble	
MUSC 1912	Rock Ensemble	
MUSC 1913	Blues/Rock Ensemble	
MUSC 1914	Create Your Own Music	
MUSC 1915	Chamber Ensemble	
MUSC 1917	Jazz Choir and Combo	
MUSC 1918	World Music Ensemble	
MUSC 1919	Fusion Ensemble	
MUSC 1920	Pep Band	

**Contemporary/Popular Music or Global Music/Ethnomusicology Category**

Complete one of the following:	4	
MUSC 2101	Black Popular Music	
MUSC 2150	Making a Musical: Analysis, Craft, and Creation <sup>1</sup>	
MUSC 2310	Popular Music Since 1945	
MUSC 2311	Topics in American Music	
MUSC 2313	Topics in Global Music Cultures	
MUSC 2317	Punk Rock	
MUSC 2320	40,000 Years of Music Technology	
MUSC 2330	Musical Communities of Boston	
MUSC 2331	Topics in Musical Communities	

MUSC 2336	The Festival Experience
MUSC 2340	Divas, DJs, and Double Standards
MUSC 2351	Music, Sound, and the Screen
MUSC 2380	The World of Choral Music
MUSC 3352	Sounding Human
MUSC 3353	Music and the Racial Imagination
MUSC 3354	Sound and the Sacred
MUSC 3360	Ethnography and the Arts
MUSI 3351	Music and Social Justice
MUSI 3360	Global Music Industries in Context
MUSI 3401	Hip Hop in the Music Industry

<sup>1</sup> MUSC 2150 can be used to meet either the creative or the ethnomusicology/contemporary requirement but not both.

### Music Requirements

Code	Title	Hours
MUSC 2350 or INAM 3200	Acoustics and Psychoacoustics of Music Creative Cognition	4
MUSC 3300	Music Perception and Cognition	4
<b>Capstone</b>		
MUSC 4510	Music and the Brain Research	4

### Music Electives

Code	Title	Hours
Complete two courses from MUSC, MUSI, or MUST not used to fulfill the requirements above.		8

### Other Requirements Outside Major

Code	Title	Hours
PSYC 1000 or MUSC 1000	Psychology at Northeastern Music at Northeastern	1
EESC 2000 or EEAM 2000	Professional Development for Co-op Professional Development for Co-op	1
ENGW 1111	First-Year Writing	4
Complete one of the following:		4
MATH 1213	Interactive Mathematics	
MATH 1215	Mathematical Thinking	
MATH 1241	Calculus 1	

### Bridge/Integrative Courses

Code	Title	Hours
Note: MUSC 3300 is already required above.		
MUSC 3300	Music Perception and Cognition	

### BS Psychology/Music Major

Complete 76 semester hours in the major.

### Music Major Grade Requirement

Students must maintain at least a 2.667 grade-point average (B- average) in the requirements of the music half of the combined major and also complete all required music courses with grades of at least C. Students who fail to meet the above standards will be placed on departmental probation; those who remain on probation for two consecutive semesters will be dropped from the major.

### Program Requirement

130 total semester hours required

## Psychology and Theatre, BS

### Overview

This combined major educates students in psychology and theatre and the interface between the two disciplines. The scope and sequence of psychology courses provide students with a foundation in the interdisciplinary science of psychology, including such topics as cognition, psycholinguistics, perception, and the biological basis of behavior. The theatre curriculum provides deep knowledge of theatre that spans design, performance, and the production of innovative forms of theatre, including interactive media, computer graphics, human-computer interaction, and more.

Students completing this program of study should be able to understand how the two fields jointly contribute to explaining human behavior in the domain of theatre.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

NUpath requirements Differences and Diversity (DD) and Ethical Reasoning (ER) can be met through elective courses in PSYC or THTR. Students are responsible for satisfying any of these requirements not met within the major.

### Psychology Requirements

Code	Title	Hours
<b>Required Courses</b>		
PSYC 1101	Foundations of Psychology	4
PSYC 2320	Statistics in Psychological Research	4
PSYC 3400	Personality	4
PSYC 3404	Developmental Psychology	4
PSYC 3450	Learning and Motivation	4
PSYC 3452	Sensation and Perception	4
PSYC 3464	Psychology of Language	4
<b>Psychology Lab Course</b>		
Complete one of the following:		4
PSYC 4600	Laboratory in Research Design	
PSYC 4606	Laboratory in Biological Psychology	
PSYC 4610	Laboratory in Psycholinguistics	
PSYC 4612	Laboratory in Cognition

PSYC 4616	Laboratory in Personality	
PSYC 4622	Laboratory in Sensation and Perception	
PSYC 4624	Laboratory in Affective Science	
PSYC 4626	Laboratory in Life-Span Emotional Development	
PSYC 4628	Laboratory in Developmental Psychology	
PSYC 4632	Laboratory in Psychophysiology	
<b>Psychology Seminar</b>		
Complete one of the following:		4
PSYC 4656	Seminar in Biological Psychology	
PSYC 4658	Seminar in Psycholinguistics	
PSYC 4660	Seminar in Cognition	
PSYC 4662	Seminar in Personality	
PSYC 4664	Seminar in Social Psychology	
PSYC 4666	Seminar in Clinical Psychology	
PSYC 4668	Seminar in Sensation and Perception	

PSYC 4674 Seminar in Cognitive Neuroscience

PSYC 4676 Seminar in Developmental Psychology

### Psychology Electives

Complete two additional 4-semester-hour PSYC courses not used to fulfill requirements above from the following: 8

PSYC 1000–PSYC 5999

## Theatre Requirements

A minimum grade of C is required in all THTR & INAM courses.

