General Information

American Fabrication Academy Campus and Main Office
1781 Capital St. Suites G, H, I and 1791 Capital St. Suites G, H, I
Corona, CA 92878
(951) 279-9353
AmericanFabricationAcademy.com
@AmericanFabricationAcademy

Thank you for taking an interest in American Fabrication Academy (AFA). As a prospective student, you are encouraged to review this catalog prior to signing an Enrollment Agreement. You are also encouraged to review the School Performance Fact Sheet, which must be provided to you prior to signing an Enrollment Agreement. All information provided in the American Fabrication Academy catalog is correct and current to the best of our knowledge. No information has been withheld in this catalog.

Class Locations

Classes will be held at our main campus:
1781 Capital St Suites G, H, I and 1791 Capital St. Suites G, H, I
Corona, CA 92878

Approval Disclosure Statement

American Fabrication Academy is a private institution that is approved to operate by the Bureau of Private and Post-Secondary Education (BPPE). The approval to operate means compliance was met with state standards as set forth in the CEC and 5,CCR.

Statement of Financial Soundness

American Fabrication Academy has never filed a Bankruptcy Petition, has never operated as a debtor in possession, and has never had a Petition for Bankruptcy filed against it under Federal Law. American Fabrication Academy has not filed a petition within the preceding 5 years, has not had a petition in bankruptcy and has not had a petition in bankruptcy filed against it within the preceding 5 years that resulted in reorganization under chapter 11 of the United States Bankruptcy Code U.S.C sec.1101 at seq.

Prospective Students

As a prospective student, you are encouraged to review this catalog prior to signing an Enrollment Agreement. You are also encouraged to review the School Performance Fact Sheet, which must be provided to you prior to signing an Enrollment Agreement.

Instructional Language

All classes are conducted in English to students who are fluent in the English language. American Fabrication Academy does not offer an English as a Second Language (ESL) program.

Mission Statement, Purpose, and Objectives

The Essentials of Fabrication Program is the only course offered and is the heart of our metal fabrication school. Our mission statement at American Fabrication Academy is “Creating careers in metal fabrication”. The objective of American Fabrication Academy is to provide students with the resources and training needed to fully comprehend metal fabrication at its core. Our curriculum, as listed below, goes into detail listing the things you as a student will learn to provide you with the knowledge and skills necessary to become a marketable metal fabricator.

The Essentials of Fabrication Coursework teaches you:

Mig, Tig and Stick Welding - Machining - Sheet Metal Forming - Chassis Fabrication - Tube Fabrication - Blueprint Comprehension - Motorsports Fabrication - Resume Writing, and Interview Preparation etc.

Students will be trained on the following equipment:

Mig, Tig and stick welders, plasma cutter, manual tubing bender and programmable tubing bender, grinders and polishers, sheet metal stomp shear, hydraulic shear, sheet metal brake, pop rivet gun, English wheel, bead roller, bag and hammer forming, horizontal and vertical band saw, cold saw, abrasive and hole saw notchers, manual mill, manual lathe, drill press, precision measuring tools (dial calipers, micrometers, dial indicator).

Description of Facility, Equipment and Materials

American Fabrication Academy is located in an industrial park at 1781 Capital St. Suites G, H, I and 1791 Capital St. Suites G, H, I, Corona, CA 92878. The administrative office, four classrooms, and labs are all within the facility and have a student occupancy of 84 (48 total in four day classes, 36 total in three night classes). American Fabrication Academy owns all state-of-the-art equipment needed to support the achievement of the educational objectives to successfully teach and train students in metal fabrication. Students will acquire the necessary level of education, training, skill, and experience to obtain employment and confidence in operating equipment generally used in current metal fabrication occupations.

American Fabrication Academy's office and classrooms include heating and cooling, ventilation, and lighting. Classrooms, laboratories, and campus environs are all well maintained. All permits required by any public agencies relating to the health and safety of the institution's facilities and equipment are valid and on file, and such permits shall be available to the Bureau upon request.

Course	Total Clock Hours	Document Awarded at Completion
Essentials of Fabrication	600	Certificate of Completion

Day Schedule

Monday through Thursday 8 hours per day (8:00am - 4:30pm), 18.75 weeks, 600 clock hours

Morning break from 10:00am to 10:15am, lunch from 12:15pm to 1:00pm, afternoon break from 3:00pm to 3:15pm.

Night Schedule

Monday through Thursday 4 hours per night (5:00pm - 9:00pm), 37.5 weeks, 600 clock hours

Evening break from 7:00pm to 7:15pm.

2024 Day Class Start and End Dates

1/8/2024 to 5/15/2024
2/6/2024 to 6/17/2024
3/11/2024 to 7/22/2024
4/15/2024 to 8/28/2024
5/20/2024 to 10/1/2024
6/18/2024 to 10/29/2024
7/23/2024 to 12/3/2024
9/3/2024 to 1/27/2025
10/2/2024 to 2/25/2025
10/30/2024 to 3/25/2025
12/4/2024 to 4/28/2025

2024 Night Class Start and End Dates

1/31/2024 to 10/23/2024
4/29/2024 to 2/4/2025
7/30/2024 to 5/5/2025
10/24/2024 to 7/30/2025

2024 Holiday Schedule

Memorial Day May 27, 2024
Independence Day July 4, 2024
Labor Day September 2, 2024
Thanksgiving November 28, 2024

Winter Break is from December 23, 2024, to January 3, 2024, with a return to class on January 6, 2025.

