About University of Pasadena and Distance (On-Line) Learning

University of Pasadena (UPAS) was founded in 2012 by a group of eminent educationists and entrepreneurs with a vision to create an educational institution that will enable our students to be competent professionals and lifelong learners in the fields of engineering and education.

UPAS is a degree granting Institution. All instruction at UPAS is online and is considered distance education. We believe that students with just knowledge of what is thought or learned is not enough to be successful in their career, they also need to build their skills and abilities as well. Hence we have adopted an innovative approach of Outcome based education model that incorporates tasks, projects and activities that will help our students achieve their career goals and also help them to think as entrepreneurs.

At UPAS we leverage the latest technologies and one of the best learning platforms available to help our students learn from customized and easy to learn content from anywhere, at any time of the day, and get the best one on one coaching and mentoring when needed from our eminent faculty.

Academic Advisory Board:

The Academic Advisory Board at UPAS is comprised of senior professionals in the industry and academia who are well respected by their peers. They provide strategic advice and focus on the welfare of the institution than anything else. They exercise independent judgment and conduct themselves with highest ethical standards.

Academic Advisory Board: Engineering

- Mr. Prabharan Swarnam –Managing Director, Eight Hills, USA
- Mr. Mark Parameswaran – CEO, Agna Business Application, India
- Mr. Rohan Gupta – Design Engineer, Apple, USA
- Mr.Subbhu Rama – Chief Executive Officer, Stealth, Accio Ventures - Founder

Academic Advisory Board: Education

- Ms. Agnes Joseph - School Director ,The Indian Public School (TIPS) ,Bengaluru
- Ms.Thara Mohan - School Director ,The Indian Public School (TIPS), Coimbatore
- Ms. Kara Cleaver – Founder, Influency Group.

Top Administrators:

- Mr. Ashok Kumar – Chief Executive Officer (CEO)
- Dr. Chockalingam Arunachalam - Chief Academic Officer (CAO)
- Dr. Narayanan Solayappan - Chief Operations Officer (COO),
- Ms. Kripa Lakshmi R - Chief Financial Officer (CFO)
- Mr. Mark Treston –Compliance Officer (CO)
- Mr. Karthikeyan Doraiswami – Registrar

Ownership:

University of Pasadena is a C Corporation which is 100% owned by Fuji International Limited.

About Online Learning

Online learning at UPAS provides a location independent, technology driven learning experience through Moodle rooms, the university's online course delivery platform. Online classes at UPAS are completely interactive and easily usable, enabling students to interact directly with faculty and students through Moodle rooms.

Classes follow a trimester program. Students will need a computer and Internet access to complete their coursework. Students who complete the program receive transcripts and degree from UPAS that is equivalent to a degree earned in a classroom program.

Please read our Frequently Asked Questions (FAQ) for answers to commonly asked questions about online learning at UPAS.

Knowledge – Through Guided Discovery

- Customized Course Content

Skills – Through projects and activities

- Problem Solving
- Communication
- Leadership
- Innovation
- Lifelong Learning
- Critical & Analytical Thinking
- Interpersonal Skills
- Decision Making

Abilities – Through Practical Application

- Design and Implementation Skills
- Apply Knowledge
- Familiarity of Latest Tools and Technologies
- Professionalism

Mission and Objectives

Mission Statement

“To provide students worldwide with outcome-based, multi-modal, technology-enabled graduate level distance education that can empower them to achieve their professional goals.”

Objectives:

- To prepare students to be successful professionals in their field of choice through industry exposure
- To provide a high quality and cost-effective online degree program for students who desire an alternative to traditional institutions for a higher education
- To adopt an outcome-based education model that helps students build skills and abilities that are essential to becoming competent professionals
- Continuously leverage evolving technology to ensure effective content delivery
- Remain cost effective as progress is made at University of Pasadena
- Focus on maintaining industry relevance both in curricula and delivery

Approval

UPAS is a private institution that is approved to operate by the Bureau for Private Postsecondary Education (BPPE). Approval means that the institution follows the California Private Postsecondary Act of 2009.

Notice to Prospective Degree Program Students

This institution is provisionally approved by the Bureau for Private Postsecondary Education to offer degree programs. To continue to offer this degree program, this institution must meet the following requirements:

- Become institutionally accredited by an accrediting agency recognized by the United States Department of Education, with the scope of the accreditation covering at least one-degree program.
- Achieve accreditation candidacy or pre-accreditation, as defined in regulations, by Nov 20, 2017, and full accreditation by May 19, 2022.

If this institution stops pursuing accreditation, it must:

- Stop all enrollment in its degree programs, and
- Provide a teach-out to finish the educational program or provide a refund.

An institution that fails to comply with accreditation requirements by the required dates shall have its approval to offer degree programs automatically suspended.

Institutional Representative Initials: _____ Student Initials: _____

Date: _____

Date: _____

Accreditation: N/A

University of Pasadena is a private institution that is approved to operate by the Bureau for Private Postsecondary Education (BPPE). Approval means that the institution is in compliance with the California Private Postsecondary Act of 2009.

Bureau for Private Postsecondary Education

1747 North Market, Suite 225
Sacramento, CA 95834

Phone: (916) 574-8900
Licensing Fax: (916) 263-1894

Toll Free: (888) 370-7589
Web site: www.bppe.ca.gov

Main Fax: (916) 263-1897
Email: bppe@dca.ca.gov

School Catalog Policy:

The UPAS Catalog is published once each year, and at the end of each school year, in December; the catalog is reviewed and updated as to course offerings, school policies and compliance with the BPPE, regulatory agency, as needed.

UPAS Online Academic Programs

UPAS offers the following programs of study:

- Master of Science in General Engineering
- Master of Arts in Education

All courses and instruction are provided through Distance Education, and not in traditional classroom locations.

The institutional learning outcomes are as follows

- Apply critical thinking skills in finding solutions to solve real world problems and make informed, ethical decisions
- Display mastery of knowledge and skills to succeed professionally in the field of choice through industry exposure
- Display the ability to share skills and knowledge with others and demonstrate cultural and global awareness to be responsible citizens
- Utilize latest tools and technologies available in the respective field of choice to enhance learning
- Demonstrate and ensure effective information literacy skills to support continuous, lifelong learning

Here is the overview of our two degree granting programs

MASTER OF SCIENCE IN GENERAL ENGINEERING

The master's degree program in general engineering is a multidisciplinary program of study suited to the educational needs of individual students. This program may be particularly attractive to practicing engineers and professionals in related fields who seek a wider, more flexible base of knowledge and skills.

A master's degree program in general engineering typically requires students to complete at least 36 credit hours of graduate level study. In addition to a general core that includes technology and management courses, students typically complete a concentration option in a specific area of study such as Information Technology, Electronics or Mechanical Engineering. Students will also be required to successfully complete a project.

Program Objective

- Offer Master's degree in General Engineering with the emphasis on specialization in a technical area and management to become corporate leaders in technology companies or entrepreneurs
- Emphasizing the importance of building skills and abilities that help in applying engineering and management skills to solve real world problems
- Enabling aspiring students that would like to pursue research programs in the area of their choice

Program Outcomes

On successful completion of this program, students will be able to:

- Identify and develop systems and solve complex engineering and management problems by applying engineering principles, mathematics, and science
- Develop effective engineering and project management skills by communicating effectively with a range of audiences
- Acquire new knowledge using appropriate learning strategies to use latest tools and technologies to improve their execution
- Conduct appropriate experimentation, analyze, and interpret data to offer solutions to real-world engineering problems
- Apply engineering design to produce solutions that meets specific needs with consideration of societal, cultural, and global welfare

Program Delivery:

The program consists of both 3 credit and 4 credit courses. Students will need to complete all the Graduate Core courses. They can choose electives in their choice. They will need to complete a minimum of 36 credits. The following is the course break up.

CATEGORY	Courses	Credits
GRADUATE CORE	3	11
ELECTIVES	5	17
CAPSTONE PROJECT	1	4
INTERNSHIP	1	4
TOTAL	10	36

All courses follow a 15 week- delivery model where course objectives and outcomes for each week are thoroughly outlined and presented to students. Each course consists of the following elements:

- Multi-Media Presentations
- Interactive Sessions with Faculty online
- Assignments including tasks, projects and activities (pop quizzes) mid-term tests, etc. that are graded manually by the professors
- Continuous Assessments
- Final Exam

There will be a significant emphasis on the outcomes for each week. Assignments are focused on assessing the students' capability of applying the knowledge gained and demonstrating their skills and abilities in specific areas.

Courses for Master of Science in General Engineering:

Category	Name of Course	Credits
ENGR	Advanced Engineering Analysis and Statistics	4
MGMT	Business Plan	3
ELECTIVE	Elective Course	3
ELECTIVE	Elective Course	3
ELECTIVE	Elective Course	3
ENGR	Disruptive Innovation and Technology	4
ELECTIVE	Elective Course	4
ELECTIVE	Elective Course	4
	Capstone Project	4
	Internship	4
Total		36

ADVANCED ENGINEERING ANALYSIS AND STATISTICS (4 credits)

Prerequisites - Three levels of Mathematics in Undergraduate Program.

This course will introduce students to applying advanced analytical, computational and experimental methods to tackle modern interdisciplinary engineering and technological problems. This will include solutions and applications of ordinary differential equations, partial differential equations and Fourier series, the study of Legendre Polynomials and Bessel Functions. Students will get an exposure to the study of advanced probability distributions, sampling theory advanced statistical applications and hypothesis testing.

BUSINESS PLAN (3 credits)

Prerequisites – Undergraduate Degree in Engineering

This course will lay the foundations for writing sound business plans. It will cover topics such as principle elements of business plan (the executive summary, the organizational plan, the marketing plan, the financial plan, and the management description, risk analysis). Students will learn about the information needed to make a business plan (research on market potential, customer profiles, manufacturing costs, projected financial statements), how it is to be gathered and presented. They will also get an understanding of how expectations of investors are met through it.