Code	Title	Hours
<b>Foundational Courses</b>		
INAM 2000	Ethics in Creativity	4
THTR 1101	Introduction to Theatre	4
THTR 1120	Acting 1	4
THTR 1131	Introduction to Technical Theatre	4
THTR 1270	Introduction to Theatrical Design	4
THTR 3325	Dramaturgical Inquiry	4
<b>Making Theatre</b>		
THTR 1100	Production Experience 1	1
THTR 2000	Production Experience 2	1
<b>Texts, Community, &amp; Social Context</b>		
Complete one of the following:		4
INAM 1300 and INAM 1301	The Ethics of Narrative in Theatre and The Ethics of Narrative in Theatre Seminar	
THTR 1215	Activism and Performance	
THTR 1220	Race, Power, and Performance	
THTR 1400	Documentary Theatre Project	
THTR 2200	The American Black Theatre Experience	
THTR 2340	Theatre and Society	
THTR 2500	Breaking the Glass Ceiling: Women in Theatre	
THTR 2983	Topics in Theatre History and Culture	
THTR 3100	Creative Storytelling for Social Engagement	
THTR 3200	Queer Theatre and Performance	
THTR 3650	Performing Theory	
<b>Electives</b>		
Complete two of the following:		8
THTR 2200	The American Black Theatre Experience	
THTR 2310	History of Musical Theatre	
THTR 2330	Playwriting	
THTR 2335	Boston Theatre Experience	
THTR 2340	Theatre and Society	
THTR 2342	Acting 2	
THTR 2345	Acting for the Camera	
THTR 2346	Viewpoints	
THTR 2370	Lighting Design	
THTR 2380	Costume Design	
THTR 2385	Fashion Construction and Pattern Making	
THTR 2400	Scenic Design	
THTR 2600	Voice and Speech Training	
THTR 2983	Topics in Theatre History and Culture	
THTR 2993	Topics in Dance	
THTR 3100	Creative Storytelling for Social Engagement	
THTR 3200	Queer Theatre and Performance	
THTR 3400	Stage Combat	

THTR 3550	Directing for the Stage
THTR 3650	Performing Theory
THTR 3670	Mixed-Media Performance Lab
THTR 3973	Topics in Performance Studies
THTR 4345	Advanced Acting for the Camera
THTR 5300	Devised Theatre Project
THTR 5450	Acting 3
THTR 5700	Design for Immersive Performance

## Integrative Requirements

Code	Title	Hours
INAM 3200	Creative Cognition	4
THTR 4702	Capstone: Creative Practice Research Project	4

## Supporting Courses

Code	Title	Hours
PSYC 1000 or THTR 1000	Psychology at Northeastern Theatre at Northeastern	1

### Mathematics

Complete one of the following: 4

MATH 1213	Interactive Mathematics
MATH 1215	Mathematical Thinking
MATH 1241	Calculus 1

Complete one course from approved NUpath DD options. <sup>1</sup> 4

Complete one course from approved NUpath ER options. <sup>2</sup> 4

Complete first-year writing course. 4

Complete NUpath Integrating Knowledge Through Experience co-op experience.

Complete open electives to fulfill the total program hours.

<sup>1</sup> Some PSYC and THTR electives fill NUpath DD requirements.

<sup>2</sup> Some PSYC and THTR electives fill NUpath ER requirements.

## Program Requirements

131 total semester hours required

**Total Hours: 132**

## Psychology, Minor

The Department of Psychology offers a minor in psychology, which involves taking five psychology courses, some required and some elective, that focus on the multidisciplinary study of mind, brain, and behavior. The minor accommodates students with a broad range of interests in basic and applied psychology. Students can elect to take fundamental and advanced courses spanning biological psychology, cognition, social psychology, personality psychology, sensation and perception, clinical psychology, applied psychology, learning and motivation, developmental psychology, or other subfields of psychology to craft a minor that reflects their interests within this wide-ranging field.

### Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

*Note:* A maximum of two courses (or 8 semester hours) of transfer credit may count toward the minor. This minor is not available to students majoring in behavioral neuroscience or in any combined major that involves psychology. Courses taken pass/fail and receiving an S grade may not be used toward the minor.

Code	Title	Hours
<b>Required Course</b>		
PSYC 1101	Foundations of Psychology	4
<b>Personal/Social Bases of Behavior (Area A)</b>		
Transfer courses are not permitted to fulfill the Area A requirement.		
Complete one of the following:		4
PSYC 3400	Personality	
PSYC 3402	Social Psychology	
PSYC 3404	Developmental Psychology	
PSYC 3406	Clinical Psychology and Mental Health	
<b>Biological/Cognitive Bases of Behavior (Area B)</b>		
Transfer courses are not permitted to fulfill the Area B requirement.		
Complete one of the following:		4
PSYC 3450	Learning and Motivation	
PSYC 3452	Sensation and Perception	
PSYC 3458	Biological Psychology	
PSYC 3464	Psychology of Language	
PSYC 3466	Cognition	

### Elective Courses

Code	Title	Hours
Complete two PSYC courses.		8

### GPA Requirement

2.000 GPA required in the minor

## Interdisciplinary Programs

### Behavioral Neuroscience

#### Jennifer Ingemi, PhD

Assistant Teaching Professor and Interim Director

305 Nightingale Hall  
617.373.2852  
[bns@northeastern.edu](mailto:bns@northeastern.edu)

Behavioral neuroscience is a broad and dynamic interdisciplinary field that focuses on understanding physiological brain mechanisms and how they give rise to behavioral functions in humans and animals. The relationship between the brain's activity and an organism's behavior, both healthy and pathological, is examined at multiple levels of analysis, from how a cell functions to how a facial expression conveys trust or fear.