Instructional Method

American Fabrication Academy is a hands-on, on campus school. There is no satellite, online or distance education courses offered.

Programs Offered

American Fabrication Academy offers a 600 clock hour Essentials of Fabrication program. Students are part of a 12 student to 1 instructor class ratio while learning in a classroom setting (10%) as well as hands-on lab learning (90%). The requirements for completing the program are as follows: Completion of 600 hours as well as a 70% or higher overall score for classroom and lab projects. A final exam will be given at the end of the Essentials of Fabrication program and will test the students' knowledge and retention of the information taught in the courses. Our Essentials of Fabrication course is an accredited educational program, however, does not offer any degrees or licensing programs. This institution does not require any internship or externship to complete the program. The Essentials of Fabrication program does not lead to positions in a profession, occupation, trade, or career field requiring licensure in the state of California.

Required Courses in Essentials of Fabrication /Clock Hours

101. MIG welding	32
102. TIG Welding	64
103. Square Tube Construction	24
104. Aluminum Project	16
105. Drilling	16
106. Plasma Cutting	8
107. Blueprint Comprehension	8
108. MIG Aluminum and Stick Welding	28
109. Toolbox Sheet Metal Project	48
110. Sheet Metal Forming	16
111. Bending	24
112. Notching	24
113. Bead Rolling	32
114. AWS TIG Certification	16
115. Motorcycle Chassis	32
116. Cab and Chassis Project	80
117. Manual Mill and Lathe	96
118. Career Services and Job Search	32
119. Final Written Exam	4
<i>Total Program Clock Hours</i>	600

Module Descriptions

101 MIG Welding

As a result of classroom instruction and shop training this module will prepare the student with basic knowledge of MIG welding. Students will execute Butt and Fillet joints in horizontal and vertical positions. Students will weld on round and square mild steel tubing. Students will be evaluated on the precision and technique involved in the welding process.

Shop safety and machine knowledge will be continuously reviewed on every machine or piece of equipment used in this module. Shop safety is an ongoing lesson which is addressed throughout each project. **32 Clock Hours**

102 TIG Welding

As a result of classroom instruction and shop training this module will prepare the student with basic knowledge of TIG welding both alternating and direct current on aluminum and steel. Welding will be performed in the horizontal and vertical position on sheet metal square tubing and round tubing. Students will be evaluated on the precision and technique involved in the welding process.

Shop safety and machine knowledge will be continuously reviewed on every machine or piece of equipment used in this module. Shop safety is an ongoing lesson which is addressed throughout each project. **64 Clock Hours**

103 Square Tube Construction Project

As a result of classroom instruction and shop training this module will prepare the student with basic knowledge of the use of a tape measure to make precise cuts on square tubing and construction of joints with various degrees of angle to construct a workbench.

Shop safety and machine knowledge will be continuously reviewed on every machine or piece of equipment used in this module. Shop safety is an ongoing lesson which is addressed throughout each project. **24 Clock Hours**

104 Aluminum Sheet Project

As a result of classroom instruction and shop training this module will prepare the student with basic knowledge of sheet metal shear, bead roller, pneumatic and hand grinding tools and the alternating current TIG welding process to cut, fit, weld, grind and finish the vase/trashcan project. Students will be evaluated on size, fitment, welding and grinding process on this project.

Shop safety and machine knowledge will be continuously reviewed on every machine or piece of equipment used in this module. Shop safety is an ongoing lesson which is addressed throughout each project. **16 Clock Hours**

105 Drilling

As a result of classroom instruction and shop training, this module will prepare the student with basic knowledge of all types of drill bits, hand drill, pneumatic drill, drill press. Students will practice drilling, reaming and deburring. Students will be evaluated on their knowledge of drill bits and the drilling process.

Shop safety and machine knowledge will be continuously reviewed on every machine or piece of equipment used in this module. Shop safety is an ongoing lesson which is addressed throughout each project. **16 Clock Hours**

106 Plasma Cutting

As a result of classroom instruction and shop training this module will prepare the student with basic knowledge on handheld plasma cutting machines and the plasma cutting process. Students will utilize the handheld plasma cutter on thin gauge sheet metal to create a rose project. Students will be evaluated on the craftsmanship and styling of their project.

Shop safety and machine knowledge will be continuously reviewed on every machine or piece of equipment used in this module. Shop safety is an ongoing lesson which is addressed throughout each project. **8 Clock Hours**

107 Blueprint Comprehension

As a result of classroom instruction and shop training this module will prepare the student with basic knowledge of blueprints and shop drawings. Students will learn scale, legends information boxes, revision blocks, title blocks, grid system and line standards. Students will be evaluated on their knowledge of all text and lines in blueprints and engineered drawings.