DISRUPTIVE INNOVATION AND TECHNOLOGY (4 credits)

Prerequisites – Undergraduate Degree in Engineering

The purpose of this course is to help students understand what disruptive innovations are and expose them to some examples and the areas of technology and business that these innovations have impacted. The course includes case studies of some large companies that have not survived disruptive innovations in their fields. In addition to firms that have failed, students will look at some that have survived and are doing well. The course also covers the importance of using technological innovation in a business environment, creating knowledge management systems and technology transfer.

Electives:**FUNDAMENTALS OF MACHINE DESIGN (4 credits)**

Prerequisites – Undergraduate level courses in Higher Level Calculus

Building on the Engineering Mechanics course, this course introduces students to the fundamental principles of machine design. Topics include analysis and calculation of key metrics like forces, moments, stresses, strains, friction, and kinematics that influence machine design upon completion, students can analyze machine components and make recommendations on component selections for an application.

LEAN THINKING AND LEAN MANUFACTURING (4 credits)

Prerequisites – Undergraduate Degree in Engineering

Lean Thinking and lean manufacturing course will expose you to the concepts and principles of Lean Management to help you optimize processes, increase quality and drive maximum value in any business. You will learn to reduce waste in value streams by improving workflows and then by subsequently improving the physical layout of their facilities and also create more value for customers with fewer resources, reduce unwanted activities and adopt continuous process improvement, where small changes are implemented systematically. The course will guide you in implementing Lean tools, techniques and metrics in your workplace.

ALTERNATIVE ENERGY CONVERSION (4 credits)

Prerequisites – Undergraduate Degree in Engineering

Alternative energy conversion focus on the conversion of renewable energy sources into useful electrical energy. This conversion is subject to some major limitations that must be thoroughly understood to

unlock the full potential of these technologies. With the exception of photovoltaic, most of the renewable energy must be converted into rotational energy (Angular kinetic energy). Limitations of this conversion step are investigated focusing on thermal power generation (e.g. concentrated solar, biomass combustion, geothermal). Thermodynamic analysis will allow students to calculate maximum efficiencies of power cycles and its components. This course provides an overview of solar energy in photovoltaic and thermal systems, wind energy conversion, methods of energy extraction from biomass, geothermal, tidal and wave energy, Fuel cells, hydrogen energy and various energy storage device. Finally, financial and economic evaluation of renewable economic sources were reviewed.

MECHATRONICS (3 credits)

Prerequisites – Undergraduate Degree in Engineering

The integration of Electronic engineering, Electrical engineering, Computer technology and Control engineering with Mechanical engineering is increasingly forming an important part in the design, manufacture, and maintenance of a wide range of engineering products and processes. As a result, the engineers need to adopt an interdisciplinary and integrated approach to engineering. Thus, engineers need skills and knowledge that are not confined to a single subject area. They need to be capable of operating and communicating across a range of engineering disciplines and linking with those having more specialized skills. The term mechatronics is used to describe this approach. This course is an introductory course to mechatronics and it provides the basics in designing and developing mechatronics system.

COMMUNICATION SYSTEMS (3 credits)

Prerequisites – Undergraduate Degree in Engineering

This course starts with brief introduction to communication systems, noise in communications systems, voice signal digitization, digital radio, communication satellites, satellite earth stations, satellite access, satellite links, fiber-optic communications, optical fiber communications systems analysis and design, systems measurements and performance evaluation, and elements of HDTV. A brief Introduction to digital communication systems is also given including modulation and coding techniques.

CONTROL SYSTEMS (4 credits)

Prerequisites – Undergraduate Degree in Engineering

The objective of the course is to provide an understanding of the frequency domain analysis of control systems and the compensation technique that can be applied towards stabilizing control systems. Students are introduced to different types of control systems and their basic elements. Topics covered in this course include Time Response Analysis, Frequency Response Analysis, Stability Analysis and State Variable Analysis.

SOLID STATE ELECTRONIC DEVICES (3 credits)

Prerequisites – Undergraduate Course in Electronic Properties of Materials or equivalent

This course introduces crystallography and growth of semiconductor crystals, statistical mechanics, quantum mechanics and energy bands & charge carriers thereby helping in understanding the conduction Mechanisms in conductors, insulators and semiconductors. It also gives an in-depth understanding of excess carriers in semiconductors, junction theory, diodes, bipolar junction transistors, optoelectrical devices, LEDs and lasers, integrated circuits, power devices, and negative conductance devices.

WIRELESS COMMUNICATION (4 Credits)

Prerequisites – Basic Level Computer Networks class in Electrical or Computer Engineering

Undergraduate Program, Linear Algebra and Probability

This course provides a comprehensive overview and advanced knowledge of modern mobile and wireless communication systems. Building on the prior knowledge on communication systems, students develop further understanding on the challenges and opportunities brought by the wireless medium in

designing current and future wireless communication systems and networks.

SUSTAINABLE CONSTRUCTION (3 credits)

Prerequisites – Undergraduate Degree in Engineering

This course will cover the fundamental concepts of sustainability in construction; the environmental, economic and social components. Additionally, this course will start by developing basic knowledge about the environmental impacts of various phases of a construction project and the consequences of such impacts including the global warming and resource depletion issues. The course continues by discussing how designers and construction managers can contribute to improving the sustainability in construction by reducing the environmental impacts of construction projects without compromising the performance of the constructed facility and economic viability of the project. A number of the alternative strategies available in design, procurement, construction, operation and end of life phases to reduce the overall environmental impact of construction project are discussed. This course also covers various sustainability assessment techniques such as life cycle analysis and life cycle costing that can be used to estimate the environmental and economic impacts of construction. Students are expected to learn how the available strategies, standards and guidelines can be applied to improve sustainability in practice.

ENVIRONMENTAL ENGINEERING PROCESSES (4 credits)

Prerequisites – Undergraduate Degree in Engineering

This course is an overview of engineering approaches to protecting water quality with an emphasis on fundamental principles. Theory and conceptual design of systems for treating municipal wastewater and drinking water are discussed, as well as reactor theory, process kinetics, and models. Physical, chemical, and biological processes are presented, including sedimentation, filtration, biological treatment, disinfection, and sludge processing. Finally, there is discussion of engineered and natural processes for wastewater treatment. Case studies from the fields of air, water and soil engineering describe real-life solutions to problems in pollution prevention and remediation, as an aid to practicing professional skills.

DATA NETWORKS AND SECURITY (4 credits)

Prerequisites – Undergraduate Degree in Engineering

This course introduces students to a set of core network concepts and terminology which involves data and network security. This course examines the network standards and design of the network structure for its efficient management. This course will let you know, how to evaluate the authentication mechanism in different network scenarios and discusses the Ethernet switch LAN technology along with all the devices used in switching. The wireless LAN technology using the wi-fi 802.11 standard is explored in this course. It emphasizes the working of IPV4 and IPV6 addressing in the network with the help of TCP/IP protocol.

CLOUD COMPUTING (4 credits)

Prerequisites – Undergraduate level courses in Operating Systems and Networking

This course introduces students to set of core technologies, algorithms and design philosophies and takes them through how cloud computing systems today are built on top of these fundamental concepts. They learn about classical algorithms, scalability, classical precursors and trending areas. Included as part of this course is a programming module that allows students to gain experience in implementing these concepts in assignments provided in the C++ language.

MOBILE APPLICATION DEVELOPMENT (3 credits)

Prerequisites – Background in Java, XML or .NET languages

With smart phones and tablets becoming increasingly powerful and loaded with features, mobile application development has become very important skill. This course teaches students how to build mobile apps for Android and iOS, Students learn to write both web apps and native apps for Android

using Eclipse and the Android SDK, to write native apps for iPhones, iPod Touches, and iPads using XCode and the iOS SDK, and to write web apps for both platforms. Additional topics covered include application deployment and availability on the corresponding app stores and markets, application security, efficient power management, and mobile device security, memory management; user interface design; user interface building; input methods; data handling; network techniques and URL loading; and, finally, specifics such as GPS and motion sensing. Students are expected to work on a project that produces a professional-quality mobile application.

SOFTWARE APPLICATION SECURITY (4 credits)

Prerequisites – Undergraduate Degree in Engineering

This course deals with designing and implementing secure system and application software, that is, software that is not vulnerable to malicious attacks. This course addresses application and web server security and the methodologies required to ensure web servers are not vulnerable to security breaches. By the end of the course, students should be familiar with why security is important, what types of vulnerabilities can be present in applications, how they can be exploited, and how to go about developing applications that is sufficiently secure. The course will involve reading technical papers as well as written assignments. The course explains some of the most common security issues involved in the development of software, including secure database access, secure data communications, security of web applications and use of encryption techniques.

OPERATING SYSTEMS (3 credits)

Prerequisites – Undergraduate courses in Systems Programming, Hardware/Software Interfaces

This course provides an overview of operating systems, their history and their evolution. It covers the fundamentals of operating system function, design and implementation, and typical problems associated with designing and implementing operating systems. Topics covered in the course include concurrency, memory management, file systems, device management, interrupts, multitasking, deadlocking, scheduling and security

ENTREPRENEURSHIP FOR SCIENTISTS AND ENGINEERS (3 Credits)

Prerequisites – Undergraduate Degree in Engineering

The objective of the course is to create self-employment awareness, and thereby enable students to create job opportunities for others. The initial focus is on the technologies involved in the entrepreneurship and it aims to educate the students about the launching startups, concept of intellectual properties and patent & trademark strategies. Further this course will enlighten the students about the various strategies involved in the business technology development strategies, marketing strategies and financial strategies etc. Finally, it concentrates on the topic of technology valuation.

CAPSTONE PROJECT (4 credits)

Capstone project is a requirement. It is offered to give a chance to the individuals who have inventive thoughts and need to test in instruction. Responsible upon the importance of the theme/exertion required, this task could be worth even two courses subject to the confirmation of the scholarly administration.