As a behavioral neuroscience major, you will take courses across multiple departments to acquire foundational knowledge and strong critical thinking skills in the disciplines of biology, psychology, physical sciences, and mathematics. Through our combined majors, you can explore the intersection of behavioral neuroscience with complementary disciplines including philosophy, design, computer science, and data science. For some of our majors, we offer an accompanying PlusOne Master of Science in Bioinformatics or Applied Behavior Analysis.

Ample opportunities exist for students to put theory into practice while acquiring valuable hands-on research and clinical experience at renowned institutions across the world through Northeastern University's co-op program. Faculty-mentored directed studies and honors projects are guided by investigators with shared interests from academic units, centers, and institutes throughout campus.

Our rigorous and comprehensive curriculum is designed to prepare students for employment in clinical settings or the biotech and pharmaceutical industry or for further graduate training in a plethora of scientific disciplines or in healthcare professions. Our graduates are qualified for a wide variety of careers including nonprofits, law, science writing, Big Data, artificial intelligence, and more.

---

### Biochemistry

Website (<https://cos.northeastern.edu/biochemistry/>)

Faculty Advisor website (<http://tinyurl.com/bioadv/>)

#### Kirsten Fertuck, PhD

Associate Teaching Professor and Director

203 Mugar Life Sciences Building  
617.373.2852

Biochemistry focuses on the chemical processes occurring in the wide variety of living systems and touches essentially all aspects of our own lives. Our Northeastern University program engages you in two integrated paths to a career in biochemistry: rigorous coursework that is designed to prepare you to interpret the ever-expanding knowledge base and hands-on learning that positions you to leverage cutting-edge technology to solve fundamental problems in the chemistry of life.

After required basic coursework in biochemistry, biology, chemistry, physics, and mathematics, our majors select elective courses that reflect many areas of biochemistry including neuroscience, bioorganic chemistry, stem cell and regenerative biology, microbial biotechnology, and systems biology and engineering.

In our interdisciplinary program, students take advantage of faculty-mentored research guided by investigators from bioengineering, biology, chemical engineering, chemistry, pharmaceutical sciences, physics, psychology, and other academic units.

Northeastern's signature co-op program provides complementary opportunities in world-class biotechnology companies, hospitals, and research facilities as close as Boston and as far as your global interest takes you.

Our biochemistry program is designed to prepare students to enter the job market directly or to go on to graduate, medical, veterinary, dental, law, or business school. Our graduates are qualified for a wide range of careers that span academics, industry, government, and medicine, working in laboratory or clinical research, regulation and quality control, production, marketing, or information systems.

### Linguistics

Website (<https://cos.northeastern.edu/linguistics/>)

**Adam Cooper, PhD**

Teaching Professor and Director

617.373.4553

linguistics@northeastern.edu

Linguistics is the scientific study of human language. A growing and exciting field, it has links to a diverse range of others, including psychology, philosophy, neuroscience, cognitive science, computer science, artificial intelligence, sociology, language teaching, anthropology, and education.

Linguists work to understand the structures and social uses of human language at all levels. Questions about linguistic structures and cognitive structures include: How do children learn to speak? How is language represented in the mind? What do all languages, including sign languages, have in common? How is language different from the communication systems used by whales, bees, and chimpanzees? What linguistic information do computers need in order for us to converse with them? What are the neurological tie-ins of language disorders such as aphasia or Williams Syndrome, and what can such impairments tell us about the brain mechanisms for language? These scientific and technological questions lead us to ask other questions about language and society: How might we think about linguistic controversies, including debates about official languages, Black English, gender bias, and bilingualism in education? Linguistics attempts to answer each of these questions and covers a surprisingly broad range of topics related to language and communication. And cutting-edge work in cognitive science investigates how natural languages are acquired and processed. Computational linguists apply linguistic theory to build all of the applications that we use that interface with language: grammar checkers, translation programs, search engines, browsers, voice recognition, and speech synthesis. To work in a field that involves language in any way, you will need to know how language works, the core of the field of linguistics.

Linguistics at Northeastern University offers courses examining the structure of language (such as phonetics, phonology, morphology, syntax, and semantics); the sociocultural nature of language (such as language and culture, language and gender, and sociolinguistics); and applied fields (such as language acquisition, language change, and historical linguistics).

Students can pursue a major in linguistics or one of a number of combined majors, including linguistics and psychology, linguistics and cultural anthropology, linguistics and English, linguistics and communication studies, computer science and linguistics, data science and linguistics, American Sign Language and linguistics, and linguistics and speech-language pathology and audiology. A minor in linguistics is also available.

Linguistics offers a variety of co-ops, including positions at local and national companies involved in speech recognition and production, as well as at Northeastern's own language processing and language acquisition labs in the Department of Psychology. Linguistics majors can also participate in international co-ops—for example, working with researchers at the University of Kaiserslautern in Germany.