Shop safety and machine knowledge will be continuously reviewed on every machine or piece of equipment used in this module. Shop safety is an ongoing lesson which is addressed throughout each project **8 Clock Hours**

108 MIG Aluminum and Stick Welding

As a result of classroom instruction and shop training this module will prepare the student with basic knowledge of welding aluminum with a spool gun. Students will also be trained in basic stick welding 7018 and 6013 and be evaluated on the quality and craftsmanship of their weld.

Shop safety and machine knowledge will be continuously reviewed on every machine or piece of equipment used in this module. Shop safety is an ongoing lesson which is addressed throughout each project. **28 Clock Hours**

109 Toolbox Sheet Metal Project

As a result of classroom instruction and shop training this module will prepare the student with basic knowledge of sheet metal brake, dial calipers, sheet metal shear, bead roller, horizontal band saw, rivet gun and TIG welder to construct a toolbox. Students will be evaluated on the layout, craftsmanship and measurements of their toolbox.

Shop safety and machine knowledge will be continuously reviewed on every machine or piece of equipment used in this module. Shop safety is an ongoing lesson which is addressed throughout each project. **48 Clock Hours**

110 Sheet Metal Forming

As a result of classroom instruction and shop training this module will prepare the student with basic knowledge of English wheel, bossing mallet, slapper and shrinking head to create contours in thin aluminum sheet metal. Students will be evaluated on the overall shape and craftsmanship of their bowl project.

Shop safety and machine knowledge will be continuously reviewed on every machine or piece of equipment used in this module. Shop safety is an ongoing lesson which is addressed throughout each project. **16 Clock Hours**

111 Bending

As a result of classroom instruction and shop training this module will prepare the student with basic knowledge of the JD Squared hydraulic draw bender. Students will draft bending projects on paper to accomplish various bend angles and clocking angles to match the drawing. Students will be evaluated on accuracy of bend angle, clocking and the distance between bend starts.

Shop safety and machine knowledge will be continuously reviewed on every machine or piece of equipment used in this module. Shop safety is an ongoing lesson which is addressed throughout each project. **24 Clock Hours**

112 Notching

As a result of classroom instruction and shop training this module will prepare the student with basic knowledge of hole saw notcher, abrasive notcher and hand notching process with grinders. Students will be evaluated on fitment angles and alignment of tube notches.

Shop safety and machine knowledge will be continuously reviewed on every machine or piece of equipment used in this module. Shop safety is an ongoing lesson which is addressed throughout each project. **24 Clock Hours**

113 Bead Rolling Project

As a result of classroom instruction and shop training this module will prepare the student with basic knowledge of the bead rolling machine and all the dies with it including but not limited to the step die, bead die, tank roll die and spoiler die. Students will use these dies to form sheet metal panels to roll the ends to fit on tubing. Students

will use Dzus fasteners to fasten the panels to the chassis project. Students will be evaluated on the accuracy and craftsmanship of their project.

Shop safety and machine knowledge will be continuously reviewed on every machine or piece of equipment used in this module. Shop safety is an ongoing lesson which is addressed throughout each project **32 Clock Hours**

114 AWS TIG Certification

An American Welding Society (AWS) welding inspector will be evaluating and certifying our students in TIG welding of mild steel, stainless steel, and aluminum.

Shop safety and machine knowledge will be continuously reviewed on every machine or piece of equipment used in this module. Shop safety is an ongoing lesson which is addressed throughout each project. **16 Clock Hours**

115 Motorcycle Chassis

As a result of classroom instruction and shop training this module will prepare the student with basic knowledge of geometry and safety of constructing a tubular American V-Twin motorcycle chassis utilizing tube benders, mill, lathe and the Bend Tech operating program. Students will be evaluated on precision and craftsmanship as a group.

Shop safety and machine knowledge will be continuously reviewed on every machine or piece of equipment used in this module. Shop safety is an ongoing lesson which is addressed throughout each project. **32 Clock Hours**

116 Cab Chassis Project

As a result of classroom instruction and shop training this module will prepare the student with basic knowledge of construction of a roll cage, engine cage and bed cage on an extra cab Ford Ranger. Students will utilize tube benders, saws, measuring tools, grinders, welders and drafting skills to construct a full-size vehicle cage. Students will be evaluated as a group on the accuracy and craftsmanship of their cage.

Shop safety and machine knowledge will be continuously reviewed on every machine or piece of equipment used in this module. Shop safety is an ongoing lesson which is addressed throughout each project **80 Clock Hours**

117 Manual Mill and Lathe

As a result of classroom instruction and shop training this module will prepare the student with basic knowledge of the manual milling machine and the manual lathe. Students will use precision measuring tools such as dial calipers and micrometers and cut, face, turn, drill, and tap aluminum and steel to a thousandth of an inch. Students will be evaluated by measuring their project to written specs.