Illustration of unique thought and response of thorough research system is normal for undertaking this project. The capstone project is the culminating experience of the student's engineering program and provides students with the opportunity to apply and integrate their knowledge and skills gained. Students will take the responsibility to organize, plan and carry-out the various tasks required for successful completion of the project.

Requirements for Capstone project:

- Identify the faculty advisor.
- Identify an appropriate title or problem statement.
- Submit the project proposal describing the project. Upon completion of the project submit the report.
- Online presentations of the capstone project through zoom to the faculty.

INTERNSHIP (4 credits)

Internship is a requirement to share your experience that will help long-term professional development. It is a form of experimental learning that integrates knowledge and theory learned in the classroom with the practical application and skills development in a professional setting. Student gain valuable work experience and gratify requirements for a qualification.

Requirements for Internship:

- Identify a faculty.
- They should maintain an attendance record.
- Should submit a weekly report to their supervisor and faculty
Student should get feedback from the faculty.
- Students should get feedback from the employer.
- Online presentations of the Internship through zoom to the faculty

Students would choose electives based on the cluster of their choice. The student can choose Mechanical Engineering Cluster, Electrical Engineering Cluster and Information Technology cluster. The elective courses for each cluster are shown below:

Mechanical Engineering Cluster:

Prerequisites – Undergraduate in General Engineering/Mechanical Engineering

Fundamentals of Machine Design
Lean Thinking and Lean Manufacturing
Alternative Energy Conversion
Mechatronics
Entrepreneurship for Scientists and Engineers

Recommended Course Sequence for Mechanical Engineering Cluster

Category	Name of Course	Type	Term	Credits
MATH 511	Advanced Engineering Analysis and Statistics	Core	1	4
MECH 580	Fundamentals of Machine Design	Elective	1	4
ENTP 512	Business Plan	Core	2	3
MECH 586	Alternative Energy Conversion	Elective	2	4
MECH 587	Mechatronics	Elective	3	3
ENTP 521	Disruptive Innovation and Technology	Core	3	4
ENTP 583	Entrepreneurship for Scientists and Engineers	Elective	4	3

MECH 585	Lean Thinking and Lean Manufacturing	Elective	4	4
ENGR 900	Capstone Project	Core	5	4
INTR 901	Internship	Core	6	4
Total				37

Electrical Engineering Cluster:

Prerequisites – Undergraduate in General Engineering/Electrical Engineering

Communication Systems
Control Systems
Solid State Electronic Devices
Wireless Communication
Entrepreneurship for Scientists and Engineers

Recommended Course Sequence for Electrical Engineering Cluster

Category	Name of Course	Type	Term	Credits
MATH 511	Advanced Engineering Analysis and Statistics	Core	1	4
ELEC 580	Communication Systems	Elective	1	3
ENTP 512	Business Plan	Core	2	3
ELEC 583	Solid State Electronic Devices	Elective	2	3
ELEC 585	Wireless Communication	Elective	3	4
ENTP 521	Disruptive Innovation And Technology	Core	3	4
ENTP 583	Entrepreneurship for Scientists and Engineers	Elective	4	3
ELEC 582	Control Systems	Elective	4	4
ENGR 900	Capstone Project	Core	5	4
INTR 901	Internship	Core	6	4
Total				36

Information Technology Cluster:

Prerequisites – Undergraduate in General Engineering/Computer Science/Information Technology

Data Networks and Security
Cloud computing
Operating Systems
Mobile Applications Development
Software Application Security

Entrepreneurship for Scientists and Engineers

Recommended Course Sequence for Information Technology Cluster

Category	Name of Course	Type	Term	Credits
MATH 511	Advanced Engineering Analysis and Statistics	Core	1	4
COMP 583	Mobile Applications Development	Elective	1	3
ENTP 512	Business Plan	Core	2	3
COMP 585	Operating Systems	Elective	2	3
COMP 581	Data Networks and Security	Elective	3	4
ENTP 521	Disruptive Innovation And Technology	Core	3	4
ENTP 583	Entrepreneurship for Scientists and Engineers	Elective	4	3
COMP 582	Cloud computing	Elective	4	4
ENGR 900	Capstone Project	Core	5	4
INTR 901	Internship	Core	6	4
Total				36

Civil Cluster:

Prerequisites – Undergraduate in General Engineering

Sustainable Construction
Environmental Engineering Process
Entrepreneurship for Scientists and Engineers

Recommended Course Sequence for Information Technology Cluster

Category	Name of Course	Type	Term	Credits
MATH 511	Advanced Engineering Analysis and Statistics	Core	1	4
CIVL 581	Sustainable Construction	Elective	1	3
ENTP 512	Business Plan	Core	2	3
ELEC 583	Solid State Electronic Devices	Elective	2	3
CIVL 582	Environmental Engineering Process	Elective	3	4
ENTP 521	Disruptive Innovation And Technology	Core	3	4
ENTP 583	Entrepreneurship for Scientists and Engineers	Elective	4	3
MECH 585	Lean Thinking and Lean Manufacturing	Elective	4	4
ENGR 900	Capstone Project	Core	5	4
INTR 901	Internship	Core	6	4
Total				36

The following courses related to entrepreneurship are offered:

- Business Plan
- Disruptive Innovation and Technology
- Entrepreneurship for Scientists and Engineers (as an elective)

These courses collectively gives some of the key outcomes which helps the student gain the ability to become an entrepreneur:

- Design organizational plan and strategic business plans
- Prepare marketing and financial plans
- Examine strategies used for disruptive product innovations
- Create a vision and communicate effectively with team
- Identify the conflicts & handle them ethically to resolve them effectively
- Observe various styles, traits, approaches in leadership & adopt a suitable leadership grid

Upon graduation, the entrepreneurship courses and the cluster courses collectively gives the students ability to set up a new business or takeover a family business or get a corporate job with both domain and entrepreneurial skills.

MASTERS OF ARTS IN EDUCATION

The Postgraduate Degree Program in Education has been designed to broaden the training and understanding of education in relation to the philosophy and concepts underlying international education (online/distance learning) and sharpen teachers' skills in relation to the processes, cultures and classroom practices. It is a professional development course with a series of on---line modules covering core and contemporary topics in education. The modules are intended for teachers, administrators, librarians, or anyone interested in education — and there is no prior technical expertise required. The modules are designed for self---paced learning, so one can explore the training on their own time and review them as often as desired.

Program Objective

- Provide teacher education to those with or without a bachelor's degree in education to enable them to become competent while continuously developing professionals as teachers and/or education administrators
- Inculcate the attitude and ability to evolve, through continuous self-study even while practicing the profession, as leaders in their chosen career

Program Outcomes

Students completing this program are expected to achieve the following:

- Analyze the application of educational research and evidence-based practices to design innovative curriculum and academic writing
- Analyze diversity issues in education and learning practices to make informed, ethical decisions
- Integrate advanced approaches to instruction and assessment to enhance student learning
- Apply practitioner research methods and ideas to instruction in both traditional and digital learning environment

Program Delivery:

The program consists of both 3 credit and 4 credit courses. Students will need to complete all the Graduate Core courses. They can choose electives in their choice. They will need to complete a minimum of 36 credits. The following is the course break up.

CATEGORY	Courses	Credits
CORE COURSES	8	25
ELECTIVES	1	3
CAPSTONE PROJECT	1	4
INTERNSHIP	1	4
TOTAL	11	36

All courses follow a 15 week- delivery model where course objectives and outcomes for each week are thoroughly outlined and presented to students. Each course consists of the following elements:

- Multi-Media Presentations
- Interactive Sessions with Faculty online
- Assignments including tasks, projects and activities (pop quizzes) mid-term tests, etc.that are graded manually by the professors
- Continuous Assessments
- Final Exam

There will be a significant emphasis on the outcomes for each week. Assignments are focused on assessing the students' capability of applying the knowledge gained and demonstrating their skills and abilities in specific areas.

Courses for Master of Arts in Education:

Courses	Credits
Historical and Contemporary Thoughts on Education	3
Child Psychology: Principles and Perspectives	3
Learning through Inquiry: The IB paradigm	3
TransDisciplinary and Holistic Approaches to Education	3
Collective and Collaborative Design and Transaction of Curriculum.	3
Continuous and Comprehensive Assessment of Learning.	3
Statistical Methods for Teachers and Education Administrators	4
Issues in Language Teaching	3
Electives:	3
Arts, Crafts and Physical Education: Integrating into Curriculum	3
Design of Assessment Tools and Rubrics for Diversity.	3
Role of ICT for Effective Teaching and Education Management	3
Human Resource Management for Education Managers	3
Education Policy: Local, National and Global Perspectives.	3
Education and Society: Local, National and Global Dimensions	3

HISTORICAL AND CONTEMPORARY THOUGHTS ON EDUCATION (3 credits)

This course is intended to provide an overview of the processes by which knowledge, skills, values and beliefs have been transmitted from one generation to another across different civilizations through the ages. Roles of the family, peers, formal institutions such as gurukuls of ancient India, collegiums of

Greece and religious institutions are evaluated. Contemporary thoughts on education and schooling across different societies and their relevance for IB approach are discussed.

CHILD PSYCHOLOGY: PRINCIPLES AND PERSPECTIVES (3 credits)

The objective of this course is to review the evolution and development of the ideas pertaining to the psychology of children and the implications of various learning theories. The student-□□teachers will be sensitized to the importance of their impact as role-□□models and counselors.

LEARNING THROUGH INQUIRY: THE IB PARADIGM (3 credits)

This course aims to introduce the participants to the inquiry approach to learning. The framework of the IB methodology and its importance in the objective development of children; meeting the IB learner profiles will be the mainstay of the course. Student will have a hands-on approach to develop effective practices, and to strengthen the inquiry approach to learning.

TRANS-□DISCIPLINARY and HOLISTIC APPROACHES TO EDUCATION (3 credits)

This core course is intended to inculcate among the student teachers, the crux of international teaching and learning methodology: namely breaking the barriers between subjects and helping children learn holistically across disciplines.