Students with backgrounds in linguistics have pursued advanced degrees in fields including law, cognitive science, education, English, interpreting, business, speech-language pathology, computer science, developmental psychology, sociology, and linguistics itself. Other graduates have gone on to work in neurological research, computational linguistics, translation, language software, education, dictionary publishing, robotics, and criminal justice.

## Behavioral Neuroscience, BS

### Overview

The behavioral neuroscience curriculum focuses on the biological bases underlying behavior under healthy and pathological states. The program combines the disciplines of biology and psychology with a strong background in basic physical sciences and mathematics to understand how the behavior of humans and animals is controlled by physiological systems. Students gain a solid foundation in the anatomical and functional specializations of the brain and neural mechanisms from neurons to circuits to networks. Students then choose from a range of advanced electives to delve deeply into diverse specializations and current topics in the field.

*Note:* Due to overlap in course content, double majoring in behavioral neuroscience with any of the following majors is not permitted: psychology, biology, cell and molecular biology, or biochemistry.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Behavioral Neuroscience Foundation Courses

Code	Title	Hours
BIOL 1107 and BIOL 1108	Foundations of Biology and Lab for BIOL 1107	5
BIOL 2299	Inquiries in Biological Sciences	4
BIOL 2301 and BIOL 2302	Genetics and Molecular Biology and Lab for BIOL 2301	5
BIOL 3405	Neurobiology	4
BNSC 1000	Behavioral Neuroscience at Northeastern	1
PSYC 1101	Foundations of Psychology	4
PSYC 3200	Clinical Neuroanatomy	4
PSYC 3458	Biological Psychology	4
Complete one of the following. Students who receive transfer credit for the Advanced Placement Statistics exam may complete the 1 SH PSYC 2315 course (requires department permission).		4-5
ENVR 2500 and ENVR 2501	Biostatistics and Lab for ENVR 2500	
PSYC 2320	Statistics in Psychological Research	

### Behavioral Neuroscience Advanced Courses

Code	Title	Hours
Complete four of the following (at least two must be numbered in the 4000–5999 range):		16-17
BIOL 3415	Current Topics in Behavioral Neuroscience	
BIOL 3601	Neural Systems and Behavior	
BIOL 3605	Developmental Neurobiology	
BIOL 4705	Neurobiology of Cognitive Decline	
BIOL 4709	Neurobiology of Learning and Memory	
BIOL 5587 or BIOL 3405	Comparative Neurobiology Neurobiology	
BIOL 5595	Cell and Molecular Neuroscience	
BIOL 5601	Multidisciplinary Approaches in Motor Control	
PSYC 3506	Neuropsychology of Fear	
PSYC 3508	Behavioral Endocrinology	
PSYC 3510	Brain, Behavior, and Immunity	
PSYC 4510	Psychopharmacology	
PSYC 4512	Neuropsychology	

PSYC 4514	Clinical Neuroscience
PSYC 4540	Quantitative Topics in Psychology and Behavioral Neuroscience
PSYC 4570	Behavioral Genetics
PT 5410 and PT 5411	Functional Human Neuroanatomy and Lab for PT 5410

One course may be an experiential course:

BIOL 4970	Junior/Senior Honors Project 1
BIOL 4971	Junior/Senior Honors Project 2
BIOL 4991	Research
BNSC 4970	Junior/Senior Honors Project 1
BNSC 4971	Junior/Senior Honors Project 2
BNSC 4991	Research
BNSC 4994	Internship
PSYC 4965	Undergraduate Teaching Experience
PSYC 4970	Junior/Senior Honors Project 1
PSYC 4971	Junior/Senior Honors Project 2
PSYC 4991	Directed Study Research

## Behavioral Neuroscience Elective Courses

Code	Title	Hours
------	-------	-------

### Psychology Elective

An additional behavioral neuroscience core course may be used to fulfill this requirement.

Complete one of the following: 4

PSYC 3404	Developmental Psychology
PSYC 3406	Clinical Psychology and Mental Health
PSYC 3450	Learning and Motivation
PSYC 3451	Learning Principles and Behavior Analysis
PSYC 3452	Sensation and Perception
PSYC 3464	Psychology of Language
PSYC 3466	Cognition
PSYC 3540	Environmental Psychology
PSYC 4524	Cognitive Development

### Biology Elective

Complete one of the following: 4-5

BIOL 3401	Comparative Vertebrate Anatomy
BIOL 3409	Current Topics in Biology
BIOL 3411	Current Topics in Cell and Molecular Biology
BIOL 3421 and BIOL 3422	Microbiology and Lab for BIOL 3421
BIOL 3603	Mammalian Systems Physiology
BIOL 3611 and BIOL 3612	Biochemistry and Lab for BIOL 3611
BIOL 4707	Cell and Molecular Biology
BIOL 5543	Stem Cells and Regeneration
BIOL 5573	Medical Microbiology
BIOL 5581	Biological Imaging
BIOL 5591	Advanced Genomics
BIOL 5593	Cell and Molecular Biology of Aging

### Research Elective

Complete one of the following: 4

BIOL 2309	Biology Project Lab
PSYC 4600	Laboratory in Research Design
PSYC 4604	Laboratory in Learning and Motivation
PSYC 4606	Laboratory in Biological Psychology

PSYC 4612	Laboratory in Cognition
PSYC 4622	Laboratory in Sensation and Perception
PSYC 4624	Laboratory in Affective Science
PSYC 4626	Laboratory in Life-Span Emotional Development
PSYC 4632	Laboratory in Psychophysiology