Shop safety and machine knowledge will be continuously reviewed on every machine or piece of equipment used in this module. Shop safety is an ongoing lesson which is addressed throughout each project. **96 Clock Hours**

118 Career Services and Job Search

As a result of classroom instruction and shop training this module will prepare the student with basic knowledge of resume writing filling out job applications, interview skills and job search. **32 Clock Hours**

119 Final Written Exam

In this module students will be evaluated on knowledge from all their written tests throughout the course, there will be a written test with 60 questions. **4 Clock Hours**

American Fabrication Academy Grading Scale & Graduation Requirements

A= Excellent = 90% -100%

B= Good = 80% - 89.9%

C= Satisfactory = 70% - 79.9%

F= Failed = 0% - 69.9%

I= Incomplete = 0%

W= Withdrawn from course or program / No grade given

To be eligible for a certificate of completion each student must satisfy the requirements below:

Overall grade of 70% or better

Completed all 600 hours of classroom/lab hours

Satisfied all financial obligations to American Fabrication Academy

Accreditation

American Fabrication Academy is accredited by the Council for Occupational Education (COE), 7840 Roswell Rd., Building 300, Suite 325, Atlanta, GA 30350, Telephone: (770) 396-3898 / FAX: (770) 396-3790, www.council.org. The Department of Education recognizes the COE as a national accrediting agency and American Fabrication Academy obtained initial accreditation on December 8, 2021.

Total Charges

Total List of Charges: Essentials of Fabrication 600-hour course (as of 4/1/2024)

Tuition \$25,650.00

Deposit/Registration Fee \$100.00

Student Tuition Recovery Fund Fee (STRF) CA Residents Only \$0.00

Learning media, uniform shirts, protective hood, tools, & materials included \$0.00

TOTAL CHARGES FOR THE CURRENT PERIOD OF ATTENDANCE \$25,750.00

ESTIMATED TOTAL CHARGES FOR ENTIRE PROGRAM \$25,750.00

TOTAL AMOUNT DUE AT ENROLLMENT \$100.00

Student Tuition Recovery Fund (STRF)

The State of California established the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic losses suffered by a student in an educational program at a qualifying institution, who is or was a California resident while enrolled, or was enrolled in a residency program, if the student enrolled in the institution, prepaid tuition, and suffered an economic loss. Unless relieved of the obligation to do so, you must pay the state-imposed assessment for the STRF, or it must be paid on your behalf, if you are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition. You are not eligible for protection from the STRF, and you are not required to pay the STRF assessment, if you are not a California resident, or are not enrolled in a residency program.

It is important that you keep copies of your Enrollment Agreement, financial aid documents, receipts, or any other information that documents the amount paid to the school. Questions regarding the STRF may be directed to the Bureau for Private Postsecondary Education, 1747 N. Market Blvd, Suite 225, Sacramento, CA 95834 P.O. Box 980818, West Sacramento, CA 95798-0818 (916) 431-6959 or (888) 370-7589.

To be eligible for STRF, you must be a California resident or are enrolled in a residency program, prepaid tuition, paid or deemed to have paid the STRF assessment, and suffered an economic loss as a result of any of the following:

1. The institution, the location of the institution, or an educational program offered by the institution was closed or discontinued, and you did not choose to participate in a teach-out plan approved by the Bureau or did not complete a chosen teach-out plan approved by the Bureau.
2. You were enrolled at an institution or a location of the institution within the 120-day period before the closure of the institution or location of the institution or were enrolled in an educational program within the 120-day period before the program was discontinued.
3. You were enrolled at an institution or a location of the institution more than 120 days before the closure of the institution or location of the institution, in an educational program offered by the institution as to which the Bureau determined there was a significant decline in the quality or value of the program more than 120 days before closure.
4. The institution has been ordered to pay a refund by the Bureau but has failed to do so.
5. The institution has failed to pay or reimburse loan proceeds under a federal student loan program as required by law or has failed to pay or reimburse proceeds received by the institution in excess of tuition and other costs.
6. You have been awarded restitution, a refund, or other monetary award by an arbitrator or court, based on a violation of this chapter by an institution or representative of an institution, but have been unable to collect the award from the institution.
7. You sought legal counsel that resulted in the cancellation of one or more of your student loans and have an invoice for services rendered and evidence of the cancellation of the student loan or loans.

To qualify for STRF reimbursement, the application must be received within four (4) years from the date of the action or event that made the student eligible for recovery from STRF.

A student whose loan is revived by a loan holder or debt collector after a period of non-collection may, at any time, file a written application for recovery from STRF for the debt that would have otherwise been eligible for recovery. If it has been more than four (4)

years since the action or event that made the student eligible, the student must have filed a written application for recovery within the original four (4) year period, unless the period has been extended by another act of law.

However, no claim can be paid to any student without a social security number or taxpayer identification number.”

Note: Authority cited: Sections 94803, 94877 and 94923, Education Code. Reference: Section 94923, 94924 and 94925, Education Code.

Admissions Policies

All applicants must be at least 17 years old, and if under the age of 18 they must have parental consent. Applicants must meet in person with an American Fabrication Academy representative to mutually determine whether the program meets the needs of the applicant. Potential students must tour our educational facility and submit documentation showing they possess a high school diploma or its equivalent, GED, or pass the institution’s Ability to Benefit (ATB) test, as well as provide a valid state issued photo ID. Upon acceptance to our Essentials of Fabrication program, all applicants must complete an Enrollment Agreement, and pay the \$100.00 application fee. The balance due will be paid in monthly payments starting on the first day of class and last payment due prior to completion of the course.