COLLECTIVE AND COLLABORATIVE DESIGN AND TRANSACTION OF CURRICULUM (3 credits)

The student/teachers are helped to understand the meaning and nature of curriculum. The processes associated with collaborative design of the curriculum, as well as effective implementation / transaction of the curriculum in the classroom will be discussed in detail.

CONTINUOUS AND COMPREHENSIVE ASSESSMENT OF LEARNING (3 credits)

Through this course, the teacher-□□trainees learn to appreciate the role of assessment as a constructive learning aid rather than as a mechanism for grading and certification. Approaches and techniques to carry out formative, mid-□□course and summative assessment in the context of the inquiry approach would be the core content of this course.

STATISTICAL METHODS FOR TEACHERS AND EDUCATIONAL ADMINISTRATORS (4 credits)

This core course facilitates the participants to efficiently organize the mass of data they collect about children and their academic progress during their teaching / learning journey and analyze the same towards inferring constructive conclusions to enhance the teaching / learning process. A related aim is to assist the student teachers to glean the essence of research-□□based on published reports and articles in the field of international education (teaching and learning).

ISSUES IN LANGUAGE TEACHING (3 credits)

The basic principles and desirable practices to effectively teach languages – mother tongues, as well as second language acquisition will be the focus of this course. Emphasis would be placed on teaching / learning the English language since it will be the medium of instruction where the student teachers would practice and would later implement what they have learned

Electives:

HUMAN RESOURCES MANAGEMENT FOR EDUCATION MANAGERS (3 credits)

This elective course is appropriate for those who intend moving to educational administration. The team leaders and program coordinators would benefit greatly from the input through this course on managing human resources effectively.

EDUCATION POLICY: LOCAL, NATIONAL AND GLOBAL PERSPECTIVES (3 credits)

Given the diversity of societies across the world, an international educator who aspires to seek positions in different societies would do well to be aware of the diversity in education policy and implications of the role and responsibilities of teachers / administrators. This course aims to provide input towards that objective.

EDUCATION AND SOCIETY: LOCAL, NATIONAL AND GLOBAL DIMENSIONS (3 credits)

Awareness of the crucial nexus between education in a society and the way the society develops is crucial for educators who plan to not only function as teachers but get involved in off-school social entrepreneurial activities. Such individuals would benefit from the discussions in their elective course and contribute meaningfully to society.

DESIGN OF ASSESSMENT TOOLS AND RUBRICS FOR DIVERSITY (3credits)

This elective course facilitates building the competence and skills to design and administer need- based assessment tools for special children.

ARTS, CRAFTS AND PHYSICAL EDUCATION: INTEGRATING INTO CURRICULUM (3 credits)

This core course helps the student-teachers to integrate arts, crafts and physical education into the inquiry method, and enables them to effectively utilize the assistance of specialized teachers for those activities. The process of planning to assessment interrogation is addressed in this course.

ROLE OF ICT FOR EFFECTIVE TEACHING AND EDUCATION MANAGEMENT (3 credits)

This elective course is intended for those who would like to go beyond the basics of using ICT in education and develop their own ICT-based tools and aids for enhancing the teaching / learning / Assessment processes. Exposure to a variety of learning management systems and their deployment would be part of the hands-on practice.

CAPSTONE PROJECT (4 credits)

Capstone project is a requirement. It is offered to provide an opportunity to those who have innovative ideas and want to experiment in education. Depending on the gravity of the topic/effort required this project could be worth even two courses subject to the approval of the academic management. Display of original idea and adoption of rigorous research methodology is expected for undertaking this project. The capstone project is the culminating experience of the student's education program and provides students with the opportunity to apply and integrate their knowledge and skills gained. Students will take the responsibility to organize, plan and carry out the various tasks required for successful completion of the project.

Requirements for Capstone project:

- Identify the faculty advisor.
- Identify an appropriate title or problem statement.
- Submit the project proposal describing the project.
- Upon completion of the project submit the report.
- Online presentations of the capstone project through zoom to the faculty.

INTERNSHIP (4 credits)

Internship is a requirement to share your knowledge that will help in long-term specialized development. Student gain work involvement and gratify requirements for a stipulation. UPAS supports internship programs that provide growth and learning opportunities to students in high school, college and trade schools.

Requirements for Internship:

- The students should select the organization related to their career goal.
- Identify the Internship field supervisor.
- Identify a faculty.
- They should maintain an attendance record.
- Should submit a weekly report to their supervisor and faculty
- Student should get feedback from the faculty.
- Students should get feedback from the employer.
- Online presentations of the Internship through zoom to the faculty

Student Technology Requirements

When you are planning to enroll in distance education courses, it is important to consider the technology needed to have a smooth and successful experience. We recommend that you meet the technical requirements listed below when using the learning management system (LMS).

Note: For additional required hardware or software requirements for your course(s), contact your instructor or refer to the course syllabus for additional information on their requirements

We expect our students to be familiar with the use of computers, Internet, and email. You should be able to follow basic instructions to configure programs and course work. In order to enroll in UPAS online programs, you are expected to have the following minimum requirements fulfilled:

Basic Technical knowledge and skills:

- Getting online
- Downloading, saving, opening, and printing material found online
- Conducting Internet searches
 - Composing e-mail/course messages and attaching documents. (Open LMS Student Help Link: Course Messages)
- Writing and editing with a word processor, such as Notepad, MS Word, etc
- Take online examinations.
- Learning new computer skills.

Hardware Requirements:

- Desktop/Laptop with i3 Intel processor or equivalent (less than 4 years old)
- Color monitor with 1024 x 768 resolution
- Minimum 20 GB free Hard Disk Space
- Minimum 2 GB RAM
- High-speed broadband (10 Mb/s or higher) connection
- Audio speakers/headphone and microphone for listening to audio or videos presented in courses
- Webcam with microphone for interacting in course activities that require video feedback from students (such as Voice Thread).

Software

- Windows 8 or later, Mac OS 10.13 or higher
- Chrome latest version ([Download](#))
- Microsoft Office 2015 (includes Word, Excel and PowerPoint) or higher version
- Windows Media Player – should be part of your Windows OS install
- Adobe Acrobat Reader latest version ([Download](#))

Email

- Have a personal email account.

Admissions & Enrollment

Why should you choose UPAS?

- At UPAS, we believe that competency is essential for any graduating student to be successful in their career. Hence, we have adopted outcome Based Online Education Model that not only enables our students to gain knowledge through course work but also helps them build their skills and abilities that are very essential to become a competent professional and a lifelong learner.
- We believe that students graduating from UPAS should have breadth and depth of knowledge, skills and abilities to think big and be able to convert ideas into successful businesses or rise to the level of senior executives in any organization.
- We provide greater flexibility to enroll in our courses from any part of the world by delivering the course online without compromising quality. Our program is structured in such a way to make learning and easy process through customized course content and delivered through our Learning Management System. If they need guidance or help, they can reach out to their assigned eminent faculty members at any time to make their learning experience the best possible one.
- To provide students with continuous feedback on their progress in their program, we have formulated a continuous assessment model that measures their outcome levels. This model will help students to understand their level in the program and focus on where would like to be as well.
- Feedback is collected at the end of the semester and completion of the course. Feedback is collected from the employers regarding internship and measures are taken regarding their performance.
- Our faculties comprise of people with great academic and research credentials,
- Industry experts and successful entrepreneurs who were able to guide/mentor our students to be practically apply their knowledge through projects, industry connect and creative activities.
- We at UPAS believe that cost should not be an impediment for someone that wants to learn and be successful in his or her career and hence we have made our program very cost effective as well.

We hope that you find our program useful and select UPAS as the preferred school of your choice to fulfill your ambitions.

About Online Learning

Online learning at UPAS provides a location independent, technology driven learning experience through Moodle, the University's online course delivery platform. Moodle is a widely accepted platform for online education that is used by several leading universities. This platform is available on the cloud and the company Moodle Rooms manages the entire infrastructure for this platform. Administrators and faculty at UPAS will be able to remotely login to the system through their computers to administer the system, conduct classes and tests. Online classes at UPAS are highly interactive and easily usable, enabling students to interact directly with faculty and students through the Moodle platform. Students will require set of equipment that is listed on page 23 to access the platform.

The school will transmit all lessons and materials to the student if the student has completely paid for the educational program and, after having received the first lesson and the initial materials, requests in writing that all the material be sent. Once the balance of the materials is transmitted to the student, the school will be obligated to provide other educational services it has agreed to provide.

All assignments, project work and tests submitted online will be evaluated by the faculty and a response provided to students within 72 hours (3 days) of submission (5 days for assignments). When students submit their project, they will get an acknowledgement within 48 hours (2 days) and the evaluation will be completed within a week of submission.

Classes follow a trimester calendar just as a classroom program does. Students when complete the program, receive transcripts and a degree from UPAS that is equivalent to a degree earned in a classroom program. Please read our Frequently Asked Questions for answers to commonly asked questions about online learning at UPAS

Evaluation Standards (Grading):

The evaluation of student achievement is based on students meeting the objectives for each program. At the beginning of each class, the instructor will provide the students with a syllabus identifying the objectives and grade determination criteria. Student should achieve a cumulative grade of 3.0 or higher at the end of the term and also end of the program. In a course in which a failing grade has been received, the student must repeat the course. If the student repeats a course after having received an F grade initially, the previous F grade is replaced with the new grade for the **Grade Point Average (GPA)** calculation.

Grade Point Determination

- The following systems of grade points are used to evaluate a student's level of achievement.
- A student's general standing is the result of the total number of grade points earned, divided by the total number of semester hours taken.