**Capstone Course**

Complete one of the following: 4

BIOL 4701	Biology Capstone
PSYC 4654 to PSYC 4678	

**Behavioral Neuroscience Supporting Courses**

Code	Title	Hours
CHEM 1161 and CHEM 1162	General Chemistry for Science Majors and Lab for CHEM 1161	5
CHEM 2311 and CHEM 2312	Organic Chemistry 1 and Lab for CHEM 2311	5
CHEM 2313 and CHEM 2314	Organic Chemistry 2 and Lab for CHEM 2313	5
MATH 1341 or MATH 1241	Calculus 1 for Science and Engineering Calculus 1	4

Complete one of the following: 5

DS 2000 and DS 2001	Programming with Data and Data Science Programming Practicum
PHYS 1145 and PHYS 1146	Physics for Life Sciences 1 and Lab for PHYS 1145
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151
PHYS 1161 and PHYS 1162 and PHYS 1163	Physics 1 and Lab for PHYS 1161 and Recitation for PHYS 1161
PHYS 1171 and PHYS 1172 and PHYS 1173	Physics 1 for Bioscience and Bioengineering and Lab for PHYS 1171 and Interactive Learning Seminar for PHYS 1171

**Behavioral Neuroscience Major Credit/GPA Requirement**

Complete 90 semester hours in the major with a minimum 2.000 GPA.

Due to overlap in course content, double majoring in behavioral neuroscience with any of the following majors is not permitted: psychology, biology, cell and molecular biology, or biochemistry.

**Program Requirement**

132 total semester hours required

## Behavioral Neuroscience and Design, BS

### Overview

The behavioral neuroscience and design combined major engages students in an interdisciplinary study across the biology, psychology, and Art + Design departments to integrate fundamental design courses with a strong foundation in the physiological brain mechanisms that give rise to behavioral functions. The latest research in neuroscience and psychology enables designers to maximize the impact of their designs and, conversely, complex neuroscientific concepts can be made intelligible to a wider public through creative visual works. Students in this major have the opportunity to learn about the inner workings of the brain and how its various structures interact to enhance their approach to design methodologies. Students can then apply these principles to biomimetic medical devices as well as data and network visualization.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Behavioral Neuroscience Requirements

## Behavioral Neuroscience and Philosophy, BS

### Overview

The behavioral neuroscience and philosophy combined degree program engages students in the interdisciplinary study across the biology, psychology, and philosophy departments. The major provides rigorous training in both disciplines with a specific focus on understanding seminal questions concerning human nature and the mind. Courses in the basic sciences will lay a strong foundation in biology, chemistry, and data analytics that are relevant to neuroscience. In behavioral neuroscience core courses, students will examine the structure and function of the human nervous system in order to explore brain mechanisms that give rise to behavioral functions, including cognitive processes, as well as pathological states. In philosophy courses, successful students will develop core analytics skills, including ethical reasoning; learn to recognize and question deep theoretical assumptions at the heart of scientific theories and practice; and explore the social and ethical dimensions of neuroscience and scientific practice more broadly. The fields of behavioral neuroscience and philosophy are further bridged with course work that is designed to enable students to apply neuroscientific concepts to philosophical, moral, and ethical questions.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Behavioral Neuroscience Requirements

Code	Title	Hours
<b>Behavioral Neuroscience Overview</b>		
BNSC 1000	Behavioral Neuroscience at Northeastern <sup>1</sup>	1
EESC 2000	Professional Development for Co-op <sup>2</sup>	1
<b>COS Foundations</b>		
BIOL 1107 and BIOL 1108	Foundations of Biology and Lab for BIOL 1107	5
BIOL 2299	Inquiries in Biological Sciences	4
BIOL 2301 and BIOL 2302	Genetics and Molecular Biology and Lab for BIOL 2301	5
CHEM 1161 and CHEM 1162	General Chemistry for Science Majors and Lab for CHEM 1161	5
CHEM 2311 and CHEM 2312	Organic Chemistry 1 and Lab for CHEM 2311	5
PSYC 1101	Foundations of Psychology	4
<b>Mathematics Foundation</b>		
MATH 1251 or MATH 1341	Calculus and Differential Equations for Biology 1 Calculus 1 for Science and Engineering	4
<b>Statistics Foundation</b>		
Complete one of the following. Students who receive transfer credit for the Advanced Placement Statistics exam may complete the 1 SH PSYC 2315 course (requires department permission).		4-5
ENVR 2500 and ENVR 2501	Biostatistics and Lab for ENVR 2500	
PSYC 2320	Statistics in Psychological Research	
<b>Behavioral Neuroscience Foundation</b>		
PSYC 3200	Clinical Neuroanatomy	4
PSYC 3458	Biological Psychology	4
<b>Psychology Elective</b>		
Complete one of the following:		4
PSYC 1214	The Moral Mind: The Science Underlying Ethical Decision-Making and Virtuous Character	
PSYC 3404	Developmental Psychology	
PSYC 3406	Clinical Psychology and Mental Health	

PSYC 3450	Learning and Motivation
PSYC 3451	Learning Principles and Behavior Analysis
PSYC 3452	Sensation and Perception
PSYC 3464	Psychology of Language
PSYC 3466	Cognition
PSYC 4524	Cognitive Development

**Behavioral Neuroscience Core Courses**

Complete two of the following:	8
BIOL 3415	Current Topics in Behavioral Neuroscience
BIOL 3601	Neural Systems and Behavior
BIOL 3605	Developmental Neurobiology
BIOL 4705	Neurobiology of Cognitive Decline
BIOL 5595	Cell and Molecular Neuroscience
BIOL 5601	Multidisciplinary Approaches in Motor Control
PSYC 3506	Neuropsychology of Fear
PSYC 3508	Behavioral Endocrinology
PSYC 3510	Brain, Behavior, and Immunity
PSYC 4510	Psychopharmacology
PSYC 4512	Neuropsychology
PSYC 4514	Clinical Neuroscience
PSYC 4570	Behavioral Genetics

**Upper-Division Elective**

Complete one course that is not already taken as long as pre-requisites have been met:	4
BNSC 4970 or higher	
BIOL 3403 or higher	
PSYC 3404 or higher	

<sup>1</sup> Students entering through CSSH may take Philosophy at Northeastern (PHIL 1000).