Students must speak, read, and write in English, as all classes are taught in English. Applicants with a history of being convicted of or pleading guilty or no contest to a crime or other felony, will be subject to further review by American Fabrication Academy. This policy applies to enrolled and/or current students. Conviction of a felony crime while attending or awaiting classes, is grounds for termination or denial.

Student’s Right to Cancel or Withdraw

The student has the right to cancel the enrollment agreement and obtain a refund of charges paid through attendance at the first class session, or the seventh day after enrollment, whichever is later. Student applicants must write, sign and date a letter to notify the Chief Academic Officer of American Fabrication Academy that they wish to cancel their enrollment. If the notice is received by mail, it is effectively the date in which it was postmarked and mailed. The student applicant will be returned all money paid if notice of cancelation is received within this time frame.

Withdrawal Policy

A student who withdraws or is terminated from their program at American Fabrication Academy will be required to repeat any subject as required upon return and will be responsible for any costs associated with repeating the subject. Costs incurred are based on scheduled hours, not hours actually completed.

Refund Policy

Students have the right to withdraw from the Essentials of Fabrication course at any time, for any reason. Intent to withdraw must be submitted via a signed and dated written notice to the chief academic officer. Students who have completed less than 60 percent of the required 600 hours to complete the program will be issued a pro rata refund based on the hours that have been completed. No refund will be given after 60 percent of the class has been completed.

Refunds, when due, are made within 45 days (1) of the last day of attendance if written notification has been provided to the institution by the student, or (2) from the date the institution terminates the student or determines withdrawal by the student. Also, refunds, when due, are made without requiring a request from the student. Students that have paid a deposit and/or tuition and fees that cancel enrollment before class starts or within the first seven (7) business days after their scheduled start date will be refunded all funds paid or from the date the institution terminates the student or determines withdrawal by the student. American Fabrication Academy will keep the cost of any unreturned and/or used equipment and supplies.

Re-Enrollment Policy

A student who had previously withdrawn or was terminated may request to re-enroll by submitting, in writing, a request to the COO for approval. If the request is authorized, the student must sign a new Enrollment Agreement at the current tuition rate. If there is any balance of earned tuition due, said balance must be paid prior to re-enrollment unless otherwise authorized by the COO. Any updated books or supplies needed will be paid for by the student. A student who re-enrolls will receive credit for any prior payments received and subjects taken.

Federal and State Financial Aid

American Fabrication Academy does not participate in any federal or state financial aid programs at this time.

Student Loan Agreement

If a student obtains a loan from a private institution or the federal or state government, a loan guarantee agency may take action against the student, including applying any income tax refund to which the person is entitled to reduce the balance owed on the loan. The student may not be eligible for any other federal student financial aid at another institution or other government assistance until the loan is repaid. If a student obtains a loan to pay for an educational program, the student will have to repay the full amount of the loan plus interest, less any amount of any refund, and that, if the student receives federal student financial aid funds, the student is entitled to a refund of the money's not paid from federal financial aid funds.

Transferability of Credits and Credentials

NOTICE CONCERNING TRANSFERABILITY OF CREDITS AND CREDENTIALS EARNED AT OUR INSTITUTION. The transferability of credits you earn at American Fabrication Academy is at the complete discretion of an institution to which you may seek to transfer. Acceptance of the certificate you earn in Essentials of Fabrication is also at the complete discretion of the institution to which you may seek to transfer. If the certificate that you earn at this institution is not accepted at the institution to which you seek to transfer, you may be required to repeat some or all your coursework at that institution. For this reason, you should make certain that your attendance at this institution will meet your educational goals. This may include contacting an institution to which you may seek to transfer after attending American Fabrication Academy to determine if your certificate will transfer.

Acceptance of Credits/Hours

It is at the discretion of AFA if they will accept transfer credits/hours from other postsecondary institutions. The school director will review prior credits to determine if they are comparable in scope and content. Transcripts from prior institutions will need to be obtained in order to review. AFA will keep written records of previous education and if credits are accepted, the student will be promptly notified, and program adjustments will be made.

Transfer Students

American Fabrication Academy has not entered into an articulation or transfer agreement with any other college, vocational school, or university.

Satisfactory Academic/Attendance Progress Policy (SAP)

American Fabrication Academy maintains records of attendance and academics for each enrolled student. In order to graduate, completion of all 600 clock hours of the program and a 70% or “C” is mandatory. Failure to meet these benchmarks will result in denial of graduation. Students are expected to attend all scheduled hours and be on time every day. Job skills are dependent on good attendance and grades.

There are strict policies that ensure all students maintain Satisfactory Academic (70%) and Attendance Progress (SAP) towards graduation. SAP has four benchmarks: 150 hours, 300 hours, 450 hours, and 600 hours. If the student’s attendance and/or grades have dropped below the minimum standard at these benchmarks, the student will first be put on SAP Warning and be requested to meet with the Chief Academic Officer (CAO) or an office administrator to discuss what may be causing the issues, as well as solutions. This status will remain in effect until their attendance and/or grades have been made up. If the student fails to make up grades and/or attendance by the following benchmark, they will be put on SAP Probation.