Grade	Points	Grade	Points
A	4.0	A-	3.75
B+	3.50	B	3.0
B-	2.75	C+	2.50
C	2.0	C-	1.75
D	1.0	F	0
I	*Incomplete	W	Withdrew from the course

Grading:

Faculties use the total course grade calculated at the end of the course to provide a letter grade to the student

Percentile	Grade
95-100	A
90-95	A-
87 – 89	B+
84 – 86	B
80 – 83	B-
77 – 79	C+
74 – 76	C
70 – 73	C-
60 – 69	D
Less than 59	F

Course	Sem/term	Credit Hours	Grade	points	Total Points	GPA
Course 1	1	3.00	A	4.00	12.00	3
Course 2	1	3.00	C	2.00	06.00	
Cumulative term GPA						
Course 3	2	3.00	D	1.00	03.00	2.8
Course 4	2	3.00	B+	3.50	10.50	
Course 5	2	3.00	A	4.00	12.00	
Cumulative term GPA						
Course 6	3	3.00	D	1.00	03.00	2.9
Course 7	3	4.00	B	3.00	12.00	
Course 8	3	3.00	B ⁺	2.75	08.25	
Course 9	3	3.00	B+	3.50	10.50	
Course 10	3	4.00	A	4.00	16.00	
Cumulative term GPA						
Course 11	4	4.00	A	4.00	16.00	4
Cumulative term GPA						
		36 Credits		Total Points	109.25	
CUM GPA = Total Points/Total Credit Hours					Total GPA	3.03

Students must achieve a cumulative GPA of 3.0 or above as the end of the programs for graduation as shown in the example.

Admission Process

Thank you for showing interest in UPAS; we have made every effort to make sure you understand our admission process clearly. We have done our best to ensure that the information is clear and can be completed without much effort!

- Start of Admission cycle: 8 weeks before start of the term
- Close of Admission cycle: 2 weeks before start of the term

Admission requirements:

- A Bachelor's degree (BA or BS) from an approved university. Students whose degrees were completed at foreign universities must submit notarized translations into English where appropriate. Such students may be required to have their degrees evaluated by a UPAS-approved evaluation service to determine equivalency to a bachelor's degree from the United States.
- A Preferred GPA of 2.5 or above in their Bachelor's degree.
- Official transcripts and Bachelor's degree (B.A or B.S) in the relevant field of study from an approved institution.
- Personal Statement for seeking admission @ UPAS as part of application form.
- Satisfactory performance (> 50%) in the UPAS entrance exam to demonstrate web-based online learning capability.
- English Language proficiency must be demonstrated during Step 1 of the application process when the application is submitted. Admission team, after reviewing the application, will determine English proficiency based on the following.
 - The prospective student is a native English speaker; or
 - The prospective student can provide evidence of having earned a degree from a college or university where English was the primary language of instruction; or
 - Students who have had English as a second language need to demonstrate English proficiency by submitting TOEFL (Test of English as a Foreign Language) scores of 71 or higher on the Internet based test (iBT), or 60 or higher on the paper-based test (PBT). Visit www.toefl.org for more information on the TOEFL.
- Have a desktop/laptop with Internet broadband (6 Mbps or higher) connection and familiar with using Internet, email and other software programs with instructions provided on how to connect to the learning platform to complete the coursework.
- UPAS accepts transcripts only in English. If the potential student interested in our programs has transcripts in any language other than English, the student must use the service of third-party transcript evaluators approved by the institution.
 - Academic & Professional International Evaluations, Inc. (APIE), P.O. Box 5787 Los Alamitos, CA 90721-5787 Telephone: (562) 594-6498 APIE@email.msn.com Website: <http://www.apie.org>
 - Academic Credentials Evaluation Institute (ACEI), P.O. Box 6908 Beverly Hills, CA 90212 Toll Free: (800) 234-1597 (USA Only) or (310) 275-3530 Fax: (310) 275-3528 Email: acei@acei-global.org Website: <http://www.acei-global.org>

Admission Procedure:

- Prospective student should visit our website (Admissions tab) to download application (free of cost).
- Students will email (admissions@upasadena.org) the filled application along with course registration information and other related documents like degree certificates, course details, etc.,

- Once the application is submitted, the students will receive an email with a link to make payment for application fees with the fee amount. The students can also make payment at the time of submitting the application using the payment link available to them once they submit the application.
- Students will receive an email acknowledging that application has been received. If payment is made, acknowledgment email of the application fee payment has been received will be sent. If application fee payment is not received with 1 business day of submitting the application, a reminder email will be sent to the student. The submitted application will not be processed until the application fee is received.
- An official email will be sent to the students within 5 working days from the date of application regarding acceptance or denial of admission with the reason. The outcome of the admission request is communicated to the prospective student by the admission team and all the documents used along with the reason for approval or rejection is documented in the online student file.
- The possible reasons for denial of admission are unfair transcripts /undergraduate degrees, Transcripts and undergraduate degrees from an unapproved institution. Unsatisfactory performance in the UPAS entrance exam or false declaration or document manipulation may also lead to denial of admission at UPAS.
- UPAS will send an email with Application transfer request outcome and entrance exam details (link) with user name (email ID) and password (date of birth) within 3 working days of the receipt of the application fee. Students can appeal the transfer of credits outcome by sending email to cao@upasadena.org. The response to the appeal will be given within 3 working days.
- Students will have to take the entrance exam within 2 working days or else, they will have to reapply.
- Entrance exam notification will also be available in the student dashboard.
- If the student is accepted, UPAS will send the enrolment agreement and the fee details to the student within 3 working days from the date entrance exam was taken.
- Student must send the signed enrollment agreement and pay the tuition fees within 3 working days of the receipt of the enrollment form. Email will be sent to the student with the payment details. UPAS web site also has a link to make payment for tuition fees. UPAS will send a reminder email if fee payment is not received within 2 working day of the receipt of the enrollment form.
- UPAS will send an Acknowledgement email for fees payment received.
- Students will receive the Welcome kit within 2 working days of the receipt of the fees.
- Student will start the program enrolled at University of Pasadena (UPAS).

Graduate Degree Programs:

Admission requirements:

- A Bachelor's degree (BA or BS) from an approved university. Students whose degrees were Completed at foreign universities must submit notarized translations into English where appropriate. Such students may be required to have their degrees evaluated by a UPAS-approved evaluation service to determine equivalency to a bachelor's degree from the United States
- A preferred GPA of 2.5 or above in their Bachelor's degree.
 - Official transcripts and Bachelor's degree (BA or BS) in the relevant field of study from an approved institution
 - Personal statement for seeking admission @ UPAS
 - Satisfactory performance (>50%) in the UPAS entrance exam.
 - Have a desktop/laptop with Internet broadband (6 Mbps or higher) connection and

familiar with using Internet and email and other software programs with instructions provided on how to connect to the learning platform to complete the course work.

Graduation Requirements

- Satisfactory completion of 36 credit hours in the chosen field of study.
- The capstone project submitted by the student as part of the graduate program has to be approved by our university faculty committee for an award of Master's degree.
- A 10 week supervised internship must be completed and an internship report should be submitted which is evaluated by faculty.
- Minimum 70% of the credits towards the degree must be taken from UPAS.
- Cumulative GPA must be 3.0 or higher.
- All graduate students are expected to complete the degree program within 3 years from the date of enrollment after which a request must be made to the admission department in the university asking for an extension. Continuous request for extension will not be encouraged and the student will be dropped from the program and won't be eligible for a degree.

Admission Policy

An official email will be sent to the students within 5 working days from the date of application regarding acceptance or denial of admission with the reason. The outcome of the admission request is communicated to the prospective student by the admission team and all the documents used along with the reason for approval or rejection is documents under student file online. The reason for denial can be any of the following:

- Unable to submit official Transcripts and/or undergraduate degree copies.
- Transcripts and undergraduate degree from an unapproved institution.
- Unsatisfactory performance in the UPAS entrance exam.
- False declaration or document manipulation may lead to denial of admission at our university.

International Students

International students who wish to enroll in UPAS degree program should meet all the admission requirements stated under admission requirements and provide evidence of financial resources to be able to complete the course without interruption.

English Proficiency

This institution does not offer instruction in English as a second language. Nor do we provide English language services. All classes are conducted only in the English language. To prove students are able to communicate fluently in English, if there is any doubt, this institution accepts a successful TOEFL test result and/or the U.S. Foreign Service Language Rating System.

Students who have had English as a second language need to demonstrate English proficiency by submitting TOEFL (Test of English as a Foreign Language) A minimum score of 65 on the paper-delivered Test of English as a Foreign Language (TOEFL PBT), or 80 on the Internet Based Test (iBT) Visit www.toefl.org for more information on the TOEFL.

Applicants holding a baccalaureate or advanced degree from an accredited college or university in the U.S is exempt from the TOEFL requirement.

English language proficiency assessment requirement is A minimum score of 65 on the paper-delivered Test of English as a Foreign Language (TOEFL PBT), or 80 on the Internet Based Test (iBT). 6.5 on the International English Language Test (IELTS); 58 on the Pearson Test of English Academic Score Report; 105 on the Duolingo English Test; or 55 on the 4-skill Michigan English Test (MET), or 650/LP on the Michigan Examination for the Certificate of Competency in English (ECCE), or 650/LP on the Michigan Examination for the Certificate of Proficiency in English (ECPE).

Policies & Regulations

How to start taking courses?

Every student that is enrolled in the program will be given access to our online OpenLMS platform and detailed instructions on how to navigate through the course from Sign In to completion. If there are any issues or questions related to the course work, you can contact your academic advisor at academics@upasadena.org.

Course duration

All courses follow a 15-week delivery model. In case students are not able to complete the course in the stipulated time frame, they are expected to repeat the same course again and will be treated as taking a new course.

Leave of absence

If a student is unable to complete the course due to unavoidable reasons, the student must inform his/her academic advisor about and continue the course during the next academic session with other courses. Students are allowed one Leave of Absence during one calendar year for personal emergencies.

Non-active or unable to reach

If they are not active (except in case of leave of absence) with their course work or the university is unable to contact them for a period of 12 (twelve) months, they will be deregistered from the program and they will not be eligible for the university degree.