<sup>2</sup> Students entering through CSSH may take Professional Development for Co-op (EESH 2000).

**Philosophy Requirements**

Code	Title	Hours
<b>Philosophy Foundation</b>		
PHIL 1105 or PHIL 3050	Science and Pseudoscience Information and Uncertainty	4
PHIL 1115	Introduction to Logic	4
PHIL 1145	Technology and Human Values	4
PHIL 2325 or POLS 2325	Ancient Philosophy and Political Thought Ancient Philosophy and Political Thought	4
PHIL 2330	Modern Philosophy	4
<b>Philosophy Restricted Electives</b>		
Complete eight credits from the following list, not taken to fulfill other requirements:		8
PHIL 3305	Philosophy of Emotions	
PHIL 3360	Scientific Approaches to Philosophy	
PHIL 3435	Moral Philosophy	
PHIL 4500	Theory of Knowledge	
PHIL 4510	Philosophy of Science	
PHIL 4535	Philosophy of Mind	
PHIL 4555	Philosophy of Biology	

**Additional Electives**

Complete two additional PHIL courses, not taken to fulfill other requirements.	8
--	---

**Integrative Requirements**

Code	Title	Hours
BIOL 4709 or BIOL 5587	Neurobiology of Learning and Memory Comparative Neurobiology	4
PHIL 4535 or PHIL 4555	Philosophy of Mind Philosophy of Biology	4

**Writing Courses**

Code	Title	Hours
<b>College Writing</b>		
ENGW 1111 or ENGW 1102	First-Year Writing First-Year Writing for Multilingual Writers	4
<b>Advanced Writing in the Disciplines</b>		
ENGW 3307 or ENGW 3308 or ENGW 3309 or ENGW 3315	Advanced Writing in the Sciences Advanced Writing in the Social Sciences Advanced Writing in the Humanities Interdisciplinary Advanced Writing in the Disciplines	4

**Required General Electives**

Code	Title	Hours
	Complete 16 credits of general electives.	16

**Behavioral Neuroscience GPA Requirement**

A minimum 2.000 GPA in all behavioral neuroscience courses is required.

**Major Credit Hour Requirement**

96 total semester hours required in major.

**Program Requirement**

130 total semester hours required

**Plan of Study****Sample Plans of Study****FIVE YEARS, THREE CO-OPS**

Year 1								
Fall	Hours	Spring	Hours	Summer 1	Hours	Summer 2	Hours	Hours

## Biochemistry, BS

### Overview

Website (<http://www.northeastern.edu/biochemistry/>)

Advising website ([https://docs.google.com/document/d/1JgPCHpZvKA\\_iMN4j2guuEfp1BiaVdLfBvhk9kMEAy9k/edit/](https://docs.google.com/document/d/1JgPCHpZvKA_iMN4j2guuEfp1BiaVdLfBvhk9kMEAy9k/edit/))

Biochemistry focuses on the chemical processes occurring in the wide variety of living systems and touches essentially all aspects of our own lives. Our Northeastern program engages you in two integrated paths to a career in biochemistry: rigorous course work that is designed to prepare you to interpret the ever-expanding knowledge base and hands-on learning that positions you to leverage cutting-edge technology to solve fundamental problems in the chemistry of life.

After required basic course work in biochemistry, biology, chemistry, physics, and mathematics, our majors select elective courses that reflect many areas of biochemistry including neuroscience, bioorganic chemistry, stem cell and regenerative biology, microbial biotechnology, and systems biology and engineering.

In our interdisciplinary program, students take advantage of faculty-mentored research guided by investigators from bioengineering, biology, chemical engineering, chemistry, pharmaceutical sciences, physics, psychology, and other academic units.

Northeastern's signature co-op program provides complementary opportunities in world-class biotechnology companies, hospitals, and research facilities as close as Boston and as far as your global interest takes you.

Our biochemistry program prepares students to enter the job market directly or go on to graduate, medical, veterinary, dental, law, or business school. Our graduates are qualified for a wide range of careers that span academics, industry, government, and medicine, working in laboratory or clinical research, regulation and quality control, production, marketing, or information systems.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Biochemistry Major Requirements

Code	Title	Hours
<b>Introduction to College</b>		
BIOC 1000 or INSC 1000	Biochemistry at Northeastern Science at Northeastern	
<b>Biology Foundations</b>		
<i>Foundations</i>		
BIOL 1107 and BIOL 1108	Foundations of Biology and Lab for BIOL 1107	5
<i>Inquiries</i>		
BIOL 2299	Inquiries in Biological Sciences	4
<i>Techniques</i>		
BIOL 2309	Biology Project Lab	4
<b>Genetics and Molecular Biology</b>		
BIOL 2301 and BIOL 2302	Genetics and Molecular Biology and Lab for BIOL 2301	5
<b>General Chemistry</b>		
CHEM 1161 and CHEM 1162	General Chemistry for Science Majors and Lab for CHEM 1161	5
<b>Organic Chemistry 1</b>		
CHEM 2311 and CHEM 2312	Organic Chemistry 1 and Lab for CHEM 2311	5
<b>Organic Chemistry 2</b>		