When a student is put on SAP Probation, they must meet with the Chief Operating Officer (COO) to discuss why the student is failing to maintain compliance with the corrective plan and create a revised plan of action to bring grades and/or attendance up to the minimum standard. If, by the next benchmark, the student still has not reached the minimum standard of 70% and has not made up time, further disciplinary action such as suspension or termination will occur. If the student is suspended or terminated, the student has three (3) days to appeal the decision with the COO. If the appeal is approved, the student may return to class under the previous SAP Probation plan. If the student does not appeal or the appeal is denied, the student will remain suspended or terminated.

Students have a maximum time frame of one and a half times the regularly scheduled program length to complete the program. If the program is not completed within this timeframe, the student will be terminated.

Make-Up Policy

All time missed must be made up. Make-up time will take place only at the school location during operating hours, including Fridays from 8:00am to 12:00pm. Addendum: Students have three (3) weeks (12 days) to make up projects and all +make-up time must be approved by the instructor and completed prior to graduation.

Absentee/Tardy Policy

If a student will be unable to attend a future class or is absent or tardy, the student will let the school know and schedule make-up time. If a student has an unexcused absence or tardy for more than 14 consecutive calendar days, American Fabrication Academy will initiate a withdrawal from the course on the 15th day. In the instance of an unexcused tardy or absence, a verbal warning will be given to the student with a reminder that time must be made up. *There is an exception to the 14-calendar day rule if the student tests positive for Covid-19 and provides administration with a positive test or doctor's note. Absences will be excused, and the student may return once they have been quarantined for a minimum of ten days. Time will not need to be made up for Covid-19 related absences.

Leave of Absence Policy

A Leave of Absence is a temporary interruption to any student's study with the reasonable expectation that the student will return. A signed written request or email communication explaining the request, the date of the request, and the expected time they will return is required. Leave of Absence requests will be considered based upon curriculum scheduling. The student will return to another class at the same point at which the student left his old class. The school reserves the right to grant a student a Leave of Absence if the student has unforeseen circumstances and cannot contact the school in a prompt manner. If the student's Leave of Absence request is not approved or the student does not agree to the terms of the Leave of Absence, the student will have the option of continuing the program of enrollment or be considered to have withdrawn from the school.

A student requesting a Leave of Absence must understand upon return a revised completion date will be established upon class schedules.

Students from other Countries

American Fabrication Academy does not provide Visa services or vouch for student status or any associated charges.

Language Proficiency Information

Classes will be taught in the English language, at a high school proficiency level. If English is not your primary language, the institution will accept the passing score for TEST of ENGLISH LANGUAGE (TOEFL). This information can be found at www.toeflgoanywhere.org

Statement of Non-Discrimination

American Fabrication Academy will not deny admission or discriminate against currently enrolled students on the basis of race, color, religion, sex, age, disabilities, financial status, national origin, marital status, sexual orientation, or any other legally protected status in any of the school's activities. We will reasonably accommodate applicants and students with disabilities to the extent required by applicable law.

Health and Safety Plan

A copy of the Health and Safety Plan can be obtained through Human Resources.

Faculty and Staff Qualifications

Jason Saunders – Director, CEO & CFO

Jason has a bachelor's degree in biology from CSUF and has owned/operated several businesses since 2004. He has never suffered a financial loss in his business ventures and works closely with private CPAs Cieslik and Glenn to ensure financial security. He has a passion for working with people young and old, who may be misdirected or lack proper guidance to achieve their goals and dreams. He understands that not all people are offered equal opportunity or guidance in life to be successful contributing members of society. American Fabrication Academy is one of the vehicles used to fulfill this life goal. Jason's duties as Director, CEO, and CFO of American Fabrication Academy are to oversee the administration of the institution's mission and objectives. As Director, CEO, and CFO, Jason will also have direct supervision of the CAO and COO.

Luke Czaplinski - Director of Career Services and Instructor

Luke has over 27 years in the welding and fabrication industry. He is American Welding Society (AWS) certified and has 6+ years of metal fabrication teaching experience. With Luke's years of experience teaching fabrication, he has spent many hours identifying and meeting recruiters from all facets of the metal fabrication industry.

Luke served as a non-commissioned officer in the United States Marine Corps Infantry Division for 4 years and is a key component in the recruiting of veterans to be trained and placed in the career of their dreams. In addition to teaching, Luke's responsibilities include but are not limited to, assisting students in resume writing, interview prep and job search. Luke will aid each student on an individual basis to best locate job opportunities that fit the students' goals.

Marcio Umanzor - Chief Academic Officer CAO/ Instructor/VA SCO

Marcio is a master fabricator and has more than 25 years' experience in the welding and fabrication industry, also owning his own motorcycle chassis building company for several years. He is American Welding Society (AWS) certified and has 6+ years of metal fabrication teaching experience. In addition to teaching, Marcio's responsibilities include but are not limited to, creating curriculum, enforcing school compliance, as well as student orientation. He will report to the CEO and is also responsible for the supervision of faculty, development of educational programs and curricula, and implementation of American Fabrication Academy's mission, purpose, and objectives.