OpenLMS Uptime

We make all efforts to ensure that our OpenLMS platform is up 99.99% of the time, but in case they have trouble accessing the platform or issues with the platform, can email to it@upasadena.org

Contact our enrollment advisor

They can contact our enrolment advisor through email: admissions@upasadena.org

Tuition & Fees

All students enrolling in UPAS online engineering degree program pay the same fees regardless of whether they are in or out of the US. Tuition and fees are due before the start of classes in each academic session unless a payment plan with a different or differed payment schedule is agreed. All non-refundable fees are non- refundable once they are paid (Application and Registration fees).

Optional fees like Transfer of credit fee is non-refundable once they are paid. No other optional fees are charged. Most of the communication is done by email. There is no charge for shipping to students residing in the United States if using ground US Postal Service. No expedited shipment available.

Graduate Degree Program Tuition and Fees:

Minimum Requirement: 36 Credits; Recommended Time to complete: 24 months. Maximum time to complete is 36 months.

FEES	BASIS	PER UNIT COST	UNITS	COST
**Application Fee	One Time	\$50	1	\$50
**Registration Fee	One Time	\$200	1	\$200
*Transfer of Credit Fees (Optional)	One Time	\$30	1	\$30
Student Transcripts	One Time	\$20	1	\$20
Tuition Fee (subject to change)	\$50 per credit	\$50	36	\$1800
***Text Books	\$200	\$200	2	\$400

TOTAL ESTIMATED COST FOR THE PROGRAM: \$2500.00

SCHEDULE OF TOTAL CHARGES FOR A PERIOD OF ATTENDANCE: \$300

(Example: If a student enroll 2 courses with 6 credits, then Period for attendance is 6 credits X \$50=\$300)

*Transfer of credit is non-refundable, one-time optional fee

**Registration and application fee are non-refundable, one-time mandatory fees

***Paid to a third party who provides these services

Required Equipment:

Students are required to have the following equipment and they are responsible for purchasing these on their own:

Hardware	Software	Internet & Email
Desktop/Laptop with i3 Intel processor or equivalent,	Windows 8 or later, Mac OS 10.13 or higher	High speed broadband (4 Mbs or higher) connection
Color monitor with 1024 x 768 resolution	Internet Explorer 11 or higher or another equivalent browser	Have a personal email account
Minimum 20 GB free Hard Disk Space	Microsoft Office 2015 or higher Version	
Minimum 2 GB RAM	Adobe Flash Player	
Audio speakers/headphone and microphone	Adobe Acrobat Reader (9.11 or DC)	

Payment Options:

All payments should be paid in full using Pay pal, Check, ECH Transfer or Credit Card (VISA, Master, and Amex) as per the schedule for each semester unless prior arrangements (deferred payment) are made.

UPAS does not offer loans. However, students can make the fee payment as one full payment or in two equal installments or as per agreed upon terms.

Fee Collection Policy:

Fees and charges are due by the specified due dates for each term. All students have following options to make payment. Payment is made in full by the mentioned due date - typically on the first day of the semester. Payment is made in two equal instalments - the first instalment is due on the first day of the semester; the second instalment is due on the first working day of the eighth week of the semester This payment plan is always available to all students. The institution allows students to make payments based on agreed upon flexible payment plan which must be approved by the Admission head.

There are no additional costs or fees to the students in making payments in instalments hence TILA requirements are not applicable.

The institution allows students to make payments based on agreed upon flexible payment plan.

- If the students are not able to make the payment as per the first agreed payment schedule, subsequently, the institution allows students to work with admissions to come with a new payment plan. There is no interest charged for the payments made through the payment plan.
- If the student still fails to make the payments on time, then the institution exercises the collection process. Collection agencies are authorized by the University to collect unpaid accounts in accordance with the Federal Fair Debt Collection Practices Act
- The University also in some circumstances pursues legal action to secure a court ordered judgment as a means of collecting unpaid accounts.
- Delinquent account information is provided to national credit reporting agencies and may impact an individual's credit rating.

Tuition Assistance:

We do not offer any tuition assistance currently. The school does not offer federal or state grants or loans or any other type of grants, loans, or scholarships at present.

Refund and Cancellation Policy**Cancel a Course:**

All students enrolling in UPAS online degree program pay the same fees regardless of whether they are in or out of the US. Tuition and fees are due before the start of classes in each academic session unless prior arrangements are made. All non-refundable fees are non-refundable once they are paid (Application and Registration). Transfer of credit is the only optional fee and it is also non-refundable. No other optional fees are charged. All communication is done by email. No expedited shipment available.

For Distance Learning Programs:

When instruction is not offered in real time, the student shall have the right to cancel the enrollment agreement and receive a full refund minus the non-refundable charges before the first lesson and materials are received. Cancellation is effective on the date written notice of cancellation is sent. If the school sent the first lesson and materials before an effective cancellation notice was received, the student should return all materials within 15 days of notice of cancellation.

STUDENT'S RIGHT TO CANCEL:

The Student has the right to cancel the enrollment and obtain a refund of refundable charges paid through attendance on the first day of class, or the seventh (7th) day after enrollment, whichever is later.

The cancellation occurs when the student gives written notice of cancellation to the Office of admissions, at the address of the school, shown below or email to admissions@upasadena.org. The Student can mail or hand-deliver the cancellation notice. The written notice of cancellation, if sent by mail, is effective when deposited in the mail, properly addressed with prepaid postage. The cancellation notices are to be addressed to: **University of Pasadena, Office of Admissions, 19401 South Vermont Avenue, Suite D202, Torrance, California 90502.**

HYPOTHETICAL REFUND EXAMPLE:

Students have a right to a full refund of all charges, less the \$50 application fee and the \$200 registration fee if the student cancels the enrollment agreement on the first day of class or within the seventh day after signing this agreement. The amount retained by the school will not exceed the **\$50 (fifty dollars) Application Fee and the \$200 (two hundred dollars) Registration Fee for a total of \$250** (two hundred and fifty dollars). Since UPAS is operating based out of the state of California, the refund policies follow CA state requirements.

If a student withdraws from the program after instruction has begun, the student will receive a pro rata refund for the unused portion of the tuition minus non-refundable charges. The date of withdrawal is the date of cancellation and is determined as the date the student notifies the school of the decision to cancel, or the last date of attendance, if the student fails to notify the school. The student will be charged for all hours attended. UPAS follows a 15- week semester and the courses are either 3-credit courses or 4-credit courses. The 3-credit courses are conducted for 3 hours per week and the 4-credit courses are conducted for 4 hours per week.

The following table illustrates the refund policy with a hypothetical example:

Total number of credits	36
Tuition fee per credit	\$50.00
Maximum possible class hours	$36 * 15 = 540$ total hours
Application + registration fee (non-refundable)	\$250.00
Total Tuition fees	$36 * 50 = \$1800.00 + \$250 = \$2050.00$
Per class hour cost	$1800/540 = \$3.33$
Total hours attended by the student	60 hours
Total due to school	$\$250 + (60 * \$3.33) = \$450.00$
Total due to student	$\$2050 - \$450 = \$1600.00$

For example, if the Student completes 60 hours of a 540---hour course and paid \$1800 for tuition in full and \$250 application and registration charges, the student will receive a refund of \$1,600.

The school will refund money collected from a third party on the student's behalf, if the school cancels or discontinues the course in which the student is enrolled, or if the student drops out. If any portion of the tuition was paid from the proceeds of a third party, the refund will be sent to the lender or agency that guaranteed the funds. Any remaining amount will first be used to repay any student financial aid programs from which the student received benefits, in proportion to the benefits received. Any remaining amount of money will be paid to the student. **If the student receives federal student financial aid funds to pay for an educational program, the student is entitled to a refund of the money not paid from federal financial aid funds.** If the student obtains a loan the student will have the responsibility to repay the full amount of the loan plus interest, less the amount of any refund. If the student defaults on a federal or state loan, both of the following may occur:

(1) The federal or state government or a loan guarantee agency may take action against the student, including garnishing an income tax refund; and (2) the student may not be eligible for any other government financial assistance at another institution until the loan is repaid.

UPAS will make all refunds within 30 days of written cancellation.

It is essential that students understand the details about their desired course and curriculum before registering for the courses. If the school sent the first lesson and materials before an effective cancellation notice was received, the school shall make a refund within 30 days.

All requests for withdrawal or dropping of courses must be submitted in writing for a refund to the following address or by email to admissions@upasadena.org:

University of Pasadena

Student Services

Internship and Placement Services (IPS) connects students, employers, alumni, faculty, and staff. IPS offers career counseling, provides information about upcoming career fairs, resume writing support, interview preparation support and networking opportunities through alumni relationships. The IPS builds the industry connections with the help of faculties that have industry connections and Alumni's. This information is used to provide Internship and placement support to the students and alumni. Alumni services: Career services and transcript services. For any requests or questions, please email to studentservices@upasadena.org

Placement/Career Services

As UPAS, offers online instruction, and there is online access to the school's Career Services Center where students can access career and job placement services: resume writing, cover letter, and networking opportunities. The curriculum includes job opportunities, networking availabilities, resumes and on-line programs for career search. For any requests or questions, email to placement@upasadena.org

Library Services

Students have access to the institution librarian to get help to identify resources and learning materials they need. The Librarian has regular office hours and can be reached through email and text at any time. Students,

When in need of finding resources for their study, they can contact the librarian with details including the topic of interest, the kind of resource requested and how soon they need it. The librarian sends them the requested material in the form of web links to posted information, publications, web sites, online educational videos or documents.

Librarian is available to answer student questions and provide the necessary guidance students may need in locating further material online. For library services, please email to library@upasadena.org

A variety of online services are also available for students to conduct research and have immediate access to texts, periodicals, and resource materials, and they include:

- This is an online digital library that provides resources including books, videos, documents, and publications. Every student at UPAS can request for access to this service, which will be provided at additional cost. The school librarian will have access to this service as well and students can exchange information with the librarian and faculty about resources they access through this service. They can also reach out to the librarian to find specific resources at this site.
- **Class mailing lists**, which students use to share information they find with their immediate peers.