CHEM 2313 and CHEM 2314	Organic Chemistry 2 and Lab for CHEM 2313	5
<b>Physical Chemistry</b>		
CHEM 3431 and CHEM 3432	Physical Chemistry and Lab for CHEM 3431	5
<b>Biochemistry Courses</b>		
BIOL 3611 and BIOL 3612	Biochemistry and Lab for BIOL 3611	5
BIOL 4707	Cell and Molecular Biology	4
Complete one of the following:		3-5
CHEM 3331 and CHEM 3332	Bioanalytical Chemistry and Lab for CHEM 3331	
CHEM 5620	Protein Chemistry	
<b>Experiential Learning Introduction</b>		
EESC 2000	Professional Development for Co-op	1
<b>Capstone</b>		
Please complete one of the following options to fulfill the capstone requirement:		4-5
BIOC 4971	Junior/Senior Honors Project 2	
BIOC 4991 and BIOC 4900	Research and Biochemistry Capstone	
BIOC 4994 and BIOC 4900	Internship and Biochemistry Capstone	
BIOL 4701	Biology Capstone	
BIOL 4991 and BIOC 4900	Research and Biochemistry Capstone	
CHEM 4750	Senior Research	
CHEM 4901 and BIOC 4900	Undergraduate Research and Biochemistry Capstone	

## Biology and Chemistry Advanced Electives

Code	Title	Hours
Complete 3 courses for a total of at least 10 semester hours. One must be a lecture-based BIOL course and one must be a lecture-based CHEM course. The third may be BIOL, CHEM, or Research.		10

### Biology

BIOL 2311 to BIOL 5999

### Chemistry

CHEM 2310 to CHEM 5999

### Research Option

Up to 4 semester hours may be biochemistry-related research for credit:

BIOC 4970	Junior/Senior Honors Project 1	
BIOC 4971	Junior/Senior Honors Project 2	
BIOC 4991	Research	
BIOC 4994	Internship	
BIOL 4970	Junior/Senior Honors Project 1	
BIOL 4991	Research	
CHEM 4750	Senior Research	
CHEM 4901	Undergraduate Research	
CHEM 4970	Junior/Senior Honors Project 1	

## Biochemistry Breadth Courses

A minimum GPA of 2.000 is required for the biochemistry breadth courses.

Code	Title	Hours
<b>Mathematics Courses</b>		
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4

**Physics Courses***Physics 1*

Complete a lecture and lab set for Physics 1:	5
---	---

PHYS 1145 and PHYS 1146	Physics for Life Sciences 1 and Lab for PHYS 1145	
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	
PHYS 1161 and PHYS 1162	Physics 1 and Lab for PHYS 1161	
PHYS 1171 and PHYS 1172 and PHYS 1173	Physics 1 for Bioscience and Bioengineering and Lab for PHYS 1171 and Interactive Learning Seminar for PHYS 1171	

*Physics 2*

Complete a lecture and lab set for Physics 2:	5
---	---

PHYS 1147 and PHYS 1148	Physics for Life Sciences 2 and Lab for PHYS 1147	
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	
PHYS 1165 and PHYS 1166	Physics 2 and Lab for PHYS 1165	
PHYS 1175 and PHYS 1176 and PHYS 1177	Physics 2 for Bioscience and Bioengineering and Lab for PHYS 1175 and Interactive Learning Seminar for PHYS 1175	

**Intermediate or Advanced Science**

Complete one course from the following:	4-5
---	-----

BIOL 2301 to BIOL 5999
CHEM 2311 to CHEM 5999
EEMB 2290 to EEMB 5999
ENVR 2310 to ENVR 5999
MATH 2280 to MATH 5999
PHYS 2303 to PHYS 5999
PSYC 2320 to PSYC 5999

**Biochemistry Major Credit/GPA Requirements**

Complete 82 semester hours in the major with a cumulative GPA of 2.000.

Due to overlap in course content, double majoring in biochemistry and biology, biochemistry and cell and molecular biology, biochemistry and behavioral neuroscience, or biochemistry and chemistry is not permitted.

**Program Requirement**

136 total semester hours required

**Plan of Study**

Please note that these are sample plans of study. While the requirements are the same for all students, individual schedules may vary.

## Linguistics, BS

### Overview

The major in linguistics is designed to provide students with a strong foundation in the study of linguistics at both the structural and social levels. Coursework on the structural side focuses on the internal structures that make up language and the methods and theories used to identify and understand these core structures (for example, in courses covering phonetics, phonology, morphology, syntax, and semantics); while coursework on the social side emphasizes the methods and theories that are used to study and interpret patterns of social interaction at the linguistic level (for example, in courses covering language and culture, sociolinguistics, and language and gender). Additional coursework draws from related fields to further develop students' understanding of the broad spectrum of language-related domains (for example, psycholinguistics, language acquisition, and historical linguistics, among other topics).