Robert Claro - Chief Operations Officer COO/Instructor/VA SCO

Robert is a master fabricator and has more than 23 years in the welding and fabrication industry. He was previously with the Imperial County Sheriff's Office but is now following his passion for teaching. He is American Welding Society (AWS) certified and has 4+ years of metal fabrication teaching experience. In addition to teaching, Robert's responsibilities include but are not limited to, overseeing day to day operations, equipment maintenance, as well as coordinating monthly staff meetings. He is also primarily responsible for administration of the American Fabrication Academy's business operations, finance, management, personnel, and contracting for goods, services, or property.

Ronald "Ronnie" Warkentin - Instructor

With over 25 years of experience in the fabrication and welding industry, Ronnie's background in motorsports sets him apart from the other instructors. As the previous owner of a custom truck accessories fabrication shop, Ronnie acquired specialized skills that focused on customized details. He spent several years fabricating in motorsports, circle track, off road, drag race, and road race, to name a few, until the opportunity to teach was presented. Ronnie has been an instructor for 10+ years and is passionate about sharing his knowledge and experience with his students to prepare them for amazing opportunities in the industry.

Kyle Fuquay – Instructor

A former sergeant in the United States Marine Corps, Kyle spent two tours in Afghanistan before ending his 4-year military career and starting in the motorsports industry. After receiving welding and fabrication training from Luke and Marcio, Kyle began his 6-year career in aerospace where he assembled space components for United Launch Alliance and NASA. He also spent some time working part-time from

home welding travel trailers, conducting automotive based repairs, and using his CNC plasma table to make custom signs and artwork. He was eventually promoted at work and took on the role of supervisor for the machining of aerospace components for customers including Boeing, Lockheed Martin, and Northrop Grumman. Kyle's experience and knowledge in the industry paired with his professionalism and patience is what makes him an asset to the team.

Rafael "Ralph" Alvarez - Instructor

After completing his 4-year enlistment in the United States Navy, Ralph followed his passion for motorsports and enrolled in classes at Riverside Community College where he earned his T-Ten Toyota and Lexus certificate as well as an AA in Automotive Technology. It was during this time that he learned how to weld and fabricate. After completing his education, Ralph worked for large companies such as CRST, General Electric, and Honeywell Intelligrated. With his 20+ years of valuable, real-world experience in the automotive, transportation, and railroad industries, his main goal is to share his knowledge and prepare our students for their careers after graduation.

Juan Solis - Instructor

Juan spent 5 years in the United States Navy as a Hospital Corpsman in the Infantry Unit before deciding to seek training in the welding and fabrication industry in 2015. Being instructed by Luke, Marcio, and Ronnie, Juan obtained the knowledge and skills needed to start a career in the offroad industry building Baja buggies, cages, and long travel kits for GNR Fabrication and Magnum Offroad. From there, he ventured into welding high-end stairwells, gates, and fences at Coastal Welding in Carlsbad, CA. Juan eventually started J1 Welding and Fabrication, where he provides mobile repair on trailers and vehicles, and continues to offer welding of stairwells, gates, and fences. He is dedicated to providing detailed instruction to our students to ensure they become successful in their future careers.

Gustavo Hernandez – Director of Admissions

A University of Redlands Graduate with a degree in Business, Gustavo knows that it takes hard work and dedication to be successful. He has worked as a shift lead at Starbucks, managing a team of several baristas, and as an admissions representative for 8+ years. Gustavo has spent the last few years working with the Skillbridge program at the Marine Base in Twentynine Palms and has been successful in enrolling service members into trade programs that prepare them for today's workforce.

Heather Valdez - Office Administrator/VA SCO

With her 20+ years of experience in a financial aid office setting, Heather brings a wealth of knowledge and skills to the team. She has worked for both large corporations and small businesses, assisted in Human Resource duties, and managed teams of student employees through Federal Work Study. She has been a School Certifying Official for the Veterans Administration (VA) for more than five years and has been a key player in obtaining approval from The California State Approving Agency for Veterans Education (CSAAVE) and the Council on Occupational Education (COE) for national accreditation. Her strong work ethic and problem-solving skills make her a valuable asset to the AFA team.

Silvia Monteon – Administrative Assistant

Silvia is extremely well rounded when it comes to working in an office and with students. She spent the last 6 years as a paraeducator in ABA therapy for the Corona-Norco Unified School District and did in-home ABA therapy as a certified Registered Behavior Technician. Prior to that, she worked for 10 years as administrative support for TD Laser, a toner manufacturer. She worked as a supervisor for the Orange County Public Defender's Office for 8 years before that, and mentored children after school, assisting with homework and other activities. Silvia's ability to connect with students, willingness to help with anything, and positive attitude are greatly appreciated by AFA staff and students.

Student Conduct, Probation and Dismissal Policies

American Fabrication Academy reserves the right to impose disciplinary actions including probation, suspension, or termination from the school to any student who violates the rules and regulations or consistently fails to meet passing requirements. American Fabrication Academy will discipline students for first offense with a verbal warning. Upon a second offense, the student will be given a written warning, and on the third occasion the student will be given private counseling to determine the appropriate course of action. Upon the 4th offense, withdrawal proceedings will commence.