Housing:

No housing assistance is available through UPAS; the institution does not have dormitory facilities under its control; there is no housing available as the programs of study are on line, and the institution has no responsibility to find or assist in students finding housing.

Transcript Requests:

All requests for transcripts should be addressed to the Office of the Registrar and must be authorized by the student (or former student) by their signature. There is a per copy cost for transcripts supplied by the institution for additional transcripts. Transcripts are not provided for those who have overdue financial obligations to the Institution. Please fill in the transcript request form from the website under form and submit the same to studentservices@upasadena.org and cc to registrar@upasadena.org

Full Name (and other names if there are any)

Program of Study

Social Security Number

Date of Birth

Mailing address for sending transcript

Contact phone number

Number of copies required

Student Records are kept permanently.

Fees (\$5 per transcript for normal delivery and \$25 for Quick delivery, \$2 processing fee per request)

Method of Payment: VISA, MasterCard, ACH transfer, American Express.

Please send your request to:

University of Pasadena

19401 South Vermont Avenue, Suite D202, Torrance, California 90502

Email: info@upasadena.org

Website: <http://www.upasadena.org>

Note: Request can be made at any time from Monday through Friday during normal working hours, except during university and national holidays.

Attendance Policy:

Consistent participation in class is a minimum requirement. Although the on-line classes do offer flexibility to students, there are weekly deadlines for attending the sessions scheduled for each week. Falling behind in classwork due to absences is detrimental to the student and the entire class. Once a student misses three class sessions (that is, fails to meet weekly commitments) he/she will be placed on probation. Probation is meant to serve as a warning. If the student does not improve attendance, and falls below 85% attendance rating, the student will not receive the Grade for that course and will have to repeat the course in the following semester (See Dismissal below). There are no excused absences except for family bereavement, major religious holiday, or due to a doctor's orders for which proof must be provided.

There will be online group sessions that have set times. Tardiness in attending such sessions will not be tolerated. Classes begin on time; a faculty member reserves the right to refuse to let students enter the session if students are tardy. If a student is tardy to class more than 3 times, that will be considered an absence for that class.

Maintaining Official Student Records and Transcripts:

Student academic records are maintained in a paper and digital format while students are currently enrolled. Graduate Students' *Official Academic Transcripts* are kept permanently. Students may contact the school administration through mail registrar@upasadena.org or studentservices@upasadena.org to order transcripts and/or to receive a copy of their academic records.

Probation or Dismissal Policy:

Grounds for probation includes if students do not attend or participate in online classes at a minimum of 85%, or if a student is disruptive to any portion of the instruction. The attendance and the grade percentage of every student are continuously tracked on the Open LMS. Once on probation, students have one term to improve their attendance and/or grades, and behavior or they will be dismissed from the program. So, in effect, if a student falls below 85% attendance in two consecutive terms, the student will be dismissed from the program.

Non-academic dismissal policy

Non-Academic means those activities/behaviors and matters not directly related to the instructional/learning process. A violation of the published rules, regulations, practices, procedures or policies of the University or of any authorized rule-making body within the University, including all academic and administrative units, any residence, and a violation of any professional code of conduct applicable to any faculty or department

Academic Progress Policy:

The Assessment and Grading Policy establishes a framework for the academic team to ensure that students are progressing at an acceptable pace and working towards completion of their program. This has been put in place to help students achieve their goals.

This policy applies to all members of the academic team. They are expected to be well versed with this policy so that they can answer any questions students may have in this regard.

Graduate Level - Students must meet a 3.0 cumulative GPA at the end of the term and program with graduate hours to graduate. This includes all credit hours taken by the student while enrolled in the institution as a

graduate student.

While the institution offers flexibility to students to choose the number of credits they sign up for in each term/semester, all students must complete 70% of all credit hours attempted at the start of the semester.

This completion ratio is obtained by dividing the number of credit hours successfully completed at the end of the semester by the total number of credit hours signed up for by the student at the beginning of the semester.

Successful completion of a course is defined as earning a A, A-, B+, B or B- Unsuccessful completion is defined as earning a grade of C, D, F or I.

Students who do not complete assigned course work within a grading period will receive an incomplete grade ("I"), which is unacceptable as a final grade. However, with an instructor's approval, a student may be granted an extension to complete the required course work. If the work is not completed within the designated period, the student will be assigned an "F" and required to repeat the course. Credit hours will also be denied until the student meets satisfactory progress.

Letter grade is awarded on successful completion of a capstone project or internship.

A student who withdraws from a course will receive the symbol "W" (Withdrawal) for the course, which has no impact on the grade.

Quantitative Measure of Progress:

While the institution offers flexibility to students to choose the number of credits they sign up for in each term, all students must complete 70% of all credit hours attempted at the start of the term.

This completion ratio is obtained by dividing the number of credit hours successfully completed at the end of the term by the total number of credit hours signed up for by the student at the beginning of the term.

Maximum Time Frame for Degree Completion:

All graduate students are expected to complete the degree program within 3 years from the date of enrollment after which a written request must be made to the CAO (cao@upasadena.org) asking for an extension. The 3-year timeframe includes time that students take off for vacation or leave of absence. If the student does not provide the required paperwork to end their program or request for extension within the threshold date, they will be administratively dropped from the program

Satisfactory Academic Progress Probation:

The qualitative component, quantitative components and time frame component (completion of the program) for each student are monitored at the end of each term in order to provide a formal intervention by the institution for those who do not meet the SAP standards. Such students will be placed on probation.

Students can repeat a failed course only once. The ability to retake the course is subject to the approval of CAO and to availability of the course in that term. The grade earned from a repeated course will replace the original grade and become the final grade of the student's record.

Confidentiality and Privacy Policy:

The Institution gathers only the following personal information such as name, address, driver license, social security number, email, phone number, date of birth and educational qualifications. No other information is collected. The information collected is not disclosed to third party and is kept for Institution use only. The personal information is classified as confidential and only accessible on a need to know basis by the internal staff. The data is protected by a strict access control mechanism so that only the person who needs to know the data has access to it. All personal data is protected by strong password policy and access is tracked and logged. Anyone who accesses the personal data without proper approval or access will be subject to strict disciplinary actions. The Institution staffs are required to sign the confidentiality agreement that they will

follow the privacy policy and related procedures in a proper manner relating to collection, storage, access and disposal of records.

Complaint/Grievance Policy:

The Institution goal is to provide a fair and enjoyable work environment for all employees. The Institution encourages direct communication between staff and their supervisors to resolve any conflicts. Since this is an online institution and most of the staff work remotely, all communication happens online and over the phone. So, the staff is encouraged to directly raise the issue with the supervisor since it is the best way to address any complaints or grievance. Students are also encouraged to directly work with the faculty first to resolve their complaints. The grievance policy addresses work place harassment, supervisor behavior and health/safety. The escalation for student related complaints/grievance are done to the Chief Academic Officer by sending email to cao@upasadena.org. The employee related complaints/grievance are to be sent to hr@upasadena.org. The complaints must be filed within 10-business day of the incident. The Institution is committed in resolving all complaints within 5 business days. The complaint and all responses/decisions are kept permanently in the employee or students file. Any retaliation against the employee or students who file complaints will be taken very seriously and strict disciplinary actions will be taken against those employees, staff or administrators. If the employee or student is not satisfied that the Institution has addressed their concerns to their satisfaction, they can raise the issue with

**Bureau for Private Postsecondary
Education 1747 North Market, Suite 225
Sacramento, CA 95834**

Phone: (916) 574-8900

Toll Free: (888) 370-7589

Fax: 916.263.1897

Web site: www.bppe.ca.gov

E-mail: bppe@dca.ca.gov

Student Identity Verification Policy:

The Institution is an online university. So, the institution must verify that the student who applies for the program is the same student who participates and completes the program and receives the academic credit. Following methods are used to verify the student identify.

- A secure login and password, which is required to login to the Learning Management System. The student is required to keep the user name and password personal and confidential.
- Proctored examinations – requires face-to-face interaction to minimize the possibility of academic dishonesty
- Valid government issued photo id

All personal information collected to verify the identity of the student will be protected as per the Institution's privacy policy. Students are responsible for providing complete and honest information in any identify verification process. Because technology and personal accountability will not completely ensure academic integrity, faculty and content developers are encouraged to design courses that employ assignments and evaluations that support academic integrity.

Proctored examinations

- All final examinations at the end of the term (week 15) will be online proctored examinations.
- An email notice from academics will be sent to all students in week 12 with exam details and time slots choices per course.

Example		
Course Name	Date	Slot 1
		Slot 2
		Slot 3

- Students should submit “Proctored examination request form” by end of week 13.
- At the time of examination, the online proctor will verify student’s identity by checking government approved photo ID against the ID submitted during admission.
- After verification process, the online proctor will share the proctor password with the students to begin the examination.
- Students will take the exam in his/her laptop/System as per the examination details (date, time, duration).

Non-Discrimination Policy:

The Institution complies with all applicable federal, state and local laws prohibiting the exclusion of any person because of race, creed, color, national origin, sex, sexual orientation, gender identity or expression, marital status, age or disability subject to the conditions established by the law. This compliance is applicable to both students and employees. Since the institution is an online university and plans to attract students from all over the world, the institution encourages diversity in employees, top administration and student population. Any questions or concerns regarding non - discrimination policy should be addressed to compliance@upasadena.org

The Disability Support (DS) program at UPAS is part of Student Services and is the primary provider for support programs and services that facilitate equal educational opportunities for students with disabilities who can benefit from instruction as required by federal and state laws.