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Linguistics Major Requirements

Code	Title	Hours
<b>Foundational Courses</b>		
LING 1150 or LING 1449	Introduction to Language and Linguistics English Now and Then	4
LING 2350	Linguistic Analysis	4
LING 3412	Language and Culture	4
<b>Linguistic Structure</b>		
LING 3420	Phonetics	4
LING 3422	Phonology	4
LING 3424	Morphology	4
LING 3450	Syntax	4
LING 3452	Semantics	4
<b>Language in Context</b>		
Complete one of the following:		4
LING 3442	Sociolinguistics	
LING 3456	Language and Gender	
<b>Language Change</b>		
Complete one of the following:		4
LING 3454	History of English	
LING 3460	Historical Linguistics	
<b>Research Experience</b>		
Complete one of the following:		4
LING 3150	Field Linguistics	
LING 4891	Research Seminar in Linguistics	
With prior linguistics program approval, one of the following experiences can be used to fulfill the research experience:		
LING 4970 and LING 4971	Junior/Senior Honors Project 1 and Junior/Senior Honors Project 2	
LING 4991	Directed Study Research	
<b>Linguistics Seminar</b>		
Complete at least one seminar (LING 4654 may be repeated with different topics):		
LING 4654	Seminar in Linguistics	4
<b>Linguistics Electives</b>		
Complete five electives from the following that have not already been taken to fulfill other major requirements:		20
LING 3000 to LING 4999 <sup>1</sup>		

Up to two electives may come from the following list:

DEAF 2700	ASL Linguistics
PSYC 4610	Laboratory in Psycholinguistics
PSYC 4612	Laboratory in Cognition
PSYC 4658	Seminar in Psycholinguistics
PSYC 4660	Seminar in Cognition
PSYC 4674	Seminar in Cognitive Neuroscience
PSYC 4676	Seminar in Developmental Psychology

<sup>1</sup> Please visit the Linguistics Courses page (<https://catalog.northeastern.edu/undergraduate/science/linguistics/#coursestext>) within this catalog to review the list of courses in the LING 3000–LING 4999 range.

## Supporting Courses

Code	Title	Hours
Complete two courses in the same language with a grade of C or higher. Proficiency at elementary level 2 or higher is required.		8

## Linguistics Major Credit Requirement

Complete 76 semester hours in the major.

## Program Requirement

128 total semester hours required

## Plan of Study

## Linguistics and Communication Studies, BA

### Overview

In the combined major in linguistics and communication studies, students learn about the formal structures and analysis of human languages across multiple levels (sounds, words, phrases and sentences, meaning) while simultaneously mastering the fundamentals of effective communication and of communication theory and practice. Students receive extensive training in writing and speaking, both for a technical audience and more generally; and they explore the role of language and communication in society, both from a broad theoretical perspective and in narrower, more focused and applied domains.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### BA Language Requirements

All BA students are required to complete the BA degree language requirements, for a total of 12 semester hours of language study or demonstrated equivalent proficiency, as described in Additional Requirements for BA students (p. 119). Successful demonstration of proficiency does not reduce total minimum semester hours of study required to earn the BA degree.

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Linguistics Requirements

Code	Title	Hours
<b>Linguistics Foundations</b>		
LING 1150	Introduction to Language and Linguistics	4
LING 2350	Linguistic Analysis	4
LING 3412	Language and Culture	4
<b>Linguistic Structure</b>		
Complete three of the following:		12
LING 3420	Phonetics	
LING 3422	Phonology	
LING 3424	Morphology	
LING 3450	Syntax	
LING 3452	Semantics	
<b>Linguistics Electives</b>		
Complete two courses not used to fulfill other degree requirements from the following options.		8
LING 3000 to LING 4999 <sup>1</sup>		
DEAF 2700	ASL Linguistics	

<sup>1</sup> Please visit the Linguistics Courses page (<http://catalog.northeastern.edu/undergraduate/science/linguistics/#coursestext>) within this catalog to review the list of courses in the LING 3000 - LING 4999 range.

### Communication Studies Requirements

## Linguistics and Cultural Anthropology, BS

### Overview

The combined major in linguistics and cultural anthropology focuses on the relationship of culture to the institutions, interpersonal relations, and practices that make up their social structure while emphasizing the structure of human language and its involvement in social interaction and culture. Students examine how language both reflects and influences cultural phenomena and how it can be used as a tool to study those phenomena; and they apply their interests across a range of connected courses, co-op opportunities, and potential research projects.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Linguistics Major Language Requirement

Complete two courses in the same language with a grade of C or higher. Proficiency at elementary level 2 or higher is required.

### Linguistics Requirements

*Note:* A grade of C or higher is required for all courses in this section.

Code	Title	Hours

## Linguistics and English, BA

### Overview

In the combined major in linguistics and English, students study the structures and analysis of human languages across multiple levels (sounds, words, phrases and sentences, meaning) and apply this knowledge to understanding how the English language works, its rhetorical forms, how it has changed over time, and its cultural context. Students hone their writing skills, develop substantial language-analysis skills, and apply them particularly to English.

### Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

### Universitywide Requirements

All undergraduate students are required to complete the Universitywide Requirements (p. 128).

### BA Language Requirements

All BA students are required to complete the BA degree language requirements, for a total of 12 semester hours of language study or demonstrated equivalent proficiency, as described in Additional Requirements for BA students (p. 119). Successful demonstration of proficiency does not reduce total minimum semester hours of study required to earn the BA degree.

### NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 111).

### Linguistics Requirements

Code	Title	Hours
<b>Linguistics Requirements</b>