Student Grievances

All students have the right to appeal any disciplinary, academic or attendance policies or procedures made by the school. The student has five (5) calendar days to file an appeal by the actions taken by American Fabrication Academy. The appeal will be heard by the appeal committee which consists of the instructors of the school. The appeal committee has no more than three (3) days to answer the appeal. Once a

decision has been made; it is final. In the case that a student issue is not resolved at the institutional level, students may contact the Council on Occupational Education at: 7840 Roswell Rd., Building 300, Suite 325, Atlanta, GA 30350, (800)917-2081 or www.council.org.

Learning Resources

All instruction is provided in a classroom and/or hands on lab environment. There is no onsite library available to students, however, instructors and students have access to the Corona Public Library located at 650 S. Main St Corona CA 92882, which is less than 2 miles from the school location. Students and Instructors may have access to the library outside class hours on Friday 10:00 am to 9:00 pm. The Corona Public Library will allow access to other learning resources from other institutions' collections of resources. The instructors are available before and after classes for any additional questions students may have. Students will also have access to the internet for online information access.

Student Parking

There are no parking permits or fees for students. Students must park in the designated area. Students will be shown where they can and cannot park. Students will be responsible for any/all fees, tickets and/or violations they may incur. American Fabrication Academy is not responsible for any theft, damages, or violations.

Smoking and Tobacco

Smoking is only permitted in the designated area, which is outside the workshop. This applies to cigarettes, chewing tobacco, electronic cigarettes, and vaporizers. There is absolutely no smoking in or near the classroom or workshop.

Academic Counseling

American Fabrication Academy's career services coordinator will spend time with each student developing educational and vocational plans. Instructors will be available before and after class, as well as by appointment.

Housing

American Fabrication Academy does not offer housing to any students or staff. The institution does not have dormitories under its control. The links below can serve as a helpful resource. None of the agencies listed below are affiliated with American Fabrication Academy. Applicants/ Students should use at their own risk. Housing is widely available, with prices ranging from \$400-\$2000/month depending on the size and location the student prefers.

Rental Home Resources:

www.roomster.com

www.rentcafe.com

www.apartmentlist.com

Also, readily available short-term housing located within a mile of the schools Corona location are below:

Rodeway Inn and Suites

1701 West 6th Street

Corona, CA. 92882

Best Western Corona Hotel & Suites

1900 Frontage Road

Corona, CA. 92882

If an applicant or student needs further assistance with finding housing, they can contact the office administrator.

Policies on Retention of Student Records

American Fabrication Academy shall maintain a file for each student who enrolls in the institution whether or not the student completes the educational service.

This file will contain the following documents:

1. Application, photo of government ID and copy of high school diploma or equivalent and transcripts.
2. Enrollment agreement
3. Academic records
4. VA records, if applicable.

American Fabrication Academy maintains all records required at its office located at 1781 Capital St. Suites G, H, I and 1791 Capital St. Suites G, H, I. Corona, CA 92878. In addition to permanently retaining a transcript, all pertinent student records are maintained for a period of 5 years from the student's completion or withdrawal date. For current records (records that are within a period of 5 years of completion or withdrawal date), American Fabrication Academy maintains functioning devices that can immediately reproduce exact, legible printed copies of stored records. These devices are stored and maintained at our location at 1781 Capital St. Suites G, H, I and 1791 Capital St. Suites G, H, I, Corona, CA 92878. For a record that is no longer current, American Fabrication Academy can produce exact legible copies in less than two business days. Personnel are present during business hours who know how to operate the record keeping devices and can explain the operation of the devices to any person authorized. Any authorized person including persons authorized by the Act or this chapter, or to investigate will be given immediate access to document reproduction devices for the purpose of inspecting and copying stored records, and upon request, reimburse American Fabrication Academy at a rate not to exceed .10 cents per page. All American Fabrication Academy student information and federal financial aid program information will be stored in a locked fireproof file cabinet which is located at its Corona, California location, and duplicate copies will be stored in the school's Google Cloud. In the event that American Fabrication Academy closes its business operations, all records will be maintained for a period of 10 years, and the repository will make these records immediately available for inspection and copying, without charge, except as allowed under subdivision (c)4 of this section, during normal business hours any by any entity authorized by law to inspect and copy records.

Students may request transcripts by emailing americanfabricationacademy@gmail.com.

Job Placement Assistance

American Fabrication Academy provides career placement assistance at the end of the program. Students will be assisted with resume preparation, available career or job identification, filling out applications, and interview skills.

Gainful Employment of Graduates

Graduates of the Essentials of Fabrication course will be qualified for entry level positions in the metal working industry. The Dictionary of Occupational Titles US Department of Labor describes some of these job titles as #619.361-014; #809.318-010; #819.361-010, #811.648-014, #819. 384 - 010 and other related fabrication and welding D.O.T. Codes. The standard occupational classification for these job titles and other associated titled descriptions can be found in the US Department of Labor's O*net S.O.C #51 - 4122 .00; #5 1-4121

*****This program prepares students for the American Welding Society certification test*****

- Original documents will be stored on site in locked file cabinets, behind locked doors.
- Backups of all documents will be stored on an internet-based password protected cloud service.