Student code of conduct:

By enrolling at the Institution by signing the enrollment agreement, students accept responsibility for compliance with all university’s code of conduct. Strict disciplinary action will be taken if the students commit or attempt to commit the following misconduct:

- Academic Dishonesty and integrity are core values of the Institution and if the faculty or staff finds that even one incident of academic dishonesty may merit expulsion. Both students and faculty are jointly responsible for maintaining academic standards and integrity. Academic dishonesty includes plagiarism, cheating and forging.
- Misusing university resources including using identification of another student, accessing records that they are not supposed to access, sending abusive messages, violating copyright laws and unauthorized entry into the university building
- Threat to any person’s mental or physical health including physical violence, sexual misconduct, and sexual harassment
- Discrimination and retaliation.
- Violation of any university policy

State of California Disclosure Statements:

State of California, Bureau for Private Post-secondary Education: **UPAS** is a private institution that is approved to operate by the Bureau for Private Postsecondary Education. Approval means that the institution follows the California Private Postsecondary Act of 2009.

Any questions a student may have regarding this catalog that have not been satisfactorily answered by the institution may be directed to the Bureau for Private Postsecondary Education

Bureau for Private Postsecondary Education

Toll Free: (888) 370-7589

Fax: 916.263.1897

Web site: www.bppe.ca.gov

E-mail: bppe@dca.ca.gov

As a prospective student are encouraged to review this catalog prior to signing an enrollment agreement. You are also encouraged to review the *School Performance Fact Sheet*, which must be provided to you prior to signing an enrollment agreement.

A student or any member of the public may file a complaint about this institution with the Bureau for Private Post-secondary Education by calling 888:370:7589 or by completing a complaint form, which can be obtained on the Bureau's Internet Web Site: www.bppe.ca.gov.

All student records are maintained at the institution's main office while students are enrolled and are available only in digital format after graduation. Official academic transcripts are maintained permanently.

All instruction is conducted on-line

Student, Faculty/Staff Complaint/Grievance Procedures

Persons seeking to resolve problems or complaints should first contact the instructor in charge and then the office administration. Requests for further action may be made to the School Director or to the Chief Academic Officer (CAO) academics@upasadena.org

The School Director or The Chief Academic Officer (CAO) is the initial contact for any ethics issues or grievances about classes, students, instructors, staff members, or situations.

Students who have ethics concerns may contact the school to request the name and phone number for the CAO or School Director. Any contact/discussion with the School Director or CAO is completely confidential.

Complaint/Grievance form are available in the website.

STUDENTS' RIGHTS POLICY:

UPAS adheres to all state and federal laws concerning the use of personal information. As such, UPAS is committed to the responsible use of personal information collected from and about students, faculty, staff, business partners and others who entrust this information to us. Such personal information includes any name or numbers (e.g. social security numbers and dates of birth) that may be used alone or in conjunction with any other information to identify a specific individual, or other personal information that could be used to cause financial or reputational harm to an individual. This policy applies to information that is collected by any means whether electronically, by telephone, or on paper. UPAS forbids access to all such information without written consent from the student.

Student Integrity and Academic Honesty Policy

University of Pasadena applies its student integrity and academic honesty policies to ensure that examinations, results and the final grades truly reflects the stated learning outcomes.

- Secure login and password - All students are assigned a unique student ID and password to login to learning management system (LMS) and student portal. The students are instructed to keep this ID/password personal and confidential.
- Plagiarism tool - Student should understand that plagiarism would not be tolerated at any level. The instructors will check for plagiarism when they suspect one.
- Proctored examinations- All final examinations at the end of the term (week 15) will be online proctored examinations.

Violation penalty

Integrity violation penalty (Having another person take the assessments)

- First time violation of the policy - withdrawn from the course
- Second time violation of the policy - dismissed from the University

Honesty violation penalty (Plagiarism – submitting others work as their own)

- First time violation of the policy - redo/rework the assignment/assessment of the course
- Second time violation of the policy - will be awarded zero mark/points for the activity
- Third time violation of the policy - withdrawn from the course

Transfer of Credits:

NOTICE CONCERNING TRANSFERABILITY of CREDITS and CREDENTIALS EARNED at this INSTITUTION:

The transferability of the credits you earn at University of Pasadena is at the complete discretion of an institution to which you may seek to transfer.

Acceptance of the Degree you earn in the Master of Science Degree in General Engineering, Master of Arts in Education at University of Pasadena is also at the complete discretion of the institution to which you may seek to transfer. If the Degree that you earn at this institution to which you seek to transfer is not accepted at the institution to which you seek to transfer, you may be required to repeat some or all of your coursework at that institution. For this reason you should make certain that your attendance at this institution will meet your educational goals. This may include contacting an institution to which you may seek to transfer after attending University of Pasadena (UPAS) to determine if your degree will transfer.

Transfer Credit Evaluation:

- Credits earned at other institutions will be evaluated using the following criteria: Transcript copies must be forwarded to the Office of Admissions for evaluation.
- Only those courses that are substantially comparable to the acting courses at this institution will be considered for evaluation.
- Courses under consideration must have a grade of "B" or higher.

This institution makes no representation whatsoever concerning the transferability of any credits to any institution.

The institution has not entered into an articulation or transfer agreement with any other college or university
Experiential Credit is not given nor evaluated at this institution.

Transferring Students:

For UPAS to determine whether your course credits can be transferred or not, please mail all your relevant transcripts to the admissions office at UPAS. Acceptance of credits will be based on the

Approval from our Chief Academic Officer (CAO) or satisfactory performance in our challenge examinations for the respective course.

We allow students to transfer up to 10 credits for master's programs, upon approval based on criteria specified above.

Student Tuition Recovery Fund (STRF) Fees Disclosures:

"The State of California established the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic loss suffered by a student in an educational program at a qualifying institution, who is or was a California resident while enrolled, or was enrolled in a residency program, if the student enrolled in the institution, prepaid tuition, and suffered an economic loss. Unless relieved of the obligation to do so, you

must pay the state-imposed assessment for the STRF, or it must be paid on your behalf, if you are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition.

You are not eligible for protection from the STRF and you are not required to pay the STRF assessment, if you are not a California resident, or are not enrolled in a residency program.”

“It is important that you keep copies of your enrollment agreement, financial aid documents, receipts, or any other information that documents the amount paid to the school. Questions regarding the STRF may be directed to the Bureau for Private Postsecondary Education, 1747 North Market Blvd., Suite 225, Sacramento, CA 95834, (916) 574-8900 or (888) 370-7589.

To be eligible for STRF, you must be a California resident or are enrolled in a residency program, prepaid tuition, paid or deemed to have paid the STRF assessment, and suffered an economic loss as a result of any of the following:

1. The institution, a location of the institution, or an educational program offered by the institution was closed or discontinued, and you did not choose to participate in a teach-out plan approved by the Bureau or did not complete a chosen teach-out plan approved by the Bureau.
2. You were enrolled at an institution or a location of the institution within the 120 day period before the closure of the institution or location of the institution, or were enrolled in an educational program within the 120 day period before the program was discontinued.
3. You were enrolled at an institution or a location of the institution more than 120 days before the closure of the institution or location of the institution, in an educational program offered by the institution as to which the Bureau determined there was a significant decline in the quality or value of the program more than 120 days before closure.
4. The institution has been ordered to pay a refund by the Bureau but has failed to do so.
5. The institution has failed to pay or reimburse loan proceeds under a federal student loan program as required by law or has failed to pay or reimburse proceeds received by the institution in excess of tuition and other costs.
6. You have been awarded restitution, a refund, or other monetary award by an arbitrator or court, based on a violation of this chapter by an institution or representative of an institution, but have been unable to collect the award from the institution.
7. You sought legal counsel that resulted in the cancellation of one or more of your student loans and have an invoice for services rendered and evidence of the cancellation of the student loan or loans.

To qualify for STRF reimbursement, the application must be received within four (4) years from the date of the action or event that made the student eligible for recovery from STRF.

A student whose loan is revived by a loan holder or debt collector after a period of non-collection may, at any time, file a written application for recovery from STRF for the debt that would have otherwise been eligible for recovery. If it has been more than four (4) years since the action or event that made the student eligible, the student must have filed a written application for recovery within the original four (4) year period, unless the period has been extended by another act of law.

However, no claim can be paid to any student without a social security number or a taxpayer identification number.”

ADDITIONAL DISCLOSURES:

Students are to please review the following before registering and enrolling in any class at this institution.

Title IV

This institution is not accredited at this time, and therefore does not qualify to offer Title IV funding of any kind. Until UPAS is accredited, the degree from UPAS is not recognized for some employment positions including but not limited to positions with some states.

Financial Aid

This institution does not participate, nor does it offer financial aid of any kind, not federal (Title IV), state, or any other government funding source.

Loans

This institution does not offer education loans of any kind. If a student were to obtain a loan to pay for an educational program, the student would have the responsibility to repay the full amount of the loan plus interest, less and amount of any refund, and that, if the student has received federal student financial aid funds, the student is entitled to a refund of the money's not paid from the federal student financial aid program funds.

Distance Education

This institution's education offerings are distance learning (online learning) only. Students will receive all materials and information regarding their online class one week prior to the start of class, and one week after all enrollment and registration matters have been completed.

Student Visas:

As UPAS offers only distance/online education this institution does not issue student visas of any kind.

Licenses:

There are no licensing exams required by the students upon graduation from any program at UPAS.

Bankruptcy

This institution does not have a pending petition in bankruptcy, is not operating as a debtor in possession, has not filed a petition within the preceding five years, or has had a petition in bankruptcy filed against it within the preceding five years that resulted in reorganization under Chapter 11 of the United States Bankruptcy Code (11 U.S.C. Sec 1101 et seq.).

Any questions a student may have regarding this catalog that have not been satisfactorily answered by the institution may be directed to the Bureau for Private Postsecondary Education. Their contact information is:

Job Classification

Currently the University of Pasadena and its degree programs are not accredited by an accrediting agency recognized by the United States Department of Education. A graduate of an unaccredited Degree program may not be eligible to sit for applicable licensure exams in California and other states. A degree program that is unaccredited or a degree from an unaccredited institution is not recognized for some employment positions, including, but not limited to positions with the State of California. A student enrolled in an unaccredited institution is not eligible for federal financial aid
